

SUMMARY OF LEGISLATION APPROVED BY THE
SECOND REGULAR SESSION OF THE SIXTY-SEVENTH IOWA GENERAL ASSEMBLY
MEETING IN THE YEAR 1978

PREPARED BY THE IOWA LEGISLATIVE SERVICE BUREAU

This summary of legislation has been prepared for the use of legislators and other interested persons. The classifications of legislative enactments under specific subject headings and the summary descriptions are the work product of legislative staff personnel. It is recognized that the legislative enactments contained in this summary may logically fall under more than one subject heading in certain instances and perhaps differences of opinion may arise as to the summary descriptions. However, it is believed that the purpose of this compilation--that of providing interested persons with a quick reference to legislation enacted in specific areas and generally informing them of the contents of the legislation--will be served by this publication.

Legislation enacted after the May 12, 1978 recess is summarized in Appendix I, and is not included under a specific subject heading.

The various Legalizing Acts passed by the 1978 Session are not included in this summary.

The compilation also contains a list of the sections of the Code of Iowa amended or repealed during the 1978 Session.

The power to levy taxes must be expressly authorized by the General Assembly. The General Assembly may authorize the creation and dissolution of joint county-municipal corporation governments and may authorize the establishment of charters. If the home rule powers of a county and a city conflict, the home rule power of a city will prevail within its jurisdiction. The proposed constitutional amendment will be submitted to the state electorate for ratification at the 1978 general election and, if ratified, will become effective at that time.

However, if the cost of repair is less than \$500 or if emergency repairs of less than \$2,000 are needed to prevent further damage to a building and such repairs cannot reasonably be delayed in compliance with the time requirements of formal or informal bidding and contracting procedures, the board of supervisors may award a contract without advertising or giving written notice for bids and enter a statement in the minutes of the board meeting giving reasons for the need for the repairs. EDUCATION

HF 463

By Committee on Education. Makes numerous changes to the financing and administration of the area education agencies. It increases the salary limit for AEA administrators for next year to \$29,000 for AEAs with budgets of less than \$7,000,000 and \$30,000 for AEAs with budgets of \$7,000,000 or more and allows increases thereafter of a percent equal to one-half the percent of allowable growth used for the school aid formula, subject to the approval of the State Board of Public Instruction. AEAs are granted corporate status and lease-purchase authority subject to approval at a referendum if the cost exceeds \$5,000. The term "other" services is changed to "educational" services. It provides payment from the state treasury of the costs of instruction of children residing in juvenile homes, children placed by the district court from whom parental rights have been terminated, and children in state institutions, charitable institutions and licensed boarding homes who are not counted in any district's weighted enrollment. It requires AEAs to hold public hearings on their budgets and requires approval of the total amount of all AEA budgets by the State Comptroller and the State Board. It prohibits educational services funds from being expended for collective bargaining purposes. It sets the number of members of the AEA boards and the merged area boards at nine starting in 1981 and requires that the boundary lines be established by a commission of the members of the school boards in the area. It requires that special education instruction funds generated in the school years beginning in 1975, 1976, and 1977 not used by a school district be deducted from the special education funds generated for the 1978 school year on a 65 percent state aid and 35 percent property tax basis. It allows the State Board and the State Comptroller to reduce budgets for media and educational services in AEAs that are not serving nonpublic school pupils in a manner comparable to public school pupils. Materials and services to nonpublic school pupils are limited to those which cannot be diverted for religious purposes. It provides allowable growth for media services budgets and strikes the \$8.00 per pupil limit that was present. It adds \$3.00 per pupil for media resource materials. It provides for a rounding up of media budgets for all areas over a three-year period. Special education support services funds may not be used for transportation purposes. It prohibits special education instructional program funds from being used for modification of school buildings to make them more accessible to the handicapped and makes other changes clarifying the use of such funds. It restricts the growth of special education support services budgets of AEAs to the amount approved for the

preceding year plus allowable growth, except that for the 1978 school year the State Board may grant additional funds not to exceed 4.87 percent statewide and for 1979, 3 percent statewide. It changes the authority for approval of AEA programs and services from the Department to the State Board of Public Instruction. It provides for expenditure of AEA surplus fund balances to a level leaving a 6 percent surplus. (Emergency: Effective June 23, 1978.)

- HF 2137 By Committee on Education. Sets the property tax levy for operating the area schools at 20 and 1/4 cents per thousand dollars of assessed valuation in the merged area. Changes the date on which area schools must submit budgets to the State Board of Public Instruction from December 1 to May 1 and the date on which the State Board must approve or disapprove the budget from January 1 to June 1. It raises from 5 years to 10 years the period of time the 20 1/4 cents per thousand dollars of assessed valuation levy for capital improvements can be voted.
- HF 2277 By Committee on Education. Grants the board of an area school the authority to sell student-constructed buildings and the property on which the building is located by any procedure adopted by the board. Such buildings were formerly sold by bidding procedure.
- HF 2330 See Financial Institutions and Insurance. Relates to contracts for group health and life insurance for employees of the Board of Regents.
- HF 2359 By Committee on Education. Relates to school district reorganization procedures. It deletes the option of the State Board of Public Instruction to allow additional time for school districts making a good faith effort to comply with approval standards before commencing reorganization of the district. It changes the procedure for action on a reorganization petition so that the hearing does not have to be held on the same day as the final day for filing objections and allows objections to be filed up to sixty days after a petition is filed. It provides that when two or more area education agencies are discussing the formation of a school district which includes territory in more than one area education agency, the total votes of each board will be equal. It requires the AEA board to consider the wishes of property owners who reside along the boundary lines of proposed districts. It provides that for the first year of existence of a reorganized district, the board will consist of all of the resident members of the boards of the constituent districts. The Act requires that special elections for school district reorganizations be held no later than December thirty-first. It provides that the collective bargaining agreement of the district with the

largest enrollment will continue in effect until a successor agreement for the reorganized district is negotiated and the employees of the reorganized district will be included in the bargaining unit of that agreement. It also provides that if only one collective bargaining agreement is in effect, the employees of the reorganized district will be included in the bargaining unit of that agreement. It provides an optional method for electing board members. It provides that districts which jointly employ personnel for classes meet the twelve-grade requirements for school districts. It prohibits an election for the issuance of bonds for construction of new school buildings in a district until after a meeting with the boards of contiguous districts and the area education agency to discuss alternatives to the construction, including the possibility of re-organization.

HF 2390 By Committee on State Government. Makes numerous changes in the Iowa civil rights law. It allows a person claiming to be aggrieved by an unfair or discriminatory practice to commence an action for relief in the district court if a timely filed complaint has been on file with the Iowa Civil Rights Commission for at least 120 days and if the complainant requests a release from the Commission to commence the action and if the Commission issues the release. The release shall not be issued if a finding of no probable cause has been made on the complaint by a hearing officer, or a conciliation has been executed or when the Commission has served notice of hearing upon the respondent. A person receiving a release to commence an action in the district court must do so within ninety days of the release or within one year after the filing of the complaint, whichever occurs first. It clarifies the existing definition of "public accommodation" to clearly include all public agencies, local governments and tax-supported districts that offer services to the public. It also gives the Commission the express power to investigate credit practices. It further provides that it shall not be a discriminatory employment practice to discriminate on the basis of age: (1) If the person is under 18 years of age but not by law an adult; (2) In a state or federal program which serves a bona fide public purpose; or (3) In a bona fide apprenticeship employment program if the employee is over 45 years old. It also provides that a religious qualification for instructional personnel or an administrative officer serving in a supervisory capacity at a religious educational facility or institution shall be presumed to be a bona fide occupational qualification. It allows a hearing officer under the jurisdiction of the Commission to determine probable cause, and authorizes the director to bypass the conciliation, conference and

persuasion procedure after thirty days when the process is unworkable or futile. It allows the district court or the Commission to award damages to a prevailing complainant including actual damages, court costs, and reasonable attorneys' fees and allows the court to award a respondent attorney's fees and court costs if the court finds the complainant's action was frivolous. It also establishes a referral relationship between the Commission and local agencies designated by the Commission. It prohibits a complainant filing with a referral agency from filing a complaint based on the same acts with the Commission and vice versa. It allows, however, the referral of complaints from the Commission to a referral agency and from a referral agency to the Commission. A referral agency may refuse to accept a complaint referred to it by the Commission and the decision of a referral agency is subject to judicial review. It finally includes as a discriminatory practice discrimination by an educational institution on the basis of sex in any program or activity, except athletic programs which however must offer comparable opportunities. (Effective January 1, 1979.)

TRANSPORTATION--VEHICLES

HF 2216

By Committee on Transportation. Specifies new duties for the Railroad Division of the Department of Transportation to evaluate railroad trackage. It replaces the penalty provisions of the railroad laws with a uniform schedule of violations. The Act modifies the procedure to eliminate rail agency service and authorizes reduced rates for certain rail shipped products. It provides for the use of the grade crossing safety funds to construct flasher lights or gate arm signals at railroad crossings and it repeals certain sections of the railroad law.

SF 2187

By Committee on Transportation. Establishes a new chapter providing for the registration of authorized vehicle recyclers upon payment of a fee of \$35.00. It prohibits the selling, dismantling, restoring, storing, salvaging or recycling of more than 6 vehicles per year without first obtaining a license from the State Department of Transportation. It prevents registration of any vehicle if the applicant has not required registration fees for another vehicle when due. The Act excepts the junking certificate and salvage certificate of title provisions from the red title provisions, strikes the requirement that insurance companies obtain a red title for unrecovered stolen vehicles and provides for issuance of a salvage certificate of title. It provides for the issuance of a junking certificate for a vehicle junked or demolished and a salvage certificate of title for damaged vehicles which are to be rebuilt. It requires inspection by a peace officer prior to reissuing a certificate of title for a vehicle under a salvage certificate of title. The Act allows a peace officer to inspect vehicles or component parts in possession of a car dealer or an authorized vehicle recycler, and prohibits transfer of certificates of title to be used to identify another vehicle other than that for which the title was issued. The Act requires actual notice of a state's lien on a vehicle. It allows an individual to display an instruction permit or vehicle registration valid at the time of citation and thus avoid a fine for failure to possess. It appropriates \$105,000 for service of notice of the suspension of a license. It eliminates inspection of emission control devices upon transfer. The Act rewrites the designations of colored lights on traffic control devices, and specifies driving practices at stop, yield, railroad crossings and highway crossings. The Act requires replacement of all green running lights with amber, white, or yellow by January 1, 1980. The Act allows for application to the district court for a "temporary restricted permit" for travel to and from work in cases of extreme hardship after suspension or revocation of a motor vehicle license. It allows

movement of oversized loads of hay, straw or stover without the prerequisite of "emergency conditions" subject to permit. It raises the cost for licensing car lots from \$5 to \$10 and allows for temporary car lot permits for fairs.

SF 2215

By Committee on Transportation. Provides for the posting of a bond to pay for the costs of modifying a motor vehicle franchise. The Act exempts from certain tariff filing requirements motor truck operators transporting certain agricultural products. The Act provides an exemption for certain passenger services serving disabled passengers from the certification requirements for motor carriers. It extends to four years the time allowed for filing refund applications for certain motor vehicle registration fees. It eliminates the maximum contracts a contract carrier may have before being considered a motor carrier. (Effective January 1, 1979)

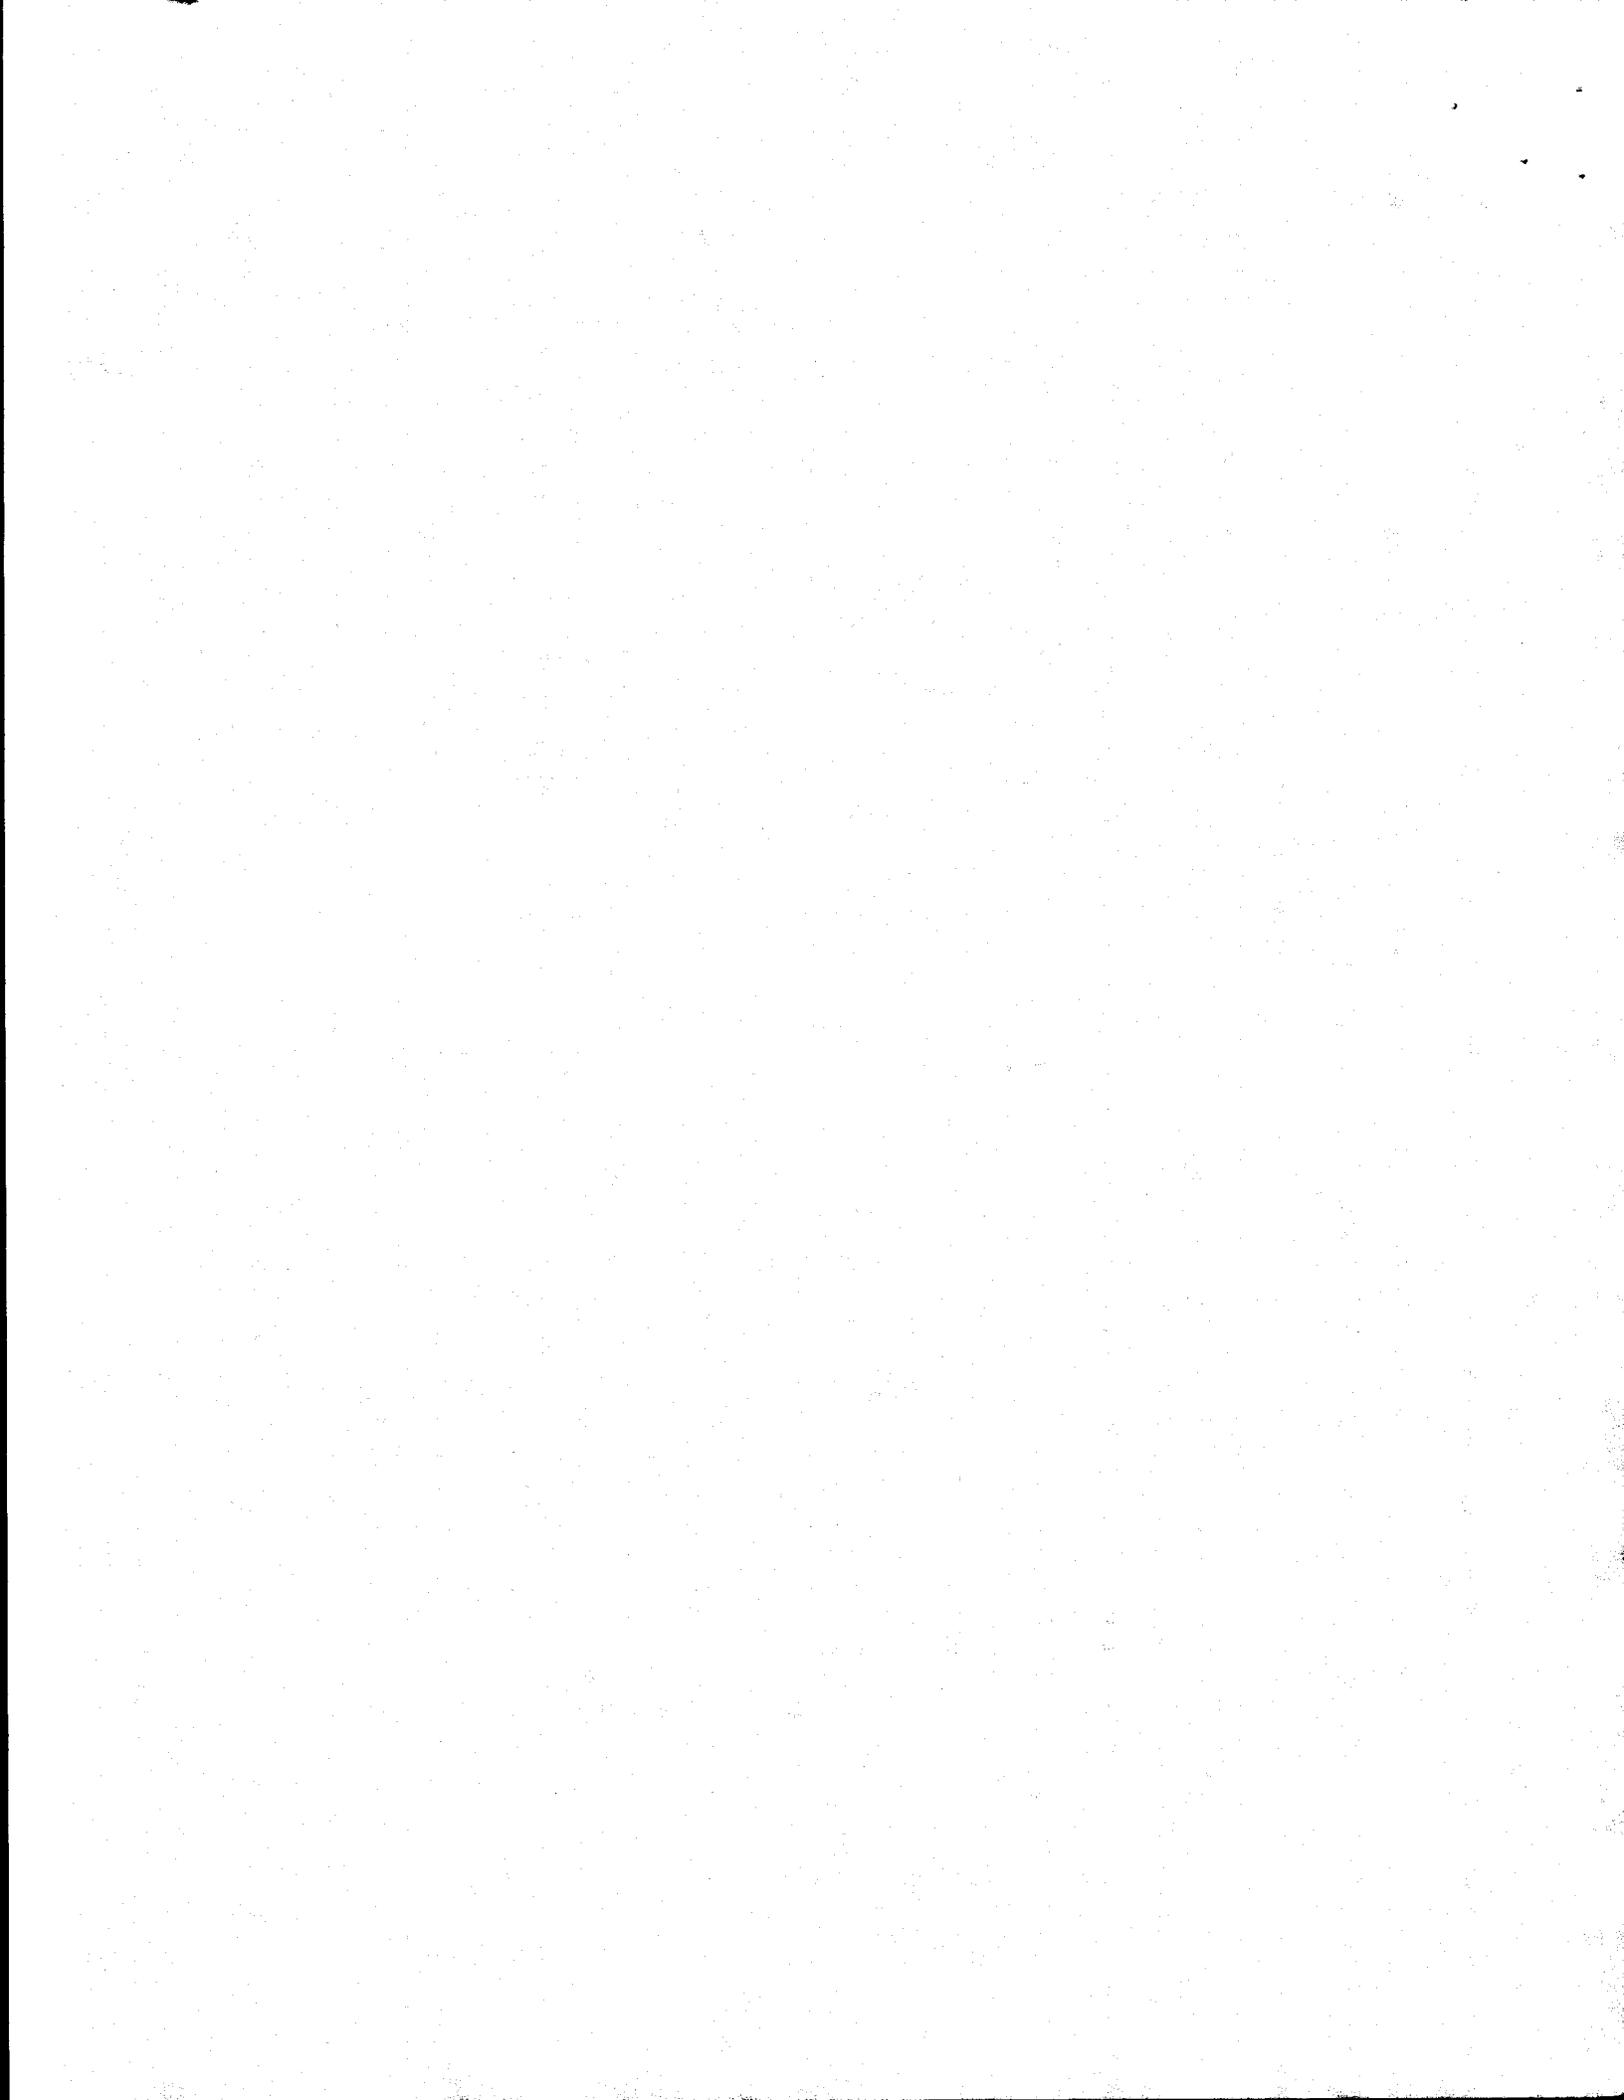

APPENDIX II

FINAL DISPOSITION OF BILLS AND RESOLUTIONS

The following is a tabulation of bills and resolutions recommended as the result of interim studies by standing committees and subcommittees of standing committees and the number of such bills and resolutions subsequently enacted by the 1978 Session of the Sixty-seventh General Assembly. The figures appearing in this tabulation deserve some qualification. It should be noted that while some interim committees did not make any legislative recommendations, work continued on the subjects the committees studied and enactments eventually resulted. In some cases policy recommendations were made by a committee which were later incorporated into legislation that was enacted. In other instances the substance of legislation recommended by a committee was enacted in an amended form in another bill. Also some of the committees were instructed to review a bill that had already passed the house of origin and the committee recommended amendments to the bill that were later adopted with modifications. The footnotes that appear after some of the figures are intended to clarify some of these situations. This tabulation does not include those committees that were formed to perform an oversight function only with no legislative recommendations anticipated.
