

I am a case manager who works with individuals with intellectual disabilities and brain injuries. I have also worked with them in the direct care capacity in the past. I do not feel that the governor is being fair with the people that we serve and is actually taking the choice away from the individuals and their families. The waiver program has always been about individual rights and choices. I believe without the proper oversight that many of our individuals who we currently serve who do not have a guardian or anyone else to watch out for them could fall through the cracks and being dual diagnosed could lead to potential hospitalizations where with all of their team involved those have been staved off in the past.
