I3 INTEGRATED INFORMATION FOR IOWA

Mission

Through effective integration of information with innovative redesign of business processes, I/3 will provide greater responsiveness to customers, improved productivity, increased accountability, efficient delivery of services across State Government and consistent and accurate information that Iowans want.

What is I/3 ?

I/3 is an **integrated solution**, sharing a centralized database, with all 'users'. Budget, Finance, eProcurement, Human Resources, Payroll, and Benefits are being served by the same database through **one point of entry**.

Data need only be entered or updated once, **reducing errors, time and labor**, with a common data warehouse to support reports, analysis, planning and program management. Ultimately, time and costs are shifted to **innovating, problem solving** and direct **service to customers** rather than **inputting, processing, organizing, verifying** and related "busy work" that burns through time and money.

Why Iowa Needs The I/3 System

▶ To get quick, accurate answers to questions such as...
  - How much money is owed to the state?
  - How many employees does the state have?
  - What are total compensation costs?
  - Who are the vendors and contractors doing business with the State?
▶ To increase productivity, value and return on investment
▶ To suport implementation of the Accountable Government Act
▶ To more precisely measure what Iowans are receiving for their tax dollar

Why I/3 Makes Sense in Times of Tight Budgets

Generally, organizations the size of Iowa government can still perform needed administrative tasks, even with reduced staffing, by using an enterprise resource planning system. A typical system **increases productivity** and **reduces support needs**. Redirecting staff time and materials to more critical services and business solutions **avoids additional spending of approximately 1%**, which represents about $10 million dollars a year.

I/3 USERS

All Executive Branch, Judicial Branch and Legislative Branch agencies will use all or part of the I/3 system.

PROJECT TIMELINE

Budget	CY2002-03
Finance	CY2002-03
eProcurement	CY2002-03
Data Warehouse	CY2003-05
Human Resources	CY2003-05
Payroll / Benefits	CY2003-05

Budget | Finance | eProcurement | Human Resources | Payroll | Benefits

I/3 BENEFITS

BUDGET
▶ Provide better information to manage and make choices
▶ Empower departments to more closely measure program performance and results

FINANCE
▶ Enhanced functionality, including state-wide Fixed Asset, Inventory, and Cost accounting capabilities
▶ Drill down from table summaries to detail transactions
▶ Use the same data among modules, eliminating rekeying

E-PROCUREMENT
▶ More efficient, accurate, and accountable with less paper processing, better tracking, and timely information
▶ Combined purchasing power (with full use of I/3 by all purchasing authorities) and increased vendor competition to reduce costs
▶ Better public access to business opportunities and a streamlined internal process with Vendor Self Service

DATA WAREHOUSE/REPORTING
▶ Savings in time and materials through automated electronic report distribution
▶ Single data warehouse reporting from all components of I/3
▶ Ability to generate reports at the agency or user level on demand using a web-enabled reporting tool

HUMAN RESOURCES/PAYROLL
▶ Accurate and timely processing of payroll transactions and reporting
▶ Self-service compensation and benefit information for employees and managers
▶ Human resources information readily available to state decision makers
