

571—12.11(455A) Waivers of retroactivity. Normally, grant program developments completed prior to application scoring will not be approved. However, an applicant may make written request for a waiver of retroactivity to allow project elements to be considered for grant assistance. Waivers will be issued in writing by the board. Receipt of a waiver does not ensure funding, but only ensures that the project will be considered for funding along with all other applications.
