AMANDA Consolidation

Purpose and History

This appropriation is to the Department of Public Health (DPH) to consolidate the AMANDA system. The AMANDA database management system is used for licensing and covers a number of programs within the Department. The project is intended to consolidate five public licensing websites into a single website and provide a more modern portal. The system is used for 300,000 licenses. The DPH expects that ongoing costs of the new system will be provided for by fees collected from the issuance and renewal of licenses.

Funding

The General Assembly appropriated \$796,800 from the Technology Reinvestment Fund for FY 2020 to update the system.
