Total of Completed Reviews			893	641

* 242 plans were received between Feb. 7, 2000 and Dec. 31, 2000 = ~ 1/work day

Findings of Plan Reviewers

A Pro-active Approach

- plan reviewer identifies potential environmental concerns
- helps producer identify options and alternatives
- provides information on cost-share and practices

Education on Nutrient Sampling (when values differ significantly from ISU tables)

- N values from proper sampling are higher than were originally submitted in MMP

Double Application

- some fields listed by two producers (less than 3 %)
- usually large producers

Construction Permits Needed at Time of Construction

- dozens of sites
