

21—68.64(192) Care and delivery of producer milk samples.

68.64(1) Immediately after a milk hauler collects a milk sample, the milk hauler shall place the sample container in a clean, refrigerated carrying case in which the temperature is kept at from 32°F to 40°F.

68.64(2) If the sample containers are packed in ice or cold water to keep the samples refrigerated, the ice or water shall cover no more than $\frac{3}{4}$ of each sample container.

68.64(3) The milk hauler shall promptly deliver the samples to the place designated by the milk purchaser.
