

141A.5 Partner notification program — HIV.

1. The department shall maintain a partner notification program for persons known to have tested positive for HIV infection.

2. In administering the program, the department shall provide for the following:

a. A person who tests positive for HIV infection shall receive post-test counseling, during which time the person shall be encouraged to refer for counseling and HIV testing any person with whom the person has had sexual relations or has shared drug injecting equipment.

b. The physician or other health care provider attending the person may provide to the department any relevant information provided by the person regarding any person with whom the tested person has had sexual relations or has shared drug injecting equipment.

c. (1) Devise a procedure, as a part of the partner notification program, to provide for the notification of an identifiable third party who is a sexual partner of or who shares drug injecting equipment with a person who has tested positive for HIV, by the department or a physician or physician assistant, when all of the following situations exist:

(a) A physician or physician assistant for the infected person is of the good-faith opinion that the nature of the continuing contact poses an imminent danger of HIV transmission to the third party.

(b) When the physician or physician assistant believes in good faith that the infected person, despite strong encouragement, has not and will not warn the third party and will not participate in the voluntary partner notification program.

(2) Notwithstanding [subsection 3](#), the department or a physician or physician assistant may reveal the identity of a person who has tested positive for HIV infection pursuant to [this subsection](#) only to the extent necessary to protect a third party from the direct threat of transmission. [This subsection](#) shall not be interpreted to create a duty to warn third parties of the danger of exposure to HIV through contact with a person who tests positive for HIV infection.

(3) The department shall adopt rules pursuant to [chapter 17A](#) to implement this paragraph “c”. The rules shall provide a detailed procedure by which the department or a physician or physician assistant may directly notify an endangered third party.

3. In making contact the department shall not disclose the identity of the person who provided the names of the persons to be contacted and shall protect the confidentiality of persons contacted.

4. The department may delegate its partner notification duties under [this section](#) to local health authorities unless the local authority refuses or neglects to conduct the partner notification program in a manner deemed to be effective by the department.

5. In addition to the provisions for partner notification provided under [this section](#) and notwithstanding any provision to the contrary, a county medical examiner or deputy medical examiner performing official duties pursuant to [sections 331.801 through 331.805](#) or the state medical examiner or deputy medical examiner performing official duties pursuant to [chapter 691](#), who determines through an investigation that a deceased person was infected with HIV, may notify directly, or request that the department notify, the immediate family of the deceased or any person known to have had a significant exposure from the deceased of the finding.
