

Thanks for listening and taking comments.

I have a question for the Governor. If your personal lines insurance agent just handed you a list of 4 names of insurance companies with no other information would you be able to pick what company was best for you and your family? These companies that you are asking us to pick from do not have their stuff together. They do not have approved vendor lists. How are we to pick what is best when we do not know what we are picking from?

I assume that you Mr. Branstad have NO ONE that receives services of this kind. I can not believe that if you would have to be using this you would be doing this.

How many people in your life time have you done direct care for? If the answer is even 1 this would not be happening.

One of the companies that you are asking us to choose from has some of the officers in jail for fraud. This is not how Iowa does business.

One of the companies has so many job listing within the state of Iowa that tells me they do not have any or enough employees within this state to be able to start doing business the first of January.
