Iowa State University — Agricultural Experiment Station

Purpose

The Iowa Agriculture and Home Economics Experiment Station is a research program designed to address immediate and long-term needs of Iowans. Established at Iowa State University (ISU) in 1888, the Experiment Station fulfilled a Congressional charge for land-grant universities to develop organizations to advance science for the citizens of their states. The Dean of the College of Agriculture and Life Sciences serves as Director of the Experiment Station.

The Experiment Station is sometimes confused with the Iowa State research farms and labs, where much of its work takes place. However, the Experiment Station is not a physical location but a research program. The Experiment Station program involves many partners and connections to extension programs reaching Iowans in every county.
