

To Whom It May Concern:

I e-mailed you the when you had your last meeting. Well since than, things haven't gotten any better. We received the packet for the four private insurances. Put when asked which insurance is going to be used by the providers that we have we have not been able to get answers. We want to know which insurance the providers we have now is going to have so we can have the same doctors, pharmacy, and hospital and other providers that we have. It is December 1 and have only until December 17 to receive all this information that we all need to know. There are 560,000 clients that are waiting for all these answers and over 20,000 care providers that are wanting to know answers. It seems like that everything has to be rush, rush and not giving enough time to get everything put in place like it should be done. The clients are the people that are going to get hurt over all this because they are not going to get the care they have been receiving and most likely not be able to go to the providers that they have been going to.
