IAC Ch 12, p.1

**641—12.7(730) Analytical quality control.** The number and position of control specimens tested within a batch and the number of calibrators used for each batch of specimens shall be consistent with generally accepted laboratory practice for the methodology used to conduct confirmatory testing.

- 12.7(1) Positive and negative controls shall be used in testing each batch of specimens.
- **12.7(2)** Procedures shall be implemented and documented to ensure that carryover from a positive specimen does not contaminate other subsequent specimens in that batch.
- **12.7(3)** Approved laboratories shall develop criteria for the detection and rejection of adulterated samples.
