IOWA DEPARTMENTAL RULES

1973

The permanent rules of general application promulgated by the state departments to January 1, 1973.

WAYNE A. FAUPEL
CODE EDITOR

PHYLLIS BARRY
ASSISTANT CODE EDITOR

PUBLISHED BY THE
STATE OF IOWA
UNDER AUTHORITY OF CHAPTER 14, CODE 1973

PREFACE

This volume is published in compliance with section 14.6(5) of the Code. The rules of the various boards and departments are arranged in alphabetical order, using the names of the departments in general use.

Not all of the rules promulgated by the state departments have been included. The law specifies "permanent" rules of "general application." (See page following.) Where rules have been omitted by the editor there is a notation indicating where such rules may be obtained.

This volume includes the rules and regulations of the departments filed with the secretary of state prior to January 1, 1973.

The Editors.

PUBLICATION OF DEPARTMENTAL RULES

Section 14.6 of the Code, subsection 5, requires the Code Editor to:

"Prepare the manuscript copy, and cause to be printed by the state superintendent of printing in each year in which a Code is published, a volume which shall contain the permanent rules and regulations of general application, promulgated by each state board, commission, bureau, division or department, other than a court, having statewide jurisdiction and authority to make such rules. The Code editor may omit from said volume all rules and regulations applying to professional and regulatory examining and licensing provisions and any rules and regulations of limited application and temporary rules. The Code editor may make reference in the volume as to where said omitted rules and regulations may be procured.

"This volume shall be known as the Iowa Departmental Rules and any rule printed therein may be cited as ... I.D.R..... giving the year of publication and the page where the particular rule, by number, may be found.

* * *

"The Code editor may provide cumulative, semiannual supplements for insertion in the latest published volume and a place shall be provided in the binding of said volume for insertion of such supplements."

Supplements to the Iowa Departmental Rules are published, as authorized by statute, usually on January 1 and July 1 of each year.

No charge is generally made for these supplements, however, anyone desiring a copy should first contact the Superintendent of Printing, Statehouse, Des Moines, Iowa.

TABLE OF CONTENTS

IOWA

DEPARTMENTAL RULES

1973

ACCOUNTANCY BOARD

CHAPTER 1
ANNUAL REGISTRATION

1.1(116) Fees. Registration fees, payable annually in December, shall be:

For each certified public accountant or public accountant in practice, ten dollars.

For each certified public accountant or public accountant not in practice, five dollars.

For each firm, assumed, associate or corporate name, five dollars.

For applicants who qualify and are registered after July 1 of any year, the fee for the remainder of that year shall be one-half of the annual fee.

1.2(116) Individuals. Any person desiring to engage in the public practice of accountancy in the state of Iowa must secure from the board of accountancy a certificate to practice before entering upon such practice. The certificate shall be good through December 31 of the year in which issued. Thereafter, in December of each year, each practitioner must secure an authorization to practice during the immediately ensuing year.

Any person holding a valid and unrevoked certificate as a certified public accountant granted under the laws of this state will be entitled to registration with this board to engage in the practice of public accountancy as a "Certified Public Accountant"; and may use the abbreviation "C. P. A." in connection with his name. Any person holding a valid and unrevoked certificate as a public accountant granted under the laws of this state will be entitled to registration with this board to engage in the practice of public accountancy as a "Public Accountant" under that designation and no other.

A certificate to practice shall be issued only to the holder of a certificate as certified public accountant (or as public accountant), issued by this state, and only after the applicant has filed with the board a declaration of his intention to practice, together with the annual fees required by law, and has filed with the auditor of state his bond in the sum of $5,000.

Failure to secure a certificate to practice in any year shall not disqualify a person previously registered from securing a certificate to practice in a future year, provided such person has paid to the board of accountancy the sum of five dollars for each full year during the time he has not been in practice.

1.3(116) Partnerships. Any partnership practicing accountancy in this state may use the designation of and practice as certified public accountants under a firm name, only if it fulfills the following requirements:

1. All partners holding a valid and unrevoked certificate as a certified public accountant, or an equivalent thereof, issued under the laws of any state or territory of the United States or the District of Columbia, or one issued by the governmental authority of a foreign nation; and

2. All partners resident in each office of the firm, wherever located, which undertakes to practice accountancy in Iowa are the holders of certificates as certified public accountants granted under the laws of this state and have received certificates to practice from the Iowa board of accountancy; and

3. All partners, wherever located, having supervisory or other direct responsibility for audits and reports issued by such offices described in paragraph 2 above are the holders of certificates as certified public accountants granted under the laws of this state and have certificates to practice from the Iowa board of accountancy.

Any partnership may use the designation of and practice as public accountants under a firm name in this state, only if all the members of such partnership are duly registered as public accountants or certified public accountants, and have received certificates to practice as such from the Iowa board of accountancy.

1.4(116) Firm, associate, assumed or corporate names. All practitioners, who, in connection with the practice of accountancy, make use of a firm, associate, assumed or corporate

name, shall register the same at the time of making application for registration, but certificates to practice shall be issued only in the names of individuals, and only firms whose members are all certified public accountants shall use such designation in connection with the use of such firm names, provided, however, that hereafter no corporation shall be allowed to practice public accounting in this state unless incorporated therefor prior to April 13, 1929.

Partnership, firm, assumed or associate names shall be registered only when all members thereof are holders of certificates as certified public accountants or as public accountants issued by the Iowa board of accountancy.

No firm, assumed, associate or corporate name shall include the name of any individual not interested in the ownership of the firm, except that in the case of the purchase of a going practice from a predecessor firm the purchaser shall have the right to continue the use of the predecessor firm name as provided in the contract of purchase; and no firm, associate, assumed or corporate name shall be registered under the designation "Certified Public Accountants" unless all of the individuals whose names are included in such firm, associate, assumed or corporate name are or have been the holders of certificates as certified public accountants; provided, however, that nothing in this section shall be construed to prohibit the use of any firm, associate, assumed or corporate name established prior to April 6, 1929.

[Filed before July 4, 1952; amended December 15, 1958]

CHAPTER 2
EXAMINATIONS

2.1(116) Qualifications of applicants. In order to be eligible to take the examination for a certificate as a certified public accountant, an applicant must:

1. Be over 21 years of age, and
2. Be a resident of the state of Iowa, and
3. Be a citizen of the United States or have duly declared his or her intention of becoming such citizen, and
4. Be of good moral character, and
5. Be a graduate of a high school having at least a four-year course of study or, in the opinion of the board, have an equivalent education or pass a preliminary examination to be given by the board at least 30 days before the regular examination, and
6. Be a graduate of a college or university commerce course with a major in accounting and have had at least one year's experience as a staff accountant in the employ of a practitioner entitled to registration by the Iowa board of accountancy.

The applicant's claim to college or university credits must be confirmed by an official transcript of credits issued by the institution in question. To establish a major in accounting, the applicant's transcript(s) must reveal a minimum of 18 semester hours (or its equivalent in quarter hours) in accounting courses in advance of the elementary year course. In recognizing college and university credits, the Iowa board of accountancy adheres to the standards on which recognition of such credits would be granted by the institutions of higher learning under the jurisdiction of the Iowa state board of regents. Credit obtained for work done in business colleges, in correspondence schools, in "extension universities" or in comparable organizations (all of which are characteristically operated for profit) is not "college or university credit".

In lieu of the college or university course and the one year's experience set forth above, the applicant may substitute three years' continuous practical experience as a public accountant or as a staff accountant, or three years' continuous employment as a field examiner under a revenue agent in charge of the income tax bureau of the treasury department of the United States, or as a field examiner in the auditor's, banking or insurance departments of the state of Iowa.

2.2(116) Time and place for filing applications. Each candidate must file with the secretary of the board a written application on a form which will be furnished by the secretary on request. The application must be filed not less than 45 days prior to the date set for examination and must be accompanied by a certified check, postoffice money order or bank draft for the required examination fee.

2.3(116) Examination fee. The statutory examination fee is $25. If the applicant is conditioned on account of failure in one or more subjects, as provided in section 16, he may have four opportunities to complete his examination in the failed subject(s) without further payment of fee except that he will be required to pay any additional expense which is occasioned solely by his reexamination in the failed subject(s). In no case shall the examination fee be refunded, unless, in the discretion of the board, the applicant shall be deemed ineligible for the examination.

2.4(116) Time and place and notice of examinations. Examinations will be held at least once each year in May or November, or both, at the discretion of the board. Notice of the time and place of the examination will be advertised by the board for not less than three consecutive days in each of three daily newspapers published in the state of Iowa, the last publication to be not less than 60 days prior to such examination. Similar notice will be mailed to each candidate whose application to take the examination shall have been filed with the board and approved by a majority of the members thereof.

2.5(116) Subjects and requirements. Examinations will be held in the following subjects: (1) Theory of accounts, (2) practical accounting, (3) auditing, (4) commercial law,

(5) taxation and (6) general commercial knowledge. In the several sessions of the examination, these subjects may be combined in any manner deemed proper by the board. The time required for the entire examination will ordinarily be two and one-half days, unless otherwise prescribed by the board, with one-half day devoted to each of the major subjects, theory of accounts, auditing and commercial law, and two half-days devoted to the major subject, practical accounting. If the candidate passes either the examination in practical accounting, or any two of the examinations in theory of accounts, auditing or commercial law, and has grades of not less than 50 in the failed subjects, he may be conditioned and may complete his examination in the failed subject or subjects at any one or all of the next four succeeding examinations. If he is successful in passing the examination in the failed subject(s) at either of the subsequent examinations indicated, he shall be deemed to have passed the entire examination and shall be entitled to receive the certificate. If the candidate fails to remove his condition in the specified time, his credits shall lapse and he shall be required to sit for the examination in all subjects at his next examination thereafter.

2.6(116) Conduct of examinations. Examinations may be conducted in co-operation with the American Institute of Accountants or set independently by the Iowa board of accountancy. When examinations are conducted in co-operation with the American Institute of Accountants, they will be held simultaneously with those held in other states co-operating with the institute.

Each candidate will receive from the secretary (or from his representative) a numbered identification card and envelope. Before commencing his examination, the candidate will sign his name and indicate his address on this card which will then be sealed in the envelope and returned to the examiner in charge. Thereafter, the candidate will be known in the examination by his identification number and he shall place this number on every sheet containing computations for or answers to the examination questions. Under no circumstance shall a candidate place his name, initials or any identifying mark other than his assigned number on any of his examination papers. Failure to comply with this rule shall be deemed misconduct sufficient for rejecting the candidate's papers.

If any candidate shall bring into the examination room any books, printed or written matter of a character tending to assist the applicant, or shall exchange any information or assistance with another applicant, any such action will be considered misconduct and shall be sufficient cause for rejecting his papers.

All supplies necessary for the examination will be furnished by the board and, after use, shall remain the property of the board. Answers in all examinations must be presented on blanks furnished by the board and must be completed within the time allotted for each paper by the board.

All examinations shall be in writing. The writing may be in ink or in pencil and must be legible. The board will not be responsible for the misconstruing of any writing which may be difficult to decipher.

The examination questions are the property of the board, but may be retained by the candidate with the board's permission.

The secretary will communicate in writing to each candidate the decisions reached by the board in his case, and shall state the grade received by the candidate on each paper or subject. In no event will any information concerning a candidate's answers be given to anyone other than the candidate himself nor will any of the candidate's papers be accessible for inspection at any time or by any persons except members of the board.

Three years after an examination the answers will be destroyed in a manner determined by a majority of the board.

2.7(116) Certificates. A certificate shall be issued only after a candidate's examination performance has received the approval of this board through the affirmative votes of a majority of its members.

[Filed before July 4, 1952; amended June 29, 1959]

CHAPTER 3
REGISTRATION OF FOREIGN CERTIFICATES

3.1(116) Qualification for issuance. The board is empowered to register the holders of unrevoked certified public accountants' certificates granted by other states or of equivalent certificates granted by the recognized authority of foreign countries, provided:

1. That the applicant is a citizen of the United States or has declared his or her intention of becoming such.

2. That the applicant holds a valid and unrevoked certificate as a certified public accountant or an equivalent thereof, issued under the laws of any state or territory of the United States or the District of Columbia, or one issued by the governmental authority of a foreign nation (hereinafter called state), showing that the holder thereof has complied with the laws of such state.

3. That the requirements for a certificate as a certified public accountant or its equivalent in the state which has granted it to the applicant are, in the opinion of the board, equivalent to those established by the laws of Iowa and the rules of this board for the issuance of a certificate as a certified public accountant.

4. That the applicant received his certificate as a certified public accountant or its equivalent of the state with which reciprocity is requested, as a result of a regular written examination held within said state, or

5. That the applicant shall have been in continuous practice thereunder for at least seven years prior to the date of application, and

6. That the state issuing the original certificate extends similar privileges to certified public accountants of Iowa and on the same terms.

3.2(116) Applications for registration certificates. Each application for a registration certificate must be made on an official form to be furnished by the board on request, and must be accompanied by:

1. Official or certified copies of the laws of the state in which the applicant obtained his certificate as a certified public accountant, and of the rules of the board of examiners of such state, in effect both at the time he took the examination and at the date of application.

2. An official statement from the board of examiners of such state to the effect that the applicant's certificate is in full force and effect and unrevoked, and that he is in good standing.

3. An official statement from the board of examiners of such state that such board extends similar privileges to certified public accountants of Iowa and on the same terms.

4. A certified check, post-office money order or bank draft for the required fee of $25.

Each application will be considered on its merits. The board specifically reserves the right to dispose of any application in such manner as, in its judgment, is warranted by the evidence, in the given case. In the event that an application is denied, the entire fee of $25 will be refunded by the board to the applicant.

[Filed November 19, 1954]

CHAPTER 4
TEMPORARY ACCOUNTING ENGAGEMENTS

4.1(116) Nonregistered certified public accountants. The holder of a certified public accountant's certificate, granted by another state, who has neither office nor legal address in the state of Iowa, may practice in this state in connection with temporary engagements incident to his professional practice in the state of his domicile, provided he shall file, at least five days before commencing work for his client, with the board of accountancy and with the auditor of state the written appointment of a registered practitioner of this state, accompanied by a power of attorney, upon whom legal service may be had in all matters which may arise from such temporary professional accounting engagements, to act as his agent. The appointment of an agent may be temporary to cover a single engagement, in which case the application must state the name and address of the client for whom work is to be done, or the appointment may be made permanent by so designating in the application. If a permanent agent is appointed, the appointee must advise both the board and the auditor of state, in writing, at the time each assignment is begun, of the name and address of the client and the name and address of such permanent agent.

[Filed before July 4, 1952]

CHAPTER 5
REVOCATION OR SUSPENSION OF CERTIFICATES AND REGISTRATIONS

5.1(116) Grounds for revocation. The certificate of any certified public accountant or public accountant, issued by the state of Iowa, shall be revoked and any certificate to practice shall be canceled if the holder or registrant:

1. Shall be convicted of a felony, or

2. Shall be convicted of any lesser offense involving dishonesty or fraud, or

3. Has been principal or accessory to the issuance or certification of false or fraudulent financial or related statements, or

4. Has obtained registration and a certificate to practice or either by means of false statements or misrepresentation.

5.2(116) Grounds for suspension. The certificate of any certified public accountant or public accountant or any certificate to practice issued by the state of Iowa may be suspended upon proof that the holder thereof has been guilty of unprofessional or unethical conduct in connection with the practice of accountancy. Such suspension shall be for such period of time not exceeding one year, as in the discretion of the board shall be deemed appropriate.

5.3(116) Hearings. Written notice of the cause of such contemplated action and bill of particulars thereof, and the time and place for the hearing thereon, will be mailed to the holder of such certificate or to such registrant at his or her last known address at least 20 days prior to the date fixed for such hearing.

The board may adjourn such hearing from time to time, upon the request of the party charged, for the purpose of a fair hearing and the certificate holder shall have the right to be represented by counsel.

All hearings, as herein provided, shall be before the full board and a two-thirds vote of the members thereof shall be required before any cancellation, revocation or suspension shall be ordered.

5.4(116) Failure to pay annual fees. The failure to pay any of the annual fees herein provided on or before December 31 of each year shall result in the automatic cancellation of the certificate to practice and may be cause for the suspension of the certificate held by any certified public accountant or public accountant. The certificate to practice so canceled and the certified public accountant or public accountant certificate so suspended shall not be reinstated until all fees provided by law have been paid together with the amount of such default or arrears.

[Filed before July 4, 1952]

CHAPTER 6
RULES OF PROFESSIONAL CONDUCT

6.1(116) Rules of professional conduct.

6.1(1) The preparation and certification of exhibits, statements, schedules or other forms of accountancy work containing an essential misstatement of fact or omission therefrom of such a fact as would amount to an essential misstatement or a failure to put prospective investors or creditors on notice in respect of an essential or material fact not specifically shown in the statements themselves shall be cause for such disciplinary action as the board of accountancy may impose under the provisions of law upon proper presentation of proof that such misstatement was either willful or the result of such gross negligence as to be inexcusable.

6.1(2) No practitioner shall certify to any statements, accounts, exhibits, schedules or other results of accounting engagements which have not been verified entirely under his own supervision or that of a member of his firm or staff or that of a practitioner duly registered with the Iowa board of accountancy or with a similar board in another state or in a foreign country.

6.1(3) No registered practitioner shall render or offer to render professional service, the fee for which shall be contingent upon his findings and the results thereof, except such income tax work as is permitted by the committee on enrollment and disbarment of the treasury department on a contingent fee basis.

6.1(4) Competitive bidding is deemed to be detrimental to the interests of the public and the accounting profession. No registered practitioner shall at any time knowingly, directly or indirectly, enter into bidding for any type of professional service whatsoever, in competition with other accountants. Competitive bidding is hereby defined as bidding for work on any basis in competition with other accountants.

6.1(5) No practitioner, while duly registered to practice, shall engage in any business or occupation conjointly with that of a public accountant which in the opinion of the board of accountancy is incompatible or inconsistent therewith.

6.1(6) No duly registered practitioner shall directly or indirectly allow or agree to allow a commission, brokerage or other participation by the laity in the fees or profits of his professional work, nor shall he accept directly or indirectly from the laity any commission, brokerage or other participation for professional or commercial business turned over to others as an incident of his services to clients.

6.1(7) No practitioner shall allow any person to practice accountancy in his name who is not a practitioner duly registered with the board of accountancy or who is not in his employ on a regular compensation.

No practitioner shall operate any branch office unless he shall have in charge of such branch office a duly registered practitioner, resident of the community wherein such branch office is located.

6.1(8) No practitioner duly registered with the board of accountancy shall directly or indirectly solicit the clients or encroach upon the business of another registered practitioner, but it is the right of any practitioner to give proper service and advice to those asking such service or advice.

6.1(9) No practitioner shall directly or indirectly offer employment to an employee of a fellow practitioner duly registered with the board of accountancy without first informing said fellow practitioner of his intent. This rule shall not be construed to prevent negotiations with any one who of his own initiative or in response to public advertisement shall apply to such registered practitioner for employment.

6.1(10) No registered practitioner shall advertise his or her professional attainments or service through the mails, in the public prints, by circular letters or by other written word except that a practitioner may cause to be published in the public prints what is technically known as a card. A card is hereby defined as an advertisement of the name, title (such as C. P. A. or public accountant), class of service and address of the advertiser, without any further qualifying word or letters, or in the case of announcement of change of address or personnel of firm, the plain statement of the fact for the publishing of which the announcement purports to be made. Cards permitted by this rule when appearing in newspapers shall not exceed two columns in width and three inches in depth; when appearing in magazines, directories and similar publications, cards shall not exceed one-fourth page in size. This rule shall not be construed to inhibit the proper and professional dissemination of impersonal information or the properly restricted circulation of firm bulletins containing staff personnel and professional information.

Nothing in this rule or in 6.1(8) shall be construed to prohibit the making in the public press or through the mails (or both) of a single announcement, otherwise conforming to the rules of the board, of an individual's or firm's initial opening of a practice office in a city or town.

6.1(11) The mailing by registered practitioners of circulars, letters, pamphlets or other printed or written matter to persons not clients of such registered practitioners which contain no direct solicitation of employment but which do include the name and a description of the practice and address of such registered practitioner, or the distribution to persons not clients of the registered practitioner, of circulars or pamphlets advertising any business, educational or social institution or organization, which circular or pamphlet contains

a card or advertisement of the practice of such registered practitioner, shall be construed as advertising under this rule.

6.1(12) No practitioner duly registered with the board of accountancy shall use any letters as the abbreviation of any words constituting a title or description of accountancy qualifications in conjunction with his name except the abbreviation C.P.A. which may be used only by certified public accountants.

6.1(13) A registered practitioner shall not permit his name to be associated with statements purporting to show financial position or results of operations in such a manner as to imply that he is acting as an independent public accountant unless he shall: (*a*) Express an unqualified opinion, or (*b*) express a qualified opinion, or (*c*) disclaim an opinion on the statements taken as a whole and indicate clearly his reasons therefor, or (*d*) when unaudited financial statements are presented on his stationery without his comments, disclose prominently on each page of the financial statements that they were not audited.

[Filed July 4, 1951; amended November 19, 1954, January 17, 1956, August 11, 1958, June 1, 1959]

ADJUTANT GENERAL

CHAPTER 1
FORMS FOR MILITARY PROCESS

1.1(29B) *The following forms are prescribed* by the adjutant general of Iowa pursuant to the provisions of chapter 29B of the Code and shall be used by all military courts in the issuance of all process, including writs and warrants necessary and proper to carry into full effect the powers vested in such courts. Such process may be directed to appropriate military personnel, the sheriff of any county or any other peace officer of the state. It shall be the duty of all persons to whom such process may be so directed to execute the same and make return of their acts thereunder according to the requirements of the same.

The keepers and wardens of all city or county jails and of all other jails, penitentiaries or prisons, designated by the governor or the adjutant general of the state, shall receive the bodies of persons committed by such process of a military court and confine them in the manner provided by law for civilian offenders.

These rules are intended to implement chapter 29B of the Code.

[Filed August 6, 1963; amended November 27, 1965]

AGRICULTURE DEPARTMENT

ANIMAL INDUSTRY DIVISION

CHAPTER 1
LIVESTOCK DISEASES

1.1(163) Whenever any person or persons who shall have knowledge of the existence of any infectious or contagious disease, as defined by section 163.2, such disease affecting the animals within the state or resulting in exposure thereto, which may prove detrimental to the health of the animals within the state; it shall be the duty of such person or persons to report the same in writing to the Chief, Division of Animal Industry, State Capitol Building, Des Moines, Iowa 50319 or to his authorized representative, who shall then take such action as deemed necessary, for the suppression and prevention of such disease.

[Filed March 12, 1962]

1.2(163) Whenever the chief of division of animal industry shall have knowledge of an outbreak of any contagious, infectious or communicable disease among domestic animals in the state, he shall take such action as he deems necessary for the prevention and suppression of such disease, and is authorized to establish, enforce and maintain such quarantine regulations as he may deem necessary and for such purpose is authorized and empowered to call to his assistance any peace officer to aid him in the prosecution and performance of his duties.

1.3(163) Whenever notice is given to the trustees of a township or to a local board of health that animals are suspected of being affected with or having been exposed to any contagious, infectious or communicable disease, they may impose

such restrictions as deemed necessary to prevent the spread of the disease. It shall be the duty of such township trustees or local boards to immediately notify the chief of division of animal industry.

1.4(163) An animal must be considered as "exposed" when it has stood in a stable with, or been in contact with, any animal known to be affected with a contagious, infectious or transmissible disease; or if placed in a stable, yard or other enclosure where such diseased animal or animals have been kept unless such stable, yard or other enclosure has been thoroughly cleaned and disinfected after containing animals so affected.

1.5(163) No attenuated or live culture vaccine or virus shall be sold or offered for sale at retail except to a licensed veterinarian of this state, nor shall it be administered to any livestock or poultry except by a licensed veterinarian of the state of Iowa. This does not apply to the sale of and administration of virulent hog-cholera virus when sold to and administered by valid permit holders for its use on hogs owned by themselves on their own premises.

1.6(163) No person owning or having the care or custody of any animal affected with glanders or farcy, or which there is reason to believe is affected with said disease, shall lead, drive or permit such animal to go on or over any public grounds, unenclosed lands, street, road, public highway, lane or alley; or permit such animal to drink at any public watering trough, pail or spring, or keep such diseased animal in any enclosure in or from which such diseased animal may come in contact with, or in proximity to, any animal not affected with such disease.

1.7(163) Whenever any animal affected with glanders dies or is destroyed the carcass of such animal shall be burned immediately.

As glanders is transmissible to human beings great care must be exercised in handling diseased animals or carcasses.

1.8(163) It shall be the duty of the chief of division of animal industry to maintain quarantine on all animals affected with glanders until such animals have been destroyed by consent of the owner or otherwise, and carcasses disposed of in accordance with 1.7(163) and the premises where the same have been kept thoroughly cleaned and disinfected.

1.9(163) In suspected cases of glanders and farcy the most efficient field test is the intrapalpebral mallein test, and as valuable aids to diagnosis the mallein Strauss' agglutination and precipitation tests shall be recognized.

1.10(163) Upon the appearance of an outbreak of blackleg on any premises all calves and yearlings on the premises should be promptly immunized. All carcasses of animals dead of blackleg must be burned intact without removal of the hide. Such carcasses may be disposed of by removal within 24 hours by the operator of a regularly licensed rendering plant or his employees. In the event that the owner of any animal dead from blackleg neglects or refuses to make such disposition of the carcass or carcasses as indicated above, then in such cases the disposal shall be handled in accordance with 1.115(163).

1.11(163) It shall be the duty of any city or local board of health or township trustees, whenever notice is given of animals being affected with rabies, glanders, scabies, hog cholera or any contagious or infectious disease or having been exposed to the same, to promptly notify the chief of division of animal industry.

1.12(163) Whenever rabies is known to exist in any community it shall be the duty of all owners of dogs or other exposed animals to immediately confine such dogs or animals securely to prevent them from spreading the infection should they develop the disease.

1.13(163) When quarantine is established in any community on account of the existence of rabies all dogs not confined or muzzled shall be promptly destroyed.

1.14(163) Whenever the chief of division of animal industry shall have knowledge of any horses, cattle, sheep or swine affected with scabies or mange it shall be his duty to place such animals in quarantine and require owners to dip such animals at such intervals and in such dips as the case may require.

1.15(163) The secretary of agriculture hereby recommends that all private and farm premises shall be cleaned up between April 15 and May 15 of each year by removing all litter, manure, cobs and other waste accumulations; such products being spread upon the land as fertilizer or burned, that the health of the people and the livestock may be protected from any contagion or infection that may have existed on the premises. On any premises where any infectious or communicable diseases may have been known to exist, a thorough disinfection shall be required after cleaning.

1.15(1) All municipal officers, township trustees, county agents, inspector of the bureau of animal industry, physicians and veterinarians in Iowa are requested to use their influence in advising and assisting the people in carrying out the provisions of this rule.

1.15(2) Barns, stables, hog and poultry houses: First, sweep ceilings, walls and floors removing all cobwebs, dust and litter; then clean out all manure, litter, hay and fodder from mangers and floors, scraping all permanent feed boxes, mangers, walls and floors. Finally, thoroughly spray ceilings, walls, partitions, feed boxes and mangers with a three percent solution of compound cresol U.S.P.

1.15(3) Pens and yards: Remove all manure, litter, cobs and other waste material; then thoroughly spray with a three percent solution of compound cresol U.S.P. and scatter lime over floors and yards.

1.16(163) It shall be the duty of the chief of division of animal industry to supervise the disinfection of all buildings, stalls and pens at the state fairgrounds just prior to the opening of such fair and to supervise the disinfecting daily of hog pens and such other enclosures as he may deem necessary.

1.17(163) It shall be the duty of all secretaries of all county fairs or exhibitions of livestock in the state of Iowa, excepting the Iowa state fair, to supervise the disinfecting of all buildings, stalls and pens prior to the opening of such county fair or exhibition of livestock and to disinfect hog pens and all such enclosures as he may deem necessary, daily during such fairs and exhibitions.

1.18(163) All cattle and swine presented for exhibition at the Iowa state fair, or any fair or exhibition within the state of Iowa, will be considered under quarantine and not eligible for showing until the owner or agent presents the proper health certificate stating the animals comply with the following rules. Official health certificates must be presented to and approved by the veterinary inspector in charge of the fair or exhibition before time of showing.

1.19(163) All female cattle and bulls shall be identified as originating from herds, all animals of which were negative to the last tuberculin test and applied within one year. If such cattle are not of this classification, they shall have proved negative to a tuberculin test applied within 60 days prior to the opening date of such fair or exhibition before time of showing.

1.19(1) All breeding and dairy cattle over six months of age must have passed a negative test for Bang's disease (brucellosis) within 60 days prior to the opening date of the fair, except such cattle as originate in herds designated and certified by the proper livestock sanitary authorities of the state of origin as Bang's disease (brucellosis) accredited herds. The blood samples must have been drawn by a licensed accredited veterinarian and tested by an approved laboratory and certified to by the livestock sanitary official of the state of origin.

1.19(2) Steers need not be tested but must be accompanied by a health certificate showing them to be free from symptoms of infectious and contagious diseases as determined by a clinical inspection.

1.19(3) *Vaccinates.* Calves vaccinated against Bang's disease (brucellosis) between the ages of four and eight months with brucella-abortus vaccine strain number 19 and were negative to an agglutination test within 20 days prior to date of vaccination, will be accepted without additional test up to 38 months of age, provided said vaccination was applied and blood sample drawn by a licensed accredited veterinarian and properly reported by him. The agglutination test on these blood samples must have been made by a recognized laboratory.

a. Calves vaccinated against Bang's disease (brucellosis) between the ages of four and eight months with brucella-abortus vaccine strain number 19 and without the benefit of a pretest will be accepted without additional test up to 24 months following date of vaccination, provided said vaccination was applied by a licensed accredited veterinarian and properly identified and reported by him.

b. All such cattle vaccinated after July 4, 1947, must be identified with a regulation tattoo mark.

1.20(163) All swine must be accompanied by a certificate showing that they have been immunized with anti-hog-cholera serum and hog-cholera virus not less than 21 days or when serum alone is used not more than 15 days prior to the opening date of such fair or exhibition.

Swine accompanied by a health certificate stating that they have been vaccinated by a licensed graduate veterinarian with any of the vaccines recognized by the Chief, U.S. Bureau of Animal Industry, Washington, D. C., for the prevention of hog cholera, not less than 21 days nor more than 12 months will be eligible to enter any fair or exhibition.

1.21(163) All railroad and transportation companies are hereby required to provide for proper drainage of all stockyards, pens, alleyways and chutes, and to clean and disinfect the same between April 15 and May 15 of each year and at such other times as may be deemed necessary. All expense incurred for the disinfecting and supervision of same must be paid by the railroad company. The chief of the division of animal industry shall enforce this rule.

1.22(163) It is hereby ordered by the state of Iowa, secretary of agriculture, that all cars or vehicles that have been used for conveying any animal or animals that have been found to have suffered or are suffering from any contagious or infectious diseases must be cleaned and disinfected thoroughly before leaving the yards where such animal or animals have been unloaded within the state of Iowa.

1.23(163) All stock cars and trucks used for hauling livestock (cattle, horses, sheep and swine) for feeding, breeding or stock purposes into the state of Iowa must be cleaned and disinfected before such shipments of livestock are loaded.

1.24(163) The term "quarantine" shall be construed to mean the perfect isolation of all diseased or suspected animals from contact with other animals as well as the exclusion of other animals

from yards, stables, enclosures or grounds where suspected or diseased animals are or have been kept.

1.25(163) The department of agriculture hereby authorizes and directs the chief of division of animal industry to co-operate with the bureau of animal industry, United States department of agriculture, in all regulations for the prevention, control and eradication of contagious and infectious diseases among domestic animals in the state of Iowa.

[Filed June 3, 1955; amended March 12, 1962]

1.26(163) Reserved for future use.

INTRASTATE MOVEMENT OF LIVESTOCK

1.27(163) General. All places where livestock is assembled, either bought or sold for purposes other than immediate slaughter, whether by private sale or public auction, when not under federal supervision must be under state supervision.

1.27(1) The management of all livestock auction markets shall make application for, and obtain a permit from the department to conduct such sales.

1.27(2) Before movement, the livestock shall comply with requirements as set forth below.

1.27(3) Livestock imported for resale shall meet all health requirements governing their admission into the state as set forth in chapter 3 of the rules of the agriculture department.

1.28(163) Veterinary inspection.

1.28(1) All livestock markets shall be under the general supervision of the Chief, Division of Animal Industry, Des Moines, Iowa 50319, and the direct supervision of the approved veterinary inspector. State-federal approved markets shall pay veterinary inspection fees directly to the department of agriculture and the department shall reimburse the veterinary inspector. All other markets shall pay inspection fees directly to the veterinary inspector.

1.28(2) The veterinary inspector shall:

a. Examine all livestock moving through the market,

b. Prohibit the sale of any animal which in his opinion is diseased,

c. Issue quarantines when required, and

d. Supervise the cleaning and disinfection of yards following sales.

1.29(163) Swine.

1.29(1) Swine known to be exposed to any infectious or contagious disease shall not be sold at a public sale. Swine infected with rhinitis, bull nose or arthritis may be sold at the end of the hog sale to move direct to slaughter on an affidavit or may be returned to the farm of origin under quarantine for later movement to slaughter.

1.29(2) All swine consigned for sale, except when sold for immediate slaughter or for the manufacture of biological products, must meet the following requirements relative to hog-cholera vaccination:

a. Vaccinated not less than 21 days nor more than one year prior to sale with modified live virus and anti-hog-cholera serum or antibody concentrate, or

b. Vaccinated not less than 21 days nor more than six months with killed vaccine, or

c. Unvaccinated swine to be vaccinated on market premises by veterinary inspector with modified live virus and anti-hog-cholera serum or antibody concentrate and placed under 21-day quarantine on the premises of the purchaser, thereby eliminating more than one movement during the 24-hour period following vaccination.

1.29(3) Public announcement of the vaccination status of all swine shall be made prior to the sale.

1.29(4) Swine vaccinated by a licensed veterinarian must be accompanied by a certificate of vaccination.

1.29(5) Swine vaccinated by the owner must be accompanied by a notarized statement showing date of vaccination, serial number and manufacturer of vaccine and serum.

1.29(6) Swine consigned for sale and unloaded at a livestock market must meet hog-cholera vaccination requirements before leaving market whether a change of ownership occurs or not.

1.29(7) The vaccination status of all swine moving through an auction market must be acceptable to the veterinary inspector in charge.

1.29(8) Boars for immediate service and pregnant sows may be released on single treatment only, at the discretion of the veterinary inspector in charge and at no time shall a certificate of vaccination be issued on serum alone treatment.

1.29(9) Baby pigs less than 30 days of age may be moved through a livestock market without vaccination when nursing immune sows.

1.29(10) *Brucellosis.* All breeding swine four months of age or over moving through a livestock market must:

a. Originate from a validated herd, or

b. Be proved negative to a brucellosis test conducted within 60 days prior to sale or service and originate from a herd not under quarantine.

All breeding swine showing a positive reaction to a brucellosis test conducted at a livestock market shall be tagged in the left ear with a reactor tag and moved direct to slaughter on permit. The herd of origin shall be placed under quarantine for immediate test. Such quarantine to remain in effect until a complete negative herd test is conducted.

The negative animals from a reactor group disclosed at an auction market can return to the farm

of origin or be sold as one unit under strict quarantine to be tested no sooner than 30 days nor later than 60 days from the date of test.

1.30(163) Cattle. All female cattle born after July 1, 1963, sold or otherwise disposed of or moved to commingle with cattle of another owner for dairy or breeding purposes, after reaching the age of nine months must have been officially vaccinated for brucellosis. (Exceptions can be made in a hardship case.)

1.30(1) Free movement of the following classes:

a. Animals consigned directly to slaughter.

b. Steer and spayed heifers.

c. Native calves under eight months of age.

d. Female cattle under 30 months of age, when officially vaccinated for brucellosis and accompanied by an official health certificate showing individual identity.

e. Females born prior to July 1, 1963 accompanied by an official health certificate showing a negative test to brucellosis conducted within a 30 day period prior to movement.

f. Animals from a herd certified to be free of brucellosis or animals from a herd not under quarantine located in a modified certified brucellosis area.

1.30(2) Cattle originating in certified herds and modified certified brucellosis areas lose their identity and brucellosis health status when consigned by a dealer or pass through a nonapproved market and must be handled according to 1.30(1), "*a*" through "*e*".

1.30(3) *Bulls.* Official brucellosis vaccination will not be recognized for the intrastate movement of bulls of any age.

Bulls eight months of age and over must be accompanied by an official health certificate.

a. Showing a negative brucellosis test conducted within 30 days prior to movement, or

b. Originate in a herd certified to be free of brucellosis, or

c. Originate from a herd not under quarantine located in a modified certified brucellosis area.

1.30(4) Cattle meeting Iowa brucellosis vaccination requirements purchased at an auction market may be tested for brucellosis on the auction market premises in the new owner's name at owner's request. This test must be made within 24 hours from the time of sale. If such test discloses reactors, the herd of origin shall be placed under quarantine for immediate test. The negative animals can return to the farm of origin or be sold under strict quarantine to be retested no sooner than 30 days nor later than 60 days from the date of test. Reactors must be consigned direct to slaughter on permit.

1.30(5) Female cattle of recognized beef type under 21 months of age not having met brucellosis requirements as set forth above, are subject to feeder quarantine for a period of time not to exceed 12 months. An owner may upon written request receive an extension of quarantine not to exceed 120 days. Such cattle may be sold or transferred between owners, when not under quarantine, and it shall be the responsibility of the seller or owner to furnish evidence of the sale or transfer to the Iowa division of animal industry within 72 hours.

1.30(6) Bulls of recognized beef type sold through auction markets are subject to immediate test, castration or consignment to slaughter.

1.31(163) Sheep.

1.31(1) Market class sheep shall have free movement through all auction markets when meeting the following requirements:

a. Consigned direct to slaughter on a signed slaughter affidavit.

b. Properly branded with the letter "K" on the side or back by means of red branding paint.

1.31(2) Other classes of sheep:

a. Must have been dipped within ten days under veterinary supervision to move through an auction market.

b. Can be handled only by auction markets having dipping facilities available.

1.31(3) All sheep unloaded at an auction market which does not maintain proper dipping facilities must move direct to slaughter and may not return to the farm of origin without dipping.

1.31(4). The same requirements as stated in 1.31(1), 1.31(2) and 1.31(3) above shall be in effect on any sheep sold from trucks by managers of the auction markets, regardless of whether they are unloaded in the yards.

1.32(163) Swine vaccination. All swine of 30 days of age or over that are sold or leased to move intrastate and not consigned direct to slaughter or for serum production, must be accompanied by a valid certificate of vaccination issued by a licensed veterinarian or notarized statement of vaccination by owner against hog cholera by a method approved and recognized by the Iowa department of agriculture and the United States department of agriculture.

Unvaccinated swine at time of sale or lease, must be vaccinated on the premises of the seller or lessor or may move to an Iowa auction market or approved feeder pig market to be vaccinated; and must move to the premises of the purchaser or lessee within 24 hours of vaccination, where they shall be placed under 21-day quarantine.

Freshly vaccinated swine, if not moved within 24 hours of vaccination, shall be placed under 21-day quarantine on the owner's premises.

This rule is intended to implement chapter 163 of the Code.

[Filed July 14, 1964; amended January 12, 1966, May 14, 1968, July 9, 1968]

HEALTH REQUIREMENTS COVERING THE INTRASTATE MOVEMENT OF POULTRY

1.33(163) Turkeys. All turkey-hatching eggs or turkey poults must originate from flocks or hatcheries that comply with the following requirements of the Iowa state department of agriculture.

1.33(1) Originate from a flock tested annually and classified as follows:

a. "U. S. pullorum-typhoid clean" as provided in the National Turkey Improvement Plan (9 CFR 146).

b. S. typhimurium tested and no reactors found.

c. "Mycoplasma Gallisepticum tested and no reactors found."

1.33(2) All blood samples shall be drawn by approved testing crews.

1.33(3) All birds to be banded and blood samples identified by band number.

1.33(4) Blood samples shall be tested by an approved laboratory.

1.33(5) Tests shall be conducted with antigens approved by the department.

1.33(6) All eggs used for hatching shall be identified by the flock owner as to the flock of origin.

1.33(7) Ten percent of the flock shall be tested for mycoplasma gallisepticum at time flock is selected. Ten percent of the flock shall be tested for mycoplasma gallisepticum at the time the pullorum-typhoid and typhimurium test is conducted using the same sera. Ten percent of the flock shall be tested for mycoplasma gallisepticum when first eggs are saved or at time of first artificial insemination.

1.33(8) All flock and hatchery owners shall follow sanitation procedures prescribed by the department.

1.33(9) Flock and hatchery owners shall report any signs of respiratory disease to the department.

1.34(163) Chickens.

1.34(1) All chicken-hatching eggs or baby chicks must originate from flocks or hatcheries that have a pullorum-typhoid clean rating given by the official state agency of the National Poultry Improvement Plan or other state agency.

1.34(2) All boxes, crates and containers shall be new or disinfected before being used to move poultry within the state of Iowa, and identified with a label co-operating in the National Poultry Improvement Plan or other state agency.

[Filed June 13, 1966; amended May 14, 1968]

1.35(163) and **1.36(163)** Reserved for future use.

BRUCELLOSIS

1.37(163) Definitions as used in these rules.

1.37(1) "Department" means the Iowa Department of Agriculture, State Capitol Building, Des Moines, Iowa.

1.37(2) "Federal Office" means the Animal Disease Eradication Division, Agricultural Research Service, United States Department of Agriculture, 501 Iowa Building, Des Moines, Iowa.

1.37(3) "Brucellosis" means the disease of brucellosis in animals.

1.37(4) "Brucellosis Test" means the blood serum agglutination test for brucellosis, applied in accordance with a technique approved by the department.

1.37(5) "B.R.T." means brucellosis ring test as applied to milk and cream, and used as a presumptive test for locating possible brucellosis infected herds according to a technique approved by the department.

1.37(6) "Brucellosis Test Classification" means the designation of animals tested by the brucellosis test classifying them as negative, suspects or reactors according to the following diagnostic tables:

a. Official Vaccinates:

Dilutions			Diagnosis
1:50	1:100	1:200	
−	−	−	Negative
+	−	−	Negative
+	+	−	Suspect
+	+	+	Reactor

b. Nonvaccinated Animals:

Dilutions			Diagnosis
1:50	1:100	1:200	
−	−	−	Negative
+	−	−	Suspect
+	+	−	Reactor
+	+	+	Reactor

1.37(7) "Veterinarian" means a graduate of an approved veterinary school who is licensed and registered to practice veterinary medicine in this state.

1.37(8) "Under Official Supervision" is the term applied to any herd following control plans 1.38(1) [Plan A], 1.38(2) [Plan B] or 1.38(3) [Plan C], and the owner of which has signed the State-Federal Co-operative Agreement.

1.38(163) Control plans for brucellosis. In order to be recognized as being under a control plan for brucellosis it will be necessary for owners of cattle to sign an agreement form prescribed by the department designating one of the following plans:

1.38(1) [Plan A] Test annually of all cattle more than eight months of age, except steers, spayed heifers and official calfhood vaccinates until 30 months of age, slaughter all reactors with indemnity payments as provided by state and federal regulations. All reactors to be hot iron branded on the left jaw with the letter "B" at the time the test is completed. Official calfhood vaccination to be optional with the herd owner.

1.38(2) [Plan B] Test annually all cattle more than eight months of age, except steers, spayed heifers and official calfhood vaccinates until 30 months of age. All reactors are to be identified by hot iron brand on the left jaw with the letter "B" and with an ear tag in the left ear, and the herd quarantined on the farm. No reactors may be held more than three years. If a calfhood official vaccinate reacts, the animal may be retested within 60 days at the owner's expense. Official vaccination of all female calves between the ages of four and eight months.

1.38(3) [Plan C] Official vaccination of all female calves between the ages of four and eight months. The herd must be composed entirely of official vaccinates.

Owners who follow either 1.38(2) [Plan B] or 1.38(3) [Plan C] may change to 1.38(1) [Plan A] by compliance with the requirements of 1.38(1) [Plan A] and be eligible for indemnity providing the herd has passed one complete herd test with disposal without indemnity of any reactors disclosed.

1.39(163) Certified brucellosis-free herd. In order to qualify a herd of cattle as brucellosis-free and receive a certificate evidencing same, the owner thereof shall comply with the following requirements:

1.39(1) *Certified brucellosis-free herd.* Tests on herds in which reactors have been disclosed shall be made at intervals of not more than 60 days until all evidence of infection has been eliminated. These tests shall include all animals over six months of age, except steers, spayed heifers and officially vaccinated animals not over 30 months of age. A herd may be certified as brucellosis-free when it has passed at least three consecutive tests, with the first clean test and the certifying test not less than 12 months apart. Where there is no evidence of infection on the first test, a herd may be certified as brucellosis-free when it has passed one additional clean test conducted not earlier than six months nor more than one year from the date of the first test. Where the milk test is employed, herds may be certified as brucellosis-free with a minimum of three negative milk tests conducted at intervals of from four to six months and followed by a clean blood test within 30 days of the last milk test (BRT). All recertification of herds shall be based on the annual negative blood test.

1.39(2) *Additions to certified herds.*

a. To certified herds:

(1) From herds with equal status.

(2) From once-tested clean herds. Calf vaccinated animals up to 30 months of age on certificate of vaccination—over 30 months if negative; or nonvaccinated animals on evidence of negative retest not less than 60 days from date of negative herd test.

b. To once-tested clean herds.

(1) From herds with equal or superior status.

(2) From other herds, calfhood vaccinated animals up to 30 months of age on certificate of vaccination; over 30 months, if negative; nonvaccinated animals if tested negative, then segregated and retested negative in not less than 60 days.

1.39(3) The owner or veterinarian shall make a request to the chief, division of animal industry for certification or recertification, for a brucellosis-free herd when the required tests are completed.

1.40(163) Restraining animals. To facilitate the vaccination, taking of blood sample or identifying animals as reactors, it shall be the duty of the owner to confine the animals in a suitable enclosure and to restrain the individual animal in a manner sufficient to permit the veterinarian to perform any of the services required under laws and rules of Iowa.

1.41(163) Quarantines.

1.41(1) Bovine animals classified as reactors shall be quarantined on the premise and not permitted to mingle with other cattle until disposed of for slaughter under a permit issued by the department or its authorized agent.

1.41(2) All bovine animals comprising a herd operating under control Plan A shall be quarantined when one of its members has been classified as a reactor, such quarantine to remain in effect until two consecutive negative brucellosis tests, 30 to 60 days apart, have been made. No animals of such a herd may be moved or sold except to slaughter under permit issued by the department or its authorized agent except that the department in hardship cases may permit the movement of such animals other than to slaughter with quarantines remaining in effect at the new location, together with any new animals with which they may commingle.

1.41(3) Owners of animals tested for brucellosis shall hold the entire herd on the premises until the results of the test are determined.

1.41(4) Notice of quarantine shall be delivered in writing by the department or its authorized agent to the owner or caretaker of all cattle quarantined. A report of such quarantine shall also be filed with the department as prescribed.

1.41(5) All suspects to the brucellosis test disclosed in herds operating on Plan A or Plan B shall be quarantined and subjected to a retest. Suspects shall be subjected to two tests, 30 to 60 days apart. Unless subsequent tests show the animal to be a reactor the animal may be released from quarantine.

1.42(163) Identification of bovine animals.

1.42(1) *Identification tag.* Every veterinarian, in conjunction with the testing of any bovine animal for brucellosis or the vaccination of any such animal, shall insert an identification tag of the type approved by the department in the right ear of each animal which is not so identified; provided that in the case of an animal registered with a purebred association, the registry or tattoo number assigned to the animal by such association may be used for identification in lieu of an identification tag.

1.42(2) *Official vaccinates* (Defined by law). All official vaccinates must be given an identification tag in the right ear, and in addition must be tattooed or branded in accordance with chapter 164 of the Code.

1.42(3) *Reactor identification.* Bovine-reactor cattle eight months of age or over shall be permanently branded with a hot iron on the left jaw with the letter "B" not less than two inches nor more than three inches high and shall also be tagged in the left ear with a reactor identification tag approved by the department within 15 days of the date on which they were disclosed as reactors. This subrule shall not apply to official calfhood vaccination as defined in section 164.1. Such vaccinates need not be branded if they react to the brucellosis test until 30 months of age.

1.43(163) Cleaning and disinfection. After any disclosure of reactors to the brucellosis test and following their disposal for slaughter, the owner of such cattle shall be required to clean and disinfect all barns and premises in which said cattle have been held. Such cleaning and disinfection shall be done in accordance with instructions and with a disinfectant approved by the department.

1.44(163) Disposal of reactors.

1.44(1) Reactor cattle disclosed in herds operating under Plan A shall be tagged and branded within 15 days of the date the blood samples were taken. In accordance with Iowa law, an additional 30 days will be allowed for slaughter.

1.44(2) All reactors shall be disposed of for slaughter only in plants operating under federal meat inspection or slaughtering establishment approved by the department and must be accompanied by a shipping permit ADE 1-27 issued by an accredited veterinarian.

1.44(3) No cattle shall be disposed of through public sales or sales barns.

1.45(163) Brucellosis tests and reports.

1.45(1) All brucellosis tests conducted at state-federal expense must be tested at the state-federal laboratory, Ames, Iowa.

1.45(2) The department shall approve a veterinarian as eligible to conduct brucellosis tests, provided he has submitted to and has successfully passed a course of training and instruction provided by the department. The department shall specify the standards for maintaining such approval.

1.45(3) All brucellosis tests conducted by a veterinarian must be reported to the department, on forms prescribed, within seven days following completion of such tests. A copy of such tests shall also be given to the herd owner by the veterinarian.

1.45(4) Reports of vaccination shall be rendered by the veterinarian within 30 days in compliance with the regulation. It is from the information on these reports that the owner of the cattle will receive recognition as being under official supervision.

1.46(163) Suspect animals designated as reactors.

1.46(1) A nonvaccinated animal classified as a suspect on two consecutive brucellosis tests no sooner than 30 nor longer than 60 days apart may be reclassified as a reactor by the veterinarian obtaining the blood sample, provided the herd of origin contains reactors.

1.46(2) A nonvaccinated animal classified as a suspect on the brucellosis test may be reclassified as a reactor by the veterinarian obtaining the blood sample provided that such an animal is known to have aborted and is from a herd containing reactors.

1.46(3) Animals so designated in 1.38(1) and 1.38(2) will be eligible for indemnity in accordance with the laws and rules governing same.

1.47(163) Indemnity not allowed.

1.47(1) No indemnity shall be paid unless the test was previously authorized by proper state or federal authority.

1.47(2) No indemnity may be paid on an animal which was vaccinated when it was more than eight months of age.

1.47(3) No indemnity may be paid for calves positive to the agglutination test unless eight months of age or over.

1.47(4) No indemnity may be paid as a result of a test of an official vaccinate less than 30 months of age.

1.47(5) No indemnity may be paid upon reactors unless they are tagged, branded and slaughtered according to the state and federal regulations.

1.47(6) No indemnity may be paid upon cattle entering the state of Iowa which have not met the requirements for entry as breeding or dairy cattle.

1.47(7) No indemnity can be paid on reactors owned by the state or county.

1.47(8) No indemnity may be paid on unregistered reactor bulls, steers or spayed heifers.

1.47(9) No indemnity will be paid for brucellosis reactors when known reactors have been held on the premises for more than 30 days from the date on which they were tagged and branded.

1.47(10) No indemnity will be paid when infected premises have not been cleaned and disinfected to the satisfaction of the department in such a manner as to prevent the further spread of the disease.

1.47(11) No indemnity will be paid if the claimant has failed to comply with any of the requirements of these rules.

1.47(12) No indemnity will be paid on brucellosis reactors disclosed in a herd unless a state-federal co-operative agreement has been signed by the owner prior to conducting the brucellosis test.

1.47(13) No indemnity will be allowed unless all animals comprising the herd, both beef and dairy type, have been subjected to a brucellosis test conducted at the state-federal laboratory.

1.47(14) No indemnity will be paid on any reactors unless they are slaughtered in a plant operating under federal meat inspection and accompanied by a shipping permit ADE 1-27 issued by an accredited veterinarian.

1.48(163) Area testing.

1.48(1) Counties shall be tested in the order that valid petitions are received unless the department shall decide that it is not expedient to make tests in that order.

1.48(2) All provisions of the rules as promulgated under authority of section 164.2 are also in effect for counties designated as under area testing.

1.48(3) An area may be declared modified certified brucellosis-free by the application of two milk tests not less than six months apart, together with a blood test of all milk reacting herds and such other herds as are not included in the milk test. The number of reactors (exclusive of officially calf vaccinated animals under 30 months of age) must not exceed one percent of the cattle and the herd infection must not exceed five percent. Infected herds shall be quarantined until they have passed at least two consecutive blood tests not less than 60 days apart.

1.48(4) If testing as outlined in 1.48(3) above reveals an animal infection rate of more than one percent, but not over two percent and a retest of the infected herds applied within 120 days discloses not more than one percent animal infection in not over five percent of the herds, the area may then be certified.

1.48(5) If the test of an area as outlined under 1.48(3) results in more than two percent reactors, or if a retest of infected herds as under 1.48(3) does not qualify the area for certification, it shall be necessary to make a complete area retest.

1.48(6) *Recertification.* Areas may be recertified with the application of semiannual milk tests, follow-up blood tests of milk reacting herds and blood tests at three-year intervals on 20 percent of all herds not included in the milk test, if the incidence of infection does not exceed one percent of the cattle and five percent of the herds under test.

1.48(7) If testing as outlined under 1.48(6) reveals an animal infection rate of more than one percent, but not over two percent and a retest of the infected herds applied within 120 days discloses not more than one percent animal infection in not over five percent of the herds, the area may then be certified.

1.48(8) Any area not qualifying for recertification under the provisions of 1.48(7) shall be required to re-establish its certified status through testing procedures as outlined under 1.48(3).

1.48(9) The report of suspicious ring test of any herd shall be cause for a brucellosis test to be made.

1.48(10) The report of negative ring test will exempt a herd from brucellosis test unless such herd is due a test because of previous infection.

1.48(11) Milk producing herds missed on more than one regularly scheduled ring test will be required to have a brucellosis test made.

1.49(163) Tuberculin tests adopted by the department of agriculture are:

1.49(1) The subcutaneous or "Thermal" test.

1.49(2) The intradermic or "Skin" test.

1.49(3) The ophthalmic or "Eye" test.

1.50(163) The intradermic tuberculin test will be accepted provided it has been applied by a regularly employed state or federal veterinarian, an accredited veterinarian or by an approved veterinarian when endorsed by the authorities of the state of origin, provided the observations be made at the seventy-second hour.

1.51(163) The intradermic test is hereby adopted for area tuberculosis eradication work.

1.52(163) The ophthalmic test will not be accepted as an official test except when applied in combination with either the subcutaneous or intradermic test.

1.53(163) All tuberculin tests must be made within 30 days of date of shipment.

1.54(163) All certificates of health must show the number of cattle included in the test, the name of the owner and the post-office address.

1.55(163) All cattle not identified by registration name and number shall be identified by a proper metal tag bearing a serial number attached to the right ear.

1.56(163) No cattle shall be imported into the state of Iowa except in accordance with 3.4(163).

1.57(163) All herds of breeding cattle in counties that are under state and federal supervision for the eradication of tuberculosis in which reactors have been found may be held in quarantine until they have passed a negative tuberculin test.

All cattle that react to the tuberculin test, as well as those which show physical evidence of tuberculosis, shall be marked for identification by branding with the letter "T" not less than two or more than three inches high on the left jaw and to the left ear shall be attached a metal tag bearing serial number and the inscription "REACTOR".

1.58(163) All untested steer cattle shall be handled and maintained as a separate unit from the breeding cattle (which means they shall be quarantined, watered and fed apart from breeding cattle).

1.59(163) Female cattle, the products of which are intended for family use, may be tuberculin tested without being denied the use of the same pastures and the same watering troughs as steers in feeding. This does not apply to female cattle, the products of which are handled commercially; neither does it apply where the feeding cattle are other than steers. Cows kept under such conditions cannot be sold for any purpose other than slaughter without being subjected to an additional tuberculin test.

1.60(163) Certificates and test charts must be made to conform with United States Bureau of Animal Industry rules governing the interstate movement of cattle; the original must be attached to the waybill and a copy forwarded to the Chief of Division of Animal Industry, Iowa Department of Agriculture, Des Moines, Iowa 50319.

1.61(163) Reactors to the tuberculin test brought in for immediate slaughter must be consigned to a slaughtering establishment having federal inspection and must be transported thereto in accordance with section V, Regulation 7, of B. A. I. Order No. 309.

1.61(1) When it is found on slaughter that animals are affected with tuberculosis, the chief, division of animal industry, may order an immediate investigation, and if deemed advisable have all breeding cattle on the premises from which the tubercular animals originated, tested for tuberculosis.

1.61(2) When cattle within the state of Iowa are sold under sale contract to pass a 60- or 90-day tuberculin test and have failed to pass the same, before being returned to the original owner, the party wishing to return such animal or animals shall first obtain a permit from the chief, division of animal industry, Iowa department of agriculture, to do so.

1.61(3) When cattle are sold out of the state of Iowa under sale contract to pass a 60- or 90-day tuberculin test and failing to pass the same, before being returned to the original owner, the party wishing to return such animal or animals shall first furnish a tuberculin test chart showing the reaction, giving the date of reaction and proving to the satisfaction of the chief, division of animal industry, that such animals are reactors.

1.62(163) The rules adopted by the Iowa department of agriculture governing the establishment of tuberculosis-free accredited herds and accredited areas or units in Iowa will be applied to such herds, and areas or units in co-operation with the bureau of animal industry, United States department of agriculture.

1.63(163) A tuberculosis-free accredited herd is one which has been tuberculin tested by the subcutaneous method or any other test approved by the bureau of animal industry, under the supervision of the Iowa department of agriculture and the United States department of agriculture or a veterinary inspector employed by the state in which co-operative tuberculosis eradication work is being conducted jointly by the United States department of agriculture and the state. Further, it shall be a herd in which no animal affected with tuberculosis has been found upon two annual or three semiannual tuberculin tests, as above described, and by physical examination.

1.64(163) The entire herd, or any cattle in the herd, shall be tuberculin tested or retested at such time as is considered necessary by the federal and state authorities.

1.65(163) No herd shall be classed as an accredited herd, in which tuberculosis has been found by the application of the test as referred to in 1.63(163), until such herd has been successfully subjected to two consecutive tests with tuberculin applied at intervals of not less than six months, the first interval dating from the time of removal of the tuberculous animals from the herd.

1.66(163) No cattle shall be presented for the tuberculin test which have been injected with

tuberculin within 60 days immediately preceding or which have at any time reacted to a tuberculin test.

1.67(163) Prior to each tuberculin test satisfactory evidence of the identity of the registered animal shall be presented to the inspector. Any grade cattle maintained in the herd or associated with the animals of the herd shall be identified by a tag or other marking satisfactory to the state and federal officials.

1.68(163) All removals of cattle from the herd, either by sale, death or slaughter, shall be reported promptly to the said state or federal officials, giving the identification of the animal, and if sold, the name and address of the person to whom transferred. If the transfer is made from the accredited herd to another accredited herd the shipment shall be made in only cleaned and disinfected cars. No cattle which have not passed a tuberculin test approved by the state and federal officials shall be allowed to associate with the herd.

1.69(163) All milk and other dairy products fed to calves shall be that produced by an accredited herd, or if from outside or unknown sources it shall be pasteurized by heating to not less than 150° F. for not less than 20 minutes.

1.70(163) All reasonable sanitary measures and other recommendations by the state and federal authorities for the control of tuberculosis shall be complied with.

1.71(163) Cattle from an accredited herd may be shipped interstate on certificate obtained from the office of the chief, division of animal industry or from the office of the bureau of animal industry without further tuberculin test, for a period of one year, subject to the rules of the state of destination.

1.72(163) All cattle which react to the tuberculin test and for which the owner desires indemnity, as provided by statute, must be removed immediately from the cattle barn, lots and pastures where other cattle are being kept.

1.72(1) The barn or place where reacting cattle have been housed or kept shall be thoroughly cleaned and disinfected immediately.

1.72(2) Feed places and floors must be cleared of all hay and manure and scraped clean.

1.72(3) All loose boards and decayed woodwork should be removed, and when deemed necessary, and requested by the veterinarian, must be accomplished before it will be considered that the place has been properly cleaned and disinfected.

1.72(4) The feeding places, troughs, floors and partitions near the floor should be washed and scoured with hot water and lye.

1.73(163) Strict compliance with these methods and rules shall entitle the owner of tuberculosis-free herds to a certificate, "TUBERCULOSIS-FREE ACCREDITED HERD", to be issued by the United States department of agriculture, bureau of animal industry and the division of animal industry, Iowa department of agriculture, said certificate shall be good for one year from date of test unless revoked at an earlier date.

1.74(163) Failure on the part of the owners to comply with the letter or spirit of these methods and rules shall be considered sufficient cause for immediate cancellation of the co-operative agreement with them by the state and federal officials.

1.75(163) In accordance with the provisions of chapter 165 of the Code, the Iowa department of agriculture shall have control of the sale, distribution and use of all tuberculin used in the state and shall formulate regulations for its distribution and use. Only such persons as are authorized by the department, inspectors of the B.A.I. and regularly licensed practicing veterinary surgeons of the state of Iowa shall be entitled to administer tuberculin to any animal included within the meaning of this chapter.

1.76(163) No person, firm or corporation shall sell or distribute tuberculin to any person or persons in the state of Iowa except under the following conditions:

1.76(1) That the person or persons are legally authorized to administer tuberculin.

1.76(2) That all sales of tuberculin shall be reported to the secretary of agriculture on proper forms, which forms may be obtained from the chief, division of animal industry.

1.76(3) Reports of all sales and distribution of tuberculin in the state of Iowa shall be made in triplicate; the original copy to be delivered with the tuberculin to the person obtaining same; the duplicate to be forwarded to the Chief, Division of Animal Industry, Des Moines, Iowa 50319; and the triplicate copy to be retained by the manufacturer or distributor. All reports shall be made within 60 days from date of sale.

1.77(163) When hogs upon any farm or premises within the state of Iowa are sick or show symptoms of cholera, it shall be the duty of the owner or person having supervision of such hogs to immediately report same to the chief, division of animal industry. Upon receiving such notice the chief, division of animal industry, shall promptly investigate the case. If cholera is present the regular quarantine card shall be posted and the owner or person having supervision of the hogs so diseased will be required:

1.77(1) To shut up his sick hogs or confine them under cover away from all carriers of infection.

1.77(2) To vaccinate the herd.

1.77(3) To burn all dead hogs within 24 hours intact, or he may dispose of same by turning

such dead hogs over to a licensed rendering plant within 24 hours. Failure of the owner or his agent to dispose of the carcasses of hogs as outlined above, will be cause for the disposal of same in accordance with 1.115(163).

1.77(4) To clean and disinfect the hog houses, pens and yards where infected hogs have been and to disinfect daily that part of the premises where sick hogs are being kept under cover. When satisfied that the herd has recovered from the disease the remaining hogs may be given their freedom on the premises and the part of premises where the sick hogs have been kept shall be cleaned and disinfected.

1.78(163) All hogs within the state of Iowa immunized by the double or simultaneous method against hog cholera shall be held intact for a period of not less than 21 days from date of vaccination.

1.79(163) A person, firm, company or corporation before selling or offering for sale within the state any anti-hog-cholera serum and hog-cholera virus shall first make application to the department of agriculture for permission.

1.80(163) Said application shall give the name of said person, firm, company or corporation with their place or places of business.

1.81(163) No anti-hog-cholera serum and hog-cholera virus shall be sold or offered for sale or use or be used in this state which has not been produced at a plant holding a valid United States government license for the manufacture and sale of same.

1.82(163) Any person, firm, company or corporation operating under permit issued by the department of agriculture that sells or distributes or is responsible for the sale or distribution of any anti-hog-cholera serum and hog-cholera virus, if the same should cause any sickness in hogs, shall promptly investigate the complaint and report the result to the Chief, Division of Animal Industry, Des Moines, Iowa 50319. Until such action is taken by such person, firm, company or corporation, and a report made as required, their license or permit may be suspended or canceled by the secretary of agriculture.

1.83(163) All anti-hog-cholera serum and hog-cholera virus and all serum and toxins which may be injuriously affected by exposure to light and to high temperature must be stored in a dark, cool chamber or refrigerator at a temperature not to exceed 55°F.

All dealers in the state of Iowa or in any place under the jurisdiction of the state of Iowa shall keep such products protected from light and under refrigeration until sold or otherwise disposed of.

1.84(163) Permanent daily records of the course of the preparation, of tests for purity and potency and of methods of preservation of virus, serum and toxins shall be kept by each licensed establishment whether it is a dealer or manufacturer producing such products in the state of Iowa, on a form satisfactory to the chief, division of animal industry, or a duly authorized representative of the secretary of agriculture; and also a record shall be kept by each establishment and by each manufacturer showing the sale, shipment or other disposition of anti-hog-cholera serum or hog-cholera virus.

1.85(163) Each true container of anti-hog-cholera serum and hog-cholera virus prepared for sale, exchange or shipment by any licensed establishment within the state of Iowa or imported into the state shall bear a trade label as hereinafter directed.

1.86(163) No container of anti-hog-cholera serum and hog-cholera virus shall bear a label unless or until the product contained therein shall have been prepared in compliance with these rules and found not to be worthless, contaminated or harmful.

1.87(163) No person shall apply or affix or cause to be applied or affixed any trade label, stamp or mark on any container of anti-hog-cholera serum or hog-cholera virus prepared or received in a licensed establishment except in compliance with these rules. Suitable tags or labels of a distinct design shall be used for identifying all anti-hog-cholera serum and hog-cholera virus.

1.88(163) Each trade label, stamp or trademark shall show the federal license number and the permit number issued by the state.

1.89(163) Each trade label, stamp or mark shall bear a serial number affixed by the manufacturer by which the product can be identified with the records of preparation.

1.90(163) Each trade label, stamp or mark shall bear a return date affixed by the producer of same. The date shown shall be the date after which the manufacturer does not guarantee the product to be of full strength and potency.

1.91(163) On the trade label, stamp or mark affixed to the true container of hog-cholera virus, in addition to the statements required by the preceding rules, the following must be prominently placed and lettered: Caution: Burn virus container and all unused contents.

1.92(163) Any person, not a registered veterinarian, applying for a permit to use hog-cholera virus must furnish to the secretary of agriculture a certificate from a recognized institution certifying that such person has taken proper course of instruction and is qualified to safely use hog-cholera virus whereupon the secretary of agriculture shall issue a permit to such person to use hog-cholera virus on his own hogs upon his own premises.

1.93(163) No person, firm or corporation shall engage in the business of disposing of the bodies of dead animals without first obtaining a

license to do so in the manner and upon the terms and conditions provided in chapter 167 of the Code.

1.94(163) Any person who shall obtain from any other person the body of any animal for the purpose of obtaining the hide, skin or grease from such animal in any way whatsoever shall be deemed to be engaged in the business of disposing of dead animals.

1.95(163) Any person desiring to engage in the business of disposing of the bodies of dead animals by cooking or otherwise shall file with the department of agriculture of the state of Iowa an application for license.

1.96(163) Such applicant shall at the time he files such application pay to the department of agriculture the sum of $100.

1.97(163) If the secretary of agriculture shall find that such applicant is a responsible and reliable person and capable of conducting properly such business, and that the place where such business is to be conducted is a suitable and sanitary place, he shall issue to such applicant a certificate to that effect.

1.98(163) Such applicant shall file such certificate with the department of agriculture and shall pay said department the sum of $100 for a license to conduct such business.

1.99(163) Every person operating under a license issued by the department of agriculture shall pay, annually, for the renewal of such license the sum of $100.

1.100(163) Plans of disposal plant, either in blueprint or detail drawing shall be filed with the Iowa department of agriculture. All tanks, vats, pipes, drains, valves, etc., shall be shown in detail. A separate drawing or blueprint of the covered or underground portion of the construction shall be included with these plans. Any alteration in construction that is to be made shall be approved by the department before construction is undertaken.

1.101(163) No place shall be deemed suitable or sanitary for disposing of the bodies of dead animals unless it conforms to the following specifications:

1.101(1) The building must be provided with concrete or cement floors or some other nonabsorbent material and provided with good drainage and be thoroughly sanitary.

1.101(2) All cooking vats or tanks shall be airtight; except where proper escapes or vents are required for live steam used in cooking.

1.101(3) Steam shall be so disposed of as not to cause unnecessary annoyance or create a nuisance.

1.101(4) Such place shall be so situated, arranged and conducted as not to interfere with the comfortable enjoyment of life and property of the citizens of this state.

1.101(5) No liquid wastes, either from the process or from washings, shall be discharged into any stream, watercourse or on the surface of the ground.

1.101(6) All sewage from washing of floors, wagons, trucks, and all liquid wastes from the rendering process shall be disposed of by:

a. Evaporation.

b. Sterilized by boiling.

c. Through a series of septic tanks proven adequate to handle and render nonpathogenic the quantity of material discharged at maximum capacity of the plant. The disposal plan for carrying out the above process shall be submitted to the department for approval before it is installed.

1.102(163) Conveyances for transporting carcasses of animals must be provided with watertight bed or tank not less than 24 inches in depth; all metal or metal-lined and watertight at least four inches above the general level of the bottom of box or bed; endgate to be of metal or metal-lined, hinged at the bottom of box or bed and fastened firmly at top when closed; endgate to be provided with an effect on the inside to fit snugly over the end of the bed.

1.103(163) All trucks used for transporting carcasses of dead animals on the highways must be owned and operated by a licensed disposal plant, except as provided for in 1.104(163). The name and address and license number of the plant shall be painted on both sides of the truck in letters not less than four inches high and in a color in definite contrast to the body color of the truck.

1.104(163) In cases where licensed disposal plants have employees operating trucks in other cities or towns, they must operate under the name of the licensed disposal plant by which they are employed, and this applies to all advertisements and listings.

1.105(163) Tarpaulins. No disposal plant truck shall be moved on the highway without having a tarpaulin which is adequate to cover the bed of the truck and anything contained therein. If any carcass is contained in the truck or the truck has not been thoroughly cleaned, such tarpaulin must be in place covering the bed of the truck and its contents. Such tarpaulin must have no holes through which flies can pass.

1.106(163) Whenever a vehicle or person in charge thereof, or his assistant, has been upon any premises for the purpose of removing the carcass of any animal, or where animals are dead or dying, before such vehicle can be taken upon a public highway or upon other premises and before leaving the premises of the rendering plant on each trip the wheels of such vehicles and the shoes or boots

of all persons having been upon such infected premises shall be disinfected thoroughly with any disinfectant of prescribed strength recommended by the bureau of animal industry as a disinfectant, preferably cresol compound, three percent, or a 1-1000 solution of bichloride of mercury. Facilities and materials for disinfection shall be carried on truck at all times.

1.107(163) The carcass of no animal which dies or which has been killed on account of being affected with anthrax may be handled by a disposal plant. In case through error or otherwise an anthrax carcass is brought into a disposal plant, the plant and its trucks shall be placed under quarantine immediately on the premises of the disposal plant. And said quarantine shall remain in effect until such cleaning and sterilizing of the plant, equipment and any byproducts including hides that the department may deem necessary have been completed.

1.108(163) If a committee, composed of a member of the division of animal industry, a member of the dairy and food division and representatives of the state board of health and local board of health, after investigation finds that the location or management of any rendering plant interferes with the health, comfort and enjoyment of life or property, the department will consider such finding sufficient grounds for the withholding or suspending of a license.

1.109(163) It will be necessary for the management of each rendering or processing plant to spray the inside of each building, including the doors, windows and screens, as well as all trucks used in transporting the bodies of dead animals, with an approved and effective fly control agent every 30 days beginning the first of April and continuing through the month of October.

1.110(163) Penalty. See section 167.19.

1.111(163) All carcasses of animals dead or which have been killed on account of being infected with anthrax must be burned within 24 hours intact without removal of the hide, together with all contaminated flooring, mangers, feed racks, watering troughs, buckets, bedding, litter, soil and utensils. In case such flooring, mangers, feed racks, watering troughs, buckets, stanchions, etc., that have been contaminated are constructed of metal and cement or other fireproof material, they shall be disinfected thoroughly with cresolis compound, U.S.P. or any reliable disinfectant recommended by the B.A.I., chief of division of animal industry or a regularly qualified veterinarian. In the event the owner or his agent neglects or refuses to make such disposition of the carcasses of animals dead from anthrax within 24 hours, as stated above, then in such cases the disposal of the same shall be handled in accordance with 1.115(163).

1.112(163) All carcasses of hogs dead of cholera must be burned within 24 hours intact, or they may be disposed of within 24 hours to the operator of a licensed rendering plant or his employee. In the event that the owner or his agent neglects or refuses to make such disposition of the carcass or carcasses of hogs dead of cholera, then the disposal of same shall be handled in accordance with 1.115(163).

1.113(163) All carcasses of animals dead from noncommunicable diseases, may be either burned within 24 hours, or such carcasses may be disposed of within 24 hours by the operator of a licensed rendering plant or his employees. In the event that the owner or his agent neglects or refuses to make such disposition of the carcass or carcasses, then the disposal of same shall be handled in accordance with the provisions of 1.115(163).

1.114(163) All persons are strictly forbidden to throw the carcass of any animal into any river, stream, lake or pond or bury the carcass of any animal near any stream or tile drain. Such carcasses if dead of noncommunicable disease, if not disposed of to a rendering plant, must be buried six feet below the surface of the ground, in accordance with the preceding rule.

1.115(163) When the owner of any animal, dead from any cause, neglects or refuses to make proper disposition of the carcasses of such animals it shall be the duty of the township trustees or local board of health to supervise the disposal of such carcasses.

[Filed November 26, 1957]

FEEDING GARBAGE

1.116(163) On and after June 1, 1953, it shall be unlawful for any person, firm, partnership or corporation to feed garbage, including all waste material, byproducts of a kitchen, restaurant, stock yards, hotel or slaughter house, every refuse accumulation of animal, fruit or vegetable matter, liquid or otherwise to animals, unless such garbage has been heated to a temperature of 212°F. for 30 minutes.

Nothing in this requirement shall apply to an individual who feeds to his own animals only the garbage obtained from his own household.

1.117(163) Before any person shall process any public or commercial garbage for swine, a license must be obtained from the Iowa department of agriculture, division of animal industry.

1.118(163) Application blanks to obtain license for processing garbage may be secured from the Iowa Department of Agriculture, Division of Animal Industry, Statehouse, Des Moines, Iowa.

1.119(163) The license fee for each processing plant shall be $50 annually, payable on or before September 1.

1.120(163) Upon receipt of the application and license fee the department will inspect the premise and the physical property on which the

applicant proposes to conduct such business. The representative of the department making the inspection shall file a report of his findings.

1.121(163) The cooking of raw garbage for the purpose of feeding to animals shall be in a plant or boiler located not less than 100 feet from any pen, lot or other enclosure in which animals are kept.

1.122(163) Garbage to be fed to swine in the state of Iowa shall be cooked or heated to 212°F. for 30 minutes by one or more of the following methods:

1.122(1) Wet steaming or boiling in open vat.

1.122(2) Dry steaming or boiling in a jacketed kettle.

1.122(3) Steaming in pressure cylinder.

1.122(4) Steam boilers.

1.122(5) Direct heating over an open fire. Accurate recording thermometers shall be used regardless of the manner of cooking. Daily cooking records are to be kept and available to the department for a period of at least six months after processing.

1.123(163) The boilers or containers in which such raw garbage intended for animal feed is cooked or heated must be kept in a clean and sanitary condition at all times. All containers used for storage of raw garbage shall be constructed and kept in such a manner that rodents or animals shall not have access to them.

1.124(163) All trucks, vehicles and containers used for the transportation of raw garbage to cooking plants shall be constructed of or lined with impervious material which does not permit the escape of any fragments of garbage or of liquids and the garbage shall be covered.

1.125(163) All garbage cooking plants for processing raw garbage for the purpose of feeding animals shall be situated and operated in such a manner as not to interfere with the comfortable enjoyment of life and property of the citizens of Iowa.

1.126(163) On and after January 1, 1956, all swine which have been fed raw garbage, as defined in section 163.26(3), shall be placed under quarantine and held in strict isolation from other animals.

1.127(163) Swine shall not be moved from the premises until a period of 30 days has elapsed from date the quarantine is issued, and they have been inspected by a state or a federally employed veterinarian who will issue a shipping form known as ADE 1-27 for the movement of the swine direct to a federally inspected packing plant for slaughter and special processing.

1.128(163) Swine referred to in 1.126(163) and 1.127(163) which have developed the disease known as vesicular exanthema prior to or following the issuance of the quarantine, may be moved to a licensed rendering plant for processing under the direction of the Iowa department of agriculture.

1.129(163) Any vehicle used for the movement of swine referred to in 1.126(163), 1.127(163) and 1.128(163), shall be thoroughly cleaned and disinfected before leaving premises where swine have been delivered.

1.130(163) Penalty. Violations of these rules shall be punishable as provided for in section 163.29.

[Filed April 24, 1953; amended December 22, 1955]

ERADICATION OF BOVINE TUBERCULOSIS

1.131(165) Fee schedule.

1.131(1) *Injection.* Five dollars per stop (herd) and 75 cents per head.

1.131(2) *Reading.* Five dollars per stop (herd) and 50 cents per head.

1.131(3) *Tagging and branding reactors.* Five dollars first reactor and three dollars each additional reactor.

[Filed July 13, 1965]

RABIES CONTROL

1.132(351) Control and prevention of rabies.

1.132(1) *Antirabies vaccine.*

a. Modified live virus chick embryo rabies vaccine is the designated vaccine approved by the Iowa department of agriculture and will be recognized for a period of two years. It shall be given intramuscularly.

b. In the event the professional judgment of the veterinarian indicates the use of modified live virus chick embryo vaccine in a particular animal is contraindicated, inactivated nervous tissue vaccine may be used on an annual basis.

1.132(2) *Tag and certificate.*

a. The veterinarian shall issue a tag with the numerical number thereon and the certificate of vaccination shall designate the tag number.

b. Each rabies vaccination certificate issued by the veterinarian must be an Official Rabies Vaccination Certificate approved by the Iowa department of agriculture.

[Filed July 13, 1965; amended March 21, 1967]

1.133 to 1.136 Reserved for future use.

BOVINE BRUCELLOSIS

1.137(164) Back tagging in bovine brucellosis control.

1.137(1) All bovine animals two years of age and older received for sale or shipment to a slaughtering establishment shall be identified with a back tag issued by the department. The back tag will be affixed to the animal as directed by the department.

1.137(2) It shall be the duty of every livestock trucker, when delivering to an out-of-state market, and every livestock dealer, livestock market operator, stockyards operator and slaughtering establishment to identify all such bovine animals not bearing a back tag at the time of receiving possession or control of such animals. A livestock trucker may be exempted from this requirement if the animals are identified as to the farm of origin when delivered to a livestock market, stockyards or slaughtering establishment agreeing to accept responsibility for back tag identification.

1.137(3) Every person required to identify animals under this rule shall file reports of such identification on forms prescribed by the department. Each such report will cover all animals identified during the preceding week.

[Filed September 26, 1967]

CHAPTER 2
MOVEMENT OF LIVESTOCK (INTERSTATE—INTRASTATE)

NOTE: Rules governing movement of livestock (both interstate and intrastate) through livestock auction markets, marketing agencies, sale barns or sale yards with special reference to brucellosis requirements of cattle as applied to livestock auction markets and marketing agencies specifically approved under state-federal agreement.

For the purpose of following rules—livestock markets shall be deemed to include all auction markets, marketing agencies, sales barns, sales yards or livestock dealers operating under a state permit as required.

2.1(163) Permits.

2.1(1) *By whom required.* Any person, partnership, firm, corporation or livestock market engaged in the business of buying, selling or assembling livestock, or receiving livestock by consignment for the purpose of resale either interstate or intrastate, whether by private sale, public auction or on a commission basis either wholly or in part, when not under full-time federal supervision must be under state supervision and must first obtain a permit to conduct such business. A separate permit must be obtained for each separate or independent marketing unit even though operated under the same management or same person, partnership, firm, corporation or livestock market.

The foregoing provision shall not apply to authorized agents or employees of livestock markets operating under a valid state permit, provided such agent or employee is doing business in the name of such livestock market, nor shall it apply to the owner or operator of a farm or feedlot who deals only in livestock which has been kept by him or is to be used by him for dairy, breeding or feeding purposes. Furthermore, this shall not apply to a commission firm doing business under the rules and regulations of a public stockyards company operating under federal supervision.

2.1(2) *How permits will be issued.* Applications for livestock marketing permit shall be made to the division of animal industry by the marketing unit owner or operator or the livestock dealer on a special form furnished by the department. Upon receipt of such application, an investigation will be made and the premises will be inspected by a qualified state employed inspector. A permit will then be issued or the application denied.

2.2(163) Animal health and sanitation requirement.

2.2(1) *Veterinary inspection required.* All auction markets, marketing agencies, sales barns or sales yards operating under a permit as required shall provide for veterinary inspection by a qualified veterinary inspector, approved by the department of agriculture, state of Iowa, who shall inspect all animals marketed and shall require that the premises be maintained in sanitary condition at all times.

2.2(2) *Who may inspect.* Any accredited veterinarian, licensed to practice in the state of Iowa, and who has been approved by the Iowa department of agriculture. In addition the veterinary inspector must be approved by the department to do brucellosis plate testing or shall have available approved laboratory facilities.

2.3(163) Duties and responsibilities of the livestock market management.

General. All livestock market owners, operators or managers shall co-operate in obtaining full compliance with all state laws, rules and with the federal regulation (Part 78, Title 9—C.F.R.) and shall agree to:

2.3(1) Notify the division of animal industry, Iowa department of agriculture and United States department of agriculture (Des Moines branch) animal disease eradication division as to method of operation (buying, receiving and selling of livestock). Auction markets shall furnish a schedule of regular sale dates and notify both aforementioned departments of all special sales not less than five days in advance.

2.3(2) Provide for chutes and divisions of yarding and pens as required to handle livestock according to their classification.

2.3(3) Furnish the name of a veterinarian who will be held primarily responsible for all inspections required to be approved as veterinary inspector.

2.3(4) Permit no animals to be sold at any time prior to veterinary inspection.

2.3(5) Release only recognized beef type cattle for feeding or grazing purposes as qualify under Iowa law and federal regulations.

2.3(6) Permit no cattle under feeder quarantine in accordance with Iowa law to be sold except direct to slaughter unless permission is granted by the approved veterinary inspector, in which case they may be released for further feeding under quarantine not to exceed the unexpired time of the original quarantine.

2.3(7) Clean and disinfect all chutes, whether portable or stationary and all pens, alleyways and scales after each sale or at any time when ordered to do so by the approved veterinary inspector and in accordance with the procedure recommended by him.

2.3(8) Maintain accurate records, including records of origin, identification, destination or other disposition of all livestock handled at the livestock market. Such records shall be made available for inspection by an authorized state or federal inspector upon request. Such records shall be kept for a period of not less than one year.

2.3(9) Notify both state and federal offices immediately in the event of sale, transfer of ownership or change of management of the livestock marketing agency.

2.3(10) Failure to comply with any of the foregoing provisions shall be deemed sufficient reason to remove a market from the state-federal approved list or revoke the permit to operate as a livestock market or both. In the event of termination of operation, the permit to operate must be surrendered to the State Department of Agriculture, State Capitol Building, Des Moines, Iowa 50319.

2.4(163) Duties and responsibilities of the livestock market veterinary inspector.

General. The livestock market veterinary inspector shall allow sufficient time to perform his duties at the livestock market and shall inspect all livestock prior to sale whether sold by auction or private sale. In the case of auction markets he must be present during the entire time the sale is in progress. He shall have full authority to reject or detain any animal or animals at owner's expense, or any animal or animals which in his opinion is diseased or exposed in conformance with chapter 163 of the Code, which for any reason may be detrimental to the health of the animals within the state. In addition to clinical inspection on all animals, the veterinary inspector shall:

2.4(1) Permit no animal to be sold prior to test when a test is required.

2.4(2) Permit no animal to be released prior to vaccination when vaccination is required.

2.4(3) Obtain permits for movement (either interstate or intrastate) at owner's expense when permits are required.

2.4(4) Issue all official quarantines (including feeder quarantine) or other form of releasing documents before permitting animals to be removed from the livestock market.

2.4(5) Notify the state office promptly of any transfer of ownership of feeder cattle under feeder quarantine.

2.4(6) Mail copies of all official health certificates and quarantines to the division of animal industry immediately.

2.4(7) Mail copies of all test charts (both T.B. and Brucellosis) and copies of all calfhood vaccination record Form BV-1 to the United States Department of Agriculture (Des Moines branch), Animal Disease Eradication Division.

2.4(8) Report promptly all violations or refusals to comply with state laws, rules and federal regulations to the proper state or federal inspectors.

2.4(9) Failure to comply with any of the foregoing provisions shall be deemed sufficient reason for disapproving the veterinary inspector.

2.5(163) Classification of livestock markets.

2.5(1) State-Federal approved markets shall include all markets that qualify to receive cattle in conformance with state laws, rules and federal regulations (Title 9, Part 78—C.F.R.). They will be classified according to their physical facilities and equipment available to receive, handle and maintain the identity and the brucellosis health status of cattle marketed. They will be designated as Class "A", those approved to receive all classes of cattle including known brucellosis reactors, and Class "B", those approved to receive only cattle not known to be brucellosis infected.

2.5(2) Nonapproved markets shall include all markets that do not qualify for state-federal approval under Title 9, Part 78—C.F.R.

2.6(163) Requirements for state-federal (specifically) approved markets.

General. Collection of veterinary inspection fee: In conformance with section 211.3, the state department of agriculture shall collect a veterinary inspection fee agreed upon by the marketing unit operator and qualified veterinary inspector, recommended by the marketing unit operator and approved by the secretary of agriculture, plus a cost of administration not to exceed two dollars per month per marketing unit, on all animals marketed through sale yards, sale barns, auction markets or other marketing agencies required to hold permits issued by the department. Such fees, when collected, shall be placed by the secretary in an "inspection fee revolving fund" under his jurisdiction. The department shall pay fees to each such approved veterinary inspector for inspection services in accordance with agreements between such veterinarians and the marketing units where

inspections are accomplished, reduced by the allowable amounts for administration. Such fees shall be adjusted from time to time so that the amount collected will not exceed the costs of said veterinary inspections and the administration thereof. The provisions of this Act shall also apply to all sale yards, sale barns and marketing agencies receiving livestock moved into the state of Iowa for sale through said sale yards, sale barns and marketing agencies, except meat processing establishments or terminal markets where full-time federal inspections are required and such requirements are complied with. Sale yards, sale barns and marketing agencies not handling livestock shipped into the state of Iowa for resale shall be exempt from the provisions of this Act, as well as livestock meeting federal and state requirements for interstate shipment as to health at the time of entry into Iowa.

2.6(1) Physical facilities and equipment necessary to qualify for Class "A" state-federal approved market.

Class "A" certificates of approval will be issued to auction markets only; and only to those markets having facilities and equipment to receive cattle in conformance with state laws, rules and with federal regulation (Title 9, Part 78—C.F.R.) and will be permitted to receive all classes of cattle including known brucellosis reactors.

2.6(2) Class "A" state-federal approved markets shall:

a. Provide a separate unloading chute and a division of yarding for handling of known brucellosis reactors, such chute and yarding shall at no time be used to hold cattle of any other class.

b. Provide sufficient runways or alleyways, the floors of which shall be covered with concrete or other material of an impervious nature so that reactor animals can travel from the holding pens through the sale ring and the scale room and be returned without leaving such floors.

c. Provide a separate unloading chute and a division of yarding for handling cattle originating in certified brucellosis-free herds or in negative herds from modified certified brucellosis areas. Such chute may be used for handling cattle of unknown brucellosis health status.

d. Provide sufficient runways or alleyways, the floors of which are covered with concrete or other material of an impervious nature so that animals can travel from holding pens through sale ring and scale room and be returned without leaving such floors.

2.6(3) Physical facilities and equipment necessary to qualify for Class "B" state-federal approved markets.

Class "B" certificates of approval will be issued to auction markets meeting the same requirements as listed under 2.6(2) except paragraphs "*a*" and "*b*"; and to marketing agencies having facilities to maintain the identity and brucellosis health status of the various classes of cattle received.

2.6(4) *Nonapproved markets.* Nonapproved markets will not be permitted to receive cattle originating outside the state of Iowa, except such cattle that have met both state and federal requirements prior to entry, but must meet the same requirements as state-federal specifically approved markets in handling and releasing cattle to move intrastate and must meet all federal regulations under Title 9, Part 78—C.F.R., as well as the requirements of the state of destination in releasing cattle to move interstate. Cattle from certified herds and areas passing through such markets shall be deemed to have lost their status and must meet the requirements of 2.7(1) through 2.7(6). If brucellosis reactor animals are disclosed on tests within nonapproved markets, they shall be placed in a holding pen separate and apart from other cattle. Such animals must be sold or moved from the holding pen direct to slaughter.

2.7(163) Requirements for sale of all bovine animals. All animals must pass a negative test for brucellosis unless they can be classified under one of the following exemptions:

2.7(1) Steers and spayed heifers.

2.7(2) Female calves for dairy and breeding purposes under eight months of age.

2.7(3) Female animals and bulls of recognized beef type sold for feeding and grazing purposes.

2.7(4) Animals consigned direct to slaughter.

2.7(5) Official vaccinates under 30 months of age if accompanied by an official vaccination certificate.

2.7(6) Cattle accompanied by test charts and identified as having passed a negative test within 30 days.

2.7(7) Cattle from modified certified herds or modified certified brucellosis areas, providing they do not originate from a herd under quarantine, and further provided they are handled in accordance with 2.6(163), 2.6(2) "*d*". If such cattle are consigned by a dealer or pass through a nonapproved market, however, they lose their identity and brucellosis health status and must be handled according to 2.7(1) through 2.7(6) above. Known brucellosis reactors shall be handled in accordance with 2.6(163), 2.6(2) "*a*" and "*b*".

After the cattle are classified and identified, according to the purpose for which they are to be sold, this information shall be recorded on the check-in slip. All check-in slips, vaccination certificates, test charts, permits or other official documents shall be given to the official veterinary inspector. The veterinary inspector shall be held responsible for checking all animals and determining if the animals qualify under these exemptions. Animals that do not qualify must be tested or sold for slaughter.

2.8(163) Testing and vaccinating. All animals classified to be tested shall be tested prior to sale. All brucellosis tests shall be reported on the regular brucellosis test form ADE 8-28, and duplicate blood samples of all animals tested shall be forwarded to the Brucellosis Diagnostic Laboratory, Iowa State University, Ames, Iowa. All unvaccinated female calves not less than four months or more than eight months to be returned to Iowa farm for dairy or breeding purposes should be vaccinated against brucellosis with brucella-abortus vaccine strain 19 at owner's expense before being released.

2.9(163) Order of sale through auction markets. The following order shall be maintained in the sale of the various classes of cattle through auction markets whenever applicable:

2.9(1) Cattle from certified herds and modified certified brucellosis areas.

2.9(2) Animals having passed a negative test within 30 days and official vaccinates under 30 months of age.

2.9(3) Beef cattle sold for feeding and grazing.

2.9(4) Animals consigned direct to a slaughter.

2.9(5) Brucellosis reactor animals.

2.10(163) Releasing cattle. The veterinary inspector in charge of the livestock market shall be held responsible for seeing that all animals are released in conformance with Iowa laws, rules and federal regulation Title 9, Part 78—C.F.R., where interstate movement is involved. All release forms must be signed, stamped or otherwise approved by the veterinarian or someone authorized by him to do so. Any stamp so used must be initialed by the person by whom it is used. The livestock market management shall co-operate to see that all animals are released only on properly stamped or veterinary approved release forms.

2.11(163) Movement of cattle into modified certified brucellosis areas within Iowa. Cattle moving into a modified certified brucellosis area within Iowa on a negative 30-day test only shall be quarantined, held separate and apart from other cattle and retested at owner's expense in not less than 30 days nor more than 60 days.

[Filed December 23, 1959;
amended February 1, 1960]

CHAPTER 3
IMPORTATION OF LIVESTOCK AND POULTRY INTO THE STATE OF IOWA

3.1(163) General.

3.1(1) No animal, including poultry or birds of any species that is affected with, or that has been recently exposed to any infectious, contagious or communicable disease or that originates from a quarantined area, shall be shipped or in any manner transported or moved into Iowa; except animals approved for interstate shipment for immediate slaughter by the animal disease eradication division, United States department of agriculture.

3.1(2) All livestock or poultry shipped or in any manner transported or moved into Iowa shall be accompanied by an official health certificate or permit or both when required which must be attached to the waybill or shall be in possession of the driver of the vehicle or the person in charge of the animals.

3.2(163) Official health certificate.

3.2(1) An official health certificate is a legible record accomplished on an official form of the state of origin, issued by an accredited veterinarian and approved by the livestock sanitary official of the state of origin; or an equivalent form of the United States department of agriculture issued by a federally employed veterinarian.

3.2(2) A copy of the health certificate shall be forwarded immediately to the livestock sanitary official of the state of origin for approval and transmittal.

3.2(3) Health certificates on swine shall not be valid more than 48 hours from date of inspection. Certificates on all other livestock and poultry shall not be valid more than 30 days from date of inspection.

3.3(163) Permits.

3.3(1) Requests for permits should be directed to the Division of Animal Industry, Statehouse, Des Moines, Iowa 50319. Day phone number 515-281-5304.

3.3(2) All animals and poultry entering the state of Iowa under permit shall be consigned to a corporation or an individual who is a legal resident of the state of Iowa or to a legal agent authorized by law to do business within the state.

3.3(3) All permits shall be valid for one shipment only and will be void 15 days after date of issuance.

3.4(163) Cattle.

3.4(1) Apparently healthy cattle of any class may be consigned to public stockyards or a slaughtering establishment under federal inspection or to a livestock market or a slaughtering establishment jointly approved by the Iowa department of agriculture and the United States department of agriculture when accompanied by an official certificate, waybill or a signed owner's certificate stating:

a. Destination of livestock
b. Purpose of movement
c. Number of animals
d. Point of origin
e. Name and address of consignor.

3.4(2) *Scabies.* Cattle originating from herds or areas under quarantine for cattle scab will not be admitted.

3.4(3) *Tuberculosis.* Cattle of all classes may enter the state of Iowa when originating from a tuberculosis modified accredited area from a herd not under quarantine, or meet one of the following requirements:

a. Originate from a negative herd tested within 12 months prior to entry, showing date of herd test.

b. Negative tuberculin test applied within 30 days prior to entry.

3.5(163) Brucellosis—cattle.

3.5(1) Same as federal requirements for the interstate movement with the following additions: All brucellosis tests of cattle shall be conducted by state or federal laboratories or by approved laboratories under the direct supervision of the livestock sanitary official of the state of origin. All cattle regardless of breed, entering with negative brucellosis test, will be subject to quarantine to be retested for brucellosis no sooner than 30 days nor later than 60 days from date of last test.

3.5(2) No test required but waybill or health certificate necessary for the following classes:

a. Cattle going direct for immediate slaughter to an approved slaughter establishment.

b. Cattle going direct to a public stockyard or to a state-federal approved livestock market.

3.5(3) Steers and spayed heifers must be accompanied by a health certificate or permit and no test required.

3.5(4) *Cattle for dairy and breeding purposes.* Cattle for dairy and breeding purposes may enter from a herd not under quarantine, accompanied by an official health certificate from the state of origin, showing individual identity of all animals. All female cattle born after July 1, 1963, having reached the age of nine months must have been officially vaccinated for brucellosis prior to entry. Such vaccination meeting all brucellosis requirements for entry until the animal reaches the age of 30 months.

a. Dairy type females and bulls under eight months of age may enter on a health certificate. (No test or permit required.)

b. All females over 30 months of age, bulls over eight months of age (including brucella vaccinates) and females born before July 1, 1963, when not official vaccinates under 30 months of age must meet one of the following requirements:

(1) Originate from a certified brucellosis-free herd, showing date of last test and herd certification number.

(2) Originate from negative herds in modified certified areas providing the entire herd of origin has passed a negative test within 12 months prior to entry, date of test to be shown on health certificate.

(3) Proved negative to a brucellosis test conducted within 30 days prior to entry.

3.5(5) *Feeding or grazing.* Female cattle of recognized beef type under 21 months of age may enter under feeder quarantine for a period not to exceed 12 months (no test, but official certificate and a permit required). Steers and spayed heifers, official certificate or permit required.

NOTE: Springer heifers or heifers with calves by side will not be admitted for feeding or grazing purposes. Such cattle shall be classified as breeding cattle and meet the requirements as set forth above, 3.5(4).

3.5(6) However, female calves admitted for feeding or grazing purposes, if officially vaccinated at private expense, may be released from feeder quarantine for brucellosis.

3.6(163) Dogs. All dogs shall be accompanied by a health certificate. Dogs four months of age or older must be vaccinated for rabies by one of the following methods:

Modified live virus vaccine (chick embryo origin) not more than two years prior to entry.

Killed virus vaccine (caprine origin) not more than one year prior to entry.

Exceptions: Dogs for exhibition and performing dogs entering for a limited period of time.

3.7(163) Goats. Goats for dairy and breeding purposes may enter the state when meeting the following requirements:

1. Originate from a herd not under quarantine.

2. Proved negative to a brucellosis test conducted within a 30-day period prior to entry.

3. Originate from a tuberculosis modified accredited area or meet one of the following requirements:

Originate from a negative herd tested within 12 months prior to entry, showing date of herd test.

Negative tuberculin test applied within 30 days prior to entry.

3.8(163) Horses, mules and asses. Official health certificate showing freedom from disease.

3.9(163) Sheep. All sheep entering the state of Iowa for breeding or feeding purposes shall be accompanied by a permit and a health certificate.

3.9(1) *Dip.* All sheep must have been dipped in an approved dip within ten days prior to entry, unless originating in states or areas designated as scab-free by the ADE-USDA and qualifying under "*a*" or "*b*" below:

a. Moved direct from point of origin to point of destination, without being diverted enroute, or

b. Enter Iowa through public stockyards under federal supervision provided the identity of the animals is maintained and they are handled separate and apart from sheep originating in scab-infested areas or sheep of unknown origin.

3.9(2) *Slaughter.* Sheep can enter the state of Iowa when consigned direct for immediate slaughter to an approved slaughter establishment under federal supervision no dipping required.

3.9(3) *Scrapie.* Sheep from premises where scrapie has been known to exist within the last 42 months or sheep from flocks under surveillance for scrapie will not be admitted into Iowa.

3.10(163) Swine.

3.10(1) Interstate movement shall meet all federal requirements. Swine that have been fed raw garbage will not be admitted into Iowa for any purpose, except for immediate slaughter to a slaughtering establishment under federal inspection and in compliance with federal requirements for interstate shipment. Swine for feeding and breeding not immunized for hog cholera may enter only when meeting federal regulations.

3.10(2) Slaughter swine may enter without health certificate when consigned directly to a public stockyard or slaughter establishment under federal supervision or when sold or consigned to an assembly station which must move the swine directly to slaughter.

3.10(3) *Breeding or feeding.*

a. Health certificate including a statement by a qualified veterinarian that the swine have been inspected within 48 hours prior to entry and found healthy.

b. Hog-cholera vaccination required under one of the following methods:

(1) Killed or inactivated hog-cholera vaccine not less than 21 days nor more than six months prior to entry.

(2) Modified live virus and anti-hog-cholera serum not less than 21 days nor more than one year prior to entry.

(3) Modified live virus and anti-hog-cholera serum immunized less than 24 hours, to be in transit not more than 48 hours to point of destination.

c. All swine imported for breeding or feeding purposes not having been vaccinated 21 days or more prior to entry shall be vaccinated and quarantined on purchaser's premises and shall be maintained separate and apart from all other swine for a period of 21 days from date of vaccination.

d. The swine shall be identified by an ear tag affixed to either ear, bearing a number and the state of origin.

Exceptions:

(1) Registered swine for exhibition or breeding purposes.

(2) Swine for the manufacture of biological products.

(3) Swine for immediate slaughter.

e. Brucellosis. All breeding swine four months of age and over must meet one of the following requirements:

(1) Negative to brucellosis test conducted by an official laboratory of the state of origin within 30 days of entry.

(2) Originate from a validated brucellosis-free herd, tested within 12 months prior, the health certificate shall include the certificate herd number and date of last test.

3.11(163) Poultry. Poultry hatching eggs, baby chicks or turkey poults must be accompanied by an official health certificate from the state of origin.

3.11(1) *Chickens.*

a. All poultry-hatching eggs or baby chicks must originate from flocks or hatcheries that have a pullorum-typhoid clean rating given by the official state agency of the national poultry improvement plan or other state agency of the state of origin and so stated on the health certificate.

b. All boxes, crates and containers shall be new or disinfected before being used to move poultry into the state of Iowa and identified with a label co-operating in the national poultry improvement plan or other official state agency.

3.11(2) *Turkeys.*

a. No turkeys shall be imported for breeding purposes and no turkey eggs shall be imported for hatching purposes unless they originate from a flock that has been tested annually and can be classified as follows:

(1) Pullorum-typhoid clean as provided by the national turkey improvement plan or other official state agency.

(2) Salmonella typhimurium tested and no reactor found.

(3) Mycoplasma gallisepticum tested and no reactor found.

b. No person shall import turkeys or turkey eggs for breeding or hatchery purposes unless such turkeys or turkey eggs comply with the requirements of this rule.

c. All turkeys or turkey poults and turkey eggs imported into Iowa shall be accompanied by a certificate signed by the chief livestock official of the state of origin certifying that such turkeys, turkey poults or turkey eggs are from flocks complying with this rule or an equivalent program of the state of origin.

3.11(3) Health certificate or permits will not be required for the importation of poultry for immediate slaughter.

[Filed December 3, 1964]

DAIRY AND FOOD DIVISION

CHAPTER 4
FOOD

4.1(159) In the case of loaf bread where the plain or stock wrapper is used an insert slip, three by six inches, may be used, provided it is so placed

as to be plainly visible through the wrapper, and the printing thereon must have the approval of the department.

4.2(159) Unwrapped bread retailed at its place of manufacture is not considered by the department as food sold in package form, but it must be labeled as to its net weight either with a placard or on the container. Unwrapped bread and other bakery products may be transported to a place other than the place of manufacture provided the bread and other bakery products are transported in cabinets or other containers that are clean, sanitary and have tight closures to protect the bread or other bakery products from dust, dirt and contamination.

The bread and other bakery products may be displayed for sale at places other than their place of manufacture unwrapped, providing they are displayed in cases that are clean, sanitary and have closures affixed thereto and that the labeling requirements are complied with.

4.3(159) Benzoate of soda, in quantities not exceeding one-tenth of one percent, may be added to foods. The addition of benzoate of soda shall be plainly stated on the label of each package.

4.4(159) The department rules that a quart of strawberries shall weigh at least 20 ounces, with a reasonable tolerance of not more than one ounce under, when the quart box is well filled.

4.5(159) The word "Ham", except when prefixed by a word or words indicating the thigh of some other animal, shall be considered as applied only to the thigh of a hog prepared for food and must not be used in connection with the sale of a pork shoulder.

4.6(159) The state department of agriculture adopts the standards proclaimed by the United States department of agriculture pertaining to meats and meat products.

4.7(159) All metal ice cream containers in addition to being thoroughly washed must be lined with a parchment paper liner before being filled.

[Filed December 6, 1962]

CHAPTER 5
FOOD STANDARDS

5.1(190) French dressing. French dressing is the separable liquid food or the emulsified viscous fluid food prepared from and containing not less than 35 percent by weight of edible butter oil or vegetable oil and one or both of the acidifying ingredients specified in 5.1(1) hereof. One or both of the optional emulsifying ingredients specified in 5.1(2) hereof may be added provided, however, that the quantity thereof shall be not more than seventy-five hundreds of one percent by weight of the finished French dressing. It may be seasoned or flavored with any one or more of the ingredients specified in 5.1(3) hereof.

5.1(1) *Acidifying ingredients.*

a. Any vinegar or any vinegar diluted with water or any such vinegar or diluted vinegar mixed with the additional optional acidifying ingredient, citric acid, but in any such mixture the weight of citric acid is not greater than 25 percent of the weight of the acids of the vinegar or diluted vinegar calculated acetic acid. For the purpose of this paragraph, any blend or two or more vinegars is considered to be a vinegar.

b. Lemon juice or lime juice or both or any such juice in frozen, canned, concentrated or dried form or any one or more of these diluted with water.

5.1(2) *Optional emulsifying ingredients.*

a. Gum acacia (also called gum arabic), carob bean gum (also called locust bean gum), guar gum, gum karaya, gum tragacanth, extract of Irish moss, pectin, propylene glycolester of alginic acid, sodium carboxymethylcellulose or any mixture of two or more of these.

b. Liquid egg yolks, frozen egg yolks, liquid whole eggs, frozen whole eggs or any one or more of these with liquid egg white or frozen egg white. For the purpose of this paragraph, the quantity of egg-yolk-containing ingredients is calculated as the weight of the egg-yolk-solids contained therein.

5.1(3) *Seasoning or flavoring.*

a. Salt.

b. Sugar, dextrose, corn syrup, invert sugar syrup, nondiastatic maltose syrup, glucose syrup, honey. The foregoing sweetening ingredients may be used in syrup or dried form.

c. Mustard, paprika, other spice or spice oil or spice extract.

d. Monosodium glutamate.

e. Any suitable, harmless food seasoning or flavoring (other than imitations).

f. Tomato paste, tomato puree, catsup, sherry wine.

5.2(190) Mayonnaise dressing. Mayonnaise dressing is the emulsified semisolid food prepared from edible butter oil or vegetable oil; one or both of the acidifying ingredients specified in 5.1(1), except that if under (1) thereof vinegar diluted with water is used, it shall be to an acidity, calculated as acetic acid, of not less than two and one-half percent by weight, and if an ingredient or ingredients specified under (2) thereof be used diluted with water, it shall be to an acidity, calculated as citric acid, of not less than two and one-half percent by weight; and one or more of the egg-yolk-containing ingredients specified under 5.1(2) "*b*". Mayonnaise dressing may be seasoned or flavored with any one or more of the seasonings and flavoring ingredients specified in 5.1(3), except that no turmeric or saffron is used and no spice oil or spice extract is used which imparts to the dressing a color simulating the color imparted by egg yolk and except "*f*" thereof.

5.3(190) Salad dressing. Salad dressing is the emulsified semisolid food prepared from edible butter oil or vegetable oil; one or both of the acidifying ingredients specified in 5.1(1); one or more of the egg-yolk-containing ingredients specified in 5.1(2) "*b*", and a cooked or partly cooked starchy paste prepared with a food starch, tapioca flour, wheat flour, rye flour or any one or more of these; in the preparation of such starchy paste, water may be added. One or more of the optional emulsifying ingredients specified in 5.1(2) "*a*" may be added. Salad dressing may be seasoned or flavored with any of the ingredients specified in 5.1(3), except that no turmeric or saffron is used and no spice oil, spice extract or any other seasoning or flavoring is used which imparts to the salad dressing a color simulating the color imparted by egg yolk and except "*f*" thereof.

5.4(190) Labeling of dressings. When the additional optional acidifying ingredient as authorized in 5.1(1) is used, the label shall bear the statement "Citric acid added" or "With added citric acid" and where an optional emulsifying ingredient specified in 5.1(2) "*a*" is used, the label shall bear the statement ". . . . . added" or "With added . . . . . ", the blank being filled with the common name or names of the emulsifying ingredient or mixture of the emulsifying ingredients used. The statement showing the optional ingredients present shall conspicuously appear preceding or following the name of the dressing without intervening written, printed or graphic matter.

5.5(190) Tests for mastitis and results. A cow shall be considered to be in a mastitic condition whenever a milk sample taken therefrom shall exceed any of the following screening tests and test results:

California mastitis test	Weak positive (CMI 1)
Catalase test	30% oxygen
Milk quality test	Definite reaction
Modified whiteside test	Position (1+)
Wisconsin mastitis test	WMT value of 27

and a confirmatory count indicates a presence of somatic cells greater than 1,500,000 per ml when a direct microscopic or electronic somatic cell counting technique is used on the original milk sample.

These rules are intended to implement chapter 190 of the Code.

[Filed September 2, 1952; amended August 18, 1970]

CHAPTER 6
PRODUCTION AND SALE OF EGGS

6.1(196) Definitions.

6.1(1) The department shall construe the meaning of the word "processor" as contained in section 196.3 to be a person who stores eggs intended only for conversion to liquid, frozen or dried form or who converts eggs to liquid, frozen or dried form.

6.1(2) "Eggs unfit for human food" are described in the U.S. Standards and Grades of Eggs as follows:

Loss. An egg that is inedible, smashed or broken so that the contents are leaking, cooked, frozen, contaminated or containing bloody whites, large blood spots, large unsightly meat spots or other foreign material.

Inedible eggs. Eggs of the following descriptions are classed as inedible: Black rots, white rots, mixed rots (addled eggs), sour eggs, eggs with green whites, eggs with stuck yolk, moldy eggs, musty eggs, eggs showing blood rings, eggs containing embryo chicks (at or beyond the blood stage and any eggs that are adulterated as such term is defined pursuant to the Federal Food, Drug and Cosmetic Act.

6.2(196) License. Each person or firm operating at more than one location must provide a list of all locations when applying for a license. Each subsidiary plant will be furnished a copy of the original license.

6.3(196) Producers and hatcheries exempted.

6.3(1) Hatcheries exempted under this section handling eggs to be used for hatching purposes, shall clearly identify such eggs by marking the ends of each case clearly with the words "Eggs for Hatching" in letters a minimum of one-half inch in height.

6.3(2) Producers selling to anyone other than direct to consumers must obtain a license as required in section 196.4. Institutions, restaurants, schools or any other business, facility or place in which eggs are prepared or offered for food for use by its patrons, residents, inmates or patients shall not be deemed to be consumers. (See section 196.14.)

6.4(196) Retailers exempted. There is no requirement in the Iowa Code for egg retailers or egg dealers to furnish bond.

6.5(196) Candling and grading required. Eggs to be resold other than as manufactured eggs may be candled and graded by other than first buyer providing producer identity is retained. (See section 196.15.)

6.6(196) Candling and grading room. The department survey shall include an examination of and evaluation of the lighting of the room, the type of equipment being used, volume of eggs handled, the candling and grading procedures and the adequacy of personnel and equipment to handle the volume of eggs to be candled or graded. General sanitation must reflect that an edible product is being handled.

6.7(196) Grades. The United States Standards for Consumer Grades and Weight Classes for shell eggs shall be the standards of grade requirements for Iowa. These grades shall include AA, A and B. Sizes shall be Jumbo, Extra Large, Medium, Small and Peewee.

TABLE 1 — SUMMARY OF IOWA CONSUMER GRADES FOR SHELL EGGS

Iowa Consumer Grade	At least 80 percent (lot average)[1] must be	Tolerance Permitted[2]	
		Percent	Quality
Grade AA or Fresh Fancy Quality	AA Quality.	15 to 20 Not over 5[3]	A. B, C, or Check.
Grade A	A Quality or better.	15 to 20 Not over 5[3]	B. C or Check. C.
Grade B	B Quality or better.	10 to 20 Not over 10[3]	Dirty or Check.

1. In lots of two or more cases or cartons, see table 2 of this section for tolerances for individual case or carton within a lot.
2. Within tolerance permitted, an allowance will be made at receiving points or shipping destination for ½ percent leakers in Grades AA, A, and B.
3. Substitution of higher qualities for the lower qualities specified is permitted.

TABLE 2 — TOLERANCE FOR INDIVIDUAL CASE OR CARTON WITHIN A LOT

Iowa Consumer Grade	Case-minimum quality — percent[1]	Carton-minimum quality — number egg[1]
Grade AA or Fresh Fancy Quality	70% AA 20% A 10% B, C or Check.	8 eggs AA. 2 eggs A. 2 eggs B, C or Check.
Grade A	70% A 20% B 10% C or Check.	8 eggs A. 2 eggs B. 2 eggs C or Check.
Grade B	70% B 10% C 20% Check or Dirty.	8 eggs B. 2 eggs C. 2 eggs Check or Dirty.

1. Substitution of higher qualities for lower qualities specified is permitted.

TABLE 3 — IOWA WEIGHT CLASSES FOR CONSUMER GRADES FOR SHELL EGGS

Size or Weight class	Minimum net weight per dozen	Minimum net weight per 30 dozen	Minimum weight for individual eggs at rate per dozen
	OUNCES	POUNDS	OUNCES
Jumbo	30	56	29
Extra Large	27	50½	26
Large	24	45	23
Medium	21	39½	20
Small	18	34	17
Peewee	15	28	—

6.8(196) Records required. The first licensed buyer or the person candling eggs for the first licensed buyer shall keep a daily record of the number of eggs received from each producer that are to be candled or candled and graded. Such records are to be kept for a period of six months and shall be available for inspection by a duly authorized representative of the department of agriculture.

6.9(196) Certificate.

6.9(1) Eggs moving from an egg-grading plant to a processor must have stamped on the ends of each case the grade and the name and address or code number of firm doing such grading. All previous labels on case shall be defaced before applying new label.

6.9(2) The words "eggs that are being processed by a processor" shall be construed by the department to mean the eggs received from producers by firms actually engaged in breaking eggs for liquid, frozen or dried products at the same establishment where the said eggs are received.

These rules are intended to implement chapter 196 of the Code.

[Filed January 11, 1966]

CHAPTER 7
DAIRY

7.1(194) The department recognizes the Babcock test or the Gerber test as an approved method of testing milk or cream for milk-fat and other dairy products as specified in Standard Methods for the Examination of Dairy Products (11th Edition). Said publication is hereby incorporated into this rule by this reference and made part thereof insofar as applicable, a copy of which is on file with the secretary of state.

All milk or cream, graded or tested, as provided by chapters 194 and 195 of the Code shall be graded and tested by samples which shall be taken in the following manner:

1. Samples may only be taken from vats or tanks which pass the required organoleptic test; the temperature of bulk tanks from which the sample is to be taken must be not higher than 50° F.
2. The temperature of the bulk tank shall then be recorded.
3. The quantity of the milk or cream in the bulk tank shall then be measured and the measurement recorded.
4. The bulk tank shall then be agitated for a period of not less than five minutes.
5. The sample shall then be taken by using a sterile dipper and the liquid shall be placed in an approved sterile container.
6. The sample of milk or cream shall then be immediately stored at a temperature of between 32° F. and 40° F.

7.2(194) The following makes of guaranteed test bottles and pipettes are approved by the department for universal use in Iowa: The Nafis, the Kimball and the Wagner. All test bottles should be graduated to the half point.

7.3(194) All persons using the Babcock test or the Gerber test shall retain within the premises an exact copy of all transactions and all appliances where the test is used, as well as samples of all milk and cream tested, properly labeled so that a representative of the department by testing said samples with said appliances can check the cream bought with the cream on hand and thereby verify the test given in each transaction, both copies and cream samples must be held until 6:00 p.m. of the second day following the application. When Sundays or legal holidays intervene, the samples shall be held one additional day. When considered necessary, the department may require any sample held for a longer period.

7.4(194) All stations shall be equipped with test bottles graduated to the half point and all cream testing should be read to the half point.

7.5(194) The examination for a tester's license must be approved by the department.

7.6(194) When cream stations are conducted in connection with a produce house, garage, oil station, barber shop, tire shop, cigar factory, shoe repair shop, harness shop or other businesses that have objectionable odors or material contaminating factors, the stations must be partitioned off by a dust-proof tight wall with outside light and ventilation.

7.7(194) No common carrier or other person shall transport any crate of poultry or similar dirt distributing packages on top of milk or cream cans.

7.8(194) The handling of hides, furs, live poultry or other articles that might contaminate is prohibited in cream rooms or any room where food is prepared or handled.

7.9(194) In case where a flavor is added to a milk or skimmed milk drink or compound, it is not considered by the department as violating section 190.6, when the fat of said flavor does not exceed one-half of one percent of the whole and said compound is labeled as required by section 189.11.

7.10(194) Standards for the production, processing and distribution for Grade "A" pasteurized, pasteurized (grade not declared) and Grade "A" raw milk shall conform to United States public health service recommended milk ordinance and code, 1953 edition, which is hereby incorporated into this rule by this reference and made a part thereof insofar as applicable; a copy of which is on file with the secretary of state.

7.11(194) A rating of 90 percent or more calculated according to the rating system as contained in public health service Publication

No. 678, "Methods of Making Sanitation Ratings of Milk Sheds", shall be necessary to receive or retain a Grade "A" certification under chapter 192 of the Code. Said publication is hereby incorporated into this rule by this reference and made a part thereof insofar as applicable; a copy of which is on file with the secretary of state.

7.12(194) Evaluation of methods and reporting of results for approval of a laboratory shall be based on procedures and tests contained in Standard Methods for the Examination of Dairy Products (11th Edition) and Methods of Analysis of the Association of Official Agricultural Chemists (9th Edition). Said publications are hereby incorporated into this rule by this reference and made a part thereof insofar as applicable; a copy of each being on file with the secretary of state.

MANUFACTURING MILK

7.13(194) Legal milk.

7.13(1) All milk delivered to a creamery, cheese factory or milk processing plant shall be subject to an examination, as provided in chapter 194 of the Code, which shall be made at the plant if delivered in separate containers or before mixing with other milk collected in a bulk tank container and the examination shall be made by a licensed grader.

7.13(2) Every creamery, cheese factory or milk processing plant which gathers its milk by a bulk tank vehicle whether operated by an independent contractor or otherwise shall provide for a licensed grader in the operation of said bulk tank and for examination of said milk by the grader upon receipt thereof at the bulk tank.

7.13(3) The common change occurring in milk is the development of acidity, causing an acid flavor and odor, or even complete or partial coagulation. Other undesirable changes include sweet curdling, ropiness, gassiness and abnormal flavors, odors and colors. All milk showing any of these defects or any other defect must be rejected.

7.13(4) The presence of any insect in milk shall be sufficient cause for rejection.

7.14(194) New producers.

7.14(1) A "new producer" is a person selling milk for the first time who, therefore, has not previously produced milk under this Act. A person who formerly produced farm separated cream and is now selling, for the first time, whole milk for manufacturing purposes is considered a new producer. Similarly a producer who previously supplied Grade "A" milk or sold milk in another state not reciprocating on quality transfers and offering manufacturing milk for sale in the state of Iowa for the first time, shall be classified as a new producer. A new producer is also one who has not offered manufacturing milk for sale since the enactment of this milk grading law on July 4, 1959.

7.14(2) A licensed milk grader must examine, smell and taste the first lot of milk purchased from a new producer. This milk must also be tested immediately for extraneous matter or sediment content. However, it is not necessary to subject the milk of the new producer on the first delivery to a bacterial quality test. A test of this nature, however, must be made on a properly collected sample from this producer within 15 days thereafter.

7.14(3) If the sediment disc on the can of milk selected for test shows sediment in excess of 2.50 mg., all cans in the shipment shall be tested for sediment content in the same manner. Any milk showing sediment in excess of 2.50 mg. shall be rejected by the creamery, cheese factory or milk processing plant and not used for human consumption.

7.15(194) Bacterial tests and classes.

7.15(1) To clarify some of the difficulties that may be encountered when attempting to express the results of these tests, the following explanations are presented:

7.15(2) *Class I milk.*

a. Resazurin test: Color of dye-milk mixture not reduced beyond 5P7/4 in two and three-fourths hours. Methylene blue test: Color of dye-milk mixture not reduced in five and one-half hours.

b. The direct microscopic (clump) count or standard plate count was 200,000 per milliliter or less.

7.15(3) *Class II milk.*

a. Resazurin test: Color of dye-milk mixture not reduced beyond 5P7/4 in one and one-half hours, but reduced beyond 5P7/4 in two and three-fourths hours. Methylene blue test: Color of dye-milk mixture not reduced in two and one-half hours, but reduced in five and one-half hours.

b. The direct microscopic (clump) count or standard plate count was more than 200,000 but not more than 3,000,000 per milliliter.

7.15(4) *Class III milk (probationary milk).*

a. Resazurin test: Color of dye-milk mixture reduced beyond 5P7/4 in more than three-fourths hour, but less than one and one-half hours. Methylene blue test: Color of dye-milk mixture reduced in more than one hour, but less than two and one-half hours.

b. The direct microscopic (clump) count or standard plate count was over 3,000,000 per milliliter.

7.16(194) Testing and exclusion of Class III milk.

7.16(1) If a producer desires to change to another plant or factory, it is required that his first shipment of milk be accompanied by a written quality release form from his former purchaser.

This quality release form must be requested by the producer in person or in writing from the manager of the plant previously purchasing his milk. (Plant being asked for quality release shall give it to person with written order or deliver to producer making the request.)

7.16(2) If the quality release form of this producer shows that his last test for bacterial quality indicated Class III milk, the new purchaser must then test his first shipment of the transferring producer's milk by:

a. Organoleptic grading (physical appearance, taste and smell).

b. Sediment or extraneous matter.

c. An estimate of bacterial quality must be run within seven days from the last test date entered on the transfer form.

7.16(3) In other words, his previous record of bacterial quality is transferred with him. For example, if a producer has had two consecutive Class III bacterial estimates at one plant and then decides to sell his milk to another plant, he may not start as a new producer without previous history. This section requires that his milk be tested for four consecutive weeks if he has not improved the quality of his milk during this period. Upon transferring to a new plant, the next bacterial test is entered on his record as the third of the four required tests.

7.16(4) If the fourth consecutive test is still Class III, this producer's milk may not be purchased by any plant for human consumption. The plant refusing this milk is required to notify the area resident inspector of the dairy and food division of the Iowa department of agriculture, immediately, in writing.

7.17(194) Unlawful milk. Four weekly Class III bacterial tests make rejection compulsory and said milk shall not be accepted thereafter by any plant or creamery until authorized by the secretary of agriculture.

7.18(194) Price differential. All producers are to be treated equally.

7.19(194) Penalties for plants and producers.

7.19(1) The scope of this section is broad, covering all plant employees, operators and milk haulers.

7.19(2) A producer selling milk to a new purchaser without first obtaining a quality release from the former buyer, would be an example of noncompliance with the law and these rules.

This rule is intended to implement chapters 194 and 195 of the Code.

[Filed November 28, 1962; amended March 11, 1964; April 22, 1968]

CHAPTER 8
AGRICULTURAL SEEDS

8.1(199) The term "agricultural seeds" shall mean, in addition to those listed in section 199.1(2) of the Code, all such seeds listed in section 201.2(h) Rules and Regulations, Federal Seed Act of August 9, 1939, U.S. department of agriculture, agricultural marketing service, No. 156 and amendments, with the following exceptions:

Alfilaria-Erodium cicutarium (L).
Bluegrass, annual-Poa annua L.
Chess, soft-Bromus mollis L.
Hemp-Cannabis sativa L.
Johnson grass-Sorghum halepense (L.)
Mustard-Brassica juncea (L)
Mustard, black-Brassica nigra
Rape, bird-Brassica campestris L.
Rape, turnip-Brassica campestris vars.
Sorghum almum-Sorghum almum
Wild-rye, Canada-Elymus canadensis L.
Wild-rye, Russian-Elymus junceus

8.2(199) Seed testing, sampling and analysis shall be regulated by sections 201.39 to 201.63 and 201.65; Rules and Regulations, Federal Seed Act, insofar as they do not conflict with Iowa law.

8.3(199) Lawn and turf mixtures. For lawn and turf mixtures the name of the kind or kind and variety of seed components to be named in order of their predominance may be met by naming the kind or kind and variety of seed components in the order of their predominance under the separate headings "Fine Textured Grasses" and "Coarse Kinds". The following shall be named as "Fine Textured Grasses": Colonial bentgrass (*Agrostis tenuis*), creeping bentgrass (*Agrostis palustris*), velvet bentgrass (*Agrostis canina*), Kentucky bluegrass (*Poa pratensis*), rough bluegrass (*Poa trivialis*), wood bluegrass (*Poa nemoralis*), Canada bluegrass (*Poa compressa*), red fescue (*Festuca rubra*), chewing fescue (*Festuca rubra var. commutata*) and sheep fescue (*Festuca ovina*). All other kinds or kinds and varieties must be listed under the heading "Coarse Kinds".

8.4(199) Definitions.

[The following has been added to the list of noxious weed seeds under the authority of section 199.1(4) of the Code.]

8.4(10) Giant Foxtail—*Setaria Faberi.*

8.5(199) Labeling of treated seeds shall be regulated by section 201.31"*a*" of the Rules and Regulations, Federal Seed Act, of August 1, 1939, U.S. department of agriculture consumer and marketing service, No. 156 and amendments, insofar as they do not conflict with Iowa law.

These rules are intended to implement chapter 199 of the Code.

[Filed June 7, 1962; amended September 14, 1965; November 13, 1969]

CHAPTER 9
PESTICIDES

9.1(206) Definitions and standards.

9.1(1) The following definitions are hereby adopted.

a. The term "insecticide" means any substance or mixture of substances intended for preventing, destroying, repelling or mitigating any insects and related forms which may be present in any environment whatsoever.

b. The term "fungicide" means any substance or mixture of substances intended for preventing, destroying, repelling or mitigating any fungi.

c. The term "rodenticide" means any substance or mixture of substances intended for preventing, destroying, repelling or mitigating rodents or any other vertebrate animal which the secretary shall designate to be a pest.

d. The term "herbicide" means any substance or mixture of substances intended for preventing, destroying, repelling or mitigating any weed or undesirable plant.

e. The term "nematocide" means any substance or mixture of substances intended for preventing, destroying, repelling or mitigating nematodes or subterranean pests.

f. The term "defoliant" means any substance or mixture of substances intended for causing the leaves or foliage to drop from the plant with or without causing abscission.

g. The term "desiccant" means any substance or mixture of substances intended for artificially accelerating the drying of plant tissue.

h. The term "nematode" means invertebrate animals of the phylum nemathelminthes and class nematoda, that is, unsegmented round worms with elongated, fusiform or saclike bodies covered with cuticle and inhabiting soil, water, plants or plant parts; may also be called nemas or eelworms.

i. The term "insect" means any of the numerous small invertebrate animals generally having the body more or less obviously segmented, for the most part belonging to the class Insecta, comprising six-legged, usually winged forms, as for example, beetles, bugs, bees, flies and to other allied classes of arthropods whose members are wingless and usually have more than six legs, as for example, spiders, mites, ticks, centipedes and wood lice.

j. The term "fungi" means all nonchlorophyll-bearing thallophytes, that is, all nonchlorophyll-bearing plants of a lower order than mosses and liverworts, as for example, rusts, smuts, mildews, molds, yeasts and bacteria except those on or in living man or other animals.

k. The term "rodent" means any animal of the order Rodentia, including, but not limited to, rats, mice, rabbits, gophers, prairie dogs and squirrels.

l. The term "weed" means any plant which grows where not wanted.

9.1(2) Additional definitions and standards which are consistent and applicable to the pesticide Act shall be those established by the Association of American Pesticide Control Officials.

9.2(206) Methods of analysis. The current methods of analysis of the Association of Official Agricultural Chemists of North America shall be adopted as the official methods insofar as they are applicable, and such other methods shall be used as may be necessary to determine whether the product complies with the law.

9.3(206) Registration required. No person shall distribute, give, sell or offer to sell any pesticide which has not been registered with the department of agriculture.

9.4(206) Registration of products. Two exact copies of the labeling of each proposed product shall be submitted with the application. Also, there shall be submitted an ingredient statement, which shall comply with the provisions of rule 9.13(206) herein, the proposed directions for use of the product, and a list of the specific pests, for control of which it is to be sold, if such information is not contained in the labeling. Other pertinent information concerning inert ingredients and physical properties of the product shall also be included on request by the secretary.

9.5(206) Registration, general application of. A registration of a pesticide is held to apply to the product even though manufactured at or shipped from other than the registered address. When a product has been registered by a manufacturer or jobber, no registration shall be required of other sellers of the product so registered, provided shipments or deliveries thereof are in the manufacturer's or registrant's original, unopened and properly labeled container.

9.6(206) Conditional refusal or cancellation of registration and registration under protest. Any of the following causes is sufficient to justify a conditional refusal or cancellation of registration of a product, with notice to the registrant of the manner in which the article, label or other material fails to comply with the pesticide Act, and with opportunity for the registrant to make necessary corrections before resubmitting the product and the label.

1. If the labeling bears any statement, design or graphic representation relative thereto, or to its ingredients, which is false or misleading in any particular;

2. If the product is found to be an imitation of, or illegally offered for sale under the name of another pesticide;

3. If the labeling bears reference to Iowa registration number;

4. If the labeling accompanying the pesticide does not contain directions for use which are necessary and, if complied with, adequate for the protection of the public;

5. If the label does not contain a warning or caution statement which may be necessary and, if complied with, adequate to prevent injury to living man and other vertebrate animals;

6. If the label does not bear an ingredient statement on that part of the immediate container and on the outside container or wrapper, if there be one, through which the ingredient statement on the immediate container cannot be clearly read under customary conditions of purchase. Provided, however, the secretary may permit the ingredient statement to appear prominently on some other part of the container, if the size or form of the container makes it impracticable to place it on the part of the retail package which is displayed;

7. If any word, statement or other information required to appear on the label or labeling is omitted or not prominently placed thereon and in such terms as to render it likely to be read and understood under customary conditions of purchase and use;

8. If an insecticide, nematocide, antibiotic, bactericide, fungicide or herbicide is found to be injurious to living man or other useful vertebrate animals or to vegetation (except weeds), to which it is applied or to the person applying such pesticide when used as directed or in accordance with commonly recognized safe practice; or if a plant regulator, defoliant or desiccant when used as directed is found to be injurious to living man or other vertebrate animals or vegetation to which it is applied or to the person applying such pesticide; provided, however, that physical or physiological effect on plants or parts thereof shall not be deemed to be injurious, when this is the purpose for which the plant regulator, defoliant or desiccant was applied in accordance with label claims and recommendations;

9. If the pesticide is misbranded;

10. If the registrant has been guilty of fraudulent and deceptive practices in the evasion or attempted evasion of the pesticide Act or any rules promulgated thereunder; provided, however, that no registration shall be revoked until the registrant shall have been given an opportunity for a hearing by the secretary or his agent;

11. If the registrant upon notice insists that corrections in the article, labeling or other material as specified are not necessary, and requests in writing that the article be registered, the secretary shall register the article under protest and shall warn the registrant in writing of the apparent failure of the article to comply with the provisions of the pesticide Act and regulations thereunder. In such event the secretary shall publicize the fact through releases to duly recognized mass news media.

9.7(206) Changes in labeling or ingredient statement. Changes in the labeling or ingredient statement in registered pesticides shall be submitted in advance to the secretary for his approval. The registrant must describe the exact change desired and proposed effective date and such other pertinent information that justify such changes. After the effective date of a change in labeling or ingredient statement the product shall be marketed only under the new claims or ingredient statement, except that a reasonable time may be allowed by the secretary for disposal of properly labeled stocks of the old product. Changes in the composition shall not be allowed if such changes would result in a lowering of the product's value as a pesticide.

9.8(206) Label requirements. Each package of pesticide sold separately shall bear a complete label. The label shall contain the name, brand or trade-mark of the product; name and address of the manufacturer, registrant or person for whom manufactured; directions for use which are necessary and if complied with, adequate for protection of the public; statement of net content in terms of weight or measure in general use; and an ingredient statement. The label of every pesticide, if necessary to prevent injury to man, other animals and useful vegetation, must contain a warning or caution statement, in nontechnical language based on the hazard involved in the use of the pesticide. In addition, any pesticide highly toxic to man shall be labeled with a skull and crossbones and with the word "poison" prominently in red on a background of distinctly contrasting color; the first-aid antidote for the poison shall be given and instructions for safe disposal of containers.

NOTE: Products subject to deterioration may bear on their label a statement such as "not to be sold or used after .... date ...." The use of such a statement, however, in no way relieves the manufacturer of his responsibility for label claims.

9.9(206) Directions for use—when necessary. Directions for use are required whenever they are necessary for the protection of the public. The public includes not only users of pesticides but also those who handle them or may be affected by their use, handling, or storage. Directions for use are considered necessary in the case of most small retail containers which go into the hands of users, and in the case of larger containers with the following exception:

Directions may be omitted if the pesticide is to be used by manufacturers in their regular manufacturing processes; provided, the label clearly shows that the product is intended for use only in manufacturing processes and bears an ingredient statement giving the name and percentage of each of the active ingredients.

9.10(206) Other claims. No claim shall be made for products in any written, printed or graphic matter accompanying the product at any time which differ in substance from written representations made in connection with registration.

9.11(206) Name of product. The name of the product shall appear on the labeling so as not to emphasize any one ingredient or otherwise be misleading. It shall not be arranged on the label in such a manner as to be confused with other terms, trade names or legends.

9.12(206) Brand names, duplication of, or infringement on. A brand name is distinctive with reference to the material to which it applies and the registration of a pesticide under the same brand name by two or more manufacturers or shippers should be denied or refused. This principle applies also to the registration of brand names so similar in character as to be likely to be confused by the purchaser. In the event the same name or a closely similar one is offered by another manufacturer, the secretary may decline the said name a second time, for registration unless required to do so by an order of court.

9.13(206) Ingredient statement.

9.13(1) *Location of ingredient statement.* The ingredient statement must appear on that part of the label displayed under customary conditions of purchase except in cases where the secretary determines that, due to the size or form of the container, a statement on that portion of the label is impractical, and permits such statement to appear on another side or panel of the label. When so permitted, the ingredient statement must be in larger type and more prominent than would otherwise be possible. The ingredient statement must run parallel with other printed matter on the panel of the label on which it appears and must be on a clear contrasting background not obscured or crowded.

9.13(2) *Names of ingredients.* The well-known common name of the ingredient must be given or, if the ingredient has no common name, the correct chemical name. If there is no common name and the chemical composition is unknown or complex, the secretary may permit the use of a new or coined name which he finds to be appropriate for the information and protection of the user. If the use of a new or coined name is permitted, the secretary may prescribe the terms under which it may be used. A trade-mark or trade name may not be used as the name of an ingredient except when it has become a common name.

9.13(3) *Percentages of ingredients.* Percentages of ingredients shall be determined by weight and the sum of the percentages of the ingredients shall be 100. Sliding scale forms of ingredient statements shall not be used.

9.13(4) *Designation of ingredients.*

a. Active ingredients and inert ingredients shall be so designated, and the term "inert ingredient" shall appear in the same size type and be equally as prominent as the term "active ingredients".

b. If the name but not the percentage of each active ingredient is given, the names of the active and inert ingredients shall respectively be shown in the descending order of the percentage of each present in each classification and the name of each ingredient shall be given equal prominence.

9.13(5) *Active ingredient content.* As long as a pesticide is subject to the Act the percentages of active ingredients declared in the ingredient statement shall be the percentages of such ingredients in the pesticide.

9.14(206) Net contents. Each package of pesticide shall show the net weight or measure of content, either stenciled or printed on the package or container, or on a tag attached thereto. Indefinite statements of content such as "....oz. when packed" shall not be used. Statements of liquid measure, or of specific gravity or density of liquid preparations, or expression of composition in terms of pounds per gallon shall be made on the basis of 68°F. (20°C.) except when other basis has been established through trade custom.

9.15(206) Coloration of highly toxic materials. The white powder pesticides hereinafter named shall be colored or discolored in accordance with this rule. Provided, however, that any such white powder pesticide which is intended solely for use by a textile manufacturer or commercial laundry, cleaner or dyer as a moth-proofing agent, which would not be suitable for such use if colored and which will not come into the hands of the public except when incorporated into a fabric, shall not be required to be so colored or discolored in accordance with this rule. The hues, values and chromas specified are those contained in the Munsell Book of Color, Munsell Color Company, 10 East Franklin Street, Baltimore, Maryland.

9.15(1) The coloring agent must produce a uniformly-colored product not subject to change in color beyond the minimum requirements during ordinary conditions of marketing and storage and must not cause the product to become less effective or cause damage when used as directed or in accordance with commonly recognized safe practice.

9.15(2) Standard lead arsenate, basic lead arsenate, calcium arsenate, magnesium arsenate, zinc arsenate, zinc arsenite and barium fluosilicate shall be colored any hue, except the yellow-reds and yellows, having a value of not more than eight or a chroma of not less than four or shall be discolored to a neutral lightness value not over seven.

9.15(3) Sodium fluoride and sodium fluosilicate shall be colored blue or green having a value of not more than eight and a chroma of not less than four or shall be discolored to a neutral lightness value not over seven.

9.15(4) Other white powder pesticides may be required to be colored or discolored after investigation and public hearing.

9.15(5) The secretary may permit other hues to be used for any particular purpose if the prescribed hues are not feasible for such purposes, and if such action will not be injurious to the public.

9.15(6) The coloration requirements above shall apply to the materials named therein and not to nonhighly toxic mixtures consisting of other ingredients with highly toxic materials.

9.16(206) Illegal acts. All pesticides, whether registered or not, sold or offered for sale shall comply with the provisions of section 206.3(1) of the pesticide Act.

The secretary shall examine pesticides from time to time, and if it appears at any time that a pesticide fails to comply with any provision of the pesticide Act, notice may be given to the manufacturer or seller thereof and an opportunity to present his views either orally or in writing about the alleged violation. If it then appears that the provisions of this Act have been violated, a statement of the facts may be sent to the county attorney in the county in which the violation occurred for the purpose of instituting criminal proceedings.

Also, if a pesticide, its labeling and other materials do not comply with the Act at any time, the secretary may cancel the registration and issue a registration under protest and publicize the said protest.

9.17(206) Guarantee of pesticide.

9.17(1) Any manufacturer or distributor or other person residing in the United States may furnish to any person to whom it sells a pesticide a guarantee that the pesticide was lawfully registered at the time of sale and delivery to such person, and that the pesticide complies with all the requirements of the Act and rules herein.

9.17(2) No reference to or suggestion that a guarantee of registration has been given shall be made in the labeling of any pesticide.

9.18(206) Shipments for experimental use. A pesticide shipped or delivered for experimental use shall not be considered a violation of section 206.3(1) of the pesticide Act.

9.18(1) When the pesticide is shipped or delivered for experimental use under the supervision of any federal or state agency authorized by law to conduct research.

9.18(2) By others if the pesticide is not sold and if the container thereof is plainly and conspicuously marked "For Experimental Use Only—Not To Be Sold".

9.18(3) Or provided that a written permit has been obtained from the secretary either specific or general subject to such restrictions or conditions as may be set forth in the permit. The application for such a permit shall contain such information as may be required by the secretary; and in addition the proposed labeling thereon shall bear (1) the prominent statement "For Experimental Use Only" on the container label; (2) a caution or warning statement which may be necessary and if complied with adequate for the protection of those who may handle or be exposed to the experimental products; (3) the name and address of the applicant; (4) the name or designation of the formulation; (5) if the pesticide is to be sold, the statement of the names and percentages of the principal active ingredients in the product.

9.18(4) A pesticide intended for experimental use shall not be offered for general sale by a retailer or others, or advertised for general sale.

9.19(206) Enforcement.

9.19(1) *Collection of samples.* Samples of pesticides and devices shall be collected by an official investigator or by any employee of the state who has been duly designated by the secretary, by entry into any place during reasonable business hours.

9.19(2) *Notice of apparent violation.* If from an examination or analysis a pesticide appears to be in violation of the pesticide Act, a notice in writing shall be sent to the person against whom criminal proceedings are contemplated, giving him an opportunity to offer such written explanation as he may desire. The notice shall state the manner in which the sample fails to meet the requirements of the Act and the regulations.

9.19(3) Any person may in addition to his reply to such notice, file within 20 days of its receipt a written request for an opportunity to present his views orally in connection therewith.

9.19(4) No notice or hearing shall be required prior to the seizure of any pesticide or device. Any pesticide or device may be seized for confiscation by condemnation if it is being distributed, sold or offered for sale in violation of law as provided in section 206.10 of the pesticide Act.

9.19(5) If an article is condemned, it shall after entry of court decree be disposed of by destruction or sale and the net proceeds, if any, shall be paid to the state treasurer.

9.20(206) Chemical deterioration of products.

9.20(1) The following pesticides are subject to deterioration because of lapse of time since manufacture:

a. Pyrethrum (dust and wettable powder)
b. Rotenone (dust and wettable powder)
c. Diazinon-starter fertilizer mixtures
d. Mixtures of zineb and malathion
e. DDVP (syrup baits)

9.20(2) The label on such pesticides shall bear the confidential code number or designation approved by the secretary which shows the date of manufacture.

9.21(206) Highly toxic. A pesticide which falls within any of the following categories when tested on laboratory animals (mice, rats and rabbits) is highly toxic to man within the meaning of these principles:

9.21(1) *Oral toxicity.* Those which produce death within 14 days in half or more than half the animals of any species at a dosage of 50 milligrams at a single dose, or less, per kilogram of body weight when administered orally to ten or more such animals of each species.

9.21(2) *Toxicity on inhalation.* Those which produce death within 14 days in half or more than half of the animals of any species at a dosage of 200 parts or less by volume of the gas or vapor per million parts by volume of air when administered by continuous inhalation for one hour or less to ten or more animals of each species, provided such concentration is likely to be encountered by man when the pesticide is used in any reasonably foreseeable manner.

9.21(3) *Toxicity by skin absorption.* Those which produce death within 14 days in half or more than half of the animals (rabbits only) tested at a dosage of 200 milligrams or less per kilogram of body weight when administered by continuous contact with the bare skin for 24 hours or less to ten or more animals.

9.21(4) *Designation as highly toxic.* Provided, however, that the secretary may exempt any pesticide which meets the above standard but which is not in fact highly toxic to man, from these principles with respect to pesticides highly toxic to man, and may after a hearing designate as highly toxic to man any pesticide which experience has shown to be so in fact.

9.21(5) *Human data.* If the secretary finds, after opportunity for hearing that available data on human experience with any pesticide indicates a toxicity greater than that indicated from the above described tests on animals, the human data shall take precedence and if he finds that protection of the public health so requires, the secretary shall declare such pesticide to be highly toxic to man for the purposes of this Act and the regulations thereunder.

9.22(206) Sale or possession of sodium fluoroacetate. No person shall sell or possess any sodium fluoroacetate except federal, state, county, municipal officers or their deputies for use in their official duties in pest control; research or chemical laboratories in their respective fields; regularly licensed pest control operators for use in their own service work; and wholesalers or jobbers of pesticides for sale to the aforementioned persons; or for export.

9.23(206) Sale or possession of thallium. No person shall sell or possess any thallium or thallium compound except federal, state, county, municipal officers or their deputies for use in their official duties in pest control; research or chemical laboratories in their respective fields; regularly licensed pest control operators for use in their own service work; properly registered ant, mole and rodent poisons containing thallium expressed as metallic not more than one percent; wholesalers or jobbers of pesticides for sale to the aforementioned persons; or for export.

9.24(206) Warning, caution and antidote statements. In order to promote uniformity between the requirements of the Iowa pesticide Act and requirements of the several states and the federal government, section 206.6 of the Iowa pesticide Act provides for the adoption of rules and regulations in conformity with those prescribed by the United States department of agriculture. Warning, caution and antidote statements required to appear on labels of pesticides under the pesticide Act shall conform to the warning, caution and antidote statements required under interpretation 18 and revisions thereof of the regulations for the enforcement of the federal insecticide, fungicide and rodenticide Act, which interpretation 18 and revisions thereof are hereby incorporated into this rule by this reference and made a part hereof.

9.25(206) Forms of plant and animal life and viruses declared to be pests. Each of the following forms of plant and animal life and viruses is declared to be a pest under the Act when it exists under circumstances that make it injurious to plants, man, domestic animals, other useful vertebrates, useful invertebrates or other articles or substances:

1. Mammals, including but not limited to dogs, cats, moles, bats, wild carnivores, armadillos and deer;
2. Birds, including but not limited to starlings, English sparrows, crows and blackbirds;
3. Fishes, including but not limited to the jawless fishes such as the sea lamprey, the cartilaginous fishes such as the sharks and bony fishes such as the carp;
4. Amphibians and reptiles, including but not limited to poisonous snakes;
5. Aquatic and terrestrial invertebrates, including but not limited to slugs, snails and crayfish;
6. Roots and other plant parts growing where not wanted;
7. Viruses, other than those on or in living man or other animals.

9.26(206) Regulations dealing with commercial applicators.

9.26(1) All licensed commercial applicators shall establish and maintain a program of continued training of personnel who apply or disperse pesticides.

9.26(2) The secretary shall administer a testing program designed to test an applicator's knowledge of the usage, the rates of application and precautions to be taken in use of any or all products which he will be applying.

9.26(3) All commercial applicators of pesticides shall be required to have a license. The secretary shall require proof of competence and responsibility before issuing a license, and for this purpose may require the commercial applicator and his or its foremen who supervise the application of any pesticide in this state, to pass a written examination before issuing the license.

9.26(4) Every public official or foreman who applies pesticides on public property or supervises such application shall be licensed and shall pass a written examination and be required to qualify as competent, before being issued his license.

9.26(5) Employees of state or federal research organizations (USDA Plant Pest Control Division, Iowa Agricultural Experiment Station and other official agencies authorized by law to conduct research in the field of pesticides) are not required to take the written examination or to be issued a license.

9.26(6) Every licensee shall make records of his activities which shall include on each pesticide applied:

a. The name of the licensee

b. The name and address of the landowner or customer

c. An adequate and precise description of the land area involved in treatment outdoors, and the exact address or location of any building or buildings treated, wherever located

d. The date of application

e. The pesticide product used

f. The quantity used and rate of application

g. The direction and estimated velocity of wind at time of application to any outdoor area.

9.26(7) A copy of such records shall in every case be kept in the applicator's file for a period of five years from date of application. If any claim or suit is brought within such period of time, said records shall be kept on file available for subpoena until final disposition of the claim or suit. Any such records shall be made available to the secretary or his representative upon request at any time.

9.26(8) Any person seeking to obtain a commercial applicator's license in this state shall submit proof of financial responsibility to the secretary, and upon obtaining a license such person shall maintain proof of financial responsibility at all times while such license shall be in effect. Proof of financial responsibility may consist of:

a. Proof of unencumbered financial net worth of the applicant or licensee if a resident of this state, in an amount not less than $5,000; exclusive of his homestead, or

b. The deposit with the secretary of a surety bond in favor of any person or persons who may suffer damage from the application of a pesticide, issued by a corporate surety company authorized to do business in this state, which surety bond shall be in an amount not less than $5,000, however, that the aggregate liability of the surety to all such persons shall, in no event, exceed the amount of such bond; or

c. The filing of an insurance policy of an insurer authorized to do business in this state, insuring the licensee and any of his agents against liability resulting from the application of a pesticide, which insurance policy shall be in an amount not less than $5,000 against damage to persons or property.

d. Regardless of the method of proof which may be used by the applicant under this rule, the form and substance of said proof must meet with approval of the secretary of agriculture.

9.26(9) The secretary may revoke or suspend any license of a commercial applicator after conviction of the holder for violation of any provision of the pesticide Act.

9.26(10) If upon an investigation of the commercial applicator it appears at any time that said applicator has failed to comply with or has violated any provision of the pesticide Act or has failed to pay any final judgment rendered against him for damages within 60 days, or has failed or refused to follow safe and recommended procedures for the application of any pesticide, a written notice shall be given to said applicator and an opportunity to present his views orally or in writing about the alleged acts or violation, and after said notice and an opportunity to appear, the secretary may refuse to renew the applicator's license.

9.26(11) Custom fertilizer manufacturers who add a pesticide to their custom blends shall register a label for each guaranteed level of each pesticide added to fertilizer mixtures. The applicator who drives a spreader truck applying fertilizer pesticide mixtures shall be required to have an applicator's license, unless he is under the supervision of a licensee.

9.27(206) Use of high volatile esters. The use of high volatile esters formulations of 2,4-D and 2,4,5-T, the alcohol fraction of which contains five or fewer carbons, shall be prohibited in the counties of Harrison, Mills, Lee, Muscatine and that part of Pottawattamie county west of Range 41 West of the 5th P.M. to become effective upon filing.

[Filed December 2, 1963; amended May 15, 1964]

CHAPTER 9A
FERTILIZERS

9A.1(200) Additional plant food elements besides N, P and K. Additional plant nutrients, besides nitrogen, phosphorus and potassium, when mentioned in any form or manner shall be registered and shall be guaranteed. Guar-

antees shall be made on the elemental basis. Sources of the elements guaranteed shall be shown on the application for registration. The minimum percentages which will be accepted for registration are as follows:

Element	*Percent*
Calcium (Ca)	1.00
Magnesium (Mg)	0.50
Sulfur (S)	1.00
Boron (B)	0.02
Chlorine (Cl)	0.10
Cobalt (Co)	0.0005
Copper (Cu)	0.05
Iron (Fe)	0.10
Manganese (Mn)	0.05
Molybdenum (Mo)	0.0005
Sodium (Na)	0.10
Zinc (Zn)	0.05

Guarantees or claims for the above-listed additional plant nutrients are the only ones which will be accepted. Proposed labels and directions for use of the fertilizer shall be furnished with the application for registration upon request. Any of the above-listed elements which are guaranteed shall appear in the order listed, immediately following guarantees for the primary nutrients, nitrogen, phosphorus and potassium. Warning or caution statements are required on the label for any product which contains 0.03 percent or more of boron in a water-soluble form or 0.001 percent or more of molybdenum.

9A.2(200) Warning required. When any product which contains 0.03 percent or more of boron in a water-soluble form or 0.001 percent or more of molybdenum is incorporated in a commercial fertilizer a special warning tag or statement must be furnished to the purchaser. This tag or statement shall carry the word "WARNING" in letters at least one inch in height; it shall state the crops for which the fertilizer is to be used and it shall state that use of the fertilizer on any other than those recommended may result in serious injury to the crops. The tag or statement is to be attached to or printed on the bag or other container in which the fertilizer is sold; for bulk fertilizers the statement must be placed on the invoice or other document which shall accompany delivery and be supplied to the purchaser at the time of delivery as provided in section 200.6(2).

9A.3(200) Specialty fertilizer labels. Specialty fertilizer products shall be labeled to show the following information, if not appearing on the face or display side in a readable and conspicuous form, shall occupy at least the upper third of a side of the container.

Net Weight
Brand Name
Grade
Guaranteed Analysis:
Total Nitrogen (N) ..... _____%
_____% Ammoniacal Nitrogen**
_____% Nitrate Nitrogen**
_____% Water Insoluble Nitrogen*
Available Phosphorus (P) or P_2O_5 or both ..... _____%
Soluble Potassium (K) or K_2O or both .... _____%
Additional Plant Nutrients, if claimed, and in the order and not less than the minimum percentage as shown in rule 9A.1 of this chapter.
**Potential Acidity or Basicity____% or _____lbs.
Calcium Carbonate Equivalent per ton.
Name and Address of Registrant

NOTES:
*If claimed or the statement "organic" or "slow acting nitrogen" is used on the label.
**If claimed or required.

9A.4(200) Pesticides in fertilizers. When an insecticide, herbicide or any other additive for pest control is added to fertilizer the product must be registered and guaranteed with respect to the kind and percentage of each of these additives as well as with respect to plant food elements. In a prominent manner the label on the package shall state the crops for which the fertilizer is to be used and shall state that the use of the fertilizer on any other crops or under conditions other than those recommended may result in serious injury to crops.

9A.5(200) Prior to cancellation of registration and license. At any time the following conditions prevail the secretary will notify the person guaranteeing the fertilizer that the quality of such fertilizers must be improved and may request that the distributor notify the secretary of further sales to be made in the state prior to manufacturing, mixing or blending.

9A.5(1) When more than 20 percent of five or more samples of all fertilizers sampled from a plant are in violation.

9A.5(2) When more than 20 percent of five or more samples of one grade from a plant are in violation.

If further sampling and analysis of fertilizer covered by "1" or "2" above shipped after the first official notice does not indicate performance above these standards the guarantor's license may be suspended or sale may be stopped on all such lots of a specific fertilizer grade.

9A.6(200) Standards for the storage and handling of anhydrous ammonia. The Standards for the Storage and Handling of Anhydrous Ammonia as published in the A.A.I. Standard No. M-1 January, 1965, revision shall be adopted as the official standards for administration of the Iowa Fertilizer Law with the following exceptions:

1. Section 1.2.1(K) entitled "Implement of husbandry" is deleted.

2. Section 2.4 is deleted and in its place insert the following:

2.4 Location of containers and permanently installed unloading points. Containers shall be located outside of buildings other than those especially constructed for this purpose. Permanent storage and permanently installed unloading points shall be located outside of densely populated areas, and subject to the approval of the Iowa department of agriculture, which can determine whether the storage and unloading points are located a safe distance from the line of property which may be built on. However, in the absence of a specific determination, this distance shall not be less than 50 feet. In any case, the distance from a source of drinking water shall not be less than 50 feet, and the distance from any school, hospital or any other place of public assembly shall not be less than 400 feet.

3. Section 2.11.4 is deleted and in its place insert the following:

2.11.4 Tank cars shall be unloaded only through a permanently installed unloading point which meets all requirements of these regulations including location, design, construction, safety equipment and operation.

4. Section 5.10 Transfer of Liquids, add new subsection 5.10.3.

5.10.3 Tank trucks, semitrailers and trailers for transportation of anhydrous ammonia above 3,000 gallons total water capacity shall be unloaded only through a permanently installed unloading point which meets all requirements of these regulations including location, design, construction, safety equipment and operation.

These rules are intended to implement chapter 200 of the Code.

[Filed July 13, 1965;
amended November 14, 1966]

CHAPTER 10
BULK TANKS FOR MILK

10.1(192) The milk room may be built inside of a barn or other building if completely enclosed, properly ventilated and kept in a sanitary condition. A vestibule is not required.

10.2(192) The milk room shall have a floor drain with a trap and the floor shall be so graded as to provide proper drainage. A drain opening through the wall will not be permitted.

10.3(192) The walls and ceilings of the milk room shall be sealed and of material that can be easily cleaned.

10.4(192) All windows that open or can be opened shall be screened against flies or other insects.

10.5(192) Doors shall be self-closing, made of solid material, and open outward. Doors swinging both ways will not be approved, but may have sliding doors, if self-closing. The outside door may be a screen door opening outward.

10.6(192) A well-ventilated room shall mean a room in which the air is changing or moving so as to keep it free from moisture, bad odors, excessive heat and dust.

10.7(192) The bulk tank shall be located in such a manner that the drain is accessible for cleaning and rodding.

10.8(192) The hose port shall be located on the exterior wall of the milk room in such a manner that the hose can be kept clean and sanitary at all times.

10.9(192) The usual safety regulations for a 220-volt weather proof electrical connection for a milk pump shall be followed. The switch box shall be placed on the inside wall of the milk room.

10.10(192) A properly located tank shall mean one with easy access to all areas for cleaning and servicing. There must be space for a person to move around on all sides of the tank for proper cleaning.

[Filed November 18, 1963]

CHAPTER 11
COMMERCIAL FEEDS

11.1(198) The definitions and standards for commercial feeds adopted by the Association of American Feed Control Officials are hereby adopted for the enforcement of the Iowa commercial feed law.

11.2(198) Brand and product names.

11.2(1) The brand or product name must not be misleading. If the name indicates the feed is made for a specific use the character of the feed must conform therewith.

11.2(2) Single ingredient feeds shall have a product name in accordance with the designated definitions of feed ingredients as recognized by the Association of American Feed Control Officials.

11.2(3) A name of a commercial feed, other than those containing hormones, shall not be derived from one or more ingredients of a mixture to the exclusion of other ingredients and shall not be one representing any component of a mixture unless all components are included in the name.

11.2(4) The word "vitamin", or a contraction thereof, or any word suggesting vitamin can be used only in the name of a feed which is represented to be a vitamin supplement, and which is labeled with the minimum content of each vitamin declared, as specified in 11.3(3).

11.2(5) The term "mineralized" shall not be used in the name of feed except "Trace Mineralized Salt". When so used, the product must contain significant amounts of trace minerals which are recognized as essential for animal nutrition.

11.3(198) Expression of guarantees.

11.3(1) The sliding-scale method of expressing guarantees (For example: "Protein 15-18

percent") is prohibited, except on minerals where a specific maximum and minimum guarantee is required.

11.3(2) Drugs in commercial feeds shall be guaranteed in terms of percentage by weight, except that antibiotics if guaranteed must be guaranteed in terms of grams per pound of feed when more than one gram per pound is present; and in terms of grams per ton when lesser amounts are presented.

11.3(3) Vitamins, guarantees of minimum vitamin content of feeds and feed supplements shall be stated in units or milligrams per pound as provided herein: Vitamin E in International Units or as the vitamin part of vitamin E active compounds in milligrams per pound, vitamin A, other than precursors of vitamin A, in USP Units, vitamin D in products offered for poultry feeding in International Chick Units, vitamin D for other uses in USP Units, all other vitamins as true vitamins, not compounds, excepting only pyridoxine hydrochloride, choline chloride, and thiamine; oils and concentrates containing vitamin A or vitamin D or both may be additionally labeled to show vitamin content in units per gram; and providing that the term "d-pantothenic acid" be used in stating the pantothenic acid guarantee.

11.3(4) Minerals, except salt (NaCl), when quantitatively guaranteed, shall be stated in terms of percentage of the element. If any minerals are guaranteed, all required (Ca, P, I, Salt, if added) shall be shown on the label. When calcium or salt guarantees are given in the guaranteed analysis, such shall be stated as minimum and maximum and conform to the following:

a. When the minimum is 5.0 percent or less, the maximum shall not exceed the minimum by more than one percent.

b. When the minimum is above 5.0 percent, the maximum shall not exceed the minimum by more than 20 percent provided that in no case shall the difference between the minimum and maximum exceed 5.0 percent.

11.4(198) Ingredient statement.

11.4(1) Each feed ingredient must be specifically named.

11.4(2) When water is added in the preparation of canned foods for animals, water must be listed as an ingredient.

11.4(3) The term "dehydrated" may precede the name of any product that has been artificially dried.

11.4(4) No reference to quality or grade of an ingredient shall appear in the ingredient statement of a feed.

11.4(5) Pursuant to section 198.5 alternative listing of any ingredients given within each of the following groups may be shown on the registration:

a. Corn, hominy feed, wheat, barley and grain sorghums.

b. Cottonseed meal, soybean meal, peanut meal and linseed meal.

c. Beet molasses, corn sugar molasses, citrus molasses and cane molasses.

11.5(198) Labeling.

11.5(1) The information required in section 198.6 must appear in its entirety on one side of a label or on one side of the container; except for feeding instructions which may be placed on the reverse side of the label if necessary. This information shall not be subordinated or obscured by other statements and designs.

11.5(2) The names of all ingredients must be shown in letters or type of the same size.

11.6(198) Minerals.

11.6(1) When the word "iodized" is used in connection with a feed ingredient, the ingredient shall not contain less than 0.007 percent iodine, uniformly distributed.

11.6(2) Mineral phosphatic materials for feeding purposes shall be labeled with a guarantee for the minimum and maximum percentages of calcium, minimum percentage of phosphorous and the maximum percentage of fluorine.

11.6(3) The fluorine content of any mineral or mineral mixture which is to be used directly for the feeding of domestic animals shall not exceed 0.30 percent for cattle; 0.35 percent for sheep; 0.45 percent for swine; and 0.60 percent for poultry.

Soft rock phosphate, rock phosphate or other fluorine-bearing ingredients may be used only in such amounts that they will not raise the fluorine concentration of the total (grain) ration above the following amounts: 0.009 percent for cattle; 0.01 percent for sheep; 0.014 percent for swine; and 0.35 percent for poultry.

11.7(198) Nonprotein nitrogen. Urea and ammonium salts of phosphoric and carbonic acids are acceptable ingredients in cattle, sheep and goat feeds only; these materials shall be considered adulterants in proprietary feeds for other animals and birds; the maximum percentage of equivalent protein from nonprotein nitrogen must appear immediately below crude protein guarantee; and the name of the substance supplying the nonprotein nitrogen must appear in the ingredient list. If feed contains more than 8.75 percent of equivalent protein contributed by nonprotein material or if the equivalent protein contributed

by nonprotein materials exceeds one-third of the total crude protein, the label shall bear (1) a statement of proper usage and (2) the following statement in type of such conspicuousness as to render it likely to be read and understood by ordinary individuals under customary conditions of purchase and use:

WARNING: This feed should be used only in accordance with directions furnished on the label.

11.8(198) Artificial color. An artificial color may be used in feeds only if it has been shown to be harmless to animals. No material shall be used to enhance the natural color of a feed or feed ingredient whereby inferiority would be concealed.

11.9(198) Drugs, stock tonics. Before a registration is accepted for a commercial feed or stock tonic which contains drugs or other ingredients which are potentially harmful to animals, the distributor may be required:

1. To submit evidence to show the safety of the feed when used according to the directions which the distributor furnishes with the feed: (A current food and drug administration clearance will be accepted as evidence of safety).
2. To furnish a written statement that adequate written or printed warnings and feeding directions will accompany each delivery of the feed; and
3. To state the percentage of the drug or other ingredients in a prominent place on the label of the feed.

11.10(198) Stock tonics. For efficient administration under section 198.3(7), stock tonics shall include all remedies or drugs for adding to the drinking water. Products for animal feeding containing more than 20 percent of drugs or remedies for the cure, mitigation, prevention or treatment of diseases or other nonnutritional conditions shall be registered as stock tonics even though the product may be carried on feed ingredients or be intended for mixing with feed. Products containing less than 20 percent of drugs or remedies and represented as remedies for nonnutritional conditions may be registered as stock tonics.

11.11(198) Viable weed seed. Screening and byproducts of grains or seeds containing viable weed seed shall not be used as an ingredient in the manufacture of commercial feed, unless the feed is so finely ground or otherwise treated so that the weed seed will not germinate.

[Filed March 11, 1964]

CHAPTER 12
STATE ENTOMOLOGIST

12.1(267) Nursery stock. Defined as cultivated or wild woody plants such as all kinds of fruit trees and vines, forest or shade trees, evergreens, ornamental shrubs and vines; all kinds of berry plants including strawberry plants, flowering bulbs and corms; roots or rooted herbaceous plants to be used for ornamental purposes; fruit pits, nuts and other seeds or fruit, forest and ornamental trees and shrubs; and such other plants and parts thereof which are to be offered for sale in other states where Iowa inspection and certificate coverage of such plants or parts is required as a condition of entrance therein.

12.2(267) Person. Defined as any individual or combination of individuals, corporation, company, society, association or partnership, institution or public agency.

12.3(267) A nurseryman. A person who grows or propagates nursery stock for sale or distribution.

12.4(267) A nursery. Any grounds or premises on or in which nursery stock is propagated or grown for sale or distribution, including any grounds or premises on or in which nursery stock is being fumigated, treated, stored or packed for sale or movement.

12.5(267) A dealer. Any person, not a grower or propagator of nursery stock, who obtains nursery stock for the purpose of sale or distribution, said nursery stock usually being kept on hand so delivery or partial delivery may be made at the time of sale.

12.6(267) An agent or salesman. A person who has authority to represent a nurseryman, dealer or another agent in soliciting wholesale or retail orders for nursery stock, but who keeps no nursery stock on hand for advertising or display purposes or for delivery at the time an order is taken.

12.7(267) No nursery stock shall be brought into the state or transported or offered for sale or transportation within the state unless such shall have first been inspected and found free of any seriously injurious insect pest or plant disease.

12.8(267) Every shipment, car, package, bag, box, carton or parcel of nursery stock brought into the state or transported or offered for sale or transportation in the state must carry firmly attached thereto a tag bearing a copy of the shipper's current valid certificate of inspection certifying that the stock has been inspected by a duly authorized inspector and found free of seriously injurious insect pests and plant disease. If for any reason the shipment requires a federal inspection certificate or tag, the same must be attached.

12.9(267) Every out-of-state nurseryman or dealer who ships nursery stock into the state of Iowa must file with the state entomologist of Iowa a signed copy of his current valid certificate of inspection. This, together with the payment of either a fee of ten dollars or a fee equivalent to that charged by his state to out-of-state nurserymen and dealers, shall entitle him to an out-of-state certificate as shown herewith. The state entomologist of Iowa shall determine which fee shall be paid.

State of Iowa
Department of Agriculture
Office of the State Entomologist
Number . . . Station "A", Ames, Iowa . . . , 19 . .
Out-of-State Certificate

This certifies that .....
(name)
of ..... has filed a certificate of
(address)
inspection with the State Entomologist of Iowa, stating that .....
(his, her, their, its)
nursery stock has been duly inspected for the season of 19 . . . , and found to be apparently free from dangerously injurious insect pests and plant diseases.

Permission is hereby granted to the above named nursery to ship nursery stock into the State of Iowa for the year ending September 1, 19 . . . , provided that all rules and regulations of any federal quarantine, as well as those of the State of Iowa, governing the movement of such stock into Iowa, be complied with.

This certificate expires September 1, 19 . . . , but may be revoked for cause.

.....
Secretary of Agriculture

.....
State Entomologist

12.10(267) Notwithstanding the provision of rule 12.9(267), the state entomologist may enter into reciprocal agreements with the responsible officers of other states whereby the required out-of-state certificate may be granted to nurserymen and dealers of such states without the payment of the required fee provided Iowa nurserymen are permitted to ship nursery stock into such states without having to pay a fee for a certificate granting that privilege; and provided, further, the state entomologist shall find that other states before issuing their certificates require inspections equal to those required by the Iowa law.

12.11(267) The state entomologist may also enter into reciprocal agreements with the responsible officers of other states under which certified nursery stock may be sold and shipped into the state by nurserymen and dealers of such states without furnishing bond, special permit tags of all kinds, filing of special invoices, fumigation of stock, special inspection at time of shipment or any other special inspection other than that required for the issuance of the regular form of certificate of inspection, signing of special statements concerning the location of nursery stock or any requirements other than the filing of the certificate of inspection.

12.12(267) All shipments of nursery stock coming into the state as well as intrastate shipments are subject to inspection in transit or at destination at the option of the inspector, and if found infested with any dangerously injurious insect pest or plant disease, may be returned to the consignor, treated, destroyed or otherwise disposed of as the inspector may deem advisable and direct. In case return to the consignor or treatment is ordered same shall be at the expense of the consignor.

12.13(267) The inspection of nurseries shall be made annually or oftener if the nature of the stock is such as to require inspection more frequently or if certain clean-up measures are recommended and further inspection is needed as a consequence.

12.14(267) If deemed advisable by the state entomologist, any nurseryman or dealer must give references satisfactory to the state entomologist as to his integrity and moral character before a certificate shall be issued to him.

12.15(267) Nursery stock lined out or heeled in and held over after the spring delivery season for nursery stock is over shall not be offered for sale or transportation without reinspection and certification. The usual inspection fee shall be paid for such inspection and certification.

12.16(267) Nursery stock purchased in other states and shipped into this state, as well as stock purchased within the state, received under a recognized certificate may be reshipped by Iowa nurserymen or dealers under their own certificate.

12.17(267) Iowa nurserymen and dealers may, if deemed advisable by the state entomologist, be required to furnish a complete list of names of firms or individuals, together with their addresses, from whom they receive nursery stock.

12.18(267) Growers of greenhouse plants, hardy herbaceous perennials, bulbs or tubers of flowering plants or other plants, who wish to make shipments into states requiring that an inspection certificate accompany such plants, must make application for inspection services before such certificate can be issued. The same rules and fees shall apply here as for inspection of nursery stock.

12.19(267) Each applicant for inspection, if the stock is found satisfactory, shall upon the payment of the required fee be granted a certificate of the form shown below. All certificates are valid up to the first of September following date of issue, the certificate year dating from September 1 to September 1, even though the inspections often must be made during the summer months preceding the date of issuance of the certificate.

State of Iowa
Department of Agriculture
Office of the State Entomologist
Number . . . Station "A", Ames, Iowa . . . , 19 . . .
Certificate of Nursery Inspection

This certifies that the nursery premises and the growing nursery stock consisting of .....
.....
(general nursery stock—evergreens, strawberries, raspberries)
.....
(ornamental shrubs, etc.)
and belonging to .....

have been inspected by a duly authorized nursery inspector as provided by the "Iowa Crop Pest Act"—Chapter 267 of the Code.

Permission is hereby granted to the above-named nursery to sell and ship (1) stock of his own growing which upon inspection has either been found apparently free from dangerously injurious insect pests and plant diseases, or if infested or diseased, has been treated as prescribed by this office, and (2) stock obtained from other sources approved by this office, provided that a tag on which a copy of this certificate has been printed, is attached to each package, bale, box or carload lot shipped or delivered.

This certificate applies only to stock which has been officially inspected for the year ending September 1, 19... and expires on that date, but may be revoked by the State Entomologist at any time for cause.

.....
Secretary of Agriculture

.....
State Entomologist

12.20(267) Dealers in nursery stock shall secure a dealer's certificate from the state entomologist under which to carry on their business within the state. For the purposes of this regulation each separate place of business whether owned or operated by an individual, firm or corporation shall be considered as distinct and operate under its own certificate. In case of a system of chain stores or chain nurseries each store or nursery shall obtain a dealer's certificate from the state entomologist for the conduct of the nursery business in such store or nursery. The fee for each dealer's certificate shall be five dollars.

12.21(267) Each applicant for a dealer's certificate shall be required to subscribe to the following affirmation:

Nursery Dealer's Affidavit

State of Iowa
County of..... ss.
I, ...
of .....
State of Iowa, dealer in nursery stock being duly sworn, declare that I grow no nursery stock for sale myself at .....
and that I will buy and sell only stock which has been inspected and certified by a duly authorized nursery inspector in the state where the stock is grown. I have purchased or expect to purchase only nursery stock which has been inspected for the year ending September 1, 19... from .....
.....
.....

I further agree that, if during the said year, I obtain nursery stock from any parties other than those named above, I will give written notice of such purchase to the State Entomologist of Iowa, and will not sell or otherwise dispose of such stock without his written consent to do so.

I affirm that as a nursery dealer I have and will maintain proper facilities for keeping all nursery stock to be offered for sale in a viable condition pending such sale.

Subscribed and sworn to before me by the said.....this...day of....., 19.....

Notary Public in and for County of .....

12.22(267) The certificates granted dealers shall be of the form shown below and shall be valid from the date of issue to the following September 1.

STATE OF IOWA
DEPARTMENT OF AGRICULTURE
OFFICE OF THE STATE ENTOMOLOGIST

Number.....:Ames, Iowa....., 19...

Dealer's Certificate

This certifies that ..... (name)
of ..... (address) having made affidavit to buy and sell only nursery stock which has been inspected and certified in accordance with the provisions of "The Iowa Crop Pest Act", chapter 267 of the Code, and to file with the state entomologist a complete list of all sources from which he desires to procure stock for reselling, is authorized to sell and ship nursery stock as a dealer; provided that a tag on which a copy of this certificate has been printed is attached to each package, box or other container in which shipment is made.

This certificate expires September 1, 19...., but may be revoked sooner for cause.

.....
Secretary of Agriculture

.....
State Entomologist

12.23(267) If deemed advisable by the state entomologist, each applicant for a dealer's certificate shall furnish a written recommendation of one banker, one businessman and three nurserymen and must satisfy the state entomologist as to his business honesty and integrity.

12.24(267) Individuals, firms or corporations who are offering nursery stock for sale at nursery grounds, stores, roadside stands, public market places or any other place shall have and maintain proper facilities for keeping all nursery stock in a viable condition and shall keep such stock in a viable condition pending sale, and shall keep in view of the public the proper kind of certificate showing that they have the right to be offering nursery stock for sale.

12.25(267) Nursery stock being offered for sale shall be watered so that the roots are sufficiently moist at all times. Nursery stock dug with a ball of earth around the roots shall be kept in sawdust, shingletoe, peat, sphagnum moss or other moisture-holding material, not toxic to the plants, of sufficient depth to cover at least two-thirds of the ball of earth. Dormant nursery stock dug without a ball of earth around the roots may be dis-

played with the roots covered with soil or any of the above moisture-holding material or may be stored in a storage room where the temperature and humidity are controlled to maintain the viability of the nursery stock. When the state entomologist or his authorized representative finds nursery stock being offered for sale under conditions which do not meet the requirements of this rule he may order that sale of the nursery material be stopped until the requirements are complied with.

12.26(267) Each plant collected from the wild state and offered for sale must bear a label plainly marked "Collected from Wild", unless such plant material is grown in the nursery row for at least one growing season before being offered for sale, then such disclosure is not required.

12.27(267) Railroad and express companies, postal systems, bus lines and any other public carriers of any kind whatsoever are prohibited from accepting, for shipment, nursery stock not bearing a proper certificate of inspection. If the shipper, when notified that the certificate is lacking, does not supply same, the said companies or officials shall report said fact to the state entomologist of Iowa, giving name and address of the party offering said stock for shipment.

See sections 267.13 and 267.14 of Iowa crop pest Act.

12.28(267) Out-of-state nurserymen or dealers who have their orders filled by Iowa nurserymen and shipped directly to their customers and want the stock to go out as their shipment will be required to take out a dealer's license with their address as that of nursery where orders are filled and have attached to each shipment a tag bearing a copy of the certificate. Otherwise the shipment must have attached to it the grower's certificate of the nursery filling the order and the stock represented as belonging to them.

12.29(267) Any nurseryman or dealer advertising nursery stock for sale in Iowa should give in his advertisement the number of the certificate under which he is operating in the state of Iowa.

12.30(267) Quarantine regulations, either state or federal, will take precedence over the above rules in regard to any nursery plant or class of plants affected by them.

12.31(267) Certificates issued to nurserymen or dealers are nontransferable and are for the exclusive use of the one to whom they are issued. Each and every form of these may be revoked by the state entomologist at any time.

12.32(267) Cereal leaf beetle (Oulema melanopa).

12.32(1) The insect cereal leaf beetle (Oulema melanopa) in any living state of its development is hereby declared a dangerously injurious insect pest. A certification of inspection as to freedom from cereal leaf beetle (Oulema melanopa) is hereafter required on all of the following listed commodities coming into Iowa, from or through any area of the United States, which is under cereal leaf beetle (Oulema melanopa) quarantine.

a. Barley, oats, wheat and all other small grains which have not been cleaned to meet state seed sales requirements.

b. All hay and straw for use as forage or bedding.

c. Fodder and plant litter of any kind.

d. Sod.

e. Used harvesting machinery.

12.32(2) A certificate of inspection as to freedom from cereal leaf beetle (Oulema melanopa) must be executed by the state entomologist or other plant regulatory official of the quarantined state from which the commodity originates or passes through.

12.32(3) Any person bringing any of said commodities into Iowa for fairs, rodeos or any other public or private exhibition or sale, shall furnish said certificate, at the time of arrival at his destination in Iowa to the fair board or other public or private official in charge of said exhibition or sale.

12.32(4) Said required certificate shall be in addition to any other health certificate required by Iowa law or rule and in addition to any certificate required by any federal law, rule or regulation.

12.32(5) It shall be the duty of all said public or private officials in charge of said exhibition or sale, who receive such a certificate, to promptly file the same with the Iowa State Entomologist at the Department of Agriculture, Des Moines, Iowa.

These rules are intended to implement chapter 267 of the Code.

[Filed October 19, 1961; amended March 20, 1968]

CHAPTER 13

Reserved for future use

CHAPTER 14

WEIGHTS AND MEASURES

All tolerances and specifications for the weights and measures division were adopted from the U.S. Bureau of Standards Handbook H.44 published September 1949.

14.1(215) The term "sensibility reciprocal" is defined as to the weight required to move the position of equilibrium of the beam, pan, pointer or other indicating device of a scale, a definite amount.

14.2(215) A Platform Scale is a scale having a load receiving platform carried on multiplying levers which transmit the load to the beam or other reading element, such platform having four or more lines of support comprised of bearings which rest directly upon knife edges in the multiplying levers. The tolerances to be allowed in excess or

deficiency on all platform scales shall not be greater than the values shown in the following table:

MAINTENANCE TOLERANCES FOR LARGE-CAPACITY SCALES, EXCEPT LIVESTOCK, COAL-MINE, VEHICLE, AND FREIGHT SCALES, WHEEL-LOAD WEIGHERS, AND RAILWAY TRACK SCALES.

Known Test Load Pounds	Tolerance on Ratio Test Ounces	Tolerance on Weighbeam Reading-face and Unit-Weight Indications Ounces
99 or less	½	1
100 to 199	2	2
200 to 299	3	4
300 to 399	4	6
400 to 499	5	8
500 to 599	7	10
600 to 799	8	12
		Pounds
800 to 999	11	1
1000 and over	¼ lb. per 1000 lbs.	1 lb. per 1000 lbs.

14.3(215) T.3.3. For vehicle, axle-load, livestock, animal, crane and railway track scales. The basic maintenance tolerance on vehicle, axle-load, livestock, animal, crane and railway track scales shall be two pounds per 1,000 pounds of test load (0.2 percent); the acceptance tolerance shall be one-half the basic maintenance tolerance.

14.4(215) Reserved for future use.

14.5(215) A counter scale is a scale of any type which is especially adopted on account of its compactness, light weight, moderate capacity and arrangements of parts for use upon a counter or table. The tolerance on all counter scales shall be as follows:

Nominal capacity Pounds	Minimum tolerance value Ounce
3 or less	1/16
4 to 7	1/8
8 to 14	1/4
15 to 23	3/8
24 to 39	1/2
40 to 50	5/8

14.6(215) A spring scale is a scale in which the weight indications depend upon the change of shape or dimensions of an elastic body or system of such bodies.

14.6(1) A computing scale is a scale which, in addition to indicating the weight, indicates the total price of the amount of commodity weighed for a series of unit prices and must be correct in both its weight and value indications.

14.6(2) All computing scales shall be equipped with weight indicators and charts on both the dealer's and customer's sides.

14.6(3) Tolerances for both the spring scale and the computing scale shall not be greater than that for counter scales.

14.7(215) The automatic grain scale is one so constructed with a mechanical device that a stream of grain flowing into its hopper can be checked at any given weight, long enough to register said weight and dump the load. The garner above the scale should have at least three times the capacity of the scale to insure a steady flow at all times.

On automatic-indicating scales. On a particular scale, the maintenance tolerances applied shall be not smaller than one-fourth the value of the minimum reading-face graduation; the acceptance tolerances applied shall be not smaller than one-eighth the value of the minimum reading-face graduation.

However, on a prepackaging scale (see D.11, D.12) having graduated intervals of less than one-half ounce, the maintenance tolerances applied shall not be smaller than one-eighth ounce and the acceptance tolerances applied shall be not smaller than one-sixteenth ounce.

14.8(215) Motor truck scales are scales built by the manufacturer for the use of weighing commodities transported by motor truck.

14.9(215) Livestock scales are scales which are constructed with stock racks, or scales which are being used to weigh livestock.

14.10(215) Grain dump scales are scales so constructed that the truck may be unloaded without being moved from the scale platform.

The above-mentioned scales must be approved by the department. This approval being based upon blueprints and specifications submitted for this purpose.

14.11(215)

14.11(1) In the construction of a scale pit, the pit walls must be of reinforced concrete. The floor shall be constructed of materials that can be kept well drained and as dry as possible at all times. All scale footings shall be at least 12 inches below the frost line.

There shall be an approach at each end of the scale of not less than ten feet, and said approach shall be of reinforced concrete on a level with the scale deck.

14.11(2) Electronic scales shall have a vertical clearance of not less than four feet from the floor line to the bottom of the I beam of the scale bridge, thus providing adequate access for inspection and maintenance. The load-bearing supports of all scales installed in a fixed location shall be constructed to insure the strength, rigidity and permanence required for proper scale performance.

14.12(215) Pitless scales may be installed on a temporary basis, not to exceed four months, and said scale shall be placed on concrete footings. Said specifications for same being furnished by the scale manufacturer.

14.13(215) Master scale test weights used by scale repairmen for checking scales after being overhauled must be sealed by the department of agriculture, division of weights and measures, as to their accuracy once each year. Said weights after being sealed are to be used only as master test weights.

14.14(215) S.1 Design.

General. A scale shall be of such materials and construction that (1) it will support a load of its full nominal capacity without developing undue stresses or deflections, (2) it may reasonably be expected to withstand normal usage without undue impairment of accuracy or the correct functioning of parts, and (3) it will be reasonably permanent in adjustment.

14.14(1) *Stability of indications.* A scale shall be capable of repeating with reasonable precision its indications and recorded representations. This requirement shall be met irrespective of repeated manipulation of any scale element in a manner duplicating normal usage, including (*a*) displacement of the indicating elements to the full extent allowed by the construction of the scale, (*b*) repeated operation of a locking device, and (*c*) repeated application or removal of unit weights.

14.14(2) *Interchange or reversal of parts.* Parts which may readily be interchanged or reversed in the course of normal usage shall be so constructed that their interchange or reversal will not materially affect the zero-load balance or the performance of the scale. Parts which may be interchanged or reversed in normal field assembly shall be (*a*) so constructed that their interchange or reversal will not affect the performance of the scale or (*b*) so marked as to show their proper positions.

14.14(3) *Pivots.* Pivots shall be made of hardened steel, except that agate may be used in prescription scales, and shall be firmly secured in position. Pivot knife-edges shall be sharp and straight and cone-pivot points shall be sharp.

14.15(215) Weighbeams. All weighbeams, dials, or other mechanical weight-indicating elements must be placed on reinforced concrete footings or metal structural members. Concrete and metal must be of sufficient strength to keep mechanical weight-indicating elements in positive alignment with the lever system.

14.16(215) Whenever a scale is equipped with a beam box, the beam uprights, shelf and cap must be made of channel irons or I beams. The box covering the weighbeam may be constructed of wood or other material.

14.17(215) The steelyard, or beam rod, must be connected directly to the nose iron on the transverse lever on all motor truck and livestock scales.

14.18(215) The amount of weight indicated on the beam, dial or other auxiliary weighing attachments shall not exceed the factory-rated capacity of the scale, and said capacity shall be stamped on the butt of the beam (fractional bar is not included).

14.18(1) *Auxiliary attachment.* If auxiliary attachment is used, the amount of the auxiliary attachment must be blocked from the beam.

14.18(2) *Normal position.* The normal balance position of the weighbeam of a beam scale shall be horizontal.

14.18(3) *Travel.* The weighbeam of a beam scale shall have equal travel above and below the horizontal. The total travel of the weighbeam of a beam scale in a trig loop or between other limiting stops near the weighbeam tip shall be not less than the minimum travel shown in table 2; when such limiting stops are not provided, the total travel at the weighbeam tip shall be not less than eight percent of the distance from the weighbeam fulcrum to the weighbeam tip.

14.18(4) *Weighbeam.*

TABLE 2.—MINIMUM TRAVEL OF WEIGHBEAM OF BEAM SCALE BETWEEN LIMITING STOPS

Distance from weighbeam fulcrum to limiting stops Inches	Minimum travel between limiting stops Inch
12 or less	0.4
13 to 20	.5
21 to 40	.7
Over 40	.9

14.18(5) *Poise stop.* Except on a steelyard with no zero graduation, a shoulder or stop shall be provided on each weighbeam bar to prevent a poise from traveling and remaining back of the zero graduation.

14.18(6) *Pawl.* A poise on a notched weighbeam bar shall have a pawl with a rounded tip which will seat the poise in a definite and correct position at any notch, wherever in the notch the pawl is placed, and hold it there firmly and without appreciable movement. That dimension of the top of the pawl which is transverse to the longitudinal axis of the weighbeam shall be equal to the corresponding dimension of the notches.

14.18(7) *Nominal capacity, marking.* The nominal capacity shall be conspicuously marked "*a*" on any scale equipped with unit weights, "*b*" on any scale with which counter poist or equal-arm weights are intended to be used, and "*c*" on any automatic-indicating or recording scale so constructed that the capacities of the several individual indicating and recording elements are not immediately apparent.

A small capacity uncompensated spring scale shall be conspicuously marked to show that the scale is illegal for use in the retail sale of foodstuffs other than fruits and vegetables.

14.19(215) Provision for sealing coin slot. Provision shall be made on a coin-operated scale for applying a lead-and-wire seal in such a way that insertion of a coin in the coin slot will be prevented.

14.20(215) Stock racks. A livestock scale shall be equipped with a suitable enclosure, fitted with gates as required, within which livestock may be held on a scale platform; this rack shall be securely mounted on the scale platform and adequate clearances shall be maintained around the outside of the rack.

14.21(215) Lengthening of platforms. The length of the platform of a vehicle scale shall not be increased beyond the manufacturer's designed dimension except when the modification has been approved by competent scale-engineering authority, preferably that of the engineering department of the manufacturer of the scale, and by the weights and measures authority having jurisdiction over the scale.

14.22(215) Accessibility for testing purposes. A large capacity scale shall be so located, or such facilities for normal access thereto shall be provided that the test weights of the weights and measures official, in the denominations customarily provided, and in the amount deemed necessary by the weights and measures official for the proper testing of the scale, may readily be brought to the scale by customary means; otherwise it shall be the responsibility of the scale owner or operator to supply such special facilities, including necessary labor, as may be required to transport the test weights to and from the scale, for testing purposes, as required by the weights and measures official.

14.23(215) Assistance in testing operations. If the design, construction or location of a large-capacity scale is such as to require a testing procedure involving special accessories or an abnormal amount of handling of test weights, such accessories or needed assistance in the form of labor shall be supplied by the owner or operator of the scale, as required by the weights and measures official.

14.24(215) Beam scale. One on which the weights of loads of various magnitude are indicated solely by means of one or more weighbeam bars either alone or in combination with counterpoise weights.

14.25(215) Spring scale. An automatic-indicating scale in which the counterforce is supplied by an elastic body or system of such bodies, the shape or dimensions of which are changed by applied loads. A "compensated" spring scale is one equipped with a device intended to compensate for changes in the elasticity of the spring or springs resulting from changes in temperature, or one so constructed as to be substantially independent of such changes; an "uncompensated" spring scale is one not so equipped or constructed. A "straight-face" spring scale is one in which the indicator is affixed to the spring without intervening mechanism and which indicates weight values on a straight graduated reading-face. (The use in a scale of metal bands or strips in lieu of pivots and bearings does not constitute the scale a "spring" scale.)

14.26(215) Weighbeam or beam. An element comprising one or more bars equipped with movable poises or means for applying counterpoise weights or both.

14.27(215) Livestock scale. For purposes of the application of requirements for SR, tolerances and minimum graduations, a scale having a nominal capacity of six thousand pounds or more and used primarily for weighing livestock standing on the scale platform. (An "animal scale" is a scale adapted to weighing single heads of livestock.)

14.28(215) Tolerances on petroleum products measuring devices. All pumps or meters at filling stations may have a tolerance of not over five cubic inches per five gallons, minus or plus. All pumps or measuring devices of a large capacity shall have a maintenance tolerance of 50 cubic inches, minus or plus, on a 50-gallon test. Add additional one-half cubic inch tolerance per gallon over and above a 50-gallon test. Acceptance tolerances on large capacity pumps and measuring devices shall be one-half the maintenance tolerances.

14.29(215) If a meter is found to be incorrect and also capable of further adjustment, said meter shall be adjusted, rechecked and sealed. If a seal is broken for any cause other than by a state inspector, the department of agriculture shall be promptly notified of same.

14.30(215) G-S.4. All weighing or measuring devices shall be provided with appropriate recording or indicating elements, which shall be definite, accurate and easily read under any conditions of normal operation of the device. Graduations and a suitable indicator shall be provided in connection with indications and recorded representations designed to advance continuously. Graduations shall not be required in connection with indications or recorded representations designed to advance intermittently or with indications or recorded representations of the selector type.

14.31(215) S20-1. All gasoline or oil metering devices shall be equipped with an effective air eliminator to prevent passage of air or vapor through the meter. The vent from such eliminator shall not be closed or obstructed.

14.32(215) S20-2. No means shall be provided by which any measured liquid can be diverted from the measuring chamber of the meter or the discharge line therefrom. However, two or more

delivery outlets may be installed, if automatic means is provided to insure that liquid can flow from only one such outlet at one time, and the direction of flow for which the mechanism may be set at any time is definitely and conspicuously indicated.

14.33(215) The specifications, tolerances and regulations for commercial weighing and measuring devices, together with amendments thereto, as recommended by the National Bureau of Standards and published in National Bureau of Standards Handbook 44-4th Edition shall be the specifications, tolerances and regulations for commercial weighing and measuring devices in the state of Iowa, except as modified by state statutes, or by rules adopted and published by the Iowa department of agriculture and not rescinded.

[Filed December 14, 1965; amended November 21, 1966, November 15, 1967, August 30, 1968, September 10, 1969, September 15, 1970, December 17, 1971]

14.34(215) Inspection tag or mark. If a meter is found to be inaccurate, an appropriate "Inaccurate" card and a "Repair and Placing in Service" card shall be left with the meter.

14.34(1) The "Inaccurate" card is to be retained by the LP-gas dealer after repair.

14.34(2) The "Repair and Placing in Service" card is to be forwarded to weights and measures division of the agriculture department.

14.35(215) If the meter has not been repaired within 30 days the meter will be condemned and a red condemned tag will be attached to the meter.

14.36(215) In accordance with the contemplated revision of National Bureau of Standards Handbook 44, Gur. 4.4 (Replacement of Security Seal), accredited repair and testing companies shall be authorized to affix a security seal, properly marked with the identification of such company.

14.37(215) Companies specializing in testing and repairing LP-gas meters shall be registered with the division of weights and measures as accredited repair and testing agencies upon meeting the requirements set forth by the department of agriculture.

14.38(215) In the delivery of LP-gas by commercial bulk trucks (bobtail) across state lines, it shall be mandatory for all trucks delivering products to be equipped with a meter that has been either tested by the state of Iowa or that carries the seal of an accredited meter service and proving company.

14.39(215) The location of all LP-gas liquid meters in retail trade shall be listed, by the owner, with the department of agriculture.

14.40(215) Upon putting a new or used meter into service in the state of Iowa, the user shall report to the weights and measures division.

MOISTURE-MEASURING DEVICES

14.41(215A) All moisture-measuring devices will be tested against a measuring device which will be furnished by the department and all moisture-measuring devices will be inspected to determine whether they are in proper operational condition and supplied with the proper accessories.

14.42(215A) Moisture-measuring devices may be rejected for any of the following reasons:

14.42(1) The moisture-measuring device tested is found to be out of tolerance with the measuring device used by the department by one of the inspectors so assigned by more than one-half of one percent on grain under 20 percent moisture content.

14.42(2) The person does not have available the latest charts for type of device being used.

14.42(3) The person does not have available the proper scale or scales and thermometers for use with the type of device being used.

14.42(4) The moisture-measuring device is not free from excessive dirt, debris, cracked glass or is not kept in good operational conditions at all times.

These rules are intended to implement chapters 210, 212, 213, 214, 215 and 215A of the Code.

[Filed November 18, 1963; amended September 14, 1965, December 14, 1965, November 21, 1966, November 15, 1967, August 30, 1968, September 10, 1969, September 22, 1969, September 15, 1970, December 17, 1971]

CHAPTER 15
HOTEL, RESTAURANT AND FOOD ESTABLISHMENTS

15.1(170) License required. A boarding house is not a restaurant unless they cater to transient guests. A boarding house catering to transient guests is classified as a restaurant and, therefore, must have a restaurant license.

15.2(170) Sanitary regulations.

15.2(1) Perishable food shall mean any food of such type or in such condition as may spoil.

15.2(2) Potentially hazardous food shall mean any perishable food which consists in whole or in part of milk or milk products, eggs, meat, poultry, fish, shellfish or other ingredients capable of supporting rapid and progressive growth of infectious or toxigenic micro-organisms.

15.3(170) Temperatures and proper care of foods.

15.3(1) All perishable food shall be stored at such temperatures as will protect against spoilage.

15.3(2) All potentially hazardous food shall, except when being prepared and served, when being displayed for service, be kept at 45°F. or below, or 140°F. or above.

15.3(3) All potentially hazardous food, when placed on display for service, shall be kept hot or cold as required hereafter:

If served hot: Displayed in or on a heated facility which can maintain the temperature of such food at 140°F. or above.

If served cold: Displayed in or on a refrigerated facility which can maintain the product temperature at 45°F. or below.

15.3(4) Frozen food shall be kept at such temperatures as to remain frozen.

15.3(5) When ready for preparation, potentially hazardous frozen food shall be thawed or prepared for use in the following ways:

a. Thawed at refrigerator temperature of 45°F. or below.

b. Thawed under pure running water 70°F. or below.

c. Quick thawed as part of the cooking process.

d. Thawed at room temperature if food is immediately refrigerated or cooked after thawing.

In any event, food which is to be thawed by any of the above ways must be put into appropriate containers which will provide for sanitary care of the food during thawing.

15.3(6) Hollandaise and other potentially hazardous sauces prepared from fresh ingredients must be discarded as waste within three hours after preparation. Where such sauces require eggs as an ingredient, only shell eggs shall be used.

15.3(7) Custards, cream fillings or similar products which are prepared by hot or cold processes shall be kept at safe temperatures, except during necessary periods of preparation and service. Pastries or puddings shall meet the following requirements as applicable:

a. Pastry fillings shall be placed in shells, crusts or other baked goods immediately following preparation or shall be refrigerated at 45°F. or below in shallow pans, immediately after cooking or preparation and held thereat until combined into pastries or served.

b. All completed custard-filled and cream-filled pastries shall, unless served immediately following filling, be refrigerated at 45°F. or below promptly after preparation and held thereat pending service.

15.3(8) Sugar, catsup and mustard shall be kept in covered or closed containers at all times. Sugar bowls which contain loose unpackaged sugar will not be permitted.

15.3(9) Mayonnaise and other similar preparations must be kept refrigerated at 45°F. or lower after opening.

15.4(170) Storage of food.

15.4(1) Wet storage of packaged food will not be permitted.

15.4(2) Food must be covered, wrapped or placed in proper container to prevent contamination.

15.4(3) Dry ingredients which have been opened must be placed in tight covered plastic, glass or metal containers.

15.4(4) Storage facilities must be kept clean and provide adequate storage space and be located in such a place as to protect food from contamination and unsanitary conditions.

15.4(5) Racks, shelves and other surfaces must be free of corrosion, rust and other unsanitary conditions.

15.4(6) Food in cartons, bags or other containers kept in storerooms, basements, warehouses or other places shall be placed on platforms, racks or pallets so as to allow space of at least four inches above the floor and sufficient space from the wall for proper pest control.

15.5(170) Garbage.

15.5(1) All garbage must be kept in metal or plastic containers with tight-fitting lids. Inside garbage cans must be emptied, thoroughly washed and disinfected daily.

15.5(2) All garbage and refuse must be moved from premises regularly so as not to create problems with insects and rodents, offensive odors or health or fire hazards.

15.6(170) Towels.

15.6(1) Individual sanitary towels are approved by the department.

15.6(2) Air driers are approved by the department.

15.6(3) Cloth towel dispensers that offer a clean section of towel each time used, are approved and are not considered roller towels, provided they are serviced regularly and not allowed to leave a loose end of toweling hanging when the roll reaches the end.

15.6(4) Soiled linens, towels, etc. must be kept in proper containers and kept away from food preparation and serving areas.

15.7(170) Approved methods of washing and sanitizing glasses, plates, cups, saucers, dishes and silverware.

15.7(1) *Manual dishwashing.* Adequate facilities must be provided which include:

a. Space for prescraping and removing all food possible from dishes before washing.

b. Proper garbage disposal.

c. Sufficient hot water supply.

d. A three-compartment sink large enough

to handle the volume of dishes. Each compartment must be capable of being supplied with hot and cold running water.

e. A drainboard.

f. Racks for clean dishes.

g. Effective cleansing agent.

h. Effective sanitizing materials.

Procedure is as follows:

After the dishes are prescraped, they must be washed in the first compartment using an effective detergent or other approved cleansing agent and a brush or swab. The temperature of this wash water should be 110° to 120°F. The dishes are then rinsed in hot water in the second compartment to remove all detergent or other approved cleansing agent and suds. Temperature of this rinse should be 110° to 120°F. Finally, the dishes are sanitized in the third compartment of the sink by immersing them for at least one minute at a temperature of not less than 75°F. in a sanitizing solution which contains one of the following:

At least 100 PPM of available chlorine.

At least 200 PPM of a quaternary ammonium compound.

Any other sanitizing agent which has been demonstrated to the satisfaction of the department of agriculture to be effective and nontoxic under use conditions and for which a suitable field test is available.

In using any of these sanitizers, it is important to follow the directions on the label of the product carefully and to measure amounts accurately.

After dishes and silverware are sanitized, they should be allowed to drain dry in racks or on a corrugated surface. The use of towels for drying dishes or silverware is prohibited.

Care should be used in handling the dishes after washing to see that the fingers do not come in contact with the drinking edge of the cups and glasses or the parts of spoons and forks that are placed in the mouth or the blades of knives.

Cups and glassware should be stored upside down on corrugated mats or in racks and be protected from dust and dirt. Dishes, cups, glassware and silverware must never be stored on cloth or paper towels, newspapers, etc. Silverware should be stored in a sanitary manner in such a way that only the handles will be touched when transferred to service.

15.7(2) *Mechanical dishwashing machines.* Dishwashing machines shall:

a. Be of such materials and so designed and constructed as to be easily cleanable.

b. Shall be capable when operated properly of rendering all surfaces of equipment and utensils clean and sanitary.

c. Wash water shall be kept reasonably clean.

d. Rinse water tanks shall be so protected by distance, baffles or other effective means as to minimize the entry of wash water into the rinse water.

e. The wash water temperature shall be kept at least 140°F.

f. The final rinse water shall be at a temperature of at least 180°F. at the entrance of the manifold.

g. When chemicals are relied upon for sanitization, they shall be of a class or type approved by the department and shall be applied in such concentration for such a period of time to provide effective bactericidal treatment of the equipment and utensils.

h. Conveyors in dishwashing machines shall be accurately timed to assure proper exposure times in wash and rinse cycles.

i. An easily readable thermometer shall be provided for reading temperature of wash water.

j. An easily readable thermometer shall be provided for reading temperature of rinse water.

k. Jets, nozzles and all other parts of each machine shall be maintained free of chemical deposits, debris and other soil. Automatic detergent dispensers, if used, shall be kept in proper operating condition.

Procedure is as follows:

After the dishes are prescraped and placed in racks and run through the wash and rinse cycle, they should be allowed to drain dry in racks or on a corrugated surface. The use of towels for drying dishes or silverware is prohibited.

Care should be used in handling the dishes after washing to see that the fingers do not come in contact with the drinking edge of cups and glasses or the parts of spoons and forks that are placed in the mouth or the blades of knives.

Cups and glassware should be stored upside down on corrugated mats or in racks and be protected from dust and dirt. Dishes, cups, glassware and silverware must never be stored on cloth or paper towels, newspapers, etc. Silverware should be stored in a sanitary manner in such a way that only the handles will be touched when transferred to service.

Any other type of machine, device or facilities and procedures may be approved by the department for cleaning or sanitizing equipment and utensils, if it can be readily established that such machine, device or facilities and procedures will routinely render equipment and utensils clean to sight and touch and provide effective bactericidal treatment as demonstrated by an average plate count per utensil surface examined, of not more than 100 colonies.

15.8(170) Medical certification. The department may require medical certification as proof of freedom from infection with any communicable disease.

15.9(170) Sanitary regulations. Insecticide vaporizers using lindane or any other insecticide that could contaminate food must not be used in rooms or areas where food is prepared or served

except under the supervision of a pest control operator licensed under the Iowa state department of agriculture.

These rules are intended to implement chapter 170 of the Code.

[Filed January 11, 1966; amended September 13, 1966, December 16, 1966]

CHAPTER 16
DAIRY TRADE PRACTICES

16.1(192A) Schools, churches and other charitable institutions not operated for profit.

16.1(1) The exemption in section 192A.1(7) of schools, churches and other charitable institutions not operated for profit applies to both dairy products and equipment.

16.1(2) The exemption does not apply to a catering service or a fraternity buying group. The test is whether or not the business is done directly with the school, church or institution and not with a third person.

16.1(3) Whether or not an institution qualifies as a charitable institution not operated for profit and thus is exempt from the Act is a matter of fact under the circumstances. It will depend on its origin, objects, charter and how it conducts its business. Membership organizations whose benefits accrue to the membership are not charitable institutions. Public institutions such as jails, county homes, mental health institutions, prisons, etc., are charitable organizations not operated for profit and exempt from the law.

16.2(192A) Sales. A lease with option to buy paid for within 36 months is a sale within the meaning of section 192A.1(9).

16.3(192A) Price differentials and discounts.

16.3(1) Section 192A.3 applies to both wholesale and retail sale of dairy products.

16.3(2) Price differentials, allowed under section 192A.3(1) must be cost justified.

16.3(3) Central billing or group discounts must be cost justified.

16.3(4) Differentials between name brand dairy products and private label must be cost justified.

16.3(5) A deviation filed to meet an equally low price of a competitor will continue only so long as the equally low price of a competitor exists. When the price of the competitor is changed, the deviation must be withdrawn.

16.3(6) Discounts and rebates to be allowed must be cost justified.

16.3(7) Discounts shall be determined on the basis of units delivered so far as ice cream is concerned and on dollar amounts so far as milk is concerned.

16.4(192A) Definitions.

16.4(1) *Stop.* Refers to a location. As used here, a stop is a retail food store.

16.4(2) *Delivery.* The process of transferring a product from one location to another. If the wholesaler services a stop two times in one day, two deliveries have been made whether or not merchandise is left at the stop.

16.4(3) *Service time.* Time that can be allocated directly to a stop. This includes time for securing the order, putting up the order, servicing the case, stamping merchandise, collecting and all other functions performed at the stop by the deliveryman.

16.4(4) *Methods of delivery.*

a. "Full service" includes secure the order, put up the order, service the case and sometimes the storage cooler, make out the bill, accept outdated merchandise, stamping merchandise and collect (cash, check or extension of invoice for signature).

b. "Modified drop" includes put up order, put the product in the storage cooler and preordering of merchandise. This procedure does not include checking outdated merchandise or the acceptance of outdated merchandise.

c. "Drop service". The product is prearranged in the truck for each store. The product is put on the dock or the backroom of the store. The merchandise is preordered. This procedure does not include checking outdated merchandise or the acceptance of outdated merchandise.

16.4(5) *First distributor.* Under section 192A.30, the word "processor" shall be construed to mean any processor or distributor that sells any processed dairy product or dairy products in Iowa, in the first instance.

16.5(192A) Equipment.

16.5(1) Six percent annual interest means not less than six percent interest on the unpaid balance on a declining balance. Any higher statutory rate is permitted.

16.5(2) The minimum selling price on new equipment is cost plus transportation and installation cost plus six percent markup. If sold on a conditional sales contract, the minimum interest to be added is six percent interest on the unpaid balance on a declining balance. Any sale under this section requires a ten percent down payment.

16.5(3) When a sale is reported, copy of the conditional sales contract or bill of sale and recording or filing number in the county where the equipment is located, is required to be attached to the report.

16.5(4) Failure to collect or repossess on a conditional sale would be in violation of the law.

16.5(5) Sale must be reported within 72 hours after installation.

16.6(192A) Gifts and promotions.

16.6(1) The general effect of sections 192A.13, 192A.14, 192A.15 is to:

a. Prohibit processors and distributors from extending payments and gifts that may buy or retain accounts.

b. Absolutely prohibit certain types of gifts and sales promotions practices.

c. Specify promotional types of activities that are lawful.

16.6(2) "Free goods", as defined in section 192A.13, means one or more items of personal property:

a. That is given gratuitously without increase in the regular purchase price of the dairy products it is offered with, or that is given gratuitously without charging the purchaser an additional sum over the regular purchase price of the dairy product it is offered with, or

b. For which the wholesaler does not receive monetary consideration from any recipient thereof.

For example, it is unlawful for a processor or distributor to:

Give a retailer a free, extra quantity of selected dairy products upon his purchasing of a certain volume of product.

Supply a retailer with free merchandise to be given away by him to the consumer with the consumer's purchase of selected dairy products (balloons, pencils, coins, food products, potholders, etc.). However, there is no prohibition against a wholesaler supplying sample food products which can reasonably be expected to be consumed on the retailer's premises.

Supply a retailer with free merchandise to be sold by him in combination with or on the condition of a consumer's purchase of dairy products.

Run a "cents-off" purchase price coupon in newspapers that is redeemable at any retailer by the consumer upon his purchase of dairy product. The giving of coupons amounts to an offer to give money and the redemption of coupons is in effect, the giving of money. The result is no different than attaching a coin to a carton of milk.

Print a "refund" coupon on the package of a selected dairy product or provide a separate coupon whereby a consumer can receive a cash refund by sending the imprinted coupon or portion of package and separate coupon to the wholesaler or a third party.

Offer premiums of merchandise which the consumer may obtain by redeeming coupons printed on selected dairy products.

Offer premiums of merchandise which the consumer may obtain by redeeming coupons and paying an additional cash amount which does not fully compensate the wholesaler for the value of the merchandise.

Run a contest among its retail store accounts and give a prize to retailers for increases in volume of sales.

Reimburse a retailer for the cost of merchandise or other items of value given away by a retailer for promotional purposes.

Furnish retailers with free merchandising aids, such as tote bags for milk unless packaged at plant, recipe booklets, potholders.

Furnish retailers with the service of store personnel whose wages are paid by the wholesaler.

More than four promotions per year or more than one item per promotion being offered to any retailer, is a price reduction and a violation of the statute. However, nothing in this rule shall prevent the promotion offered to the retailer from including more than one item per promotion but each item so offered shall be considered a separate promotion. By this rule the department does not restrict the choice of item or items so offered.

Equipment may not be furnished for a promotion, which is predominantly commercial in nature, run at a retail store location, incidental to the retailer's course of business.

Furnishing of dispensers, freezers, etc., on the retail route without charge is the furnishing of free goods.

Transactions allowed by statute:

The furnishing of point of sale advertising material that remains inside retailer locations made of paper, cardboard or other material not of a permanent nature for use in the promotion of products of such wholesaler.

Examples: Advertising display material such as picture signs or balloons with wholesaler's name, unprinted menu forms advertising the dairy's products but not including creamers or permanent wall-type menu board signs.

The furnishing of hostesses or demonstrators at any retailer's location to promote the products of the wholesaler, processor or distributor may also use equipment incidental to the function of its hostesses or demonstrators, such as equipment used for storage or for display for sale. However, such equipment must be used only by such hostesses or demonstrators. It may not be used by the retailer for any purpose.

The advertising by a wholesaler of his own products through any advertising media he selects which does not involve allowances, payment for furnishing of other property to persons purchasing such products in a manner prohibited by this section.

Examples: Newspaper, radio or television advertising and printed material such as flyers, which only advertises the dairy and does not identify any retailer. Clock advertising signs are generally permitted under 16.6(1) "c".

Advertising allowances which do no more than reimburse a retailer for his costs in advertising the

wholesaler's selected dairy products. Payments must be in the form of reimbursement and not paid in advance.

Examples: A dairy may pay a retailer for only that portion which advertises the dairy's products. A dairy cannot pay national line rates if local advertising rates are lower.

Conduct otherwise permitted by this section.

16.7(192A) Consumption on the sale premises.

16.7(1) The provision in section 192A.15 "being consumed on the sale premises" means that at the retail store the dairy products given away must be in such form and quantity as they would, in fact, be consumed on the premises and when given away on the retail route at the home of the prospective purchaser, shall not exceed one quart of milk and the smallest sample carton produced of one other product.

16.7(2) This section is also interpreted to mean that dairy may also use equipment, incidental to giving away its products. However, such equipment may not be used by the retailer for storage or display for sale. The dairy must conspicuously display that the dairy — not the retailer — is giving away the product.

16.8(192A) Fees. Under section 192A.30, fees on ice cream mix, cottage cheese and ice milk mix will be based on the milk which was processed to make the ice cream mix, cottage cheese and ice milk mix. The fee on novelties sold within the state will be based on a formula that three dozen novelties is the equivalent of a gallon of ice cream.

16.9(192A) Price filing guide.

16.9(1) Under 192A.7, new prices whether lower or higher shall be filed with the secretary of agriculture ten days prior to the effective date. Nothing in this rule shall abrogate the provisions of section 192A.7.

16.9(2) Prices to be filed include processor and distributor prices to retailers, retail outlets, wholesalers, jobbers and distributors.

16.10(192A) Loan guide. Any account where any balance of the purchase price is due the processor, distributor or broker, as set forth in sections 192A.10 and 192A.16 for 45 days or more shall be interpreted by the department as a loan and a violation per se of the statute.

16.11(192A) Additive variant. The words "any additive variant of any dairy product" as used in section 192A.1(1) shall be construed to include any product containing caseinate or sodium caseinate derived from milk.

These rules are intended to implement chapter 192A of the Code.

[Filed December 28, 1966; amended January 11, 1968, May 14, 1968]

CHAPTER 17
MEAT AND POULTRY INSPECTION

17.1(189A) Part 301 of Title 9, Chapter III, of the code of Federal Regulations as amended by the Meat Inspection Regulations of the United States Department of Agriculture, Consumer and Marketing Service in the Federal Register, Volume 35, Number 193, Part II, on October 3, 1970, is hereby adopted in its entirety by reference and in addition thereto the following subsections shall be expanded to include:

1. Sec. 301.2(a) therein defining the term "act" shall include the Iowa meat and poultry inspection Act, chapter 189A, of the Code.
2. Sec. 301.2(b) therein defining the term "department" shall include the Iowa department of agriculture.
3. Sec. 301.2(c) therein defining the term "secretary" shall include the secretary of agriculture of the state of Iowa.
4. Sec. 301.2(d) therein defining the term "consumer and marketing service" shall include the Iowa meat and poultry inspection service.
5. Sec. 301.2(e) therein defining the term "administrator" shall include the director of the Iowa meat and poultry inspection service or any officer or employee of the Iowa department of agriculture.
6. Sec. 301.2(j) therein defining the term "officer in charge" shall include the officer in charge of an area.
7. Sec. 301.2(t) therein defining the term "commerce" shall include intrastate commerce in the state of Iowa.
8. Sec. 301.2(u) therein defining the term "United States" shall include the state of Iowa.

17.2(189A) Part 303, Part 306, Parts 308 through 320, Parts 323 through 326 and Part 329 of Title 9, Chapter III, of the code of Federal Regulations as amended by the Meat Inspection Regulations of the United States Department of Agriculture, Consumer and Marketing Service in the Federal Register, Volume 35, Number 193, Part II, on October 3, 1970, are hereby adopted in their entirety by reference. Part 305 except section 305.2, Part 307 except section 307.6, Part 325 except sections 325.3 and 325.12 of Title 9, Chapter III, of the code of Federal Regulations as amended by the Meat Inspection Regulations of the United States Department of Agriculture, Consumer and Marketing Service, in the Federal Register, Volume 35, Number 193, Part II, on October 3, 1970, are hereby adopted in their entirety by reference.

17.3(189A) Whenever an official form is designated by federal regulation, the appropriate Iowa form will be substituted and whenever an official mark is designated the following official Iowa marks will be substituted.

17.4(189A) Purpose. The purpose of these rules is to control the movement into and within the state of Iowa of inedible meat and carcass

parts and establish standards for facilities, sanitation, vehicles, inspection of inedible meat and carcass parts, processing and storage of inedible meats and carcass parts.

17.5(189A) Processing.

17.5(1) Rendering plants and pet animal food processing plants may process fallen or dead animals into pet animal food where the animals are recovered and transported to the processing plant within a reasonable time following the death of the animals and before decomposition occurs.

17.5(2) Processing facilities shall be in a separate area equipped and used only for skinning, eviscerating, deboning, grinding, decharacterizing, packaging and labeling of inedible meat and carcass parts to be used in pet animal food. Rendering facilities approved by the department shall be available to process materials not suitable for pet animal food.

17.5(3) All inedible meat and carcass parts shall be adequately decharacterized with charcoal or with other suitable agent acceptable to the Iowa department of agriculture. Following decharacterizing, inedible meat and carcass parts shall be packed in suitable containers approved by the department.

17.5(4) All containers for decharacterized inedible meat or carcass parts shall be marked with the word "inedible" in letters not less than two inches high on all outside surfaces.

17.5(5) Decharacterized inedible meat and carcass parts shall be frozen or held at a temperature of 40°F. or less in the processing plant or during transportation to the final processor.

17.5(6) Fallen or dead animals which are recovered and transported to the processing plant shall be immediately skinned and eviscerated, except the lungs, heart, kidneys and liver which shall be left attached to the carcass and the carcasses shall be stored in a chill room with attached viscera until inspected and approved by an inspector of the department. The stomach or stomachs, together with the entire intestinal tract, shall be discarded at time of evisceration. All carcasses skinned shall be tagged immediately with serially numbered tags and stamped with the word "inedible" with an ink or dye approved by the department. The word "inedible" shall be not less than one-half inch high. Condemned carcasses shall be deeply slashed on the round, rump, loin and shoulder, denatured with a ten percent solution of cresylic acid or other decharacterizing agent approved by the department and removed to a rendering plant prior to the close of the working day. All decisions of the inspector are final.

17.6(189A) Inspection.

17.6(1) The secretary of agriculture shall appoint an inspector who shall be a graduate veterinarian or a person who is trained and skilled in the field, to inspect processing plants daily and enforce sanitary requirements, supervise dressing operations, inspect carcasses for the presence of dangerous communicable disease or poisons and evidence of decomposition. Any of these conditions shall be cause for the carcass to be condemned as unfit for processing into pet animal food.

17.6(2) All compensation for the inspectors assigned to rendering plants and pet animal food processing plants, processing inedible meat and carcass parts for pet food, shall be paid by the owners or operators granted permission to process fallen or dead animals. Failure to pay compensation 90 days after the service is rendered shall be grounds for revocation of the renderer's license.

17.6(3) All rendering plants and pet animal food processing plants shall be inspected by the division of animal industry before approval is granted by the secretary of agriculture. Approval will be based on compliance with the requirements set forth in these rules.

17.6(4) The Iowa department of agriculture will periodically inspect approved rendering plants and pet animal food processing plants for compliance with all the requirements set forth in these rules.

17.7(189A) Plant requirements.

17.7(1) Plant shall be maintained in a sanitary condition, with well distributed, abundant lighting and sufficient ventilation for all rooms and compartments.

17.7(2) There shall be an efficient drainage and plumbing system for the establishment and premises. All drains and gutters shall be properly installed with approved traps and vents.

17.7(3) Water supply shall be ample, clean and potable with adequate facilities for distribution throughout the plant. An ample supply of hot water (not less than 180° F.) shall be available for cleaning of equipment, floors, walls, etc. Hot water shall be delivered under pressure to sufficient, convenient outlets to accomplish a thorough cleanup.

17.7(4) Floors, walls, ceilings, partitions, posts, doors and other structural parts shall be of impervious material and well painted with an oil base or other suitable paint. All floors shall be kept watertight.

17.7(5) Every practicable precaution shall be taken to exclude flies, rats, mice and other vermin from the facilities.

17.7(6) Dogs and cats shall be excluded from the establishment.

17.7(7) The entire area and equipment of the establishment in which carcasses are received and processed shall be thoroughly cleaned after each day's operation.

17.7(8) All liquids and sewage from the carcass preparation process or washing of floors shall not be discharged into a watercourse but shall be drained into a covered cesspool, a city sanitary sewer or be disposed of by evaporation in a manner satisfactory to Iowa department of agriculture and the Iowa department of health.

17.8(189A) Records. All licensed and permitted establishments shall keep the following records and make them available at all reasonable times to any employee or agent of the Iowa department of agriculture.

1. The name and address of the owner, the approximate time of death of the animal and the date the animal was received for processing shall be recorded on all animals to be inspected and approved by the department for processing into pet animal food.
2. Inventory of number of cartons of inedible meat and carcass parts and the weight of each carton processed each day.
3. A running inventory of the number of cartons of inedible meat and carcass parts and the weight of each carton stored and transported.
4. Copies of all shipping documents provided by the Iowa department of agriculture.

17.9(189A) Transportation.

17.9(1) No person shall sell or transport into or within the state of Iowa any decharacterized inedible meat or carcass parts obtained or processed from dead, dying, diseased or disabled animals without first obtaining a permit from the Iowa department of agriculture.

17.9(2) All decharacterized inedible meat and carcass parts shall be transported and delivered to and from rendering plants and pet animal food processing plants licensed and inspected by the state of Iowa. Rendering plants and pet animal food processing plants ostside the state of Iowa from which decharacterized inedible meat or carcass parts are shipped into the state of Iowa shall be certified by the proper public officials of the state of origin that the processing establishment meets at least the minimum standards set forth in these rules.

17.9(3) All decharacterized inedible meat and carcass parts must be moved in closed conveyances and all outer openings sealed with an Iowa department of agriculture metal numbered seal issued by the department and sealed under the supervision of an approved veterinarian or an employee under his supervision at the point of origin, and the numbers of the seal or seals shall be entered on the shipping documents.

17.10(189A) Shipping documents.

17.10(1) All decharacterized inedible meat and carcass parts transported into or within the state of Iowa shall be accompanied by shipping documents provided for this purpose by the Iowa department of agriculture. Shipping documents shall be completed in quadruplicate form as follows:

1. Date of shipment—hour shipped.
2. Number of containers of inedible meat and carcass parts shipped.
3. Pounds of inedible meat and carcass parts shipped.
4. Name of plant consigning inedible meat and carcass parts.
5. Signature of the consignor.
6. Date and hour shipment received by the consignee.
7. Name of plant receiving inedible meat and carcass parts.
8. Signature of consignee.
9. Number of seal or seals used to seal the conveyance at origin.
10. Number of seal or seals broken at destination by consignee.
11. Consignee to turn over all broken seals to agent of Iowa department of agriculture.
12. Number of containers of inedible meat and carcass parts received.
13. Pounds of inedible meat and carcass parts received.

17.10(2) The original shipping document shall be mailed to the Iowa department of agriculture, division of animal industry, on the date of the shipment. Two copies of the shipping document shall accompany the shipment and shall be delivered to the consignee. The consignee shall sign and forward one of the copies delivered to him to the Iowa department of agriculture, division of animal industry, and retain the other copy for his records. One copy shall be retained by the consignor.

17.10(3) In the event that a consignee does not accept shipment of the decharacterized inedible meat and carcass parts, the shipment shall be moved under the supervision of a veterinary inspector of the Iowa department of agriculture to an approved rendering plant or pet animal food processing plant located in the state of Iowa and processed in the manner directed by the Iowa department of agriculture.

17.11(189A) Permits.

17.11(1) No decharacterized inedible meat or carcass parts shall be sold or transported into or within the state of Iowa unless the product has been inspected at a licensed rendering plant or pet animal food processing plant and passed by a veterinary inspector within the state of Iowa or by the appropriate public official in the state in which the product has been processed.

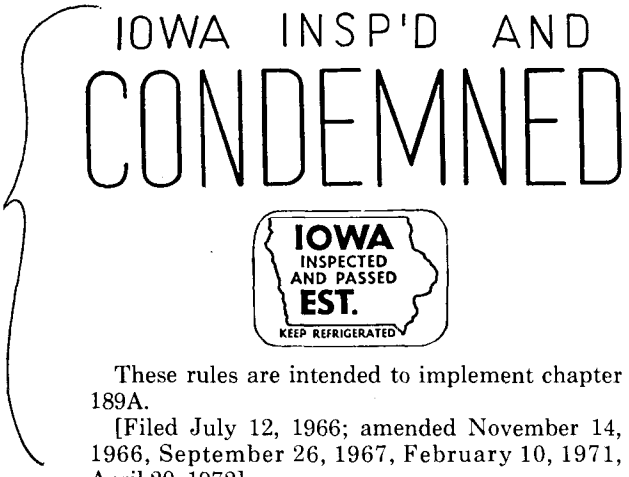
17.11(2) Permits shall contain the following information:

1. Consignor's name and address and the name of the veterinary inspector at the consignor's plant.
2. Consignee's name and address.
3. Consignor's signature and date signed.
4. Consignee's signature and date signed.

5. Certification of the veterinary inspector or appropriate public official of state of origin or employee under his supervision, that consigning establishment meets all minimum standards for the processing, inspection, facilities, sanitation, storage and decharacterization of inedible meat and carcass parts established by the Iowa department of agriculture.

6. Approval of the secretary of agriculture of Iowa and date approved.

17.11(3) The secretary of agriculture of Iowa may issue a permit for the sale or transportation of decharacterized inedible meat or carcass parts into or within the state of Iowa upon evidence that the product has been processed and transported in accordance with these rules and that the persons selling, transporting and receiving have met all requirements set forth in these rules.



These rules are intended to implement chapter 189A.

[Filed July 12, 1966; amended November 14, 1966, September 26, 1967, February 10, 1971, April 20, 1972]

CHAPTER 18
BRANDING OF LIVESTOCK

18.1(187) Location of brands on livestock.

18.1(1) Brands shall be recorded on one of either sides on the animals, in any one of three locations, to wit: The shoulder, rib, or hip.

18.1(2) Each location is considered a separate brand and not in or under conflict with the same or similar brand in a different location or on a different side.

18.2(187) Brands in conflict.

18.2(1) Whenever two or more brands are determined by the secretary, to be in or under conflict, the secretary shall give written notice to the brand owners.

18.2(2) When herds bearing a similar brand are maintained in close proximity to each other, and the secretary determines that confusion or conflict may arise therefrom; then the secretary shall direct such change or changes in the position of the brands, so as to remove such confusion or conflict.

18.2(3) When two or more brands are determined, by the secretary, to be in or under conflict, then the owner having recorded said brand on the earliest date shall be given preference in retaining said brand.

APPEAL BOARD, STATE

CHAPTER 1
TORT CLAIMS

1.1(25A) Definitions. As used in these rules, "state agency," "employee of the state," "claim" and "award" bear the definitions ascribed to them in section 25A.2. "Board" means "state appeal board" as defined in section 23.1. "Executive secretary" means executive secretary of the state appeal board.

1.2(25A) Meetings of board. The board shall meet at a time and place fixed by the chairman or a majority of the board.

1.2(1) *Orders of board.* The board shall be considered in continuous session for the purpose of entering orders, issuing determinations and making awards.

1.2(2) *Quorum.* A majority of the membership of the board shall constitute a quorum for the transaction of all business. But the compromise, settlement or allowance of any claim in an amount larger than $5,000 shall require the approval of all members of the board and of the district court of Polk county.

1.2(3) *Executive secretary.* The state comptroller shall appoint an employee of his office to serve as executive secretary of the board.

1.3(25A) Form of claims. All claims should be typewritten, but claims printed by hand will be accepted if legible.

1.3(1) *Place of filing.* Claims shall be filed in triplicate with the State Comptroller, State Capitol, Des Moines, Iowa 50319.

1.3(2) *Verification.* Claims shall be verified.

1.3(3) *Names and signatures.* Claims shall state thereon the names, addresses and telephone numbers of the person making the claim and of the attorney, if any, preparing or assisting in preparing the claim and their signatures.

1.3(4) *Designation by number.* The executive secretary shall assign a number to each claim. Thereafter it may be referred to by such a number.

1.4(25A) Content. All claims shall set forth information as follows:

1.4(1) *Description of accident.* State, in detail, all known facts and circumstances attending the damage or injury, identifying persons and property involved and the cause thereof.

1.4(2) *In connection with personal injuries or death.*

a. A detailed description of the nature, extent and duration of any and all injuries.

(1) The names and addresses of any and all physicians, surgeons, dentists or other medical personnel providing treatment or services.

(2) The dates and places of the treatments or services.

(3) The date of the final treatment or service and the name of the physician or other person providing same.

(4) If treatment or services are continuing, the name and address of each physician or other person rendering said treatment or service, and the nature of the treatment or service.

b. The name and address of any hospital in which claimant is or was confined and the dates of admission and discharge.

c. The name and address of any and all persons who have taken the X rays of claimant, the dates of such X rays and a statement as to what the X rays purportedly established.

d. A statement as to any pre-existing injury, illness or condition, the nature of such pre-existing injury, illness or condition, and the name and present address of each physician or other person who has rendered or who is rendering treatment for such disability.

e. If employed at the time of the injury or death, the name and address of the employer, the position or job held and nature of the work performed, the average weekly wage or salary for the year immediately past, the period of time lost from employment (dates), and the sum of wages or salary claimed to have been lost, if any, by reason of injuries or death.

f. If other loss of income, profit or earnings is claimed, the amount of such loss or losses and how computed, the source of such loss, the date of deprivation thereof, the period of time and whether it is continuing.

g. Name and address of present employer, if claimant has returned to work, the position or job held, the nature of the work being performed and present weekly wages, earning, income or profits.

h. Itemization in detail of any and all moneys expended or expenses incurred in connection with said claim.

i. Names and addresses of all persons who have personal knowledge of any facts relating to said claim.

1.4(3) *In connection with property damage or loss.*

a. Motor vehicle.

(1) Make, model, year.

(2) Date of purchase and purchase price.

(3) Cost estimates for repairs or actual costs thereof, with copies of estimates or bills.

(4) Specific part or parts allegedly damaged.

(5) Names and addresses of any and all persons having personal knowledge of any facts relating to the claim.

b. Other property.

(1) Nature and description of such other property or items of property separately listed.

(2) Method by which such property was acquired. If purchased, then the name of the person or place from which purchased, the price, date and usage made of the property.

(3) Depreciated value at date of damage or loss.

(4) Cost estimates for repairs or actual costs thereof with copies of cost estimates made or of bills paid.

(5) Names and addresses of any and all persons having personal knowledge of any facts relating to the claim.

1.5(25A) Allegations denied. No answer to a claim shall be required of the state, and all allegations of the claim shall be treated as denied pending final disposition.

1.6(25A) Attorney general. The executive secretary shall deliver or cause delivery of two copies of each claim to the special assistant attorney general assigned to claims.

1.7(25A) Investigation. Upon receipt of said copy, the special assistant attorney general shall investigate the claim. He shall ex officio be empowered to administer oaths or may take testimony in the form of affidavits, depositions or oral or written interrogatories or otherwise. He may compel the attendance of witnesses and certify to any district court for contempt.

1.8(25A) Notification. The special assistant attorney general shall notify the claimant or his attorney, in writing, of the board's determination and of the amount of the award, if any.

1.9(25A) Release or covenant not to sue. The claimant shall be required to execute a release of the claim or a covenant not to sue in consideration of the amount of the award fixed by the board.

1.10(25A) Acceptance. Return of the release or covenant not to sue properly executed by the claimant or his attorney shall constitute acceptance of the award in full settlement of the claim.

1.11(25A) Attorney fee affidavit. Along with the executed release or covenant not to sue the claimant's attorney shall submit in affidavit form the amount of his attorney fees in connection with his services to claimant.

1.12(25A) Warrant. If the board determines the claimant's attorney's fees to be reasonable and the release or covenant not to sue properly executed the comptroller shall cause the issuance of a warrant in the amount of the award, payable to claimant and to his attorney, if he has one.

1.13(25A) Withdrawal. Withdrawal of claims shall be by notice in writing addressed to the State Appeal Board, Office of the State Comptroller, Des Moines, Iowa 50319.

[Filed June 16, 1967; amended September 26, 1967, August 12, 1970]

APPENDIX TO RULES

This appendix is not a part of the rules and has not been adopted by the state appeal board. The forms are not official forms and their use is not mandatory except to the extent that they incorporate provisions required by the rules.

The following forms are suggested as aids to claimants.

Form A, Iowa Tort Claims Act

State Appeal Board of the State of Iowa

CLAIM AGAINST THE STATE OF IOWA

(For damages under the Iowa Tort Claims Act)

ARCHITECTURAL EXAMINERS

CHAPTER 1
REGISTERED ARCHITECTS

1.1(118) Examinations shall be in two classes known as Standard N.C.A.R.B. Written Examinations and Standard N.C.A.R.B. Senior Examinations.

1.2(118) Examinations. The board of architectural examiners hereby adopts and incorporates by reference as fully as if set out herein, the standards contained in section I, "Examinations" of Circular of Information No. 3-69 issued by the National Council of Architectural Registration Boards.

1.3(118) Admission to examinations. The board of architectural examiners hereby adopts and incorporates by reference as fully as if set out herein, the standards contained in section E, "Standards for Admission to the NCARB Examinations" of Circular of Information No. 3-69 issued by the National Council of Architectural Registration Boards.

1.4(118) Education and training equivalents. The board of architectural examiners hereby adopts and incorporates by reference as fully as if set out herein, the standards contained in section F, "Education and Training Equivalents" of Circular of Information No. 3-69 issued by the National Council of Architectural Registration Boards.

1.5(118) Professional experience equivalents. The board of architectural examiners hereby adopts and incorporates by reference as fully as if set out herein, the standards contained in section G, "Professional Experience Equivalents" of Circular of Information No. 3-69 issued by the National Council of Architectural Registration Boards.

1.6(118) Council record. Each applicant for registration to practice architecture in the state of Iowa shall present a council record prepared by the N.C.A.R.B. to the board for their files. Applicants for the written examinations are required to make application to N.C.A.R.B. for a council record at least six weeks before the personal audience is held.

[Filed April 8, 1970]

ATHLETICS COMMISSIONER

CHAPTER 1
PROFESSIONAL WRESTLING RULES

1.1(727A) All bouts, unless expressly approved by the commissioner, will be limited to three falls; the contestant gaining the most falls will be the winner of the bout. If there have been no falls, or if each contestant has won one fall at the end of a specified time limit, the referee will declare the bout a draw. If, at the end of a time limit of a two fall out of three bout, only one contestant has been awarded one fall, that contestant will be declared the winner. If, at the end of a time limit of a single fall bout, no falls have been awarded, the bout will be declared a draw.

1.2(727A) Both shoulders touching the mat at the same time and held for three seconds will constitute a fall.

1.3(727A) If the contestants work off the mat so that any part of their bodies are in or underneath the ropes, the referee will order them to break and place them in the center of the ring in a standing position.

1.4(727A) If a contestant crawls through the ropes or out of the ring and refuses to return at the count of ten by the referee, said contestant will be disqualified.

1.5(727A) If a contestant does not break a hold and take two steps backward before continuing when ordered to do so by the referee, the referee will then count to four. If the hold is not broken he will award the fall or bout to the offending contestant's opponent.

1.6(727A) No contestant will be permitted to grasp or hang onto clothing, mats or ropes for support.

1.7(727A) Striking, pushing or in any way abusing the referee will not be allowed. After being warned by the referee, repeating of the offense by the offender will forfeit the fall or bout to his opponent.

1.8(727A) Contestants must not take anything into the ring with them or pick up anything thrown into the ring to be used in any way to gain an advantage over an opponent.

1.9(727A) Fingernails will be trimmed closely. The use of strong-smelling substances on any part of the body, shoes or trunks is prohibited.

1.10(727A) Following each fall the contestants may or may not leave the ring. If they remain in the ring, the timekeeper will allow three minutes between the falls. If one or more of the contestants retire to the dressing rooms, five minutes will be granted.

1.11(727A) All wrestling contestants must be on the premises where the bout is to be held at least one-half hour before the start of the card.

1.12(727A) No promoter, matchmaker or any other person shall arrange, match or advertise any wrestling exhibition or contest between persons of opposite sex. Exhibitions are permitted between women when matched against women, but no male person will be permitted to engage in a wrestling contest or exhibition or tag team arrangement with a female person.

1.13(727A) No boxing bouts shall be permitted in any professional wrestling show, nor shall any wrestling bouts be permitted in any boxing show.

1.14(727A) Promoters are held responsible to insure that adequate public safety is maintained at all bouts. A minimum of at least one law enforcement officer, furnished by the promoter, must be in attendance as required by the need for adequate public safety maintenance. Failure to so provide, may result in the cancellation of the matches and the revocation of the promoters' licenses.

1.15(727A) The promoter shall make certain that no wrestler shall be permitted to wrestle who is suffering from any illness or disability which in any way interferes with or prevents such wrestler from giving a full, complete and satisfactory exhibition of his ability and skill, or endangers his health or the health of his opponent.

1.16(727A) All wrestling must take place within the ropes and no wrestler shall deliberately leave the enclosed ring during the course of an exhibition or contest in pursuit of another wrestler.

1.17(727A) All professional wrestling programs under the supervision and the authority of the commissioner are exhibitions only and not contests and all such wrestling can only be advertised or announced as exhibitions, unless a special license is issued for a contest.

1.18(727A) The promoter shall have responsibility for compliance with the foregoing rules. He shall make certain that referees are familiar with rules and that referees enforce them. Promoters shall be answerable to the commissioner for noncompliance.

[Filed February 9, 1971]

CHAPTER 2
PROFESSIONAL BOXING RULES

2.1(727A) Ten rounds shall be the maximum number of rounds for a boxing bout, except for a championship match which may not exceed 15 rounds. Three minutes of boxing will constitute a round, or by special permission of the commissioner, two minutes. There will be a rest period of one minute between rounds.

2.2(727A) Permission must be received from the commissioner before a contestant will be

permitted to box an opponent 18 pounds heavier than himself in the welterweight or middleweight classes, or six pounds heavier than himself in or under the lightweight class.

2.3(727A) No contestant under the age of 18 years will be permitted to participate in any event except by special permission of the commissioner. In any event, he will not be permitted to box more than four rounds. No contestant under the age of 21 normally will be permitted to box more than six rounds until he has participated in ten or more professional bouts. However, if in the judgment of the commissioner, he has had sufficient experience, he may be allowed to participate in bouts of longer duration.

2.4(727A) If a contestant claims to be injured during the bout, the referee will stop the bout and request the attending physician to make an examination. If the physician decides that the contestant has been injured as the result of a foul, he should so advise the referee. If the physician is of the opinion that the injured contestant may be able to continue, he will order a five minute intermission, after which he will make another examination and again advise the referee of the injured contestant's condition. It shall be the duty of the promoter to have an approved physician in attendance during the entire duration of all bouts.

2.5(727A) If a contestant falls due to fatigue or is knocked down by his opponent, he will be allowed ten seconds in which to rise unassisted. When such contestant falls, his opponent will go to the farthest neutral corner and remain there while the count is being made. The referee will stop counting should the opponent fail to go to such neutral corner.

2.6(727A) Any boxing contestant who has agreed to take part in a bout of five rounds or more shall not be permitted to participate in any other bout, in Iowa or elsewhere, five days prior to the date thereof unless given permission by the commissioner.

2.7(727A) All main event contestants shall be in the city or locale at least 24 hours before the scheduled time of the bout or contest, and it shall be the duty of the promoter to advise the commissioner of such arrival time. Any exception to the foregoing must be approved by the commissioner.

2.8(727A) No person other than the contestants and the referee shall enter the ring during the bout, excepting the seconds between the rounds or the attending physician if asked by the referee to examine an injury to a contestant.

2.9(727A) Only one roll of cotton gauze surgical bandage, not to exceed two inches in width and ten yards in length, shall be used for the protection of each hand. Only one winding of surgeons' adhesive tape not more than one and one-half inches in width, may be placed directly on the hand to protect that part of the hand near the wrist. Said tape may cross the back of the hand twice, but shall not extend within one inch of the knuckles when the hand is clenched to make a fist.

2.10(727A) Twenty points shall be the maximum number to be scored in any round. The contestant winning the round will receive ten points and his opponent proportionately less. If the round is even, each contestant will receive ten points.

2.11(727A) The gloves must not be twisted or manipulated in any way by the contestants or their handlers. If a glove breaks or a string becomes untied during the bout, the referee will instruct the timekeeper to take time out while the glove is being adjusted.

2.12(727A) Contestants must wear proper athletic attire, including a foul proof protective cup. Athletic attire of opposing contestants shall be of contrasting colors.

2.13(727A) Excessive use of cocoa butter, petroleum jelly, grease, ointments or strong-smelling liniment by a contestant during the progress of a bout will not be permitted.

2.14(727A) A boxer will be deemed down when:

1. Any part of his body other than his feet is on the ring floor.
2. He is hanging helplessly over the ring ropes, but then is not officially down until so pronounced by the referee, who may count him out either on the ropes or on the floor.
3. Rising from a down position.

2.15(727A) The following tactics will be deemed foul:

1. Hitting below the belt or after the bell has terminated the round.
2. Hitting an opponent who is down or who is getting up after being down.
3. Holding an opponent or deliberately maintaining a clinch.
4. Holding an opponent with one hand and hitting with the other hand.
5. Butting with head or shoulders or using the knee.
6. Hitting with inside or butt of the hand, the wrist or the elbow and all backhand blows.
7. Hitting or "flicking" with the open glove or thumbing.
8. Wrestling or roughing at the ropes.
9. Purposely going down without being hit.
10. Striking deliberately at that part of the body over the kidneys.
11. Use of the pivot blow or rabbit punch.
12. Use of abusive or profane language.
13. Failure to obey the referee, or any physical actions which may injure a contestant, except by fair sportsmanlike boxing.

2.16(727A) The referee will penalize a contestant guilty of committing any of the above mentioned fouls by deducting points from his score in the round or rounds such fouls are committed; or if

in his judgment the foul is of a serious nature or intentionally inflicted, he may award the bout to the contestant so fouled.

2.17(727A) Scale of weights:

	[Pounds]
Flyweight	112
Bantamweight	118
Featherweight	126
Lightweight	135
Welterweight	147
Middleweight	160
Light heavyweight	175
Heavyweight	Over 175

2.18(727A) At each boxing card, the commissioner or a representative designated by him shall be in attendance.

2.19(727A) Contestants shall be weighed on the day of the scheduled match by the examining physician, at a time and place to be determined by the commissioner. Preliminary boxers may be allowed to weigh in and be examined not later than one hour before the scheduled time of the first match on the card. All weights stripped.

2.20(727A) Officials will consist of the referee, physician, timekeeper and judges. These officials and the contestants, seconds and managers are subject to approval by the commissioner.

2.21(727A) The office will not approve bout permits for bouts on Christmas Day; nor for bouts in which more than two boxing contestants are to appear in the ring at the same time, such bouts being commonly referred to as "battles royal". In programs wherein both amateur and professional contestants appear on the same card, there shall be no more than four amateur bouts of three rounds each and they shall be under the complete control and supervision of A.A.U. authority, provided that on each such card there shall be at least an equal number of bouts of professional boxing. The amateur section of the card shall be held first with at least a 15 minute intermission between the amateur and professional events.

2.22(727A) Promoters are held responsible to insure that adequate public safety is maintained at all bouts. A minimum of at least one law enforcement officer, furnished by the promoter, must be in attendance as required by the need for adequate public safety maintenance. Failure to so provide, may result in the cancellation of the matches and the revocation of the promoters' licenses.

2.23(727A) Excessive coaching and other detracting activities by seconds, managers or trainers while the bouts are in progress are prohibited. Offenders will be warned and if the violation continues, the offending contestant may be charged with a foul and loss of points.

2.24(727A) The use of foul or abusive language or mannerisms by any person associated with any bout will not be tolerated.

2.25(727A) Admission to locker rooms shall be restricted to officials, contestants, their managers and seconds. Locker rooms will be kept neat and clean.

2.26(727A) All contracts between promoters and contestants must be written on official forms furnished by the commissioner. One copy of each contract must be filed in the office of the commissioner at least seven days prior to the date of the bout, unless specific, individual delay is approved by the commissioner. Telegrams or letters indicating acceptance of terms will be considered an agreement between a contestant, his manager and the promoter pending the actual signing of the contract.

2.27(727A) The ring may not be less than 16 nor more than 22 feet square within the ropes and must be elevated three and one-half feet above the floor. Suitable steps for the use of contestants must be provided.

2.28(727A) The ring posts must be made of metal not more than four inches in diameter, extending from the floor of the building to the height of 58 inches above the ring floor and must be fastened securely to the floor or to the other posts.

2.29(727A) The ropes shall be a minimum of three in number, extending in a triple line 18 inches, 35 inches and 52 inches from the floor of the ring; at least one inch in diameter; and wrapped in soft materials. The ropes may not be closer to the ring posts than 18 inches. If four ropes are used, they will be proportionately spaced.

2.30(727A) The ring floor will extend beyond the lower rope for a distance of not less than 18 inches and the entire floor will be padded to the thickness of at least one inch with felt, corrugated paper, matting or other soft materials to be approved by the office of the commissioner. A canvas covering stretched tightly and laced to the ring platform will cover the padding.

2.31(727A) A suitable bell or gong must be provided and used.

2.32(727A) Gloves may not weigh less than eight ounces for professional bouts and must be new for all main events and bouts of ten rounds or greater.

2.33(727A) All gloves will be furnished by the promoter.

2.34(727A) Accurate scales will be furnished by the promoter.

2.35(727A) The referee is charged with the enforcement of all rules of the office of the commissioner which apply to the execution of performance and the conduct of contestants and of contestants' seconds while in the ring.

2.36(727A) Before starting each bout the referee will ascertain the name of the chief second in each corner and will hold him responsible for all conduct in the corners.

2.37(727A) The promoters may be permitted to name the referee from the approved list.

2.38(727A) The referee will stop a bout whenever he deems it advisable because of the physical condition of one or both of the contestants, or when one of the contestants is clearly outclassed by his opponent, or whenever he decides that a contestant is not making his best efforts, or for any other reason he deems sufficient.

2.39(727A) The referee has the power to declare forfeited all or any part of a contestant's purse whenever in the referee's judgment such contestant is not performing in good faith.

2.40(727A) The referee will inspect the gloves and bandages of the contestants in all main events and make sure that no foreign substances have been applied to the gloves or bodies of the contestants that might be detrimental to an opponent. In bouts preliminary to the main event, when the gloves are adjusted in the dressing rooms, he will inspect the gloves and bodies of the contestants.

2.41(727A) The contestants in all boxing bouts will be instructed by the referee to shake hands after his final instructions and not to do so again until the start of the last scheduled round.

2.42(727A) The contest will be decided by the vote of the referee and the two judges.

2.43(727A) The referee should instruct the judges, when used, to mark their scorecards accordingly when he has assessed a foul upon one of the contestants.

2.44(727A) The referee must insure that a bout moved to its proper completion. It should be stopped or completed, not delayed, except in cases of damaging fouls. Delaying and avoiding tactics should be avoided and the contestant who employs such tactics should be penalized in the scoring.

2.45(727A) When a fallen contestant rises and falls again, without being hit again, the referee will continue the original count rather than starting a new count.

2.46(727A) In assessing fouls, the referee must weigh the cause as well as the act. When a foul is unintentionally inflicted but intentionally received, it should be applied to the deliberate recipient.

2.47(727A) The referee shall penalize a contestant who uses the ropes to gain advantage by deducting points accordingly, and warning the contestant against continued use of the ropes for this purpose.

2.48(727A) Whenever a boxer has been injured seriously, knocked out or technically knocked out, the referee will immediately summon the attending ring physician to aid the stricken boxer. Managers, handlers and seconds may not attend to the stricken boxer, except at the request of the physician.

2.49(727A) Except for championship fights of national recognition, the referee shall stop the fight after a fighter is knocked down three times in one round with a winner declared on a T.K.O.

2.50(727A) The timekeeper will provide a stopwatch and a whistle which he will blow ten seconds before the start of each round in boxing bouts.

2.51(727A) It is the duty of the timekeeper to keep accurate time of all bouts. He will keep an exact record of time taken out at the request of a referee for an examination of a contestant by the physician, replacing a glove or adjusting any equipment during a round.

2.52(727A) The timekeeper must be impartial and it is a violation of these rules for any timekeeper to signal interested parties at any time during a bout.

2.53(727A) Unless special permission is given by the commissioner, the seconds may not be more than two in number, one of whom will announce to the referee at the start of the bout that he is the chief second.

2.54(727A) Seconds may not enter the ring until the timekeeper indicates the termination of the round and they must leave at the sound of the timekeeper's whistle before the beginning of each round. If the chief second or anyone for whom the promoter is responsible, such as a manager, enters the ring before the bell ending the round has sounded, the fight will be terminated and the decision will be awarded to the opponent.

2.55(727A) Seconds shall not throw or splash water upon a contestant. A wet sponge may be used between rounds to refresh the contestant. Excess water on the floor of the ring must be wiped up at once by seconds. Water discharged from the mouth of a contestant must be caught in the bucket furnished for that purpose.

2.56(727A) Seconds may not smoke in the ring or corners and may not wear a hat or cap while working in the corner.

2.57(727A) The throwing of a towel into the ring to indicate the defeat of a contestant will not be recognized by the referee. If a second or manager desires to have the fight stopped, he should present himself on the ring apron.

2.58(727A) Before leaving the ring at the start of each round the seconds will remove all obstructions, buckets, stools, bottles, towels and robes from the ring floor and ropes.

2.59(727A) The judges will be two in number and their scorings together with the referee's will be used to determine the winner.

2.60(727A) The judges will reach their decision without conferring in any manner with any other official or person. Each judge will make out a score card to the best of his ability and in accordance with the provisions of the rules governing boxing. At the end of the bout the decision must be written on the score card and the card will be handed to the referee who will then announce the decision.

2.61(727A) In all professional boxing contests, the winner shall be determined on the majority vote of the two judges and the referee and each judge and referee shall select his choice on the highest number of points.

AUDITOR OF STATE

INDUSTRIAL LOAN DIVISION

CHAPTER 1
INDUSTRIAL LOANS

1.1(536A) Licenses. The license and current license renewal card of each licensee shall be prominently displayed and available for easy reading by the public in the place of business of the licensee.

1.2(536A) Multiple business authorization. This regulation shall be known as the "Multiple Business Regulation." Any authorization granted by this regulation shall be conditional upon full compliance with all parts thereof. Printed copies of the "Application for Multiple Business Authorization" shall be obtained from the office of Auditor of State, Division of Industrial Loan Audits, State Capitol Building, Des Moines, Iowa 50319. The printed application form shall be used by each licensee when applying for multiple business authorization. All information shall be supplied in full and where space is inadequate for a full answer, a rider shall be attached.

1.3(536A) Other business in same office. The auditor of state, upon receiving a completed application from a licensee, may authorize that licensee to conduct its industrial lending business within the same office, room, suite or place of business in which any other business is conducted except that no authorization will be granted to a licensee to conduct its industrial lending business within the same office, room, suite or place of business where the sale of tangible personal property is conducted; except that the sale of repossessed property shall be allowed.

1.4(536A) Examination of books. The auditor of state or his duly appointed representative shall have the right to examine and investigate the books, accounts and records wherever situated of all businesses authorized or conducted by a licensee licensed pursuant to chapter 536A of the Code. All books, accounts and records pertaining to businesses conducted pursuant to such license shall be made readily available to the examiners who may investigate without prior notice.

1.5(536A) Index. An alphabetical index shall be maintained for each borrower, endorser, comaker, surety or other party currently indebted to the licensee or to any other business operated within the same office, room, suite or place of business. The index shall show the following information:

The name of the obligor, the account number assigned to the obligor's indebtedness, the type of indebtedness (small loan, industrial loan, insurance, receivable, etc.), information showing whether the obligor is other than a borrower and sufficient information to locate all account ledger cards.

1.6(536A) Account ledger cards. Account ledger cards relating to each type of business operation must be filed in separate groups. Paid-in-full or renewed account ledger cards must also be filed in similar manner and must be retained as a separate group for at least three years following the annual examination.

1.7(536A) Account ledger card control. A record shall be maintained in the licensed office showing the total number and amount of the account ledger cards for each type of business conducted. This record shall be posted either daily or weekly.

1.8(536A) Dual loans. If any person or husband and wife, individually or together, are indebted in any amount under the provisions of the Iowa small loan law, no loan shall be made by the same office to said person or husband and wife, individually or together, under the Iowa industrial loan law.

1.9(536A) Loan conversion. If any person or husband and wife, individually or together, are indebted in any amount on a loan made under the provisions of the Iowa industrial loan law, no loan shall be made to said person or husband and wife, individually or together, under the Iowa small loan law unless the proceeds of the small loan, after deducting insurance premiums, exceed by $200 or more the amount necessary to pay in full the balance due on the industrial loan after the normal rebates have been made. The proceeds of

the small loan shall, to the extent necessary, be applied to pay off the balance of the industrial loan.

1.10(536A) Advertising limitations. There shall be no direct or indirect indication whatsoever in any advertisements that loans made under the Iowa industrial loan law are subject to the Iowa small loan law; and likewise, no advertising for loans to be made under the Iowa small loan law shall indicate that such loans are subject to the Iowa industrial loan law.

1.11(536A) Type in advertising. The size and face of the type used in describing the two types of loans shall be the same.

1.12(536A) Multiple business revocation. If the licensee or other business affiliate fails to comply with all conditions set forth in this regulation, the auditor of state, upon giving ten days' advance written notice to the licensee by certified mail stating his contemplated action and the grounds thereof, and after granting the licensee an adequate hearing, may revoke the licensee's authorization to conduct a multiple business operation.

1.13(536A) Books and records. Licensees shall be required to preserve their books, accounts and files for a minimum period of three years following the date of final entry recorded therein.

1.14(536A) Loan record. Records for loans made under the Iowa industrial loan law shall be kept separate from other types of business conducted in the office of the licensee.

1.15(536A) Exceptions. Each licensee shall keep the following records in its place of business, except that combination forms and special office systems may be used in lieu thereof, if approved by the auditor of state in writing.

1.15(1) *Loan register.*

a. The loan register shall contain the original entry and shall show for every loan the loan number, date of loan, name of borrower and amount of note.

b. The loan register shall be kept numerically by loan number in the order made.

1.15(2) *Account ledger cards.*

a. An individual account ledger card shall be kept for each account and shall show at least the loan number, name and address of the borrower, date of loan, date of first payment, date of final payment, terms of repayment, face amount of note, cash advanced to borrower, cash advanced to pay balance of previous industrial loan, interest or discount charge, service charge, appraisal fee, attorney fee, fee paid or to be paid to a public official for recording or filing a mortgage or for satisfying a judgment or lien on any real or personal property securing the loan, type and cost of credit life insurance, type and cost of health and accident insurance and type and cost of other insurance; except that if only one type of credit life or health and accident insurance is being provided by the licensee only the cost for each need be shown.

b. In the case of precharging or precollecting of releasing fees, there shall be evidence of the amount charged or collected posted to the account ledger card and carried forward on all future account ledger cards until the amount is disbursed.

c. All payments shall be credited upon the account ledger card as of the same day they are received.

d. The account ledger card shall show the amount and date of each payment applied to the note, the unpaid balance of the note after applying such payment and the date and amount of any additional charge collected for delinquency or deferment.

e. If payment is made through the proceeds of an insurance claim or the sale of security, it shall be so designated.

f. No erasures whatsoever may be made in the payment section of any account ledger. In case of error, a line shall be drawn in ink through the improper entry and the correct entry made on the following line.

g. When a loan is prepaid in full, the account ledger card shall show the date of prepayment, the amount paid to discharge the loan, the amount of the interest or discount rebate and any deduction from the rebate for previously earned but uncollected delinquency charges.

h. When a loan is prepaid in full, by the borrower, any refund of the cost of credit life insurance, health and accident insurance or other insurance shall be recorded on the card.

i. Paid-in-full or renewed account ledger cards must be retained as a separate group until released by the auditor of state; except that no licensee shall be required to keep a card in this group for more than three years following the date of final payment.

1.15(3) *Original paper file.*

a. A separate file, envelope or folder shall be maintained for each borrower or loan account.

b. Such file shall contain all papers relating to the borrower or his loan with the exception of the promissory note which may be kept in a separate promissory note file. Exceptions to the above requirement are the note and security instrument which have so been sold, pledged or assigned as collateral security and any papers in the custody of a court or agent for collection.

c. All instruments evidencing or securing a loan must bear the loan number.

d. No instrument or part thereof shall be left blank for completion in the absence of signature by the borrower or borrowers.

1.15(4) *Promissory note file.* If the promissory notes are not kept in the file of original papers and have not been sold, pledged or assigned as collateral security or placed in the custody of a

court or agent for collection, then they must be kept in a promissory note file.

1.16(536A) Insurance premium refunds. If the policy is surrendered for cancellation by the borrower, the refund or credit of an amount paid by the debtor for insurance shall be not less than the pro rata unearned gross premium in the following cases:

1.16(1) *Decreasing term.* All decreasing term credit life insurance or credit accident and sickness insurance except that payable by a single premium.

1.16(2) *Level term.* All level term credit life insurance.

1.17(536A) Single premium insurance refund. If the policy is surrendered for cancellation by the borrower, the refund or credit of an amount paid by the debtor for insurance, in the case of decreasing term credit life insurance or of credit accident and sickness insurance upon which a single premium is paid in advance, shall be not less than the amount computed by the "Direct Ratio Method," commonly known as the "Rule of 78's."

1.18(536A) Property insurance refunds. If the policy is surrendered for cancellation by the borrower, the refund or credit of an amount paid by the debtor for property insurance shall be not less than the amount required by the short rate refund table approved by and on file in the office of the Iowa commissioner of insurance.

1.19(536A) Refund exception. A premium refund or credit need not be made if the amount thereof is less than one dollar per type of insurance.

1.20(536A) Fees. All fees paid by a borrower to a licensee for recording or filing a chattel mortgage or security agreement or for satisfying a judgment or lien on any real or personal property securing a loan shall be evidenced by a receipt or other satisfactory evidence of payment.

1.21(536A) Appraisal fees. All fees paid by a borrower to a licensee for actual expenses incurred by the licensee in appraising real or personal property offered by the borrower as security for a loan shall be evidenced by a written explanation of how the fee was computed. The following are acceptable as expenses incurred by a licensee in making appraisals:

1.21(1) The actual cost of transportation or a reasonable mileage cost estimate to and from the place where the appraisal is to be made.

1.21(2) The actual cost of the appraiser's time.

1.21(3) Meals and, if it is necessary for the appraiser to remain out of town overnight, lodging.

1.22(536A) Independent appraiser. The licensee may choose to have the appraisal performed by an independent appraiser. In this case, the cost of the appraisal would be the amount charged by the independent appraiser as evidenced by his statement. The appraiser's statement shall be retained.

1.23(536A) Abstracting and opinion charges. A licensee may collect from a borrower the actual cost incurred in the continuation of an abstract and an attorney's opinion as to the title to real property securing a loan. The charge shall be evidenced by a statement rendered by the individual or firm performing the service.

1.24(536A) Prepayment. Refunds for prepayment in full shall be computed by the "Direct Ratio Method," commonly referred to as the "Rule of 78's" method, based on the number of full months the loan is prepaid in full.

1.25(536A) Restrictions. No person other than an actual or bona fide employee of the lender or the principal borrower shall obtain the signature of one or more of the principal borrowers outside the loan office except under unusual circumstances or where the loan is made by mail.

1.26(536A) Penalty. It shall be the responsibility of each licensee to see that all management personnel are familiar with the Iowa industrial loan law and all rules promulgated thereto.

The foregoing rules are intended to implement chapter 536A of the Code.

[Filed October 8, 1965; amended December 13, 1966, November 15, 1967]

SAVINGS AND LOAN DIVISION

CHAPTER 2
INCORPORATION AND ORGANIZATION

2.1(534) Board resolution to file application. Prior to an association amending its articles of incorporation and the bylaws for the purpose of establishing a branch office, the board of directors of the association will, by resolution, authorize the filing of an application for permission to establish a branch office along with the supporting information required by such application. The prescribed form of application and an outline of information required in support thereof may be obtained by request from the office of the Auditor of State, Supervisor of Savings and Loan Associations, State Capitol Building, Des Moines, Iowa.

2.2(534) Eligibility. No application will be considered if at the date on which it is filed:

2.2(1) The location of the proposed branch office is outside the "regular lending area" as defined in section 534.1(5), with the further stipulation that branch offices outside of the state of Iowa will not be considered;

2.2(2) The association has not been in operation for at least three years;

2.2(3) The association has on file any other application for permission to establish a branch office with respect to which action by the supervisor, auditor of state or the state executive council is pending;

2.2(4) The association has received approval for another branch office and such office has not yet opened;

2.2(5) The association does not submit assurance that the proposed branch office will open within 18 months of the date of approval of amendment to the articles and bylaws by the state executive council.

2.3(534) Application and supporting data. In support of the requirements of the Code, the association will supply such data as are outlined in the "Application for Permission to Establish a Branch Office." Particular emphasis is placed on trend data concerning the proposed branch service area. Appropriate to this are economic surveys of the area, whether compiled primarily for the applicant or for other local groups. Also required are an estimate of the annual income and expenses of the proposed branch office, the annual business to be transacted by it, and a statement of the functions to be performed at such office and of the personnel and office facilities to be provided for the operation of the office.

2.4(534) Annual budget. The application for permission to branch must be accompanied by a proposed annual budget of the association. The budget is for the confidential use of the supervisor and the auditor of state and is not to be open to inspection by the public.

2.5(534) Evaluation of applications. A certified copy of the association's board of directors' resolution authorizing application, the completed "Application for Permission to Establish a Branch Office" and the proposed annual budget will be submitted by the association to the office of the auditor of state, savings and loan division. The auditor of state and the supervisor are charged with the preliminary evaluation of the application and supporting data and may request further information as may be desirable in particular cases. They will have 30 days from date of receipt of all required or requested information in which to evaluate the application.

2.6(534) Amendment of articles and bylaws. If, upon evaluation of the information presented, the auditor of state and the supervisor approve the application, they will give written notice to the association to proceed with amendment of the articles of incorporation and bylaws of the association. The articles are to be amended as provided in section 534.3(3) "*g*" and the bylaws by resolution of the board of directors. Both amendments are subject to approval of the supervisor as to form and must be approved by the state executive council. The amendments must indicate the location for the specific branch office intended. An amendment cannot be made giving the association broad powers to branch.

Upon approval of the members of the amendment to the articles of incorporation and upon approval of the amendment to the bylaws by the board of directors, four certified copies of each of the amendments shall be filed with the supervisor.

2.7(534) Published notice of branch. If, upon receipt of the amendments, the supervisor approves them as to form he shall give the association written notification to publish the following notice:

NOTICE OF FILING AMENDMENTS TO THE ARTICLES OF INCORPORATION AND BYLAWS

APPLICATION FOR THE PURPOSE OF ESTABLISHING A BRANCH OFFICE

Notice is hereby given that, pursuant to the provisions of section 534.3 of the Code and the rules of the office of Auditor of State, Savings and Loan Division, the .....
Savings and Loan Association, ..., Iowa has filed with the Auditor of State, amendments to the articles of incorporation and bylaws of the association for submission to the state executive council. Said amendments provide for the establishment of a branch office at, or in the immediate vicinity of, ..., ..., Iowa. The amendments along with a completed "Application for Permission to Establish a Branch Office" have been delivered to the office of Auditor of State, located in the State Capitol Building, Des Moines, Iowa. Any person may file communications in favor or in protest of said amendments and application at the office of auditor of state within 20 days after the date of this publication. The amendments and completed application, together with all communications received in favor or in protest thereof, are available for inspection by interested persons at the aforesaid office.

.....Savings and Loan Association
....., Iowa.

The association shall publish the notice in a newspaper of general circulation in the community in which the branch office is to be located within 15 days of the supervisor's notification to do so. A copy of the notice accompanied by a publisher's affidavit will be furnished the supervisor by the association immediately after publication.

2.8(534) Submission of amendments. Upon receipt of the affidavit of publication of notice and following the 20-day period for communications allowed in the notice, the supervisor will deliver the amendments to the auditor of state for presentation to the state executive council. Processing of the amendments will be as provided in section 534.3 of the Code. Approval by the state executive council of the amendments will constitute approval of the proposed branch office. If the

state executive council disapproves the amendments, appeal may be made as provided in section 534.3(3)"*b*" of the Code.

[Filed September 15, 1966]

CHAPTER 3
SAVINGS LIABILITY—DIVIDENDS

3.1(534) Classes of savings. In addition to regular savings share accounts, an association may, if its articles of incorporation permit and by resolution of its board of directors, classify savings according to the character, amount or duration thereof, or regularity of additions thereto. For this purpose, the classifications are defined.

3.1(1) *Bonus accounts.* Under the bonus arrangement, the association may agree, by issuance of a bonus security certificate, to pay an extra dividend at a specified rate in addition to the regular dividend rate.

Bonus accounts may be:

Fixed balance accounts of $1,000 or a greater amount which is an integral multiple of $1,000, maturing in 36 months, or

Accounts on a monthly payment basis, such monthly payments to be set forth in a bonus agreement, for a period of not less than 36 months nor more than 96 months.

a. Regular dividends shall be distributed as of the normal distribution dates and the bonus amount upon completion of the agreed upon maturity. In the event that the account is withdrawn prior to the maturity date specified, no bonus may be paid nor may a penalty be assessed. The association shall, on each regular dividend payment date, make appropriate debits and credits to a "Reserve for Bonus" which shall be maintained as long as bonus accounts are outstanding.

b. The bonus security form to be used shall be submitted to the supervisor for approval prior to initiation of any bonus plan.

c. Bonus certificates, issued under any plan prior to the effective date of this regulation, must be redeemed upon their date of maturity, which date shall, in no event, be later than July 1, 1968. Such certificates may be replaced by a regular savings share account or a plan conforming to one of the classes of savings set forth in this rule.

3.1(2) *Variable accounts.* The association may offer accounts in either single payment plan, bonus plan, variable rate plan or otherwise with terms of not less than 60 days or more than ten years.

3.1(3) *Ninety-day notice accounts.* The term "notice account" means any form of withdrawable account evidenced by an account book or certificate containing a requirement that the holder of the account give the association written notice of at least 90 days prior to making any withdrawal from such account, except as provided in this rule. An association may provide that such notice prior to withdrawal will not be required at the end of a dividend period or within ten days thereafter in connection with the withdrawal of funds which have remained in the association for at least 90 days. In the event of any other withdrawal from such account prior to the expiration of such notice period, the holder of such account shall not be entitled to receive accrued and unpaid earnings on the amount withdrawn for the period of time such funds remained in the association since the last date on which the association regularly distributed earnings on notice accounts.

This amendment is intended to implement sections 534.10 and 534.42 of the Code.

[Filed September 14, 1967; amended June 28, 1968, July 9, 1968, May 13, 1969, October 12, 1972]

CHAPTER 4
MUTUAL DEPOSITS

4.1(534) Mutual deposit association.

4.1(1) *General approval.* A state-chartered association may elect to operate in a manner similar to federally chartered savings and loan associations as a "mutual deposit" association or institution. Such an election shall enable such institution or association to avail itself of the various terminology and powers authorized for "mutual deposit" savings associations or institutions as authorized by federal law and limited by rules and regulations of the Federal Home Loan Bank System or the Federal Savings and Loan Insurance Corporation from time to time, and as implemented and approved by the rules of the supervisor of savings and loan associations.

4.1(2) *Procedure to elect.* In order to elect to become such a "mutual deposit association or institution", a state chartered association shall by action of its members at a regular annual meeting or a specially called meeting for that purpose amend its articles of incorporation so as to convert to a mutual deposit type institution or association by adopting Articles of Incorporation which are substantially similar to those which are attached hereto as addendum "A" and by this reference made a part hereof and especially which shall contain the provisions of Articles 5, 7, 17, 18, 20, 21, 22 and 23 of said Model Articles of Incorporation. The associations shall further obtain the formal approval of the supervisor and the executive council of the state of Iowa.

4.1(3) Such associations as elect to become mutual deposit type associations or institutions shall also continue to have the rights and powers and be generally regulated and limited by the provisions of chapter 534 of the Code as amended from time to time, as though they had not converted, excepting where federal regulations or rules of this office specifically adopted for "mutual deposit" type associations may limit same.

4.2(534) Fixed-rate, fixed-term savings deposit accounts.

4.2(1) *General approval.* A state-chartered association which in accordance with state law may accept accounts bearing a definite rate of return for fixed periods of time (hereinafter referred to as "fixed-rate, fixed-term accounts") and whose board of directors has adopted a resolution providing for the issuance of such fixed-rate, fixed-term accounts may, subject to the limitations contained in 4.2(2), and to the disclosure provisions contained in 4.2(3), issue certificates evidencing such fixed-rate, fixed-term accounts in such form as the board of directors of the institution may determine.

4.2(2) *Limitations.* In issuing certificates evidencing fixed-rate, fixed-term accounts pursuant to the approval contained in 4.2(1), no insured institution shall:

a. Provide for any forfeiture for breach of condition on the part of any holder, other than loss of interest or partial loss thereof, for the term of the fixed-rate, fixed-term account or other specified time period;

b. Issue any negotiable form of certificate evidencing a fixed-rate, fixed-term account;

c. Deny any member the opportunity to invest at the same rate offered to any other member at that time on the same classification of fixed-rate, fixed-term account;

d. Accept any fixed-rate, fixed-term account for a term of less than 60 days or more than ten years; provided, that any fixed-rate, fixed-term account may be renewed, at the option of the institution, for successive periods not exceeding ten years for each renewal;

e. Provide for withdrawal from any fixed-rate, fixed-term account prior to the expiration of the fixed-term, except as provided in 4.2(4);

f. Issue any fixed-rate, fixed-term account which is subject to redemption; or

g. Issue any form of certificate evidencing a fixed-rate, fixed-term account unless the institution has first (1) obtained a written opinion by its legal counsel that such form of certificate complies with the requirements of applicable law and regulations and the institution's articles of incorporation and bylaws, which opinion shall be retained by the institution so long as it continues to issue certificates in such form, and (2) submitted a copy of such form of certificate, together with a copy of such legal opinion, to the supervisor of savings and loan associations, office of the auditor of state. Provided, that such legal opinion need not be obtained if the institution uses a form of certificate which has already been approved by the Federal Savings and Loan Insurance Corporation for use by state-chartered institutions.

4.2(3) *Disclosure.* Each certificate evidencing a fixed-rate, fixed-term account accepted pursuant to the approval contained in 4.2(1) shall include in its provisions and display in easily read type:

a. The rate of interest to be paid and the dates or frequency at which interest is payable;

b. The amount of the fixed-rate, fixed-term account;

c. The term of the fixed-rate, fixed-term account;

d. The penalty or penalties imposed for withdrawal prior to completion of the fixed term or renewal;

e. Any provisions relating to renewal at the conclusion of the fixed term;

f. Any provisions relating to the interest to be paid after the conclusion of a fixed term or renewal;

g. A provision converting the fixed-rate, fixed-term account at the conclusion of a fixed term or renewal to the status of an account accepted for an indefinite period of time;

h. The minimum balance requirement applicable to fixed-rate, fixed-term accounts.

4.2(4) *Withdrawal prior to expiration of term.* Each certificate issued by an insured institution for a fixed-rate, fixed-term account shall provide that, in the event of withdrawal of all or any portion of such account prior to the expiration of its term: (a) If the term of such account is less than one year, except with respect to accounts of $100,000 or more, the account holder shall receive interest on the amount withdrawn at such rate, not in excess of the rate then being paid on savings accounts accepted for an indefinite period of time and subject to such other penalties as the certificate evidencing such accounts may provide. (b) If the term of such account is one year or more or if such account is in the amount of $100,000 or more, the account holder shall receive interest at the stated rate on the amount withdrawn less such penalty as the certificate evidencing such account may provide. Such penalty shall be in amount not less than the lesser of the interest for 90 days (three months) on the amount withdrawn or all interest (since issuance or renewal of the account) on the amount withdrawn. (c) If any interest has been paid to the account holder prior to such withdrawal, a deduction shall be made from the amount withdrawn to adjust for the penalty applicable to such interest. In the case of early withdrawal of only a portion of such account, the certificate evidencing such account shall be canceled if the applicable minimum balance requirement ceases to be met; appropriate notation may be made on the certificate indicating the amount and date of such withdrawal and the remaining account balance or the certificate may be canceled and a new certificate issued for the remaining portion of the account with the same term, rate and dates as on the canceled certificate. A certificate issued by an insured institution for a fixed-rate, fixed-term account may provide that the holder

cannot withdraw any portion of such account prior to the expiration of its term except under such emergency circumstances as may be set forth therein.

ADDENDUM A
MODEL ARTICLE OF INCORPORATION
FOR
.....SAVINGS AND LOAN ASSOCIATION
(A Mutual Deposit Institution)

Section 1. Name and Place of Business. The name of this association shall be..... Savings and Loan Association, a mutual deposit institution, and its principal place of business shall be in the City of ..... in the County of ..... and the State of Iowa. Any security instruments to which the association is a party shall identify it as a "mutual deposit institution".

Section 2. Seal. This association may have a seal consisting of two concentric circles with the words "..... Savings and Loan Association, a mutual deposit institution" between such circles and the word "Incorporated" in the center, and, under it, the date of Incorporation. An impression of such seal if used by the association shall be necessary on all instruments conveying title to real estate, but shall not be necessary on any other instrument.

Section 3. Duration. This association shall continue and exist, perpetually, unless sooner dissolved in the manner authorized and provided for by the laws of Iowa.

Section 4. Objects. This association is formed to operate and do business as a savings and loan association, a mutual deposit institution. Its objects and purposes are to promote and encourage thrift and home ownership by providing a convenient and safe cooperative method for savings and accumulating money and investing such money in loans to its members on the security of first mortgages and to do such other business as shall be authorized by the laws of Iowa.

MEMBERSHIP

Section 5. Membership. Any person, firm, corporation and other legal entity may become a member of this association: (1) By owning a savings account or a savings deposit account. (2) By becoming a borrower on a mortgage loan or assuming such a loan. (3) By purchasing on contract from the association or, (4) By any other method authorized by Chapter 534, Code of Iowa.

MEMBERS' MEETINGS—
QUORUM — VOTING RIGHTS

Section 6. Members' Voting Rights. At all members' meetings, each member including borrowing members shall have one vote in person or by proxy for each one hundred dollars paid in and credited on his savings deposit account or savings deposits. Such voting shall be as prescribed by Chapter 534, Code of Iowa.

Section 7. Fines, Fees and Penalties. Except for borrowers, the institution shall not directly or indirectly charge any membership, admission, repurchase, withdrawal, or any fee or sum of money for the privilege of becoming, remaining or ceasing to be a holder of a savings account or deposit, except such penalty or forfeiture as the law may prescribe or allow in the event of an emergency withdrawal or any other type of withdrawal prior to maturity, such penalty or forfeiture in no event to be greater than a loss of interest.

Section 8. Members' Meetings—Regular. A regular annual meeting of the members shall be held on the.....Wednesday in January of each year at the office of the association beginning with the hour of.....M. Notice of such meeting shall be given as prescribed by Chapter 534, Code of Iowa.

Section 9. Special Meeting. Special meetings of members may be held at any time on call of the President or by written call signed by a majority of the directors. Notice of any special meeting shall be published at least once in a newspaper of general circulation published in the city of the principal place of business of this association not less than ten days and not more than twenty days before the date of such special meeting. Such notice must in general terms state what is to be considered and acted on at such special meeting.

Section 10. Quorum—Rules of Order. Not less than ten members holding or representing not less than $.....in a savings account or in a savings deposit account in person or by proxy shall constitute a quorum for transaction of business at any members' meeting. Roberts' Rules of Order shall govern in all such meetings.

GENERAL MANAGEMENT—DIRECTORS
—OFFICERS

Section 11. Directors — How Elected — Quorum — Qualifications. The business of the association shall be managed by a board of directors of not less than five or more than fifteen as determined and elected by ballot from among the members by a plurality of the votes of the members present in person or by proxy. If authorized by vote of the members, the directors may elect all directors. At all times at least two-thirds of the directors shall be bona fide residents of this state.

In order to qualify as a director, a member of this association must hold a savings account or a savings deposit account in the amount of at least two hundred dollars; provided that, if the assets of the association exceed five hundred thousand dollars, such member must hold a savings deposit account in the amount of at least five hundred dollars; and provided further, if the assets exceed two and one-half million dollars, his savings account or savings deposits must be at least one thousand dollars. A director shall automatically cease to be a director when he ceases to be a member, or when the net equity above savings deposit account loans of the member aggregates less than the minimum

required to be eligible for election as a director, provided no action of the board of directors shall be invalidated through the participation of such director in such action.

At the first annual meeting, the directors shall by majority vote be divided into three classes of as nearly equal numbers as possible. The term of office of directors of the first class shall expire at the annual meeting next after the first election; of the second class, one year thereafter; and of the third class, two years thereafter; and at each annual election thereafter directors shall be chosen for a full term of three years to succeed those whose terms expire.

The number of directors within the limits hereinabove specified may be subsequently increased only by vote of the members.

If the members fail to elect a director to fill each vacancy created by any such increase, the directors may fill such vacancy by electing a director to serve until the next annual meeting of the members, at which time a director shall be elected to fill the vacancy for the unexpired term for the class of director in which such vacancy exists.

Whenever under the provisions hereof the number of directors is changed and vacancies caused by such change are filled, the directors so elected shall be classified in accordance with the provisions hereof, so that each of the three classes shall always contain numbers as nearly equal as possible.

Any vacancy among directors, not so filled by the members, may be filled by a majority vote of the remaining directors, though less than a quorum, by electing a director to serve until the next annual meeting of the members, at which time a director shall be elected to fill the vacancy for the unexpired term for the class of director in which such vacancy exists. In event of a vacancy on the board of directors from any cause, the remaining directors shall have full power and authority to continue direction of the association until such vacancy is filled.

Section 12. Executive Committee. The Board of Directors may elect from their number an Executive Committee consisting of three or more directors to which it may refer any and all matters requiring consideration and action between board meetings. The Board of Directors may also elect such other committees as it may deem necessary.

Section 13. Officers — How Elected — General Duties. The Board of Directors shall immediately after each annual members' meeting assemble and elect, either from or outside of its own membership, a President, one or more Vice Presidents, a Secretary, Counsel, and such additional officers as it shall deem necessary. The Board of Directors shall also have power to fill vacancies in such offices. All salaries, including compensation for directors, shall be fixed by the Board of Directors. One person may hold any two offices. The officers shall be responsible for the operation and management of the association under the general management and direction of the Board of Directors, and within the provisions of these articles of incorporation, the bylaws adopted by the Board consistent herewith and the statutes of the State of Iowa. Officers shall be elected for terms not exceeding one year at a time or for such shorter terms as the Board of Directors may deem advisable.

Section 14. Present Directors. The following shall constitute its Board of Directors for the term indicated:

Name	Address	Term Expires

Section 15. Present Officers. Until the next annual members' meeting, the following shall be the officers of this association:

President	of
Vice President	of
Secretary	of
Treasurer	of
Counsel	of

Section 16. Execution of Conveyances and Releases. The President or the Vice President, together with the Secretary or the Assistant Secretary, if any, or such other officers as the Board of Directors may approve, shall have authority to execute any instrument affecting the title to real estate and the seal of the association shall be impressed upon such instrument, if used by the association. Either the President, Secretary or the Vice President alone or such other officer as the Board shall expressly authorize, shall have authority to release mortgages when they are settled in full and may make such releases on the margin of the record without seal.

SAVINGS DEPOSITS

Section 17. Savings Deposits. All savings accounts of this institution shall be considered savings deposits in accordance with the law of the state of Iowa. Share accounts existing in this institution on the date it became a deposit institution shall remain share accounts unless and until they are exchanged for savings deposits. Any right outstanding at the time when this institution became a deposit institution to receive a savings account from the institution in exchange for a previously issued savings account shall thereafter be a right to receive, at the option of the holder of such right, either a savings account or a corresponding savings deposit."

Section 18. Priority. In the event of voluntary or involuntary liquidation, dissolution, or winding up of this institution or in the event of any other situation in which the priority of such savings deposits is in controversy, all savings deposits shall, to the extent of their withdrawal value, have the same priority as the claims of general creditors of the institution not having priority (other than any priority arising or resulting from consensual subordination) over other general creditors of this institution, and, in addition, savings deposits shall have the same right to share in the remaining assets of the institution as if they were savings accounts. If, in any such event, there are outstanding

in this institution any one or more insured accounts which are not savings deposits, such insured accounts (regardless of whether there are or are not outstanding in this institution any one or more such savings deposits) shall, to the extent of their withdrawal value, have the same priority as if they were savings deposits. As used in this section, the term insured account has the same meaning as defined in the rules and regulations for insurance of accounts of the Federal Savings and Loan Insurance Corporation.

Section 19. Reserve for Contingencies. As of June thirtieth and December thirty-first of each year the Board of Directors shall transfer and credit to a general reserve account an amount equivalent to not less than two per cent of the net earnings of the association for the preceding six months, called the "accounting period", such transfers to be made at the end of each six months' accounting period, until such general reserve account is equal to at least five per cent of the total amount of savings account or savings deposit account. If at any time thereafter such general reserve account shall on account of losses be reduced to less than five per cent of the amount of savings accounts or savings deposit accounts, such transfer and credits thereto shall be resumed and continued until such reserve is again equal to at least five per cent of the total amount of savings accounts or savings deposit accounts. The reserve account so established shall at all times be maintained and used for the sole purpose of absorbing losses incurred by the association and for no other purposes. The association may establish such other and additional special reserves as may be ordered by its Board of Directors.

Section 20. Types of Savings Deposits. Savings accounts or savings deposit accounts may be opened and held solely and absolutely in his own right by, or in trust for any person, including an adult or minor individual, male or female, single or married, a partnership, association, fiduciary corporation, or political subdivision or public or government unit or any other corporation or legal entity. Savings accounts or savings deposit accounts shall be represented only by the account of each savings account or savings deposit account holder on the books of the association, and shall be transferable only on the books of the association and upon proper written application by the transferee and upon acceptance by the association of the transferee as a member upon terms approved by the board of directors. The association may treat the holder of record of a savings account or savings deposit account as the owner thereof for all purposes without being affected by any notice to the contrary unless the association has acknowledged in writing the notice of a pledge of such savings account or savings deposit account.

An account book may be issued to each savings account or savings deposit account holder on the books of the association and such account book shall, if issued, contain a form of membership certificate to indicate the withdrawal value of the savings share account. A separate certificate for a savings account or a savings deposit account may be issued in lieu of an account book in form to be approved by the supervisor.

The following types of savings deposits may be accepted in the discretion of the board of directors:

1. Full-Paid Savings Deposits, when the full value thereof is paid at the time of issuance.

2. Installment Savings Deposits, on which payments shall be made in the amounts and at the times fixed by the board of directors.

3. Optional Savings Deposits, on which, after the first payment has been made, the account holder may pay any amount at any time.

4. Short-Term Club Savings Deposits, on which payments may be made at the option of the account holder to be withdrawn within..... months. (Not to exceed 24 months.)

5. Bonus Savings Deposits, which are accepted pursuant to a bonus plan approved by both the Supervisor of Savings and Loan Associations and the Federal Savings and Loan Insurance Corporation if the savings and loan is insured.

6. Single Payment Savings Deposits, when the full face value thereof is paid at the time of acceptance and which are maintained in such amount and for such periods of time as may be approved by both the Supervisor of Savings and Loan Associations and the Federal Savings and Loan Insurance Corporation, if the savings and loan is insured.

7. Any other type of savings deposit, the acceptance of which has been approved by both the State Supervisor and the Federal Savings and Loan Insurance Corporation.

Section 21. Distribution of Earnings. Except on savings deposit accounts which specifically provide for distribution of earnings as of other dates, regular earnings on all types of savings deposits and savings accounts shall be declared semiannually as of the last business day of..... and as of the last business day of.....by the board of directors out of the surplus of the association. Regular earnings may also be declared by the board of directors as of other dates, but not more frequently than monthly, out of the surplus. Also, subject to approval of the board of directors, the association may pay earnings on amounts withdrawn from savings accounts or savings deposits, or designated classes thereof, between the dates the association regularly distributes earnings. Earnings may be declared payable within three business days of the end of a distribution period. For the purpose of calculating earnings, any withdrawal, either total or partial, made during the last three business days of a distribution period may be considered as having been made as of the last business day of the period.

The association shall not be required to credit earnings to savings deposits or savings accounts with a balance of less than.....dollars* or savings deposits or savings accounts issued under a

Christmas club, vacation club, or other similar plan whereby they shall automatically be listed for withdrawal no later than.....months (insert figure not to exceed twenty-four months) after the date of issuance. The board of directors may fix a lesser amount than such minimum with respect to the distribution of earnings on savings deposits and savings accounts established in connection with a program offered to children for the encouragement of thrift.

The date of investment shall be the date of the actual receipt by the institution of a payment on a savings deposit or savings account except that the board of directors may fix a date, which shall not be later than the twentieth day of the month, for determining the date of investment. Payments, affected by such determination date, received by the institution on or before such determination date, shall receive earnings as if invested on the first of the month during which such payment was made. Payments, affected by such determination date, received subsequent to such determination date, shall receive earnings as if invested on the first of the month next succeeding the month during which such payment was made, except that after adoption by the association's board of directors of a resolution so providing, payments received subsequent to a determination date on savings accounts or savings deposits or designated classes thereof, shall receive earnings from the date of receipt.

The board of directors may classify savings deposits and savings accounts as to amount and term, and may determine to pay different rates of earnings with respect to savings deposits and savings accounts in different classes. Rates of earnings may be negotiated on an individual account, such rate being within the limits of regulatory authority or law.

Notwithstanding any other provision of these articles, the association if insured by the Federal Savings and Loan Insurance Corporation, may distribute net earnings on its savings accounts or savings deposits on such other basis and in accordance with such other terms and conditions as may from time to time be authorized by the regulations made by the Federal Home Loan Bank Board.

*Note: The dollar amount to be inserted may not exceed fifty dollars.

Section 22. Withdrawal. Any member may withdraw his unpledged savings deposit or savings account, in whole or in part, in accordance with 534.12(2) of the Code of Iowa, 1966, as now or hereafter amended. The institution may require at least 30 days' written notice of intention to withdraw.

Section 23. Association's Redemption Rights. At any time funds are on hand for the purpose, the board of directors may determine to redeem by lot or otherwise, in its discretion, all or part of the institution's savings deposits and savings accounts on an earnings date by giving 30 days' notice by registered or certified mail to each affected holder, except that this provision shall not apply to fixed-rate, fixed-term classes of accounts. Upon receipt of notice of redemption, the savings deposit book, certificate, or other evidence of the account shall then be surrendered for cancellation and payment. If on or before the redemption date the funds necessary for redemption have been set aside so as to be and continue to be available therefore, earnings on savings deposits and savings accounts called for redemption shall cease to accrue from and after the earnings date specified as the redemption date.

Section 24. Insurance of Accounts. If authorized by the Board of Directors this association may insure its savings accounts or savings deposits, with the Federal Savings and Loan Insurance Corporation, provided, however, that after such insurance has become effective it shall not be discounted or terminated except upon a majority vote of the members at a meeting called for that purpose by written notice disclosing the intention to consider the termination of such insurance mailed to each member at his last address as recorded on the books of the association at least thirty days before such meeting. Upon termination of insurance, all members shall be notified in writing. In case such meeting votes to terminate the insurance the association shall within ten days thereafter mail to each of its insured members at his last known address as recorded on the books of the association a copy of its notice to the Insurance Corporation of action to terminate its insurance.

INVESTMENTS—POWERS—LOANS

Section 25. Investments. This association shall have power to invest in securities and real estate as follows: In securities without limit, in obligations of, or guaranteed as to principal and interest by, the United States or in this state; in stock of a federal home loan bank of which it is eligible to be a member, and in any obligation or consolidated obligation of any federal home loan bank or banks; in stock or obligations of the federal savings and loan insurance corporation; in stock or obligations of a national mortgage association or "Ginney Mae" or any successor or successors thereto; in demand, time or savings deposits with any bank or trust company the deposits of which are insured by the federal deposit insurance corporation; in stock or obligations of any corporation or agency of the United States or this state, or in deposits therewith to the extent that such corporation or agency assists in furthering or facilitating the association's purposes or powers; in savings accounts of any association operating under the provisions of Chapter 534 and of any federal savings and loan association; in bonds, notes, or other evidence of indebtedness which are general obligations of any city, town, village, county, school district, or other municipal or political subdivision of this state.

Also, in real estate purchased at sheriff's sale or at any other sale, public or private, judicial or oth-

erwise, upon which the association has a lien or claim, legal or equitable; in real estate accepted by the association in satisfaction of any obligation; in real estate purchased for sale or improvement and sale, upon contracts, at the cost of land and improvements, when such contracts are executed concurrently with or prior to such purchase, such transactions to be subject to all the limitations herein provided with respect to real estate loans; in real estate acquired by the association in exchange for real estate owned by the association; in real estate acquired by the association in connection with salvaging the value of property owned by the association; an amount not exceeding the sum of its reserves and undivided profits; in the purchase and development of real estate for the purpose of producing income or for sale or for improvement thereof and the erection of buildings thereon for sale or rental purposes. Title to all real estate shall be taken and held in the name of the association and such title shall immediately be recorded in accordance with the law. The association shall also have authority to invest in any other investments now or hereafter authorized by law.

Section 26. General Powers. This association shall have the following general powers:

1. General corporate power. To sue and be sued, complain and defend in any court of law or equity; to purchase, acquire, hold, and convey real and personal estate consistent with its objects and powers; to mortgage, pledge, or lease any real or personal estate owned by the association and to authorize such pledgee to repledge same; to take property by gifts, devise or bequest; to have a corporate seal, which may be affixed by imprint, facsimile, or otherwise; to appoint officers, agents and employees as its business shall require and allow them suitable compensation; to provide for life, health and casualty insurance for its officers and employees and to adopt and operate reasonable bonus plans and retirement benefits for such officers and employees to enter into payroll savings plans; to adopt and amend bylaws; to insure its accounts or savings deposits with the federal savings and loan insurance corporation and qualify as a member of a federal home loan bank; to become a member of, deal with, or make contributions to any organization to the extent that such organization assists in furthering or facilitating the association's purposes or powers and to comply with conditions of membership; to accept savings, together with such other powers as are otherwise expressly provided for in Chapter 534, Code of Iowa or are otherwise authorized by law, now or hereafter as amended.

2. Loans on Security of savings accounts or savings deposits. To make loans on the sole security of savings accounts or savings deposits. No such loans shall exceed the withdrawal value of the accounts owned or otherwise pledged for or by the borrower. No such loan shall be made when the association has applications for withdrawal which have been on file more than sixty days and not been reached for payment.

3. Mortgage loans. To make first mortgage loans on real estate under the limitations and conditions imposed elsewhere in Chapter 534, Code of Iowa, now or as hereafter amended or as otherwise authorized by law.

4. Insured and guaranteed loans. To make any loan, secured or unsecured, which is insured or guaranteed in any manner and in any amount by the United States or any instrumentality thereof or by this state or any instrumentality thereof.

5. Dealing with successors in interest. In the case of loans made under subsections 2, 3 and 4 of this section, in the event the ownership of the real estate security or any part thereof becomes invested in a person other than the party or parties originally executing the security instruments, and provided there is not an agreement in writing to the contrary, an association may, without notice to such party or parties, deal with successor or successors in interest with reference to said mortgage and the debt thereby secured in the same manner as with such party or parties, and may forbear to sue or may extend time for payment of or otherwise modify the terms of the debt secured thereby, without discharging or in any way affecting the original liability of such party or parties thereunder or upon the debt thereby secured.

6. Property Improvement Loans. To make improvement loans to home owners and other property owners for maintenance, repair, modernization, improvements and equipment of their properties, with or without security provided that no such loan without security shall exceed the maximum lending amount, interest or term prescribed by law nor exceed the maximum percentage of assets limitation set by law.

7. Power to purchase and to lend upon loans. The power to make loans shall include (a) the power to purchase loans of any type that the association may make, (b) the power to make loans upon the security of loans of any type that the association may make, and (c) the power to sell any loans of the type the association is authorized to make. Loans under (a) and (c) may be outside regular lending area if restricted to loans insured or guaranteed partially by an instrumentality of the United States or by any insurer approved by the federal home loan bank or the supervisor.

8. Participation loans. This association may participate with other lenders in the origination or purchase of an interest in loans of any type that such an association may otherwise make, provided that the other participants are instrumentalities of or corporation owned wholly or in part by the United States or this state, or are associations or corporations insured by the federal savings and loan insurance corporations or the federal deposit insurance corporation or are life insurance companies with assets in excess of one hundred million dollars, such loans to be within or without the reg-

ular lending area of the association. Such loans shall comply with rules and regulations of accounts if this association is insured at the time.

9. Servicing loans. To service mortgages subject to such regulations and restrictions as may be prescribed by the supervisor, provided such mortgages originally are made by such association and subsequently sold. The maximum principal amount of mortgages thus serviced by the association at any one time shall not exceed twenty-five per cent of the amount of the savings accounts or deposits of the association.

10. Fiscal agent. This association which is a member of a federal home loan bank shall have power to act as fiscal agent of the United States and, when designated for the purpose by the secretary of the treasury, it shall perform under such regulations as he may prescribe all such reasonable duties as fiscal agent of the United States as he may require, and shall have power to act as agent for any United States government instrumentality. This association may also handle travelers checks and money orders.

11. Purchase of contracts. This association may buy and sell vendors' real estate contracts; provided, however, that all such contracts shall contain forfeiture provisions as provided for in Chapter six hundred fifty-six (656), Code of Iowa, and provided further that the requirements for loans as set forth in these Articles should be applicable to making and buying of such contracts, except that at the time of purchase of such vendors' contracts the association shall not purchase any such contract for more than ninety per cent of the value of the real estate therein described appraised as required by these Articles. The association shall not hereafter invest more than fifteen per cent of its assets in such vendors' contracts authorized by this subsection. Said fifteen per cent shall be considered as included within the forty per cent of assets lending power set out hereinafter.

12. Power to borrow. If and when this association is not a member of a federal home loan bank, it shall have power to borrow not more than an aggregate amount equal to one-fourth of its savings deposits on the date of borrowing. If and when this association is a member of a federal home loan bank, it shall have power to secure advances of not more than an aggregate amount equal to one-half of its savings deposits. Within such amount equal to one-half of its savings deposits, the association may borrow from sources other than such federal home loan bank an aggregate amount not in excess of ten per cent of its savings deposits. A subsequent reduction of savings liability shall not effect in any way outstanding obligations for borrowed money. All such loans and advances may be secured by property of the association.

13. Automatic authorization. This association may have the right to participate in any new or additional powers or activities now or hereafter granted to the association immediately upon the effective date of such additional authority.

Section 27. Loan Plans. Real estate loans may be made as authorized by Chapter 534, Code of Iowa, as amended.

Section 28. Contracts for Savings Programs.

1. School savings. The association shall have power to contract with the proper authorities of any public or nonpublic elementary or secondary school or other institution of higher learning, or any public or charitable institution caring for minors, for the participation and implementation by the association in any school or institutional thrift or savings plan, and it may accept savings accounts or savings deposits at such a school or institution either by its own collector or by any representative of the school or institution which becomes the agent of the association for such purpose.

2. Payroll savings plan. The association shall have power to contract with any corporation of any type for investment in the association by employees under a payroll savings plan.

Section 29. Transferred Savings Accounts or Savings Deposits Not to be Offset. A borrowing member shall not without permission of the Board of Directors be permitted to offset against his indebtedness to the association any savings accounts or savings deposits in the association acquired directly or indirectly from other members.

Section 30. Power to Borrow. When authorized by the Board of Directors, this association shall have power to borrow from a Federal Home Loan Bank in amounts not in excess of fifty (50) per cent of the aggregate amounts paid in and credited on savings deposits not pledged as security for loans, or not in excess of ten (10) per cent of such savings deposits from other banks. It may pledge its assets to secure advances from a Federal Home Loan Bank, or a banking institution.

Section 31. Limited Liability. The members of the association shall not be responsible for any losses which its savings deposits shall not be sufficient to satisfy, and savings deposits shall not be subject to assessment. The private property of members shall be exempt from liability for corporate debts and the provisions of this article shall not be changed during the existence of this association.

Section 32. Expenses — Limitations — How Paid. All expenses for management and conducting the affairs of this association shall be paid from the earnings of the association and not from capital paid in. Such expenses shall not in any one year exceed the limitations prescribed by law.

Section 33. General Powers. This association shall have power to do such other things as may be incidental to or reasonably necessary for accomplishing the objects and purposes for which it is organized.

Section 34. Bylaws. The Board of Directors shall have power to adopt, repeal, and amend by-

laws which shall provide for the management and conduct of the business of this association within the provisions of the laws of Iowa, these articles of incorporation and all legal rules and regulations of the supervisor of savings and loan associations.

Section 35. Amendments. Any of these articles of incorporation, except the section holding the property of its members exempt from liability for the association debts, may be repealed, amended, altered or added to at any annual or special meeting of the members by a vote of two-thirds of the savings deposits represented at such meeting, subject to approval of the executive council of the State of Iowa.

In witness whereof, we have signed our name, this_____day of_____, 19____.

Name .....

Address .....

These rules are intended to implement section 534.19(18) of the Code.

amended October 11, 1972]

BANKING DEPARTMENT

SMALL LOAN DIVISION

CHAPTER 1
SMALL LOANS

1.1(536) Application.

1.1(1) *Form used.* Printed copies of application for license shall be obtained from the Superintendent, Department of Banking, State of Iowa, Des Moines, Iowa. The printed application form shall be used by each applicant when applying for a license. All questions shall be answered in full and whenever space is inadequate a rider may be attached giving in full the information required.

1.1(2) *License and investigation fee.* Separate checks or money orders in payment of investigation fee and annual license fee must accompany the application. Each check or money order shall be made payable to the superintendent of banking.

1.2(536) Suspension, revocation or surrender of license.

1.2(1) *Refund.* No refund of license fee shall be made wherein a license is revoked or surrendered.

1.2(2) *Responsibility of license.* In order to preclude violation of any provision of the Small Loan Act or any general rule or regulation thereunder, it shall be the responsibility of each licensee to assure that each person in charge of or employed in its place of business shall be familiar with the laws and regulations relating to the business of making, servicing and collecting loans under the provisions of the Small Loan Act.

1.3(536) Records.

1.3(1) *Loan register.* A "Loan Register" or its equivalent record which shall be the book of original entry and a permanent record shall show for every loan: Account number, date of loan, name of borrower and nature of security. The register shall be kept numerically by loan number in the order made.

1.3(2) *Ledger card.*

a. Such account card shall show: Name and address of borrower; loan number; date of loan; terms of repayment including maturity date; nature of security; cost of credit life and credit health and accident insurance (such premium to be stated separately); name of any endorsers, comakers or sureties; amount and date of receipt of recording and releasing fees and amount and dates of payment of recording and releasing fees as paid out for filing a financing statement or termination statement, including the fee required for securing a lien on a motor vehicle title.

b. The card for an interest bearing loan shall show the amount of the loan, the amount and date of each payment of principal and of interest and the balance due on principal. If a portion of the interest earned is not paid at the time payment is made, the card for an interest bearing loan must show either the date to which interest is paid or the amount of interest then due but unpaid.

c. The card for a precomputed loan shall show the actual amount of the loan excluding the precomputed interest, the amount of the precomputed interest and the face amount of the note including interest, the amount and date of each payment applied to the note, the unpaid balance of the note after applying such payment and the date and amount of any additional interest collected as default or deferment charges. If deferment interest is collected in whole or in part, the card shall indicate the particular installment deferred and the number of times deferred plus the date of the final installment and any uncollected portion of the deferment interest.

d. When a precomputed loan is prepaid in full, the card must show the date of prepayment, the amount paid to discharge the loan, the amount of the interest rebate, and any deduction from the rebate for previously earned but uncollected default or deferment interest.

e. When any loan is prepaid in full, either by cash or renewal, refunds of the unearned premiums of credit life and accident and health insurance shall be recorded on the card.

f. If payment is made in any other way than in the ordinary course of business, it shall be

so designated; for example, payment by sale of security, insurance claim or endorser.

g. No erasures whatsoever may be made in the payment section of any account card. In case of error a line should be drawn in ink through the improper entry and the correct entry made on the following line. The entries on the card shall correspond with the receipts given to the borrower.

h. Paid-in-full and renewed ledger cards which no longer reflect an active loan are to be accumulated in a separate section of the files of the licensee and retained from one banking department examination to the next. After the examination these cards may be filed in a permanent file.

1.3(3) *Loan file.* A separate file shall be maintained for each borrower in the office where the loan is outstanding. Such file shall contain the note, security agreement, wage assignment and all other evidence of indebtedness or security pertaining to the loan except when the note is kept in a separate promissory note file or when said papers are in custody of a court or an agent for collection or are hypothecated. When a borrower is also a comaker, guarantor or endorser on another loan, the file of such borrower shall be cross-referenced to the other, unless such cross-referencing is included on the alphabetical record required by 1.3(5) or on the individual account card required by 1.3(2). All instruments taken in connection with a loan and signed by a borrower must bear the loan number.

1.3(4) *Payments.* All receipts and disbursements of any amount shall be entered on the records of the licensee as of the day they occur. Separate headings shall be provided for payments on principal and interest. In the case of precomputed loans, payments applied to the note may be shown as a lump sum and need not be itemized between principal and precomputed interest, but additional interest collected for default or deferment shall be itemized or otherwise separately indicated.

1.3(5) *Index.* An alphabetical record shall be maintained and show the name of each borrower, endorser, comaker or surety who is currently indebted to the licensee, together with sufficient information to locate the account card.

1.3(6) *Payments.*

a. All payments shall be credited on the account card as of the day of receipt. Interest shall be charged only from the date the proceeds of the loan are delivered to the borrower even though the note shall bear a prior date.

b. When payment is received on an interest bearing loan, the receipt for each payment shall show the amount applied to interest and the amount applied to principal.

1.3(7) *Examination of records.* The records previously mentioned and any additional records as may be used by a licensee shall be made available for examination upon request by the superintendent of banking or his designated representatives.

1.3(8) *Disbursement voucher.* Licensees shall use a disbursement voucher in conjunction with each loan showing a detailed itemization of the distribution of the loan proceeds. Such voucher is to be signed by the borrower except when a loan is made by mail.

1.3(9) *Date of death.* When a death claim is filed with an insurance company, the exact date of death is to be recorded on the loan ledger card.

1.3(10) *Annual report.* An annual report shall be prepared and submitted to the superintendent of banking for each licensed place of business located within the state of Iowa. If a company owns and operates more than one licensed office in the state, then separate reports for each licensed office and a composite statement for all licensed offices owned and operated within the state shall be prepared and submitted to the superintendent of banking. Annual reports shall be completed as prescribed by the superintendent of banking.

1.4(536) Miscellaneous restrictions.

1.4(1) *Advertising.*

a. The words "advertisement" and "advertising" as used in these regulations shall include all material printed, published, displayed, distributed, broadcast or televised for the purpose of obtaining applications for loans.

b. No licensee shall advertise, display or distribute mailing pieces which have a similarity or resemblance to a bank counter check, postal or express money order, U.S. currency, cash exchange certificate, cash reserve certificate or any negotiable instrument whatsoever (except a promissory note payable to the licensee) or any city, county, state or federal warrant and shall not use an envelope employing the words "Treasurer's Office" for return name and address or which is in any manner similar to U.S. government, state, county or city envelopes used in any area.

c. No licensee shall advertise, display, distribute, broadcast, televise or cause or permit to be advertised, displayed, distributed, broadcast or televised any matter whatsoever concered with the business authorized by chapter 536 of the Code, which indicates that loans may be obtained in amounts greater than permitted by law.

d. Licensees shall not feature in any advertisement such terms as "reduced rates" or "reduced payments" or similar phrases which apply only to a specific type of loan, unless such advertisement shall clearly state the type of loan to which such advertisement shall apply.

e. Licensee shall not employ unqualified superlatives in advertising, such as "lowest rates", "lowest costs", "lowest payment plan" or "cheapest loans".

f. Licensees shall not offer any monetary inducement, premiums, commissions or anything

of value to present or prospective borrowers to encourage them to borrow money.

g. Licensees shall not use blind loan advertisements such as displaying only telephone numbers or box addresses which do not clearly indicate the identity of the licensee.

1.4(2) *Closing loans.*

a. No lender shall accept applications for loans or close loans at any place other than that named in the license. However, under unusual or peculiar circumstances or when the loan is made by mail, the signature of one or more of the borrowers may be obtained outside of the loan office, provided that such signatures are obtained by an actual and bona fide employee of the lender or by the spouse of the borrower.

b. A licensee shall have authority to make and complete loans by mail from the lender's licensed office. In making such loans, the lender shall mail all necessary papers to the borrower and upon completion of such papers by the borrower the check or money order representing proceeds of the loan shall be mailed from the licensee's office.

c. No licensee shall permit any person other than a bona fide employee to complete its notes, security instruments or any other form used in small loan transactions, nor shall any person other than a bona fide employee be permitted to accept payments on such loans except delinquent loans referred to other parties for collection purposes.

d. The licensee shall explain to the borrower in general terms the contents of the note, security agreement and any and all other papers taken in connection with the completion of a small loan. No instrument shall have blanks left to be completed after being signed.

1.4(3) *Splitting loans.* An individual, copartnership, association or corporation holding more than one license shall not induce or permit any borrower or any husband and wife, individually or jointly, to be indebted to him under more than one contract of loan at the same time at any one or more of his licensed offices.

1.4(4) *Recording and releasing fees.*

a. When a loan is made or any time thereafter, a licensee may charge the borrower such fees as are required for filing, recording and releasing a financing statement or mortgage if such instrument has been filed with a county recorder or the secretary of state. No fee in excess of that which is actually to be charged by the county recorder or secretary of state shall be collected from the borrower. A licensee may charge the borrower such fee as is required for recording an automobile certificate of title lien with the county treasurer's office. No fee shall be collected from the borrower exceeding that actually charged by the county treasurer.

b. Any releasing fee collected is to be carried forward on all future ledger cards until the amount is disbursed.

1.4(5) *Deferments.* Deferments may be granted with or without the consent or request of the borrower. No installment which has been partially paid or for which a default charge has been collected shall be deferred or included in the computation of the deferment charge unless such partial payment or default charge is refunded to the borrower or credited to the deferment charge.

a. If the deferment is granted at the request or with the consent of the borrower, the deferment may be granted at any time and for such number of full months as may be agreed upon between the parties.

b. If the deferment is made at the option of the lender alone, the lender shall give the borrower appropriate written notice that the deferment has been granted disclosing the date of the deferment, the amount of the deferment charge, the date on which the next installment is scheduled to be paid and the deferred maturity date of the loan. The number of months of any deferment shall not exceed one month plus the number of full installments in default.

c. Any provision in any promissory note or other document which is not in conformity with the foregoing provisions shall not be deemed objectionable so long as the foregoing provisions are complied with in all respects.

1.4(6) *Default charge.* Default charges are not to be collected if payment is made by accident and health insurance claim.

1.5(536) Release of security. Upon repayment of the loan in full by cash, a new loan or otherwise, the licensee must within thirty days mark indelibly every obligation and security other than a mortgage or security agreement signed by the borrower with the word "paid" or "canceled" and release any mortgage or security interest which no longer secures a loan to the licensee, restore any collateral, return any note and any assignment given by the borrower.

1.6(536) Sales finance contracts.

1.6(1) *Written permission to purchase.* If the superintendent of banking shall grant in writing permission to a licensee to purchase sales contracts from third parties, the total indebtedness of a borrower due to the licensee together with that due on contracts purchased may exceed the amount prescribed by statute provided that:

a. The small loan and sales contracts are not knowingly made simultaneously.

b. No licensee shall make a loan simultaneously with the purchase of a time sales contract by it or by an associate or affiliate if the debtor under both the loan and sales contracts is the same and the loan and sales contracts together exceed $1,000. Any loan made within 15 days either before or after the purchase of a time sales contract to the same debtor shall be deemed to constitute a simultaneous transaction.

c. An adequate index system shall be established and maintained by licensees for each type of business permitted in writing by the superintendent of banking in order that the examiner or examiners duly appointed by the superintendent of banking may determine that no violations of the statute exist. Such index system shall contain all current evidence of indebtedness or security which have been signed by the borrower, endorser, guarantor or surety except spouse as listed on the record of the borrower.

1.6(2) *Usury.* It shall be considered usurious and an evasion of the small loan law to permit any person as a borrower or as an endorser, guarantor or surety to be indebted to a licensee directly or contingently or both at any one time for a sum exceeding $1,000 for principal, except that an endorser, guarantor or surety for any borrower shall also be permitted to borrow as long as the total of the guaranteed and direct loan does not exceed $1,000 and if the legal instruments which the endorser, guarantor or surety signed as such are noted to read that such person "appears on this note as endorser, guarantor or surety and is responsible for the principal balance only".

1.7(536) Insurance.

1.7(1) *Kind permitted.* No licensee under chapter 536 of the Code or any person or corporation affiliated with the licensee shall solicit insurance, take any application, requisition or request for insurance or receive profits from insurance in connection with any loans made under chapter 536 except credit life and credit health and accident insurance. The term of such credit insurance shall not extend beyond the final maturity date of the loan contract, and only one obligor on any one loan contract may be insured.

1.7(2) *Amount of insurance.* The initial amount of life insurance cannot exceed the total amount repayable (principal and interest). Thereafter, the amount of life insurance in force during the term of insurance shall not exceed the scheduled monthly loan payment multiplied by the number of unexpired due dates or the amount required to discharge the loan contract, whichever is greater.

1.7(3) *Monthly benefit.* The amount of each periodic benefit payment provided by credit accident and health insurance shall not exceed the scheduled periodic loan payment.

1.7(4) *Computation of insurance proceeds.* The date of death of any obligor who is covered by credit life insurance shall be considered as the date of final payment on both interest bearing and precomputed loans. Compute refund of unearned interest as of the date of death. In computing such refund the number of months elapsed is equal to the number of expired due dates plus the next due date if death occurs 16 days or more after a scheduled due date. The difference between the amount of insurance in force and the balance due the licensee, after deducting interest refund, must be paid to the second beneficiary or estate of the deceased.

1.7(5) *Insurance premium refunds.* Whenever a loan is paid in full or renewed before maturity (except by insurance), existing life insurance and accident and health insurance must be canceled and unearned premiums refunded.

a. When a loan is paid in full or renewed prior to the first scheduled due date, the insurance shall be deemed to have been in force for one full month.

b. In computing the unearned premiums on or after the first scheduled due date, the number of months elapsed is the number of expired due dates plus the next date if prepayment in full or renewal occurs 16 days or more after a scheduled due date.

c. A premium refund or credit need not be made if the total amount thereof for both credit life and credit health and accident insurance is less than one dollar total.

1.7(6) *Credit insurance premium refund upon settlement by life or health and accident claim.* When the loan balance is paid by claim under the insurance provisions of credit life insurance, the date of death shall be considered as the date of payment of the account and the unearned premium on the credit health and accident insurance shall be refunded. Such refund is to be added to the death benefit proceeds and used first to liquidate the loan balance with any excess to be paid to the second beneficiary or the estate of the insured member. Similarly, should the insurer of the health and accident coverage elect to liquidate the contract balance in one sum, the date of such payment shall be the date used to compute the amount of the unearned premium on the credit life insurance and such amount of refund shall be paid to the insured. In the case of a precomputed loan, both the unearned interest and refund of unearned credit life premium are to be paid to the insured.

1.8(536) Interest rate. Pursuant to the power granted to the state banking board under section 536.13(1) "*b*" and section 536.13(2), and after giving notice and opportunity to be heard as prescribed by section 536.13(3), the state banking board in action taken at the regular board meeting held September 11, 1969, fixed the maximum interest that may be charged beginning January 1, 1970, and until such time as a different rate is fixed by the board as three percent per month on any part of the unpaid principal balance of the loan not exceeding $250 and two percent per month on any part of the loan in excess of $250, but not exceeding $400, and one and one-half percent per month on any part of the unpaid principal balance in excess of $400.

This rule is intended to implement section 536.13 of the Code.

[Filed March 13, 1968;
amended October 14, 1969]

CHAPTER 2
CREDIT UNION EXAMINATION FEE

2.1(533) Purpose. The purpose of this rule is to establish fees to be paid to the superintendent of banking for making or causing to be made examinations of credit unions in accordance with section 533.6, which section requires the superintendent of banking to determine the examination fee and to base the said determination upon certain costs.

2.2(533) Examination fee. The superintendent of banking has made the following determination, based upon the actual cost of the operating expense of the credit union division of the department of banking and the proportionate share of the administrative expenses in the operation of the department of banking attributable to credit unions:

1. The examination fee of state chartered credit unions shall be as follows, and payable at the close of each examination by check payable to the superintendent of banking.

Assets:			Basic:	Assets Scale:
Less than		$ 25,000	$ 25.00 plus	Nil
Over $	25,000—	$ 50,000	$ 100.00 plus	4¢ per $100 of assets
Over $	50,000—	$ 100,000	$ 150.00 plus	3¢ per $100 of assets
Over $	100,000—	$ 250,000	$ 175.00 plus	3¢ per $100 of assets
Over $	250,000—	$ 500,000	$ 250.00 plus	3¢ per $100 of assets
Over $	500,000—	$ 750,000	$ 425.00 plus	2¢ per $100 of assets
Over $	750,000—	$ 1,000,000	$ 450.00 plus	2¢ per $100 of assets
Over $	1,000,000—	$ 2,000,000	$ 750.00 plus	2¢ per $100 of assets
Over $	2,000,000—	$ 3,000,000	$ 1,200.00 plus	2¢ per $100 of assets
Over $	3,000,000—	$ 4,000,000	$ 1,500.00 plus	2¢ per $100 of assets
Over $	4,000,000—	$ 6,000,000	$ 2,000.00 plus	2¢ per $100 of assets
Over $	6,000,000—	$ 10,000,000	$ 2,500.00 plus	2¢ per $100 of assets
Over $	10,000,000—		$ 2,850.00 plus	2¢ per $100 of assets

2. Together with an annual fee as follows, payable on the December 31 asset figure and forwarded with the annual financial statement in January of each year:

Assets:			Maximum Fee:
Less than		$ 500,000	30¢ per $1,000 ($15 Minimum)
Over $	500,000—	$ 1,000,000	$150 plus 25¢ per $1,000 in excess of $ 500,000
Over $	1,000,000—	$ 2,000,000	$275 plus 20¢ per $1,000 in excess of $1,000,000
Over $	2,000,000—	$ 5,000,000	$475 plus 15¢ per $1,000 in excess of $2,000,000
Over $	5,000,000—		$295 plus 10¢ per $1,000 in excess of $5,000,000

This rule is intended to implement chapter 533 of the Code.

[Filed December 14, 1965]

STATE BANK DIVISION

CHAPTERS 3 to 7

Reserved for future use

CHAPTER 8
GENERAL BANKING POWERS

8.1(524) Deposits defined.

8.1(1) A demand deposit includes every deposit which is not a time deposit or savings deposit as defined in 8.1(2) and 8.1(3) respectively. Gross demand deposits for purposes of 8.7(524) shall consist of the sum of all such demand deposits. Net demand deposits shall consist of gross demand deposits less items in process of collection, payable immediately upon presentation to banks under a local clearing agreement.

8.1(2) *Time deposit.* Time deposit includes time certificate of deposit, time deposit open account and multiple maturity time deposit as follows:

a. Time certificate of deposit. A deposit evidenced by a negotiable or nonnegotiable instrument which provides on its face that the amount of the deposit is payable on a certain date, specified in the instrument, not less than 30 days after the date of the deposit; or at the expiration of specified period not less than 30 days after the date of the instrument; or upon written notice to be given not less than 30 days before the date of repayment.

b. Open account. A deposit, other than a time certificate of deposit, with respect to which there is in force a written contract with the customer that neither the whole nor any part of such deposit may be withdrawn by check or otherwise prior to the date of maturity, which shall be not less than 30 days after the date of the deposit, or prior to the expiration of the period of notice which must be given by the customer in writing not less than 30 days in advance of withdrawals.

c. Multiple maturity. A time deposit that is payable at the customer's option on more than

one date, whether on a specified date or at the expiration of a specified time after the date of deposit, after written notice of withdrawal or with respect to which the underlying instrument or contract or any informal understanding or agreement provides for automatic renewal at maturity.

8.1(3) *Savings deposit.* A savings deposit consists of funds credited to the account of one or more individuals, or in which the beneficial interest is held by one or more individuals, or of a corporation, association or other organization operated primarily for religious, philanthropic, charitable, educational, fraternal or other similar purposes and not operated for profit or in which the entire beneficial interest is held by one or more individuals or by such a corporation, association or other organization, and with respect to which the customer is not required by the deposit contract but may at any time be required by the state bank to give not less than 30 days' notice in writing of an intended withdrawal before such withdrawal is made and which is not payable on a specified date or at the expiration of a specified time after the date of deposit.

8.2(524) Maximum interest on time and savings deposit. The superintendent of banking hereby prescribes the following maximum rates of interest payable on time and savings deposits.

8.2(1) *Single maturity time deposits of $100,000 or more.* The following schedule shall apply:

Maturity	Maximum percent
30— 59 days	No maximum limitation
60— 89 days	No maximum limitation
90—179 days	6¼%
180 days or more but less than 1 year	7 %
1 year or more	7½%

8.2(2) *Single maturity time deposits of less than $100,000.* The following schedule shall apply:

Maturity	Maximum percent
30 days or more but less than 1 year	5 %
1 year or more but less than 2 years	5½%
2 years or more	5¾%

8.2(3) *Multiple maturity time deposits.* The following schedule shall apply:

Maturity	Maximum percent
30 days or more but less than 90 days	4½%
90 days or more but less than 1 year	5 %
1 year or more but less than 2 years	5½%
2 years or more	5¾%

8.2(4) *Savings deposit.* The maximum rate of interest is four and one-half percent per annum.

[Filed January 28, 1971]

8.3(524) Paying interest on other than demand deposits.

8.3(1) *Compounding.* In calculating the rate of interest paid, the effects of compounding of interest may be disregarded. A state bank which elects to compound interest shall state the time period of compounding in every statement required by section 524.805(3) and in every notice or advertisement.

8.3(2) *Grace period.* A state bank may pay interest on a savings deposit received during the first ten calendar days of any calendar month at the permissible maximum rate calculated from the first day of the calendar month until such deposit is withdrawn or ceases to become a savings deposit. A state bank may pay interest on a savings deposit withdrawn during its last three calendar business days of any calendar month ending a regular quarterly or semiannual interest period at the permissible maximum rate calculated to the end of the calendar month.

8.4(524) Effect of maturity on payment of interest. After the date of maturity of any time deposit, such deposit is a demand deposit and no interest may be paid subsequent to that date or after the expiration of the period of notice given with respect to the repayment of such time deposit or savings deposit when applicable. The foregoing sentence does not preclude a customer and the state bank from using the same account to initiate a new time or savings deposit relationship upon proper notice. If a time or savings deposit is renewed, automatically or by action of the customer, within ten days after maturity or expiration of the period of notice, the renewed deposit or any renewed portion may draw interest from the date of maturity or expiration date of the period of notice, and a time certificate may be dated back to the maturity date of the matured certificate.

8.5(524) Payment of time deposits before maturity. Except as provided in 8.5(2), a state bank shall not pay a time deposit prior to the contractual term.

8.5(1) A state bank may make a loan to the customer upon the security of his time deposit, provided that the rate of interest on the loan is not less than two percent per year more than the rate of interest on the time deposit.

8.5(2) Where it is necessary to prevent great hardship to the customer, a state bank may pay before maturity a time deposit or the portion thereof necessary to meet such emergency. Before making such payment the customer shall sign an application describing fully the circumstances constituting the emergency which is deemed to justify the payment of the deposit before maturity, which application shall be approved by an officer of the bank who shall certify that, to the best of his knowledge and belief, the statements in the application are true. Such application shall be retained in the files and made available to the examiners

authorized to examine the state bank. Where a time deposit is paid before maturity the customer shall forfeit accrued and unpaid interest for a period of not less than three months on the amount withdrawn if an amount equal to the amount withdrawn has been on deposit three months or longer and shall forfeit all accrued and unpaid interest on the amount withdrawn if an amount equal to the amount withdrawn has been on deposit less than three months. When a portion of a time certificate of deposit is paid before maturity, the certificate shall be canceled and a new certificate shall be issued for the unpaid portion of the deposit with the same terms, rate, date and maturity as the original deposit.

8.6(524) Payment of savings deposits. Whether or not interest is paid, a state bank shall not require or waive notice of withdrawal as to any amount or percentage of the savings deposit of any customer unless it shall similarly require or waive notice as to the savings deposits of every other customer subject to the same contractual provisions with respect to notice or withdrawal.

If a state bank, without requiring notice of withdrawal, pays interest that has accrued on a savings deposit during the preceding interest period it shall, upon request and without requiring such notice, pay interest that has accrued during the period on the savings deposits of every other customer.

A state bank shall not change its practice with respect to requiring or waiving of notice of withdrawal of savings deposits for the purpose of discriminating in favor of or against any customer.

Any change of practice shall be made only pursuant to duly recorded action by the directors of the state bank.

A state bank which does not require notice of withdrawal of savings deposits is not restricted as to loans to its customers on the security of such deposits. If it is the practice of the state bank to require notice of withdrawal of a savings deposit, a state bank may make a loan to a customer upon the security of his savings deposit, provided that the rate of interest on the loan is not less than two percent more than the rate of interest on the savings deposit.

8.7(524) Cash reserve formula. Cash reserves required by section 524.816 shall consist of the sum of the following assets taken from the daily statement for each business day:

1. Coin and currency on hand.
2. Debit balances with other banks in the seventh, eighth, ninth and tenth federal reserve districts, less remittances debited to each such bank for the day for which reserves are being computed.
3. Debit balances with all other banks, less any remittances debited to each such bank for the day for which reserves are being computed and less remittances, if any, debited for the previous business day.

For purposes of applying section 524.1602(1), the cash reserve shall not be deemed to be deficient if the average of the cash reserve for the day for which the computation is made and the four preceding business days is at least equal to the average cash reserve requirement for such five-day period. Corrective action shall be taken on the day following the date of the daily statement for which the computation of averages discloses a deficiency in the cash reserve.

CHAPTER 9
INVESTMENT AND LENDING POWERS

9.1(524) Bonds or securities investment characteristics. Bonds or other investment securities purchased for investment by a state bank for its own account as provided in section 524.901(2) shall consist of obligations, which have been publicly offered or which are of such sound value or are so well secured as to be readily salable at a fair value, with investment characteristics not distinctly or predominantly speculative. They shall fall within the four highest grades according to a reputable rating service or they shall represent unrated issues of equivalent value.

BLIND, COMMISSION FOR

CHAPTER 1
VOCATIONAL REHABILITATION

1.1(601B) General provisions.

1.1(1) *Coverage.* The state plan constitutes a description of the vocational rehabilitation program for the blind for the state of Iowa. The state plan, which provides for vocational rehabilitation services to the blind, is submitted by the state commission for the blind.

The commission accepts the following definition of blindness, and services will not be denied to any person on the grounds that he is not blind if such person meets the condition of either "*a*" or "*b*" in the paragraph: (*a*) Vision not more than 20/200 central visual acuity in the better eye, with correcting glasses, or a field defect in which the peripheral field has contracted to an extent that the widest diameter of visual field subtends at angular distance of not greater than 20°; (*b*) a combination

of loss of visual acuity and loss of visual field which imposes an employment handicap which is substantially that of a blind person, or a medical prognosis indicating a progressive loss of sight which will terminate in blindness as defined in "*a*" of this paragraph. A person who is considered blind under the terms of the definition of blindness as stated in "*b*" of this paragraph will be accepted for services only upon agreement with the general rehabilitation agency in this state.

Any individual who has a visual impairment but who is not eligible for services from the commission under "*a*" or "*b*" in the preceding paragraph will be referred to the general rehabilitation agency.

1.1(2) *Submittal of plan materials.*

a. The director of the commission is authorized to submit plan material, plan amendments and reports direct to the office of vocational rehabilitation.

b. This plan will be amended whenever necessary to reflect a material change in any phase of state law, organization, policy or agency operation. Such amendments will be submitted to the office of vocational rehabilitation for approval before they are put into effect or within a reasonable time thereafter.

1.1(3) *State-wide application of plan.* This plan shall be in effect in all political subdivisions of the state.

1.2(601B) Scope of agency program.

1.2(1) *Objectives and services.* The commission shall provide such activities and services under the vocational rehabilitation plan to each eligible individual found by diagnostic study to require such services as are necessary to render the blind person fit to engage in a remunerative occupation, including: (*a*) Diagnostic and related services (including transportation) requested for the determination of eligibility for services and the nature and scope of services to be provided; (*b*) guidance; (*c*) physical restoration services; (*d*) training; (*e*) books and training materials; (*f*) maintenance during rehabilitation; (*g*) placement; (*h*) tools, equipment, initial stocks and supplies; initial stocks and supplies for vending stands; (*i*) acquisition of vending stand or other equipment, and initial stocks and supplies for small business enterprises under the supervision of the commission; (*j*) transportation; (*k*) occupational licenses; and (*l*) other goods and services which may be necessary.

1.2(2) *Remunerative occupation.* Remunerative occupation includes: Employment in the competitive labor market; practice of a profession; self-employment, home making, farm or family work (including work for which payment is in kind rather than cash); sheltered employment, and industries or other home-bound work of a remunerative nature.

1.3(601B) Case finding and intake. Persons desirous of services offered by the commission for the blind should contact either the commission directly or county welfare offices, local public or private service organizations, general medical practitioners, ophthalmologists or optometrists. Students of the braille and sight saving school are routinely referred to the commission for the blind at that time when commission services are considered feasible.

1.4(601B) Eligibility.

1.4(1) *General provisions.* The commission assumes responsibility for determination of the eligibility of individuals for vocational rehabilitation and of the nature and scope of vocational rehabilitation service to be provided such individuals, and such responsibility will not be delegated to any other agency or individual not of the agency staff.

1.4(2) *Basic requirements.* Eligibility for vocational rehabilitation will be determined upon the basis of three basic conditions: (*a*) The existence of blindness as defined in 1.1(1), according to the examination of an approved ophthalmologist; (*b*) the impairment constitutes a substantial handicap to employment; (*c*) there shall be a reasonable expectation that vocational rehabilitation services may render the individual fit to engage in a remunerative occupation. Individuals who are homebound are not excluded.

Eligibility will be determined without regard to citizenship, creed, sex, race, color or national origin of the individual.

1.4(3) *Other factors.* Six months residence immediately previous to his application is required to establish eligibility for rehabilitation service. However, if the applicant has resided in the state less than six months with evident intention of becoming a permanent resident, he may be accepted.

1.4(4) *Certification.*

a. Simultaneously with acceptance of the blind person for rehabilitation services, there will be a certification that the individual has met the basic eligibility requirements. The certified statement of eligibility will be signed and dated by the counselor.

b. For each case determined to be ineligible for vocational rehabilitation services there shall be a certificate to that effect, dated and signed by the counselor.

1.4(5) *Disabled civil employees of the U.S. government.* The same standards of eligibility are applied to disabled civil employees of the U.S. government who are disabled in the line of duty.

1.5(601B) Case study and diagnosis.

1.5(1) *Purpose.* In each case, prior to and as a basis for formulating the individual's plan of vocational rehabilitation, there will be a thorough

diagnostic study which will consist of a comprehensive evaluation of pertinent medical, social, psychological, educational and vocational factors.

The diagnostic study will be adequate to provide the basis for: (*a*) Establishing that a mental or physical condition is present which limits the activities the individual can perform; (*b*) appraising the current general health status of the individual in order to determine the limitations and capacities as far as possible; (*c*) determining how and to what extent the disabling condition may be expected to be removed, corrected, or minimized by physical restoration services, and; (*d*) selecting an employment objective commensurate with the individual's capacities and limitations.

1.5(2) *Scope of case study.* In each case, according to the degree necessary, the diagnostic study will include an evaluation of the individual's personality, intelligence level, educational background and achievement, vocational aptitudes and interests, employment experience and opportunities, and personal and social adjustments, and other pertinent data helpful in determining the nature and scope of services to be provided for accomplishing the individual's vocational objective.

1.5(3) *Medical diagnostic study.* The commission policy will be to provide in each case: (*a*) A complete general medical examination providing an appraisal of the current medical status of the individual; (*b*) examination by an ophthalmologist and other specialists in all medical fields, as needed; (*c*) such clinical laboratory examinations as X rays and other indicated studies as are necessary to establish the diagnosis and to determine the extent to which the disability may limit daily living and work activity and to estimate the probable results of physical restoration services.

1.5(4) *General medical.*

a. Minimum procedures routinely required in the general medical diagnosis are: (1) Medical history; (2) determination of the physical and mental abilities and limitations of the individual including laboratory reports on blood, serological and urinalysis. All medical and eye reports must be approved by the ophthalmological and medical consultants.

b. Medical reports in lieu of securing new medical examinations are accepted from reliable sources such as aid to the blind, state university hospitals, and doctors on the accredited list of the state medical society, which can be relied upon to provide sound information. The data requested in the general medical and eye examination report forms must be covered in the resumé.

c. (1) A medical examination report, or a medical abstract resumé, if made within six months of plan development, will be accepted as an adequate substitute for a new examination. Exception to this practice will be made only upon the advice of the medical consultant. (2) An eye report, to be acceptable, must have been made within three months of plan development unless there is an eye report from an established agency or one already on file for the individual case in the office of the aid to the blind, state department of social services, indicating that the disability is static and cannot be eliminated, arrested or reduced by surgery or treatment. Exception to this practice will be made only upon the advice of the ophthalmological consultant.

1.5(5) *Medical specialty examinations.* Examinations by a specialist in a specialty field will be secured in all cases in which there is a need for a more thorough study as indicated by the medical examination. (*a*) Eye examinations by accredited ophthalmologists are required. (*b*) In some very unusual case where the individual cannot reach an ophthalmologist, a report from an optometrist who is on the accredited list of the state department of social services for examinations for applicants for aid to the blind will be accepted. (*c*) A psychiatric examination will be secured in all cases of mental illness or emotional disturbance. A brief summary of the individual's social and vocational history will be furnished to the psychiatrist. (*d*) When dentistry is indicated to promote the health of the individual, the commission will provide the service. The recency of specialists' reports shall be the same as for medical reports.

1.5(6) *Diagnostic hospitalization.* In-patient hospitalization for diagnostic purposes will be provided in cases in which the diagnostic study required for adequate understanding of the client's condition cannot be satisfactorily done on an out-patient basis.

1.5(7) *Psychological evaluation in mental retardation cases.* The commission will secure or provide psychological evaluation in all cases of mental or suspected retardation.

1.6(601B) Rehabilitation plan for the individual.

1.6(1) *Content of plan.* An individual plan of vocational rehabilitation will be formulated for each client accepted for rehabilitation services. The plan will be based (*a*) upon the evaluation of all data secured through the diagnostic study; (*b*) will specify the vocational rehabilitation objective (or tentative objective when the ultimate objective cannot be determined at the time), the services necessary to accomplish the client's vocational rehabilitation, and the plan for providing or securing necessary services; and (*c*) will be formulated with the client's participation.

1.6(2) *Services to be provided.* The plan will provide for all rehabilitation services necessary to accomplish the vocational rehabilitation, and that such services will be carried to completion so far as possible.

1.6(3) *Termination or revision of plan.* The commission will exercise its discretion in relation to the termination or revision of the individual's plan when for any reason it becomes evident that the services cannot be completed or that the client's needs have changed.

1.7(601B) Order of selection for services. All necessary vocational rehabilitation services will be provided without delay to all handicapped individuals determined to be eligible for services. However, if a situation should develop under which vocational rehabilitation services cannot be extended without delay to all eligible clients, a plan amendment will be submitted, setting forth the criteria for order of selection of eligible clients for provision of services.

1.8(601B) Guidance.

1.8(1) *Policies for guidance of clients.* Guidance in the form of vocational rehabilitation counseling, consisting of personal interviews, letters of advisement, and other direct and indirect contacts, are provided every client by a vocational rehabilitation counselor. Beginning with the initial interview, counseling seeks to develop such relationships with the client as are conducive to helping him explore and understand his vocational problems, limitations, and potentialities and to enable him to plan and execute a program of vocational rehabilitation that will accomplish maximum adjustment and satisfaction in suitable employment. Periodic contacts are maintained for guidance and counseling purposes throughout the entire vocational rehabilitation process and continue until the individual is considered to be rehabilitated, and his case record is ordered closed. Effort is made at all times to develop the independence of the individual and to utilize collateral facilities and co-operating individuals to provide competent guidance in vocational and nonvocational areas affecting the client's program of vocational rehabilitation.

1.8(2) *Methods for evaluating progress of client.* The individual's progress toward his vocational rehabilitation objective is evaluated by regular contacts, reports from professional personnel or agencies providing vocational rehabilitation services, reports from reliable co-operators and employers, periodic written progress reports by clients, and by the periodic review of all such information or by case staffing procedures.

1.9(601A) Economic needs.

1.9(1) *Economic need policies.*

a. The commission will establish economic need for each client simultaneously with or within a reasonable time prior to provision of those services for which a needs test is required.

b. The following services are provided at the expense of the commission only when found necessary to accomplish the vocational rehabilitation of an eligible disabled person and when the disabled individual is determined to be in economic need: (1) Physical restoration services; (2) maintenance during rehabilitation (except under no circumstances is maintenance paid after a client is placed and actually receives remuneration for his employment or after 30 days from the date a client is placed in self-employment or for more than 30 days during an interruption of service or during any one illness of an acute intercurrent nature); (3) transportation (except transportation for diagnosis is not conditioned on economic need); (4) occupational licenses; (5) books and training materials; (6) tools, equipment, and initial stocks (including livestock) and supplies; equipment and initial stocks and supplies for vending stands; and necessary shelters in connection with the foregoing items; and (7) such goods and services as business licenses and reader or attendant services found necessary to render an eligible handicapped person fit to engage in a remunerative occupation.

Financial need is not a condition for the provision of any services not specifically mentioned or referred to in the paragraph immediately above.

c. The agency will maintain a written standard for measuring the financial need of clients with respect to normal living requirements and for determining their financial ability to meet the cost of necessary rehabilitation services. In the case of a client receiving aid to the blind, no further investigation is required to establish his financial need. Such information is available to the commission at all times from the department of social services.

d. In the determination of economic need, the commission will secure data regarding the financial circumstances of the client, including his resources, living requirements, and obligations. The client (or a responsible relative or guardian) will be regarded as the primary source of information about his financial circumstances and needs, although information from other reliable sources may be obtained if necessary.

e. All consequential resources available to the individual will be taken into account in calculating his financial need, with the exception of certain resources defined in the following section on methods of determining economic need.

1.9(2) *Methods of determining economic need.*

a. Need standard. The commission maintains a written standard for measuring financial need of clients in terms of normal living requirements. This standard is determined, following consideration of available information of the current cost of living, on the basis of the usual requirements which would provide the elements of living essential to the maintenance of the client's morale, and to permit the effective and successful undertaking of his vocational rehabilitation.

This standard consists of a basic standard for determining normal living requirements for all clients and adaptations of this standard to meet special circumstances. These circumstances in-

clude: (1) Special needs accompanying designated types of disabilities; (2) variations based on differences in cost of normal living requirements in different localities; (3) variations based on the nature of normal living requirements caused by the particular rehabilitation services to be provided; (4) other objectively defined circumstances affecting the requirements of individuals in those circumstances.

This standard will also be adapted to meet the need for short periods of medical care for acute conditions arising during the course of vocational rehabilitation. Treatment will be available for a period not to exceed 30 days in the case of any one illness.

Prior to the provision of services conditioned upon financial need, the commission's need standard or its modification appropriate to the defined circumstances will be applied in each case to determine the existence and extent of the individual's need. The individual will be considered in financial need if he has insufficient resources to procure normal living requirements as defined by the standard, and to meet the cost of necessary vocational rehabilitation services conditioned on financial need.

b. Client resources. In determining the financial circumstances of the individual, the commission will identify all consequential resources actually available to him, however derived, including all resources of the client, his spouse, and, if the client is a minor, the resources of his parents. These resources consist of current income, including remuneration in kind and remuneration from on-the-job training; any benefits to which the individual may be entitled by way of pension, compensation or insurance; and capital assets, including both real and personal property.

The commission has established policies regarding conditions under which resources are considered "actually available" to the client. Only those resources which are actually available to him for use during the period of his vocational rehabilitation will be taken into account.

The commission has established policies providing that certain defined resources of the client may be retained by him and need not be used in his vocational rehabilitation program. Resources which the client will not be expected to apply toward the cost of services involved in his vocational rehabilitation program are:

(1) Amounts specified below of capital assets, both real and personal property, provided that current income will not be disregarded.

Ten thousand dollars in capital assets, other than cash, including client's shelter on basis of tax evaluation and including both real and personal property not otherwise specifically exempt.

Cash assets in an amount not to exceed $1,000 for a single person or $1,500 for a married person.

(2) Resources of any type needed to meet the client's obligations for:

Support of dependents (including only persons in the home for whom he has assumed responsibility, and other persons for whose support he is legally responsible) in accordance with the standard established by the agency to measure the amount in which this obligation will be recognized. This standard is determined on the basis of the usual requirements which would provide the elements of living essential to adequate maintenance of the health of the client's dependents for their participation in ordinary activities and includes, in addition to the assets set forth in item 1, the resources invested in necessary home furnishings used by dependents and resources invested in tools, equipment and vehicles used in providing support of dependents.

Obligations which the client is required by legal process to pay or which, if not recognized, would constitute a substantial obstacle to achievement of his vocational rehabilitation objective.

c. Total resources. The total consequential resources actually available to the client, minus capital assets disregarded, and minus the amounts needed to meet obligations in accordance with applicable policies, will be considered to constitute the client's resources. In each case, the amount of the commission's supplementation will be the amount by which the individual's living requirements, plus the cost of services to be purchased, exceed his resources for obtaining the planned vocational rehabilitation services conditioned on economic need.

If, prior to the start of the consummation of the rehabilitation plan, it is evident that a client is in need of clothing to make it possible for him adequately to clothe himself during training or other rehabilitation program, the agency may expend whatever is necessary to provide the needed clothing.

1.9(3) *Uniform application and equitability of standards.* The staff of the commission will be provided with written standards and instructions, and such training and supervision in their use as are necessary to achieve uniformity in applying them. Instructions as to monetary amounts for measuring the individual's normal living requirements, for recognizing obligations, for support of dependents, for amounts of capital assets that may be disregarded in calculating resources will be included in such instructions. Standards and policies on determining financial requirements and consideration of resources will provide for equitable treatment of all clients.

1.10(601B) Confidential information.

1.10(1) *Agency regulations.* The commission maintains such regulations and rules as are necessary to assure that all information as to the personal facts and circumstances of applicants or clients given or made available to the agency, its representatives, or employees in the course of administration of the vocational rehabilitation

program, including lists and names and addresses and records of agency evaluations will be held to be confidential.

The use of such information and records will be limited to purposes directly connected with the administration of the vocational rehabilitation program and may not be disclosed, directly or indirectly, other than in the administration of the program, unless the consent of the client to such release has been obtained either expressly or by necessary implication. Release of information to employers in connection with placement of the rehabilitation client may be considered as a release of information in connection with the administration of the rehabilitation program. Such information may, however, be released to welfare agencies or programs from which the client has requested services, for which his consent may be presumed, provided such agencies have adopted regulations which will insure that the information will be held confidential, and can assure that the information will be used only for the purposes for which it is provided.

All such information is the property of the commission and may be used only in accordance with the agency's regulations.

1.10(2) *Agency procedures.* The commission has adopted such procedures and standards as are necessary to (*a*) give effect to its regulations; (*b*) to assure that all clients and interested persons are informed of the confidential nature of rehabilitation information; (*c*) assure the adoption of such office practices and availability of such office facilities and equipment as will assure the adequate protection of the confidential nature of the records.

1.11(601B) Services to individuals.

1.11(1) *Training and training materials.*

a. Training. All necessary vocational rehabilitation services will be made available to eligible individuals to the extent necessary to achieve vocational rehabilitation. Training will include vocational, prevocational, personal adjustment training, and other rehabilitation training which contributes to the individual's vocational adjustment. It also includes training provided directly by the state agency or procured from other private or public training facilities.

b. Training materials. All necessary training supplies are provided to the client including: Books, tape recorders and tapes, instruments for students taking chiropractic training, clinical coats, piano-tuning tools, aprons and other necessary helps.

1.11(2) *Physical restoration services.* It is the policy of the commission to secure physical restoration services, when such are not otherwise available, for eligible disabled individuals to the extent necessary to achieve their vocational rehabilitation. "Physical Restoration Services" means those medical and medically related services which are necessary to correct or modify substantially within a reasonable period of time a physical or mental condition which is stable or slowly progressive, and includes: (*a*) Medical or surgical treatment by general practitioners or medical specialists; (*b*) psychiatric treatment; (*c*) dentistry; (*d*) nursing services; (*e*) hospitalization (either inpatient or out-patient care) and clinic services; (*f*) convalescent nursing or rest home care; (*g*) drugs and supplies; (*h*) prosthetic devices essential to obtaining or retaining employment; (*i*) physical therapy; (*j*) occupational therapy; (*k*) medically directed speech and hearing therapy; (*l*) physical rehabilitation in a rehabilitation facility; (*m*) treatment of medical complications and emergencies, either acute or chronic, which are associated with or arise out of the provision of physical restoration services, or inherent in the condition under treatment; and (n) other medical or medically related rehabilitation services.

Physical restoration services will be furnished to an eligible client only when the following criteria are met: (1) The clinical status of the individual's condition must be stable or slowly progressive (i.e., the condition must not be acute or transitory, or of so recent an origin that the resulting functional limitations affecting occupational performance cannot be identified); (2) eliminate or substantially reduce the handicapping condition within a reasonable period of time; (3) the individual must be found to be in need of financial assistance in meeting the costs of the services.

1.11(3) *Transportation.* The agency furnishes transportation incidental to provision of diagnostic or other vocational rehabilitation services. Transportation includes: Cost of travel and subsistence during travel (or per diem allowances in lieu of subsistence) for the client and his attendant or guide when such assistance is needed.

1.11(4) *Maintenance.*

a. Maintenance will be provided only in order to enable an individual to derive the full benefit of other vocational rehabilitation services that he is receiving.

b. Maintenance grants cover the handicapped individual's basic living expenses such as food, shelter, clothing, health maintenance and other subsistence expenses essential to achieving the individual's vocational rehabilitation objective.

c. As needed in the individual case, maintenance may be provided at any time in connection with vocational rehabilitation services from the date of initiation of services, including diagnostic services, until such time as the client actually receives remuneration (not more than 30 days after placement) from his employment, or in the case of the client placed in self-employment, for not more than 30 days after he is so placed.

d. The commission assumes responsibility for providing as a part of maintenance amounts to cover the cost of medical care for short periods

necessary to treat acute conditions arising in the course of vocational rehabilitation which, if not cared for, would constitute a hazard to achieving the individual's vocational rehabilitation objective. Such medical care shall be available for a period not to exceed 30 days in the case of any one illness.

1.11(5) *Placement.* The agency assumes the responsibility for the placement of all handicapped individuals accepted for vocational rehabilitation services.

The standards of the agency for determining that a client is suitably placed are:

(*a*) That the work performed is consistent with the client's physical, and mental capacities, interests, and personal characteristics.

(*b*) That the client possesses or has acquired necessary skills to perform the work successfully.

(*c*) That the work has reasonable permanency.

(*d*) That working conditions will neither aggravate the client's disability nor jeopardize the health or safety of others.

(*e*) That the employment provides reasonable maintenance for the client and his dependents at the highest economic level he can reasonably obtain.

(*f*) That if not employed full time, the employment is consistent with the client's capacity to work and produce.

(*g*) That the wage and working conditions conform with state and federal statutory requirements.

In each case there will be a reasonable period of follow-up after placement to assure that the vocational objective of the client has been achieved.

1.11(6) *Tools, equipment, initial stocks and supplies, occupational licenses.* Tools, equipment, initial stocks and supplies, including livestock, will be provided, as needed, in the individual case, for the operation of a business or agricultural enterprise or the pursuit of a trade, occupation, or profession by eligible clients. Tools, equipment, initial stocks and supplies will be supplied in such quantity and will be of such quality so as to give reasonable assurance of successful operation of the enterprise, performance in the occupation, or practice of the profession.

Guides and standards governing quality and quantity are developed as necessary with appropriate professional, trade, business training, and other organizations and institutions.

1.11(7) *Other goods and services.* The agency will provide a client with other goods and services as are necessary, such as an attendant or reader services. The necessary licenses to operate a profession or business for which the client was trained will be provided. In the case of licenses covering specific periods of time (such as cigarette licenses) in the controlled business enterprise program, the agency retains the right to prorate the cost monthly from the profits of the business.

1.12(601B) Vending stands and other small businesses for severely handicapped individuals.

1.12(1) *Persons to be served.* In selection of an operator, the commission will permit no discrimination because of race, color, or creed. In order to be eligible for licensing as a stand operator, an individual must be blind according to the definition in 1.1(1) of this plan. Persons to be eligible do not have to be in economic need.

1.12(2) *Policies governing the acquisition of equipment and initial stocks and supplies.*

a. (1) The commission will assist blind persons in establishing any type of small business enterprise which seems feasible. Such small business enterprise will not be under the control of the commission, but will belong to individual blind persons except for vending stands as provided hereafter in this section. (2) The commission will provide suitable vending stands and equipment for the location selected. Adequate initial stocks of merchandise also will be purchased for the use of the operator.

b. The location for vending stands shall be selected after it has been determined that the establishment of such an enterprise in that particular location will contribute to the maximum development of opportunities for the operator. The determination of the commission shall be made upon the basis of established criteria and after an evaluation of all relevant facts disclosed as a result of the comprehensive survey of that particular location. The criteria for the evaluation of the location shall take into consideration such factors as population, traffic, continued availability, and type of premises.

c. Ownership of all assets of the program will be maintained by the commission. The right, title, and interest in automatic coin machines are vested in the commission. However, if at any time any operator of a vending stand indicates a desire to purchase the equipment and stock of the stand and become an independent owner-operator, then the commission will immediately adopt rules which will permit such purchase and which will conform to the federal law and regulations.

1.12(3) *Policies of management and supervision.* The responsibility for the management and supervision of the vending stands will be vested in the commission.

No public or private agencies are used by the commission in the program.

No set-aside funds will be taken from the proceeds of vending operations, except that the operator may be required to participate in the cost of purchasing new equipment for their stands or the cost of repair or replacement of equipment.

1.13(601B) Hearings on applicant's appeals. If an applicant or client is aggrieved by an action or inaction on the part of the counselor to whom the case has been assigned, the counselor

shall inform the applicant or client of his right to a hearing before the members of the commission. The applicant or client shall set forth his complaints in writing and with a request for a hearing, submit them to the director of the commission, who in turn will present them to the members of the commission immediately. The commission, within five days of the presentation of the case, will notify the individual in writing of the time for the hearing. The applicant or client shall appear in person, or he may be represented by counsel, or he may appear in person with counsel. After hearing all testimony, the commission shall take the evidence under consideration and notify the applicant or client within five days after the hearing of the decision. The decision of the commission shall be final.

1.14(601B) Rules governing the vending stand program.

1.14(1) *Issuance and conditions of licenses.*

a. In issuing licenses to operate vending stands, the commission will make no discrimination because of sex, race, color or creed. Preference shall be given to blind persons who are in need of employment, and to those who have resided within the state of Iowa for a period of at least one year. Licenses will be issued only to persons who are determined by the commission to be:

(1) Blind as defined in section 403.1(p) of the federal regulations issued pursuant to the Vocational Rehabilitation Act (29 U.S.C. Ch 4);

(2) Citizens of the United States;

(3) At least 21 years of age; and

(4) Certified by the commission's rehabilitation division as qualified to operate a vending stand.

b. Licenses will be issued for an indefinite period but subject to termination if, after affording the operator an opportunity for a fair hearing, the commission finds that the vending stand is not being operated in accordance with its rules, the terms and conditions of the permit, or the agreement with the operator.

c. The income from the vending machines within reasonable proximity to and in direct competition with the vending stand will be assigned to the operator. A vending machine shall be considered to be in reasonable proximity to and in direct competition with the stand if it vends articles of a type authorized by the permit, and is so located that it attracts customers who would otherwise patronize the vending stand.

1.14(2) *Termination of licenses.* Any license to an individual for the operation of a vending stand on federal or other property may be terminated when the commission finds that the vending stand is not being operated in accordance with its rules, the terms and conditions governing the permit, or the agreement with the operator.

1.14(3) *Fair hearing for operators.* An opportunity for a fair hearing will be afforded to any operator dissatisfied with any action arising from the operation or administration of the vending stand program. The following stipulations shall be included in the procedure for such hearing:

(The word "operator" includes the personal representative or next of kin in a hearing relative to the determination of the amount to be paid by the commission for an operator's ownership in the stock and equipment, in the event of the death of an operator.)

a. An operator shall have the right to be represented at the hearing by counsel or by a friend;

b. Hearings shall be held within a reasonable time after request therefor and at a time and place reasonably convenient to the operator;

c. The operator shall have an adequate opportunity to present his case, and for cross-examination;

d. The hearings shall be held before a three-member panel composed of

(1) One member selected by the operator requesting the hearing,

(2) One member selected by the commission representative involved in the action under question, and

(3) One member, who shall automatically become the panel chairman, selected by the first two members;

e. The decision shall be based upon the information adduced at the hearing, and the decision of the panel shall be final. A verbatim transcript of the testimony and exhibits (or an official report containing the substance of what transpired at hearing) together with all papers and reports filed in the proceedings shall be available to the operator and to the commission;

f. The decision shall be in writing and shall set forth the issue, the relevant facts brought out at the hearing, the pertinent provisions in law and agency policy, and the reasoning that led to the decision. The operator and the commission shall be furnished copies of the decision immediately upon its issuance;

g. The decision shall constitute the official action of the commission in relation to the action which was the subject of the hearing.

1.14(4) *Furnishing equipment and initial stock.* The commission shall be responsible for (*a*) furnishing each vending stand with adequate, suitable equipment and for the maintenance and repair of such equipment, and (*b*) for furnishing each vending stand with adequate initial stock of merchandise.

1.14(5) *Right, title to and interest in vending stand equipment and stock.* The right, title to and interest in vending stand equipment and stock used in the program is vested in the state commission for the blind, except that if at any time any operator of a vending stand indicates a

desire to become an independent owner-operator and purchase the equipment and stock of the stand he is operating, then the commission will immediately adopt rules which will permit such purchase, and which will conform to the federal law and regulations.

1.14(6) *Funds set aside from vending stand proceeds.* No funds will be set aside from the proceeds of the vending stand operation, except that the operators may be required to participate in the cost of purchasing new equipment for their stands or the cost of repair or replacement of equipment.

1.14(7) *Policies governing the duties, supervision, transfer and participation of operators.* The proceeds of the operation of each stand shall accrue to the operator after paying operating costs.

Each vending stand operator shall agree to:

a. Perform faithfully and to the best of his ability the necessary duties in connection with the operation of the vending stand in accordance with the commission's rules, and standards issued pursuant thereto, the terms of the permit, and the agreement with the operator.

b. Co-operate fully with officials and duly authorized representatives of the commission in connection with their official program responsibilities.

c. Operate the vending stand in accordance with all applicable health laws and regulations.

d. Furnish such reports as the commission may from time to time require.

1.14(8) *Supervision of operators.* The commission will provide to each operator regular and systematic supervision and in-service training in the keeping of accounts, the selection and purchase of suitable merchandise, the maintenance of a clean and attractive location, and the adoption and utilization of sound business practices and methods, to assure the greatest possible financial return to the operator and to preserve the employment opportunities for the use of successive blind persons.

1.14(9) *Transfer of operators.* When a vacancy occurs the operator who has demonstrated business and managerial ability will be considered for promotion to the more profitable stand, if he so desires.

Other factors which will be given consideration relative to transfer include: Proximity of location of stand to residence of operator, family conditions, health of operator, or other pertinent data believed to be to the advantage of the operator or necessary for the success of the stand.

1.14(10) *Explanation to operator of his rights and responsibilities.* The commission shall furnish to each operator a copy of these rules, and a description of the arrangements for providing services to him, which shall be read to and explained to him to assure that he understands the provisions of such documents and the provisions of the permit and any agreements under which he operates, as evidenced by his signed statement.

AGREEMENT BETWEEN THE COMMISSION FOR THE BLIND AND THE OPERATOR OF A VENDING STAND

In compliance with such laws and with the rules and regulations required to be issued by the commission to govern and apply to all vending stands now operating or to be established under the program, this agreement is entered into by and between ....., the operator of a vending stand, located at ..... in ....., Iowa and the Iowa commission for the blind.

This agreement, executed on ....., 19...., replaces and supersedes any and all previously executed agreements between the operator and the commission, concerning the operation of the vending stand.

In accordance with the provisions of the above laws, rules and regulations, and in order to provide the greatest possible financial return to the operator and to preserve and promote employment opportunities for other blind persons, the following standards of operation and service are included and made a part of this agreement:

1. Insofar as is reasonable and advisable the operator will conduct the vending stand as an individual business.

2. The operator will maintain a stock of merchandise equivalent to that provided by the commission.

3. The operator will confer with the commission regarding the selection of additional items or lines of merchandise and their source of supply, but will do his own buying.

4. The operator will conduct the business on a cash basis—paying cash for goods and supplies, and shall not extend credit to his customers.

5. The operator will employ sound business practices including the taking of regular inventories of merchandise, in accordance with the policy of the commission, and may request assistance from the commission in so doing when and if help is needed.

6. The vending stand shall be in operation during the hours the building in which it is located is open for business. If this exceeds a reasonable day, the operator may employ an assistant or may make arrangements with the commission for times during the day when the stand may be closed.

7. The assistants employed by the operator should receive a fair and reasonable rate of pay, and shall have the approval of the commission. Insofar as is reasonable and to the best interest of the operator and the stand, employment should be given to the visually handicapped.

8. The operator will co-operate fully with officials and duly authorized representatives of the commission in connection with their official program responsibilities.

9. The operator will make any and all such reports as may be required by the commission.

10. The operator will perform faithfully and to the best of his ability the necessary duties in connection with the vending stand in accordance with the standards prescribed by the commission and in order to create a favorable acceptance of the vending stand program by the general public.

11. The commission will furnish all reasonable supervision, consultation, in-service training in business operation and advise the operator on problems, which may be required for the successful operation of the stand.

12. It is understood that all right, title and interest to all vending stand equipment is vested in the commission, and the commission assumes responsibility for its repair, alteration, maintenance and replacement, and the operator will take no action which would impair such right, title and interest.

13. It is understood and agreed that if at any time the operator should desire to become an independent owner-operator and to purchase the equipment and stock of the stand, the commission will immediately adopt rules and regulations which will permit such purchase.

14. It is further understood that at some future time the commission and the operator may enter into an agreement whereby the operator will assume, in whole or in part, responsibility for maintenance and replacement of equipment, if the operation of the stand becomes sufficiently profitable to warrant such an agreement.

15. If necessary, the commission will purchase such licenses and bonds for the operator as may be necessary for the operation of the stand with the understanding that the operator will pay to the commission the fees for same on a prorated monthly basis.

CHEMICAL TECHNOLOGY REVIEW BOARD

[The rules formerly published herein have been transferred to the ENVIRONMENTAL QUALITY DEPARTMENT, ch 35]

CIVIL RIGHTS COMMISSION

CHAPTER 1
SEX-SEGREGATED WANT ADS

1.1(601A) Cease use.

1.1(1) All newspapers within the state of Iowa shall cease to use sex-segregated want ads—e.g. "Male Help Wanted", "Female Help Wanted", and "Male and Female Help Wanted" or "Men—Jobs of Interest", "Women—Jobs of Interest", and "Men and Women".

1.1(2) Any newspapers failing to comply with 1.1(1) shall be deemed in violation of the Iowa civil rights Act, sections 601A.7 and 601A.8, and legal proceedings shall henceforth be initiated against such newspaper.

1.1(3) The Iowa civil rights commission will regard any publication of sex preference for a job to be in violation of the Iowa civil rights Act and, therefore, suggests that all Iowa newspapers refrain from publishing any sex preference which an employer in its job order may want printed.

1.1(4) The Iowa civil rights commission suggests that Iowa newspapers, instead of using sex-titled, sex-segregated want ads, use neutral want ads, e. g. "Help Wanted", "Jobs of Interest", "Positions Available" or the like.

1.2(601A) Exception.

1.2(1) The Iowa civil rights commission recognizes that sex may, in very limited circumstances, be a bona fide occupational qualification, e. g. a woman to be a women's fashion model. Therefore an employer seeking to place a job order or want ad which shows sex preference, must, by affidavit, claim that such preference is based upon a bona fide occupational qualification.

1.2(2) The affidavit referred to in 1.2(1) must set out the complete basis upon which the employer believes that a person of a particular sex is required for the job the employer wishes to fill. The affidavit must also clearly state that the employer truly believes the sex preference is bona fide and that the employer, and not the newspaper or publisher of the ad, is responsible for the content of the ad.

1.2(3) Any newspaper, or other publisher which prints want ads, can publish a want ad with a sex preference, if, and only if, that newspaper or publisher has received from the employer the affidavit referred to in 1.2(1) and 1.2(2). The newspaper or publisher, upon receipt of such affidavit, will submit a copy thereof, by mail or other convenient method, to the Iowa civil rights commission.

CHAPTER 2
EMPLOYEE SELECTION PROCEDURES

2.1(601A) "Test" defined. For the purpose of the rules in this chapter, the term "test" is defined as any paper-and-pencil or performance measure used as a basis for any employment decision. The rules in this chapter apply, for example, to ability tests which are designed to measure eligibility for hire, transfer, promotion, membership, training, referral or retention. This definition includes, but is not restricted to, measures of general intelligence, mental ability and learning ability; specific intellectual abilities; mechanical, clerical and other aptitudes; dexterity and co-ordination; knowledge and proficiency; occupational and other interests; and attitudes, personality or temperament. The term "test" includes all formal, scored, quantified or standardized techniques of assessing job suitability including, in addition to the above, specific qualifying or disqualifying personal history or background requirements, specific educational or work history requirements, scored interviews, biographical information blanks, interviewers' rating scales, scored application forms, etc.

2.2(601A) "Discrimination" defined. The use of any test which adversely affects hiring, promotion, transfer or any other employment or membership opportunity of classes protected by Title VII, Civil Rights Act 1964 and chapter 601A constitutes discrimination unless: (1) The test has been validated and evidences a high degree of utility as hereinafter described, and (2) the person giving or acting upon the results of the particular test can demonstrate that alternative suitable hiring, transfer or promotion procedures are unavailable for his use.

2.3(601A) Evidence of validity.

2.3(1) Each person using tests to select from among candidates for a position or for membership shall have available for inspection evidence that the tests are being used in a manner which does not violate 2.2(601A). Such evidence shall be examined for indications of possible discrimination, such as instances of higher rejection rates for minority candidates than nonminority candidates. Furthermore, where technically feasible, a test should be validated for each minority group with which it is used; that is, any differential rejection rates that may exist, based on a test, must be relevant to performance on the jobs in question.

2.3 (2) The term "technically feasible" as used in these rules means having or obtaining a sufficient number of minority individuals to achieve findings of statistical and practical significance, the opportunity to obtain unbiased job performance criteria, etc. It is the responsibility of the person claiming absence of technical feasibility to positively demonstrate evidence of this absence.

2.3 (3) Evidence of a test's validity should consist of empirical data demonstrating that the test is predictive of or significantly correlated with important elements of work behavior which comprise or are relevant to the job or jobs for which candidates are being evaluated.

a. If job progression structures and seniority provisions are so established that new employees will probably, within a reasonable period of time and in a great majority of cases, progress to a higher level, it may be considered that candidates are being evaluated for jobs at that higher level. However, where job progression is not so nearly automatic, or the time span is such that higher level jobs or employees' potential may be expected to change in significant ways, it shall be considered that candidates are being evaluated for a job at or near the entry level. This point is made to underscore the principle that attainment of or performance at a higher level job is a relevant criterion in validating employment tests only when there is a high probability that persons employed will in fact attain that higher level job within a reasonable period of time.

b. Where a test is to be used in different units of multiunit organization and no significant differences exist between units, jobs, and applicant populations, evidence obtained in one unit may suffice for the others. Similarly, where the validation process requires the collection of data throughout a multiunit organization, evidence of validity specific to each unit may not be required. There may also be instances where evidence of validity is appropriately obtained from more than one company in the same industry. Both in this instance and in the use of data collected throughout a multiunit organization, evidence of validity specific to each unit may not be required: Provided, that no significant differences exist between units, jobs, and applicant populations.

2.4 (601A) Minimum standards for validation.

2.4 (1) For the purpose of satisfying the requirements of this chapter, empirical evidence in support of a test's validity must be based on studies employing generally accepted procedures for determining criterion-related validity, such as those described in "Standards for Educational and Psychological Tests and Manuals" published by American Psychological Association, 1200 17th Street, N.W., Washington, D. C. 20036. Evidence of content or construct validity, as defined in that publication, may also be appropriate where criterion-related validity is not feasible. However, evidence for content or construct validity should be accompanied by sufficient information from job analyses to demonstrate the relevance of the content (in the case of job knowledge or proficiency tests) or the construct (in the case of trait measures). Evidence of content validity alone may be acceptable for well-developed tests that consist of suitable samples of the essential knowledge, skills

or behaviors composing the job in question. The types of knowledge, skills or behaviors contemplated here do not include those which can be acquired in a brief orientation to the job.

2.4(2) Although any appropriate validation strategy may be used to develop such empirical evidence, the following minimum standards, as applicable, must be met in the research approach and in the presentation of results which constitute evidence of validity:

a. Where a validity study is conducted in which tests are administered to applicants, with criterion data collected later, the sample of subjects must be representative of the normal or typical candidate group for the job or jobs in question. This further assumes that the applicant sample is representative of the minority population available for the job or jobs in question in the local labor market. Where a validity study is conducted in which tests are administered to present employees, the sample must be representative of the minority groups currently included in the applicant population. If it is not technically feasible to include minority employees in validation studies conducted on the present work force, the conduct of a validation study without minority candidates does not relieve any person of his subsequent obligation for validation when inclusion of minority candidates becomes technically feasible.

b. Tests must be administered and scored under controlled and standardized conditions, with proper safeguards to protect the security of test scores and to insure that scores do not enter into any judgments of employee adequacy that are to be used as criterion measures. Copies of tests and test manuals, including instructions for administration, scoring, and interpretation of test results, that are privately developed and are not available through normal commercial channels must be included as a part of the validation evidence.

c. The work behaviors or other criteria of employee adequacy which the test is intended to predict or identify must be fully described; and, additionally, in the case of rating techniques, the appraisal form(s) and instructions to the rater(s) must be included as a part of the validation evidence. Such criteria may include measures other than actual work proficiency, such as training time, supervisory ratings, regularity of attendance and tenure. Whatever criteria are used they must represent major or critical work behaviors as revealed by careful job analyses.

d. In view of the possibility of bias inherent in subjective evaluations, supervisory rating techniques should be carefully developed, and the ratings should be closely examined for evidence of bias. In addition, minorities might obtain unfairly low performance criterion scores for reasons other than supervisors' prejudice, as, when as new employees, they have had less opportunity to learn job skills. The general point is that all criteria need to be examined to insure freedom from factors which would unfairly depress the scores of minority groups.

e. Differential validity. Data must be generated and results separately reported for minority and nonminority groups wherever technically feasible. Where a minority group is sufficiently large to constitute an identifiable factor in the local labor market, but validation data have not been developed and presented separately for that group, evidence of satisfactory validity based on other groups will be regarded as only provisional compliance with these rules pending separate validation of the test for the minority group in question. See 2.8 (601A). A test which is differentially valid may be used in groups for which it is valid but not for those in which it is not valid. In this regard, where a test is valid for two groups but one group characteristically obtains higher test scores than the other without a corresponding difference in job performance, cutoff scores must be set so as to predict the same probability of job success in both groups.

2.4 (3) In assessing the utility of a test the following considerations will be applicable:

a. The relationship between the test and at least one relevant criterion must be statistically significant. This ordinarily means that the relationship should be sufficiently high as to have a probability of no more than 1 to 20 to have occurred by chance. However, the use of a single test as the sole selection device will be scrutinized closely when that test is valid against only one component of job performance.

b. In addition to statistical significance, the relationship between the test and criterion should have practical significance. The magnitude of the relationship needed for practical significance or usefulness is affected by several factors, including:

(1) The larger the proportion of applicants who are hired for or placed on the job, the higher the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few job vacancies are available;

(2) The larger the proportion of applicants who become satisfactory employees when not selected on the basis of the test, the higher the relationship needs to be between the test and a criterion of job success for the test to be practically useful. Conversely, a relatively low relationship may prove useful when proportionately few applicants turn out to be satisfactory;

(3) The smaller the economic and human risks involved in hiring an unqualified applicant relative to the risks entailed in rejecting a qualified applicant, the greater the relationship needs to be in order to be practically useful. Conversely, a relatively low relationship may prove useful when the former risks are relatively high.

2.5(601A) Presentation of validity evidence. The presentation of the results of a validation study must include graphical and statistical representations of the relationships between the test and the criteria, permitting judgments of the test's utility in making predictions of future work behavior. (See 2.4(3) concerning assessing utility of a test.) Average scores for all tests and criteria must be reported for all relevant subgroups, including minority and nonminority groups where differential validation is required. Whenever statistical adjustments are made in validity results for less than perfect reliability or for restriction of score range in the test or the criterion, or both, the supporting evidence from the validation study must be presented in detail. Furthermore, for each test that is to be established or continued as an operational employee selection instrument, as a result of the validation study, the minimum acceptable cutoff (passing) score on the test must be reported. It is expected that each operational cutoff score will be reasonable and consistent with normal expectations of proficiency within the work force or group on which the study was conducted.

2.6(601A) Use of other validity studies. In cases where the validity of a test cannot be determined pursuant to 2.3(601A) and 2.4(601A) (e.g., the number of subjects is less than that required for a technically adequate validation study, or an appropriate criterion measure cannot be developed), evidence from validity studies conducted in other organizations, such as that reported in test manuals and professional literature, may be considered acceptable when: (1) The studies pertain to jobs which are comparable (i.e., have basically the same task elements), and (2) there are no major differences in contextual variables or sample composition which are likely to significantly affect validity. Any person citing evidence from other validity studies as evidence of test validity for his own jobs must substantiate in detail job comparability and must demonstrate the absence of contextual or sample differences cited in "1" and "2" of this rule.

2.7(601A) Assumption of validity.

2.7(1) Under no circumstances will the general reputation of a test, its author or its publisher, or casual reports of test utility be accepted in lieu of evidence of validity. Specifically ruled out are: Assumptions of validity based on test names or descriptive labels; all forms of promotional literature; data bearing on the frequency of a test's usage; testimonial statements of sellers, users, or consultants; and other nonempirical or anecdotal accounts of testing practices or testing outcomes.

2.7(2) Although professional supervision of testing activities may help greatly to insure technically sound and nondiscriminatory test usage, such involvement alone shall not be regarded as constituting satisfactory evidence of test validity.

2.8(601A) Continued use of tests. Under certain conditions, a person may be permitted to continue the use of a test which is not at the moment fully supported by the required evidence of validity. If, for example, determination of criterion-related validity in a specific setting is practicable and required but not yet obtained, the use of the test may continue: Provided: (1) The person can cite substantial evidence of validity as described in 2.6(601A); and (2) he has in progress validation procedures which are designed to produce, within a reasonable time, the additional data required. It is expected also that the person may have to alter or suspend test cutoff scores so that score ranges broad enough to permit the identification of criterion-related validity will be obtained.

2.9(601A) Employment agencies and employment services.

2.9(1) An employment service, including private employment agencies, state employment agencies, and the U. S. Training and Employment Service, as defined in section 701(c) of Title VII, Civil Rights Act of 1964 or 601A.2 of the Code, shall not make applicant or employee appraisals or referrals based on the results obtained from any psychological test or other selection standard not validated in accordance with these rules.

2.9(2) An employment agency or service which is requested by an employer or union to devise a testing program is required to follow the standards for test validation as set forth in these rules. An employment service is not relieved of its obligation herein because the test user did not request such validation or has requested the use of some lesser standard than is provided in these rules.

2.9(3) Where an employment agency or service is requested only to administer a testing program which has been elsewhere devised, the employment agency or service shall request evidence of validation, as described in the rules in this chapter, before it administers the testing program or makes referral pursuant to the test results. The employment agency must furnish on request such evidence of validation. An employment agency or service will be expected to refuse to administer a test where the employer or union does not supply satisfactory evidence of validation. Reliance by the test user on the reputation of the test, its author, or the name of the test shall not be deemed sufficient evidence of validity. See 2.7(1). An employment agency or service may administer a testing program where the evidence of validity comports with the standards provided in 2.6(601A).

2.10(601A) Disparate treatment. The principle of disparate or unequal treatment must

be distinguished from the concepts of test validation. A test or other employee selection standard — even though validated against job performance in accordance with the rules in this chapter — cannot be imposed upon any individual or class protected by Title VII, Civil Rights Act of 1964 or chapter 601A where other employees, applicants or members have not been subjected to that standard. Disparate treatment, for example, occurs where members of a minority or sex group have been denied the same employment, promotion, transfer or membership opportunities as have been made available to other employees or applicants. Those employees or applicants who have been denied equal treatment, because of prior discriminatory practices or policies, must at least be afforded the same opportunities as had existed for other employees or applicants during the period of discrimination. Thus, no new test or other employee selection standard can be imposed upon a class of individuals protected by Title VII or chapter 601A who, but for prior discrimination, would have been granted the opportunity to qualify under less stringent selection standards previously in force.

2.11(601A) Retesting. Employers, unions, and employment agencies should provide an opportunity for retesting and reconsideration to earlier "failure" candidates who have availed themselves of more training or experience. In particular, if any applicant or employee during the course of an interview or other employment procedure claims more education or experience, that individual should be retested.

2.12(601A) Other selection techniques. Selection techniques other than tests, as defined in 2.1(601A), may be improperly used so as to have the effect of discriminating against minority groups. Such techniques include, but are not restricted to, unscored or casual interviews and unscored application forms. Where there are data suggesting employment discrimination, the person may be called upon to present evidence concerning the validity of his unscored procedures as well as of any tests which may be used, the evidence of validity being of the same types referred to in 2.3(601A) and 2.4(601A). Data suggesting the possibility of discrimination exist, for example, when there are differential rates of applicant rejection from various minority and nonminority or sex groups for the same job or group of jobs or when there are disproportionate representations of minority and nonminority or sex groups among present employees in different types of jobs. If the person is unable or unwilling to perform such validation studies, he has the option of adjusting employment procedures so as to eliminate the conditions suggestive of employment discrimination.

2.13(601A) Affirmative action. Nothing in these rules shall be interpreted as diminishing a person's obligation under Title VII, Civil Rights Act of 1964, Executive Order 11246 as amended by Executive Order 11375, or chapter 601A to undertake affirmative action to ensure that applicants or employees are treated without regard to race, color, religion, sex, or national origin. Specifically, the use of tests which have been validated pursuant to these rules does not relieve employers, unions or employment agencies of their obligations to take positive action in affording employment and training to members of classes protected by Title VII and chapter 601A.

[Filed September 15, 1971]

CHAPTER 3
RULES OF PRACTICE

3.1(601A) Definitions.

3.1(1) The term "Act" as used herein shall mean the Iowa Civil Rights Act of 1965, as amended (chapter 601A, Code).

3.1(2) Unless indicated otherwise, the terms "court", "person", "employment agency", "labor organization", "employer", "employee", "unfair practice" or "discriminatory practice", "commission", "commissioner", and "public accommodation" shall have the same meaning as set forth in chapter 601A of the Iowa Code.

3.1(3) The term "chairman" shall mean the chairman of the Iowa civil rights commission; and the term "commissioner" shall mean any member, including the chairman, of the Iowa civil rights commission. The chairman or a majority of the commission may designate any member of the commission to serve, in the absence of the chairman, as acting chairman; and, in the absence of the chairman, the acting chairman shall have all of the duties, powers, and authority conferred upon the chairman by the Act and these rules. At all times it shall be necessary that a quorum be present before the commission can transact any official business.

3.1(4) The term "hearing examiner" shall mean any person duly appointed by the commission to conduct a public hearing upon a complaint brought to a public hearing upon the order of the Iowa civil rights commission.

3.1(5) The term "executive director" shall mean an employee of the commission, selected by, and serving at the will of, the commission as executive director, who shall have such duties, powers and authority as may be conferred upon him by the commission, subject to the provisions of the Act.

3.2(601A) The complaint.

3.2(1) *Amendment of complaint.* A complaint or any part thereof may be amended by the complainant at any time prior to the hearing thereon and, thereafter, at the discretion of the commissioners.

3.2(2) *Withdrawal of complaint.* A complaint or any part thereof may be withdrawn by the complainant at any time prior to the hearing thereon and, thereafter, at the discretion of the commissioners. However, nothing herein shall preclude the commission from continuing the investigation and initiating a complaint on its own behalf against the original respondent, as provided for in the Act, whenever it deems it in the public interest.

3.2(3) *Timely filing of the complaint.*

a. Ninety-day limitation. The complaint shall be filed within the 90 days after the occurrence of the alleged unlawful discriminatory practice or act.

b. Continuing wrong. If the alleged unlawful discriminatory practice or act is of a continuing nature, the date of the occurrence of said alleged unlawful practice shall be deemed to be any date subsequent to the commencement of the alleged unlawful practice up to and including the date upon which the unlawful practice has ceased.

3.3(601A) Processing the complaint.

3.3(1) *Receipt and acknowledgement of complaint.* Upon the receipt of a verified complaint the executive director of the Iowa civil rights commission shall send a letter to the complainant acknowledging receipt of the complaint. The executive director shall also recommend to the complainant that he take whatever additional legal or nonlegal action that may be necessary to protect his rights under other applicable provisions of city and municipal ordinances and state and federal law.

3.3(2) *Anonymity of complaint.* For purposes of commission meetings the complaints shall be identified only by case number so that the anonymity of the complainant and responding parties can be preserved.

3.4(601A) Investigation and conciliation.

3.4(1) *Investigating commissioner.*

a. Assignment of investigating commissioner. After a complaint has been filed, the chairman shall designate one of the commissioners, with the assistance of the commission staff, to make a prompt investigation of the allegations of the complaint. The commissioner appointed to supervise the investigation shall be known as the investigating commissioner. As part of the investigation the respondent shall be offered an opportunity to submit a statement of his position in respect to the allegations of the complaint.

b. Disqualification of investigating commissioner. A commissioner appointed to act as an investigating commissioner shall disqualify himself should he have a personal interest in the case at issue or any personal acquaintanceship with the complaining or responding party.

c. The investigation shall then proceed to a determination of whether or not there exists probable cause to credit the allegations of the complaint.After the designated investigating staff member has completed his investigation of the facts alleged in the complaint he shall prepare a written report of his findings and submit it to the investigating commissioner.

d. If the investigating commissioner finds that probable cause exists, the investigating commissioner shall notify the other members of the commission in person at a commission meeting. As soon as the investigating commissioner finds that probable cause exists to believe the allegations outlined in the complaint the investigating commissioner or authorized staff member, or both, shall proceed immediately to attempt to eliminate such discriminatory or unfair practice by conference, conciliation or persuasion or other remedial action. Five days prior to an attempt to eliminate such discrimination or unfair practice by conference, conciliation or persuasion or other remedial action, a decision of the investigation must be given to the respondent.

e. Both the complainant and respondent shall be notified in writing of the finding of probable cause.

f. After a finding of probable cause the investigating commissioner or authorized staff member shall make at least two attempts to arrange a meeting so that conciliation may begin.

g. The individual complainant, if any, should be present during attempts at conciliation. However, successful conciliation shall not be deemed defective if the individual complainant is not present, provided that his approval of the terms of conciliation is obtained as soon as possible.

h. Discrimination discovered during investigation. If, after investigation, the investigating commissioner determines that there is no probable cause to credit the allegations of the complaint but finds unlawful discriminatory practices to exist which were not complained of, he shall amend the complaint and go forward to attempt to eliminate such practices.

3.5(601A) Conducting the hearing.

3.5(1) *Hearing examiners.* The commission shall designate one or three of its members, or such other persons as it sees fit, to conduct the hearing. The absence or disqualification of one or more members of a hearing panel appointed to hear a particular case shall not prevent the remaining panel member from hearing the instant case as a sole and independent hearing examiner, unless other good cause can be shown that would prevent the individual commissioner or other person from acting as an independent hearing examiner.

3.5(2) Any commissioner or other person appointed to serve as a hearing examiner who has

any interest in the case at issue, or personally knows the complainant or respondent, shall disqualify himself to serve as a hearing examiner. The commissioner assigned as investigating commissioner in the case at issue shall not be appointed to serve as a hearing examiner.

3.5(3) *Power of the hearing examiners.* The hearing examiner shall have full authority to make all decisions regarding the admission and exclusion of evidence, and to control the procedures. Except in extraordinary circumstances, evidence or testimony offered by any party shall be entered in the record, subject to the objection of any other party, in order that a complete record will be available in the event of appeal. The hearing examiner may rule upon all motions and objections.

3.5(4) *Sworn testimony.* All testimony given at a commission hearing shall be under oath administered by the court reporter present at the hearing.

3.5(5) *Order of presentation.* The case in support of the complaint shall be presented to the hearing examiner by one of the commission's attorneys or agents, or by the attorney for the complainant, who shall present his evidence first. Where there is more than one complainant party the order of presentation shall be in the discretion of the hearing examiner. After all the evidence and testimony of the complaining parties has been received, all other parties shall be allowed to present their evidence or testimony. All parties, other than the party introducing the testimony, shall be allowed to cross-examine any witness immediately after his testimony has been received.

3.5(6) *Transcript and record.*

a. Transcript. All testimony given at a hearing held pursuant to chapter 601A of the Iowa Code, shall be transcribed by a stenographer retained by the hearing examiner.

b. Record. The written transcript of the record upon the hearing before the hearing examiner shall consist of the notice of the hearing, the verified complaint, as the same may have been amended, the stenographic transcript of the testimony taken at the hearing, the exhibits and depositions in evidence, written applications and stipulations.

3.6(601A) Findings and orders.

3.6(1) *Recommended decision.* If, upon all the admissible evidence in the record, the hearing examiner determines that the respondent has engaged in an unlawful practice, the hearing examiner shall so state in writing his findings of fact, conclusions of law, and order, and recommend the same to the commission for its evaluation.

3.6(2) *Commission adoption.* The recommended decision of the hearing examiner shall be presented to the Iowa civil rights commission for its consideration and adoption, modification, or rejection.

3.6(3) *Disqualification of investigating commissioner.* The investigating officer appointed by the acting commissioner to serve in the instant case shall not take part in this decision. Likewise, the commissioner that served as hearing examiner in the instant case shall not take part in the decision.

3.7(601A) Reopening proceedings. Within ten days after the issuance of an order or finding, the commission may, upon its own motion or upon application, of any party, for good cause shown or whenever justice so requires, or where an order or decision was made upon default of any party affected thereby, reopen any closed proceedings upon notice to all parties and take such action as it may deem necessary.

3.8(601A) Reconsideration. Any party may file a motion for reconsideration within 30 days after a receipt of a final decision to the commission. Such motion shall be submitted in writing to the commission, and in addition, shall include a statement of all matters alleged to have been erroneously decided, and, if applicable, a statement as to any newly discovered matters or circumstances that have arisen subsequent to the final decision.

3.9(601A) Stipulations. The parties may, by stipulation in writing filed with the commission at any stage of the proceeding or orally made at the hearing, agree upon any pertinent facts in the proceeding.

3.10(601A) Appeals to the district court. Appeals to the district court from the decision of the commission shall be perfected pursuant to the provisions of section 601A.10.

3.11(601A) Partial invalidity. If any provision of these rules, or the application of a provision to any person or circumstances, shall be held invalid, the remainder of these rules, or the application of a rule to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

3.12(601A) Availability of rules. Copies of these rules of practice and procedure, prepared in compliance with sections 601A.5(9) and 601A.9(14) of the Iowa Civil Rights Act, shall be available to the public on request and shall be kept on file in the office of the Secretary of State, State Capitol Building, Des Moines, Iowa 50319.

[Filed April 20, 1972]

CHAPTER 4
RULES ON DISCRIMINATION BECAUSE OF SEX

4.1(601A) General principles. References to "employer" and "employers" in these rules state principles that are applicable not only to employers but also to labor organizations and to employment agencies insofar as their action or

inaction may adversely affect employment opportunities, as defined in the Iowa Civil Rights Act, (Section 601A.5).

4.2(601A) Sex as a bona fide occupational qualification. The bona fide occupational qualification exception as to sex is strictly and narrowly construed. Labels — "men's jobs" and "women's jobs" — tend to deny employment opportunities unnecessarily to one sex or the other.

4.2(1) The following situations do not warrant the application of the bona fide occupational qualification exception:

a. The refusal to hire a woman because of her sex based on assumptions of the comparative employment characteristics of women in general. For example, the assumption that the turnover rate among women is higher than among men.

b. The refusal to hire an individual based on stereotyped characterizations of the sexes. Such stereotypes include, for example, that men are less capable of assembling intricate equipment; that women are less capable of aggressive salesmanship. The principle of nondiscrimination requires that individuals be considered on the basis of individual capacities and not on the basis of any characteristics generally attributed to the group.

c. The refusal to hire an individual because of the preferences of coworkers, the employer, clients or customers except as covered specifically in 4.2(2).

4.2(2) Where it is necessary for the purpose of authenticity or genuineness, sex is a bona fide occupational qualification, e.g., an actor or actress.

4.3(601A) Recruitment and advertising.

4.3(1) Employers engaged in recruiting activity must recruit employees of both sexes for all jobs unless sex is a bona fide occupational qualification.

4.3(2) Advertisement in newspapers and other media for employment must not express a sex preference unless sex is a bona fide occupational qualification for the job. The placement of an advertisement in columns headed "male" or "female" will be considered an expression of a preference, limitation, specification or discrimination based on sex.

4.4(601A) Employment agencies.

4.4(1) Section 601A.7(1) "*a*" and "*c*", specifically states that it shall be unlawful for an employment agency to discriminate against any individual because of sex. Private employment agencies which deal exclusively with one sex are engaged in an unlawful employment practice, except to the extent that such agencies limit their services to furnishing employees for particular jobs for which sex is a bona fide occupational qualification.

4.4(2) An employment agency that receives a job order containing an unlawful sex specification will share responsibility with the employer placing the job order if the agency fills the order knowing that the sex specification is not based upon a bona fide occupational qualification. However, an employment agency is not in violation of the law, regardless of the determination as to the employer, if the agency does not have reason to believe that the employer's claim of bona fide occupational qualification is without substance and the agency makes and maintains a written record available to the commission of each such job order. Such record shall include the name of the employer, the description of the job and the basis for the employer's claim of bona fide occupational qualification.

4.4(3) It is the responsibility of employment agencies to keep informed of opinions and decisions of the commission on sex discrimination.

4.5(601A) Pre-employment inquiries as to sex. A pre-employment inquiry may ask "male -------, female ----------"; or "Mr. Mrs. Miss," provided that the inquiry is made in good faith for a nondiscriminatory purpose. Any pre-employment inquiry in connection with prospective employment which expresses directly or indirectly any limitation, specification, or discrimination as to sex shall be unlawful unless based upon a bona fide occupational qualification.

4.6(601A) Job policies and practices.

4.6(1) Written personnel policies relating to this subject area must expressly indicate that there shall be no discrimination against employees on account of sex. If the employer deals with a bargaining representative for his employees and there is a written agreement on conditions of employment, such agreement shall not be inconsistent with these guidelines.

4.6(2) Employees of both sexes shall have an equal opportunity to any available job that he or she is qualified to perform, unless sex is a bona fide occupational qualification.

4.6(3) No employer shall make any distinction based upon sex in employment opportunities, wages, hours, or other conditions of employment. In the area of employer contributions for insurance, pensions, welfare programs and other similar "fringe benefits" the employer will not violate these guidelines if his contributions are the same for men and women or if the resulting benefits are equal.

4.6(4) Any distinction between married and unmarried persons of one sex that is not made between married and unmarried persons of the opposite sex will be considered to be a distinction made on the basis of sex. Similarly, an employer must not deny employment to women with young children unless it has the same exclusionary policies for men; or terminate an employee of one sex

in a particular job classification upon reaching a certain age unless the same rule is applicable to members of the opposite sex.

4.6(5) The employer's policies and practices must assure appropriate physical facilities to both sexes. The employer may not refuse to hire men or women, or deny men or women a particular job because there are no restroom or associated facilities, unless the employer is able to show that the construction of the facilities would be unreasonable for such reasons as excessive expense or lack of space.

4.6(6) An employer must not deny a female employee the right to any job that she is qualified to perform. For example, an employer's rules cannot bar a woman from a job that would require more than a certain number of hours or from working at jobs that require lifting or carrying more than designated weights.

4.7(601A) Separate lines of progression and seniority systems.

4.7(1) It is an unlawful employment practice to classify a job as "male" or "female" or to maintain separate lines of progression or separate seniority lists based on sex where this would adversely affect any employee unless sex is a bona fide occupational qualification for that job. Accordingly, employment practices are unlawful which arbitrarily classify jobs so that:

a. A female is prohibited from applying for a job labeled "male," or for a job in a "male" line of progression; and vice versa.

b. A male scheduled for layoff is prohibited from displacing a less senior female on a "female" seniority list; and vice versa.

4.7(2) A seniority system or line of progression which distinguishes between "light" and "heavy" jobs constitutes an unlawful employment practice if it operates as a disguised form of classification by sex, or creates unreasonable obstacles to the advancement by members of either sex into jobs which members of that sex would reasonably be expected to perform.

4.8(601A) Discriminatory wages.

4.8(1) The employer's wages schedules must not be related to or based on the sex of the employees.

4.8(2) The employer may not discriminatorily restrict one sex to certain job classifications. The employer must take steps to make jobs available to all qualified employees in all classifications without regard to sex.

4.9(601A) Fringe benefits.

4.9(1) Fringe benefits, as used herein, include medical, hospital, accident, life insurance and retirement benefits; profit-sharing and bonus plans; leave; and other terms, conditions, and privileges of employment.

4.9(2) It shall be an unlawful employment practice for an employer to discriminate between men and women with regard to fringe benefits.

4.9(3) Where an employer conditions benefits available to employees and their spouses and families on whether the employee is the "head of the household" or "principal wage earner" in the family unit, the benefits tend to be available only to male employees and their families. Due to the fact that such conditioning discriminatorily affects the rights of women employees, and that "head of household" or "principal wage earner" status bears no relationship to job performance, benefits which are so conditioned will be found a prima-facie violation of the prohibitions against sex discrimination contained in the Act.

4.9(4) It shall be an unlawful employment practice for an employer to make available benefits for the wives and families of male employees where the same benefits are not made available for the husbands and families of female employees; or to make available benefits for the wives of male employees which are not made available for female employees; or to make available benefits to the husbands of female employees which are not made available for male employees.

4.9(5) It shall not be a defense under chapter 601A of the Code to a charge of sex discrimination in benefits that the cost of such benefits is greater with respect to one sex than the other.

4.10(601A) Employment policies relating to pregnancy and childbirth.

4.10(1) A written or unwritten employment policy or practice which excludes from employment applicants or employees because of pregnancy is in prima-facie violation of chapter 601A of the Code, and may be justified only upon showing of business necessity.

4.10(2) Disabilities caused or contributed to by pregnancy, miscarriage, legal abortion, childbirth, and recovery therefrom are, for all job-related purposes, temporary disabilities and should be treated as such under any health or temporary disability insurance or sick leave plan available in connection with employment. Written and unwritten employment policies and practices involving matters such as the commencement and duration of leave, the availability of extensions, the accrual of seniority and other benefits and privileges, reinstatement, and payment under any health or temporary disability insurance or sick leave plan, formal or informal, shall be applied to disability due to pregnancy or childbirth on the same terms and conditions as they are applied to other temporary disabilities.

4.10(3) Where the termination of an employee who is temporarily disabled is caused by an employment policy under which insufficient or no leave is available, such a termination violates the Act if it has a disparate impact on employees of one sex and is not justified by a business necessity.

[Filed October 9, 1972]

COMMERCE COMMISSION

CHAPTER 1
RULES OF PRACTICE

1.1(474) Sessions of commission.

1.1(1) The commerce commission shall be considered in session at the office of the said commission in Des Moines, Iowa, at all times; and at any time that a quorum of the said commission shall be present shall be considered a session for considering petitions, informal complaints, applications and other communications, and also for considering and acting upon any business of the commerce commission other than complaints.

1.1(2) There shall be held regular sessions at the office of the commission in Des Moines during the week, commencing on the first Tuesday of each month, except in the months of July and August, for considering and hearing and acting upon informal complaints.

1.1(3) There shall also be held at its office in Des Moines regular sessions of the commission, commencing on the second Tuesday of each month, except in the months of July and August, for the hearing, considering and acting upon formal complaints and contested cases.

1.1(4) Special sessions may be held at other times at the office of the commission at Des Moines and at other places in this state when dates for the same shall have been set by the said commission, or at any other time when the entire commission is present.

1.1(5) Sessions of the commission to revise or change classifications and schedules of rates wherein notice is required by publication in two weekly newspapers as required by law, shall be held twice each year on the first Tuesday in April and October. If any day designated for any of the sessions shall fall upon an election day or legal holiday then the same shall be held upon the second succeeding day thereafter.

1.2(474) Informal complaints. Informal complaints are those presented to the commerce commission which may be taken up by the commerce commission and adjusted by correspondence through the secretary without requirement of service of notice or fixing any special date for hearing. But if such action fails to result in the adjustment of the informal complaint to the satisfaction of all parties thereto, then the said secretary shall refer the matters to the commerce counsel for investigation by him and presentation to the commission for its determination of the issues involved. If, in the judgment of the commission, it seems necessary, or if either party to the said matter makes a written request for the same, a hearing of said matters shall be held before the commission at its office in Des Moines at one of its regular sessions as hereinbefore provided. In the event that such formal hearing is desired, a formal complaint shall be prepared by the party complaining or by the commerce counsel, and same shall be filed and proceedings had as provided for formal complaints.

1.3(474) Formal complaints. All complaints other than these defined as informal complaints must be by petition printed or written, or partly printed and partly written, setting forth briefly the facts claimed to constitute a violation of the law and the relief demanded, and which complaint must be filed by a party in interest and may be filed by any person in his own behalf or in behalf of a class of persons similarly situated or a firm, corporation, association or any mercantile, agricultural or manufacturing society or any body politic or municipal organization, and in which complaint the name of the carrier or carriers complained against must be stated in full and the address of the petitioner, and if presented by an attorney, with the name and address of the attorney or counselor, which must appear upon the petition. The complainant must furnish as many copies of the petition as there may be parties complained against to be served, and four additional copies for the use of the commerce commission and commerce counsel.

1.4(474) Service of notice. The commerce commission will cause a copy of the petition or complaint to be served upon defendant railway company or companies with notice to satisfy or answer the same at the regular session for such hearings, and as stated in said notice. It may be served personally or by mail in the discretion of the commerce commission, and such service of notice must be had and served 20 days prior to the next regular session of the commission for the hearing of formal complaints and contested matters, provided said petition shall be filed 20 days before said date. If not, then such notice must be served 20 days prior to the next succeeding regular session.

1.5(474) Answers. The carrier or carriers complained against must answer such complaint at least five days before the first day of the session of which due notice has been given, unless further time shall be granted by the commerce commission for the filing of such answer. The answers must be filed with the secretary of the commerce commission at its office in Des Moines. The answer must specifically admit, deny or otherwise answer all material allegations of the petition and also briefly set forth the affirmative grounds relied upon to support such answer. If the defendant shall make satisfaction before answering, a written statement thereof must be filed both by the complainant or petitioner and the carrier or carriers complained against.

1.6(474) Demurrer. Any defendant who deems the petition of complaint insufficient to show a breach of legal duty may, instead of answering, demur thereto. And in such case the facts stated in the petition will be deemed admitted. A copy of the demurrer must at the same time be filed with the secretary of the commerce commission. The filing of the answer, however, will not be deemed an admission of the sufficiency of the petition. Nor will the ruling on the demurrer be considered as a final adjudication of the questions raised by the demurrer; and no petition shall be held sufficient, on account of the failure to demur thereto, but a motion to dismiss for insufficiency may be made at the hearing.

1.7(474) Amendments. Amendments to any petition or answer to any proceeding or investigation may be allowed by the commerce commission at its discretion.

1.8(474) Extension of time. Extension of time may be granted upon the application of any party to a proceeding at the discretion of the commerce commission.

1.9(474) Service of papers. The notice or other papers which are required to be served upon the adverse party or parties may be served personally or by mail and when any party has appeared by attorney, such service upon the attorney shall be deemed proper service upon the party.

1.10(474) Stipulations. The parties to any proceeding or investigation before the commerce commission may, by stipulation in writing filed with the secretary, agree upon the facts or any portion thereof involved in the controversy, which stipulation shall be regarded as evidence on the hearing.

1.11(474) Formal hearings.

1.11(1) The complaint or petition shall be heard at the office of the commerce commission in Des Moines unless otherwise ordered. The witnesses may be examined orally before the commerce commission, their testimony taken down and filed in the case, or depositions may be taken upon the notice as prescribed for the taking of depositions in the district courts of this state, and upon any stipulation made and upon documentary evidence pertinent to the questions at issue. The complainant must establish the facts alleged to constitute a violation of the law or entitle him to the relief prayed, unless the defendant admits the same or fails to answer the petition, or where the burden of proof is by statute placed upon the defendant. In case of a failure to answer, the commerce commission will take such proof of the facts as may be deemed proper and reasonable. Oral arguments may be had by the parties with right to the commerce commission to limit the time thereof and either party may have the right to furnish briefs, and if briefs are filed they must be either printed or typewritten, and copies thereof served upon the opposite party, and such briefs filed within the time fixed by the commerce commission.

1.11(2) In all contested cases the petitioner will open and close the case. Each party to the hearing will be allowed to introduce such evidence as is admissible under the general rules of evidence in the district courts of the state of Iowa and such other evidence as in the judgment of the commerce commission may be pertinent, material and admissible and in the hearing of such cases the commerce commission will be governed by the rules and practices which obtain in the district courts of the state of Iowa, so far as the same are applicable and as herein provided.

1.12(474) Rehearings. Applications for reopening a case after final submission or for rehearing after decision made by the commerce commission must be by petition, and must state specifically the grounds upon which the application is based. If such application be to reopen the case for further evidence, the nature and purpose of such evidence must be briefly stated, and the same must not be merely cumulative. If the application be for a rehearing, the petition must specify the findings of fact and conclusions of law claimed to be erroneous, with a brief statement of the grounds of error; and when any decision, order or requirement of the commerce commission is sought to be reversed, changed or modified on account of facts and circumstances arising subsequent to the hearing or of consequences resulting from compliance with such decision, order or requirement which are claimed to justify a reconsideration of the case, the matters relied upon by the applicant must be fully set forth.

1.13(474) Transcripts of records. The testimony in hearings before this commission shall be taken by a shorthand reporter appointed by the commission. The said shorthand notes shall be translated into longhand only on direction of the commission, and such shorthand notes, extension or translation of the same, together with all exhibits offered in evidence, shall be filed with and become a part of the record. The commission does not furnish copies of such extension or translation of said notes or exhibits, but in the event that either party shall desire a copy thereof, the same will be furnished by the reporter, on application, at a rate not exceeding the legal rates authorized by law.

1.14(474) Subpoenas. Subpoenas shall be issued by the secretary of this commission under seal of the commission at the request of either party to any complaint or hearing, requiring the attendance of witnesses or the production of evidence, as provided by statute.

1.15(474) Information furnished. The secretary of the commerce commission will, upon request, furnish information from the files of the commerce commission as will conduce to the prop-

er presentation of facts material to the controversy, and the commerce counsel will, upon request, advise any party as to the form of petition, answer or other paper necessary to be filed in any case.

[Filed prior to July 4, 1951]

CHAPTER 2
CONSTRUCTION AND OPERATION OF ELECTRIC SUPPLY AND COMMUNICATION LINES

2.1(489) Safety rules for the installation and maintenance of electric supply and communication lines. The National Bureau of Standards "Safety Rules for the Installation and Maintenance of Electric Supply and Communication Lines, comprising Part 2, the Definitions and the Grounding Rules of the Sixth Edition of the National Electric Safety Code" as "approved by American Standards Association, June 8, 1960, as American Standard C2.2-1960 (UDC 621.316.9)" and as "Reprinted July 1, 1963, with correction on page 92" as hereafter modified, are hereby adopted as standard minimum requirements for the installation and maintenance of overhead and underground electric supply and communication lines in the state of Iowa, provided, however, that this rule shall not apply to electrical facilities which are in existence upon the effective date of this rule in conformance with the requirements of the order of the Iowa state commerce commission issued in Docket E-5248 dated February 10, 1942, and are hereafter continuously maintained in conformance with the provisions of said commerce commission order.

2.1(1) The first sentence of rule 232, B is changed to read: "Greater clearances than specified in table 1 (rule 232, A) shall be provided where required by 1, 2, 2.5 and 3 below."

2.1(2) The following new rule designated as 232, B, 2.5 is added and inserted between rules 232, B, 2, and 232, B, 3: "Conductors Operated at Temperatures in Excess of 120° F. Under these conditions the clearances given in table 1 (rule 232, A) shall be increased by the difference between final unloaded sag at 120° F., no wind and the final unloaded sag at the maximum temperature at which the conductor will operate, no wind, both sags calculated for the crossing span."

2.1(3) The second sentence of rule 233, B, is changed to read: "The increase in 1, 2, 2.5 and 3 below are cumulative where more than one are applicable."

2.1(4) The following new rule designated as 233, B, 2.5 is added and inserted between rules 233, B, 2 and 233, B, 3: "Conductors Operated at Temperatures in Excess of 120° F. Under these conditions the clearances given in table 3 (rule 233, A) shall be increased by the difference between final unloaded sag at 120° F., no wind and the final unloaded sag at the maximum temperature at which the conductor will operate, no wind, both sags calculated for the crossing span."

Notwithstanding anything foregoing all electric supply and communication lines shall conform to the requirements of chapter 489 of the Code pertaining to distance from buildings and crossing of railroads and all other applicable requirements of the Code without exclusion because of specific enumeration herein.

The standard minimum requirements for the installation and maintenance of overhead and underground electric supply and communications lines herein adopted together with the provisions of chapter 489 of the Code pertaining to distance from buildings and crossing of railroads, all other applicable requirements of the Code and any rules issued by the commerce commission to supplement the aforesaid standard minimum requirements may be referred to collectively as the "Iowa Electrical Safety Code."

2.2(489) Special situations. Matters not coming within the provisions of these rules, or to which these rules cannot be made applicable will be given separate consideration by the commission. For good cause shown the commission may permit deviation from any rule or requirement thereof and adopt another requirement in a special case.

2.3(489) Petition for franchise. A petition for franchise to construct, operate and maintain an electric supply line, outside the corporate limits of cities and towns, for the transmission, distribution, use and sale of electric current shall set forth the following:

1. The name of the individual, company, corporation, city or town asking for the franchise.
2. The principal office or place of business of the petitioner.
3. The starting points, routes and termini of the proposed lines, accompanied by copies of two maps or plats showing such details.
4. A general description of the public or private lands, highways and streams over, across or along which any proposed line will pass.
5. General specifications as to materials and manner of construction.
6. The maximum voltage to be carried over each circuit.

Common use construction—Where two or more electric supply lines are to occupy the same highway, all electric supply circuits shall be attached to the same or common line of poles unless the Iowa state commerce commission authorizes construction of separate pole lines.

2.4(489) Petitions for authority to increase the operating voltage or attach an additional electric supply circuit.

2.4(1) No individual, company, corporation, city or town shall increase the operating voltage of an existing electric supply circuit, or attach

an additional electric supply circuit to an existing electric supply line, for the transmission, distribution, use and sale of electric current for lighting, power and heating purposes, which is located upon public highways or grounds outside the corporate limits of cities and towns in the state, without first procuring from the Iowa state commerce commission a certificate granting authority for this improvement.

2.4(2) Any individual, company or corporation authorized to transact business in the state, including cities and towns, may file a verified petition asking for authority to increase the operating voltage of an existing electric supply line, or to attach an additional electric supply circuit to an existing electric supply line, for the transmission, distribution, use and sale of electric current for lighting, power and heating purposes outside the corporate limits of cities and towns in the state.

The petition shall set forth the following:

a. The name of the individual, company, corporation, city or town asking for the certificate.

b. The principal office or place of business of the petitioner.

c. A general description of the public or private lands, highways and streams over, across or along which the existing electric supply line is located.

d. Two maps on which shall be shown the starting point, route and terminus of the proposed improvement. These maps shall show the same information as is required on maps with a petition for franchise, as is provided in this order.

e. General specifications as to the material used in the existing electric supply line and materials which will be used in constructing the proposed improvement and the manner of construction.

f. The maximum voltage carried over the existing electric supply circuit and the maximum voltage to be carried over the proposed improvement.

g. The name and address of the individual, company, corporation, city or town to whom the franchise was granted to construct, operate and maintain the existing electric supply line and the date when the franchise was issued.

2.5(489) Maps to be filed with petition. Maps accompanying a petition shall be drawn to a scale of one inch per mile, must be of a permanent nature and shall show the following:

1. The starting point, route and terminus of the proposed electric supply line.
2. Highways shall be indicated by a single solid line.
3. The side of a section which is not bounded by a highway shall be indicated by a single broken line.
4. The number of each section.
5. Township and range numbers shall be indicated on each side of the map.
6. The margin or side of the highway on which the proposed electric supply line will be located.
7. The voltage of the proposed electric supply line shall be designated, and in a petition for franchise where the proposed line will be constructed with more than one circuit, the voltage of each circuit shall be designated.
8. Fractional miles of proposed electric supply line shall be indicated by scale.
9. The boundary limits of villages and subdivisions of land as platted and the corporate limits of cities and towns shall be indicated on the maps.
10. The margin or side of the highway on which electric supply and communication lines are located that will be paralleled or crossed by the proposed electric supply line, and the location of all railroad rights of way, which will be crossed or paralleled in close proximity thereto, by the proposed electric supply line.
11. The number of (*a*) communication wires which will be crossed, paralleled by or in joint use with the proposed electric supply line, with the name and address of the owners of such communication lines; (*b*) electric supply lines, stating the operating voltage of each circuit, which will be crossed or paralleled by the proposed electric supply line, with the name and address of the owners of such electric supply lines; and (c) the name and address of the owners of railroad rights of way which will be crossed or paralleled in close proximity by the proposed electric supply line.

2.6(489) Notice to owners of land and others. Where a petition for a franchise to erect, operate and maintain an electric supply line for the transmission, distribution, use and sale of electric current, seeks to use lands other than highways (except where easements have been acquired) petitioner shall, in addition to statutory notice of hearing, give notice in writing of the time and place of such hearing to the owners of record and the parties in possession of the lands, by either registered or certified United States mail, addressed to their last known address, which notice shall be mailed no later than five days after the date of second publication of the official notice of hearing concerning the petition. Not less than five days prior to the date of hearing, the petitioner shall file with the Iowa state commerce commission, post-office receipt for either registered or certified articles bearing its registry or certificate number showing mailing of said notice as provided herein.

2.7(489) Notice of construction, major operating or circuit change of an electric supply line.

2.7(1) *Advance notice.* Each individual, company, corporation, city or town filing a petition with the Iowa state commerce commission for a franchise to construct, operate and maintain an electric supply line shall give notice in writing,

accompanied by a map showing the route of the proposed electric supply line to interested parties who will be involved in a crossing or parallel on the same highway or in close proximity thereto. One copy of each letter of notification or a written statement showing the name, address and date of letter shall accompany the petition when it is filed with the Iowa state commerce commission.

2.7(2) In a situation where an additional electric supply circuit is to be added, or the operating voltage is to be increased on an existing electric supply line, or major operating or circuit change is to be made on an existing electric supply line, a written notice and map shall be given to all interested parties at the time when the petition for authority to make such an improvement is filed with the Iowa state commerce commission.

2.7(3) *Advanced notice on deferred construction.* In a situation where a proposed electric supply line is not constructed within six months from the date of granting the franchise or the additional circuit is not attached or the voltage is not increased on an existing electric supply line within six months from the date of granting the certificate for such an improvement, then the party holding the franchise or certificate shall again notify in writing all interested parties not more than 60 days and not less than seven days before construction will start on the improvement.

2.8(489) Reporting accidents.

2.8(1) Any person, company, corporation, city or town operating electric supply lines which are located outside the corporate limits of cities and towns shall report in writing to the Iowa state commerce commission, all accidents to employees or other persons resulting in fatalities or second or third degree burns involving several areas or an extensive area of the body surface caused by contact with energized parts of an electric supply line, and fatal accidents or fractures, dislocations or internal injuries resulting from a fall or from other cause, and such written report shall indicate the following information:

a. The name, address and age of the person or persons involved in the accident.

b. The time and place where the accident occurred.

c. The cause of the accident in detail.

d. The name of the individual, company, corporation, city or town operating the electric supply line.

2.8(2) A written report of the accident shall be filed in the office of the Iowa state commerce commission within 48 hours of the time the accident occurred.

2.9(489) Joint use lines supporting electric supply and communication circuits. In situations where the Iowa state commerce commission has jurisdiction and it is mutually agreeable between both the electric supply and communication companies, communication circuits may be attached to electric supply lines, provided an agreement in writing signed by an authorized representative of the communication company has been filed with the electric supply company to the effect that the communication company will comply with the rules of the National Electrical Safety Code covering joint use construction applicable to the situation or situations covered in said written agreement.

2.10(489) Operation and co-ordinative methods applicable to electric supply systems.

2.10(1) *General.*

a. These general rules for operation, co-ordination and co-operation shall supplement the "Iowa Electrical Safety Code" as defined in 2.1(489) foregoing.

b. The means of avoiding or reducing inductive effects such as are outlined below shall be applied in each case insofar as is practicable for the sufficient reduction of inductive interference. In case the parties of interest shall, in any case, fail to agree upon the application of these means to a specific case the matter shall be referred to the Iowa state commerce commission.

2.10(2) *Location of lines.*

a. Location of electric supply lines.

(1) Electric supply lines and communication lines shall be located on opposite sides of the highway and separated as far as practicable within highway limits. When electric supply and communication lines are located on private rights of way the horizontal separation shall, if practicable, be of such distance that no structure conflict will be created. In the event it is not practicable to obtain such a separation when these lines are on private rights of way and the parties involved can reach an agreement with regard to the conflict or joint use of poles, no further action is necessary. In the event no agreement can be reached the matter shall be referred to the Iowa state commerce commission.

(2) Electric supply lines shall be constructed on one side of the highway so that the other side of the highway may be used by communication lines, except as otherwise approved by the Iowa state commerce commission.

(3) Crossings from side to side of a highway should be avoided as far as practicable.

b. Recommended location of communication lines.

(1) It is recommended that communication companies furnish pertinent data regarding new construction and major improvements of communication lines to companies operating electric supply lines involved in crossings, conflicts and inductive exposures.

(2) Communication lines should be constructed on one side of the highway so that the other side of the highway may be used by electric supply lines.

(3) Crossing from side to side of a highway should be avoided as far as practicable.

2.10(3) *Avoidance of parallels.* The route of a proposed electric supply line shall be selected, where reasonable and practicable, so as to avoid creating parallels with long distance communication lines, even though this will necessitate a reasonable increase in the initial construction cost of the electric supply line.

2.10(4) *Relocating a communication line.* When an electric supply line is to be constructed in a location occupied by a communication line, the expense of relocating the communication line shall be borne by the electric supply company. The electric supply company shall not be required to pay any part of the used life of the communication line, but shall pay only the net nonbetterment expense of relocating the communication line.

2.10(5) *Apportionment of expenses.* The expense to be paid by an electric supply company whose line is or will be involved in a crossing, conflict, parallel or inductive exposure with a communication line, in order to reduce a hazard or inductive interference (except for changes to be made in a ground return telephone circuit to mitigate inductive interference) shall be in accordance with the rules of the Iowa state commerce commission; but in case the parties involved cannot agree as to the expense which should be paid by the electric supply company then the same shall be referred to the Iowa state commerce commission for determination.

2.10(6) *Definitions.* For the purpose of these rules, the following terms are used with meanings as given in these definitions:

Inductive co-ordination. The location, design, construction, operation and maintenance of electric supply and communication systems in conformity with harmoniously adjusted methods which will prevent inductive interference.

Physical co-ordination. The location, design, construction, operation and maintenance of electric supply and communication systems in conformity with harmoniously adjusted methods which will prevent physical interference.

General co-ordinative methods. Those methods reasonably available for general application to electric supply or communication systems which contribute to physical and inductive co-ordination without specific consideration to the requirements for individual exposures.

Specific co-ordinative methods. Those additional methods applicable to specific situations where general co-ordinative methods are inadequate.

Inductive exposure. A situation involving electric supply and communication circuits where the conditions are such that inductive co-ordination must be considered.

Inductive interference. An effect due to the inductive influence of an electric supply system, the inductive susceptiveness of communication system and the inductive coupling between the two systems, of such character and magnitude as to prevent the communication system from rendering satisfactory and economical service.

Inductive influence. Those characteristics of an electric supply circuit with its associated apparatus that determine the character and intensity of the inductive field which it produces.

Inductive susceptiveness. Those characteristics of a communication circuit with its associated apparatus that determine the extent to which its operation may be affected by inductive influence.

Coupling. The interrelation of electrical circuits by electric or magnetic induction or both, or by conduction through a common earth path, or by combinations thereof.

Physical exposure. A situation involving electric supply and communication facilities where the conditions are such that physical co-ordination must be considered.

Physical interference. A condition arising from the physical relationship of electric supply and communication facilities which by reason of the possibility of contacts or conduction between the respective facilities, or by reason of their proximity, prevents the safe and economical operation of either system.

Conflicts or conflicting construction. Situations where two separate pole lines parallel each other in close proximity under conditions defined more specifically in the National Electrical Safety Code.

Discontinuity. A point at which there is an abrupt change in the physical relations of electric supply and communication circuits or in electrical constants of either circuit.

Transpositions are not rated as discontinuities, although technically included in the definition, because of their application to co-ordination.

Transposition. A transposition is an interchange of the position of conductors of a circuit between successive lengths.

Metallic communication circuit. A metallic communication circuit is a circuit in which the current flows in adjacent metallic conductors and ground connections are not used except through relatively high impedances for protection or signaling.

Ground-return circuit. A ground-return circuit is a circuit which has a metallic conductor between two points and the circuit is completed through the ground or earth.

Parallel. Parallel means a situation where an electric supply line and a communication line follow substantially the same route and create an inductive exposure, but the horizontal separation between these lines is of sufficient distance so that no conflict is created.

Interested parties. Interested party means any individual, company, corporation, city, town or railroad company operating electric supply lines, communication lines or line of railroad tracks which will be involved in a crossing, parallel, in-

ductive exposure or conflicting situation on the same highway or in close proximity thereto or upon private rights of way on account of the construction of a proposed electric supply line or a major change in construction or operating features of an existing electric supply line.

GENERAL CO-ORDINATIVE METHODS

2.10(7) *Residual currents and voltages.* Residual currents returning in the earth or by remote metallic paths and residual voltages shall be limited as far as practicable.

Unsymmetrical loads, which give rise to such residual currents and voltages, shall be avoided as far as practicable.

2.10(8) *Discontinuities.* Discontinuities shall be limited to the number required by the conditions.

2.10(9) *Insulation.* The insulation of electric supply lines and equipment shall be in accordance with good modern practices.

2.10(10) *Operating and switching.* In all switching operations, care shall be taken to limit the production of transient disturbances.

Care shall be taken to avoid re-energizing a faulted circuit at normal voltage an excessive number of times even if done in order to locate or clear the fault. This does not preclude reclosing a circuit breaker several times immediately following a circuit breaker operation.

2.10(11) *Connections.* Care should be taken to avoid contact resistance which might increase the inductive influence.

2.10(12) *Lines.*

a. In order to limit the residual currents and voltages arising from line unbalances, the resistance, inductance, capacitance and leakage conductance of each phase conductor of a circuit in any section shall be as nearly equal as practicable to the corresponding quantities in the other phase conductors in the same section.

Induction motors and generators shall be selected so that their harmonic voltages and currents, as far as practicable, will not increase the inductive influence of the system to which they are connected. Care should be taken in the selection and use of rotating machinery to obtain, as far as necessary and practicable, electrical balance.

b. Rectifiers, arc furnaces and other apparatus. Rectifiers, arc furnaces and other apparatus which distort the voltage or current wave form of an electric supply circuit involved in an inductive exposure shall be equipped when and as necessary and practicable with suitable auxiliary apparatus to mitigate such distortion.

c. Capacitors. When capacitors are connected to an electric supply circuit or circuits, consideration shall be given to their location and effect on power system influence in an inductive exposure.

d. Transformers. In order that the wave form of voltage and current may be affected as little as practicable by transformers, such apparatus shall be so designed as not to require operation at excessive magnetic densities. In the installation, connection and operation of transformers, care shall be taken to avoid the use of normal voltages in excess of rating that would result in excessive magnetizing currents.

Where a three-phase electric supply circuit is connected to the wye-connected windings of transformers with grounded neutral, or to wye-connected auto-transformer with grounded neutral consideration shall be given to the use of stabilizing windings (tertiary) or other suitable means for adequately limiting the triple harmonic components of residual currents and voltages.

Care shall be taken that the individual units in each bank of transformers, operated with a grounded neutral and connected to a three-phase supply circuit are substantially alike as to electrical characteristics and that they are similarly connected.

e. Circuit breakers. Each circuit breaker controlling the supply of electric energy to transmission circuits shall have all of its poles arranged for gang operation, except when arranged for rapid opening and reclosing of a single phase to clear a phase to ground fault.

These circuit breakers shall be automatic for short-circuits between phases and, in the case of systems operating with a grounded neutral, from phase to ground. They shall be of a type which will disconnect the faulty circuit in as short a time as practicable.

f. Protective apparatus. Protective apparatus shall be such that it will not unnecessarily add to transient disturbances and shall, as far as practicable, avoid or limit such transient disturbances.

g. Ground connection (except those employed as return in connection with electric traction systems). Ground connections if employed on apparatus connected to electric supply circuits shall be made at balanced or neutral points. This precludes the use of ground return electric supply circuits.

SPECIFIC CO-ORDINATIVE METHODS

The specific practices which follow are to be used, insofar as may be necessary and practicable, in situations requiring inductive or physical co-ordination, in addition to the general practices.

It is not intended that all of these practices should be applied in any specific case. In each instance that practice or those practices shall be selected, which in combination with the methods that are to be applied to the communication facilities, will afford the best engineering solution.

The conductivity of a multigrounded neutral conductor of an electric supply circuit shall be adequate for the load which it is required to carry. The conductivity of a multigrounded neutral con-

ductor of a single-phase electric supply circuit shall not be less than 60 per cent of that of the phase conductor with which it is associated. In no case shall the resistance of such neutral conductor exceed three and six-tenths ohms per mile. (This does not modify the mechanical strength requirements for conductors as provided in the National Electrical Safety Code.)

In an inductive exposure involving communication or signal circuits and equipment where the controlling frequencies are 360 cycles or lower, the neutral conductor shall have the same conductivity as the phase conductor with which it is associated.

Some of the methods and means for limiting unbalance in lines are described below:

a. Configuration. Where there is a choice between two or more configurations of a circuit or a group of circuits, that configuration shall, where practicable, be chosen which will provide the superior balance.

b. Phase arrangement. Certain phase arrangements of multiple circuit lines that are especially effective in reducing the inductive influence shall, where practicable, be employed.

c. Transpositions. The capacitances and inductances of the phase conductors of a circuit shall be suitably balanced by transpositions, as far as necessary and practicable.

d. Branch circuits. Where branch circuits employing less than the total number of phases are to be used, they shall, where practicable, be so planned as not to give rise to excessive residual current returning in the earth or by remote metallic paths, or to excessive residual voltages. Distributing the branch circuits among the phases of the main circuit so as to obtain as nearly as practicable equality of their lengths and loads throughout the main circuit will aid in accomplishing this result.

2.10(13) *Three-phase, four-wire circuits with multigrounded neutral.* On three-phase, four-wire circuits with multigrounded neutral, single-phase and open-wye loads shall be limited in size and distributed among the phases to limit, as far as necessary and practicable, the unbalanced load current.

2.10(14) *Overhead ground wire.* Where overhead ground wires are to be installed on electric supply lines, consideration shall be given to the utilization of such kind and size of wire as will aid in providing the most satisfactory co-ordination. Frequently those characteristics which are beneficial from a co-ordination standpoint, during abnormal conditions on the electric supply line have adverse effects during normal operating periods. Therefore, the relative importance of both normal and abnormal effects must be considered in each installation.

2.10(15) *Apparatus—rotating machinery.* Synchronous machines shall be specified and selected so as to have a wave form in which the harmonic components are limited as far as practicable.

Where three-phase generators having grounded neutrals are to be connected either directly or through wye-wye connected transformer banks to three-phase electric supply circuits, means shall be used to suppress triple harmonics as far as necessary and practicable.

2.10(16) *Lines.*

a. Configuration. Where physical and economic conditions permit a choice of configuration of electric supply circuits within inductive exposures the configuration selected shall be such as to most effectively limit the inductive influence.

b. Co-ordinated transpositions. Where co-ordinated transpositions are necessary to reduce inductive influence electric supply circuits shall be transposed within the inductive exposure. Such transpositions shall be located and installed so as to obtain the best practical co-ordination, due consideration being given to existing transpositions throughout the electrical supply and communication circuits.

2.10(17) *Apparatus.*

a. Wave shape. Special means and devices for reducing the amplitude of harmonic voltages and currents on electric supply systems involved in inductive exposures shall be used where necessary and practicable.

b. Circuit breakers. Electric supply circuits involved in physical or inductive exposures shall be equipped with automatic circuit breakers or their equivalent.

c. Fuses. In the higher voltage distribution systems, consideration should be given to the use of fuses where branch lines leave the main line.

2.10(18) *Current limiting devices.* Consideration shall be given to the use of current limiting devices in either the line wires or the neutral-to-ground connection of electric supply circuits.

2.10(19) *Shielding.* Consideration shall be given to the installation of shield wires in inductive exposures. In order to obtain the full benefit of such shield wires, they must be effectively grounded at both ends of the exposures and at frequent intervals within the exposures.

2.10(20) *Branch circuits.* Consideration should be given to the isolation of branch circuits consisting of less than the total number of phases of the main circuit by means of transformers, when such main or branch circuits are involved in inductive exposures.

2.11(489) Notice of transfer or assignment of franchise. The holder of a franchise shall notify the Iowa state commerce commission in writing, when transferring any franchise or portion of a franchise, stating the applicable franchise number and docket number which are affected and a description of the route of the transmission

line when less than the total franchised line is affected, together with the name of the transferee and date of transfer within 30 days of the effective date of transfer.
[Filed prior to July 4, 1951; amended September 24, 1965, December 14, 1965]

MOTOR TRANSPORTATION DIVISION

CHAPTER 3
TRUCK OPERATORS
AND CONTRACT CARRIERS

3.1(327) General information.

3.1(1) These rules are subject to such changes, modifications and amendments as the commission may from time to time promulgate and adopt under the provisions of chapter 17A of the Code.

3.1(2) *Waiver of suspension of rules.* The adoption of these rules shall in no way preclude the commission from altering or amending them, pursuant to statute. These rules shall in no way relieve any carrier from any of its duties under the laws of this state. The commission may at its discretion on its own motion or upon request for good cause shown, suspend or waive any of the rules.

3.1(3) *Person defined.* The word "person" when used in the rules of the commission will be construed by the commission as including any individual, firm, copartnership, joint adventure, association, corporation, estate, trust, business trust, receiver or any other group or combination acting as a unit and the plural as well as the singular number.

3.1(4) *Extension of authority and commodities.* A like commodity shall not be transported under a truck operator permit and a contract carrier permit which is held by the same person.

a. A motor carrier as defined in chapter 325 of the Code, who also holds a truck operator permit, shall not use said permit as a means to extend his motor carrier authority, nor shall he operate his truck operator permit to or from any point held under his motor carrier authority.

b. A holder of a truck operator permit or contract carrier permit shall not use said permits to offer motor carrier service as defined in chapter 325 of the Code, provided that nothing contained in this rule shall prevent a truck operator from providing drayage service on behalf of a motor carrier within the confines of the city or town which said motor carrier is authorized to serve.

c. Under contract carrier authority granted by this commission, a contract carrier shall not engage in the business of transporting general commodities and shall be restricted to the transportation of property by motor truck under individual written contracts which provide special and individual services required by the needs of a particular shipper as prescribed by section 327.1(5).

3.2(327) Applications and filings.

3.2(1) Application for a permit to operate as a truck operator or contract carrier shall be made to the Iowa State Commerce Commission, Des Moines, Iowa, on forms prescribed for that purpose and furnished upon request.

3.2(2) An application for a truck operator permit must be accompanied by:

a. Liability, property damage and cargo insurance policy or policies, certificate of insurance or surety bond in accordance with section 327.15.

b. Two copies of tariff or power of attorney.

c. The annual permit fee as provided in 3.2(5).

3.2(3) Application for a contract carrier permit must be accompanied by:

a. Liability and property damage insurance policy or policies, certificate of insurance or surety bond in accordance with section 327.15. There shall be no requirement for cargo insurance.

b. A copy of each transportation contract which the applicant has entered into except that no copies of contract need to be filed by farm-to-market milk and cream haulers. A contract shall be defined as set out in section 327.1(5). This paragraph shall not be applicable to applications made under the provisions of section 327.23.

c. Annual permit fee as provided in 3.2(5).

d. An affidavit by the applicant showing dedication of equipment to the shipper.

e. An affidavit by the shipper showing the peculiar needs of a shipper requiring contract carrier service.

3.2(4) *Filing of contracts other than with application.* Whenever a contract carrier enters into a new transportation contract after having been issued a permit, said carrier shall file a copy of said new contract and affidavits of dedication and peculiar needs as referred to in 3.2(3) "*d*" and 3.2(3) "*e*" with the commission before transporting any property for the shipper. Every contract carrier operating under a permit issued by the commission shall file with the commission a copy of each transportation contract under which said contract carrier is operating. (This rule does not apply to contract carriers operating under the provisions of section 327.23, nor to farm-to-market milk and cream haulers.)

3.2(5) *Annual permit fee.* Application for a permit shall be accompanied by a remittance in the amount sufficient to pay the annual permit fee for each motor truck described on the form attached to the application. The remittance will cover the permit fee for each motor truck described from the date the permit is issued until the thirty-first day of December of the year in which the permit is issued. The annual permit fee shall be remitted to the commission in the form of a certified check, bank draft, cashier's check, express money order

or postal money order, payable to the Iowa state commerce commission. The annual permit fee of five dollars for each motor truck and six dollars for each semitrailer for each year after the year in which the permit is issued, shall be due and payable on or before the first day of January of each succeeding year.

3.2(6) *Equipment changes or additions.* Before placing any additional motor trucks in service, the holder of the permit shall furnish the commission a description of such motor trucks together with the information as to time placed in service, make of equipment, factory number and year built. The holder of the permit shall furnish the commission information as to whether or not a fee has been paid on said motor truck by another permit holder under this chapter, together with information as to the time the equipment is to be placed in service under present operator's permit. The holder of the permit shall pay the commission an annual fee on such motor truck provided a fee has not been paid for the current year under this chapter.

3.2(7) *Fee receipt.* The holder of a permit shall be furnished a receipt for each permit fee paid. The receipt or proof that fee has been paid shall be carried with the described motor truck at all times.

3.2(8) *Holders of interstate permits.* Application for a permit governing strictly interstate operation shall be made on the forms prescribed. Chapter 327 of the Code, together with the rules thereunder adopted by the commission insofar as may be applicable, govern holders of permits affording service of a strictly interstate character.

Holders of permits of a strictly interstate character need not file with the commission evidence of cargo insurance required by 3.2(2) "*a*" and 3.2(4). Rule 3.2(5) shall not be applicable to truck operators or contract carriers operating interstate exclusively as to trucks licensed and domiciled in states reciprocal with Iowa on a comparable fee.

3.2(9) *Transfer of permit.* A truck operator permit or a contract carrier permit may be transferred if the transferee does not hold a like permit. Application for the commission's approval of proposed sale and transfer of a permit must be filed with the commission on forms prescribed and furnished by the commission, signed and sworn to by all parties. Insurance prescribed by law must be filed by transferee. (See section 327.15 of the Code.) Permit fee for new equipment to be operated by transferee must accompany application. If fee for current year has been paid on equipment, an additional fee is not required. The commission will not approve a transfer of the operator's permit until transferee has complied with 3.4(1) and 3.8(1). [Rule 3.8(1) does not apply to contract carriers.]

3.3(327) Marking of equipment.

3.3(1) *Manner of marking equipment.* Before placing any equipment in service there shall be painted on each side of the equipment and on the headboards, if appropriate, or on some suitable material securely placed on each side of such equipment, in letters and figures large enough to be easily read at a distance of 50 feet and in a color in contrast to the background the following:

a. Name of truck operator or contract carrier under whose authority equipment is being operated.

b. Address of truck operator or contract carrier.

c. Ia. C.C. P .....
(Permit Number)

All freight carrying motor vehicles operating exclusively under interstate authority shall not be required to display item "*b*" above.

3.3(2) *Registration decal or sticker.* The operator of any truck or tractor of any carrier performing an interstate transportation service for compensation within the contemplation of the provisions of chapter 327B of the Code, shall have in his possession, or affixed to said truck or tractor, the decal or sticker issued by this commission bearing the registration number of the carrier.

3.4(327) Insurance.

3.4(1) *Insurance requirements.* Each truck operator and contract carrier shall at all times maintain on file with the commission effective insurance policy, policies or surety bond made out in accordance with these rules, with limits required by chapter 327 of the Code, with respect to the motor trucks used in furnishing truck operator service or contract carrier service under a permit of the assured. Such policy, policies or surety bond shall be written for a period of one year or more. A certificate of insurance in a form prescribed by the commission may be filed in lieu of a policy.

3.4(2) *Endorsement for policy.* Every policy filed or for which a certificate of insurance is filed with the commission shall have attached thereto the prescribed and applicable required endorsement or endorsements.

3.4(3) *Certificates of insurance.* Certificates of insurance filed with the commission for truck operator and contract carriers in lieu of insurance policies written for limits as prescribed by chapter 327 of the Code shall be in accordance with forms prescribed by the commission.

3.4(4) *Insurance binders.* Binders filed to comply with the insurance requirements of section 327.15 and these rules pending the issuance and filing of an insurance policy or a certificate of insurance must be made out in accordance with the form prescribed by the commission.

3.4(5) *Cancellation and reinstatements.* Thirty days prior written notice shall be given the commission on the cancellation of any policy, cer-

tificate of insurance or surety bond filed with the commission for a truck operator or contract carrier. Notices of cancellation and reinstatement shall show the correct name and address of the assured as then shown in the policy, the correct name of the insurance company and correct number of the policy. Specific coverage under a policy may be canceled when the notice of cancellation includes that information.

3.4(6) *Assignment of interest endorsement for policy.* Assignment of interest endorsement filed for policies on file with the commission or for policies for which certificates of insurance have been filed with the commission shall be in accordance with the form prescribed by the commission.

3.4(7) *Surety bond.* In case a truck operator or contract carrier desires to file a surety bond to comply with the requirements of section 327.15 the commission will, upon request, provide the form of such bond.

3.4(8) *Policies, certificates and bonds remain on file.* Insurance policies, certificates of insurance and surety bonds filed with the commission by truck operators and contract carriers shall remain on file in the office of the commission and must not be removed therefrom except with the express permission of the commission.

3.5(327) Freight receipts.

3.5(1) Every truck operator shall issue a receipt in triplicate on date freight is received for shipment and the receipt shall show the following:

a. Name of truck operator.

b. Date and place received.

c. Name of consignor.

d. Name of consignee.

e. Destination.

f. Description of shipment.

g. Signature of truck operator or agent issuing the receipt.

h. That the charges for transportation of the articles listed on the receipt are subject to the tariff and classifications in effect and on file with the Iowa state commerce commission on the date transportation of the shipment begins.

i. Freight described in apparent good order unless an exception is noted.

3.5(2) Receipts shall be numbered consecutively; there shall be one copy for the consignor, one for the consignee and one to be kept by the truck operator. Operator's copy shall be carried with the cargo and shall show total of all charges made for the movement of freight and shall be kept by the operator for a period of not less than one year, subject to inspection by commission representatives at any reasonable time. Freight receipts for agricultural products being transported from farm-to-market need not be completed until the end of the business day.

3.6(327) Lease of equipment.

3.6(1) *Lease defined.* Lease, for the purpose of these rules means a written document providing for the exclusive possession, control and responsibility over the operation of the vehicle or vehicles in the lessee for a specific period of time as if such lessee were the owner. A copy of the lease must be carried in the leased equipment at all times.

3.6(2) *Number.* No truck operator or contract carrier may have more than one lease covering a specific piece of equipment in effect at a given time.

3.6(3) *Lease of vehicles to shippers or receivers.* No truck operator or contract carrier shall lease vehicles with or without drivers to shippers or receivers.

3.6(4) *Identification of equipment.* Each lessee shall properly identify each piece of equipment during the period of the lease as specified in 3.3(327).

3.6(5) *Conditions.* Any lease of equipment by any truck operator or contract carrier except under the following conditions is prohibited:

a. Every such lease must be in writing and signed by the parties thereto or their regular employees or agents duly authorized to act for them.

b. Every lease shall specify the time the lease begins and the time or circumstances on which it ends.

c. Every lease shall set out the specific consideration or method of determining compensation.

d. Every lease shall provide for the exclusive possession, control and use of the equipment and for the complete assumption of responsibility in respect thereto by the lessee for the duration of said lease.

3.7(327) Complaints.

3.7(1) *Complaint on rates.* All complaints filed with the commission against truck operators, alleging violation of effective tariffs shall contain the following information in addition to that required by 1.3(474):

a. The name, address and permit number of the truck operator against whom complaint is made.

b. Complete information as to commodity transported, names of shippers and receivers of the freight and definite information as to the rates and charges assessed.

c. An allegation setting out complainant's grounds for complaint.

d. Such other information as may be pertinent to the subject matter of the complaint.

e. All complaints must be signed by complainant.

3.7(2) *Complaint on tariffs.* A complaint against a truck operator charging that the rates, charges, classifications and rules and regulations pertaining thereto contained in the effective tariff

of such operator are unjust, unreasonable or discriminating must be filed in accordance with the commission's rules of practice and when so filed, said complaint shall be set down for hearing and hearing held thereon as provided by the said rules of practice, provided that in addition to the persons who may file complaints under the provisions of the rules of practice, the superintendent of motor transportation division or chief of the rate division may file a complaint against a truck operator under this rule. On such hearing the commission shall fix or approve the rates, charges, classifications and rules and regulations pertaining thereto, of the truck operator complained against. [See chapter 1.]

3.8(327) Tariffs.

3.8(1) *Form and contents.* All truck operators shall maintain on file with the commission a tariff stating the rates and charges to be made for the services performed under their permits; also a classification, if class rates are to be assessed, stating the ratings which are to be applied in connection with the rates named in said tariff. Provided, however, that rates and charges to be applied to movements of household goods transported in closed body, van-type equipment shall be according to the Iowa state commerce commission's household goods tariff No. 13 and supplements thereto and reissues thereof. All tariffs and classifications must conform to the following rules except as otherwise authorized by the commission.

3.8(2) All tariffs and amendments or supplements thereto must be in book, pamphlet or loose-leaf form of size 8 x 11 inches. They must be plainly printed, mimeographed, planographed, stereotyped or reproduced by other similar durable process on good quality paper. No alteration in writing or erasure shall be made in any tariff or supplement thereto. A margin of not less than five-eighths inch, without any printing thereon must be allowed at the binding edge of each tariff and supplement.

3.8(3) All tariffs and supplements must be filed in the office of the commission and posted in a conspicuous place at the operator's principal place of business at least 30 days prior to the effective date thereof, unless otherwise authorized by the commission, except that tariffs, supplements or adoption notices issued in connection with applications for truck operator permits, or the transfer of permits from one truck operator to another may become effective on a date not earlier than the date on which permits are issued or transferred.

3.8(4) Issuing truck operators or their agents shall transmit to the commission two copies of each tariff, supplement or revised page. Both copies shall be included in one package accompanied by a letter of transmittal listing all tariffs enclosed and addressed to the Iowa State Commerce Commission, Rate Division, Des Moines, Iowa. All postage or express must be prepaid.

3.8(5) The title page of every tariff and supplement shall show in the order named:

a. Each tariff shall be numbered in upper right-hand corner, beginning with number 1. Such number shall be shown as follows: Ia. C.C. No. . .

When tariffs are issued canceling a tariff or tariffs previously filed, the Ia. C.C. number or numbers that have been canceled must be shown in the upper right-hand corner under Ia. C.C. number of the new tariff.

b. Supplements to a tariff in addition to showing the Ia. C.C. number of the tariff amended thereby shall be numbered beginning with number 1 and such information shall be shown in the upper right-hand corner. Supplements shall also show in the upper right-hand corner the number of any previous supplements canceled thereby and also the numbers of the supplements containing all changes made in the tariff.

c. The name of each truck operator must be the same as that appearing in its permit. If the truck operator is not a corporation and a trade name is used, the name of the individual or partners must precede the trade name.

d. A brief description of the territory in which, or points from and to which the tariff applies.

e. Date of issue and date effective.

f. Name, title and street address of truck operator or agent by whom tariff is issued.

3.8(6) Each tariff shall contain in the order named:

a. Table of contents, arranged alphabetically showing the number of the page on which each subject may be found. If a tariff contains so small a volume of matter that its title page or interior arrangements plainly indicates its contents, the table of contents may be omitted.

b. A complete index of all commodities on which specific rates are named therein, together with reference to the page or items in which they are shown. No index need be shown in tariffs of less than five pages or if the rates are alphabetically arranged by commodities.

c. Explanation of all abbreviations, symbols and reference marks used in the tariff.

d. When a tariff names rates by classes, a classification of articles must be published in the tariff or in a separate tariff. When a classification is published in a separate tariff, reference must be made thereto on the title page of the rate tariff as follows:

"Governed, except as otherwise provided herein, by the (here name) classification (showing issuing agent) Ia. C.C. No. . . . . .
. . . . supplements to or successive issues thereof."

All truck operators shown as participating carriers in a rate tariff which is governed by a separate

classification must be named as participating carrier in such separate classification.

e. Table of rates. All rates must be explicitly stated in cents or in dollars and cents, per 100 pounds, per mile, per hour, per ton of 2,000 pounds, per truck load (of stated amount) or other definable measure. Where rates are stated in amounts per package or bundle, definite specifications of the packages or bundles must be shown and ambiguous terms, rates, descriptions or plans for determining charges will not be accepted.

Tariffs containing tables of rates based on distances from point of origin to destination must show the mileages or indicate a definite method by which such mileages should be determined.

3.8(7) Truck operators or their agents may not publish class or commodity rates which duplicate or conflict with rates published by or for account of such truck operator.

3.8(8) Truck operators or their tariff publishing agents may not publish rates on household goods transported in closed body, van-type equipment for distances of 30 miles and over. Such rates are published in the commission's household goods tariff No. 13 or successive issues thereof. Rates on household goods transported in open-type equipment for all distances, and in closed body, van-type equipment for distances under 30 miles, must be published in tariffs of the individual truck operators or in tariffs of their authorized agent.

3.8(9) *Commodity rates.* Commodity rates on articles in stated truck load or in less-than-truck load quantities may be published, and where they differ from a published class rate basis, the lower rate shall take preference.

3.8(10) *Tariff changes.* All rates, charges and classifications which have been filed with the commission must be allowed to become effective and remain in effect for a period of at least 30 days before being changed, canceled or withdrawn, unless otherwise authorized by the commission.

All tariffs, supplements and revised pages (including classifications) shall indicate changes from preceding issue by use of the following symbols:

↓ or (R) to denote reductions
◆ or (A) to denote increases
▲ or (C) to denote changes, the result of which is neither an increase nor a reduction.
The proper symbol must be shown directly in connection with each change.

3.8(11) *Posting regulations.* Each truck operator must post and file at its principal place of business all of its tariffs and must also carry copies of such tariffs in every truck operated. All tariffs must be kept available for public inspection or examination at all reasonable times. It is not necessary that household goods tariff No. 13 or successive issues be carried in trucks.

3.8(12) *Application for special permission.* Truck operators and agents when making application for permission to establish rates, charges, classification rating or rule or less than statutory 30 days' notice shall use the form prescribed by the commission.

3.8(13) *Powers of attorney and participation notices.*

a. Whenever a truck operator desires to give authority to an attorney and agent to issue and file tariffs and supplements thereto in its stead, a power of attorney in the form prescribed by the commission must be used.

b. Whenever a truck operator desires to participate in tariffs issued and filed by another truck operator or its agent, a power of attorney using the form prescribed by the commission shall be issued in favor of such other truck operators. This subrule shall apply only to single line operations.

c. The original of all powers of attorney shall be filed with the commission and a duplicate of the original sent to the agent or truck operator in whose favor such document is issued.

d. Whenever a truck operator desires to cancel the authority granted an agent or another truck operator by power of attorney, this may be done by a letter addressed to the commission revoking such authority on 60 days' notice. Except for good cause shown, the commission will authorize a lesser notice. Copies of such notice must also be mailed to all interested parties.

MOTOR TRANSPORTATION DIVISION

CHAPTER 4
MOTOR CARRIERS AND CHARTER CARRIERS

4.1(325) General information.

4.1(1) *General.* These rules are subject to such changes, modifications and amendments as the commission may from time to time promulgate and adopt under the provisions of chapter 17A of the Code.

4.1(2) *Waiver or suspension of rules.* The adoption of these rules shall in no way preclude the commission from altering or amending them, pursuant to statute. These rules shall in no way relieve any carriers from any of its duties under the laws of this state. The commission may in its discretion on its own motion or upon request for good cause shown, suspend or waive any of the rules.

4.1(3) *Person defined.* The word "person" when used in the rules of the commission will be construed by the commission as including any individual, firm, copartnership, joint adventure, association, corporation, estate, trust, business

trust, receiver or any other group or combination acting as a unit and the plural as well as the singular number.

4.1(4) *Extension of authority.* A regular route motor carrier shall not render service by means of a truck operator permit between points which are now being actively served by another certificated carrier.

4.1(5) *C.O.D. remittance.* Upon collection of a C.O.D. bill, the carrier collecting same shall make prompt remittance. Remittance must be made to the consignor or party entitled to receive the amount as shown on the bill of lading within ten days after delivery of shipment to the consignee.

4.1(6) *Receipts for freight and baggage.* Every motor carrier shall issue in triplicate a receipt for freight received for shipment, which receipt shall contain the following:

a. Name of motor carrier.
b. Date and place received.
c. Name of consignor.
d. Name of consignee.
e. Destination.
f. Description of shipment.
g. Weight.
h. Rate and charges.
i. Signature of motor carrier or agent.

One copy of such receipt shall be furnished to the consignor, one to the consignee and one retained by the motor carrier. Passenger motor carrier shall issue to passengers a check for baggage tendered to their care.

4.1(7) *Passengers and freight.* No passenger motor carrier, charter carrier shall transport express, other than newspapers, nor shall any freight motor carrier transport passengers, unless specifically authorized by the commission to do so. Express transported on passenger carrying motor vehicles shall be of such character and not greater in amount than can be safely and conveniently transported without causing discomfort or hazard to passengers.

4.1(8) *Redemption of passenger tickets.* Passenger motor carriers shall provide for the redemption of unused passenger tickets at the place of purchase and at the carrier's main office in accordance with the provisions of sections 479.99 and 479.100.

4.2(325) Insurance.

4.2(1) *Insurance requirements.* Each motor carrier and charter carrier shall at all times maintain on file with the commission effective insurance policy, policies or surety bond required by the provisions of chapter 325 of the Code. Such policy, policies or surety bond shall be written for a period of one year or more. A certificate of insurance may be filed in lieu of a policy. Motor carriers and charter carriers operating exclusively in interstate commerce need not file with the commission cargo insurance prescribed by section 325.26.

4.2(2) *Endorsement of policy.* Every policy filed or for which a certificate of insurance is filed with the commission shall have attached thereto the prescribed and applicable required endorsement or endorsements.

4.2(3) *Certificates of insurance.* Certificates of insurance filed with the commission for motor carriers or charter carriers in lieu of insurance policies written for the limits as prescribed by chapter 325 of the Code, shall be in accordance with the forms prescribed by the commission.

4.2(4) *Insurance binders.* Binders filed to comply with the requirements of section 325.26 and these rules pending the issuance and filing of an insurance policy, or a certificate of insurance must be made out in accordance with the form prescribed by the commission.

4.2(5) *Cancellation and reinstatements.* Thirty days prior written notice shall be given the commission on the cancellation of any policy, certificate of insurance or surety bond filed with the commission for a motor carrier or charter carrier. Notices of cancellation and reinstatement shall show the correct name and address of the assured as then shown in the policy, the correct name of the insurance company and the correct number of the policy. Specific coverage under a policy may be canceled when the notice of cancellation includes that information.

4.2(6) *Assignment of interest endorsement for policy.* Assignment of interest endorsements filed for policies on file with the commission or for policies for which certificates of insurance have been filed with the commission, shall be in accordance with the form prescribed by the commission.

4.2(7) *Surety bond.* In case a motor carrier or charter carrier desires to file a surety bond to comply with the requirements of section 325.26, the commission upon request will prescribe the form of such bond.

4.2(8) *Policies, certificates and bonds to remain on file.* Insurance policies, certificates of insurance and surety bonds filed with the commission by motor carriers or charter carriers shall remain on file in the office of the commission and must not be removed therefrom except with the express permission of the commission.

4.2(9) *Suspension.* Where regular route motor carriers fail to have effective insurance on file with the commission or fail to pay the regulatory certificate fee, the commission may suspend the authority of such carriers. The suspension shall remain in force and effect until the operator meets the requirements of section 325.26 (insurance) or section 325.35 (fees), or both. The carrier affected

by the suspension order may, upon request, have a hearing before the commission.

4.3(325) Self-insurance passenger carriers.

4.3(1) *Applications for self-insurance.* A motor carrier of passengers requesting self-insurance shall: Make application in writing, file a balance sheet for the calendar year immediately preceding the current year up to and including the full quarter preceding the application. The applicant shall furnish any information the commission may deem necessary with the application or at any time during the period of self-insurance.

4.3(2) *Filing of balance sheets.* Upon authorization by the commission, a self-insurer shall file with the commission balance sheets within 30 days after the close of each quarter, during the period of self-insurance.

4.3(3) *Surety bond.* The applicant shall file with the commission a surety bond in the penal sum of $1,000.

4.3(4) *Authorization.* After receipt and consideration of the items and information required by 4.3(1), 4.3(2) and 4.3(3), the commission may authorize a common carrier of passengers to self-insure.

4.3(5) *Cancellation of self-insurance.* The commission shall have the right to cancel self-insurance at any time it may deem necessary.

4.4(325) Marking of equipment.

4.4(1) *Manner of marking equipment.* Before placing any equipment in service there shall be painted on each side of the equipment and on the headboards, if appropriate, or on some suitable material securely placed on each side of such equipment, in letters and figures large enough to be easily read at a distance of 50 feet and in a color in contrast to the background the following:

a. Markings for all passenger carrying motor vehicles.

(1) Name of motor carrier or charter passenger carrier under whose authority equipment is being operated.

(2) Ia. C.C. Cert. ..... (Number of Certificate)

or

Ia. C.C. Cert. C.C. ..... (Number of Certificate)

b. Markings for all freight carrying motor vehicles operating exclusively under interstate authority:

(1) Name of motor carrier under whose authority equipment is being operated.

(2) Ia. C.C. Cert. ..... (Number of Certificate)

c. Markings for all freight carrying motor vehicles operating under intrastate authority or operating under interstate and intrastate authority:

(1) Name of motor carrier under whose authority equipment is being operated.

(2) Address of motor carrier.

(3) Ia. C.C. Cert. ..... (Number of Certificate)

4.4(2) Reserved for future use.

4.5(325) Motor carrier application.

4.5(1) *Application for a certificate.* Application for a certificate of convenience and necessity to operate as a motor carrier shall be made to the Iowa State Commerce Commission, State Capitol, Des Moines, Iowa, upon the forms prescribed for that purpose provided by the commission. All such applications shall be typewritten.

4.5(2) *Deposit.* Application for a certificate of convenience and necessity must be accompanied by deposit sufficient to secure the payment of all costs and expenses of hearing and any preliminary investigation necessary in connection therewith. Such deposits shall not be less than $200, the commission reserving the right to require such additional deposit as it may deem necessary. Deposit shall be made by certified check, bank draft, express money order or postal money order, payable to the Iowa state commerce commission. Any unused balance of a deposit will be refunded to the applicant.

4.5(3) *Notice of hearing.* The applicant will be notified as to the time and place for hearing as soon as named by the commission, and furnished with copies of the official notice of hearing, which the applicant shall cause to be published on the same day of the week two consecutive weeks in some newspaper of general circulation published in each county through or in which the proposed service will be rendered. The last publication of said notice must be made not less than ten days prior to the date of hearing. Proof of publication from each newspaper in which the notice was published must be filed with the commission five days prior to the date of hearing. Failure to file such proofs shall be grounds for cancellation of the hearing. The applicant shall pay the cost of such publication and shall file receipt from each newspaper showing the cost of publication has been paid. Prior to publication, the applicant shall examine said notice and notify the commission of applicant's approval of the form and content of the notice or submit a revised notice to the commission.

4.6(325) Placing motor vehicles in service.

4.6(1) *Annual certificate fee.* The annual certificate fee of five dollars for each truck and six dollars for each semitrailer used in intrastate commerce for each year or any part of the year in which the vehicle is used shall be due and payable on or before the first day of January or at the time the vehicle is placed in service and should be remitted in the form of a certified check, bank draft,

cashier's check, express money order or postal money order payable to the Iowa state commerce commission. A complete description of the vehicle on which the fee is paid shall accompany the remittance. (Certificate fees are not payable on tractors or truck tractors.)

4.6(2) *Fee receipt.* The holder of an intrastate certificate shall be furnished a receipt for each certificate fee paid. The receipt shall be carried with the described vehicle at all times.

4.6(3) *Equipment changes or additions.* Before placing any additional or replacement bus, truck or semitrailer in intrastate service, the holder of the certificate shall furnish the commission a description of such motor vehicles together with the information as to the time placed in service, make of equipment, factory number and year built. The holder of the certificate shall also furnish the commission information as to whether or not a current certificate fee has been paid on said motor vehicle by another certificated holder under this chapter, together with information as to time placed in service under present certificated carrier's authority. The holder of the certificate shall pay the commission an annual fee on such motor vehicle provided the fee has not been paid for the current year under this chapter.

4.6(4) *Commencement of operations.* Motor carriers shall begin operating within 30 days after a certificate of convenience and necessity has been issued. Service authorized shall commence within 30 days from the effective date of the certificate, or the operating rights previously granted shall be forfeited unless otherwise ordered by the commission.

4.6(5) *Interruptions of regular service.* All interruptions of regular service, where such interruptions are likely to continue for more than 24 hours, shall be promptly reported in writing to the commission and to the public along the route, with a full statement of the cause of such interruption and its probable duration.

4.6(6) *Suspension of motor carrier service.* Suspension of service for a period of five consecutive days without notice to the commission shall be cause for forfeiture of all operating rights.

4.6(7) *Unauthorized extensions of certificate.* Motor carriers holding a truck operator permit, a contract carrier permit or both shall not avoid or modify exceptions or limitations in a certificate of convenience and necessity by using any authority granted by such permits.

4.6(8) *Established route.* In all cases where the route or any part of the route of any motor carrier shall be closed by the public authorities for repairs or for any purpose, the detour prescribed by the public authorities as a substitute for such road shall be the authorized route of the motor carrier until such time as the regular route shall be reopened for public travel. No motor carrier shall receive or discharge passengers or freight on a detour. This subrule shall not be applicable to charter carriers.

4.7(325) Time schedule.

4.7(1) *Time schedule of operation.* Time schedules must be printed or typewritten, numbered consecutively, beginning with number 1, and shall show:

a. Name and address of motor carrier.

b. Number of schedule canceled thereby.

c. Time of arrival at and departure from all terminals.

d. Time of departure from all intermediate points.

e. What days each scheduled trip is made.

f. What points, if any, on the route of the carrier to which service cannot be rendered, and reasons therefor.

g. Date issued.

h. Date effective.

4.7(2) Every application for a certificate of convenience and necessity or to change time schedule must be accompanied by a copy of the proposed schedule. Additional copies shall be furnished when requested by the commission.

4.7(3) No motor carrier shall change a time schedule until after at least 30 days' notice of the change proposed has been given to the commission, competitive and connecting motor carriers and the public. Shorter notice may be authorized by the commission upon special request. The notice to the public shall be given by posting a copy of the schedule in a conspicuous place at each station or stopping place affected. After such notice the time schedule will be considered in full force and effect, unless ordered withdrawn, modified or suspended.

A copy of the effective time schedule shall be posted in a conspicuous place, easily accessible to public inspections, at each station or stopping place on the route, and a copy shall be in possession of each driver or operator.

Time schedules as filed with the commission must be adhered to.

4.7(4) *Discontinuance of bus service.* The passenger carrier shall notify mayors of points where bus service is to be discontinued at least 15 days prior to date of discontinuance of said service and shall furnish the commission with proofs of notification.

4.8(325) Records and reports.

4.8(1) *Records.* Every motor carrier shall keep an accurate record of assets and liabilities, cost and depreciation of all equipment and other physical property owned, receipts from operation, operating and other expenses, total amount of freight hauled in pounds by commodity, number of passengers carried, actual miles traveled within and without the state and such other information the commission may deem necessary from time to time.

4.8(2) *Reports.* Every motor carrier shall file with the commission for the calendar year an annual report, duly verified, in such form as the commission may prescribe, on or before March 31 of the year following that for which the report is filed. The commission will prescribe the character of the information to be embodied in such annual report and will furnish a blank form therefor.

4.9(325) Equipment of passenger carrying motor vehicles.

4.9(1) *Inside lights.* All motor vehicles used in the transportation of passengers shall maintain a light or lights of not less than two candle power each, within the vehicle and so arranged as to light up the interior thereof for the convenience and safety of the passenger, except that portion occupied by the driver.

4.9(2) *Heating, ventilation and smoking.* Passenger carrying motor vehicles shall be properly ventilated at all times and shall, when weather conditions require, be heated so as to be reasonably comfortable for passengers. No smoking shall be permitted in closed buses, except in designated section.

4.10(325) Drivers.

4.10(1) Every motor carrier or charter carrier who acts as a driver shall comply with all requirements of the law applying to drivers.

4.10(2) Motor carriers and charter carriers shall see that all prospective drivers are familiar with the provisions of chapter 325 of the Code, all other laws applying to motor carriers or charter carriers and these rules before being allowed to operate a motor vehicle. No driver or operator of any vehicle used in the transportation of passengers shall carry on any unnecessary conversation with passengers, collect fares or make change while such vehicle is in operation, nor shall the operator smoke in the vehicle while driving.

4.10(3) It shall be the duty of the driver or operator of passenger carrying motor vehicles to open and close doors on the vehicle and a notice to that effect shall be posted on each door. Motor vehicles must at all times be operated in a safe manner in conformity with the laws of the road and duly prescribed street traffic regulations.

4.11(325) Safety requirements for passenger carrying vehicles.

4.11(1) *Explosives, acids and inflammable articles not to be carried.* No motor carrier shall knowingly carry or permit to be carried in any motor vehicle transporting passengers, any high explosives, acid or inflammable liquid or article.

4.11(2) *Fire protection.* Every motor vehicle used for the transportation of passengers shall be equipped with a fire extinguisher bearing the label of approval of the Underwriters Laboratories, Incorporated. Such extinguisher shall be attached to the vehicle in such a place as to be immediately accessible to the driver and shall be kept in satisfactory operative condition at all times.

4.11(3) *Doors on passenger vehicles.* Every motor vehicle used for transporting passengers will be equipped with an exit door at the side and an exit door at the rear thereof, or shall have an escape exit on each side thereof, free and clear of any steering apparatus or other obstruction. Such exits shall open outwardly toward the natural means of egress and shall always be unlockable from within.

4.12(325) Application, transfer, lease or assignment of a certificate of convenience and necessity.

4.12(1) *Sale, transfer, lease or assignment.* Application for the commission's approval of a proposed sale, transfer, lease or assignment of a motor carrier certificate of convenience and necessity must be typewritten, signed and sworn to by parties interested. Proposed sale, transfer, lease or assignment shall not become effective until approved by the commission. Applications involving exclusively interstate authority need contain only information required by paragraphs "*a*", "*b*", "*c*", "*h*" and "*m*" of this subrule. Such application shall contain:

a. The name and address of the holder of the certificate, the certificate number and the authority granted thereby.

b. The name and address of the person proposing to take over or lease the certificate.

c. A statement as to whether it is proposed to sell, transfer, lease or assign the certificate, the reasons therefor, and a request that the commission approve such proposal.

d. A statement that a financial statement of the person proposed to take over or lease the certificate is attached to the application. Form of financial statement will be furnished by the commission upon request.

e. A statement that two copies each of the time schedule and tariff proposed to be placed in effect are attached to the application.

f. The proposed consideration or amount to be paid for the certificate.

g. A description of all property proposed to be sold, transferred, leased or assigned and the amount to be paid therefore.

h. A statement that a copy of the proposed lease is attached to the application, if it is proposed to lease the certificate.

i. A statement that copies of all contracts, agreements and other stipulations between the parties to the application are attached to the application.

j. A complete description of each bus, truck or combination tractor-truck, semitrailer or trailer to be operated by person proposing to take over or lease the certificate.

k. A statement that the proposed sale, transfer, lease or assignment is not for the purpose of hindering, delaying or defrauding creditors.

l. A statement, including the name and address of each of the transferor's known creditors, signed and sworn to, certifying that each has been mailed notice of proposed transfer.

m. The date on which it is desired that such proposed sale, transfer, lease or assignment shall become effective.

n. Such other facts as may be necessary to give the commission complete information regarding the proposed transaction.

4.12(2) *Application of interstate carriers.* Chapter 325 of the Code, together with the rules thereunder adopted by the commission insofar as may be applicable, govern motor carriers affording services of a strictly interstate character.

Application for a certificate covering such an operation shall be made upon forms prescribed and furnished by the commission. Section 325.12, subsections 4, 5 and 6 are not applicable to interstate carriers. A showing of convenience and necessity before this commission is not a condition precedent to the granting of a certificate to an interstate carrier. Therefore no hearing will be held for this purpose and 4.5(2) and 4.5(3) of these rules may be disregarded when application is submitted. Applicant shall have first complied with the Motor Carrier Act administered by the interstate commerce commission and the rules and regulations thereunder adopted except in instances where application is made for intrastate authority concurrently with an application for single state interstate authority under the provisions of section 206 "*a*" (6) of the Interstate Commerce Act, as amended. A showing of convenience and necessity before the commission will be a condition precedent to the granting of a single state interstate certificate and a hearing will be held for this purpose.

4.13(325) Lease of equipment.

4.13(1) *Lease defined.* Lease, for the purpose of these rules, means a written document providing for the exclusive possession, control and responsibility over the operation of the vehicle or vehicles in the lessee for a specific period of time as if such lessee were the owner. A copy of the lease must be carried in the leased equipment at all times.

4.13(2) *Number.* No motor carrier or charter carrier may have more than one lease covering a specific piece of equipment in effect at a given time.

4.13(3) *Lease of vehicles to shippers or receivers.* No motor carrier or charter carrier shall lease vehicles with or without drivers to shippers or receivers.

4.13(4) *Identification of equipment.* Each lessee shall properly identify each piece of equipment, during the period of the lease, as specified in 4.4(325).

4.13(5) *Conditions.* Any lease of equipment by any motor carrier or charter carrier except under the following conditions is prohibited:

a. Every such lease must be in writing and signed by the parties thereto or their regular employees or agents duly authorized to act for them.

b. Every lease shall specify the time the lease begins and the time or circumstances on which it ends.

c. Every lease shall set out specific consideration of method of determining compensation.

d. Every lease shall provide for the exclusive possession, control and use of the equipment and for the complete assumption of responsibility in respect thereto by the lessee for the duration of said lease.

4.14(325) Tariffs.

4.14(1) *Filing of tariffs, schedules and classifications.* Every applicant seeking authority to operate under a certificate of convenience and necessity must file tariffs which comply with the provisions of this rule before authority requested can be issued. All tariffs and schedules, including classifications filed on and after the date of approval hereof, must conform to the following regulations, except as otherwise indicated herein or as otherwise authorized by the commission.

The term "tariff" as used herein means a publication stating the rates, fares and charges of a motor carrier, and all rules which said motor carrier applies in connection therewith.

The term "classification" as used herein means a publication stating the ratings (first, second, third, fourth, etc.) which are to be applied in the connection with the rates named in said tariff.

4.14(2) All tariffs and amendments or supplements thereto must be in book, pamphlet or loose-leaf form of size 8 x 11 inches. They must be plainly printed, mimeographed, planographed, stereotyped or reproduced by other similar durable process on good quality paper. No alteration in writing or erasure shall be made in any tariff or supplement thereto. A margin of not less than five-eighths inch, without any printing thereon must be allowed at the binding edge of each tariff and supplement.

4.14(3) All tariffs and supplements hereafter issued must be filed and posted at least 30 days prior to the effective date thereof, unless otherwise authorized by the commission, except the tariffs or supplements issued in connection with new or changed operating authority, or issued to reflect the transfer or leasing of operating authority from one motor carrier to another, may be filed and posted to become effective on less than 30 days' notice, under authority of the commission's docket number covering the establishment, changing, transfer or leasing of operating authority.

4.14(4) Issuing carriers or their agents shall transmit to the commission, as aforesaid, two copies of each tariff, supplement or revised page. Both copies shall be included in one package ac-

companied by a letter of transmittal listing all tariffs enclosed and addressed to the Iowa State Commerce Commission, Rate Division, Des Moines, Iowa. All postage or express must be prepaid.

4.14(5) The title page of each tariff shall contain:

a. Each tariff hereafter issued shall be numbered in upper right-hand corner, beginning with number 1. Such number shall be shown as follows: Ia. C.C. No. .....

When tariffs are issued canceling a tariff or tariffs previously filed, the Ia. C.C. number or numbers that have been canceled must be shown in the upper right-hand corner under the Ia. C.C. number of the new tariff.

EXAMPLE: Ia. C.C. No. 2
cancels
Ia. C.C. No. 1

b. Amendments or supplements to a tariff in addition to showing the Ia. C.C. number of the tariff amended thereby shall be numbered beginning with the number 1 and such information shall be shown in the upper right-hand corner. Supplements shall also show in the upper right-hand corner the number of any previous supplements canceled thereby and also the numbers of the supplements containing all changes made in the tariff.

EXAMPLE: Supplement No. 5 to
Ia. CC. No. 1
cancels
Supplements Nos. 3 and 4.
Supplements Nos. 2 and 5
contain all changes.

c. Name of carrier or name of agent issuing tariff. Whenever two or more carriers join in a through rate, fare or charge, the names of all participating carriers must be shown. The name of each carrier must be the same as that appearing in its certificate.

If the carrier is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name.

Whenever two or more carriers join in a through rate, fare or charge, authority by means of proper power of attorney or concurrence, as provided in 4.14(12) and 4.14(13) hereof, must be given the agent or carrier publishing the tariff.

d. A brief description of the districts in which, or points from and to which the tariff applies.

e. Date of issue and date effective.

f. Name, title and street address of officers or agent by whom tariff is issued.

4.14(6) Tariff publication shall contain in the order named:

a. Index arranged alphabetically showing the tariff contains so small a volume of matter that its title page or interior arrangement plainly indicates its contents, the index may be omitted. No index need be shown in tariffs of less than five pages or if the rates or fares to each destination are alphabetically arranged.

b. Explanation of all abbreviations, symbols and reference marks used in the tariff.

c. When a tariff names rates by classes, a classification of articles must be published in the tariff or in a separate tariff of classification. When a rate tariff is governed by any separately published tariff of classification, tariff of classification exceptions, tariff or rules, or other similar publication affecting the provisions of the tariff reference shall be made in the rate tariff to such separate governing tariffs. A rate tariff may not refer to another rate tariff for classification ratings, exceptions to the classification, rules, lists of commodities, list of points assigned rate groups or rate basis, or other governing provisions. All carriers shown as participating carriers in a rate tariff which is governed by separately published governing tariffs, must be named as participating carriers in such separate governing tariffs. Carriers or their agents may not publish class or commodity rates which duplicate or conflict with other rates published by or for account of such carriers.

d. Tables of rates. All rates must be specifically stated in cents or in dollars and cents, per 100 pounds, per mile, per ton of 2,000 pounds per stated truck load or other definable measure. Where rates are stated in amounts per package or bundle definite specifications of the packages or bundles must be shown.

e. Tables of fares. An explicit statement of the fares in cents or in dollars and cents, together with the names or description of the points from and to which they apply. Tariffs containing tables of rates or fares based on distances from point of origin to destination must show the mileage, or indicate a definite method by which such mileage shall be determined.

4.14(7) *Commodity rates.* Commodity rates, either specific point-to-point rates or based on distance scales, in stated truckload or in less-than-truck-load quantities may be published, and where they differ from the regular class rate basis, the lower rate shall take preference.

4.14(8) *Excursion fares.* Fares for a round-trip excursion limited to a designated period of not more than three days may be established without further notice, upon posting of tariff one day in advance in a public conspicuous place where tickets for such round-trip excursions are sold and filing the required number of copies thereof with the commission. Fares for a round-trip of more than three days and not more than 30 days, and fares for a series of daily round-trip excursions not exceeding 30 days, may be established upon a like notice of three days. No supplement may be issued to any tariff which is published under this rule for the purpose of canceling the tariff.

4.14(9) *Tariff changes.* All rates, charges and classifications which have been filed with the commission must be allowed to become effective and remain in effect for a period of at least 30 days before being changed, canceled or withdrawn, unless otherwise authorized by the commission.

All tariffs, supplements and revised pages (including classifications) shall indicate changes from preceding issues by use of the following symbols which must be shown directly in connection with each change:

↓ or (R) to denote reductions

◆ or (A) to denote increases

▲ or (C) to denote changes, the result of which is neither an increase nor a deduction.

4.14(10) *Posting regulations.* Each carrier must post and file at some designated point at each of its stations or offices all of the tariff or schedules applying from, or to, or at, such station or office and must also post and file at its principal place of business all of its tariffs and schedules. All tariffs or schedules must be kept available for public inspection or examination at all reasonable times.

4.14(11) *Applications.* Carriers or agents when making application for permission to establish rates, fares, charges, classification ratings or rule on less than statutory (30 days') notice shall use the form prescribed by the commission.

4.14(12) *Powers of attorney.* Whenever a carrier desires to give authority to an attorney and agent to issue and file tariffs and supplements thereto in its stead, a power of attorney in the form prescribed by the commission shall be used.

4.14(13) *Concurrence notice.* Whenever a carrier desires to concur in tariffs issued and filed by another carrier or its agent, a concurrence using the form prescribed by the commission shall be issued in favor of such carriers. The original of all powers of attorney and concurrences shall be filed with the commission and a duplicate of the original sent to the agent or carrier in whose favor such document is issued.

Whenever a carrier desires to cancel the authority granted an agent or another carrier by power of attorney or concurrence, this may be done by a letter addressed to the commission revoking such authority on 60 days' notice. Copies of such notice must also be mailed to all interested parties.

[Filed May 10, 1966; amended July 14, 1967]

[Former rules MV41—MV47 have probably been superseded by 4.3(325).]

CHAPTER 5
MINIMUM RAILROAD CLEARANCES

5.1(477) Scope and application. The following rules prescribe minimum track centers, and minimum horizontal and vertical clearances applicable to tracks, structures, fixtures and other appurtenances of railroads. The term "railroad" includes steam railroads and electric interurban railroads. These rules apply to all new construction of tracks, bridges, buildings and other structures and facilities adjacent to the tracks of railroads, carried on after date on which these rules become effective. Nothing herein contained prohibits any railroad from constructing its tracks, bridges, buildings and other structures with clearances greater than required by these rules. Where conditions apparently make it impracticable to comply with these rules, application for permission to maintain reduced clearances should be made to the commission in accordance with the directions given in "Procedure" hereof.

5.2(477) General requirements. The vertical and horizontal clearances herein prescribed are for tangent tracks and tracks where the tops of the rails are at the same level, and shall not be less than those shown:

Where one rail is elevated above the other, compensation shall be made so that the minimum vertical and horizontal clearances herein prescribed shall be maintained, the vertical clearances being taken from the top of the higher rail, and the horizontal clearances being measured perpendicularly to a line that passes through the center line of the track and which is perpendicular to the face of the ties.

If the alignment is curved, the horizontal clearance shall be so increased as to provide for the overhanging and the tilting of a car 85 feet long, 60 feet between centers of trucks, and 14 feet high, allowance being made for super-elevation of outer rail.

The distance from top of rail to top of tie shall be taken as eight inches.

5.3(477) Warning signs required. At all overhead freight loading platforms, awnings, canopies, coal chutes, ore tipples, entrances to warehouses, shop buildings and similar structures, where the vertical clearance is less than 22 feet, and at all high freight loading platforms where the horizontal clearance is less than eight feet, warning signs must be erected as a caution to employees.

5.4(477) Location and lettering of warning signs. Warning signs for use at places having reduced clearances shall be placed in conspicuous positions, with black letters and border upon a white background. The sign will be of either of two kinds: Vertical or horizontal. It shall have thereon the words "NO CLEARANCE". The vertical sign shall not be less than 48″ x 6″, and the horizontal not less than 36″ x 6″. Letters thereon shall be 3″ high, 2″ wide, and ⅜″ stroke, reading top to bottom on the vertical sign and left to right on the horizontal sign.

5.5(477) Printed rules. The railroads shall promulgate a printed rule prohibiting employees from riding on the tops or sides of cars while in motion at points where 5.3(477) requires the maintenance of warning signs.

STEAM RAILROADS

5.6(477) Main tracks. The distance from the center line of any main track to the center line of an adjacent main track, both used exclusively for passenger service, shall be not less than 13 feet; if freight cars are handled on either or both tracks, the distance between the center lines of such tracks shall be not less than 14 feet.

5.7(477) Tracks adjacent to main tracks.

5.7(1) Except as to ladder tracks, the distance from the center line of any main track to the center line of any adjacent subsidiary track shall be not less than 15 feet.

5.7(2) The distance from the center line of any main track to the center line of any adjacent ladder track in which switches are operated mechanically, shall be not less than 15 feet; in ladder tracks where switches are not operated mechanically, not less than 17 feet.

5.8(477) Subsidiary passenger tracks.

5.8(1) Except as to ladder tracks the distance between the center lines of any two subsidiary passenger tracks shall be not less than 13 feet.

5.8(2) Any pair of subsidiary tracks used solely for passenger service may have centers less than 13 feet provided the center lines of any track, adjacent to either side of such pair of tracks, is located not less than 13 feet therefrom.

5.9(477) Subsidiary freight tracks.

5.9(1) Except as to ladder tracks the distance between the center lines of subsidiary freight tracks shall be not less than 13 feet six inches.

5.9(2) *Team tracks.* Any two adjacent tracks, commonly known as a pair of team tracks, with a driveway on one side thereof, may have track centers less than 13 feet six inches. If a third track is constructed adjacent to such pair of tracks its track center must be not less than 13 feet six inches from the center line of the nearest track.

5.9(3) *Track system with high platform adjacent thereto.* Any system of two or more tracks at freight houses, warehouses, wharves or similar structures used exclusively for handling freight to or from high platforms located on one or both sides thereof may have its track centers less than 13 feet six inches, provided that at least two tracks in any such system shall have centers not less than this distance.

5.10(477) Ladder tracks.

5.10(1) The distance from the center line of any subsidiary track to the center line of any adjacent ladder track where the switches are operated mechanically, shall be not less than 15 feet; where the switches are not operated mechanically, not less than 17 feet.

5.10(2) The distance between the center lines of two adjacent parallel ladder tracks where the switches in both are operated mechanically shall be not less than 17 feet; where the switches in either or both are not operated mechanically, not less than 19 feet.

5.11(477) Bridges.

5.11(1) *Bridges supporting main tracks or subsidiary freight tracks.* The clearances of all bridges supporting main tracks or subsidiary freight tracks shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet; thence downward at an angle to a point 16 feet above the top of rail and eight feet laterally distant from the center line of track; thence downward to a point four feet above the top of rail and eight feet laterally distant from the center line of track; thence downward on an angle to a point level with the top of rail and five feet six inches laterally distant from the center line of track.

5.11(2) *Bridges spanning main tracks or subsidiary freight tracks.* The clearance of all bridges spanning main tracks or subsidiary freight tracks shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet; thence downward at an angle to a point 20 feet above the top of rail and eight feet laterally distant from the center line of track; thence downward to a point level with the top of rail and eight feet laterally distant from the center line of track.

5.12(477) Buildings and miscellaneous structures.

5.12(1) *Structures adjacent to main tracks.* Except as otherwise specified the clearances between main tracks and buildings or other structures adjacent thereto shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail the vertical clearance line shall extend thence horizontally each way to points eight feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.12(2) *Structures adjacent to subsidiary passenger tracks.* Except as otherwise specified the clearances between subsidiary passenger tracks and buildings or other structures adjacent thereto shall be as follows:

Tracks outside of buildings: Beginning at a point in the center line of track 22 feet above the top of rail, the vertical clearance line shall extend thence horizontally each way to points seven feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

Tracks entering buildings: Beginning at a point in the center line of track at such a height as will

be most practicable for the height of equipment handled on such tracks the vertical clearance lines shall extend thence horizontally each way to points seven feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.12(3) *Structures adjacent to subsidiary freight tracks.* Except as otherwise specified the clearances between subsidiary freight tracks and buildings or other structures adjacent thereto shall be as follows:

Tracks outside of buildings: Beginning at a point in the center line of track 22 feet above the top of rail the vertical clearance line shall extend thence horizontally each way to points eight feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

Tracks entering buildings such as warehouses, freight houses, coaling stations, elevators and similar structures: Beginning at a point in the center line of track at such a height as will be most practicable for equipment handled on such tracks the vertical clearance line shall extend thence horizontally each way to points seven feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.12(4) *Engine houses, shop doors, car sheds, etc.* The clearances at the entrances of engine houses, shop doors, car sheds, etc., shall be as follows: Beginning at a point in the center line of track at such a height as will be most practicable for the height of equipment using the buildings; thence horizontally each way to points six feet, six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.12(5) *Coal tipples, ore tipples, stone crushers, etc.* The clearances of all subsidiary tracks passing through or underneath coal tipples, ore tipples, stone crushers or similar overhead structures shall be as follows: Beginning at a point in the center line of track at such a height as will be most practicable for the height of equipment handled on such tracks, the vertical clearance line shall extend thence horizontally each way to points seven feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.13(477) Awnings and canopies.

5.13(1) *Awnings and canopies at main tracks.* Awnings and canopies spanning main tracks or supported at the sides of main tracks shall have clearances as follows: Beginning at a point in the center line of track 22 feet above the top of rail, the vertical clearance line shall extend thence horizontally each way to points eight feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with top of rail.

5.13(2) *Awnings and canopies at subsidiary passenger tracks.* Awnings and canopies spanning subsidiary passenger tracks or supported at the sides of such tracks shall have clearances as follows: Beginning at a point in the center line of track at such a height above the top of rail as will be most practicable for the height of equipment handled on such tracks, the vertical clearance line shall extend thence horizontally each way to points seven feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.13(3) *Awnings and canopies at subsidiary freight tracks.* Except as otherwise specified awnings and canopies spanning subsidiary freight tracks or supported at the sides of such tracks shall have clearances as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet to a point; thence diagonally to a point 16 feet above the top of rail and eight feet laterally distant from the center line of track; thence vertically downward to a point level with the top of rail; except that awnings and canopies at freight houses and freight loading platforms may be constructed inside of the above limits up to not less than five feet six inches from the center line of the track and not less than 17 feet above the top of rail.

5.14(477) Overhead loading platforms. All tracks (except main, passing, ladder or other open thoroughfare tracks) spanned by overhead platforms used for icing or other loading purposes may have vertical clearances less than 22 feet, provided such platforms or structures are so constructed as to open upward or outward by means of counterweights or other devices and thus provide clearances required by 5.12(2) and 5.12(3) at times when cars are being handled over the tracks served by such platforms.

5.15(477) High freight platforms. The faces or edges of high platforms for handling freight to or from cars on subsidiary tracks shall not exceed five feet eight inches from the center lines of such tracks, except when such platforms have horizontal clearances of eight feet from such tracks.

5.16(477) Low platforms. Platforms not higher than eight inches above the top of rail may be constructed and maintained with faces not less than five feet one inch from the center line of an adjacent track. Platforms less than four inches above the top of rail may be constructed and maintained with faces not less than four feet six inches from the center line of an adjacent track.

5.17(477) Switch stands.

5.17(1) *Main tracks.* Main track switch stands exceeding two feet ten inches in height and not exceeding four feet in height shall have horizontal clearances of not less than eight feet from the center line of an adjacent track to the nearest part of the switch stand above the base of rail; and not less than eight feet three inches when the switch stand exceeds four feet in height.

5.17(2) *Subsidiary tracks.* Subsidiary track switch stands exceeding two feet ten inches in height and not exceeding four feet in height shall be not less than seven feet six inches from the center line of an adjacent track to the nearest part of the switch stand above the base of rail; and not less than eight feet when the switch stand exceeds four feet in height.

5.18(477) Low switch stands, dwarf signals, signal apparatus, etc. Switch stands not exceeding two feet ten inches in height, dwarf interlocking signals not exceeding two feet eight inches in height, interlocking switch machines, pipe lines and other signaling apparatus, the third rail and its supports for the electric operation of trains, and guard rails of all kinds may be installed and maintained between or adjacent to tracks regardless of the clearance lines hereinbefore specified.

5.19(477) Penstocks and water tanks.

5.19(1) *Penstocks.* The distance from the nearest part of a penstock above the top of rail to the center line of an adjacent main track, passing track or subsidiary freight track shall be not less than eight feet; and to the center line of an adjacent subsidiary passenger track other than a passing track, not less than seven feet six inches; except that penstock bases not exceeding four feet above top of rail may have nearest part not less than seven feet six inches from center line of track.

5.19(2) *Water tanks.* The distance from the nearest part of a water tank to the center line of any adjacent track shall be not less than nine feet.

Spouts in raised position shall have minimum clearances as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet; thence downward at an angle to a point 16 feet above the top of rail and eight feet laterally distant from center line of track; thence vertically downward to a point level with the top of rail and eight feet laterally distant from center line of track.

5.20(477) Semaphore and color light signals. The distance from the nearest part above the top of rail of a semaphore or color light signal, other than a dwarf signal, to the center line of an adjacent track shall be not less than eight feet.

5.21(477) Poles, posts and signs. The face of all telegraph, telephone, trolley or other poles, whistle posts, mile posts, posts for signal bridges, whipcords, crossing gates, highway crossing bells and all other signs, signals or devices not otherwise provided for in these rules shall be not less than eight feet from the center line of adjacent tracks. No part of any sign or appurtenance attached to such poles or posts shall be less than eight feet from the center line of an adjacent track, between the top of rail and a point 17 feet above.

5.22(477) Fences. To prevent persons from crossing railroad tracks at unauthorized places in the immediate vicinity of passenger stations fences not more than four feet above the top of rail may be maintained between tracks.

5.23(477) Mail cranes. The distance from the center line of the main track to the nearest part of the mail crane with the arms extended for the mail pouch shall be not less than six feet three inches.

5.24(477) Building materials or supplies. No building materials or supplies of any kind shall be piled nearer to any track than nine feet from the center line thereof, except materials for immediate use, which may be placed not nearer than seven feet six inches from the center line of track.

ELECTRIC RAILROADS

5.25(477) Main tracks. The distance from the center line of any main track to the center line of an adjacent main track, both used exclusively for passenger service, shall be not less than 13 feet; where freight cars are handled on either or both tracks, the distance between the center lines of such tracks shall be not less than 14 feet.

5.26(477) Tracks adjacent to main tracks.

5.26(1) Except as to ladder tracks, the distance from the center line of any main track to the center line of any adjacent subsidiary track shall be not less than 15 feet.

5.26(2) The distance from the center line of any main track to the center line of any adjacent ladder track in which switches are operated mechanically shall be not less than 15 feet; in ladder tracks where switches are not operated mechanically, not less than 17 feet.

5.27(477) Subsidiary passenger tracks.

5.27(1) Except as to ladder tracks the distance between the center lines of any two adjacent subsidiary passenger tracks shall be not less than 13 feet.

5.27(2) Any pair of subsidiary tracks used solely for passenger service may have centers less than 13 feet provided the center line of any track adjacent to either side of such pair of tracks is located not less than 13 feet therefrom.

5.28(477) Subsidiary freight tracks.

5.28(1) Except as to ladder tracks, the distance between the center lines of any two subsidiary freight tracks shall be not less than 13 feet six inches.

5.28(2) *Team tracks.* Any two adjacent tracks, commonly known as a pair of team tracks, with a driveway on one side thereof, may have track centers less than 13 feet six inches. If a third track is constructed adjacent to such pair of tracks its track center must be not less than 13 feet six inches from the center line of the nearest track.

5.28(3) *Track system with high platforms adjacent thereto.* Any system of two or more tracks at freight houses, warehouses, wharves or similar structures used exclusively for handling freight to or from high platforms located on one or both sides thereof may have its track centers less than 13 feet six inches, provided that at least two tracks in any such system shall have centers not less than this distance.

5.29(477) Ladder tracks.

5.29(1) The distance from the center line of any subsidiary track to the center line of any adjacent ladder track where the switches are operated mechanically shall be not less than 15 feet; where the switches are not operated mechanically, not less than 17 feet.

5.29(2) The distance between center lines of two adjacent ladder tracks where the switches in both are operated mechanically shall be not less than 17 feet; where the switches in either or both are not operated mechanically, not less than 19 feet.

5.30(477) Bridges.

5.30(1) *Bridges supporting main tracks or subsidiary freight tracks.* The clearances of all bridges supporting main tracks or subsidiary freight tracks shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet; thence downward at an angle to a point 16 feet above the top of rail and eight feet laterally distant from the center line of track; thence downward to a point four feet above the top of rail and eight feet laterally distant from the center line of track; thence downward at an angle to a point level with top of rail and five feet six inches laterally distant from the center line of track.

5.30(2) *Bridges spanning main tracks or subsidiary freight tracks.* The clearances of all bridges spanning main tracks or subsidiary freight tracks shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet; thence downward at an angle to a point 20 feet above the top of rail and eight feet laterally distant from the center line of track; thence downward to a point level with the top of rail and eight feet laterally distant from the center line of track. The vertical clearance of bridge shall be such that the trolley contact wire may be maintained at a minimum vertical height of 22 feet from top of rail. In such a case the clearance line of the structure shall extend four feet horizontally from center line of track at the maximum height; thence downward at an angle so as to intersect a point 20 feet above the top of rail and eight feet laterally distant from center line of track; and thence follow the clearance line previously designated.

5.31(477) Buildings and miscellaneous structures.

5.31(1) *Structures adjacent to main tracks.* Except as otherwise specified the clearances between main tracks and buildings or other structures adjacent thereto shall be as follows: Beginning at a point in the center line of track 22 feet above the top of rail the vertical clearance line shall extend thence horizontally each way to points eight feet from the center line of track from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.31(2) *Structures adjacent to subsidiary passenger tracks.* Except as otherwise specified the clearances between subsidiary passenger tracks and buildings or other structures adjacent thereto shall be as follows:

Tracks outside of buildings: Beginning at a point in the center line of track 22 feet above the top of rail, the vertical clearance line shall extend thence horizontally each way to points seven feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with top of rail.

Tracks entering buildings: Beginning at a point in the center line of track at such a height as will be most practicable for the height of equipment handled on such tracks the vertical clearance line shall extend thence horizontally each way to points seven feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.31(3) *Structures adjacent to subsidiary freight tracks.* Except as otherwise specified the clearances between subsidiary freight tracks and buildings or other structures adjacent thereto shall be as follows:

Tracks outside of buildings: Beginning at a point in the center line of track 22 feet above the top of rail, the vertical clearance line shall extend thence horizontally each way to points seven feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with top of rail.

Tracks entering buildings such as warehouses, freight houses, elevators and similar structures: Beginning at a point in the center line of track at such a height as will be most practicable for equipment handled on such tracks the vertical clearance line shall extend thence horizontally each way to

points seven feet from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.31(4) *Engine houses, shop doors, car sheds, etc.* The clearances at the entrances of engine houses, shop doors, car sheds, etc., shall be as follows: Beginning at a point in the center line of track at such a height as will be most practicable for the height of equipment using the buildings; thence horizontally each way to points six feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.31(5) *Coal tipples, ore tipples, stone crushers, etc.* The clearances of all subsidiary tracks passing through or underneath coal tipples, ore tipples, stone crushers or similar overhead structures shall be as follows: Beginning at a point in the center line of track at such a height as will be most practicable for the height of equipment handled on such tracks, the vertical clearance line shall extend thence horizontally each way to points seven feet from the center line of track, from which points horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.32(477) Awnings and canopies.

5.32(1) *Awnings and canopies at main tracks.* Awnings and canopies spanning main tracks or supported at the sides of main tracks shall have clearances as follows: Beginning at a point in the center line of track 22 feet above the top of rail; the vertical clearance line shall extend thence horizontally each way to points eight feet from the center line of track; from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.32(2) *Awnings and canopies at subsidiary passenger tracks.* Awnings and canopies spanning subsidiary passenger tracks or supported at the sides of such tracks shall have clearances as follows: Beginning at a point in the center line of track at such a height above the top of rail as will be most practicable for the height of equipment handled on such tracks, the vertical clearance line shall extend thence horizontally each way to points seven feet six inches from the center line of track, from which points the horizontal clearance lines shall extend vertically downward to points level with the top of rail.

5.32(3) *Awnings and canopies at subsidiary freight tracks.* Except as otherwise specified awnings and canopies spanning subsidiary freight tracks or supported at the sides of such tracks shall have clearances as follows: Beginning at a point in the center line of track 22 feet above the top of rail; thence horizontally four feet to a point; thence diagonally to a point 16 feet above the top of rail and eight feet laterally distant from the center line of track; thence vertically downward to a point level with the top of rail; except that awnings and canopies at freight houses and freight-loading platforms may be constructed inside of the above limits up to not less than five feet six inches from the center line of the track and not less than 17 feet above the top of rail.

5.33(477) Overhead loading platforms. All tracks (except main, passing, ladder or other open thoroughfare tracks) spanned by overhead platforms used for icing or other loading purposes may have vertical clearances less than 22 feet, provided such platforms or structures are so constructed as to open upward or outward by means of counterweights or other devices and thus provide clearances required by 5.31(477) at times when cars are being handled over the tracks served by such platforms.

5.34(477) High freight platforms.

5.34(1) The faces or edges of high platforms for handling freight to or from cars on subsidiary tracks shall not exceed five feet eight inches from the center line of such tracks, except when such platforms have horizontal clearances of eight feet from such tracks.

5.34(2) Where railroads use a passenger type of car for handling freight to or from high platforms, the clearances between the faces of such cars and the edges or faces of such platforms shall not exceed four inches, except when such platforms have horizontal clearances of eight feet from such tracks.

5.35(477) Low platforms. Platforms not higher than eight inches above the top of rail may be constructed and maintained with faces not less than five feet one inch from the center line of an adjacent track. Platforms less than four inches above the top of rail may be constructed and maintained with faces not less than four feet six inches from the center line of an adjacent track.

5.36(477) Switch stands.

5.36(1) *Main tracks.* Main track switch stands exceeding two feet ten inches in height and not exceeding four feet in height shall have horizontal clearances of not less than eight feet from the center line of an adjacent track to the nearest part of the switch stand above the base of rail; and not less than eight feet three inches when the switch stand exceeds four feet in height.

5.36(2) *Subsidiary tracks.* Subsidiary track switch stands exceeding two feet ten inches in height and not exceeding four feet in height shall be not less than seven feet six inches from the center line of an adjacent track to the nearest part of the switch stand above the base of rail; and not less than eight feet when the switch stand exceeds four feet in height.

5.37(477) Low switch stands, dwarf signals, signal apparatus, etc. Switch stands not exceeding two feet ten inches in height, dwarf interlocking signals not exceeding two feet eight inches in height, interlocking switch machines, pipe lines and other signaling apparatus, the third rail and its supports for the electric operation of trains, and guard rails of all kinds may be installed and maintained between or adjacent to tracks regardless of the clearance lines hereinbefore specified.

5.38(477) Semaphore or color light signals. The distance from the nearest part above the top of rail of a semaphore signal post, other than a dwarf signal, to the center line of an adjacent track shall be not less than eight feet.

5.39(477) Poles, posts and signs. The faces of all telegraph, telephone, trolley or other poles, whistle posts, mile posts, posts for signal bridges, whipcords, crossing gates, highway crossing bells and all other signs, signals or devices not otherwise provided for in these rules shall be not less than eight feet from the center line of an adjacent track. No part of any sign or appurtenance attached to such poles or posts shall be less than eight feet from the center line of an adjacent track, between the top of rail and a point 17 feet above same.

5.40(477) Fences. To prevent persons from crossing railroad tracks at unauthorized places in the immediate vicinity of passenger stations, fences not more than four feet above the top of rail may be maintained between tracks.

5.41(477) Building materials or supplies. No building materials or supplies of any kind shall be piled nearer to any track than nine feet from the center line thereof, except materials for immediate use, which may be placed not nearer than seven feet six inches from the center line of track.

5.42(477) When no permission for construction is necessary. Except as may be required by law or by order of the commission, it will not be necessary, previous to new construction of tracks or appurtenances, for any railroad company to obtain permission for such changes or alterations nor will it be necessary to obtain permission to operate on such tracks, provided the track centers and clearances at such tracks or appurtenances conform to rules contained herein.

5.43(477) When permission for construction is necessary. When conditions in any particular case make it impracticable to comply with the foregoing rules, or for good reason variation therefrom is desired, application may be made to this commission for permission to construct and maintain such tracks or appurtenances with clearances less than are herein provided.

5.44(477) Essentials of application. The application for such permission shall be submitted in triplicate by the railroad company, or jointly by the railroad company and the owner of property when the track or appurtenance is upon private property. Each application must be accompanied by a plan showing the location of the proposed track or appurtenance and the clearances which it is desired to maintain; the name of the company or companies making the application; a description, the location and the reasons for varying from clearance rules; asking for approval of specified clearances set forth in petition; and asking that a date for hearing be fixed and interested parties be notified, in the event the commission deems a hearing of the petition necessary; said petition shall be signed by petitioner or petitioners.

5.45(477) Approval of application. If the commission approves application without a formal hearing, a duplicate of the application will be returned to the petitioner duly certified by the secretary of the commission.

5.46(477) Hearing. When deemed necessary by the commission, a formal hearing will be held upon any application to maintain clearances less than those herein prescribed. Due notice of the time and place of such hearing will be given interested parties. An order will issue after hearing, approving or disapproving the requested clearances.

[Filed prior to July 4, 1951]

CHAPTER 6
RAILROAD SAFETY DEVICES AND SIGNALS

6.1(478) Under the provisions of sections 478.33 to 478.36 and in the exercise of powers therein conferred, the Iowa state commerce commission adopted, effective February 15, 1951, rules pertaining to submission and approval of plans covering changes in interlocking plants or other safety devices including requirement for the filing of quarterly interlocking reports by railroad companies, such report forms by reference made a part hereof; and further adopted rules of the interstate commerce commission entitled "Rules, Standards and Instructions for installation, maintenance and repair of automatic block signal systems, interlocking traffic control systems, automatic train stop, train control and cab signal systems and other similar appliances, methods and systems", effective October 1, 1950, and by reference made a part hereof, as minimum requirements for the installation, maintenance and repair of interlocking and safety devices in the state of Iowa, insofar as the Iowa state commerce commission has jurisdiction; and matters not coming within the provisions of these rules or to which these rules cannot be made applicable shall be given separate consideration by the commission.

The portion of the rules of the Iowa state commerce commission is as follows:

6.2(478) Physical changes, reconstruction, rehabilitation or discontinuance. No interlocking plant or other safety device where railroads cross each other or at a junction or at a drawbridge shall be reconstructed or rehabilitated nor discontinued in whole or in part nor shall any changes be made which involve change in type of system or appliances, or alter the functional operation of apparatus, the location of signals, the aspects displayed by signals, the location of interlocking stations, or which involve or result in change from track arrangement, except upon securing approval from the commission.

6.3(478) Submission of applications.

6.3(1) An application should be filed for each project involving: The discontinuance, in whole or in part, of interlocking plants or other safety devices, or

Any change in interlocking or other safety device which involves change in type of system or appliances, or alters the functional operation of apparatus, the location of signals, the aspects displayed by signals, the location of interlocking stations, or which involves or results from change in track arrangement.

6.3(2) An application may be submitted in the form of a letter describing the nature of the proposal (a copy of information as submitted to the interstate commerce commission may be submitted in lieu of a specifically prepared description of proposal) same to be accompanied by a print, sketch or other descriptive matter.

6.3(3) When detailed plans, such as locking sheet, dog chart, circuit plans (excepting manipulation chart), are available, they shall be filed for approval.

6.3(4) In the preparation of plans, the graphical symbols and circuit nomenclature, preferably those approved by the Association of American Railroads, Signal Section, shall be used.

6.4(478) Approval of plans.

6.4(1) All submitted plans must show the approval of each of the interested railroad companies.

6.4(2) If the preliminary plan, sketch or print is satisfactory, or if, in the judgment of the commission, modifications are necessary, the plan will be approved accordingly. The detailed plans, furnished either at the time of application or at a later date, will be likewise approved. One copy of plans will be retained by the commission and other approved copies returned to the maintaining company.

6.4(3) Approvals will be effective for a period of one year. If the work is not started within that period a new approval must be obtained.

6.4(4) The commission may investigate and determine the matters involved in each application with or without formal hearing.

6.5(478) Upon completion of changes immediate advice shall be furnished this commission by the maintaining company or the one in charge of said changes. An inspection will be made by the commission of changes as soon thereafter as is convenient. Changes shall be carried on in accordance with provisions of 236.326. [Interstate commerce commission rules as set forth in 6.1(478)]

Upon completion of a new interlocking or other safety device, advice shall be furnished this commission preferably not less than three days in advance of time when protection is ready for inspection. The commission will endeavor to have the protection inspected at the time of its completion, but if unable to do so it will authorize the railroad company in charge to place the protection in conditional service subject to future inspection.

Conditional service shall mean that all units and other apparatus involved be connected and operated from the control point for a period of not less than 24 hours, unless otherwise specified. During conditional service all trains shall come to a full stop at the governing signal, regardless of its indication, and shall not proceed until proper signal indication is received.

6.6(478) Certificate of authority. A certificate of authority for the operation of the protection and the passage of trains thereover without first having stopped will be issued to each of the interested railroad companies after inspection by the commission, if the protection is satisfactorily installed and is in accordance with the approved plans.

6.7(478) Modification of rules, standards and instructions. The commission reserves the right to modify any of the provisions of these rules in any specific case or otherwise when in the commission's opinion, public interest or safety will be better served by so doing.

Any party or parties desiring to make any departure from these rules, or believing them unreasonable or inadequate may file a written petition with the commission, whereupon the commission will take such action as may seem to it proper.

6.8(478) Abandonment or permanent removal. Whenever protection is permanently taken out of service the commission must be notified immediately. Under such a circumstance, train movements will be governed by the usual precautions prescribed by statute, governing train movements over and across railroad grade crossings, junctions and drawbridges. (Sec. 478.31 of the Code)

6.9(478) Interlocking reports. A report for each authorized protection shall be filed quarterly with the commission by the railroad company in charge of the maintenance of said protection. The report shall be filed on a prescribed form adopted by the commission. It shall be filed within 30 days after the end of the quarter year for which the report is made.

[Filed prior to July 4, 1951]

CHAPTER 7
HIGHWAY RAILROAD CROSSING SIGNALS

7.1(478) In the exercise of powers conferred by statutes relating to highway grade crossing protective devices, the Iowa state commerce commission by order dated December 28, 1934, adopted flashing light and flashing light with rotating stop banner type signals as standards for installation at highway railroad grade crossings in the state of Iowa and subsequently on April 23, 1938, by order additionally adopted the wigwag type signal as one of the standards, providing therein that requisites would be adopted covering signal types, such requisites being adopted August 23, 1938, including plan entitled "Highway Crossing Signal Standards—Iowa", said plan by reference made a part hereof. Requisites read as follows:

7.2(478) Aspects. [Detailed drawings of various crossing signals may be obtained from the Iowa commerce commission.]

7.3(478) Location.

7.3(1) At least one signal shall be located upon each side of the track or tracks and on the right-hand side of the highway as viewed by traffic approaching the crossing. The signals shall normally be located not less than eight feet or more than 15 feet from the gauge line of the nearest rail of the railroad and not less than six feet or more than 12 feet from the right-hand edge of the pavement or traveled way. The dimensions given are to the center of the mast.

7.3(2) Additional signals or lamp unit assembled may be required where local conditions warrant.

7.4(478) Operating time.

7.4(1) On through tracks, automatically controlled crossing signals shall be arranged to provide not less than 20 seconds' warning for the fastest train approaching the crossing from either direction.

7.4(2) Unless otherwise provided, passing, siding and switch tracks shall be provided with short crossing track circuits extending preferably not less than 100 feet beyond highway in both directions.

7.5(478) Operating power. Two sources of power shall be provided for the operation of crossing signals.

7.6(478) Circuits.

7.6(1) All single or multiple track not in existing signal territory shall have full crossing protection obtained by the staggering of rail insulation at the crossing and by means of shunt connections of the interlocking relays or equivalent arrangement.

7.6(2) All single track within existing signal territory and all multiple track in signal territory in municipalities shall have full protection obtained by means of short track circuits over the crossing.

7.6(3) The short track circuit, on multiple track operations in the country and when within existing signal territory, may be omitted where the likelihood of back-up or reverse movements over the crossing is remote.

7.7(478) Lamp units.

7.7(1) *Flashing light:*

a. Lamp units (center of lens), unless otherwise specified, shall be located not less than seven feet ten inches, and not more than nine feet above the surface of the highway.

b. Signal lights shall shine in both directions along the highway, and shall be mounted horizontally two feet six inch centers. Lamp units shall be arranged in pairs, back to back, and shall be open at the front and be designed so that the door will move to the side or downward. Peep holes may be used.

c. Lamp units shall be equipped with mountings providing ready adjustment in all directions with positive locking for such adjustments.

d. Lamp units shall be provided with hoods not less than 12 inches in length and with backgrounds 20 inches in diameter. Hoods and backgrounds shall be painted black.

e. Lamp units shall have lenses or roundels, red in color, not less than eight and three-eighths inches in diameter for both front and rear indications. Transmission values, based on A. A. R., Signal Section, standard scale, shall be 220 to 300.

f. The beam spread shall be not less than ten degrees each side of the axial beam under normal conditions. This beam spread is interpreted to refer to the point at the angle mentioned where the intensity of the beam is 50 percent of the axial beam under normal conditions.

7.7(2) *Wigwag:*

a. Center of lens, unless otherwise specified, shall be located not less than seven feet ten inches and not more than nine feet above the surface of the highway.

b. Signal light(s) located in wigwag banner disc shall shine in both directions along the highway. The light(s) shall light only at the extremes of the swing of banner, producing an aspect of flashing lights spaced 30 inches apart. An auxiliary light shall be provided to light automatically in case of failure of normal light(s). As an alternate a double filament type bulb having an auxiliary filament of longer rated life than main filament may be used in signals having individual lamp units and reflectors for each direction.

In case the banner fails to make its initial movement from the vertical position, provision shall be made in the wigwag mechanism to insure that the light(s) in the banner will illuminate when current is applied.

c. A metal framework shall encompass the banner at its extreme positions affording a balanced outline reasonably in keeping with stationary lights with backgrounds.

d. The size and painting of disc shall be substantially in accordance with A. A. R. S. S. Drawing 1553. The use of the word "STOP" on the disc is optional, but when used a mask must be provided to hide it when the disc is in a vertical position. Crystal lenses with light back of them or reflector buttons may be used in the word "STOP".

e. Lamp units shall have lenses, red in color, not less than six and three-eighths inches in diameter for indication in both directions along the highway. Transmission values based on A.A.R. Signal Section, standard scale, shall be 220 to 300.

f. The beam spread shall be not less than ten degrees each side of the axial beam under normal conditions. This beam spread is interpreted to refer to the point at the angle mentioned where the intensity of the beam is 50 percent of the axial beam under normal conditions.

7.8(478) Flashes.

7.8(1) *Flashing light.* Lights (in pairs) shall flash alternately. The number of flashes for each light per minute shall be 30 minimum and 45 maximum.

7.8(2) *Wigwag.* The number of cycles per minute shall be 30 minimum and 45 maximum. Movement from one extreme to the other and back constitutes a cycle.

7.9(478) Range.

7.9(1) *Flashing light.* The effective range of flashing lights equipped with ten-volt, ten-watt lamps, or equivalent, burning at rated voltage shall be not less than 1500 feet under bright sunlight conditions with the sun at or near the zenith. This requirement applies to both front and rear indications.

7.9(2) *Wigwag.* The signal light, when disc is at either end of cycle, shall have a range at night of 1500 feet.

7.10(478) Signs.

7.10(1) The "Railroad Crossing" sign shall normally be in accordance with A. A. R. S. S. Drawing 1642.

7.10(2) The "Number of Tracks" sign shall normally be in accordance with A. A. R. S. S. Drawing 1645.

7.11(478) Bells. If local conditions at a crossing warrant, one or more gong-type bells may be used. Bell shall operate independently of remainder of mechanism, excepting where bell operates as an integral part of a wigwag mechanism.

7.12(478) Signs. A reflector button sign "STOP ON RED SIGNAL" shall be provided for signals shown at Figures 1 and 3 of attached drawings. Such sign shall be in accordance with A. A. R. S. S. Drawing 1646. It shall be displayed toward highway traffic approaching the near side of crossing.

APPLICABLE ONLY TO FLASHING LIGHT WITH ROTATING DISC

7.13(478) Signs. The "STOP" sign shall be octagonal in shape, 24 inches across the flats, suitably formed of sheet steel, and have the word "STOP" in reflector buttons per details of drawing attached.

7.14(478) Mechanism.

7.14(1) The "STOP" sign shall be returned to and held in a stop position perpendicular and at right angles to the center line of the highway by the force of gravity and shall be moved to and held in a clear position parallel to the center line of the highway by the application of electrical energy.

7.14(2) The mechanism shall be arranged to rotate the "STOP" sign about its vertical axis from its stop position to its clear position through an angle of 90 degrees against the force of gravity, retaining it in that position as long as electrical energy is supplied and to cause it to return to its stop position by the force of gravity when through the failure of any part or circuit the electrical energy is cut off. The parts shall be locked in their stop and clear positions against any force applied from without the mechanism case.

7.14(3) The "closed circuit" principle shall be made fundamental in the detailed design of all parts of the operating mechanism and in its control and operation.

APPLICABLE TO TYPE UNDER 1—(d)
FLASHING LIGHT-AUTOMATIC GATE TYPE SIGNALS

7.15(478) Signals.

7.15(1) Signals consisting of a combination of flashing light signals and automatic gates shall when indicating the approach of a train present toward the highway the appearance of swinging red light or lights and of horizontal arm or arms extending over the traveled roadway, a sufficient distance to cover the lane or lanes used by traffic approaching the crossing.

7.15(2) Flashing light signals shall meet the requirements shown in these requisites as applying to such signals excepting that "STOP ON RED SIGNAL" sign need not be provided.

7.15(3) The automatic gate arms, when not indicating the approach or presence of a train, shall not obstruct or interfere with highway traffic.

7.15(4) The automatic gate arms shall be mounted on posts or housings containing the arm-operating mechanisms. The posts or housings shall be located not less than three feet from right-hand edge of pavement or traveled way.

7.15(5) The design of the gate operating mechanisms, as far as practicable, shall be such as to insure proper operation during unfavorable

weather conditions, and in case of power failure the gate arm shall assume the horizontal position across the roadway.

7.15(6) The mechanisms shall be so designed that if the arms, while being raised or lowered, strike or foul an object they will readily stop, and on removal of the obstruction shall assume the position corresponding with the control apparatus. The gate arms shall be so arranged that if a vehicle is on the crossing with the gates lowered it may proceed off the crossing.

7.15(7) Circuits for operation of the signals shall be so arranged that flashing lights, gate-arm lights and bell (if bell is used) will start to operate not less than 20 seconds before the fastest train reaches the crossing and will operate between three and five seconds before the automatic gates start to descend. Gates shall reach full horizontal position before the arrival of the fastest train operated over the crossing and remain down until the rear of the train has cleared the crossing.

7.15(8) In addition to the requirements of 7.15(7), the circuits for the operation of the signals shall be so arranged that the flashing lights, gate-arm lights and bell will operate at any time gate arm is in a position to interfere with highway traffic, regardless of whether or not a train is approaching the crossing.

7.15(9) Each gate arm extending over the roadway shall have three red lights, shining in both directions along the highway, so positioned as to insure, as far as possible, that no vehicle or vehicles standing within the limits of the traffic lane or lanes approaching the crossing can obscure all three lights from the view of drivers of following vehicles. The light nearest the tip of each arm shall burn steadily, and the other two lights on each arm shall flash alternately in unison with the flashing lights on the roadside signal mast.

7.15(10) The bottom of gate arms, when in the horizontal position, shall not be less than three, nor more than four feet above the crown of the roadway.

7.15(11) The gate arms shall be painted on both sides with alternate diagonal stripes of white or aluminum and black.

7.15(12) In each black stripe of each gate arm on the approach side only, there shall be a diagonal row of not less than three crystal or colorless reflector lenses, not less than one-half inch in optical diameter, to reflect the headlight beams of approaching motor vehicles.

7.15(13) Details of the signals, gates, operating mechanisms and control circuits shall be in accordance with A. A. R. recommended practice.

7.15(14) The gate arms shall operate uniformly, smoothly and complete all movements without rebound or slap and be securely held when in the raised position.

7.15(15) Each individual gate post shall be provided with independent operating mechanism, and housing to be of sufficient size to allow ready inspection, adjustment and repairs.

7.15(16) The highway traffic lanes in the vicinity of the crossing shall be distinctly marked. The marking and maintenance thereof will be provided by authorities having jurisdiction of the particular highway.

APPLICABLE TO ALL TYPES OF SIGNALS

7.16(478) Painting. Metal parts shall be painted in accordance with A. A. R. Signal Section requirements, and unless otherwise specified will be finished with white or aluminum.

7.17(478) Foundations. Foundations shall be substantially in conformity with A. A. R. Signal Section Drawing 1107. They shall be level and set parallel to track except where alignment of apparatus requires otherwise. Dimensions are for level and solid ground.

7.18(478) Material and workmanship. All material and workmanship shall be first class in every respect, and every signal installation in all its details shall be constructed and installed to the satisfaction of the Iowa state commerce commission.

7.19(478) Deviations. The commission reserves the right to make such deviations from these requisites as may appear just and proper under the circumstances, it being understood, however, that there will be no change in uniformity of standard aspects in these variations.

[Filed prior to July 4, 1951]

CHAPTER 8
REPORTING OF RAILWAY ACCIDENTS

8.1(474) In the exercise of powers conferred in section 474.46, concerning the furnishing of immediate notice by railroad companies relating to loss of life or personal injuries occurring in connection with railroad accidents in the state of Iowa, the Iowa state commerce commission adopted "Rules for the Reporting of Railway Accidents in the State of Iowa" effective November 1, 1932, together with a form for the reporting of said accidents, by reference made a part hereof.

8.2(474) Monthly reports. The monthly reports of railway accidents (including rail failures causing train accidents) should be made on forms provided by this commission or on forms identical therewith in arrangement, size, color and weight of paper. The forms provided, which are of four kinds, are designated as Forms V. T. R. and F. This commission has adopted "Rules Governing Monthly Reports of Railway Accidents", 1922 Revision, issued by the interstate commerce commission, bureau of standards, and such rules shall govern in the monthly reports of railway accidents to this body.

8.3(474) Immediate report. [See §474.46 of the Code.] The form provided for the purposes of immediate report is Form "C" which is furnished by this commission. Upon the occurrence of any train or train service accident involving serious injury or loss of life, except to trespassers, this form should be filled out and immediately returned. The completed Form "C" report will be returned regardless of the fact that telegraphic report has been made as outlined in 8.4(474).

8.4(474) Telegraphic report. In addition to the provisions of 8.3(474), immediate report by telegraph or other equal facility should be made as directed for the following classes of accidents:

8.4(1) *Collisions.* A collision is a violent impact of a train, locomotive or car with some other train, locomotive or car while both are on rails. Accidents, however, in which cars not in suitable condition to withstand common train usage, that when coupled in trains may be damaged through ordinary train movements, should be classified as miscellaneous train accidents and not as collisions. Rear-end, head-on, side or raking and railroad grade crossing collisions should be reported by telegraph in all cases where death or serious injury results, except to trespassers, also in cases where damage to railway property amounts to more than $150, including the cost of clearing wreck. Collisions involving yard service need only be reported where death or serious injury results.

8.4(2) *Derailments.* Derailments of all classes should be reported where reportable casualties result, excepting to trespassers. Other derailments than those involving yard service should be reported where the damage to railway property exceeds $300, including the cost of clearing wreck. Particularly such derailments as those involving defects in tracks, bridges, switches, signals or other defects in roadway, or such as are the result of malicious intent or tampering, should be reported.

8.4(3) *Locomotive boiler accidents.* All locomotive boiler accidents are reportable by telegraph, which involve serious injury or loss of life, except to trespassers.

8.4(4) *Other accidents.*

a. Accidents to persons on moving cars or locomotives resulting from coming in contact with any structure or fixture above or at the side of track.

b. Accidents to employees in train service due to defective equipment, parts or appurtenances.

This report will be made where death or serious injury results from cause set out above, except to trespassers.

8.5(474) Serious injury. The interpretation of serious injury shall mean:

8.5(1) Injury to an employee sufficient to incapacitate him from performing his ordinary duties for more than three days in the aggregate during the ten days immediately following the accident. This rule applies to employees on duty and others classed as not on duty, but does not apply to employees classed as passengers or trespassers.

8.5(2) Injury to a person other than an employee if the injury is sufficient, in the opinion of the reporting officer, to incapacitate the injured person from following his customary vocation or mode of life for a period of more than one day. This rule applies also to employees classed as passengers or trespassers.

8.6(474) General application. There may be from time to time accidents which result from causes other than those listed above and which the commission may desire to investigate. The reporting of such accidents must necessarily be left to the judgment of the reporting officer, and if he feels that the accident is such as this body would wish to investigate he will immediately report by telegraph or other equal facility. The desire is to have reported all accidents, whether or not they involve injuries or death, which are due to causes that are worthy of investigation.

8.7(474) Monthly reports. In the exercise of powers conferred by statutes relating to the reporting of railway accidents the Iowa state commerce commission adopted rules of the interstate commerce commission, bureau of statistics, 1922 revision, effective January 1, 1922, entitled "Rules Governing Monthly Reports of Railway Accidents" together with reporting forms required in connection therewith, the rules and reporting forms by reference made a part hereof, as requirements for the monthly report of railway accidents occurring on railroads operated in the state of Iowa, insofar as the commission has jurisdiction; and matters not coming within the provisions of these rules or to which these rules cannot be made applicable shall be given separate consideration by the commission.

[Filed prior to July 4, 1951]

CHAPTER 9
ABANDONMENT OF STATIONS AND SERVICE

9.1(474) Under the provisions of sections 474.15, 474.16 and 474.17 and in the exercise of powers therein conferred, the Iowa state commerce commission on the first day of June, 1951, revised and readopted an order dated June 18, 1937, prescribing form of notice for posting at railroad stations where a railroad company proposes to abandon a railway station or to remove a depot or to discontinue a station or agency.

9.2(474) Form of notice, by reference made a part hereof, adopted effective June 28, 1937, was readopted.

A requirement that a railroad company before proceeding with the abandonment of a station or

the discontinuance of services thereat shall file a written request with the Iowa state commerce commission of its intention and request authority to post notices; also providing that notices not be posted until authority is received.

9.3(474) A requirement that the railroad company upon the completion of posting of notices shall file with the Iowa state commerce commission a copy of notice with affidavit form completed.

9.4(474) A requirement that the date named for abandonment or discontinuance of service shall be at least five days later than the final date for the filing of objections; also that not less than 15 days will be allowed for the filing of objections with the Iowa state commerce commission.

9.5(474) A requirement making the provisions of order equally applicable to proposed discontinuance of railway express agency services.

9.6(474) In the exercise of powers conferred by statutes relating to train service the Iowa state commerce commission adopted resolution dated March 30, 1948, prescribing form of notice for posting at railroad stations in Iowa where not more than one such train is now or hereafter operated on a daily or less than daily schedule.

9.7(474) Form of notice, by reference made a part hereof, adopted effective April 10, 1948.

9.8(474) A requirement that a railroad company before proceeding with the abandonment or permanent curtailment of described train service shall file a written request with the Iowa state commerce commission of its intention; requesting authority to post notices; and further providing that notice allow a period of 15 days for the filing of objections with the Iowa state commerce commission.

9.9(474) A requirement that proposed changes may become effective, if no objections are filed, on the twenty-fifth day after posting of notice; otherwise the same services previously furnished the public shall be continued until after determination by the Iowa state commerce commission.

9.10(474) A requirement that the railroad company, upon the completion of posting of notices, shall file with the Iowa state commerce commission a copy of notice with affidavit form completed.

9.11(474) A finding that the provisions of resolution do not apply where abandonment of railroad line has been permitted; and that the adoption of resolution in no manner affects present procedure of the Iowa state commerce commission in the handling of complaints relating to train services where the number of trains is greater than described in resolution.

9.12(474) The cancellation of the provisions of a resolution of the Iowa state commerce commission adopted January 30, 1943, provided, however, that the cancellation of said resolution shall in no manner affect the right of the Iowa state commerce commission to request information deemed by it advisable and proper in connection with the handling of matters relating to train service.

[Filed prior to July 4, 1951]

CHAPTER 10
PIPE LINES AND UNDERGROUND GAS STORAGE

10.1(490) Definitions. Terms not otherwise herein defined shall be understood to have their usual meaning.

1. "Approximate right angle" shall mean within five degrees of a 90 degree angle.
2. "Commission" shall mean the Iowa state commerce commission.
3. "Multiple line crossing" shall mean a point at which a proposed pipe line will either overcross or undercross an existing pipe line.
4. "Permanent permit" shall mean a permit issued after appropriate application to and determination by this commission.
5. "Permit" shall mean a permanent permit or renewal permit issued by the Iowa state commerce commission.
6. "Pipe line" shall mean any pipe, pipes or pipe lines used for the transportation or transmission of gas, gasoline, oils or motor fuels or inflammable fluids.
7. "Pipe-line company" shall mean any person, firm, co-partnership, association, corporation or syndicate engaged in or organized for the purpose of owning, operating or controlling pipe lines for the transportation or transmission of gas, gasoline, oils or motor fuels or inflammable fluids.
8. "Renewal permit" shall mean the reissuance of a permanent permit after appropriate application to and determination by this commission.
9. "Underground storage" shall mean storage of gas in a subsurface stratum or formation of the earth.
10. Technical terms not herein defined shall be as defined in ASA B31.3 and .4—1966 and ASA B31.8—1963 and as the same may hereafter be revised.

10.2(490) Petition for permit. Petition for permit shall be made to this commission upon the form prescribed. A typical set of exhibits to such petition, which exhibits are labeled "A", "B", "C", "D" and "E" are described below:

Exhibit "A". A description of the proposed route of the pipe line. This should be as specific and detailed as circumstances permit. This commission would prefer a legal description showing the general direction of the proposed route through

each quarter section of land to be crossed, including township and range and whether on private or public property, public highway or railroad right of way, together with such other information as may be deemed pertinent. Construction deviation of 160 rods from proposed routing will be permitted.

If it becomes apparent that there will be deviation of greater than 160 rods in some area from the proposed route as filed with this commission, construction of such line in such area shall be suspended. Exhibits "A", "B" and "E" reflecting such deviation shall be filed, and the procedure hereinafter set forth to be followed upon the filing of a petition for permit shall be followed.

Exhibit "B". Maps of proposed routing of the pipe line. Such maps shall have a minimum scale of not less than one inch to one mile. Strip maps will be acceptable. Two copies of such maps shall be filed.

Exhibit "C". A showing on forms prescribed by this commission of engineering specifications covering the engineering features, materials and manner of construction of the proposed pipe line, its approximate length, diameter and the name and location of each railroad and primary highway and the number of secondary highways to be crossed, if any, and such other information as may be deemed pertinent.

Exhibit "D". Satisfactory attested proof of solvency and financial ability to pay damages in the sum of $50,000 or more; or surety bond satisfactory to this commission in the penal sum of $50,000 with surety approved by this commission, conditioned that the petitioner will pay any and all damages legally recovered against it growing out of the operation of its pipe line or gas storage facilities in the state of Iowa; or security satisfactory to this commission as a guarantee for the payment of damages in the sum of $50,000.

Exhibit "E". Consent or other showing of right of appropriate public highway authorities, or railroad companies, where the pipe line will be placed longitudinally on, over or under, or at other than an approximate right angle to railroad tracks or highway, when such consent is obtained prior to filing of the petition and hearing thereon shall be filed with the petition.

Should the exact and specific route be uncertain at the time of petition, a statement shall be made by petitioner that all such consents or other showing of right will be obtained prior to construction and copies thereof filed with this commission.

Additional exhibits. If permission is sought to construct, maintain and operate facilities for underground storage of gas, said petition shall include the following information, in addition to that stated above:

a. A description of the public or private highways, grounds and waters, streams and private lands of any kind under which such storage is proposed, together with a map thereof.

b. Maps showing the location of proposed machinery, appliances, fixtures, wells and stations necessary for the construction, maintenance and operation of such facilities.

10.3(490) Publication of notice of hearing. When a petition for permit is received by this commission, accompanied by proper exhibits, it shall be docketed for hearing and petitioner shall be advised of the time and place of hearing. Petitioner shall also be furnished copies of the official notice of hearing which petitioner shall cause to be published once each week for two consecutive weeks in some newspaper of general circulation in each county in or through which construction is proposed. Proof of such publication shall be filed prior to or at such hearing, together with receipts showing that costs of such publication have been paid by petitioner.

10.4(490) Objections. All whose rights or interests may be affected by the object of a petition may file written objection thereto. Such written objection shall be filed with the secretary of this commission not less than five days prior to date of hearing. This commission may, for good cause shown, permit filing of objections less than five days prior to hearing, but in such event petitioner shall be granted a reasonable time to meet such objections.

10.5(490) Hearing. Hearing shall be not less than ten or more than 30 days from the date of last publication of notice of hearing.

Petitioner shall be represented by one or more duly authorized representatives or counsel or both. This commission may examine the proposed route of the pipe line or location of the underground storage facilities which are the object of the petition or may cause such examination to be made on its behalf by an engineer of its selection. One or more members of this commission or a duly appointed hearing examiner shall consider such petition and any objections filed thereto and may hear such testimony as may be deemed appropriate. One or more petitions may be considered at the same hearing. Petitions may be consolidated. Hearing shall be held in the office of this commission or at such other place within the state of Iowa as this commission may designate.

10.6(490) Permanent permit. If after hearing and appropriate findings of fact it is determined a permit should be granted, a permanent permit will be issued. Otherwise such petition shall be dismissed with or without prejudice. Where proposed construction has not been established definitely, the permanent permit will be issued on the route or location as set forth in the petition, subject to deviation of up to 160 rods on either side of such proposed route. If the proposed construction is not completed within two years from the date of issue, subject to extension at the discretion of this commission, such permanent permit shall

be void and of no further force or effect. Upon completion of the proposed construction, maps of the final routing of the pipe line, bearing rechain survey notes, shall be filed with this commission.

A permanent permit shall normally expire 25 years from date of issue. No such permit shall ever be granted for a longer period than 25 years.

10.7(490) Renewal permits. Petition for renewal of permit may be filed at any time subsequent to issuance of a permanent permit and prior to the expiration thereof. Such petition shall be made on the form prescribed by this commission. Instructions for the use thereof are included as a part of such form. The procedure for petition for permit shall be followed with respect to publication of notice, objections and hearing. Renewal permits shall normally expire 25 years from date of issue. No such permit shall ever be granted for a longer period than 25 years. The same procedure shall be followed for subsequent renewals.

10.8(490) Amendments of permits. Petition may be filed for amendment of permanent or renewal permit to cover construction of a line paralleling an existing line of petitioner or to make contiguous extension of an existing underground storage area of petitioner. Such petition for amendment shall be made on the form prescribed by this commission. Such petition shall have attached those same exhibits required for a petition for permit. If such petition for amendment is for paralleling construction and the same falls within the 160 rods permissive deviation of the permanent permit or subsequent renewal permit, the requirement of publication of notice and hearing may be waived. Subject to such exception only, the procedure for petition for permit shall be followed in all instances. Upon appropriate determination by this commission, an amendment to permanent permit will be issued. Such amendment shall be subject to the same conditions with respect to completion of construction within two years and the filing of final routing maps as attached to permanent permits.

10.9(490) Fees. All fees shall be payable to "Iowa state commerce commission".

All fees referred to below shall be paid in the year of issuance of the permit to which they apply. Such fees shall be collected on the basis of approximate mileage as shown in the particular petition. Upon the filing of final routing maps fees shall be paid or refunded on the basis of adjusted mileage.

Construction inspection fee. Upon issuance of a permanent permit, petitioner shall pay a fee of 50 cents per inch of diameter for each mile or fraction thereof of pipe line covered by such permit.

Annual inspection fee. For each calendar year subsequent to the year in which the construction inspection fee was paid, for which year or fraction thereof a permit (permanent or renewal) shall be effective, there shall be paid an annual inspection fee of 25 cents per inch of diameter for each mile or fraction thereof of pipe line. Such payment shall be made prior to January 1 of such calendar year.

Paralleling line fee. A construction inspection fee shall be paid upon the issuance of an amendment to permanent permit and an annual inspection fee shall be paid for each year thereafter that such permit is in force. Both such fees shall be determined as above.

Renewal permit fee. Upon issuance of a renewal permit, there shall be a fee of $25 per petition, as the same may be consolidated, plus a flat fee of 50 cents per mile or fraction thereof of pipe line involved, irrespective of diameter, to cover the costs and expenses of the commission in conjunction therewith. Such payment shall be in addition to the annual inspection fee.

10.10(490) Inspections. This commission shall from time to time examine the construction, maintenance and condition of pipe line, underground storage facilities and equipment used in connection with such pipe line or facilities in the state of Iowa to determine if the same is unsafe or dangerous. One or more members of this commission, one or more duly appointed representatives hereof or the same together may enter upon the premises of any pipe-line company within the state of Iowa for the purpose of making such inspections. Except under extreme circumstances, such inspections shall be made after adequate opportunity has been provided for a representative of such company to accompany such inspecting party.

10.11(490) Standards for construction, operation and maintenance. All pipe lines and underground storage facilities and all equipment used in connection therewith shall be constructed, operated and maintained in accordance with either section 3—PETROLEUM REFINERY PIPING CODE (designated as ASA B31.3—1966), section 4—OIL TRANSPORTATION PIPING CODE (designated as ASA B31.4—1959) or section 8—AMERICAN STANDARD GAS TRANSMISSION AND DISTRIBUTION PIPING SYSTEMS (designated as ASA B31.8—1963), of the American Standard Code for Pressure Piping published by the American Society of Mechanical Engineers, insofar as the same may be applicable, and as said sections may be hereafter altered, amended or modified by said society.

This commission has adopted certain specifications for undercrossings of primary and secondary roads and railroads in addition to those found in such above-mentioned code. Should conflict exist between such specifications, such conflict shall be resolved by this commission after written information has been filed of such conflict by any party desiring clarification.

10.12(490) Undercrossing permits. Undercrossings of primary or secondary highways and railroad right of ways shall be at an approximate right angle as herein defined, with an addi-

tional construction tolerance of five degrees being permitted, unless permission to vary further therefrom is obtained from the proper authority and filed with this commission.

Permission to undercross primary or secondary highways need be sought only from this commission, except in case of undercrossings installed at other than an approximate right angle, as herein defined, in which case permission must be sought from either the Iowa state highway commission or the appropriate county board of supervisors.

It is recommended however, that pipe-line companies confer with appropriate highway authorities before crossing primary or secondary highways, in order that such companies may determine contemplated future changes in such highways which may influence the location of pipe-line facilities. It is further recommended that pipe-line companies give such authorities advance notice of their intent to cross highways. It is the policy of this commission to give notice to highway authorities of petitions of pipe-line companies for authority to construct pipe lines which will cross highways under the jurisdiction of such authorities.

No special permit need be obtained to cross rivers, waters and streams within the state of Iowa where such crossings are included within a petition to this commission.

10.13(490) River crossings. This commission has primary state jurisdiction to issue permits to cross rivers, waters and streams within the state of Iowa and its jurisdiction in such respect is paramount to that of the Iowa state conservation commission.

As a matter of co-operation, this commission has agreed to furnish the Iowa state conservation commission information relative to crossings of rivers, waters and streams, together with plats of such crossings upon the filing of a petition indicating such crossings. Pipe-line companies shall provide information direct to the Iowa state conservation commission pertaining to the date of commencement of construction where such crossings are involved.

10.14(490) Distribution mains. No petition need be made for permit to construct, operate or maintain a gas main or distribution main as technically defined in ASA B31.8—1963 and which will be operated at a pressure of less than 150 pounds per square inch.

10.15(490) Accidents. A preliminary report shall be sent to this commission by registered or certified letter within 24 hours of any accident arising from, or in any way connected with the operation of a pipe line or underground storage facility within the state of Iowa, which accident results in personal injury or damage in excess of $500 to the property of others. Such preliminary report shall give the outstanding characteristics of such accident. Such report shall be followed within a reasonable time by a full written report giving complete details of such accident.

No preliminary report need be made in the event of an accident resulting only in damage to the property of the pipe-line company. A written report of such accident shall be filed with the secretary of this commission within a reasonable time. Accidents involving damage to the pipe line or underground storage facilities of the pipe-line company in an amount less than $1,000, including costs of repair, need not be reported to this commission.

The dollar amounts of damage and repair costs hereinabove referred to must necessarily be the results of the pipe-line company's best estimates made at the time of such accident.

10.16(490) Removal or relocation of pipe lines. Notice of removal from service or relocation of existing pipe lines for which permits have been obtained shall be supplied the secretary of this commission. Such notice shall be accompanied by a plat of the pipe line as relocated or, in the case of removal from service, a plat showing the portion of pipe line removed. No such notice need be supplied of a relocation of 300 feet or less on either side of the survey center line as filed with this commission unless said relocation would result in placing said pipe line within 300 feet of an occupied residence. Relocations of 160 rods or more shall require the filing of a petition for permit.

10.17(490) Sale or transfer of permit. No permit shall be sold without prior written approval of this commission. No transfer of a permit prior to completion of construction shall be effective until the permittee shall file with this commission written notice of date of transfer and name and address of the transferee.

10.18(490) Amendments to rules. These rules are subject to such amendments or exceptions as this commission may deem advisable. Parties desiring to depart from these rules may make written requests to this commission, whereupon appropriate action will be taken. Amendments hereto shall apply only to permits issued after the effective date of such amendments.

[Filed July 19, 1960; amended August 23, 1962, November 14, 1966]

CHAPTER 11
RESEARCH AND STATISTICS
ACCOUNTING RULES AND REGULATIONS

11.1(474) Commission's adoption of interstate commerce commission accounting rules and regulations. Classes I, II and III steam railways, railway bridge companies, railway terminal companies, electric interurban railways, Railways Express Agency, Inc., The Pullman Company, class I freight and passenger motor carriers shall adhere to the accounting rules as prescribed by the interstate commerce commission relating to system and Iowa operations.

11.2(474) Accounting rules applicable to class II freight and passenger motor carriers.

11.2(1) Single entry accounting shall be used regarding daily records that should be kept on operating and nonoperating revenues, operating expenses and operating statistics deemed necessary by the commission.

11.2(2) Revenues are to be entered each day as earned, not once a week or only when collections are made. Rents and interest income should be entered on the day received.

11.2(3) Operating expenses should be entered daily except salaries that are paid weekly or monthly, rents paid monthly and interest paid. Depreciation charges are to be entered in operating expenses on the fifteenth of each month; and when equipment is retired, such charges cease to be an operating expense. Depreciation may be charged only during the period equipment or facilities are actually being used in connection with operation authorized by this commission.

11.2(4) Freight motor carriers shall keep daily records on pounds carried and truck or tractor miles operated, on system and within the state of Iowa, separately.

11.2(5) Passenger motor carriers shall keep daily records on passengers carried, bus miles operated and motor passenger miles revenue, on system and within the state of Iowa, separately.

11.2(6) Revenues earned within the state of Iowa should include all intrastate revenues and a mileage prorate of interstate revenues.

11.2(7) Individual equipment records must be kept showing description, cost, monthly depreciation and mileage records.

11.2(8) Record should be kept on the accrual basis, so that at the end of each calendar year, licenses, insurance, etc., paid for in advance may be carried in prepayment accounts on financial statement and not shown as an expense in the year it is not used.

11.2(9) Records are to be set up and kept beginning at the time operations commence and that at no time shall daily entries be more than five days in arrears. Such records must be kept intact and open for inspection by our representatives at any time. Daily records, for one calendar year or any portion thereof, shall not be destroyed before three years, after the close of such calendar year.

11.2(10) Other records may be kept in addition to these prescribed by the commission, but in no instance shall any class II motor carrier fail to keep daily records as prescribed under this rule.

FILING MOTOR CARRIER ANNUAL REPORTS

11.3(474) Instructions relating to filing annual report forms by class II motor carriers.

11.3(1) Annual report form must be filled out in duplicate and one copy, duly verified and sworn to before a notary public or someone authorized to administer oaths, filed with the office of the Iowa state commerce commission, Des Moines, Iowa, on or before February 28 of the year following that for which annual report is filed.

11.3(2) Every annual report must, in all particulars, be complete in itself; and reference to the return of former years should not be made to take the place of required entries.

11.3(3) If it be necessary or desirable to insert additional statements, typewritten or other in a report, they should be legibly made on durable paper and, wherever practicable, on sheets not larger than a page of the annual report form. Inserted sheets should be securely attached, preferably at the inner margin; attachment by pins or clips is insufficient.

11.3(4) All entries in the report form should be taken from the motor carrier's daily record, and must be made in permanent black ink, except those of a contrary or unusual character, which should be in red ink.

11.3(5) Each motor carrier must make its annual report to this commission in duplicate, retaining one copy in its files for reference in case correspondence, with regard to said report, becomes necessary. For this reason two copies of the report form are furnished to each motor carrier concerned.

11.3(6) If for any reason a motor carrier is unable to complete and file its report on or before February 28, the commission may extend the time fixed for filing said report upon request and proper showing.

11.3(7) Failure to file said annual report may be considered by the commission as just cause for revocation of certificate.

11.3(8) The year means the calendar year ending December 31 of the year for which the report is made; or, in case the report is made for a shorter period than one year, it means the close of the period covered by the report within the calendar year for which the report is made.

11.3(9) Should the entire authority granted a motor carrier be transferred to another carrier, or revoked, a report covering the current operations during such calendar year, or portion thereof, must be completed and filed with this office not later than 30 days after the commission's order of transfer or revocation.

[Filed July 19, 1960; amended August 23, 1962, November 7, 1966]

CHAPTER 12
BONDED WAREHOUSE DIVISION

12.1(543) Application of rules. These rules are subject to such changes and modifications as the commission may from time to time deem advisable and to such exceptions as may be considered just and reasonable in individual cases.

12.2(543) Types of products to be warehoused. Products to be warehoused shall be divided into two general types or classes as follows:

12.2(1) *Bulk grain.* "Bulk grain" means grain that is not contained in sacks.

12.2(2) *Agricultural and farm consumable products other than bulk grain.* Such products include agricultural products suitable for storage in quantity, canned agricultural products and products used in producing other agricultural products.

For the purpose of storage, grain processed for seed purposes shall be classed as an agricultural product other than bulk grain.

12.3(543) Application for license. Application for a license to operate as a bonded warehouseman under the Iowa bonded warehouse law [ch 543 of the Code] shall be made to the commission on forms prescribed for that purpose, which will be furnished to prospective applicants upon request. All such applications should be typewritten and all information must be furnished as required by section 543.5.

12.4(543) Warehouse license. A warehouse license shall specify the type and quantity of products which may be stored in a licensed warehouse. A license may be issued authorizing the storage of either or both general types or classes of products to be warehoused provided the warehouse or warehouses described in the application is or are found to be suitable for the proper and safe storage of the product or products intended to be stored therein.

12.4(1) *Suitable storage.* No storage unit shall be considered suitable for the storage of bulk grain unless the warehouseman has available the necessary equipment such as; grain leg, portable augers or vacuvators for handling, receiving, loading out of grain and empty storage space to turn and condition the grain to be stored therein or unless said storage unit is properly equipped with means such as air ducts and ventilating fans to keep the grain stored therein from going out of condition.

12.4(2) *Warehouse license nontransferable.* No warehouse license shall be amended to cover change in name of the warehouseman.

12.5(543) Reinstatement of warehouse license. A warehouse license which has terminated may be reinstated by the commission upon receipt of proper application filed by the warehouseman, provided that such application is filed within 30 days from the date of termination of the warehouse license.

12.6(543) Bonds. Bonds filed with the commission shall be on forms prescribed and furnished by the commission.

12.6(1) *Amount of bond.* The amount of bond to be filed in connection with the storage of bulk grain and agricultural and farm consumable products other than bulk grain shall be determined in accordance with the provisions of section 543.13.

12.6(2) *Indemnification of licensed storage facilities.* Bonds shall be so written as to indemnify storage in the storage facilities of the warehouseman as described in the particular warehouse license issued to the warehouseman.

12.6(3) *Minimum bond.* The amount of bond prescribed in this rule is the minimum that will be accepted by the commission. However, a bond in a higher amount may be filed by the warehouseman if he deems it advisable in the operation of his warehouse business.

12.6(4) *Additional bond as commission may require.* If the commission deems it necessary in order to insure the faithful performance of the obligations of the warehouse under the terms of chapter 543 of the Code and rules of the commission, the commission may require bond be filed in an amount determined by the commission in addition to the minimum amount as required by section 543.13.

12.7(543) Insurance. Each warehouseman licensed by this commission shall keep fully insured, for its current market value, against loss by fire, inherent explosion or windstorm, all agricultural products in storage in his warehouse and all agricultural products which have been deposited temporarily in his warehouse pending storage or for purpose other than storage. Such insurance shall be carried in an insurance company or companies authorized to do business in this state and shall be provided by and carried in the name of the warehouseman. Each policy providing such coverage must have attached thereto an Iowa bonded warehouse endorsement form as prescribed by the Iowa state commerce commission. An insurance policy may include more than one station as defined by section 543.1(14). A station may be insured by more than one policy.

12.7(1) *Certificate of insurance.* As evidence of such insurance coverage having been provided, a certificate of insurance form as prescribed by the Iowa state commerce commission shall be filed with this commission.

a. Not more than one policy shall be included on any one certificate of insurance. Where one policy provides coverage for two or more stations a separate certificate of insurance shall be executed for each station shown on the policy.

b. The amount of insurance shown on a certificate of insurance shall be the total amount provided by the particular policy and for the particular station for which such certificate is executed.

12.7(2) Reserved for future use.

12.8(543) Notice to commission. The commission shall be notified at once in the following:

12.8(1) Of loss or damage to stored products or to licensed storage facilities.

12.8(2) The death of an individual or any member of a partnership operating a bonded warehouse.

12.8(3) Change of ownership of a bonded warehouse.

12.8(4) Change in name under which a bonded warehouse is operated.

12.8(5) Any structural change of a bin or facility.

12.8(6) The acquiring of additional storage facilities whether temporary or permanent, prior to the use of such facilities.

12.8(7) The termination of a lease on storage facilities, the destruction or removal of facilities, the leasing of a facility under license to any other person.

12.8(8) Before any facility under warehouse license may be used for the storage of any product other than that which it is licensed.

12.9(543) Scale weight ticket. Every licensed warehouseman shall have pre-numbered scale tickets showing the warehouseman's name and location. A copy of all such scale tickets shall be maintained in numerical sequence as part of the records. Any scale ticket used in pricing grain for the purpose of sale to the warehouseman shall have the price shown on all copies of such ticket.

12.10(543) Issuance of warehouse receipts. A warehouse receipt shall be issued for all agricultural products that become storage in a warehouse licensed by this commission no later than six months from date of deposit or at the time request is made by the depositor unless the warehouseman has in his possession a signed statement from the depositor that he does not desire a warehouse receipt be issued. If a depositor signs a statement that no warehouse receipt need be issued, such grain would then be deemed as open storage and would remain a warehouse obligation. The original warehouse receipt shall be issued to the depositor of the commodity placed in storage and one copy of such receipt shall be maintained as part of the warehouseman's records and one copy immediately filed with the commission.

12.10(1) *Unpriced or unpaid grain deemed held for storage after 30 days.* Any grain which has been received at any bonded warehouse for which the actual sale price is not fixed and documented on the warehouseman's records or payment made on the 30th day shall be construed to be grain held for storage within the meaning of the Iowa bonded warehouse law. Warehouse receipts shall be issued in accordance with the provisions of section 543.18.

Grain held in storage after the 30th day for which warehouse receipts have not been issued shall be deemed as open storage. The warehouseman's tariff charges shall apply to open storage the same as warehouse receipted storage. Open storage shall be considered as a storage obligation.

12.10(2) *Information on warehouse receipts.* Not more than one commodity, grade or value of commodity shall be shown on a warehouse receipt. All grade factors pertinent to determining grade shall be shown on warehouse receipts issued for bulk grain and any other information pertinent to the commodity stored under warehouse receipt should clearly be stated under the heading "Remarks". All warehouse receipts issued shall designate the person the receipt is issued to and whether it is issued negotiable or nonnegotiable.

12.11(543) Form of warehouse receipt. Warehouse receipt forms shall be of a size 7 inches in width by 8¼ inches in length and shall be printed in not less than quadruplicate for bulk grain and not less than triplicate for agricultural commodities other than bulk grain. The original receipt shall be white in color and the weight of the paper used shall not be less than 20 pound base. The commission's copy of the receipt shall be pink in color and the weight of the paper used shall not be less than 16 pound base. The warehouseman's copy shall be yellow color and shall not be less than 16 pound base. The owner's copy shall be green in color and shall not be less than 16 pound base.

Receipts issued for bulk grain and receipts issued for agricultural and farm consumable products other than bulk grain shall be in a form prescribed by the Iowa state commerce commission.

12.12(543) Cancellation of warehouse receipts. Upon delivery of the commodity represented by a warehouse receipt, the original receipt must be marked canceled upon the face thereof by the warehouseman or his authorized agent, signed and dated. The warehouseman may then retain such warehouse receipt in his possession and present the receipt to be canceled with the commission's stamp at the time of any inspection or examination of his warehouse records.

12.12(1) *Partial delivery of negotiable warehouse receipted commodity.* If only a portion of the commodity represented by a negotiable warehouse receipt is delivered, such warehouse receipt shall be marked canceled upon the face thereof by the warehouseman or his authorized agent, signed and dated and forwarded to the commission to be stamped with the commission's

cancellation stamp after which the receipt will be returned to the warehouseman and shall be kept as part of the warehouseman's permanent records. A new warehouse receipt must be issued covering the balance of the commodity remaining in storage at the time the original warehouse receipt is canceled.

12.12(2) *Voided receipts.* Original warehouse receipts voided by the warehouseman for any reason shall be so marked, signed and dated and held to be stamped with the commission's cancellation stamp in the same manner as canceling any other warehouse receipt.

12.12(3) *Surrender of warehouse receipts on cancellation or termination of license.* When a warehouse license is canceled or otherwise terminated, all unused warehouse receipts under such license shall be immediately surrendered to the commission for cancellation. Upon the cancellation or termination of a warehouse license all warehouse receipts which have been issued that are still outstanding must immediately be recalled, marked canceled, signed and dated by the warehouseman or his authorized agent and forwarded to the commission to be stamped with the commission's cancellation stamp after which said receipts will be returned to the warehouseman.

12.12(4) *Return or purchase of grain or replacement receipt issued upon cancellation of outstanding receipts.* At the time such outstanding receipts are canceled due to the cancellation or termination of a warehouse license, all grain represented by such outstanding warehouse receipts must be returned to the warehouse receipt holder unless purchased and paid for by the warehouseman or a replacement warehouse receipt issued under a new warehouse license.

12.12(5) *Delivery conditioned upon return of outstanding negotiable warehouse receipt.* No commodity represented by an outstanding negotiable warehouse receipt shall be delivered until such outstanding warehouse receipt is returned to the warehouseman.

12.12(6) *Cancellation of warehouse receipt conditioned on removal from storage or purchase and payment.* No warehouse receipt shall be canceled by the warehouseman until the commodity represented by such receipt has been removed from storage or purchased and payment made.

12.13(543) Settlement of obligations. The warehouseman shall make settlement upon demand to any person for the purchase of grain which has had the price fixed or no later than six months from date of delivery to the warehouse.

12.14(543) Lost or destroyed receipt. If a warehouse receipt is lost or destroyed, a duplicate warehouse receipt may be issued in accordance with the provisions of the Uniform Commercial Code. Before a duplicate warehouse receipt can be issued a bond must be provided in the amount equal to twice the value of the commodity and a copy of such bond filed with the commission. The indemnity bond required before the issuing of a duplicate receipt must be in a form that will fully protect any person injured by issuance of a duplicate receipt. A duplicate warehouse receipt must clearly state under the heading "Remarks" that it is a duplicate receipt, the lost receipt number it is replacing and the license number the lost receipt was issued under. If the products represented by the lost or destroyed receipt are to be removed from storage, a release may be procured from the person to whom the receipt was issued on a form provided by the commission. The release, in duplicate, must then be forwarded to the office of the commission.

12.15(543) Storing of commodities. Bulk grain in storage shall be leveled in such a manner that the amount of grain in the storage facility can be readily determined. Other than bulk grain storage shall be stored in such a manner that it can be readily inspected and the amount and kind thereof determined. Such maintenance, conditioning, care or surveillance shall be given to stored commodities as will be required to maintain the quality, grade and safe storage of the commodities. Nothing shall be placed or stored in licensed facility that will in any way contaminate the stored products or cause any degrading of grade or value.

12.15(1) *Storage of contaminating products or more than one type of agricultural commodity.* Facilities may be licensed for both bulk grain and agricultural products other than bulk grain; however, if products of a contaminating nature are stored in the facility, the facility must be removed from the license for any other agricultural products. If more than one type of an agricultural commodity is being stored in a facility, proper measures must be implemented to keep such commodities from intermingling.

12.15(2) *Stored commodities in licensed facilities.* All stored commodities shall be maintained in licensed facilities.

12.16(543) Warehouseman's obligation and storage. A warehouseman must at all times maintain sufficient quality and quantity of stored commodities in his warehouse to cover the obligations as investigation of the records shall indicate. If at the time of an examination a shortage is determined a warehouseman must immediately purchase and make actual payment for a sufficient quantity and quality of the commodity to fully cover the shortage.

12.17(543) Monthly statements. A statement shall be prepared at the close of business at the end of each calendar month and filed with the commission by the tenth of the month following. This statement shall be on a form prescribed by the commission, which will be furnished to the warehouseman upon request. A statement must be

filed for each calendar month regardless of whether or not the warehouseman has commodities in storage.

12.18(543) Tariffs. Each warehouseman, at the time of making application for a warehouse license, shall file a tariff with the commission and publish the same in accordance with the provisions of section 543.28. Such tariff shall be on a form prescribed by the commission, which forms will be furnished to the applicant upon request. Such tariff containing rates to be charged for storage, delivery and conditioning of stored products shall be furnished in duplicate to the commission. After being properly numbered and dated by the commission, one copy of the tariff will be returned to the applicant for publication. Publication of the tariff shall be made by posting the same in a conspicuous place at the place of business of the applicant.

12.18(1) *Application of tariff.* The tariff rates applicable to a stored commodity shall be those as contained in the tariff on file with the commission at the time the product was received for storage for the entire interim of the storage period. Tariff charges will cease upon cancellation of a warehouse license. Tariff charges will continue in accordance with the rates as filed by the successor warehouseman.

12.18(2) *Amending tariff.* Tariffs may be amended by the licensed warehouseman by filing a new tariff with the commission and publishing the same in the same manner as outlined for an original tariff. Such amended tariff shall contain rates to be charged for the storage, delivery and conditioning of all commodities to be stored by the warehouseman. The previous tariff shall continue to apply on all commodities received prior to the effective date of the amended tariff. The amended tariff will only apply to any commodities received thereafter and until further amendment of the tariff.

12.18(3) *Posting of license and tariffs.* Warehouse licenses with annual fee receipt and tariffs shall be posted in a conspicuous place at the warehouseman's place of business and in such a manner as to be protected from damage or effacement. If a warehouse license is amended, the amended license shall be immediately posted. If tariffs are amended, the amended tariff shall be posted and the previous tariff shall also be posted as long as there is any commodity in store subject to those rates.

12.19(543) Rates. Rates charged by a warehouseman for storage, conditioning and delivery of agricultural products shall be those contained in the effective tariff filed with the commission in accordance with the provisions of section 543.28 and rule 12.18(543); except there shall be no minimum charge requirement for storage or delivery of bulk grain stored under Supplement Tariff No. 1 for the sole purpose of processing and which is redelivered to the original depositor. Any grain that is held pending disposition and is sold within 30 days from date of delivery the tariff charges will not be applicable.

12.20(543) Identification of licensed storage units. Each storage unit or building licensed under the Iowa bonded warehouse law shall have painted thereon an identifying letter or numeral or both, assigned by the commission. These identifying letters or numerals shall be painted in a conspicuous place on the storage unit or building. Identifying letters or numerals on a storage unit or building must remain legible as long as the unit or building continues as a licensed storage facility.

12.21(543) Maintenance of storage facilities. All licensed storage facilities shall be maintained in such manner as to be suitable for the proper and safe storage of the particular product or products to be stored therein. Safe and adequate means of ingress and egress to the various storage units of the warehouse shall be provided and maintained by the warehouseman.

12.21(1) *Ladders and lifts on storage units.* Storage units having entrance over 20 feet above ground or floor level and not in excess of 50 feet above such ground or floor level shall be equipped with a fixed ladder or safe and adequate lift. If equipped with fixed ladder, such ladder shall have side rails and rungs, these rungs to be spaced not to exceed one foot centers and there shall be sufficient space between ladder rung and face of the structure to permit safe foothold. Permanent fixed ladders more than 24 feet in height shall have a safety cage attached which shall commence not less than 7 feet or more than 8 feet from ground level. Storage units having entrance over 50 feet above ground or floor level shall be equipped with safe and adequate lift.

12.21(2) *Catwalks or walkways.* Catwalks or walkways shall be so enclosed to a height of 42 inches from the floor to the handrail so as to provide complete safety for the person using such catwalks or walkways.

Walkways, lifts and ladders shall be kept clean and free of grain and other matter which might endanger the safety of persons using same.

12.21(3) *Removal of facilities from warehouse license.* Any storage facility which fails to meet these requirements will be called to the attention of the warehouseman. Failure of the warehouseman to place such facility in a suitable condition within a reasonable length of time will result in said facility being eliminated from coverage from the warehouse license in accordance with the provisions of section 543.8. Any facility found which is deteriorated to a point that it is unsuitable for storage shall be immediately removed from the warehouse license in accordance with the provisions of section 543.8 until such time that it will meet requirements and has been reinspected. If a

warehouseman feels a licensed facility has unjustly been removed from the warehouse license, he may petition the commission for hearing in order to review its action. The commission, after considering the facts, shall take such action as it deems just and reasonable.

12.22(543) Records. A warehouseman must maintain complete and sufficient records to show all deposits, purchases, sales, storage obligations and loadouts of the warehouse.

12.22(1) *Maintaining warehouse receipts.* Outstanding and canceled warehouse receipts must be maintained in numerical sequence.

12.22(2) *Daily position record.* A complete daily position record shall be maintained by all warehousemen.

12.22(3) *Contracts.* All copies of deferred payment contracts shall be numbered.

12.22(4) *Retention of records.* All records shall be kept for a period of not less than six years.

12.22(5) *Grade factors on scale tickets.* All grade factors on deposit of grain for which warehouse receipts are not issued must be documented on scale ticket or supplemental records.

12.23(543) Adjustment of records for operational shrink. Operational shrink shall be taken on a monthly basis and the warehouse records documented accordingly.

[Filed January 30, 1956; amended November 23, 1964, December 7, 1971, October 18, 1972]

MOTOR TRANSPORTATION DIVISION

CHAPTER 13
LIQUID TRANSPORT CARRIERS

13.1(327A) General information.

13.1(1) These rules are subject to such changes, modifications and amendments as the commission may from time to time promulgate and adopt under the provisions of chapter 17A of the Code.

13.1(2) *Waiver or suspension of rules.* The commission may in its discretion on its own motion or upon request for good cause shown, suspend or waive any of the rules.

13.1(3) *Person defined.* The word "person" when used in the rules of the commission will be interpreted by the commission as including any individual, firm, copartnership, joint adventure, association, corporation, estate trust, business trust, receiver or any other group or combination acting as a unit and the plural as well as the singular number.

13.2(327A) Insurance requirements.

13.2(1) *General.* Each liquid transport carrier shall at all times maintain on file with the commission effective insurance policy, policies or surety bond, made out in accordance with these rules with limits required by chapter 327A of the Code, with respect to the vehicles used in furnishing liquid transport carrier service. Such policy, policies or surety bond shall be written for a period of one year or more. A certificate of insurance in the form prescribed by the commission may be filed in lieu of a policy.

13.2(2) *Endorsement of policy.* Every policy filed or for which a certificate of insurance is filed with the commission shall have attached thereto the prescribed and applicable required endorsement or endorsements.

13.2(3) *Certificates of insurance.* Certificates of insurance filed with the commission for liquid transport carriers in lieu of insurance policies written for the limits as prescribed by chapter 327A of the Code, shall be in accordance with forms prescribed by the commission.

13.2(4) *Insurance binders.* Binders filed to comply with the insurance requirements of chapter 327A of the Code, and these rules pending the issuance and filing of an insurance policy or a certificate of insurance must be made out in accordance with the form prescribed by the commission.

13.2(5) *Cancellation and reinstatements.* Thirty days prior written notice shall be given the commission of the cancellation of any policy, certificate of insurance or surety bond filed with the commission for a liquid transport carrier. Notices of cancellation and reinstatement shall show the correct name and address of the insured as then shown in the policy, the correct name of the insurance company and the correct number of the policy. Specific coverage under a policy may be canceled when the notice of cancellation includes that information.

13.2(6) *Assignment of interest endorsement for policy.* Assignment of interest endorsements filed for policies on file with the commission or for policies for which certificates of insurance have been filed with the commission shall be in accordance with the form prescribed by the commission.

13.2(7) *Surety bond.* If a liquid transport carrier desires to file a surety bond to comply with the requirements of chapter 327A of the Code, the commission will, upon request, prescribe the form of such bond.

13.2(8) *Policies, certificates and bonds to remain on file.* Insurance policies, certificates of insurance and surety bonds, filed with the commission by liquid transport carriers, shall remain on file in the office of the commission and must not be removed therefrom except with the express permission of the commission.

13.2(9) *Suspension.* Where a liquid transport carrier fails to have effective insurance on file with the commission or fails to pay the regulatory certificate fee, the commission may suspend the authority of such carriers. The suspension shall remain in force and effect until the operator has met the requirements of section 327A.5 (insurance) and section 327A.19 (fees). The carrier affected by the suspension order shall, upon request, have a hearing before the commission.

13.3(327A) Marking of equipment.

13.3(1) *Manner of marking equipment.* Before placing any equipment in service there shall be painted on each side of the equipment and on the headboards, if appropriate, or on some suitable material securely placed on each side of such equipment, in letters and figures large enough to be easily read at a distance of 50 feet and in a color in contrast to the background the following:

a. Name of liquid transport carrier under whose authority equipment is being operated.

b. Address of liquid transport carrier.

c. Ia. C.C. LC .....

(Certificate number)

All liquid carrier equipment operating exclusively under interstate authority shall not be required to display item "*b*" above.

13.3(2) *Registration decal or sticker.* The operator of any truck or tractor of any carrier performing an interstate transportation service for compensation within the contemplation of the provisions of chapter 327B of the Code, shall have in his possession or affixed to said truck or tractor, the decal or sticker issued by this commission bearing the registration number of the carrier.

13.4(327A) Application and notice of hearing.

13.4(1) *Application for a certificate.* Application for a certificate of convenience and necessity to operate as a liquid transport carrier shall be made to the Iowa State Commerce Commission, Des Moines, Iowa, upon the forms prescribed for that purpose. All such applications shall be typewritten.

13.4(2) *Deposit.* Application for a certificate of convenience and necessity must be accompanied by a deposit sufficient to secure the payment of all costs and expenses of hearing and any preliminary investigation necessary in connection therewith. Such deposit shall not be less than $200. The commission reserves the right to require such additional deposit as it may deem necessary. Deposit must be made by certified check, bank draft, express money order or postal money order, payable to the Iowa state commerce commission. Any unused balance of a deposit will be refunded to the applicant.

13.4(3) *Sale, transfer, lease, assignment or acquisition of control or management of a certificate.* Application for a proposed sale, transfer, lease, assignment or acquisition of control or management of a certificate of convenience and necessity must be typewritten, signed and sworn to by all interested parties and filed with the commission for 90 days prior to the proposed effective date. Each application shall be made upon the form prescribed for that purpose and applicant must comply with 13.4(2) and 13.4(4).

13.4(4) *Publication of notice of hearing.* The applicant will be notified as to the time and place for hearing as soon as named by the commission and furnished with copies of the official notice of hearing, which the applicant shall cause to be published on the same day of the week two consecutive weeks in some newspaper of general circulation published in each county through or in which the proposed service will be rendered. The last publication of said notice must be made not less than ten days prior to the date of hearing. Proof of publication from each newspaper in which the notice was published must be filed with the commission five days prior to the date of the hearing. Failure to file such proofs may result in the cancellation of the hearing. The applicant shall pay the cost of such publication and shall file receipt from each newspaper showing the costs of publication have been paid. Applicant shall examine said notice prior to publication and notify the commission of applicant's approval of the form and content of the notice or submit a revised notice to the commission.

13.4(5) *Notice by applicant to liquid transport carrier.* Applicant filing application for sale, transfer, lease, assignment or acquisition of control or management of a liquid transport carrier certificate, in addition to the requirements of 13.4(4) shall notify by registered or certified mail each liquid transport carrier holding a certificate of convenience and necessity issued by the commission to transport over, in or through the area described in the application. Proof of notice by return signature card must be filed with the commission five days prior to the date of the hearing. The applicant shall pay the cost of such mailings. Failure to file proof may result in cancellation of the hearing.

13.4(6) *Interstate carriers.* Chapter 327A of the Code, together with the rules thereunder adopted by the commission insofar as may be applicable, govern carriers affording service of a strictly interstate character. Application for a certificate covering such an operation shall be made upon forms prescribed by the commission. A showing of convenience and necessity before this commission is not a condition precedent to the granting of an interstate certificate. Therefore, no hearing is held for this purpose and 13.4(2), 13.4(4), 13.5(2) and 13.5(4) of these rules may be disregarded when application is submitted. Applicant should have first complied with the Motor Carrier Act, administered by the interstate com-

merce commission and the rules and regulations thereunder adopted. All interstate carriers shall file and maintain with the commission appropriate liability and property damage insurance policy or policies, surety bond or proper certificate(s) of liability and property damage insurance covering said motor vehicles used within the state of Iowa in accordance with 13.2(1).

13.5(327A) Annual reports and fees.

13.5(1) *Records and filings.* Every liquid carrier shall keep an accurate record of assets and liabilities, costs and depreciation of all equipment and other physical property owned, receipts from operation, operating and other expenses, gross amount of liquids hauled, actual miles traveled within and without the state and other required information and shall file with the commission for the calendar year an annual report, duly verified, in such form as the commission may prescribe on or before March 31 of the year following that for which the report is filed. The commission will prescribe the character of the information to be embodied in such annual report and furnish a blank form therefor.

13.5(2) *Annual certificate fee.* Application for a certificate of convenience and necessity shall be accompanied by a remittance in the amount sufficient to pay the annual certificate fee of five dollars for each motor vehicle described on the form attached to the application, provided, however, that the fee herein provided for each semitrailer shall be in the amount of six dollars. The remittance will cover the certificate fee for each motor vehicle described from the date the certificate is issued until the thirty-first day of December of the year in which the certificate is issued. The annual certificate fee should be remitted in the form of a certified check, bank draft, cashier's check or money order payable to the Iowa state commerce commission. The annual certificate fee for each motor vehicle for each year after the year in which the certificate is issued shall be due and payable on or before the first day of January for each succeeding year and shall be remitted in the form prescribed above.

13.5(3) *Fee receipt.* The holder of an intrastate certificate shall be furnished a receipt for each certificate fee paid. The receipt shall be carried with the described trailer at all times.

13.5(4) *Equipment changes or additions.* Before placing any additional vehicles in service, the holder of a certificate of convenience and necessity shall pay the commission the annual fee and furnish a complete description of such motor vehicles operated in intrastate commerce together with information as to the time the equipment is to be placed in service. Description shall show registration of equipment and factory number.

13.6(327A) Freight receipts.

13.6(1) *Receipt for freight.* Every liquid carrier shall issue a receipt in triplicate on date freight is received for shipment and the liquid carrier's copy must be fully completed at the end of each day's business. Receipts shall show the following:

a. Name of liquid carrier.
b. Date and place received.
c. Name of consignor.
d. Name of consignee.
e. Destination.
f. Description of shipment.
g. Rate and charges.
h. Signature of liquid carrier or agent.

One copy of such receipt shall be furnished to the consignor, one to the consignee and one to be retained by the liquid carrier.

13.7(327A) Complaints.

13.7(1) *Complaint on rates.* All complaints filed with this commission against liquid carriers alleging violations of effective tariffs shall be written and contain the following information:

a. The name, address and certificate number of the liquid carrier against whom claim is made.

b. Complete information as to the type of liquid transported, name of shipper and receiver of freight and definite information as to rates assessed.

c. An allegation setting out complainant's ground for complaint.

d. Such other information as may be pertinent to the subject matter of the complaint.

e. Complaint must be signed by complainant.

13.7(2) *Complaint on tariffs.* A complaint against a liquid carrier charging that the rates, charges, classifications and rules and regulations pertaining thereto contained in the effective tariff of such liquid carrier are unjust, unreasonable or discriminating must be filed in accordance with the commission's rules of practice and when so filed said complaint shall be set down for hearing and hearing held thereon as provided by the said rules of practice, provided that in addition to the persons who may file complaints under the provisions of the rules of practice the superintendent of motor transportation or chief of rate division may file a complaint against a liquid carrier under this rule. On such hearing the commission shall fix or approve the rates, charges, classifications and rules and regulations pertaining thereto, of the liquid carrier complained against.

13.8(327A) Driver requirements.

13.8(1) *General.* Every liquid transport carrier who acts as a driver shall comply with all requirements of the law applying to drivers. Liquid transport carriers shall see that all prospective drivers are familiar with the provisions of chapter 327A of the Code, and all other laws applying to

liquid transport carriers and these rules before allowing them to operate a motor vehicle.

13.8(2) *Definitions.* The following definitions shall be used:

a. On duty. A driver is "on duty" from the time he begins to work or is required to be in readiness to work until the time he is relieved from work and all responsibility for performing work; except time spent resting in a sleeper berth or not driving or assuming any other responsibility while traveling, each driver must be given at least eight consecutive hours off duty after arrival at destination, during which period he shall be considered as off duty.

b. Driving time. The terms "drive", "operate" and "driving time" include all time spent on a moving vehicle; and any interval not in excess of ten minutes in which the driver is on duty and not on a moving vehicle; except the terms "drive", "operate" and "driving time" does not include certain travel time under the exceptions in section "*a*" of this rule.

13.8(3) Every liquid transport carrier and his or its officers, agents, representatives and employees who drive motor vehicles or are responsible for the hiring, supervision, training, assignment or dispatching of drivers, shall comply with the requirements of this rule.

13.8(4) *Minimum requirements.* No person shall drive, nor shall any liquid transport carrier require or permit any person to drive any motor vehicle unless that person possess the following minimum qualifications:

a. No loss of foot, leg, hand or arm—no mental or functional disease likely to interfere with driving—no loss of fingers, impairment or use of foot, leg, fingers, hand or arm or other structural defect or limitation likely to interfere with safe driving.

b. Visual acuity of at least 20/40 (Snellen) in each eye either without glasses or by correction with glasses—ability to distinguish colors red, green or yellow—drivers requiring correction by glasses shall wear properly prescribed glasses at all times when driving.

c. Hearing shall not be less than 10/20 in the better ear for conversational tones, without a hearing aid.

d. The driver shall not be addicted to the use of narcotics or habit-forming drugs or the excessive use of alcoholic beverages or liquors.

e. Every driver shall be experienced in driving some type of motor vehicle (including private automobiles) for not less than one year including experience through the four seasons.

f. Every driver shall be competent by reason of experience in driving the type of motor vehicle or motor vehicles which he drives.

g. Every driver shall be familiar with the rules and regulations established by this commission and by the department of public safety relating to motor vehicles.

h. Every driver shall be not less than 21 years of age.

13.8(5) *Physical examination of drivers.* No person shall drive nor shall any liquid transport carrier require or permit any person to drive any motor vehicle unless said person shall have been physically examined and shall have been certified by a licensed doctor of medicine or osteopathy as meeting the requirements of 13.8(4).

Every driver shall be physically re-examined and shall be certified by a licensed doctor of medicine or osteopathy as meeting the requirements of this rule at least once in every 36 months.

13.8(6) *Certificate of physical examination.* Every liquid transport carrier shall have in its files at his principal place of business for every driver employed or used by it a legible certificate of a licensed doctor of medicine or osteopathy based on a physical examination as required by this rule, or a legible photographically reproduced copy thereof and every driver of such carrier is required to have in his possession while driving such a certificate or photographically reproduced copy thereof covering himself.

A doctor's certificate shall certify as follows:

DOCTOR'S CERTIFICATE

This is to certify that I have this day examined ..... in accordance with rule 13.8(5) as required by the liquid transport carrier rules of the Iowa state commerce commission and that I find him:

☐ Qualified under said rules.

☐ Qualified only when wearing glasses.

I have kept on file in my office a complete examination form for this person.

.....
(date)

.....
(place)

.....
(Signature of examining doctor)

Signature of driver .....
Address of driver .....

13.8(7) Nothing contained in these rules shall be construed as to prevent a liquid transport carrier from required additional or more stringent physical, mental or intellectual qualifications or age requirements than prescribed in this rule.

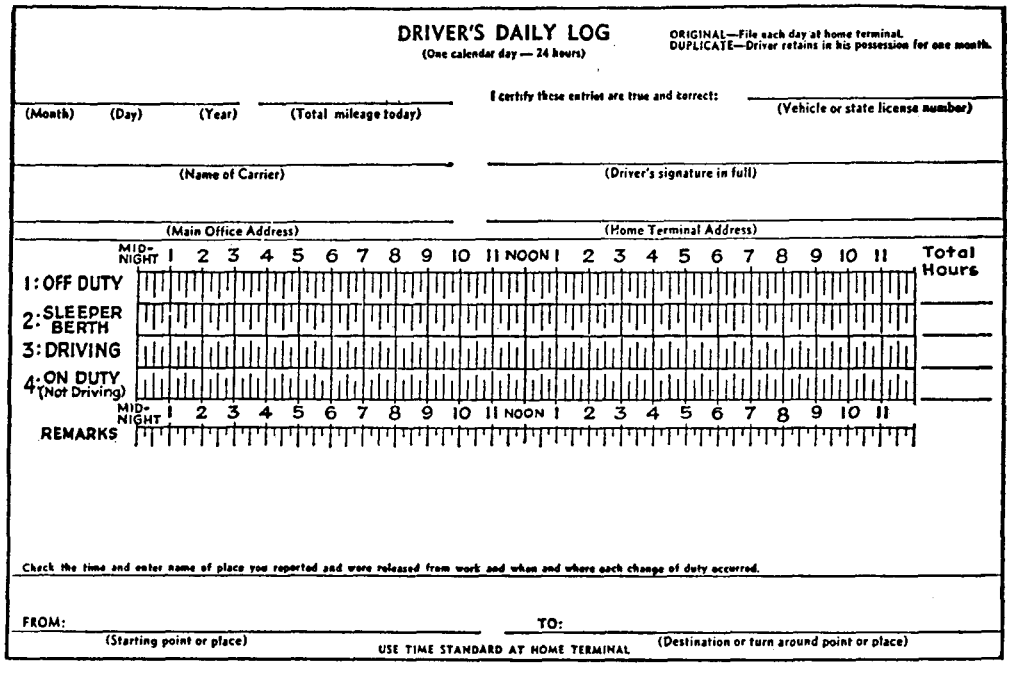
13.9(327A) Hours of driving.

13.9(1) No liquid transport carrier subject to these regulations shall permit or require a driver in his employ to drive or operate for more than 12 hours in the aggregate in any period of 24 consecutive hours, unless such driver be off duty for eight consecutive hours during or immediately following the 12 hours aggregate driving, and within said period of 24 consecutive hours; provided, however, that two periods of resting or sleeping in a berth may be accumulated to give the aforesaid total of eight hours off duty.

13.9(2) No liquid transport carrier subject to these rules shall permit or require any driver in his employ to remain on duty for a total of more than 60 hours in any week; provided, however, that carriers operating vehicles on every day of the week may permit drivers in their employ to remain on duty for a total of not more than 70 hours in any period of 192 consecutive hours.

13.10(327A) Driver's daily log.

13.10(1) Every liquid transport carrier shall require that a driver's daily log shall be made in duplicate by every driver employed or used by it and every driver who operates a motor vehicle shall make such log. Such log shall be in the form as follows:



DRIVER'S DAILY LOG
(One calendar day — 24 hours)

ORIGINAL—File each day at home terminal.
DUPLICATE—Driver retains in his possession for one month.

(Month) (Day) (Year) (Total mileage today)

I certify these entries are true and correct:

(Vehicle or state license number)

(Name of Carrier)

(Driver's signature in full)

(Main Office Address)

(Home Terminal Address)

MID-NIGHT 1 2 3 4 5 6 7 8 9 10 11 NOON 1 2 3 4 5 6 7 8 9 10 11 Total Hours

1: OFF DUTY

2: SLEEPER BERTH

3: DRIVING

4: ON DUTY (Not Driving)

MID-NIGHT 1 2 3 4 5 6 7 8 9 10 11 NOON 1 2 3 4 5 6 7 8 9 10 11

REMARKS

Check the time and enter name of place you reported and were released from work and when and where each change of duty occurred.

FROM: (Starting point or place) TO: (Destination or turn around point or place)

USE TIME STANDARD AT HOME TERMINAL

13.10(2) Drivers and liquid transport carriers will be held responsible for the proper maintenance of the daily logs. Driver shall keep the log current to the time of the last change of duty status. Failure to make logs, failure to make required entries therein, falsification of entries, or failure to file logs with the liquid transport carrier will make both the driver and the carrier liable to prosecution.

13.10(3) The driver shall forward each day the original log to his home terminal. If the services of a driver are used by more than one carrier during a calendar day, the driver shall furnish each motor carrier a copy of his log for the entire day. In such case the log shall indicate the name of each carrier served by the driver during that day.

13.10(4) The original logs shall be retained by the liquid transport carrier for a period of one year. Duplicate copies of the logs are the driver's personal records and are to be kept for a period of one month in the possession of the driver while he is on duty.

13.10(5) The time standard in effect at the driver's home terminal shall be used. The log shall be prepared, maintained and submitted for a 24-hour calendar day beginning at midnight.

13.10(6) All entries shall be made by the driver except that the name and main office address of the liquid transport carrier may be printed or otherwise entered by an authorized representative of the carrier. The name of the liquid transport carrier shall be that for which the driving is performed. In case of the driver of a leased vehicle, the name shown shall be that of the liquid transport carrier performing the transportation.

13.10(7) The driver shall certify to the correctness of the log by signing his name in full.

13.10(8) In addition to the identification of the carrier and the driver's signature, the entries shall indicate:

a. The month, day and year for which the log is prepared.

b. The total mileage traveled during the calendar day covered by the log.

c. The carrier's vehicle number or, if no such number is provided, the state license number of the power unit.

d. Driver's home terminal address.

e. The actual period or periods during the calendar day spent in the activities specified on lines 1, 2, 3 and 4 by drawing a continuous line between the appropriate time markers. The fol-

lowing directions are illustrative only and are not to be construed as modifying these definitions or rules:

(1) Line 1. *Off duty.* All times, except that spent in a sleeper berth, when the driver is not working, is not required to be in readiness to work, or is not under any responsibility for performing work.

(2) Line 2. *Sleeper berth.* All time resting in a sleeper berth.

(3) Line 3. *Driving.* All time spent driving or riding on a moving vehicle, including all stops not in excess of ten minutes, except that time spent in a sleeper berth or time spent traveling under the conditions named in 13.4(6).

(4) Line 4. *On duty (not driving).* All time spent by a driver in performing work other than driving, such as, loading or unloading, preparing reports, remaining in readiness to perform work, remaining in charge of a disabled vehicle, stops for meals unless the driver has been relieved from duty, etc.

f. Under "Remarks" the time and the name of the place where each such change of duty occurred, such as the place of reporting for work, starting to drive, stops exceeding ten minutes in duration and where released from work. Explain any emergency resulting in hours exceeding those permitted by the regulations.

g. In the column "total hours", the hours and fractions thereof shown in each of lines 1, 2, 3 and 4. The sum of the entires in this column must total 24 hours. Enter the place where the trip began and the final destination or farthest turnaround points. On trips requiring more than one calendar day, the log for each day shall show the origin and final destination at the bottom of the log with the points of beginning and ending the travel of that day shown as required by "*f*" in "Remarks." If a driver departs from and returns to the same place on any day, the "destination or turnaround point" shall be the farthest point reached before the driver begins his return trip.

13.10(9) The Iowa state commerce commission will not provide supplies of the log. The log may be incorporated as a part of any daily form used by a carrier provided it is so ruled and the log appears distinct and separate from other portions of such form. In reproducing the log, dimensions of approximately 5½ x 7½ inches shall be used. The full instructions for the use of the log must be reproduced either on the reverse side of each log sheet or, if logs are bound in book form, on either side of the book cover. Stocks of logs in the possession of carriers or their suppliers on the effective date of these regulations may be used.

13.11(327A) Tariffs.

13.11(1) *Form and contents.* All liquid transport carriers shall maintain on file with the commission a tariff stating the rates and charges to be made for the services performed under their certificates; also a classification, if class rates are to be assessed, stating the ratings which are to be applied in connection with the rates named in said tariff. All tariffs and classifications must conform to the following regulations, except as otherwise authorized by the commission.

13.11(2) All tariffs and amendments or supplements thereto must be in book, pamphlet or loose-leaf form of size 8 x 11 inches. They must be plainly printed, mimeographed, planographed, steneotyped, or reproduced by other similar durable process on good quality paper. No alteration in writing or erasure shall be made in any tariff or supplement thereto. A margin of not less than five-eighths inch, without any printing thereon must be allowed at the binding edges of each tariff and supplement.

13.11(3) All tariffs and supplements must be filed in the office of the commission and posted in a conspicuous place at least 30 days prior to the effective date thereof, unless otherwise authorized by the commission, except that tariffs, supplements, or adoption notices issued in connection with applications for liquid transport carriers, or the transfer of certificates from one liquid transport carrier to another, may become effective on a date not earlier than the date on which permits are issued or transferred.

13.11(4) Issuing liquid transport carriers or their agents shall transmit to the commission two copies of each tariff, supplement, or revised page. Both copies shall be included in one package accompanied by a letter of transmittal listing all tariffs enclosed and addressed to the Iowa State Commerce Commission, Rate Division, Des Moines, Iowa. All postage or express must be prepaid.

13.11(5) Title page of every tariff and supplement shall show in the order named:

a. Each tariff shall be numbered in upper right-hand corner, beginning with number 1. Such number shall be shown as follows: Ia. C.C. No . . .

When tariffs are issued canceling a tariff or tariffs previously filed, the Ia. C.C. number or numbers that have been canceled must be shown in the upper right-hand corner under the Ia. C.C. number of the new tariff.

b. Supplements to a tariff in addition to showing the Ia. C.C. number of the tariff amended thereby shall be numbered beginning with number 1 and such information shall be shown in the upper right-hand corner. Supplements shall also show in the upper right-hand corner the number of any previous supplements canceled thereby and also the numbers of the supplements containing all changes made in the tariff.

c. The name of each liquid transport carrier must be the same as that appearing in its certificate (or application if no certificate has been issued). If the liquid transport carrier is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name.

d. A brief description of the territory in which, or points from and to which, the tariff applies.

e. Date of issue and date effective.

f. Name, title and street address of liquid transport carrier or agent by whom tariff is issued.

13.11(6) Tariffs shall contain in the order named:

a. Table of contents, arranged alphabetically showing the number of the page on which each subject may be found. If a tariff contains so small a volume of matter that its title page or interior arrangement plainly indicates its contents, the table of contents may be omitted.

b. A complete index of all commodities on which specific rates are named therein, together with reference to the page and items in which they are shown. No index need be shown in tariffs of less than five pages or if the rates are alphabetically arranged by commodities.

c. Explanation of all abbreviations, symbols and reference marks used in the tariff.

d. When a tariff names rates by classes, a classification of articles must be published in the tariff or in a separate tariff. When a classification is published in a separate tariff, reference must be made thereto on the title page of the rate tariff as follows:

"Governed, except as otherwise provided herein, by the (here name) classification (showing issue agent) Ia. C.C. No. .... supplements to or successive issues thereof."

All liquid transport carriers shown as participating carriers in a rate tariff which is governed by a separate classification must be named as participating carriers in such separate classification.

e. Table of rates. All rates must be explicitly stated in cents or in dollars and cents, per gallon, per mile, per hour, per ton of 2,000 pounds, per truck load (of stated amount), or other definable measure.

Tariffs containing tables of rates based on distances from point of origin to destination must show the mileages or indicate a definite method by which such mileages should be determined.

f. Liquid transport carriers or their agents must not publish class or commodity rates which duplicate or conflict with rates published by or for account of such liquid transport carriers.

13.11(7) *Commodity rates.* Commodity rates on articles in stated truck-load or in less-than-truck-load quantities may be published, and where they differ from a published class rate basis, the lower rate shall take preference.

13.11(8) *Tariff changes.* All rates, charges and classifications which have been filed with the commission must be allowed to become effective and remain in effect for a period of at least 30 days before being changed, canceled or withdrawn, unless otherwise authorized by the commission.

All tariffs, supplements and revised pages (including classifications) shall indicate changes from preceding issues by use of the following symbols:

↓ or (R) to denote reductions

◆ or (A) to denote increases

▲ or (C) to denote changes, the result of which is neither an increase nor a reduction.

The proper symbol must be shown directly in connection with each change.

13.11(9) *Posting regulations.* Each liquid transport carrier must post and file at its principal place of business tariffs, classifications and governing rules and regulations. All tariffs must be kept available for public inspection or examination at all reasonable times.

13.11(10) *Application for special permission.* Liquid transport carriers and agents when making application for permission to establish rates, charges, classification ratings or rule on less than statutory 30 days' notice shall use the form prescribed by the commission.

13.11(11) *Powers of attorney and participation notices.*

a. Whenever a liquid transport carrier desires to give authority to any attorney and agent to issue and file tariffs and supplements thereto in its stead, a power of attorney in the form prescribed by the commission must be used.

b. Whenever a liquid transport carrier desires to participate in tariffs issued and filed by another liquid transport carrier or its agent, a power of attorney using the form prescribed by the commission shall be issued in favor of such other liquid transport carrier.

c. The original of all powers of attorney shall be filed with the commission and a duplication of the original sent to the agent or liquid transport carrier in whose favor such document is issued.

d. Whenever a liquid transport carrier desires to cancel the authority granted an agent or another liquid transport carrier by power of attorney this may be done by a letter addressed to the commission revoking such authority on 60 days' notice, except for good cause shown the commission will authorize a lesser notice. Copies of such notice must also be mailed to all interested parties.

13.12(327A) Lease of equipment.

13.12(1) *Lease defined.* Lease, for the purpose of these rules means a written document providing for the exclusive possession, control and responsibility over the operation of the vehicle or vehicles in the lessee for a specific period of time as if such lessee were the owner. A copy of the lease must be carried in the leased equipment at all times.

13.12(2) *Number.* No liquid carrier may have more than one lease covering a specific piece of equipment in effect at a given time.

13.12(3) *Lease of vehicles to shippers or receivers.* No liquid carrier shall lease vehicles with or without drivers to shippers or receivers.

13.12(4) *Identification of equipment.* Each lessee shall properly identify each piece of equipment during the period of the lease as specified in 13.3(327A).

13.12(5) *Conditions.* Any lease of equipment by any liquid carrier except under the following conditions is prohibited:

a. Every such lease must be in writing and signed by the parties thereto or their regular employees or agents duly authorized to act for them.

b. Every lease shall specify the time the lease begins and the time or circumstances on which it ends.

c. Every lease shall set out the specific consideration or method of determining compensation.

d. Every lease shall provide for the exclusive possession, control, and use of the equipment and for the complete assumption of responsibility in respect thereto by the lessee for the duration of said lease.

[Filed May 10, 1966; amended June 10, 1966; July 14, 1967]

UTILITIES AND TRANSPORTATION DIVISIONS

CHAPTER 14
COMPLIANCE WITH THE ECONOMIC STABILIZATION PROGRAM

14.1(325, 327, 327A, 479, 490A) Definitions. The term "commission" as used in these rules means the Iowa state commerce commission.

The term "utility" as used in these rules means any person, firm, or corporation providing a service subject to regulation by the commission under those sections of the Iowa Code specifically cited as a part of the rules which follow.

14.2(325, 327, 327A, 479, 490A) Criteria applicable. Except for those utilities qualifying for the small business exemption set forth in Title 6, Economic Stabilization, Section 101.51, Subpart E; and such utilities as may be from time to time exempted from Price Commission regulations by the Cost of Living Council; the commission will not issue final approval of any proposed increase in rates or charges, or any portion of such a proposal, on or after the effective date of these rules unless it finds and determines that a proposed increase in rates complies with the following general criteria, as more specifically described in 14.8 and 14.9.

14.2(1) The increase is cost justified and does not reflect future inflationary expectations.

14.2(2) The increase is the minimum required to assure continued, adequate and safe service or to provide for necessary expansion to meet future requirements.

14.2(3) The increase will achieve the minimum rate of return needed to attract capital at reasonable costs and not to impair the credit of the utility.

14.2(4) The increase does not reflect labor costs in excess of those allowed by policies of the federal Price Commission.

14.2(5) The increase takes into account expected and obtainable productivity gains.

14.3(325, 327, 327A, 479, 490A) Effect on pending matters. Any utility, which on the effective date of this chapter has pending before the commission any application to increase rates pursuant to chapters 325, 327, 327A, 479, 490A of the Iowa Code must, if such information is not otherwise made a part of the formal record upon which the commission's decision is to be based, make a showing that the requested increase complies with the general substantive criteria for public utility price increases set forth in 14.8 and 14.9.

14.4(325, 327, 327A, 479, 490A) Future filings or petitions. Any utility that makes a tariff filing for a rate increase on or after the effective date of this amendment shall proffer as a part of its evidentiary presentation a showing that the requested increase complies with the general substantive criteria for public utility price increases set forth in 14.8 and 14.9.

14.5(325, 327, 327A, 479, 490A) Exemptions. These rules shall not apply to any rate increase intended solely to pass through specific allowable costs, including taxes (except income taxes), purchased gas or other energy costs, but not including labor costs, under a previously approved tariff provision; any rate increase intended to adjust relationships between classes of customers, and which increase does not increase the utility's aggregate annual revenue by more than one percent.

14.6(325, 327, 327A, 479, 490A) Filing with federal Price Commission. On or after the effective date of these rules, the secretary of the commission shall promptly forward to the federal Price Commission a copy of such commission orders, periodic reports, or other information as the Price Commission may require by regulation or otherwise.

14.7(325, 327, 327A, 479, 490A) Public notice. The commission's procedures will contin-

ue to provide reasonable opportunity for participation by all interested parties, or their representatives, in its proceedings. Notice of all rate changes by tariff filing or by petition is required to be given unless waived for good cause. All interested parties are afforded an opportunity to intervene in rate making proceedings, including participation as parties in public hearings mandated by statute or held at the commission's discretion, including rehearings.

14.8(325, 327, 327A, 479, 490A) Interpretation. Pursuant to the expressed purpose of these rules, and the terms of 14.2, the following general guidelines will be applied by the commission in its interpretation and implementation of that rule.

In making the showing required under 14.3 and 14.4, the affected utility company shall satisfy the following standards.

14.8(1) The increase must be cost justified and should not reflect future inflationary expectations.

a. The increase must be justified by costs incurred, which costs have been established by the use of an income statement for a past test period, adjusted up or down only for known and measurable changes in revenues or expenses. All cost increases must be specifically and quantitatively provable and known; may not be associated with a level of revenues different from that which occurred within the test period; and may not reflect future inflationary expectations. (Intended to implement 325, 327, 327A, 479, 490A)

b. In the preparation of the aforementioned income statement, all revenues, expenses, and rate base items must be properly allocated among different utility services, and between utility and nonutility operations. (Intended to implement 490A)

c. Adjustments to test period data will be made where necessary to eliminate the effects of conditions reflected in the test period which are found by the commission to be abnormal or unrepresentative. Such adjustments will not be made unless found to be subject to definite computation or reasonable estimation. (Intended to implement 490A)

d. Pursuant to the decision of the Iowa supreme court in Davenport Water Co. v. Iowa State Commerce Commission, 190 N.W. 2d 583; Section 490A.8 of the Iowa Code; and those relevant portions of the commission's decision in Davenport Water Company, Docket No. U-138, not inconsistent with the foregoing authority: the commission in adjudicating rate increase proposals will receive and consider competent evidence relating to the "value" of the applicant utility's rate base, including "fair value" testimony as well as that based upon calculations of the utility's "net investment" in plant devoted to public use. (Intended to implement 490A)

e. Regulated carriers under chapters 325, 327, 327A, and 479 of the Code must at a minimum file with the commission:

(1) A revenue and expense statement for a past test period itemized in detail by each function performed by the carrier or selected representative carriers. The regulated function shall be adjusted by all factors, increase or decrease, that have occurred during the year to annualize both revenue and expense to the charges and costs in effect on the last day of the test period.

(2) A current revenue and expense statement, using the revenue and expense statement developed in (1) above as its base, which is adjusted for:

Charges put in effect and pending revenue requests as if effective from the date of statement developed in (1) above, to the end of the adjusted test period.

Increases in costs that will be incurred, prior to or within 120 days of the stated effective date of the rate increase annualized for the current one-year period. Increased costs in order to be included and annualized must be specifically and quantitatively provable and known; and specifically attributable to prices for a particular service or group of services insofar as such are reasonably possible of determination.

(3) Such other statements, schedules or documents which will show explicit details of those adjustment facts used to develop the revenue and expense statements in (1) and (2) above.

14.8(2) The increase is the minimum required to assure continued, adequate and safe service or to provide for necessary expansion to meet future requirements.

Where rate increases are sought to cover costs associated with expansion or improvement of service, the increases will not be permitted except in instances where the costs qualify as test-period adjustments within the scope of 14.8(1). (Intended to implement 325, 327, 327A, 479, 490A)

14.8(3) Price increases may not be more than will achieve the minimum rate of return, or operating ratio where applicable, needed to attract capital at reasonable cost and not to impair the credit of the public utility.

a. The increase may achieve no more than the minimum rate of return, or operating ratio where applicable, needed to attract capital at reasonable cost and not impair the credit of the applicant utility company. (Intended to implement 325, 327, 327A, 479, 490A)

b. Pro forma adjustments for issues of securities shall not be made in the capitalization structure of the utility unless such adjustments represent the result of refinancing of existing debt, which refinancing is not associated with a level of revenues different from that which occurred within the test period, and occurs before the proposed rates are allowed to become effective under bond

and subject to refund pursuant to section 490A.6. The cost of such refinancing which takes place subsequent to said effective date may be allowed by the commission after its occurrence through the authorization of a "phased" or two-step order specifically covering the time periods involved. (Intended to implement 490A)

c. Consistent with the limitations above set forth, the commission in determining the appropriate rate of return will consider the capital structure of the applicant and costs of the various components of the capital structure in a manner consistent with the test period employed. The commission, however, retains its authority, consistent with the terms and purposes of chapter 490A of the Code, to adjust applicant's capital structure—as for example where the applicant is a subsidiary of another company and the capital costs of the latter are taken into consideration. (Intended to implement 490A)

d. The rate of return, or operating ratio where applicable, allowed by the commission, will not reflect expectations of future inflation. (Intended to implement 325, 327, 327A, 479, 490A)

14.8(4) The increase does not reflect labor costs in excess of those allowed by policies of the federal Price Commission. (Intended to implement 325, 327, 327A, 479, 490A)

a. A wage or salary payment in excess of labor costs allowed by Price Commission regulations and policies will not be given effect for rate purposes. An application for a rate increase which is based in whole or in part on increased wages or salaries in excess of those allowed by Price Commission regulations will be allowed only with respect to the portion of the wage settlement or salary increase which does not exceed Price Commission regulations or policies.

b. In those cases where it is shown that excess costs over the current guideline would work an undue hardship on the utility if disallowed, they may be considered on a case-by-case basis.

14.8(5) The increase takes into account expected and obtainable productivity gains. (Intended to implement 325, 327, 327A, 479, 490A)

a. Expected productivity gains, susceptible of quantitative measurement, will be taken into account through the use of past test-period data as outlined above. All productivity gains associated with increases in costs for which adjustments are allowed must be considered with a view toward achieving a consistent and balanced projection of operating experience.

b. Obtainable productivity gains will be taken into account by identifying, to the extent practicable in a rate case, any present or projected expenditures of an applicant which are wasteful or unnecessary. Where it is demonstrated that an applicant can reduce the cost of its operation by eliminating or curtailing wasteful or unnecessary expenditures, the commission will so find, and such expenses will be disallowed in computing cost for rate making purposes.

14.9(325, 327, 327A, 479, 490A) Construction and application.

14.9(1) The rules herein adopted will not apply to any utility which at the time of final commission action on any proposed price or rate increase has been exempted from price controls under the rules of the Cost of Living Council.

14.9(2) As to all other utilities regulated by this commission, except insofar as compliance herewith constitutes satisfaction of the above stated Price Commission criteria, adherence to the foregoing standards shall not be deemed dispositive of any issue in rate proceedings arising under the Iowa Code.

14.9(3) This chapter shall remain in force and effect until such time as the necessity therefor shall no longer exist, either by virtue of the cessation or termination of Federal Economic Stabilization Program activities, as may be declared by the President of the United States, or by Act of the United States Congress—at which time this chapter will be terminated by appropriate commission action.

[Filed October 11, 1972]

CHAPTER 15
PRACTICE AND PROCEDURE

15.1(490A) General information.

15.1(1) *Procedure governed.* These rules are promulgated under chapter 490A of the Code as guides for practice and procedure thereunder before the Iowa state commerce commission (hereinafter referred to as the "commission") unless otherwise ordered by the commission in any proceeding, and subject to such special rules, or amendments thereto which may hereafter be adopted.

No rule of the commission shall in any way relieve a utility from any of its duties under the law of this state.

None of the procedures provided for herein shall apply to electric transmission line hearings under chapter 489 of the Code or to pipe-line and underground gas storage hearings under chapter 490 of the Code.

15.1(2) *Communications.* All communications to the commission shall be addressed to the Iowa State Commerce Commission, Des Moines, Iowa, unless otherwise specifically directed. Pleadings and other papers required to be filed with the commission shall be filed in the office of the commission within the time limit, if any, for such filing. All communications and documents

are deemed to be officially received when delivered at the office of the commission.

15.1(3) *Suspension or alterations of rules.* The commission may in its discretion on its own motion, or upon request, amend, modify or suspend any of these rules.

15.1(4) *Examiners.* Hearings will be conducted by the commission.

Examiners may be designated by the commission to preside at and conduct hearings and shall have the following authority:

a. To regulate the course of hearings, the recessing, reconvening and adjournment thereof, unless otherwise ordered by the commission;

b. To administer oaths and affirmations;

c. To rule upon the admissibility of evidence and offers of proof;

d. To take or cause depositions to be taken;

e. To dispose of procedural matters and to dispose of motions to dismiss proceedings or other motions which involve final determination of proceedings, subject to review by the commission upon application by the aggrieved party;

f. Within their discretion, or upon direction of the commission, to certify any question to the commission for its consideration and disposition;

g. To permit the filing of written briefs, if any, and to fix the conditions thereof and the time in accordance with 15.7(12) and to provide for the service thereof on the parties;

h. To hold appropriate conferences before or during hearings;

i. To take any other action necessary or appropriate to the discharge of the duties vested in them, consistent with law and with the rules and orders of the commission.

15.2(490A) Matters applicable to all proceedings.

15.2(1) *Service of papers.* The notice or other papers which are required to be served may be served personally or by depositing in the United States mail properly addressed with postage prepaid and when any party has appeared by attorney, such service upon the attorney shall be deemed proper service upon the party.

15.2(2) *Parties entitled to service.* All parties in any proceeding shall be served with all notices, motions, pleadings or orders filed or issued in said proceeding.

15.2(3) *Orders of the commission.* All orders made by the commission will be filed in the office of the commission in Des Moines. Orders of the commission shall be deemed to become effective upon entry by the commission unless otherwise provided in the order.

15.2(4) *Forms of papers.* The commission suggests the following guides and reserves the right to, and may, require compliance if the commission deemed such compliance to be necessary or desirable:

a. All papers filed in any proceeding should be legible in typing, printing or longhand.

b. If typewritten or in longhand, the impression should be only one side of the paper, and lines should be double spaced, except that long quotations may be single spaced and indented. Mimeographed, multigraphed, hectographed, photostated or planographed papers, and the like, will be accepted as typewritten.

c. If printed, the paper should be unglazed, and the printing should be in clear type adequately leaded.

d. All papers, except exhibits, should be cut or folded so as not to exceed a width of eight and one-half inches and a length of 14 inches, and should have inside margins not less than one inch wide. Whenever practical, all exhibits of a documentary character should conform to said requirements of size and margin.

e. Pleadings such as complaints, written motions, notices and applications for further hearing or rehearing should contain the address of the party filing the paper or if represented by an attorney, the name and business address of such attorney, the caption "Before the Iowa State Commerce Commission", and docket number, if any, assigned to the proceeding.

15.2(5) *Number of copies of pleadings.* Upon filing application, complaint or other pleading, the person filing the same should file an original and three copies thereof with the commission and furnish additional copies for each and every respondent or party to be served by the commission and such other copies as the commission may request.

15.2(6) *Copies of exhibits.* An original and three copies of all exhibits, rate compilations, statistical and other tabulated statements which any applicant intends to offer in evidence other than in rebuttal, must be filed with the commission not later than the beginning of the first day of the first hearing unless otherwise provided by the commission. One copy of such exhibits, compilations or statements shall be furnished to each party upon request. Any other party desiring to introduce any exhibit during the course of a hearing shall furnish an original and three copies of such exhibits for the use of the commission, and one copy to each party upon request, unless otherwise provided by the commission.

15.2(7) *Parties.*

a. The parties to proceedings before the commission are complainants, petitioners, applicants, respondents and intervenors. The term corporation as used herein shall include municipal corporation.

"Complainants" are persons, corporations or associations who complain to the commission by

written complaint of any act or things done or omitted to be done in violation, or claimed to be in violation, of chapter 490A of the Code, or of any order or rule of the commission shall be deemed a complainant in any proceeding initiated on its own motion.

"Petitioners" and "applicants" are parties who by written petition, application or filing, apply for or seek relief from the commission, and who are not otherwise designated in this rule.

"Respondents" are parties against whom a complaint or petition is filed, or who by reason of interest or possible interest in the subject matter of a petition or application or the relief sought therein are made respondents, or to whom an order is directed by the commission initiating a proceeding.

"Intervenors" are persons, corporations (including municipal corporations), associations or public authorities who upon written petition, are permitted to intervene in any proceeding before the commission; provided that, in the case of any inquiry, investigation or hearing on any matter relating to rates or other charges or services within any city or town such city or town may become a party to the proceeding and an intervenor by filing with the commission its written appearance.

b. Any party to the proceeding may appear and be heard by an attorney at law authorized to practice in the state of Iowa. A natural person may appear and be heard in his own behalf. A corporation or association may appear and present evidence by any bona fide officer or employee, provided however, only persons admitted to practice as attorneys and counselors at law shall represent a party in proceedings before this commission in any matter involving the exercise of legal skill or knowledge except with consent of the commission. All persons appearing in proceedings before this commission shall conform to the standard of ethical conduct required of attorneys before the courts of Iowa. If any person does not conform to such standards, the commission may decline to permit such person to appear in any proceeding.

c. The commission or its examiner may permit all persons, corporations, associations or public authorities to be heard, to examine and cross-examine witnesses, but they shall not be parties to the proceedings unless so designated in paragraph "*a*" of this rule, provided, however, that testimony or statement of any person so appearing shall be given under oath and that such person shall be subject to cross-examination by the parties to the proceeding.

d. The commission's staff, its representatives and agents may appear at any hearing and shall have all rights of participation as a party to the proceeding.

15.2(8) *Method of intervention.* The request to intervene in a proceeding shall be by petition to intervene filed at least five days prior to the time said matter is called for hearing, but not afterward, except for good cause shown.

The petition must be in writing and shall contain (1) the name of the petitioner; (2) the grounds of the proposed intervention; (3) the position and interest of the petitioner in the proceeding; (4) a prayer for leave to intervene and be treated as a party to the proceeding; and (5) if affirmative relief is sought, specific prayers for such relief, which may be in the alternative. Such petitions must be accompanied by the affidavit of a person with knowledge as to the facts set forth in the petition.

The commission may, in its discretion, grant or deny such petition or may permit intervention by such person limited to particular issues or to a particular stage of the proceeding.

The granting of any petition to intervene shall not have the effect of changing or enlarging the issues specified in the commission's notice of hearing, unless the commission shall, on motion, amend the same.

15.2(9) *Amendments to pleadings.* Amendments to pleadings may be allowed upon proper motion at any time during the pendency of the proceeding upon such terms as shall be just and reasonable.

15.3(490A) Complaints.

15.3(1) *Complaints.* Complaints shall be handled by the commission as provided by section 490A.3.

15.3(2) *Form of complaints.* The commission at its discretion may require a complaint to be in writing in substantially the following form:

BEFORE THE IOWA
STATE COMMERCE COMMISSION

(Insert name of complainant)
Complainant)
(Insert name of each respondent)
Respondent)

NO. .....
(To be inserted by the Secretary of the Commission if not assigned)

COMPLAINT

The complaint of *(here insert full name of such complainant)* respectfully shows:

(1) That *(here state name, occupation, and post-office address of each complainant)* is (are) complainant(s) herein;

(2) That *(here state name, occupation, and post-office address of each respondent)* is (are) respondent(s) herein;

(3) That *(here insert fully and clearly the specific act or thing complained of, such facts as are necessary to give a full understanding of the situation, and the law, order, or rule, and the section or sections thereof, of which a violation is claimed. Be specific and detailed).*

WHEREFORE, complainant asks *(here state specifically the relief desired).*

Dated at ..... Iowa, this.....
.....day of ....., 19.....

.....
(Name of each complainant)

.....
(Name and address of attorney if any)

15.3(3) *Dismissal of complaints.* Complaints may be dismissed by the commission upon the filing of an application for dismissal, stating the reasons therefore, by the complainant or the respondent, or upon the motion of the commission.

15.4(490A) Applications and petitions.

15.4(1) *Form of applications and petitions.* All applications and petitions shall be in writing. An original and three copies of the application or petition shall be filed. The application or petition must set forth the full name and post-office address of the applicant or petitioner and must contain an adequate statement of facts on which the application or petition is based, with a request for an order, authorization, permit or franchise desired.

15.4(2) *Dismissal of applications and petitions.* Applications and petitions may be dismissed by the commission upon the filing of an application for dimissal, stating the reasons therefore, by the applicant or petitioner, or upon the motion of the commission.

15.4(3) *Applications filed in accordance with the provisions of section 490A.7.*

a. Any public utility filing an application with the commission requesting a determination of the reasonableness of its rates, charges, schedules, service or regulations shall submit at the formal proceeding ordered by the commission as a result of such application, all information and data, by means of testimony or exhibits, necessary for the commission to make such determination. All such testimony and exhibits shall be given or presented by competent witnesses, under oath or affirmation, and the proceeding itself shall be governed by the applicable provisions of 15.1 (490A), 15.2 (490A) and 15.3 (490A).

b. Unless otherwise specifically authorized by the commission, rates and charge determinations shall not be heard in the same proceeding as one for service.

c. All of the foregoing requirements shall likewise apply in the event the commission shall, on its own motion, initiate a formal proceeding to determine the reasonableness of a public utility's rates, charges, schedules, service or regulations.

15.4(4) *Tariffs or sheets to be filed on 30 days' notice.* No public utility subject to rate regulation shall make effective any new or changed rate, charge, schedule or regulation except by filing the same with the commission at least 30 days prior to the effective date thereof. The commission, for good cause shown, may allow changes in rates, charges, schedules or regulations to become effective on less than 30 days' notice.

15.4(5) *Letter of transmittal.* All tariffs and all additional original or revised sheets of tariffs and the accompanying letter of transmittal shall be filed with the commission in duplicate and shall include or be accompanied with such information as is necessary to explain the nature, effect, and purpose of the tariff or additional original or revised sheet submitted for filing. Such information shall include, when applicable:

a. The amount of the aggregate annual increase or decrease proposed.

b. The names of communities affected.

c. The number and classification of customers affected.

d. A summary of the reasons for filing and such other information as may be necessary to support the proposed changes.

15.4(6) *Evidence.* Unless otherwise authorized by the commission, a utility shall when proposing changes in tariffs or rate schedules, which changes relate to a general increase in revenue, prepare and submit with its proposed tariff the following evidence:

a. Factors relating to value. A statement showing the original cost of the items of plant and facilities, for the beginning and end of the last available calendar year, any other factors relating to the value of the items of plant and facilities the utility deems pertinent to the commission's consideration, together with information setting forth budgeting accounts for the construction of scheduled improvements.

b. Comparative operating data. Information covering the latest available calendar year immediately preceding the filing date of the application.

(1) Operating revenue and expenses by primary account.

(2) Balance sheet at beginning and end of year.

c. Test year and pro forma income statements. Schedules setting forth revenues, expenses, net operating income of the last available calendar year, the adjustment of unusual items and by adjustment to reflect operations for a full year under existing and proposed rates.

d. Additional evidence. The applicant may submit any other schedules, exhibits and data which it deems pertinent to the application.

15.4(7) *Evidence requested by the commission.* The applicant shall furnish any additional evidence as ordered by the commission at any time after the filing of the tariff.

15.4(8) *Notice of changes of tariffs.* Notice of changes in tariffs or the filing of new tariffs shall be given to all cities, towns and counties affected by such changes by notifying the mayors

and the chairmen of the boards of supervisors of such cities, towns and counties, respectively, by ordinary mail not more than 15 days following the filing of such changes in tariffs or new tariffs with the commission. Proof of mailing of such notice shall be filed with the commission prior to the effective date of such changes in tariffs or new tariffs filed with the commission.

The commission may, in its discretion, waive the foregoing notice or require additional notice to be given. Failure of a mayor or chairman of a board of supervisors to receive a copy of the notice herein prescribed shall not invalidate such notice.

15.4(9) *General publicity.* Whenever changes in rates or regulations are put into effect under the provisions of section 490A.6, allowing such rates, charges, schedules or regulations to be placed into effect under bond or by any other undertaking approved by the commission, 90 days subsequent to the filing of such changes, the utility shall acquaint the public with the changes by notifying the mayors of the cities and towns and the chairmen of the boards of supervisors of the counties, respectively, affected by such changes in the manner provided in 15.4(8).

15.5(490A) Answers.

15.5(1) *Time for.* Answers to complaints, petitions, applications or other pleadings shall be filed with the commission within 20 days after the day on which such pleadings are served upon the respondent or other party unless otherwise ordered. The answer must specifically admit, deny or otherwise answer all material allegations of the pleadings and also briefly set forth the affirmative grounds relied upon to support such answer.

If the party fails to file an answer, issue as to such party will be considered joined.

15.5(2) *Motion to dismiss.* Any party who deems the complaint, petition, application or other pleading insufficient to show a breach of legal duty or grounds for relief may, instead of answering, move to dismiss. In such case, the facts stated in said pleadings will be deemed admitted for the limited purpose of determining the merits of said motion.

15.6(490A) Notice.

15.6(1) *Service of notice.*

a. The commission will prescribe such notices as are required by law in hearings contemplated in sections 490A.3, 490A.6 and 490A.7. All other pleadings, including briefs, applications for further hearing or rehearing, and notices of appeal shall be served by the party filing same upon all parties to the proceeding, unless otherwise ordered by the commission. Proof of service shall accompany the filing with the commission.

b. Proof of service of any paper shall be by certificate of attorney, affidavit or acknowledgment.

c. Unless otherwise provided by the commission, service shall be made by delivering in person or by depositing in the United States mail, properly addressed with postage prepaid, one copy to each party entitled thereto. When any party or parties have appeared by attorney, service upon the attorney shall be deemed service upon such party or parties.

d. Answers, intervening petitions, supplemental complaints and petitions, amendments to proceedings, written motions, affidavits in support of such motion, shall be served by the party filing the same upon all parties to the proceeding and shall be accompanied by proof of service upon such parties.

See 15.4(8).

15.7(490A) Investigation and hearings.

15.7(1) *Investigations.* The commission may at any time, on its own motion, investigate and inquire into the management of the business of any public utility, and, if it deems necessary, initiate investigations, issue subpoenas to require the attendance and testimony of witnesses, the production of all books, papers, tariff schedules, contracts, agreements and documents of the utility under investigation, and to inspect the same and to examine under oath or otherwise any officer, director, agent, or employee of any public utility.

The commission may also, through its own experts or employees, or otherwise, obtain such information as it may consider necessary or desirable in any investigation.

15.7(2) *Hearings.* When the commission orders a hearing, witnesses shall be examined orally under oath or affirmation and their testimony shall be taken down and made a part of the record, or depositions may be taken under oath or affirmation upon such notice as is herein prescribed. The commission does not furnish copies of the record but in the event that any person, whether or not a party to the proceedings, shall desire a copy thereof, the same will be furnished by the reporter, upon request, in a reasonable time at a rate not exceeding the legal rate authorized by law.

15.7(3) *Witnesses and subpoenas.* At the direction of the commission, subpoenas may be issued by the commission for the attendance of witnesses or for the production of books, papers, records, accounts or documents at a hearing in a pending proceeding. Such subpoenas may be issued upon the motion of the commission or upon application of any party to the proceeding in writing incorporating a showing that any such subpoena is reasonably required and specifying as nearly as possible the books, papers, records, accounts or documents desired to be produced and the material or relevant facts to be proved by them.

15.7(4) *Stipulations.* The parties to any proceeding or investigation before the commission may, by stipulation in writing filed with the commission, agree upon the facts or any portion thereof involved in the controversy, subject to approval by the commission or the examiner.

15.7(5) *Objections and exceptions.* When objections are made to the admission or exclusion of evidence before the commission, the grounds relied upon shall be stated briefly. Formal exceptions are unnecessary.

15.7(6) *Order of procedure.* At hearings on complaints, the complainant shall open and close. At hearings upon applications, the applicant shall open and close. At hearings on investigations, the commission or examiner may direct who shall open and close, but when the investigation is on the motion of the commission, the commission's staff or its representatives shall open and close. In hearings on several proceedings on a consolidated record, the commission or examiner shall designate who shall open and close. Intervenors shall follow the parties in whose behalf the intervention is made, and, in all cases where the intervention is not in support of either original party, the commission or examiner will designate at what stage such intervenors shall be heard. The commission or examiner may direct departures from the foregoing order or procedure in its or his discretion.

15.7(7) *Calling for further evidence.* At any stage of the hearing, or after the close of testimony, but prior to brief having been filed, the commission or examiner may call for further evidence upon any issue, and may require such evidence to be presented by the party or parties concerned or by the staff of the commission.

15.7(8) *Depositions.* The commission or examiner, either upon its or his own motion, or upon application in writing by any party, may cause the depositions of witnesses residing within or without the state to be taken in the manner prescribed by law for like depositions in civil actions in the district courts of the state of Iowa.

15.7(9) *Documentary evidence.* When any material or relevant matter offered in evidence by any party is embraced in a book, paper or document containing other matter not material or relevant, the party offering the same shall plainly designate the matter so offered. If in the judgment of the commission or examiner, such immaterial or irrelevant matter would unnecessarily encumber the record, such book, paper or document will not be received in evidence as a whole, but the material or relevant portions thereof, if otherwise admissible, may be read into the record or a true copy thereof supplied in the form of an exhibit.

Any matter contained in a report or other document on file with the commission may be offered in evidence by merely specifying the report, document, or other file containing the matter so offered. The commission or examiner on its or his own motion or upon a motion of any party, may require the offering party to designate specifically the portion of the report document or other file offered in evidence and the purpose for which it is offered.

15.7(10) *Appeals to commission from ruling of hearing examiner.* Any party objecting to a ruling of the examiner may present his objections to the commission in writing within five days. Such procedure will not be permitted to delay proceedings.

15.7(11) *Motions.* Motions, unless made during the hearings, shall be made in writing, shall set forth the relief or order sought and shall be filed with the secretary of the commission. Motions based on matter which does not appear of record shall be supported by affidavit.

15.7(12) *Brief and oral arguments.* At the discretion of the commission or examiner oral arguments may be had by the parties with right of the commission or examiner to limit the time thereof and either party may have the right to furnish briefs. The commission or examiner shall designate the order in which oral arguments and briefs shall be made and filed.

15.7(13) *Reopening hearing.* At any time after the closing of a hearing but before the issuance of an order by the commission, any party to the proceedings may file with the commission or the examiner a petition to reopen the proceedings for the purpose of taking additional evidence. Copies of such petition shall be served upon all parties or their attorneys of record. Within ten days after the service of any such petition, any other party to the proceeding may file with the commission or the examiner his response to such petition.

Any time prior to the issuance of an order by the commission, after notice to the parties and an opportunity to be heard, the commission or examiner may reopen the proceedings for the reception of further evidence on the commission's or the examiner's own motion.

15.8(490A) Rehearings.

15.8(1) *Application for rehearing.* All applications for rehearing will be made and processed in accordance with section 490A.12.

15.8(2) *Contents of application.* Applications for rehearing after decision made by the commission must state specifically the grounds upon which the application is based and must specify the findings of fact and conclusions of law claimed to be erroneous, with a brief statement of the grounds of error.

15.9(490A) Prehearing procedure.

15.9(1) *Prehearing conference.* An informal conference of parties may be ordered at the discretion of the commission or examiner or at the request of any party prior to a hearing in any proceeding.

a. For the purpose of formulating issues and considering:

(1) The simplification of issues.

(2) The necessity of desirability of amending the pleadings either for the purpose of clarification, amplification or limitation.

(3) The possibility or making admissions of certain averments of fact or stipulations thereof, to the end of avoiding unnecessary proof.

(4) The procedure at the hearing.

(5) The propriety of prior mutual exchange between or among the parties of prepared testimony and exhibits.

(6) Such other matters as may aid in the simplification of the evidence and disposition of the proceeding.

b. Recordation. Action agreed upon at the conference shall be made a part of the record in such manner as may be prescribed by the commission or examiner at the close of the conference.

15.9(2) *Offers of settlement.* Nothing contained in this section shall be construed as precluding any party to a proceeding from submitting at any time offers of settlement or proposals of adjustment to all parties and to the commission (or to staff counsel for transmittal to the commission), or from requesting conferences for such purpose.

The fact that proposals of settlement or of adjustment or as to procedure to be followed and proposed stipulations have been made by any party but not agreed to by parties to whom offered shall be privileged and shall not be admissible in evidence against any counsel or parties claiming such privilege.

[Filed February 18, 1966]

CHAPTER 16
ACCOUNTING

16.1(490A) Uniform systems of accounts—electric. The 1958 uniform systems of accounts for Class A, B, C, and D electric utilities, including editorial and clarifying changes as of June, 1960, of the National Association of Railroad and Utilities Commissioners, are adopted with the following modifications:

16.1(1) General instruction 1-A of the uniform systems of accounts for electric utilities is changed for Class D electric utilities to read: "Utilities having annual electric operating revenues of less than $150,000.00."

16.1(2) General instruction 1-B of the uniform systems of accounts for electric utilities is modified by adding the following sentence: "Utilities subject to rate regulation by the commission shall keep all the accounts of this system of accounts which are applicable to their affairs and utilities not subject to rate regulation shall keep the accounts of these systems of accounts for operating revenue only."

16.1(3) General instruction 1-D of the uniform systems of accounts for electric utilities is modified by adding the following sentence: "It is recommended but not required that electric utilities not subject to rate regulation keep all applicable accounts as recommended for Class A, B, C and D utilities."

16.1(4) General instruction 2-D of the uniform systems of accounts for electric utilities is modified by adding the following sentence: "This shall not prohibit the electric utilities from using such additional accounts as they are required or permitted to keep for their reporting to other regulatory authorities or to their stockholders providing the commission is notified of the nature, amount and purpose of such accounts in the annual report to the commission and at such other times as may be requested by the commission."

16.2(490A) Uniform systems of accounts—gas. The 1958 uniform systems of accounts for Class A, B, C and D gas utilities, including editorial and clarifying changes as of June, 1960, of the National Association of Railroad and Utilities Commissioners, are adopted with the following modifications:

16.2(1) General instruction 1-A of the uniform systems of accounts for gas utilities is changed for Class D gas utilities to read: "Utilities having annual gas operating revenues of less than $150,000.00."

16.2(2) General instruction 1-B of the uniform systems of accounts for gas utilities is modified to add the following sentence: "Gas utilities subject to rate regulation by the commission shall keep all the accounts of this system of accounts which are applicable to their affairs and gas utilities not subject to rate regulation shall keep the accounts of this system of accounts for operating revenue only."

16.2(3) General instruction 1-D of the uniform systems of accounts for gas utilities is modified by adding the following sentence: "It is recommended but not required that gas utilities not subject to rate regulation keep all applicable accounts as recommended for Class A, B, C and D gas utilities."

16.2(4) General instruction 2-D of the uniform systems of accounts for gas utilities is modified by adding the following sentence: "This shall not prohibit the gas utilities from using such additional accounts as they are required or permitted to keep for their reporting to other regulatory authorities or to their stockholders providing the commission is notified of the nature, amount and purpose of such accounts in the annual report to the commission and at such other times as may be requested by the commission."

16.3(490A) Uniform systems of accounts—water. The 1957 uniform systems of accounts for Class A, B, C and D water utilities,

including editorial and clarifying changes as of June, 1960, of the National Association of Railroad and Utilities Commissioners are adopted with the following modifications:

General instruction 2-D of the uniform systems of accounts for water utilities is modified by adding the following sentence: "This shall not prohibit the water utilities from using such additional accounts as they are required or permitted to keep for their reporting to other regulatory authorities or to their stockholders providing the commission is notified of the nature, amount and purpose of such accounts in the annual report to the commission and at such other times as may be requested by the commission."

16.4(490A) Uniform systems of accounts—telephone. The uniform systems of accounts for telephone utilities adopted by the F.C.C., editorial revision effective December 7, 1963, are adopted with the following modifications:

16.4(1) The general instructions of the F.C.C. uniform systems of accounts for Class A and Class B telephone companies are modified by adding to general instructions, section 31.01-1 the following instruction: "*(h)* The preceding paragraphs "*b*," "*c*," and "*d*" are modified to provide that telephone utilities subject to rate regulation by the commission shall keep all the accounts of this system of accounts which are applicable to their affairs and telephone utilities not subject to rate regulation shall keep the accounts of this system of accounts for operating revenues only. It is recommended but not required that telephone utilities not subject to rate regulation keep accounts as recommended for Class A, B, C and D companies."

16.4(2) The general instructions of the F.C.C. uniform systems of accounts for Class A and Class B telephone companies, section 31.2-26, are modified to insert after the title: "This section applies only to those companies which are required by the F.C.C. to maintain continuing property records."

16.4(3) The general instructions of the F.C.C. uniform systems of accounts for Class C telephone companies are modified by adding to general instructions, section 33.1 "*b*" the following: "Telephone utilities subject to rate regulation by the commission shall keep all the accounts of this system of accounts which are applicable to their affairs and telephone utilities not subject to rate regulation shall keep the accounts of this system of accounts for operating revenues only. It is recommended but not required that telphone utilities not subject to rate regulation keep accounts as recommended for Class A, B, C or D companies."

16.4(4) The general instructions of the F.C.C. uniform systems of accounts for Class A, B and C telephone companies are modified by adding the following sentence: "This shall not prohibit the telephone companies from using such additional accounts as they are required or permitted to keep for their reporting to other regulatory authorities or to their stockholders, providing the commission is notified of the nature, amount and purpose of such accounts in the annual report to the commission and at such other times as may be requested by the commission."

16.5(490A) Uniform systems of accounts—telegraph. The uniform systems of accounts for telegraph utilities adopted by the F.C.C., editorial revision, effective December 7, 1963, are adopted with the following modifications:

The general instructions of the F.C.C. uniform systems of accounts for telegraph companies are modified by adding the following sentence: "This shall not prohibit the telephone companies from using such additional accounts as they are required or permitted to keep for their reporting to other regulatory authorities or to their stockholders, providing the commission is notified of the nature, amount and purpose of such accounts in the annual report to the commission and at such other times as may be requested by the commission."

[Filed January 17, 1964]

CHAPTER 17
ASSESSMENTS

17.1(490A) Definition of "direct assessment." The charge to a particular public utility for expenses incurred by the commission for the purpose of determining rate matters to investigate the books, accounts, practices and activities of, or make appraisals of the property of, or to render any engineering or accounting services to any public utility.

17.2(490A) Definition of "remainder assessment." The charge to all public utilities for the annual expenses reasonably attributable to the performance of the commission's duties prescribed by chapter 490A of the Code, after deducting the direct assessments and excluding the salaries of the commissioners.

17.3(490A) Notice of investigation and of intention to assess costs. The commission shall notify any utility to be assessed of the commission's intention to assess the costs incurred in any matter for which direct assessment can be made.

17.4(490A) Expenses to be included in direct assessments.

17.4(1) Salaries of commission employees, which will be computed on an hourly rate ob-

tained by dividing the individual's annual salary, and related benefit costs borne by the state, by the appropriate number of standard working hours for the year. The time of all commission employees engaged on the matter for which a direct assessment is to be made, whether on the property of the public utility, in the offices of the commission, or elsewhere, including travel time, will be included. The maximum chargeable time per person shall not exceed eight hours per day or 40 hours per week.

17.4(2) Travel expenses incurred in an investigation or in rendering services by commission personnel or by others employed by the commission will be charged to the utility. Travel expenses include costs of transportation, lodging, meals and other normal expenses attributable to traveling.

17.4(3) Whenever the commission finds it necessary to engage persons, facilities or equipment for consulting advice, particular projects or services arising out of investigations, the cost to the commission of such special services, facilities, or equipment, shall be chargeable to the public utility under investigation.

17.5(490A) Definition of "gross operating revenues derived from intrastate public utility operations." All revenues from intrastate operations includable in the operating revenue accounts of the prescribed uniform systems of accounts and operating revenues from the sale of heat; provided, however, that such revenues shall not include the following: (*a*) Uncollectible revenues; (*b*) Amounts included in the accounts for interdepartmental sales and rents.

17.6(490A) Reporting of operating revenues. Every public utility shall file with the commission on or before April 1 of each year a verified report, on forms prescribed by the commission, showing its gross operating revenues derived from intrastate public utility operations during the preceding calendar year. Such revenues are to be reported on the accrual basis or the cash basis consistent with the annual report filed with the commission.

17.7(490A) Compilation of assessment. The revenues for the remainder assessment shall be compiled by the commission and each utility assessed in proportion to its respective gross operating revenues during the last calendar year. The bill or accompanying letter of transmittal to each utility shall indicate the assessable revenue for the utility, the rate at which the assessment was computed, and the assessment amount. Utilities not subject to rate regulation will be assessed at one-half the rate assessed those subject to such regulation.

[Filed September 14, 1965]

CHAPTER 18
UTILITY RECORDS

18.1(490A) Definitions of "NARUC Rules". The "Regulations to Govern the Preservation of Records of Electric, Gas, and Water Utilities, Revised 1963," as published by the National Association of Railroad and Utilities Commissioners.

18.2(490A) Definition of "Part 42—FCC Rules and Regulations." The unit of Volume X of the Rules and Regulations of the Federal Communications Commission officially designated as "Part 42, Preservation of Records of Communication Common Carriers," as adopted by the Federal Communications Commission in Docket 13080 and published in the Federal Register on October 4, 1960, and as amended by Transmittal Sheet No. X-9 to Volume X of Rules and Regulations January, 1961 Edition, effective date September 1, 1965.

18.3(490A) The NARUC rules are adopted as a part of the rules of this commission and shall apply to any electric, gas or water public utility which is subject to regulation of rates by this commission.

18.4(490A) Part 42—FCC rules and regulations, as amended by Transmittal Sheet No. X-9, is hereby adopted as a part of the rules of this commission and shall apply to any public utility furnishing communications services to the public for compensation and which is subject to regulation of rates by this commission.

18.5(490A) Supplementing the regulations of the NARUC and Part 42—FCC rules and regulations, as amended by Transmittal Sheet No. X-9: The following addition is made to the general instructions of the NARUC and Part 42—FCC rules and regulations as amended by Transmittal Sheet No. X-9:

Records of Service Performed by Associated Companies

Any public utility to which the rules and regulations governing the preservation of records apply shall assure the availability of records of services performed by associated companies for the period indicated herein, as are necessary, to support the cost of services rendered to it by an associated company.

This instruction shall apply to any public utility which is subject to regulation of rates by this commission.

[Filed November 16, 1965;
amended January 11, 1966]

CHAPTER 19
SERVICE SUPPLIED BY GAS UTILITIES

19.1(490A) General information.

19.1(1) *Authorization of rules.* Chapter 490A of the Code provides that the Iowa state

commerce commission shall establish all needful, just and reasonable rules, not inconsistent with law, to govern the exercise of its powers and duties, the practice and procedure before it, and to govern the form, contents and filing of reports, documents and other papers necessary to carry out the provisions of this law.

Chapter 490 of the Code, provides that the Iowa state commerce commission shall have full authority and power to promulgate rules as it deems proper and expedient in the supervision of the transportation or transmission and underground storage of gas within the state of Iowa.

19.1(2) *Application of rules.* The rules shall apply to any gas utility operating within the state of Iowa as defined in chapter 490A of the Code and shall supersede all rules on file with this commission which are in conflict with these rules. These rules are intended to promote safe and adequate service to the public, to provide standards for uniform and reasonable practices by utilities, and to establish a basis for determining the reasonableness of such demands as may be made by the public upon the utilities. If unreasonable hardship to a utility or to a customer results from the application of any rule herein prescribed, application may be made to the commission for the modification of the rule or for temporary or permanent exemption from its requirements. The adoption of these rules shall in no way preclude the commission from altering or amending them, pursuant to statute, or from making such modifications with respect to their application as may be found necessary to meet exceptional conditions. These regulations shall in no way relieve any utility from any of its duties under the laws of this state.

19.1(3) *Definitions.* The following words and terms, when used in these rules, shall have the meaning indicated below:

a. "Commission" means the Iowa state commerce commission, and sometimes hereinafter referred to as "ISCC".

b. "Utility" means any person, partnership, business association, or corporation, domestic or foreign, owning or operating any facilities for furnishing gas to the public for compensation.

c. "Customer" means any person, firm, association, or corporation, or any agency of the federal, state or local government, being supplied with gas service by a gas utility.

d. "Premises" means a piece of land or real estate, including buildings and other appurtenances or improvements thereon.

e. "Gas plant" means all facilities including all real estate, fixtures and property owned, controlled, operated or managed by a gas utility for the production, storage, transmission and distribution of gas.

f. "Main" means a gas pipe, owned, operated, or maintained by a utility, which is used for the purpose of transmission or distribution of gas, but does not include "service pipe".

g. "Rate-regulated utility" means any utility as defined in definition "*b*" above which is subject to rate regulation provided for in chapter 490A of the Code.

h. "Service pipe" is the pipe that runs between a main or a pipe line and a regulator or meter on the customer's premises.

i. "Meter", without other qualification, shall mean any device or instrument which is used by a utility in measuring a quantity of gas.

j. "Check flow" means a flow between 20 percent and 50 percent of the rated capacity of a meter, except that with rotary displacement meters, it shall be ten percent or 20 percent of the rated capacity of the meter.

k. "Full-rated flow" means a flow of 100 percent of the rated capacity of a meter.

l. "Cubic foot" of gas as used in these rules shall have the following meanings:

(1) Where gas is supplied and metered to customers at the pressure [as defined in 19.7(2)] normally used for domestic customers' appliances, a cubic foot of gas shall be that quantity of gas which, at the temperature and pressure existing in the meter, occupies one cubic foot, except that where a temperature compensated meter is used, the temperature shall be 60°F.

(2) When gas is supplied to customers at other than the pressure in (1) above, the utility shall specify in its rules the base for measurement of a cubic foot of gas [see 19.2(5) "*c*", (6)]. Unless otherwise stated by the utility, such cubic foot of gas shall be that quantity of gas which, at a temperature of 60°F. and a pressure of 14.73 pounds per square inch absolute, occupies one cubic foot.

(3) The standard cubic foot of gas for testing the gas itself for heating value shall be that quantity of gas, saturated with water vapor, which at a temperature of 60°F. and a pressure of 30 inches of mercury occupies one cubic foot. (Temperature of mercury = 32° F.; accelleration due to gravity = 32.17 ft. per second; density = 13.595 grams per cubic centimeter).

m. "Interruption of service" means any disturbance of the gas supply whereby the pilot flame on the appliances of at least 50 customers in one segment or in a portion of a distribution system shall have been extinguished.

n. The abbreviations used, and their meanings, are as follows:

BTU	—British Thermal Unit
LP-Gas	—Liquefied Petroleum Gas
psig	—Pounds per Square Inch, Gauge
W.C.	—Water Column

o. "Appliance" refers to any device which utilizes gas fuel to produce light, heat or power.

p. "Tap" or "town border station" means the delivery point or measuring station at which a gas distribution utility receives gas from a natural gas transmission company.

q. "Gas" unless otherwise specifically des-

ignated, means manufactured gas, natural gas, other hydrocarbon gases, or any mixture of gases produced, transmitted, distributed or furnished by any gas utility.

r. "Pressure", unless otherwise stated, is expressed in pounds per square inch above atmospheric pressure, i.e., gauge pressure (abbreviation—psig).

s. "Complaint" as used in these rules is a statement or question by anyone, whether a utility customer or not, alleging a wrong, grievance, injury, dissatisfaction, illegal action or procedure, dangerous condition or action, or utility obligation.

t. "Heating and calorific values". The following values shall be used:

(1) "British thermal unit" (BTU) is the quantity of heat that must be added to one avoirdupois pound of pure water to raise its temperature from 58.5°F. to 59.5°F. under standard pressure.

(2) "Dry calorific value" of a gas (total or net) is the value of the total or the net calorific value of the gas divided by the volume of dry gas in a standard cubic foot.

NOTE: The amount of dry gas in a standard cubic foot is .9826 cu. foot.

(3) "Net calorific value" of a gas is the number of British thermal units evolved by the complete combustion, at constant pressure, of one standard cubic foot of gas with air, the temperature of the gas, air, and products of combustion being 60°F. and all water formed by the combustion reaction remaining in the vapor state.

NOTE: The net calorific value of a gas is its total calorific value minus the latent heat of evaporation at standard temperature of the water formed by the combustion reaction.

(4) "Therm" means 100,000 British thermal units.

(5) "Total calorific value" of a gas is the number of British thermal units evolved by the complete combustion being 60°F. and all water formed by the combustion reaction condensed to the liquid state.

u. "Tariff" refers to the entire body of rates, rentals, charges, classifications and rules adopted and filed by a public utility for a single type of service.

19.2(490A) Records and reports.

19.2(1) *Location of records.* All records required by these rules or necessary for the administration thereof, shall be kept within this state, unless otherwise authorized by the commission. These records shall be reasonably accessible and available for examination by the commission or its authorized representatives at all reasonable hours.

19.2(2) *Retention of records.* Unless otherwise specified by the commission, all records required by these rules shall be preserved for the period of time specified in the revised 1963 edition of the National Association of Railroad and Utilities Commissioners' publication "Regulations to Govern the Preservation of Records of Electric, Gas and Water Utilities".

19.2(3) *Tariffs to be filed with the commission.* The utility shall file its tariff with the commission, and shall maintain such tariff filing in a current status. The schedules of rates of rate-regulated utilities and rules of all utilities shall be filed with the commission and shall be classified, designated, arranged and submitted so as to conform to the requirements of current tariff or rate schedule circulars and special instructions which have been or may from time to time be issued by the commission. Provisions of the schedules shall be definite and so stated as to minimize ambiguity or the possibility of misinterpretation. The form identification and content of tariffs shall be in accordance with these rules.

Utilities which are not subject to the rate regulation provided for by chapter 490A of the Code shall not be required to file schedules of rates, or contracts primarily concerned with a rate schedule, with the commission but nothing contained in these rules shall be deemed to relieve any utility of the requirement of furnishing any of these same schedules or contracts which are needed by the commission in the performance of the commission's duties upon request to do so by the commission.

19.2(4) *Form and identification.* All tariffs shall conform to the following rules:

a. The tariff shall be printed, typewritten or otherwise reproduced on 8½ x 11 inch sheets of white paper equal in durability to 20-pound bond paper with 25 percent cotton or rag content so as to result in a clear and permanent record. The sheets of the tariff should be ruled or spaced to set off a border on the left side suitable for binding. In the case of utilities subject to regulation by any federal agency the format of sheets of tariff as filed with the commission may be the same format as is required by the federal agency provided that the rules of the commission as to title page; identity of superseding, replacing or revision sheets; identity of amending sheets; identity of the filing utility, issuing official, date of issue, effective date; and the words "ISCC Tariff" shall apply in the modification of the federal agency format for the purposes of filing with this commission.

b. The title page of every tariff and supplement shall show in the order named:

(1) The first page shall be the title page which shall show:

ISCC GAS TARIFF

(Name of Public Utility)
Filed with
Iowa State Commerce Commission .....
date

(2) When a tariff is to be superseded or replaced in its entirety, the replacing tariff shall show in its title page that it is a revision of a tariff on file and the number being superseded or replaced, for example:

ISCC TARIFF NO. .....
SUPERSEDES ISCC TARIFF NO. .....

(3) When a partial tariff amends or adds to an original or amended tariff already on file, the partial tariff shall show on each amending page the designation of the original tariff and the number of any preceding amendment thus amended.

AMENDS ISCC TARIFF NO. .....

(Name of Public Utility)

EFFECTIVE .....

(4) When a new part of a tariff eliminates an existing part of a tariff it shall so state and clearly identify the part eliminated.

(5) Any tariff modifications as defined in "2", "3" or "4" above replacing tariff sheets shall be marked in the right margin with symbols as herein described to indicate the place, nature and extent of the change in text.

Symbol	*Meaning*
(C)	A change in regulation
(D)	A discontinued rate, treatment or regulation
(I)	An increased rate or new treatment resulting in increased rate
(N)	A new rate, treatment or regulation
(R)	A reduced rate or new treatment resulting in a reduced rate
(T)	A change in text but no change in rate, treatment or regulation

c. All sheets except the title page shall have, in addition to the above-stated requirements the following further information:

(1) Name of utility under which shall be set forth the words "ISCC Tariff". If the utility is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name.

(2) Issuing official and issue date.

(3) Effective date.

19.2(5) *Content of tariffs.* A tariff filed with the commission shall contain:

a. A table of contents containing a list of rate schedules and other sections in the order in which they appear showing the sheet number of the first page of each section.

b. All rates of utilities subject to rate regulation for service with indication for each rate of the type of gas and the class of customers to which each rate applies. There shall also be shown the prices per unit of service, and the number of units per billing period to which the prices apply, the period of billing, the minimum bill, method of measuring demands and consumptions, including method of calculating or estimating loads or minimums, and any special terms and conditions applicable. The discount for prompt payment or penalty for late payment, if any, and the period during which the net amount may be paid shall be specified.

c. A copy of the utility's rules, or terms and conditions, describing the utility's policies and practices in rendering service shall include:

(1) A statement as to the equivalent total heating value of the gas in BTU's per cubic foot on which their customers are billed. If necessary, this may be listed by district, division or community.

(2) The list of the items which the utility furnishes, owns, and maintains on the customer's premises, such as service pipe, meters, regulators, vents and shut-off valves.

(3) General statement indicating the extent to which the utility will provide service in the adjustment of customer appliances at no additional customer charge over the filed commodity rates of rate-regulated utilities or commodity rates charged by nonrate-regulated utilities.

(4) General statement of the utility's policy in making adjustments for wastage of gas when such wastage occurs without the knowledge of the customer.

(5) A statement indicating the minimum number of days allowed for payment of the gross amount of the customer's bill before service will be discontinued for nonpayment.

(6) A statement indicating the volumetric measurement base to which all sales of gas at other than standard delivery pressure are corrected.

(7) Forms of standard contracts required of customers for the various types of service available.

(8) A copy of each standard and special contract for the purchase, sale or interchange of gas.

(9) A copy of each type of customer bill.

(10) The name, title, address and telephone number of the person who is authorized to receive, act upon and respond to communications from the commission in connection with; (*a*) general management duties; (*b*) customer relations (complaints); (*c*) engineering operations; (*d*) meter tests and repairs; (*e*) emergencies during nonoffice hours; (*f*) pipe-line permits (gas).

(11) The utility shall keep the commission informed currently by written notice of the location at which the utility keeps the various classes of records required by these rules.

(12) List of towns, cities, and unincorporated communities where urban rates are applicable, and towns in which service is furnished.

(13) Definitions of classes of customer.

(14) Extension rules for extending service to new customers indicating what portion of the extension or cost thereof will be furnished by the utility; and if the rule is based on cost, the items of cost included as required in 19.3(10).

(15) Rules with which prospective customers must comply as a condition of receiving service, and the terms of contracts required.

(16) Rules governing the establishment of credit by customers for payment of service bills.

(17) Rules governing disconnecting and reconnecting service.

(18) Notice required from customer for having service discontinued.

(19) Rules covering temporary, emergency, auxiliary, and stand-by service.

(20) Rules shall show any limitations on loads and covering the type of equipment which may or may not be connected.

(21) The list of service areas and the rates where rate control is authorized by law shall be filed in such form as to facilitate ready determination of the rates available in each municipality and in such unincorporated communities as have service at urban rates. If the utility has various rural rates, the areas where the same are available shall be indicated.

(22) A notification to the commission shall be made of any planned change in rate of service by a utility even though the change in rate of service is provided for in its tariff filing with the commission. This information shall reflect the amount of increase or decrease and the effective date of application. An up-to-date tariff sheet shall be supplied to the Iowa state commerce commission for its copy of tariff showing the current rates.

19.2(6) *Annual, periodic and other reports to be filed with the commission.* A utility shall file annually with the commission a verification that it has a currently correct set of utility system maps for each operating or distribution area. The maps shall show:

a. Gas production plant.

b. Principal storage holder.

c. Peak shaving facilities location.

d. Feeder and distribution mains indicating size and pressure.

e. System metering (town border stations and other supply points).

f. Regulator stations in system indicating inlet and outlet pressures.

g. Calorimeter location.

h. State boundary crossing.

i. Franchise area.

j. Names of all communities (post offices) served.

19.2(7) *Accident reports.* Any person, company, corporation, city or town operating gas supply lines shall report in writing to the commission, all accidents to employees or other persons resulting in fatalities or burns, fractures, dislocations or internal or other injuries, which are directly traceable to the utility's operations of manufacturing or mixing gases or the transmission and distribution of gas and accidents resulting in property loss in excess of $10,000; such written report shall indicate the following information:

a. The name, address and age of the person or persons involved in the accident.

b. The time and place where the accident occurred.

c. Description of injuries including extent, severity and location on injured person(s).

d. The cause of the accident in detail.

e. The name of the individual, company, corporation, city or town operating the gas supply line.

Prompt notice, by telephone or telegraph, shall be given to the gas engineering section of the commission during office hours by the utility of any accident which has resulted in a fatality.

19.2(8) *Construction programs.* A utility shall notify the Iowa commerce commission of all proposed important additions to plant, including main extensions, the construction of which was started by the utility during the preceding month. For the purposes of this rule, an important addition to plant shall mean a single project involving the expenditure of at least $5,000 for other than main construction, or in the case of main construction, an expenditure of $30,000.

19.2(9) *Reports of gas service.* Each utility shall compile a monthly record of the following operations within 30 days after the end of the month covered and such record shall upon and after compilation be kept available for inspection by the commission or its staff at the principal utility's office within the state of Iowa. Such record shall contain:

a. The daily and monthly average of total heating values of gas in accordance with 19.7(7).

b. The monthly acquisition and disposition of gas.

c. Interruptions of service occuring during the month in accordance with 19.7(10). If there were no interruptions, then it should be so stated.

d. The number of customer pressure investigations made and the results.

e. The number of customer meters tested and test results tabulated as follows: The number that falls into limits 0 to +2%, +2 to +4%, −2 to −4%, over +4%, under −4%, and "Does Not Register" in accuracy.

f. Progress on leak survey program including the number of leaks found during the month classified as to nature of leaks and causes.

g. Number of district regulators checked and nature of repairs required.

h. Number of house regulators checked and nature of repairs required.

i. Description of usual types of operating difficulties.

j. Type of odorant and monthly average pounds per million cubic feet used in each individual distribution system.

A summary of the 12 monthly gas service records for each calendar year shall be attached to and submitted with the utility's annual fiscal plant and statistical report to the commission.

19.2(10) The utility shall keep the commission informed currently by written notice as to the location at which the utility keeps the various classes of records required by these rules.

19.2(11) A copy of the utility's current rules, if any, published or furnished by the utility for the use of engineers, architects, plumbing contractors, etc., covering meter and service installation shall be filed with the commission.

19.2(12) A copy of each type of customer bill form in current use shall be filed with the commission.

19.2(13) Prompt notice by telephone or telegram shall be given the gas engineering section of the commission by a utility in the event of interruption of service as defined in 19.1(3) "*m*" of these rules.

19.2(14) Each utility shall file such other monthly, periodic and annual reports as are requested by the commission. Monthly and periodic reports shall be due in the commission's office within 30 days after the end of the reporting period. All annual reports shall be filed with this commission by April 1 of each year for the preceding calendar year.

19.3(490A) General service requirements.

19.3(1) *Disposition of gas.* All gas sold by a utility shall be on the basis of meter measurement unless otherwise authorized by the commission. Wherever practicable, consumption of gas within the utility itself, or by administrative units associated with it, shall be metered. All service on the premises of the customer (except those customers who prior to the effective date of this order have been allowed to submeter service) shall be sold directly by the utility and such a customer shall not directly sell or submeter such service to a third party except the indirect reselling of utility service by a utility customer which is included as an unidentified part of fixed rentals will not be considered submetering.

19.3(2) *Condition of meter.* No meter shall be installed or continued in service which is known to be mechanically defective, has an incorrect correction factor or has not been tested, and adjusted, if necessary, in accordance with 19.6(490A) and 19.6(3). The capacity of the meter and the index mechanism should be consistent with the gas requirements of the customer.

19.3(3) *Meter reading sheets or cards.* The meter reading sheets, cards or ledger sheets shall show:

a. Customer's name, address, rate schedule, or identification of rate schedule.

b. Identifying number or description of the meter(s).

c. Meter readings.

d. If the reading has been estimated.

e. Any applicable multiplier or constant, or reference thereto.

19.3(4) *Meter charts.* All charts taken from recording meters shall be marked with the initial and final date and hour of the record, the meter identification, customer's name and location and the chart multiplier.

19.3(5) *Meter multiplier.* If it is necessary to apply a multiplier to the meter readings, the multiplier must be marked on the face of the meter register or stenciled in weather resistant paint upon the front cover of the meter.

19.3(6) *Prepayment meters.* Prepayment meters shall not be geared or set so as to result in the charge of a rate or amount higher than would be paid if a standard type meter were used, except under such special rate schedule as may be filed under 19.2(3).

19.3(7) *Meter reading interval.* An effort shall be made to read meters on corresponding days of each meter-reading period. The utility may permit the customer to supply the meter readings on a form supplied by the utility. Unless the utility has a plan to test check readings, a utility representative will read the meter at least once each 12 months and when the utility is notified there is a change of customer.

19.3(8) *Readings and estimates.* When a customer is connected or disconnected or the regular meter reading date is substantially revised causing a given billing period to be longer or shorter than usual, such bills shall be prorated on a daily basis unless other provisions are made in the utility's filed rules.

The utility may leave a meter reading form with the customer when access to meters cannot be gained. If the form is not returned in time for the billing operation, an estimated bill may be rendered. If an actual meter reading cannot be obtained, the utility may render an estimated bill without reading the meter or supplying a meter reading form to the customer. Only in unusual cases or when approval is obtained from the customer shall more than three consecutive estimated bills be rendered.

19.3(9) *Temporary service.* When the utility renders a temporary service to a customer it may require that the customer bear all the cost of installing and removing the service in excess of any salvage realized.

19.3(10) *Extension plan.* Each utility shall develop a plan, acceptable to the commission, for the installation of extensions of main and service lines where such facilities are in excess of those included in the regular rates for service and for which the customer shall be required to pay all or part of the cost. No utility shall make any extension except as permitted by their rules or refuse to make extension in accordance with these rules.

19.3(11) *Co-operation and advance notice.* In order that full benefit may be derived from these rules and in order to facilitate their proper application, all utilities shall observe the following co-operative practices:

a. Each utility shall give to other public utilities in the same general territory advance notice of any construction or change in construction or in operating conditions of its facilities concerned or likely to be concerned, in situations of proximity, provided, however, that the requirements of this rule shall not apply in case of routine extensions or minor changes in the local underground distribution facilities.

b. Each utility shall assist in promoting conformity with these rules. An arrangement should be set up between all utilities whose facilities may occupy the same general territory, providing for the interchange of pertinent data and information including that relative to proposed and existing construction and changes in operating conditions concerned or likely to be concerned in situations of proximity.

19.4(490A) Customer relations.

19.4(1) *Customer information.* Each utility shall:

a. Maintain up-to-date maps, plans or records of its entire transmission and distribution systems, with such other information as may be necessary to enable the utility to advise prospective customers, and others entitled to the information, as to the facilities available for serving any locality.

b. Assist the customer or prospective customer in selecting the most economical rate schedule.

c. Notify customers affected by a change in rates or schedule classification as set out in Rules of Practice and Procedure before the commission.

d. Post a notice in a conspicuous place in each office of the utility where applications for service are received, informing the public that copies of the rate schedules and rules relating to the service of the utility, as filed with the commission, are available for inspection.

e. Upon request, inform its customers as to the method of reading meters.

f. Furnish such additional information as the customer may reasonably request.

g. Make certain that employees responsible for the receiving of customer telephone calls and customer office visits shall be properly qualified and instructed in the screening and prompt handling of complaints to assure prompt reference of the complaint to the person or department capable of effective handling of the matter complained of and to obviate the necessity of the customer's preliminary recitation of the entire complaint to employees lacking in ability and authority to take appropriate action.

19.4(2) *Customer deposits.* Each utility may require from any customer or prospective customer a deposit intended to guarantee payment of bills for service. Such deposit shall not be less than five dollars nor more in amount than the maximum estimated charge for service for two consecutive billing periods or 90 days, whichever is less, or as may reasonably be required by the utility in cases involving service for short periods or special occasions.

19.4(3) *Interest on deposit.* Simple interest on deposits accrued at the rate of at least five percent per annum shall be paid by the utility to each customer required to make such a deposit for the time held by the utility. Interest shall be paid from the date of deposit to the date of refund or the date upon which the customer's account becomes delinquent, whichever is earlier, unless such period be less than six months. Payment of the interest to the customer may be made annually or at the time the deposit is returned. The deposit shall cease to draw interest on the date it is returned, on the date upon which the customer's account becomes delinquent, or on the date notice is sent to the customer's last known address that the deposit is no longer required.

19.4(4) Each utility shall keep records to show:

a. The name and address of each depositor.

b. The amount and date of the deposit.

c. Each transaction concerning the deposit.

19.4(5) Each utility shall issue a receipt of deposit to each customer from whom a deposit is received, and shall provide means whereby a depositor may establish his claim if his receipt is lost.

19.4(6) The deposit may be refunded upon request of the customer after 12 consecutive months of prompt payment, and, without such request, shall be refunded by the utility after 36 months of prompt payment unless the utility has evidence to indicate that the deposit is necessary to insure payment of bills for service. The deposit shall be refunded when the customer has paid the final billing upon termination of his service.

19.4(7) A record of each unclaimed deposit must be maintained for at least three years, during which time the utility shall make a reasonable effort to return the deposit. Unclaimed deposits, together with accrued interest, shall be credited to an appropriate account.

19.4(8) A new or additional deposit may be required upon reasonable written notice of the need for such a requirement in any case where a deposit has been refunded or is found to be inadequate to cover two months' bills as above provided for in 19.4(2) or where a customer's credit standing is not satisfactory to the utility. The service of any customer who fails to comply with these requirements may be disconnected upon five days' written notice.

19.4(9) *Customer bill forms.* Each customer shall be informed as promptly as possible following the reading of his meter, on bill form or otherwise, the following:

a. The reading of the meter at the beginning and at the end of the period for which the bill is rendered.

b. The dates on which the meter was read at the beginning and end of the billing period.

c. The number and kind of units metered.

d. The applicable rate schedule or identification of the applicable rate schedule.

e. The gross or net amount of the bill or both. In the case of prepayment meters, the amount of money collected shall be shown.

f. The date by which the customer must pay the bill in order to benefit from any discount or to avoid any penalty.

g. A distinct marking to identify an estimated bill.

h. A distinct marking to identify a minimum bill.

19.4(10) Any conversions from meter reading units to billing units, or any calculations to determine billing units from recording or other devices, or any other factors, such as purchased gas or fuel adjustments, used in determining the bill. In lieu of this information on the bill, a statement must be on the bill advising that such information can be obtained by contacting the utility's local office.

19.4(11) *Customer records.* The utility shall retain customer billing records for the length of time necessary to permit the utility to comply with 19.4(12) but not less than three years.

19.4(12) *Adjustment of bills.* Bills which are incorrect due to meter or billing errors are to be adjusted as follows:

a. Fast meters. Whenever a meter in service is tested and found to have overregistered more than two percent, the utility shall recalculate the bills for service, for the period as determined below:

(1) The bills for service shall be recalculated from the time at which the error first developed or occurred if that time can be definitely determined.

(2) If the time at which the error first developed or occurred cannot be definitely determined, it shall be assumed that the overregistration existed for a period equal to one-half of the time since the meter was last tested, or July 4, 1963, whichever is later, and the bills for service shall be recalculated for that period.

(3) If the recalculated bills indicate that more than three dollars is due an existing customer or five dollars is due a person no longer a customer of the utility, the full amount of the calculated difference between the amount paid and the recalculated amount shall be refunded to the customer. The refund to an existing customer may be in lump sum cash or as lump sum credit on a bill. If a refund is due a person no longer a customer of the utility, a notice shall be mailed to the last known address, and the utility shall upon request made within three months thereafter refund the amount due.

b. Nonregistering meters. Whenever a meter in service is found not to register, the utility may render an estimated bill.

c. Slow meters. Whenever a meter is found to be more than two percent slow, the utility may bill the customer for the amount the test indicates he has been undercharged for the period of inaccuracy, which period shall not exceed the last six months the meter was in service unless otherwise ordered by the commission. No back billing will be sanctioned if the customer has called to the utility's attention his doubts as to the meter's accuracy and the utility has failed within a reasonable time to check it.

19.4(13) Billing adjustments due to fast or slow meters shall be calculated on the basis that the meter should be 100 percent accurate. For the purpose of billing adjustment the meter error shall be one-half of the algebraic sum of the error at full-rated flow plus the error at check flow.

a. When a customer has been overcharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the amount of the overcharge shall be adjusted, refunded, or credited to the customer.

b. When a customer has been undercharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the amount of the undercharge may be billed to the customer.

19.4(14) *Credits and explanations.* Credits due a customer because of meter inaccuracies, errors in billing, or misapplication of rates shall be separately identified.

19.4(15) *Reasons for denying and disconnecting service.* Service may be refused or discontinued for any of the reasons listed below. Unless otherwise stated, the customer shall be allowed a reasonable time in which to comply with the rule before service is discontinued. Service may be refused or discontinued:

a. Without notice in the event of a condition determined by the utility to be hazardous.

b. Without notice in the event of customer use of equipment in such a manner as to adversely affect the utility's equipment or the utility's service to others.

c. Without notice in the event of tampering with the equipment furnished and owned by the utility.

d. Without notice in the event of unauthorized use.

e. For violation of or noncompliance with the utility's rules on file with the commission.

f. For failure of the customer to fulfill his contractual obligations for service or facilities subject to regulation by the commission.

g. For failure of the customer to permit the utility reasonable access to its equipment.

h. For nonpayment of bill provided that the utility has made a reasonable attempt to effect collection and has given the customer written notice that he has at least five days, excluding Sundays and holidays, in which to make settlement of his account or make a deposit in accordance with 19.4(2), or have his service disconnected.

i. For failure of the customer to provide the utility with a deposit as authorized by 19.4(2).

j. For failure of the customer to furnish such service equipment, permits, certificates, or rights of way necessary to serve said customer as shall have been specified by the utility as a condition to obtaining service, or in the event such equipment or permissions are withdrawn or terminated.

19.4(16) *Insufficient reasons for denying service.* The following shall not constitute sufficient cause for refusal of service to a present or prospective customer:

a. Delinquency in payment for service by a previous occupant of the premises to be served.

b. Failure to pay for merchandise purchased from the utility.

c. Failure to pay for a different type or class of public utility service.

d. Failure to pay the bill of another customer as guarantor thereof.

e. Failure to pay back bill rendered in accordance with 19.4(12)"*c*" (Slow meters).

f. Failure to pay adjusted bills based on the undercharges set forth in 19.4(13) "*b*".

19.4(17) *Change in character of service.* The following procedure shall be followed whenever there is a material change in the character of the gas service:

a. Changes under the control of the utility. The utility shall make such changes only with the approval of the commission, and after adequate notice to the customers.

b. Changes not under the control of the utility. The utility shall maintain the proper combustibility of the gas supplied at the heating value and specific gravity existing at the customers' meters by adjustment of appliances, if necessary [see 19.7(6) "*b*"].

19.4(18) The utility shall make any necessary adjustments to the customers' appliances without charge and shall conduct the adjustment program with a minimum of inconvenience to the customers in a change in character of service under the control of the utility.

19.4(19) *Customer complaints.* Each utility shall investigate promptly and thoroughly and keep a record of written complaints and all other reasonable complaints received by it from its customers in regard to safety, service, or rates, and the operation of its system as will enable it to review and analyze its procedures and actions. The record shall show the name and address of the complainant, the date and nature of the complaint, and its disposition and the date thereof. All complaints caused by a major outage or interruption shall be summarized in a single report.

19.5(490A) Engineering practice.

19.5(1) *Requirement for good engineering practice.* The gas plant of the utility shall be constructed, installed, maintained and operated in accordance with accepted good engineering practice in the gas industry to assure, as far as reasonably possible, continuity of service, uniformity in the quality of service furnished, and the safety of persons and property.

19.5(2) *Acceptable standards.* Unless otherwise specified by the commission, the utility shall use the applicable provision in the publications listed below as standards of accepted good practice:

a. The letters "ASA" used in these rules mean "American Standards Association", American Standard Code for "Gas Transmission and Distribution Piping Systems", ASA B31.8—1963.

b. The American Standard Installation of Gas Appliances and Gas Piping, ASA Z21.30—1964.

c. The National Fire Protection Association Standard, No. 59, June, 1962, "The Storage and Handling of Liquified Petroleum Gases at Utility Gas Plants".

d. "Standard Methods of Gas Testing", Circular No. 48, National Bureau of Standards, 1916. (The applicable portions of this circular have been substantially reproduced in the American Meter Company Handbook E-4, covering the testing of positive displacement gas meters).

e. "Testing Large Capacity Rotary Gas Meters", Research Paper No. 1741, National Bureau of Standards Journal of Research, September, 1946.

f. "Standard Method of Test for Calorific Value of Gaseous Fuels by the Water-Flow Calorimeter", American Society for Testing Materials, Standard D 900-55, adopted, 1948; Revised, 1955.

19.5(3) *Acceptable references.* The following publications have not been designated as standards but they may be used as guides for acceptable practice:

a. "Accuracy of the Recording Gas Calorimeter When Used with Gases of High BTU Content", by John H. Eiseman, National Bureau of Standards, and Elwin A. Patter, Gas Inspection Bureau of the District of Columbia, AGA publication No. CEP-55-13.

b. "Orifice Metering of Natural Gas", Report No. 3 of the AGA Gas Measurement Committee—April, 1955, as reprinted with revisions in January, 1956.

c. Reports prepared by the Practical Methods Committee of the Appalachian Gas Measurement Short Course, West Virginia University, as follows:

(1) Report No. 1, "Methods of Testing Large Capacity Displacement Meters"—1960.

(2) Report No. 2, "Testing Orifice Meters"—1940 as revised, 1958.

(3) Report No. 3, "Designing and Installing Measuring and Regulating Stations" as revised, 1956.

(4) Report No. 4, "Useful Tables for Gas Men"—1950.

(5) Report No. 5, "Prover Room Practices"—1954.

19.5(4) *Adequacy of gas supply.* The gas supply regularly available from pipe-line sources supplemented by production or storage capacity must be sufficiently large to meet all reasonable demands for firm gas service.

19.6(490A) Inspections and meter tests.

19.6(1) *Inspection of gas plant.* The utility's gas transmission and distribution facilities shall be designed, constructed and maintained as required to perform the gas delivery burden placed upon them. Each utility shall be capable of emergency repair work on a scale consistent with its scope of operation and with the physical conditions of its transmission and distribution facilities.

In appraising the reliability of the utility's transmission and distribution system, the commission will consider the condition of the physical property and the size, training, supervision, availability, equipment and mobility of the maintenance forces all as principal factors.

Each utility must adopt a program of inspection of its gas plant in order to determine the necessity for replacement and repair. The frequency of the various inspections shall be based on the utility's experience and accepted good practice. Each utility shall keep sufficient records to give evidence of compliance with its inspection program.

19.6(2) *Referee tests.* Upon written application to the commission by a customer or a utility, a test will be made of the customer's meter as soon as practicable under the observation of a representative of the commission.

The application, when in the case of a customer, shall be transmitted by certified or registered mail, accompanied by a certified check or money order made payable to the utility in the amount of ten dollars.

On receipt of such request from a customer the commission will forward the deposit to the utility and will notify the utility of the requirement for the test and the utility shall not knowingly remove or adjust the meter until instructed by the commission. The utility shall furnish all instruments, load devices and other devices and other facilities necessary for the test and shall perform the test in the presence and under the observation of the commission's representative and shall furnish verification of the accuracy of test instruments used.

If upon test the meter is found to overregister to an extent requiring a refund under the provisions of 19.4(12) "*a*", the amount paid to the utility for the test shall be returned to the customer by the utility.

The utility shall notify the customer in advance of the date and time of the referee test so the customer or his representative may be present when his meter is tested. The commission will make a written report of the results of the test to the customer and to the utility.

19.6(3) *Leak tests.* Repaired meters, and meters that have been removed from service, shall be leak tested by the utility prior to installation. New meters shall be leak tested in accordance with a sampling method acceptable to the commission. Each meter tested shall be subjected to an internal pressure of at least 20" W.C. and checked for the presence of leaks by one of the following tests:

a. Immersion test.

b. Soap test.

c. Pressure drop test of a type acceptable to the commission.

19.6(4) *Request tests.* Upon request by a customer the utility shall make a test of the meter serving him, provided that such tests need not be made more frequently than once in 18 months. If the meter is found accurate under the provisions of 19.4(12) the utility may charge the consumer not to exceed five dollars or the actual cost of such test, whichever is lesser. If a customer demands a meter test with less than 18 months between tests and the utility is not willing to perform the meter test at no charge, the customer must make a request for a referee test as set out in 19.6(2).

The utility shall notify the customer in advance of the date and time of the requested test so the customer or his representative may be present when his meter is tested.

A report of the results of the test shall be made to the customer within a reasonable time after the completion of the test, and a record of the report, together with a complete record of each test, shall be kept on file at the office of the utility.

19.6(5) *Periodic tests.* Unless otherwise authorized by the commission each utility shall make periodic tests of meters, associated metering

devices and instruments, to assure their accuracy. Such tests shall be scheduled within the calendar year or earlier, when the interval is stated in years; or within the calendar month or earlier, when the interval is stated in months. The basic periodic test interval shall not be longer than provided for in the following schedule:

NOTE: Maintenance and test programs suggested by manufacturers of the following meters and devices should be carefully considered.

a. Positive displacement meters 0 to 800 c.f./hr.
with ½ inch water column drop- 10 yrs.
801 to 2400 c.f./hr.
with ½ inch water column drop- 7 yrs.
Over 2400 c.f./hr.
with ½ inch water column drop- 2 yrs.

b. Orifice meters ..... 6 months

c. Base pressure correcting devices shall be checked on same time interval as the meters they are on.

d. Base volume correcting devices shall be checked on same time interval as the meters they are on.

e. Secondary standards.
Test bottles, one cubic foot ..... 10 years
Dead weight testers ..... 10 years

f. Working standards.
Bell provers ..... 5 years
Rotary displacement test meters ..... 5 years
(Each utility having rotary displacement meters which are too large for testing on a five cubic foot bell prover may use a properly calibrated transfer prover, low pressure flow prover, critical flow prover, or differential tests. In the latter case, an original differential test record shall be set up immediately after installation; further differential test results shall be recorded and compared with original test records.)
Flow provers ..... 5 years
Laboratory quality indicating pressure gauges ..... 6 months

19.6(6) *Preinstallation inspections and tests.* Except where an acceptable statistical sampling program has been approved by the commission, every meter and associated device shall be inspected and tested before being placed in service. A meter manufacturer's certification approved by the commission and supplemented by an acceptable statistical sampling program shall suffice for this purpose. The accuracy of each meter shall be certified to be within the following tolerances:

a. For positive displacement meters ..... 1.5% plus or minus

b. For orifice meters ..... 2.0% plus or minus

19.6(7) *As found tests.* All meters and associated metering devices shall be tested by the utility after they are removed from service. Such tests shall be made before the meters and associated devices are adjusted, repaired or retired.

19.6(8) *Test procedures and accuracies.* Meters and associated metering devices shall be tested at the points and adjusted to the tolerances prescribed below. The test of any unit of metering equipment shall consist of a comparison of its accuracy with the accuracy of a standard. The commission will use the applicable provisions of the standards listed in 19.5(2) as criteria of accepted good practice in testing meters.

a. Positive displacement meters.

(1) *Accuracy at test points.*

FLOW	ADJUSTED TO WITHIN
Check flow	1.5%
Not less than full rated flow	1.5%

(2) *Overall accuracy.* The accuracy at check flow and the accuracy at not less than full rated flow shall agree within one percent.

b. Orifice meters. Accuracy at test points must be within two percent, plus or minus.

c. Timing devices. All recording type meters or associated instruments which have a timing element that serves to record the time at which the measurement occurs must be adjusted so that the timing element is not in error by more than plus or minus four minutes in any 24-hour period.

19.6(9) *General.* All meters and associated metering devices, when tested, shall be adjusted as closely as practicable to the condition of zero error. All tolerances are to be interpreted as maximum permissible variations from the condition of zero error. In making adjustments no advantage of the prescribed tolerance limits shall be taken.

19.6(10) *Facilities and equipment for meter testing.* Each utility shall maintain or designate a meter shop for the purpose of inspecting, testing and repairing meters. The shop shall be open for inspection by authorized representatives of the commission at all reasonable times, and the facilities and equipment, as well as the methods of measurements and testing employed, shall be subject to the approval of the commission.

The area within the meter shop used for testing of meters shall be designed so that the meters and meter testing equipment are protected from drafts and excessive changes of temperature.

The meters to be tested shall be stored in such manner that the temperature of the meters is substantially the same as the temperature of the prover.

19.6(11) *Working standards.* Each utility shall own and maintain, or have access to, at least one approved bell type prover of not less than five cubic foot capacity, and all other equipment necessary to test meters, which shall be installed in the meter room. Means shall be provided to maintain the temperature of the liquid in the meter prover at substantially the same level as the ambient temperature in the prover room. The meter prover shall be maintained in good condition and correct adjustment so that it shall be capable of

determining the accuracy of any service meter to within one-half of one percent.

Each utility having meters which are too large for testing on a five cubic foot bell prover may use a properly calibrated test meter or a properly designed flow prover for testing the large meters.

19.6(12) Working standards must be checked periodically [see 19.6(5)] by comparison with a secondary standard.

Bell provers or piston type provers must be checked with a one cubic foot bottle which has been calibrated by the National Bureau of Standards.

Rotary displacement test meters must be checked with a bell prover or piston type prover of adequate capacity which has been calibrated by representatives of the National Bureau of Standards.

19.6(13) Extreme care must be exercised in the use and handling of standards to assure that their accuracy is not disturbed. Each standard shall be accompanied at all times by a certificate or calibration card, duly signed and dated, on which are recorded the corrections required to compensate for errors found at the customary test points at the time of the last previous test.

19.6(14) Each utility must have properly calibrated orifices, as may be necessary, to achieve the rates of flow required to test the meters on its system.

19.6(15) *Records of meters and associated metering devices.* Each utility shall maintain records of the following data, where applicable, for each meter and associated metering device until three years after retirement:

a. The complete identification—manufacturer, number, type, capacity, multiplier, constants and pressure rating.

b. The dates of installation and removal from service, together with the location.

19.6(16) *Meter test records.* Each utility shall maintain records of at least the last two tests made of any meter. The record of the meter test made at the time of the meter's retirement shall be maintained for a minimum of three years. Test records shall include the following:

a. The date and reason for the test.

b. The reading of the meter before making any test.

c. The accuracy "as found" at check and full rated flow.

d. The accuracy "as left" at check and full rated flow.

e. In the event test of the meter is made by using a standard meter or a flow prover, the utility shall retain all data taken at the time of the test in sufficiently complete form to permit the convenient checking of the test methods and the calculations.

f. Statement of repairs made if any.

19.7(490A) Standards of quality of service.

19.7(1) *Purity requirements.* All gas supplied to customers shall be substantially free of impurities which may cause corrosion of mains or piping or from corrosive or harmful fumes when burned in a properly designed and adjusted burner.

19.7(2) *Pressure limits.* The maximum allowable operating pressure for a low pressure distribution system shall not be so high as to cause the unsafe operation of any connected and properly adjusted low pressure gas burning equipment.

19.7(3) *Pressure surveys and records.* Each utility shall make a sufficient number of pressure measurements on its mains and at the customer's meter so that it will have a substantially accurate knowledge of the pressures in the low, intermediate and high pressure systems in each district, division, or community served by its distribution mains. All pressure records obtained under this section shall be retained by the utility for at least two years and shall be available for inspection by the commission's representatives. Notations on each record shall indicate the following:

a. The location where the pressure check was made.

b. The time and date of the check.

19.7(4) *Standards for pressure measurements.*

a. Secondary standards. Each utility shall own or have access to a dead weight tester. This instrument must be maintained in an accurate condition.

b. Working standards. Each utility must have water manometers, mercury manometers, laboratory quality indicating pressure gauges and field type dead weight pressure gauges as necessary for the proper testing of the indicating and recording pressure gauges used in determining the pressure on the utility's system. Working standards must be checked periodically [see 19.6(5)] by comparison with a secondary standard.

19.7(5) Extreme care must be exercised in the handling of standards to assure that their accuracy is not disturbed. Each standard shall be accompanied at all times by a certificate or calibration card, duly signed and dated, on which are recorded the corrections required to compensate for errors found at the customary test points at the time of the last previous test.

19.7(6) *Heating value.*

a. Manufactured and mixed gas. The heating value of manufactured gas, including LP-gas mixed with air, and natural gas when mixed with manufactured or LP-gas for peak shaving or emergency purposes shall be considered a mixed gas and shall be considered as being under the control of the utility. The average heating value on any

one day shall not fall below the standard total heating value [see 19.2(5) "c" (1)] by more than five percent but such average heating value may exceed the standard total heating value provided the resulting mixed gas shall have a specific gravity of less than 1.000. The monthly average heating value shall be not less than the standard total heating value.

b. Natural and LP-gas. The heating value of natural gas and undiluted, commercially pure LP-gas shall be considered as being not under the control of the utility. The utility shall determine the allowable range of monthly average heating values within which its customers' appliances may be expected to function properly without repeated readjustment of the burners. If the monthly average heating value is above or below the limits of the allowable range for three successive months, the customers' appliances must be readjusted in accordance with 19.4(17).

19.7(7) *Heating value determination and records.* Unless acceptable heating value information is available for all periods from other sources, including the pipe-line supplier, the utility shall provide and maintain a calorimeter of a type acceptable to the commission for the regular determination of the heating value of the gas sold. All companies using peak shaving equipment for auxiliary gas supply must determine heating value of mixed gas after the introduction of the peak shaving gas supply. The calorimetric equipment shall be installed in a suitably located testing station acceptable to the commission and subject to its inspection. The accuracy of all calorimeters, as well as the method of making heating value tests, shall be acceptable to the commission. Recording calorimeters shall be tested with a standard gas at least once each three years.

19.7(8) The utility shall determine the heating value of manufactured and mixed gas at least twice each day and shall make the tests during the period of the morning and afternoon peak demands.

19.7(9) The utility shall determine the heating value of natural and LP-gas at least once each month, except that utilities selling gas subject to a thermal adjustment shall determine the heating value in accordance with 19.7(8) above.

19.7(10) *Interruptions of service.* Each utility shall make reasonable efforts to avoid interruptions of service but when interruptions occur, service shall be re-established within the shortest time practicable, consistent with safety. Each utility shall keep records of interruptions of service on a major portion of its distribution system as set out in 19.1(3) *"m"* and shall make an analysis of the records for the purpose of determining steps to be taken to prevent recurrence of such interruptions. Such records should include the following information concerning the interruptions:

a. Cause *b.* Date and time *c.* Duration

19.7(11) Planned interruptions shall be made at a time that will not cause unreasonable inconvenience to customers and shall be preceded by adequate notice to those who will be affected.

19.7(12) Each utility shall promptly notify the gas section of the commission by telephone or telegraph of any interruption to the service of a major portion of its distribution system.

19.8(490A) Safety.

19.8(1) *Acceptable standards.* As criteria of accepted good safety practice the commission will use the applicable provisions of the standard listed in 19.5(2).

19.8(2) *Protective measures.* Each utility shall exercise reasonable care to reduce hazards inherent in connection with utility service to which its employees, its customers, and the general public may be subjected and shall adopt and execute a safety program designed to protect the public, fitted to the size and type of its operations. The utility shall give reasonable assistance to the commission in the investigation of the cause of accidents and in the determination of suitable means of preventing accidents. Each utility shall maintain a summary of all reportable accidents arising from its operations.

19.8(3) *Turning on gas.* Each utility upon the installation of a meter and turning on gas or the act of turning on the gas alone shall take the necessary steps to assure itself that there exists no flow of gas through the meter which is a warning that the customer's piping or appliances are not safe for gas turn on. (Ref: Sec. 2.11 ASA Z21.30, 1950 Turning on Gas.)

19.8(4) *Gas leaks.* A report of a gas leak shall be considered as an emergency requiring immediate attention.

19.8(5) *Odorization.* Any gas distributed to customers through gas mains or gas services or used for domestic purposes in compressor plants, which does not naturally possess a distinctive odor to the extent that its presence in the atmosphere is readily detectable at all gas concentrations of one-fifth of the lower explosive limit and above, shall have an odorant added to it to make it so detectable. Odorization is not necessary, however, for such gas as is delivered for further processing or use where the odorant would serve no useful purpose as a warning agent. Suitable tests must be made to determine whether the odor meets the aforementioned standards.

[Filed July 12, 1966]

CHAPTER 20
SERVICE SUPPLIED BY ELECTRIC UTILITIES

20.1(490A) General information.

20.1(1) *Authorization of rules.* Chapter 490A of the Code provides that the Iowa state

commerce commission shall establish all needful, just and reasonable rules, not inconsistent with law, to govern the exercise of its powers and duties, the practice and procedure before it, and to govern the form, content and filing of reports, documents and other papers necessary to carry out the provisions of this law.

Chapter 489 of the Code, provides that the Iowa state commerce commission shall have power to make and enforce rules relating to the location, construction, operation and maintenance of certain electrical transmission lines.

20.1(2) *Application of rules.* The rules shall apply to any electric utility operating within the state of Iowa subject to chapter 490A of the Code, and to the construction, operation and maintenance of electric transmission lines to the extent provided in chapter 489 of the Code, and shall supersede all conflicting rules of any such electric utility which were in force and effect prior to the adoption of their superseding rules.

These rules are intended to promote safe and adequate service to the public, to provide standards for uniform and reasonable practices by utilities, and to establish a basis for determining the reasonableness of such demands as may be made by the public upon the utilities.

If unreasonable hardship to a utility or to a customer results from the application of any rule herein prescribed, application may be made to the commission for the modification of the rule or for temporary or permanent exemption from its requirements.

The adoption of these rules shall in no way preclude the commission from altering or amending them, pursuant to statute, or from making such modifications with respect to their application as may be found necessary to meet exceptional conditions.

These rules shall in no way relieve any utility from any of its duties under the laws of this state.

20.1(3) *Definitions.* The following words and terms when used in these rules, shall have the meaning indicated below:

a. "Commission" means the Iowa state commerce commission, sometimes hereafter referred to as "ISCC".

b. "Utility" means any person, partnership, business association, or corporation, domestic or foreign, owning or operating any facilities for furnishing electricity to the public for compensation.

c. "Rate-regulated utility" means any utility as defined in definition 20.1(3) "*b*" above which is subject to rate regulation provided for in chapter 490A of the Code.

d. "Customer" means any person, firm, association, or corporation, or any agency of the federal, state or local government, being supplied, subject to the jurisdiction of this commission with light, heat or power by an electric utility.

e. "Premises" means a piece of land or real estate, including buildings and other appurtenances or improvements thereon.

f. "Electric plant" includes all real estate, fixtures and property owned, controlled, operated or managed in connection with or to facilitate the production, generation, transmission, delivery or furnishing of light, heat or power by an electric utility.

g. "Meter" means, unless otherwise qualified, a device that measures and registers the integral of an electrical quantity with respect to time.

h. "Meter shop" is a shop where meters are inspected, repaired and tested, and may be at a fixed location or may be mobile.

i. "Tariff" means the entire body of rates, tolls, rentals, charges, classifications and rules, adopted and filed by an electric utility for heat, light or power service furnished by the electric utility.

j. "Transmission line" means any single or multiphase electric power line operating at nominal voltages in excess of either 26,000 volts between ungrounded conductors or 15,000 volts between grounded and ungrounded conductors, regardless of the functional service provided by the line.

k. "Distribution line" means any single or multiphase electric power line operating at nominal voltage in either of the following ranges: 2,000 to 26,000 volts between ungrounded conductors or 1,155 to 15,000 volts between grounded and ungrounded conductors, regardless of the functional service provided by the line.

l. "Secondary line" means any single or multiphase electric power line operating at nominal voltage less than either 2,000 volts between ungrounded conductors or 1,155 volts between grounded and ungrounded conductors, regardless of the functional service provided by the line.

m. "Complaint" as used in these rules is a statement or question by anyone, whether a utility customer or not, alleging a wrong, grievance, injury, dissatisfaction, illegal action or procedure, dangerous condition or action or utility obligation.

20.1(4) *Abbreviations.* The following abbreviations may be used where appropriate:

a. ASA—American Standards Association, Incorporated, 10 East 40th Street, New York 16, New York.

b. FCC—Federal Communications Commission, Washington, D. C. 20554.

c. FPC—Federal Power Commission, Washington, D. C. 20426.

d. NARUC—National Association of Railroad and Utilities Commissioners, Interstate Commerce Commission Building, P. O. Box 684, Washington, D. C. 20044.

e. NFPA—National Fire Protection Association, 60 Batterymarch Street, Boston 10, Massachusetts.

20.2(490A) Records and reports.

20.2(1) *Location of records.* All records required by these rules or necessary for the administration thereof, shall be kept within this state unless otherwise authorized by the commission. These records shall be available for examination by the commission or its authorized representatives at all reasonable hours.

20.2(2) *Retention of records.* Unless otherwise specified herein, all records required by these rules shall be preserved for the period of time specified in the National Association of Railroad and Utilities Commissioners' publication, "Regulations to Govern the Preservation of Records of Electric, Gas and Water Utilities—Revised 1963".

20.2(3) *Tariffs to be filed with the commission.* The utility shall file its tariff with the commission, and shall maintain such tariff filing in a current status.

The schedules of rates of rate-regulated utilities and rules of all utilities shall be filed with the commission and shall be classified, designated, arranged and submitted so as to conform to the requirements of current tariff or rate schedule circulars and special instructions which have been or may from time to time be issued by the commission. Provisions of the schedules shall be definite and so stated as to minimize ambiguity or the possibility of misinterpretation. The form, identification and content of tariffs shall be in accordance with these rules.

Utilities which are not subject to the rate regulation provided for by chapter 490A of the Code, shall not be required to file schedules of rates, or contracts primarily concerned with a rate schedule, with the commission and shall not be subject to the provisions related to rate regulations, but nothing contained in these rules shall be deemed to relieve any utility of the requirement of furnishing any of these same schedules or contracts which are needed by the commission in the performance of the commission's duties upon request to do so by the commission.

20.2(4) *Form and identification.* All tariffs shall conform to the following rules:

a. The tariff shall be printed, typewritten or otherwise reproduced on 8½ x 11 inch sheets of white paper equal in durability to 20-pound bond paper with 25 percent cotton or rag content so as to result in a clear and permanent record. The sheets of the tariff should be ruled or spaced to set off a border on the left side suitable for binding. In the case of utilities subject to regulation by any federal agency the format of sheets of tariff as filed with the commission may be the same format as is required by the federal agency provided that the rules of the commission as to title page; identity of superseding, replacing or revision sheets; identity of amending sheets; identity of the filing utility, issuing official, date of issue, effective date; and the words "ISCC TARIFF" shall apply in the modification of the federal agency format for the purposes of filing with this commission.

b. The title page of every tariff and supplement shall show in the order named:

(1) The first page shall be the title page which shall show:

ISCC ELECTRIC TARIFF

(Name of Public Utility)
filed with
Iowa State Commerce Commission .....
Date

(2) When a tariff is to be superseded or replaced in its entirety, the replacing tariff shall show on its title page that it supersedes a tariff on file and the number being superseded or replaced, for example:

ISCC TARIFF NO. _____
SUPERSEDES ISCC TARIFF NO. _____

(3) When a partial tariff amends or adds to an original or amended tariff already on file, the partial tariff shall show on each amending page the designation of the original tariff and the number of any preceding amendment thus amended, for example:

AMENDS ISCC TARIFF NO. _____

(Name of Public Utility)

EFFECTIVE _____

(4) When a new part of a tariff eliminates an existing part of a tariff it shall so state and clearly indicate the part eliminated.

(5) Any tariff modifications as defined above shall be marked in the right-hand margin of the replacing tariff sheet with symbols as here described to indicate the place, nature and extent of the change in text.

—Symbols—

(C)—Changed regulation

(D)—Discontinued rate or regulation

(I)—Increase in rate or new treatment resulting in increased rate

(N)—New rate, treatment or regulation

(R)—Reduction in rate or new treatment resulting in reduced rate

(T)—Change in text only

c. All sheets except the title page shall have, in addition to the above-stated requirements the following further information:

(1) Name of utility under which shall be set forth the words "ISCC TARIFF". If the utility is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name.

(2) Issuing official, title and issue date.

(3) Effective date.

20.2(5) *Content of tariffs.*

a. A table of contents containing a list of rate schedules and other sections in the order in which they appear showing the sheet numbers of the first page of each rate schedule or other section. In the event the utility filing the tariff elects to segregate a section such as general rules from the section containing the rate schedules or other sections, it may at its option prepare a separate table of contents for each such segregated section.

b. A preliminary statement containing a brief general explanation of the utility's operations.

c. All rates for service with indication for each rate of the type and voltage of service and the class of customers to which each rate applies. There shall also be shown any limitations on loads and type of equipment which may be connected, the prices per unit of service, and the number of units per billing period to which the prices apply, the period of billing, the minimum bill, any effect of transformer capacity upon minimum bill or upon the number of KWH in any step of the rate, method of measuring demands, method of calculating or estimating loads in cases where transformer capacity has a bearing upon minimum bill or size of rate steps, and any special terms and conditions applicable. The discount for prompt payment or penalty for late payment, if any, and the period during which the net amount may be paid shall be specified.

d. The voltage and type of service, (direct current or single or polyphase alternating current) supplied in each municipality, but without reference required to any particular part thereof.

e. Forms of standard contracts required of customers for the various types of service available.

f. If service to other utilities or municipalities is furnished at a standard filed rate, either a copy of each signed contract or a copy of the standard uniform contract form together with a summary of the provisions of each signed contract. The summary shall show the principal provisions of the contract and shall include the name and address of the customer, the points where energy is delivered, rate, term, minimum, load conditions, voltage of delivery and any special provisions such as rentals. Standard contracts for such sales as that of energy for resale, street lighting, municipal athletic field lighting, and for water utilities may be filed in summary form as above outlined.

g. Copies of special contracts for the purchase, sale, or interchange of electrical energy.

h. List of towns, cities, and unincorporated communities where urban rates are applicable, and a list of all communities in which service is furnished at other rates.

i. The list of service areas and the rates shall be filed in such form as to facilitate ready determination of the rates available in each municipality and in such unincorporated communities as have service at urban rates. If the utility has various rural rates, the areas where the same are available shall be indicated.

j. Definitions of classes of customers.

k. Extension rules for extending service to new customers indicating what portion of the extension or cost thereof will be furnished by the utility; and if the rule is based on cost, the items of cost included.

l. Type of construction which the utility requires the customer to provide if in excess of the Iowa electric safety code or the requirements of the municipality having jurisdiction, whichever may be the most stringent in any particular.

m. Specification of such portion of service as the utility furnishes, owns, and maintains, such as service drop, service entrance cable or conductors, conduits, service entrance equipment, meter and socket. Indication of the portions of interior wiring such as range or water heater connection, furnished in whole or in part by the utility, and statement indicating final ownership and responsibility for maintaining equipment furnished by utility.

n. Statement of the type of special construction commonly requested by customers which the utility allows to be connected, and terms upon which such construction will be permitted, with due provision for the avoidance of unjust discrimination as between customers who request special construction and those who do not. This applies, for example, to a case where a customer desires underground service in overhead territory.

o. Rules with which prospective customers must comply as a condition of receiving service, and the terms of contracts required.

p. Rules governing the establishment of credit by customers for payment of service bills.

q. Rules governing the procedure followed in disconnecting and reconnecting service.

r. Notice by customer required for having service discontinued.

s. Rules covering temporary, emergency, auxiliary and stand-by service.

t. Rules covering the type of equipment which may or may not be connected, including rules such as those requiring demand-limiting devices or power-factor corrective equipment.

u. General statement of the method used in making adjustments for wastage of electricity when accidental grounds exist without the knowledge of the customer.

v. A statement indicating the minimum number of days allowed for payment of the gross amount of the customer's bill before service will be discontinued for nonpayment.

w. Each utility shall develop a plan, acceptable to the commission, for the extensions of facilities, where they are in excess of those included in the regular rates for service and for which the customer shall be required to pay all or part of the cost as provided in 20.3(8) of these rules. The complete text of this accepted plan shall be included in the tariff as filed with the commission.

x. The name, title, address and telephone number of the person authorized to receive, act upon and respond to communications from the commission in connection with:

(1) General management duties.
(2) Customer relations (complaints).
(3) Engineering operations.
(4) Meter tests and repairs.
(5) Emergencies during nonoffice hours.
(6) Franchises for electric lines.

20.2(6) *Annual, periodic and other reports to be filed with the commission.*

a. System map verification. The utility shall file annually a verification that it has a currently correct set of utility system maps in accordance with general requirement 20.3(10) and a statement as to the location of the utility's offices where such maps are accessible and available for examination by the commission or its agents. The verification and map location information shall also be reported to the commission upon other occasions when significant changes occur in either the maps or location of the maps.

b. Accident reports. Any person, company, corporation, city or town operating electric supply lines shall report in writing to the commission, all accidents to employees or other persons resulting in fatalities or second or third degree burns involving several areas or an extensive area of the body surface caused by contact with energized parts of an electric supply line, and fatal accidents or fractures, dislocations or internal injuries resulting from a fall or from other causes and accidents resulting in property loss in excess of $10,000; such written report shall indicate the following information:

(1) The name, address and age of the person or persons involved in the accident.

(2) The time and place where the accident occurred.

(3) Description of injuries including extent, severity and location on injured person(s).

(4) The cause of the accident in detail.

(5) The name of the individual, company, corporation, city or town operating the electric supply line.

c. Notice of accident. Prompt notice, by telephone or telegraph shall be given to the electrical engineering section of the commission during office hours by the utility of any electrical utility accident as hereinbefore defined which has resulted in a human fatality.

Prompt notice, by telephone or telegraph shall be given to the electrical engineering section of the commission during office hours by the utility in the event of an interruption of electric service, other than scheduled interruptions, for one hour or longer period of time to an important portion of the utility's electrical service customers.

d. Each utility shall compile a monthly record of electric service showing the production, acquisition and disposition of electric energy, the number of customer terminal voltage investigations made, the number of customer meters tested and such other information as may be required by the commission. The monthly "Electric Service" record shall be compiled not later than 30 days after the end of the month covered and such record shall, upon and after compilation, be kept available for inspection by the commission or its staff at the utility's principal office within the state of Iowa. A summary of the 12 monthly "Electric Service" records for each calendar year shall be attached to and submitted with the utility's annual report to the commission.

e. The utility shall keep the commission informed currently by written notice as to the location at which the utility keeps the various classes of records required by these rules.

f. A copy of the utility's current rules, if any, published or furnished by the utility for the use of engineers, architects, electrical contractors, etc., covering meter and service installations shall be filed with the commission.

g. A copy of each type of customer bill form in current use shall be filed with the commission.

20.3(490A) General service requirements.

20.3(1) *Disposition of electricity.* All electricity sold by a utility shall be on the basis of meter measurement except for temporary service installations where the load is constant and the consumption may be readily computed, or as provided for in its filed rates.

Wherever practicable, consumption of electricity within the utility itself, or by administrative units associated with it, shall be metered.

No part of the electric service supplied to a customer's premises (except those premises at which submetering or resale of service was permitted prior to the first effective date of these rules) shall be resold to any third party except as an undefined part of a fixed rental without the specific written consent and agreement of the utility serving the premises and any utility operating under such an agreement or entering into such an agreement shall file a copy of each such agreement as a part of its tariff filing with the commission.

20.3(2) *Condition of meter.* No meter shall be installed or continued in service which is known to be mechanically or electrically defective, or to have incorrect constants or which has not been tested, and adjusted if necessary, in accordance with rules herein. The capacity of the meter and the index mechanism should be consistent with the electric requirements of the customer.

20.3(3) *Meter reading records.* The meter reading records shall show:

a. Customer's name, address, and rate schedule or identification of rate schedule.

b. Identification of the meter or meters either by permanently marked utility number or by manufacturer's name, type number and serial number.

c. Meter readings.
d. If the reading has been estimated.
e. Any applicable multiplier or constant.

20.3(4) *Meter charts.* All charts taken from recording meters shall be marked with the initial and final date and hour of the record, the meter identification, customer's name and location and the chart multiplier.

20.3(5) *Meter multiplier.* If it is necessary to apply a multiplier to the meter readings, the multiplier must be marked on the face of the meter register or stenciled in weather resistant paint upon the front cover of the meter in the following manner, X 100, or X 20.

20.3(6) *Meter reading and billing periods.* Readings of all meters used for determining charges to customers shall be scheduled monthly, bimonthly, quarterly or semiannually. An effort shall be made to obtain readings of the meters on corresponding days of each meter reading period. Bills shall be prorated on a daily basis:

a. Whenever, as a result of the connection or disconnection of the customer's service or a change of meter reading dates to serve the utility's convenience, the duration of the meter reading period for any customer is less than 80 percent of the normal meter reading period and,

b. Whenever, due to any cause, the duration of the meter reading period for any large commercial, large industrial or wholesale customer is less than 80 percent of the normal meter reading period.

The utility may permit the customer to supply the meter readings on a form supplied by the utility. Unless the utility has a plan to test check meter readings a utility representative will read the meter at least once each 12 months. At the request of the customer the utility will read the meter upon the beginning or termination of service.

In the event that the utility leaves a meter reading form with the customer when access to meters cannot be gained and the form is not returned in time for the billing operation, an estimated bill may be rendered.

If an actual meter reading cannot be obtained, the utility may render an estimated bill without reading the meter or supplying a meter reading form to the customer. Only in unusual cases or when approval is obtained from the customer shall more than three consecutive estimated bills be rendered.

20.3(7) *Demand meter registration.* When a demand meter is used for billing, the meter installation should be designed so that the highest expected annual demand reading to be used for billing will appear in the upper half of the meter's range.

20.3(8) *Extension plan.* Each utility shall develop a plan, acceptable to the commission, for the installation of extensions of main and service lines where such facilities are in excess of those included in the regular rates for service and for which the customer shall be required to pay all or part of the cost. No utility shall make or refuse to make any extensions except as permitted by these rules.

20.3(9) *Co-operation and advance notice.* In order that full benefit may be derived from these rules and in order to facilitate their proper application, all utilities between whose facilities co-ordination may now or later be necessary, shall observe the following co-operative practices:

a. Each utility shall give to other utilities in the same general territory advance notice of any construction or change in construction or in operating conditions of its facilities involved or likely to be involved, in situations of proximity, provided, however, that the requirements of this rule shall not apply in case of routine extensions or minor changes in the local distribution facilities.

b. To assist in promoting conformity with these rules, an arrangement shall be established between all utilities, whose facilities may occupy the same general territory, providing for the interchange of pertinent data and information including that relative to proposed and existing construction and changes in operating conditions involved or likely to be involved in situations of proximity.

20.3(10) *Maps.* Each utility shall maintain a currently corrected map or set of maps showing the physical location of its electric lines and stations in the area in which it supplies electric power and of the electric transmission facilities interconnecting such areas and all such maps shall be continuously accessible and available for examination by the commission or its agents at the utility's designated offices during the utility's regular office hours. The utility shall maintain maps or records showing:

a. Generating stations with capacity designation.

b. Purchased power supply points with maximum contracted capacity designation.

c. Purchased power metering points if located at other than power delivery point.

d. Transmission lines with size and type of conductor designation and operating voltage designation.

e. Transmission-to-transmission voltage transformation substations with transformer voltage and capacity designation.

f. Transmission-to-distribution voltage transformation substations with transformer voltage and capacity designation.

g. Distribution lines with size and type of conductor designation, phase designation and voltage designation.

h. Post-office names of all municipalities where retail electric service is supplied.

i. Post-office names of all municipalities to which the utility furnishes wholesale-for-resale electric power service.

j. All points at which transmission, distribution or secondary lines of the utility cross Iowa state boundaries.

k. The maps shall otherwise conform to any mapping standards presently adhered to by the reporting utility.

20.3(11) The requirement as to accessibility and availability to the commission may be fulfilled.

a. In the case of maps showing generating and transmission features only by keeping a currently correct copy of such map or maps on file at the commission office.

b. In the case of maps showing distribution features only or in the case of maps showing all features of the utilities system, by keeping a currently correct copy of such map or maps on file at utility offices centrally located with respect to the part of the state covered by the map.

20.4(490A) Customer relations.

20.4(1) *Customer information.* Each utility shall:

a. Maintain up-to-date maps, plans, or records of its entire transmission and distribution systems, together with such other information as may be necessary to enable the utility to advise prospective customers, and others entitled to the information, as to the facilities available for serving prospective customers in its service area.

b. Assist the customer or prospective customer in selecting the most economical rate schedule available for his proposed type of service.

c. Notify customers affected by a change in rates or schedule classification in the manner provided in the rules of practice and procedure before the commission.

d. Post a notice in a conspicuous place in each office of the utility where applications for service are received, informing the public that copies of the rate schedules and rules relating to the service of the utility, as filed with the commission, are available for inspection.

e. Upon request, inform its customers as to the method of reading meters.

f. Furnish such additional information as the customer may reasonably request.

20.4(2) Employees responsible for the receiving of customer telephone calls and customer office visits shall be properly qualified and instructed in the screening and prompt handling of complaints to assure prompt reference of the complaint to the person or department capable of effective handling of the matter complained of and to obviate the necessity of the customer's preliminary repetition of the entire complaint to employees lacking in ability and authority to take appropriate action.

20.4(3) *Customer deposits.* Each utility may require from any customer or prospective customer a deposit intended to guarantee payment of bills for service. Such deposit shall not be less than five dollars nor more in amount than the maximum estimated charge for service for two consecutive billing periods or 90 days, whichever is less, or as may reasonably be required by the utility in cases involving service for short periods or special occasions.

20.4(4) *Interest on deposit.* Accrued simple interest on deposits at the rate of at least five percent per annum shall be paid by the utility to each customer required to make such a deposit for the time held by the utility. Interest shall be paid from the date of deposit to the date of refund or the date upon which the customer's account becomes delinquent, whichever is earlier, unless such period be less than six months. Payment of the interest to the customer may be made annually, or at the time the deposit is returned.

The deposit shall cease to draw interest on the date it is returned, on the date upon which the customer's account becomes delinquent, or on the date notice is sent to the customer's last known address that the deposit is no longer required.

20.4(5) Each utility shall keep records to show:

a. The name and address of each depositor.

b. The amount and date of the deposit.

c. Each transaction concerning the deposit.

20.4(6) Each utility shall issue a receipt of deposit to each customer from whom a deposit is received, and shall provide means whereby a depositor may establish his claim if his receipt is lost.

20.4(7) The deposit may be refunded upon request of the customer after 12 consecutive months of prompt payment, and, without such request, shall be refunded by the utility after 36 consecutive months of prompt payment unless the utility has evidence to indicate that the deposit is necessary to insure payment of bills for service. The deposit shall be refunded when the customer has paid the final billing upon termination of this service.

20.4(8) A record of each unclaimed deposit must be maintained for at least three years, during which time the utility shall make a reasonable effort to return the deposit. Unclaimed deposits, together with accrued interest, shall be credited to an appropriate account.

20.4(9) A new or additional deposit may be required upon reasonable written notice of the need for such a requirement in any case where a deposit has been refunded or is found to be inadequate to cover the amount as provided for in 20.4(3) above, or where a customer's credit standing is not satisfactory to the utility. The service of any customer who fails to comply with these requirements may be disconnected upon five days written notice.

20.4(10) *Customer bill forms.* Each customer shall be informed as promptly as possible

following the reading of his meter, on bill form or otherwise, the following:

a. The reading of the meter at the beginning and at the end of the period for which the bill is rendered.

b. The dates on which the meter was read, at the beginning and end of the billing period.

c. The number and kind of units metered.

d. The applicable rate schedule, or identification of the applicable rate schedule.

e. The gross and net amount of the bill. In the case of prepayment meters, the amount of money collected shall be shown.

f. The date by which the customer must pay the bill in order to benefit from any discount or to avoid any penalty.

g. A distinct marking to identify an estimated bill.

h. A distinct marking to identify a minimum bill.

i. Any conversions from meter reading units to billing units, or any calculations to determine billing units from recording or other devices, or any other factors, such as fuel cost and amount of sales tax adjustments used in determining the bill.

20.4(11) *Customer billing information alternate.* In lieu of the complete display of such information on the bill, a statement shall be supplied to the customer on the bill form or otherwise advising that such information can be obtained by contacting the utility's local office.

20.4(12) *Customer records.* The utility shall retain records as may be necessary to effectuate compliance with 20.4(13) and 20.6(6), but not less than three years. Records for customer shall show where applicable:

a. KWH meter reading
b. KWH consumption
c. KW meter reading
d. KW measured demand
d. KW billing demand
f. Total amount of bill.

20.4(13) *Adjustment of bills.* Whenever a meter creeps or whenever a metering installation is found upon any test to have an average error of more than 2.0 percent; or a demand metering error of more than 1.5 percent in addition to the errors allowed under accuracy of demand meter; an adjustment of bills for service for the period of inaccuracy shall be made in the case of overregistration and may be made in the case of underregistration. The amount of the adjustment shall be calculated on the basis that the metering equipment should be 100 percent accurate with respect to the testing equipment used to make the test. For watthour meters, the average accuracy shall be the arithmetic average of the percent registration at light load and at heavy load, giving the heavy load registration a weight of four and the light load registration a weight of one.

20.4(14) *Determination of adjustment.* If the date when the error in registration began can be determined, such date shall be the starting point for determination of the amount of the adjustment except that adjustments due to slow meters shall be limited to the preceding six-month period as in the paragraph below.

If the date when the error in registration began cannot be determined, it shall be assumed that the error has existed for a period equal to one-half of the time elapsed since the meter was installed or one-half of the time elapsed since the last previous test, or July 4, 1963, whichever is later, except as otherwise provided in the paragraph below, covering error in registration due to creep. Adjustments due to slow meter shall be limited to the preceding six months except that a longer period may be authorized by the commission.

Recalculation of bills shall be on the basis of actual monthly consumption except that if service has been measured by self-contained single-phase meters or three-wire network meters and involves no billing other than for kilowatt-hours, the recalculation of bills may be based on the average monthly consumption determined from the most recent 36 months consumption data.

The error in registration due to creep shall be calculated by timing the rate of creeping and assuming that this creeping affected the registration of the meter for 25 percent of the time since the meter was installed or since the last previous test, whichever is later.

When the average error cannot be determined by test because of failure of part or all of the metering equipment, it shall be permissible to use the registration of check metering installations, if any, or to estimate the quantity of energy consumed based on available data. The customer must be advised of the failure and of the basis for the estimate of quantity billed. The same periods of error shall be used as defined in paragraphs above.

20.4(15) *Refunds.* If the recalculated bills indicate that more than one dollar is due an existing customer or two dollars is due a person no longer a customer of the utility, the full amount of the calculated difference between the amount paid and the recalculated amount shall be refunded.

Refunds shall be made to the two most recent consumers who received service through the meter found to be in error. In the case of a previous consumer who is not longer a customer of the utility, a notice of the amount due shall be mailed to such previous consumer at his last known address, and the utility shall upon demand made within three months thereafter refund the same.

20.4(16) *Back billing.* If the recalculation of billing indicates that an amount due the utility is equal to or in excess of amounts set forth in 20.4(15) above as minimum refunds, the utility may bill the customer for the amount due.

Each utility may establish a policy whereby the minimum sum above which it will commence back

billing for amounts due to underregistration is in excess of the amounts set forth in 20.4(15) above as minimum refunds. In such cases the minimum sum established as the amount above which the utility will commence back billing shall determine in all cases of underregistration whether the customer will be billed for the amount due the utility because of underregistration.

a. When a customer has been overcharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter or other similar reasons, the amount of the overcharge shall be adjusted, refunded or credited to the customer.

b. When a customer has been undercharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter or other similar reasons, the amount of the undercharge may be billed to the customer.

20.4(17) *Reasons for denying and discontinuing service.* Service may be refused or discontinued for any of the reasons listed below. Unless otherwise stated, the customer shall be allowed a reasonable time in which to comply with the rule before service is discontinued. No service shall be disconnected on the day preceding a day or days on which the utility's business office is closed, except as provided in 20.4(17) "*a*" and 20.4(17) "*b*". Service may be refused or discontinued:

a. Without notice in the event of a condition on the customer's premises determined by the utility to be hazardous.

b. Without notice in the event of customer use of equipment in such a manner as to adversely affect the utility's equipment or the utility's service to others.

c. Without notice in the event of tampering with the equipment furnished and owned by the utility.

d. Without notice in the event of unauthorized use.

e. For violation of or noncompliance with the utility's rules on file with the commission.

f. For failure of the customer or prospective customer to furnish such service equipment, permits, certificates or rights of way as are specified to be furnished, in the utility's rules filed with the commission, as conditions of obtaining service, or for the withdrawal of that same equipment or for the termination of those same permissions or rights, or for the failure of the customer or prospective customer to fulfill the contractual obligations imposed upon him as conditions of obtaining service by any contract filed with and subject to the regulatory authority of the commission.

g. For failure of the customer to permit the utility reasonable access to its equipment.

h. For nonpayment of bill provided that the utility has made a reasonable attempt to effect collection and has given the customer written notice that he has at least five days, excluding Sundays and holidays, in which to make settlement on his account or have his service discontinued or denied.

i. For failure of the customer to provide the utility with a deposit as authorized by 20.4(3).

20.4(18) *Insufficient reasons for denying service.* The following shall not constitute sufficient cause for refusal of service to a present or prospective customer:

a. Delinquency in payment for service by a previous occupant of the premises to be served.

b. Failure to pay for merchandise purchased from the utility.

c. Failure to pay for a different type or class of public utility service.

d. Failure to pay the bill of another customer as guarantor thereof.

e. Failure to pay a back bill rendered in accordance with 20.4(16).

f. Failure to pay a bill rendered in accordance with 20.4(16) "*b*".

20.4(19) *Estimated demand.* Upon request of the customer and provided the customer's demand is estimated for billing purposes, the utility shall measure the demand during the customer's normal operation and use the measured demand for billing.

20.4(20) *Servicing utilization control equipment.* Each utility shall service and maintain any equipment it uses on customer's premises and shall correctly set and keep in proper adjustment any thermostats, clocks, relays, time switches or other devices which control the customer's service in accordance with the provisions in the utility's rate schedules.

20.4(21) *Customer complaints.* Complaints concerning the charges, practices, facilities or service of the utility shall be investigated promptly and thoroughly. The utility shall keep such records of customer complaints as will enable it to review and analyze its procedures and actions.

20.4(22) *Temporary service.* When the utility renders temporary service to a customer it may require that the customer bear all the cost of installing and removing the service facilities in excess of any salvage realized.

20.4(23) *Change in type of service.* If a change in the type of service, such as from 25- to 60-cycle or from direct or alternating current, or a change in voltage to a customer's substation, is effected at the insistence of the utility and not solely by reason of increase in the customer's load or change in the character thereof, the utility shall share equitably in the cost of changing the equipment of the customer affected as determined by the commission in the absence of agreement between utility and customer. In general, the customer should be protected against or reimbursed for the following losses and expenses to an appropriate degree:

a. Loss of value in his electrical power utilization equipment.

b. Cost of changes in wiring, and

c. Cost of removing old and installing new utilization equipment.

20.5(490A) Engineering practice.

20.5(1) *Requirement for good engineering practice.* The electric plant of the utility shall be constructed, installed, maintained and operated in accordance with accepted good engineering practice in the electric industry to assure, as far as reasonably possible, continuity of service, uniformity in the quality of service furnished, and the safety of persons and property.

20.5(2) *Acceptable standards.* The utility shall use the applicable provisions in the publications listed below as standards of accepted good practice unless otherwise ordered by the commission.

a. Iowa Electrical Safety Code.

b. National Electrical Code, NFPA No. 70, ASA C-1-7-24-62.

c. American Standard Code for Electricity Metering, ASA C-12—1965.

d. American Standard Requirements, Terminology and Test Code for Instrument Transformers, ASA C57.13—1954.

20.5(3) *Adequacy of supply and reliability of service.* The generating capacity of the utility's plant, supplemented by the electric power regularly available from other sources, must be sufficiently large to meet all normal demands for service and provide a reasonable reserve for emergencies.

In appraising adequacy of supply the commission will segregate electric utilities into two classes, viz., those having high capacity transmission interconnections with other electrical utilities and those which lack such interconnection and are therefore completely dependent upon the firm generating capacity of the utility's own generating facilities.

a. In the case of utilities having interconnecting ties with other utilities, the commission will, upon appraising adequacy of supply, take appropriate notice of the utility's recent past record, as of the date of appraisal, of any widespread service interruptions and any capacity shortages along with the consideration of the supply regularly available from other sources, the normal demands, and the required reserve for emergencies.

b. In the case of noninterconnected utilities the commission will give attention to the maximum total coincident customer demand which could be satisfied without the use of the single element of plant equipment, the disability of which would produce the greatest reduction in total net plant productive capacity and also give attention to the normal demands for service and to the reasonable reserve for emergencies.

20.5(4) *Electric transmission and distribution facilities.* The utility's electrical transmission and distribution facilities shall be designed, constructed, maintained and electrically re-enforced and supplemented as required to reliably perform the power delivery burden placed upon them in the storm and traffic hazard environment in which they are located. Each utility shall carry on an effective preventive maintenance program and shall be capable of emergency repair work on a scale which its storm and traffic damage record indicates as appropriate to its scope of operations and to the physical condition of its transmission and distribution facilities.

In appraising the reliability of the utility's transmission and distribution system the commission will consider the condition of the physical property and the size, training, supervision, availability, equipment and mobility of the maintenance forces all as demonstrated in actual cases of storm and traffic damage to the facilities.

20.5(5) *Inspection of electric plant.* Each utility shall adopt a program of inspection of its electric plant in order to determine the necessity for replacement and repair. The period between inspections of various elements of the plant shall be based on the utility's experience and accepted good practice in the industry. Each utility shall keep sufficient records to give evidence of compliance with its inspection program.

20.6(490A) Meter tests.

20.6(1) *Request tests.* Upon request by a customer, the utility shall make a test of the meter serving him, provided that such tests need not be made more frequently than once in 12 months. The customer, or his representative, may be present when his meter is tested. If the meter is found accurate under the provisions of 20.4(13) the utility may charge the consumer not to exceed five dollars or the actual cost of such test whichever is lesser.

A report of the results of the test shall be made to the customer within a reasonable time after the completion of the test, and a record of each test shall be kept on file at the office of the utility.

Any additional test of a customer meter requested to be made within the 12 months next following a request test of the same meter shall be a referee test as hereinafter provided unless the utility voluntarily agrees to make such an additional test as a request test.

20.6(2) *Referee tests.* Upon written application transmitted by certified or registered mail to the commission by a customer or a utility, a test will be made of the customer's meter as soon as practicable under the observation of a representative of the commission.

A customer's application for a referee test shall be accompanied by a certified check or money order made payable to the utility in the amount of ten dollars.

On receipt of such request from a customer the commission will forward the deposit to the utility

and will notify the utility of the requirement for the test and the utility shall not knowingly remove or adjust the meter until instructed by the commission. The utility shall furnish all instruments, load devices and other facilities necessary for the test and shall perform the test in the presence and under the observation of the commission's representative and shall furnish verification of the accuracy of test instruments used.

If upon test the meter is found to overregister to an extent requiring a refund under the provisions of 20.4(13), the amount paid to the utility for the test shall be returned to the customer by the utility. The customer or his representative may be present when his meter is tested. The commission will make a written report of the results of the test to the customer and to the utility.

20.6(3) *Preinstallation inspections and tests.* Every meter and associated device shall be inspected and tested before being placed in service, and the accuracy of each meter shall be certified to be within the tolerance permitted by 20.6(12). A meter manufacturer's certification approved by the commission and supplemented by an acceptable statistical sampling program shall suffice for this purpose.

If a meter is removed from a customer's premises, except for field testing, it must be inspected and tested as above, before it is again placed in service.

20.6(4) *Postinstallation inspections.* These inspections are made to determine proper operation and wiring connections and must be made within 60 days after installation by a qualified person who, whenever possible, should be someone other than the original installer. The following equipment is subject to postinstallation inspections:

a. Meters associated with instrument transformers, excluding single-phase current transformer metering installations, or phase shifting transformers together with all such associated equipment.

b. Kilovar-hour meters.

c. Demand meters.

d. Direct current watt-hour meters.

20.6(5) *As found tests.* All meters and all associated devices shall be tested after they are removed from service. Such tests shall be made before the meters or associated devices are adjusted, repaired, returned to active service or retired.

20.6(6) *In-service performance tests.* In-service performance tests must be made in accordance with 20.6(7), 20.6(8) or 20.6(9). These tests may be made on the customer's premises or in the utility's meter shop. However, it is recommended that meters associated with instrument transformers, or phase shifting transformers, or those having mechanical contact devices, be tested on the customer's premises. Tests made for other purposes, such as request or referee tests, shall not be counted as in-service performance tests.

All self-contained single-phase meters and three-wire network meters on a utility's system must be tested in accordance with a single program, which must be one of the following:

a. At a fixed periodic interval, see 20.6(7).

b. At a variable interval, see 20.6(8).

c. By statistical sampling, see 20.6(9).

20.6(7) *Periodic test schedule.* In the test intervals specified below, the word "years" means calendar years and the word "month" means calendar months. The basic periodic test interval shall not be longer than provided for in the following schedule:

a. Alternating current watt-hour meters:

(1) Meters used with instrument transformers

Polyphase meters ..... 4 years
Single-phase meters ..... 8 years

(2) Self-contained polyphase meters ..... 6 years

(3) Self-contained single-phase meters and three-wire network meters ..... 8 years

b. Direct current watt-hour meters:

(1) Up to and including 6 KW ..... 42 months

(2) Over 6 KW up to and including 100 KW ..... 18 months

(3) Over 100 KW ..... 12 months

c. Var-hour meters: Same as the schedule for associated watt-hour meters.

d. Demand meters:

(1) Integrated (block interval) demand meters including demand registers and associated control devices: Same as the schedule for associated watt-hour meters, but not to exceed six years.

(2) Lagged demand meters: Same as the schedule for associated watt-hour meters.

e. Secondary standards:

(1) Portable rotating standard watt-hour meters ..... 12 months

(2) Indicating voltmeters ..... 12 months

(3) Instrument transformers ..... 10 years

f. Working standards and instruments:

(1) Portable rotating standard watt-hour meters—induction type ..... 2 weeks

(2) Indicating voltmeters ..... 3 months

(3) Instrument transformers ..... 10 years

20.6(8) *Variable interval plan.* The variable interval plan described below may be used for testing self-contained single-phase meters and three-wire network meters.

The meters shall be divided into homogeneous groups such as by manufacturers' types, and may be further subdivided in accordance with location or other factors which may be disclosed by test records to have an effect on the percentage regis-

tration of the meters. Subsequently, groupings may be modified or combined if justified by the performance records. The meters to be tested shall be those longest in service without test.

The percentage, P, of meters to be tested in each group during the current year is dependent upon the number of meters which on in-service test during the preceding year were found to have a percentage registration of more than 102 percent or less than 98 percent.

The maximum value of P shall be 25 percent and the minimum value shall be not less than:

a. Five percent for a group of 2,000 or more meters.

b. One hundred meters or 12.5 percent, whichever is less, for a group of fewer than 2,000 meters.

The values of P between the maximum and minimum shall be determined from the formula

$$P=K\left(\frac{100\ (F+S)}{T}-1\right)$$

Where:

T=total number of meters tested in the group during the preceding year,

F=number of meters in this group which registered more than 102 percent,

S=number of meters in this group which registered less than 98 percent, and

K=an empirical constant selected to provide for the test of a sufficient number of meters in the group to insure that an acceptable standard of performance is being maintained. The value of K=6.25 is recommended as an empirical constant which will accomplish this end.

The variable interval plan shall be accompanied by a liberal policy for testing meters on request and a procedure whereby unusually high or low bills for service will be detected and investigated and any utility proposing to use this plan shall submit information to the commission as to its method of detection and investigation of unusually high and low bills and obtain the commission's approval before adopting or continuing use of the variable interval plan.

20.6(9) *Statistical sampling.* Statistical sampling for self-contained single-phase meters and three-wire network meters may be used in lieu of periodic or variable interval testing upon approval by the commission. The program used shall conform to accepted principles of statistical sampling based on either variables or attributes methods and should be evaluated by impartial mathematical statisticians.

A statistical sampling program shall include an adequate policy for testing meters on request and a procedure, approved by the commission, whereby unusually high or low bills for service would be detected and investigated. The meters shall be divided into homogeneous groups such as by manufacturer's types, and may be further subdivided in accordance with location or other factors which may be disclosed by test records to have an effect on the percentage registration of the meters. Subsequently, groupings may be modified or combined if justified by the performance records. A sample shall be taken each year from each homogeneous group. It is extremely important that each meter in the sample be drawn at random. Every meter in the group must have an equal chance to be drawn. In order to accomplish this aim it is advisable to use a table of random numbers as an aid in assembling the sample.

The sample taken each year shall be of sufficient size to demonstrate with reasonable assurance the condition of the group from which the sample is drawn. A minimum sample size should be specified and may be expressed as a combination of a number and percentage, such as, "100 meters or 12.5 percent, whichever is less". The sampling plan shall contain a table of mathematically calculated sample sizes and related constants for determining the characteristics of the homogeneous group, accompanied by curves for determining the risk of making an incorrect decision. An acceptable sampling plan is one in which sample will, 95 times out of 100, correctly identify a homogeneous group of meters which has at least 97.5 percent of the group within the limits 98 percent-102 percent registration on in-service performance test. Plans based on the variables method shall use a sample of at least 100 meters, and plans based on the attributes method shall use a sample of at least 300 meters; however, except for corrective procedures, the sample size need not exceed ten percent of the group. If a group of meters does not meet the acceptable performance criteria, then corrective action must be taken.

The corrective action shall consist of either an accelerated test program to raise the accuracy performance of the group to acceptable standards or removing the group from service. An accelerated test program shall provide for testing at rates which vary in accordance with the calculated percentage of defective meters in rejected groups. In its application to an individual group the rate of testing shall be such that the required corrective action is completed within four years unless a longer period is authorized by the commission, but not more than 25 percent of the meters in the group need to be tested in any one year. Accelerated testing may be discontinued when the test results indicate that the rejected group is within acceptable limits.

Records shall be maintained and tabulated to indicate the number of meters in each homogeneous group in service at the beginning of each year, the number of meters making up the sample for each homogeneous group, the test results for each group, and any necessary corrective action taken.

20.6(10) *Instrument transformer tests.* Instrument transformers shall be tested:

a. When first received.

b. When removed from service.

c. Upon complaint.

d. When there is evidence of damage.

e. Whenever an approved check, such as the variable burden method in the case of current transformers, made whenever the meter is tested, indicates that a quantitative test is required.

20.6(11) *Generating station meter tests.* Generator output wattmeters in the utility's generating stations shall be tested according to a suitable schedule by comparison with the utility's working standards.

20.6(12) *Test procedures and accuracies.* Meters and associated devices shall be tested at the loads indicated below and, when found to exceed the tolerances prescribed below, shall be adjusted as close as practicable to zero error. The test of any unit of metering equipment shall consist of a comparison of its accuracy with the accuracy of a standard. The commission will use the applicable provisions of the American Standard Code for Electricity Metering ASA C12, as criteria of accepted good practice.

a. Alternating current watt-hour meters.

(1) Shop tests

Test Load as Approximate Percentage

OF TEST CURRENT	POWER FACTOR	TOLERANCES
100	1.0	±1.0%
10	1.0	±1.0%
100	0.5	±2.0%

(2) Field tests

Test Load as Approximate Percentage

OF TEST CURRENT	POWER FACTOR	TOLERANCES
100	1.0	±1.0%
10	1.0	±1.0%

b. Direct current watt-hour meters.

Test Load as Approximate Percentage

OF TEST CURRENT	TOLERANCES
100	±1.5%
10	±1.5%

c. Demand meters.

(1) Integrated (block interval) demand meters.

Demand meters which are direct driven shall be tested at a load point no less than 50 percent of full scale. Tests shall be continuous for at least one demand interval and shall be started simultaneously with the demand interval of the demand meter.

Demand meters which are actuated by impulses shall be tested by transmitting enough impulses to cause the meter to register at a load point no less than 50 percent of full scale. If an impulse actuated demand meter is equipped with a device which records the number of impulses received by the meter, and if there is frequent and accurate comparison of such record with the number of kilowatt hours registered on the associated watt-hour meter, then it is not necessary to make a periodic field test of the demand meter.

Demand meters shall be adjusted to indicate zero under no-load conditions, and shall be checked to ascertain that the meter resets to zero. Impulse devices associated with demand meters must be checked for proper operation. The demand meter shall have an accuracy of within two percent of full scale. The time interval must be accurate within 0.5 percent for synchronous motor timing elements and within two percent for mechanical clock timing elements. Meters recording demand readings on a chart which provides a record of the time at which the demand occurs shall be accurate to within plus or minus four minutes in 24 hours.

(2) Lagged demand meters.

Demand meters shall be tested at a load point no less than 50 percent of full scale.

Demand meters shall be adjusted to indicate zero under no-load conditions with potential applied.

The demand meter shall have an accuracy within three percent of full scale.

Meters recording demand readings on a chart which provides a record of the time at which the demand occurs shall be accurate to within plus or minus four minutes in 24 hours.

d. Instrument transformers.

All current and potential transformers shall be tested in accordance with the procedures prescribed in American Standards Association Code ASA C57.13. Any utility unable to perform the above test due to a lack of proper equipment may have its instrument transformers tested by another utility whose testing equipment conforms to the requirements of the commission. In lieu of utility testing of instrument transformers the commission will accept the certificate of test as furnished by the manufacturer.

Current or potential transformers shall not be installed in metering service if their accuracy does not fall within the 0.6 accuracy class as described in ASA C57.13.

e. Meters for measurement of purchased electricity. Utilities purchasing electricity from nonutilities or from utilities outside the state must verify that the instruments and meters which are necessary to furnish complete and accurate information as to the energy purchased are installed and tested in accordance with the requirements of the commission.

20.6(13) *General.* All meters and associated devices, when tested, shall be adjusted as closely as practicable to the condition of zero error. All tolerances are to be interpreted as maximum permissible variations from the condition of zero error. In making adjustments, no advantage of the prescribed tolerance limits shall be taken.

Meters shall not "creep", i.e., there shall be no continuous unidirectional rotation of the moving element of a meter when the meter load wires have been removed and rated voltage is applied to the potential elements of the meter.

20.6(14) *Facilities and equipment for meter testing.* Each utility shall maintain a meter shop for the purpose of inspecting, testing, and repairing meters. The shop shall be open for inspection by authorized representatives of the commission at all reasonable times, and the facilities and equipment, as well as the methods of measurements and testing employed, shall be subject to the approval of the commission. A utility may, however, have all or part of the required tests, repairs and adjustments made or its portable testing equipment checked by another agency having adequate and sufficient testing equipment to comply with these rules and approved by the commission.

Each meter shop at which the utility conducts tests of meters shall have a voltage supply adequate to make the appropriate tests.

20.6(15) *Secondary standards.* Each utility shall have at least one portable rotating standard watt-hour meter with a correction of not more than 0.5 percent at commonly used loads. If the correction percentage varies between successive tests by more than 0.25 a complete check must be made to determine the cause of such variation. If the cause of variation cannot be removed, the use of the instrument shall be discontinued. Secondary standards must be checked periodically [see 20.6(7) *"e"*] at the national bureau of standards or at a laboratory acceptable to the commission.

20.6(16) *Working standards.* Each utility shall have at least one portable rotating standard watt-hour meter with a correction of not more than 0.5 percent at commonly used loads. If the correction percentage varies between successive tests by more than 0.25 a complete check must be made to determine the cause of such variation. If the cause of variation cannot be removed, the use of the instrument shall be discontinued. Working standards must be checked periodically [see 20.6(7) *"f"*] by comparison with a secondary standard in the utility's meter shop.

20.6(17) Extreme care must be exercised in the handling of standards to assure that their accuracy is not disturbed. Each standard shall be accompanied at all times by a certificate or calibration card, duly signed and dated, on which are recorded the corrections required to compensate for errors found at the customary test points at the time of the last previous test.

20.6(18) *Records of meters and associated metering devices.* Each utility shall maintain records of the following data, where applicable, for each meter and together with an associated device until retirement:

a. The complete identification—number, type, voltage, amperes, number of wires, number of stators, disk constant (K_h), demand interval, and ratio.

b. The dates of installation and removal from service, together with the location.

c. Primary rating, ratio and burden data for instrument transformers.

20.6(19) *Meter test records.* Each utility shall maintain records of the last two tests made of any meter. The record of the meter test made at the time of the meter's retirement shall be maintained for a minimum of three years. Test records shall include the following:

a. The date and reason for the test.

b. The reading of the meter before making any test.

c. The accuracy "as found" at light and heavy loads.

d. The accuracy "as left" at light and heavy loads.

e. Statements of repairs made, if any.

20.7(490A) Standards of quality of service.

20.7(1) *Standard frequency.* The standard frequency for alternating current distribution systems shall be 60 cycles per second. The frequency shall be maintained within limits which will permit the satisfactory operation of customer's clocks connected to the system.

20.7(2) *Voltage limits.* Each utility shall adopt and file with the commission, standard nominal service voltages for each of the several areas into which its distribution system or systems may be divided.

20.7(3) *Secondary voltages.* For all retail service, except power service, the variations of voltage shall be no more than six percent above or below the standard voltage at any time. For retail power service the variation of voltage shall be no more than ten percent above or below the standard voltage at any time.

Where three-phase service is provided the utility shall exercise reasonable care to assure that the phase voltages are in balance.

20.7(4) *Primary voltages.* For service rendered principally for industrial or power purposes the voltage variation shall not exceed ten percent above or ten percent below the standard nominal voltages as filed in the utility's rules.

For service rendered to public utilities and others for resale, the nominal voltage shall be as mutually agreed upon by the parties concerned. The allowable variation shall not exceed 7.5 percent above or 7.5 percent below the agreed upon nominal voltage without the express approval of the commission.

The limitations stated in this subsection shall not apply to special contracts in which the customer specifically agrees to accept service with unregulated voltage.

20.7(5) *Exceptions to voltage requirements.* Voltage outside the limits specified will not be considered a violation when the variations:

a. Arise from the action of the elements.

b. Are infrequent fluctuations not exceeding five minutes duration.

c. Arise from service interruptions.

d. Arise from temporary separation of parts of the system from the main system.

e. Are from causes beyond the control of the utility.

20.7(6) *Voltage surveys and records.* Voltage measurements shall be made at the customer's entrance terminals. For single-phase service the measurement shall be made between the grounded conductor and the ungrounded conductors. For three-phase service the measurement shall be made between the phase wires.

20.7(7) Each utility shall make a sufficient number of voltage measurements, using recording voltmeters, in order to determine if voltages are in compliance with the requirements as stated in 20.7(2), 20.7(3), 20.7(4). All voltmeter records obtained under 20.7(7) shall be retained by the utility for at least two years and shall be available for inspection by the commission's representatives. Notations on each chart shall indicate the following:

a. The location where the voltage was taken.

b. The time and date of the test.

c. The results of the comparison with an indicating voltmeter.

20.7(8) *Equipment for voltage measurements.*

a. Standards. Each utility shall have available at least one indicating voltmeter with a stated accuracy within 0.25 percent of full scale. This instrument must be maintained within its stated accuracy.

b. Working instruments. Each utility shall have at least two indicating voltmeters with a stated accuracy within one percent of full scale.

c. Each utility must have readily available at least two portable recording voltmeters with a stated accuracy within 1.5 percent of full scale.

20.7(9) Standards must be checked periodically [see 20.6(7) "*e*"] at the national bureau of standards, or at a laboratory acceptable to the commission. Working instruments must be checked periodically [see 20.6(7) "*f*"] by comparison with a standard in the meter shop used by the utility.

20.7(10) Extreme care must be exercised in the handling of standards and instruments to assure that their accuracy is not disturbed. Each standard shall be accompanied at all times by a certificate or calibration card, duly signed and dated, on which are recorded the corrections required to compensate for errors found at the customary test points at the time of the last previous test.

20.7(11) *Interruptions of service.* Each utility shall make reasonable efforts to avoid interruptions of service but when interruptions occur, service shall be re-established within the shortest time practicable, consistent with safety.

20.7(12) Each utility shall keep records of interruptions of service on its primary distribution system and shall make an analysis of the records for the purpose of determining steps to be taken to prevent recurrence of such interruptions. Such records should include the following information concerning the interruptions:

a. Cause.

b. Date and time.

c. Duration.

The log for each unattended substation must show interruptions which require attention to restore service, with the estimated time of interruption.

20.7(13) Planned interruptions shall be made at a time that will not cause unreasonable inconvenience to customers and shall be preceded, if feasible, by adequate notice to those who will be affected.

20.8(490A) Safety.

20.8(1) *Protective measures.* Each utility shall exercise reasonable care to reduce those hazards inherent in connection with its utility service and to which its employees, its customers, and the general public may be subjected and shall adopt and execute a safety program designed to protect the public and fitted to the size and type of its operations.

20.8(2) The utility shall give reasonable assistance to the commission in the investigation of the cause of accidents and in the determination of suitable means of preventing accidents.

20.8(3) Each utility shall maintain a summary of all reportable accidents arising from its operations.

20.8(4) *Grounding of secondary distribution system.* Unless otherwise specified by the commission, each utility shall comply with, and shall encourage its customers to comply with, the applicable provisions in the Iowa electrical safety code for the grounding of secondary circuits and equipment.

Ground connections should be tested for resistance at the time of installation unless multigrounding is used. The utility shall keep a record of all ground resistance measurements.

The utility shall establish a program of inspection so that all artificial grounds installed by it shall be inspected within reasonable periods of time.

[Filed July 12, 1966]

CHAPTER 21
SERVICE SUPPLIED BY WATER UTILITIES

21.1(490A) General information.

21.1(1) *Authorization of rules.* Chapter 490A of the Code provides that the Iowa state commerce commission shall establish all needful, just and reasonable rules, not inconsistent with law, to govern the exercise of its powers and duties, the practice and procedure before it, and to govern the form, contents and filing of reports, documents and other papers necessary to carry out the provisions of this law.

21.1(2) *Application of rules.* The rules shall apply to any water utility operating within the state of Iowa under the jurisdiction of the Iowa state commerce commission and are made pursuant to chapter 490A of the Code.

These rules are intended to promote safe and adequate service to the public, to provide standards for uniform and reasonable practices by utilities, and to establish a basis for determining the reasonableness of such demands as may be made by the public upon the utilities.

If unreasonable hardship to a utility or to a customer results from the application of any rule herein prescribed, application may be made to the commission for the modification of the rule or for temporary or permanent exemption from its requirements.

The adoption of these rules shall in no way preclude the commission from altering or amending them, or from making such modifications with respect to their application as may be found necessary to meet exceptional conditions.

These rules shall in no way relieve any utility from any of its duties under the laws of this state.

21.1(3) *Definitions.*

a. "Acquisition" as used herein refers only to the acquisition of a unit of plant in place and ready for operation and does not include the purchase of materials or equipment for later installation.

b. "Commission" as used in these rules shall be construed to mean the Iowa state commerce commission, and sometimes hereinafter referred to as I.S.C.C.

c. "Customer" as used in these rules shall be construed to mean any person, co-partnership, firm, association, corporation, their lessees, trustees, or receivers appointed by any court, or agency of the federal, state or local government, being supplied with water service by a water utility.

d. "Gross property additions" means the sum total of construction cost and appropriate overhead costs as defined in Instruction 3, Components of Construction Cost, and Instruction 4, Overhead Construction Costs of the Utility Plant Instructions of the Uniform System of Accounts for Water Utilities as adopted by this commission.

e. "Distribution main" means water pipe owned, operated, or maintained by a utility which is used for the purpose of distribution of water from which service connections with customers are taken.

f. "Main" or "mains" shall mean any pipe, conduit or other conveyance through which water for public use may be transmitted or distributed. It shall include trenches or other structures in or upon which such pipe, conduit or other conveyance is carried, and also land, easements or other rights of occupancy or use requisite for the construction and operation of such pipe, conduit or other conveyance.

g. "Meter", without other qualifications, shall mean any device or instrument used for the purpose of measuring a quantity of water by a water utility.

h. "Municipality" refers to any town, village or city.

i. "Service connection" shall be construed to mean the line from the main to the customer's property line, and shall include all of the pipe fittings and valves necessary to make the connection.

j. "Service pipe" or "service line" shall mean the pipe that runs between the distribution main and the customer's place of consumption.

(1) "Company service pipe" shall mean that portion of the service pipe installed at the cost and expense of the utility.

(2) "Customer's service pipe" shall be that portion of the service pipe installed at the cost and expense of the customer.

k. "Transmission main" is used for conveying water to the distribution system, reservoirs, tanks or stand pipes, and has generally no service connections with customers.

l. "Utility" as used in these rules shall be construed to mean any person, partnership, business association or corporation, domestic or foreign, owning or operating any facilities for furnishing water to the public for compensation, when subject to the jurisdiction of this commission, their lessees, trustees or receivers, appointed by any court whatsoever, that may now or hereafter be engaged as a public utility in the business of furnishing water to domestic, commercial, industrial or municipal customers in the state of Iowa.

m. "Premises" as used herein shall be restricted to the following:

(1) A building under one roof owned or leased by one customer and occupied as one residence or one place of business.

(2) A combination of buildings owned or leased by one customer, in one common enclosure occupied by one family as a residence or one corporation or firm as a place of business.

(3) Each unit of a multiple house or building separated by a solid vertical partition wall occupied by one family as a residence or one firm as a place of business.

(4) A building owned or leased by one customer and having a number of apartments, of-

fices or lofts which are rented to tenants using in common one hall and one or more means of entrance.

(5) A building two or more stories high under one roof owned or leased by one customer and having an individual entrance for the ground floor occupants and one for the occupants of the upper floors.

(6) A combination of buildings, such as a garden-type apartment, owned by one customer, in one common enclosure, none of the individual buildings of which is adapted to separate ownership.

(7) A public building.

(8) A single plot, used as a park or recreational area.

n. "Property" shall mean all facilities owned and operated by a water utility.

21.2(490A) Records and reports.

21.2(1) *Location of records.* All records required by these rules, or necessary for the administration thereof, shall be kept within the state at an office or offices of the utility unless otherwise authorized by the commission and shall be reasonably accessible and available for examination by the commission or its authorized representatives at all reasonable hours.

21.2(2) *Retention of records.* Unless otherwise specified by the commission, all records required by these rules shall be preserved for the period of time specified in the revised 1963 edition of the National Association of Regulatory Utility Commissioners' publication "Regulations to Govern the Preservation of Records of Electric, Gas and Water Utilities", as provided in chapter 18 of the rules of the utilities division, Iowa state commerce commission, as presently constituted or revised in the future.

Where machine billing is used and meter readings recorded on tabulating cards, the register sheets may be considered the "meter reading sheets" and the "billing records." "Meter reading sheets" and "billing records" or the "register sheets" shall be kept six years or until they are no longer needed to adjust bills. This means that the records must be kept six years or from the date of one meter test to the next, whichever is longer.

21.2(3) *Tariffs to be filed with the commission.* The utility shall file its tariff with the commission, and shall maintain such tariff filing in a current status. The schedules of rates and rules of all rate regulated utilities shall be filed with the commission and shall be classified, designated, arranged and submitted so as to conform to the requirements of current tariff or rate schedule circulars and special instructions which have been or may from time to time be issued by the commission. Provisions of the schedules shall be definite and so stated as to minimize ambiguity or the possibility of misinterpretation. The form, identification and content of tariffs shall be in accordance with these rules.

21.2(4) *Form and identification.* All tariffs shall conform to the following rules:

a. The tariff shall be printed, typewritten or otherwise reproduced on 8½ x 11 inch sheets of white paper equal in durability to 20-pound bond paper with 25 percent cotton or rag content so as to result in a clear and permanent record. The sheets of the tariff should be ruled or spaced to set off a border on the left side suitable for binding. In the case of utilities subject to regulation by any federal agency, the format of sheets of tariff as filed with the commission may be the same format as is required by the federal agency provided that the rules of the commission as to title page, identity of superseding, replacing or revision sheets, identity of amending sheets, identity of the filing utility, issuing official, date of issued, effective date, and the words "Filed with the ISCC" shall apply in the modification of the federal agency format for the purposes of filing with this commission.

b. The title page of every tariff and supplement shall show in the order named:

(1) The first page shall be the title page which shall show:

..... WATER TARIFF

(Name of Public Utility)

Filed with Iowa State Commerce Commission ..... (Date).

(2) When a tariff is to be superseded or replaced in its entirety, the replacing tariff shall show on its title page that it is a revision of a tariff on file.

(3) When a revision or amendment is made to a filed tariff, the revision or amendment shall show on each sheet the designation of the original tariff or number of the immediate proceeding, revision or amendment which it replaces. (See exhibit A)

(4) When a new part of a tariff eliminates an existing part of a tariff, it shall so state and identify the part eliminated. (See exhibit A)

(5) Any tariff modifications as defined in (2), (3) or (4) above replacing tariff sheets shall be marked in the right margin with symbols as herein described to indicate the place, nature and extent of the change in text.

Symbol	*Meaning*
(C)	A change in regulation.
(D)	A discontinued rate, treatment or regulation.
(I)	An increased rate or new treatment resulting in increased rate.
(N)	A new rate, treatment or regulation.
(R)	A reduced rate or new treatment resulting in a reduced rate.
(T)	A change in text but no change in rate, treatment or regulation.

c. All sheets except the title page shall have, in addition to the above-stated requirements, the following further information:

(1) Name of utility tariff under which shall be set forth the words "Filed with the ISCC". (See exhibit A)

If the utility is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name

(2) Issuing official and issue date.

(3) Effective date.

21.2(5) *Content of tariffs.* A tariff filed with the commission shall contain:

a. Table of contents. A table of contents containing a list of rate schedules and other sections in which they appear showing the sheet number of the first page of each section.

b. Rates. All rates of utilities subject to rate regulation for service with indication for each rate of the type of water service and the class of customers to which each rate applies. There shall also be shown the prices per unit of service, and the number of units per billing period to which the prices apply, the period of billing, the minimum bill method of measuring demands and consumptions, including method of calculating or estimating loads or minimums, and any special terms and conditions applicable. The discount for prompt payment or penalty for late payment, if any, and the period during which the net amount may be paid shall be specified.

c. Utility's rules. A copy of the utility's rules, or terms and conditions, describing the utility's policies and practices in rendering service, shall include:

(1) The list of the items which the utility furnishes, owns, and maintains on the customer's premises, such as water services, meters and shutoff valves.

(2) General statement of the utility's policy in making adjustments for wastage of water when such wastage occurs without the knowledge of the customer.

(3) A statement indicating the minimum number of days allowed for payment of a customer's bill before service will be discontinued for nonpayment.

(4) A copy of each standard and special type of contract for service.

(5) A copy of each type of customer bill form.

(6) The name, title, address, and telephone number of the person who is authorized to receive, act upon and respond to matters in connection with general management duties, customer relations (complaints), engineering operations, meter tests and repairs and emergencies during nonoffice hours.

(7) The location at which the utility keeps the various classes of records required by these rules.

(8) List of towns, cities and unincorporated communities where urban rates are applicable, and towns in which service is furnished.

(9) Definitions of classes of customers.

(10) Extension rules for extending service to new customers indicating what portion of the extension or cost thereof will be furnished by the utility; and if the rule is based on cost, the items of cost included as required in 21.3(12).

(11) Rules with which prospective customers must comply as a condition of receiving service, and the terms of contracts required.

(12) Rules governing the establishment of credit by customers for payment of service bills.

(13) Rules governing disconnecting and reconnecting service.

(14) Notice required from customer for having service discontinued.

(15) Rules governing temporary, emergency, auxiliary, and standby service.

(16) Rules shall show any limitations on loads and covering the type of equipment which may or may not be connected.

(17) A notification to the commission shall be made of any planned change in rate of service by a utility even though the change in rate of service is provided for in its tariff filing with the commission. This information shall reflect the amount of increase or decrease and the effective date of application.

d. Changes in tariffs. Changes in tariffs or rate schedules, rules which are included in a tariff, may be made by filing an entire new tariff or by filing additional original sheets or revised sheets, which shall be numbered and identified as provided in 21.2(4). The proposed change shall be indicated on the additional original sheet or on the revised sheet by an asterisk immediately preceding the item or by some other method of symbols with an explanation in the schedule of the symbols used. Where a new ruling eliminates a rate schedule or rule it shall so state.

21.2(6) *System maps verification.* A utility shall file annually with the commission a verification that it has a currently correct set of utility system maps or other records for each operating or distribution area. The maps or other records shall show:

a. Location of all principal pumping stations, filter plants, sources of supply, storage facilities and size, character and location of all mains, including valves, pressure gauges and fire hydrants.

b. Location, size, and kind of each service pipe, where practicable. In lieu of showing service locations on maps, a card record or other suitable means may be used.

c. Layout of all principal pumping stations, filter plants to show size, location and character of all major equipment, pipe lines (composition), connections, valves and other equipment used.

d. The date of construction of all principal items of plant and extensions of main.

e. State boundary crossings.

f. Franchise area.

g. Names of all communities (post offices) served.

21.2(7) *Accident reports.* Prompt notice, by telephone or telegraph, shall be given to the engineering section of the commission during office hours by the utility of any accident which has resulted in a fatality. Any utility under the jurisdiction of this commission shall report in writing to the commission, all accidents to employees or other persons resulting in fatalities or fractures, dislocations, or internal or other injuries, which either incapacitates the person injured for two days thereafter, or may prevent him from returning to work for two days thereafter, which are directly traceable to the transmission and distribution of water and accidents resulting in property loss in excess of $10,000; such written report shall indicate the following information:

a. The name, address and age of the person or persons involved in the accident.

b. The time and place where the accident occurred.

c. Description of injuries including extent, severity and location on injured person(s).

d. The cause of the accident in detail.

e. The name of the individual company, corporation, operating the water system.

21.2(8) *Construction programs.* A utility shall file a report of major construction programs as follows:

a. A notification of all proposed important additions to plant, the construction of which was started by the utility during the preceding month. For the purpose of this rule, an important addition to plant shall mean a single project involving the expenditure of at least $100,000 or an amount equivalent to at least ten per cent of the total water plant in service, whichever is less.

b. A notification of all important additions to plant previously reported under "*a*" above, the construction of which was completed to the extent that the facility was placed in operation during the preceding month.

21.2(9) *Records of water service.* Each utility shall compile a monthly record of the following operations within 30 days after the end of the month covered and such record shall upon and after compilation be kept available for inspection by the commission or its staff at the utility's principal office within the state of Iowa and a summary of the 12 monthly water service records for each calendar year shall be attached to and submitted with the utility's annual fiscal plant and statistical report to the commission. Such records shall contain:

a. The monthly intake of run water and the disposition of water.

b. Unscheduled or unplanned interruptions of service, [21.2(13) and 21.7(3)], occuring during the month. If there were no such interruptions, then it should be so stated.

c. The number of customer meters tested and test results tabulated.

d. Description of unusual types of operating difficulties.

e. Customer complaints as set out in 21.4(10).

21.2(10) *Informing the commission.* The utility shall keep the commission informed currently by written notice as to the location at which the utility keeps the various classes of records required in these rules.

21.2(11) *Filing rules.* A copy of the utility's current rules, if any, published or furnished by the utility for the use of engineers, architects, plumbing contractors, etc., covering meter and service installation shall be filed with the commission.

21.2(12) *Filing bill forms.* A copy of each type of customer bill form in current use shall be filed with the commission.

21.2(13) *Prompt notice.* Prompt notice by telephone or telegram shall be given the water engineering section of the commission by a utility in the event of unscheduled or unplanned interruption of service involving 100 or more customers for a period of two hours or more duration.

21.2(14) *Filing monthly, periodic and annual reports.* Each utility shall file such other monthly, periodic and annual reports as are requested by the commission. Monthly and periodic reports shall be due in the commission's office within 30 days after the end of the reporting period. All annual reports shall be filed with this commission by April 1 of each year for the preceding calendar year.

21.3(490A) General service requirements.

21.3(1) *Disposition of water.* All water sold by a utility shall be upon the basis of metered volume sales except that the utility may at its option provide flat rate or estimated service for the following:

a. Temporary service where the water use can be readily estimated.

b. Public and private fire protection service.

c. Water used for street sprinkling and sewer flushing, when provided for in contract between the utility and the municipality or other local government authority.

21.3(2) *Register and multiplier.* All meters used for metered sales shall have registration devices indicating the volume of water in either cubic feet or United States gallons. Where a constant or multiplier is necessary to determine the meter reading in cubic feet or gallons, the constant or multiplier shall be indicated upon the face of the meter.

21.3(3) *Special charges.* No utility shall make special charges for its installation or use of any devices for metering service to a customer, except for temporary service where the utility may charge its actual cost of installation and removal of its metering devices.

21.3(4) *Utility use.* Wherever practicable, consumption of water within the utility itself, or by administrative units associated with it, shall be metered.

21.3(5) *Separate metering.* Separate premises shall be separately metered and billed. Combined billing or submetering shall not be permitted.

21.3(6) *Meter reading sheets and cards.* The meter reading sheets or cards shall show:

a. Customer's name, address and rate schedule or identification of rate schedule.

b. Identifying number or description of the meter(s).

c. Meter readings and dates.

d. If the reading has been estimated.

e. Any applicable multiplier or constant, or reference thereto.

21.3(7) *Meter reading interval.* Reading of all meters used for determining charges to customers shall be scheduled monthly, bimonthly, quarterly, or semiannually. An effort shall be made to read meters on corresponding days of each meter-reading period. The meter-reading date may be advanced or postponed not more than ten days without adjustment of the billing for the period. The utility may permit the customer to supply the meter readings on a form supplied by the utility, provided a utility representative reads the meter at least once each six months and when there is a change of customer.

21.3(8) *In and out. Readings and estimates.* When a customer is connected or disconnected or the regular meter-reading date is substantially revised causing a given billing period to be longer or shorter than usual, such bills shall be prorated on a daily basis unless other provisions are made in the utility's filed rules.

The utility may leave a meter-reading form with the customer when access to meters cannot be gained. If the form is not returned in time for the billing operation, an estimated bill may be rendered. If an actual meter reading cannot be obtained, the utility may render an estimated bill without reading the meter or supplying a meter-reading form to the customer. Only in unusual cases or when approval is obtained from the customer shall more than three consecutive estimated bills be rendered.

21.3(9) *Meter test records.* Each utility shall maintain records of at least the last two tests made of any meter. The record of the meter test made at the time of the meter's retirement shall be maintained for a minimum of three years. Test records shall include the following:

a. The date and reason for the test.

b. The reading of the meter before making any test.

c. The accuracy "as found" at each rate of flow.

d. The accuracy "as left" at each rate of flow.

e. In the event test of the meter is made by using a standard meter, the utility shall retain all data taken at the time of the test in sufficiently complete form to permit the convenient checking of the test methods and the calculations.

21.3(10) *Records of meters and associated metering devices.* Each utility shall maintain records of the following data, where applicable, for each meter and associated metering device until retirement:

a. The complete identification—manufacturer, number, type, capacity, multiplier, constants and pressure rating.

b. The dates of installation and removal from service, together with the location.

21.3(11) *Temporary service.* When the utility renders temporary service to a customer, it may require that the customer bear all the costs of installing and removing the service in excess of any salvage realized.

21.3(12) *Extension plan.* The utility shall develop, with the approval of the commission, a uniform policy governing the amount of main extension that will be made free to connect a new customer. This policy shall be based generally on the investment that can prudently be made for the probable revenue. In the event that a customer is required to make a contribution to the cost of the utility's facilities required to serve him, the utility shall account for this contribution in such manner that it will not be included in the rate base used to determine the reasonableness of the utility's rates. No utility shall make any extension except as permitted by their rules or refuse to make extension in accordance with these rules.

21.3(13) *Service connections.* In urban areas with well-defined streets, the utility shall control (supervise the installation and maintenance of) that portion of the service pipe from its main to and including the customer's meter. A curb stop shall be installed at a convenient place between the property line and the curb. All services shall include a curb stop and curb box or meter vault. In installations where meters are installed in meter vaults incorporating a built-in valve, and are installed between property line and curb, no separate curb stop and curb box is required.

21.3(14) *Location of meters.* Meters may be installed outside or inside as mutually agreed upon by the customer and utility.

a. Outside. Meters installed out-of-doors shall be readily accessible for maintenance and reading and so far as practicable the location should be mutually acceptable to the customer and the utility. The meter shall be installed so as to be unaffected by climatic conditions and reasonably secure from injury.

b. Inside. Meters installed inside the customer's building shall be located as near as possible to the point where the service pipe enters the building and at a point reasonably secure from injury and readily accessible for reading and testing. In cases of multiple buildings, such as two-family dwellings or apartment buildings, the meter(s) shall be located within the premises served or in a common location accessible to the customers and the utility.

21.4(490A) Customer relations.

21.4(1) *Customer information.* Each utility shall:

a. Post a notice in a conspicuous place in each office of the utility where applications for service are received, informing the public that copies of the rate schedules and rules relating to the service of the utility, as filed with the commission, are available for inspection.

b. Upon request, inform its customers as to the method of reading meters, computing the charges billed and assist in choosing the appropriate rate.

c. Provide notification of changes in rates or rate classifications as set out in rules of practice and procedure before the Iowa State Commerce Commission on Public Utility Matters.

d. Furnish such additional information as the customer may reasonably request.

e. Maintain up-to-date maps, plans, or records of its entire transmission and distribution systems, with such other information as may be necessary to enable the utility to advise prospective customers, and others entitled to the information, as to the facilities available for serving any locality.

f. Make certain that employees responsible for the receiving of customer telephone calls and customer office visits shall be properly qualified and instructed in the screening and prompt handling of complaints to assure prompt reference of the complaint to the person or department capable of effective handling of the matter complained of and to obviate the necessity of the customer's preliminary repetition of the entire complaint to employees lacking in ability and authority to take appropriate action.

g. Each utility shall at any time, on request, give its customers such information and assistance as is reasonably possible in order that customers may secure safe and efficient service. Each utility shall inform each customer of any change made or proposed to be made in any condition as to its service as would affect the efficiency of the service or the operation of the appliances or equipment which may be in use by said customer.

21.4(2) *Customer deposits.* Each utility may require from any customer or prospective customer a deposit intended to guarantee payment of bills for service.

a. Amount of deposit. Such deposit shall not be less than five dollars nor more in amount than the maximum estimated charge for service for two consecutive billing periods or 90 days, whichever is less, or, in the case of a customer whose bills are payable in advance, it shall not exceed an estimated 60 days bill for such customer, or as may reasonably be required by the utility in cases involving service for short periods or special occasions.

b. Interest on deposit. Simple interest on deposits at the rate of at least five per cent per annum shall be paid by the utility to each customer required to make such a deposit for the time held by the utility. Interest shall be paid from the date of deposit to the date of refund or the date upon which the customer's account becomes delinquent, whichever is earlier, unless such period be less than six months. Payment of the interest to the customer may be made annually or at the time the deposit is returned. The deposit shall cease to draw interest on the date it is returned, on the date upon which the customer's account becomes delinquent, or on the date notice is sent to the customer's last known address that the deposit is no longer required.

c. Deposit record. Each utility shall keep records to show: (1) The name and address of each depositor. (2) The amount and date of the deposit. (3) Each transaction concerning the deposit.

d. Deposit receipt. Each utility shall issue a receipt of deposit to each customer from whom a deposit is received, and shall provide means whereby a depositor may establish his claim if his receipt is lost.

e. Deposit refund. The deposit may be refunded upon request of the customer after 12 consecutive months of prompt payment, and, without such request, shall be refunded by the utility after 36 months of prompt payment unless the utility has evidence to indicate that the deposit is necessary to insure payment of bills for service. The deposit shall be refunded when the customer has paid the final billing upon termination of his service.

f. Unclaimed deposits. A record of each unclaimed deposit must be maintained for at least three years, during which time the utility shall make a reasonable effort to return the deposit. After three years, the unclaimed deposits, together with accrued interest, shall be credited to an appropriate account as established by the commission's accounting rules.

g. New or additional deposit. A new or additional deposit may be required upon reasonable written notice of the need for such a requirement in any case where a deposit has been refunded or is found to be inadequate to cover two months bills as above provided for, or where a customer's credit standing is not satisfactory to the utility. The service of any customer who fails to comply with these requirements may be disconnected upon five days' written notice.

21.4(3) *Customer bill forms.* The utility shall bill each customer as promptly as possible following the reading of his meter. Each bill, including the customer's receipt, shall show:

a. The reading of the meter at the beginning and at the end of the period for which the bill is rendered.

b. The dates on which the meter was read at the beginning and end of the billing period.

c. The number and kind of units metered.

d. The applicable rate schedule, or identification of the applicable rate schedule.

e. The gross and net amount of the bill.

f. The discount for prompt payment or penalty for delayed payment and the latest date on which it may be paid without loss of discount or incurring of penalty.

g. A distinct marking to identify an estimated bill.

h. Prorating of bills for a billing period which is longer or shorter than usually allowed on a daily basis unless other provisions are filed by the utility in its filed rules.

i. Credits due a customer because of meter inaccuracies, errors in billing or misapplication of rates each shown separately and identified. The original billing rendered because of meter inaccuracy, or errors in billing, shall be separated from the regular bill and the charges explained in detail. Subsequent to the first billing, the amount can be shown as a separate item on the regular bill.

21.4(4) *Customer records.* The utility shall retain customer billing records for the length of time necessary to permit the utility to comply with 21.4(5), but not less than three years.

21.4(5) *Adjustment of bills.* Bills which are incorrect due to meter or billing errors are to be adjusted as follows:

a. Fast meters. Whenever a meter in service is tested and found to have overregistered more than two percent, the utility shall adjust the customer's bill for the excess amount paid. If the time at which the error first developed or occurred can be definitely determined, the estimated amount of overcharge is to be based thereon. If the time at which the error first developed or occurred cannot be definitely determined, it shall be assumed that the overregistration existed for a period equal to one-half of the time since the meter was last tested, or July 4, 1963, whichever is later, and the bills for service shall be recalculated for that period. If the recalculated bills indicate that more than three dollars is due an existing customer or five dollars is due a person no longer a customer of the utility, the full amount of the calculated difference between the amount paid and the recalculated amount shall be refunded to the customer. The refund to an existing customer may be in lump sum cash or as lump sum credit on a bill. If a refund is due a person no longer a customer of the utility, a notice shall be mailed to the last known address, and the utility shall upon request made within three months thereafter refund the amount due.

b. Nonregistering meters. Whenever a meter in service is found not to register, the utility may render an estimated bill. The utility shall estimate the charge for the water used by averaging the amount registered over a similar period preceding or subsequent to the period of nonregistration or for corresponding period in previous years, adjusting for any changes in the customer's usage. When it is found that the error in a meter is due to some cause, the date of which can be fixed, the overcharge or the undercharge shall be computed back to but not beyond such date.

c. Slow meters. Whenever a meter is found to be more than two percent slow, the utility may bill the customer for the amount the test indicates he has been undercharged for the period of inaccuracy, which period shall not exceed the last six months the meter was in service unless otherwise ordered by the commission. No back billing will be allowed if the customer has called to the company's attention his doubts as to the meter's accuracy and the company has failed within a reasonable time to check it.

d. Calculation of billing adjustments. Billing adjustments due to fast and slow meters shall be calculated on the basis that the meter should be 100 percent accurate. For the purpose of billing adjustment, the meter error shall be one-half of the algebraic sum of the error at maximum test flow plus the error at intermediate test flow.

e. Overcharge adjustment. When a customer has been overcharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the amount of the overcharge shall be adjusted, refunded or credited to the customer.

f. Undercharge adjustment. When a customer has been undercharged as a result of incorrect reading of the meter, incorrect application of the rate schedule, incorrect connection of the meter, or other similar reasons, the amount of the undercharge may be billed to the customer.

g. Credits and explanations. Credits due a customer because of meter inaccuracies, errors in billing, or misapplication of rates shall be separately identified as set out in 21.4(3) "*i*".

21.4(6) *Reasons for denying and disconnecting service.* Service may be refused or discontinued only for the reasons listed below. Unless otherwise stated, the customer shall be permitted at least five days, excluding Sundays and legal holidays, following mailing in which to take necessary action before service is discontinued.

a. Without notice in the event of a condition determined by the utility to be unreasonably hazardous.

b. Without notice in the event of customer use of equipment in such a manner as to adversely

affect the utility's equipment or the utility's service to others.

c. Without notice when the utility has discovered clear and convincing evidence that by fraudulent means a customer has obtained unauthorized water service or has diverted the water service for unauthorized use or has obtained water service without same being properly registered upon the utility's meters.

d. In the event of tampering with the equipment furnished and owned by the utility.

e. For violation of or noncompliance with the rules which the utility has filed with the commission.

f. For failure of the customer to fulfill his contractual obligations for service or facilities subject to regulation by the commission.

g. For failure of the customer to permit the utility reasonable access to its equipment.

h. For nonpayment of bill provided that the utility has made a reasonable attempt to effect collection and has given the customer written notice that he has at least five days, excluding Sundays and legal holidays, in which to make settlement on his account or make a deposit in accordance with 21.4(2) or have his service disconnected.

i. For failure of the customer to furnish such service equipment, permits, certificates, or rights of way, as shall have been specified by the utility as a condition to obtaining service, or in the event such equipment or permissions are withdrawn or terminated.

j. No service shall be disconnected on the day prior to a weekend or holiday except as provided in paragraphs "*a*", "*b*" and "*c*" of this subrule.

k. When a prospective customer is refused service under the provisions of this section, the utility shall notify him promptly of the reason for the refusal to serve and of his right to appeal the utility's decision to the commission.

21.4(7) *Reconnection.* In all cases of discontinuance of service as herein defined, where the cause for discontinuance has been corrected, and all rules of the utility on file with the commission have been complied with, the utility shall promptly restore service to the customer.

21.4(8) *Reconnection charge.* Where service has been discontinued in accordance with this section, the utility may make a reasonable charge for reconnection of service. This charge, however, shall be applied uniformly and shall be incorporated in the rules of the utility.

21.4(9) *Insufficient reasons for denying service.* The following shall not constitute sufficient cause for refusal of service to a present or prospective customer:

a. Nonpayment for service by a previous occupant of the premises to be served.

b. Failure to pay for merchandise or special services purchased from the utility.

c. Failure to pay the bill of another customer as guarantor thereof.

d. Failure to pay for a different type or class of public utility service.

e. Failure to pay a back bill rendered in accordance with 21.4(5) "*c*". (Slow meters.)

f. Failure to pay adjusted bills based on the undercharges set forth in 21.4(5) "*f*".

21.4(10) *Customer complaints.* For the purpose of this section, the word "complaint" shall mean objection to the charge, facilities, or quality of service of a utility concerning which an investigation is necessary.

a. Each utility shall investigate promptly and thoroughly and keep a record of written complaints and all other reasonable complaints received by it from its customers in regard to safety, service, or rates, and the operation of its system as will enable it to review and analyze its procedures and actions. The record shall show the name and address of the complainant, the date and nature of the complaint, and its disposition and the date thereof.

b. All complaints caused by a major service interruption shall be summarized in a single report.

c. A record of the original complaint shall be kept for a period of three years subsequent to the final settlement of the complaint.

21.4(11) *Access to property.* The utility shall have access at all reasonable hours to meters, service connections, and other property owned by it which may be located on customer's premises for purposes of installation, maintenance, operation or removal of its property at the time service is to be terminated. Any employee of the utility whose duties require him to enter the customer's premises shall wear a distinguishing uniform or other insignia, identifying him as an employee of the utility, or carry on his person a badge or other identification which will identify him as an employee of the utility, the same to be shown by him upon request.

21.5(490A) Engineering practice.

21.5(1) *Requirement of good engineering practice.* The design and construction of the utility's water plant shall conform to good standard engineering practice. It shall be designed and operated so as to provide reasonably adequate and safe service to its consumers and shall conform to the requirements of the state department of health, and local boards of health, with reference to sanitation and potability of water.

21.5(2) *Construction standards.* Standards for construction and maintenance of mains and services are as follows:

a. Depth of mains. Water mains shall be placed at such a depth below ground level, or otherwise protected, as will prevent freezing during the coldest weather experienced in the community in which laid, and to prevent damage by traffic.

b. Dead ends. Insofar as practicable, the utility shall design its distribution system so as to avoid dead ends in its mains. Where dead ends are necessary, the utility shall provide hydrants or valves for the purpose of flushing the mains. Mains with dead ends shall be flushed as often as necessary to maintain the quality of the water but in any event they shall be flushed at least once each six months.

c. Segmentation of system. Valves or stopcocks shall be provided at reasonable intervals in the mains so that repairs may be effected by the utility with interruptions to the service of a minimum number of customers.

d. Disinfection of water mains. All new mains shall be thoroughly disinfected before being connected to the system. The method of disinfecting shall be in compliance with state department of health acceptable practice standards.

e. Grid systems. Wherever feasible, the distribution system shall be laid out in a grid so that in case of breaks or repairs the interruptions of service to the customers shall be at a minimum.

f. Size of service pipe. The size, design and material and installation of the service pipe shall conform to such reasonable requirements of the utility as may be incorporated in its rules provided, however, that the minimum size of the pipe shall not be less than three-fourths inch nominal size except under unusual circumstances which shall be clearly defined.

g. Depth of service pipe. All service pipes shall be laid at such a depth as will prevent freezing, except where services are not intended for use during freezing weather, and are actually drained during such periods.

h. Inspection of service pipe. In the installation of a service pipe the customer shall leave the trench open and pipe uncovered until it is inspected by the utility or other duly authorized agency and shown to be at proper depth, free from any tee, branch connection, irregularity or defect. The utility or other duly authorized agency shall expedite the inspection so that the trench may be closed as soon as practical.

i. Unsatisfactory foundation. Whenever normal excavation discloses unsatisfactory foundation one or more of the following corrective measures shall be adopted:

(1) Excavate to good bearing soil and backfill to pipe grade with suitable material well tamped to provide adequate support.

(2) Support with a concrete slab.

(3) Support with piling.

j. Pipe on bridges. Pipe on a highway bridge shall be located so as to reduce hazard to a minimum and be protected from freezing.

k. Pipes laid in trench with other facilities. To secure compliance with the requirements of these rules by others doing underground construction work, the utility should arrange with the other agencies having highway subsurface rights for adequate notification and inspection procedure.

(1) Water services may be laid in the same trench with other underground utilities with the exception of sewer pipes, provided such service pipes are laid at least 12 inches in a horizontal plane from other subsurface facilities. Where water service pipes must be run or laid in the same trench with building sewer or drainage piping, the provisions of the Iowa state plumbing code shall apply.

(2) All water mains shall be laid clear of all other underground structures and should not be laid in the same trench with other underground utilities in order to minimize the possibility of water leakage by reason of any movement of such structures or of the mains.

(3) At crossings of mains and services with other underground structures, clearances shall be not less than 12 inches.

l. Pressure testing. Pipe laid shall be tested and made tight before being placed in service.

m. Backfill. The ditch underneath, around and over the pipe shall be backfilled with good material thoroughly compacted to secure a firm support. To disclose any settlement of the backfill which may need correcting, newly filled ditches shall be reinspected at intervals for sufficient period of time subsequent to completion of backfilling operations.

n. Service connection. Service connections may be tapped into cast iron mains if the diameter of the corporation stop does not exceed one-sixth of the diameter of the main. Service connections may be tapped into asbestos cement pipe if the diameter of the corporation stop does not exceed the permissible sizes listed in the following table:

Pipe Size	*Pipe Class*	*Corporation Stop*
3″ thru 6″	100 and 150	¾″
3″ and 4″	200	¾″
6″	200	1″
8″ thru 16″	100, 150 and 200	1″

Otherwise, and in mains other than cast iron or asbestos cement, a saddle, sleeve or welded connection may be used or a tee cut into the line. The service connection at the main or the run of service pipe shall allow for a reasonable amount of flexibility to prevent fracture or leaks at the connection with the main.

21.5(3) *Inspection of water plant.* The utility's water transmission and distribution facilities shall be designed, constructed and maintained as required to perform the water delivery burden placed upon them. Each utility shall be capable of emergency repair work on a scale consistent with its scope of operation and with the physical conditions of its transmission and distribution facilities.

In appraising the reliability of the utility's transmission and distribution system, the commission will consider the condition of the physical property and the size, training, supervision, availability, equipment and mobility of the maintenance forces all as principal factors.

Each utility must adopt a program of inspection of its water plant in order to determine the necessity for replacement and repair. The frequency of the various inspections shall be based on the utility's experience and accepted good practice. Each utility shall keep sufficient records to give evidence of compliance with its inspection program.

21.6(490A) Meter testing.

21.6(1) *Meter test facilities and equipment.* Each utility furnishing metered water service shall provide the necessary standard facilities, instruments and other equipment for testing its meters in compliance with these rules. Any utility may be exempted from this requirement by the commission provided that satisfactory arrangements are made for test of its meters by another utility or approved agency equipped to test meters in compliance with these rules.

a. Meter shop. The utility's meter test shop shall insofar as practicable simulate the actual service conditions of temperature, inlet pressure and outlet pressure. It shall be provided with the necessary fittings, including a quick acting valve for controlling the starting and stopping of the test and a device for regulating the flow of water through the meter under test within the requirement of these rules.

b. Test equipment and procedures. The over-all accuracy of the test equipment and test procedures shall be sufficient to enable test of service meters within the requirements of these rules. In any event, the inherent over-all accuracy of the equipment shall permit test with an over-all error of not to exceed three-tenths of one percent.

21.6(2) *Test measurement standards.* Measuring devices for test of meter may consist of a calibrated tank for volumetric measurement or tank mounted upon scales for weight measurement. If a volumetric standard is used, it shall be accompanied by a certificate of accuracy from any standard laboratory as may be approved by the commission. If a weight standard is used, the scales shall be tested and calibrated periodically by such approved laboratory and a record maintained of the results of the test.

a. Basic standards. When basic standards are used for meter test, they shall be of a capacity sufficient to insure accurate determination of accuracy and shall be subject to the approval of the commission.

b. Transfer provers. By special permission of the commission, a standard meter may be provided and used by a utility for the purpose of testing meters in place. This standard meter shall be tested and calibrated periodically to insure its accuracy within the limits required by these rules. In any event, such test shall be made at least once every 60 days while the standard meter is in use and a record of such tests shall be kept by the utility.

21.6(3) *Accuracy requirements.* All meters used for measuring quantity of water delivered to a customer shall be in good mechanical condition and shall be adequate in size and design for the type of service which they measure and shall be accurate to the following standards.

a. Test flow limits. For determination of minimum test flow and normal test flow limits, the commission will use as a guide the appropriate standard specifications of the American Water Works Association for the various types of meters. These test flows for positive displacement type cold water meters are as follows:

	FLOW IN G.P.M.		
Nominal Meter Size	*Minimum*	*Intermediate*	*Maximum*
⅝	0.25	2	15
¾	0.50	3	25
1	0.75	4	40
1½	1.50	8	80
2	2.00	15	120
3	4.00	20	250
4	7.00	40	350
6	12.00	60	700

Displacement meters shall be tested at each of the rates of flow stated above for the various size meters.

b. Accuracy limits. A meter shall not be placed in service if it registers less than 95 percent of the water passed through it at the minimum test flow or overregisters or underregisters more than one and one-half percent at the intermediate or maximum limit except that a repaired meter shall not overregister or underregister more than one and one-half percent of the intermediate and maximum flows and shall register not less than the following appropriate percentage of the water passed through it at the minimum test flow:

If manufactured on or after January 1, 1947	90%
If manufactured prior to January 1, 1947	85%

21.6(4) *As found tests.* All meters tested in accordance with these rules for periodic or complaint tests shall be tested in the condition as found in the customer's service prior to any alteration or adjustment in order to determine the average meter error. Tests shall be made at intermediate and maximum rates of flow and the meter error shall be the algebraic average of the errors of the two tests.

21.6(5) *Sealing of meters.* Upon completion of adjustment and test of any water meter under the provisions of these rules, the utility shall affix thereto a suitable register seal in such a manner that adjustment or registration of the meter cannot be changed without breaking the seal.

21.6(6) *Record of test.* A complete record of all meter tests and adjustments and data suffi-

cient to allow checking of test calculations shall be recorded. Such record shall include:

a. Identifying number of the meter.

b. Type and capacity of the meter.

c. Constant of the meter.

d. Date and kind of tests made.

e. Reading of the meter before making any test.

f. The error as found at each test.

g. If readjusted, the percentage of registration as left after each test.

The complete record of tests of each meter shall be maintained for at least two continuous periodic tests and in no case for less than two years.

21.6(7) *Report of meter tests.* Each utility shall furnish to the commission at intervals not exceeding one year a report of the summary of all meter tests made. This report shall be in such detail as may be prescribed by the commission from time to time.

21.6(8) *Initial test and storage of meters.* Every water meter shall be tested as required by these rules prior to its installation either by the manufacturer, the utility, or any approved organization equipped for meter testing. Meters in storage shall be stored in accordance with the manufacturers' recommendations, and unless so stored, shall be tested immediately before installation.

21.6(9) *Repaired or tested meters.* All water meters removed from service for repair or testing in accordance with these rules shall be restored to the prescribed limits of accuracy as required by these rules before again being placed in service.

21.6(10) *Periodic and routine tests.* Each utility shall adopt schedules for periodic and routine tests and repair of its meters as approved by the commission.

21.6(11) *Request tests.* Each utility shall make a test of any water meter upon written request of any customer provided such request is not made more frequently than once each 18 months. The customer shall be given the opportunity of being present at such request tests.

21.6(12) *Referee tests.* The commission will make or cause to be made tests of meters as follows:

a. Application. Upon written application to the commission by a customer or a utility, a test will be made of the customer's meter as soon as practicable under the observation of a representative of the commission.

b. Guarantee. The application transmitted by certified or registered mail shall be accompanied by a certified check or money order made payable to the utility in the amount indicated below:

(1) Capacity of 80 gallons per minute or less	$ 4.00
(2) Capacity over 80 gallons, up to 120 gallons per minute	$ 6.00
(3) Capacity of over 120 gallons per minute	$10.00

c. Conduct of test. On receipt of such request from a customer, the commission will forward the deposit to the utility and will notify the utility of the requirement for the test and the utility shall not knowingly remove or adjust the meter until instructed by the commission. The utility shall furnish all instruments, load devices and other facilities necessary for the test and shall perform the test in the presence and under the observation of the commission's representative and shall furnish verification of the accuracy of test instruments used.

d. Test results. If upon test the meter is found to overregister to an extent requiring a refund under the provisions of 21.4(5) *"a"*, the amount paid to the utility for the test shall be returned to the customer by the utility.

e. Notification. The utility shall notify the customer in advance of the date and time of the referee test so the customer, or his representative, may be present when his meter is tested.

f. Commission report. The commission will make a written report of the results of the test to the customer and to the utility.

21.6(13) *Installation of meters.* Each water utility shall adopt a standard method of meter installation. Such methods shall be set out with a written description or drawing to the extent necessary to a clear understanding of the requirements. Copies of approved standard methods shall be made available upon request to prospective customers, contractors or others engaged in the business of placing pipe for water utilization. All meters shall be set in place by the utility.

21.6(14) *Registration of meters.* All meters used for metered sales shall have registration devices indicating the volume of water in either cubic feet or United States gallons. Where a constant or multiplier is necessary to determine the meter reading in cubic feet or gallons, the constant or multiplier shall be indicated upon the face of the meter, and on the meter reading sheet or card.

21.7(490A) Standards of quality of service.

21.7(1) *Quality of water.* Any utility furnishing water service for human consumption or for domestic uses shall provide water that is wholesome, potable, free from objectionable odors and taste, and in no way harmful or dangerous to health and shall conform to all legal requirements of the state department of health for construction and operation of its water system as pertains to sanitation and potability of the water.

a. In absence of comparable requirements of the state department of health the following rules shall apply and the water supplied by any utility shall be:

(1) Obtained from a source free from pollution and adequately protected from pollution, or

(2) Adequately protected by artificial treatment.

(3) Reasonably free from objectionable color, turbidity, taste and odor.

(4) From a source reasonably adequate to provide a continuous supply of water.

(5) Of such quality at all times as to meet the standards of purity for drinking water as set out in Public Health Service Drinking Water Standards, Revised 1962, PHS Publication No. 956 as modified by Iowa state department of health regulations governing drinking water in Iowa.

b. Operation of supply system. The utility shall operate and maintain its supply system in such manner as will guarantee that:

(1) The water supply system, including wells, reservoirs, pumping equipment, treatment works, mains and service pipes shall be free from sanitary defects.

(2) No physical connection between the distribution system of a public potable water supply and that of any other water supply is permitted, unless such other water supply maintains a safe sanitary quality in accordance with these rules and the interconnections of both supplies are approved by the state department of health.

(3) The growth of algae in the water at the source of supply, in reservoirs or other basins, and in the water mains, is controlled by proper treatment.

(4) Where water supplies are obtained from driven or drilled wells, the tightness of well casings and protection at the surface of the ground will prevent the infiltration of water other than that from the strata tapped by such wells.

c. Laboratory testing. The quality of water being furnished by the utility shall be determined by laboratory tests.

(1) Each utility shall have representative samples of the water supplied by it examined by the state or local department of health or, by a state department of health approved laboratory employing a competent chemist and bacteriologist, skilled in the sanitary examination of water, at intervals sufficient to insure a safe water supply.

(2) In the event that the above-prescribed test shows that the water furnished by the utility is contaminated or otherwise unsafe for human consumption, the utility shall forward a report of such test to the commission or other state agency having correctional jurisdiction without delay, and shall take immediate steps to correct the condition.

21.7(2) *Pressures.* Under normal condition of use of water the pressure (pound per square inch gauge) at a customer's service connection shall be not less than 25 PSIG and not more than 125 PSIG.

a. Pressure outside the limits specified will not be considered a violation when the variations:

(1) Arise from the action of the elements.

(2) Are infrequent fluctuations not exceeding five minutes duration.

(3) Arise from service interruptions.

(4) Are from causes beyond the control of the utility.

b. Each utility shall adopt and maintain a standard pressure in its distribution system at locations to be designated as the point or points of "standard pressure".

c. At regular intervals, each utility shall make a survey of pressures in its distribution system of sufficient magnitude to indicate the quality of service being rendered at representative points on its system. Such surveys should be made during periods of high usage at or near the maximum usage during the year. The pressure charts for these surveys shall show the date and time of beginning and end of the test and the location at which the test was made. Records of these pressure surveys shall be maintained at the utility's principal office in the state and shall be made available to the commission upon request.

21.7(3) *Interruption of supply.* Prompt notice by telephone or telegraph shall be given to the commission by each utility of all interruptions to or major impairment of the supply for periods of a duration of one hour or more occurring on production works, storage works, transmission mains or distribution mains except those occurring in the course of routine operations. The same notice shall be given in case of accident or damage to portions of the plant which might lead to interruptions of service.

a. Each utility shall make all reasonable efforts to prevent interruptions of service and when such emergency interruptions occur shall endeavor to re-establish service with the shortest possible delay consistent with the safety to its customers and the general public. Where an emergency interruption affects fire protection service, the utility shall immediately notify the fire chief or other responsible local official.

b. Whenever any utility finds it necessary to schedule an interruption to its service, it shall make all reasonable efforts to notify all customers to be affected by the interruption, stating the time and anticipated duration of the interruption. Whenever possible, scheduled interruptions shall be at such hours as will provide least inconvenience to the customer.

c. Every utility shall maintain records of interruptions for a period of at least five years.

21.7(4) *Shortage of supply.* The utility shall exercise reasonable diligence to furnish a continuous and adequate supply of water to its customers and to avoid any shortage or interruption of delivery thereof.

a. If a utility finds that it is necessary to restrict the use of water it shall notify its customers, and give the commission written notice, before such restriction becomes effective. Such notifications shall specify:

(1) The reason for the restriction.

(2) The nature and extent of the restriction.

(3) The date such restriction is to go into effect.

(4) The probable date of termination of such restriction.

b. During times of threatened or actual water shortage the utility shall equitably apportion its available water supply among its customers with due regard to public health and safety.

Supersedes Rate No. .....

These rules are intended to implement sections 490A.2 and 490A.8 of the Code.

[Filed June 11, 1968]

CHAPTER 22
TELEPHONE UTILITIES

22.1(490A) General information.

22.1(1) *Application of rules.* The rules shall apply to any telephone utility operating within the state of Iowa subject to chapter 490A of the Code, and shall supersede all conflicting rules of any telephone utility which were in force and effect prior to the adoption of their superseding rules. These rules are intended to promote safe and adequate service to the public, to provide standards for uniform and reasonable practices by utilities, and to establish a basis for determining the reasonableness of such demands as may be made by the public upon the utilities.

22.1(2) *Waiver and modification.* If unreasonable hardship to a utility or to a customer results from the application of any rule herein prescribed, application may be made to the commission for the modification of the rule or for temporary or permanent exemption from its requirements.

The adoption of these rules shall in no way preclude the commission from altering or amending them, pursuant to statute, or from making such modifications with respect to their application as may be found necessary to meet exceptional conditions.

22.1(3) *Definitions.* For the administration and interpretation of these rules, the following words and terms shall have the meaning indicated below:

a. "Average busy-season, busy-hour traffic" means the average traffic volume for the busy-season, busy-hours.

b. "Base rate area" means the developed portion or portions within each exchange service area as set forth in the telephone utility's tariffs, maps or descriptions. Main station service within this area is furnished at uniform rates without mileage charges. (See also "Rate Zone")

c. "Busy-hour" means the two consecutive half-hours during which the greatest volume of traffic is handled in the office.

d. "Busy-season" means that period of the year during which the greatest volume of traffic is handled in the office.

e. "Calls" means customers' telephone messages attempted.

f. "Central office" means a switching unit, in a telephone system which provides service to the general public, having the necessary equipment and operating arrangements for terminating and interconnecting subscriber lines and trunks or trunks only. There may be more than one central office in a building.

g. "Channel" means an electrical path suitable for the transmission of communications.

h. "Class of service" means the various categories of service generally available to customers, such as business or residence.

i. "Commission" means the Iowa state commerce commission.

j. "Customer or subscriber" means any person, firm, partnership, corporation, municipality, co-operative organization, governmental agency, etc., provided with telephone service by any telephone utility.

k. "Customer trouble report" means any call or written statement from a subscriber or user of telephone service relating to a physical defect or to difficulty or dissatisfaction with the operation of telephone facilities. Each call or written statement received shall be considered a separate report, even though it may duplicate a previous report or merely involve an inquiry concerning progress on a previous report. Also, a separate report shall be counted for each telephone or PBX switchboard position reported in trouble when several items are reported by one customer at the same time, unless the group of troubles so reported is clearly related to a common cause.

l. "Exchange" means a unit established by a telephone utility for the administration of telephone service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with associated plant used in furnishing communication service in that area.

m. "Exchange service" means telephone service furnished by means of exchange plant and facilities.

n. "Exchange service area" or "exchange area" means the general area in which the telephone utility holds itself out to furnish exchange telephone service.

o. "Exchange station" means communication equipment with an individual exchange or extension number located within an exchange service area which may be called by dial or otherwise from any other exchange station.

p. "Extended area service" means telephone service, furnished at flat rates, between subscribers' telephone stations located within an exchange area and all of the subscribers of one or more additional exchange areas.

q. "Flat rate service" means service furnished at a fixed monthly or periodic charge.

r. "Foreign exchange service" means exchange service furnished a subscriber from an exchange other than the exchange regularly serving the area in which the subscriber is located.

s. "Grade of service" means the number of parties served on a telephone line such as one-party, two-party, four-party, etc.

t. "Held order for regrade" means an application for regrade of service not filled within 30 days of the date which the prospective customer desires service.

u. "Held order for service" means an application for establishment of service not filled within 30 days of the date which the prospective customer desires service.

v. "Local service" means telephone service furnished between subscriber stations located within an exchange area.

w. "Main station" means the primary or principal station directly connected by means of an individual line or party line circuit with a central office.

x. "Message" means a completed customer telephone call.

y. "Message rate service" means service for which the subscriber charges are based on message units depending in part upon the number of outgoing messages placed by the subscriber to stations receiving service from the same local or extended service area.

z. "Multiparty service" means service provided on a channel designed for the connection of more than four main stations with the central office.

aa. "Outside plant" means the telephone equipment and facilities installed on, along, or under streets, alleys, highways, and private rights of way between customer locations, central offices or the central office and customer location.

ab. "Percentage of fill" means the ratio of circuits and equipment in use to the total available.

ac. "Premises" means the space occupied in a single exchange by a customer in a building or in adjoining buildings not separated by a public thoroughfare.

ad. "Rate zone" means an area other than base rate area within an exchange service area where service generally is furnished at uniform rates without mileage charges.

ae. "Rural service" means service in an exchange area outside of a base rate area or generally outside a special rate area, as defined herein, furnished without mileage charge.

af. "Service line" means those facilities owned and maintained by a customer or group of customers, which lines are connected with the facilities of another telephone utility for communication service.

ag. "Special rate area" means an area within an exchange where service generally is furnished at uniform rates. Usually this comprises a developed area outside of the base rate area which is also known as a "locality rate area" and separated by some distance from the base rate area.

ah. "Subscriber line" means the wires or channels used to connect the telephone equipment at the subscriber's premises with the central office.

ai. "Switching service" means switching performed for service lines.

aj. "Tariff" means the entire body of rates, tolls, rentals, charges, classifications, and rules, adopted and filed with the commission by a public utility providing service to the public.

ak. "Telephone station" means the telephone instrument installed for the use of a customer or subscriber.

al. "Telephone utility" means any person, partnership, business association, or corporation, domestic or foreign, owning or operating any facilities for furnishing communications service to the public for compensation.

am. "Toll connecting trunks" means a general classification of trunks carrying toll traffic and ordinarily extending between a local office and a toll office.

an. "Toll message" means a message made between different exchange areas for which a charge is made.

ao. "Toll rate" means the tariff charge prescribed for toll messages, usually based upon the duration of the message and the distance between the exchanges.

ap. "Toll station" means a telephone connected to a toll line or directly to a toll board.

aq. "Toll station service" means telephone service rendered from a toll station.

ar. "Traffic" means telephone call volume, based on number and duration of messages.

as. "Traffic grade of service" means the percent of customer call attempts which do not encounter an all-trunks-busy condition during the average busy-season, busy-hour.

at. "Wide area service" means service beyond the local or extended area provided at a flat monthly rate or on a basis differing from customary message toll rates.

22.1(4) *Abbreviations.*

AMA—Automatic Message Accounting
ANC—All Number Calling
ANI—Automatic Number Identification
CAMA—Centralized Automatic Message Accounting
CATV—Community Antenna Television
CB—Common Battery
CDO—Community Dial Office
COE—Central Office Equipment
DDD—Direct Distance Dialing
D-TPL—Dial-Terminal Per Line
D-TPS—Dial-Terminal Per Station
EAS—Extended Area Service
ESS—Electronic Switching System
IMTS—Improved Mobile Telephone Service
INWATS—Inward Wide Area Telephone Service
MG—Magneto
MMM—Message Minute Miles
PABX—Private Automatic Branch Exchange
PBX—Private Branch Exchange
SLU—Subscriber Line Usage
TSP—Traffic Service Position
TSPS—Traffic Service Position System
TWX—Teletypewriter Exchange Service
WATS—Outward Wide Area Telephone Service

22.1(5) *Switching service.* Effective with the adoption of these rules, telephone utilities shall not provide switching service to additional lines which do not meet the technical criteria of these rules. Also, effective with the adoption of these rules, each telephone utility shall eliminate nonconforming switching service according to one of the following provisions:

a. By conversion to dial or other adequate service.

b. By changing all lines not upgraded to dial or other adequate service to company-owned stations within a period of five years.

22.1(6) *Basic utility obligations.* Each telephone utility shall provide telephone service to the public in its service area in accordance with its rules and tariffs on file with the commission. Such service shall normally meet or exceed the standards set forth in these rules governing service supplied by "Telephone Utilities."

22.2(490A) Records and reports.

22.2(1) *Evaluation of records.* Each telephone utility has the obligation to continually study and evaluate its records and reports to insure that any irregularities in service that may cause customer dissatisfaction or complaint are corrected expeditiously and that all phases of construction, equipment maintenance or operation are satisfactory.

22.2(2) *Retention of records.* Unless otherwise specified herein, all records required by these rules shall be preserved for the period of time specified in "Part 42—FCC Rules and Regulations." The latter shall be the unit of Volume X of the rules and regulations of the federal communications commission officially designated as "Part 42—Preservation of Records of Communication Common Carriers" as adopted by the federal communications commission in Docket 13080 and published in the Federal Register on October 4, 1960, and as amended by Transmittal Sheet No. X-9 to Volume X of Rules and Regulations, January, 1961 Edition, effective date September 1, 1965.

Where a telephone utility is operated in conjunction with any other enterprise, suitable records shall be maintained so that the results of the telephone operation may be determined upon reasonable notice and request by the commission.

22.2(3) *Location of records.* All records required by these rules or necessary for the administration thereof, shall be kept within this state, unless otherwise authorized by the commission, or shall be made available to the commission or its authorized representatives at all reasonable hours.

22.2(4) *Tariffs to be filed with the commission.* The utility shall file its tariff with the commission, and shall maintain such tariff filing in a current status. A copy of the same tariff shall also be on file in all business offices of the telephone utility and shall be available for inspection by the public.

The schedules of rates of rate-regulated utilities and rules of all utilities shall be filed with the commission and shall be classified, designated, arranged and submitted so as to conform to the requirements of current tariff or rate schedule circulars and special instructions which have been or may from time to time be issued by the commission. Provisions of the schedules shall be definite and so stated as to minimize ambiguity or the possibility of misinterpretation. The form, identification and content of tariffs shall be in accordance with these rules.

Utilities which are not subject to the rate regulation provided for by chapter 490A of the Code, shall not be required to file schedules of rates, or contracts primarily concerned with a rate schedule, with the commission but nothing contained in these rules shall be deemed to relieve any utility of the requirement of furnishing any of these same schedules or contracts which are needed by the commission in the performance of the commission duties upon request to do so by the commission.

22.2(5) *Form and identification.* All tariffs shall conform to the following rules.

a. The tariff shall be printed, typewritten or otherwise reproduced on 8½x11-inch sheets of white paper equal in durability to 20-pound bond paper with 25 percent cotton or rag content so as to

result in a clear and permanent record. The sheets of the tariff should be ruled or spaced to set off a border on the left side suitable for binding. In the case of utilities subject to regulation by any federal agency the format of sheets of tariff as filed with the commission may be the same format as is required by the federal agency, provided that the rules of the commission as to title page; identity of superseding, replacing or revising sheets; identity of amending sheets; identity of the filing utility, issuing official, date of issue and effective date; and the words "Filed with the I.S.C.C." shall be applied to modify the federal agency format for the purposes of filing with this commission.

b. The title page of every tariff and supplement shall show in the order named:

(1) The first page shall be the title page which shall show:

(Name of Public Utility)
Telephone Tariff
Filed with
Iowa State Commerce Commission
_____(date)

(2) When a tariff is to be superseded or replaced in its entirety, the replacing tariff shall show on its title page that it is a revision of a tariff on file.

(3) When a revision or amendment is made to a filed tariff, the revision or amendment shall show on each sheet the designation of the original tariff or the number of the immediate preceding revision or amendment which it replaces. (See exhibit A)

(4) When a new part of a tariff eliminates an existing part of a tariff it shall so state and clearly identify the part eliminated. (See exhibit A)

c. Any tariff modifications as defined above shall be marked in the right-hand margin of the replacing tariff sheet with symbols as here described to indicate the place, nature and extent of the change in text.

— Symbols —
(C)—Changed regulation
(D)—Discontinued rate or regulation
(I) —Increase in rate
(N)—New rate or regulation
(R)—Reduction in rate
(T)—Change in text only

d. All sheets except the title page shall have, in addition to the above-stated requirements, the following further information:

(1) (Name of public utility) Telephone Tariff under which shall be set forth the words "Filed with I.S.C.C." If the utility is not a corporation, and a trade name is used, the name of the individual or partners must precede the trade name.

(2) Issuing official and issue date.

(3) Effective date.

22.2(6) *Content of tariffs.*

a. A table of contents containing a list of exchange rate schedules and other sections in the order in which they appear showing the sheet number of the first page of each rate schedule or other section. In the event the utility filing the tariff elects to segregate a section such as general rules from the section containing the rate schedules or other sections, it may at its option prepare a separate table of contents or index for each such segregated section.

b. All rates of rate-regulated utilities for service defining the classes and grades of service that are available to the customers and to which each rate applies. With these rate schedules, a map shall be filed which shall clearly define the base rate boundary and any rural or special zones that are set forth in the tariff. The boundary line location on such maps shall be delineated from fixed reference points.

c. Any limitations on the type of equipment which may be connected, the length of billing period, and any special terms and conditions applicable. The discount for prompt payment or penalty for late payment, if any, and the period during which the net amount may be paid shall be specified.

d. Forms of standard contracts required of customers for the various types of service available other than those which are defined elsewhere in the tariff.

e. A designation, by exchange, of the EAS to other exchanges.

f. The list of exchange areas and the standard rates associated therewith, where rate control is authorized by law, shall be filed in such form as to facilitate ready determination of the rates available. If the utility has mileage extension charges, the areas where mileage rates apply shall be indicated.

g. Definitions of classes of customers.

h. Extension rules, under which extensions of service will be made, indicating what portion of the extension or cost thereof will be furnished by the utility; and if the rule is based on cost, the items of cost included as required in 22.3(5).

i. The type of construction which the utility requires the customer to provide if in excess of the Iowa electrical safety code or the requirements of the municipality having jurisdiction, whichever may be the most stringent in any particular.

j. Statement of the type of special construction commonly requested by customers which the utility allows to be connected, and the terms upon which such construction will be permitted, with due provision for the avoidance of unjust discrimination as between customers who request special construction and those who do not. This applies, for example, to a case where a customer desires underground service in overhead territory.

k. Rules with which prospective customers must comply as a condition of receiving service.

l. Rules governing the establishment of credit by customers for payment of service bills.

m. Rules governing the procedure followed in disconnecting and reconnecting service.

n. Notice by customer required for having service discontinued.

o. Rules covering temporary, emergency, auxiliary and standby service.

p. Rules covering the type of equipment which may or may not be connected.

22.2(7) *Annual, periodic and other reports to be filed with the commission.*

a. System maps. The utility shall file annually a verification that it has a currently correct set of utility system maps in accordance with general requirement 22.3(6) and a statement as to the location of the utility's offices where such maps are accessible and available for examination by the commission or its staff. The verification and map location information shall also be reported to the commission upon other occasions when significant changes occur in either the maps or location of the maps.

b. Each utility shall file with the commission a report of each accident in connection with the operation of the utility's telephone plant which results in an injury temporarily disabling an employee for two days or more or resulting in permanent disability or death. Prompt notice of fatal accidents shall be given to the commission by telephone. A written report of the accident shall be filed within ten days next following the occurrence of the accident on forms approved by the commission. Such written reports shall indicate the following information:

(1) The name, address and age of the person or persons involved in the accident.

(2) The time and place where the accident occurred.

(3) The cause of the accident in detail.

(4) The name of the individual, company, corporation, city or town operating the telephone exchange service.

c. The utility shall file annually a report of all important additions to the telephone plant by exchange or location, the construction or acquisition of which was completed by the utility during the preceding year and that which is planned for the current year. For the purpose of this rule an important addition to plant shall mean a single project involving the expenditure of more than $50,000 or an amount equivalent to more than 25 percent of the total telephone plant in service, whichever is less.

d. Each utility shall compile a monthly record by exchange of station, central office, and outside trouble reports and held applications. This information shall be supplied on forms approved by the commission. The records shall be compiled not later than 30 days after the end of the month covered and shall, upon and after compilation, be kept available for inspection by the commission or its staff. A summary of the 12 monthly records shall be attached to and submitted with the utility's annual report to the commission.

e. The utility shall keep the commission informed currently by written notice as to the location at which the utility keeps the various classes of records required by these rules.

f. A copy of each standard type of customer bill form in current use shall be filed with the commission.

g. The name, title, address and telephone number of the person who is authorized to receive, act upon and respond to communications from the commission in connection with the following:

(1) General management duties.

(2) Customer relations (complaints).

(3) Engineering operations.

(4) Emergencies during nonoffice hours.

22.3(490A) General service requirements.

22.3(1) *Held applications.*

a. During such period of time as telephone utilities may not be able to supply initial telephone service to prospective customers or upgrade existing customers withing 30 days after the date applicant desires service, the telephone utility shall keep a record by exchanges showing the name and address of each applicant for service, the date of application, date that service is desired, the class and grade of service applied for, together with the reason for the inability to provide the new service or higher grade to the applicant.

b. When, because of shortage of facilities, a utility is unable to supply main telephone service on dates requested by applicants, first priority shall be given to furnishing those services which are essential to public health and safety. In cases of prolonged shortage or other emergency, the commission may require establishment of a priority plan, subject to its approval for clearing held orders, and may request periodic reports concerning the progress being made.

22.3(2) *Directories.* All directories published after the effective date of these rules shall conform to the following:

a. Telephone directories shall be regularly published, listing the name, address and telephone number of all customers, except public telephones and numbers unlisted at customer's request.

b. Upon issuance, a copy of each directory shall be distributed to all customers locally served by that directory. A copy of each directory shall be furnished the commission at any time upon its request.

c. The year of issue shall appear on the front cover. Information pertaining to emergency calls, such as for the police and fire departments, for each exchange listed in the directory shall appear conspicuously on the back side of the front cover or on the front side of the first page of the directory.

d. The directory shall contain such instructions concerning placing local and long distance calls, calls to repair and information services, and location of telephone company business

offices as may be appropriate to the area served by the directory. Rates between frequently called points may also be included.

e. Information or intercept operators shall maintain records of all telephone numbers (except telephone numbers not listed or published at customer request) in the area for which they are responsible for furnishing information service.

f. In the event of an error in the listed number of any customer, the telephone utility shall intercept all calls to the listed number for a reasonable period of time provided existing central office equipment will permit and the number is not in service. In the event of an error or omission, in the name listing of a customer, such customer's correct name and telephone number shall be in the files of the information or intercept operators and the correct number shall be furnished the calling party either upon request or interception.

g. Whenever any customer's telephone number is changed after a directory is published, the utility shall intercept all calls to the former number for a reasonable period of time and give the calling party the new number provided existing central office equipment will permit, and the customer so desires.

h. When additions or changes in plant, records or operations which will necessitate a large group of number changes are scheduled, reasonable notice shall be given to all customers so affected even though the additions or changes may be coincident with a directory issue.

22.3(3) *Grade of service.*

a. Within the base rate area, no utility shall connect more customers on any line than are contemplated under the grade of service charged the customer on such line.

b. On rural lines where multiparty service is provided, no more than eight customers shall be connected to any one circuit, unless approved by the commission. All rural circuits now serving more than eight customers shall be changed to meet this requirement within a five-year period following adoption of these rules. If 20 percent or more of the customers of a utility are on rural service lines serving more than eight parties, the utility shall file with the commission within 12 months from the adoption of the rules a plan showing the proposed action for reducing these lines to a maximum of eight parties. The telephone utility may regroup customers in such a manner as may be necessary to carry out the provision of this rule. An application for extension of time may be made. Such application shall contain the following:

(1) An analysis of the original amount of work to be completed in meeting the provisions of this rule as to work completed and in service at time of extension application, work under construction at time of extension application, and work not yet begun.

(2) Estimated date of completion.

(3) Reasons why the total conversion plan has not yet been completed as previously scheduled.

(4) Justification of the additional time requested.

Upon completion in the meeting of this requirement a report to that effect shall be filed with the commission.

22.3(4) *Public telephone service.*

a. In each exchange the telephone utility shall supply at least one coin telephone that will be available to the public on a 24-hour basis. This coin telephone shall be located in a prominent location in the exchange and shall be lighted at night. The utility may also establish other public telephone service at locations where the public convenience will be served. This requirement may be waived by the commission in cases of abusive vandalism or damage.

b. In other locations the telephone utility may provide semipublic telephone service to subscribers. Semipublic service is used at locations where the installation of a public telephone is not warranted but where there is a demand for telephone service for transients or where there is a need of this service by guests, employees, members or occupants, or where there is a demand for service by a combination of transient and customer use.

22.3(5) *Extension plan.* Each utility shall develop a plan, acceptable to the commission, for the extensions of facilities, where they are in excess of those included in the regular rates for service and for which the customer shall be required to pay all or part of the cost. This plan must be related to the investment that prudently can be made for the probable revenue. No utility shall make or refuse to make any extensions except as permitted by the approved extension plan.

22.3(6) *Maps.*

a. Each telephone utility shall maintain in a current status exchange maps showing the exchange service area for each telephone exchange operated, and the map shall be in sufficient detail to reasonably permit locating the exchange service area boundaries in the field. A copy of such maps shall be available to the commission or its authorized representatives at any time upon request.

b. The maps shall show:

(1) Base rate area.

(2) Exchange boundary.

(3) Location of central office.

(4) Name of communities (P.O. designations) served.

(5) State boundary crossings (if any).

(6) Interexchange routes and circuit information. (This information may be otherwise provided on forms approved by the commission.)

22.3(7) *Traffic rules.*

a. Suitable practices shall be adopted by each telephone utility concerning the operating methods to be employed by operators with the objective of providing efficient and pleasing service to the customers.

b. Telephone operators shall be instructed to be courteous, considerate and efficient in the

handling of all calls, and to comply with the provisions of the Communications Act of 1934 in maintaining the secrecy of communications.

c. All operator-handled calls shall be carefully supervised and disconnects made promptly.

d. When an operator is notified by a customer that he has reached a wrong number on a direct dialed call, the customer shall be given credit on his bill when the claim has been substantiated.

22.4(490A) Customer relations.

22.4(1) *Customer information.*

a. Each utility shall:

(1) Maintain up-to-date maps, plans, or records of its entire exchange systems, together with such other information as may be necessary to enable the utility to advise prospective customers, and others entitled to the information, as to the facilities available for serving prospective customers in its service area.

(2) Inform the customer or prospective customer of the basic grades of service available at his subscriber location and the charges associated therewith.

(3) Notify customers affected by a change in rates or schedule classification.

(4) Post a notice in a conspicuous place in each office of the utility where applications for service are received, informing the public that copies of the rate schedules and rules relating to the service of the utility, as filed with the commission, are available for inspection.

(5) Furnish such additional information as the customer may reasonably request.

b. Employees responsible for the receiving of customer telephone calls and customer office visits shall be properly qualified and instructed in the screening and prompt handling of complaints to assure prompt reference of the complaint to the person or department capable of effective handling of the matter complained of and to obviate the necessity of the customer's preliminary repetition of the entire complaint to employees lacking in ability and authority to take appropriate action.

22.4(2) *Customer deposits.* Each utility may require from any customer or prospective customer a deposit intended to guarantee payment of bills for service.

a. Such deposit shall not be less than five dollars nor more in amount than the maximum charge for two months local exchange service plus two months estimated toll service, or as may reasonably be required by the utility in cases involving service for short periods or special occasions.

b. Interest on deposit.

(1) Simple interest on deposits at the rate of at least five percent per annum shall be paid by the utility to each customer required to make such a deposit for the time held by the utility. Interest shall be paid from the date of deposit to the date of refund or the date upon which the customer's account becomes delinquent, whichever is earlier, unless such period be less than six months.

(2) Payment of interest to the customer shall be made annually if requested by the customer, or at the time the deposit is returned.

(3) The interest shall be accrued annually.

(4) The deposit shall cease to draw interest on the date it is returned, on the date upon which the customer's account becomes delinquent, or on the date notice is sent to the customer's last known address that the deposit is no longer required.

c. Each utility shall keep records to show:

(1) The name and address of each depositor.

(2) The amount and date of the deposit.

(3) Each transaction concerning the deposit.

d. Each utility shall issue a receipt of deposit to each customer from whom a deposit is received, and shall provide means whereby a depositor may establish his claim if his receipt is lost.

e. The deposit shall be refunded upon request of the customer after 12 consecutive months of prompt payments, and, without such request, shall be refunded by the utility after 36 consecutive months of prompt payment. In no case, however, must a deposit be refunded if the customer's credit standing is not satisfactory to the utility.

f. A record of each unclaimed deposit must be maintained for at least three years during which time the utility shall make a reasonable effort to return the deposit.

g. Unclaimed deposits, together with accrued interest, shall be credited to an appropriate account.

h. A new or additional deposit may be required upon reasonable written notice of the need for such a requirement in any case where a deposit has been refunded or if found to be inadequate to cover the amount as provided for in "*a*" above, or where a customer's credit standing is not satisfactory to the utility. The service of any customer who fails to comply with these requirements may be disconnected upon five days' written notice.

22.4(3) *Customer billing.* Bills to customers shall be rendered regularly and clearly list all charges. Reasonable customer requests for an itemized statement of charges shall be complied with.

22.4(4) *Customer complaints.* Complaints concerning the charges, practices, facilities, or service of the utility shall be investigated promptly and thoroughly. The utility shall keep a record of such complaint showing the name and address of the complainant, the date and nature of the complaint, its disposition, and all other pertinent facts dealing with the complaint, which will enable the utility to review and analyze its procedure and actions. The records maintained by the

utility under this rule shall be available for inspection by the commission or its staff upon request.

22.4(5) *Discontinuance, suspension or refusal of service.*

a. In the event of nonpayment of any sum due for exchange, toll or other service, the telephone utility may with respect to such service suspend or discontinue the service without suspension, or following suspension of service sever the connection and remove any of its equipment from the customer's premises, provided that the utility has made a reasonable attempt to effect collection and has given the customer written notice that he has at least five days in which to make settlement of his account or make a deposit in accordance with 22.4(2). In unusual credit circumstances or abnormal usage of service which would result in undue revenue loss, the requirement of a five-day written notice would not apply.

b. In the event there is disagreement or dispute concerning a bill for telephone service, the telephone company may require the customer to pay a sum of money equal to the amount of the undisputed portion of the bill to the telephone utility pending settlement and thereby avoid discontinuance of service for nonpayment of such disputed bill.

c. No deposit shall be required as a condition for establishment of service other than as provided in the utility's rules and tariffs on file with the commission.

d. Service may be denied to any applicant for failure to comply with applicable requirements of these rules, or of the utility's rules, or the requirements of municipal ordinances, or law pertaining to the services.

e. Delinquency in payment for service rendered to a previous occupant of the premises to be served and unpaid charges for services or facilities not ordered by the present or prospective subscriber shall not constitute a sufficient cause for refusal of service to a present or prospective subscriber.

22.4(6) *Temporary service.* When the utility renders temporary service to a customer, it may require that the customer bear all the cost of installing and removing the service facilities in excess of any salvage realized.

22.5(490A) Engineering.

22.5(1) *Requirement for good engineering practice.* The telephone plant of the utility shall be constructed, installed, maintained and operated subject to the provisions of the Iowa electrical safety code or the requirements of any municipality having jurisdiction, whichever may be the most stringent, and in accordance with accepted good engineering practice in the communication industry to assure, as far as reasonably possible, continuity of service, uniformity in the quality of service furnished, and the safety of persons and property.

22.5(2) *Adequacy of service.*

a. Each utility shall employ recognized engineering and administrative procedures to determine the adequacy of service being provided to the customer.

b. Traffic studies shall be made and records maintained to determine that sufficient equipment and an adequate operating force are provided during the busy-season, busy-hour.

c. Each telephone utility shall provide emergency service in all exchanges operated in which regular service is not available at certain periods during the 24 hours of the day. When service is not continuous for the full 24-hour day, proper arrangements shall be made for handling emergency calls during the off periods by the use of alarms maintained in proper condition with someone conveniently available so that emergency calls will be given prompt attention.

d. Each utility shall employ adequate procedures for assignment of facilities. The assignment record shall be kept up-to-date and checked periodically to determine if adjustments are necessary to maintain proper balance in all groups.

22.5(3) *Manual switchboard requirements.*

a. Switchboards shall be provided with sufficient cord pairs to handle the calls of an average busy-season, busy-hour so that 96 percent of the calls are answered on the initial attempt.

b. The position requirements shall be engineered on the basis of each position handling no more than 230 traffic units during the average busy-season, busy-hour. (This shall be applicable to all types of switchboards.)

22.5(4) *Dial service requirements.*

a. Each utility shall employ appropriate procedures to determine the adequacy of central office equipment. Sufficient central office capacity and equipment shall be provided to meet the following minimum requirements during average busy-season, busy-hour:

(1) Dial tone within three seconds on at least 95 percent of telephone calls.

(2) Complete dialing of called numbers on at least 90 percent of telephone calls without encountering an all-trunks-busy condition within the central office.

b. Each telephone utility shall engineer all new and additional central office equipment requirements using sound engineering practice, consistent with the practices of the telephone industry.

c. Rural lines shall be engineered for a line fill of no more than eight customers per line. Whenever practical, all new dial offices shall be engineered on a terminal per station basis.

d. Each central office shall be provided with alarms to indicate improper functioning of equipment.

22.5(5) *Grounded circuits.* On and after the effective date of these rules, no additional tele-

phone lines shall be constructed as a single wire with ground return. Telephone utilities shall provide full metallic circuits for all customers located within the base rate area, and so far as economically feasible, to all rural multiparty customers located beyond the base rate area. Telephone utilities operating ground return rural circuits which are affected by inductive interference should cooperate to the fullest extent possible with all interested parties in correcting this condition, and where necessary to eliminate inductive or conductive interference full metallic circuits, properly transposed, shall be provided.

22.5(6) *Interexchange trunks.*

a. When trunk lines or toll circuits for communication are furnished by one or more telephone utilities between exchanges, the circuits connecting such exchanges shall be nongrounded. No customer's instruments other than toll stations shall be regularly connected thereto.

b. Interexchange trunks shall be provided so that at least 95 percent of telephone calls offered to the group will not encounter an all-trunks-busy condition. For toll connecting trunks, this figure shall be at least 97 percent.

22.5(7) *Transmission requirements.* Telephone utilities shall furnish and maintain adequate plant, equipment and facilities to provide satisfactory transmission of communications between customers in their service areas. Transmission shall be at adequate volume levels and free of excessive distortion. Levels of noise and cross talk shall be such as not to impair communications.

22.5(8) *Minimum transmission objectives.*

a. The transmission objectives set forth herein are based upon the use of standard telephone sets connected to a 48-volt dial central office, and measured at a frequency of 1,000 cycles.

b. With the foregoing conditions a subscriber line that provides satisfactory pulsing and supervision normally will provide acceptable and adequate transmission. Such line should, in general, have a loop resistance not exceeding the operating design of the associated central office equipment.

c. The over-all transmission loss, including terminating equipment, on local interexchange or interoffice trunks should be no more than ten decibels.

d. Whenever feasible, the over-all transmission loss, including terminating equipment, on intertoll trunks and on terminating links should be no more than five decibels measured at multiple frequencies between 200 and 3,000 cycles. Because these trunks may be only one of several connected links on some toll routes, it may be necessary to provide better facilities in order to keep the over-all net circuit losses within the five decibel limit so as to provide satisfactory message transmission.

22.5(9) *Joint use.* Where joint construction is mutually agreed upon, it shall be subject to the provisions of the Iowa electrical safety code or such other appropriate regulation as may be prescribed.

22.5(10) *Provisions for testing.* Each telephone utility shall provide or have access to test facilities which will enable it to determine the operating and transmission capabilities of circuit and switching equipment, either for routine maintenance or for fault location.

22.5(11) *Answering time.* At manual exchanges 95 percent of the local calls shall be answered by the operator within ten seconds. In large manual exchanges it should be possible to answer the majority of such calls within three seconds except during periods of momentary peak loads. It is not contemplated that this rule can be observed during periods of emergency when an abnormal and unexpected volume of traffic occurs. In manual toll offices, 90 percent of trunk signals shall be answered within ten seconds. On the average, calls shall be answered within five seconds. The average time interval between operator's answer of the customer's signal and the initial signal or report as to the called number should be no more than 90 seconds unless delayed due to reference to rate and route operators.

22.5(12) *Maintenance of plant and equipment.*

a. Each telephone utility shall adopt and pursue a maintenance program aimed at achieving efficient operation of its system so as to permit the rendering of safe, adequate and continuous service at all times.

b. Maintenance shall include keeping all plant and equipment in a good state of repair consistent with safe and adequate service performance. Broken, damaged or deteriorated parts which are no longer serviceable shall be repaired or replaced. Adjustable apparatus and equipment shall be readjusted as necessary when found by preventive routines or fault location tests to be in unsatisfactory operating condition. Electrical faults, such as leakage or poor insulation, noise induction, cross talk, or poor transmission characteristics shall be corrected to the extent practicable within the design capability of the plant affected.

c. In all exchanges, periodic leakage tests shall be made on all circuits by use of proper instruments to determine that sufficient insulation is being maintained and further to discover any substantial change in insulation values which might cause future service difficulties. Loop resistance tests or transmission loss tests should be made on local circuits when transmission is poor, in an endeavor to locate the source of trouble.

d. Maintenance of aerial plant shall include the replacement of broken or missing insulators; broken or badly deteriorated poles, crossarms and brackets; rusted wires; and broken-down

guys. Defective splices shall be replaced, slack wire retensioned, wires properly transposed, and adequate clearance provided between the wires and trees or brush.

e. Switchboard maintenance shall include the replacement of frayed cords, the periodic gauging of jack ferrules, and plugs, and the replacement of ferrules and plugs worn beyond reasonable tolerance. The night alarm circuit for each line and the ringoff drops on the cord circuits shall be tested periodically and adjustments made where necessary. Central office batteries shall be replaced when required to maintain good telephone service.

f. Dial central office equipment shall be inspected and routinely tested at regular intervals, and such repairs, adjustments or replacements made as are found to be necessary and as are required to insure the proper functioning of dial switching equipment.

g. All station apparatus shall be properly maintained including replacement of transmitters and receivers and cords when broken, damaged, or when necessary for good transmission. Utility owned station batteries on magneto systems shall be replaced when the voltage per cell is one volt or less.

h. All station dry cells shall show either the date of original installation or the date of manufacture, or in lieu thereof the telephone utility may keep a record at each central office of the dates of installation of station batteries used at stations served from that central office.

i. Records of various tests and inspections shall be kept on file in the office of the telephone utility for a minimum of one year. These records shall show the line or station tested or inspected, the reason for the test, the general conditions under which the test was made, the general result of the test and such corrections as were made when the test indicated need for same.

22.6(490A) Standards of quality of service.

22.6(1) *Service interruption.*

a. Each telephone utility shall make all reasonable efforts to prevent interruptions of service. When interruptions occur, the utility shall reestablish service with the shortest possible delay. The following objectives in the clearing of trouble reports shall be observed:

(1) In central offices in excess of 10,000 terminals:

Business service: Eighty percent cleared within two hours

Residence service: Eighty percent cleared within four hours

(2) In central offices with less than 10,000 terminals:

Business service: Eighty percent cleared in eight hours

Residence service: Eighty percent cleared in twenty-four hours.

b. Each telephone utility shall inform the commission as soon as possible of any occurrence of an unusual nature which apparently will result in prolonged and serious interruption of service to a large number of customers.

c. Arrangements shall be made to have personnel available to receive and record trouble reports 24 hours daily and also to clear trouble of an emergency nature; at night, on holidays, and weekends, as well as during regular working hours.

d. Whenever service must be interrupted during regular working hours for the purpose of working on the lines, cable or equipment, the work shall be done at a time which will cause the least inconvenience to the customers, and any who would be seriously affected by such interruption shall, so far as possible, be notified in advance.

e. Each telephone utility shall keep a written record showing all interruptions affecting service in an entire exchange service area or any major portion thereof for a minimum of six years. This record shall show the date, time, duration, time cleared and extent and cause of the interruption. This record shall be available to the commission or its authorized representatives upon request at any time within the period prescribed for retention of such records.

f. Whenever a trouble report is received, a record should be made by the company and if repeated within a 30-day period by the same customer, this case shall be referred to a supervisor for permanent correction.

g. When a customer's telephone is reported or found to be out of order, it shall be restored to service as promptly as possible. In the event it remains out of order in excess of 48 consecutive hours after being reported or known to be out of order, the utility shall refund to the customer the pro rata part of that month's charges for the period of days during which the telephone was out of order if the customer so requests. This refund may be accomplished by a credit on a subsequent bill for telephone service.

h. In the event of a catastrophe, as determined by the commission, the matter of refund and out of service as outlined above does not apply.

i. It shall be a minimum objective to so maintain the service that the average rate of customer trouble reports in an exchange is no greater than 14 per 100 telephones per month.

22.6(2) *Emergency operation.*

a. Each telephone utility shall make reasonable provisions to meet emergencies resulting from failures of lighting or power service, sudden and prolonged increases in traffic, illness of operators, or from fire, storm, or acts of God, and each telephone utility shall inform employees as to procedures to be followed in the event of emergency in order to prevent or mitigate interruption or impairment of telephone service.

b. It is essential that all central offices have adequate provision for emergency power. In offices without installed emergency power facilities, there shall be access to a mobile power unit which can be delivered on short notice.

c. In toll centers and in exchanges exceeding 10,000 terminals, it is essential that a permanent auxiliary power unit is installed.

22.7(490A) Safety.

22.7(1) *Protective measures.*

a. Each utility shall exercise reasonable care to reduce the hazards to which its employees, its customers and the general public may be subjected.

b. The utility shall give reasonable assistance to the commission in the investigation of the cause of accidents and in the determination of suitable means of preventing accidents.

c. Each utility shall maintain a summary of all reportable accidents arising from its operations.

22.7(2) *Safety program.* Each utility shall adopt and execute a safety program, fitted to the size and type of its operations. As a minimum, the safety program should:

a. Require employees to use suitable tools and equipment in order that they may perform their work in a safe manner.

b. Instruct employees in safe methods of performing their work.

c. Instruct employees who, in the course of their work, are subject to the hazard of electrical shock, asphyxiation or drowning, in accepted methods of artificial respiration.

CHAPTER 23
ANNUAL REPORT

23.1(490A) General information.

23.1(1) Every public utility is required to keep and render its books, accounts, papers and records accurately and faithfully in the manner and form prescribed by the commission and to comply with all directions of the commission relating to such books, accounts, papers and records.

23.1(2) In order that the commission may keep informed regarding the manner and method in which a utility business is conducted, and in order to obtain information on which to apportion the costs of operation of the utilities division of the commerce commission as prescribed by chapter 490A, all public utilities coming under the provision of chapter 490A of the Code, shall file with this commission, annual reports as hereinafter described in these rules, on or before April 1 of each year covering their operations during the immediately preceding calendar year. In the event that a utility has ceased operations through merger or sale of its plant during the calendar year, each of the involved utilities shall be responsible for filing an annual report with the commission which reflects the operations of the properties which were subject to such sale or merger. The annual report covering the portion of the calendar year operations to the date of sale or merger shall be filed with the commission within 90 days after such transaction.

23.1(3) All pages of the report must be completed and submitted to the commission. The words "none" or "not applicable" may be used to complete a schedule when they accurately and fully state the facts. The commission shall be notified of the nature, amount and purpose of any accounts used in addition to those prescribed in utilities division chapter 16, "Accounting". See 16.1(4), 16.2(4), 16.3(490A), 16.4(4), and 16.5(490A). A copy shall be retained in the respondent's file. All reports are to be prepared for and certified to the Iowa state commerce commission.

23.1(4) Annual report requirements specified in "Regulations Governing Service Supplied by Gas, Electric, Telephone, or Water Utilities", utilities division, chapters 19, 20, 21, and 22, shall be included with the annual reports set forth in the following paragraphs. The reporting utility should use their own format in preparing such reports.

23.2(490A) Annual report requirements—rate-regulated utilities. Two copies each of the following report forms must be completed and filed with the commission.

23.2(1) *Electric utilities.*

a. Class A & B—Form IE-1, Annual Report—Rate-Regulated Electric Utilities (including FPC Annual Report Form No.1).

b. Class C & D—Form IE-1, Annual Report—Rate-Regulated Electric Utilities (including FPC Annual Report Form No. 1F).

23.2(2) *Gas utilities.*

a. Class A & B—Form IG-1, Annual Report—Rate-Regulated Gas Utilities (including FPC Annual Report Form No. 2).

b. Class C & D—Form IG-1, Annual Report—Rate-Regulated Gas Utilities (including FPC Annual Report Form No. 2A).

23.2(3) *Telegraph utilities.* Form RTG-1, Annual Reports—Rate-Regulated Telegraph Utilities (including FCC Annual Report Form—R & O).

23.2(4) *Telephone utilities.* Form RRT-1, Annual Report—Rate-Regulated Telephone Utilities (including FCC Annual Report Form M).

23.2(5) *Water utilities.*

a. Class A & B—Form WA-1, Annual Report—Rate-Regulated Water Utilities.

b. Class C & D—Form WD-1, Annual Report—Rate-Regulated Water Utilities.

23.2(6) Reports by rate-regulated utilities which have multistate operations shall provide information concerning their Iowa operations on the schedules listed below. Such schedules shall be prepared using the same format used in reporting total company data and shall be clearly labeled "Iowa Operations" at the top of each schedule. It shall include:

a. Summary of utility plant and accumulated depreciation and amortization reserves.

b. Plant in service by primary account.

c. Materials and supplies.

d. Contributions in aid of construction.

e. Accumulated deferred income taxes.

f. Accumulated investment credit.

g. Statement of income for the year.

h. Operating revenues.

i. Operating and maintenance expenses.

j. Taxes charged during year.

Statements shall be included setting forth the method or basis used in making allocations between states.

23.2(7) In addition to the above-mentioned reports, the respondent shall also file with the commission, immediately upon publication, two copies of any financial, statistical or operational reviews or reports that a company may prepare for distribution to stockholders, bondholders or any other interested parties.

23.3(490A) Annual report requirements—nonrate-regulated utilities.

23.3(1) *Municipally owned electric.* Form ME-1, Annual Report—Municipal Electric Plant and Operations (including one copy of "Report of Utilities" prepared for the state auditor's office).

23.3(2) *Municipally owned gas utilities.* Form MG-1, Annual Report—Municipal Gas Plant and Operation (including one copy of "Report of Utilities" prepared for the state auditor's office).

23.3(3) *Nonrate-regulated telephone utilities.* Form NRT-1, Annual Report—Telephone Plant and Operations.

23.3(4) *Co-operative electric utility corporations or associations.* Form EC-1, Annual Report—Co-operative Electric Plant and Operations.

These rules are intended to implement sections 490A.2, 490A.9, 490A.10 and 490A.22 of the Code.

[Filed December 12, 1967]

COMPTROLLER, STATE

CHAPTER 1
AUDITING CLAIMS

All vouchers and claims required by law to be audited by the state comptroller should conform to the following rules:

1.1(8) All claims shall be typewritten, or written in ink, and be itemized and certified to by the claimant. Approval of the claim shall be certified thereon by the head of the department or his deputy, or chairman of the board or commission or its executive officer. Claims shall show in the space provided therefore reference to the appropriation or allocation from which the claim is payable.

1.2(8) Claims for personal property sold, or services rendered to the state, should have the original invoices attached whenever possible to do so.

1.3(8) Claims for personal property sold or services rendered to the state shall be deemed presented for payment when filed or received by the department whose approval thereof is required under 1.1(8) notwithstanding any delay by the department in forwarding same with its approval to the comptroller for payment.

1.4(8) When compensation is fixed on an annual or monthly basis and services rendered cover less than a full month, compensation is to be made on the basis of a 30-day month.

1.5(8) Officers and employees shall be allowed lodging and meal expenses when required to travel outside of the city or town of their residence or official domicile, but in no event shall the amount thereof exceed $15 per day in this state. The $15 per day limit includes:

1.5(1) *Lodging.* (Name of establishment where expense is incurred must be given and receipt submitted.)

1.5(2) *Meals.* Receipts may be required at the option of state comptroller.) If travel does not

require overnight lodging, meal allowance will be restricted as follows:

a. Those traveling on state business who depart prior to 7:00 a.m. and return after 6:00 p.m. to their official domicile, may be reimbursed a maximum of seven dollars per day for three meals.

b. Those traveling on state business who depart after 7:00 a.m. and return after 6:00 p.m. may be reimbursed a maximum of five dollars and 75 cents per day for lunch and dinner.

c. Those traveling on state business who depart before 7:00 a.m. and return before 6:00 p.m. may be reimbursed a maximum of three dollars and 25 cents for breakfast and lunch.

d. Those traveling on state business who depart after 7:00 a.m. and return before 6:00 p.m. may be reimbursed a maximum of two dollars for lunch.

1.5(3) *Sales tax on lodging and meals.* Lodging and meal expenses are not limited outside the state, but the expenditures should be reasonable. (Receipt for lodging to be submitted.)

This rule does not apply to elected officials, and the state comptroller may, at the request of a department head, grant other exceptions necessitated by unusual circumstances.

1.6(8) Officials and employees continuously employed at the seat of government or at an official domicile will not be allowed subsistence expense. Officers and employees whose residence is elsewhere than the official domicile will not be allowed any expense at such residence or for traveling between residence and official domicile.

1.7(8) The place of official domicile or residence should be shown on the claim in addition to the place where expense is incurred, the nature of employment, and by whom ordered.

1.8(8) Where an employee works at one place for one week or more, he shall be allowed expense for lodging at the weekly or monthly rate, receipt to be submitted.

1.9(8) Federal tax exemption certificates should be used in connection with the purchase of transportation, or on any article that has federal tax. Any payment of such tax will be deducted from claim.

1.10(8) The statutory allowance of ten cents per mile for use of private automobile in state business shall include all expense of the automobile.

1.11(8) The hire of special conveyance will be allowed only when no public or regular means of transportation are available, or when such public or regular means of transportation cannot be used advantageously, in which case receipt therefor should accompany claim, or its absence satisfactorily explained.

1.12(8) Telegraph or long distance telephone expense shall show that same was for official business, and between what points and parties. When calling or wiring a state officer or department, reverse charges.

1.13(8) All charges for necessary stenographic or typing service, rental of typewriter in connection with preparation of official reports or correspondence, clerical assistance, hire of conference room for state business and other expense should be charged under the heading "Miscellaneous" and will be allowed if approved by head of department, and if clearly, fully and satisfactorily explained and receipts for same are attached to claim. All parking and storage charges on state-owned vehicles will be paid when claim is accompanied by receipt. Registration fees away from the official domicile will be allowed when receipt is attached to claim. Registration fees at official domicile may be allowed with prior approval of state comptroller, and, if allowed, receipt must be attached to claim.

It is the duty of department heads and executive officers of boards and commissions to keep expenditures at the lowest reasonable amount in connection with expense incurred by reason of public service.

[Filed February 16, 1966;
amended February 9, 1971]

CONSERVATION COMMISSION

DIVISION OF FISH AND GAME

CHAPTER 1
GAME MANAGEMENT AREAS

1.1(109) Blinds and decoys. Blinds and decoys are prohibited on all game management areas, except Lake Odessa in Louisa County, between the hours of one-half hour after close of hunting time and midnight each day.

1.2(109) Lake Odessa in Louisa County.

[Special regulations, by temporary rule, shall be in effect for Lake Odessa.]

This rule is intended to implement section 109.6 of the Code.

[Filed August 12, 1970]

CHAPTER 2
GAME MANAGEMENT AREAS

2.1(109) Jurisdiction. All lands and waters under the jurisdiction of the Iowa conservation commission are established as game management areas under the provisions of section 109.6.

[Filed March 8, 1966]

CHAPTER 3
STATE GAME REFUGES

3.1(109) Unlawful restrictions. The following areas under the jurisdiction of the Iowa state conservation commission are established as game refuges where posted as such. It shall be unlawful to hunt, pursue, kill, trap or take any wild animal, bird or game on these areas at any time, and no one shall carry firearms thereon.

Area	County
Sweet Marsh	Bremer
Storm Lake Island	Buena Vista
Big Marsh	Butler
South Twin Lake	Calhoun
Round Lake	Clay
Allen Green Refuge	Des Moines
Ingham Lake	Emmet
Forney Lake	Fremont
Riverton Area	Fremont
Dunbar Slough	Greene
Bays Branch	Guthrie
McCord Pond	Guthrie
California Bend	Harrison
Hawkeye Wildlife Area	Johnson
Muskrat Slough	Jones
Colyn Area	Lucas
Red Rock Area	Marion
Louisville Bend	Monona
Five Island Lake	Palo Alto
Flint Access	Polk
Gifford Sanctuary	Pottawattamie
Smith Area	Pottawattamie
Lake View Area	Sac
Otter Creek Marsh	Tama
Rice Lake Refuge	Winnebago
Snyder Bend	Woodbury
Lake Cornelia	Wright

[Filed September 13, 1966]

CHAPTER 4
DOG RESTRICTIONS IN STATE AREAS

4.1(109) Where restricted. Dogs shall be prohibited on all state-owned game management areas, as established under authority of section 109.6, between the dates of March 15 and July 15 each year; except that, field and retreiver meets may be conducted at designated sites after first securing a permit as provided in section 109.22.

Such permit shall show the exact designated site of said meet and all dogs shall be confined to that site.

[Filed September 11, 1962]

CHAPTER 5
LEGAL RESIDENCY

5.1(109) Defined. The requirements for legal residence as referred to in chapter 110 of the Code insofar as it applies to the issuance of sport fishing, small game hunting, combined hunting and fishing, and trapping licenses are concerned shall be as follows: Any individual who has lived in the state continuously for a period of 30 days shall be considered a legal resident of the state for the purpose of purchasing a sport fishing, small game hunting, combined hunting and fishing, or trapping license.

[Filed December 13, 1962]

CHAPTER 6
SCUBA AND SKIN SPEARING OF ROUGH FISH

6.1(109) When permitted. The spearing of rough fish by scuba and skin divers will be permitted in accordance with the following seasons and rules.

6.2(109) Prohibited areas. Scuba and skin spearing for rough fish will be prohibited in all natural lakes in Iowa between May 1 and October 1 of each year, except on West Okoboji and Spirit Lakes, in Dickinson county, where no seasonal limitations will be invoked.

6.2(1) Scuba and skin spearing shall be permitted in all state-owned meandered streams.*

a. Des Moines River—From Mississippi River to west line of T-95N, R-32W, Palo Alto county, west branch, and north line of T-95N, R-29W, Kossuth county, east branch; a point near Algona.

b. Iowa River—From Mississippi River to west line T-81N, R-11W, Iowa county near Koszta.

c. Cedar River—From Iowa River to west line T-89N, R-13W, Black Hawk county, at Cedar Falls.

d. Raccoon River—From Des Moines River to west line Polk county.

e. Wapsipinicon River—From Mississippi River to west line T-89N, R-6W, above Central City in Linn county.

f. Maquoketa River—From Mississippi River to west line T-84N, R-3E, near Maquoketa in Jackson county.

g. Skunk River—From Mississippi River to north line T-73N, R-8W, northeast corner of Jefferson county.

h. Turkey River—From Mississippi River to west line T-95N, R-7W, Fayette county near Clermont.

*A meandered lake or stream is one which at the time of the original government survey was so surveyed as to mark, plat and compute acreage of adjacent fractional section.

i. Nishnabotna River—To north line T-67N, R-42W, Fremont county, northeast of Hamburg.

j. Upper Iowa River—From its mouth to west line Section 28-100-4 west, Allamakee county.

k. Little Maquoketa River—From Mississippi River to west line Section 25-90-2 east, Dubuque county.

6.2(2) Scuba and skin spearing shall be permitted in streams or impoundments on private land where access is permitted by owner or lessee.

6.2(3) Scuba and skin spearing is prohibited in all state-owned artificial lakes.

6.2(4) Scuba and skin spearing is prohibited in all state-owned strip mines, county conservation board areas and fish and game management areas where posted as such.

6.2(5) Scuba and skin spearing is prohibited within 100 feet of any swimming beach area.

6.2(6) Scuba and skin spearing of carp, buffalo, quillback, gar and dogfish only shall be lawful between the hours of sunrise and sunset each day.

6.2(7) A valid fishing license shall be required of all individuals engaged in scuba and skin spearing unless the individual is exempt under the provisions of section 110.17.

6.3(109) Permitted equipment. Permitted equipment to be used in scuba and skin spearing shall be:

1. Hand and pole spears.
2. Rubber band powered spear guns.
3. Spring powered spear guns.
4. Pneumatic spring powered spear guns.
5. All spears used on powered spear guns shall be attached to the gun by a cord lanyard or other device, the over-all length of spear gun and cord shall not exceed 20 feet.

6.4(109) Prohibited equipment. Prohibited equipment and methods shall be:

1. No power or exploding spear heads will be permitted.
2. No guns powered by gunpowder explosive or explosives or compressed gas will be permitted.
3. A spear gun may not be cocked or fired within 100 feet of any swimming beach area.
4. It shall be unlawful to cock or discharge a powered spear gun above the surface of the water.

6.5(109) Diver's flag. The "International Diver's Flag" (a red flag with a white diagonal stripe running from the upper left-hand corner to the lower right-hand corner, minimum size, 12" x 15", with a 3" stripe), shall be displayed by each diver or group of divers on a buoy, float or boat during any diving or underwater spear fishing activity. This diving flag shall be displayed on the water only when underwater diving activity is in progress, the diver or group of divers must stay within a 100-foot circle of the flag. Recognition of this flag by law will not be construed as conferring any rights or privileges on its users nor be construed as restricting the use of the water so marked. Operators of boats shall exercise precaution commensurate with conditions indicated.

6.6(109) Employees exempt. Underwater scuba and skin spearing regulations shall not apply to authorized agents of the state conservation commission when engaged in research or management studies or enforcement.

[Filed March 8, 1966]

CHAPTER 7
OPEN WATER REFUGES

7.1(109) Zone. Hunting on the following natural lakes is restricted to a zone extending 50 yards into the lake from the ordinary high-water mark or continuous emergent vegetation. Beyond this zone is a wildlife refuge.

County	Area
Buena Vista	Storm Lake
Calhoun	North Twin Lake
Cerro Gordo	Clear Lake
Dickinson	East Okoboji, Minnewashta, Upper and Lower Gar Lakes
Dickinson	Spirit Lake
Dickinson	West Okoboji Lake
Dickinson	Silver Lake
Emmet	High Lake
Emmet	Ingham Lake
Emmet	Tuttle Lake
Palo Alto	Lost Island Lake
Palo Alto	Silver Lake
Palo Alto	Virgin Lake
Pottawattamie	Lake Manawa
Sac	Black Hawk Lake

[Filed October 25, 1962]

CHAPTER 8
USE OF FIREARMS

8.1(109) Banner Mine Area. The use of firearms in the Banner Mine Area, a game management area in Warren county, Iowa, shall be restricted as follows:

Between the dates of March 1 to August 31 of each year the use of firearms on any portion of the Banner Mine Area, except the posted firing areas, is prohibited.

[Filed July 13, 1965]

CHAPTER 9
MOTOR VEHICLE RESTRICTIONS

9.1(109) Game management areas. The use of motor vehicles in all designated fish and game areas shall be restricted as follows:

Motor vehicles shall be restricted from all designated fish and game management areas except on constructed or designated roads and parking lots within these areas.

9.2(109) Employees exempt. This shall not apply to personnel of the state conservation commission and authorized persons engaged in research, management or enforcement.

[Filed September 14, 1965]

CHAPTER 10
MARKING OF WATERFOWL

10.1(110A) Marked for shooting. All waterfowl released for shooting purposes shall be physically marked by removal of the hind toe from the right foot at not more than four weeks of age.

[Filed August 23, 1967]

CHAPTER 11
PROMISCUOUS FISHING

11.1(109) General. The conservation commission may, after an investigation, when it is found there is imminent danger of loss of fish through natural causes, authorize by public order the taking of fish from any area and by such means as they may deem advisable to salvage such imperiled fish populations.

11.1(1) *Method of take.* Fish may be taken by any means except by use of dynamite, poison, electric shocking devices or any stupefying substances.

11.1(2) *Commercial purposes.* This rule shall not authorize the taking of fish for commercial purposes.

[Filed September 20, 1968]

CHAPTER 12
MUSSELS—METHODS AND SEASONS

12.1(109) Commercial taking. Mussels may be taken, for commercial purposes, from the public waters of the state subject to the following regulations.

12.1(1) *Seasons.*

a. Mississippi river. Entire length—April 15 to September 30 of each year.

b. Remainder of state. June 15 to November 30 of each year.

12.1(2) *Methods*

a. Crowfoot bar designed to catch mussels by the insertion of hooks between the shells of the mussels. Such bar not to exceed 20 feet in length.

b. By hand.

This rule is intended to implement sections 109.39 and 109.100 of the Code.

[Filed June 9, 1970]

CHAPTERS 13 to 25
Reserved for future use

DIVISION OF LANDS AND WATERS

CHAPTER 26
SPECIAL WATER ACTIVITY RULES—GREEN VALLEY LAKE, UNION COUNTY

26.1(106) For experimental purposes as provided in Chapter 1060, Acts of the Sixty-third General Assembly, the boat-type and the motor horsepower restrictions, as provided in chapter 106 of the Code and subrules 30.1(1) and 30.1(2), do not apply to Green Valley Lake from June 1 to September 10 each year, and the following rules shall be placed in lieu thereof during these periods.

26.2(106) No inboard boats permitted.

26.3(106) No racing-type craft permitted.

26.4(106) For the purposes of this Act, a wake means "any appreciable movement of water created by a motorboat which adversely affects the activity of another person or persons who are involved in activities approved for that area or which may adversely affect the natural features of the shoreline of the lake."

26.5(106) All boats must maintain a no-wake speed on the entire lake between the hours of sunset and 10:30 p.m., also between 4:00 a.m. and 10:00 a.m.

26.6(106) No boating is permitted on the lake between the hours of 10:30 p.m. and 4:00 a.m.

26.7(106) A portion of the west arm of Green Valley Lake shall be designated as a ski zone and shall be marked by controlled area buoys as designated by Iowa's Uniform Waterway Marking System. This designated area shall be referred to as the "ski zone."

26.7(1) Water skiing and general boating are permitted in the designated ski zone between 10:00 a.m. and sunset.

26.7(2) All boats must maintain a no-wake speed when outside the ski zone between the hours of 10:00 a.m. and sunset.

26.8(106) In the ski zone all boats must keep to the right of the "Center of the Channel" buoys which shall be identified by their black and white stripe design as designated by Iowa's Uniform Waterway Marking System.

26.9(106) No one shall be permitted in the water in the ski zone except those persons engaged in water skiing or similar activity.

26.10(106) No person shall be in the water outside the ski zone except in the designated beach area and in accordance with the park rules.

26.11(106) All boats in the ski zone not engaged in water skiing or similar activity shall keep out of the general traffic pattern of the boats pulling skiers.

26.12(106) All persons engaged in water skiing, including the use of surfboard-type devices, shall wear a coast guard approved lifesaving device.

26.13(106) In the ski zone no boat shall be operated at speeds greater than five miles per hour when within 50 feet of another craft or person.

26.14(106) No boat shall be operated within 100 feet of shore at speeds greater than five miles per hour.

26.15(106) Between the dates of September 11 and May 31 no motorboats of any type will be permitted on Green Valley Lake except displacement-type craft equipped with outboard motors not to exceed six horsepower shall be permitted and all departmental rules regulating boating on artificial lakes over 100 acres in size shall apply to Green Valley Lake.

This rule is intended to implement section 106.31 of the Code.

[Filed July 14, 1970;
amended February 10, 1971]

CHAPTER 27
SAFETY EQUIPMENT

27.1(106) The number and type of fire extinguishers required for motorboats within the state of Iowa are as follows:

27.1(1) *Fire extinguishers.* Fire extinguishers shall be a coast guard approved type as identified in the coast guard publication equipment list (CG-190) by manufacturer's model, number and size, or type bearing the labeling "marine type" by the Underwriter's Laboratories, Inc., which are coast guard approved as per Federal Register 5, November, 1960.

27.1(2) *Approved fire extinguishers.* Each fire extinguisher is classified, by letter and number, according to the type of fire it may be expected to extinguish, and the size of the extinguisher. The letter indicates the type of fire ("A" for fires in ordinary combustible materials; "B" for gasoline, oil and grease fires). Extinguishers approved for motorboats are hand-portable, of either B-I or B-II classification.

Classification (type-size)	Foam (minimum gallons)	Carbon Dioxide (minimum pounds)	Dry Chemical (minimum pounds)
B-I.....	1¼	4	2
B-II.....	2½	15	10

The number of approved extinguishers required depends upon the class (or length) of the motorboat. One B-II extinguisher may be substituted for two B-I extinguishers. When the engine compartment of the motorboat is equipped with a fixed (built-in) extinguishing system of an approved type, one less B-I extinguisher is required.

27.1(3) *Fire extinguishers required.*

Class of motorboat	Without fixed Fire extinguisher system in machinery space	With fixed Fire extinguisher system in machinery space
I (less than 16 ft.)	1 B-I	None
II (16 ft. to under 26 ft.)	1 B-I	None
III (26 ft. to under 40 ft.)	2 B-I or 1 B-II	1 B-I
IV (40 ft. to 65 ft.)	3 B-I or 1 B-II and 1 B-I	2 B-I or 1 B-II

27.2-27.5 Reserved for future use.

27.6(106) Lights on vessels generally. Any vessels on the waters of the state under the jurisdiction of the state conservation commission, while inhabited at anchor or underway and of a class of vessel not requiring special lights for operating while underway between the hours of sunset and sunrise, shall exhibit a white or amber light which shows all around the horizon between the hours of sunset and sunrise.

27.7(106) White lights for sailboats. Vessels of class I, II, III, and IV, propelled by sail alone between sunset and sunrise shall exhibit in addition to the combined lantern or separate side lights, a white light so placed as to illuminate the sail and be visible at a distance of at least one-half mile.

27.8-27.12 Reserved for future use.

27.13(106) Buoyant safety equipment. Life preservers, life belts, ring buoys or similar devices shall be coast guard approved.

[Filed December 19, 1961; amended
May 15, 1962, March 17, 1967]

CHAPTER 28
REGISTRATION AND NUMBERING

28.1(106) Emblem placed. The registration emblem will be placed four inches toward the stern of the registration number on each side of the bow of the vessel. On the port side the emblem will be four inches behind the registration number, and on the starboard side four inches in front of the registration number.

All newly registered boats or boats with renewed registrations will receive emblems with the registration certificate.

28.2-28.5 Reserved for future use.

28.6(106) Procedure for application of boat registration number—content. The following information shall be furnished, required and stated in the application for number.

1. Name and address of owner.
2. Present number (if any).
3. Hull material (wood, steel, aluminum, plastic, other).
4. Type of propulsion (outboard, inboard, other).

5. Length and width of boat.
6. Make and year built (if known).
7. Statement as to use.
8. Signature.
9. Does the boat have a marine toilet (Yes..... No.....).
10. From whom purchased (name and address).

28.7–28.9 Reserved for future use.

28.10(106) Information on certificate. The certificate of number shall show the following:

1. Name and address of boat owner.
2. Number issued.
3. Expiration date.
4. Make, or model, or type of boat.
5. Hull material (wood, steel, aluminum, plastic, other).
6. Length of vessel.
7. Propulsion (inboard, outboard, other).
8. Maximum capacity rating (number of persons).

28.11–28.14 Reserved for future use.

28.15(106) Numbering pattern to be used.

28.15(1) *Identification number.* The identification numbers awarded under the Iowa system shall consist of three parts. The first part shall consist of the letters "IA" indicating this state. The second part shall consist of not more than four Arabic numerals. The third part shall consist of not more than two letters.

28.15(2) *Example.* The parts shall be separated by a hyphen or an equivalent space. As example:

IA-2500-C IA-9875-EA IA 7560 ZZ

28.15(3) *Unusable letters.* Since the letters "I", "O", and "Q" may be mistaken for Arabic numerals, they shall not be used in the suffix.

28.16–28.18 Reserved for future use.

28.19(106) Display of number on vessel, as to size, block type and contrasting color.

28.19(1) *Application of number.* The identification number awarded to any vessel under the Iowa numbering system shall be displayed thereon by being:

a. Painted on, or attached to, each side of the bow (i.e., the forward half) of the vessel; read from left to right, and in such position as to provide maximum visibility.

b. In block characters of good proportion not less than three inches in height.

c. Of a color which will contrast with the color of the background (i.e., dark numbers on a light background, or light numbers on a dark background) and so maintained as to be clearly visible and legible.

28.19(2) *Restriction.* No other number shall be carried on the bow of the vessel.

28.19(3) *Purchase of number.* Purchase and attachment of these letters and number is the responsibility of the boat owner.

28.20–28.24 Reserved for future use.

28.25(106) Number designating passenger capacity. The passenger capacity of boats as assigned by the commission shall be painted or attached to the starboard side (the right side while in boat and facing the bow) of boat within nine inches of transom in three-inch or larger block numbers in a color contrasting to the boat color so that the numbers ride above the water line when boat is fully loaded.

28.26–28.29 Reserved for future use.

28.30(106) Boats for hire. Each commercial boat operator will be required to number the boat or boats he wishes to operate for hire with block characters of good proportion not less than three inches in height, in the following manner.

Upon making application for a number for commercially operated vessels the following type number will be assigned:

Example IA-1555-E

To identify this vessel as a commercial vessel it will be required that the commercial operator affix an X as the final letter of the suffix:

Example IA-1555-EX

When a commercial operator transfers a vessel to another individual, unless it be to another commercial operator, it will be his responsibility to remove the second letter from the suffix. (The letter X).

Transferred to	
Commercial	*Private Individual*
IA-1555-XX	IA-1555-X
IA-1555-EX	IA-1555-E

Transferred to	
Private	*Commercial Operator*
IA-1555-A	IA-1555-AX
IA-1555-D	IA-1555-DX

[Filed August 16, 1962; amended April 8, 1963, September 13, 1966]

CHAPTER 29
PASSENGER CAPACITY

29.1(106) Regulations on boat capacities. All motorboats of conventional construction under eight and one-half feet in length are considered one passenger capacity crafts, eight and one-half to ten feet in length and 48 inches and over in width are considered two-passenger capacity crafts.

For all motorboats of conventional design between 16½ feet and 25½ feet the following chart is used for determining passenger capacities. Motorboats above 25½ feet are considered on an individual basis.

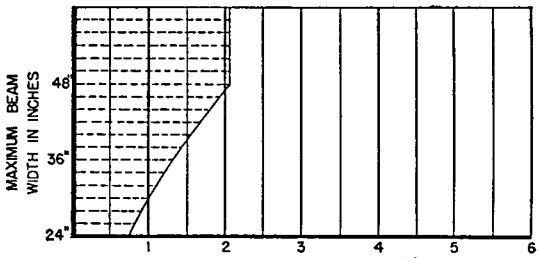
Length	*Width*	*Passenger Capacity*
16′6″-17′6″	64″+	7
17′6″-18′6″	68″+	8
18′6″-19′6″	72″+	9
19′6″-20′6″	76″+	10
20′6″-21′6″	80″+	11
21′6″-22′6″	84″+	12
22′6″-23′6″	88″+	13
23′6″-24′6″	92″+	14
24′6″-25′6″	96″+	15

Pontoon boats will be figured on the basis of 15 square feet of deck space per passenger capacity.

Houseboats are to be figured on the basis of 25 square feet of deck space per passenger capacity.

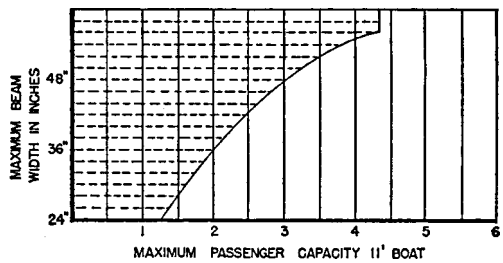
In the loading of boats where children are passengers, the last adult may be substituted by two children if their total combined weight is less than 160 pounds, this special regulation not to alter the assigned passenger capacity of the vessel.

The following charts will be used in determining passenger capacities of motorboats of conventional design between ten feet and 16 ½ feet in length,

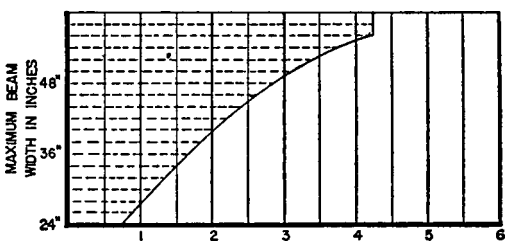


MAXIMUM PASSENGER CAPACITY 10' BOAT
BASE WEIGHT 150 LBS. INCLUDES MOTOR & MISC. GEAR

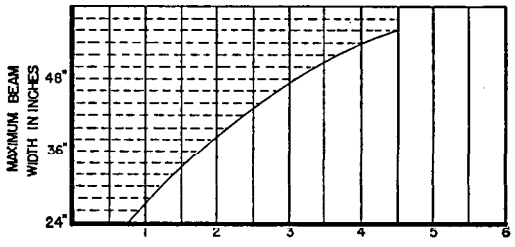
with two clarifications—(1) should the passenger capacity result in a fraction less than one-half, the next lower passenger capacity figure shall apply and (2) should the passenger capacity result in a fraction over one-half, the next highest passenger capacity figure shall apply:



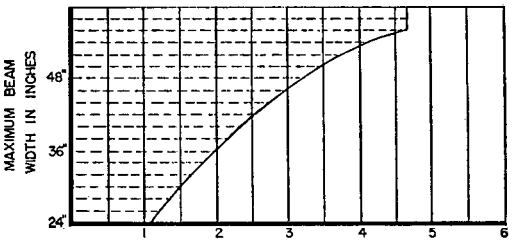
MAXIMUM PASSENGER CAPACITY 11' BOAT
BASE WEIGHT 185 LBS. INCLUDES MOTOR & MISC. GEAR



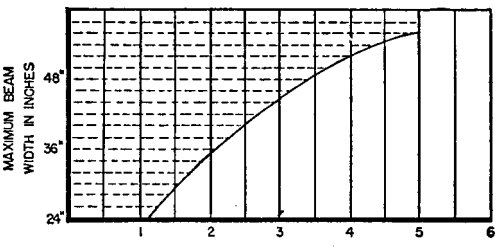
MAXIMUM PASSENGER CAPACITY 12' BOAT
BASE WEIGHT 225 LBS. INCLUDES MOTOR & MISC. GEAR



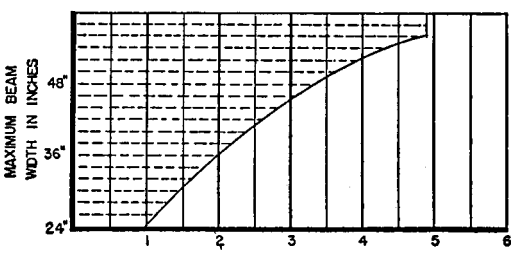
MAXIMUM PASSENGER CAPACITY 12½' BOAT
BASE WEIGHT 225 LBS. INCLUDES MOTOR & MISC. GEAR



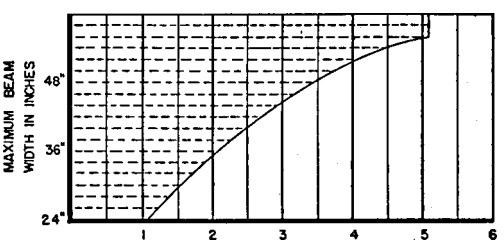
MAXIMUM PASSENGER CAPACITY 13' BOAT
BASE WEIGHT 225 LBS. INCLUDES MOTOR & MISC. GEAR



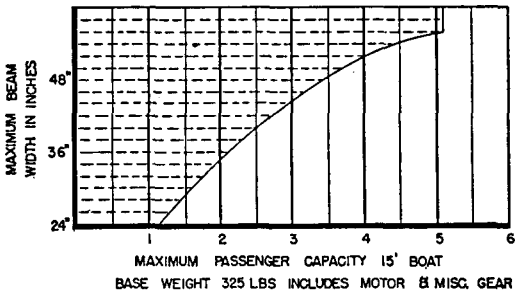
MAXIMUM PASSENGER CAPACITY 13½' BOAT
BASE WEIGHT 225 LBS. INCLUDES MOTOR & MISC. GEAR

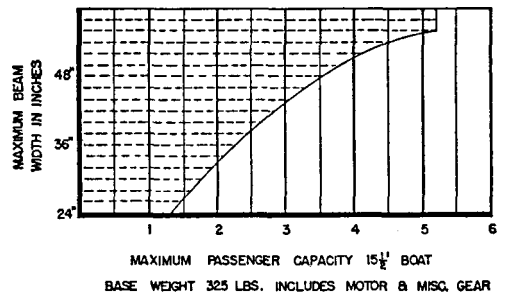


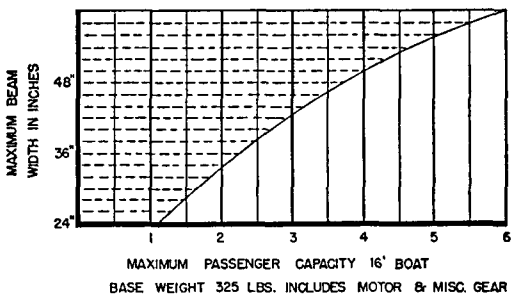
MAXIMUM PASSENGER CAPACITY 14' BOAT
BASE WEIGHT 275 LBS. INCLUDES MOTOR & MISC. GEAR



MAXIMUM PASSENGER CAPACITY 14½' BOAT
BASE WEIGHT 275 LBS. INCLUDES MOTOR & MISC. GEAR







Passenger capacities of canoes for hire shall be limited to two passengers per canoe.

Passenger capacities of canoes used with motors on waters of the state under the jurisdiction of the state conservation commission are as follows:

Canoe Length in Feet	*Passenger Limit*
14 feet to 16 feet	2 passenger
16 feet to 19 feet	3 passenger
19 feet and over	4 passenger

Special motor driven canoes will be considered on an individual basis.

Passenger capacities of paddle propelled canoes on all state-owned artificial lakes shall be as follows:

Canoe Length in Feet	*Passenger Limit*
Under 16 feet	2 passenger
16 feet to 18 feet	4 passenger
Over 18 feet	To be determined on an individual basis.

[Filed December 19, 1961; amended May 15, 1962]

CHAPTER 30
SPEED AND DISTANCE—ZONING

30.1(106) Where restricted. All waters under the jurisdiction of the state conservation commission.

30.1(1) No motorboat shall be operated at speeds greater than five miles per hour when within 250 feet of another craft traveling at five miles per hour or less.

30.1(2) Motorboats shall maintain a minimum passing or meeting distance of 50 feet when both boats are traveling at speeds greater than five miles per hour.

30.2–30.5 Reserved for future use.

30.6(106) Lakes and impoundments. All lakes and federal impoundments under the jurisdiction of the state conservation commission, except Lake Odessa in Louisa county, Iowa.

30.6(1) No motorboat shall be operated at a speed exceeding five miles per hour unless vision is unobstructed at 300 feet ahead.

30.6(2) No motorboat shall be operated within 300 feet of the shore at a speed greater than ten miles per hour.

30.7–30.10 Reserved for future use.

30.11(106) Lake Odessa in Louisa county.

30.11(1) No motorboat shall be operated at a speed exceeding five miles per hour unless vision is unobstructed at 300 feet ahead.

30.11(2) No motorboat shall be operated at a speed greater than ten miles per hour between April 1 and October 1 yearly, except that portion of Lake Odessa proper lying south of the south line of Section 17 and west and north from the east side of the Sand Run Public Access Area in Section 33, all in Township 74 North, Range 2 West of the 5th P.M.

30.12–30.15 Reserved for future use.

30.16(106) A safety zone is hereby established in Iowa waters above and below all navigation lock and dam structures on the Mississippi river between the Iowa-Minnesota border and the Iowa-Missouri border. The established zone shall be 600 feet upstream and 100 feet downstream from the roller gate or tainter gate section of the structure.

30.16(1) The safety zone does not include the area directly above and below the navigation lock or the auxiliary lock structure.

30.16(2) The safety zone does not include the area directly above and below the solid fill portion of the dam and structure.

30.16(3) The safety zone shall be recognized by the state of Iowa only when plainly marked in accordance with the uniform marking system, as adopted by the state of Iowa, including buoys placed at the outer limits of the restricted safety zone 600 feet above and 100 feet below the structure as described in 30.16(106).

30.16(4) No boat or vessel of any type shall enter the established safety zone as recognized by the state of Iowa as described in 30.16(3).

30.17-30.20 Reserved for future use.

30.21(106) Joyce Slough Area. The Joyce Slough Area, a portion of the Mississippi river within the city of Clinton, Iowa, is hereby zoned to be a harbor area and vessels traveling therein shall not travel at speeds in excess of five miles per hour.

30.22-30.25 Reserved for future use.

30.26(106) Massey Slough. Operation of vessels in Massey Slough of the Mississippi river at Massey Station, Dubuque county, Iowa, extending from a northerly to southerly direction from the upper end to the lower end of the slough, encompassing the water in Section 14, Township 88N, Range 3E, of the 5th P.M., tract number NFIA-26M.

30.26(1) Water recreation activities as restricted within posted areas which are marked with approval buoys shall be obeyed.

30.26(2) Buoys approved by the Dubuque county conservation board shall be those of a system adopted by the state conservation commission on a state-wide uniform basis.

30.26(3) All boating accidents shall be reported to the river patrol office in addition to the state conservation commission as prescribed by the Code of Iowa.

30.26(4) All boats underway must maintain a speed of less than five miles per hour in said waters.

30.26(5) Subrule 30.1(1) which reads "No motorboat shall be operated at speeds greater than five miles per hour when within 250 feet of another craft traveling at five MPH or less" is hereby waived in this particular zoned area.

30.27-30.30 Reserved for future use.

30.31(106) Mitchell county waters. Operation of vessels in Mitchell county on the following impounded waters:

Cedar river from Mitchell Dam, thence upriver to the County "S" Bridge.

Cedar river from the St. Ansgar Mill Dam, thence upriver to the Newberg Bridge crossing Highway 105.

Cedar river from the Otranto Dam upriver to the Great Western Railway Bridge crossing the Cedar river.

The Stacyville Pool, on the Little Cedar river at Stacyville, Iowa.

30.31(1) Water recreation activities as restricted within posted areas which are marked with approved buoys shall be obeyed.

30.31(2) No floating docks, buoys, or manmade obstructions shall be placed in water without approval of the Mitchell county sheriff.

30.31(3) Buoys approved by the Mitchell county sheriff's office shall be those of a system adopted by the state conservation commission on a state-wide uniform basis.

30.31(4) Swimming in areas other than posted areas approved by the Mitchell county sheriff must be within 25 feet of shore.

30.31(5) All boats underway must maintain a speed less than five miles per hour if within 50 feet of a moored fishing craft in use.

30.31(6) Boating operation at speeds in excess of ten miles per hour shall not take place prior to 9:00 a.m. and after 6:00 p.m. each day.

30.31(7) The towing of more than one skier by a single boat shall be at the option of the water safety patrol and the determination of the patrol shall be based upon water congestion and safety of operations.

30.31(8) All boating accidents shall be reported to the river patrol office in addition to reporting the accident to the state conservation commission.

30.31(9) All water skiers required to wear life jackets, life belts or preservers.

30.31(10) Any finding or establishment of areas by the Mitchell county sheriff under 30.31(1) to 30.31(3) shall be created by petition of interested persons or adjoining landowners filed with Mitchell county sheriff, who shall establish or disallow same within ten days, by written notice of such petitioners. Any party aggrieved by such findings may appeal such determination to the Mitchell county board of supervisors by written notice within ten days of such findings and a hearing shall be held thereon before such board within 30 days thereafter. The decision of such board shall be final and binding.

30.31(11) Subrule 30.1(1) which reads "No motorboat shall be operated at speeds greater than five miles per hour when within 250 feet of another craft traveling at five miles per hour or less" is hereby waived in this particular zoned area.

30.32-30.36 Reserved for future use.

30.37(106) Maquoketa river. Operation of vessels on the impoundment of the Maquoketa river in Delaware county, Iowa, extending westerly and northerly from the line between Sections 29 and 30 in Delhi township in said county, to the line between Sections 10 and 15 in Milo township in said county which impoundment is sometimes known and referred to as Hartwick Lake or Lake Delhi.

30.37(1) Water recreation activity restrictions shall be obeyed, including restrictions within posted areas which are marked with approved buoys.

30,37(2) No dock or obstruction of any nature shall be placed in the water without first obtaining a permit from the conservation commission.

30.37(3) Application for dock permits and buoy permits shall be made on forms provided by the conservation commission for that purpose.

30.37(4) Reserved for future use.

30.37(5) Every dock or structure shall be constructed and maintained in accordance with the requirements on the permit issued by the conservation commission and shall be removed from the water on or before December 15 of each year.

30.37(6) All buoys shall be those of a system adopted by the state conservation commission and shall be constructed, placed and maintained in accordance with chapter 106 of the Code, and the applicable rules of the conservation commission.

30.37(7) Swimming or wading shall be restricted to an area within 25 feet of shore except in special areas approved by the conservation commission and marked by approved buoys.

30.37(8) No motorboat shall be operated at speeds greater than ten miles per hour at any time between the hours from one hour after sunset to one hour before sunrise.

30.37(9) No motorboat shall be operated at a speed which will create appreciable wake or roll when within 50 feet of an occupied craft at anchor or traveling at a no-wake speed.

30.37(10) Boating accidents shall be reported as required in section 106.7 and the applicable departmental rule.

30.37(11) All water skiers shall wear a life belt or life jacket.

30.37(12) Subrule 30.1(1) shall not apply to this area, as described in 30.37(106).

30.38-30.42 Reserved for future use.

30.43(106) Zoning of off-channel waters of the Wapsipinicon river in Pinicon Ridge Park in Linn county. No motorboat shall be operated at a speed which will create a wake within the zoned area designated by regulatory buoys or signs on the off-channel waters of the Wapsipinicon river above the dam at Central City, Linn county, Iowa.

The zoned area will be the off-channel waters created in and adjacent to the developed recreation areas of the Pinicon Ridge Park on the west and south bank of the Wapsipinicon river above the dam at Central City, Linn county.

30.44-30.47 Reserved for future use.

30.48(106) Speed restrictions on Lake Manawa. No motorboat shall be operated at a speed greater than five miles per hour within the zoned area, designated by regulatory buoys, on Lake Manawa in Pottawattamie county, Iowa.

30.48(1) Zoned Area 1—South and east of a line from the end of the area known as "Tin Can Dike" to the southern tip of the Les Peterson property on the east shore.

30.48(2) Zoned Area 2—South and west of a line from the south end of the Eleventh Street dike to the north end point of the area known as "Boy Scout Island".

30.48(3) Zoned Area 3—North and east of a line from a point 300 yards north of the entrance to the lagoon known as the "Novak Lagoon" to the existing bench mark in the west parking area of North Park.

30.48(4) Zoned Area 4—North and west of a line from the north end of the public boat ramps in North Park to the building known as the "Neal Durick boathouse" on the northeast shore.

30.49-30.53 Reserved for future use.

30.54(106) Zoning of Little Wall Lake. No motorboat shall be operated at a speed which will create a wake within the zoned area designated by regulatory buoys on Little Wall Lake in Hamilton county.

The zoned area will not exceed approximately 20 acres in the northeast portion of the lake identified by a line from a point on the high-water mark approximately 296.6 feet west of the southeast corner of the southwest quarter of Section 10, Township 86 North, Range 24 West; thence northwest to the high-water mark which is 775 feet south and 319 feet west of the northeast corner of the northwest quarter southwest quarter of Section 10, Township 86 North, Range 24 West.

[Filed December 19, 1961; amended July 23, 1962, January 14, 1964, March 24, 1964, September 14, 1965, January 11, 1966, September 13, 1966, December 13, 1967, July 16, 1968, August 14, 1968]

CHAPTER 31
NAVIGATION AIDS

31.1(106) Definitions.

31.1(1) *Waterway marker* is any device designed to be placed in, on, or near the water to convey an official message to a boat operator on matters which may affect health, safety, or well being, except that such devices of the U.S. or any agency of the United States are excluded from the meaning of this definition.

31.1(2) *Regulatory marker* is a waterway marker which has no equivalent in the U.S. Coast Guard system of navigational aids.

31.1(3) *State aid to navigation* is a waterway marker which is the equivalent of a U. S. Coast Guard aid to navigation.

31.1(4) *Buoy* is any device designed to float which is anchored in the water and which is used to convey a message.

31.1(5) *Sign* is any device for carrying a message which is attached to another object such as a piling, buoy, structure or the land itself.

31.1(6) *A display area* is the area on a sign or buoy needed for display of a waterway marker symbol.

31.1(7) *Symbols* are geometric figures such as a diamond, circle, rectangle, etc., used to convey a basic message.

31.2(106) Waterway markers. Waterway markers used on the waters of this state shall be as follows:

31.2(1) *State aids to navigation.*

a. A red-topped white buoy, red buoy or sign shall indicate that side of a channel to be kept to the right of a vessel when entering the channel from the main water body or when proceeding upstream.

b. A black-topped white buoy, black buoy or sign shall indicate that side of a channel to be kept to the left of a vessel when entering the channel from the main water body or when proceeding upstream.

c. A black and white vertically striped buoy or sign shall indicate the center of a navigable waterway.

d. Buoys or signs in "*a*" and "*b*" above shall normally be used in pairs and only for the purpose of marking a clearly defined channel.

e. A red and white vertically striped buoy or sign shall indicate boats should not pass between buoy and nearest shore.

f. State aids to navigation shall be numbered or lettered for identification. Red buoys and signs marking channels shall be identified with even numbers, and black buoys and signs marking channels shall be identified with odd numbers, the numbers increasing from the main water body or proceeding upstream. Buoys and signs indicating the center of a waterway will be identified by letters of the alphabet. All numbers and letters used to identify state aids to navigation shall be preceded by the letters "IA".

g. Letters and numerals used with state aids to navigation shall be white, in block characters of good proportion and spaced in a manner which will provide maximum legibility. Such letters and numerals shall be at least six inches in height.

h. The shapes of state aids to navigation shall be compatible with the shapes established by U. S. Coast Guard regulations for the equivalent U. S. Coast Guard aids to navigation.

i. Where reflectorized materials are used, a red reflector will be used on a red buoy, and a green reflector on a black buoy.

31.2(2) *Regulatory markers.*

a. A diamond shape of international orange with white center shall indicate danger. The nature of the danger may be indicated by words or well-known abbreviations in black letters inside the diamond shape, or above or below it, or both, on white background.

b. A diamond shape of international orange with a cross of the same color within it against a white center without qualifying explanation shall indicate a zone from which all vessels are excluded.

c. A circle of international orange with white center will indicate a control or restriction. The nature of the control or restriction shall be indicated by words, numerals, or well-known abbreviations in black letters inside the circle. Additional explanation may be given above or below it in black letters on white background.

d. A rectangular shape of international orange with white center will indicate information, other than a danger, control or restriction, which may contribute to health, safety or well being. The message will be presented within the rectangle in black letters.

e. Letters or numerals used with regulatory markers shall be black, in block characters of good proportion, spaced in a manner which will provide maximum legibility, and of a size which will provide the necessary degree of visibility.

31.3(106) Authority to place markers.

31.3(1) No waterway marker shall be placed on, in or near the waters of the state unless such placement is authorized by the agency or political subdivision of the state exercising jurisdiction, with respect to regulation of boating, over the area where placed, except that the provisions of this section shall not apply to private aids to navigation under the jurisdiction of the U. S. Coast Guard.

31.3(2) Such agency or political subdivision of the state will, prior to authorizing placement, obtain the necessary clearances of federal and state agencies exercising regulatory authority over the area concerned.

31.3(3) The agency or political subdivision of the state authorizing the placement of a waterway marker will inform the state conservation commission of the following:

a. Exact location of the marker, expressed in distance and direction from one or more fixed objects whose precise location is known.

b. The description and purpose of the marker including its identifying number, if any.

31.4(106) Maintenance of waterway markers. Waterway markers will be maintained in proper condition, or be replaced or removed.

31.5, 31.6 Reserved for future use.

31.7(106) Display of waterway markers.

31.7(1) A waterway marker may be displayed as a sign or a fixed support, as a buoy bearing a symbol on its surface, or as a sign mounted on a buoy.

31.7(2) When a buoy is used to carry a symbol on its surface, it will be white, with bands of international orange on the top, and at the bottom above the water line.

31.7(3) A buoy whose sole purpose is to carry a sign above it will be marked with three bands of international orange alternating with two

bands of white, each band occupying approximately one-fifth of the total area of the buoy above the water line, except where the sign itself carries orange bands; however, nothing in these rules shall be construed to prohibit the mounting of a sign on a buoy which has been placed for a purpose other than that of carrying a sign.

31.7(4) When symbols are placed on signs, a suitable white background may be used outside the symbol.

31.8(106) Specifications for waterway markers.

31.8(1) The size of a display area shall be as required by circumstances, except that no display area shall be smaller than one foot in height. The size shall increase in increments of six inches; provided, however, that this specification for increase in increments shall not apply to markers in existence prior to the adoption of this rule.

31.8(2) The thickness of the symbol outline shall be one-tenth of the height of the display area.

31.8(3) The outside width of the diamond, the inner diameter of the circle, and the average of the inside and outside widths of a square shall be two-thirds of the display area height.

31.8(4) The sides of the diamond shall slope at a 35 degree angle from the vertical on a plane surface. Appropriate adjustments for curvature may be made when applied to a cylindrical surface.

31.8(5) *Materials.* Waterway markers shall be made of materials which will retain, despite weather and other exposures, the characteristics essential to their basic significance, such as color, shape, legibility and position. Reflectorized materials may be used.

31.9(106) Waterway marking devices. All waters under the jurisdiction of the state conservation commission.

31.9(1) Mooring buoys shall be white with a two-inch blue reflectorized band clearly visible above the water; the buoy shall extend a minimum of 12 inches above the surface of the water, and shall have at least one square foot of surface visible from any direction.

31.9(2) Placement of mooring buoys shall be within 250 feet of shore, except under certain circumstances the commission may require them to be placed at a lesser distance. Requirements for mooring buoys may be waived by the director under special circumstances.

31.9(3) Permanent race course marker buoys shall be white with a ball of international orange, of at least 12 inches in diameter. The buoy shall extend a minimum of two feet above the surface of the water and shall be at least 16 inches in diameter, and shall be lighted during periods of low visibility, and during the hours of darkness.

31.9(4) Markers such as mooring buoys and race course markers will be processed in the same manner as waterway markers, and authorization for their placement will be obtained from the agency or political subdivision of the state exercising jurisdiction with respect to regulation of boating, and such agency or political subdivision will assure that proper clearances for their placement are obtained from state and federal agencies exercising regulatory authority over the area concerned.

31.9(5) Such markers shall not be of a color, shape, configuration or marking which could result in their confusion with any federal or state aid to navigation or any state regulatory marker, and shall not be placed where they will obstruct navigation, cause confusion or constitute a hazard.

31.10(106) The diver's flag.

31.10(1) A red flag with a white diagonal running from the upper left hand corner to the lower right hand corner (from mast head to lower outside corner) and known as the "diver's flag" shall, when displayed on the water, indicate the presence of a diver in the water in the immediate area.

31.10(2) Recognition of this flag by regulation will not be construed as conferring any rights or privileges on its users, and its presence in a water area will not be construed in itself as restricting the use of the water area so marked.

31.10(3) Operators of vessels will, however, exercise precaution commensurate with conditions indicated.

31.10(4) This flag shall be displayed only when diver activities are in progress, and its display in a water area when no diver activities are in progress in that area will constitute a violation of this rule and of chapter 106 of the Code.

CHAPTER 32
REPORTING OF BOATING ACCIDENTS

32.1(106) Accident report. A written report is required when an accident occurs on board, or involving any vessel in addition to those stipulated in the law. The disappearance of any person from on board under circumstances which suggest any possibility of their death or injury.

32.2(106) Procedure. These reports shall be filed in triplicate with the state conservation commission in writing.

32.3(106) Contents. The report shall include the following information:

1. The numbers or names of the vessels involved, or both.
2. The locality where the accident occurred.

3. The date and time where the accident occurred.

4. The weather and lake or river conditions at time of accident.

5. The name, address, age, and boating experience of the operator of the reporting vessel.

6. The name and address of the operator of the other vessel involved.

7. The names and addresses of the owners of vessels or other property involved.

8. The names and addresses of any person or persons involved or killed.

9. The nature and extent of injury to any person or persons.

10. A description of damage to any property (including vessels) and estimated cost of repairs.

11. A description of the accident (including opinions as to the causes).

12. The length, propulsion, horsepower, fuel and construction of the reporting vessel.

13. Names and addresses of known witnesses.

14. The specific number of persons on board the reporting vessel at the time of the accident.

CHAPTER 44
FISHING SHELTERS

44.1(111) When regulated. For the period beginning on the first day of November of each year and ending on the twentieth day of February of the following year, the following rules pertaining to the building or erection of fishing shelters for noncommercial purposes shall apply to all such buildings or structures placed on or over state-owned lands or waters under the jurisdiction of the state conservation commission:

44.1(1) A permit, for which no charge or fee will be made, must be secured from the state conservation commission for the erection of all buildings or structures used as fishing shelters on or over state-owned lands or waters.

44.1(2) All such buildings must be of a type and made from materials approved by the state conservation commission.

44.1(3) The permit number must be painted legibly in a color contrasting to the background on all sides of the shelter in numerals at least six inches high.

44.1(4) Failure to remove the building or structure and materials used in its construction from state-owned property on or before February twentieth of each year shall be deemed just cause for prosecution as provided for in section 111.4.

44.1(5) Information containing the name and address of owner must be placed on door of shelter in a legible and durable manner.

44.1(6) Structures may not be locked when in use.

CHAPTER 45
STATE PARKS AND PRESERVES

45.1(111) Opening time. Except by arrangement or permission granted by the director or his authorized representative the following rules shall apply; all persons shall vacate all state parks and preserves before 10:30 p.m., each day, except authorized campers in accordance with section 111.46, and no person or persons shall enter into such parks and preserves until 4:00 a.m. the following day.

[Filed September 14, 1965]

CHAPTER 46
STATE PARK AND PRESERVE WILDLIFE REFUGES

46.1(109) Established. The following state parks and preserves under the jurisdiction of the Iowa state conservation commission are established as wildlife refuges under the provisions of section 109.5 for the calendar year 1962 and thereafter unless otherwise altered or amended by process of law:

PARK OR PRESERVE	*COUNTY*
A. A. Call	Kossuth
Backbone	Delaware
Beeds Lake	Franklin
Bellevue	Jackson
Bixby	Clayton
Black Hawk Lake	Sac
Bob White	Wayne
Browns Lake	Woodbury
Brush Creek Canyon	Fayette
Clear Lake	Cerro Gordo
Cold Springs	Cass
Dolliver Memorial	Webster
Eagle Lake	Hancock
Echo Valley	Fayette
Fort Atkinson	Winneshiek
Fort Defiance	Emmet
Frank A. Gotch	Humboldt
Geode	Des Moines—Henry
George Wyth	Black Hawk
Green Valley	Union
Gull Point (Okoboji Areas)	Dickinson
Heery Woods	Butler
Inn Area (Okoboji Areas)	Dickinson
Kearny	Palo Alto
Lacey-Keosauqua	Van Buren
Lake Ahquabi	Warren

Lake Anita ..... Cass
Lake Darling ..... Washington
Lake Keomah ..... Mahaska
Lake MacBride ..... Johnson
Lake Manawa ..... Pottawattamie
Lake of Three Fires ..... Taylor
Lake Wapello ..... Davis
Ledges ..... Boone
Lewis and Clark ..... Monona
Lost Island ..... Palo Alto
McIntosh Woods ..... Cerro Gordo
McGregor Heights ..... Clayton
Maquoketa Caves ..... Jackson
Margo Frankel Woods ..... Polk
Mill Creek ..... O'Brien
Mini-Wakan ..... Dickinson
Nine Eagles ..... Decatur
Oak Grove ..... Sioux
Oakland Mills ..... Henry
Okamanpedan ..... Emmet
Orleans Beach ..... Dickinson
Palisades-Kepler ..... Linn
Pammel ..... Madison
Pikes Peak (McGregor Area) ..... Clayton
Pikes Point ..... Dickinson
Pilot Knob ..... Hancock
Pine Lake ..... Hardin
Pioneer ..... Mitchell
Point Ann ..... Clayton

CHAPTER 50
SNOWMOBILES

50.1(321G) Accident report. Whenever any snowmobile is involved in an accident resulting in injury or death to anyone or property damage amounting to $50 or more, the operator shall file a report of the accident with the commission within 48 hours. Said report shall be on forms provided by the commission, completed and submitted in duplicate, including the following information:

1. Registration numbers of snowmobiles involved.
2. The locality where the accident occurred.
3. Date and time of accident.
4. Weather and visibility conditions.
5. Name, address, age and snowmobile operating experience of the reporting snowmobile operator.
6. Name(s) and address(es) of owner(s) of snowmobile(s) involved, and any other witness(es).
7. Name(s) and address(es) of operator(s) of other vehicle(s) involved.
8. Safety equipment being worn by operator and passenger(s).
9. Name(s) and address(es) of any person(s) injured or killed.
10. The nature and extent of injury to any person(s).
11. Description of damage to any property (including snowmobiles) and estimated cost of repair.
12. Description of the accident (including opinions as to the causes.)
13. Horsepower, make and year of each snowmobile involved.
14. Estimated speed of vehicles involved.
15. Whether alcohol was a contributing factor.
16. Whether snowmobile was rented or privately owned.

This rule is intended to implement section 321G.10 of the Code.

50.2–50.4 Reserved for future use.

50.5(321G) Registration applied for card and proof of purchase.

50.5(1) *Procedure for registration applied for card—content.* The following information shall be furnished, required and stated on the registration applied for card.

a. Name and address of dealer.
b. Make and model of snowmobile.
c. Serial number of snowmobile.
d. Present registration number (if any).
e. Date of purchase.
f. Name and address of purchaser.

The above required information shall be legibly printed on the card by the dealer selling the snow-

mobile. The card shall be completed in duplicate and one copy returned forthwith to the state conservation commission.

50.5(2) *Use.* The registration applied for card may be used only after an application for registration has been made to the county recorder. Placing a completed application for registration and required fee in the mail to the recorder shall constitute making an application.

50.5(3) *Placement on machine.* The registration applied for card shall be placed on the forward portion of the machine in a position so as to be clearly visible at all times and shall be maintained in a legible manner.

50.5(4) *Proof of purchase.* The operator of any snowmobile displaying a registration applied for card shall carry and display upon request of any peace officer a valid bill of sale for said snowmobile.

This rule is intended to implement chapter 321G of the Code.

[Filed January 5, 1971;
amended December 15, 1971]

CHAPTERS 51 to 54
Reserved for future use.

CHAPTER 55
ANNUAL PERMIT AND RENTAL FEE SCHEDULE FOR STATE-OWNED RIVERBED, LAKE BED, AND WATERFRONT LANDS

55.1(111) General. Table 1 and Table 2 hereof are approved guidelines for the purpose of expediting the administration of applications for permit and use of land under the jurisdiction of the state conservation commission, excepting those lands leased for agricultural purposes, commercial concession agreements, and agreements covering the removal of sand, gravel, and other natural materials.

Fees for use of state-owned lands under the jurisdiction of the state conservation commission for agricultural purposes shall be determined by the usual "Co-operative Farm Agreement" depending on the crop, soil conditions and other pertinent factors.

The fee for an area in which the primary use is to provide access, for the general public, from the river or lake to a commercial business may be determined by the noncommercial schedule, providing the renter does not offer any product for sale or collect any fees for services rendered on said state property.

55.2(111) Table 1—Areas designated for industrial or commercial use by the commission.

	FRONTAGE															
	50′	100′	150′	200′	250′	300′	350′	400′	450′	500′	550′	600′	650′	700′	750′	800′
DEPTH																
100′	$100	200	300	400	500	600	700	800	900	1000	1100	1200	1300	1400	1500	1600
200′	$175	350	525	700	875	1050	1225	1400	1575	1750	1925	2100	2275	2450	2625	2800
	$225	450	675	900	1125	1350	1575	1800	2025	2250	2475	2700	2925	3150	3375	3600
400′	$250	500	750	1000	1250	1500	1750	2000	2250	2500	2750	3000	3250	3500	3750	4000

When the area leased is larger than that designated by this table, the fee for each additional segment of 50′x100′ or any portion thereof shall be determined as follows:

A. The fee for increased depth shall be at the rate of $25 per segment (50′x100′) or any portion thereof.

B. The fee for additional frontage shall be proportionate to that indicated on the table.

55.3(111) Table 2—Areas designated for noncommercial use or use by nonprofit organizations.

	FRONTAGE									
	50′	100′	150′	200′	250′	300′	350′	400′	450′	500′
DEPTH										
50′	$50	100	150	200	250	300	350	400	450	500
100′	$75	150	225	300	375	450	525	600	675	750
150′	$87.50	175	262.50	350	437.50	525	612.50	700	787.50	875

The above table shall be used to determine the annual permit and rental fees for noncommercial use, or use by nonprofit organizations, except, irregular parcels of less than 5,000 square feet; in which case the commission shall rent and permit limited development which is appropriate for the area and the annual fee shall be not less than $50 nor more than $100.

When the area leased is larger than that designated by this table, the fee for each additional segment of 50'x50', or any portion thereof, shall be determined as follows:

A. The fee for increased depth shall be at the rate of $12.50 per segment (50'x50') or any portion thereof.

B. The fee for additional frontage shall be proportionate to that indicated on the table.

This rule is intended to implement sections 111.4 and 111.25 of the Code.

[Filed February 9, 1971]

DAIRY INDUSTRY COMMISSION

CHAPTER 1
EXCISE TAX

1.1(179) The first buyer of milk or cream charged with the collection of the excise tax under chapter 179 of the Code, shall keep a complete and accurate record of such purchases during the period of May 1 to June 30 each year. Such records include (1) date of purchase, (2) name of producer, and (3) pounds of milk or cream purchased from each producer. Such records shall be preserved for a period of two years.

1.2(179) The return required by section 179.7 shall be filed with the dairy industry commission on or before August 1 of each year, on forms furnished by the commission, or ones substantially similar thereto.

[Filed March 26, 1959]

DENTISTRY BOARD, STATE

CONTENTS

CHAPTER 7
RECIPROCITY

CHAPTER 8
MISCELLANEOUS RULES

CHAPTER 1
GENERAL PROVISIONS

1.1(153) Definitions. For the purpose of the interpretation of the following rules:

1.1(1) "Board" shall mean the Iowa state board of dentistry.

1.1(2) "Department" shall mean the department of health, state of Iowa.

1.1(3) "Rule" shall mean a requirement, procedure, or standard of general application prescribed by the board relating to either the administration or enforcement of chapter 153 of the Code or the regulation of the practice of dentistry and dental hygiene.

1.1(4) "Order" shall mean a requirement, procedure or standard of specific or limited application adopted by the board relating to any matter the board is authorized to act upon, including the professional conduct of licensees hereunder and the examination for licensure and licensure of any person hereunder.

1.1(5) "Examination planning meeting" shall mean that meeting of the board held at the time and place of the annual meeting of the Iowa Dental Association.

1.1(6) "Examination meeting" shall mean those meetings of the board held in Iowa City for the purpose of examining candidates for licensure as dentists or as dental hygienists, the time and place of such examination meetings to be fixed by the board as near to the spring commencement of the University of Iowa as may be practicable. The time and place of such examination meeting shall be published in the Journal of the American Dental Association at least 60 days prior to such examination meeting.

1.1(7) "Annual meeting" shall mean that meeting of the board held each year in Iowa City in conjunction with the examination meeting for the purpose of electing officers for the ensuing year and conducting such other business as may properly come before the board.

1.1(8) "Special meetings" shall mean those meetings of the board other than above provided for, which special meetings, including telephone conferences, shall be held at such times and places and upon such notice, written or oral, as the chairman, secretary or a majority of the board deems necessary.

1.1(9) Three members of the board shall constitute a quorum for the purpose of conducting the business of the board. Sturgis Standard Code of Parliamentary Procedure shall, when not in conflict herewith, govern the deliberations of the board.

1.1(10) "Chapter" shall mean Dental Practice Act of Iowa.

1.1(11) The board interprets "practicing in Iowa" as used in section 153.11 of the Code to mean rendering a professional service in this state either as an employee or an independent contractor for any valuable consideration. Any licensee residing in Iowa eligible for the five-dollar renewal fee provided for therein shall be required to certify in writing to the board that he is not or will not be "practicing in Iowa" during the time to which such renewal relates, which status shall be shown on the licensee's record and continued thereon unchanged until otherwise directed by the board.

1.2(153) Organization of board. The board at its annual meeting shall organize for the ensuing year, selecting from its own membership a chairman, vice-chairman, secretary, treasurer and such other officers as it may from time to time deem necessary, which officers shall assume their duties July 1. The vice-chairman shall prepare and submit an annual budget to the board at such time as the board designates.

1.3(153) Tenses, gender and number. For the purposes of these rules, the present tense includes the past and future tenses, and the future, the present and past, and the past, the present and future; the masculine gender includes the feminine and the neuter, and the feminine, the masculine and neuter, and the neuter, the masculine and feminine; and the singular includes the plural, and the plural, the singular, as the context requires.

1.4(153) Fee splitting prohibited. No individual or group of individuals engaged in the practice of dentistry in the state of Iowa shall, except as authorized by the provisions of this rule, rule 5.2(4), or section 153.32(8), split, divide or allocate, either directly or indirectly with any dentist or layman other than an associated licensed dentist or licensed hygienist practicing in the same office, any fees earned in rendering dental service; provided, however, that this rule shall not be interpreted to prevent an employer from paying an employee in the regular course of employment.

1.5(153) Limitation on signs. No dentist shall use letters of a size greater than six inches in height as part of any sign, name plate or other professional public announcement.

1.6(153) Number of signs limited. No dentist shall display simultaneously at his place of business or elsewhere more than two signs, name plates or other professional announcements, such signs to employ only lettering to show his name, address, and professional title or degree and specialty, together with his office hours and telephone number; provided, however, that a dentist may use his name and address and designate his office hours on the building directory and the entrance door to his office.

1.7(153) Sign illumination limited. No dentist shall use lighted signs, electric, neon or otherwise, nor any glaring lights to illuminate signs, posters or any other professional announcement.

1.8(153) Dentist's presence required. No dentist shall practice dentistry in any place or location where dental services are rendered where the name or names on the door, window, wall, directory, or any sign whatsoever, shall indicate or tend to indicate that such place or location is owned or operated by any person not actually practicing dentistry therein; provided, however, that in the event that the dentist whose name so appears on such window, wall, or sign, shall have terminated his practice, this rule shall not be applicable to any other dentist practicing in such establishment for 12 months immediately following such termination. No dentist shall have a proprietary interest in more than three places of business where dentistry is practiced nor display his license or annual renewal certificate therein.

1.9(153) Public announcements and professional cards limited. A dentist shall make use of no announcement through any media, means, agency or device of an advertising nature, except he may advise his patients of record by letter or otherwise, or he may publicly announce only by way of newspaper the opening, relocation or termination of his practice of dentistry or professional association, which announcement shall state only his name, degree, specialty, as recognized by the board, office location where he is actually engaged in practice, office hours, telephone numbers and may be published in no more than seven consecutive publications in the same newspaper. Such announcement shall be limited to a space equivalent to a two-column width and three inches in length. The board interprets a professional card, to be either the announcement above-described and limited or a card one column wide and one inch in length. No shaded or solid background or any other attention-getting device shall be allowed.

1.10(153) Attention-getting signs prohibited. No person licensed by the board shall employ any advertising sign, whether same be a projecting sign or otherwise, which shall by its design, intent or character, reasonably appear to be principally attention getting in nature as distinguished from merely imparting the information contained thereon to the general public.

1.11(153) Official forms. The following board forms are the official forms to be used by the board for the purposes respectively indicated therefor:

1.11(1) Board Form 1—Dental license (8½ x 11).

1.11(2) Board Form 2—Dental hygienist's license (8½ x 11).

1.11(3) Board Form 3—Grade average of applicant's for licensure for dentistry (yellow paper).

1.11(4) Board Form 4—Grade form average of applicants for dental hygiene (blue paper).

1.11(5) Board Form 5—Ballot for mail vote.

1.11(6) Board Form 6—Dentist's application for license.

1.11(7) Board Form 7—Hygienist's application for license.

1.11(8) Board Form 8—Notice to applicant of results of his examination (used for both dentists and hygienists).

1.11(9) Board Form 9—Letter to accompany notice of applicant of examination results.

1.11(10) Board Form 10—Notice of renewal fee and application for renewal of license to practice dentistry.

1.11(11) Board Form 11—Application for renewal of license to practice dental hygiene.

1.11(12) Board Form 12—Renewal certificates for dentists and hygienists.

1.11(13) Board Form 13—Information for applicants for examination in dentistry and dental hygiene.

1.11(14) Board Form 14—Examination instructions to state board candidates.

1.11(15) Board Form 15—Prosthetic design forms.

1.11(16) Board Form 16—Lettersize letterhead stationery.

1.11(17) Board Form 17—Letterhead envelopes.

1.11(18) Board Form 18—Large size envelopes—license size.

1.11(19) Board Form 19—Envelopes to mail renewal certificate (small window size).

1.11(20) Board Form 20—Envelopes to mail renewal applications (large window size).

1.11(21) Board Form 21—Application for reciprocity for dentists.

1.11(22) Board Form 22—Information to dentists for reciprocity.

1.11(23) Board Form 23—Application for reciprocity for hygienists.

1.11(24) Board Form 24—Information to hygienists for reciprocity.

1.11(25) Board Form 25—Receipts acknowledging payment of fees.

1.11(26) Board Form 26—Registry of dentists and hygienists.

1.11(27) Board Form 27—Directory, published biennially.

1.11(28) Board Form 28—Seal of board.

1.11(29) Board Form 29—Temporary faculty license.

1.11(30) Board Form 30—Resident dentist license.

1.11(31) Board Form 31—Application for reinstatement of license.

1.11(32) Board Form 32—Notice of failure to renew.

1.11(33) Board Form 33—Voucher.

1.11(34) Board Form 34—Certificate of nonpractice.

1.12(153) Displaying license and annual renewal certificate. The license and current annual renewal certificate must be prominently displayed by each licensee at the principal office of employment. An additional certificate shall be obtained from the secretary of the board whenever a dentist practices at more than one address and same shall be displayed therein, but no more than two such additional certificates shall be issued. A fee of five dollars will be charged for each additional certificate.

1.13(153) Notice required of change of address. Every licensee shall upon changing his principal office and within ten days thereafter furnish the secretary of the board with his new address.

1.14(153) Reinstatement application. All applications for reinstatement under section 153.12 and for reinstatement of a hygienist's license shall be made on Board Form No. 31 and filed with the secretary of the board, together with the then current annual license fee and a penalty fee of ten dollars. The applicant shall present himself for the clinical examination prescribed herein at such time and place fixed by the board, unless the board expressly waives such examination for good cause shown by the applicant and upon presentation of satisfactory and convincing evidence of his knowledge and information regarding current techniques, procedures, materials and theories obtaining in the practice of dentistry. Each applicant shall present the written recommendation of two active practitioners of dentistry licensed in Iowa who are and have been members of the American Dental Association for one or more years last past that he be reinstated, which recommendation shall be unqualified and shall specifically detail the personal knowledge each has of the applicant, his professional and moral suitability for reinstatement and the reason for so recommending. The application shall also include the following:

1.14(1) Name and current residence of applicant.

1.14(2) Date of admission to practice in Iowa and license number for which reinstatement is sought.

1.14(3) Dates and places of practice, and reasons for seeking reinstatement and why license was not maintained.

1.14(4) Names of all professional (dental) organizations in which membership is or was held, and dates thereof.

1.14(5) List of all study clubs and professional meetings attended, with dates and places thereof.

1.14(6) List of all postgraduate courses taken, with dates and places thereof.

1.14(7) Other states in which licensed, and the identifying number of each license.

1.15(153) Records of board. The board shall maintain as a part of its records the following information:

1.15(1) A list of applicants who have failed the board's examination, but who are still eligible for re-examination.

1.15(2) Alphabetical lists of all licensees to practice dentistry in Iowa who are and who are not in good standing with the board.

1.15(3) Alphabetical lists of all licensees to practice dental hygiene in Iowa who are and who are not in good standing with the board.

1.15(4) Alphabetical lists of dentists registered in but not practicing in Iowa.

1.15(5) An alphabetical list of resident dentist licensees.

1.15(6) An alphabetical list of dental college faculty permit holders.

1.15(7) An alphabetical list of licensees in federal services.

[Filed October 23, 1968]

CHAPTER 2
APPLICATIONS FOR LICENSURE

2.1(153) Applications to practice dentistry. Any person desiring to take the examination for licensure to practice dentistry within the state of Iowa must first present to the board an

application and credentials, as prescribed by chapter 153 of the Code and shall conform to the following rules of the board:

2.1(1) An application on a form, hereinafter referred to as Board Form No. 6, furnished by the board must be completely filled out.

2.1(2) The completed application shall be filed with the board not later than 30 days prior to the date set for the beginning of the examination for which application is made.

2.1(3) The applicant shall furnish satisfactory evidence of having graduated from an accredited dental college which shall have been approved by the board.

2.1(4) For identification purposes, the applicant shall furnish one notarized, unmounted passport size photograph 3" x 3", taken not more than 12 months before date of application.

2.1(5) The fee of $50 as fixed by chapter 153 of the Code shall accompany the application. The fee of $50 will be returned to those applicants who are found to be ineligible to take the examination.

2.1(6) The applicant shall furnish a testimonial of good moral character by the dean or other authorized representative of the dental school from which the applicant graduated, and if he is a member of the American Dental Association he shall furnish a like testimonial by the president or secretary of the constituent or component society or its equivalent, and certification by the secretary of the board of dental examiners of the state in which he may be licensed.

The board may require from an applicant or obtain from other sources such other information pertinent to the character, education and experience of the applicant as it may deem necessary in order to pass upon the applicant's qualifications.

2.1(7) The board shall compile the names of the successful candidates on a suitable and appropriate form, which shall be known as Board Form No. 3, and when so compiled the same shall become a permanent part of the records maintained by said board and available to public inspection at all reasonable hours.

2.2(153) Verification of application. Every applicant shall sign his application and shall swear or affirm to the truth of the statements contained therein before a notary public or other person authorized by law to administer oaths.

2.3(153) Rejection of incomplete application. Incomplete applications shall be returned to the applicant with the tendered fee, together with a statement setting forth the reasons for such rejection.

2.4(153) Applications to practice dental hygiene. Any person desiring to take examination for licensure to practice dental hygiene must present an application and credentials as prescribed by chapter 153 of the Code and shall conform to the following rules of the board:

2.4(1) An application on a form, hereinafter referred to as Board Form No. 7, furnished by the board must be completed in all respects.

2.4(2) The completed application shall be filed with the board not later than 30 days prior to the date set for the beginning of the examination for which application is made.

2.4(3) The applicant shall furnish a certified photostatic copy of a diploma or certificate in dental hygiene from an accredited school of dental hygiene approved by the board.

2.4(4) The applicant shall present to the board a certificate duly issued by the National Board of Examiners for Dental Hygienists evidencing the successful completion of the examination administered by said national board.

2.4(5) For identification purposes the applicant shall furnish one notarized, unmounted passport size photograph, 3" x 3", taken not more than 12 months before the date of application.

2.4(6) A fee of $25 shall accompany the application.

2.4(7) The applicant shall furnish evidence of good moral character satisfactory to the board, in addition to the requirements prescribed in section 153.8 of the Code. For the purpose of chapter 153 of the Code, an accredited school of dental hygiene shall include only those schools of dental hygiene now or hereafter approved by the board.

2.5(153) List of successful applicants. The board shall compile the names of the successful candidates on a suitable and appropriate form, which shall be known as Board Form No. 4, and when so compiled the same shall become a permanent part of the records maintained by said board and available to public inspection at all reasonable hours.

2.6(153) Disclosure of applicant's grade prohibited. No information regarding the grades of the respective applicants shall be divulged by the board until the applicants themselves have been notified by the board.

[Filed October 23, 1968]

CHAPTER 3
EXAMINATIONS

3.1(153) Examination procedure, dentists. The following rules are deemed by the board to provide for an examination sufficiently thorough to test the fitness of the applicant and same shall govern the conduct of examination and be strictly adhered to throughout the entire examina-

tion. An examinee who violates any of the rules, or instructions applicable to him may be declared by the board to have failed the examination.

3.1(1) Unless otherwise notified in writing, applicants must appear at the appointed hour on the first day of the examination at the college of dentistry in Iowa City as fixed by the board, at which time the board shall assign each applicant a number for identification purposes during such examination.

3.1(2) The ability of an examinee to read and interpret instructions shall be evaluated and considered by the board as a part of the examination.

3.1(3) Any examinee who gives or receives unauthorized assistance in any portion of the examination may be dismissed from the examination.

3.1(4) An examinee must be present punctually at the time designated for commencing each session of the examination.

3.1(5) If the examinee fails the first examination and desires to take a second examination, he shall notify the board at least 30 days prior to the first day of the next examination, and he shall be required to certify that the material statements contained in his original application are currently true and correct.

3.1(6) The examinee must attain an average grade of not less than 75 percent in the clinical portion of the examination. The grade of the theoretical portion of the examination will be ascertained by averaging the grades of Part I and Part II of the examination administered by the National Board of Dental Examiners.

3.1(7) The secretary of the board will assign board members to the specific operations in the clinical portion of the examination that they are to grade.

3.1(8) The examinee must furnish his own patients, all needed materials, supplies and instruments; and the director of the dental clinic at the college of dentistry may aid in the procurement of patients.

3.1(9) The general clinical requirements hereinafter prescribed for the examination may be confirmed, added to, modified or changed in any particular, without notice, as the board in its discretion shall deem advisable for the purpose of sufficiently evaluating and testing the fitness of the examinee to practice dentistry.

3.1(10) All operations must be performed by the examinee in the presence of the board members assigned for such purpose. The examinee shall be informed as to which board member has been designated to grade the required operation.

3.1(11) Notwithstanding the educational experience of any examinee, the board may deduct points from the grade of the examinee in all restorations where the normal contact and tooth form has not been restored and where all margins have not been carried to self-cleansing areas.

3.1(12) The board may deduct points from the grade of the examinee if the cases selected do not have approximating contacting teeth.

3.1(13) Each examinee may be required to perform clinical operations as follows, which operations must be previously approved by one or more board members:

a. Oral diagnosis. Charting, treatment planning and slide examination.

b. Operative.

(1) Gold foil restoration, Class 2, 3 or 4 (Class 5, only if specifically authorized).

(2) Amalgam restoration, Class 2.

c. Crown and bridge. Cast gold crown (or a three-quarter crown only if specifically authorized).

d. Prosthetics. Impression, cast, design of partial denture on surveyed cast and on Board Form No. 15, with written instructions to technician.

3.2(153) Scope of examination, dentists.

3.2(1) All applicants, except as otherwise provided herein, shall present a certificate duly issued over the signature of the secretary of the National Board of Dental Examiners evidencing successful completion of Part I and II of the examination administered by said National Board of Dental Examiners; such national board certificate shall be required, and the board no longer shall administer an examination on theory unless otherwise provided.

3.2(2) Examinees who otherwise qualify but who have failed in one or more subjects of the national board examination may be admitted to the clinical examination, but the license will be withheld until certification of Part II is received from the secretary of said National Board of Dental Examiners.

3.2(3) At the discretion of the board, any dentist who has lawfully practiced dentistry in another state or territory for five years may be exempted from presenting a certificate evidencing successful completion of the examination administered by said National Board of Dental Examiners.

3.2(4) All examinees shall be prepared to be examined for general knowledge of the chapter.

3.3(153) Examination procedure, hygienists. The following rules must be strictly adhered to throughout the entire examination and shall govern the conduct of the examinations. An examinee who violates any of the rules or instructions applicable to him may be declared by the board to have failed the examination.

3.3(1) Each applicant shall be required to do two complete oral prophylaxes.

3.3(2) Each applicant for licensure as a hygienist shall be required to give a demonstration of his skill in removing lime deposits, accretions and stains from exposed surfaces of the teeth and from the root surfaces to the depth of the attached gingiva, polishing the teeth and making instrumental examination for caries, and charting the mouth and teeth in as many cases as may be designated by the board during the examination.

3.3(3) Each applicant may further be required to perform such other practical demonstrations as the board in its discretion may specify during the course of examination, which may include but shall not necessarily be limited to the following:

a. Take full mouth, plus bite-wing X rays. These X rays to be mounted and presented to an examiner at the time of the oral interview.

b. Give a presentation of procedures for mouth care including the use of models and brushes to demonstrate the use of toothbrushes.

c. Demonstrate the care and sharpening of instruments used by dental hygienists.

d. Pouring of cast from impression that will be provided.

e. Recognition of errors in X-ray technique from projected slides.

f. Such other tests as may be determined by the board.

3.3(4) An average of 75 percent constitutes a passing grade in the clinical part of the examination.

3.4(153) Scope of examination, hygienists. In grading such practical demonstrations, the following will be observed and evaluated by the board:

1. Consideration for patient.
2. Position of chair.
3. Neatness of operator and operation.
4. Instrumentation.
5. Operation of engine.
6. Use of medicaments.
7. Gum laceration or injury.
8. Sharpness of instruments.
9. Final results.

[Filed October 23, 1968]

CHAPTER 4
AUXILIARY PERSONNEL

4.1(153) Definitions.

4.1(1) The term "dental assistant" means any person other than a hygienist or dental laboratory technician who acts by assisting a dentist in rendering dental services to a patient.

4.1(2) The term "hygienist" means a person holding a license as a dental hygienist issued by the board pursuant to the provisions of chapter 153 of the Code.

4.1(3) The term "dental laboratory technician" as used in these rules shall include all legal entities other than a licensed dentist who fabricates, constructs, makes, alters or repairs oral prosthetic appliances solely and exclusively for a licensed dentist and under his supervision or direction.

4.2(153) Dental assistants. Dental assistants may perform all services at the direction and under the supervision of the licensed dentist, except the following services:

4.2(1) Any and all removal of or addition to the hard or soft tissue of the oral cavity, except the surplus residue of restorative materials.

4.2(2) Any and all diagnosis of or prescription for or treatment or attempt to correct by any medicine, appliance, or method, any disease, disorder, lesion, injury, deformity, or defect of the oral cavity, teeth, gums or maxillary or mandibular arches of the human being, except the application of topical fluorides.

4.2(3) The administration of anesthetics, except topical anesthetics.

4.2(4) A prophylaxis, except polishing the teeth and their restorations.

4.2(5) Making an impression of the maxillary or mandibular arch, or any part thereof, except for study models.

4.3(153) Practice of dental hygiene. In assisting the members of the dental profession in providing oral health care, the following services performed by the dental hygienist shall be deemed:

4.3(1) *Educational:* Issuing written and oral instructions for optimal oral health, including the teaching of proper brushing techniques and interdental stimulation.

4.3(2) *Therapeutic:* Application or administration of medicaments prescribed by a licensed dentist, and a complete oral prophylaxis of all surfaces of the teeth to the depth of the attached gingiva.

4.3(3) *Preventive:* The topical application of medicaments and other methods for caries control.

4.3(4) *Diagnostic:* Making of X-ray exposures of teeth and surrounding tissues; obtaining and recording vital medical and dental history, including the charting of carious lesions, periodontal pockets and other abnormal conditions; and making impressions for study models.

All such services shall be performed under the supervision of a licensed dentist.

4.4(153) Advertising and soliciting dental service prohibited. No auxiliary personnel, including the dental assistant, hygienist and dental laboratory technician as defined in 4.1(153) shall advertise, solicit, represent or hold himself or

itself out in any manner to the general public that he or it will furnish, construct, repair, or alter prosthetic, orthodontic or other appliances, with or without consideration, to be used as substitutes for or as a part of natural teeth or associated structures or for correction of malocclusions or deformities, or that he or it will render any other dental service.

4.5(153) Unlawful practice by auxiliary personnel. Any assistant, hygienist or dental laboratory technician who assists a dentist in practicing dentistry in any capacity other than as an employee or independent contractor, or who directly or indirectly procures a licensed dentist to act as nominal owner, proprietor or director of a dental office as a guise or subterfuge to enable such assistant, hygienist or dental laboratory technician to engage directly or indirectly in the practice of dentistry defined by chapter 153 of the Code, or who renders dental service directly or indirectly on or for members of the public other than as an employee or independent contractor for an employing dentist shall be deemed to be practicing dentistry without a license.

[Filed October 23, 1968;
amended June 14, 1972]

CHAPTER 5
SUSPENSION OR REVOCATION OF LICENSES OF DENTISTS AND DENTAL HYGIENISTS

5.1(153) General grounds. In general terms, suspension or revocation of licenses under these rules shall be on those grounds specified in sections 153.32 and 153.34.

5.2(153) Dishonorable or unprofessional conduct in the practice of dentistry or dental hygiene, defined. "For being guilty of dishonorable or unprofessional conduct in the practice of dentistry or dental hygiene" as used in section 153.34(13) shall include:

5.2(1) The indiscriminate or promiscuous prescribing or dispensing of any drug which, under the circumstances, has no therapeutic value.

5.2(2) The practice of dentistry or dental hygiene while in a state of advanced physical or mental disability which renders the licensee incapable of performing professional services or impairs functions of judgment necessary to his practice.

5.2(3) The failure to maintain adequate safety and sanitary conditions for a dental office.

5.2(4) The act of a dentist in:

a. Splitting fees, accepting rebates, or commissions, except as authorized by the provisions of this rule, rule 1.4(153) or chapter 153 of the Code, from any source associated with the service rendered to a patient; provided, however, that the sharing of income in a dental partnership or association shall not be construed as splitting fees nor shall compensating dental auxiliaries on the basis of a percentage of the fee received for the over-all service be deemed accepting a commission.

b. Making suggestive, lewd, lascivious or improper advances to a patient.

c. Engaging in personal conduct which brings discredit to the profession of dentistry and which results in the imposition of a sentence of incarceration in any penal institution, whether or not such sentence is suspended.

d. Employing, assisting or enabling in any manner an unlicensed person to practice dentistry. The phrase "for conducting the practice of dentistry so as to permit directly or indirectly an unlicensed person to perform work which under this chapter can legally be done only by persons licensed to practice dentistry or dental hygiene in this state" as found in section 153.34(5) of the Code, shall include the practice by a licensed dentist in the same premises occupied by a dental laboratory or technician or the maintenance of a professional association with a dental laboratory or technician if such dental laboratory or technician advertises, solicits, represents, holds itself or himself out in any manner to the general public that it or he will sell, supply, furnish, construct, repair or alter prosthetic dentures, bridges, orthodontic or other appliances or devices to be used as substitutes for, or as a part of natural teeth or associated structures or for correction of malocclusions or deformities, or who in any way violates the provisions of section 153.34.

"In the same premises" as used hereinabove shall mean identical public facilities used in common, such as office door, reception room, receptionist, files, telephone, telephone number, address, post-office box, etc.

"The maintenance of a professional association" as used hereinabove shall mean any continuing arrangement of any kind or nature under which the licensed dentist delegates to or permits the assumption by the dental laboratory or dental laboratory technician of any service constituting the practice of dentistry as defined in chapter 153 of the Code.

5.2(5) Practice of dentistry under any name except the licensee's own proper name, such as the use of the words, "clinic", "institute", or any other title that may suggest a public or semi-public activity, or teaching institution, or that could be interpreted to imply superiority over other dental practitioners, shall constitute the unlawful practice of dentistry under the name of an association or trade name, as those terms are used in section 153.34(14) and shall be grounds for discipline under section 153.34.

5.3(153) Exterior signs limited. The use of signs on the outside of a building wherein a dentist or several dentists conduct their practices

which attract the attention of members of the public who are not otherwise seeking to locate a dentist who practices at that location and the use of devices and signs which are intended to, or result in, public attention to the practitioners in that building constitutes unlawful advertising. Any medium employed by a dentist to identify the site of his practice which, apart from the information it contains, constitutes a physical object with attention-getting properties or characteristics, whether by reason of size, shape, color, illumination, pictorial representation, or animation, constitutes unlawful advertising under sections 153.19 and 153.32(1,2).

5.4(153) Hygienist's wrongful solicitation of patients. The board shall revoke or suspend the license of any dental hygienist who is found guilty of using or attempting to use in any manner whatsoever any patient recall list, records, reprints or copies of same, or information gathered therefrom of the names of patients whom he might have served in the office of a prior employer, unless such names appear upon the bona fide recall list of his present employer and were caused to so appear through the legitimate practice of dentistry as provided for in chapter 153 of the Code. The board shall also suspend or revoke the license of any licensed dentist who is found guilty of aiding or abetting or encouraging a dental hygienist employed by him to make any use of a recall list to solicit patronage from patients formerly served in the office of any dentist formerly employing such hygienist. No order of suspension or revocation provided in this rule shall be made or entered except after hearing by the board as provided in chapter 153 of the Code and such order shall be subject to judicial review as provided by law.

[Filed October 23, 1968]

CHAPTER 6
PROCEDURAL RULES

6.1(153) Definitions. For the purpose of the rules in this chapter the following definitions shall apply:

6.1(1) "Board" means the Iowa state board of dentistry, or not less than three members thereof, authorized by law to adjudicate contested cases.

6.1(2) "Contested case" means any adversary proceeding before the board the purpose of which is to determine the legal right of any licensee under chapter 153 of the Code, to have his license renewed, or to determine the question of the suspension or revocation thereof in accordance with the terms of chapter 153.

6.1(3) "Respondent" means any person against whom an accusation, charge or order to show cause has been filed as provided for in chapter 153 of the Code or any person whose legal right provided for in chapter 153 shall be determined or affected.

6.2(153) Order to show cause, revocation, suspension. A hearing to determine whether a license should be renewed or revoked or suspended as provided for in chapter 153 of the Code shall only be initiated after causing an investigation of the accusation or charges giving rise thereto to be made and a citation to issue under the seal of the board, signed by the secretary or chairman, requiring the licensee to personally appear at a time and place certain and show cause, if any he has, why his license should be renewed; or to personally appear and answer to or defend against any accusation or charge provided in chapter 153 of the Code as a ground for the suspension or revocation of his license. The citation shall consist of a written statement of charges or accusations setting forth in ordinary and concise language the acts of omission or commission with which the respondent is charged and shall be sufficiently detailed to enable the respondent to answer or defend against. Said citation shall specify the statutes or rules which the respondent is alleged to have violated.

6.3(153) Service of citation or order to show cause. Upon the issuance thereof the citation or the order to show cause, as the case may be, and a copy of all charges or accusations filed against the licensee or other accompanying information relating to the order to show cause, shall be served upon the respondent as provided for in chapter 153 of the Code. If the respondent is a resident of the state of Iowa and can be personally found therein for the purpose of making service, such personal service of the citation may be made upon the respondent in the same manner as provided by law for the service of an original notice in a civil action, and proof thereof made by the return of service executed by such person authorized by law in such cases. But if the respondent is neither a resident of the state of Iowa nor personally present therein so that personal service of the citation can be made upon him within said state, then the citation and copies of the accusation or charges against the respondent shall be served upon respondent by certified mail, addressed to his last known post-office address as shown by the records of the board.

6.4(153) Time and place of hearing. The hearing on the order to show cause for the renewal of the license, or on the question of suspension or revocation thereof, shall be fixed by the board for a time and place certain, which hearing shall be held not earlier than 20 days following the service of the order to show cause or the citation upon the respondent. For the purpose of this rule, and if certified mail is used for making service, service upon the respondent shall be deemed to have been made when a sealed envelope, addressed to the last known address of the respondent as shown by the records of the board, and having good and sufficient postage affixed thereto, and containing the order to show cause or the citation referred to hereinabove, is deposited in the United States mail in any city or town within the state of Iowa.

6.5(153) Right of personal appearance. The order to show cause or the citation, as the case may be, shall notify the respondent that he may be physically present at such hearing and may be represented by counsel thereat, and that he may present any relevant evidence pertaining to the propriety of renewing his license, or pertaining to the question of the suspension or revocation of his license or the last renewal thereof, and that he will be given a full opportunity to be heard and to present all evidence or witnesses in his behalf and to cross-examine all witnesses testifying against him.

6.6(153) Depositions for use as evidence in the hearing. On request of the respondent, or upon notice from the board to the respondent, the board may permit the testimony of any material witness, residing within or without the state, to be taken for use as evidence in the hearing, by deposition in the same manner prescribed by law for evidentiary depositions in civil actions. Such request or notice shall specify the nature of the proceeding then pending; the name and address of the witness whose testimony is desired; a showing of the materiality of the testimony of such witness and that such witness will be unable to be personally present at such hearing. Whereupon, and upon being satisfied from the showing so made, the board shall forward a request to such witness to appear and testify by deposition before an officer authorized to administer oaths named in the request at a time and place specified therein.

6.7(153) Conduct of the hearing. All hearings conducted by the board under chapter 153 of the Code, in which the rights of any licensee are to be determined shall be governed by the following procedure:

6.7(1) Every hearing in a contested case shall be presided over by the chairman of the board, or in his absence by the vice-chairman. Not less than three members of the board shall be necessary to constitute a quorum for the purpose of conducting such hearing.

6.7(2) The attorney for the board shall advise the member or members of the board concerning the conduct of the hearing and rulings on the admission or exclusion of evidence and other matters of law.

6.7(3) Any member of the board shall voluntarily disqualify himself and withdraw from any case to which he cannot accord a fair and impartial hearing or consideration. Any party may request the disqualification of any board member by filing an affidavit, prior to the taking of evidence at a hearing, stating with particularity the grounds upon which it claimed that a fair and impartial hearing cannot be accorded. The issue shall be determined by the other members of the board. No board member shall withdraw voluntarily or be subject to disqualification if his disqualification would prevent the exercise of a quorum qualified to act in a particular case.

6.7(4) All proceedings at the hearing shall be reported in writing, and the board shall prepare an official record, which shall include testimony and exhibits in each contested case, but it shall not be necessary to transcribe the record unless it is requested for purposes of rehearing or court review.

6.8(153) Evidence.

6.8(1) All evidence shall be taken only on oath or affirmation.

6.8(2) Each party shall have the right to call and examine witnesses; to introduce exhibits; to cross-examine opposing witnesses on any matter relevant to the issues even though that matter was not covered in direct examination; to impeach any witness regardless of which party first called him to testify; and to rebut the evidence against him. If respondent does not testify in his own behalf, he may be called and examined as if under cross-examination.

6.8(3) The board may admit and give probative effect to relevant evidence which possesses probative value and shall not be bound by the technical rules relating to the admissibility of evidence; provided, however, that the board shall give effect to the rules of privilege recognized by law. Hearsay evidence may be used for the purpose of supplementing or explaining any direct evidence but shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions. All evidence including records and documents (except tax returns and tax reports) in the possession of the board of which it desires to avail itself shall be offered and made a part of the record in the case. Documentary evidence may be received in the form of copies or excerpts, or by incorporation by reference.

6.9(153) Decision in contested case.

6.9(1) No right, license or privilege shall be granted, issued, renewed, revoked, suspended, limited or conditioned except upon the affirmative vote of at least three members of the board.

6.9(2) Whenever, in a contested case, a member of the board who has not participated in the hearing votes in the decision of the case, a final decision, if adverse to the respondent, shall not be made until a proposed decision, including the statement of reasons therefor, has been served on the respondent and opportunity has been afforded to file exceptions and present argument to all of the members of the board who are to render the final decision.

6.9(3) The respondent shall have the opportunity to present either oral or written argument and to present additional newly discovered evidence after the close of the record but prior to final decision.

6.9(4) Informal disposition of a contested case may be made in the manner prescribed by law.

6.10(153) Form of decision—findings. Every decision and order adverse to a party to the proceeding shall be in writing and shall contain a statement of findings or reasons, a determination of the issues presented, and decision of the board. The findings shall consist of a statement of the conclusions upon each contested issue of fact necessary to the decision. Parties to the proceedings shall be notified of the decision and order in person or by mail. A copy of the decision and order and accompanying statement of reasons together with proof of service shall be delivered or mailed, upon request, to the respondent or to his attorney of record.

6.11(153) Effective date of decision—stay of execution—notice to licensee.

6.11(1) The decision or order of the board shall become effective immediately upon its service on respondent; provided, however, that the board may, in its discretion, stay the enforcement of its decision pending appeal or reconsideration within 30 days after said service.

6.11(2) The board may, upon its own motion or upon petition of respondent, reconsider or grant a rehearing of any decision rendered in a contested case or may condition any such decision upon just and reasonable grounds.

6.11(3) The filing of a petition for review shall not automatically stay the enforcement of the board decision.

[Filed October 23, 1968]

CHAPTER 7
RECIPROCITY

7.1(153) For dentists. Any dentist who has been lawfully licensed to practice in another state or territory which has and maintains a standard for the practice of dentistry substantially equal to that now maintained in this state, and who has been lawfully and continuously engaged in the practice of dentistry for five or more years immediately before filing his application to practice in this state and who shall deposit with the secretary of the board a duly attested certificate from the examining board or examining authority of the state or territory in which he is licensed or registered, certifying to the fact of his licensing or registration and of his being a person of good moral character and of professional attainments, may, upon the payment of a fee of $50 be granted a license to practice dentistry in this state. Provided, however, that no license shall be issued to any such applicant, unless the state or territory from which such certificate has been granted to such applicant shall have extended a like privilege to engage in the practice of dentistry within its own borders to dentists heretofore and hereafter licensed by this state, and provided further, that the board shall have power to enter into reciprocal relations with similar departments or boards of other states whose laws are substantially the same as the provisions of chapter 153 of the Code for the purposes of this rule, in computing the five-year period of practice in another state or territory any person who served in any federal service or on the faculty of an accredited dental college may count the time spent by him in such service.

7.1(1) Each applicant shall attach to his application, Board Form No. 21, a certified copy of any and all licenses to practice dentistry he may hold from other states or territories, together with his sworn statement of his previous service in dentistry, detailing places and dates of employment and indicate whether or not he has ever had a license revoked or suspended. If his license has ever been revoked or suspended, then he must furnish a sworn statement detailing the circumstances thereof.

7.1(2) Each applicant must certify to the board that he has sustained no conviction of a felony or indictable misdemeanor and has committed no violation of chapter 153 of the Code or any comparable act defining unprofessional conduct or the illegal practice of dentistry in the state or territory from which he comes.

7.1(3) Each applicant may be required to personally appear before the board for interview at the regular examination meeting or such special meeting as may be fixed by the board.

7.1(4) Each applicant for an Iowa license by reciprocity hereunder must establish to the board's satisfaction that he is a member in good standing of any existing national dental association to which he would be eligible for membership.

7.1(5) Each applicant for an Iowa dental license by reciprocity may be required to pass an examination on the provisions of the Iowa dental practice chapter.

7.1(6) Any state, territory or district which grants without examination a license to practice dentistry therein to any applicant holding a license from this board shall be deemed to accord equal rights to dentists of Iowa within the meaning of section 153.21, irrespective of whether such licensure is referred to as reciprocity, endorsement, criteria approval, criteria evaluation or other term of a similar import.

7.2(153) For dental hygienists. Any dental hygienist currently licensed to practice in another state or territory which has and maintains a standard for the practice of dental hygiene substantially equal to that now maintained in this state, who shall file with the secretary of the board a duly attested certificate from the examining board or examining authority of such other state or territory in which he is licensed or registered, certifying to the fact of his licensing or registration and of his being a person of good moral character

and of professional attainments, may, upon the payment of a fee of $25, be granted a license to practice dental hygiene in this state.

7.2(1) He shall complete and file with the secretary of the board his application for such license to practice dental hygiene on Board Form No. 23, and he shall in addition attach a certified copy of any and all licenses to practice dental hygiene he may hold from other states or territories and he shall include with his application a sworn statement of his previous dental hygiene practice, detailing places and dates of employment and the names of his employers and indicate whether or not he has ever had a license revoked or suspended. If his license has ever been revoked or suspended, he shall furnish a sworn statement detailing the circumstances thereof.

7.2(2) Each applicant may be required to personally appear before the board for interview at the regular examination meeting or such special meeting as may be fixed by the board.

7.2(3) Each applicant for license as a dental hygienist shall be required to present satisfactory evidence of graduation from a school of dental hygiene approved by the board.

[Filed October 23, 1968,
amended June 14, 1972]

CHAPTER 8
MISCELLANEOUS RULES

8.1(153) Dental residents, internes or graduate students. All persons granted permission by the Iowa board of dentistry to practice as residents, internes or graduate students in board approved teaching or educational institutions offering specialty oriented courses shall be required to furnish to the board the following:

8.1(1) A written request from the superintendent, director or head of the institution in which the applicant seeks to enroll.

8.1(2) A written statement of a licensed Iowa dentist who proposes to exercise supervision and direction over said applicant, specifying in general terms the time and manner thereof.

8.1(3) All applicants herein mentioned shall be required to furnish to the board such additional information as the board may deem necessary to enable it to determine the proficiency of such applicant.

8.1(4) If said licensee leaves the service of such institution during the tenure of said residency, internship or graduate study, the authority granted by the board to said licensee shall be automatically canceled.

8.1(5) The applicant for the "Resident Dentist License" shall file his application therefor with the secretary of the board on Board Form No. 30, together with the fee of ten dollars, whereupon the board may issue such license.

8.1(6) Such licensee shall be subject to all provisions of chapter 153 of the Code and rules of the board and any violation thereof, or the failure of the licensee to perform and progress satisfactorily or receive effective supervision as determined by the board, shall be grounds for the revocation of such license after such notice and hearing as the board may prescribe.

8.2(153) Dental college faculty permits. The board may issue to such members of the faculty of the dental college eligible for licensure but not yet licensed and registered to practice dentistry or dental hygiene in this state a permit entitling the holder thereof to perform all clinical operations which a person licensed to practice dentistry or dental hygiene in this state may lawfully perform, but only within the facilities of the dental college and as an adjunct of his teaching functions therein. Such permit shall expire on the first day of July next following the date of issuance, and may be extended at the sole discretion of the board for not more than one additional year. A fee of ten dollars shall be paid by the applicant to the board on the issuance of such permit. The dean of the dental college shall certify to the board those bona fide members of the college's faculty who are not licensed and registered to practice dentistry or dental hygiene in Iowa, and shall promptly notify the board of any change in personnel on the faculty. Any faculty member so certified shall, prior to commencing his duties in the dental college, make written application to the board for such permit. Such a permit shall be valid only as long as the holder thereof remains a member of the faculty of the dental college, and shall subject the holder to all provisions of chapter 153 of the Code regulating the practice of dentistry and dental hygiene in this state.

[Filed October 23, 1968]

EDUCATIONAL RADIO AND TELEVISION FACILITY BOARD

CHAPTER 1
ORGANIZATION AND ADMINISTRATION

1.1(19A) Creation and purpose. The purpose of these rules is to give effect to the provisions of section 19A.3 to establish an efficient, effective, and uniform system of personnel administration for the state educational radio and television facility board and staff, to provide equal employment opportunity for all and career opportunities comparable to those in business and industry.

1.2(19A) Covered employees. All employees of the state educational radio and television facility board, except the educational facilities director, will be covered under the rules and regulations of this system.

1.3(19A) Administration. Under the authority of the state educational radio and television facility board, its educational facilities director will be responsible for the development and operation of the system in compliance with the objectives and intent of section 19A.3. The educational facilities director will be responsible for conducting a program of personnel administration in accordance with these rules.

1.3(1) *Records and reports.* The director will maintain an individual file on each employee that will include regular evaluation and a record of all personnel transactions affecting that individual. The director will periodically as requested, and at least annually, report a summary of such operations to the state educational radio and television facility board.

1.3(2) *Nondiscrimination.* All programs and transactions administered under these rules will be conducted on the basis of merit and fitness without discrimination or favor because of political or religious opinions or affiliations or national origin, race, sex or age except as prescribed or permitted under state and federal law.

1.3(3) *Political activity.* No employee covered under this System will engage in any partisan political activity that is prohibited by law. Chapter 16 of "The Rules of the Merit System of Iowa" will apply in regard to this agency as well. Those employees who are by law subject to the provisions of the Federal Hatch Act will be informed of such provisions and will be required to adhere thereto.

1.4(19A) Definitions.

1.4(1) *"Absence without leave"* means any absence of an employee from duty without specific authorization, either before or after such absence.

1.4(2) *"Agency"* means any legally constituted board, commission, office, authority, agency, department or other branch of state government. "The Agency" refers specifically to the state educational radio and television facility board and the staff of the Iowa educational broadcasting network.

1.4(3) *"Allocation"* means the original assignment of a position to an appropriate class on the basis of duties and responsibilities assigned and performed.

1.4(4) *"Board"* means the state educational radio and television facility board.

1.4(5) *"Class or class of position"* means one or more positions which are sufficiently similar in duties and responsibilities that each position in the group can be given the same job title, require the same minimum qualifications as to education and experience, can be filled by substantially the same test of ability or fitness, and that the same schedule of pay can be applied with equity to all positions in the class under the same or substantially the same employment conditions.

1.4(6) *"Class specification"* means a descriptive and explanatory guide reflecting distinct characteristics of duties and responsibilities normally assigned to positions allocated to the class and the minimum qualifications requisite thereto.

1.4(7) *"Classification plan"* means the orderly arrangement of positions within the classified service into separate and distinct classes, so that each will contain those positions which involve substantially similar or comparable skills, duties and responsibilities.

1.4(8) *"Classified employee"* means an employee occupying a position in the classified service or an employee currently on leave in accordance with established leave regulations.

1.4(9) *"Demotion"* means a change of a classified employee from a position in a given classification to a position in a lower classification. Normally, the lower classification will have a lower entrance salary. Demotion may be voluntary or involuntary.

1.4(10) *"Detail to special duty"* means the temporary assignment of a classified employee to perform the duties and responsibilities of a position other than the one to which he is regularly assigned without prejudice to his rights in and to his regularly allocated position.

1.4(11) *"Director"* means the educational facility's director of the state educational radio and television facility board (section 8A.18).

1.4(12) *"Examination"* means the determination of eligibility of applicants for positions in any class in the classified service.

1.4(13) *"Grievance"* means any expressed difference, dispute or controversy between an employee and the appointing authority of his representative with respect to circumstances and conditions which concern their working relationships in the agency.

1.4(14) *"Minimum qualifications"* means the requirements of training and experience and other qualifications as prescribed in the job specification for the class of position.

1.4(15) *"New position"* means a position not previously existing.

1.4(16) *"Part-time position"* means a position requiring the services of an employee for less than a standard or nonstandard work week on a continuing basis.

1.4(17) *"Pay plan"* means a schedule of salaries or hourly wages established for the several classes recognized in the state classification plan.

1.4(18) *"Position"* means a group of specific duties, tasks and responsibilities assigned by the appointing authority to be performed by one employee; a position may be part-time or full-time, temporary or permanent, occupied or vacant.

1.4(19) *"Promotion"* means a change in status of a permanent employee from a position in a lower classification to a position in a higher classification. Normally the higher classification will have a higher entrance salary.

1.4(20) *"Reallocation"* means the reassignment or change in the allocation of a position by raising it to a higher, reducing it to a lower, or moving it to another class of the same level on the basis of significant changes in the kind or difficulty of the tasks, duties and responsibilities in such position, or because of an amendment to the classification plan, and officially assigning to that position the class title for such appropriate class of position.

[Filed October 9, 1972]

CHAPTER 2
CLASSIFICATION PLAN

2.1(19A) Preparation, adoption and maintenance of the classification plan for the classified service.

2.1(1) The board ascertains the actual duties, tasks and responsibilities of all classified positions and adopts a uniform classification plan for employees in administration and programming and another plan in engineering.

2.1(2) The classification plan shall set forth for each class of position a class title, definition, examples of work performed, minimum qualifications and special requirements that are necessary for satisfactory performance in the class. Personal qualifications commonly required of an employee in any class such as good citizenship, honesty, loyalty, sobriety, industry, amiability to supervision and willingness to co-operate with associates shall be implied for entrance into any class.

2.1(3) The classification plan shall be so developed and maintained that all positions which are substantially similar and comparable with respect to kind, difficulty and responsibility of work are included in the same class; that the same means of recruitment and appropriate evaluation methods may be used in filling all positions within a class; and, that the same schedule of pay may be applied with equity to all positions in a class.

2.1(4) The board shall from time to time review the classification plan and may add, combine, divide or abolish classes or revise the specifications of existing classes or establish new classes as the needs of the classified service so indicate.

2.1(5) Each position in the classification plan shall be reviewed at intervals by the board and allocations or reallocations shall be made as deemed necessary.

2.2(19A) Creation and allocation of new positions. When a new position or positions are to be established, if an appropriate classification does not already exist, the board shall prepare a new class specification to cover the position or positions, and they shall be allocated and approved as set forth in this chapter.

2.3(19A) Status of incumbents when positions are reallocated. In all cases of reallocation, the employee in the position when it is reallocated shall be entitled to serve therein with the classified status that he had in the position before its reallocation, provided he meets the minimum qualifications for the class to which his position is reallocated or if the duties and responsibilities of the position have not appreciably changed. If ineligible for appointment to the position as reallocated, he shall be transferred, promoted or demoted by appropriate action in accordance with the provisions of these rules. However, a classified employee shall not be required to meet the minimum qualifications, if his position is reallocated to a lower or comparable class. In any case in which the incumbent is ineligible to continue in the position and he is not transferred, promoted or demoted, the provisions of these rules regarding separation shall apply.

2.4(19A) Class specifications. The class specification along with classification standards shall be considered in allocating positions and specifications shall be interpreted as follows:

2.4(1) Class specifications are descriptive only and are not restrictive. The use of a particular expression of duties, qualifications, requirements or other attributes shall not be held to exclude others not mentioned but germane to the class concept.

2.4(2) In determining the class to which any position shall be allocated, the specification for each class shall be considered as a whole. Consideration shall be given to the general duties, specific tasks, responsibilities required and relationship to other classes as affording together a picture of the positions that the class intended to include.

2.4(3) A class specification shall be construed as a general description of the kinds of work characteristic of positions properly allocated to that class and not as prescribing what the duties of any position shall be, nor as limiting the expressed or implied authority of the agency, now or hereafter vested with right to prescribe or alter the duties of any position.

2.4(4) The fact that all of the actual tasks and duties performed by the incumbent of a position do not appear in the specification of a class to which the position has been allocated shall not be taken to mean that the position is necessarily excluded from the class, nor shall any one example of a typical task taken without relation to other parts of the specification be construed as determining that a position should be allocated to the class.

2.4(5) Changes in minimum qualification requirements shall have no effect on the status of incumbent employees.

2.5(19A) Position descriptions and notification of change in position content. Position descriptions shall be supplied and kept current by the director for each position under his jurisdiction. Any major changes in position content that are made will be placed on file and notification of these changes shall be brought to the attention of all employees occupying these positions.

2.6(19A) Assignment of lead-worker duties. Whenever a classified employee, who is performing the same duties as other employees in his class, is assigned limited supervisory duties such as distribution of work assignments, maintaining a balanced work load among a group and keeping record of work, production or attendance over employees in the same class or a class having the same entrance salary and which duties do not justify reallocation to a supervisory class in a higher pay range, the appointing authority may request the director to approve the position as a "lead-worker position."

[Filed October 9, 1972]

CHAPTER 3
PAY PLAN

3.1(19A) Preparation and adoption of the pay plan. The director shall prepare and recommend to the state educational radio and television facility board for their adoption a pay plan for all classes of positions.

3.1(1) *Factors to be considered in preparing the pay plan.* Pay grades shall be determined with due consideration to pay grades for other classes, the relative difficulty and responsibility of work in the several classes, recruiting experience, the availability of employees in particular occupational categories, prevailing rates of pay for similar employment in private and other public jurisdictions in the area, employee turnover, cost of living factors, the financial policies and economic considerations of the state. The minimum and maximum rates of pay assigned the several classes of positions shall be those which most nearly reflect these factors.

3.1(2) *Adoption by commission.* The board shall adopt the pay plan, or a revision thereof, and forward same to the Iowa merit employment commission for final approval.

3.2(19A) Pay plan review and amendment. The director, at his discretion, but not less than annually, shall review the pay plan, giving consideration to factors as specified in 3.1(1) of these rules, and may recommend revisions to the board. Revision in the pay plan shall be made in the same manner as the adoption and approval of the original pay plan under 3.1(19A). When the director determines that a pay grade assignment for a class or position is not competitive or is not properly related to the overall pay plan, the director may recommend the reassignment of the class of position to a different pay grade. Revision in the pay grade assignment for the class of position shall be made in the same manner as the adoption and approval of the original pay plan under 3.1(19A).

3.3(19A) Content of the pay plan. The pay plan for the classified service shall include:

3.3(1) For employees in administration and programming, the schedule of numbered pay grades with the minimum, maximum and intermediate steps for each pay grade, established by the merit employment department.

3.3(2) A special schedule of pay grades for engineering employees.

3.3(3) A list of classes of positions by occupational groups and the pay grade to which each class is assigned.

3.4(19A) Pay of employees. Each employee shall be paid at one of the steps of pay set forth in the pay plan for the class of positions to which the position he occupies is allocated except as provided in these rules or when otherwise authorized by the board. Such pay shall constitute the total compensation for the employee for services rendered to the state.

3.5(19A) Administration of the pay plan.

3.5(1) *Entrance rate of pay.*

a. Appointment based on scarcity of qualified applicants. When the economic or employment conditions make recruitment of eligibles at the minimum rate for the class of position difficult or impossible, the director may authorize appointment of qualified eligibles at a higher rate within the pay grade for the class of position not to exceed step "C" of the pay grade. All other current, new or promoted employees in the class for whom conditions are similar shall be treated in the same manner.

b. Appointment based on overqualification or exceptional qualifications. The director may offer appointment above the entrance rate to qualified eligibles who exceed the minimum qualifications of the class or who possess outstanding and unusual experience for the class of position. All other current, new or promoted employees who possess similar qualifications shall be treated in the same manner.

c. Appointment below minimum step "A" of the pay grade. The director may authorize appointment below the minimum step "A" of the pay grade for a class as follows:

(1) *Career development appointment.* When a career development appointment is made, rules set forth in 4.5"*f*"(1) of the Iowa merit system rules shall apply.

(2) *Co-operative training and trainee appointments.* When co-operative training and trainee appointments are made, rules set forth in 4.5"*f*(2) of the Iowa merit system rules shall apply.

(3) *Budget limitation.* If the director is unable to make appointments at the minimum step "A" of the pay grade for a class because of budget limitations, he may authorize appointment at such step below the minimum as budgetary conditions will permit.

3.5(2) *Pay increases.* A standard pay increase is a periodic increase in pay from one step to a higher step within the pay grade for a class.

a. A basis for pay increases. Pay increases shall not be automatic or retroactive. All such pay increases shall be upon specific recommendation of the director and shall be based on standards of performance and other pertinent data.

b. Pay increase eligibility. Employees in administration and programming shall be eligible and may be given consideration for a one-step pay increase at the beginning of the pay period following the satisfactory completion of periods of service prescribed below for progression from step to step within the pay grade for the class to which their positions are allocated. The periods of service shall be exclusive of time spent on educational leave, leave without pay, and periods during which service was rated less than satisfactory as reflected by an official performance rating. Periods of satisfactory service required for eligibility are as follows:

(1) Progression from step "A" to "B" and step "B" to "C" - six months.

(2) Progression from step "C" to "D", step "D" to "E" and step "E" to "F", "F" to "G" and step "G" to "H" - 12 months.

(3) Employees in engineering are eligible for pay increase each year on July 1 until they reach the maximum of the appropriate class.

c. Anniversary date. Any type of pay increase given an individual other than an adjustment incident to an upward revision of the range of the class in which he is employed, an exceptionally meritorious service raise, pay for lead worker duty assignment or special duty assignment shall establish a new anniversary date for purposes of eligibility for merit increases. When an employee in administration or programming is appointed to the classified service, the increase date shall be established on the first day of the pay period after either January 1 or July 1, depending on which occurs first after the employee's initial six months of employment. The increase date for engineering personnel shall be July 1 only.

3.5(3) *Pay increase for exceptionally meritorious service.* A pay increase of one step within the pay grade for the class may be made for exceptionally meritorious service, in addition to pay increases provided in 3.5(2), upon recommendation of the director and approval of the board. Exceptionally meritorious service pay increases shall be governed by the following:

a. The employee must have served in the position for at least 12 months.

b. Written justification, setting forth in detail the nature of the exceptionally meritorious service rendered, must be submitted by the director to the board and approved in advance of granting the pay increase.

c. No more than one exceptionally meritorious service pay increase may be granted in any 12-month period to an individual.

3.5(4) *Pay increase upon promotion.* A promotion means a change from a position in one class to a position in another class having a higher minimum step "A".

a. An employee who is promoted shall have his pay increased to the minimum step "A" of the pay grade for the higher class if his rate of pay before promotion falls below said minimum "A" step. In the case of overlapping pay grades and the employee's rate of pay is at or above the minimum "A" step of the pay grade for the class to which he is promoted, he shall receive a one step promotional pay increase.

b. For promotions between classes with a one or two pay step differential between the pay grades, the director may approve a one-step promotional increase.

c. For promotions between classes with a three or more pay step differential between the pay grades, the director may approve a two-step promotional increase.

d. The director may, for employees who fall within 3.5(1)"*b*", as with a new employee, approve an additional step promotional increase.

3.5(5) *Pay for lead worker duty assignments.*

a. An employee who is occupying a position which has been classified by the director as a lead worker position, as provided in these rules, shall be eligible for a one-step pay increase in addition to his regular step in the pay grade for the class to which the position is allocated.

b. At such time as the employee is removed from the position or the lead worker duties are removed therefrom, the employee's pay shall be reduced one step to his regular step in the pay grade for the class.

3.5(6) *Pay upon assignment to special duty.* When an employee is assigned to special duty in another position, as provided in these rules, his pay may be increased to the minimum step he could receive upon promotion to such position, provided that:

a. Any such temporary increase granted shall not affect the employee's eligibility for pay increases in his regular position.

b. At the expiration of the assignment to special duty, his pay shall revert to his authorized rate in his regular position.

3.5(7) *Pay upon demotion.* An employee who is demoted shall have his rate of pay fixed by the director with the approval of the board on any step within the pay range for the class of position to which he has been demoted which does not exceed his last rate of pay in the pay range for the class of position from which demoted.

3.5(8) *Pay adjustments incident to pay grade reassignments.*

a. In the event a class is assigned to a higher pay grade, the following pay adjustments will be made to employees occupying position of that class:

(1) If the new pay grade assigned is one or two grades above the prevailing pay grade assignment, all employees in positions of that class shall be increased at least one step if their pay is on an intermediate or maximum step of the original pay grade or to the new minimum step in cases where the one-step adjustment is not sufficient.

(2) If the new pay grade assigned is three or more grades above the prevailing pay grade assignment, all employees shall be increased at least two steps if their pay is on an intermediate or maximum step or to the new minimum step in cases where the two-step adjustment is not sufficient.

b. In the event a class is assigned to a lower pay grade, the rate of pay of an employee may remain the same.

3.5(9) *Pay upon reassignment.* An employee who is reassigned from a position in one class to a different position in the same class or to a position in a different class in the same pay grade shall not be eligible for a pay increase nor shall such reassignment have any effect on his pay increase eligibility.

3.6(19A) Overtime. Time that an employee works in excess of the prescribed number of hours for a standard work week or an extended work week shall be credited to the employee as overtime.

3.6(1) *General policy on overtime.*

a. Overtime shall be held to a minimum consistent with the needs of the service.

b. All overtime work must be authorized by the director in advance of the performance of the work.

c. Normally, compensatory time off shall be granted for overtime; however, the director may approve cash payment for overtime as follows:

(1) To any employee eligible for overtime payment under the provisions of the fair labor standards Act irrespective of whether the position is subject to said Act of the Code.

(2) To any employee eligible for overtime payment under 3.6(5) pertaining to the overtime accumulation. It shall be the responsibility of the director to determine whether or not an employee is eligible for overtime payment under the provisions of the fair labor standards Act.

d. Compensatory time off shall be granted as soon as possible after overtime is earned. Compensatory time off must be granted within one year of the date earned. Within the time limitations specified herein, the director shall respect the wishes of the employees relative to the time at which compensatory time off may be used, insofar as he determines the needs of the service will permit.

e. Additional pay for overtime work shall not be considered as part of the employee's base pay.

f. All cash overtime payments shall be separately recorded on the payroll.

g. Any additional cash compensation shall cease to be payable, without right of appeal, when-

ever the employee's work week is reduced to 40 hours.

h. The state is considered as one employer for the purposes of determining the number of hours worked.

i. Positions shall be categorized by the director for purposes of determining eligibility for overtime as follows:

(1) *Standard work week.* A standard work week shall include positions which require 40 hours of work in seven consecutive days on regular daily assignments or of 80 hours of work in 14 consecutive days for shift assignments.

(2) *Extended work week.* Extended work weeks shall be approved by the director and may be established on increments of two additional hours per week up to 48 hours. The rate of pay for the position shall be increased one step for each two-hour increment above 40 hours per week. Upon reduction of the work week, the pay of the incumbent employee shall be reduced accordingly, without the right of appeal.

(3) *Nonstandard work week.* The nonstandard work week shall include all positions not assigned to the standard work week and the extended work week categories. Such positions shall be considered to be compensated on a total job basis.

3.6(2) *Rate for crediting overtime work.* An employee who works overtime shall be credited one hour for each hour worked in addition to the prescribed work week for the position he holds.

3.6(3) *Rate for granting compensatory time off.* An employee shall be granted one and one-half hours of compensatory time off for each hour of overtime earned except on holidays when the rate shall be double time for each hour of overtime earned.

3.6(4) *Rate of pay for overtime work.* Employees shall be compensated at the regular rate of pay for their position for each hour of overtime worked.

3.6(5) *Overtime accumulation.* Overtime may be accumulated up to an amount equal to four times the number of hours in the prescribed work week.

a. If an employee has accumulated overtime equal for four times the number of hours in his prescribed work week, he shall not be eligible to earn further overtime until his accumulated hours of overtime are reduced or cash compensation for additional overtime is approved, in accordance with 3.6(1)"c".

b. If overtime has not been liquidated within one year of the date of accrual, the employee shall be compensated in cash for that overtime.

c. If an employee is transferred or promoted from one agency to another or separates or retires from the classified service, he shall be compensated in cash by the agency from which he is so transferred, promoted, separated or retired, for such accumulated overtime as cannot be liquidated by compensatory time off prior to the effective date of such action.

3.6(6) *Overtime computation.* For purposes of computing overtime, total hours worked shall exclude all absences from duty, leave without pay and time specifically allowed for meals. Time during which the employee is excused from work because of holidays, sick leave, vacation or compensatory time off shall be construed as time worked.

3.6(7) *Overtime records.* The agency shall, in addition to other time records, include as a minimum each overtime accrual and compensation, whether time off or cash, separate from regular work and compensation.

3.7(19A) *Pay differential.* The board may authorize a pay differential for a position within a class due to special duty requirements related to the position, but not to the class as a whole. This differential shall be over and above the pay within the pay grade for the class or position and shall be paid only as long as the employee occupies the particular position or the class is used under the circumstances which have necessitated the differential. The request shall be submitted in writing by the director and shall outline all facts as to the particular need.

[Filed October 9, 1972]

CHAPTER 4
APPLICATIONS, EXAMINATIONS AND EVALUATIONS

4.1(19A) Applications. Applications for employment will contain no question so formed as to elicit any information concerning national origin, race, sex, or political or religious affiliation, and the truth of statements made on the application will be certified by the signature of the applicant.

4.2(19A) Examination and evaluation. Advertising for a processing of application for employment will be carried out on an open, competitive basis. Examination and evaluation procedure must be approved by the director.

4.3(19A) Character of examinations and evaluations. Examinations may include written, oral, physical or performance tests or any combination of these. They may take into consideration such factors as education, experience, aptitude, knowledge, character, physical fitness or other qualifications or attributes which enter into the determination of the relative fitness of applicants. Such examinations will consist of an evaluation of a statement of training and experience and such other materials as the applicant may be required to submit as evidence of fitness for a position and may include oral interviews for evaluation of personal and technical qualifications and

evaluations of other factors which enter into the determination of the relative fitness of applicants. For positions involving unskilled, semi-skilled, domestic, attendant or custodial work, where the character or conditions of employment make it impractical to supply the needs of the institutions through procedures prescribed above, the director may adopt or authorize the use of such other procedures as he determines to be appropriate which will assure the selection of such employees on the basis of merit and fitness. Examinations so given will conform with and utilize such methods, form and techniques as the director may require.

4.4(19A) Announcement of vacancies. Announcement of vacancies will be made publicly and will include the title, the current salary range, and the minimum qualifications for the class; the date; and the manner in which applications can be made. Announcements of vacancies will, in addition to other publication or distribution prescribed by the director, be displayed in the agency's business office and distributed to all the state employment offices of the Iowa employment security commission.

4.5(19A) Eligibility to compete in examinations. Anyone who applies for employment in a specific class at the agency and who meets the minimum qualifications prescribed for that class, and who is not rejected or disqualified under 4.6(19A), will have the right to consideration for employment in that class.

4.6(19A) Rejection or disqualification of applicants. The director may reject any applicant or, after examination, may refuse to certify any candidate if it is found that the person:

1. Does not meet the minimum required qualifications for that class;
2. Is so disabled that he cannot perform the duties of the job;
3. Habitually uses narcotics or uses intoxicating beverages to excess;
4. Has made a false statement of material fact in his application;
5. Has information concerning the examination to which he is not entitled;
6. Has reached or will within one year reach normal retirement age;
7. Has been convicted of a felony or an indictable misdemeanor which makes him unsuitable for employment in a particular class or position;
8. Has been dismissed from private or public service for a cause that would be detrimental to his employment with the agency. A disqualified applicant or eligible will promptly be notified of such action at his last known address. A disqualified applicant or eligible may request review of the reason for his disqualification. Such request will be in writing and upon receipt, the director will give full consideration of the request and notify the applicant of his decision in writing.

[Filed October 9, 1972]

CHAPTER 5
ELIGIBILITY AND SELECTION

5.1(19A) Eligibility lists. Insofar as possible, eligibility lists will be established and maintained by the director to fill the employment needs of the agency. Vacancies shall be filled by re-employment, promotion or original appointment. Provision is hereby made for three corresponding kinds of eligibility lists, each of which will be maintained by class position.

5.1(1) Re-employment lists will consist of the names of permanent employees who have been laid off or demoted without prejudice in accordance with these rules and will be maintained in the reverse order of layoff or demotion.

5.1(2) Original entry and promotional lists will be established as a result of competitive evaluations and will consist of the names of all applicants who have qualified and who have not been disqualified in accordance with these rules.

5.1(3) The names of persons acceptably qualified as indicated by competitive examinations or evaluations shall be placed on the eligible lists in order of their final rating, starting with the highest. All such lists shall be merged prior to use.

5.1(4) If a vacancy occurs or if new positions are established and a new employee is needed, the director shall select any one of the top three available persons whose names have been placed on the merged list.

5.2(19A) Removal of names from eligibility lists. In addition to the causes for rejection or disqualification set forth under 4.6(19A), the director may permanently or temporarily remove names from eligible lists for the following reasons:

1. On receipt of a written statement from the eligible that he no longer desires consideration for a position in the class.
2. Appointment from such eligible list to fill a permanent position.
3. Failure to respond within five working days to the written inquiry of the director relative to availability for appointment.
4. Declination of appointment without good cause or under conditions which the eligible previously indicated he would not accept.
5. Failure to appear for a scheduled employment interview or to report for duty within a reasonable time specified by the director.
6. Failure to maintain a record of his current address with the director as evidenced by the return of a properly addressed, unclaimed letter or other evidence.
7. Willful violation of any of the provisions of these rules.

5.3(19A) Duration of eligibility lists. Eligibility lists will exist for a period of time no less than one year and no more than three years. Names may be added to or deleted from eligibility lists in accordance with these rules. The names of

applicants who have not been appointed or otherwise removed from lists will be removed at the termination of the designated period of time.

5.4(19A) Notification of removal from eligibility lists. Applicants whose names are removed from eligibility lists for any reason other than 1 and 2 in 5.2(19A) will be immediately notified of such removal in writing by the director.

5.5(19A) Precedence of eligibility lists. For appointment to permanent positions, eligibility lists will be used as follows:

5.5(1) Re-employment lists, including the names of qualified employees who may have accepted demotion in lieu of layoff, will supersede promotional and original entry lists.

5.5(2) In the absence of re-employment lists, vacancies will be filled by the internal promotion of qualified employees in accordance with these rules whenever practical and feasible.

5.5(3) Original entry eligibility lists will follow re-employment and promotion in the order of precedence.

[Filed October 9, 1972]

CHAPTER 6
APPOINTMENTS

6.1(19A) Appointments. All vacancies in part-time or full-time positions shall be filled as provided by the merit Act and these rules. All appointments shall be made at the minimum salary for the class of position, unless otherwise provided in these rules. No appointment shall be made to any position or shall the position otherwise be encumbered until the position has been classified in accordance with these rules and the comptroller has certified as to the availability of funds.

6.2(19A) Probationary appointment. Probationary selections shall be made for each position from the three highest available names on the appropriate merged eligibility list in accordance with chapter 5 of these rules. Appointments shall be made only to positions authorized and established on a permanent basis, subject to the successful completion of a one-year probationary period. Probationary appointment shall not confer upon the appointee any privilege or right of promotion, transfer, re-employment, reinstatement or demotion to any other position, nor does it confer any right of appeal.

6.3(19A) Provisional appointment. If there are fewer than three persons available for employment from the appropriate eligible list, the director may fill the position or positions pending examination and the establishment of an adequate eligible list. If such person(s) meet(s) the qualifications as to training and experience for the class of position, such person or persons may be provisionally appointed to fill the existing vacancy or vacancies until an adequate eligible list is established and appointments made therefrom. No provisional appointment shall be continued for more than 30 calendar days after an adequate eligible list has been established nor for more than 180 calendar days from the date of appointment. No provisional appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or reinstatement to any other position, nor shall a provisional employee be entitled to vacation under these rules.

6.4(19A) Intermittent appointment. If the work of the agency requires the service of a person or persons on an intermittent or irregular basis, the director shall select such person or persons who have signified their willingness to accept intermittent appointment. Such intermittent appointment shall not exceed 180 calendar days or 1040 hours in any 12-month period. Appointees may be placed on leave without pay at the end of the appointment and may be returned to duty the following year in the same class at the agency's determination. A period of intermittent service shall not constitute a part of the probationary period except where such service immediately precedes probationary appointment within the agency. The acceptance or refusal of intermittent appointment shall not affect an eligible's standing on an eligible list or his eligibility for a probationary appointment. No intermittent appointment shall confer upon the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or any other right to any other position, nor to vacation under these rules.

6.5(19A) Career development appointment. When a position within a class cannot be filled because of the lack of qualified eligible applicants meeting the minimum qualifications for the class, the director may make a career development appointment to a person meeting the minimum education requirements, but who lacks the experience necessary to qualify. Career development appointments shall be limited to one year; appointees must meet the minimum experience requirements upon expiration of the appointment; and, appointees must have passed the appropriate examinations provided before appointment. Appointment does not confer on the appointee any privilege or right of promotion, transfer, re-employment, reinstatement or demotion to any other position, nor does it confer any right of appeal upon termination of the appointment. Vacation and sick leave shall be in accordance with probationary appointment.

6.6(19A) Reinstatement to previous class of position. A permanent employee, who has resigned while in good standing or who has been separated for other than good cause as outlined in these rules, shall be eligible for reinstate-

ment to his former class of position or to a lower class of position within a period of time equivalent to his period of continuous previous service, not to exceed two years from the date of separation - provided he has been certified by the director as meeting the current minimum qualifications as to training, experience, knowledge, skills and education for the class of position to which he is reinstated.

6.7(19A) Emergency appointment. When an emergency exists in order to preserve the public peace, health or safety or to prevent the stoppage of public business, requiring the immediate services of one or more persons, the director may appoint a person or persons to a class of position without regard to other provisions governing appointments. In no case, however, shall the same person be appointed under this provision for more than a total of 60 calendar days during any 12-month period. No emergency appointment shall confer on the appointee any privilege, right of appeal or right of position, transfer, promotion, demotion, reinstatement or any other right to any classified position, nor shall an emergency employee be entitled to vacation or sick leave under these rules.

6.8(19A) Work test appointment. In accordance with 4.3 of these rules, the director may appoint persons to positions involving unskilled or semiskilled, domestic, attendant or custodial work on the basis of a competitive working test performance for the length of the probationary period in accordance with these rules. Such employees shall acquire permanent status and be subject to the same rules as other probationary employees.

6.9(19A) Seasonal appointments. When the services to be rendered in a position occur, terminate and reoccur periodically or annually, the director may make a seasonal appointment to fill only positions which are authorized and established as seasonal positions for a specified period each year, not to exceed eight months in any twelve-month period, on a continuing basis, year after year. Appointees shall be placed on leave without pay upon completion of each period of seasonal employment and may be returned to duty the following season in a position in the same class the following year, if recommended by a satisfactory service review. No seasonal appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or reinstatement to any classified position nor shall a seasonal employee be entitled to vacation under these rules.

6.10(19A) Co-operative training appointment. The director may make co-operative training appointments to one or more permanent positions. An appointee must be certified to be a bona fide student in an accredited educational institution, pursuing a study program directly related to the work of the position and have successfully completed one year of the study program for which he is enrolled. Two co-operative training appointments may be made to each authorized position and the appointee(s) shall work a period not to exceed a combined total of eight hours a day. No appointee shall be employed more than three semesters, or the equivalent, in any two-year period. No co-operative training appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, promotion, demotion or reinstatement, nor shall a co-operative training employee be entitled to vacation under these rules.

6.11(19A) Trainee appointment. When there is a need for services which can be performed by student trainees, the director may make a trainee appointment of a person who does not meet the minimum education and experience requirements as follows:

6.11(1) *Appointments for half-time or less.* May be made to bona fide students who are currently enrolled in a course of study which will qualify them for the position to which appointed within one year and who have been certified by the educational institution as to status and course of study. Appointments shall be made only to permanent or temporary positions and not to exceed 180 calendar days or the equivalent in part-time employment.

6.11(2) *Appointments exceeding half-time.* May be made to bona fide students pursuing a course of training which will qualify them for appointment to the position to which appointed. Such appointments shall be made only to authorized and established permanent or temporary positions and shall not exceed 180 calendar days in any 12-month period. Appointees must be at least 14 years old and possess working permits if required by law.

6.11(3) No trainee appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, promotion, demotion or reinstatement, nor shall a trainee employee be entitled to vacation under these rules.

6.12(19A) Project appointment. When it is known in connection with a particular job, project grant, or contract that the services of an employee will be needed only for a limited duration, a project appointment may be made. Such an appointment will not be made for more than twelve months; however, it may be extended for one additional twelve-month period on the basis of a limited need that could not otherwise be efficiently and effectively filled. No project appointment shall confer upon the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or any other right to any classified position.

[Filed October 9, 1972]

CHAPTER 7
PROMOTIONS, DEMOTIONS, TRANSFERS AND TERMINATIONS

7.1(19A) Promotions.

7.1(1) *Selection.* In accordance with these rules and as far as practical and feasible, all vacancies will be filled by the promotion of qualified permanent employees based on individual performance with due consideration for length of service and capacity for the new position.

7.1(2) *Qualifications.* A candidate for promotion must be certified by the director as possessing the qualifications required in the job specification for the class to which the candidate wishes to be promoted, and must qualify for the new position by promotional competition.

7.1(3) *Promotional eligibility lists.* The names of all permanent employees who are eligible for competitive promotional consideration will be placed on appropriate promotional eligibility lists. The duration of a promotional eligibility list will be the same as that established for the original entry list for the same classification.

7.1(4) *Promotion by competitive evaluation.* Vacancies will be announced in accordance with 4.4(19A) and application will be open to all qualified permanent employees of the agency. Selection will be made in accordance with the rules in chapter 5.

7.1(5) The director may approve a noncompetitive promotion with a department and certify for such a promotion a permanent employee who meets the qualifications for the class if the reasons specified are in the interests of efficiency and effectiveness in the operation of the department.

7.2(19A) Transfers.

7.2(1) *Reassignments.* An employee may be reassigned at any time from one position to another in the same class.

7.2(2) *Special assignment.* When the services of an employee are temporarily needed in a position in the same or a different class within the institution other than the position to which the employee is assigned, he may be given special assignment by the director to perform the duties of such position for a period not to exceed six months without change in title or status.

7.3(19A) Demotion (voluntary). If, for any reason, an employee wishes to be demoted to a position in a lower class, the director may upon written request from the employee effect such a demotion provided the employee is certified as meeting the qualifications required for the lower class. Voluntary demotion will not be subject to appeal.

7.4(19A) Terminations.

7.4(1) *Resignations.* To resign in good standing, an employee must notify the director of his intention to resign in writing at least ten working days prior to the effective date of resignation, except in cases where the director agrees to a shorter period of notice. An employee who fails to give proper notice may be barred from future reinstatement as provided for in these rules. Employees who resign will have no rights of appeal under these rules.

7.4(2) *Retirement.* Employees who are terminated at the normal retirement age prescribed by the agency or who retire voluntarily in accordance with 7.4(1) will be considered to have terminated in good standing and without prejudice and will have no rights of appeal under these rules.

7.4(3) *Reduction in force.* The director may layoff an employee when he deems necessary because of shortage of funds or work, a material change in duties or organization or abolishment of one or more positions. Reduction in force will be accomplished in a systematic way and reviewed and approved by the board for its conformance to these rules:

a. Reduction in force will be made by class of position.

b. Reduction in force may be made by organizational units within the agency.

c. The order of reduction in force will be by type of appointment as follows: Emergency, temporary, irregular, provisional, permanent.

d. Each employee affected by a reduction in force will be notified in writing of the layoff and the reasons therefore at least ten working days prior to the effective date of the layoff.

e. There will be competition among all employees in the class of position or positions affected by the layoff by reasons of a reduction in force based on a retention points system which shall be made up of a combination of points for length of service and performance evaluation of all employees in the class within the agency. Each class shall be rated on a uniform performance evaluation scale and each employee shall be informed of his personal performance evaluation rating prior to a reduction in force which removes or demotes him. Length of service and performance evaluation points shall be calculated as follows:

(1) Length of service credit shall be allowed at a rate of one point for each month of service. For the purpose of computing length of service credits, all continuous period of employment between the date of original appointment and the date of layoff shall be included. Approved leaves of absence without pay, suspensions without pay and layoffs for periods exceeding 14 consecutive days shall not be counted; however, the periods of service immediately preceding and that immediately following such leaves of absence and layoffs shall be counted. An employee who is returned to duty following approved military duty shall have

all periods of military service counted as continuous service. Breaks in service, where the employee is off of the payroll of an agency for more than 14 days shall be considered as a new employment. Part-time employment shall receive pro rata service credit.

(2) Performance evaluation credit shall be allowed at a rate of one point for each month of service rated as satisfactory under a performance evaluation plan approved by the board. An additional two points shall be added for each month of service during which performance is rated one or more levels above satisfactory. No credit shall be allowed for service rated less than satisfactory.

(3) Reduction in force retention points shall be the total of the length of service credit points and the performance evaluation credit points.

f. Employees shall be placed on the layoff list beginning with the employee with the highest number of retention points. Employee layoffs shall be made from the layoff list in inverse order. Copies of the computation of the length of service credits and performance evaluation credits shall be furnished to the employees.

g. The reduction in force formula approved by the director will be posted so that all employees will have access to it.

h. An affected employee may appeal a reduction in force by filing, within five days after notification as provided in paragraph "*d*" of this subrule, a written grievance with the director (see Chapter 9). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

i. A permanent employee in a class of position to which layoffs are to be effected may, in lieu of layoff, elect voluntary demotion to a position in the next lower class of position in the same series, or, in the absence of a lower class in the same series, to a class of position which the employee has formerly occupied while in the continuous employment of the institution. Such demotion or the occupying of a formerly held position will not be permitted, however, if the result thereof would be to cause the layoff of another permanent employee. To exercise the right of voluntary demotion or to occupy a formerly held position in lieu of layoff, the employee must have the approval of the director.

[Filed October 9, 1972]

CHAPTER 8
DISCIPLINARY ACTIONS

8.1(19A) Causes for disciplinary action. All employees may be subject to disciplinary action for any of the reasons specified in chapter 19A.9(16) of the Code.

8.2(19A) Disciplinary actions. Disciplinary action will be reasonable, timely and related in severity to the seriousness of the offense; however, this will not preclude reasonable penalties of varying severity for an accumulation of offenses.

8.2(1) *Suspension.* The director may, for cause in accordance with 8.1(19A), suspend any employee for such length of time as he considers appropriate; but not to exceed ten days at any one time or 20 days in any 12-month period. He will inform the affected employee of the suspension and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the suspension will be maintained in the employee's personal file. The employee may appeal the action directly to step #2 of the grievance procedure specified in 9.3(19A). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

8.2(2) *Reduction of pay within grade.* The director may, for cause in accordance with 8.1(19A), reduce the pay of an employee to a lower step within the pay grade assigned to the class of position. He will notify the affected employee of the reduction, the reasons therefor and the duration thereof, in writing within 24 hours of the time the action is taken. A copy of the reduction notice will be maintained in the employee's personal file. The employee may appeal the action directly to step #2 of the grievance procedure specified in 9.3(19A). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

8.2(3) *Demotion.* The director may, for cause in accordance with 8.1(19A), demote an employee to a vacant position in a lower class for which he qualifies. He will notify the affected employee of the demotion and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the notice of demotion will be maintained in the employee's personal file. The employee may appeal the action directly to Step #2 of the grievance procedure specified in 9.3(19A) If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

8.2(4) *Discharge.* The director may, for cause in accordance with 8.1(19A), discharge any employee. He will notify the affected employee of the discharge and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the notice of discharge will be maintained in the employee's personal file. The employee may appeal the action directly to Step #2 of the grievance procedure specified in 9.3(19A). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

[Filed October 9, 1972]

CHAPTER 9
GRIEVANCES AND APPEALS

9.1(19A) Appeals on position classification. A permanent employee may initiate a request for a review of the classification of his position to the director. Within ten days after the receipt of a written request from an employee, the director or his representative will discuss the request with the employee and will inform him of its disposition. If the employee is not satisfied with the decision, he may request that the director of administrative services review his classification. The director of administrative services will conduct such investigation as he deems necessary to determine the proper allocation of the position, and will notify the involved parties of his decision within 45 days after receipt of the appeal. The decision of the director of administrative services will stand until significant changes in the duties and responsibilities of the position can be shown.

9.2(19A) Appeals on application, examination and certification procedures. Any applicant may appeal an action which he alleges to be in violation of these rules concerning applications, examinations or certification. Appeals may also be filed in regard to alleged discrimination and veterans preference, but not in cases where a position has been abandoned or where the individual has resigned or retired. The aggrieved applicant will first discuss the matter with the director and, if not satisfied with the explanation and decision given, may within 20 days after the occurrence of the alleged violation file a written appeal with the director at Step #3 of the grievance procedure provided in 9.3(19A). If the applicant is not satisfied with the decision rendered at that step, he may pursue his appeal in accordance with the grievance procedure.

9.3(19A) Grievances. Disputes or complaints by permanent employees regarding the interpretation of application of institutional rules governing terms of employment or working conditions (other than general wage levels) will be resolved in accordance with the following procedure:

Step #1. A dissatisfied employee will first discuss his problem with his immediate supervisor. It is presumed that the majority of disputes, complaints or misunderstandings will be resolved at this point. If the employee is still dissatisfied after such discussion, he may within ten days after the occurrence of the matter leading to his dissatisfaction or within ten days after such time that the employee has, or could reasonably be expected to have, knowledge of such occurrence, file a written grievance with his immediate supervisor. The supervisor will review the grievance with the employee and will transmit his decision to the employee in writing within five days after receiving the grievance.

Step #2. If the employee is not satisfied with the decision of his supervisor, he may within five days after receiving that decision appeal it to the director. Such an appeal will be in writing and will contain all of the information included in the initial grievance, the decision of the supervisor, and any other pertinent information the employee may wish to submit. The appeal will be signed and dated by the employee. The director will investigate the grievance and will give the employee or a representative of his choosing the right to present his case orally. The director may affirm, reverse or modify the supervisor's decision and will notify the employee of his decision in writing within ten days after receiving that appeal.

Step #3. If the employee is not satisfied with the decision of the director, he may within five days after receiving that decision, appeal it to the director for transmittal to the board. The appeal will be in writing and will include all of the information included in the initial grievance and subsequent appeals, all the decisions related thereto, and any other pertinent information the employee may wish to submit. The appeal will be signed and dated by the employee. The board will inform both parties in writing of its decision within 30 days after the appeal is filed with the director.

Step #4. If the employee is not satisfied with the board's decision, he may within five days after receiving that decision request that the director of administrative services review the written grievance. Said review shall be provided within 30 days and shall be final. The director of administrative services may sustain the ruling of the board, or direct a new hearing be held by the board within 30 days in which he will serve as arbitrator.

A written grievance will contain a brief description of the complaint or dispute and the pertinent circumstances and dates of occurrence. It will specify the rule which has allegedly been violated and will state the corrective action desired by the employee.

At each step of the grievance procedure, the employee may be represented by one or two persons of his choosing. The name of such representatives will be noted on the written grievance and on each subsequent appeal. Presentations, reviews, investigations and hearings held under this procedure may be conducted during working hours, and employees who participate in such meetings will not suffer loss of pay as a result thereof.

If an employee does not appeal a decision rendered at any step of this procedure within the time prescribed by these rules, the decision will become final. If an agency representative does not reply to an employee's grievance or appeal within the prescribed time, the employee may proceed to the next step. With the consent of both parties, any of the time limits prescribed in these rules may be extended.

The board chairman will establish procedures for the conduct of the hearing in a fair and informal manner that will afford each party reasonable and ample opportunity to present his case and to rebut the presentation of the other. The chairman

will be responsible for presenting the decision of the board to the involved parties within the prescribed time.

[Filed October 9, 1972]

CHAPTER 10
VACATION AND LEAVE OF ABSENCE

10.1(19A) Vacation.

10.1(1) *Computation.* An employee shall be entitled to and granted vacation with full pay computed at:

a. No vacation shall be granted for less than one year;

b. One week after completion of one year continuous employment;

c. Two weeks after completion of two years continuous employment;

d. Three weeks after completition of five years continuous employment;

e. Four weeks after completion of 12 years continuous employment;

f. Time spent in military service, within the four-year time limit under the military training and service act, shall be considered continuous service, provided the classified employee left an agency of state government to enter the military service and returned to the state unit within the 30-day period following his military discharge.

10.1(2) *Subject to the following conditions:*

a. Vacation leave must be applied for by the employee and may be used only when approved by the agency director, who shall designate such time or times when it will least interfere with the efficient operation of the agency, taking into consideration the vacation preference of the employee. Vacation need not be taken in periods of one week or more.

b. Permanent part-time employees shall accrue vacation leave in an amount proportionate to that which would be accrued under full-time employment.

c. Vacation leave shall not accrue to any employee on leave without pay, suspension, layoff or educational leave.

d. An employee who is transferred from one state agency or department shall be credited with the vacation leave he has accumulated.

e. Any employee who is separated from the state employment by layoff, resignation, death or otherwise shall be paid or shall have payment made to his estate, for any unused vacation leave accumulated to his credit on a calendar day basis.

f. All earned accumulated vacation leave shall be paid to an employee before he is granted leave without pay, except as otherwise provided in these rules.

g. Vacation leave shall be taken upon a work day basis. Officially designated holidays falling within a period of vacation leave shall not be counted against vacation leave.

h. An employee who is discharged for good cause, or for other reasons set forth in these rules, shall not be paid for vacation leave accrued during the 12 months prior to termination.

i. Vacation leave may not be taken in advance.

j. Vacation leave shall be cumulative to twice the annual entitlement, but the agency may require an employee to take vacation leave whenever in the administrative judgment of the director such action would be in the best interests of the agency, but no employee shall be required to reduce his accrued leave to less than one week by such action.

k. Terminal leave. Vacation allowances for less than one year shall accrue at the rate:

(1) No terminal leave shall be granted for less than one year employment;

(2) Three and one-half days for each completed calendar quarter (three months) during the second year of continuous employment and through the fifth year of continuous service;

(3) Five and one-fourth days pay for each completed calendar quarter (three months) during the sixth year of continuous employment and through the twelfth year of continuous employment;

(4) Seven days for each completed calendar quarter (three months) during the 13th year of continuous service and for all subsequent years of continuous service;

(5) For any calendar quarter (three months) not completed, no vacation credit will be given;

(6) Terminal leave shall be construed to mean a normal work week.

10.2(19A) Sick leave. An employee shall be entitled to sick leave with full pay at the rate of two and one-half calendar days for each calendar month of service not to exceed 30 calendar days in a 12-month period subject to the following conditions:

1. Sick leave shall apply to a period in which the employee is incapacitated from the performance of his duties by sickness or injury, for medical, surgical, dental or optical examination or treatment, or where by reason of his exposure to contagious disease, his presence at his post of duty would jeopardize the health of others. *Disabilities caused or contributed to by pregnancy and recovery therefrom shall be covered by sick leave.

2. Sick leave shall not be used for vacation leave.

3. Sick leave shall not be taken in advance.

4. Sick leave shall not be cumulative for more than 90 calendar days.

5. In all cases where an employee has been absent on sick leave, he shall immediately upon return to work submit a statement that such absence was due to illness or other reasons stated in 1 of 10.2(19A). In cases where such absence exceeds three calendar days, such statement shall be verified by a physician or other authorized practitioner, unless waived by the agency. For a lesser period of absence, the agency may, at the director's discretion, require evidence of illness or other reasons defined in 1 of 10.2(19A) as he deems necessary and in all cases sick leave shall not be granted until approved by the agency.

6. Sick leave shall be taken on a calendar day basis. Officially designated holidays falling within a period of sick leave shall not be counted against sick leave. If a person is sick both the day preceding and the day following his normal days off, he will be charged for his normal days off.

7. Sick leave shall not accrue during leave of absence without pay, suspension, layoff or educational leave.

8. Permanent part-time employees shall accrue sick leave in an amount proportionate to that which would be accrued under full-time employment.

9. An employee who is transferred from one state agency or department shall be credited with the sick leave he has accumulated.

10. All sick leave shall expire on the date of separation from the agency except as designated in 9 of 10.2(19A), and no employee shall be reimbursed for sick leave outstanding at the time of such separation.

11. If an absence of illness or injury extends beyond the sick leave accrued to the credit of the employee, such additional time may be charged to vacation leave. If all sick and vacation leave is used, the employee may be granted sick leave without pay, other leave without pay or terminated.

10.3(19A) Enforced leave. The agency shall grant an employee time off from his duties, with compensation for absence necessary or reasonable, when some member of his immediate family requires the employee's care or attention, or in case of death in the immediate family. Said enforced leave shall not be granted in excess of accumulated sick leave. The number of days granted will be governed by the circumstances of the case, but in no event shall they exceed five sick days in any calendar year.

10.4(19A) Sick leave without pay. Upon written application of an employee, sick leave without pay may be granted by the agency for the remaining period of disability after both sick leave and vacation leave have been exhausted. In the event such leave exceeds one year, an extension must be requested by the employee and approved by the agency. At any time the agency may require the employee to submit a certificate from the attending physician or practitioner. In the event of a failure or refusal to supply such certificate, or if the certificate does not clearly show sufficient disability to preclude the employee from the performance of his regular duties, such sick leave without pay shall be cancelled and the employee returned to work or terminated at the agency's option.

10.5(19A) Leave of absence without pay. An employee, upon application is writing, may be granted leave without pay for any reason deemed satisfactory to the agency, subject to the following conditions:

10.5(1) Such leave shall not be granted for more than 12 months, but upon written application prior to the expiration of such leave, the agency may grant extensions of such leave as appear best to serve the interests of the agency. Such extension shall not be for more than an additional year.

10.5(2) Failure on the part of the employee to report immediately at the expiration of a leave of absence without pay or extension of such leave, except for valid reasons submitted in advance and approved by the agency, shall be considered a resignation.

10.6(19A) Educational leave. Educational leave, either with or without pay, may be granted at the discretion of the agency for a period not to exceed one year. Provided, however, the agency may grant such extensions as may appear best to serve the interests of the agency not to exceed one year. When additional leave is granted, the employee need not be required to first exhaust his vacation leave.

10.7(19A) Rights upon return from sick leave without pay, leave without pay or educational leave without pay. A properly executed sick leave without pay, leave of absence without pay or educational leave shall accord the employee the right to be returned to his position, or one of like nature on the expiration thereof or sooner if agreeable to or by action of the agency; except, that if the position has been abolished through legislation or material reorganization of the agency, the employee shall be given consideration for any other position of similar pay grade and class which, in the opinion of the agency, does not require qualifications substantially higher than or different than those of the position previously held. If there is no such position, the layoff provisions of these rules shall apply. If it is found necessary to fill the position during the interim of leave, the new employee shall vacate the position upon the return of the employee on leave subject to layoff, transfer or demotion rights earned under these rules.

10.8(19A) Compensatory leave. An employee shall be granted compensatory leave for all work in excess of a formal working schedule in accordance with the policies and regulations of the agency.

10.9(19A) Holidays. Holidays shall be granted in accordance with state law and the governor or executive council's proclamations as they are observed by the agency in accordance with the work load policies and regulations.

10.10(19A) Military leave. Military leave shall be granted in accordance with Iowa state law and such rights and privileges as it provides.

10.11(19A) Maternity leave. Maternity leave shall be granted to permanent or probationary female classified employees when requested and supported by competent medical determination, normally not later than the seventh month of pregnancy, but may be extended by the appointing authority where requested by the employee, if supported by competent medical determination and working conditions permit extension. Such leave shall expire not later than two months after the birth of the child unless extended by the action of the appointing authority. Reinstatement shall be in accordance with rule 10.7(19A).

10.12(19A) Election leave. Any employee not subject to the Federal Hatch Act, who becomes a candidate for paid, partisan elective office, shall be granted leave without pay, voluntarily or involuntarily, commencing 30 days prior to the particular primary or general election and continuing until the employee has assumed the new office to which he is appointed or is eliminated as a candidate in such an election. Rights upon return to work thereafter shall be the same as those provided under 10.7(19A).

10.13(19A) Court and jury service. When in obedience to a subpoena or direction by proper authority, an employee appears as a witness or a jury member for the federal government, the state of Iowa or a political subdivision thereof, he shall be entitled to leave of absence from regular duty with regular compensation. When an employee is subpoened or appears in private litigation other than the federal government, the state of Iowa or political subdivision thereof, the time absent by reason therefor, may be taken as the agency directs in each specific case.

10.14(19A) Abandonment of position. Any employee who is absent from duty for three consecutive work days without proper notification and authorization thereof shall be deemed to have resigned his position.

EMPLOYMENT SAFETY COMMISSION

[Repealed by 64 GA, ch 1028; see Labor Bureau]

EMPLOYMENT SECURITY COMMISSION

CHAPTER 1
EMPLOYER'S RECORDS AND REPORTS

1.1(96) Records to be kept by the employer.

1.1(1) Each employing unit having employment performed for it shall maintain records to show the information hereinafter indicated. Such records shall be kept in such form and manner that it will be possible from an inspection thereof to obtain the facts necessary to determine the eligibility of each employee as to his rights to benefits. Such records shall be open to inspection and be subject to be copied by the commission and its authorized representatives at any reasonable time. Such records shall be kept for a period of five years after the calendar year in which the remuneration to which they relate was paid, or if not paid was due.

1.1(2) Such records shall show with respect to each employee unless the commission has ruled that his services do not constitute employment:

a. Name of worker.

b. Social security account number.

c. Date on which employee was hired, rehired or returned to work after a temporary layoff, and the date separated from work and the reason therefor.

d. Scheduled hours except for workers without a fixed schedule of hours, such as those working outside of the employer's establishment in such a manner that the employer has no definite knowledge of their working hours.

e. Total wages paid for employment in each period and the date of payment. For all pay periods ending in each quarter, show separately: Money wages; the cash value of other remuneration such as any special payment for services such as wages in lieu of notice, bonuses, gifts, prizes, show separately: Money payments, other remuneration and the nature of such payments such as accounts paid to employees as allowance or reimbursement for traveling and other business expenses, and the amounts of such expenditures actually incurred and accounted for by him.

f. The state or states in which his services are performed; and if any of such services are performed outside of this state and are not incidental to the service within the state, his base of operations (or if there is no base of operations then the place from which such services are directed or controlled) and his residence (by state), and the name of the county in Iowa in which services were performed.

g. When the pay period covers services performed both in employment and in excluded work, show the hours and wages for employment under this Act and also hours and wages for excluded work.

h. For determining the worker's eligibility for partial benefits:

(1) Wages earned by weeks as provided for in the rule relating to claims for benefits for total and partial unemployment, 3.2(3).

(2) Whether any week was in fact a week of less than full-time work.

(3) Time lost, if any, by each worker due to his unavailability for work showing days and weeks in which such loss of time occurred.

1.2(96) Reports.

1.2(1) Each employing unit shall make such reports at such times as the commission may require, and shall comply with the instructions printed upon any report form issued by the commission pertaining to the preparation and return of such report.

1.2(2) Any individual or employing unit, not already an employer, who fulfills the conditions with respect to becoming an employer, shall immediately give notice to the commission of that fact. He shall set forth in such notice his name and address and the name and address of the business.

1.2(3) Any employer who terminates his business for any reason whatsoever, or transfers or sells all or a substantial part of the assets of his organization, trade or business to another, or changes the trade name of such business or address thereof, shall, within ten days after such termination, transfer or change of name or address, give notice in writing to the commission of that fact. He shall set forth in such notice the former name and address of the business, the new name and address, the name of any new owner and his own name and present address.

1.3(96) Definition of wages for employment during a calendar quarter. Unless the context otherwise requires, terms used in rules, interpretations, forms and other official pronouncements issued by the commission shall have the following meaning:

1.3(1) *"Wages paid"* include both wages actually received by the worker and wages constructively paid. Wages are constructively paid when they are credited to the account of or set apart for a worker without any substantial restriction as to the time or manner of payment or conditions upon which payment is to be made and must be made available to him so that they may be drawn upon by him at any time, and their payment brought within his own control and disposition, although not then actually reduced to possession.

1.3(2) *"Wages payable"* means wages earned, including wages earned and paid as well as wages earned and unpaid. [See section 96.19(10, *a*, *b*)]

1.4(96) Identification of workers covered by the Iowa employment security law.

1.4(1) Each employer shall ascertain the federal social security account number of each worker employed by him in employment subject to the Iowa employment security law.

1.4(2) The employer shall report the worker's federal social security account number in making any report required by the Iowa employment security commission with respect to the worker.

1.4(3) If any employer has in his employ a worker engaged in employment who does not have an account number, such employer shall request the worker to show him a receipt issued by an officer of the social security board acknowledging that the worker has filed an application for an account number. The receipt shall be retained by the worker. In making any report required by the Iowa employment security commission with respect to such a worker, the employer shall report the date of issue of the receipt, its termination date, the address of the issuing office and the name and address of the worker exactly as shown in the receipt.

1.4(4) If a worker failed to report to the employer his correct federal social security account number or fails to show the employer a receipt issued by an office of the social security board acknowledging that he has filed an application for an account number, the employer shall inform the worker that regulation 106 of the bureau of internal revenue, United States treasury department, under the federal insurance contribution Act provides that:

a. Each worker shall report to every employer for whom he is engaged in employment his federal social security account number and his name exactly as shown on the account number issued to him by the social security board.

b. Each worker who has not secured an account number shall file an application for a federal social security account number on form SS-5 of the treasury department, bureau of internal revenue. The application shall be filed on or before the seventh day after the date on which the worker first performs employment for wages, except that the application shall be filed on or before the date the worker leaves the employ of his employer if such date precedes such seventh day. Copies of form SS-5, "Application for a Social Security Account Number" can be secured at the field office of the social security board nearest the worker's place of employment or the local post office.

c. If, within 14 days after the date on which the worker first performs employment for wages for the employer, or on the day on which he leaves the employ of the employer, whichever is the earlier, the worker does not have a federal social security account number, and has not shown the employer a receipt issued to the worker by an office of the social security board acknowledging that he has filed an application for an account

number, the worker shall furnish the employer an application on form SS-5, completely filled in and signed by the worker. If a copy of form SS-5 is not available, the worker shall furnish the employer a written statement, signed by the worker, of the date of the statement, the worker's full name, present address, date and place of birth, father's full name, mother's full name before marriage, worker's sex, and a statement as to whether the worker had previously filed an application on form SS-5 and, if so, the date and place of such filing. Furnishing the employer with an executed form SS-5, or statement in lieu thereof, does not relieve the worker of his obligation to make an application on form SS-5 as required in paragraph "*b*."

1.4(5) The employer shall inform the worker, in instances in which the information is pertinent, that in accordance with regulation 106 of the bureau of internal revenue, United States treasury department:

a. Any worker who has lost his federal social security account number card may secure a duplicate card by applying at the field office of the social security board nearest the worker's place of employment.

b. Any worker may have his account number changed at any time by applying to a field office of the social security board and showing good reason for a change. Any worker whose name is changed by marriage or otherwise, or who has stated incorrect information on form SS-5 should report such change or correction to a field office of the social security board. Copies of the form OAAN-7003, "Employee's Request for Change in Records," for making such reports may be obtained from any field office of the social security board (or the central office of the Iowa employment security agency or a local employment office).

c. Any worker who has more than one social security account number shall report all numbers to the field office of the social security board nearest the worker's place of employment (to a public employment office, or to the area claims office).

1.4(6) If the worker fails to comply with the requirements enumerated under 1.4(4), the employer shall execute a form SS-5, "Application for a Social Security Account Number", or statement signed by the employer, setting forth as fully and as clearly as practicable, the worker's full name, his present or last known address, date and place of birth, father's full name, mother's full name before marriage, the worker's sex and a statement as to whether an application for an account number has previously been filed by the worker, and if so, the date and place of such filing. This statement, or the executed form SS-5 signed by the employer shall be attached to any report required by the Iowa employment security commission with respect to such a worker.

1.5(96) Separation notices. Separation notices required when the separation is such that no disqualification is involved.

1.5(1) Each employer shall deliver to each worker when separated from his employment with such employer permanently or for an indefinite period, or for an expected duration of seven days or more, when such separation is under conditions which, in the opinion of the employer, would not disqualify the worker from receiving benefits, a copy of "Information For Workers," form IESC 200. This notice shall be delivered to the worker at the time of separation, if possible, or if such delivery be impossible or impracticable, it shall be mailed to such worker's last known address.

1.5(2) Separation notices required under conditions which may disqualify permanently or for an indefinite period or for an expected duration of seven days or more, for any reason defined in section 96.5 of the Iowa employment security Act which, in the opinion of the employer may disqualify him from receiving benefits, the employer shall, within seven days after such separation, notify the Iowa employment security commission of such separation on form IESC 203, notice of separation. The employer shall also deliver to such worker a copy of such notice at the time of separation, if possible, or if delivery is impossible or impracticable, he shall mail a copy of such notice to the last known address of such worker.

1.6(96) Employer elections to cover multistate workers.

1.6(1) The following rule shall govern the Iowa employment security commission in its administrative co-operation with other states subscribing to the interstate reciprocal coverage arrangement, hereinafter referred to as "the arrangement."

1.6(2) *Definitions.* As used in this rule, unless the context clearly indicates otherwise:

a. "Jurisdiction" means any state of the United States, the District of Columbia, Puerto Rico or, with respect to the federal government, the coverage of any federal unemployment compensation law;

b. "Participating jurisdiction" means a jurisdiction whose administrative agency has subscribed to the arrangement and whose adherence thereto has not terminated;

c. "Agency" means any officer, board, commission or other authority charged with the administration of the unemployment compensation law of a participating jurisdiction;

d. "Interested jurisdiction" means any participating jurisdiction to which an election submitted under this rule is sent for its approval; and "interested agency" means the agency of such jurisdiction;

e. "Services customarily performed" by an individual in more than one jurisdiction means services performed in more than one jurisdiction

during a reasonable period, if the nature of the services gives reasonable assurance that they will continue to be performed in more than one jurisdiction or if such services are required or expected to be performed in more than one jurisdiction under the election.

1.6(3) *Submission and approval of coverage elections under the interstate reciprocal coverage arrangement.*

a. Any employing unit may file an election, on form RC-1, to cover under the law of a single participating jurisdiction all of the services performed for him by any individual who customarily works for him in more than one participating jurisdiction. Such an election may be filed, with respect to an individual, with any participating jurisdiction in which

(1) Any part of the individual's services are performed;

(2) The individual has his residence; or

(3) The employing unit maintains a place of business to which the individual's services bear a reasonable relation.

b. The agency of the elected jurisdiction (thus selected and determined) shall initially approve or disapprove the election. If such agency approves the election, it shall forward a copy thereof to the agency of each other participating jurisdiction specified thereon, under whose unemployment compensation law the individual or individuals in question might, in the absence of such election, be covered. Each such interested agency shall approve or disapprove the election, as promptly as practicable, and shall notify the agency of the elected jurisdiction accordingly. In case its law so requires, any such interested agency may, before taking such action, require from the electing employing unit satisfactory evidence that the affected employees have been notified of, and have acquiesced in the election.

c. If the agency of the elected jurisdiction or the agency of any interested jurisdiction, disapproves the election, the disapproving agency shall notify the elected jurisdiction and the electing employing unit of its action and of its reasons therefor.

d. Such an election shall take effect as to the elected jurisdiction only if approved by its agency and by one or more interested agencies. An election thus approved shall take effect, as to any interested agency, only if it is approved by such agency.

e. In case any such election is approved only in part or is disapproved by some of such agencies, the electing employing unit may withdraw its election within ten days after being notified of such action.

1.6(4) *Effective period of elections.*

a. Commencement. An election duly approved under this regulation shall become effective at the beginning of the calendar quarter in which the election was submitted, unless the election, as approved, specifies the beginning of a different calendar quarter. If the electing unit requests an earlier effective date than the beginning of the calendar quarter in which the election is submitted, such earlier date may be approved solely as to those interested jurisdictions in which the employer had no liability to pay contributions for the earlier period in question.

b. Termination.

(1) The application of an election to any individual under this rule shall terminate, if the agency of the elected jurisdiction finds that the nature of the services customarily performed by the individual for the electing unit has changed, so that they are no longer customarily performed in more than one particular jurisdiction. Such termination shall be effective as of the close of the calendar quarter in which notice of such findings is mailed to all parties affected.

(2) Except as provided in 1.6(4) *"b"*, (1) each election approved hereunder shall remain in effect through the close of the calendar year in which it is submitted, and thereafter until the close of the calendar quarter in which the electing unit gives written notice of its termination to all affected agencies.

(3) Whenever an election under this rule ceases to apply to any individual under 1.6(4) *"b"*, (1, 2), the electing unit shall notify the affected individual accordingly.

1.6(5) *Reports and notices by the electing unit.*

a. The electing unit shall promptly notify each individual affected by its approved election, on the form RC-2 supplied by the elected jurisdiction, and shall furnish the elected agency a copy of such notice.

b. Whenever an individual covered by an election under this rule is separated from his employment, the electing unit shall again notify him, forthwith, as to the jurisdiction under whose unemployment compensation law his services have been covered. If at the time of termination the individual is not located in the elected jurisdiction, the electing unit shall notify him as to the procedure for filing interstate benefit claims.

c. The electing unit shall immediately report to the elected jurisdiction any change which occurs in the conditions of employment pertinent to its election, such as cases where an individual's services for the employer cease to be customarily performed in more than one participating jurisdiction or where a change in the work assigned to an individual requires him to perform services in a new participating jurisdiction.

[Filed June 27, 1955; amended November 22, 1961, September 11, 1968, April 21, 1972]

CHAPTER 2
EMPLOYER'S CONTRIBUTIONS AND CHARGES

2.1(96) Contributions by employers.

2.1(1) Contributions shall become due and be payable quarterly on the last day of the month next following the calendar quarter for which the contributions have accrued. If the commission finds that the collection of any contributions from a particular employer will be jeopardized by delay, they may declare such contributions due and payable as of the date of the finding.

2.1(2) Upon written request filed with commission before the due date of any contribution, the commission may, for good cause shown, grant an extension in writing of the time for payment of such contribution and the due date, but (*a*) no extension shall exceed 30 days, and (*b*) no extension shall postpone payment beyond the last day for filing tax returns under the federal unemployment tax Act. If an employer who has been granted an extension fails to pay his contribution on or before the termination of the period of such extension, interest shall be payable from the original due date as if no extension had been granted.

2.1(3) The first contribution payment of any employing unit which elects with the written approval of such election by the commission, to become an employer, or to have nonsubject services performed for it deemed employment, shall become due and payable on the last day of the month next following the close of the calendar quarter in which the conditions of becoming an employer by election are satisfied, and shall include contributions with respect to all wages paid for employment occurring on and after the date stated in such approval (as of which such employing unit becomes an employer), up to and including the calendar quarter in which the conditions of becoming an employer by election are satisfied.

2.1(4) The first contribution payment of any employer who becomes newly liable for contributions in any year shall become due and payable on the last day of the month next following that quarter wherein occurred the twentieth calendar week, during the calendar year within which a total of one or more workers were employed on any one day, or the last day of the month next following that calendar quarter in which a total of $1500 in wages were paid. The first payment of such an employer becoming liable in the course of a calendar year shall include contributions with respect to all wages paid for employment from the first day of the calendar year.

2.1(5) The first contribution payment of an employer who becomes newly liable for contributions in any year in any other manner shall become due and be payable on the last day of the month next following the quarter wherein such individual or employing unit became an employer. The first payment of such an employer shall include contributions with respect to all wages paid for employment for such individual or employing unit since the first day of the calendar year.

2.1(6) *Bond requirement—nonprofit organization.*

a. If the commission requires a bond pursuant to section 96.7(10), the bond shall be issued by a surety authorized to do business in this state and be deposited with the commission within 30 days after the effective date of such nonprofit organization's election to become liable for payments in lieu of contributions, or within 30 days after demand. In lieu of the posting of such bond the nonprofit organization may deposit security in one or more of the following forms: Cash deposit, securities, certificates of deposit issued by a bank or federally insured savings and loan association, bearer bonds issued by the United States or by the state of Iowa.

b. The amount of such bond or deposit shall be equal to two and seven-tenths percent of the organization's total taxable wages paid for employment for the four calendar quarters immediately preceding the effective date of the election. If the nonprofit organization did not pay wages in each of such four calendar quarters, the amount of the bond or deposit shall be as determined by the commission.

c. If any nonprofit organization fails to post a bond or furnish security or increase security within the time specified by this section, the commission may terminate the election upon written notice to the organization. The termination shall be effective on the first day of the calendar quarter following the date of the notice of termination.

2.1(7) *Request for termination of election to make payments in lieu of contributions.* A private nonprofit organization or a state-owned hospital or institution of higher education being a subject employer under section 96.19(6,*i*) and having elected to reimburse the Iowa employment security commission for benefits based on service performed by its employees, for a period of not less than two calendar years, may request that such election be terminated, as provided under section 96.7 [9,*a*(3)] and agree to pay contributions based on wages paid its employees in accordance with section 96.7. The request must be made not later than 30 days prior to the beginning of the taxable year for which such termination shall first be effective. Any employing unit above, for whom such request is granted, shall continue to remain liable for reimbursing the fund for any benefit charges based on wages reported during the period when he was a reimbursable employer.

2.2(96) Group accounts.

2.2(1) Any nonprofit organization or any state-owned hospital or institution of higher education which has become liable for payments in lieu of contributions may make application to the

commission to participate in a group account with one or more such employers.

2.2(2) The commission shall approve those applications that meet the requirements of this rule.

2.2(3) Any application to participate in a group account may be filed at any time; provided, however, all contributions, payments in lieu of contributions, interests and penalties due from the applicant employer must be paid prior to the effective date of the employer's membership in a joint account.

2.2(4) Each applicant-employer shall agree to assume joint and several liability for any payments, interests and penalties accruing on the part of any one of the members participating in the joint account during the duration of the account in consideration for the commission granting him the right to participate in it.

2.2(5) Each member participating in a group account agrees to maintain a sufficient record of his own employment in order that he can furnish the commission with information necessary to enable the commission to make proper certification to the bureau of internal revenue of the United States treasury under the federal unemployment tax Act and to enable the division to determine any benefit charges against his separate account.

2.2(6) All group accounts will be maintained only on a calendar year basis and such accounts must be maintained for a minimum period of one calendar year and will continue thereafter until terminated at the discretion of the commission or upon application by the group.

2.2(7) Any nonprofit organization or any state-owned hospital or institution of higher education may be added to an existing group account if all of the members currently in such account file a new application with the commission for a new group account and otherwise qualify under this section.

2.2(8) Withdrawal from a group account by any participating member may be approved if the request for withdrawal is made in writing to the commission on or before September 30 of the year prior to the year for which the withdrawal is to be effective.

2.2(9) The remaining member or members shall continue to constitute a group account. The withdrawal or termination of all except one member shall not dissolve such group account, unless and until such last member shall withdraw or terminate.

2.3(96) Accrual of interest and penalties.

2.3(1) In those cases in which the commission finds that a genuine controversy exists or has existed regarding an employing unit's liability for contributions on all or a part of its employees and the case has been resolved against such employing unit, then no interest or penalty will accrue from the date of such controversy between the commission and the employing unit until 30 days after the decision of the commission requiring the payment of contributions.

2.3(2) Interest and penalty shall not accrue with respect to contributions required from an employer based upon wages for employment in those cases in which the employer's liability is based solely upon the provisions of section 96.19(6, *g*) of the Iowa employment security law until 30 days after determination of his liability under the federal unemployment tax Act.

2.3(3) That each nonprofit organization which has been approved to make payments in lieu of contributions shall be billed each calendar month for benefits paid during such month.

2.3(4) Interest and penalty shall not accrue in those cases where the commission finds:

a. That as a matter of equity and good conscience, the employer should not be required to pay interest.

b. That interest and penalties as provided under section 96.14 shall accrue 30 days after the date of such monthly billing.

2.3(5) Accrual of interest and penalties applicable to contributory employers shall be applicable to nonprofit organizations which have been approved to make payments in lieu of contributions.

2.4(96) Employers' payments to persons performing military services. The term "wages" shall not include cash payments, or the cash value of other remuneration, made voluntarily and without contractual obligation to, or in behalf of, an individual for periods during which such individual is in active service or training as a member of the national guard or the military or naval forces of the United States, including the organized reserves.

2.5(96) Employers' contributions and charges. Where an individual has been employed by two or more employers during the same period, benefits payable to such individual by reason of such employment shall be charged against the accounts of such employers against whose accounts the maximum charges hereunder have not previously been made in accordance with the following: When wage records filed with the commission by employers show that the individual has been employed by two or more employers during the same calendar quarter, but the wage records do not indicate that employment within the quarter has been consecutive, then the benefits paid to such eligible individual shall be apportioned and charged against the accounts of such employers in direct ratio to the wages earned by such individual in insured work for such calendar quarter. The

method of apportionment for chargeback purposes shall be on the basis of the ratio which the wages earned by such individual in insured work for each such employer in such calendar quarter bears to the total wages earned by such individual in insured work from all such employers in such calendar quarter.

2.6(96) Cash value of board and room.

2.6(1) If board, rent, housing, lodging, meals or similar advantage is extended in any medium other than cash as partial or entire remuneration for service constituting "employment" as defined in the Act [ch 96 of the Code], the reasonable cash value of same shall be deemed wages subject to contribution.

2.6(2) Where the cash value for such board, rent, housing, lodging, meals or similar advantage is agreed upon in any contract of hire, the amount so agreed upon shall be deemed the value of such board, rent, housing, lodging, meals or similar advantage. Check stubs, pay envelopes, contracts and the like, furnished to employees setting forth such cash value, are acceptable evidence as to the amount of the cash value agreed upon in any contract of hire except as provided in 2.6(4) and 2.6(5).

2.6(3) In the absence of such agreement in a contract of hire the rate for board, rent, housing, lodging, meals or similar advantage, furnished in addition to money wages or wholly comprising the wages of an employed individual, shall be deemed to have not less than the following cash value except as provided in 2.6(4).

Full board and room per week	$35.00
Meals (without lodging) per week	17.50
Meals (without lodging) per day	2.50
Lodging (without meals) per week	17.50
Lodging (without meals) per day	2.50

2.6(4) The commission or its authorized agent may, after affording reasonable opportunity at a hearing for the submission of relevant information in writing or in person, determine the reasonable cash value of such board, rent, housing, lodging, meals or similar advantage in particular instances or group of instances, if it is determined that the values fixed in or arrived at in accordance with 2.6(3) or in the contract of hire do not properly reflect the reasonable cash value of such remuneration.

2.6(5) If the commission determines that the reasonable cash value is other than prescribed in a contract of hire or in 2.6(3), the employer's payroll and contribution reports to the commission shall thereafter show the value of such remuneration as determined by the commission.

2.7(96) Employees hired with equipment. Where an employee is hired with equipment, except where it is ordinary in custom and usage in the trade or business for employees to furnish such equipment at their own expense, the fair value of the remuneration for the employee's services, if specified in the contract of hire, shall be considered "wages". If the contract of hire does not specify the employee's wages, or the value of wages agreed upon under the contract of hire is not a fair value, the commission shall determine the employee's wages, taking into consideration the prevailing wages for similar work under comparable conditions, and the wages thus determined shall apply as wages and be so reported by the employer.

2.8(96) Gratuities and tips. The following criteria shall be applicable in determining whether tips are wages under the contribution provision of the Act: Tips received by an individual from a person or persons other than his employer, and not accounted for to the employer, are not wages. Where the customer writes the amount of the tip on his bill and the employer pays the employee the amount so shown and charges it to the customer's account, such amounts are wages. Where the employer adds a certain percent to the customer's bill for disbursement to his employees, the sums so disbursed are wages.

amended October 8, 1957, June 23, 1959,
April 21, 1972]

CHAPTER 3
CLAIMS AND BENEFITS

3.1(96) Claims for benefits for total and partial unemployment.

3.1(1) *Claims and registrations for benefits for total unemployment.*

a. Any individual claiming benefits for total unemployment shall report in person at the area claims office or the state employment service office of the Iowa employment security commission most accessible to him and shall there register for work and file a claim for benefits, which claim shall be effective as of the first day of the calendar week in which he does so report and file his claim, except as otherwise provided in this rule.

b. In order to establish eligibility for benefits or for waiting period credits for weeks of total unemployment, the claimant shall continue to file claims as directed, in person or by mail, at such intervals as may be prescribed by a representative of the Iowa employment security commission.

c. The Iowa employment security commission, for reasons found to constitute good cause for any individual's failure to appear at the time specified for reporting may accept a continued claim from such individual as having been made at the specified time, provided such continued claim is filed within seven days following the date specified for his reporting.

d. If an individual is located in an area served only by an itinerant service of the Iowa employment security commission, his claim for total unemployment may be accepted as effective as of the first day of the calendar week in which he became totally unemployed, provided that he registered in person with such itinerant service at the first available opportunity following the commencement of his total unemployment.

e. Claims for benefits for total unemployment shall set forth (1) that the individual claims benefits; (2) that he registers for work; and (3) such other information as is required thereby. The claim for benefits for total unemployment shall constitute both the individual's registration for work and his claim for benefits, or waiting period credits.

f. Continued claims for benefits for total unemployment shall set forth (1) that the individual continues his claim for benefits; (2) that he is totally unemployed; (3) that he registers for work; (4) that since he last registered for work he has performed no service and earned no wages, except as indicated; and (5) such other information as is required thereby. The continued claim for benefits for total unemployment shall constitute both the individual's registration for work and his claim for benefits or waiting period credits.

3.1(2) Reserved for future use.

3.2(96) Definitions.

3.2(1) The word "*week*" as used in section 96.19(6,*a*,*i*) refers to a calendar week and not to a flexible week. If any week includes both December 31 and January 1, the days of that week up to January 1 shall be deemed one calendar week and the days beginning January 1 another such week.

3.2(2) "*Regular job*" as referred to in section 96.19 (10,*b*) shall mean a job with an employer with whom the individual has a continuous attachment during a given claim period. Attachment will ordinarily have reference to the individual who has been employed and expects to continue in the employ of the employer for a considerable period a month, six weeks or longer.

3.2(3) "*Week of partial unemployment.*" With respect to a partially unemployed individual whose wages are paid on a weekly basis, a week of partial unemployment shall consist of his pay period week; with respect to a partially unemployed individual whose wages are not paid on a weekly basis, but the amount the claimant has earned during any seven consecutive days' period or periods within such pay period can be determined and such information furnished to the commission. A week of partial unemployment shall consist of a calendar week or such other seven consecutive days' period within the pay period as may be found appropriate under the circumstances and prescribed by the commission.

3.3(96) Registration and filing of claims for partial unemployment.

3.3(1) A claim for benefits filed by an individual in person at any local employment office in this state or with an authorized itinerant agent of the commission on form IESC 211, shall constitute such individual's notice of unemployment, registration for work and claim for benefits or waiting period credit, with respect to each week of partial unemployment covered by the claim, provided that such claim is filed not later than four weeks after the individual receives, through his employer or through the commission, appropriate notice of his potential eligibility for partial benefits as to any such week of partial unemployment.

3.3(2) On the filing of a valid claim for benefits, the benefit year of such individual will begin with the first day of the employer work week with respect to which the claim is filed, provided that such claim is filed not later than four weeks after the individual receives, through his employer or through the commission, appropriate notice of his potential eligibility for partial benefits as to any such weeks of partial unemployment.

3.3(3) A continued claim for partial benefits filed by an individual in person or by mail pursuant to the provisions of this rule shall constitute such individual's notice of unemployment, registration for work and claim for partial benefits or waiting period credit, with respect to each week of partial unemployment covered by the claim, provided that such continued claim is filed not later than four weeks after the individual received, through his employer or through the commission, appropriate notice of his potential eligibility for partial benefits as to any such week of partial unemployment.

3.3(4) Any partially unemployed individual who fails with good cause to file a claim for partial benefits or waiting period credit shall be permitted to file such claim with respect to any week of partial unemployment at any time up to 13 weeks following the close of the actual or potential benefit year in which such claim period falls, provided such claim is filed within one week after the individual is appropriately notified of his potential eligibility for partial unemployment. Failure to file a claim for partial benefits or waiting period credit as provided in these rules shall be deemed to be for good cause if due to failure on the part of the employer to comply with the requirements relating to participation in the initiation of a claim, verification or other requirements relating to partial unemployment, to coercion or intimidation exercised by the employer to prevent the prompt filing of a claim for partial benefits or waiting period credit, or to failure by the commission to discharge its responsibilities under the law.

3.4(96) Employer responsibility in the initiation of claims for partial unemployment benefits.

3.4(1) Each employer, not later than seven days, immediately following the close of any week in which he has reduced the customary prevailing hours of work of any employee to the extent that the weekly wages of such employee amount to less than the current maximum weekly benefit (computed at the beginning of each fiscal year), plus earnings which are not deductible under section 96.19(10,*b,c*) of the Iowa employment security law, shall complete and deliver to such individual a notice that he may be potentially eligible for benefits. This notice shall be a claim for partial unemployment insurance benefits on form IESC 211.

3.4(2) The employer may elect to use in lieu of form IESC 211 a payroll byproduct, if the pay period of the employer coincides with the week or weeks of partial unemployment claimed, providing that the payroll byproduct appropriately notifies the worker of his potential right to partial unemployment benefits, and contains:

a. Information necessary to establish the identity of the employer and claimant,

b. The pay period week covered,

c. The total amount of earnings in each such pay period week,

d. The following certification (individual or rubber stamped), "I certify that the above amount represents reduced earnings in a week of less than full-time work because of lack of work."

e. Signature of employer (individual or facsimile),

f. The date such payroll byproduct was delivered to the worker.

3.4(3) Upon filing of a first claim for partial benefits for a benefit year the commission shall promptly notify each worker named therein of his potential rights to partial benefits and shall notify his employer of such worker's partial earnings limit and the benefit year ending date. Upon receipts of such notice each employer shall record the partial earnings limit and the benefit year ending date on the payroll records.

3.5(96) Employer's verification of partial unemployment.

3.5(1) After an employer has been notified of a partial earnings limit a worker's weekly benefit amount, plus six dollars, and current benefit year ending date of any worker in his employ, such employer, until otherwise notified shall, immediately after the end of any pay period within which there were weeks in which the worker earned less than his weekly benefit amount, plus six dollars, and in any case not later than 30 days after the end of the first week of partial unemployment occurring within such pay period as provided in 3.4(1) which began within such benefit year and for which such worker's earnings fall below such partial earnings limit because of lack of work in such week, furnish each such worker a joint low earnings report and claim for partial unemployment compensation benefits (individual) form IESC 213, setting forth the information required therein; or

3.5(2) The employer may elect to use in lieu of form IESC 213 a payroll byproduct in conformity with the provisions of 3.4(2).

3.5(3) Upon request by the commission an employer shall complete and return to the commission form IESC 213, request for employer's individual earnings report with respect to any individual names on such form for the purpose of verifying earnings reported by the individual to the commission.

3.6(96) Mass partial unemployment.

3.6(1) The term "mass partial unemployment" means a reduction of hours to less than full-time work at the same time and for the same reason for 25 or more partially unemployed individuals customarily employed in a single establishment.

3.6(2) When mass partial unemployment occurs the employer, not later than seven days immediately following the close of any pay period during which mass partial unemployment occurred in any week and in any case not later than 30 days after the end of the first week of partial unemployment occurring within such pay period, shall complete and mail or deliver to the nearest area claims office of the Iowa employment security commission a joint low earnings report and claim for partial unemployment compensation benefits (Mass, form IESC 212), covering each week of partial unemployment occurring in any such pay period. This requirement shall remain effective with respect to each pay period in any benefit year of any individual unless the employer is otherwise notified by the Iowa employment security commission.

3.6(3) Upon receipt of form IESC 212 covering initial mass partial unemployment, the Iowa employment security commission will immediately notify on form IESC 211 each individual listed on form IESC 212 that he is potentially eligible for partial unemployment compensation benefits and that he may file a claim for such benefits as provided in this rule.

3.6(4) The employer or employing unit may elect to use in lieu of form IESC 212, form IESC 211 or payroll byproduct as provided in 3.4(96).

3.6(5) *Employer records.* Each employer shall keep his payroll records in such form that it would be possible from an inspection thereof to determine with respect to each worker in his em-

ploy who may be eligible for partial benefits, the following:

a. Wages earned, by weeks, as provided for in 3.2(96).

b. Whether any week was in fact a week of less than full-time work.

c. Time lost, if any, by each such worker due to his unavailability for work.

3.7(96) Extended period for registration and filing claims for good cause. Notwithstanding the provisions of these rules if the commission finds that failure of any individual to register and file a claim for unemployment compensation benefits or waiting period weeks within the time set forth by these rules was due to:

3.7(1) Failure on the part of the employer to comply with the provisions of the Act or of these rules or,

3.7(2) To coercion or intimidation exercised by the employer to prevent the prompt filing of such claim or,

3.7(3) Failure of the commission to discharge its responsibilities promptly in connection with such claim, the commission shall extend the period during which such claim may be filed to a date which shall be not less than one week after the individual has received appropriate notice of his potential rights to benefits, provided, that no such claim may be filed after the 13 weeks subsequent to the end of the benefit year during which the week of unemployment occurred. In the event continuous jurisdiction is exercised under the provisions of the Act, the commission may, in its discretion, extend the period during which claims, with respect to week of unemployment affected by such redetermination, may be filed.

3.8(96) Notice to employer of claim filed and request for wage and separation information.

3.8(1) When an individual files a new claim for benefits, the Iowa employment security commission shall notify his last employer and all base period employers thereof; and may request wage and separation information on form IESC 201A. Each employer shall promptly complete and return so as to be received in seven days such information request form to the Iowa employment security commission's office, whose address is shown thereon, giving the following information if requested.

a. A statement of wages paid in each calendar quarter of the base period.

b. If the employer has knowledge of facts which might defer or deny the claimant's right to benefits, a complete statement thereof;

c. Such additional information as the Iowa employment security commission may deem necessary and request.

3.8(2) Should any employer fail to submit the information requested, as above set out, the deputy may make a determination of the claimant's benefit rights based on such information as is available.

3.9(96) Active and earnest search for work. According to section 96.4(3) an unemployed individual shall be eligible to receive benefits only if the commission finds among other things, that he is "earnestly and actively seeking work". Mere registration at an employment office does not establish that the claimant is able and available for work. It is essential that he personally and diligently seek work on his own behalf. It is difficult to establish definite criteria for defining the words "actively" and "earnestly". Much will depend on the estimate of the employment opportunities in the area. The number of employer contacts which might be appropriate in an area of limited opportunity might be totally unacceptable in other areas. When employment opportunities are high a claimant may be expected to make more than the usual number of contacts. Likewise, unreasonable limitations by a claimant as to salary, hours or conditions of work can indicate that he is not earnestly seeking work. The commission expects each claimant for benefits, in order to continue to be available for work under the Iowa statute, to conduct himself as a normal, prudent person who is out of work and seeking work would conduct himself.

3.10(96) Part-time worker. "Part-time worker" shall mean any person who has been in the employ of an employing unit and has established a pattern of part-time regular employment, which is subject to the employment security payroll tax, and has accrued wage credits, while working at a part-time job, if he becomes separated from this employment by the employer for no disqualifiable reason, and providing he has reasonable expectancy of securing other employment during the same hours and for the number of hours he can work, no disqualification shall be imposed under sections 96.4(3) and 96.5(1).

3.11(96) Interpretation of misconduct. As referred to in the Iowa employment security law, section 96.5(2), "Misconduct" shall have the following meaning. "Misconduct" consists of acts evidencing such willful or wanton disregard of an employer's interests as is found in deliberate violation or disregard of standards of behavior which the employer has the right to expect of his employees, or acts which show an intentional and substantial disregard of the employer's interest or the employees duties and obligations to his employer. In order to justify a finding of misconduct, the matter must be within the individual's control and the behavior must be such as to show an intentional breach of the worker's obligations towards his employer.

3.12(96) Disciplinary layoff. Whenever a claim is filed and the reason for the claimant's unemployment is the result of a disciplinary layoff

imposed by the employer, the claims deputy will determine the claim under the provisions of section 96.5(2).

3.13(96) Leave of absence. A leave of absence negotiated with the consent of both parties, employer and employee, shall be deemed a period of voluntary unemployment for the employee-claimant, and he shall be considered ineligible for benefits for such period.

3.13(1) If at the end of a period or term of a negotiated leave of absence the employer fails to re-employ the employee-claimant, such claimant shall be considered laid-off and eligible for benefits.

3.13(2) If the employee-claimant fails to return at the end of such leave of absence and subsequently becomes unemployed he shall be considered as having voluntarily quit and therefore is ineligible for benefits.

3.13(3) The period or term of a leave of absence may be extended, but only if there is evidence that both parties have voluntarily agreed.

3.14(96) Interpretation of labor disputes. As referred to in the Iowa employment security law, section 96.5 [3,*b*(1)], and section 96.5(4), labor dispute shall have the following meaning: "Labor dispute" shall mean "any controversy concerning terms, tenure or conditions of employment, or concerning the association or representation of persons in negotiating, fixing, maintaining, changing or seeking to arrange terms or condition of employment regardless of whether the disputants stand in the proximate relation of employer and employee."

3.15(96) Payment of benefits to interstate claimants.

3.15(1) The following rule shall govern the Iowa employment security commission in its administrative co-operation with other states adopting a similar rule for the payment of benefits to interstate claimants.

3.15(2) *Definitions.* As used in this rule, unless the context clearly requires otherwise:

a. "Interstate benefit payment plan" means the plan approved by the interstate conference of employment security agencies under which benefits shall be payable to unemployed individuals absent from the state (or states) in which benefit credits have been accumulated.

b. "Interstate claimant" means an individual who claims benefits under the unemployment insurance law of one or more liable states through the facilities of an agent state. The term "interstate claimant" shall not include any individual who customarily commutes from a residence in an agent state to work in a liable state unless the Iowa employment commission finds that this exclusion would create undue hardship on such claimants in specified areas.

c. "State" includes the District of Columbia, Puerto Rico and the Virgin Islands.

d. "Agent state" means any state in which an individual files a claim for benefits from another state.

e. "Liable state" means any state against which an individual files, through another state, a claim for benefits.

f. "Benefits" means the compensation payable to an individual, with respect to his unemployment, under the unemployment insurance law of any state.

g. "Week of unemployment" includes any week of unemployment as defined in the law of the liable state from which benefits with respect to such week are claimed.

3.15(3) *Registration for work.*

a. Each interstate claimant shall be registered for work, through any public employment office in the agent state when and as required by the law, regulations and procedures of the agent state. Such registration shall be accepted as meeting the registration requirements of the liable state.

b. Each agent state shall duly report to the liable state in question whether each interstate claimant meets the registration requirements of the agent state.

3.15(4) *Benefit right of interstate claimants.*

a. If a claimant files a claim against any state, and it is determined by such state that the claimant has available benefit credits in such state, then claims shall be filed only against such state as long as benefit credits are available in that state. Thereafter, the claimant may file claims against any other state in which there are available benefit credits. For the purposes of this rule, benefit credits shall be deemed to be unavailable whenever benefits have been exhausted, terminated or postponed for an indefinite period or for the entire period in which benefits would otherwise be payable, or whenever benefits are affected by the application of a seasonal restriction.

b. The benefit rights of interstate claimants established by this rule shall apply only with respect to new claims filed on or after July 5, 1953.

3.15(5) *Claims for benefits.*

a. Claims for benefits or waiting period shall be filed by interstate claimants on uniform interstate claim forms and in accordance with uniform procedures developed pursuant to the interstate benefit payment plan. Claims shall be filed in accordance with the type of week in use in the agent state. Claims filed against the Iowa employment security commission shall be processed and paid on the basis of the type of benefit week used by the agent state.

b. Claims shall be filed in accordance with agent-state regulations for intrastate claims in local employment offices, or at an itinerant point, or by mail.

(1) With respect to claims for weeks of unemployment in which individual was not working for his regular employer, the liable state shall, under circumstances which it considers good cause, accept a continued claim filed up to one week, or one reporting period, late. If a claimant files more than one reporting period late, an initial claim must be used to begin a claim series and no continued claim for a past period shall be accepted.

(2) With respect to weeks of unemployment during which an individual is attached to his regular employer, the liable state shall accept any claim which is filed within the time limit applicable to such claims under the law of the agent state.

3.15(6) *Determinations of claims.*

a. The agent state shall, in connection with each claim filed by an interstate claimant, ascertain and report to the liable state in question such facts relating to the claimant's availability for work and eligibility for benefits as are readily determinable in and by the agent state.

b. The agent state's responsibility and authority in connection with the determination of interstate claims shall be limited to investigation and reporting of relevant facts. The agent state shall not refuse to take an interstate claim.

3.15(7) *Appellate procedure.*

a. The agent state shall afford all reasonable co-operation in the taking of evidence and the holding of hearings in connection with appealed interstate benefit claims.

b. With respect to the time limits imposed by the law of a liable state upon the filing of an appeal in connection with a disputed benefit claim, an appeal made by an interstate claimant shall be deemed to have been made and communicated to the liable state on the date when it is received by any qualified officer of the agent state.

3.16(96) Training or retraining programs—eligibility for training. For an unemployed individual to be considered for approval for training programs and continuing participation therein, one or more of the following requirements shall be met:

3.16(1) Reasonable employment opportunities for which the claimant is fitted by training or experience are minimal, severely curtailed, or do not exist in the locality making a change in occupation necessary to again become gainfully employed.

3.16(2) Employment opportunities are severely curtailed or nonexistent for the claimant's current skills or education because of health, disability or other compelling factors.

3.16(3) Training is necessary for the claimant who has unusable or obsolete skills to enable him to obtain adequate employment.

3.16(4) The training for the claimant relates to an occupation or a skill for which there is, or is expected to be in the immediate future, reasonable opportunities in the locality where the claimant is residing or in a location to which the claimant is willing to move.

3.16(5) The claimant has the required qualifications and aptitudes to successfully complete the training. Basic education courses, however, which are necessary as a prerequisite for skill training, or other short-term vocationally directed academic courses may also be approved.

3.16(6) The training program consists of a practical and substantial curriculum to substantiate the expenditure of unemployment insurance funds.

3.16(7) The claimant furnishes to the commission satisfactory evidence that he is attending the training course regularly.

3.16(8) *Method of making application for approval.* Any claimant for benefits who desires to receive benefits while attending school for training or retraining purposes shall make a written application to the commission setting out the following:

a. His most recent employer and employment;

b. The reasons for his unemployment;

c. The proposed course of training or retraining;

d. The educational establishment at which he would receive training;

e. The estimated time required for such training;

f. The type of jobs for which the claimant will qualify at completion of such training.

[Filed December 29, 1955; amended December 29, 1958, June 23, 1959, December 4, 1959, November 22, 1961, April 21, 1972]

CHAPTER 4
APPEALS PROCEDURE

4.1(96) Appeals and hearing officers.

4.1(1) *The presentation of appealed claims.*

a. A party appealing from a decision of a deputy shall file with the Iowa employment security commission at the administrative office in Des Moines or at any public employment service office, a notice of appeal in writing setting forth:

(1) The name, address and social security number of the claimant;

(2) A reference to the decision from which the appeal is taken;

(3) The fact that an appeal from such decision is being made;

(4) The grounds upon which such appeal is based.

b. Upon the scheduling of a hearing on an appeal, notices of hearings shall be mailed to all parties interested in the decision of the deputy which is being appealed at least seven days before

the date of hearing, specifying the place and time of hearing. A copy of the notice of appeal showing the ground for appeal shall also be sent to the interested party who is the respondent in the case.

4.1(2) *Disqualification of an unemployment insurance hearing officer.* No hearing officer shall participate in the hearing of any appeal in which he has an interest. Challenges to the interest of any hearing officer shall be heard and decided by the commission.

4.1(3) *Hearing of appeal.*

a. All hearings shall be conducted informally in such manner as to ascertain the substantial rights of the parties. All issues relevant to the appeal shall be considered and passed upon. The claimant and any other party to an appeal before an unemployment insurance hearing officer may present such evidence as may be pertinent and each party shall have the right to examine the opposing party and his witnesses. Where a party appears in person the hearing officer shall examine such party and his witnesses and those of any opposing parties. The hearing officer, with notice to the parties of the time and place thereof, may take such additional evidence as he deems necessary.

b. The parties to an appeal, with the consent of the unemployment insurance hearing officer, may stipulate the facts involved in writing. The hearing officer may decide the appeal on the basis of such stipulation; or, in his discretion, may set the appeal down for hearing and take such further evidence as he deems necessary to enable him to determine the appeal.

c. If one of the parties fails to appear at the hearing, the unemployment insurance hearing officer shall, unless it appears that there is good cause for continuance, proceed to make his decision on the appeal.

4.1(4) *Adjournments of hearings.*

a. The unemployment insurance hearing officer shall use his best judgment as to when adjournment of a hearing shall be granted in order to secure all the evidence that is necessary and to be fair to the parties.

b. If either party fails to appear at the first hearing, the unemployment insurance hearing officer may adjourn the hearing to a later date, or, if a decision is made, may reopen the same within ten days upon good cause being shown.

4.1(5) *The determination of appeals.* Following the conclusion of a hearing of an appeal the unemployment insurance hearing officer shall, within seven days, announce his findings of fact, decision with respect to appeal and the reasons therefor, provided that the commission may, upon proper showing by the hearing officer, extend this time. The decision shall be in writing, signed by the hearing officer and filed with the commission. Copies of all decisions and the reason therefor shall be mailed by the appeals section to the claimant, to all other parties to the appeal and to the deputy.

4.2(96) Appeals to the commission.

4.2(1) *The presentation of an appeal to the commission.* A party appealing from a decision of an unemployment insurance hearing officer shall file a notice of appeal with the Iowa employment security commission at the administrative office in Des Moines or at any area claims office or state employment service office of the Iowa employment security commission.

4.2(2) *Hearings of appeals.*

a. Except as provided in 4.2(4) for the hearing of appeals removed to the commission from an unemployment insurance hearing officer the commission, to enable it to determine an appeal, may direct the taking of additional evidence before it.

b. In the review of an appeal, the commission may base its decision on the record before the hearing officer, or it may permit the parties to offer oral or written argument, or both. If, in the discretion of the commission, additional evidence is necessary to enable it to determine the appeal, the parties shall be notified by the Iowa employment security commission at least seven days before the date of hearing, specifying the place and time of hearing. Any party to any proceeding in which testimony is taken may present such evidence as may be pertinent to the issue on which the commission directed the taking of evidence.

c. The commission, in its discretion, may remand any claim or any issue involved in a claim to an unemployment insurance hearing officer for the taking of such additional evidence as the commission may deem necessary. Such testimony shall be taken by the hearing officer in the manner prescribed for the conduct of hearing on appeals before a hearing officer. Upon the completion of the taking of evidence by a hearing officer pursuant to the direction of the commission, the claim or the issue involved in such claim shall be returned to the commission for its decision thereon.

4.2(3) *The hearing of appeals by the commission on its own motion.*

a. Within ten days following the decision of an unemployment hearing officer, and in the absence of the filing of a notice of appeal to the commission by any of the parties from a decision of a hearing officer, the commission on its own motion may order the parties to appear before it for a hearing on the claim or any issue involved therein.

b. Such hearings shall be held only after seven days' notice mailed to the parties to the decision of a hearing officer, and shall be heard in the manner prescribed in 4.2(3) for the hearings of appeals by the commission.

4.2(4) *The hearings of appeals by the commission on cases ordered removed to it from any unemployment insurance hearing officer.* The

proceeding on any claim before a hearing officer ordered by the commission to be removed to it shall be presented, heard and decided by the commission in the manner prescribed in 4.1(3), 4.1(4) and 4.1(5) for the hearings of claims before an unemployment insurance hearing officer.

4.2(5) *The determination of appeals.*

a. Following the review of an appeal or the conclusion of a hearing on an appeal, the Iowa employment security commission shall announce its findings of facts and decision with respect to the appeal. The decision shall be in writing, signed by the members of the commission who reviewed the appeal, and shall be duly filed in the offices of the commission. It shall set forth the findings of fact of the commission with respect to the matters appealed and its decision.

b. If a decision of the commission is not unanimous, the decision of the majority shall control. The minority may file a dissent from such decision setting forth the reasons why it fails to agree with the majority.

c. Copies of all findings and decisions shall be mailed by the commission to the claimant and to the other parties to the appeal before the commission.

4.3(96) General rules for both appeal stages.

4.3(1) *Payment of witnesses.* Witnesses subpoenaed for any hearing before a hearing officer or the commission shall be paid by the Iowa employment security commission in accordance with the following schedule: Witness fees of seven dollars per day for each day's attendance, and in all cases mileage fees of ten cents per mile for each mile traveled.

4.3(2) *Orders for supplying information from the records of the commission.* Information from the records of the commission to the extent necessary for the proper presentation of an appeal shall be furnished only on application to the commission by a party to an appeal or his representative.

4.3(3) *Representation before an unemployment insurance hearing officer.*

a. Any individual may appear for himself in any proceeding before any hearing officer and the commission. Any partnership may be represented by any of its members or a duly authorized representative. Any corporation or association may be represented by an officer or a duly authorized representative.

b. Any party may appear by an attorney at law or his duly authorized agent.

4.3(4) *Inspection of decisions of an unemployment insurance hearing officer.* Decisions of a hearing officer and the commission shall be kept on file at the administrative office of the Iowa employment security commission at Des Moines, Iowa, and shall be open for inspection.

[Filed August 13, 1953; amended August 15, 1953, August 15, 1959, September 9, 1959, December 4, 1959, April 21, 1972]

CHAPTER 5
OLD-AGE AND SURVIVORSHIP INSURANCE SYSTEM

5.1(97) Accrual of interest. Interest shall not accrue with respect to taxes unpaid by the employer on the date they are due and payable as prescribed by the commission in those cases in which a question has been raised with the commission as to whether any part or all of the services on which such taxes are based constitutes covered employment, until such time as the commission finally determines any part or all of such services to be in employment.

5.2(97) Overpayment and underpayment of tax. In the event the employer pays taxes for any quarter in excess of the amount of tax actually due and owing, the commission shall give notice of such overpayment to the employer and such overpayment shall apply as a credit against the tax for the following quarter.

In the event such employer does not pay the full amount of the tax, or in the event such employer fails to report all of its employment for any quarter, the commission shall require the payment of such additional taxes and interest and shall proceed to collect such additional taxes and interest in the manner prescribed by law. The employer shall file such additional and supplemental reports as the commission may require when directed to do so by the commission.

5.3(97) Collection and payment of tax. Each employer on or before the fifteenth day of the month immediately following the end of each quarter shall file with the commission a report on a form to be prescribed by the commission showing the name, social security account number and amount of earnings of each of its employees during such quarter.

Each employer's taxes shall be due and payable at the time such reports are filed and shall be delinquent and bear interest from and after the fifteenth day of the month immediately following the end of the quarter.

5.4(97) Election of coverage. Any political subdivision or the instrumentalities thereof not covered under the Iowa old-age and survivor insurance system may elect to become so covered by filing with the commission its election on IOASI form No. 3, and upon approval of such election by the commission shall, as of the date stated in such approval, become subject to said Act to the same extent as all other "employers" as defined by said Act.

5.5(97) Court reporter's taxable salaries. Each court reporter employed in a district comprising several counties shall keep an accurate record of the salary paid him by the various counties of his district. When he has been paid a total salary of $3,000 by the several counties in the district, he shall certify to the county auditor of each county of the district on a form approved by the commission to the effect that he has been paid the

maximum $3,000 taxable salary for said year, and thereafter the various county auditors shall be authorized to discontinue the withholding and payment of any further or additional tax during such calendar year.

[Filed before July 4, 1952]

CHAPTER 6
IOWA PUBLIC EMPLOYEES' RETIREMENT SYSTEM

6.1(97B) Refund of accumulated contributions of a deceased member. Chapter 97B of the Code provides that a "beneficiary" means a person or persons entitled to receive benefits at the death of a member payable under the system, designated in writing by the member and filed with the commission, or if no such designation is in effect at the time of death of the member or if no person so designated is living at that time, then the beneficiary shall be the estate of the member.

6.1(1) *Payment to legal representative.* Where there is no designation of beneficiary in effect at the time of death of member, payment will be made to the legal representative of such estate.

6.1(2) *Payment to relative of deceased.* Where it appears reasonably certain that a legal representative has not been and will not be appointed or where a legal representative has been discharged, a verified application listing the surviving spouse and all heirs at law may be filed by a relative of the deceased member by blood, marriage, or adoption, and payment made to such applicant on behalf of the estate if the requirement of 6.1(3) is met.

6.1(3) *Consent of relatives to payment.* Payment of benefits or refunds due at the death of a member may be made to the applicant provided for in 6.1(2) if verified statements are submitted to the commission by the spouse of the deceased member and the members of the group of relatives closest in kinship to the deceased stating that the application listing the spouse and all heirs at law falling under 6.1(2) is the correct list of the spouse and heirs at law and consenting to the payment of said death benefit or refund to the applicant for distribution as determined by the following groupings:

a. Children and children of deceased children;

b. Parents;

c. Brothers and sisters and children of deceased brothers and sisters;

d. All other relatives by blood or adoption, the closeness of relationship being determined according to the law of the domicile of the deceased insured individual.

6.2(97B) Recomputation of benefits based on re-employment after retirement. Recomputation of benefits as provided under Iowa public employees' retirement system section 97B.48, based on re-employment after retirement, will not be made more often than once in every 12-month period.

[Filed November 2, 1953; amended September 8, 1954]

CHAPTER 7
FEDERAL SOCIAL SECURITY

7.1(97C) Accrual of interest.

WHEREAS section 404.1255 (a), Regulation No. 4 of the secretary of health, education and welfare, provides that interest on delayed quarterly wage reports resulting from the failure of a political subdivision to forward its report and pay its tax to the commission in time to permit the commission to file a completed consolidated wage report and a completed contribution return is one-half of one percent for each calendar month or part of a calendar month after the due date of the contributions, and

WHEREAS section 97C.18 of the Code provides:

"The state agency shall make and publish such rules and regulations, not inconsistent with the provisions of this Act, as it finds necessary or appropriate to the efficient administration of the functions with which it is charged under this Act, and the state agency shall comply with regulations relating to payments and reports as may be prescribed by the federal security administrator."

And, WHEREAS the commission must collect the interest from the political subdivisions that are delinquent in filing reports and in payment of the tax,

The commission accordingly prescribes:

Federal old-age and survivor insurance taxes unpaid by the date on which they are due and payable, which said due date is hereby established as the fifteenth of the month following the end of the quarter, shall bear interest at the rate of one-half of one percent for each calendar month from and after such due date until payment plus accrued interest is received by the commission. Interest shall be computed on actual days of delinquency.

Any federal old-age and survivor insurance tax penalties resulting from failure of the political subdivision to pay its tax when due shall be recovered by the commission from such political subdivision.

[Filed November 20, 1953; amended June 10, 1966]

ENGINEERING EXAMINERS

CHAPTER 1
EXAMINATIONS

1.1(114) Professional engineering examinations.

1.1(1) Before any applicant may be permitted to appear for examination, a digest of his training and experience must be submitted to the board for approval. No one will be admitted to the examination in the professional subject (branch) until he has had the full amount of training required by law.

1.1(2) Those who have attended college shall arrange for a certified abstract of their college education record to be transmitted directly to the board secretary by the college registrar.

1.1(3) In the examination in fundamentals, questions will be asked which will generally require knowledge of mathematics, including algebra, advanced algebra, logarithms, plane and solid geometry, trigonometry, and analytical geometry, differential and integral calculus and differential equations; applied science, including physics, mechanics, statics, dynamics, hydraulics, thermodynamics, electricity, electromagnetism and chemistry; materials of construction, including resistance of materials, steel, reinforced concrete, masonry construction and timber construction; elements of structural design, including stress analysis, beams, slabs, columns, girders, trusses, foundations, retaining walls, unit stresses and graphic statics; elements of mechanical design, including power, heating, ventilation, prime movers, mechanical transmission and water power; electrical design, including laws of electricity, electrical equipment, direct and alternating circuits, types and characteristics of motors and generators; engineering administration, including engineering economics, contracts, specifications, professional practice and professional ethics; and other subjects commonly taught in the regular approved engineering curriculum.

1.1(4) Practical experience in professional engineering work to be considered of a grade and character satisfactory to the board shall be such as to require the application of engineering principles in the practical solution of engineering problems. This work shall predicate a knowledge of engineering mathematics, physical and applied sciences, properties of materials and the fundamental principles of engineering design. It shall be of such nature as to develop and mature the applicant's engineering knowledge and judgment.

1.1(5) An applicant who fails to make a final rating of 70 percent in an examination will be required to appear for re-examination. A candidate who fails in two examinations will not be permitted to appear for another examination until he can show that he has had an additional two years of qualifying experience acceptable to the board.

1.1(6) All applicants shall be notified of two consecutive engineering board meetings after their application is filed with the secretary.

1.2(114) Photograph. A photograph of the applicant shall appear in space provided upon the application form.

It shall be an unretouched photograph taken within six months prior to the date of the application and the face shall be portrayed not less than three-fourths inch in width.

1.3(114) Land surveying. Land surveying comprises all or any combination of the following practices:

1.3(1) The making of such observations and measurements as will determine the relative position of points, areas, structures or natural objects on the earth's surface or related thereto.

1.3(2) The surveying of areas:

a. For their correct determination and description and for conveyancing.

b. For the establishment or re-establishment of land boundaries.

c. For the platting of lands and subdivisions.

d. For the setting of reference or other monuments to perpetuate such observations, measurements and surveys.

1.3(3) The preparation of land descriptions used in conveyancing.

Observations or measurements, made exclusively for geological or landscaping purposes and not involving the determination of any property line, do not constitute land surveying within the meaning of this rule, but may be considered as surveying which is a part of civil engineering practice.

1.4(114) Examination for land surveying.

1.4(1) All applicants for examination in land surveying will have to meet the requirements of two days of written examination. This will consist of one day of fundamentals and one day of land surveying practice. Those who have passed the fundamentals portion of the examination for professional engineer will not be required to take the land surveying fundamentals.

1.4(2) Candidates must know how the original surveys were conducted. They must know the rules governing the restoration of obliterated corners. They must be able to re-establish lost corners. They must have had enough actual experience in land surveying work to make them familiar with the proper methods of retracing the original surveys. This experience cannot be gained in school or from reading books. It must be secured in the field.

1.4(3) Candidates must know what discrepancies to expect in retracement work and how to use evidence in the restoration of obliterated land lines and corners. They must understand the laws governing riparian rights, accretions, adverse possession. They must also be familiar with the ethics of the engineering profession.

1.5(114) Registration in Iowa for those registered in other states. An engineer, registered in any state, who seeks registration in Iowa shall make application for such registration to the board on prescribed forms. The information submitted with that application, together with such information which the board obtains from boards in the state or states, where he has obtained registration shall be used as evidence of qualification for registration in Iowa.

1.6(114) Practice of engineering prior to registration. A professional engineer, registered in another state, who has made application for registration in the state of Iowa, under 1.5(114), may, upon specific application, be allowed to practice engineering in the state of Iowa, until the next meeting of the board, provided, in the opinion of the board, such practice is in the public interest, and the applicant has not begun the practice of engineering in the state before the board has approved his request.

1.7(114) Preliminary examinations for college seniors (engineers-in training). Examination in fundamentals will be offered to persons graduating from accredited engineering courses. Examinations may be taken during or shortly after the final term at convenient times to be fixed by the board. These fundamental examinations are designed primarily to accommodate students in Iowa engineering colleges and Iowa residents attending other engineering colleges.

1.8(114) It shall be considered unprofessional and inconsistent with honorable and dignified bearing for any professional engineer or surveyor:

1. To act for his client or employer, in professional matters other than as a faithful agent or trustee, or to accept any remuneration other than his stated recompense for services rendered.
2. To attempt to injure falsely or maliciously, directly or indirectly, the professional reputation, prospects or business of anyone.
3. To attempt to supplant another engineer or land surveyor after definite steps have been taken toward his employment.
4. To compete with another engineer or land surveyor for employment by the use of unethical practices.
5. To review the work of another engineer or land surveyor for the same client, except with the knowledge of such engineer or land surveyor, or unless the connection of such engineer or land surveyor with the work has terminated.
6. To attempt to give or obtain technical services or assistance without fair and just compensation commensurate with the services rendered.
7. To advertise in self-laudatory language, or in any other manner derogatory to the dignity of the profession.

[Filed March 16, 1953; amended January 19, 1954, October 18, 1954, June 15, 1956, March 30, 1959, March 8, 1961, June 14, 1961, March 14, 1962, May 8, 1969]

ENVIRONMENTAL QUALITY DEPARTMENT

[These rules herein published under the Environmental Quality Department heading were promulgated by former departments now abolished and their duties absorbed into the D. E. Q.]

TITLE I

AIR QUALITY

CHAPTER 1
DEFINITIONS

1.1(455B) General.

1.1(1) *Meaning.* For the purpose of these rules, the following terms shall have the meaning indicated in this chapter. The definitions set out in section 136B.2 [Code 1971] shall be considered to be incorporated verbatim in these rules.

1.1(2) *Scope.* No attempt is made to define ordinary words which are used in accordance with their established dictionary meanings, except where the context otherwise requires and it is necessary to define the meaning as used in these rules to avoid misunderstanding.

1.2(455B) Definition of terms.

1.2(1) *Air pollution alert.* That action condition declared when the concentrations of air contaminants reach the level at which the first stage control actions are to begin.

1.2(2) *Air pollution emergency.* That action condition declared when the air quality is continuing to degrade to a level that should never be reached, and that the most stringent control actions are necessary.

1.2(3) *Air pollution episode.* A combination of forecast or actual meteorological conditions and emissions of air contaminants which may or do present an imminent and substantial endangerment to the health of persons, during which the chief meteorological factors are the absence of winds that disperse air contaminants horizontally and a stable atmospheric layer which tends to inhibit vertical mixing through relatively deep layers.

1.2(4) *Air pollution forecast.* An air stagnation advisory issued to the department, the commission, and to appropriate air pollution control agencies by an authorized Air Stagnation Advisory Office of the National Weather Service predicting that meteorological conditions conducive to an air pollution episode may be imminent. This advisory may be followed by a prediction of the duration and termination of such meteorological conditions.

1.2(5) *Air pollution warning.* That action condition declared when the air quality is continuing to degrade from the levels classified as an air pollution alert, and where control actions in addition to those conducted under an air pollution alert are necessary.

1.2(6) *Air quality standard.* An allowable level of air contaminant or atmospheric air concentration established by the commission.

1.2(7) *ASME.* The American Society of Mechanical Engineers, 345 East 47th Street, New York, New York.

1.2(8) *ASTM.* The American Society for Testing Materials, 1916 Race Street, Philadelphia, Pennsylvania.

1.2(9) *Auxiliary fuel firing equipment.* Equipment to supply additional heat, by the combustion of an auxiliary fuel, for the purpose of attaining temperatures sufficient to dry and ignite the waste material, to maintain ignition thereof, and to promote complete combustion of combustible gases, solids and vapors.

1.2(10) *Backyard burning.* The disposal of residential waste by open burning on the premises of the property where such waste is generated.

1.2(11) *BTU.* British Thermal Unit, the quantity of heat required to raise the temperature of one pound of water from 59° F. to 60° F.

1.2(12) *Carbonaceous fuel.* Any form of combustible matter (whether solid, liquid, vapor or gas) consisting primarily of carbon-containing compounds in either fixed or volatile form, and which is burned primarily for its heat content.

1.2(13) *Chimney or stack.* Any flue, conduit or duct permitting the discharge or passage of air contaminants into the open air, or constructed or arranged for this purpose.

1.2(14) *Coh/1000 linear feet.* Coefficient of haze per 1000 linear feet, which is a measure of the optical density of a filtered deposit of particulate matter as given in ASTM Standard D-1704-61, and indicated by the following formula:

$$\text{Coh/1000 linear feet} = \frac{(\text{Area tape, ft}^2)\,(100{,}000)\log \dfrac{100}{\text{percent transmission}}}{(\text{Volume of air sample, ft}^3)}$$

1.2(15) *Combustion for indirect heating.* The combustion of fuel to produce usable heat that is to be transferred through a heat-conducting materials barrier or by a heat storage medium to a material to be heated so that the material being heated is not contacted by, and adds no substance to, the products of combustion.

1.2(16) *Control equipment.* Any equipment that has the function to prevent the formation of or the emission to the atmosphere of air contaminants from any fuel burning, incinerator or process equipment.

1.2(17) *Criteria.* Information used as guidelines for decisions when establishing air quality goals, air quality standards and the various air quality levels, and which in no case is to be confused or used interchangeably with air quality goals or standards.

1.2(18) *Electric furnace.* A furnace in which the melting and refining of metals are accomplished by means of electrical energy.

1.2(19) *Emission standard.* The maximum allowable discharge rate of any given air contaminant to the atmosphere as established by the commission.

1.2(20) *Equipment.* Equipment capable of emitting air contaminants to produce air pollution such as fuel burning, combustion or process devices or apparatus including but not limited to fuel burning equipment, refuse-burning equipment used for the burning of fuel or other combustible material from which the products of combustion are emitted; and including but not limited to apparatus, equipment or process devices which generate heat and may emit products of combustion, and manufacturing, chemical, metallurgical or mechanical apparatus or process devices which may emit smoke, particulate matter or other air contaminants.

1.2(21) *Excess air.* That amount of air supplied in addition to the theoretical quantity necessary for complete combustion of all fuel or combustible waste material present.

1.2(22) *Existing equipment.* Equipment, machines, devices or installations that are in operation at the effective date of these rules.

1.2(23) *Foundry cupola.* A stack-type furnace used for melting of metals consisting, but not limited to, the furnace proper, tuyeres, fans or blowers, tapping spout, charging equipment, gas cleaning devices and other auxiliaries.

1.2(24) *Fugitive dust.* Any airborne particulate solid matter emitted from any source other than a flue or stack.

1.2(25) *Garbage.* All solid and semisolid putrescible and nonputrescible animal and vegetable wastes resulting from the handling, preparing, cooking, storing and serving of food or of material intended for use as food, but excluding recognized industrial byproducts.

1.2(26) *Gas cleaning device.* A facility designed to remove air contaminants from gases exhausted from equipment as defined herein.

1.2(27) *Goal.* A level of air quality which is expected to be obtained.

1.2(28) *Heating value.* The heat released by combustion of one pound of waste or fuel measured in BTU's on an as received basis. For solid fuels, the heating value shall be determined by use of ASTM Standard D2015-66.

1.2(29) *Incinerator.* A combustion apparatus designed for high temperature operation in which solid, semisolid, liquid or gaseous combustible wastes are ignited and burned efficiently, and from which the solid residues contain little or no combustible material.

1.2(30) *Landscape waste.* Any vegetable or plant wastes except garbage. The term includes trees, tree trimmings, branches, stumps, brush, weeds, leaves, grass, shrubbery and yard trimmings.

1.2(31) *Level.* A certain specified degree, quality or characteristic.

1.2(32) *New equipment.* Any equipment or control equipment not under construction or for which components have not been purchased on the effective date of these rules, and any equipment which is altered or modified after such date, which may cause the emission of air contaminants or eliminate, reduce or control the emissions of air contaminants.

1.2(33) *Objectionable odor.* An odor that is believed to be objectionable by 30 percent or more of a random sample of the people exposed to such odor, with the sample size of at least 30 people.

1.2(34) *Objective.* A certain specified degree, quality or characteristic expected to be attained.

1.2(35) *Opacity.* A state which renders material partially or wholly impervious to rays of light and causes obstruction of the view of the observer.

1.2(36) *Open burning.* Any burning of combustible materials where the products of combustion are emitted into the open air without passing through a chimney or stack.

1.2(37) *Particulate matter.* Any material, except uncombined water, that exists in a finely divided form as a liquid or solid at standard conditions.

1.2(38) *Parts per million (PPM).* A term which expresses the volumetric concentration of one material in one million unit volumes of a carrier material.

1.2(39) *Plan documents.* The reports, proposals, preliminary plans, survey and basis of design data, general and detail construction plans, profiles, specifications and all other information pertaining to equipment.

1.2(40) *Process.* Any action, operation or treatment, and all methods and forms of manufacturing or processing, that may emit smoke, particulate matter, gaseous matter or other air contaminant.

1.2(41) *Process weight.* The total weight of all materials introduced into any source operation. Solid fuels charged will be considered as part of the process weight, but liquid and gaseous fuels and combustion air will not.

1.2(42) *Process weight rate.* For continuous or long-run steady-state source operations, the total process weight for the entire period of continuous operation or for a typical portion thereof, divided by the number of hours of such period or portion thereof; or for a cyclical or batch source operation, the total process weight for a period that covers a complete operation or an integral number of cycles, divided by the number of hours of actual process operation during such a period. Where the nature of any process or operation, or the design of any equipment, is such as to permit more than one interpretation of this definition, the interpretation that results in the minimum value for allowable emission shall apply.

1.2(43) *Refuse.* Garbage, rubbish and all other putrescible and nonputrescible wastes, except sewage and water-carried trade wastes.

1.2(44) *Residential waste.* Any refuse generated on the premises as a result of residential activities. The term includes landscape wastes grown on the premises or deposited thereon by the elements, but excludes garbage, tires and trade wastes.

1.2(45) *Ringelmann chart.* The chart published and described in Information Circular 8333, Bureau of Mines, U. S. Department of Interior, and on which are illustrated graduated shades of gray to black for use in estimating the apparent density of smoke from combustion stacks.

1.2(46) *Rubbish.* All waste materials of nonputrescible nature.

1.2(47) *Salvage operations.* Any business, industry or trade engaged wholly or in part in salvaging or reclaiming any product or material, including, but not limited to, chemicals, drums, metals, motor vehicles or shipping containers.

1.2(48) *Smoke.* Gas-borne particles resulting from incomplete combustion, consisting

predominantly, but not exclusively, of carbon, and other combustible material, or ash, that form a visible plume in the air.

1.2(49) *Smoke monitor.* A device using a light source and a light detector which can automatically measure and record the light-obscuring power of smoke at a specific location in the flue or stack of a source.

1.2(50) *Source operation.* The last operation preceding the emission of an air contaminant, and which results in the separation of the air contaminant from the process materials or in the conversion of the process materials into air contaminants, but is not an air pollution control operation.

1.2(51) *Standard conditions.* A gas temperature of 70° F. and a gas pressure of 29.92 inches of mercury absolute.

1.2(52) *Standard cubic foot (SCF).* The volume of one cubic foot of gas at standard conditions.

1.2(53) *Standard metropolitan statistical area (SMSA).* An area which has at least one city with a population of at least 50,000 and such surrounding areas as geographically defined by the U.S. Bureau of the Budget.

1.2(54) *Stationary source.* Any building, structure, facility or installation which emits or may emit any air pollutant.

1.2(55) *Theoretical air.* The exact amount of air required to supply the required oxygen for complete combustion of a given quantity of a specific fuel or waste.

1.2(56) *Trade waste.* Any refuse resulting from the prosecution of any trade, business, industry, commercial venture (including farming and ranching), or utility or service activity, and any governmental or institutional activity, whether or not for profit.

1.2(57) *Variance.* A temporary waiver from rules or standards governing the quality, nature, duration or extent of emissions granted by the commission for a specified period of time.

These rules are intended to implement section 136B.4(3, 5) [Code 1971].

[Filed August 24, 1970;
amended May 2, 1972]

CHAPTER 2
COMPLIANCE

2.1(455B) Compliance schedule.

2.1(1) *New equipment.* All new equipment and all new control equipment, as defined herein, installed in this state shall perform in conformance with applicable emission standards specified in chapter 4.

2.1(2) *Existing equipment.* All existing equipment, as defined herein, shall be in conformance with applicable emission standards specified for new equipment in chapter 4 of these rules or as otherwise specified herein.

2.1(3) *Emissions inventory.* The person responsible for equipment as defined herein shall provide information on fuel use, materials processed, air contaminants emitted, estimated rate of emissions, periods of emission or other air pollution information to the technical secretary upon his written request for use in compiling and maintaining an emissions inventory for evaluation of the air pollution situation in the state and its various parts. The information requested shall be submitted on forms supplied by the department. Any publication of such data shall be in a manner that does not divulge or reveal the identity of the installation or its owner.

These rules are intended to implement section 136B.4(3, 5) [Code 1971].

[Filed August 24, 1970;
amended May 2, 1972]

CHAPTER 3
CONTROLLING POLLUTION

3.1(455B) Permits.

3.1(1) *Permit required.* Each person planning to construct, install, reconstruct or alter any equipment as defined in 1.2(20), or related control equipment, as defined in 1.2(16), shall obtain a permit for the proposed equipment or related control equipment from the department, prior to the initiation of construction, installation or alteration. Said permit will not be required if the alterations to the equipment will not change the emissions from that equipment.

a. Application for permit. Each application for a permit shall be submitted to the department on the form "Application for a Permit to Install or Alter Equipment or Control Equipment". Plans and specifications relating to the proposed equipment shall be submitted with the application for a permit.

b. Preparation of plans. All plans and specifications for equipment and related control equipment, as defined herein, shall be prepared by or under the direct supervision of an engineer in conformance with chapter 114 of the Code.

c. Information required. The plans and specifications submitted shall include the following information:

(1) The equipment or control equipment covered by the application;

(2) The plot plan, including the distance and height for nearby buildings, and location and elevation of the emission points;

(3) The composition of the effluent stream, both before and after any control equipment with estimates of emission rates, concentration, volume and temperature;

(4) The physical and chemical characteristics of the air contaminants;

(5) Any tests to be made of the completed installation by the owner;

(6) The sampling holes, scaffolding, power sources for operation of appropriate sampling instruments and pertinent allied facilities for making tests to ascertain compliance; and

(7) Any additional information as is deemed necessary by the department to determine compliance with these rules.

3.1(2) *Processing of applications for permits.* The department shall notify the applicant in writing of the issuance or denial of a permit as soon as practicable, at least within 60 days. When this schedule would cause undue hardship to an applicant, or materially handicap this need for proceeding promptly with the proposed installation, modification or location, a request for priority consideration and the justification therefor shall be submitted to the department.

a. Issuing of permit. A permit shall be issued when the department concludes that the plans and specifications represent equipment which should comply with the requirements specified in these rules. A permit may be issued subject to conditions which shall be specified in writing.

(1) Each permit shall specify the date on which it becomes void if work on the installation for which it was issued has not been initiated by that date.

(2) Such permit is not transferable from one location to another; unless the equipment is portable or from one piece of equipment to another.

(3) If changes are proposed in the plans and specifications after a permit has been issued, a supplemental permit incorporating such changes shall be obtained.

(4) Each permit shall require the department to be notified at least ten days before the equipment or control equipment involved is placed in operation.

(5) When portable equipment for which a permit has been issued is transferred from one location to another, the department shall be notified prior to beginning operation at the new location.

b. Denial of permit. When an application for a permit is denied, the applicant shall be notified in writing of the reasons therefor. Such a denial shall be without prejudice to the right of the applicant for filing a further application after revisions are made to meet the objections specified as reasons for the denial.

3.1(3) *Exemptions from permit requirements.* The provisions of this rule shall not apply to the following items:

a. Fuel burning equipment for indirect heating and reheating furnaces using natural or liquefied petroleum gas or number 2 fuel oil, with a capacity of less than 50 million BTU per hour input.

b. Fuel burning equipment for indirect heating with a capacity less than one million BTU per hour input when burning coal or oil.

c. Mobile internal combustion and jet engines, marine installations and locomotives.

d. Equipment used on farms and ranches for agricultural purposes, except equipment as listed in 4.4(7).

3.2(455B) Variances.

3.2(1) *Application for variances.* A person may make application for a variance from applicable emission standards specified in chapter 4, or other provisions specified.

a. Contents. Each application for a variance shall be submitted to the technical secretary, stating the following:

(1) The name, address and telephone number of the person submitting the application or, if such person is a legal entity, the name and address of the individual authorized to accept service of process on its behalf and the name of the person in charge of the premises where the pertinent activities are conducted.

(2) The type of business or activity involved.

(3) The nature of the operation or process involved; including information on the air contaminants emitted, the chemical and physical properties of such emissions and the estimated amount and rate of discharge of such emissions.

(4) The exact location of the operation or process involved.

(5) The reason or reasons for considering that compliance with the provisions specified in these rules will produce serious hardship without equal or greater benefits to the public, and the reasons why no other reasonable method can be used for such operations without resulting in a hazard to health or property.

(6) Each application shall bear the signature of the person making the application, following an affirmation that all statements are true and correct.

b. Variance extension. The request for extension of a variance shall be accompanied by one of the following applicable items;

(1) A letter of intent as specified in 3.3(455B).

(2) An emission reduction program as specified in 3.4(455B).

3.2(2) *Processing of applications.* Each application for a variance and its supporting material shall be reviewed and an investigation of the facilities shall be made by the department, for evaluation of whether or not the emissions involved will produce the following effects.

a. Endanger human health. Endanger or tend to endanger the health of persons residing in or otherwise occupying the area affected by said emissions.

b. Create safety hazards. Create or tend to create safety hazards, such as (but not limited to) interference with traffic due to reduced visibility.

c. Damage to livestock or plant life. Damage or tend to damage any livestock harbored on, or any plant life on, property that is affected by said emissions and under other ownership.

d. Damage property. Damage or tend to damage any property on land that is affected by said emissions and under other ownership.

3.2(3) *Recommendation for action.* Upon completion of its investigation, the department shall submit the findings and a recommendation for appropriate action to the commission.

a. Granting of variance. The commission shall grant a variance when it concludes that such action is appropriate. The variance may be granted subject to conditions specified by the commission. The commission shall specify such time intervals as are considered appropriate for submission of reports on the progress attained in the emission reduction program.

b. Denial of variance. The commission shall deny a variance when it concludes that such action is appropriate. A denial shall be without prejudice of the right of the applicant to request a review hearing before the commission.

3.3(455B) Letter of intent.

3.3(1) *Contents.* A letter of intent to file an emission reduction program submitted pursuant to these rules shall include information on the following items pertaining to each source operation:

a. Raw materials. The quantity and type of raw materials processed.

b. Emissions. An estimate of the quantity and type of emissions to the atmosphere.

c. Emission sources. A listing of those source operations which are considered major sources of air contaminant emissions.

d. Control equipment. A listing of the existing pollution control devices and an estimate of their efficiency.

e. Anticipated problems. Comments regarding particular problems anticipated in reducing emissions.

f. Emission reduction program submission date. The date when a detailed air contaminant emission reduction program pertaining to each source operation will be submitted to the department. Such date shall not be later than six months after filing the letter of intent.

g. Additional information. Such additional information as may be required by the commission.

3.3(2) Reserved for future use.

3.4(455B) Emission reduction program.

3.4(1) *Contents.* An air contaminant emission reduction program submitted to the department pursuant to these rules shall include a schedule for the installation of pollution control devices, or the replacement or alteration of specified facilities in such a way that emissions of air contaminants are reduced to comply with the emission standards specified in chapter 4.

3.4(2) *Review.* The department shall review all programs submitted, and shall make recommendations to the commission with respect to whether these programs are adequate and reasonable.

a. Commission action. Upon receiving the recommendation of the department, the commission may approve or disapprove such programs.

(1) If an approved program is being implemented as scheduled, the person involved shall not be considered to be in violation of these rules.

(2) If the department recommends disapproval of a program, the disapproval shall be without prejudice to the right of the applicant to request a review hearing before the commission, and the applicant shall have a period of 30 days from date of notification by the commission in which to request a review hearing.

3.4(3) *Reports.* Each person responsible for an approved program shall make periodic written progress reports to the department, as specified by the department. The department shall make periodic reports to the commission on emission reduction programs submitted, and on the recommendations related to such programs.

These rules are intended to implement section 136B.4(3, 5) [Code 1971]

[Filed August 24, 1970;
amended May 2, 1972]

CHAPTER 4
EMISSION STANDARDS FOR CONTAMINANTS

4.1(455B) Emission standards. Compliance with emission standards specified in this chapter shall be in accordance with chapter 2. The following standards shall be considered as operating or performance standards, rather than design standards.

4.2(455B) Open burning.

4.2(1) *Prohibition.* No person shall allow, cause or permit open burning of combustible materials, except as provided in 4.2(2) and 4.2(3).

4.2(2) *Variances from rules.* Any person wishing to conduct open burning of materials not exempted in subsection 4.2(3) may make application for a variance as specified in 3.2(1) of these rules.

4.2(3) *Exemptions.* The following shall be permitted unless prohibited by local ordinances or regulations.

a. Disaster rubbish. The open burning of rubbish, including landscape waste, for the duration of the community disaster period in cases where an officially declared emergency condition exists.

b. Diseased trees. The open burning of diseased trees. However, when the burning of diseased trees causes a nuisance, the commission may take appropriate action to secure relocation of the burning operation. Rubber tires shall not be used to ignite diseased trees.

c. Flare stacks. The open burning or flaring of waste gases, providing such open burning or flaring is conducted in compliance with paragraphs 4.3(2) "*d*" and 4.3(3) "*d*" of these rules.

d. Landscape waste. The disposal by open burning of landscape waste originating on the premises. However, the burning of landscape waste produced in clearing, grubbing and construction operations shall be limited to areas located at least one-fourth mile from any inhabited building. Rubber tires shall not be used to ignite landscape waste.

e. Recreational fires. Open fires for cooking, heating, recreation and ceremonies, provided they comply with paragraph 4.3(2) "*d*" of these rules.

f. Residential waste. Backyard burning of residential waste at dwellings of four-family units or less. The adoption of more restrictive ordinances or regulations of a governing body of the political subdivision, relating to control of backyard burning, shall not be precluded by these rules.

g. Training fires. Fires set for the purpose of bona fide training public or industrial employees in fire fighting methods, provided that the technical secretary receives notice in writing at least one week before such action commences.

4.3(455B) Specific contaminants.

4.3(1) *General.* The emission standards contained in this rule shall apply to each source operation unless a specific emission standard for the process involved is prescribed elsewhere in this chapter, in which case the specific standard shall apply.

4.3(2) *Particulate matter.* No person shall cause or allow the emission of particulate matter from any source in excess of the emission standards specified in this chapter, except as provided in chapter 5.

a. Process weight rate. The emission of particulate matter from any process shall not exceed the amount determined from Table II, except as provided in 3.2(455B), 4.4(455B) and chapter 5.

TABLE II
ALLOWABLE RATE OF EMISSION BASED ON PROCESS WEIGHT RATE*

Process Weight Rate		Emission Rate	Process Weight Rate		Emission Rate
Lb/Hr	Tons/Hr	Lb/Hr	Lb/Hr	Tons/Hr	Lb/Hr
100	0.05	0.55	16,000	8.00	16.5
200	0.10	0.88	18,000	9.00	17.9
400	0.20	1.40	20,000	10.00	19.2
600	0.30	1.83	30,000	15.00	25.2
800	0.40	2.22	40,000	20.00	30.5
1,000	0.50	2.58	50,000	25.00	35.4
1,500	0.75	3.38	60,000	30.00	40.0
2,000	1.00	4.10	70,000	35.00	41.3
2,500	1.25	4.76	80,000	40.00	42.5
3,000	1.50	5.38	90,000	45.00	43.6
3,500	1.75	5.96	100,000	50.00	44.6
4,000	2.00	6.52	120,000	60.00	46.3
5,000	2.50	7.58	140,000	70.00	47.8
6,000	3.00	8.56	160,000	80.00	49.0
7,000	3.50	9.49	200,000	100.00	51.2
8,000	4.00	10.4	1,000,000	500.00	69.0
9,000	4.50	11.2	2,000,000	1,000.00	77.6
10,000	5.00	12.0	6,000,000	3,000.00	92.7
12,000	6.00	13.6			

*Interpolation of the data in this table for process weight rates up to 60,000 lb/hr shall be accomplished by the use of the equation

$$E = 4.10\ P^{0.67},$$

and interpolation and extrapolation of the data for process weight rates in excess of 60,000 lb/hr shall be accomplished by use of the equation

$$E = 55.0\ P^{0.11} - 40,$$

where E = rate of emission in lb/hr, and
P = process weight in tons/hr

b. Combustion for indirect heating. Emissions of particulate matter from the combustion of fuel for indirect heating or for power generation shall be limited by the ASME Standard APS-1, Second Edition, November, 1968, "Recommended Guide for the Control of Dust Emission—Combustion for Indirect Heat Exchangers". For the purpose of this paragraph, the allowable emissions shall be calculated from equation (15) in that standard, with $Comax^2$=50 micrograms per cubic meter. Allowable emissions from a single stack may be estimated from Figure 1. The maximum ground level dust concentrations designated are above the background level. For plants with 4,000 million BTU/hour input or more, the "a" factor shall be 1.0. In plants with less than 4,000 million BTU/hour input, appropriate "a" factors, less than 1.0, shall be applied. Pertinent correction factors, as specified in the standard, shall be applied for installations with multiple stacks.

(1) Outside any standard metropolitan statistical area, the maximum allowable emissions from each stack serving existing equipment, irrespective of height, shall be 0.8 pounds of particulates per million BTU input.

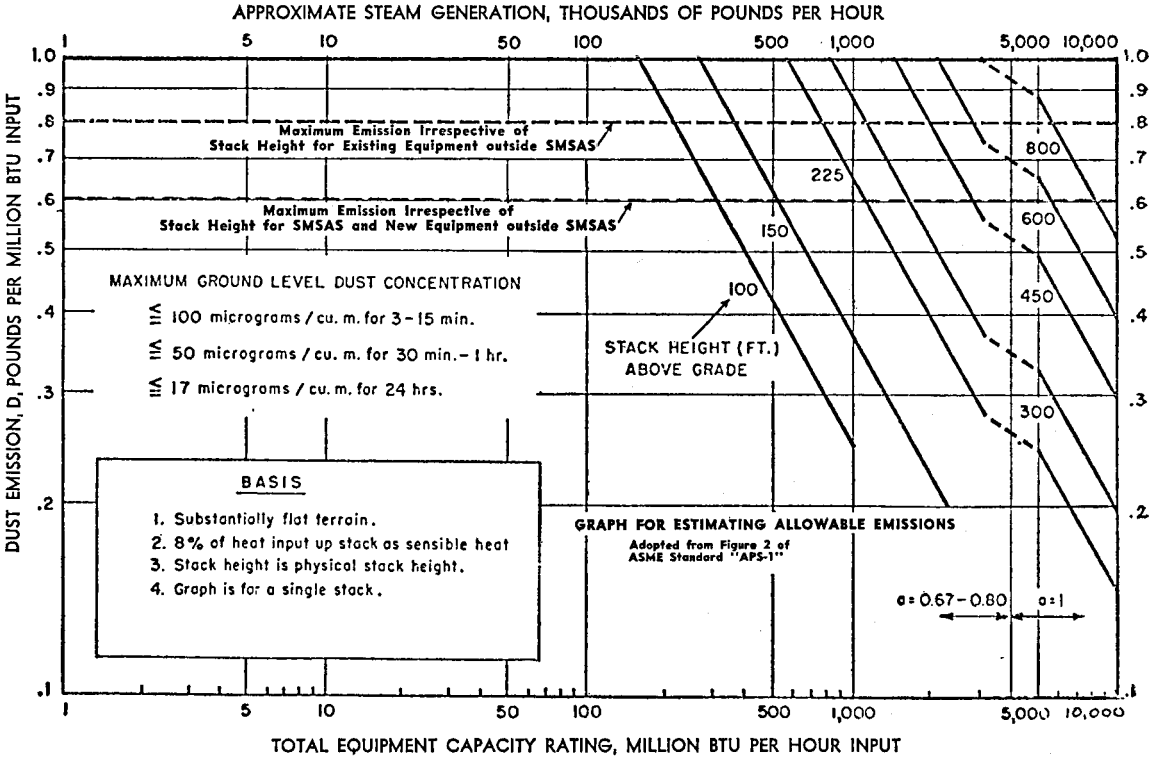
(2) Inside any standard metropolitan statistical area, the maximum allowable emission from each stack, irrespective of height, shall be 0.6 pounds of particulates per million BTU input.

(3) In new equipment, the maximum allowable emissions from each stack, irrespective of height or location, shall be 0.6 pounds of particulates per million BTU input.

(4) Measurements of emissions from a particulate source will be made in accordance with the provisions of chapter 7.

FIGURE 1

COMBUSTION FOR INDIRECT HEAT EXCHANGERS



c. Fugitive dust. After September 1, 1972, no person shall allow, cause or permit any materials to be handled, transported or stored; or a building, its appurtenances or a construction haul road to be used, constructed, altered, repaired or demolished, with the exception of farming operations or dust generated by ordinary travel on unpaved roads, without taking reasonable precautions to prevent particulate matter in quantities sufficient to create a nuisance, as defined in section 657.1, from becoming airborne. All persons, with the above exceptions, shall take reasonable precau-

tions to prevent the discharge of visible emissions of fugitive dusts beyond the lot line of the property on which the emissions originate. Reasonable precautions may include, but not be limited to, the following procedures.

(1) Use, where practical, of water or chemicals for control of dusts in the demolition of existing buildings or structures, construction operations, the grading of roads or the clearing of land.

(2) Application of suitable materials, such as but not limited to asphalt, oil, water or chemicals, on dirt roads, material stockpiles, race tracks and other surfaces which can give rise to airborne dusts.

(3) Installation and use of containment or control equipment, to enclose or otherwise limit the emissions resulting from the handling and transfer of dusty materials, such as but not limited to grain, fertilizer or limestone.

(4) Covering, at all times when in motion, open-bodied vehicles transporting materials likely to give rise to airborne dusts.

(5) Prompt removal of earth or other material from paved streets on to which earth or other material has been transported by trucking or earth-moving equipment, erosion by water or other means.

d. Visible emissions. After September 1, 1972, no person shall allow, cause or permit the emission of visible air contaminants of a density or shade equal to or darker than that designated as Number 2 on the Ringelmann Chart, or 40 percent opacity, into the atmosphere from any fuel-burning equipment, internal combustion engine, premise fire, open fire or stack, except as provided below and in chapter 5 of these rules.

(1) *Residential heating equipment.* Residential heating equipment serving dwellings of four family units or less is exempt.

(2) *Gasoline-powered vehicles.* No person shall allow, cause or permit the emission of visible air contaminants from gasoline-powered motor vehicles for longer than five consecutive seconds.

(3) *Diesel-powered vehicles.* No person shall allow, cause or permit the emission of visible air contaminants from diesel-powered motor vehicles of a shade or density equal to or darker than that designated as Number 2 on the Ringelmann Chart, or 40 percent opacity, for longer than five consecutive seconds.

(4) *Diesel-powered locomotives.* No person shall allow, cause or permit the emission of visible air contaminants from diesel-powered locomotives of a shade or density equal to or darker than that designated as Number 2 on the Ringelmann Chart, or 40 percent opacity, except for a maximum period of 40 consecutive seconds during acceleration under load, or for a period of four consecutive minutes when a locomotive is loaded after a period of idling.

(5) *Startup and testing.* Initial start and warmup of a cold engine, the testing of an engine for trouble, diagnosis or repair, or engine research and development activities, is exempt.

(6) *Uncombined water.* The provisions of this paragraph shall apply to any emission which would be in violation of these provisions except for the presence of uncombined water, such as condensed water vapor.

4.3(3) *Sulfur compounds.* The provisions of this subrule shall apply to any installation from which sulfur compounds are emitted into the atmosphere.

a. Sulfur dioxide from use of fuels. After January 1, 1974, no person shall allow, cause or permit the emission of sulfur dioxide into the atmosphere in an amount greater than 6 pounds of sulfur dioxide, maximum two-hour average, per million BTU of heat input from any solid fuel-burning installation for any combination of fuels burned; nor the emission of sulfur dioxide into the atmosphere in an amount greater than 2.0 pounds of sulfur dioxide, maximum two-hour average, per million BTU of heat input from any liquid fuel-burning installation.

After January 1, 1975, no person shall allow, cause or permit the emission of sulfur dioxide into the atmosphere in an amount greater than 5 pounds of sulfur dioxide, maximum two-hour average, per million BTU of heat input from any solid fuel-burning installation for any combination of fuels burned; nor the emission into the atmosphere in an amount greater than 1.5 pounds of sulfur dioxide, maximum two-hour average, per million BTU of heat input from any liquid fuel-burning installation.

b. Sulfur dioxide from sulfuric acid manufacture. After January 1, 1975, no person shall allow, cause or permit the emission of sulfur dioxide from a sulfuric acid manufacturing plant in excess of 6.5 pounds of sulfur dioxide, maximum two-hour average, per ton of product calculated as 100 percent sulfuric acid.

c. Acid mist from sulfuric acid manufacture. After January 1, 1974, no person shall allow, cause or permit the emission of acid mist calculated as sulfuric acid from a sulfuric acid manufacturing plant in excess of 0.5 pounds, maximum two-hour average, per ton of product calculated as 100 percent sulfuric acid.

d. Other processes capable of emitting sulfur dioxide. After January 1, 1974, no person shall allow, cause or permit the emission of sulfur dioxide from any process, other than sulfuric acid manufacture, in excess of 500 parts per million, based on volume. This paragraph shall not apply to devices which have been installed for air pollution abatement purposes where it is demonstrated by the owner of the source that the ambient air quality standards are not being exceeded.

4.3(4) *Nitrogen compounds.* The provisions of this subrule shall apply to any installation from which nitrogen compounds are emitted into the atmosphere.

a. Nitrogen oxides from use of fuel. After January 1, 1974, no person shall allow, cause or permit the emission of nitrogen oxides from gas-fired fuel-burning equipment in excess of 0.2 pounds, maximum two-hour average calculated as nitrogen dioxide, per million BTU of heat input; nor the emission of nitrogen oxides from oil-fired fuel-burning equipment in excess of 0.3 pounds, maximum two-hour average calculated as nitrogen dioxide, per million BTU of heat input.

b. Nitrogen oxides from nitric acid manufacture. After January 1, 1974, no person shall allow, cause or permit the emission of nitrogen oxides calculated as nitrogen dioxide in excess of 5.5 pounds, maximum two-hour average, per ton of product calculated as 100 percent nitric acid.

4.4(455B) Specific processes.

4.4(1) *General.* The emission standards specified in this rule shall apply, and those specified in 4.3(455B) shall not apply, to each process of the types listed in the following subrules, except as provided in exception below.

Exception: Whenever the commission determines that a process complying with the emission standard prescribed in this rule is causing or will cause air pollution in a specific area of the state, the specific emission standard may be suspended and compliance with the provisions of 4.3(455B) may be required in such instances.

4.4(2) *Asphalt batching plants.* No person shall cause, allow or permit the operation of an asphalt batching plant in a manner such that the particulate matter discharged to the atmosphere exceeds 0.15 grain per standard cubic foot of exhaust gas.

4.4(3) *Cement kilns.* Cement kilns shall be equipped with air pollution control devices to reduce the particulate matter in the gas discharged to the atmosphere to no more than 0.3 percent of the particulate matter entering the air pollution control device. Regardless of the degree of efficiency of the air pollution control device, particulate matter discharged from such kilns shall not exceed 0.1 grain per standard cubic foot of exhaust gas.

4.4(4) *Cupolas for metallurgical melting.* The emissions of particulate matter from all new foundry cupolas, and from all existing foundry cupolas with a process weight rate in excess of 20,000 pounds per hour, shall not exceed the amount determined from Table II of these rules, except as provided in chapter 5.

The emissions of particulate matter from all existing foundry cupolas with a process weight rate less than or equal to 20,000 pounds per hour shall not exceed the amount determined from Table III of these rules, except as provided in chapter 5.

TABLE III
ALLOWABLE EMISSIONS FROM
EXISTING SMALL FOUNDRY CUPOLAS

Process weight rate (lb/hr)	Allowable emission (lb/hr)
1,000	3.05
2,000	4.70
3,000	6.35
4,000	8.00
5,000	9.58
6,000	11.30
7,000	12.90
8,000	14.30
9,000	15.50
10,000	16.65
12,000	18.70
16,000	21.60
18,000	23.40
20,000	25.10

4.4(5) *Electric furnaces for metallurgical melting.* The emissions of particulate matter to the atmosphere from electric furnaces used for metallurgical melting shall not exceed 0.1 grain per standard cubic foot of exhaust gas.

4.4(6) *Feed grinding and mixing plants.* No person shall cause, allow or permit the operation of equipment at a permanent location for the handling, drying, grinding, mixing or processing of grain, or blending of grain products, for use as animal food or food supplement such that the particulate matter discharged to the atmosphere exceeds 0.1 grain per standard cubic foot of exhaust gas.

4.4(7) *Grain processing plants.* No person shall cause, allow or permit the operation of equipment for the handling, drying, grinding, mixing or processing of grain, or blending of grain products, for use as food for human consumption such that the particulate matter discharged to the atmosphere exceeds 0.1 grain per standard cubic foot of exhaust gas.

4.4(8) *Lime kilns.* No person shall cause, allow or permit the operation of a kiln for the processing of limestone such that the particulate matter in the gas discharged to the atmosphere exceeds 0.1 grain per standard cubic foot of exhaust gas.

4.4(9) *Meat smokehouses.* No person shall cause, allow or permit the operation of a meat smokehouse or a group of meat smokehouses, which consume more than ten pounds of wood, sawdust or other material per hour such that the particulate matter discharged to the atmosphere exceeds 0.2 grain per standard cubic foot of exhaust gas.

4.4(10) *Phosphate processing plants.* No person shall cause, allow or permit the operation of equipment for the processing of phosphate ore, rock or other phosphatic material including, but

not limited to, phosphoric acid in a manner that the unit emissions of fluoride exceed 0.4 pound of fluoride per ton of phosphorous pentoxide or its equivalent, but not more than 100 pounds per day.

a. Allowable emissions. The allowable total emission of fluoride shall be calculated by multiplying the unit emission specified above by the expressed design production capacity of the process equipment.

4.4(11) *Portland cement concrete batching plants.* No person shall cause, allow or permit the operation of a portland cement concrete batching plant such that the particulate matter discharged to the atmosphere exceeds 0.1 grain per standard cubic foot of exhaust gas.

4.4(12) *Incinerators.* No person shall cause, allow or permit the operation of an incinerator unless provided with appropriate control of emissions of particulate matter, visible air contaminants and objectionable odors.

a. Particulate matter. No person shall cause, allow or permit the operation of an incinerator with a rated refuse burning capacity of 1000 or more pounds per hour in a manner such that the particulate matter discharged to the atmosphere exceeds 0.2 grain per standard cubic foot of exhaust gas adjusted to 12 percent carbon dioxide.

No person shall cause, allow or permit the operation of an incinerator with a rated refuse burning capacity of less than 1000 pounds per hour in a manner such that the particulate matter discharged to the atmosphere exceeds 0.35 grain per standard cubic foot of exhaust gas adjusted to 12 percent carbon dioxide.

b. Visible emissions. No person shall allow, cause or permit the operation of an incinerator in a manner such that it produces visible air contaminants which have an appearance, density or shade equal to or darker than Number 2 on the Ringelmann Chart, or 40 percent opacity; except that visible air contaminants which have an appearance, density or shade not darker than Number 3 on the Ringelmann Chart, or 60 percent opacity, may be emitted for a period or periods aggregating not more than three minutes in any 60-minute period during an operation breakdown or during the cleaning of air pollution control equipment.

These rules are intended to implement section 136B.4(3, 5) [Code 1971].

[Filed August 24, 1970; amended May 2, 1972]

CHAPTER 5
EXCEPTIONS

5.1(455B) Exceptions due to maintenance or breakdowns.

5.1(1) *Maintenance of power or heating plant.* When building a new fire, when manually cleaning a fire, or when blowing tubes and flues in a power plant, heating plant or domestic heating plant, visible air contaminants of an appearance, density or shade equal to or darker than that designated as Number 2 on the Ringelmann Chart, or 40 percent opacity, may be emitted into the atmosphere for a period or periods aggregating not more than six minutes in any 60-minute period.

5.1(2) *Cleaning of pollution control equipment.* When cleaning pollution control equipment which does not require a shutdown of equipment, particulate matter may be emitted in excess of the limitations specified in chapter 4 for a period or periods aggregating not more than six minutes in any 60-minute period.

5.1(3) *Repair or maintenance.* Abnormal conditions, breakdown or emergency maintenance of pollution control equipment or related operating equipment, which causes emissions in excess of the limitations specified in chapter 4 shall not be deemed violations provided that the provisions specified in "*a*" and "*b*", below, are followed.

a. Report of conditions. The person responsible for the equipment causing such emissions shall notify the technical secretary by the next regular working day of the department.

b. Action to correct condition. The person responsible for such equipment causing such emissions shall, with all practicable speed, initiate and complete appropriate reasonable action (1) to correct the conditions causing emissions to exceed said limits, (2) to reduce the frequency of occurrence of such conditions, (3) to minimize the amount by which said limits are exceeded, and (4) to reduce the length of time for which said limits are exceeded; and shall submit to the technical secretary, at his request, a full report of such occurrence, including a statement of all known causes, and of the scheduling and the nature of the actions to be taken pursuant to these rules.

These rules are intended to implement section 136B.4(3, 5)[Code 1971]

[Filed August 24, 1970; amended May 2, 1972]

CHAPTER 6
CIRCUMVENTION OF RULES

6.1(455B) Circumvention of rules. No person shall build, erect, install or use any article, machine, equipment or other contrivance which, without resulting in a reduction in the total amount of air contaminants released to the atmosphere, reduces or conceals an emission which would otherwise constitute violation of these rules.

These rules are intended to implement section 136B.4(3, 5) [Code 1971].

[Filed August 24, 1970]

CHAPTER 7
MEASUREMENT OF EMISSIONS

7.1(455B) Testing and sampling of new and existing equipment.

7.1(1) *Tests by owner.* The owner of new equipment or his authorized agent shall notify the technical secretary in writing, not less than ten days before a test is to be made of an installation. Such notice shall include the time, the place and the name of the person who will conduct the tests to determine if such equipment is meeting the applicable emission standards specified in chapter 4. A representative of the department shall be permitted to witness the tests. Results of the tests shall be submitted in writing to the technical secretary.

7.1(2) *Tests by department.* Representatives of the department may conduct separate and additional air contaminant emission tests of an installation on behalf of the state and at the expense of the state. Sampling holes, safe scaffolding and pertinent allied facilities, but not instruments or sensing devices, as needed shall be requested in writing by the technical secretary, and shall be provided by and at the expense of the owner of the installation at such points as specified in the request. The owner shall provide a suitable power source to the point or points of testing so that sampling instruments can be operated as required. Analytical results shall be furnished to the owner.

7.1(3) *Methods and procedures.* Stack sampling and analytical determinations to evaluate compliance with these rules shall be made in accordance with methods and procedures acceptable to the commission.

These rules are intended to implement section 136B.4(3, 5) [Code 1971].

[Filed August 24, 1970]

CHAPTER 8
PREVENTION OF AIR POLLUTION EMERGENCY EPISODES

8.1(455B) General.

8.1(1) *Purpose.* The provisions of this chapter are designed to prevent the excessive build-up of air contaminants during air pollution episodes, thereby preventing the occurrence of an emergency due to the effects of these contaminants on the health of persons.

8.2(455B) Episode criteria.

8.2(1) *Evaluation.* Conditions justifying the proclamation of an air pollution alert, air pollution warning or air pollution emergency shall be deemed to exist whenever the commission, its technical secretary or the commissioner determines that the meteorological conditions are such that the accumulation of air contaminants in any place is reaching, or has reached, levels which could, if sustained or exceeded, lead to a substantial threat to the health of persons.

a. Air pollution forecast. Initial consideration of air pollution episode activities will be activated by receipt from the National Weather Service of an air pollution forecast. Receipt of such a forecast shall be the basis for activities such as, but not limited to, increased monitoring of air contaminants in the area involved.

8.2(2) *Declaration.* In making determinations for the declaration of an air pollution episode condition, the commission, its technical secretary or the commissioner will be guided by the criteria stated in the following paragraphs.

a. Air pollution alert. An alert will be declared when any one of the following levels is reached at any monitoring site, and when meteorological conditions are such that the contaminant concentrations can be expected to remain at those levels for 12 or more hours, or increase, unless control actions are taken.

(1) Sulfur dioxide—800 micrograms per cubic meter (0.3 ppm), 24-hour average.

(2) Particulate matter—3.0 COH or 375 micrograms per cubic meter, 24-hour average.

(3) Sulfur dioxide and particulate matter combined—product of ppm sulfur dioxide (24-hour average) and COH equal to 0.2, or product of micrograms sulfur dioxide per cubic meter (24-hour average) and micrograms particulate matter per cubic meter (24-hour average) equal to 65,000.

(4) Carbon monoxide—17 milligrams per cubic meter (15 ppm), eight-hour average.

(5) Oxidants (ozone)—200 micrograms per cubic meter (0.1 ppm), one-hour average.

(6) Nitrogen dioxide—1,130 micrograms per cubic meter (0.6 ppm), one-hour average, or 282 micrograms per cubic meter (0.15 ppm), 24-hour average.

b. Air pollution warning. A warning will be declared when any one of the following levels is reached at any monitoring site and when meteorological conditions are such that the contaminant concentrations can be expected to remain at those levels for 12 or more hours or increase, unless control actions are taken.

(1) Sulfur dioxide—1,600 micrograms per cubic meter (0.6 ppm), 24-hour average.

(2) Particulate matter—5.0 COH or 625 micrograms per cubic meter, 24-hour average.

(3) Sulfur dioxide and particulate matter combined—product of ppm sulfur dioxide (24-hour average) and COH equal to 0.8, or product of micrograms sulfur dioxide per cubic meter (24-hour average) and micrograms particulate matter per cubic meter (24-hour average) equal to 261,000.

(4) Carbon monoxide—34 milligrams per cubic meter (30 ppm), eight-hour average.

(5) Oxidants (ozone)—800 micrograms per cubic meter (0.4 ppm), one-hour average.

(6) Nitrogen dioxide—2,260 micrograms per cubic meter (1.2 ppm), one-hour average, or 565 micrograms per cubic meter (0.3 ppm), 24-hour average.

c. Air pollution emergency. An emergency will be declared when any one of the following levels is reached at any monitoring site, and when meteorological conditions are such that this condition can be expected to continue for 12 or more hours.

(1) Sulfur dioxide—2,100 micrograms per cubic meter (0.8 ppm), 24-hour average.

(2) Particulate matter—7.0 COH or 875 micrograms per cubic meter, 24-hour average.

(3) Sulfur dioxide and particulate matter combined—product of ppm sulfur dioxide (24-hour average) and COH equal to 1.2, or products of micrograms sulfur dioxide per cubic meter (24-hour average) and micrograms particulate matter per cubic meter (24-hour average) equal to 393,000.

(4) Carbon monoxide—46 milligrams per cubic meter (40 ppm), eight-hour average.

(5) Oxidants (ozone)—1,200 micrograms per cubic meter (0.6 ppm), one-hour average.

(6) Nitrogen dioxide—3,000 micrograms per cubic meter (1.6 ppm), one-hour average or 750 micrograms per cubic meter (0.4 ppm), 24-hour average.

d. Termination. Once declared, any status reached by application of these criteria will remain in effect until the criteria for that level are no longer met. As meteorological factors and air contaminants change, an appropriate change in episode level will be declared.

8.3(455B) Preplanned abatement strategies.

8.3(1) *Planned strategies.* Standby plans shall be designed to reduce or to eliminate emissions of air contaminants in accordance with the objectives set forth in Tables III—V, which are made a part of this chapter.

a. Plan preparation. Any person responsible for the operation of a source of air contaminants as set forth in Tables IV—VI shall prepare standby plans for reducing the emission of air contaminants, which shall be implemented upon the declaration of an air pollution episode and continued for the duration of the declared episode.

Any person responsible for the operation of a source of air contaminants not set forth under this paragraph shall, when requested by the technical secretary in writing, prepare standby plans for reducing the emission of such air contaminant or contaminants during periods of an air pollution episode, as specified in this chapter.

b. Plan content. Standby plans as required under this subrule shall be in writing. Each standby plan shall identify the sources of air contaminants, the approximate amount of reduction of contaminants and a brief description of the manner in which the reduction will be achieved during an air pollution alert, air pollution warning or air pollution emergency, as specified in this chapter.

c. Review of plans. Standby plans as required by this subrule shall be submitted to the technical secretary on or before January 1, 1973. Each standby plan shall be subject to review. If, in the opinion of the commission, a standby plan does not provide for adequate reduction of emissions, the commission may disapprove such plan, state the reasons for disapproval and order the preparation of an amended standby plan within a time period specified in the order.

d. Availability. During a declared air pollution episode, standby plans as required by this subrule shall be made available on the premises to any person authorized to enforce applicable rules.

8.3(2) Reserved for future use.

8.4(455B) Actions during episodes.

8.4(1) *Emission reduction activities.* Any person responsible for the operation of a source of air contaminants as set forth in Tables III—V, herein, which is located within the area involved, shall follow the actions specified below during periods of an air pollution alert, air pollution warning or air pollution emergency as may be declared.

a. Air pollution alert. When an air pollution alert has been declared, all persons in the area involved responsible for the operation of a source of air contaminants as set forth in Table III herein, shall take all air pollution alert actions as required for such sources of air contaminants, and persons responsible for the operation of specific sources set forth in Table III herein, shall put into effect the preplanned abatement strategy for an air pollution alert.

b. Air pollution warning. When an air pollution warning has been declared, all persons in the area involved responsible for the operation of a source of air contaminants as set forth in Table V herein, shall take all air pollution warning actions as required for such sources of air contaminants, and persons responsible for the operation of specific sources set forth in Table IV herein, shall put into effect the preplanned abatement strategy for an air pollution warning.

c. Air pollution emergency. When an air pollution emergency has been declared, all persons in the area involved responsible for the operation of a source of air contaminants as set forth in Table V herein, shall take all air pollution emergency actions as required for such sources of air contaminants, and persons responsible for the operation of specific sources set forth in Table V herein, shall put into effect the preplanned abatement strategy for an air pollution emergency.

d. Special conditions. When the technical secretary determines that a specified episode level has been reached at one or more monitoring sites solely because of emissions from a limited number

of sources, he shall specify the persons responsible for such sources that the preplanned abatement strategy of Tables III, IV and V, or the standby plans, are required insofar as they apply to such sources, and such actions shall be put into effect until notified that the criteria of the specified level are no longer met.

8.4(2) Reserved for future use.

TABLE III

ABATEMENT STRATEGIES EMISSION REDUCTION ACTIONS ALERT LEVEL

GENERAL

1. There shall be no open burning by any persons of tree waste, vegetation, refuse or debris in any form.
2. The use of incinerators for the disposal of any form of solid waste shall be limited to the hours between 12:00 noon and 4:00 p.m.
3. Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between the hours of 12:00 noon and 4:00 p.m.
4. Persons operating motor vehicles should eliminate all unnecessary operations.

SOURCE CURTAILMENT

Any person responsible for the operation of a source of air contaminants listed below shall take all required control actions for this alert level.

SOURCE OF AIR POLLUTION

1. Coal- or oil-fired electric power generating facilities.

Control Actions

a. Substantial reduction by utilization of fuels having low ash and sulfur content.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing or soot blowing.

c. Substantial reduction by diverting electric power generation to facilities outside of alert level.

2. Coal- and oil-fired process steam generating facilities.

Control Actions

a. Substantial reduction by utilization of fuels having low ash and sulfur content.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

c. Substantial reduction of steam load demands consistent with continuing plant operations.

3. Manufacturing industries of the following classifications:
Primary Metals Industry
Petroleum Refining Operations
Chemical Industries
Mineral Processing Industries
Paper and Allied Products
Grain Industry

Control Actions

a. Substantial reduction of air contaminants from manufacturing operations by curtailing, postponing or deferring production and all operation.

b. Maximum reduction by deferring trade waste disposal operations which emit solid particles, gas vapors or malodorous substances.

c. Maximum reduction of heat load demands for processing.

d. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

TABLE IV

ABATEMENT STRATEGIES EMISSION REDUCTION ACTIONS WARNING LEVEL

GENERAL

1. There shall be no open burning by any persons of tree waste, vegetation, refuse or debris in any form.
2. The use of incinerators for the disposal of any form of solid waste or liquid waste shall be prohibited.
3. Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between the hours of 12:00 noon and 4:00 p.m.
4. Persons operating motor vehicles must reduce operations by the use of car pools and increased use of public transportation and elimination of unnecessary operation.

SOURCE CURTAILMENT

Any person responsible for the operation of a source of air contaminants listed below shall take all required control actions for this warning level.

SOURCE OF AIR POLLUTION

1. Coal- or oil-fired electric power generating facilities.

Control Actions

a. Maximum reduction by utilization of fuels having lowest ash and sulfur content.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

c. Maximum reduction by diverting electric power generation to facilities outside of warning area.

2. Oil and oil-fired process steam generating facilities.

Control Actions

a. Maximum reduction by utilization of fuels having the lowest available ash and sulfur content.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

c. Making ready for use a plan of action to be taken if an emergency develops.

3. Manufacturing industries which require considerable lead time for shutdown including the following classifications:

Petroleum Refining
Chemical Industries
Primary Metals Industries
Glass Industries
Paper and Allied Products

Control Actions

a. Maximum reduction of air contaminants from manufacturing operations by, if necessary, assuming reasonable economic hardships by postponing production and allied operation.

b. Maximum reduction by deferring trade waste disposal operations which emit solid particles, gases, vapors or malodorous substances.

c. Maximum reduction of heat load demands for processing.

d. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

4. Manufacturing industries which require relatively short lead times for shutdown including the following classifications:

Primary Metals Industries
Chemical Industries
Mineral Processing Industries
Grain Industry

Control Actions

a. Elimination of air contaminants from manufacturing operations by ceasing, curtailing, postponing or deferring production and allied operations to the extent possible without causing injury to persons or damage to equipment.

b. Elimination of air contaminants from trade waste disposal processes which emit solid particles, gases, vapors or malodorous substances.

c. Maximum reduction of heat load demands for processing.

d. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

TABLE V

ABATEMENT STRATEGIES EMISSION REDUCTION ACTIONS EMERGENCY LEVEL

GENERAL

1. There shall be no open burning by any persons of tree waste, vegetation, refuse or debris in any form.

2. The use of incinerators for the disposal of any form of solid or liquid waste shall be prohibited.

3. All places of employment described below shall immediately cease operations:

a. Mining and quarrying of nonmetallic minerals.

b. All construction work except that which must proceed to avoid emergent physical harm.

c. All manufacturing establishments except those required to have in force an air pollution emergency plan.

d. All wholesale trade establishments: i.e., places of business primarily engaged in selling merchandise to retailers or industrial, commercial, institutional or professional users, or to other wholesalers, or acting as agents in buying merchandise for or selling merchandise to such persons or companies, except those engaged in the distribution of drugs, surgical supplies and food.

e. All offices of local, county and state government including authorities, joint meetings and other public bodies excepting such agencies which are determined by the chief administrative officer of local, county or state government, authorities, joint meetings and other public bodies to be vital for public safety and welfare and the enforcement of the provisions of this order.

f. All retail trade establishments except pharmacies, surgical supply distributors and stores primarily engaged in the sale of food.

g. Banks, credit agencies other than banks, securities and commodities brokers, dealers, exchanges and services; offices of insurance carriers, agents and brokers, real estate offices.

h. Wholesale and retail laundries, laundry services and cleaning and dyeing establishments, photographic studios, beauty shops, barber shops, shoe repair shops.

i. Advertising offices, consumer credit reporting, adjustment and collection agencies, duplicating, addressing, blueprinting, photocopying, mailing, mailing list and stenographic services, equipment rental services, commercial testing laboratories.

j. Automobile repair, automobile services, garages.

k. Establishments rendering amusement and recreational services including motion picture theaters.

l. Elementary and secondary schools, colleges, universities, professional schools, junior colleges, vocational schools and public and private libraries.

4. All commercial and manufacturing establishments not included in this order will institute such actions as will result in maximum reduction of air contaminants from their operation by ceasing, curtailing or postponing operations which emit air pollutants to the extent possible without causing injury to persons or damage to equipment.

5. The use of motor vehicles is prohibited except in emergencies with the approval of local or state police.

SOURCE CURTAILMENT

Any person responsible for the operation of a source of air contaminants listed below shall take all required control actions for this emergency level.

SOURCE OF AIR POLLUTION

1. Coal- or oil-fired electric power generating facilities.

Control Actions

a. Maximum reduction by utilization of fuels having lowest ash and sulfur content.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

c. Maximum reduction by diverting electric power generation to facilities outside of emergency area.

2. Coal- and oil-fired process steam generating facilities.

Control Actions

a. Maximum reduction by reducing heat and steam demands to absolute necessities consistent with preventing equipment damage.

b. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

c. Taking the action called for in the emergency plan.

3. Manufacturing industries of the following classifications:

Primary Metals Industries
Petroleum Refining
Chemical Industries
Mineral Processing Industries
Grain Industry
Paper and Allied Products

Control Actions

a. Elimination of air contaminants from manufacturing operations by ceasing, curtailing, postponing or deferring production and allied operations to the extent possible without causing injury to persons or damage to equipment.

b. Elimination of air contaminants from trade waste disposal processes which emit solid particles, gases, vapors or malodorous substances.

c. Maximum reduction of heat load demands for processing.

d. Maximum utilization of mid-day (12:00 noon to 4:00 p.m.) atmospheric turbulence for boiler lancing and soot blowing.

These rules are intended to implement section 136B.4(3,5) [Code 1971].

[Filed August 24, 1970;
amended May 2, 1972]

CHAPTER 9
CERTIFICATE OF ACCEPTANCE

9.1(455B) General.

9.1(1) *Purpose.* Political subdivisions shall meet the conditions specified in this chapter if they intend to secure acceptance of the local air pollution control program and to obtain a certificate of acceptance from the commission, as provided in section 136B.15 [Code 1971].

9.1(2) *Limitation.* When a certificate of acceptance is issued to a political subdivision, the commission retains authority to take emergency action as provided in section 136B.9(5) [Code 1971].

9.2(455B) Certificate of acceptance. The governing body of a political subdivision may make application for a certificate of acceptance.

9.2(1) *Forms.* Each application for a certificate of acceptance shall be submitted to the technical secretary on the form "Application for a Certificate of Acceptance of Local Air Pollution Control Program". Application forms will be available at the department.

9.2(2) *Processing of applications.* The technical secretary shall make an investigation of the program covered by an application for a certificate of acceptance to evaluate conformance with applicable provisions of section 136B.15 [Code 1971] as soon as practicable.

a. Granting of certificate. A certificate of acceptance may be granted by the commission upon receipt of an affirmative recommendation from the technical secretary, or upon favorable action following a hearing on the application.

b. Review of program. When a certificate of acceptance has been granted for a local air pollution control program, the commission shall provide for a review of the program activities at such intervals as they may prescribe, for evaluation of the continuation of the certificate. Following such review, the commission may continue the certificate in effect or suspend the certificate.

(1) *Suspension of certificate.* If the commission determines at any time that a local air

pollution control program is being conducted in a manner which is not consistent with the factors described herein, a notice to the political subdivision shall be provided setting forth the deviations from the standards prescribed herein. Such notice shall include a listing of the corrective measures that are to be completed within a specified period of time. If the commission finds, after such time period, that the specified corrective action has not been completed, the commission shall suspend the certificate of acceptance, and resume administration of the regulatory provisions of the statute in the political subdivision. Suspension of a certificate shall be without prejudice to the right of the applicant for requesting a hearing before the commission.

(2) *Reinstatement of certificate.* If the commission shall receive evidence that is deemed to indicate correction of the deviations from the standards, a suspended certificate of acceptance shall be reinstated upon the request of the political subdivision involved. Upon reinstatement of a certificate, the political subdivision shall resume the regulatory functions of the program.

9.3(455B) Ordinance or regulations.

9.3(1) *Legal aspects.* Each local control program considered for a certificate of acceptance shall be conducted under an appropriate ordinance or set of regulations.

The definition of air pollution included in the ordinance or regulations shall be consistent with that specified in section 136B.2(3) [Code 1971]. The other definitions included in the ordinance or regulations shall be consistent with those specified in chapter 1 of these rules.

9.3(2) *Legal authority.* The ordinance or regulations shall provide authority to the local control agency as follows:

a. Scope of control. Authority and responsibility for air pollution control within the entire area included in the jurisdiction involved.

b. Degree of control. Authority to prevent, abate and control air pollution from all sources within its area of jurisdiction, in accordance with requirements consistent with, or more strict than, the provisions specified in these rules.

c. Enforcement. Legal authority to enforce its requirements and standards.

d. Inspection and tests. Legal authority to make inspections, perform emission tests and obtain data, reports or other information relating to sources of air pollution which may be necessary to prepare air contaminant emission inventories, and to evaluate control measures needed to meet specified goals.

9.3(3) *Control of air pollution.* The ordinance or regulations shall contain provisions applicable to the control or prohibition of emissions of air contaminants as listed below.

a. Emission control. Requirements specifying maximum concentrations, density or rates of discharge of emissions of air contaminants from specified sources.

(1) These requirements may be included in the ordinance or regulations, or in standards adopted by the local control agency under the authority granted by such ordinance or regulations.

(2) These requirements shall not establish an emission standard for any specific source that is in excess of the emission standard specified in chapter 4 of these rules for that source. However, these requirements may establish an emission standard for any specific source that is more strict than the emission standard specified in chapter 4 of these rules for that source.

b. Prohibition of emissions. Provisions prohibiting the installation of equipment having a potential for air pollution without adequate control equipment. Such restriction may be included in the building code applicable to the jurisdiction covered by the local control agency.

c. Open burning. Provisions prohibiting open burning, including backyard burning, in urban areas within the jurisdiction of the local control agency.

(1) Provisions relating to backyard burning may consist of a program requiring the prohibition of such burning within a reasonable period of time.

(2) Provisions applicable to open burning may include a variance procedure.

d. Requirements for permits. Provisions requiring installation and operating permits for all new or altered equipment capable of emitting air contaminants into the atmosphere installed within the jurisdiction of the local control agency.

9.3(4) *Enforcement.* The ordinance or regulations of the local control agency shall include an effective mechanism for enforcing the provisions specified thereunder, as listed below.

a. Procedures. The local control ordinance or regulations shall specify that any violation of its provisions are subject to civil and criminal penalties.

b. Penalties. The penalties specified in such ordinance or regulations shall include fines, injunctive relief and sealing of equipment found to be not in compliance with applicable provisions of the ordinance or regulations.

Fines consistent with the applicable provisions of section 136B.16 [Code 1971] shall be specified.

c. Variances. A procedure for granting variances or extensions of time to attain compliance status, providing that the authority to grant such variance or extension of time shall not be allocated to any administrative officer of the local control agency.

The local control agency shall maintain on file a record of the names, addresses, sources of emissions, types of emissions, rates of emissions, reason for granting, conditions and length of time specified, relating to all variances or extension of time granted; and shall make such records available to the commission or the department upon request.

9.4(455B) Administrative organization.

9.4(1) *Administrative facilities.* Each local control program considered for a certificate of acceptance shall have the administrative facilities necessary for effective operation of such program including, but not limited to, those listed below.

a. Agency. Designation of a legally constituted body within the organizational structure of the applicable political subdivision or combination of political subdivisions, as the administrative authority for the local control program.

b. Procedures. Adoption of definite administrative procedures for developing, promulgating and enforcing requirements and standards for air pollution control within the jurisdiction of the local control agency.

c. Staff. Employment of a technical and clerical staff deemed adequate to conduct the air pollution control activities in the local control program.

(1) Key technical staff personnel shall have received training or experience in air quality management program procedures.

(2) At least one member of the technical staff shall be assigned full-time duty in the operation of the local control program.

9.4(2) *Financial support.* Each local control program considered for a certificate of acceptance shall have adequate financial support for the operation of effective program activities.

9.4(3) *Physical facilities.* Each local control program considered for a certificate of acceptance shall have the physical facilities necessary for the operation of effective program activities, including those listed below.

a. Office space. Sufficient office space and equipment to accommodate the members of the technical and clerical staff.

b. Laboratory facilities. The laboratory space and equipment shall be adequate for the effective exercise of the specific functions required in the operation of the local control program.

c. Transportation facilities. These facilities shall include provisions for transportation of personnel to service air monitoring equipment, visits to sources of emissions for investigative purposes and other appropriate program activities.

9.5(455B) Program activities.

9.5(1) *Control program.* Each local control program considered for a certificate of acceptance shall conduct air pollution control activities adequate to provide adequate control of air pollution within the jurisdiction of the local control program, including, but not limited to, those listed below. In conducting these program activities, the local control agency shall make every effort to meet the specified ambient air quality objectives applicable to the state of Iowa.

a. Evaluation of problems. Determination of the actual and potential air pollution problems within the jurisdiction of the local control agency, and comparison of the present air quality in that jurisdiction with the air quality standards and objectives promulgated for this state.

(1) The air quality within the jurisdiction shall be determined by an air monitoring program, using sampling techniques and laboratory determinations compatible with those used in the air pollution control program of this state. The air monitoring program of the local control agency shall give attention to the air contaminants considered to be indices of pollution in this state.

(2) The current emissions of significant air contaminants from sources located within the jurisdiction of the local control agency shall be determined through an emissions inventory. The data collected should be used to determine the levels of air contaminant emissions appropriate to achieve or maintain the levels specified in air quality goals or objectives, and to calculate the reductions in emissions inventory to meet those goals or objectives.

b. Control activities. Conducting of activities to abate or control emissions of air contaminants from existing equipment or from new or altered equipment located within the jurisdiction of the local control agency.

(1) A program of plant inspections shall be conducted with respect to control of emissions from existing equipment. These activities should include the collection of data related to the types of emissions and the rate of discharge of emissions from each source involved, along with stack sampling when deemed appropriate.

(2) Procedures for plan review and the issuing of permits relating to the installation or alteration such that the emission of air contaminants is significantly altered, shall be conducted with respect to control of emissions from new or altered sources. These procedures may include provisions for permits relating to the use of the equipment involved.

These rules are intended to implement sections 136B.4(3) and 136B.15 [Code 1971].

[Filed May 2, 1972]

CHAPTER 10
MISCELLANEOUS

10.1(455B) Scope. Nothing in these rules is intended to permit any practice which is in violation of any statute, ordinance or regulation.

These rules are intended to implement section 136B.4(3) [Code 1971].

[Filed May 2, 1972]

CHAPTERS 11 to 15
Reserved for future use

TITLE II

WATER QUALITY

[Transferred from Water Pollution Control Commission Rules]

CHAPTER 16
SURFACE WATER QUALITY STANDARDS

16.1(455B) Water quality standard relating to floatable and settleable solids. The waters of the state shall be kept free of floatable and settleable solids as hereinafter provided.

16.1(1) *Municipal effluent standard.* No municipality shall discharge any sewage to the waters of the state without effective removal of floatable and settleable solids as the minimum degree of treatment.

16.1(2) Reserved for future use.

These rules are intended to implement chapter 455B of the Code.

16.2(455B) Surface water quality criteria.

16.2(1) *General policy considerations.* Surface waters are to be evaluated according to their ability to support the legitimate (beneficial) uses to which they can feasibly be adapted, and this specific designation of quality areas shall be done by the Iowa water pollution control commission.

Sampling to determine conformance to these criteria shall be done at sufficient distances downstream from waste discharge points to permit adequate mixing of waste effluents with the surface waters.

16.2(2) *General criteria.* The following criteria are applicable to all surface waters at all places and at all times:

a. Free from substances attributable to municipal, industrial or other discharges that will settle to form putrescent or otherwise objectionable sludge deposits;

b. Free from floating debris, oil, scum and other floating materials attributable to municipal, industrial or other discharges in amount sufficient to be unsightly or deleterious;

c. Free from materials attributable to municipal, industrial or other discharges producing color, odor or other conditions in such degree as to be detrimental to legitimate uses of water;

d. Free from substances attributable to municipal, industrial or other discharges in concentrations or combinations which are detrimental to human, animal, industrial, agricultural, recreational, aquatic or other legitimate uses of the water.

16.2(3) *Specific criteria for designated water uses.* The following criteria are applicable at flows greater than the lowest flow for seven consecutive days which can be expected to occur at a frequency of once every ten years.

a. Public water supply. The following criteria for surface water quality apply to the point at which water is withdrawn for treatment and distribution as a potable supply.

(1) *Bacteria.* Waters shall be considered to be of unsatisfactory bacteriological quality as a source when:

A sanitary survey indicates the presence or probability of the presence of sewage or other objectionable bacteria-bearing wastes, or

Numerical bacteriological limits of 2000 fecal coliforms per 100 ml for public water supply raw water sources are exceeded during the low flow periods when such bacteria can be demonstrated to be attributed to pollution by sewage.

(2) *Radioactive substances.* Gross beta activity (in the known absence of 90 strontium and alpha emitters) shall not exceed 1000 picocuries per liter.

The concentration of 226 radium and 90 strontium shall not exceed 3 and 10 picocuries per liter respectively.

The annual average concentration of specific radionuclides, other than 226 radium and 90 strontium, shall not exceed 1/30 of the appropriate maximum permissible concentration for the 168-hour week as set forth by the International Commission of Radiological Protection and the National Committee on Radiation Protection.

Because any human exposure to unnecessary ionizing radiation is undesirable, the concentrations of radioisotopes in natural waters shall be maintained at the lowest practicable level.

(3) *Chemical constituents.* Not to exceed the following concentrations:

Specific Constituents (mg/l)			
Arsenic	0.05	Cyanide	0.025
Barium	1.0	Fluoride	1.5
Cadmium	0.01	Lead	0.05
Chromium (hexavalent)	0.05	Phenols (Other than natural sources)	0.001

All substances toxic or detrimental to humans or detrimental to treatment processes shall be limited to nontoxic or nondetrimental concentrations in the surface water.

(4) *Finished water quality.* Waters designated as a source of public water supply shall be of such quality that existing U.S. Public Health Service Drinking Water Standards for finished water can be met after conventional water treatment, consisting of coagulation, sedimentation, rapid sand filtration and disinfection.

b. Aquatic life. The following criteria are designed for the maintenance and propagation of a well-balanced fish population. They are applicable to any place in surface waters but cognizance will be given to opportunities for admixture of waste effluents with such waters.

(1) *Warm water areas. Dissolved oxygen:* Not less than 5.0 mg/l during at least 16 hours

of any 24-hour period and not less than 4.0 mg/l at any time during the 24-hour period.

pH: Not less than 6.8 nor above 9.0

Temperature.

Mississippi River—Not to exceed an 89° F. maximum temperature from the Minnesota border to the Wisconsin border and a 90° F. maximum temperature from the Wisconsin border to the Missouri border nor a 5° F. change from background or natural temperature in the Mississippi River.

Missouri River—Not to exceed a 90° F. maximum daily temperature nor a 5° F. increase over background or natural temperature.

Interior streams—Not to exceed a 90° F. maximum temperature nor a maximum 5° F. increase over background or natural temperature.

Lakes and reservoirs—Not to exceed a 90° F. maximum temperature nor a maximum 3° F. increase over background or natural temperature.

Chemical constituents. Not to exceed the following concentrations:

Specific Constituents (mg/l)			
Ammonia Nitrogen (N)	2.0	*Copper	0.02
*Arsenic	1.0	Cyanide	0.025
*Barium	5.0	*Lead	0.10
*Cadmium	0.05	*Zinc	1.0
*Chromium (hexavalent)	0.05	Phenols (Other than natural sources)	0.001
*Chromium (trivalent)	1.00		

*A maximum of 5.0 mg/l for the entire heavy metal group shall not be exceeded.

All substances toxic or detrimental to aquatic life shall be limited to nontoxic or nondetrimental concentrations in the surface water.

(2) *Cold water areas.* All criteria stated for warm water areas apply to cold water areas except as follows:

Dissolved oxygen. Not less than 7.0 mg/l during at least 16 hours of any 24-hour period nor less than 5.0 mg/l at any time during the 24-hour period.

Temperature. Not to exceed a 68°F. maximum temperature. The rate of change due to added heat shall not exceed 2°F. per hour with a 5°F. maximum increase from background temperature.

c. Recreation. The following criteria are applicable to any waters used for recreational activities involving whole body contact such as swimming and water skiing:

Bacteria. Waters shall be considered to be of unsatisfactory bacteriological quality for the above recreational use when:

A sanitary survey indicates the presence or probability of the presence of sewage or other objectional bacteria-bearing wastes or

Numerical bacteriological limits of 200 fecal coliforms per 100 ml for primary contact recreational waters are exceeded during low flow periods when such bacteria can be demonstrated to be attributable to pollution by sewage.

16.2(4) *Disinfection.* Continuous disinfection shall be provided for all municipal waste treatment effluents and for all other wastes which may be sources of bacterial pollution throughout the year where such wastes are discharged into waters designated for public water supplies and throughout the recreational season (April 1 to October 31) where such wastes are discharged into waters used or classified for recreational use and at all other times as necessary to prevent bacterial pollution which may endanger the public health or welfare.

16.2(5) *Nondegradation.* Waters whose existing quality is better than the established standards as of the date on which such standards become effective will be maintained at high quality unless it has been affirmatively demonstrated to the state that a change is justifiable as a result of necessary economic or social development and will not preclude present and anticipated use of such waters. Any industrial, public or private project or development which would constitute a new source of pollution or an increased source of pollution to high quality waters will be required to provide the necessary degree of waste treatment to maintain high water quality. (In implementing this rule, the appropriate agency of the federal government will be kept advised and will be provided with such information as it will need to discharge its responsibilities under the federal Water Pollution Control Act, as amended.)

16.2(6) *Interstate waters.*

a. The Mississippi river, Missouri river, Fox river, Des Moines river, East Fork of the Des Moines river, West Fork of the Des Moines river, Iowa river, Cedar river, Shellrock river, Winnebago river, Wapsipinicon river, Upper Iowa river, Chariton river, Middle Fork Medicine river, Weldon river, Little river, Thompson river, East Fork of the Big river, Grand river, Platte river, East Fork of the 102 river, Middle Fork of the 102 river, Nodaway river, West Tarkio river, Tarkio river, Nishnabotna river, Little Sioux river, Big Sioux river, Rock river and Kanaranzi Ditch are hereby designated as interstate waters.

b. Treatment. All municipal wastes discharged into the interstate waters of the Mississippi river shall receive a minimum of 90 percent reduction of BOD prior to discharge, no later than dates fixed by order of the Iowa water pollution control commission. All industrial wastes discharged into such interstate waters shall receive equivalent treatment prior to discharge, no later than dates fixed by order of the Iowa water pollution control commission.

All municipal wastes discharged into the interstate waters of the Missouri river shall receive a minimum of 85 percent reduction of BOD prior to discharge, no later than dates fixed by order of the

Iowa water pollution control commission. All industrial wastes discharged into such interstate waters shall receive equivalent treatment prior to discharge, no later than dates fixed by order of the Iowa water pollution control commission.

These rules are intended to implement sections 455B.9 and 455B.13 [Code 1971].

16.3(455B) Confined feeding operations waste water disposal.

16.3(1) *Definition.* Confined feeding operations for livestock and poultry in which potential pollution may exist and subject to regulations are defined as follows:

a. Open feedlot is one or more unroofed or partially roofed adjacent or nearby animal enclosures on a single property where the following animal populations and animal population densities exist:

Species	*Animal Population Exceeds*	*Square feet of lot area per animal is less than:*
Cattle, Beef	100	600
Cattle, Dairy	70	600
Swine, Butcher & Breeding (Over 40 lbs)	500	100
Swine, Feeder Pigs (Below 40 lbs)	4,000	15
Sheep	1,200	60
Turkeys	6,000	10
Chickens, Broiler	30,000	2
Chickens, Layer	20,000	2

b. Confinement feeding operation is one or more roofed or partially roofed adjacent or nearby animal enclosures on a single property from which wastes are removed as a liquid or semi-liquid and in which the maximum number of animals confined at one time exceeds:

Species	*Animal Number Exceeds*
Cattle, Beef	50
Cattle, Dairy	40
Swine, Butcher & Breeding (Over 40 lbs)	250
Swine, Feeder Pigs (Below 40 lbs)	1,800
Sheep	600
Turkeys	3,000
Chickens, Broiler	15,000
Chickens, Layer	9,000

16.3(2) *Conditions requiring registration.* Registration of the following confined feeding operations is required when one or more of the following conditions exist:

a. Registration of those open feedlot operations described in 16.3(1) "*a*" is required if one or more of the following conditions exist:

(1) The number of animals confined in an open feedlot exceeds:

Species	*Animal Number Exceeds*
Cattle, Beef	1,000
Cattle, Dairy	700
Swine, Butcher & Breeding (Over 40 lbs)	4,500
Swine, Feeder Pigs (Below 40 lbs)	35,000
Sheep	12,000
Turkeys	55,000
Chickens, Broiler	270,000
Chickens, Layer	180,000

(2) The feedlot contributes to a watercourse draining more than 3,200 acres of land above the lot and the distance from the feedlot to the nearest point on the affected watercourse is less than:

Species	*Distance to Watercourse is Less Than (Feet per 100 Animals)*
Cattle, Beef	200
Cattle, Dairy	300
Swine, Butcher & Breeding (Over 40 lbs)	50
Swine, Feeder Pigs (Over 40 lbs.)	10
Sheep	20
Turkeys	5
Chickens, Broiler	1
Chickens, Layer	1

(3) The runoff water from a feedlot or overflow from a waste collection, storage or treatment facility flows directly into a tile line or other buried conduit, drainage well, pumped well, abandoned well or sinkhole, or discharges directly into a gravel pit, rock quarry or a lake or pond when such lake or pond is located on property not wholly owned by the registrant.

b. Registration of those confinement feeding operations described in 16.3(1) "*b*" is required if one or more of the following conditions exist:

(1) The number of animals in a confinement feeding operation exceeds:

Species	*Animal Population Exceeds*
Cattle, Beef	100
Cattle, Dairy	70
Swine, Butcher & Breeding (Over 40 lbs)	500
Swine, Feeder Pigs (Below 40 lbs)	4,000
Sheep	1,200
Turkeys	6,000
Chickens, Broiler	30,000
Chickens, Layer	20,000

(2) Overflow or other waste discharge from a waste collection, storage or treatment facility contributes to a watercourse.

(3) Overflow or other waste discharge from a waste collection, storage or treatment facility flows directly into a tile line or other buried conduit, drainage well, pumped well, abandoned well or sinkhole, or discharges directly into a gravel pit, rock quarry or a lake or pond when such lake or pond is located on property not wholly owned by the registrant.

c. Those confined feeding operations not included in requirements of these rules shall be required to register if investigation by the Iowa water pollution control commission determines that such operations are causing pollution or may reasonably be expected to pollute waters of the state.

16.3(3) *Required information under conditions requiring registration.*

a. Persons engaged in livestock and poultry operations described in 16.3(1) and 16.3(2) prior to July 1, 1969, shall upon notification register such operation with the commission. Persons intending to initiate or expand livestock and poultry operations as described in 16.3(1) and 16.3(2) shall register such operation with the commission before commencing such operations and provide such information as the commission may reasonably require. Such information shall be made on a form supplied by the state department of health;

b. Operators shall submit the completed registration form to the department together with supplemental information regarding general features of topography, drainage course and identification of ultimate primary receiving streams or other waters of the state. Additional information which may be deemed necessary for satisfactory evaluation of potential pollution may be required by and shall be submitted to the department;

c. If the department determines that a proposed or existing confined feeding operation does not constitute a water pollution problem because of location, topography or other reasons, provisions for water pollution control facilities will not be required;

d. If the department determines that a confined feeding operation is, in fact, polluting or may reasonably pollute waters of the state, the operator shall obtain a permit for disposal of waste water therefrom and shall provide necessary water pollution control facilities which shall be constructed in accordance with plans and specifications approved by the department. The following factors will be considered when applicable, in forming a judgment as to whether a confined feeding operation will or will not constitute a potential water pollution problem:

(1) Soil type.

(2) Distance to stream or other waters of the state.

(3) Use of land between feedlot and stream or other waters of the state.

(4) Slope of land or time for waste to seep into soil before entering stream or other waters of the state.

(5) Control of waste discharge in proportion to stream flow.

(6) Distance to structures occupied by humans.

16.3(4) *Requirements for facilities.* Required water pollution control facilities shall be constructed and maintained to meet the minimum requirements stated in the following paragraphs; provided that when site topography, operating procedures and other available information indicate that adequate water pollution control can be effected with less than the minimum requirements, the minimum requirements may be waived; provided further that if site topography, operating procedures, experience and other available information indicate that more than minimum requirements will be necessary to effect adequate water pollution control, additional control provisions may be required.

a. The minimum water pollution control facilities for the open feedlot confined feeding operations shall be terraces or retention basins capable of containing 4 inches of surface runoff from the feedlot area, waste storage areas and all other waste contributing areas. Diversion of surface drainage prior to contact with the confined feeding area or manure or sludge storage areas shall be required. A settling basin preceding the retention basins shall be provided where necessary to facilitate solids removal. Waste retained in retention basins shall be disposed of as soon as practicable to insure adequate retention capacity for future needs.

The minimum water pollution control facilities for the confinement feeding operations shall be waste storage tanks or retention basins capable of storing the wastes produced in the confinement enclosures for a period of 120 days. Additional capacity shall be provided if wastes from other waste contributing areas are to be handled. Storage for a period of up to 180 days may be required, based on availability of land for field disposal.

b. Waste treatment or other methods of water pollution control shall be permitted where the department determines that effective results will be obtained.

c. Waste handling facilities shall be designed and reviewed in conformance with chapter 114, [Code 1971]. Services of personnel of the local soil conservation districts may be used in the design and layout of water pollution control facilities. If waste treatment facilities consist only of lagoon type structure, there shall be a minimum of two such structures for series operation.

16.3(5) *Operation of facilities.*

a. The water pollution control facilities shall be operated and maintained so as to prevent

water pollution and to protect the public health and beneficial uses of the waters of the state;

b. Waste discharges from retention basins, lagoons or waste treatment facilities into any watercourse shall be in conformance with the appropriate water quality criteria adopted by the Iowa water pollution control commission;

c. Waste materials removed from retention basins, waste treatment facilities or confined feeding operations shall be disposed of or stockpiled in a manner which will not contribute to water pollution. Wastes may be used for irrigation or spread on land surface or mixed with the soil, all in a manner which will prevent runoff of wastes. Other methods of disposal of wastes from retention basins, retention lagoons, waste treatment facilities or confined feeding operations shall be evaluated and permitted if the department determines that effective water pollution control will be accomplished.

16.3(6) *Compliance with rule changes.* Feedlot pollution control facilities constructed in accordance with rules in effect at the time of construction shall not be required to be reconstructed due to subsequent rule changes unless the Commission finds that waste discharge from such facilities is causing water pollution. Such facilities shall, however, be brought into compliance with rules in effect at the time of reconstructing, enlarging or otherwise modifying the confined feeding operation or control facilities.

These rules are intended to implement sections 455B.9 and 455B.13, Code 1973.

[Filed March 15, 1966; amended March 20, 1967, October 14, 1969, June 8, 1971, June 26, 1972, July 12, 1972]

CHAPTER 17
RECORDS OF OPERATION OF WASTE DISPOSAL SYSTEMS

17.1(455B) Definitions.

17.1(1) The definitions set out in section 455B.2 [Code 1971] shall be considered to be incorporated verbatim in these rules.

17.1(2) *"Records of operation"* when used in these rules means Iowa state department of health report forms or such other report forms, letters or documents which may be acceptable to the department and which are designed to indicate one or a combination of the following conditions during a stated period of time.

a. Volume, concentration and characteristics of wastes discharged to, discharged from or in process of treatment in a disposal system.

b. Efficiency of operation of a disposal system.

c. The effect of the waste discharged from a disposal system on the waters of the state.

17.1(3) *"Population equivalent"* means the number of people required to contribute an equal amount of five-day biochemical oxygen demand (BOD) as the waste in question, assuming that a person contributes 0.167 pounds of five-day BOD per day.

17.1(4) *"Biochemical oxygen demand"* means the amount of oxygen required to decompose the decomposable organic matter in a waste by aerobic biochemical action in five days at 20°C. The procedure for determining BOD shall be as outlined in the latest edition of Standard Methods for the Examination of Water and Sewage as published by The American Public Health Association.

17.2(455B) Submission of records of operation. Records of operation shall be submitted to the Iowa state department of health by all owners of waste disposal systems which discharge sewage or wastes into any waters of the state. Records of operation need not be submitted for waste disposal systems which discharge to municipal disposal systems, or where the wastes are discharged to soil absorption systems, which do not outlet to any waters of the state.

17.3(455B) Frequency of submitting records of operation. Records of operation required by these rules shall be submitted at monthly intervals. The state department of health may vary the interval at which records of operation shall be submitted in certain cases. Variation from the monthly interval shall be made only under such conditions as the department may prescribe in writing to the person concerned.

17.4(455B) Content of records of operation. Records of operation shall include such information as the state department of health may require based on the population served by the disposal system, the nature of the treatment process involved and the population equivalent of high strength wastes contributory to the waste disposal system.

17.5(455B) Records of operation forms. Records of operation forms shall be those provided by the state department of health unless their forms are not applicable and in this case the records of operation shall be submitted on such other forms as are agreeable to the state department of health. All reports shall be signed by the person who has direct responsibility for the operation of the disposal system.

17.6(455B) Report of by-pass.

17.6(1) Owners of waste disposal systems shall obtain written permission from the Iowa state department of health prior to any by-passing of any sewage or wastes from the waste disposal system.

17.6(2) In the event that by-passing of sewage or waste occurs as a result of mechanical failure or acts beyond the control of the owner, said owner shall notify the Iowa state department

of health by telephone of the by-passing within 12 hours of the time of discovery of the by-passing. Notification shall include the reasons for the by-pass and expected duration. Telephonic notification shall be confirmed by letter posted the same day. The owner shall comply with the instructions of the Iowa state department of health calculated to minimize the effect of the by-passing on the receiving water of the state.

These rules are intended to implement chapter 455B of the Code.

[Filed May 10, 1966;
amended November 8, 1971]

CHAPTER 18
EFFLUENT QUALITY ANALYSIS PROGRAM

18.1(455B) Submission of samples of waste discharges. Every person operating a treatment works discharging into the waters of the state or otherwise discharging sewage, industrial wastes, or other wastes into the waters of the state, shall submit a representative sample of such discharge to the commission for analysis each month for which such discharge occurs on part or all of 15 days or more during the month. Samples shall be taken only of the actual discharge and shall be taken at the point of discharge or the nearest accessible point thereto.

18.2(455B) Submission of analytical results from approved laboratories. Those persons whose laboratories are approved by the commission for performance of such analysis as the commission may require may, in lieu of the submission of samples required in rule 18.1(455B), submit results of such analyses of effluent as the commission may require to the commission on forms provided by it, provided that quarterly split samples are provided to the commission in addition to such reporting, for the purpose of verification. All such results shall be certified by the person responsible for direction of the laboratory.

18.3(455B) Compliance required as a condition of permits. The department shall require compliance with rules 18.1(455B) or 18.2(455B) as a condition of all permits for the prevention or abatement of pollution, for the discharge of sewage, industrial wastes or other wastes or for the installation or operation of disposal systems or parts thereof, and shall require the modification of all existing permits to achieve compliance with rules 18.1(455B) or 18.2(455B).

18.4(455B) Alteration of samples constitutes cause for operator license revocation. Intentional alteration or adulteration of a sample by an operator is prohibited. In the case of an operator of a municipal sewage plant, intentional alteration or adulteration of a sample shall be cause for the revocation of the license of such operator by the department.

18.5(455B) Commission waiver of requirement. The commission may waive the provisions of rules 18.1(455B) or 18.2(455B) for those discharges which it considers insignificant, and may, in lieu thereof, require the periodic reporting of discharge information by any person causing such discharge.

18.6(455B) More frequent samples may be required. More frequent samples or analysis required under 18.1(455B) and 18.2(455B), shall be collected and submitted when required by the commission upon its determination that additional performance information is required.

18.7(455B) Samples shall be submitted by discharger to laboratory under contract with commission. Each sample required under rule 18.1(455B) shall be submitted by the discharger to the laboratory designated by the commission. Each person submitting such samples shall be liable to said laboratory for a fee for such analyses which fee shall be standardized by contract between the commission and the designated laboratory. The commission may contract, for a period not to exceed two years with public agencies of this state to provide all sample transport, laboratory analysis, and reporting necessary to implement rules 18.1(455B) to 18.8(455B). If the commission finds that public agencies of the state cannot provide the required sample transport, laboratory analysis and reporting services, it may contract with any other public or private persons or agencies for such services. Any such contract shall provide for the reporting of the results of the analyses and of the actual program costs to the commission, in a manner prescribed by the commission.

These rules are intended to implement chapter 455B.9(6), 455B.9(7) and 455B.26 [Code 1971].

CHAPTERS 19 and 20
Reserved for future use

TITLE III

WATER TREATMENT

[Transferred from Health Department Rules (Title XIII)]

CHAPTER 21
CERTIFICATION OF OPERATORS OF PUBLIC WATER SUPPLY SYSTEMS AND WASTE WATER TREATMENT PLANTS

21.1(455B) Definitions.

21.1(1) The definitions set out in section 136A.1 [Code 1971] shall be considered to be incorporated verbatim in these rules.

21.1(2) *"Public water supply"* means any water supply, either publicly or privately owned, serving a municipality or a benefited water district serving a municipality.

21.1(3) *"Plant"* designates the facilities which treat the waste water, water or distribute the treated water.

21.1(4) *"Direct responsibility"* refers to that operator who has active field supervision of a water supply system or a waste water treatment plant or who is required in the performance of the normal duties to give responsible, technical advice and part-time supervision of the technical aspects, rather than only general administrative supervision, of operation.

21.1(5) *"Population equivalent"* for a water treatment plant means the calculated population which would normally require the same amount of water, computed by dividing the average annual daily production of a water treatment plant in gallons by 100.

21.1(6) *"Population equivalent"* for a waste water treatment plant means the calculated population which would normally contribute the same amount of biochemical oxygen demand (BOD) per day computed on the basis of 0.167 pounds of five-day, 20°C., BOD per capita per day.

21.1(7) *"Primary treatment"* means treatment process designed to remove from the sewage organic and inorganic settleable solids by the physical process of sedimentation.

21.1(8) *"Trickling filter"* means treatment process where the settled sewage is passed over a media onto which are attached biological organisms capable of oxidizing the organic matter normally followed by sedimentation.

21.1(9) *"Activated sludge"* refers to a biological sewage treatment process in which a mixture of sewage and sludge floc, produced in a raw or settled sewage by the growth of zoogleal bacteria and other organisms, is agitated and aerated in the presence of a sufficient concentration of dissolved oxygen, followed by sedimentation.

21.1(10) *"Waste stabilization lagoon"* means an excavation designed and constructed to receive raw or pretreated sewage in which stabilization is accomplished by several natural self-purification phenomena.

21.1(11) *"Oxidation"* means a process changing soluble iron and manganese to an insoluble form by the addition of oxygen to the compound by means of chlorine or potassium permanganate additions or mechanical aeration.

21.1(12) *"Chlorination"* means the addition of a chlorine compound or chlorine gas to water to protect the bacterial quality of the water.

21.1(13) *"Stabilization"* means the addition of chemical compounds to water to maintain an ionic equilibrium whereby the water is not in a depository or corrosive state.

21.1(14) *"Aeration"* means the bringing about of intimate contact between air and water by spraying the water in the air, bubbling air through the water or by forcing the air into the water by pressure.

21.1(15) *"Fluoridation"* means the adjustment of the fluoride ion concentration to produce the optimum fluoride concentration in the water.

21.1(16) *"Zeolite softening"* means the process of softening water by passing it through a substance known as a zeolite, which contains chemicals that are exchanged for the hardness-causing elements.

21.1(17) *"Coagulation"* means the agglomeration of colloidal or finely divided suspended matter by the addition to the water of an appropriate chemical coagulant.

21.2(455B) General.

21.2(1) The census taken each decade, or a special census taken by the United States Bureau of Census, shall be used to determine the population served by a water supply system or waste water treatment plant if the population equivalent data is not available.

21.2(2) A plant having a combination of treatment processes which are in different grades shall be classified according to that process which requires the higher numerical classification.

21.2(3) Plants with sufficient population equivalent or sufficiently complicated processes may be raised to a classification higher than that indicated by population alone.

21.2(4) An operator who has direct responsibility shall hold a certificate of equal or higher classification than that which the plant is classified.

21.2(5) An operator, currently certified, may obtain a duplicate certificate upon payment of two dollars.

21.3(455B) Classification of waste water treatment plants.

Grade	Treatment	Population
I	Primary Treatment	5,000 or less
	Waste Stabilization Lagoons	
II	Trickling Filter	5,000 or less
	Activated Sludge	2,000 or less
	Primary Treatment	5,000 to 15,000
III	Trickling Filter	5,000 to 15,000
	Activated Sludge	2,000 to 5,000
	Primary Treatment	15,000 to 50,000
IV	Trickling Filter	15,000 and over
	Activated Sludge	5,000 and over
	Primary Treatment	50,000 and over

21.4(455B) Classification of water treatment plants.

Grade	Treatment	Population
I	Iron or Manganese removal by oxidation only, chlorination only, stabilization only, or aeration only, or any combination of these processes. Flouridation.	1,000 or less
II	Zeolite Softening	5,000 or less
	Iron or Manganese removal by oxidation only, chlorination only, stabilization only, aeration only, or any combination of these processes.	1,000 to 15,000
III	Coagulation or lime or lime-soda softening and sedimentation and filtration.	15,000 or less
	Zeolite softening.	5,000 and over
	Iron or Manganese removal by oxidation only, chlorination only, stabilization only, aeration only, or any combination of these processes.	15,000 and over
IV	Coagulation or lime or lime-soda softening and sedimentation and filtration.	15,000 and over

21.5(455B) Classification of water distribution systems.

Grade	Population
I	15,000 or less
II	15,000 to 50,000
III	50,000 and over

21.6(455B) Operator education and experience qualifications.

21.6(1) All applicants shall meet the following educational and experience requirements for the grade of certificate applied as shown below. The experience qualifications shall be in the same field as the type of certificate for which the applicant is applying.

Grade I

a. Two years high school or equivalent and one year of direct responsibility or one year in operation of water distribution system, water treatment plant or waste water treatment plant, or

b. Produce educational qualifications and experience satisfactory to the board of certification and demonstrate ability to operate a water distribution system, water treatment plant or waste water treatment plant with limited supervision.

Grade II

a. High school education or equivalent and one year of direct responsibility without substitution as allowed in 21.6(2) or three years in operation of a water distribution system, water treatment plant or waste water treatment plant, or

b. Two years high school or equivalent and four years of direct responsibility or six years in operation of a water distribution system, water treatment plant or waste water treatment plant.

Grade III

a. Two years college and three years of direct responsibility or five years in operation of a water distribution system, water treatment plant or waste water treatment plant of a Grade II or higher classification facility, or

b. High school education or equivalent and four years of direct responsibility or six years in operation of a water distribution system, water treatment plant or waste water treatment plant of a Grade II or higher classification facility.

Grade IV

a. A degree of Bachelor of Science in engineering (with special courses or two years' experience in sanitary sciences) and two years in direct responsibility or four years in operation of a Grade III or higher classification of a water treatment or waste water treatment plant, or

b. Four years of college and three years of direct responsibility or five years in operation of a Grade III or higher classification of a water treatment or waste water treatment plant, or

c. High school education or equivalent and six years of direct responsibility or eight years in operation of a Grade III or higher classification of a water treatment plant or waste water treatment plant.

21.6(2) The following substitutions or equivalents for required experience or training may be accepted by the board of certification.

a. Two years' experience in operation of a water distribution system, water treatment plant or waste water treatment plant may be substituted for one year of high school or two years of grammar school education.

b. Satisfactory completion of training courses accepted by the board of certification may be considered as equivalent to:

Two years of grade school, or two years of experience in operation, or one year of direct responsibility in operation, or one year of high school, or one-half year of college, nonengineering.

c. The secretary shall record in such applicant's file the substitute qualifications that have been accepted by the board in the issuance of any certificate.

d. The board of certification may waive the experience requirements in exceptional situations.

21.7(455B) Examinations.

21.7(1) The fee for the initial certificate issued in each grade shall be five dollars, and for each renewal three dollars. The initial certification fee includes the cost of taking the examination.

21.7(2) Applications for admission to examination shall be on forms provided by the board of certification. Application forms shall be filed with the board of certification for their review prior to the examination. The required fee shall accompany each application.

21.7(3) If an applicant fails the examination, the initial certification fee which accompanies the application shall be retained by the board of certification. This initial fee shall entitle the applicant to re-examination.

21.8(455B) Interstate endorsement. The board of certification may consider for recommendation to the commissioner certification without examination of an applicant who was certified by a governmental agency or organization of another state. The applicant must have passed an examination at least equivalent to the examinations offered by the board of certification and meet the education and experience qualifications as set forth in 21.6(455B). The board of certification may at its discretion require the applicant to successfully pass the Iowa examination.

These rules are intended to implement chapters 135A and 136A [Code 1971].

[Filed June 10, 1966;
amended August 31,1971]

CHAPTER 22
WATER SUPPLIES

[These rules transferred from Health Department, 1971 IDR (Title II, Chs 1 and 2)]

22.1(455B) Definitions.

22.1(1) *Public water supply.* Public water supply shall mean any water supply serving a municipality or water district, either publicly or privately owned.

22.1(2) *Quasi-public water supplies.* Quasi-public water supplies shall include all water supplies not coming under the definition of public water supplies which are used for drinking, culinary, and ablutionary purposes by persons other than the owner or lessee of property upon which such water supply is located.

22.2 to 22.10 Reserved for future use.

22.11(455B) General. Every public or quasi-public water supply used for drinking, culinary, or ablutionary purposes which is hereafter constructed or extensively reconstructed, or existing and in the opinion of the state or local health officer is unsafe, shall comply with the requirements of these rules.

22.12(455B) Public water supplies. All public water supplies shall comply with the requirements for approval by the department.

22.12(1) Plans and specifications for any new construction or for reconstruction or improvement of any existing supply shall be submitted to the department before construction begins. This includes main extensions.

22.12(2) The water shall not contain an excessive amount of soluble mineral substance, nor excessive amounts of any chemicals employed in treatment. It should be clear, colorless, odorless and pleasant to the taste. It shall be equal in bacteriological quality to the U. S. Public Health Service Drinking Water Standards 1946, as published in Reprint 2697 from the public health reports on file in the office of the department.

22.13(455B) Quasi-public surface water supplies. All quasi-public surface water supplies shall comply with the requirements for approval by the department.

22.13(1) Plans and specifications for any new construction or for reconstruction or improvement of any existing supply shall be submitted to the department before construction begins.

22.13(2) The water shall not contain an excessive amount of soluble mineral substance, nor excessive amounts of any chemicals employed in treatment. It should be clear, colorless, odorless and pleasant to the taste. It shall be equal in bacteriological quality to the U. S. Public Health Service Drinking Water Standards 1946, as published in Reprint 2697 from the public health reports on file in the office of the department.

22.14(455B) Quasi-public ground water supplies. All quasi-public ground water supplies shall comply with the following requirements:

22.14(1) *Cisterns.* Cistern supplies consisting of roof or other surface run-off water shall not be used for drinking or culinary purposes.

22.14(2) *Wells and springs.*

a. Location. Wells must be located on ground at least one foot higher than the ground surrounding within a 15-foot radius.

On grounds subject to surface flood water, ground must be filled within a 25-foot radius of the well to an elevation at least two feet higher than the highest known flood level. No sewers or drains of any kind (except the pump pit drain) shall be permitted within a ten-foot radius of the well or spring. This also applies to basement floor drains. Sewers and drains farther than ten feet, but within 50 feet of the well or spring shall be extra heavy cast iron pipe with calked lead joints.

No septic tanks shall be permitted within 50 feet of the well or spring.

Sewers and drains farther than 50 feet but within 75 feet of the well or spring shall be cast iron with lead joints or vitrified clay pipe with joints of calked hemp and cement or other approved jointing material.

No open jointed sewers, drains, disposal field, cesspools, privies, leaching pits, barn yards, pig pens, or other such sources of pollution shall be permitted within 75 feet of the well or spring except by special permission from the department.

b. Construction. The well or spring shall be constructed in accordance with the recommendations outlined in Iowa Public Health Bulletin No. 40-1, "Sanitary Standards for Hand Pumped Wells," or equal as approved by the department.

c. Pump setting.

(1) *Mechanically driven pumps.* Pumps shall be set in compliance with the details of construction shown by the sketches available from the department, or equal details as approved by the department.

Pumps set above the ground with underground discharge shall be installed wherever feasible.

A watertight seal shall be provided at the top of the well between the casing and drop pipe and between the concrete pedestal and pump base. Nonhardening asphalt, lead, or cement grout may be used as the sealing material. Certain patented seals may also be used provided they are approved by the department.

Vents shall terminate in a down-turned ell with lower end not less than 24 inches above the floor of pump pit or basement nor less than six inches above the pump house floor when the well terminates above the ground, and provided with a 20-mesh copper screen.

(2) *Hand pumps.* Hand pumps shall be set as described in Iowa Public Health Bulletin No. 40-1, "Sanitary Standards for Hand Pumped Wells," or equal setting as approved by the department.

d. Air-lift systems. The air intake for any air-lift system or mechanical aerating apparatus shall be at least six feet above the floor surface if indoors, and ten feet above the ground if out of doors. The air intake shall be so constructed as to prevent the entrance of birds, insects, dust, rain, snow, or other contaminating material. Every air-lift system shall be equipped with effective oil traps, tanks, or filters to prevent oil from entering the water.

e. Water lubrication of pump bearings. Water lubricated pump bearings situated in any well below the pump-room floor shall be lubricated with water taken from within the well, or from the reservoir or distribution system supplied with water from the original source of the water supply, or in such other manner as may be approved by the department.

f. Priming of power pumps. Water for priming pumps on any water system shall be taken directly from the reservoir or distribution system which is supplied with water from the original source of the water supply or from another supply approved by the department. Priming devices shall be so constructed as not to expose the water to dust, drippings, or other sources of contamination.

g. Priming of hand pumps; buckets. No hand-operated type of pump or cylinder which requires priming shall be used. No pail and rope, bailer, or chain-bucket systems shall be used.

h. Treatment. Ground water supplies which do not comply with the bacteriological requirements of the U. S. Public Health Service Drinking Water Standards 1946 shall be treated by methods approved by the department or, if it is impossible by any method of treatment to secure compliance with said requirements, said well shall be abandoned, sterilized and sealed by filling with puddled clay or other impervious material up to the ground surface.

i. Disinfection and sampling of new or accidentally contaminated water supplies. New water supplies and water supplies which may have become contaminated accidentally or otherwise shall be thoroughly disinfected before being placed in use. Disinfection shall consist of first thoroughly flushing the pump and piping then adding a sufficient amount of chlorine to maintain a residual of at least 25 parts per million in the chlorinated water in contact with the well, reservoir, pump, and piping for a period of not less than 24 hours. The chlorinated water may then be pumped to waste. After all traces of free chlorine have disappeared from the water, a sample shall be examined bacterially at a laboratory approved by the department, and no water shall be used from such supply for drinking or culinary purposes until a satisfactory analysis is obtained or unless the water is treated in such manner as to make it bacterially satisfactory.

j. Connection with unsafe water sources forbidden. There shall be no cross-connection between any drinking, culinary, or ablutionary water supply and any other water supply which does not comply with these requirements.

k. Outlets from unsafe water supplies required to be sealed or labeled. All outlets from water sources accessible to the public which do not comply with these requirements shall be sealed, locked, or, at the discretion of the health officer, be provided with a permanent and easily readable tag or label reading **"Unsafe Water. Do Not Drink."** Removal of said label or tag except by permission of the health officer shall be deemed a violation of these rules.

l. Common drinking cups. The use of common drinking cups is prohibited.

TITLE IV

SOLID WASTE DISPOSAL

CHAPTER 25

DEFINITIONS

25.1(455B) Definitions. For the purpose of these rules, the following terms shall have the meaning indicated in this chapter. The definitions set out in section 406.2 [Code 1971] shall be considered to be incorporated verbatim in these rules.

25.1(1) *"Commissioner"* means the Iowa commissioner of public health.

25.1(2) *"Composting"* means the controlled, biological decomposition of selected solid organic waste materials under aerobic conditions resulting in an innocuous final product.

25.1(3) *"Department"* means the Iowa state department of health.

25.1(4) *"Flood plain"* means the area adjoining a river or stream which has been or may be hereafter covered by flood water.

25.1(5) *"Garbage"* means all solid and semisolid, putrescible animal and vegetable wastes resulting from the handling, preparing, cooking, storing, serving and consuming of food or of material intended for use as food, and all offal, excluding useful industrial byproducts, and shall include all such substances from all public and private establishments and from all residences.

25.1(6) *"High water table"* is the position of the water table which occurs in the spring in years of normal or above normal precipitation.

25.1(7) *"Incineration"* means the processing and burning of waste for the purpose of volume and weight reduction in facilities designed for such use.

25.1(8) *"Intermediate solid waste disposal"* means the site, facility, operating procedures and maintenance thereof for the preliminary and incomplete disposal of solid waste, including but not limited to transfer, open burning, incomplete land disposal, incineration, composting, reduction, shredding or compression.

25.1(9) *"Land pollution"* means the presence in or on the land of any solid waste in such quantity, of such nature and for such duration and under such condition as would affect injuriously any waters of the state, cause air pollution or create a nuisance.

25.1(10) *"Open burning"* means any burning of combustible materials where the products of combustion are emitted into the open air without passing through a chimney or stack.

25.1(11) *"Open dumping"* means the depositing of solid wastes on the surface of the ground or into a body or stream of water.

25.1(12) *"Private agency"* is defined in section 28E.2.

25.1(13) *"Public agency"* is defined in section 28E.2.

25.1(14) *"Recycling"* means the reutilization of natural resources and man-made products.

25.1(15) *"Refuse"* means putrescible and nonputrescible wastes, including but not limited to garbage, rubbish, ashes, incinerator ash, incinerator residues, street cleanings, market and industrial solid wastes and sewage treatment wastes in dry or semisolid form.

25.1(16) *"Refuse collection service"* means a publicly or privately operated agency, business or service engaged in the collecting and transporting of solid waste for disposal purposes.

25.1(17) *"Rubbish"* means nonputrescible solid waste consisting of combustible and noncombustible wastes, such as ashes, paper, cardboard, tin cans, yard clippings, wood, glass, bedding, crockery or litter of any kind.

25.1(18) *"Rubble"* means stone, brick or similar inorganic material.

25.1(19) *"Salvageable material"* means discarded material no longer of value for its original purpose but which has value if reclaimed.

25.1(20) *"Sanitary disposal"* means a method of treating solid waste so that it does not produce a hazard to the public health or safety or create a nuisance.

25.1(21) *"Sanitary disposal project"* is defined in 406.2 [Code 1971].

25.1(22) *"Sanitary landfill"* means a method of disposing of refuse on land by utilizing the principles of engineering to confine the refuse to the smallest practical area, to reduce it to the smallest practical volume and to cover it with a layer of earth at the conclusion of each day's operation or at such more frequent intervals as may be necessary so that no nuisance or hazard to the public health is created.

25.1(23) *"Shoreland"* means land within 300 feet of the high water mark of any natural or artificial, publicly or privately owned lake or any impoundment of water used as a source of public water supply.

25.1(24) *"Site"* means any location, place or tract of land used for collection, storage, conversion, utilization, incineration or burial of solid wastes.

25.1(25) *"Solid waste"* is defined in section 406.2 [Code 1971].

25.1(26) *"Solid waste collection"* means the gathering of solid waste from public and private places.

25.1(27) *"Solid waste storage"* means the holding of solid waste pending intermediate or final disposal.

25.1(28) *"Solid waste transportation"* means the conveying of solid waste from one place

to another by means of vehicle, rail car, water vessel, conveyor or other means.

25.1(29) *"Toxic and hazardous wastes"* means waste materials, including but not limited to poisons, pesticides, herbicides, acids, caustics, pathological wastes, flammable or explosive materials and similar harmful wastes which require special handling and which must be disposed of in such a manner as to conserve the environment and protect the public health and safety.

25.1(30) *"Transfer station"* means a fixed or mobile intermediate solid waste disposal facility for transferring loads of solid waste, with or without reduction of volume, to another transportation unit.

These rules are intended to implement section 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTER 26
GENERAL CONDITIONS, PROHIBITIONS AND REQUIREMENTS

26.1(455B) Permit required. A new sanitary disposal project shall not be established after the effective date of these rules until a permit is issued by the commissioner.

26.2(455B) Details of plan proposals. Cities, towns and counties and private agencies which are operating or planning to operate a sanitary disposal project shall file with the commissioner a plan on a form provided by the commissioner detailing the method proposed to comply with the requirements of chapter 455B. The plan shall be filed with the commissioner prior to November 12, 1972.

26.3(455B) General conditions.

26.3(1) A public or private agency dumping or depositing solid waste resulting from its own residential, agricultural, manufacturing, mining, commercial or other activities on land owned or leased by it must operate and maintain such sites so that they create no public health hazard or nuisance.

26.3(2) All solid waste shall be stored, collected, transported, utilized, processed, reclaimed or disposed of in a manner consistent with requirements of these rules.

26.3(3) The commissioner has the authority to grant such exceptions from these rules as he may consider proper and in the public interest.

26.4(455B) General prohibitions.

26.4(1) Open dumping is prohibited except for rubble.

26.4(2) No public or private agency shall dump or deposit solid waste on any land not its own unless the site is leased or covered by satisfactory use agreements conveying to the agency such privilege.

26.4(3) No disposal of toxic or hazardous wastes shall be made unless explicit instructions are first obtained from the commissioner of public health.

26.4(4) Radioactive materials shall not be disposed of in a sanitary disposal project. Luminous timepieces are exempt.

26.4(5) No permit shall be granted if the location of the site or operation of the facility does not conform to all applicable federal and state laws and local ordinances and regulations.

26.5(455B) Storage, collection and transportation of solid waste.

26.5(1) *Solid waste storage.* Public agencies shall be responsible for regulation of storage of all solid waste accumulated at a premise, business establishment or industry within their jurisdiction. Local regulations should include specifications for storage containers and provision for the adequate labeling of toxic and hazardous wastes. These regulations shall be adequate to prevent the creation of public health hazards and nuisances.

26.5(2) *Collection and transportation.*

a. Where a refuse collection service is a part of a sanitary disposal project, the sanitary disposal project shall be responsible for the collection and transportation of all solid waste accumulated at services premises, business establishments and industries, in a manner free of hazard or nuisance, to an authorized solid waste disposal site or facility. Public or private agencies not a part of a sanitary disposal project which collect and transport solid waste to a sanitary disposal project shall be answerable for an operation free of hazard or nuisance to the public agency responsible for the sanitary disposal project.

b. Vehicles or containers used for the collection and transportation of garbage and similar putrescible wastes or refuse containing such materials shall be leakproof, durable and of easily cleanable construction. They shall be cleaned to prevent nuisances, pollution or insect breeding and shall be maintained in good repair.

c. Vehicles or containers used for the collection and transportation of any solid waste shall be loaded and moved in such a manner that the contents will not fall, leak or spill therefrom, and shall be covered to prevent blowing or loss of material. Where spillage does occur, the material shall be picked up immediately by the collector or transporter and returned to the vehicle or container and the area properly cleaned.

d. Vehicles and containers used for the collection and transportation of toxic and hazardous wastes shall be so constructed that they can be loaded, moved and unloaded in a manner that does not create a danger to public health or safety and in compliance with these rules and federal and state laws and local ordinances and regulations.

These rules are intended to implement 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTER 27
SANITARY LANDFILL

27.1(455B) Plan for sanitary landfill. A plan proposing the use of a sanitary landfill shall be prepared by or under the direct supervision of an engineer in conformity with chapter 114, [Code 1971] and submitted in triplicate and shall include the following supporting documents:

27.1(1) A map or aerial photograph of the area showing land use and zoning within one-half mile of the solid waste disposal site. The map or aerial photograph shall be of sufficient scale to show all homes, buildings, lakes, ponds, watercourses, wetlands, dry runs, rock outcroppings, roads and other applicable details including topography and drainage patterns. Wells shall be identified on the map or aerial photograph. A U.S.C. and G.S. or U.S.G.S. Bench Mark should be indicated, if available, and a north arrow drawn. The boundaries of the solid waste disposal site will be indicated on the map or aerial photograph.

27.1(2) A plot drawing of the site and the immediately adjacent area showing dimensions, topography with appropriate contour intervals, drainage patterns, known existing drainage tiles, locations where any geologic samples were taken, all water wells with their uses and present and planned pertinent features including but not limited to roads, fencing and cover stockpiles. The scheme of development including any excavation, trenching and fill should be shown progressively with time and the monitoring methods to be used to insure compliance with the scheme shall be described. Cross-sectional drawings or other suitable evidence shall be provided showing progressively with time the original and proposed elevation of excavating, trenching, and fill. The plot drawing shall be in appropriate scale.

27.1(3) An ultimate land use proposal, including intermediate use stages, with time schedules indicating the total and complete land use. Final elevation slope and permanent drainage structures of the completed landfill shall be included. Any supporting drawings to the ultimate land use proposal shall be in appropriate scale.

27.1(4) A report shall accompany the drawings. It shall include data of the following types:

a. A stratigraphic section beneath the proposed site from the surface to and including at least five feet of the uppermost bedrock unit or to a depth of at least 50 feet of penetration into a homogenous till unit. The lithologies shall be described in terms of grain size distribution including the gravel, sand, silt and clay classes and Atterberg limits shall be determined.

Samples of sediments and rock units shall be collected at five-foot intervals or when different lithologies are encountered, whichever is most frequent. Samples shall be identified by location and depth. The name of the person classifying the sediments shall be indicated. One complete set of unaltered sack samples shall be submitted with the application.

A drilling location plan and drilling log shall be submitted for each series of samples.

b. Source and characteristics of cover material if not included in the information submitted in 27.1(4) *"a"*, above.

c. Area of site in acres.

d. Owner of site.

e. An organization chart, personnel manning table and table of equipment for the management, operation and maintenance of the site shall be prepared and submitted. A contingency plan covering equipment breakdown shall be included.

f. Information indicating that the proposed landfill is:

(1) So situated as to obviate any significant, predictable lateral leakage of leachates from the landfill to shallow unconsolidated aquifers that are in actual use or are deemed to be of potential use as a local water resource.

(2) So situated that the base of the proposed landfill is at least five feet above the high water table.

(3) Not in significant hydrologic subsurface or surface connection with standing or flowing surface water.

(4) Not situated in an unconsolidated sequence that will permit more than 0.04 cubic foot of liquid per day per square foot of area downward leakage into a subcropping bedrock or alluvial aquifer if such an aquifer is present beneath or adjacent to the proposed site. The potential downward leakage will be evaluated by means of the generalized Darcy's Law Q = PIA where:

Q = $feet^3$ of liquid/day/$foot^2$ of area of the interface,

P = coefficient of permeability of the unconsolidated confining unit,

I = the hydrologic gradient derived by the function: Piezometric head in the unconsolidated sediments minus the piezometric head in the bedrock aquifer divided by the thickness of the confining unit of lowest permeability nominated to retard downward migration of liquids or derived by other acceptable engineering practices, and

A = one square foot of area at the base of the landfill.

(5) Outside a flood plain or shoreland, unless proper engineering and sealing of the site will render it acceptable and prior approval of the Iowa natural resources council and where necessary the U.S. Corps of Engineers is obtained.

(6) At least 1000 feet from any existing well that draws water for human or livestock consumption from an aquifer that underlies and is in hydrologic connection with the landfill. This is meant to include any bedrock aquifer that is the uppermost subcropping bedrock unit beneath the unconsolidated sequence in which the landfill is to be developed.

(7) At least one mile from a municipal well or a municipal water intake from a body of static water or one mile upstream or 1000 feet downstream from a riverine intake, unless hydrologic conditions are such that a greater distance is required or a lesser distance can be permitted without an adverse effect on the water supply.

(8) Beyond 500 feet at the time of commencement of construction of the sanitary landfill from the nearest edge of the right of way of any state highway or beyond 1000 feet from the nearest edge of the right of way of an interstate or federal primary highway, unless the site is screened by natural objects, planting, fences or other appropriate means so as not to be visible from the highway.

(9) Beyond 500 feet from an occupied dwelling unless the site is screened by natural objects, planting, fences or by other appropriate means.

g. Should conditions in violation of 27.1(4) "*f*" (1), (2), (3), (4) or (5) exist, the original plan must be engineered to effect equal protection to the water resources.

h. Information indicating compliance with chapter 2 of these rules.

i. Intended operating procedures shall include at least the following conditions:

(1) Open burning shall be prohibited except when permitted by the rules of the Iowa air pollution control commission. Any burning to be conducted by the sanitary disposal project shall be at a location separate and distinct from the sanitary landfill.

(2) Solid waste shall not be deposited in such a manner that material or leaching therefrom may cause pollution of ground or surface waters.

(3) Dumping of solid waste shall be confined to as small an area as practicable, and the area shall be surrounded with appropriate barriers to confine possible wind-blown material to the area. At the conclusion of each day of operation, any wind-blown material strewn beyond the confines of the area should be collected and returned to the area.

(4) The deposited refuse shall be uniformly distributed and compacted in layers with a height and operating face slope which will permit thorough compaction into cells.

(5) Refuse shall be compacted as densely as practicable and covered after each day of operation with a compacted layer of at least six inches of earth.

(6) Provision shall be made to have cover material available for winter operations.

(7) Each site shall be graded and provided with drainage facilities to minimize the flow of surface water onto and into the fill and to prevent erosion and the collection of standing water.

(8) A minimum distance of 20 feet shall be maintained between the disposal operation and the adjacent property line unless suitable arrangements have been made with the owner of the abutting property.

(9) Effective state-approved means shall be taken to control flies and other insects, rodents or vermin.

(10) The approach road to the disposal site shall be of all-weather construction and maintained in good condition.

(11) Equipment shall be available to control accidental fires in the sanitary landfill. Arrangements shall also be made with the local fire protection agency to acquire their services immediately when needed.

(12) Telephone or other adequate facilities shall be available for emergency purposes.

(13) Sanitary facilities and shelter shall be available on site.

(14) Scavenging shall be prohibited. Any salvaging to be permitted at the site must be described.

(15) An attendant shall be on duty at the site at all times while it is open for public use.

(16) The site shall be fenced to control access and a gate shall be provided at the entrance to the site and kept locked when an attendant is not on duty.

(17) A permanent sign shall be posted at the site entrance identifying the operation, showing the permit number of the site, indicating the hours and days the site is open, specifying the penalty for unauthorized dumping, identifying the location, if any, on the site, which has been designated for disposal of toxic and hazardous wastes and providing other pertinent information.

(18) Within one month after final termination of the site or a major part thereof, the area shall be covered with at least two feet of compacted earth material, free from cracks and extrusions of refuse, adequately grated to allow surface water runoff.

(19) The finished surface of the filled area shall be repaired as required, covered with soil, and seeded with native grasses or other suitable vegetation immediately upon completion or promptly in the spring on areas terminated during winter conditions. If necessary, seeded slopes shall be covered with straw or similar material to prevent erosion.

(20) Prior to completion of a sanitary landfill site, the commissioner shall be notified in order that a site investigation may be conducted before earth-moving equipment is removed from the property.

[Filed September 1, 1971]

CHAPTER 28
COMBUSTION IN AN INCINERATOR

28.1(455B) Any sanitary disposal project using or planning to use incineration must obtain a permit.

28.2(455B) Any sanitary disposal project incinerating or planning to incinerate toxic and hazardous waste must apply for a special permit for this purpose.

28.3(455B) All incinerators must be approved as to design and operated in conformity with emission limitations imposed by rules of the Iowa air pollution control commission.

28.4(455B) Application for permit will be submitted to the department on the appropriate forms and shall include the following supporting documents:

28.4(1) A map or aerial photograph in triplicate indicating land use and zoning within one-half mile of the facility. The map or aerial photograph shall be of adequate scale to show all homes, buildings, roads and other applicable details. Boundaries of the incineration site will be clearly indicated on the map or aerial photograph.

28.4(2) Sets of plans and specifications in triplicate prepared by a registered engineer in conformity with chapter 114 [Code 1971] clearly indicating the construction existing or to be undertaken. These plans and specifications shall include the location, type and height of all buildings within 500 feet of the existing or proposed installation.

28.4(3) An engineering report to include furnace design criteria, existing or expected performance data, the present and future population and extent of the area to be served by the incinerator, the characteristics, quantities and sources of the solid waste to be processed.

28.4(4) Intended operating procedures including plans for the disposal of incinerator residue, the present or expected amount of such residue and plans for the emergency disposal of solid waste in the event of major breakdown of the incinerator plant.

a. The owner of the site and of the plant.

b. A personnel manning table for the actual operation and maintenance of the plant.

c. Information indicating compliance with chapter 26 of these rules.

d. Location, equipment, operation and maintenance of the incinerator plant shall be such that it produces only minimal interference with other activities in the area.

e. Availability of shelter and sanitary facilities for plant personnel.

f. A permanent sign at the site entrance identifying the operation, showing the permit number of the plant and indicating the hours and days that the plant is open for public use. Access to the plant shall be permitted only during those times when authorized personnel are on duty.

g. Confinement of all incoming solid waste to the unloading area. A minimum holding bin capacity of one and one-half times the 24-hour capacity of the incinerator shall be provided.

h. Provision of dust control facilities in the unloading and charging area.

i. An incinerator scale shall be available to permit proper charging weights during operation and to provide data for a record as to the total weight of material incinerated and resulting residue for planning and management purposes.

j. Supply of potable water for use of plant personnel and suitable source of water for spraying, heating, quenching, cooling and fire fighting.

k. Availability of adequate fire-fighting equipment, as recommended by the state fire marshal, in the storage and charging area and elsewhere as needed. Arrangements shall be made with the local fire protection agency to provide fire-fighting forces in an emergency.

l. Telephone or other adequate facilities shall be available for emergency purposes.

m. Cleaning of storage and charging areas after each day's operation or more often as may be required. The entire plant shall be maintained in a clean and sanitary condition.

n. Provision of necessary safety features at the charging openings and for all equipment throughout the plant.

o. Maintenance of the temperature in the combustion chambers during normal operation at a minimum of 1500°F. to produce a satisfactory residue and an odor-free operation. A continuously recording pyrometer shall be installed to maintain records of combustion chamber temperatures. These records shall be available for inspection by the commissioner upon request.

p. Proper deposit at an approved sanitary landfill site of all residue removed from the incinerator plant in a manner which will prevent the creation of nuisances, pollution and public health hazards.

q. Provision of timely notice to the commissioner prior to the initial operation of a newly constructed plant to permit inspection of the plant both prior to and during the performance tests. Performance tests of newly constructed plants are required. A report detailing the results of such performance tests shall be prepared by the design engineer of the sanitary disposal project and shall be submitted to the commissioner with copies of all supporting data documents.

r. Existing incinerators which do not meet the requirements of this section shall be reconstructed to comply or an alternate method of sanitary waste disposal must be adopted.

s. Such additional data and information as may be required by the commissioner.

These rules are intended to implement section 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTER 29
COMPOSTING

29.1(455B) Any sanitary disposal project disposing of solid waste by composting must obtain a permit granted by the commissioner prior to operation, installation or alteration of its facilities.

29.2(455B) Application for a permit to operate, install or alter a composting facility shall be

accompanied by the following supporting documents which shall be prepared by or under the direct supervision of an engineer in conformity with chapter 114 [Code 1971]:

29.2(1) Maps or aerial photographs in triplicate indicating land use and zoning within one-half mile of the proposed facility. The map or aerial photograph shall be of adequate scale to show all homes, buildings, lakes, ponds, watercourses, wetlands, dry runs, rock outcroppings, roads and other applicable details and shall indicate the general topography of the area with appropriate contours and drainage patterns. Wells and locations where geologic samples were taken will be identified on the map or aerial photograph.

29.2(2) Plans and specifications in triplicate clearly indicating the layout and construction proposed.

29.2(3) Detailed information on geological formations underlying the actual or proposed site. Such information shall be determined by geologic samples or other appropriate means to a depth of at least 20 feet, or to the high water table.

29.2(4) An engineering report describing the proposed facility, the present and future population and the area to be served by the composting unit and the characteristics, quantities and sources of solid waste to be processed.

29.2(5) Intended operating procedures, including the proposed method and the use or disposition that is to be made of the processed material.

29.2(6) Owner of the site and plant.

29.2(7) An organization chart, personnel manning table and table of equipment for the management, operation and maintenance of the site shall be prepared and submitted. A contingency plan covering equipment breakdown shall be included.

29.2(8) Information indicating compliance with chapter 2 of these rules.

29.2(9) Such additional data and information as may be required by the commissioner.

29.3(455B) Any composting operation must be conducted in a manner which minimizes pollution, public health hazards and creation of nuisances.

29.4(455B) Materials resulting from composting or similar processes and offered for sale shall contain no pathogenic organisms, shall not reheat upon standing, shall be innocuous and shall contain no sharp particles which would cause injury to persons handling the compost. Sale shall be in compliance with all applicable federal and state laws and local ordinances and regulations.

29.5(455B) Noncompostible materials removed during processing shall be handled in a manner which will not produce pollution or nuisance and shall be disposed of by another satisfactory method as provided in these rules.

These rules are intended to implement section 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTER 30
RECYCLING

30.1(455B) Any sanitary disposal project processing solid waste by recycling must obtain a permit from the commissioner.

30.2(455B) Application to construct and operate an installation for the processing of solid waste to reclaim salvageable materials for recycling must be accompanied by the following supporting documents prepared by or under the direct supervision of an engineer in conformity with chapter 114 [Code 1971]:

30.2(1) A map or aerial photograph showing land use and zoning within one-half mile of such installation. The map or aerial photograph shall be of sufficient scale to show all homes, buildings, roads and other applicable details. The boundaries of the recycling site shall be clearly indicated on the map or aerial photograph.

30.2(2) Detailed engineering drawings of all buildings, conveyor lines, machines, intermediate holding area, loading and unloading docks, transfer points and such other appurtenances to the facility, and in addition, lines of flow for all waste and salvaged material handled by the facility must be included. Access and egress roads must be shown.

30.2(3) Complete description of the method of handling reclaimed salvageable materials, the disposition of such materials, the transfer points to which they will be moved, capacities of such points and frequency of interchange must be shown.

30.2(4) Such additional data and information as may be required by the commissioner.

30.3(455B) Material which cannot be recycled shall be handled in a manner which will not produce pollution or nuisance and shall be disposed of by another satisfactory method as provided in these rules.

These rules are intended to implement section 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTER 31
OTHER METHODS OF WASTE HANDLING, PROCESSING AND DISPOSAL

31.1(455B) Before a site or facility for any other method of solid waste handling, processing and disposal, including transfer stations not otherwise provided for in these rules, is constructed, an application accompanied by plans in triplicate, specifications, design data, ultimate land use and

proposed operating procedures and such additional data and information as may be required shall be submitted to the commissioner for review before a permit can be issued. All such information shall be prepared by or under the direct supervision of an engineer in conformity with chapter 114 [Code 1971].

This rule is intended to implement section 406.5 [Code 1971].

[Filed September 1, 1971]

CHAPTERS 32 to 34
Reserved for future use

TITLE V

CHEMICAL TECHNOLOGY

CHAPTER 35
AGRICULTURAL CHEMICALS

35.1(455B) Use of DDT and DDD. Pesticides containing dichloro diphenyl trichloroethane (DDT) or dichloro diphenyl dichloroethane (DDD) shall not be distributed, sold or used except for control of pests of public health importance and pests subject to state or federal quarantines where applications of pesticides are made under the direct supervision of public health officials or state or federal quarantine officials.

35.2(455B) Use of inorganic arsenic. Formulations of inorganic arsenic, including but not limited to arsenic trioxide, calcium arsenate, lead arsenate, potassium arsenite, sodium arsenate, sodium arsenite and thioarsenite, shall not be distributed, sold or used as a pesticide for the purpose of preventing, destroying or repelling any weed, rodent or insect, except permits for the use of lead arsenate on bentgrass golf greens may be secured from the department of agriculture to permit the use of this material on only bentgrass golf greens by bona fide golf course operators. In granting the permits the department of agriculture will consider the location, amount of chemical, area to be treated and the time of application of chemical.

35.3(455B) Use of heptachlor. Pesticides containing heptachlor shall not be distributed, sold or used for the purposes of preventing, destroying or repelling mosquitoes or flies.

35.4(455B) Use of lindane. Formulations of pesticides containing lindane or crystalline lindane shall not be distributed, sold or used when the lindane is prepared, identified, packaged or advertised to be vaporized through the use of thermal vaporizing devices.

These rules are intended to implement chapters 206 and 455B.

FAIR BOARD

CHAPTER 1
GENERAL RULES

1.1(173) Interpretation of rules. The Iowa state fair board reserves its right to interpret these rules and settle and determine all matters, questions and differences in regard thereto, or otherwise arising out of, connected with or incidental to the fair.

1.2(173) Conflict of rules. In the event of conflict of general and special rules, the latter will govern.

1.3(173) Composition of exhibits. The composition of all state fair exhibits shall be determined by the Iowa state fair board.

1.4(173) Transportation charges. The state fair board will in no case assume or pay the transportation charges on articles sent for exhibition or assume or pay any expense in their delivery to the ground.

1.5(173) Exhibit safety. The state fair board will use diligence in caring for the safety of livestock or articles after their arrival but in no case will they be responsible for any loss or damage that may occur.

1.6(173) Public safety. It shall be the duty of the state fair public safety department to supervise the parking of automobiles.

1.6(1) The board or executive committee may prohibit the running of automobiles on any street within the grounds whenever, in their opinion, it becomes dangerous or to facilitate the handling of traffic, and shall reserve the right to post and enforce speed limits.

1.6(2) Under no consideration will automobiles be allowed to park around the buildings, or in any open parked space in the central part of the grounds.

1.6(3) Taxicabs will be required to park at stations designated for that purpose.

1.7(173) Admissions. All admissions to the fair shall be as determined by the fair board and printed in the premium book.

1.7(1) All persons entering the grounds must pay the admission fee. Anyone wishing to leave the grounds and return the same day may do so by having his hand stamped at any gate.

1.7(2) Camping or sleeping overnight in parking lots on fairgrounds is prohibited. Curfew

will be called at 1:00 a.m. daily and from that time until 5:00 a.m., only those persons with business may remain on the fairgrounds (including owners or caretakers of exhibits, guards, persons registered at dormitories, fair officials and employees).

1.7(3) Campers will be required to pay the regular admission fees when entering the main portion of the grounds through campground gates.

1.8(173) Advertising. The distribution of handbills or other advertising matter is strictly prohibited, and no tacking or posting of advertising bills, cards, etc., will be permitted on any of the buildings, telephone poles or elsewhere. Exhibitors may advertise and distribute from their booth or exhibit only.

CHAPTER 2
INDUSTRIAL EXHIBITS DEPARTMENT

2.1(173) Extortion. The board will carefully guard against extortion in any form being practiced on the patrons of the fair. A violation of this rule to cause forfeiture of contracts, money paid and expulsion from the grounds as the superintendent or board may elect.

2.2(173) Location of exhibits. The superintendent and his assistants will be on the grounds a week previous to the fair prepared to locate exhibits as they arrive.

2.3(173) Reassignment of space. Space contracted for cannot be assigned, sublet or otherwise disposed of without the consent of the superintendent of the industrial exhibits division.

2.4(173) Rental fee. The exhibitor will pay a rental fee in the amount determined by the fair board and stipulated in his contract with the board when the contract is executed.

2.5(173) Opening of exhibits. All exhibits will be in place and ready for public inspection by 9:00 a.m. Friday, the opening day of the fair.

2.6(173) Dismantling of exhibits. None of the exhibits or decorations will be dismantled nor removed from the exhibit before 6:00 p.m. of the closing day of the fair.

2.7(173) Exhibition hours. All exhibits will be open to the public during the hours specified in their individual contracts.

2.8(173) Decorating material. All material used in decorating must be flameproof. Canvas tops and sidewalls must also be of flameproof material.

2.9(173) Direct selling. Orders for future delivery may be taken, but direct selling from exhibits is prohibited.

2.10(173) Parking in exhibit space. The fire marshal will not permit parking of automobiles or trailers in exhibit space, except when they are being exhibited and are open to the public.

2.11(173) Use of sound. No loud-speaker, amplifier, radio or other sound device can be used on the exhibit space, unless the sound or amplification is confined to the area occupied by the exhibitor.

2.12(173) Discrimination. Each exhibitor agrees that he will not discriminate because of race, creed, color, national origin, religion or sex and further agrees that his contract shall be terminated by the fair board if a violation is found.

2.13(173) Building on exhibit space. Exhibitors will be permitted to build on space assigned them. Any part of exhibit showing to public must be finished on all sides.

2.13(1) Any structure erected on the fairgrounds must be removed from the grounds immediately after the fair unless authorized in writing by the fair board to remain on the grounds.

2.13(2) Any structure not authorized to remain must be removed within 30 days or it will become property of the fair board.

2.13(3) Any permanent or semipermanent structure erected on the fairgrounds must have the written consent of the fair board.

2.13(4) Painting or alterations attachment to any structure owned by the fair will be prohibited unless authorized in writing by the fair board.

2.13(5) All structure, footings or foundation above or below ground level will be removed at the expense of the exhibitor.

2.14(173) Gasoline engines. Demonstration of gasoline engines will be permitted in the varied industries building and on the promenade surrounding the building only if propelled by electric motors.

2.15(173) Electricity. Electricity is available to the exhibitor, and will be charged at regular rates.

2.16(173) Violation of contract. Any violation of any of the terms and agreements of the exhibitor's contract, shall, at the election of the fair board, cause the whole amount of the contract to become due and work a revocation and forfeiture of all rights and privileges granted in that contract to the exhibitor, and in the event of such breach by the exhibitor and such election by the fair board, any and all sum paid or contracted to be paid under the contract to the fair board shall be and become the property of the fair as liquidated damages for said breach.

2.17(173) Binding rules. Exhibitors shall be bound by all the rules of the International Association of Fairs and Expositions; also by the rules of the Iowa state fair as published in the Iowa state fair premium list.

2.18(173) Contract renewal. Contracts with exhibitors are for the period specified, and the fair board reserves the right to refuse renewal if they so desire.

2.19(173) Exhibitor admission. Exhibitors shall be expected to pay the regular price of admission to the fair each day.

[Filed November 20, 1972]

CHAPTER 3
CONCESSIONS DEPARTMENT

3.1(173) Needs of people. The board authorizes the letting of such concessions as are required to supply the necessary wants of the people, or that may add to their comfort, convenience and pleasure, but under no circumstances will concessions be sold or permitted where the business is conducted in other than legitimate and tradelike manner.

3.2(173) Extortion. The board will carefully guard against extortion in any form being practiced on the patrons of the fair. A violation of this rule to cause the forfeiture of contracts, money paid and expulsion from the grounds, as the superintendent or board may elect.

3.3(173) Quality stands and products. All dining halls, lunch booths and refreshment stands must be substantial in structure and neat in appearance. All food must meet standards set by the Iowa health department or by the United States Food and Drug Administration.

3.4(173) Restriction on employees. No officer or employee in any department of the fair shall have any concession, or any interest or connection with any concession operated at the fair.

3.5(173) Deposits. The concessionaire will pay a deposit in the amount determined by the fair board when his contract is signed, and he will pay the balance of the sum determined and stated in his contract in cash, before 10:00 a.m. of the first Monday of the fair. Checks will not be accepted during the fair.

3.6(173) Access to concessions. Any representative of the fair board shall have access to the concession at all times.

3.7(173) Clean stands. The concessionaire will conduct his business in a quiet and orderly manner, keep his place neat and clean, deposit all rubbish, slop, garbage, tin cans, paper, etc., in the receptacles placed or constructed adjacent to said concession plot for this purpose; he will keep his ground in front and in the rear of said concession free from all rubbish. All empty boxes and bottles, ice cream packing cases and cans must be removed from the place of business and not left on walk or street or in front of stand. Emptying salt water from ice cream packing cases is strictly prohibited.

3.8(173) Approval of board. All buildings, tents or enclosures put up by the concessionaire must have approval of the fair board.

3.9(173) Preparation opening date. The concessionaire will not be permitted to occupy a plot or space more than 13 days before the opening of the fair.

3.10(173) Concessionaires limited to contracted privileges. The concessionaire will conduct the privilege granted by his contract according to the laws and rules of the state of Iowa, and without infringement upon the rights or privileges of others, and will not handle or sell any commodity or transact any business whatsoever for which exclusive privilege is sold by the fair board, or engage in any other business whatsoever upon and within the premises or fairgrounds, except that which has been expressly stipulated and contracted for in his contract with the fair board, and will confine his transactions to the space and privilege provided in that contract.

3.11(173) Right to sell privileges. The fair board reserves the right to sell all privileges for all commodities, and concessionaires and others can sell only merchandise listed on contract with the fair board.

3.12(173) No bottles. Drinks or refreshments will not be sold or served in bottles.

3.13(173) Board approval of concessions. The concessionaire will not conduct or permit to be conducted, on the space which he has leased, any stand, show, amusement or exhibition of any character which does not meet with the approval of the fair board.

3.14(173) Posted prices. The concessionaire shall post in a conspicuous manner at the front or entrance of his place of business a sign showing price, approved by the fair board, of meals, lunches, drink and all other articles of food and drink to be sold. The practice of posting up price of meals and charging extra for drinks will not be tolerated. The size of the sign or bill of fare and place of posting to be approved by the fair. The concessionaire shall not increase or reduce the established and posted price of any item of merchandise or meal sold without the consent of the fair board.

3.15(173) Violations of contract. Any violation of any of the terms and agreements of the concessionaire's contract, shall, at the election of the fair board, cause the whole amount of the contract to become due and work a revocation and forfeiture of all rights and privileges granted in that contract to the concessionaire, and in the event of such breach by the concessionaire and such election by the fair board, any and all sums paid or contracted to be paid under the contract to the fair board shall be and become the property of the fair board as liquidated damages for said breach.

3.16(173) Removal of stands. Any structure erected on the fairgrounds must be removed from the grounds immediately after the fair. Any structure not removed within 30 days will become the property of the fair board.

3.17(173) Reassignment of contracts. No contract or privilege granted by the fair board may be assigned or otherwise disposed of without the written consent of the fair board.

3.18(173) Quitting of premises. The concessionaire shall, at the expiration of his contract, surrender possession of the premises to the fair board without further notice to quit and in as good repair as the same were on the date at which the concessionaire took possession thereof, unavoidable wear or damage by fire caused without the fault of the concessionaire excepted.

3.19(173) Lien on property. The fair board shall have a lien upon all property being kept, used or situated upon the leased premises or upon the fairgrounds whether such property be exempt or not, for the rent or privilege money to be paid under the concessionaire's contract, and for any damages sustained for any breach thereof; and the fair board shall have the right to the same, and appropriate said property to its own use to satisfy its claims against said concessionaire.

3.20(173) Binding rules. Concessionaires shall be bound by all the rules of the International Association of Fairs and Expositions; also by the rules of the Iowa state fair as published in the Iowa state fair annual premium list.

3.21(173) Use of sound. No band, orchestra, musicians, loud-speaker, amplifier, radio or other sound device can be used on the concession space unless the sound or amplification is confined to the area occupied by the concessionaire.

3.22(173) Decorating material. All decorating material must be flameproof. Canvas tops and sidewalls must also be of flameproof material.

3.23(173) Fire extinguishers. All concessions having cooking or heating devices must have a fire extinguisher in their kitchen at all times.

3.24(173) Renewal of contracts. Contracts with concessionaires are for the period specified, and the fair board reserves the right to refuse renewal if they so desire.

3.25(173) Electricity. Electricity is available to the concessionaire, and will be charged at regular rates.

3.26(173) Concessionaire's admission. Concessionaires and their help shall pay the regular price of admission to the fair each day.

3.27(173) Discrimination. No concessionaire shall discriminate because of race, creed, color, national origin, religion or sex.

[Filed November 20, 1972]

COMPETITION DIVISIONS

CHAPTER 4
ENTRIES

4.1(173) Filing date. All entries must be filed with the secretary on the date determined by the fair board and printed in the premium list.

4.2(173) Filing forms. All entries must be made on the printed forms which may be obtained free from the secretary.

4.3(173) Fees. All entry fees, stall and pen rent, space rentals and concession fees shall be as determined by the fair board and printed in the premium book.

4.4(173) Premium lists. All divisions, classes, fees and premiums, as well as all individual specifications for entries into each class and restrictions thereof are published annually in the premium lists.

4.5(173) Placement and release of exhibits. Time of placement and release of exhibits will be as determined by the fair board and printed in the premium book.

4.6(173) Time of judging. The time of judging in all departments shall be as determined by the fair board and published in the premium list.

4.7(173) Entries by creator. Articles which are the result of mechanical or artistic skill must be entered by the artist, inventor, manufacturer or authorized agent.

4.8(173) Entries by owner. Animals, with the exception of cattle, must be entered in the name of the owner and must have been owned by him not less than 30 days prior to the opening day of the fair. Cattle must be the bona fide property of and owned by the exhibitor at the time of exhibition, and be entered in owner's name.

4.9(173) Substitution of animals. Substitution of animals entered for reasons satisfactory to the management of the fair will be permitted prior to the opening day of the fair, providing the animal meets all the regulations herein applicable. All requests for substitution of this kind and the reasons therefore, together with name, date of birth and registry number of the animal substituted, shall be approved by the superintendent of the department and filed in writing with the secretary.

4.10(173) Entry tags. Exhibitors in departments where coupon entry tags are used must present coupons for the return of their goods to the superintendent or the assistants of the department in which the exhibit is shown. Under no circumstances will the exhibitor be permitted access to display cases or space where exhibits are shown.

4.11(173) Purebred entries. No animal can be entered or exhibited as purebred unless the same has been recorded in the recognized book of

record for its respective breed, and exhibitors must produce certificates of registry at the request of the superintendent in charge any time during the fair.

4.12(173) Reserved pens. Stalls and pens will not be reserved unless entry is accompanied by the required stall, pen and entry fees. All stall or pen rent to be doubled when occupied by sale animals or animals not exhibited.

4.13(173) Fraud and misrepresentation. Should any individual enter an animal or article in a name other than that of a bona fide owner or attempt to perpetrate a fraud by misrepresenting any fact, the entry thus made shall not be allowed to compete for or receive any premium. In case of question as to the age of an animal the superintendent shall appoint an expert, whose decision shall be final.

4.14(173) Erroneous entries. Exhibits which have been erroneously entered may, at the discretion of the secretary and superintendent of the department, be transferred to their proper class previous to the judging. If such classes have been judged, they shall not be rejudged.

4.15(173) Rent refund. No refunds for stall fees or pen rent will be made unless cancellation is made before cataloging.

4.16(173) Clean stalls. Livestock exhibitors must keep the space in the rear of their stalls and pens and all alleyways clear and clean. All litter must be thrown where indicated by the superintendent and his assistants.

4.17(173) Exhibition of stalls. Exhibitors must keep their stalls open and stock uncovered from 8:00 a.m. to 6:00 p.m. each day of the fair.

4.18(173) Health rules. Rules governing the health of all animals shown at the fair will be as determined by the Iowa department of agriculture, division of animal industry and published in the premium book.

4.19(173) Early removal of exhibits. Gatekeepers and police are instructed to restrain any person from passing out the gates with stock or other articles that have been on exhibition, before the hour of release, without written order from the president or superintendent of the department.

4.20(173) Dropping of classification. When a breed of cattle, swine or sheep entered and shown in the breeding classes drops below 60 head, of which 30 head are Iowa owned, they will be dropped from the classification the following year, and in order to regain entry into the classification they must present satisfactory evidence to the fair board that they will have a show of the required number, and quality in keeping with Iowa state fair standards.

4.21(173) Premiums. Premiums paid will be as determined by the fair board and printed in the premium book.

4.21(1) The fair board is pleased to list special premiums in the premium list, but will not be responsible for their payments or delivery unless they are in the hands of the secretary by the opening day of the fair.

4.21(2) Special prizes will not be accepted for classes that do not conform to the regular classifications of the department in which they are offered unless for reasons satisfactory to the executive committee and the superintendent of the department in which they are offered.

4.21(3) Specials are limited to money prizes or articles of intrinsic value.

4.21(4) Premiums in the open livestock departments will be paid at a time determined by the fair board and printed in the premium book. Premiums in other departments will be paid as soon after the close of the fair as possible.

4.21(5) Premium warrants must be cashed before November 1 in the same calendar year as their issue.

4.21(6) Any discrepancies in the amounts of premium checks must be called to the attention of the fair board before October 15 of the same calendar year. No claims for error after that date can be honored.

[Filed November 20, 1972]

CHAPTER 5
HORSE DEPARTMENT

5.1(173) 4-H club colts. Colts entered in the 4-H club classes may also be entered in the corresponding open classes by payment of the open entry fee for each exhibitor, and entry is made on regular open class entry blanks before the closing of open entries. Stall fees must also accompany entries, the same as regular open class entries. Colts entered in the open classes, and stall fees paid, will not have additional stall fees deducted from 4-H premiums if certified by the horse superintendent.

5.2(173) Ownership of animals. Unless otherwise specified to be eligible for competition, whether singly or in groups, animals must be the bona fide property of and owned by the exhibitor at the time entries close. Registry or transfer certificates showing exhibitor to be the owner must be presented upon demand.

5.3(173) Unnamed entries. Unnamed entries will not be accepted in the individual classes. Animals to compose a competitive group need not be named at the time entries are made, but must be entered in individual classes and catalog number of each animal given to ring clerk when group is shown. Sires in "get of sire" and dams in "produce of dam" classes to be named at time of making entry.

5.4(173) Bred by exhibitor. Animals shown as bred by exhibitor must be so recorded

with the record association. Those bought in dam cannot be shown as bred by exhibitor.

5.5(173) Age of entries. The date for computing age of all entries in the horse department shall be January 1. Colts foaled prior to January 1 must be entered in the class a year older than those foaled the following spring.

5.6(173) Defects. The judges will discriminate severely against animals that have hereditary or transmissible defects or unsoundness; such as bog or bone spavin, ringbone, curb (when accompanied by curby hock), cataract, stringhalt and roaring. All questions concerning soundness of animals will be referred to a competent veterinary surgeon.

5.7(173) Call to show. No animal shall be awarded a prize unless removed from its stall and exhibited, with catalog number attached, in the show ring. Animals not exhibited when called out by the ring steward or superintendent, unless especially excused, will be charged double for use of stalls or removed from the grounds, as the management may decide. Catalog stall cards will be furnished by the superintendent and must be tacked on the stalls where the animals are kept.

5.8(173) Champion classes. Only first and second prize winners in their respective classes shall be eligible to compete for champion and reserve champion prizes, and no second prize animal shall be entitled to rank above reserve in a champion class. All first prize animals will be required to show in champion classes unless excused by the proper officials. Exhibitors of first prize animals that fail to meet this requirement will forfeit, at the discretion of the officials, all or a portion of prizes awarded.

5.9(173) Call to show. Exhibitors are expected to obey the call promptly in producing their stock, when instructed to do so. Stock must be in the ring at the scheduled time, or within five minutes after the class is called, and it will be taken for granted that any person failing to comply with this rule is not a competitor for the premiums offered. Exhibitors will show their animals at such times and places as may be directed and shall furnish such information concerning their stock as may be required by the superintendent, and in case of refusal to obey this rule any or all premiums will be forfeited and the exhibitor barred from showing. The superintendent may exclude from competition exhibitors who fail or refuse to comply with any or all rules.

5.10(173) Alterations in stalls. No alterations in stalls permitted unless permission of the executive committee is given. No partitions or pens back of stalls for colts will be permitted. Exhibitors should order two stalls for mare and foal.

5.11(173) Responsibility of fair. Every horse or pony entered for competition will be under the control of the horse show management, and every precaution will be taken to protect the property of the exhibitor; but the horse show manager or the Iowa state fair board will in no case be responsible for any loss or damage that may occur, and it shall be a condition of entry that each exhibitor shall hold the horse show manager and the Iowa state fair board blameless for any loss or accident to his horses or equipment which may occur from sickness, accident, by fire or otherwise.

5.12(173) Release of horses and ponies. A special gate release must be obtained from the superintendent for removal of all horses and ponies from the grounds. All official show numbers must be returned before release is granted.

5.13(173) Performance classes. Horses entered in performance classes must be shown. However, if sick or injured, they may be excused by presentation of an official state fair veterinarian's certificate to the management by 11:00 a.m. the day the class is to be held. Horses not showing and not officially excused will cause the exhibitor to forfeit all premium money won.

5.14(173) Disputes. Any dispute as to age, height or soundness of horses will be referred to the official state fair veterinarian and his decision will be final. The two-minute rule will be observed following class call.

5.15(173) Substitution of horses. In all classes where horses are entered, no substitution of horses may be made after the announced date of closing entries.

5.16(173) Cancellation of classes. The horse show management reserves the right to cancel any class where there are less than five entries, the property of different owners; also to combine or divide any class should the best interests of the show require it. Elimination may be held in any class where the number of entries make it necessary as decided by the management.

5.17(173) Showman's courtesy. Exhibitors are hereby notified that any act of discourtesy or disobedience by them, their riders, drivers, grooms or agents, to the judges or officials, shall forfeit his stake fees and all other prize money which he may have won at the show. The horse show management shall have full power to act in issuing a ruling in such cases.

5.18(173) Show ring attire. All attendants must be suitably and neatly dressed when entering the ring to show or assist in the showing of horses. It is the tradition of the show ring that an exhibitor be correctly attired for the class in question, that attendants be neatly dressed and horses properly presented. The management may at its discretion bar an entry or person from entering the ring if not suitably attired to appear before the public, without claim or damage.

5.19 (173) Questions. All questions not covered in these rules will be decided by the horse show management, whose decisions shall be final.

SHOW HORSES

5.20(173) Unnamed entries. Unnamed entries will not be accepted.

5.21(173) Quitting of grounds. Exhibitors showing in the Iowa classes only may take horses out if so desired. They must, however, be off the grounds before 7:00 a.m. the day following their showing. Exhibitors showing in only one class may bring their horses the day shown and take them home after the show if they wish to do so.

5.22(173) Sound horses. All horses awarded a prize must be sound for the purpose or class in which they are shown.

5.23(173) Size and development. Due consideration will be given to size and development, but breed type and quality will not be subordinated to size in making awards.

5.24(173) Iowa championship classes. All Iowa first and second prize winners will be required to show in Iowa championship classes, unless excused by superintendent. Balance of winners may compete if their owners so elect. Exhibitors that fail to meet this requirement will forfeit all or a portion of prizes awarded, at the discretion of the management.

5.25(173) Call to show. Exhibitors are expected to obey the call promptly in producing their stock when instructed to do so. Stock must be in the ring at the scheduled time, and it will be taken for granted that any person failing to comply with the rule is not an exhibitor for the premium offered. Exhibitors will show their animals at such times and places as may be directed and shall furnish such information concerning their stock as may be required by the superintendent, and in case of refusal to obey this rule any or all premiums will be forfeited and the exhibitor barred from showing. The superintendent may exclude from competition exhibitors who fail or refuse to comply with any or all rules.

5.26(173) Exhibition in stall. Exhibitors must keep their stalls sufficiently open so visitors may see the stock from 8:00 a.m. to 6:00 p.m. during each day of the exhibition. All exhibitors shall decorate their stalls in an attractive manner.

5.27(173) Clean stalls. Exhibitors must keep the space in the rear of their stalls clear and clean; and all litter must be thrown where indicated by the superintendent or his assistants.

5.28(173) Alterations in stalls. No alterations in stalls permitted unless written permission of the board is given. No partitions or pens back of stalls for colts will be permitted. Exhibitors should order two stalls for mare and foal.

5.29(173) Ribbon presentation. All entries must remain in line in the show ring until ribbons have been awarded, unless otherwise ordered.

5.30(173) Ownership of animals. All animals competing must be entered in the name of their bona fide owners or their duly authorized agents.

5.31(173) Age of horse. The age of each horse will be computed from the first day of January in the year in which it was foaled.

5.32(173) Measurement of horses. Special care should be taken that the measurement of horses is correctly stated on the entry blanks and that they are entered in the proper class as to height, as in the case of a wrong entry in any class the animal will be disqualified from taking a prize in such class. Horses will be measured by the judges, from whose decision there is no appeal. This measurement will hold good in all competition during the show.

5.32(1) When one horse of a pair is not exceeding half an inch over or under the height prescribed, the other being within the limit, the pair shall not be disqualified. But the horse which is not within the prescribed limit shall not be eligible in any single harness class other than those to which it is entitled to enter on exact measurements.

5.32(2) All horses must be shown in the shoes in which they come to the show, and no horse's shoes may be changed except for reasons satisfactory to the management and with its consent. The use of shoes of excessive thickness for the purpose of increasing the height of a horse will not be allowed, and a horse shod in this manner will be disqualified. No toe weights will be allowed.

5.32(3) Animals under 14-2 will not be allowed to show in any of the saddle and harness horse classes.

5.33(173) Protests. All protests in show horse and pony classes must be made in writing and accompanied by a deposit of $20 which will be forfeited if protest is not sustained.

5.33(1) Protest must state plainly the cause of complaint or appeal and must be filed with the secretary within 12 hours after close of show.

5.33(2) No complaint or appeal based upon the statement that the judge or judges are incompetent will be considered by the board.

5.33(3) Where a protest is to be made against the competition of an animal in any class, notice of same should be filed with the superintendent of the department before the class is passed upon, that the judges may be instructed to place a reserve award, that premiums may be properly distributed in the event of the protest being sustained.

SHETLAND PONIES

5.34(173) Breeding classes. All ponies shown in the breeding classes must be duly regis-

tered with the American Shetland Pony Club, or application made in that club and recognized.

5.35(173) Judging. All ponies are to be 46 inches or under in height and are to be shown with full mane and tail. Ponies in the breeding classes (hand classes) are to be judged on a basis of 60 percent for conformation and type; 40 percent for action, way of going and manners. In the model classes ponies are to be judged on conformation and type only. Tack may or may not be used in hand classes according to exhibitor's discretion. Tack will not be used in model classes. Shoeing is optional.

5.36(173) Measurement. All ponies are subject to measurement by management.

5.37(173) Unnamed entries. Unnamed entries will not be accepted.

5.38(173) Ownership of animals. Unless otherwise specified, to be eligible for competition, whether singly or in groups, animals must be the bona fide property of and owned by the exhibitor at the time entries close. Registry or transfer certificate showing exhibitor to be the owner must be presented upon demand.

5.39(173) Group entries. Animals to compose a competitive group need not be named at the time entries are made, but must be entered in individual classes and catalog number of each animal given to ring clerk when group is shown. Sires in "get of sire" and dams in "produce of dam" classes to be named at time of making entry.

5.40(173) Age of pony. The age of each pony will be computed from the first day of January in the year in which it was foaled.

5.41(173) Call to show. No pony shall be awarded a prize unless removed from its stall and exhibited, with catalog number attached, in the show ring. Ponies not exhibited when called out by the ring steward or superintendent, unless especially excused, will be charged double for use of stalls or removed from the grounds, as the management may decide. Catalog stall cards will be furnished by the superintendent and must be tacked on the stalls where the animals are kept.

5.42(173) Champion classes. Only first and second prize winners in their respective classes shall be eligible to compete for champion and reserve champion prizes, and no second prize animal shall be entitled to rank above reserve in a champion class. All first prize animals will be required to show in champion classes unless excused by the proper officials. Exhibitors of first prize animals that fail to meet this requirement will forfeit, at the discretion of the officials, all or a portion of prizes awarded.

5.43(173) Performance classes. Ponies entered in performance classes must be shown. However, if sick or injured, they may be excused by presentation of a veterinary's certificate to the management by 12:00 noon the day the class is to be held. Ponies not showing and not officially excused will cause exhibitor to forfeit all premium money won.

5.44(173) Stake fees. All stake fees must be paid in full by 10:00 a.m. on the day shown. Ponies, to be eligible for a stake, must have been entered and shown in at least one performance class prior to the stake. They may be entered in the stake class August 1 without penalty imposed in preceding paragraph.

5.45(173) Exhibition in stall. Exhibitors must keep their stalls sufficiently open so visitors may see the stock from 8:00 a.m. to 6:00 p.m. during each day of the exhibition. All exhibitors shall decorate their stalls in an attractive manner.

5.46(173) Clean stalls. Exhibitors must keep the space in the rear of their stalls clear and clean; and all litter must be thrown where indicated by the superintendent or his assistants.

5.47(173) Alterations in stalls. No alterations in stalls permitted unless written permission of the board is given. No partitions or pens back of stalls for colts will be permitted. Exhibitors should order two stalls for mare and foal.

5.48(173) Ribbon presentation. All entries must remain in line in the show ring until ribbons have been awarded, unless otherwise ordered.

5.49(173) Protests. All protests in show horse and pony classes must be made in writing and accompanied by a deposit of $20 which will be forfeited if protest is not sustained.

5.49(1) Protest must state plainly the cause of complaint or appeal, and must be filed with the secretary within 12 hours after close of show.

5.49(2) No complaint or appeal based upon the statement that the judge or judges are incompetent will be considered by the board.

5.49(3) Where a protest is to be made against the competition of an animal in any class, notice of same should be filed with the superintendent of the department before the class is passed upon, that the judges may be instructed to place a reserve award, that premiums may be properly distributed in the event of the protest being sustained.

TEAM PULLING CONTEST

5.50(173) Stall fee. Horses may be kept on the grounds by paying a stall fee set by the fair board and published in the premium book.

5.51(173) Weighing. All competing teams will be weighed immediately before going to the pulling paddock and in the condition in which they are ready for pulling. Teams will be weighed only once. Any horse found tampered with will be barred from pulling. At the close of the contest

each day, all competing teams that win prizes will be re-examined and measured at the horse barn and all winning teams must remain until this record is completed.

5.52(173) Rest period. A rest period of at least five minutes will be allowed between each pull.

5.53(173) Weight classifications. There shall be two weight classifications, teams weighing less than 3300 pounds, and teams weighing 3300 pounds and over.

5.54(173) Pony classifications. There shall be three classifications in the pony pulling contests, ponies 44 inches and under, ponies more than 44 and not over 47 inches, ponies more than 47 and not over 50 inches.

5.55(173) Eligibility. Horses or mules, purebred, grade or unknown, are entitled to enter and may be stallions, mares or geldings.

5.56(173) Single class limitations. No horse will be permitted to pull in more than one class in any contest regardless of its weight or height.

5.57(173) Ownership of animals. Horses must have been the bona fide property of the contestant or contestants at least 30 days before the contest. Partnership or dual ownership will be permitted providing the horses were the property of the entrants 30 days before the contest. In case of a partnership or dual ownership the teams must be entered in the names of both owners.

5.58(173) Length of official pull. The official pull or distance shall be a continuous forward movement for 27½ feet. Pulls of a shorter distance shall not be used except to determine winners when two or more teams fail to pull the full distance of 27½ feet.

5.59(173) Starting. Drivers must furnish their own helpers for hitching and hooking to machine, who are their employees while participating in contest.

5.60(173) Lunging. Lunging the team into the load at the start will not be permitted.

5.61(173) Assistance. Not more than one man will be allowed to stand at the heads of the animals while they are being hitched. He may help to the extent of leading the horses or mules forward slightly until tugs and cable are taut, but must step away, leaving the animals in a standing position, before the start; but this help, if given, shall count against the driver's horsemanship.

5.62(173) Control of animals. If the animals get out of control and lunge at the start, the judges shall stop them, but said pull shall count as one of three official trials.

5.63(173) Order of tests. The first test will be with such a load as any good pulling team in the class may be expected to move. The load after the initial pull may be increased as the judges may require. A team will be given a total of three trials to move any load the full distance. In case two or more teams fail to pull the set load the full distance the teams may be placed in the order of the longest actual distance pulled.

5.64(173) Dynamometer. The apparatus used in these tests shall be a constant resistance dynamometer as designed and patented by the agricultural engineering section of the Iowa experiment station, Ames, Iowa. The point of hitch of the doubletree must not be less than 12 inches from the road surface.

5.65(173) Conditions of tests. Drivers must ride on and drive from the seat provided; in no case will they be permitted to ride or lead any horse or walk beside the team. Lines must be held reasonably taut, one in each hand, while team is pulling; slackening or "pushing on" the lines, so that they hang loose, while pair is pulling, voids pull from that point on.

5.66(173) No whips. The drivers or helpers are not permitted to carry whips or to punish the animals in any way, nor to use electric buzzers or any other device to frighten the animals at any time during the contest, whether pulling or awaiting their turn.

5.67(173) Interference. Interference from the sidelines will void that particular pull. It may be taken over.

5.68(173) Disqualification. A competent man selected by the judges must watch the teams that are awaiting their turn to pull, and if any whipping, punching, prodding or punishing of animals is observed by him, he shall report same to the judges, who may warn the offender or disqualify him from further participation in the contest; but the team may remain in if the owner selects a new driver or helper to take the place of the one disqualified.

5.69(173) Equipment. Harnesses must be furnished by the contestant and may be any type of harness or collar except that weighted collars or special weights of any kind on any part of the horse are forbidden. Bandages, boots or artificial aids of any kind will not be allowed on any horse while pulling.

5.70(173) Cross tugs. Hitching with cross tugs is prohibited.

5.71(173) Bridles. Bridles may be either open face or blind bridles, but no change therein may be made after the contest starts.

5.72(173) Broken equipment. In case any part of a harness breaks during a pull, and the team is stopped, the pull will count as one trial and the distance measured. If, however, the eveners, cable or any part of the dynamometer breaks during a pull, unless caused by lunging, the trial will not be counted against the team but the distance

traveled will be measured and can be used in determining the final rating of the team.

5.73(173) Judging and scoring. Horses and drivers are subject to the control of the judges throughout the contest period. Awards will be made on a basis of 100 percent for pulling capacity, but in event of a tie between teams the time required to cover a certain distance while exerting the maximum pull, which is taken with a stop watch, may be considered in making a final decision.

5.74(173) Qualification for championship. State championships are awarded only to teams pulling load full distance; in case of tie, time shall govern the decision.

5.75(173) Drivers. Horses may be driven by any driver designated by the owner and owners may change drivers at any time, providing such change be communicated to the judges at or before time of starting. Each driver shall continue from start to finish, unless excused by the judges. If excused, another may be designated by the owner with approval of the judges.

5.76(173) Coaching. Owners and their agents are forbidden to coach, pace, instruct or convey information to contesting drivers after the start of any pull until its conclusion, but may communicate with the drivers between test pulls.

[Filed November 20, 1972]

CHAPTER 6
CATTLE DEPARTMENT

6.1(173) 4-H club and FFA heifers. Heifers entered in the 4-H club or FFA classes may also be entered in the corresponding open classes by payment of the open entry fee for each exhibitor, and entry is made on regular open class entry blanks on or before the closing of open entries. Stall fees must also accompany entries, the same as regular open class entries. Heifers entered in the open classes, and stall fees paid, will not have additional stall fees deducted from 4-H premiums, if certified by the cattle superintendent.

6.2(173) Ownership of animals. Unless otherwise specified to be eligible for competition, whether singly or in groups, animals must be the bona fide property of and owned by the exhibitor at the time entries close.

6.2(1) Registry or transfer certificate, showing exhibitor to be the owner, must be presented upon demand.

6.2(2) Animals owned in partnership may be entered in all classes to which they are eligible, in one partner's name, but must be shown under the same ownership in each class. The entry must carry a footnote showing the actual ownership of the animal as appearing upon the herd book records.

6.3(173) Unnamed entries. Unnamed entries will not be accepted in individual classes.

6.3(1) Animals to compose a competitive group need not be named at time entries are made, but must be entered in individual classes and catalog number of each animal given to ring clerk when group is shown.

6.3(2) Sire in "get of sire" and dams in "produce of cow" classes to be named at time of making entry.

6.4(173) Bred by exhibitor. Animals shown as bred by exhibitor must be so recorded with the record association.

6.4(1) Those bought in dam cannot be shown as bred by exhibitor.

6.4(2) Animals bred by a member of a firm or partnership shall be considered as bred by the firm or partnership.

6.5(173) Bulls. Bulls 36 months old or over to be eligible to show must have dropped to his service during the 12 months preceding the show one or more living calves.

6.6(173) Eligibility of cows. Cows 42 months old or over to be eligible to show must have produced a calf carried to maturity within 18 months preceding the show.

6.7(173) Eligibility of calves. In the beef breeds no calf dropped after March 31 of the current year shall be eligible to compete in any class (this does not apply to the Aberdeen Angus division). In the dairy breeds no calf dropped after February 28 of the current year shall be eligible to compete in any class.

6.8(173) Call to show. Exhibitors are expected to obey the marshal promptly in producing their stock when instructed to do so.

6.8(1) Stock must be in the ring within ten minutes after the class is called, and it will be taken for granted that any person failing to comply with this rule is not a competitor for the premiums offered.

6.8(2) Exhibitors must show their animals at such times and places as directed, and furnish such information concerning their stock as may be required by the superintendent.

6.8(3) In case of refusal to obey this rule any or all premiums will be forfeited and the exhibitor barred from showing.

6.8(4) No animal will be awarded a prize unless removed from its stall and exhibited, with catalog number attached, in the show ring.

6.8(5) Animals not exhibited when called out by the ring steward or superintendent, unless especially excused, will be charged double for the use of stalls or be removed from the grounds, as the management may decide.

6.8(6) Catalog stall cards will be furnished by the superintendent and must be displayed above the stalls where the animals are kept.

6.9(173) Milking out. In the milking shorthorn, red poll and all dairy cattle classes milking out of cow classes in the ring may be required.

6.10(173) Exhibition in stall. Exhibitors must keep their stalls open and stock uncovered from 8:00 a.m. to 6:00 p.m. during each day of exhibition.

6.11(173) Clean stalls. Exhibitors must keep the space in the rear of their stalls clear and clean; all litter must be thrown where indicated by the superintendent of the department.

6.12(173) Iowa owned cattle. An animal must be owned in its entirety by Iowa breeders and such ownership must be shown on the certificate of registry as of date of exhibition in Iowa special classes.

6.13(173) Livestock tie out. Livestock tie out will be provided in the livestock exhibitor campground area. No livestock tie out will be permitted on the fairgrounds proper, including areas near or adjacent to any of the buildings or fences surrounding the fairgrounds.

6.14(173) Physical defects. Any artificial means of removing or remedying physical defects or conformation in exhibition animals, such as lifting or filling under the skin, will be considered as fraud and deception. All animals giving evidence of such treatment will be barred from exhibition at the state fair and at all fairs holding membership in the International Association of Fairs and Expositions.

6.15(173) Dairy breeds. The dates for both bulls and females are shown in each class. All dates are inclusive.

6.16(173) Get of sire. Get of sire group to consist of four animals either sex, the get of the sire, at least one that is two years of age or older.

6.16(1) Not more than two bulls can be shown.

6.16(2) Sire must be named.

6.16(3) Each exhibitor is limited to one entry sired by the same bull.

6.16(4) Get need not be owned by exhibitor.

6.17(173) Junior get of sire. Junior get of sire group to consist of four animals under two years of age, none of which have freshened, either sex, the get of one sire, not more than two can be bulls.

6.17(1) Must be bred by exhibitor.

6.17(2) Sire must be named and each exhibitor is limited to one entry sired by the same bull.

6.17(3) Junior get need not be owned by exhibitor.

6.18(173) Produce of dam. Group to consist of two animals any age, either sex the produce of the cow.

6.18(1) The dam must be named.

6.18(2) Each exhibitor is limited to one entry from the same dam.

6.19(173) Dairy herd. Group to consist of four cows over two years that have all calved at least once, all to be owned by exhibitor. Each exhibitor is limited to one entry.

6.20(173) Best three females. Any age. Must be bred and owned by exhibitor. Each exhibitor is limited to one entry.

6.21(173) Iowa district herds. District herd shall consist of eight animals, one bull any age, two females, two years old or over, three females under two years and two other females any age.

6.21(1) All animals shall be owned by persons within an established district as set up by the state breed association.

6.21(2) Cattle must be owned by not less than three exhibitors with no exhibitor furnishing more than three animals, and all animals in which a breeder owns a partnership interest will be counted in these three.

6.21(3) The owners of animals making up the district herd must have exhibited cattle at their respective breed shows. The individual animals need not have been exhibited there.

6.21(4) All animals entered in the district herd must be entered and shown in the open individual classes and must be exhibited under their respective owners' names. Such entries will be stalled with the rest of the exhibitor's herd and stall rent paid by him. District groups are invited and encouraged to enter additional cattle in the open classes but entries must be made in the individual exhibitor's name.

6.21(5) The president or secretary of the district association must make entry of district herds with the secretary on the date designated by the fair board and must name the person who will be in charge at the state fair, which person shall name the animals that shall constitute the herd after arrival at the fair.

6.22(173) Special prizes for herdsmen. Special prizes will be awarded in this department to the herdsmen. A committee named by the superintendent of the department will make inspections to determine the award, the period covered for inspection to be designated by the Iowa state fair board. Judges will take into consideration the following:

6.22(1) Orderliness and cleanliness of stalls and animals.

6.22(2) Promptness in having stalls cleaned by 8:00 a.m.

6.22(3) Systematic and neat arrangements of traps, feed and forage.

6.22(4) Personal appearance of herdsmen and helpers.

6.22(5) Observance of all rules.

6.22(6) Co-operation with officials in promoting the show and showings.

[Filed November 20, 1972]

CHAPTER 7
SWINE DEPARTMENT

7.1(173) 4-H club and FFA pigs. Breeding class pigs entered in the 4-H club or FFA classes may also be entered in the corresponding open classes by payment of an entry fee for each exhibitor, and entry is made on regular open class entry blanks on or before the closing of open entries.

7.1(1) Pen fees must also accompany entries, the same as regular open class entries.

7.1(2) Pigs entered in the open classes, and pen fees paid, will not have additional pen fees deducted from 4-H premiums, if certified by the swine superintendent.

7.1(3) Market pigs can only be entered in the open if they are placed in the blue award group and payment of open class entry fee made with the 4-H swine superintendent at the time designated by the fair board.

7.2(173) Ownership of animals. Unless otherwise specified, to be eligible for competition, whether singly or in groups, animals must be the bona fide property of and owned by the exhibitor on or before July 30 of the current year. Registry or transfer certificate showing the exhibitor to be the owner must be presented upon demand.

7.3(173) Limitations within class. Individuals or firms will be permitted to show not to exceed two animals in each class.

7.4(173) Purebred. No animal may be entered or exhibited in more than one breed.

7.5(173) Unnamed entries. Unnamed entries will not be accepted in the individual classes.

7.6(173) Bred by exhibitor. Animals shown as bred by exhibitor must be so recorded with the record association. Those bought in dam cannot be shown as bred by exhibitor.

7.7(173) Pedigrees. No animal can be entered or exhibited as purebred unless the same has been recorded in the recognized books of record for its respective breed, and exhibitors must produce certificates of registry at the request of the superintendent in charge any time during the fair.

7.8(173) Catalog number. No animal will be passed upon by the judge or awarded a premium whose attendant does not carry and show proper catalog number for class exhibiting.

7.9(173) Call to show. Animals not exhibited when called out by the ring steward or superintendent, unless especially excused, will be charged double for the use of pens or removed from the grounds, as the management may decide.

7.10(173) Clean stalls. Each exhibitor will be required to furnish feed and water troughs and must store all feed and equipment in feed aisles between pens. Pens must be cleaned before 7:00 a.m. each day, and all litter deposited at a place to be designated by the superintendent of the department, but under no consideration will litter be permitted to be deposited on either west, north or east outside fronts of the swine barn.

7.11(173) Eligibility of sows. Mature and senior yearling sows shall have farrowed and suckled a litter. Junior yearling sows shall have farrowed and suckled a litter or show ample evidence of carrying a litter at time of exhibition.

7.12(173) Standard swine classification. Ages for swine classification will be as set by the fair board.

MARKET BARROWS

7.13(173) Farrowing date. Barrows must have been farrowed on or after date set by the fair board.

7.14(173) Limitation within classes. Exhibitors will be permitted to show not to exceed two individuals or two groups in their respective classes.

7.15(173) Purebred. Only purebred barrows may be exhibited in the breed classes, and the names and registry numbers of their sire and dam must be given on the entry blank.

7.16(173) Crossbreeds. Crossbred and grade barrows must have been sired by a registered boar whose name and registration number, with the name and address of his owner, must be given on the entry blank.

7.17(173) Championships. First prize barrows and pens within each breed will compete for breed championships. First prize barrows and pens will compete for weight championships. Weight champions will compete for grand championships.

7.18(173) 4-H and FFA market pigs. All 4-H club and FFA market pigs placing in a blue ribbon group may compete in their corresponding open market barrow classes, providing they are eligible under the rules as to weight, pedigree, etc. Entry must be made with the superintendent of the swine department on or before the date set by the fair board, accompanied by the entry fee.

7.19(173) General rules. General rules governing entries in the regular swine classes will

apply also to market barrows. In case the general rules conflict with the special rules, the latter shall govern.

7.20(173) Competition. Competition limited to residents of Iowa.

[Filed November 20, 1972]

CHAPTER 8
SHEEP DEPARTMENT

8.1(173) 4-H club and FFA lambs. Breeding class lambs entered in the 4-H club or FFA classes may also be entered in the corresponding open classes by payment of an open entry fee for each exhibitor, and entry is made on regular open class entry blanks on or before the closing of open entries.

8.1(1) Pen fees must also accompany entries, the same as regular open class entries.

8.1(2) Lambs entered in the open classes, and pen fees paid, will not have additional pen fees deducted from 4-H premiums, if so certified by the sheep superintendent.

8.2(173) Ownership of animals. Unless otherwise specified, to be eligible for competition, whether singly or in groups, animals must have been owned by one individual or previous existing firm on date of entry.

8.2(1) The date stamp of the registry association will determine date of ownership.

8.2(2) Registry certificate or transfer, showing exhibitor to be the owner, must be presented upon demand.

8.3(173) Limitation within classes. Individuals or firms may make as many as four entries in the individual classes but only two moneys will be paid. Only two entries per exhibitor will be allowed in group classes and may place for two moneys.

8.4(173) Competitive group. Animals to compose a competitive group need not be named when making the entries, but must be entered in individual classes and catalog number for each animal given to ring clerk when group is shown.

8.5(173) Association identification. All exhibition animals must be recorded and wear the association ear tag at the time of showing. Failure on the part of an exhibitor to furnish sufficient evidence that his sheep are eligible under this rule, to the satisfaction of the superintendent or judge, will disqualify all animals whose breeding is held in doubt.

8.6(173) Bred by exhibitor. Animals shown as bred by exhibitor must be so recorded with the record association. Those bought in dam cannot be shown as bred by exhibitor.

8.7(173) Graded flock. Graded flock shall consist of one ram, any age, one ewe two years or over, one ewe one year under two and one ewe lamb under one year.

8.8(173) Breeder's young flock. Breeder's young flock shall consist of one ram under two years, two ewes, one year yet under two and two ewes, under one year, all bred and owned by exhibitor.

8.9(173) Ages of sheep. September 1 is to be used as the base date for computing ages of sheep in all classes but only those animals having lamb teeth will be eligible to show in lamb classes.

8.10(173) Pair of lambs. Pair of lambs shall consist of one ram, one ewe.

8.11(173) Pen of four lambs. Pen of four lambs shall include both sexes.

8.12(173) Flock. Flock shall consist of one ram, yearling or lamb; two ewes, one year yet under two, and two ewes, lambs.

8.13(173) Special groups. Each of the following groups—pair of lambs, pen of four lambs, pen of three ram lambs and pen of three ewe lambs—in Corriedale, Dorset, Hampshire and Suffolk breeds may consist of senior and junior lambs.

8.14(173) Fleece length. All sheep and lambs (except Corriedales) to be eligible for open class competition must carry fleece which does not exceed three-fourths inch in length on any area—personnel of the Iowa weights and measures division, department of agriculture to officiate.

INTERNATIONAL CHAMPIONSHIP SHEEP SHEARING CONTEST

8.15(173) Entries. Entries in this contest must be made with the sheep superintendent.

8.16(173) Entry fee. An entry fee is required for each individual entry and for each team entry, which must accompany the entry.

8.17(173) Contestants. This contest is open to the world.

8.18(173) Machines. Power machines will be furnished, but hand pieces must be furnished by the contestant.

[Filed November 20, 1972]

CHAPTER 9
DAIRY GOAT DEPARTMENT

9.1(173) Entry blanks. Entries must be made on regulation entry blanks, to be filled out, signed by the exhibitor and filed in the office of the secretary.

9.2(173) Entry fee. Entry fee must accompany entries. No refunds of fees will be made unless cancellation is received before August 1.

9.3(173) Age of goats. The base date for computing age of goats in all classes will be date of show.

9.4(173) Ownership of animals. Unless otherwise specified, to be eligible for competition in single and group classes, animals must have been owned by one individual or previously existing firm on date of entry. Registry certificate or transfer, showing exhibitor to be the owner, must be presented to the steward, or written permission to exhibit goat if exhibited by other than owner.

9.5(173) Limitation within classes. Individuals or firms may make as many entries as they wish in each individual class, but will be limited to placing two animals. Only one entry per exhibitor in a group class.

9.6(173) Unnamed entries. Unnamed entries will not be accepted.

9.7(173) Group entries. Animals to compose a group need not be named on entry blank but each one must be entered in individual classes.

9.8(173) Catalog number. Catalog number of each animal must be given upon a printed form to be secured from the superintendent's office and handed to the ring clerk before the show or upon entry of the group into the show ring.

9.9(173) Association identification. All animals must be recorded and tattooed in accordance with rules of their respective national registry association.

9.10(173) Collars. All goats must be collared or chained.

9.11(173) Milking does. The milking does must be milked dry before the show at a time determined in advance. Each goat must be checked to see that it has been milked out, and any milking animal showing overdistention of udder due to failure of the exhibitor to have her milked out is subject to disqualification.

9.12(173) Entries. Out of state goats may be entered.

[Filed November 20, 1972]

CHAPTER 10
POULTRY DEPARTMENT

10.1(173) Entry tags. Entry tags will not be mailed after date designated by the fair board but will be retained in the secretary's office on the grounds, where they may be called for.

10.2(173) Fees. All fees for coops must in all cases accompany the entries.

10.3(173) Markings. All birds must be marked by numbered leg bands and the number must appear upon the entry blanks and shipping tags.

10.4(173) Entries. Entries may be made by mail or in person, but in all cases the number of birds, name of exhibitor and band number must be plainly stated on the entry blank.

10.4(1) Additional entry blanks will be furnished by the secretary upon request.

10.4(2) Any misrepresentation made by the exhibitors in regard to their stock will forfeit their rights and privileges.

10.4(3) Shipping tags will be mailed to all exhibitors.

10.4(4) Tags must be attached to the coops in which the birds are shipped.

10.4(5) All expenses for transportation must be prepaid by the owner.

10.5(173) Coops. All birds will be cooped in coops furnished by the management.

10.6(173) Feed. Feed for poultry will be furnished by the management and competent assistants will have charge of the feeding.

10.7(173) Substitutions. Substitutions will be allowed but not additional entries.

10.8(173) American Standard of Perfection. Birds will be judged by the comparison method, using the American Standard of Perfection as a guide.

10.9(173) Eligibility of exhibitors. All exhibitors must be actual breeders of all the varieties they show, except hatcheries, which may exhibit birds from flocks under their supervision, as per American Poultry Association rules.

10.10(173) Awards. In exhibition poultry, first prize will be awarded if merited in the opinion of the judge. Any prize may be withheld at the discretion of the judge.

10.11(173) Handling of birds. No one except officials of the show may handle or remove birds from the coops.

10.12(173) Exhibition poultry and bantams. Exhibition poultry and bantams will be shown by breeds.

10.13(173) Limitation within classes. Every exhibitor may enter no more than three birds per class.

10.14(173) Responsibility of fair. The utmost care will be used in handling all birds, but the management will not be responsible for loss through fire, theft, accident or any other medium. Policing will be in effect at all times.

[Filed November 20, 1972]

CHAPTER 11
PIGEON DEPARTMENT

11.1(173) Entry blank. All entries must be on the official entry blank, and filed with the secretary on the date determined by the fair board and printed in the premium list. All fees must accompany the entries.

11.2(173) Substitutions. Substitutions will be allowed but no additional entries.

11.3(173) Banding of birds. All birds must be seamless banded and the number must appear upon the entry blanks.

11.4(173) Expenses for transportation. All expenses for transportation of birds shipped to the fair must be prepaid by the owner.

11.5(173) Coops. All birds will be displayed in coops provided by the fair.

11.6(173) Feed. Feed for pigeons will be furnished by the management and competent assistants will have charge of the feeding.

11.7(173) Comparison method. Birds will be judged by the comparison method, using the standard published by the National Pigeon Association or the standard approved by pigeon specialty clubs.

11.8(173) Eligibility of exhibitors. All exhibitors must be actual breeders of all the varieties they show.

11.9(173) Handling of birds. No one except officials of the show may handle or remove birds from the coops.

11.10(173) Responsibility of fair. The utmost care will be used in handling all birds, but the management will not be responsible for loss through fire, theft, accident or any other medium. Policing will be in effect at all times.

11.11(173) Varieties. All varieties of pigeons may be shown (yearling classes in Carneau Kings and French Mondaines).

11.12(173) Color classes. Birds of a variety will be shown in one color class unless there are six or more of a color shown. Then a separate color class will be set up.

[Filed November 20, 1972]

CHAPTER 12
RABBIT DEPARTMENT

12.1(173) Entry fees. All entry fees must accompany entries or entry will not be accepted.

12.2(173) Responsibility of fair. The fair board will not be responsible in case of fire or theft, accidents or providential destruction. However, every precaution will be taken to eliminate any danger of mistakes in the showroom and return of stock.

12.3(173) Disease. No animal showing symptoms of disease of any kind will be admitted to the showroom. Any animal in an unacceptable condition will be given proper care and returned to the exhibitor.

12.4(173) Earmarks. All stock must be permanently and legibly earmarked.

12.5(173) Class size. There must be five or more of a breed shown in order to be eligible for special prizes for best of breed or best opposite sex offered by the fair board.

12.6(173) Entries. All specials open to the world unless otherwise stated.

12.7(173) Ribbons. Ribbons will be awarded to fifth place.

12.8(173) Display award. An exhibitor must have four entries to be eligible for display award.

12.9(173) Display points. Display points to count as follows: First, six; second, four; third, three; fourth, two; fifth, one; multiplied by the number in class.

12.10(173) Substitution. No substitute will be allowed except in the same class, breed and sex.

12.11(173) Fur classes. Fur classes provided for: Normal colored, normal white and rex fur.

12.12(173) Entries. All specimens may compete only in classes entered.

12.13(173) Rex fur. No rabbit may be entered in fur or rex fur unless entered in regular class.

12.14(173) Breeding. Absolutely no breeding allowed in showroom.

12.15(173) Ownership. All rabbits must be entered in the name of the bona fide owner.

12.16(173) Interference during judging. Any person interfering with the judge or judging in any way will have his exhibits disqualified, without refund of entry fees or any premium awarded previous to the disqualification.

12.17(173) Natural exhibition. All exhibits must be shown in their natural condition. Any violation of this rule shall exclude such specimen from competition and result in the withholding of any premium award.

[Filed November 20, 1972]

CHAPTER 13
AGRICULTURAL DEPARTMENT

13.1(173) Entries. Entries in this department are limited to residents of Iowa.

13.1(1) All products must have been grown within the state by the exhibitor.

13.1(2) Affidavit to that effect must be given when demanded by the superintendent.

13.2(173) Limitations within classes. Exhibitors in this department will be limited to one entry in each class, and only one entry can be made from any one farm.

13.3(173) Current products. All entries in this department must be the product of the current year, except as otherwise provided.

13.3(1) All samples of corn must have been grown in Iowa by the exhibitor during the previous year.

13.3(2) The judges are instructed to reject all entries which show any indication of not having been produced during the previous year.

13.3(3) The same sample of corn cannot be exhibited in more than one class.

13.4(173) Natural samples. No ear of corn in any sample may have more than one percent of its grains missing. All samples must be in their natural condition at both butts and tips of ears.

13.5(173) Clipped oats and barley. Clipped oats and barley will be excluded from competition.

13.6(173) Arrangements of exhibits. The arrangements of exhibits will be directed by the supervisor and will be classified wherever possible.

13.7(173) Changing of exhibits. Exhibitors must not change their exhibits, or any part thereof, after the hour designated for the same to be in place; a violation of this rule to work the forfeiture of any and all premiums won in this department by said exhibitor.

13.8(173) Division of state. For the exhibit of field corn and individual farm exhibits, the state is divided into three districts, videlicet: Northern, central and southern.

INDIVIDUAL FARM EXHIBITS

13.9(173) Farm products. The products exhibited in this division must have been grown on the individual farms exhibiting and the farm must be entered in the proper district. Affidavit as to the facts must be made by the exhibitor when demanded by the superintendent or judge.

13.10(173) Premium division. The amount of money to be divided pro rata according to the score in each district will be on a basis decided by the fair board for each exhibit that qualifies. If not more than two exhibits qualify in a district, the maximum amount awarded each will not be more than comparable scores in the district having the most entries.

13.11(173) Eligibility for premiums. An exhibit must score 60 points or better to be eligible for premium money. The amount of money pro rated in a district will be based on the number of individual farm exhibits competing from that district and will be pro rated on total scores of the exhibits within the district.

13.12(173) Limitation within classes. Samples exhibited in this division will be barred from showing in other classes. All decorations considered in scoring must be made from agricultural products.

13.13(173) Size of booth. The size of booth allotted to each individual farm exhibit will be as follows: Eight feet wide, seven feet high above shelving and six feet deep. The dividing partitions slope from six feet at the bottom to one foot at the top. This will give for exhibition purposes the back wall eight by seven feet, and as much of the partition wall as may be deemed advisable to use. In addition to this wall space, each booth is supplied with four 12-inch shelves.

13.14(173) Educational exhibit. This exhibit is to be educational and must consist of products produced upon the individual farm exhibiting, keeping in mind the basis of judging as shown by the score card.

13.15(173) Best maintained individual farm booths. Best maintained individual farm booth will be determined by the condition in which the booth as a whole is kept for the duration of the fair, particular attention being paid to perishable products, which must be replaced with fresh specimens when starting to deteriorate. All or part of the premium money may be withheld on any booth which is not maintained in a neat, attractive condition.

13.16(173) Judging scale. The following scale of points will be used in judging the individual farm exhibits:

	Points
Quality of products	30
Over-all arrangement	30
Educational value	20
Adaptability of products	20
Total	100

[November 20, 1972]

CHAPTER 14
HORTICULTURAL DEPARTMENT

14.1(173) Entries. Entries in this department are limited to residents of Iowa, and all products must have been grown within the state, by the exhibitor. Affidavit to this effect must be given when demanded by the superintendent.

14.2(173) Division of state. The state is divided into three districts for classifying apples. Fruits from one district cannot compete for premiums in other districts.

14.3(173) Single entry. Only one entry can be made in each class by an exhibitor or from the same garden or orchard.

14.4(173) Duplicates. Duplicates must be provided for all collections, except district collections.

14.5(173) Optional classes. To make entry in the optional classes, list the correct optional class number on the entry blank, as many times as there are varieties to be shown, following each class number by the name of a variety. This permits the exhibitor to win more than one premium in optional classes on worthy varieties.

14.6(173) Replacement of specimens. Exhibitors may replace with fresh specimens any

exhibits that show a tendency to spot or decay at any time during the fair, except when the judge is working on the class in which they are entered. The superintendent shall have the right to remove from exhibition any exhibit, or any part thereof, which is unsightly, or which needs to be removed for the space required by new classes.

14.7(173) Horticultural information. As the products exhibited are designed to be educational, it is expected that exhibitors will co-operate with the management by giving all possible information to visitors. This is the place to learn more about varieties and the growing, packing and marketing of horticultural crops.

14.8(173) Arrangement of exhibits. The arrangement of exhibits will be directed by the supervisor and will be classified wherever possible.

14.9(173) Plates. In all cases, a plate shall consist of the following number of specimens: Apples, five; crab apples, eight; pears, five; peaches, five; grapes, four bunches; plums, twelve; strawberries, one level pint box. Any plate that does not contain the correct number of specimens will be excluded from competition.

14.10(173) Sweepstake. Where two or more varieties are listed together in one class, this means that one variety or all have not been exhibited the past two or more years. Judge as a sweepstake class.

14.11(173) Accurate name. Accuracy of name is required and any variety incorrectly named may, at the discretion of the management, be reclassified or excluded from competition.

14.12(173) Premiums. Judges may withhold premiums from unworthy exhibits.

14.13(173) Handling of exhibits. Exhibitors shall not handle any exhibits or material, other than their own, unless permission is secured from the superintendent.

[Filed November 20, 1972]

CHAPTER 15
FLORICULTURAL DEPARTMENT

15.1(173) Entries. Except where otherwise stated, entries are open to individuals, garden clubs and other groups.

15.2(173) Restricted classes. The management reserves the right to reject entries in restricted classes from exhibitors who have entered these classes previously and whose exhibits have not been of suitable quality.

15.3(173) Limitations within classes. Individuals, groups or clubs are limited to one entry per class unless otherwise specified. Any premium may be withheld at the discretion of the judge.

15.4(173) Opening of exhibits. Exhibits must be in place by 10:00 a.m. on the day specified except gardens, which must be in place and ready by 6:00 p.m. the evening preceding the fair.

15.5(173) Registration fee. Each exhibitor in this department, as a requirement for entry, will pay a registration fee (office charge).

15.6(173) Plant material. Some plant material must be used in all classes, which may include flowers, leaves, fruits, vegetables, seed pods and nuts. Unless otherwise specified, plant materials need not have been grown by the exhibitor. Foliage may be used in all classes unless otherwise stated.

15.7(173) Replacement of materials. All exhibits must be kept in good condition throughout the show. Wilted material must be replaced each day. Nothing may be removed from an exhibit without the superintendent's permission.

15.8(173) Removal of exhibits. The superintendent shall have the right to remove or exclude from the hall, at any time, any exhibit or part thereof which is unsightly.

15.9(173) Containers and accessories. Same containers and accessories cannot be used twice in succession in the same group of arrangements.

15.10(173) Markings. All containers, etc., should be well marked underneath. The management will use diligence to insure safety of exhibits but in no case will they be responsible for any loss or damage that may occur.

15.11(173) Coloring. Where color is mentioned, unless the exact shade is specified, all shades or varieties coming under the major color compete together. In mixed colors the one predominating shall classify.

15.12(173) Large arrangement. A large arrangement shall be at least 24 inches high.

15.13(173) Written comments. In some classes the judge will be requested to make comments which will be written and must remain in place during the show. Oral judging will be made after each new show.

15.14(173) Open competition. Garden clubs and individuals may enter the gladiolus, rose, dahlia and cactus shows. Individuals may enter the specimen classes in these divisions.

[Filed November 20, 1972]

CHAPTER 16
APIARY DEPARTMENT

16.1(173) Entries. Entries limited to residents of Iowa.

16.2(173) Limitations within class. Exhibitors are limited to one entry in each class.

16.3(173) Arrangement of exhibits. The arrangement of exhibits will be directed by the

superintendent and will be classified wherever possible.

16.4(173) Premium. Any premium may be withheld at the discretion of the judge.

16.5(173) Current year exhibits. All honey and beeswax exhibits must be the product of the exhibitor's apiary this season with the exception of those classes which are amber honey.

16.6(173) Ventilation for bees. Exhibitors must provide adequate ventilation for live bees in observation hives.

16.7(173) Classifications. Exhibits will be disqualified if they do not comply with the classifications.

16.8(173) Sale of products. Apiary products cannot be sold during the fair. Exhibitors wishing to sell their products must pay the regular concession fees.

[Filed November 20, 1972]

CHAPTER 17
CULINARY DEPARTMENT

17.1(173) Limitations within department. Entries in this department limited to adults, residents of Iowa. Girls and boys ten to fourteen can enter in the beginners special division only.

17.2(173) Work of homemaker. All entries in this department must be the product of the exhibitor and made in the home kitchen, and is not used as a means of livelihood. All products exhibited in jars etc., must have been canned since January 1 of the previous year. All articles that do not comply with this rule will be disqualified.

17.3(173) Limitation within classes. Exhibitors are limited to one entry in each class. Not more than ten cakes may be entered by any one exhibitor.

17.4(173) Exhibit materials. Unless otherwise specified the use of pans, plates, trays, mirrors, paper doilies, wax paper etc., on or in which to exhibit bread, cake, cookies and doughnuts is prohibited. The management suggests all baked articles be placed on heavy corrugated boards covered with plain white paper one inch larger than pan in which product was baked.

17.5(173) Canned products. Canned products should be displayed in regulation pint or quart jars. Two-quart and one-half pint jars, tall slender jars or bottles are not acceptable. Jelly must be entered in regular jelly glass.

17.6(173) Premiums. Any premium may be withheld at the discretion of the judge.

17.7(173) Display case. Exhibitors will not be permitted to enter the display case.

17.8(173) Responsibility of fair. The management will use diligence to insure the safety of articles after their arrival and placement, but in no case will they be responsible for any loss or damage that may occur.

17.9(173) Wrappings. Except on popcorn balls, taffy, peanut brittle and butterscotch candy, wrapping must be removed from all articles before they are delivered to the superintendent.

17.10(173) Arrangement on plate. Cookies, doughnuts and candy should be arranged on double paper plates.

[Filed November 20, 1972]

CHAPTER 18
TEXTILE DEPARTMENT

18.1(173) Limitations within department. Entries in this department will be limited to residents of Iowa.

18.2(173) Limitations within classes. Exhibitors are limited to one entry in each class, except in the class "work other than named"

18.3(173) Premiums. Any premium may be withheld at the discretion of the judge.

18.4(173) No professionals. Those who teach or sell their work shall be considered professionals and cannot exhibit in any class. This rule to apply throughout the department.

18.5(173) Judging. All textiles, including quilts and rugs, will be judged by the following score: General appearance, 30 percent; newness of design and material, 30 percent; suitability to occasion, ten percent; individuality, ten percent; neatness, 20 percent.

[Filed November 20, 1972]

CHAPTER 19
IOWA ART EXHIBIT

19.1(173) New Iowa work. Only artists living in Iowa are eligible. No work previously entered in the art exhibit is eligible. Entries must have been done within the past two years.

19.2(173) Delivery of entries. Exhibits must be delivered or shipped (charges prepaid) to the secretary's office in the administration building at the Iowa state fairgrounds, Des Moines, Iowa.

19.3(173) Framing. All paintings must be framed. Water colors, prints and drawings must be matted and completely covered with acetate. All work must be ready to hang. Sculpture must be on a suitable, solid base, wired or have other hanging arrangement.

19.4(173) Limitation within classes. An exhibitor will be awarded but one premium in any class.

19.5(173) Purchase prize. An exhibitor may receive the first premium in any regular class only twice. An artist who has won such premium

may enter a work in the same class for a "purchase prize" only. If a work is for sale, the tag should be plainly marked "for purchase prize". Any artist exhibiting is eligible for this prize.

19.6(173) Limitation within classes. Each exhibitor may enter no more than three entries in each division and no more than two in one class. All entries are subject to jury selection. Only those accepted will be displayed.

19.7(173) Medals. First, second, third and fourth prize winners in each class will be awarded medals.

19.8(173) Weight. No single piece of sculpture may weigh more than 150 pounds.

19.9(173) Transportation of entries. Exhibitors who will be unable to call for their exhibits the last day of the fair must have them packed so they can be returned by express collect, otherwise they will be left at the secretary's office at the fairgrounds to be called for. All Des Moines entries must be called for, preferably in the following week.

19.10(173) Subject matter. The artist is unrestricted as to subject matter, and premiums will be awarded by the judge solely on the basis of artistic excellence.

PHOTOGRAPHIC SALON

19.11(173) Open competition. Entries open to the world.

19.12(173) Requirements for prints. Color prints may be made by the entrant or by a commercial laboratory.

19.12(1) All black and white prints must be made by the entrant.

19.12(2) For all classes the entrant must have composed and exposed the picture.

19.12(3) Prints may be made by any photographic process in black and white, toned or full color media.

19.12(4) Prints made by manual technique such as oil tinting will not be accepted except in specified classes.

19.12(5) Prints must be framed or mounted and ready to hang.

19.12(6) Any size is permissible.

19.12(7) Prints may or may not be covered with acetate.

19.12(8) The use of glass is prohibited.

19.13(173) Delivery of entries. Photos must be delivered or shipped, charges prepaid, to the secretary's office in the administration building at the fairgrounds, Des Moines, Iowa.

19.14(173) Judgment of entries. The judge will pass on all photos entered, but only those accepted will be hung.

19.15(173) Premiums. The judge will not award premiums to unworthy exhibits. It is the intention of the management that no premium or distinction of any kind shall be given to exhibits that are not deserving.

19.16(173) Ribbons. First, second and third prize winners in each class will be awarded ribbons. All prints hung will be awarded the Iowa state fair salon label.

[Filed November 20, 1972]

CHAPTER 20
IOWA HERITAGE CONTESTS

RURAL FAMILY LIVING

20.1(173) Application. Counties make application to exhibit to extension service, Iowa state university, Ames, Iowa.

20.2(173) Selection of counties. A committee will determine the 18 counties selected to exhibit, in an effort to have all major phases of the year's program on display. These counties will be notified of their selection.

20.3(173) Exhibits. Each exhibit must represent a part of the home economics program offered through the extension service of Iowa state university or women's activities in co-operation with county farm bureaus.

20.4(173) Responsibility of counties. The county will be responsible for having exhibit in place on designated time and for general upkeep of the booth during the entire fair.

20.5(173) Upkeep of exhibit. Each county must have an informed person, other than the county extension home economist, responsible for the exhibit during the entire fair.

20.6(173) Division of premium moneys. The amount of money will be divided pro rata for each exhibit that qualifies in accordance with information supplied giving itemized list of expenses for the exhibit.

FARMERS AND AMATEUR HORSESHOE PITCHING TOURNAMENT

20.7(173) Entries. Contestants entering the tournament must report to the manager of the tournament at the fairgrounds horseshoe courts at the time set by the fair board and printed in the premium list.

20.8(173) Date. All games will be played on the fairgrounds horseshoe courts at the time set by the fair board and printed in the premium list.

20.9(173) Rules. The rules of the National Horseshoe Pitchers' Association will govern competition. The officials shall decide any points which are not covered by the rules or where such rules do not apply.

20.10(173) Divisions. Any Iowa resident who is a member of the State Horseshoe Pitchers'

Association may compete in the several flights of tournaments conducted under the Hawkeye Association rules. The junior division is limited to Iowa boys under 18. The farmers tournament is limited to farmers living in Iowa.

20.11(173) Availability of courts. The tournament courts will be available for use Thursday noon, the seventh day of fair, and from 8:00 a.m. to 5:00 p.m. from Friday through Sunday, the last day of fair.

20.12(173) Fees. There will be no entry fee for the junior and farmers tournaments. The Iowa Hawkeye Horseshoe Pitchers' Association sets the entry fee for its contests.

20.13(173) Classes. The contestants in each tournament will pitch 100 shoes for points to qualify for the finals of each division. The finals of the junior division shall consist of 12 players; farmers division, six players. The finals of the Hawkeye State Association brackets will be divided and played as follows:

Class A—twelve players, state official championship
Class B—six players
Class C—six players
Class D—six players
Class E—six players
Class F—six players

20.14(173) Trophies. Trophies will be awarded to first place winners in farmers, junior, ladies divisions and in classes A, B and C of the Hawkeye Association Tournament; ribbons on all placings in each class.

OLD FIDDLERS' CONTEST

20.15(173) Location and time. The location and time of the contest will be as set by the Iowa state fair board and printed in the premium list.

20.16(173) Music. All music played must be old-time music in the general acceptance of the term, and must be played by ear or from memory. In other words, note playing is barred.

20.17(173) Program. Position on the program will be decided by number.

20.18(173) Accompanist. One accompanist is allowed, to be furnished by the contestant. Electrified instruments will not be allowed in contest playing.

20.19(173) Open competition. Open to any person, any age. Out of state contestants are welcome.

20.20(173) Age groups. Three age groups to compete, under 30 years of age, 30 to 50 years of age and over 50 years of age.

20.21(173) Time allowed. Ten minutes' time will be allowed each contestant and he may play as many selections as he wishes, within the time limit. Ties will be played off on a three tune basis.

[Filed November 20, 1972]

CHAPTER 21
VOCATIONAL AGRICULTURE AND FFA DEPARTMENT

GENERAL RULES

21.1(173) Entries. Entries in this department are open to students who are regularly enrolled in Iowa vocational agriculture departments or who are active members of the Iowa Association of Future Farmers of America and are under 21 years of age on the opening day of the last previous national FFA convention.

21.2(173) Compliance with rules. Exhibitors failing to comply with any of the rules are subject to all premium cancellations.

21.3(173) Closing of entries. Entries in this department close one month preceding opening date of fair.

SPECIAL ENTRY INFORMATION

21.4(173) Entry summary. One vo ag-FFA entry summary must be submitted for each FFA member or vo ag student who is entering livestock signed by the exhibitor and certified by his vo ag instructor.

21.5(173) Entry card. One entry card must be filled out by the exhibitor for each individual and group entered in each class he is entering at the fair.

21.6(173) School group. One vo ag-FFA entry card must be filled out for each school group plus an extra summary indicating all of the school chapter group to be shown.

21.7(173) Registration. All animals entered in the vo ag-FFA purebred classes must be registered as individuals in the name of the exhibitor or in partnership with parent or guardian. The registration certificate must be presented before showing when called for by the superintendent.

21.8(173) Pen rent. Stall and pen rent must be paid at the time entries are made or entries will not be accepted.

21.9(173) Illness. In case of illness an exhibitor may substitute another FFA member or vo ag student to show his entry, or an exhibitor showing two entries at one time may have another member assist him. The substitutes and assistants must be approved by the supervisor of exhibits in the department. A member must take entire charge and care of the project in the show ring, exhibiting the animal or animals without aid.

VO AG-FFA BEEF DEPARTMENT

21.10(173) Limitation within department. Each exhibitor may show not more than eight breeding heifers, one of their vo ag-FFA nonproduce of beef, and one of their vo ag-FFA pro-

duce of beef in the dressed beef entries. A separate entry blank must be used by each exhibitor—listing all animals entered.

21.11(173) Entry times. Beef animals must be in the barn by 12:00 noon Thursday before the fair and will be released at 4:00 p.m. the following Sunday, except those being retained for the hall of champions.

21.12(173) Housing. Animals exhibited in this division must be housed in stalls designated by the supervisor of the vo ag-FFA department or forfeit all premiums earned.

21.13(173) Registration. Entries in purebred classes must be registered in the name of the exhibitor or as a partner. Registration number, name of animal and date dropped should be shown on entry blanks. Registration and transfer papers, health certificates and ear tattoos will be checked and heifers weighed beginning at noon on Thursday, immediately preceeding the fair.

21.14(173) Limitation within classes. Each exhibitor may enter up to eight heifers, and there is no limitation to the number that may be shown in each class. Substitute entries will be accepted, but no additions.

VO AG-FFA DAIRY

21.15(173) Limitation within classes. Each exhibitor may show not more than three animals in any one class but may show in one or more classes.

21.16(173) Substitute entries. Substitute entries will be accepted but no additions.

21.17(173) Purebred animals. Entries must be purebred animals, registered in the name of the exhibitor or in the name of the exhibitor as a partner. Animals will not be permitted to enter the show ring if their registration papers have not been approved by the department superintendent.

21.18(173) Housing. Animals exhibited in this division must be housed in stalls designated by the supervisor of the vo ag-FFA department or forfeit all premiums earned.

21.19(173) Clean stalls. Exhibitors must keep the space in the rear of their stalls clear and clean; all litter must be thrown where indicated by the superintendent of the department.

21.20(173) Special ownership. Cows entered in the fourth or oldest class of each breed must have been a bona fide FFA or vocational agriculture project for the past six or more months. Registration papers must show ownership or partnership for six or more months prior to the last day of the fair.

VO AG-FFA SWINE

21.21(173) Entries. Pigs not entered will not be permitted to show. Entries must be received on the proper group entry form to be eligible for the superior breeding swine exhibitor's award or the superior market swine exhibitor's award.

21.22(173) Ownership. All animals in the vo ag-FFA swine department must have been owned by the exhibitor or by the exhibitor in partnership for at least 60 days previous to the show.

21.23(173) Age of entries. Only registered pigs farrowed on or after February 1 this year may be shown in purebred classes.

21.24(173) Limitation within classes. Each exhibitor will be permitted to show one boar in the individual boar class, two gilts in the individual gilt class and one litter, and not more than two breeds in the breeding classes.

21.25(173) Litters. Litters will be composed of four pigs farrowed by one sow. There may be one boar and three gilts, or two boars and two gilts.

21.26(173) Cancellation of divisions. If three or fewer exhibitors are entered in a breed division, that division will be canceled and its entries will show in "purebreds of other recognized breeds".

21.27(173) Cancellation of classes. If there are fewer than five entries showing in a division where there are two age classes then there shall be only one age class for that breed.

21.28(173) Commercial gilts. Commercial gilts cannot be from the same litter from which gilts are shown in purebred classes, nor can they be shown in market classes.

21.29(173) Limitation within classes. Each exhibitor may show two commercial gilts.

21.30(173) Entries. Engries to market swine division open to purebred, crossbred or grade pigs, either barrows or gilts, fed for market that were farrowed on or after February 1, year of the fair, and weighing at least 190 pounds. Any pigs weighing less than 190 cannot show. There will be no reweighs. Pigs may be owned in partnership with parent or guardian.

21.31(173) Limitation within classes. Each exhibitor may show two pigs in the individual classes and one pickup load and one dressed pork in not more than two breeds.

21.32(173) Market gilts. Gilts shown in market classes cannot be shown in purebred nor commercial gilt classes.

21.33(173) Pickup load of market pigs. Pickup load of market pigs will be composed of four pigs, either barrows or gilts or any combination thereof all of the same breed, but need not be litter-mates. Pigs from pickup loads may not be exhibited in individual classes. A pickup load must be penned together.

VO AG-FFA SHEEP

21.34(173) Ownership. Sheep must be owned for at least 60 days by the exhibitor or in partnership with parent or guardian.

21.35(173) Shearing. Lambs and yearlings exhibited in breeding and market classes must be shorn in early June.

Exception: Corriedales entered in breeding classes.

21.36(173) Purebred. Purebred ewes and lambs of either sex may be entered in the breeding classes and must be recorded and carry association tags in ears when shown.

21.37(173) Age of entries. Lambs born prior to September 1, preceding year, are ineligible to show in lamb classes and only lambs showing lamb teeth can show. Yearling ewes shall be at least one year old, and not more than two years old as of August 31, year of the fair.

21.38(173) Pen of two. Lambs from pens may be exhibited in the ram and ewe lamb classes. Pen of two lambs may be made up of any animals properly entered whether shown individually or not.

21.39(173) Limitation within classes. Not more than two entries may be shown in any one class by the same exhibitor.

21.40(173) Specials. All lambs competing for specials must be a bona fide part of exhibitors' project or farming program, registered in their name or in partnership.

21.41(173) Limitation on awards. Only one award to any one exhibitor in each class; however, other awards may be advanced to the next in line.

21.42(173) Market lamb. Market lamb entries open to purebred, crossbreds or grade lambs, either wethers or ewes. Lambs may be owned in partnership with parent or guardian. Breed of sire must be stated on entry card.

21.43(173) Age of entries. Lambs born prior to January 1 are ineligible.

21.44(173) Market classes. Lambs shown in market classes cannot be shown in breeding classes.

21.45(173) Limitation within classes. In the market lamb division each exhibitor may show a maximum of two entries per class for individual and pens according to weight classification. The maximum number of animals that may be entered shall be six.

21.46(173) Market lamb. Market lamb pens will be composed of three ewe or wether lambs or both. Lambs from pens may be exhibited in the individual classes.

[Filed November 20, 1972]

CHAPTER 22
4-H DEPARTMENT

22.1(173) Conflict of rules. Should general and special rules conflict, the latter will govern. Exhibitors failing to comply with any of the rules are subject to all premium cancellations.

22.2(173) Age of exhibitors. Unless otherwise specified entries in this division are limited to members at least 12 and under 19 years of age on September 15, year of the fair, who are 4-H members in good standing with our enrollment report in the county extension office. In the livestock and dairy judging contests, members must be at least 15 years of age and have completed two years club work on September 15, year of the fair.

22.3(173) Livestock projects. Only livestock projects which have been enrolled by the member and listed by the member on the proper livestock identification report form, filed in the county extension office on or before May 15, may be entered. Partnership enrollment will not be accepted for state fair entries.

22.4(173) Entry forms. County extension staff will list all 4-H entries from the county on entry forms, using separate forms for each department. All entries must be mailed to the fair secretary's office and be postmarked on or before August 4. Late entries cannot be accepted.

22.5(173) Livestock tie out. Livestock tie out will be provided in the livestock exhibitor campground area.

22.6(173) Pen rent. Stall and pen rent must be paid at time entries are made or entries will not be accepted. The fees should be collected from the exhibitor by the county extension office and paid to the fair in one check by that office.

22.7(173) Ownership of livestock. All 4-H livestock must be owned by exhibitors or in partnership with parent or legal guardian.

22.8(173) Sickness. In case of sickness, an exhibitor may select another 4-H member to show his project. The substitute must be approved by the department supervisor. In cases where a member has been taken into military service, the animal may be shown by another eligible club member in accordance with the policy set up by the state 4-H office.

22.9(173) Charge of project. No member will be eligible for this show who does not take entire charge and care of the project in the show ring except in case of illness or for some reason approved by the superintendent.

22.10(173) Physical defects. Any artificial means of removing or remedying physical defects of conformation in animals exhibited, will be considered as fraud and deception. All animals giving evidence of such treatment will be barred from exhibition at the Iowa state fair and all fairs holding membership in the International Association of Fairs and Expositions.

22.11(173) Clean exhibits and stalls. Exhibitors will be required to keep their feed, hay,

straw, equipment, etc., in the feed alleys. The public alleyways must at all times be kept open and free from litter, equipment, feed, etc. Stalls, pens and alleyways must be cleaned and refuse deposited where instructed by the superintendent not later than 7:30 a.m. each day.

4-H BEEF

22.12(173) Ineligibility in FFA exhibits. Boys and girls are not eligible to exhibit in both 4-H and FFA beef classes.

22.13(173) Housing of animals. Animals exhibited in the beef department must be housed in stalls designated by the superintendent in charge or forfeit all premiums earned. It shall be the prerogative of the superintendent to reduce the number of stalls assigned to a county to the number actually required and to approve refund for excess stalls ordered by the county.

22.14(173) Housing of exhibitors. No 4-H exhibitor will be permitted to sleep in the 4-H and FFA cattle barn. Exhibitors violating this rule will forfeit all rights to show and any premium money previously won.

22.15(173) Market steer entries. Market steer entries are open to purebred or grade Angus, Herefords and Shorthorns showing a preponderance of the characteristics of the breed and to crossbreds and those of other breeds . . . all of which have been enrolled this year in a beginning cattle feeding project, and weighing 900 pounds or more.

22.16(173) Feeder cattle. Market steers weighing less than 900 pounds will show in separate class as feeder cattle.

22.17(173) Market heifer entries. Market heifer entries are open to animals enrolled this year in the beginning cattle feeding project—all breeds and crossbreds will show together in classes divided by weight, for those heifers weighing 850 pounds or more. Market heifers weighing less than 850 pounds will show in one class as feeder heifers.

22.18(173) Number of classes. Number of classes in market steers and feeder cattle; Angus, Hereford, Shorthorn, crossbreds-other breeds; and in market heifers, all breeds showing together will be determined by the number shown in each division and will be divided by weight.

4-H SWINE

22.19(173) Commercial gilt division. Entries to commercial gilt division open to gilts farrowed on or after February 1 this year and enrolled in any 4-H market swine project. All gilts must have been ear notched and such earmarks reported on the entry form.

22.20(173) Limitation within classes. Commercial gilts cannot be from the same litter from which gilts are shown in purebred classes. They can be included as a member of a 4-H market litter. Each exhibitor may show two commercial gilts.

22.21(173) Market swine. Market swine entries open to purebred, crossbred or grade pigs farrowed on or after February 1, this year and weighing 200 pounds or more.

22.22(173) Markings. All pigs must have been earmarked and such earmarks reported on the entry forms.

22.23(173) Limitation within classes. Each exhibitor may show two barrows in the individual classes and one market litter and may enter one barrow in the dressed pork contest.

22.24(173) Dressed pork contest. Pigs shown in the individual classes and dressed pork contest must be barrows.

22.25(173) Classification of crossbred pigs. Pigs will be classed according to breed of the sire. Crossbred pigs do not go in the "other breeds" class.

22.26(173) Carcass evaluation. All champion and reserve champion barrows of each breed must be slaughtered and carcass information obtained. Carcass evaluation will be made either in the 4-H dressed pork contest or in the open class barrow show.

22.27(173) Quality pork breed. Barrow must be purebred (with pedigrees of litter-mate boars or gilts as evidence) to show in quality pork breed classes—otherwise they will show in crossbred-grade class.

4-H SHEEP

22.28(173) Shearing. All purebred and market lambs must have been sheared over the entire body with a regular comb.

Exception: Corriedales to be shown in breeding classes. It is recommended that lambs not be blocked.

22.29(173) Ineligibility in FFA exhibits. Youth are not eligible to compete in both 4-H and FFA sheep classes.

22.30(173) Housing of animals. All sheep must be penned in the designated 4-H section.

BREEDING SHEEP

22.31(173) Entry forms. Birth date, ear tag number and registry number of each yearling ewe and ewe lamb must be given on the entry blank.

22.32(173) Registration. Certificates of registry must be presented at the 4-H sheep superintendent's office and must be approved or animals are not eligible to show.

22.33(173) Limitation within classes. Each exhibitor may show not more than two entries in any one ewe class nor more than one group in a pair of ewes class.

22.34(173) Ewe lamb. Entries in ewe lamb classes shall be dropped after January 1, this year and from ewes obtained at least three weeks before lambing. Yearling ewes shall be at least one

year old and not more than two years old as of August 31, this year. Not more than one may have been purchased as a yearling by the member.

22.35(173) Pair of ewes. Entry in pair of ewes class may consist of two ewe lambs, two yearling ewes or one of each.

22.36(173) Market lamb. Market lamb entries are open to purebred, grade or crossbred wether and ewe lambs born on or after February 1 of this year weighing 80 pounds or more. Each lamb must be identified with a numbered ear tag as required in the 4-H rules for animals exhibited outside the county. The ear tag number must be given on the entry blank and ear tag must be in the lamb's ear before arrival at the fairgrounds. Breed of sire must be shown on entry card.

22.37(173) Limitation within classes. A member may enter and show a maximum of five market lambs and one market pen.

4-H HORSES

22.38(173) Entries. Entries are open to horses and ponies regularly enrolled as 4-H projects and that meet the class qualifications.

22.39(173) Performance classes. No stallions may be entered for the performance classes.

22.40(173) Ages of horses. Ages of horses or ponies shall be based upon January 1.

22.41(173) Halter classes. Halter classes will be provided only for yearlings and two-year-old horses and ponies.

22.42(173) Limitation within classes. Each contestant is eligible to exhibit one entry per class and may enter in a maximum of four classes of his choosing. A single horse or pony may be entered in only one pleasure class.

22.43(173) Attire. Exhibitors in the English pleasure and equitation classes will be permitted to wear English attire. The judge will be instructed to not give extra credit for special attire. Exhibitors in all other classes shall wear a white dress shirt or blouse (tie optional) and blue colored riding style jeans. Chaps may not be worn. Spurs are optional. Hard soled boots and shoes are considered safe and appropriate.

22.44(173) No whips. Exhibitors in the halter classes shall use no whips and shall refrain from excessive noise.

22.45(173) Deportment. Contestants shall act as young ladies and gentlemen at all times. Unnecessary roughness or discourtesy will dismiss the rider from further competition for the entire show. Good sportsmanship shall prevail. No abuse of horses will be tolerated. Each rider must keep his horse under control or be excused from the ring. Courtesy is mandatory—no exceptions.

22.46(173) Charge of exhibit. 4-H members are expected to groom and show their animals without assistance from other persons.

22.47(173) Size of animals. In the halter classes, yearling ponies shall measure 13-2 hands or under; two-year-old ponies shall measure 14-1 hands or under. Ponies of America ponies shall measure 12-1 hands or under as yearlings and 12-3 hands or under as two-year-olds.

22.48(173) Substitution. Exhibitors shall not substitute a different horse or pony for that entered in a class unless for a cause which the superintendent shall approve and then only if the substitute horse or pony has already been entered in the 4-H show in another class.

4-H DOG OBEDIENCE

22.49(173) Entries. Entries are open to dogs regularly enrolled as 4-H projects that meet the class qualifications. All dogs are to be registered individually or as part of a litter in the AKC, UKC or FDSB.

22.50(173) Housing. Housing cannot be provided on the fairgrounds for dog entries, thus exhibitors should plan to arrive at the show pavilion after 12:00 noon and will be released at the completion of the show. Exhibitors must check in at the show ring by 12:30 p.m.

22.51(173) Health certification. Exhibitors must have a certificate showing the dog has had a rabies shot within the past two years and an up-to-date distemper immunization. Exhibitors will be asked to present the dog's health certificate to the official veterinarian prior to the start of the show at 12:15 p.m.

22.52(173) Attire. Exhibitors shall wear the 4-H participation T-shirt or blouse provided by Iowa state fair while exhibiting in their classes. If for some reason the state fair 4-H T-shirt or blouse is not available to an exhibitor, then a white shirt or white blouse shall be worn.

22.53(173) Leashes. All dogs must be on leash. Dogs may be tied in the pens while waiting for the class to be called. Exhibitor shall be ready with dog when class is called. Dogs are to be shown by 4-H member only with no substitute permitted.

22.54(173) Titled dogs. Titled dogs may be entered only in the classes as specified. Untitled dogs may be entered in not more than two obedience classes in which the exhibitor feels the dog is qualified.

LIVESTOCK JUDGING CONTEST

22.55(173) Entries. Entries limited to four members from each county, the three highest scoring members composing a team. Members will be at least 14 years and under 19 years of age as of September 15, this year and an active 4-H member for the current year, and who has never received training or instruction above high school grades, except those who may have attended a short course of not more than two weeks. Members must have completed two years' club work prior to this year. A 4-H member may not participate in more than three state livestock judging contests. A 4-H

member who has participated in a 4-H livestock judging contest beyond the state level is not eligible to participate in this contest. No one, unless a member of a county team, will be allowed to compete.

22.56(173) Limitation within classes. Counties will be limited to one team.

22.57(173) Requirements. In this contest each team member will be required to judge three rings of beef cattle-one market, one breeding and one market evaluation; three classes of swine-one market, one gilt selection and one market evaluation; and two classes of sheep-one breeding rams and one market evaluation.

22.58(173) Oral comments. Oral reasons will be required in two classes. They are the market swine and market beef.

22.59(173) Time. Fifteen minutes will be allowed for participants in each class.

22.60(173) Outside materials. No contestant shall be allowed to take books, pamphlets, notes or writing paper into the contests except such cards as are provided by the superintendent of the contest.

22.61(173) Coaching. While the contest is in progress there shall be no communication among the contestants or between the contestants and anyone else except as directed by the superintendent or his representatives.

22.62(173) Carcass data. The animals used in the three evaluation classes will be slaughtered immediately following the contest. The actual carcass data will be used in scoring the members' cards.

22.63(173) Ties. In case two or more teams tie for first place the team scoring the highest total points on reasons will be declared the winner. In case of tie in the individual contest duplicate medals will be awarded.

22.64(173) International livestock exposition. The high scoring team earns the privilege to represent Iowa at the international livestock exposition this fall. If for any reason fewer than three of the four members on the high scoring team are eligible and able to represent Iowa, the privilege will pass to the second place team. In case the second place team is unable to meet these requirements, the third place team will be given the privilege, etc.

22.65(173) American royal. The next ranking team wins the right to represent Iowa in the contest at the American royal.

DAIRY JUDGING CONTEST

22.66(173) Entries. Team entries limited to four members from each county, the three highest scoring members composing a team. Members will be at least 14 years of age and under 19 years of age September 15, this year and an active 4-H member for the current year and who has never received training or instruction above high school grades, except those who may have attended a short course of not more than two weeks.

22.67(173) Recognition. The top teams and individuals will be asked to return to the state fair for recognition.

22.68(173) Judging practice. Contestants will be allowed to visit the dairy cattle barns but they will not be allowed to get classes out for judging practice prior to the contest.

22.69(173) Outside material. No contestant shall be allowed to take books, pamphlets, notes or writing paper into the contest except such cards as are provided by the superintendent of the contest.

22.70(173) Coaching. While the contest is in progress there shall be no communication among the contestants or between the contestants and anyone else except as directed by the superintendent or his representatives.

22.71(173) Operating of contest. Coaches of judging teams will be asked to assist with the responsibility of operating the contest and are expected to report to the superintendent at the time their contestants report.

22.72(173) Classes. A ring or class shall consist of four animals designated as 1-2-3-4.

22.73(173) Composition of contest. Four rings of cows of Ayrshire, Brown Swiss, Guernsey, Holstein, Jersey or Milking Shorthorn breed and four rings of heifers of the above breeds shall make up the contest.

22.74(173) Comments. Reasons will be required on three rings of cows and one ring of heifers, two written and two oral.

22.75(173) Time. All contestants will be allowed 12 minutes to place each class. On classes where reasons are required eight minutes additional time will be allowed making a total of 20 minutes for placing and writing reasons.

22.76(173) Division of time. The 12 minutes the contestants are in the ring will be divided as follows:

22.76(1) Observe for three minutes while the cattle are moved.

22.76(2) Observe for three minutes from a distance.

22.76(3) Observe for three minutes while the cattle are again moved.

22.76(4) Observe for three minutes from a distance.

22.77(173) Forms. Regular printed forms will be furnished each contestant upon which to write his reasons.

22.78(173) Oral reasons. Two minutes will be allowed for contestants to give their oral reasons.

22.79(173) Scoring. The scoring will be based upon 50 points for each class placed and 50 points for each set of reasons.

22.80(173) High individual. To determine the high individual for all breeds the contestant's total points for the six breeds are combined and the totals arranged in order from highest to lowest. The contestant receiving the highest total is given first place for all breeds. Team ranks are determined by the same manner. In case of a tie, the contestant receiving the highest score on reasons will receive first prize. In case there is still a tie, the contestant receiving the highest score on cows will be awarded first prize. In selecting the high judge for individual breed awards in case of a tie the contestant receiving the highest score on all breeds will receive first prize.

4-H EDUCATIONAL PRESENTATIONS

22.81(173) Eligibility. To be eligible to participate 4-H members must be 14 years of age as of September 15, this year. Any 4-H member who has attended college or its equivalent is ineligible to participate. A member may represent the county only once in the educational presentation program at state fair.

22.82(173) Limitation within classes. Each county may enter three educational presentations. Entries should result from a county educational presentation program.

22.83(173) Topic of the presentation. Educational presentations may be given by one or more 4-H members. The topic of the presentation should determine its length, but should not exceed 25 minutes.

22.84(173) Same day events. Participants should not plan to be involved in another event such as exhibiting, dress revue or judging on the day they are scheduled to participate in this program.

22.85(173) Orientation. All participants are required to attend an orientation session the day they are scheduled to give their presentation.

22.86(173) 4-H member evaluation program. During the day that the participants give their presentation they will also be involved in a "4-H member evaluation program" and are expected to be present for comments given at the close of the day's session.

22.87(173) Certificates of recognition. All participants will be given certificates of recognition. Seals of merit will be presented to those giving an outstanding presentation. Seals of excellence will be presented to those giving superior presentations.

4-H EXHIBITS IN HOME ECONOMICS AND SCIENCES, MECHANICS AND ARTS

22.88(173) Entry quota. Each county may enter the quota of exhibits assigned which were based on number of members 12 years and older.

22.89(173) Maximum number of entries. The maximum number of exhibits that can be entered in any division is eight. The four divisions are clothing, food and nutrition, home improvement and sciences, mechanics and arts.

22.90(173) Limitation within classes. Exhibits are limited to one entry per class per county.

22.91(173) Letter of intent. By June 1, staff from each county are requested to provide a letter of intent to exhibit, listing the number of exhibits intended to be brought within each division.

22.92(173) Adjustments. Adjustments between the number intended on June 1 and the actual number of exhibits brought on August 15 can be one or two within a division. If adjustments are desired, please notify the state 4-H office.

22.93(173) Entries. All entries must be made in the name of the county and must be certified by an extension staff member.

22.94(173) Entry fee. No entry fee is required in the four divisions of this department.

22.95(173) Premiums. Exhibits will be awarded premiums on the basis of blue ribbon, red ribbon and white ribbon quality and of the premium unit value.

22.96(173) Exhibit quality. Any exhibit deemed to be unworthy as state fair quality by the fair management or judges or which does not meet the class description shall not be given a color rating and shall not be displayed.

22.97(173) 4-H project. The exhibit is to be an outgrowth of a 4-H project and not the result of work done in school.

22.98(173) County contest. The exhibit should have been selected from a comparable class in a county contest.

22.99(173) Rotation of exhibits. When warranted by size or nature of the exhibit, the fair management reserves the right to rotate exhibits on display.

22.100(173) Age of exhibitor. 4-H members exhibiting must be at least 12 and under 19 years of age on September 15, this year.

22.101(173) Current work. Each exhibit must be the work of a 4-H member during the current 4-H year.

22.102(173) Other use. The articles exhibited may have been made for use by someone other than the exhibitor.

22.103(173) Previous use. The article exhibited may have been used or worn before showing, but must be cleaned, laundered or dry cleaned before being exhibited.

22.104(173) Entry deadline. All exhibits in home economics and sciences, mechanics and arts must reach the 4-H exhibits building on entry day, Wednesday of the pre-fair preparation days, and must remain for the duration of the fair. Permission for late entry must be secured from the state 4-H office.

22.105(173) Entry forms. Exhibitor's entry lists must be completed using the forms sent each county office from the state fair. Include all information requested on the forms.

22.106(173) Entry tag. A completed state fair entry tag for each exhibit must be securely fastened to the exhibit in an easily seen part. State fair entry tags will be sent each county extension office from the state fair office.

22.107(173) Marking of exhibits. All exhibits including every article in the exhibit must be labeled. The labels should include: Name of county, class number, name and address of exhibitor. Attach label securely to an easily seen part of every article in the exhibit before bringing it to the state fair.

22.108(173) Check out. All exhibits must be checked out with the supervisor of the division before being removed from the 4-H exhibits building.

4-H DRESS REVUE

22.109(173) Single entries. Each county may have one entry in the Iowa state fair 4-H dress revue. Entries are to be made by June 1, at state 4-H offices, Ames, Iowa.

22.110(173) Limitation on entrants. All entrants must:

22.110(1) Be enrolled in a 4-H clothing project this year.

22.110(2) Have been enrolled for three or more years in a 4-H clothing project including this year.

22.110(3) Not have represented Iowa at the national 4-H congress in any award program.

22.110(4) Be a senior in high school the previous or the coming school year.

22.110(5) Model in garment the entrant has cut and constructed during the current 4-H club year.

22.110(6) Submit the following records with the other home economics exhibits from the county. No state fair entry tag needed.

a. Snapshot or photo of entrant wearing garment to be modeled.

b. 4-H clothing project record, or 4-H self-determined project record.

c. Senior 4-H record.

d. Iowa 4-H dress revue report form.

e. Iowa 4-H dress revue entry information.

[Filed November 20, 1972]

GENERAL SERVICES DEPARTMENT

CHAPTER 1
CENTRALIZED PURCHASING

1.1(19B) Methods of procurement used by central purchasing division. The department of general services, purchasing division, shall purchase all commodities by obtaining competitive bids whenever possible. An item may be exempt from purchase by the competitive bidding procedure when the director of the department determines the best interests of the state will be served due to an immediate or emergency need for the item. Bids are to be obtained by use of one of the following methods.

1.1(1) *Formal quotations.* Formal quotations as outlined herein shall be required on all nonexpendable items costing in aggregate between $2,500 and $15,000. The purchasing division shall prepare a written "Formal Request for Quotation" form and mail same, with a special return bid envelope or an identifying sticker for the outside of the return envelope to the approved list of vendors for the particular class of commodity. The "Formal Request for Quotation" shall contain the following information:

1. Due date and time of formal public bid opening.
2. Complete description of commodity needed.
3. Buyer's name or code.

Bids shall be opened publicly and read aloud on the date and the hour designated on the "Formal Request for Quotation" form. Bids as received are to be tabulated and the tabulation made available to all interested parties. An award shall be made within 30 calendar days of the formal bid opening to the lowest competent bidder. If an award is not made within 30 calendar days the bids shall be deemed rejected and prices as quoted by a vendor shall not be deemed as binding.

Formal quotations as outlined herein will be required on all nonexpendable items costing in aggregate of $15,000 or more. The purchasing division shall prepare a written "Formal Request for Quotation" form and handle as noted herein. In addition to the use of a direct mail request, the department shall cause to be printed in at least one daily paper in the state of Iowa a classified advertisement with the heading "Notice to Bidders". Said advertisement shall contain the following information:

1. Due date and time of formal bid opening.
2. General description of commodity to be purchased.
3. Address, name and phone number of person to be contacted to obtain official bid forms.

Bids shall be opened publicly and read aloud on the date and at the hour designated on the "Formal Request for Quotation" form. Bids as received are to be tabulated and the tabulation made available to all interested parties. An award shall be made within 30 calendar days of the formal bid opening to the lowest competent bidder. If an award is not made within 30 calendar days the bids shall be deemed rejected and prices as quoted by a vendor shall not be deemed as binding.

1.1(2) *Informal quotations.* On any item or group of items costing less than $2,500, the purchasing division shall obtain bids in one of the following ways: Prepare a written "Informal Request for Quotation" form and mail same to the approved list of vendors for that particular class of commodity. The "Request for Quotation" shall contain the following information:

1. Due date "informal quotation" must be returned.
2. Complete description of commodity needed.
3. Buyer's name or code.

Bids are to be opened informally on the due date or within 24 hours of same, and an award made to the lowest competent bidder meeting specifications. Bids as received are to be tabulated and the tabulation made available to all interested parties.

The purchasing section may obtain telephonic bids on any expendable item or group of items costing less than $500. Said bids must be documented on a special "Telephonic Bid" form.

1.1(3) *Field purchases.* The department of general services, purchasing division, may authorize an agency to use a special six-part field purchase order form to purchase expendable items only, provided that the total value of such an order does not exceed $150. Items of equipment are not to be purchased by use of a field purchase order nor can a field purchase order be used to pay for leased equipment. The use of this type of purchasing should be limited to those items not normally covered by contract and that immediate need for same is so acute that the normal functions of the agency could conceivably be curtailed.

1.1(4) *Contract purchases.* The purchasing division may, upon authorization of the director, enter into special contract purchase agreements for such items, groups of items or services that in the opinion of the director and the purchasing division, the best interest of the state will be served. Said contracts shall be obtained by use of one of the "Competitive Bidding" processes as outlined and awards made to the lowest competent bidder.

1.2(19B) Vendor eligibility. Any firm or individual legally conducting business within the state of Iowa may request to be placed on the appropriate vendor list by commodity classification. Such firm or individual must properly fill out the vendor bid application form and place same on file with the purchasing division. The purchasing section shall maintain a current vendors listing by commodities and cause to be mailed to concerned vendors all "Formal Bid Quotations" prepared by the purchasing section.

A bidder may be removed from a vendors listing for any of the following reasons.

1. Failure to respond to request for five consecutive bid requests.
2. Failure to deliver merchandise within specified delivery dates without permission of the purchasing section and the using agency.
3. Failure to deliver merchandise meeting specifications as outlined on the "Purchase Order" or the "Special Contract Purchase Agreement".
4. Any person or firm whose name appears on a current vendors listing shall be removed from such vendors bid listing if said person or firm shall in any way attempt to influence the decision of any state employee involved in the purchasing function.
5. If the director and the purchasing division have reasonable grounds to believe that there is an agreement by bidders to restrain competitive bidding, by any means, the bids of those bidders will be rejected and their names removed from the vendors bid list.
6. Discrimination in employment. A vendor may be removed from an approved vendors bid list if the civil rights commission has determined that a vendor has shown discrimination in the vendor's employment.

1.3(19B) Instructions to vendors. In processing bidding documents the vendor must prepare the documents in the manner as prescribed and furnish all information and samples as may be requested on the bidding document. The following procedures must be adhered to by all vendors in submitting bids to the department purchasing division.

1.3(1) *Bid preparation.* Bids shall be prepared either in ink or typewritten. Telegraphic or telephonic bids will not be considered as "Formal Bids".

1.3(2) *Information to be provided by vendor.* In space provided, vendors shall denote brand name, manufacturers name, model number and any other applicable information to assist in identifying the item the vendor proposes to supply.

1.3(3) *New merchandise.* Unless otherwise specified in the specifications as submitted, all items on which a vendor submits a quotation shall be new, of the latest model, crop year or manufacture and shall be at least equal in quality to that specified in specifications as submitted.

1.3(4) *Item and total prices.* A price for each separate item listed on the bidding document

must be listed in the space provided. Only one unit price shall be quoted on each item and must be extended to show the total price for the quantity of the item requested. Total price for all items listed must be shown. Should a vendor desire to submit alternate prices this can be accomplished by attaching an addendum to the bidding document. In case of error the unit price shall prevail.

1.3(5) *All or none bids.* The bidding document may specify whether or not bids will be accepted on an "all or none basis". Unless this statement appears on the bidding document the vendor may not so specify; and the purchasing division may award either by item or by lot, whichever is to the advantage of the state of Iowa. Care will be taken by the purchasing division to insure vendors that they will not be penalized by split awards.

1.3(6) *Discounts.* The bid form provides space for the statement of cash discount. The only discount provision that will be considered in determining awards will be for cash discount of 30 days or longer. Bids which specify discounts of "E.O.M." or of less than 30 days will be considered as net per item bids. Term discount periods will be computed in one of the following manners:

a. From date of invoice.

b. Date of receipt of completed order.

c. Date certified vendors claim voucher is received. Whichever date is first.

When additional testing of a product is required after delivery, the discount period shall not begin until test is completed and final approval made.

1.3(7) *Time of acceptance.* Due to the large volume of informal inquiries processed each day by the purchasing division, a minimum of ten days is allowed for acceptance of a vendors offer. A vendor may grant an additional allowance for informal bid acceptance if desired. Vendors bid allowance period, if for other than ten days, must be noted on the bidding document. If a formal bid letting award is not made within 30 calendar days the bids shall be deemed rejected and prices as quoted by the vendor shall not be deemed binding.

1.3(8) *Escalator clauses.* Unless specifically provided for on the bidding document, a bid containing an "escalator clause" providing for an increase in price will not be considered.

1.3(9) *Federal and state taxes.* The state of Iowa is exempt from the payment of Iowa sales tax, motor vehicle* fuel tax and any other Iowa tax that may be applied to a specified commodity or service. Exemption certificates will be furnished a vendor on request.

1.3(10) *Delivery date.* In the space provided on the bidding document a bidder shall show the earliest date on which delivery can be made. The purchasing division may indicate on the bid form the acceptable delivery date for a commodity. The purchasing division may consider delivery dates as a factor in determining the successful vendor.

1.3(11) *Time of submission.* All formal and informal bids shall be submitted in sufficient time, by the vendor, to reach the purchasing division prior to the date and time set for the opening of bids. Bids received after the date and time set for opening will be returned to the vendor unopened. Bids as received by the purchasing division will be dated and time stamped showing date and hour received.

1.3(12) *Modifications or withdrawal of bids.* Bids may be modified or withdrawn prior to the time and date set for the opening of bids. Said modifications or withdrawal must be in writing and delivered in a sealed envelope, properly identifying the correct bid proposal to be modified or withdrawn. After the opening of the bids, no bid may be modified or withdrawn.

1.3(13) *Testing.* Various items may require testing either before or after final award is made. This will be noted in the bid specifications and final award of contract will be made on completion of tests. In these cases vendor must guarantee price until testing has been completed.

1.3(14) *Security.* The purchasing division may require vendors to provide either a certified check, fidelity or performance bond in the amount of five percent of the total amount of any bid submitted for a commodity or service that is in excess of $2,500. Security of the successful vendor will be retained in a secure place until all items have been satisfactorily delivered or services performed as stated in bid specifications.

1.3(15) *Vendor responsibility for removal of trades.* Whenever the purchase of an item of equipment has been made with the trade-in of equipment, it shall be the vendors responsibility to remove the traded equipment from the agencies storage facilities within 30 days of the final acceptance of the equipment by the agency. The state will not assume responsibility for equipment that is not removed within this time period. The state may cause same to be removed and shipped to vendor, billing vendor for all packing, crating and transportation charges.

1.3(16) *Assignment of contract or purchase order.*

a. A vendor may not assign any contract to another party without written permission from the purchasing division.

b. A vendor may not assign any contract or purchase order to any financial institution.

1.3(17) *Strikes, lockouts or acts of God.* Whenever a vendors place of business, or source of supply has been disrupted by one of these acts, it shall be the responsibility of the vendor to promptly advise the department's purchasing division. The state of Iowa may elect to cancel all orders on

*See chapter 324 of the Code.

file with the vendor and place the order with another vendor.

1.4(19B) Opening and processing of the bidding document. The opening of bids submitted by vendors will be handled in one of the following manners.

1.4(1) *Formal quotation bid openings.* All bids received prior to the time and date set forth on the bidding document will be opened publicly at the time and the place designated and read aloud. All interested persons are invited to attend any bid opening. All original bids will be retained in the office of purchasing and shall be available for public inspection. Bids will be tabulated as required, and tabulation forms filed with bidding documents.

1.4(2) *Informal quotation bid openings.* All bids received prior to the time and date set forth on the bidding document may be opened publicly at the time and place designated. Bids will be tabulated and placed on file for public inspection within 24 hours of the time specified on the bidding document.

1.4(3) *Rejection of bids.* The right is reserved to reject any or all bids. Bids may be rejected because of faulty specifications, abandonment of the project, insufficient funds, evidence of unfair bidding procedures or failure to provide security, when required. New bids may be requested at a time deemed convenient to the purchasing division and the agency involved.

1.4(4) *Minor deficiencies and informalities.* The state reserves the right to waive minor deficiencies and informalities if in the judgment of the purchasing division the best interest of the state of Iowa will be served.

1.4(5) *Tie bids.* The purchasing division will resolve bids which are equal in all respects and tied in price by drawing lots. Whenever practical the drawing will be held in the presence of the vendors who are tied in price. If this is not possible the drawing will be made in front of at least three persons and said drawing documented.

Whenever a tie involves an Iowa firm and a firm outside the state of Iowa, the Iowa firm will receive preference.

Whenever a tie involves one or more Iowa firms and one or more firms outside the state of Iowa the drawing will be held among the Iowa firms only.

Tie bids involving Iowa produced or manufactured products and items produced or manufactured outside the state of Iowa will be resolved in favor of the Iowa product.

1.5(19B) Delivery and acceptance of commodities. When an award has been made to a vendor and the official purchase order issued and received by the vendor, deliveries are to be made in the following manner.

1.5(1) *Deliveries.* All deliveries are to be made only to the point specified on the official purchase order. If delivery is made to any other point it shall be the responsibility of the vendor to promptly reship to the correct location.

1.5(2) *Delivery charges.* All delivery charges should be to the account of the vendor whenever possible. If not, all delivery charges should be prepaid by vendor and added to the invoice.

1.5(3) *Notice of rejection.* The nature of any rejection of a shipment, based on apparent deficiencies disclosed by ordinary methods of inspection, will be given by the receiving agency, to the vendor and carrier within a reasonable time after delivery of the item, with a copy of this notice to the purchasing division. Notice of latent deficiencies which would make items unsatisfactory for the purpose intended may be given by the state of Iowa at any time after acceptance.

1.5(4) *Disposition of rejected items.* The vendor must remove at the vendors expense any item rejected by the state of Iowa. If the vendor fails to remove the rejected item the state of Iowa may dispose of the item offering same for sale, deduct any accrued expense and remit the balance to the vendor.

1.5(5) *Testing after delivery.* Laboratory analysis of an item or other means of testing may be required after delivery. In such cases, vendors will be notified in writing that a special test is being made and that payment will be withheld until completion of the testing process.

1.6(19B) How to initiate payment. It is the intent of the department's purchasing division to process vendors claims against the state of Iowa as rapidly as possible. However, there are certain procedures that a vendor must follow in order to properly initiate the payment of a claim. If a vendor will follow the outline as listed below, payment can be expected within a reasonable time period.

1.6(1) *Vendor claim voucher and invoicing.* Vendor will receive a copy of the purchase order and the vendors claim voucher will serve as authorization to supply items as listed on the purchase order.

1.6(2) *Certification.* After the merchandise has been shipped to the agency, vendor shall certify on the vendors claim voucher that shipment has been made to the agency as specified. Vendor shall prepare invoice in triplicate. Vendor's invoice must refer to the purchase order number appearing in the upper right-hand corner of the claim voucher. Attach two copies of the invoice to the claim voucher and return this document to the agency named. Vendor shall forward one copy of invoice to:

State of Iowa
Department of General Services
Purchasing Division
Grimes State Office Building
Des Moines, Iowa 50319

Payment cannot be made unless the vendors claim voucher is returned to the agency. All invoices are to be made to the account of the agency named on the voucher form.

1.6(3) *Warrant issuance.* After the vendors claim voucher and invoices have been received by the agency, and the agency certified that the merchandise has been received as ordered, vendors claim will be submitted to the state comptroller and a warrant issued to vendors account.

1.6(4) *Warrant identification.* The state warrant will be mailed along with a copy of the original vendors claim voucher to assist vendor in identifying the payment. The remittance copy of the voucher is for vendor's file.

1.6(5) *Correspondence.* All correspondence regarding payment should be addressed to the agency named with a copy to the purchasing division.

Invoices bearing cash discounts will receive priority in processing.

TITLE I

DISEASE REPORTING AND CONTROL, AND LABORATORY APPROVAL

CHAPTER 1
COMMUNICABLE DISEASE CONTROL

1.1(139) Commissioner of public health. The commissioner of public health will be the principal officer of the state for the implementation of measures to control communicable disease.

1.2(139) Reportable diseases. The following diseases or conditions are required to be reported to the Iowa State Department of Health, Lucas State Office Building, Des Moines, Iowa 50319 by the physician or other health practitioner attending any person infected with such disease:

1.2(1) *Specific diseases:*
Anthrax
Botulism
Brucellosis
Chancroid
Chickenpox
Cholera
Diarrhea, epidemic, of newborn in nurseries
Diphtheria
Encephalitis
Gonorrhea
Glanders
Granuloma inguinale
Hepatitis, viral (infectious or serum)
Histoplasmosis
Influenza
Leprosy
Leptospirosis
Lymphogranuloma venereum
Malaria
Meningitis
Mononucleosis, infectious
Mumps
Pertussis (whooping cough)
Plague
Poliomyelitis
Psittacosis
Rabies
Relapsing fever
Rocky Mountain spotted fever
Rubella (German measles)
Rubeola (measles)
Salmonellosis
Schistosomiasis
Shigellosis
Smallpox
Staphylococcal food poisoning
Syphilis
Tetanus
Trachoma
Trichinosis
Tuberculosis
Tularemia
Typhoid fever
Typhus fever
Yellow fever

1.2(2) *Other diseases.* Any other disease which is unusual in incidence, occurs in unusual numbers or circumstances, or appears to be of public health concern.

1.3(139) Reporting.

1.3(1) *Telephone, telegraph or other electronic means.*

a. Internationally quarantinable disease. Occurrence of a case of any internationally quarantinable disease shall be reported immediately by telephone, telegraph or other electronic means as soon after the diagnosis as is possible. Internationally quarantinable diseases are cholera, plague, relapsing fever (louse-borne), smallpox and yellow fever.

b. Diseases of high public health importance. Occurrence of a case of typhoid fever or diphtheria will be reported to the department immediately by telephone, telegraph or other electronic means as soon after the diagnosis as possible.

c. Epidemic. Occurrence of an outbreak of unusual numbers or under unusual circumstances of a communicable disease, such as epidemic diarrhea of the newborn in nurseries or a food poisoning episode, shall be reported immediately to the department by telephone, telegraph or other electronic means.

1.3(2) *By mail or other means.* Cases of other reportable diseases shall be reported to the department by mail at least weekly. If there is concern that delay might hinder the application of organized control measures to protect the public health, incidence of communicable disease should be reported by telephone.

1.4(139) Forms.

1.4(1) Reports of communicable diseases, other than venereal diseases, may be submitted in writing on any paper and in any format.

1.4(2) Venereal diseases should be reported on a special form which is provided to physicians and laboratories. Since these reports are confidential, they shall be transmitted in envelopes or other secure fashion. Reports of venereal disease must include name, age, sex, marital status, occupation of the patient, name of disease, possible source of infection and the duration of the disease. In localities where there is a local, functioning health department, the law requires the report to be made to the local health department. Local health departments must forward the same information to the state department of health.

1.5(139) Who should report.

1.5(1) Physicians are required by law to report all cases of reportable disease attended by them.

1.5(2) Hospitals are encouraged to report cases of reportable disease admitted.

1.5(3) School nurses are encouraged to report cases of communicable disease occurring among the children supervised.

1.5(4) School officials, through the principal or superintendent as appropriate, are encouraged to report when there is no school nurse.

1.5(5) Parents are encouraged to report, particularly when disease occurs in children not in school or when the disease might otherwise not be reported.

1.6(139) Isolation.

1.6(1) *Time periods for isolation and quarantine.*

Disease	Period of Isolation	Period of Quarantine
Chickenpox	7 days from onset of pocks.	None
Diphtheria	Until after 2 negative cultures from nose and throat, 24 hours apart.	5 days, is susceptible intimate contact
Rubella (German measles)	5 days from onset of rash. Keep away from pregnant women.	None
Impetigo	Until physician permits return.	None
Infectious Hepatitis	14 days from onset of clinical disease, at least 7 days from onset of jaundice.	None
Rubeola (measles)	7 days from onset of rash.	None
Meningococcal Meningitis	Until physician permits return.	None
Mumps	9 days or until swelling disappears.	None
Pediculosis	1 day after DDT or other adequate treatment.	None
Poliomyelitis	7 days from onset.	None
Ringworm of scalp	Until physician permits return.	None
Scabies	Until adequately treated by physician.	None
Scarlet fever Scarlatina Strep throat	7 days from onset if untreated or 24 hours after antibiotics.	None
Smallpox	Until all scabs are gone.	17 days if unvaccinated and unco-operative
Tuberculosis, proven or suspected infectious	When necessary precautions are not practiced, for such period of time as ordered by the commissioner of public health.	None
Whooping cough	21 days from beginning of whoop.	None

This subrule is intended to implement section 139.3 of the Code.

1.6(2) *Enforcement of isolation.* Isolation is to be enforced when communicable diseases are admitted or occur in hospitals, nursing homes or other health care facilities. Isolation technique will be graded in the strictness of application by the type of disease.

1.6(3) *Strict isolation.*

a. Gowns and masks: To be worn by all persons entering room and discarded before leaving room.

b. Hands: To be washed thoroughly before and after removing gown.

c. Articles: To be discarded or washed and disinfected or wrapped for autoclaving before being taken from room.

d. Diseases for which applicable: Diphtheria, staphylococcal pneumonia, exudative streptococcal infections, meningococcus infections, smallpox and open active tuberculosis.

1.6(4) *Wound and skin isolation.*

a. Gowns and gloves: To be worn only by persons having direct contact with patient.

b. Masks: To be worn by all persons entering room.

c. Hands: To be washed thoroughly on entering and leaving room.

d. Articles: To be discarded or washed and disinfected or wrapped for autoclaving before being taken from room.

e. Diseases for which applicable: Staphylococcus, pseudomonas or other gross wound infections, severe dermatitis with broken skin, gas gangrene, syphilis with skin or mucous membrane lesions and ringworm of the scalp.

1.6(5) *Enteric isolation.*

a. Gowns and gloves: To be worn only by persons having direct contact with patients.

b. Masks: Not necessary.

c. Hands: To be washed thoroughly on entering and leaving room.

d. Articles: To be discarded or washed and disinfected or wrapped for autoclaving before being taken from room.

e. Diseases for which applicable: Leptospirosis, amebiasis, hepatitis (serum and infectious), shigellosis, salmonellosis, poliomyelitis, aseptic meningitis, viral myocarditis or pericarditis.

1.6(6) *Protective isolation, of benefit principally to the patient.*

a. Gowns and gloves: To be worn by all persons entering room.

b. Masks: To be worn by all persons entering room.

c. Hands: To be washed thoroughly on entering room.

d. Articles: Only clean articles should be introduced into the area.

e. Applicability: Newborn nurseries, severe burn cases, other situations where it is imperative to minimize introduction of infection.

1.6(7) Single rooms are desirable for isolation. More than one patient with the same disease in the same room may be necessary in special situations. Isolation should be discontinued as soon as there is reasonable evidence that the hazard of spread is minimal.

1.6(8) Isolation in the home should mean prohibition of contact between patient and other susceptible members of the family. Good handwashing and individual care of eating utensils, preferably with use of disposable items, should be practiced. If nondisposable utensils are used, great care should be taken that they are properly sterilized so that they do not become a source of contamination for utensils used by other members of the family. School children who contract communicable diseases should be kept out of school and out of close contact with siblings and other children. Adults who contract communicable disease should remain at home unless hospitalized and out of close contact with susceptible family members for the same periods specified in this rule.

1.7(139) Quarantine. Quarantine will rarely be imposed by the state department of health. Should one of the internationally quarantinable diseases occur in Iowa, persons exposed, contacts to the case, shall be quarantined as the particular situation requires. Generally, contacts will be tested, as possible, for susceptibility. Immune reactors may be released from quarantine as soon as the laboratory results are available. Susceptible contacts will be continued in quarantine until the longest usual incubation period of the disease has elapsed. Confinement will usually be in their own homes, if this can be done with safety. Such other places of confinement may include dormitories, special hospitals such as a state institution or, under exceptional circumstances, in motels, hotels or the like. Such sites of quarantine will be prominently placarded with quarantine signs furnished by the department and posted on all sides of the building wherever access is possible. No susceptible person, not already a contact, will be admitted within the quarantine enclosure.

1.8(139) Disinfection.

1.8(1) *Concurrent disinfection.* All discharges from infected eyes, ears, nose, throat and skin lesions should be prevented from being disseminated. They should be absorbed by dressings or tissues and these contaminated items should be handled carefully and disposed of by incineration. Excreta from infected persons may be disposed of through sanitary sewers if these are available and adequate. Such wastes should be decontaminated by use of creosol solutions before disposal into pits or septic tanks. Body and bed linen should be carefully handled. It may be disinfected before laundering with creosol solutions. It may be safely laundered in commercial laundries if the personnel are knowledgable in safe handling techniques. These soiled materials should not be sorted, shaken or manipulated unnecessarily before they are put into the washer.

1.8(2) *Terminal disinfection.* Terminal disinfection is rarely necessary. Terminal cleaning usually suffices. Floors, walls, furniture and other articles in the room occupied by a communicable disease case should be disinfected by washing with water and detergent or soap. Airing and sunning of rooms, furniture and bedding is necessary. If smallpox has occurred, sterilization of bedding is required.

[Filed November 20, 1970; amended August 31, 1971]

CHAPTER 2
OPHTHALMIA PROPHYLACTICS FOR NEWBORN INFANT EYES

2.1(140) Treatment of infant eyes. The Iowa state department of health approves the following ophthalmia prophylactic solutions for newborn infants' eyes:

2.1(1) One percent silver nitrate from unopened wax ampules in each conjunctival sac followed by normal saline flush or

2.1(2) Penicillin ointment in the strength of not less than 100,000 units per gram or

2.1(3) Erythromycin ointment in the strength of not less than five milligrams per gram.

2.1(4) The Iowa state department of health may give written approval to other ophthalmia prophylactic solutions or ointments upon receipt of a written request accompanied by adequate evidence concerning the effectiveness of the solution or ointment.

[Filed November 20, 1970]

CHAPTER 3
BLOOD TESTING LABORATORIES

3.1(140,596) Approved premarital and prenatal blood testing laboratories. The state department of health approves the following laboratories for the purpose of performing serologic tests for syphilis in accordance with premarital and prenatal requirements:

3.1(1) The State Hygienic Laboratory at Iowa City, Iowa.

3.1(2) Laboratories of all state and territorial health departments.

3.1(3) Laboratories of the United States Public Health Service and Army, Navy and Air Force.

3.1(4) The health department laboratories of New York City and the District of Columbia.

3.1(5) The official laboratories of the provincial health departments in Canada.

3.1(6) Those private and other governmental laboratories approved for this purpose by the state department of health. A list of the approved private and other governmental laboratories is available upon request to the State Department of Health, Lucas Office Building, Des Moines, Iowa 50319.

[Filed November 20, 1970]

CHAPTER 4
PHENYLKETONURIA TESTING LABORATORIES

4.1(135) Time sequence for phenylketonuria tests. A test for phenylketonuria should be done preferably 48 hours after first feeding but in any event immediately prior to hospital discharge. A second test should be done at about four weeks of age.

4.2(135) Blood or serum. The test should be a phenylalanine blood or serum test.

4.3(135) Requirements for approval. The state department of health will approve any laboratory to perform laboratory tests for phenylketonuria provided that such laboratory meets the following criteria.

4.3(1) The laboratory director agrees to perform the inhibition assay method of Guthrie or a standard quantitative phenylalanine blood test for phenylketonuria on the request of any licensed physician, and *"a"* or *"b"*:

a. The laboratory is supervised by a pathologist either full-time or part-time who is certified by the American Board of Pathology, or

b. The laboratory is appraised by the state hygienic laboratory under a quality control program to perform either one or both of the designated tests.

4.3(2) The tests performed by the laboratory are scheduled on at least a weekly basis and reports of the number of tests performed are made quarterly to the state hygienic laboratory.

4.3(3) Reports of positive results are made immediately to the State Department of Health, Lucas Office Building, Des Moines, Iowa 50319.

4.4(135) Quality control program. It is recommended that those laboratories supervised by a part-time or full-time board certified pathologist participate in the quality control program of the state hygienic laboratory.

4.5(135) Information available. Guidelines available upon request to the state department of health should be followed.

[Filed November 20, 1970]

CHAPTER 5
MATERNAL DEATHS

5.1(135) Reporting of maternal deaths. All maternal deaths shall be reported to the division of maternal and child health of the state department of health within 48 hours. A maternal death is any death occurring while a woman is

pregnant or any death of a woman within six months of delivery. This includes deaths resulting from abortions, ectopic pregnancies and all deaths during pregnancy, childbirth, puerperium or deaths from complications of childbirth.

TITLE II

GENERAL SANITATION

CHAPTER 10
DEFINITIONS

10.1(135) Definitions.

10.1(1) *Department.* Department as hereinafter used shall refer to the state department of health.

10.1(2) *Local board.* Local board shall refer to a local board of health in cities and towns and in townships, as defined in section 137.2.

10.1(3) *Health officer.* Health officer shall mean the health officer of a local board of health as defined in section 135.1(3).

10.1(4) *Public swimming pool.* Public swimming pool shall mean any swimming pool open to the public either publicly or privately owned.

10.1(5) *Dwelling.* A dwelling is any house or building or portion thereof which is occupied in whole or in part as the home or residence of one or more human beings, either permanently or transiently.

Subrules 1.1(4) and 1.1(5), 1971 IDR, transferred to Environmental Quality Department, chapter 22.

CHAPTER 11

Reserved for future use

[Chapter 2, Water Supplies, 1971 IDR, transferred to Environmental Quality Department, chapter 22]

CHAPTER 12
SEWAGE, INDUSTRIAL WASTES AND EXCRETA DISPOSAL

12.1(135) General. Wherever a sanitary sewer is available all sewage or industrial wastes shall be discharged into such sewer.

12.2(135) Requirements when discharged into surface waters. All sewage and industrial wastes which are discharged into any surface water shall be treated in such a manner as will conform with the requirements of the department.

Plans and specifications for any new construction or for reconstruction or improvement of any existing sewerage system or treatment plant shall be submitted to the department before construction begins. This also applies to sewer extensions.

12.3(135) Requirements when used for irrigating purposes. All sewage or sewage plant effluents used for irrigating purposes shall be treated in such manner as will conform with the requirements of the department. No sewage or sewage effluents shall be used for irrigating purposes without a written permit from the said department.

12.4(135) Requirements when discharged into the soil. No excreta or sewage shall be discharged into the soil except in compliance with the following requirements:

12.4(1) *Requirements for water carriage systems.*

a. Influent sewers.

(1) *Type.* Influent sewers used to conduct sewage from a building to a private sewage treatment plant shall be constructed of cast iron, vitrified clay or concrete sewer pipe with calked lead, bitumen, cement or other approved joints, provided that all portions of such sewer lying within 50 feet of any well or other source of drinking water shall be cast iron pipe with calked lead joints.

(2) *Size.* Such influent sewers shall be not less than four inches in diameter.

(3) *Grade.* Such influent sewers shall be laid to a minimum grade of 12 inches per 100 feet.

(4) *Manholes.* A manhole shall be provided at each change in direction or grade.

b. Grease interceptors. Grease interceptors of a type approved by the department shall be installed between the building and treatment plant for all except single residence installation. In case of restaurants or other establishments which discharge large quantities of grease, the grease interceptor shall be located as close as practicable to the point at which the grease enters the influent sewer.

c. Septic tanks. All septic tanks shall discharge into a subsurface tile system or other type of filter except where written permission is obtained from the department to discharge into a stream or leaching pit. Septic tanks shall comply with the following requirements:

(1) *Location.* Septic tanks shall be located at least 50 feet, or such greater distance as may be specified by the department, from any well, spring or other water supply structure and, if possible, upon ground sloping downward therefrom.

(2) *Capacity.* Every compartment shall have a minimum effective (liquid) capacity of 125 gallons, but in no case shall the total capacity of the unit below the water line be less than 500 gallons.

(3) *Construction details.* Septic tanks shall conform in detail with the recommendations stated in the department publication "Residential Sewage Treatment Plants" or equal as approved by the department.

(4) *Construction material.* Septic tanks shall be constructed of concrete, corrosion resisting metal or other impervious material providing that metal tanks shall have a minimum wall thickness of 14 gauge.

(5) *Manholes.* All septic tanks with solid concrete covers shall be provided with at least one manhole at least 22 inches in diameter, and said manhole shall extend to the surface of the ground if the earth fill above the septic tank is more than 12 inches deep.

d. Dosing tanks and automatic siphons. All proposed installations of septic tanks of 1000 gallons or more shall be provided with a dosing tank and automatic siphon or siphons of a type approved by the department unless otherwise specifically approved by the department. The department may require dosing tanks and automatic siphons with septic tanks of smaller capacity.

e. Subsurface tile systems. Subsurface tile systems shall comply with the following requirements:

(1) *Location.* Subsurface tile systems used for disposal of settled sewage of wastes shall be located at least 75 feet from any well or other source of drinking water supply, except in creviced limestone or other porous formations the minimum distance shall be specified by the department. Such tile systems shall not be located within 25 feet of any stream or open ditch except when a collector tile is installed below the distributor tile and the intervening space is filled with at least 12 inches of coarse sand or other approved filtering material.

(2) *Construction.* Subsurface tile systems shall conform to the construction details shown in the department publication, "Residential Sewage Treatment Plants" or equal as approved by the department, except that shorter total lengths of tile lines may be permitted for systems serving public and quasi-public establishments if written approval is obtained from the department.

f. Other types of sewage or industrial waste treatment, where permitted or required, shall be installed only after plans and specifications for each project have been approved by the department.

12.4(2) *Requirements for earth pit toilets.* All earth pit toilets hereafter constructed or required by the health officer to be reconstructed shall comply with the following requirements:

a. Location. Earth pit toilets shall not be installed in cavernous or loosely stratified formations, and shall be located at least 75 feet or other distances specified by the department from any well or other source of drinking water, and if possible upon ground sloping downward therefrom.

b. Construction. The details of construction shall comply with the plans and specifications shown in the department publication, "The Sanitary Privy," or equal as approved by the department.

12.4(3) *Requirements for impervious vault toilets.* All impervious vault or pit toilets hereafter constructed or required by the health officer to be reconstructed shall comply with the following requirements:

a. Location. Impervious vault toilets shall not be located within 50 feet of any well or other source of drinking water.

b. Construction material. The vault or pit shall be constructed of impervious concrete at least six inches thick. The superstructure including floor slab, seat riser, seat cover and building shall comply with the plans and specifications for earth pit privies as shown in the department publication "The Sanitary Privy," or equal as approved by the department. The vault or pit shall be provided with a cleanout opening fitted with a fly-tight cover.

12.5(135) Maintenance. The following shall be considered defects in pit toilet installation (and sufficient cause for requiring their improvement):

12.5(1) Evidence of caving around the edges of the pit.

12.5(2) Signs of overflow or other evidence that the pit is full.

12.5(3) Seat covers open.

12.5(4) Broken, perforated or unscreened vent pipe.

12.5(5) Insanitary toilet building.

12.5(6) Evidence of light entering pit except through seat when seat cover is raised or except through cleanout opening when lid is raised.

12.6(135) Requirements for leaching pits (dry wells or cesspools). Leaching pits shall not be used for receiving sanitary sewage or industrial wastes but may be used for kitchen wastes, household laundry wastes, cellar or basement drainage and other similar waste water only when complying with the following requirements:

12.6(1) *Location.* Leaching pits shall not be located within 75 feet of any well or other source of drinking water or within 25 feet of any stream or open ditch.

12.6(2) *Construction.* Leaching pits when used for disposal of kitchen wastes shall contain at least one and one-half cubic yards of crushed rock or gravel below the inlet and when used for laundry wastes or basement drainage shall contain at least three cubic yards of crushed rock or gravel below the inlet.

Leaching pits shall be covered with not less than 12 inches and not more than 24 inches of loose filled earth.

Leaching pits shall not penetrate the soil to a depth within three feet above the ground water stratum nor shall the total depth exceed 12 feet.

12.7(135) Requirements for chemical toilets. All chemical toilets hereafter constructed

or hereafter required to be reconstructed shall comply with the following requirements:

12.7(1) *Tank.* Chemical toilets shall have a receiving tank of impervious material with an opening easily accessible for cleaning. Metal tanks shall have a minimum wall thickness of 14 gauge.

12.7(2) *Toilet bowl.* The toilet bowl shall be constructed of impervious and not readily corrodible material and shall be elevated above the receiving tank sufficiently to avoid splashing the user.

12.7(3) *Vent.* The tank and bowl shall be vented with screened pipe at least three inches in diameter, preferably constructed of cast iron, extending on an angle not less than 30 degrees with the horizontal or vertically to a point at least two feet above the roof.

12.7(4) *Mixing and chemical charge.* The tank shall be equipped with a mixing device and shall be charged with a chemical or chemicals of bactericidal nature and concentration. Chemical recharges shall be added and mixed with the contents frequently to maintain a bactericidal strength and to prevent disagreeable odors.

12.7(5) *Toilet rooms.* Chemical toilets shall be located in toilet rooms which are well lighted and ventilated and kept clean. Tank cleanouts shall not be placed in basements.

12.7(6) *Final disposal of tank contents.* The tank contents shall be disposed of by burning, burial or by discharge into a leaching pit located and constructed in accordance with these rules.

12.8(135) Requirements for comfort stations and toilet rooms. All comfort stations and toilet rooms located in public or quasi-public establishments or on grounds adjacent thereto for the use of the general public or for the patrons of such establishments shall comply with the following requirements:

12.8(1) *Plumbing.* All plumbing work and fixtures hereinafter installed shall comply with the local plumbing ordinance or with the state plumbing code where no local plumbing ordinance is in effect.

12.8(2) *Water pressure.* The water pressure shall be sufficient for effective flushing of toilets, urinals and other fixtures equipped with flushing devices.

12.8(3) *Toilet rooms.* All toilets and urinals shall be located in rooms provided with natural or artificial illumination of three foot-candles intensity on the floor surface and with natural or artificial ventilation affording at least one air change every seven minutes. All toilet rooms shall be maintained in good repair and in a clean and sanitary condition and shall be accessible to approved handwashing facilities.

12.8(4) *Approved handwashing facilities.* Approved handwashing facilities shall consist of a lavatory complying with the requirements of 12.8(3), soap in a suitable dispensing container and single service paper or cloth towels. Cloth towels shall be thoroughly laundered and sterilized before making available for reuse. Roller cloth towels shall be prohibited.

12.8(5) *Common drinking cups.* Common drinking cups shall be prohibited.

CHAPTER 13
MILK AND MILK PRODUCTS

13.1(135) The production, processing and distribution of milk and milk products are by law under the jurisdiction of the state department of agriculture.

Cities and towns also are granted by section 368.25, the power to adopt ordinances pertaining to milk sanitation. It is therefore suggested that cities and towns regulate production, transportation, processing, handling, sampling, examination, grading, labeling, regrading and sale of milk and milk products, the inspection of dairy herds, dairies and milk plants, the issuing and revocation of permits to milk producers and distributors, the placarding of restaurants and other establishments serving milk or milk products in accordance with the terms of the unabridged form of the 1939 edition of the Milk Ordinance and Code recommended by the United States public health service, a copy of which is on file with the department or which may be procured from the United States public health service or the Superintendent of Documents, Washington, D.C.

[Filed prior to July 1, 1952]

CHAPTER 14
EATING AND DRINKING ESTABLISHMENTS

14.1(135) Hotels, restaurants and food establishments are regulated under chapter 170 of the Code, the administration of which comes under the state department of agriculture.

Cities and towns also have the power under section 368.6 to regulate hotels, restaurants and eating houses. It is suggested that cities and towns under this authority regulate sanitation pertaining to the inspection, grading, regrading and placarding of eating and drinking establishments, the issuing and revocation of permits for the operation of such establishments, the sale of adulterated, misbranded or unwholesome food and drink, and the enforcement of this code shall be regulated in accordance with the terms of the unabridged form of the 1940 edition of the Ordinance Regulating Eating and Drinking Establishments recommended by the U. S. public health service, a copy of which is on file with the department, or which may be procured from the U. S. public health service or the Superintendent of Documents, Washington, D.C.

[Filed prior to July 1, 1952]

CHAPTER 15
SWIMMING POOLS AND BATHING PLACES

15.1(135) General. All public swimming pools, wading pools and bathhouses installed in connection with swimming or wading pools which are hereafter constructed or extensively reconstructed or improved shall comply with the following requirements:

15.1(1) *Plans and specifications.* Plans and specifications for new construction, reconstruction or improvements shall be submitted to the department for approval before construction begins.

15.1(2) *Design and construction.* Approval by the department shall be based on the published "Policies Governing the Design and Construction of Swimming Pools."

15.2(135) Operation and maintenance. All swimming pools, wading pools and bathhouses installed in connection with swimming pools or wading pools shall be operated and maintained in compliance with the published "Policies Governing the Operation and Maintenance of Swimming Pools."

[Filed prior to July 1, 1952]

CHAPTER 16
GARBAGE AND REFUSE

16.1(135) Definitions.

16.1(1) *Garbage.* The term "garbage" shall be interpreted to mean all putrescible waste, except sewage and body wastes, including vegetable and animal offal and carcasses of dead animals, but excluding recognized industrial byproducts, and shall include all such substances from all public and private establishments and from all residences.

16.1(2) *Refuse.* The term "refuse" shall include all nonputrescible wastes.

16.2(135) Accumulation of garbage and refuse. No owner or lessee of any public or private premises shall permit to accumulate upon his premises any garbage or refuse except in covered containers approved by the health officer. Such containers shall be constructed in such manner as to be strong, not easily corrodible, rodent proof, insect proof and shall be kept covered at all times except when garbage and refuse is being deposited therein or removed therefrom. In case garbage and one or more types of refuse are disposed of separately, separate containers may be required by the health officer.

16.3(135) Collection of garbage and refuse.

16.3(1) *Collection interval.* All garbage and refuse shall be collected sufficiently frequent to prevent nuisance.

16.3(2) *Permits.* No person, firm or corporation shall collect garbage or refuse who does not possess a permit from the health officer.

16.3(3) *Type of collection vehicles.* The collection of garbage and refuse shall be by means of covered vehicles approved by the health officer.

16.4(135) Disposal of garbage and refuse. All disposal of garbage and refuse shall be by a method or methods specifically approved by the department, provided that said method or methods shall include the maximum practicable rodent, insect and nuisance control at the place or places of disposal.

16.5(135) Dead animals. Disposal of dead animals comes under the jurisdiction of the state department of agriculture as specified in chapter 167 of the Code.

[Filed prior to July 1, 1952]

CHAPTER 17
SANITATION OF HABITABLE BUILDINGS

17.1(135) General. Every dwelling which is in whole or in part leased by the owner or his agent, except hotels and other establishments which are licensed by the department of agriculture, shall comply with the following requirements and in addition all dwellings shall conform to the requirements of the state housing law in all cities where applicable. The owner or lessor shall be deemed responsible for compliance with said requirements.

17.1(1) *Room size.* No habitable room in such a dwelling hereinafter constructed shall have a floor area of less than 80 square feet nor shall the ceiling height be less than seven and one-half feet.

17.1(2) *Heating.* Every such building shall be equipped with heating equipment capable of maintaining every habitable room thereof at a temperature of at least 70°F. whenever occupied.

17.1(3) *Lighting.* Every such building shall be so equipped as to provide every habitable room thereof with artificial lighting equipment reasonably uniformly distributed and of sufficient intensity to produce illumination of six foot-candles on the floor area, and at least ten foot-candles at certain points for reading, study, sewing and similar tasks. Hallways, stairways and similar passageways shall be provided with one or more foot-candles illumination.

Every habitable room located in any such building shall be provided with one or more windows opening to the outside air and equivalent in glass area to at least eight percent of the floor area of such room in the case of existing buildings, and to at least one-eighth of the floor area of said room in the case of buildings or additions hereafter constructed.

17.1(4) *Ventilation.* Every habitable room located in any such building shall be provid-

ed with an aggregate openable window area of at least four percent of the floor area for existing buildings and of at least six percent for buildings and additions hereafter constructed. The requirements of this item shall not apply to buildings having adequate provisions for artificial ventilation.

17.1(5) *Plumbing and excreta disposal.* All plumbing in such buildings shall comply with the requirements of the local plumbing ordinance. Where no local ordinance is in effect, the plumbing shall comply with the state plumbing code.

Every such building to which running water and sewage disposal are available shall be provided with at least one lavatory, one water closet, one bathtub or shower and one kitchen sink.

Every such building to which running water and sewage disposal are not available shall be provided with at least one pit toilet or chemical toilet seat for every 15 occupants.

17.1(6) *Screening.* Every such building which is located in an area in which flies and mosquitoes have not otherwise been effectively controlled shall have all windows and doors to the outside equipped with screens of not less than 16 meshes to the inch, which are so maintained as to effectively prevent the entrance into the building of flies and mosquitoes, provided that all outside screen doors shall open outward and be self-closing and provided that effective means other than screens may be substituted therefor when specifically approved by the health officer.

17.1(7) *Overcrowding.* If any room in such dwelling is overcrowded the health officer may order the number of persons sleeping or living in said room to be so reduced that there shall not be less than 400 cubic feet of air to each adult and 200 cubic feet of air to each child under 12 years of age occupying such room.

[Filed prior to July 1, 1952]

CHAPTER 18
TOURIST CAMPS, TRAILER CAMPS, CABIN CAMPS, CONSTRUCTION CAMPS AND SIMILAR ESTABLISHMENTS AND AREAS

18.1(135) General. All tourist camps, trailer camps, cabin camps, construction camps and similar establishments and areas available for residence, camp or picnic use which are maintained, operated or leased, free of charge or upon payment of fees, by any municipality, community, institution, corporation, association, firm or person, except hotels and other establishments which are licensed by the state department of agriculture, shall comply with the following requirements:

Trailers may be occupied as temporary residence (except as prohibited by the housing law and local ordinances) only when parked in a trailer camp or other area with facilities complying with the provision of this code.

18.1(1) *Supervision.*

a. The owner or authorized agent shall maintain in good repair and appearance all sanitary facilities and appliances on the premises, and shall be personally liable and responsible for the same. It shall be the duty of the management to bring prompt action as may be necessary to enforce these rules or, if necessary, to eject from the premises any persons who willfully or maliciously damage the sanitary facilities and appliances provided or do not strictly adhere to these or other camp regulations.

b. At least one competent caretaker shall be responsible for the supervision of the premises and shall make necessary routine inspections and exercise all duties necessary in the maintenance of the premises in a strictly sanitary manner.

c. Adequate equipment for maintaining the premises in a strictly sanitary manner at all times shall be provided and maintained by the owner or management.

18.1(2) *Space.* In existing mobile home parks each mobile home space shall be at least eight feet wider than the mobile home. In mobile home parks hereafter constructed, changed or added to, each mobile home space shall be clearly marked, contain not less than 1000 square feet, be at least 25 feet wide and abut a driveway or have clear, unobstructed access to a public highway or alley. In new parks the mobile home shall be parked at least five feet from the boundaries of the park and ten feet from a public street or alley, and ten feet from any building, except for the building housing individual sanitary facilities for each mobile home space. In new parks there shall be a space of at least 15 feet between the sides of every mobile home and at least ten feet between the ends of every mobile home. Mobile home parks, hereafter constructed, shall be well drained and located in areas free from flooding, marshes, swamps or other potential breeding places for insects or rodents.

18.1(3) *Fires.* All fires shall be made in stoves or other equipment provided for that purpose. Open unattended fires shall not be permitted.

18.1(4) *Water supply.* There shall be provided within 200 feet of any trailer space or cabin, accessible at all times, a water supply which complies with the requirements of chapter 11 entitled "Water Supplies."

18.1(5) *Excreta and sewage.* There shall be provided at each such camp, establishment or area, accessible at all times, a method of excreta disposal which complies with the requirements of chapter 12 entitled "Sewage, Industrial Wastes and Excreta Disposal."

18.1(6) *Garbage and refuse.* Every such camp, establishment or area shall comply with the requirements of chapter 16 entitled "Garbage and Refuse."

18.1(7) *Room size, heating, lighting, ventilation, plumbing, screening and overcrowding.* All cabins and other habitable buildings shall comply with the requirements of chapter 17. A group of tourist camp buildings under the same ownership may connect to a common house sewer.

Trailers shall comply with the minimum floor area for habitable rooms. However, the ceiling height may be reduced to six and one-half feet provided adequate cross-ventilation is provided by windows on both sides of the trailer.

18.1(8) *Toilets and washing facilities.* Separate toilets shall be provided for males and females, one for each 25 males and one for each 25 females. Where water is available under pressure, separate hand-washing facilities which comply with the requirements of chapter 12 shall be provided for males and for females or in each cabin or habitable building. Where water under pressure is not available, a wash basin, soap and one towel for each person shall be provided at each cabin or other permanent habitable building. All lavatories, bathtubs and shower baths shall be maintained in a strictly sanitary condition. Toilets and toilet rooms shall comply with the requirements of chapter 12 except that no sewage disposal facilities shall be located within 50 feet of any cabin or trailer. Where fly-tight sanitary privies are provided for trailer camps, they shall be constructed with the seat hinged to permit dumping soil can or chemical toilet contents into the pit. The location of all toilets or privies shall be plainly indicated by appropriate signs.

All trailers with built-in toilets shall be provided with fly-tight, leak-proof metal receptacles for containing human excrement and said receptacle shall contain sufficient chemicals to render the contents free from creating a fly or odor nuisance.

The owner or management of all camp sites shall provide a satisfactory depository for the contents of trailer house chemical toilets, and also shall provide washing facilities for the chemical toilets in a sanitary manner.

18.1(9) *Communicable disease.* It shall be the duty of all camp owners or managers or other persons knowing or suspecting the presence of persons in the camp inflicted with any communicable disease to report the said condition immediately to the local health officer.

18.1(10) *Permanent register.* A permanent register of all guests and patrons of the premises shall be maintained and open to the inspection of the health officer or representative of the department at all times.

[Filed prior to July 1, 1952]

CHAPTER 19
MASS GATHERINGS

19.1(135) Definitions. For the purpose of these rules, the following terms shall have the meaning indicated in this rule:

19.1(1) "Attendant" means any person who obtains admission to an outdoor assembly by the payment of money or without charge.

19.1(2) "Mass gathering" means an outdoor assembly which may be attended by more than 1000 attendants for a period of more than 12 hours duration. A mass gathering does not mean an event which is conducted or sponsored by a governmental unit or agency on publicly owned land or property or an event which is held within a permanent building constructed for the purpose of conducting such activities or similar activities.

19.1(3) "Person" means an individual, group of individuals, partnership, firm, corporation or association.

19.2(135) General prohibition. No person shall sponsor, promote, operate, maintain or conduct a mass gathering unless he shall have complied with the requirements of these rules. Compliance with these rules does not exempt compliance with other federal and state statutes and regulations or local regulations and ordinances.

19.3(135) Notice and plan. Any person planning to sponsor, promote, operate, maintain or conduct a mass gathering shall notify the commissioner of public health at least 30 days before the date the event is scheduled to begin. The notice shall include the plan for compliance with the provisions of these rules.

19.4(135) Requirements. The following shall be provided and in operation at least 24 hours before the mass gathering is scheduled to begin.

19.4(1) *Water supply.* All water shall be from a source approved by the state department of health. If water is not available in a pressure system, transportation vehicles must be approved by the state department of health.

a. For each 24 hour period, at least 5000 gallons of water shall be provided for each 1000 attendants. Water shall be continuously available.

b. At least eight outlets shall be provided for each 1000 attendants. One-half of the outlets shall be of fountain type. The outlets shall be conveniently located.

c. No common drinking cup shall be provided or allowed to be used.

19.4(2) *Washing facilities.* Hand washing facilities with soap and paper towels shall be provided for use of food handlers. These facilities must be located conveniently to each food concession and kitchen.

19.4(3) *Toilet facilities.*

a. The method of toilet waste disposal shall be approved by the state department of health.

b. All toilet facilities shall be enclosed and separate facilities shall be provided for each sex.

c. At least 20 toilet seats shall be provided for each 1000 attendants. Urinals for males shall

be provided, in addition to toilet seats, at the rate of eight linear feet of trench per 100 men.

d. Toilet facilities shall be conveniently located and be accessible for servicing.

e. Toilet facilities shall be kept clean and supplied with toilet tissue.

f. Toilet facilities shall be at least 200 feet from food service facilities. Toilets for each sex shall be at least 150 feet apart.

19.4(4) *Solid waste.* Receptacles for the collection of solid waste shall be located at convenient locations. The receptacles shall be readily accessible to collection vehicles. The pick up and removal of refuse, trash, garbage and rubbish shall be made at least once a day and more often if necessary. Final disposal shall be to a site approved by the state department of health.

19.4(5) *Medical facilities and personnel.* Each site shall be provided with an adequately staffed first aid station. Arrangements shall be made for ambulance service. There shall be some means of summoning an ambulance if required. The first aid station shall be readily accessible to ambulances.

19.4(6) *Food service facilities.* All food service facilities must be inspected and approved by the state department of agriculture before operation.

19.4(7) *Telephone.* At least one telephone shall be provided in a convenient location for each 1000 attendants.

19.5(135) Violation of these rules. Violation of these rules while the mass gathering is in progress, either by default of provision of required services or facilities or because of influx of greater number of attendants than anticipated, shall be grounds for immediately closing the mass gathering by order of the commissioner of public health or other legal means instituted by the commissioner or other state official.

These rules implement section 135.11 of the Code.

[Filed August 17, 1971]

CHAPTER 20
Reserved for future use

TITLE III
STATE PLUMBING CODE

CHAPTER 21
DEFINITIONS

21.1(135) General.

21.1(1) *Meaning.* For the purpose of this code, the following terms shall have the meaning indicated in this chapter.

21.1(2) *Scope.* No attempt is made to define ordinary words which are used in accordance with their established dictionary meaning except where the word has been loosely used and it is necessary to define its meaning as used in this code to avoid misunderstanding.

21.2(135) Definitions of terms.

21.2(1) *Administrative authority.* The administrative authority is the individual official, board, department or agency established and authorized by law to administer and enforce the provisions of the plumbing ordinance as adopted or amended. [See section 368.17.]

21.2(1) *Administrative authority.* The supply system is the unobstructed vertical distance through the free atmosphere between the lowest opening from any pipe, faucet or appurtenance supplying water to a tank, plumbing fixture or other device and the flood level rim of the receptacle. An air gap in the drainage system is the unobstructed vertical distance through the free atmosphere between the lowest opening in a fixture or appliance drain and the flood-level rim of the receiving receptacle, floor drain or other sewer inlet.

21.2(3) *Anchors.* See supports.

21.2(4) *Approved.* Approved means accepted or acceptable under an applicable specification stated or cited in this code, or accepted as suitable for the proposed use under procedures and powers of the state department of health.

21.2(5) *Area drain.* An area drain is a receptacle designed to collect surface or rain water from an open area.

21.2(6) *Backflow.* Backflow is the flow of water or other liquids, mixtures or substances into the distributing pipes of a potable supply of water from any source or sources other than its intended source.

21.2(7) *Backflow preventer.* A backflow preventer is a device or means to prevent backflow into the potable water system.

21.2(8) *Back-siphonage.* Back-siphonage is the flowing back of used, contaminated or polluted water from a plumbing fixture or vessel into a water supply pipe due to a negative pressure in such pipe. See backflow.

21.2(9) *Backflow of sewage or wastes.* The term backflow is also used to mean the flowing back of liquid wastes or sewage.

21.2(10) *Battery of fixtures.* A "battery of fixtures" is any group of two or more similar adjacent fixtures which discharge into a common horizontal waste or soil branch.

21.2(11) *Boiler blow-off.* A boiler blow-off is an outlet on a boiler to permit emptying or discharge of sediment.

21.2(12) *Branch.* A branch is any part of the piping system other than a main, riser or stack.

21.2(13) *Branch, fixture.* See fixture branch.

21.2(14) *Branch, horizontal.* See horizontal branch.

21.2(15) *Branch interval.* A branch interval is a length of soil or waste stack corresponding in general to a story height but in no case less than eight feet, within which the horizontal branches from one floor or story of a building are connected to the stack.

21.2(16) *Branch vent.* A branch vent is a vent connecting one or more individual vents with a vent stack or stack vent.

21.2(17) *Building.* A building is a structure built, erected and framed of component structural parts designed for the housing, shelter, enclosure or support of persons, animals or property of any kind.

21.2(18) *Building drain.* The building (house) drain is that part of the lowest piping of a drainage system which receives the discharge from soil, waste and other drainage pipes inside the walls of the building and conveys it to the building (house) sewer beginning three feet outside the building wall.

21.2(19) *Building sewer.* The building (house) sewer is that part of the horizontal piping of a drainage system which extends from the end of the building drain and which receives the discharge of the building drain and conveys it to a public sewer, private sewer, individual sewage-disposal system or other point of disposal.

21.2(20) *Building storm drain.* A building (house) storm drain is a building drain used for conveying rain water, surface water, ground water, subsurface water or other similar discharge to a building storm sewer or a combined building sewer, extending to a point not less than three feet outside the building wall.

21.2(21) *Building storm sewer.* A building (house) storm sewer is the extension from the building storm drain to the public storm sewer, combined sewer or other point of disposal.

21.2(22) *Building subdrain.* A building (house) subdrain is that portion of a drainage system which cannot drain by gravity into the building sewer.

21.2(23) *Circuit vent.* A circuit vent is a branch vent that serves two or more traps and extends from in front of the last fixture connection of a horizontal branch to the vent stack.

21.2(24) *Code.* The word "code" when used alone shall mean these regulations, subsequent amendments thereto or any emergency rule which the administrative authority having jurisdiction may lawfully adopt.

21.2(25) *Combination fixture.* A combination fixture is a fixture combining one sink and tray or a two- or three-compartment sink or tray in one integral unit.

21.2(26) *Combined building sewer.* A combined building sewer receives storm water and sewage.

21.2(27) *Common vent.* A common vent is a vent connection at the junction of two fixture drains and serving as a vent for both fixtures.

21.2(28) *Conductor.* See leader.

21.2(29) *Continuous vent.* A continuous vent is a vertical vent that is a continuation of the drain to which it connects.

21.2(30) *Continuous waste.* A continuous waste is a drain from two or three fixtures connected to a single trap.

21.2(31) *Cross-connection.* A cross-connection is any physical connection or arrangement between two otherwise separate piping systems, one of which contains potable water and the other water of unknown or questionable safety, whereby water may flow from one system to the other, the direction of flow depending on the pressure differential between the two systems. See backflow and back-siphonage.

21.2(32) *Dead-end.* A dead-end is a branch leading from a soil, waste or vent pipe, building drain or building sewer which is terminated at a developed distance of two feet or more by means of a plug or other closed fitting.

21.2(33) *Developed length.* The developed length of a pipe is its length along the center line of the pipe and fittings.

21.2(34) *Diameter.* Unless specifically stated, the term "diameter" is the nominal diameter as designated commercially.

21.2(35) *Double offset.* A double offset is two changes of direction installed in succession or series in continuous pipe.

21.2(36) *Downspout.* See leader.

21.2(37) *Drain.* A drain is any pipe which carries waste water or water-borne wastes in a building drainage system.

21.2(38) *Drainage system.* A drainage system (drainage piping) includes all the piping within public or private premises, which conveys sewage, rain water or other liquid wastes to a legal point of disposal, but does not include the mains of a public sewer system or a private or public sewage-treatment or disposal plant.

21.2(39) *Dual vent.* See common vent.

21.2(40) *Durham system.* Durham system is a term used to describe soil or waste systems where all piping is of threaded pipe, tubing or other such rigid construction, using recessed drainage fittings to correspond to the types of piping.

21.2(41) *Effective opening.* The effective opening is the minimum cross-sectional area at the point of water-supply discharge, measures are expressed in terms of:

a. Diameter of a circle.

b. If the opening is not circular, the diameter of a circle of equivalent cross-sectional area. (This is applicable to air gap.)

21.2(42) *Fixture branch.* A fixture branch is a pipe connecting several fixtures.

21.2(43) *Fixture drain.* A fixture drain is the drain from the trap of a fixture to the junction of that drain with any other drain pipe.

21.2(44) *Fixture supply.* A fixture supply is a water-supply pipe connecting the fixture with the fixture branch.

21.2(45) *Fixture unit.* A fixture unit is a design factor so chosen that the load producing values of the different plumbing fixtures can be expressed approximately as multiples of that factor.

21.2(46) *Fixture-unit flow rate.* Fixture-unit flow rate is the total discharge flow in g.p.m. of a single fixture divided by seven and one-half which provides the flow rate of that particular plumbing fixture as a unit of flow. Fixtures are rated as multiple of this unit of flow.

21.2(47) *Flood level.* See flooded.

21.2(48) *Flood-level rim.* The flood-level rim is the top edge of the receptacle from which water overflows.

21.2(49) *Flooded.* A fixture is flooded when the liquid therein rises to the flood-level rim.

21.2(50) *Flush valves.* A flush valve is a device located at the bottom of the tank for the purpose of flushing water closets and similar fixtures.

21.2(51) *Flushometer valve.* A flushometer valve is a device which discharges a predetermined quantity of water to fixtures for flushing purposes and is actuated by direct water pressures.

21.2(52) *Frostproof closet.* A frostproof closet (prohibited) is a hopper that has no water in the bowl and has the trap and the control valve for its water supply installed below the frost line.

21.2(53) *Grade.* Grade is the slope or fall of a line of pipe in reference to a horizontal plane. In drainage it is usually expressed as the fall in a fraction of an inch per foot length of pipe.

21.2(54) *Grease interceptor.* See interceptor.

21.2(55) *Grease trap.* See interceptor.

21.2(56) *Hangars.* See supports.

21.2(57) *Horizontal branch.* A horizontal branch is a drain pipe extending laterally from a soil or waste stack or building drain, with or without vertical sections or branches, which receives the discharge from one or more fixture drains and conducts it to the soil or waste stack or to the building (house) drain.

21.2(58) *Horizontal pipe.* A horizontal pipe is any pipe or fitting which is installed in a horizontal position or which makes an angle of less than 45° with the horizontal.

21.2(59) *House drain.* See building drain.

21.2(60) *House sewer.* See building sewer.

21.2(61) *Indirect waste pipe.* An indirect waste pipe is a pipe that does not connect directly with the drainage system but conveys liquid wastes by discharging into a plumbing fixture or receptacle which is directly connected to the drainage system.

21.2(62) *Individual vent.* An individual vent is a pipe installed to vent a fixture trap and which connects with the vent system above the fixture served or terminates in the open air.

21.2(63) *Industrial wastes.* Industrial wastes are liquid wastes resulting from the processes employed in industrial establishments which do not contain domestic sewage. Liquid wastes are the discharges from any fixture, appliance, area or appurtenance which do not contain fecal matter.

21.2(64) *Interceptor.* An interceptor is a device designed and installed so as to separate and retain deleterious, hazardous or undesirable matter from normal wastes and permit normal sewage or liquid wastes to discharge.

21.2(65) *Leader.* A leader (downspout) is the water conductor from the roof to the building storm drain, combined building sewer or other means of disposal.

21.2(66) *Load factor.* Load factor is the percentage of the total connected fixture unit flow rate which is likely to occur at any point in the drainage system. It varies with the type of occupancy, the total flow unit above this point being considered, and with the probability factor of simultaneous use.

21.2(67) *Loop vent.* A loop vent is the same as a circuit vent except that it loops back and connects with a stack vent instead of a vent stack.

21.2(68) *Main.* The main of any system of continuous piping is the principal artery of the system to which branches may be connected.

21.2(69) *Main sewer.* See public sewer.

21.2(70) *Main vent.* The main vent is the principal artery of the venting system to which vent branches may be connected.

21.2(71) *Offset.* An offset in a line of piping is a combination of elbows or bends which brings one section of the pipe out of line but into a line parallel with the other section.

21.2(72) *Person.* Person is a natural person, his heirs, executors, administrators or assigns; and includes a firm, partnership or corporation, its or their successors or assigns. Singular includes plural; male includes female.

21.2(73) *Pitch.* See grade.

21.2(74) *Plumbing.* Plumbing includes the practice, materials and fixtures used in the in-

stallation, maintenance, extension and alteration of all piping, fixtures, appliances and appurtenances in connection with any of the following: Sanitary drainage or storm drainage facilities, the venting system and the public or private water-supply systems, within or adjacent to any building, structure or conveyance; also the practice and materials used in the installation, maintenance, extension or alteration of the storm-water, liquid wastes or sewerage, and water-supply systems of any premises to their connection with any point of public disposal or other acceptable terminal.

21.2(75) *Plumbing fixtures.* Plumbing fixtures are installed receptacles, devices or appliances which are supplied with water or which receive or discharge liquids or liquid-borne wastes, with or without discharge into the drainage system with which they may be directly or indirectly connected.

21.2(76) *Plumbing inspector.* See administrative authority.

21.2(77) *Plumbing system.* The plumbing system includes the water-supply and distribution pipes; plumbing fixtures and traps; soil, waste and vent pipes; building drains and building sewers including their respective connections, devices and appurtenances within the property lines of the premises and water-treating or water-using equipment.

21.2(78) *Pool.* A pool is a water receptacle used for swimming or as a plunge or other bath designed to accommodate more than one bather at a time.

21.2(79) *Potable water.* Potable water is water which is satisfactory for drinking, culinary and domestic purposes and meets the standards of the state department of health.

21.2(80) *Private or private use.* In the classification of plumbing fixtures, private supplies to fixtures in residences and apartments and to fixtures in private bathrooms of hotels and similar installations where the fixtures are intended for the use of a family or an individual.

21.2(81) *Private sewer.* A private sewer is a sewer privately owned and not directly controlled by public authority.

21.2(82) *Public or public use.* In the classification of plumbing fixtures, public applies to fixtures in general toilet rooms of schools, gymnasiums, hotels, railroad stations, public buildings, bars, public comfort stations or places to which the public is invited or which are frequented by the public without special invitation and other installations (whether pay or free) where a number of fixtures are installed so that their use is similarly unrestricted.

21.2(83) *Public sewer.* A public sewer is a common sewer directly controlled by public authority.

21.2(84) *Relief vent.* A relief vent is a vent the primary function of which is to provide circulation of air between drainage and vent systems.

21.2(85) *Return offset.* A return offset is a double offset installed so as to return the pipe to its original alignment.

21.2(86) *Rim.* A rim is an unobstructed open edge of a fixture.

21.2(87) *Riser.* A riser is a water-supply pipe which extends vertically one full story or more to convey water to branches or fixtures.

21.2(88) *Roof drain.* A roof drain is a drain installed to receive water collecting on the surface of a roof and to discharge it into the leader (downspout).

21.2(89) *Roughing-in.* Roughing-in is the installation of all parts of the plumbing system which can be completed prior to the installation of fixtures. This includes drainage, water supply, vent piping and the necessary fixture supports.

21.2(90) *Sand interceptor.* See interceptor.

21.2(91) *Sanitary sewer.* A sanitary sewer is a pipe which carries sewage and excludes storm, surface and ground water.

21.2(92) *Separator.* See interceptor.

21.2(93) *Septic tank.* A septic tank is a watertight receptacle which receives the discharge of a drainage system or part thereof, and is designed and constructed so as to separate solids from the liquids, digest organic matter through a period of detention, and allow the settled sewage to discharge therefrom (usually) to some form of secondary treatment.

21.2(94) *Secondary treatment.* Secondary treatment is provided for septic tank effluent by one or a combination of the following means, including: A system of open-jointed or perforated lines, laid in soil capable of absorbing the liquid; by buried or open sand filters with or without collector tile; or by other soil absorption systems all designed to reduce the organic matter in the liquid and dispose of the liquid without nuisance or public health hazard.

21.2(95) *Sewage.* Sewage is any liquid waste containing animal or vegetable matter in suspension or solution and may include liquids containing chemicals in solution.

Domestic sewage is the water-borne wastes derived from ordinary living processes.

21.2(96) *Shall, should.* The word "shall" is a mandatory term. The word "should" is a nonmandatory term, but describes recommended procedures.

21.2(97) *Side vent.* A side vent is a vent connecting to the drain pipe through a fitting at an angle not greater than 45° to the vertical.

21.2(98) *Slope.* See grade.

21.2(99) *Soil pipe.* A soil pipe is any pipe which conveys the discharge of water closets, urinals or fixtures having similar functions, with or without the discharge from other fixtures, to the building drain or building sewer.

21.2(100) *Special waste pipe.* See chapter 29.

21.2(101) *Stack.* A stack is the vertical main of a system of soil, waste or vent piping.

21.2(102) *Stack group.* Stack group is a term applied to the location of fixtures in relation to the stack so that by means of proper fitting vents may be reduced to a minimum.

21.2(103) *Stack vent.* Stack vent (sometimes called a waste vent or soil vent) is the extension of a soil or waste stack above the highest horizontal drain connected to the stack.

21.2(104) *Stack venting.* Stack venting is a method of venting a fixture or fixtures through the soil or waste stack.

21.2(105) *Storm drain.* See building storm drain.

21.2(106) *Storm sewer.* A storm sewer is a sewer used for conveying rain water, surface water, condensate, cooling water or similar liquid wastes, exclusive of sewage and industrial waste.

21.2(107) *Subsoil drain.* A subsoil drain is a drain which receives only subsurface or seepage water and conveys it to a place of disposal.

21.2(108) *Sump.* A sump is a tank or pit which receives sewage or liquid waste, located below the normal grade of the gravity system and which must be emptied by mechanical means.

21.2(109) *Supports.* Supports, hangers and anchors are devices for supporting and securing pipe and fixtures to walls, ceilings, floors or structural members.

21.2(110) *Trap.* A trap is a fitting or device so designed and constructed as to provide, when properly vented, a liquid seal which will prevent the back passage of air without materially affecting the flow of sewage or waste water through it.

21.2(111) *Trap seal.* The trap seal is the maximum vertical depth of liquid that a trap will retain, measured between the crown weir and the top of the dip of the trap.

21.2(112) *Vacuum breaker.* See backflow preventer.

21.2(113) *Vent pipe.* See vent system.

21.2(114) *Vent stack.* A vent stack is a vertical vent pipe installed primarily for the purpose of providing circulation of air to and from any part of the drainage system.

21.2(115) *Vent system.* A vent system is a pipe or pipes installed to provide a flow of air to or from a drainage system or to provide a circulation of air within such system to protect trap seals from siphonage and back pressure.

21.2(116) *Vertical pipe.* A vertical pipe is any pipe or fitting which is installed in a vertical position or which makes an angle of not more than 45° with the vertical.

21.2(117) *Waste.* See industrial wastes and liquid wastes.

21.2(118) *Waste pipe.* A waste pipe is a pipe which conveys only liquid waste, free of fecal matter.

21.2(119) *Water-distributing pipe.* A water-distributing pipe in a building or premises is a pipe which conveys water from the water-service pipe to the plumbing fixtures and other water outlets.

21.2(120) *Water main.* The water (street) main is a water supply pipe for public or community use.

21.2(121) *Water outlet.* A water outlet, as used in connection with the water-distributing system is the discharge opening for the water (1) to a fixture; (2) to atmospheric pressure (except into an open tank which is part of the water-supply system); (3) to a boiler or heating system; (4) to any water-operated device or equipment requiring water to operate, but not a part of the plumbing system.

21.2(122) *Water riser pipe.* See riser.

21.2(123) *Water-service pipe.* The water-service pipe is the pipe from the water main or other source of water supply to the building served.

21.2(124) *Water-supply system.* The water-supply system of a building, or premises, consists of the water-service pipe, the water-distributing pipes and the necessary connecting pipes, fittings, control valves and all appurtenances in or adjacent to the building or premises.

21.2(125) *Wet vent.* A wet vent is a vent which receives the discharge from waste other than water closets.

21.2(126) *Yoke vent.* A yoke vent is a pipe connecting upward from a soil or waste stack to a vent stack for the purpose of preventing pressure changes in the stacks.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971, March 15, 1972]

CHAPTER 22
GENERAL REGULATIONS

22.1(135) Conformance with code.

22.1(1) *Requirements.* Whenever provisions of this code are inconsistent with provisions of the Uniform Plumbing Code, published by the International Association of Plumbing and Me-

chanical Officials, 1970 Edition with subsequent additions and supplements in effect at the time this subrule is filed with the Secretary of State, counties, cities and towns may adopt by regulation or ordinance either the provisions of this code or of the Uniform Plumbing Code referenced above.

This subrule is intended to implement section 135.11(7) of the Code of Iowa.

22.1(2) *Applicability.* The provisions of this code are applicable to the plumbing in buildings and premises within cities and towns and to plumbing in buildings and premises located outside the corporate limits of any city or town but which are served by individual connections to municipal water supply or sewer systems located inside the corporate limits.

22.2(135) Horizontal drainage piping. Horizontal drainage piping shall be run in practical alignment at a uniform grade. [See 31.3(135) for specific slopes.]

22.3(135) Change in direction.

22.3(1) *Fittings.* Changes in direction in drainage piping shall be made by the appropriate use of 45° Y's, long-or-short-sweep quarter bends, sixth, eighth or sixteenth bends or by a combination of these or equivalent fittings. Single and double sanitary T's and quarter bends may be used in drainage lines only where the direction of flow is from the horizontal to the vertical.

22.3(2) *Short sweeps.* Short sweeps no less than three inches in diameter may be used in soil and waste lines where the change in direction of flow is from either the horizontal to the vertical or from the vertical to the horizontal and may be used for making necessary offsets between the ceiling and the next floor above.

22.4(135) Fittings and connections.

22.4(1) *Fittings prohibited.* No double T or double sanitary branch, twin ell, St. ell or St. 45° ells shall be used on soil or waste lines. The drilling and burning of holes in or the tapping of house drains, soil, waste or vent pipes, the use of saddle hubs and bends, and the welding or brazing of parts into pipes to make fittings are prohibited. Sanitary crosses having at least twice the diameter of the branch opening may be used in a vertical position. Cast iron closet bends shall be used only in or underground.

22.4(2) *Heel or side-inlet bend.* A heel or side-inlet opening quarter bend shall not be used as a dry vent when the inlet is placed in a horizontal position.

22.4(3) *Obstruction to flow.* No fitting, connection, device or method of installation which obstructs or retards the flow of water, wastes, sewage or air in the drainage or venting systems in an amount greater than the normal frictional resistance to flow shall be used unless it is indicated as acceptable in this code, or is approved by the administrative authority as having a desirable and acceptable function and as of ultimate benefit to the proper and continuing functioning of the plumbing system. The enlargement of a three-inch closet bend or stub to four inches shall not be considered an obstruction. None of the methods described in 22.27(1) to 22.27(5) shall be considered as restriction to flow.

22.5(135) Repairs and alterations.

22.5(1) *Existing buildings.* In existing buildings or premises in which plumbing installations are to be altered, repaired or renovated deviations from the provisions of this code may be permitted, provided such deviations are found to be necessary, conform to the intent of this code and are approved in writing by the administrative authority. When a building is moved from one location to another no additional work or connection shall be made until the plumbing in said building is inspected and if necessary reconstructed to comply with this code. Nor shall additional plumbing work be installed in any building where there is defective or improperly installed plumbing until such defects have been repaired, renovated, replaced or removed.

22.5(2) *Health or safety.* Wherever compliance with all the provisions of this code fails to eliminate or alleviate a nuisance which may involve health or safety hazards, the owner or his agent shall install such additional plumbing or drainage equipment as may be found necessary by the administrative authority.

22.6(135) Sewer and water pipes. Water-service pipes or any underground water pipes shall not be run or laid in the same trench as the building sewer or drainage piping, except as provided in chapters 30 and 31.

22.7(135) Trenching, excavation and backfill.

22.7(1) *Support of piping.* Buried piping shall be supported throughout its entire length.

22.7(2) *Tunneling and driving.* Tunneling may be done in yards, courts or driveways of any building site.

22.7(3) *Open trenches.* All excavations required to be made for the installation of a building-drainage system, or any part thereof within the walls of a building, shall be open trench work. All such trenches and tunnels shall be kept open until the piping has been inspected, tested and accepted.

22.7(4) *Mechanical excavation.* Mechanical means of excavation may be used.

22.7(5) *Backfilling.* Adequate precaution shall be taken to insure proper compactness of backfill around piping without damage to such piping.

22.7(6) *Backfill material.* Trenches shall be backfilled in thin layers to 12 inches above the

top of the piping with clean earth which shall not contain stones, boulders, cinderfill or other materials which would damage or break the piping or cause corrosive action. Mechanical devices such as bulldozers, graders, etc., may be then used to complete backfill to grade. Fill shall be properly compacted.

22.8(135) Structural safety. In the process of installing or repairing any part of a plumbing and drainage installation, the finished floors, walls, ceilings, tile work or any other part of the building or premises which must be changed or replaced shall be left in a safe structural condition as determined by the proper administrative authority.

22.9(135) Workmanship. Workmanship shall conform to generally accepted good practice.

22.10(135) Protection of pipes.

22.10(1) *Breakage and corrosion.* Pipes passing under or through walls shall be protected from breakage. Pipes passing through or under cinder or concrete or other corrosive material shall be protected against external corrosion by protective coating, wrapping or other means which will prevent such corrosion.

22.10(2) *Cutting or notching.* No structural member shall be weakened or impaired by cutting, notching or otherwise, except to the extent permitted by the proper administrative authority.

22.10(3) *Pipes through footings or foundation walls.* A soil or waste pipe or building drain passing under a footing or through a foundation wall shall be provided with a relieving arch; or there shall be built into the masonry wall a pipe sleeve two pipe sizes greater than the pipe passing through or equivalent protection shall be provided.

22.10(4) *Freezing.* No water, soil or waste pipe shall be installed or permitted outside of a building or in an exterior wall unless adequate provision is made to protect such pipe from freezing where necessary.

22.11(135) Damage to drainage system or public sewer. No person shall deposit by any means into the building drainage system or sewer any ashes; cinders; rags; inflammable, poisonous or explosive liquids, gases, oils; or any other material which would or could obstruct, damage or overload such system or sewer, except as herein provided.

22.12(135) Industrial waste. Waste detrimental to the public sewer system or detrimental to the functioning of the sewage-treatment plant shall be treated and disposed of as found necessary and directed by the administrative authority having jurisdiction.

22.13(135) Sleeves. When directed, annular space between sleeves and pipes located in exterior walls shall be filled or tightly calked with coal tar or asphaltum compound, lead or other material found equally effective and approved as such by the administrative authority.

22.14(135) Ratproofing.

22.14(1) *Exterior openings.* All exterior openings provided for the passage of piping shall be properly sealed with snugly fitting collars of metal or other approved rat-proof material securely fastened into place.

22.14(2) *Interior openings.* Interior openings through walls, floors and ceilings shall be ratproofed as found necessary by the administrative authority.

22.15(135) Used or secondhand equipment. It shall be unlawful to purchase, sell or install used equipment or material for plumbing installation unless it complies with the minimum standards set forth in this code.

22.16(135) Condemned equipment. Any plumbing equipment condemned by the administrative authority because of wear, damage, defects or sanitary hazards shall not be reused for plumbing purposes.

22.17(135) Depth of building sewer and water service (outside of building). Sewers and water-service piping shall be installed below the expected frost penetration.

22.18(135) Piping in relation to footings. No piping shall be laid parallel to footings or outside bearing walls closer than three feet, except as may be approved by the administrative authority, upon a finding that a less distance is safe. Such piping installed deeper than footings or bearing walls shall be 45° therefrom, except as may be approved by the administrative authority, upon a finding that a greater angle is safe.

22.19(135) Drainage below sewer level. Drainage piping located below the level of the sewer shall be installed as provided for in chapters 30 and 31.

22.20(135) Connections to plumbing system required. All plumbing fixtures, drains, appurtenances and appliances used to receive or discharge liquid wastes or sewage shall be connected properly to the drainage system of the building or premises, in accordance with the requirements of this code.

22.21(135) Sewer required. Every building in which plumbing fixtures are installed shall have a connection to a public sewer or private sewer except as provided in 22.22(135).

22.22(135) Individual or private sewage disposal system. When a public sewer is not available for use, sewage and drainage piping shall be connected to an individual sewage disposal system of adequate capacity and of proper location, design and construction to prevent an insanitary or stream pollution condition. A plan showing the location and the design of the sewage treatment

facilities and the location of any wells within 75 feet of the site shall be filed with the application for a plumbing permit.[See 34.3(135).]

Under the provisions of the water pollution control law, section 455B.45 of the Code, a permit for the disposal of sewage or water-borne wastes is required to be obtained from the state department of health; except that no permit is required for any new disposal system or extension or addition to an existing disposal system that receives or may receive only domestic sewage from a building to be occupied by 15 persons or less. Plans and specifications for such installations must be submitted to the state department of health before a permit will be issued, and construction of such an installation shall not be started until such a permit has been obtained.

22.23(135) Location of fixtures.

22.23(1) *Light and ventilation.* Plumbing fixtures, except drinking fountains and single lavatories, shall be located in compartments or rooms provided with adequate ventilation and illumination.

22.23(2) *Improper location.* Piping, fixtures or equipment shall not be located in such a manner as to interfere with the normal operation of windows, doors or other exit openings.

22.24(135) Piping measurements. Except where otherwise specified in this code, all measurements between pipes or between pipes and walls, etc., shall be made to the center lines of the pipes.

22.25(135) Venting. The drainage system shall be provided with a system of vent piping which will permit the admission or emission of air so that under no circumstances of normal or intended use shall the seal of any fixture trap be subjected to a pressure differential of more than one inch of water.

22.26(135) Ventilation ducts.

22.26(1) *Independent system.* Ventilation ducts from washrooms and toilet rooms shall exhaust to the outer air or form an independent system.

22.26(2) *Gas water heaters.* All gas water heaters shall have a vent pipe of approved material installed so as to vent to the outside air; either through an established flue or independently through the roof. Rubber tubing shall not be used as gas supply lines.

22.27(135) Water closet connections.

22.27(1) *Lead.* Three-inch lead bends and stubs may be used on water closets or similar connections, provided the inlet is dressed or expanded to receive a four-inch flange.

22.27(2) *Reducing.* Four- by three-inch reducing bends are permitted.

22.27(3) *Copper.* Three-inch copper bends may be used on water closets or similar connections provided a four- by three-inch flange is used to receive the fixture horn.

22.27(4) *Cast iron.* Wall-hung water closets with cast iron drainage connections may be used when approved by the local administrative authority.

22.27(5) *Plastic.* Plastic closet bends and flanges may be used when approved by the local administrative authority.

22.28(135) Dead ends. In the installation or removal of any part of a drainage system, dead ends shall be avoided except where necessary to extend a cleanout so as to be accessible.

22.29(135) Toilet facilities for workmen. Suitable toilet facilities shall be provided and maintained in a sanitary condition for the use of workmen during the construction of any building.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971, December 12, 1972]

CHAPTER 23
MATERIALS—QUALITY AND WEIGHT

23.1(135) Materials.

23.1(1) *Minimum standards.* The materials listed in this chapter shall conform at least to the current issues of the standards cited when used in the construction, installation, alteration or repair of any part of a plumbing and drainage system, except that the administrative authority may allow the extension, addition or relocation of existing soil, waste or vent pipes with materials of like grade or quality, as permitted in 22.5(1).

Extra heavy weight cast iron soil and waste pipe may be either statically or centrifugally cast. Service weight cast iron soil and waste pipe shall be centrifugally or spun cast or of equal quality.

23.1(2) *Use of materials.* Each material listed in table 23.5(135) shall conform to the current issue of at least one of the standards cited opposite it. Its use shall be further governed by the requirements imposed in other chapters of this code. Materials not included in the table shall be used only as provided in 23.1(1). Materials shall be free of manufacturing defects or damage, however occasioned, which would or would tend to render such materials defective, unsanitary or otherwise improper to accomplish the purpose of this code.

23.1(3) *Specifications for materials.* Standard specifications for materials for plumbing installations are listed in table 23.5(135). Products conforming at least to any of the specifications listed for a given material shall be considered acceptable.

NOTE 1.

Abbreviations used in table 23.5(135) refer to standards or specifications as identified below:

ANSI Standards approved by the American Standards National Institute Inc., 1430 Broadway, New York, N.Y. 10018.

ASTM Standards and Tentative Standards published by the American Society for Testing Materials, 1916 Race St., Philadelphia, Pennsylvania 19103.

FS Federal Specifications published by the Federal Specifications Board and obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

AWWA Standards and Tentative Standards published by the American Water Works Association, 2 Park Avenue, New York, N.Y. 10016.

MSS Standards published by the Manufacturers Standardization Society of the Valve and Fittings Industry, 420 Lexington Avenue, New York, N.Y. 10017.

CS Commercial Standards representing recorded voluntary recommendations of the trade, issued by the United States Department of Commerce, and obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

PS Product Standards will be used to identify all new commercial standards as well as all revisions of existing standards marked 'CS' for Commercial Standards or 'SPR' for Simplified Practice Recommendations. Product standards, commercial standards and simplified practice recommendations are obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

SPR Simplified Practice Recommendations representing recorded recommendations of the trade and issued by the United States Department of Commerce, Washington, D.C. 20402.

NSF Standards and approvals issued by the National Sanitation Foundation Testing Laboratories, Inc., 2355 W. Stadium Blvd., Ann Arbor, Michigan 48106.

NOTE 2.
ASTM standards are issued under fixed designations; the final number indicates the year of original adoption, or in the case of revision the year of the last revision. T indicates Tentative. In the CS series of standards also, the final number indicates the year of issue. For Federal Specifications, the year indicated in table 23.5(135) is that of the date of issue or that of the latest revision or amendment.

NOTE 3.
All standards and specifications for materials are subject to change. Designations carrying indication of the year of issue may thus become obsolete. Table 23.5(135) gives the full designations of standards current at the time this code is printed.

23.1(4) *Identification of materials.* Each length of pipe and each pipe fitting, trap, fixture and device used in a plumbing system shall have cast, stamped or indelibly marked on it the maker's mark or name, the weight, type and classes of the product, when such marking is required by the approved standard that applies. Septic tanks shall be marked with effective capacity and the gauge of metal.

Copper pipe and tubing used for water supply and distribution, and for drainage, waste and vent installations shall be marked in color code by the manufacturer in the form of a spiral or in the form of longitudinal stripes; which markings shall be clearly visible in the completed installation at the time of inspection.

23.2(135) Special materials.

23.2(1) *Metal sheets.* Sheet lead shall not be less than four pounds per square foot for safe pans, three pounds per square foot for vent terminal flashings and shall have a minimum wall thickness of one-eighth inch for lead bends and traps. Sheet copper shall not be less than 12 ounces per square foot for safe pans and eight ounces per square foot for vent terminal flashings.

23.2(2) *Plastic sheets.* Nonplasticized chlorinated polyethylene sheet plastic having a minimum thickness of .040 inch may be used for safe pans.

23.2(3) *Red brass ferrules.* Calking ferrules shall be manufactured from red brass and shall be in accordance with the following:

Pipe sizes (inches)	Inside diameter (inches)	Length (inches)	Minimum Wt. each lb.	oz.
2.....	2 1/4	4 1/2	1	0
3.....	3 1/4	4 1/2	1	12
4.....	4 1/4	4 1/2	2	8

23.2(4) *Red brass bushings.* Soldering bushing shall be of red brass in accordance with the following:

Pipe sizes inches	Minimum weight each lb.	oz.
1 1/4	0	6
1 1/2	0	8
2	0	14
2 1/2	1	6
3	2	0
4	3	8

23.2(5) *Floor flanges.* Floor and wall flanges for water closets or similar fixtures shall be not less than one-eighth inch thick for brass, one-fourth inch thick and not less than two-inch calking depth for cast iron or galvanized malleable iron. Flanges shall be soldered to lead bends or shall be calked or screwed to other metal. Closet screws and bolts shall be of brass.

Plastic floor flanges marked to show conformance with applicable standards and also the National Sanitation Foundation Testing Laboratory may be used when specifically permitted in other sections of this code.

23.2(6) *Cleanouts.*

a. Cleanout plugs shall be of brass and shall conform to Federal Specifications WW-P-401.

b. Plugs may have raised square heads or counter sunk.

c. Counter-sunk heads should be used where raised heads may cause a hazard.

23.2(7) *Chemically stable materials.* Separate drainage and venting systems for chemical wastes shall be of corrosion resistant material approved by the administrative authority. Materials acceptable for such systems include prestressed low expansion borosilicate glass pipe, high silicon content wrought iron pipe, plastic pipe, lead pipe or other material with equal properties and qualities suitable for the wastes to be conveyed.

23.3(135) Alternate materials and methods.

23.3(1) *Existing premises.* In existing buildings or premises in which plumbing installations are to be altered, repaired or renovated, the administrative authority has discretionary powers to permit deviation from the provisions of this code, provided that such a proposal to deviate is first submitted for proper determination in order that health and safety requirements, as they pertain to plumbing, shall be observed.

23.3(2) *Approval.* Provisions of this code are not intended to prevent the use of any material, device, method of assemblage or installation fixture or appurtenance not specifically authorized, providing such alternate has been approved by the administrative authority, in accordance with this rule and the state department of health.

23.3(3) *Evidence of compliance.* The administrative authority shall require sufficient evidence to enable him to judge whether proposed alternates meet the requirements of this code for safety and health.

23.3(4) *Tests.* When there is insufficient evidence to substantiate claims for alternates, the administrative authority may require tests of compliance as proof to be made by an approved agency at the expense of the applicant.

23.3(5) *Test procedure.* Tests shall be made in accordance with generally recognized standards; but in the absence of such standards, the administrative authority shall specify the test procedure.

23.3(6) *Repeated tests.* The administrative authority may require tests to be repeated if, at any time, there is reason to believe that an alternate no longer conforms to the requirements on which its approval was based.

23.4(135) Approved materials.

23.4(1) *Periodic review.* All standards and specifications for materials are subject to change. Designations carrying indication of the year of issue may thus become obsolete. Table 23.5(135) gives the full designations of standards current at the time this code is printed.

23.4(2) *Specific usage.* Each chapter of this code indicates specifically the type of material permitted for the various parts of the plumbing system. The standards for each of those materials are given in table 23.5(135).

CHAPTER 24
JOINTS AND CONNECTIONS

24.1(135) Tightness. Joints and connections in the plumbing system shall be gastight and watertight for the pressures required by test, with the exception of those portions of perforated or open-joint piping which are installed for the purpose of collecting and conveying ground or seepage water to the underground storm drains.

24.2(135) Types of joints.

24.2(1) *Calked joints.* Calked joints for cast iron bell- and spigot-soil pipe shall be firmly packed with oakum or hemp and filled with molten lead not less than one inch deep and not to extend more than one-eighth inch below rim of hub. No paint, varnish or other coatings shall be permitted on the jointing material until after the joint has been tested and approved.

24.2(2) *Threaded joints and screwed joints.* Threads shall conform to ANSI B32.1-1968, or current issue thereof. All burrs shall be removed. Pipe ends shall be reamed out full bore and all chips removed. Pipe jointing compounds shall be used only on male threads.

24.2(3) *Wiped joints.* Joints in lead pipe or fittings, or between lead pipe or fittings and brass or copper pipe, ferrules, solder nipples or traps shall be full-wiped joints. Wiped joints shall have an exposed surface on each side of a joint not less than three-fourths inch and at least as thick as the material being jointed. Wall or floor flange lead-wiped joints shall be made by using a lead ring or flange placed behind the joint at wall or floor.

Joints between lead pipe and cast iron, steel or wrought iron shall be made by means of a calking ferrule, soldering nipple or bushing.

24.2(4) *Soldered or sweat joints.* Soldered or sweat joints for tubing shall be made with approved fittings. Surfaces to be soldered or sweated shall be cleaned bright. The joints shall be properly fluxed and made with approved solder.

Joints in copper water tubing shall be made by the appropriate use of approved brass or copper water fittings, properly soldered or sweated together.

24.2(5) *Flared joints.* Flared joints for soft-copper water tubing shall be made with fittings meeting approved standards. The tubing shall be expanded with a proper flaring tool.

24.2(6) *Hot-poured joints.* Hot-poured compound for clay or concrete sewer pipe shall not be water absorbent and when poured against a dry surface shall have a bond of not less than 100 pounds per square inch. All surfaces of the joint shall be cleaned and dried before pouring. If wet surfaces are unavoidable, a suitable primer shall be applied. Compound shall not soften sufficiently to destroy the effectiveness of the joint when subjected to a temperature of 160° F. nor be soluble in any of the waste carried by the drainage system. Approximately 25 percent of the joint space at the base of the socket shall be filled with jute or hemp. A pouring collar, rope or other device shall be used to hold the hot compound during pouring. Each joint shall be poured in one operation until the joint is filled. Joints shall not be tested until one hour after pouring.

24.2(7) *Precast joints.* Precast joints for clay sewer pipe shall be made of a material that is inert and resistant to both acids and alkalies. Such joints shall be formed both on the spigot and in the bell of the pipe at the time of pipe manufacture.

Precast compression joints having resilient properties [See table 23.5(135)] may be used for building sewers of clay tile, except when the temperature of the waste will exceed 212° F. Immediately prior to making joint contact, the surfaces shall be wiped free of foreign matter and coated with an appropriate lubricant compound; followed by positioning the top or one side of the spigot into the previously laid bell, easing the pipe into alignment with steady pressure, and drawing or pushing the pipe until the spigot is seated against the shoulder of the hub.

Precast joints of bituminous or similar compounds may be used for building sewers of clay tile, provided that the joint material is not soluble in any of the wastes carried by the drainage system and that the temperature of the wastes does not exceed 160° F. Collar surfaces of such joints shall be conical, with side slopes of 3° with the axis of pipe, and the length shall be equal to the depth of the socket. Prior to making joint contact, the surfaces shall be cleaned and coated with appropriate solvents and adhesives. When the spigot end is inserted in the collar, it shall bind before contacting the base of the socket.

24.2(8) *Brazed joints—soldered joints.* Brazed or soldered joints shall be made with approved fittings. Surfaces to be brazed or soldered shall be cleaned bright. The joints shall be properly fluxed and made with approved solder. Brazed joints shall be made in accordance with ANSI B31.1.0-1967, or current issue thereof.

24.2(9) *Cement mortar joints.* Cement joints shall be used only when specifically permitted in other chapters of this code or when approved by the administrative authority as sufficient to accomplish the purpose of this code. A layer of jute or hemp shall be inserted into the base of the joint space and rammed to prevent mortar from entering the interior of the pipe. Jute or hemp shall be dipped into a slurry suspension of portland cement in water prior to insertion into bell. Not more than 25 percent of the joint space shall be used for jute or hemp. The remaining space shall be filled in one continuous operation with a thoroughly mixed mortar composed of one part cement and two parts sand, with only sufficient water to make the mixture workable by hand. After one-half hour of setting, the joint shall be rammed around entire periphery with a blunt tool to force the partially stiffened mortar into the joint and to repair any cracks formed during the initial setting period. Pipe interior shall be swabbed to remove any material that might have fallen into the interior. Additional mortar of the same composition shall then be troweled so as to form 45-degree taper with barrel of the pipe.

24.2(10) *Burned lead joints.* Burned (welded) lead joints shall be lapped and the lead shall be fused together to form a uniform weld at least as thick as the lead being joined.

24.2(11) *Asbestos cement sewer pipe joints.* Joints in asbestos cement pipe shall be made with sleeve couplings of the same composition as the pipe, sealed with rubber rings. Joints between asbestos cement pipe and metal pipe shall be made by means of an adapter coupling calked as required in 24.2(1).

24.2(12) *Bituminized fiber pipe joints.* Joints in bituminized fiber pipe shall be made with tapered type couplings of the same material as the pipe. Joints between bituminized fiber pipe and metal pipe shall be made by means of an adapter coupling calked as required in 24.2(1).

24.2(13) *Flexible plastic pipe joints.* Joints in flexible plastic pipe shall be made by the appropriate use of insert and clamp type fittings which bear the National Sanitation Foundation seal of approval. All clamps shall be broad flat bands of corrosion resistant material, with all parts of the same material. The pipe to be joined shall be squarely cut, free of burrs and the ends wiped clean. Hot water may be used as the lubricant for the fittings; but under no circumstances shall pipe dope, gasket cement, detergent or petroleum lubricants be used. Each clamp shall be positioned over the smooth section ahead of the serrations of a fitting and securely tightened.

24.2(14) *Rigid plastic pipe joints.* Joints in rigid plastic pipe shall be made only with solvent welded or threaded type fittings; provided that threaded joints may be used only with Schedules 80 and 120 I.P.S. pipe and fittings. Fittings for solvent welded joints shall be of the same material as the pipe to be joined. The solvent cement used shall be specifically designated for the pipe material and, for potable water lines, also shall bear the approval of the National Sanitation Foundation Testing Laboratory. The pipe to be joined shall be squarely cut, free of burrs and the ends wiped dry and clean. The solvent cement shall be applied uniformly to the bell of the fitting and to the spigot of the pipe to a distance equal to the fitting depth. The pipe shall be inserted firmly to assure seating of the spigot against the shoulder of the fitting and, if possible, rotated slightly to assure even distribution of the cement. All excess cement shall be wiped from the exterior of the finished joint.

Threaded joints in rigid plastic pipe shall be made as provided in 24.2(2).

24.2(15) *Preformed gaskets.* Joints in cast iron soil pipe may be made using moulded elastomeric compression type gaskets as an alternate for and interchangeably with calked joints as described in 24.2(1) provided the pipe is centrifugally (spun) cast and of suitable design to provide a watertight joint. The soil pipe and fittings and the gaskets shall be marked to show that they were manufactured in conformance with the applicable standards. See table 23.5(135).

24.3(135) Type of pipes.

24.3(1) *Clay sewer pipe.* Joints in vitrified clay pipe or between such pipe and metal pipe shall be made as provided in 24.2(6,7) or otherwise approved under 23.3(2).

24.3(2) *Concrete sewer pipe.* Joints in concrete sewer pipe or between such pipe and metal pipe shall be made as provided in 24.2(6,7) or otherwise approved under 23.3(2).

24.3(3) *Cast iron soil pipe.* Joints in cast iron soil pipe shall be calked as provided in 24.2(1) or made up using compression type joints as provided in 24.2(15).

24.3(4) *Screw pipe to cast iron.* Joints between wrought iron, steel, brass or copper pipe and cast iron pipe shall be either calked or threaded joints made as provided in 24.2(1,2) or shall be made with approved adapter fittings.

24.3(5) *Lead to cast iron, wrought iron or steel.* Joints between lead and cast iron, wrought iron or steel pipe shall be made by means of wiped joints to a calking ferrule soldering nipple or bushing as provided in 24.2(3).

24.3(6) *Copper water tube.* Joints in copper tubing shall be made either by the appropriate brass or copper water fittings, properly sweated or soldered together or by means of approved compression fittings as provided by 24.2(4, 5).

24.3(7) *Flexible plastic pipe to metal water pipe.* Joints between flexible plastic pipe and metal water pipe shall be made by means of insertable adapter fittings with the plastic pipe attached as provided in 24.2(13) and with the metal pipe attached as provided in 24.2(2). Joint compound bearing the approval of the National Sanitation Foundation Testing Laboratory shall be used on the male threads on the metal side only, and no joint compound shall be used on the plastic pipe side.

24.3(8) *Rigid plastic pipe to metal water pipe.* Joints between rigid plastic pipe and metal water pipe shall be made by means of suitable adapter fittings with the plastic pipe attached as provided in 24.2(14) and with the metal pipe attached as provided in 24.2(2).

24.3(9) *Rigid plastic pipe to metal soil and waste pipe.* Joints between rigid plastic pipe and metal pipe shall be made with suitable adapter fittings except that plastic pipe shall be attached to cast iron soil pipe as provided in 24.2(1).

24.4(135) Methods of union.

24.4(1) *Copper tubing to screwed pipe joints.* Joints from copper tubing to threaded pipe shall be made by the use of brass or copper converter fittings. The joint between the copper tubing and the fitting shall be properly sweated or soldered, and the connection between the threaded pipe and the fittings shall be made with a standard pipe size or screw joint.

24.4(2) *Brazing or welding.* Brazing or welding shall be performed in accordance with requirements of recognized published standards of practice, ANSI B31.1.0-1967, or current issue thereof and by qualified mechanics except when the method proposed is determined by the administrative authority to be equivalent procedure for the purpose of this code.

24.4(3) *Slip joints.* In drainage and water piping, slip joints may be used only on the inlet side of the trap or in the trap seal and on the exposed fixture supply.

24.4(4) *Ground joint brass connections.* Ground joint brass connections which allow adjustment of tubing but provide a rigid joint when made up shall not be considered as slip joints.

24.5(135) Unions (screwed).

24.5(1) *Drainage system.* Unions may be used in the trap seal and on the inlet side of the trap. Unions shall have metal-to-metal seats.

24.5(2) *Water-supply systems.* Unions in the water-supply system shall be metal-to-metal with ground seats.

24.6(135) Water closet, pedestal urinal and trap standard service. Fixture connections between drainage pipes and water closets, floor-outlet service sinks, pedestal urinals and earthenware trap standards shall be made by means of brass or iron flanges, calked, soldered or screwed to the drainage pipe. The connection shall be bolted with an approved gasket or washer or setting compound between the earthenware and the connection. The floor flange shall be set on an approved firm base. The use of commercial putty or plaster is prohibited. Plastic flanges may also be used when specifically permitted in other sections of this code.

24.7(135) Prohibited joints and connections.

24.7(1) *Drainage system.* Any fitting or connection which has an enlargement, chamber or recess with a ledge, shoulder or reduction of pipe area, that offers an obstruction to flow through the drain, is prohibited.

24.7(2) *Exception.* No fitting or connection that offers abnormal obstruction to flow shall be used. The enlargement of a three-inch closet bend or stub to four inches shall not be considered an obstruction.

24.7(3) *Lead bend or ferrule.* No branch connection shall be made to a lead bend or ferrule.

24.8(135) Waterproofing of openings. Joints at the roof, around vent pipes shall be made watertight by the use of lead, copper or other approved flashings or flashings material. Exterior-wall openings shall be made watertight.

24.9(135) Increasers and reducers. Where different sizes of pipes, or pipes and fittings are to be connected, the proper size increasers or reducers or reducing fittings shall be used between the two sizes.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971]

CHAPTER 25
TRAPS AND CLEANOUTS

25.1(135) Traps. Plumbing fixtures, excepting those having integral traps, shall be separately trapped by a water-seal trap placed as close to the fixture outlet as possible, except that a set of not more than three laundry trays or lavatories or a set of two laundry trays and one sink, cast or made as one fixture, may connect with a single trap, provided that no horizontal arm shall exceed three feet in developed length from the fixture trap.

25.2(135) Type and size of traps and fixture drains.

25.2(1) *Trap size.* The size (nominal diameter) of trap for a given fixture shall be sufficient to drain the fixture rapidly but in no case less than given in table 31.4(2).

25.2(2) *Relation to fixture drains.* No trap shall be larger than the drain to which it is connected.

25.2(3) *Type of traps.*

a. Fixture traps shall be self-cleaning other than integral traps without partitions or movable parts.

b. Slip joints or couplings may be used on the trap inlet or within the trap seal of the trap if metal-to-metal ground joint is used.

c. A trap integral with the fixture shall have a uniform interior and smooth waterway.

25.3(135) General requirements.

25.3(1) *Trap seal.* Each fixture trap shall have a water seal of not less than two inches and not more than four inches, except where a deeper seal is found necessary by the administrative authority for special conditions.

25.3(2) *Trap cleanouts.* Each fixture trap, except those cast integral or in combination with fixtures in which the trap seal is readily accessible or except when a portion of the trap is readily removable for cleaning purposes, shall have an accessible brass trap screw of ample size protected by this water seal.

25.3(3) *Trap level and protection.* Traps shall be set true with respect to their water seals, and where necessary, they shall be protected from freezing.

25.3(4) Reserved for future use.

25.3(5) Reserved for future use.

25.3(6) *Prohibited traps.*

a. No trap which depends for its seal upon the action of movable parts shall be used.

b. S traps are prohibited.

c. Bell traps are prohibited.

d. Crown-vented traps are prohibited.

e. Building or house traps on the main house sewer or house drain are prohibited.

25.3(7) *Double trapping.* No fixture shall be double trapped.

25.4(135) Pipe cleanouts.

25.4(1) *Location.* Cleanouts shall not be more than 50 feet apart in horizontal drainage lines of four-inch nominal diameter or less and not more than 100 feet apart for larger pipes.

25.4(2) *Underground drainage.* Cleanouts, when installed on an underground drain, shall be extended to or above the finished grade level directly above the place where the cleanout is installed; or may be extended to the outside of the building when found necessary by the administrative authority.

25.4(3) Reserved for future use.

25.4(4) *Concealed piping.* Cleanouts on concealed piping shall be extended through and terminate flush with the finished wall or floor; chases may be left in the wall or floor, provided they are of sufficient size to permit removal of the cleanout plug and effective cleaning of the system.

25.4(5) *Base of stacks.* A cleanout shall be provided in each vertical waste or soil stack at a point at least 42 inches above the floor. For buildings with a floor slab on the ground surface, the following will be acceptable in lieu of a cleanout at the base of the stack: The building drain may be extended to the outside of the building and terminated in an accessible cleanout; or an accessible cleanout installed in the building drain downstream from the stack, not more than five feet outside the building wall.

25.4(6) *Building drain junction.* There shall be a cleanout near the junction of the building drain and building sewer or a cleanout with Y branch inside the building wall unless the cleanout at the base of the stack is within five feet of the point where the sewer enters the building and in such case the stack cleanout will be sufficient.

25.4(7) *Direction of flow.* Every cleanout shall be installed so that the cleanout opens in a direction opposite to the flow of the drainage line or at right angle thereto.

25.4(8) *Prohibited connection.* Cleanout plugs shall not be used for the installation of new fixtures or floor drains except where approved in writing by the administrative authority.

25.5(135) Size of cleanouts. Cleanouts shall be of the same nominal size as the pipes up to four inches and not less than four inches for larger piping.

25.6(135) Cleanout clearances.

25.6(1) *Large pipes.* Cleanouts on three-inch or larger pipe shall be so installed that there is a clearance of not less than 18 inches for the purpose of rodding.

25.6(2) *Small pipes.* Cleanouts smaller than three inches shall be so installed that there is a 12-inch clearance for rodding.

25.6(3) *Calking.* Cement, plaster or any other permanent finishing material shall not be placed over a cleanout plug.

25.6(4) *Concealment.* Where it is necessary to conceal a cleanout plug, a covering plate or access door shall be provided which will permit ready access to the plug.

25.7(135) Cleanout equivalent. A fixture trap or a fixture with integral trap, readily removable without disturbing concealed roughing work, may be accepted as a cleanout equivalent.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964]

CHAPTER 26
INTERCEPTORS—SEPARATORS AND BACKWATER VALVES

26.1(135) Interceptors and separators.

26.1(1) *When required.* Interceptors (including grease, oil and sand interceptors, etc.) shall be provided when, in the judgment of the administrative authority having jurisdiction, they are necessary for the proper handling of liquid wastes containing flammable wastes, sand and other ingredients harmful to the building drainage system, the public sewer or sewage-treatment plant or processes.

26.1(2) *Approval.* The size, type and location of each interceptor or separator shall be approved by the administrative authority in accordance with generally accepted standards and no wastes other than those requiring treatment or separation shall be discharged into any interceptor.

26.2(135) Grease interceptors.

26.2(1) *Commercial buildings.* A grease interceptor shall be installed in the waste line leading from sinks, drains or other fixtures in the following establishments when, in the judgment of the administrative authority, a hazard exists: Restaurants, hotel kitchens or bars; factory cafeterias or restaurants; clubs; or other establishments where grease can be introduced into the drainage system in quantities that can affect line stoppage or hinder sewage disposal.

26.2(2) *Residential units.* A grease interceptor is not necessary for individual dwelling units or any private living quarters.

26.3(135) Oil separators. An oil separator shall be installed in the drainage system or section of the system where, in the judgment of the administrative authorities, a hazard exists or where oils or other inflammables can be introduced or admitted into the drainage system in appreciable quantities by accident or otherwise.

26.4(135) Sand interceptors. Sand and similar interceptors for heavy solids shall be so designed and located as to be readily accessible for cleaning, and shall have a water seal of not less than six inches.

26.5(135) Venting interceptors. Interceptors shall be so designed that they will not become air bound if closed covers are used.

26.6(135) Accessibility of interceptor. Each interceptor shall be so installed as to provide ready accessibility to the cover and means for servicing and maintaining the interceptor in working and operating condition. The use of ladders or the removal of bulky equipment in order to service interceptors shall constitute a violation of accessibility.

26.7(135) Interceptor's efficiency.

26.7(1) *Flow rate.* Interceptors shall be rated and approved for their efficiency as determined by the administrative authority and in accordance with generally accepted practice.

26.7(2) *Water connection.* Water connection for cooling or operating an interceptor shall be such that backflow cannot occur and be protected by an approved air gap.

26.8(135) Laundries. Commercial laundries shall be equipped with an interceptor having a removable wire basket or similar device that will prevent strings, rags, buttons or other material detrimental to the public sewerage system from passing into the drainage system.

26.9(135) Bottling establishments. Bottling plants shall discharge their process wastes into an interceptor which will provide for the separation of broken glass or other solids before discharging liquid wastes into the drainage system.

26.10(135) Slaughterhouses.

26.10(1) *Separators.* Slaughtering-room drains shall be equipped with separators which shall prevent the discharge into the drainage system of feathers, entrails and other materials likely to clog the drainage system.

26.10(2) *Food grinder.* Wastes may discharge directly to the building drainage system.

26.11(135) Commercial grinders.

26.11(1) *Discharge.* Where commercial food-waste grinders are installed, the waste from those units may discharge direct into the building drainage system and not through a grease interceptor.

26.11(2) *Approval.* The administrative authority shall determine where and what type of interceptor is necessary, except that interceptors shall not be required for private living quarters or residential units.

26.12(135) Maintenance. Interceptors shall be maintained in efficient operating condition by periodic removal of accumulated grease.

26.13(135) Oil interceptors.

26.13(1) *Where required.* Oil separators shall be installed when required by the administrative authority and shall conform to the requirements of 26.13(2).

26.13(2) *Minimum dimensions.* Interceptors for service stations and garages where both oil wastes and sand or mud may be expected shall have a minimum capacity of 25 cubic feet.

26.13(3) *Special type separators.* Before installing any special type separator, a drawing including all pertinent information shall be submitted for approval of the administrative authority, as being in accordance with this code.

26.14(135) Backwater valves.

26.14(1) Reserved for future use.

26.14(2) Reserved for future use.

26.14(3) *Material.* All bearing parts of backwater valves shall be of corrosion-resistant material.

26.14(4) *Positive seal.* Backwater valves shall be so constructed as to insure a mechanical seal against backflow.

26.14(5) *Diameter.* Backwater valves, when fully opened, shall have a capacity not less than that of the pipes in which they are installed.

26.14(6) *Location.* Backwater valves shall be so installed as to provide ready accessibility to their working parts.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964]

CHAPTER 27
PLUMBING FIXTURES

27.1(135) General requirements—materials. Plumbing fixtures shall be structurally sound, of durable materials, have smooth impervious surfaces and be free from defects and concealed fouling surfaces.

27.2(135) Alternate materials. Sinks and special-use fixtures may be made of soapstone, chemical stoneware, or may be lined with lead, copperbase alloy, nickel-copper alloy, corrosion-resisting steel or other materials especially suited to the use for which the fixture is intended.

27.3(135) Overflows.

27.3(1) *Design.* When any fixture is provided with an overflow, the waste shall be so arranged that the standing water in the fixture cannot rise in the overflow when the stopper is closed or remain in the overflow when the fixture is empty.

27.3(2) *Connection.* The overflow pipe from a fixture shall be connected on the house or inlet side of the fixture trap.

27.4(135) Installation.

27.4(1) *Cleaning.* Plumbing fixtures shall be installed in a manner to afford easy access for cleaning. Where practical, all pipes from fixtures shall be run to the nearest wall.

27.4(2) *Hangers.* Wall-hung fixtures shall be secured or attached with proper hangers.

27.4(3) *Securing fixtures.* Floor-outlet fixtures shall be rigidly secured to floor by screws or bolts.

27.4(4) *Wall-hung bowls.* Wall-hung watercloset bowls shall be rigidly supported by a concealed metal supporting member so that no strain is transmitted to the closet connection.

27.4(5) *Setting.* Fixtures shall be set level and in proper alignment with reference to adjacent walls. [See 24.6(135).]

27.5(135) Water-supply protection. The supply lines or fittings for every plumbing fixture shall be so installed as to prevent backflow. [See 30.4(3).]

27.6(135) Prohibited fixtures and connections.

27.6(1) *Fixtures.* Pan, valve, plunger, offset, washout, latrine, range, frost-proof and other water closets having an invisible seal or an unventilated space or having walls which are not thoroughly washed at each discharge are prohibited. Any water closet which might permit siphonage of the contents of the bowl back into the tank is prohibited.

27.6(2) *Connections.* Fixtures having concealed slip-joint connections shall be provided with an access panel or utility space so arranged as to make the slip connections accessible for inspection and repair.

27.7(135) Water closets.

27.7(1) *Public use.* Water-closet bowls for public use shall be of the elongated type.

27.7(2) *Flushing device.* Water-closet tanks shall have a flushing capacity sufficient to properly flush the water-closet bowls with which they are connected.

27.7(3) *Ball cocks.* Ball cocks for flushing tanks shall be of the antisiphon type, properly installed and shall provide for trap refill.

27.7(4) *Close-coupled tanks.* The flush-valve seat in close-coupled water-closet combinations shall be one inch or more above the rim of the bowl, so that the flush-valve will close even if the closet trapway is clogged, or any closets with flush-valve seats below the rim of the bowl shall be so constructed that in case of trap stoppage, water will not flow continuously over the rim of the bowl.

27.7(5) *Automatic flush valve.* Flushometers shall be so installed that they will be readily accessible for repairing. When the valve is operated, it shall complete the cycle of operation automatically, opening fully and closing positively under the service pressure. At each operation the valve shall deliver water in sufficient volume and at a rate that will thoroughly flush the fixture and refill the fixture trap. Means shall be provided for regulating flush valve flow. Not more than one fixture shall be served by a single flush valve. Protection against backflow shall be provided as specified in 30.4(3).

27.7(6) *Seats.* Water closets shall be equipped with seats of smooth nonabsorbent material. All seats of water closets provided for public use shall be of the open-front type. Integral watercloset seats shall be of the same material as the fixture.

27.8(135) Urinals.

27.8(1) *Automatic flushing tank.* Tanks flushing more than one urinal shall be automatic in operation and of sufficient capacity to provide the necessary volume to flush and properly cleanse all urinals simultaneously.

27.8(2) *Urinals equipped with automatic flush valves.* Flushometers shall be as prescribed in 27.7(5) and no valve shall be used to flush more than one urinal.

27.8(3) *Trough urinals.* Trough urinals shall be permitted only in places of temporary occupancy. They shall be not less than six inches deep and shall be furnished with one-piece backs and have strainers with outlets at least one and one-half inches in diameter. The washdown pipe shall be perforated so as to flush with an even curtain of water against the back of the urinal. This pipe shall be securely clamped as high as practicable to the back of the urinal. Trough urinals shall have tanks with a flushing capacity of not less than one and one-half gallons of water for each two feet of urinal length.

27.8(4) Reserved for future use.

27.8(5) *Floor-type urinals.* Floor-type trough urinals are prohibited.

27.8(6) *Surrounding materials.* Wall and floor space to a point one foot in front of urinal lip and four feet above the floor and at least one foot to each side of the urinal shall be lined with nonabsorbent material.

27.9(135) Strainer and fixture outlets. All plumbing fixtures, other than water closets and siphon-action washdown or blowout urinals, shall be provided with metal strainers having waterway area in accord with acceptable design.

27.10(135) Lavatories. Lavatories shall have waste outlets not less than one and one-fourth inches in diameter. Wastes may have open strainers or may be provided with stoppers.

27.11(135) Shower receptors and compartments.

27.11(1) *Shower.* All shower compartments, except those built directly on the ground, shall have a lead or copper shower pan or the equivalent thereof or as determined by the administrative authority. The pan shall turn up on all sides at least two inches above finished floor level. Traps shall be so constructed that the pan may be securely fastened to the trap at the seepage en-

trance making a watertight joint between the pan and trap. Shower receptacle waste outlets shall be not less than one and one-half inches in diameter and have removable strainers.

27.11(2) *On the ground.* Shower receptors built on the ground shall be constructed of dense nonabsorbent and noncorrosive materials and shall have smooth impervious surfaces or be as provided in 27.11(1).

27.11(3) *Dimensions.* Shower compartments shall have not less than 900 square inches in floor area and, if rectangular, square or triangular, shall be not less than 30 inches in the shortest dimension.

27.11(4) *Construction.* Floors under shower compartments shall be laid on a smooth and structurally sound base and shall be lined and made watertight with sheet lead, copper or other acceptable material. Shower compartments located in basements, cellars or in other rooms in which the floor has been laid directly on the ground surface need not be lined.

27.11(5) *Public or institution showers.* Floors of public shower rooms shall be drained in such a manner that no waste water from any shower head will pass over areas occupied by other bathers.

27.11(6) *Walls.* Shower compartments shall have walls constructed of smooth, noncorrosive and nonabsorbent waterproof materials to a height of not less than six feet above the floor.

27.11(7) *Joints.* Built-in tubs with overhead showers shall have waterproof joints between the tub and walls, and the walls shall be waterproof.

27.12(135) Sinks. Sinks shall be provided with waste outlets not less than one and one-half inches in diameter. Waste outlets may have open strainers or may be provided with stoppers.

27.13(135) Food-waste-grinder units.

27.13(1) *Separate connections.* Domestic food-waste-disposal units shall be connected and trapped separately from any other fixture or compartment. Units may have either automatic or hand-operated water supply control. [See 30.4(135).]

27.13(2) *Grease interceptors.* No food-waste grinder shall be connected through a grease interceptor.

27.13(3) *Commercial-type grinders.* Commercial-type food-grinders shall be provided with not less than a two-inch waste line. Each waste line shall be trapped and vented as provided in other rules of this code.

27.14(135) Drinking fountains.

27.14(1) *Design and construction.* Drinking fountains shall conform to American National Standards Institute specifications for drinking fountains, ANSI Z4.2-1942, or current issue thereof.

27.14(2) *Protection of water supply.* Stream projectors shall be so assembled as to provide an orifice elevation as specified by American National Standards Institute specifications ANSI A40.4-1942, relating to air gaps and ANSI A40.6-1943, relating to backflow preventers, or current issue thereof.

27.15(135) Floor drains.

27.15(1) *Trap and strainers.* Floor drains shall have metal traps and a minimum water seal of three inches and shall be provided with removable strainers. The open area of strainer shall be at least two-thirds of the cross-section area of the drain line to which it connects.

27.15(2) *Size.* Floor drains shall be of a size to serve efficiently the purpose for which it is intended.

27.16(135) Dishwashing machines.

27.16(1) *Protection.* Domestic dishwashing machines shall meet requirements in 30.4(3).

27.16(2) *Separate trap.* Each unit shall be separately trapped or discharged indirectly into a properly trapped and vented fixture.

27.16(3) *Air gap.* Dishwashing machines shall not be directly connected through a food-waste grinder or to the drainage system without the use of an approved dishwasher air gap fitting on the discharge side of the dishwashing machine or similarly reliable method of connection to the drainage system.

27.16(4) *Hot water.* Dishwashing machines or similar dishwashing equipment not in private living quarters or dwelling units shall be provided with water at least 180° F. for disinfection.

27.17(135) Multiple wash sinks.

27.17(1) *Circular type.* Each 18 inches of wash sink circumference (circular type) shall be equivalent to one lavatory.

27.17(2) *Straight-line type.* Multiple wash sinks of the straight-line type shall have hot and cold combination spouts not closer than 18 inches from adjacent similar spouts and each spout shall be considered the equivalent of one lavatory.

27.18(135) Garbage can washers.

27.18(1) *Discharge.* Garbage can washers shall not discharge through a trap serving any other device or fixture.

27.18(2) Reserved for future use.

27.18(3) *Baskets.* The receptacle receiving the wash from garbage cans shall be provided with a basket or similar device to prevent the dis-

charge of large particles and utensils into the building drainage system.

27.18(4) *Connections.* Water supply connections shall conform to 30.4(3).

27.19(135) Laundry trays. Each compartment of a laundry tray shall be provided with a waste outlet not less than one and one-half inches in diameter and with a stopper.

27.20(135) Special fixtures and specialties. Baptistries, ornamental and lily pools, aquaria, ornamental fountain basins and similar constructions when provided with water supplies shall be protected from back-siphonage as required in 30.4(3).

27.21(135) Minimum plumbing facilities.

TABLE

Type of building occupancy	Type of fixture					
	Water closets	Urinals	Lavatories	Bathtubs or showers	Drinking fountains	Other fixtures
Assembly—places of worship.	Number of persons / Number of fixtures 150 Women ..... 1 300 Men 1	Number of persons / Number of fixtures 300 Men* 1	1.....	.....	1.....	
Assembly—other than places of worship (auditoriums, theaters, convention halls).	Number of persons / Number of fixtures 1-100 ..... 1 101-200 ..... 2 201-400 ..... 3 Over 400, add 1 fixture for each additional 500 men and 1 for each 300 women.	Number of persons / Number of fixtures 1-200 .....1 201-400.....2 401-600.....3 Over 600, add 1 fixture for each 300 men.*	Number of persons / Number of fixtures 1-200 ..... 1 201-400 ..... 2 401-750 ..... 3 Over 750, add 1 fixture for each 500 persons.	.....	1 for each 300 persons.	1 slop sink.
Dormitories—school or labor, also institutional.	Men: 1 for each 10 persons. Women: 1 for each 8 persons.	1 for each 25 men. Over 150, add 1 fixture for each 50 men.*	1 for each 12 persons. (Separate dental lavatories should be provided in community toilet rooms. A ratio of 1 dental lavatory to each 50 persons is recommended.)	1 for each 8 persons. For women's dormitories, additional bathtubs should be installed at the ratio of 1 for each 30 women. Over 150 persons add 1 fixture for each 20 persons.	1 for each 75 persons.	Laundry trays, 1 for each 50 persons. Slop sinks, 1 for each 100 persons.
Dwellings—one and two family.	1 for each dwelling unit.	.....	1 for each dwelling unit.	1 for each dwelling unit.	.....	Kitchen sink 1 for each dwelling unit.
Dwellings—multiple or apartment.	1 for each dwelling unit or apartment.	.....	1 for each dwelling unit or apartment.	1 for each dwelling unit or apartment.	.....	Kitchen sink 1 for each dwelling unit or apartment. For apartments or multiple dwelling units in excess of 10 apartments or units, 1 double laundry tray for each 10 units or 1 automatic laundry washing machine for each 20 units.

Industrial—factories, warehouses, foundries, and similar establishments.	Number of each sex / Number of fixtures 1-10 ..... 1 11-25 ..... 2 26-50 ..... 3 51-75 ..... 4 76-100 ..... 5 1 fixture for each additional 30 employees.	Where more than 10 men are employed: Number of men / Number of urinals 11-30 ..... 1 31-80 ..... 2 81-160 ..... 3 161-240 4	Number of persons / Number of fixtures 1-100 ..... 1 to 10 Over 100 ..... 1 to 15	1 shower for each 15 persons exposed to excessive heat or to occupational hazard from poisonous, infectious or irritating material.	1 for each 75 persons	
Institutional—Other than hospitals or penal institutions (on each occupied story).	1 for each 25 men.... 1 for each 20 women.	1 for each 50 men*.....	1 for each 10 persons.	1 for each 10 persons.	1 for each 50 persons.	
Hospitals..... Individual room wards. Waiting rooms..... Employees.....	1..... 1 for each 8 patients.. 1..... Same as public.....	.... Same as public.....	1..... 1 for each 10 patients. 1..... Same as public.....	1..... 1 for each 20 patients.	..... 1 for each 100 patients. ..... Same as public.....	1 slop sink per floor.
Penal institutions.... Prisoners..... Employees.....	1 in each cell..... 1 in each exercise room Same as public.....	1 in each exercise room. ..... Same as public.....	1 in each cell..... 1 in each exercise area Same as public.....	1 on each cell block floor.	1 on each cell block floor. 1 in each exercise area. Same as public.....	1 slop sink per floor.
Public buildings, offices, business, mercantile, storage, and institutional employees.	Number of each sex / Number of fixtures 1-15 ..... 1 16-35 ..... 2 36-55 ..... 3 56-80 ..... 4 81-110 ..... 5 111-150 ..... 6 1 fixture for each additional 40 employees.	Urinals may be provided in men's* toilet rooms in lieu of water closets but for not more than ⅓ of the required number of water closets.	Number of employees / Number of fixtures 1-15 ..... 1 16-35 ..... 2 36-60 ..... 3 61-90 ..... 4 91-125 ..... 5 1 fixture for each additional 45 persons.	.....	1 for each 75 persons.	1 slop sink per floor.
Schools: Elementary..... Secondary.....	Boys / Girls 1/40 / 1/35 1/75 / 1/45	 1/30 boys..... 1/30 boys.....	 1/50 pupils..... 1/50 pupils.....	In gym or pool shower rooms, 1/5 Pupils of a class.	1/100 pupils but at least 1 per floor.	Slop sinks, 1 on each floor.
Working men, temporary facilities.	1/30 working men....	1/30 working men....	1/30 working men....		1 fixture or equivalent for each 100 working men.	

*Where urinals are provided for the women, the same number shall be provided as for men.

27.21(1) *Minimum number of fixtures.* Plumbing fixtures should be provided for the type of building occupancy and in the minimum number(s) shown in Table 27.21(135) Minimum Number of Plumbing Fixtures. Types of building occupancy not shown in Table 27.21(135) will be considered individually by the administrative authority.

27.21(2) *Separate facilities.* In other than residential installation where toilet facilities are provided to serve members of both sexes, separate facilities should be installed for each sex.

These rules are intended to implement sections 135.11(7) and 135.12 of the Code.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971, March 15, 1972]

CHAPTER 28
HANGERS AND SUPPORTS

28.1(135) Strains and stresses. Piping in a plumbing system shall be installed without undue strains and stresses, and provision shall be made for expansion, contraction and structural settlement.

28.2(135) Vertical piping. Vertical piping shall be secured at sufficiently close intervals to keep the pipe in alignment and carry the weight of the pipe and contents.

28.3(135) Horizontal piping.

28.3(1) *Supports.* Horizontal piping shall be supported at sufficiently close intervals to keep it in alignment and prevent sagging.

28.3(2) *Cast-iron soil pipe.* Cast-iron soil pipe shall be supported at five-foot intervals except where ten-foot lengths are used the pipe shall be supported at least every ten feet.

28.3(3) *Screwed pipe.* Screwed pipe (SPS) shall be supported at approximately 12-foot intervals.

28.3(4) *Copper tubing.* Copper tubing shall be supported at approximately six-foot intervals for piping one and one-half inches and smaller and ten-foot intervals for piping two inches and larger.

28.3(5) *Lead pipe.* Lead pipe shall be supported for its entire length.

28.3(6) *Plastic pipe.* Plastic pipe for DWV applications shall be supported at intervals of at least four feet.

28.3(7) *In ground.* Piping in the ground shall be laid on a firm bed for its entire length.

28.4(135) Hangers and anchors.

28.4(1) *Material.* Hangers and anchors shall be of metal and sufficient strength to maintain in their proportional share of the pipe alignments.

28.4(2) *Attachment.* Hangers and anchors shall be securely attached to the building construction.

28.5(135) Strains and stresses.

28.5(1) *Installation of pipe.* Piping in a plumbing system shall be so installed as to prevent undue strains and stresses.

28.5(2) *Expansion and contraction.* Provisions shall be made for expansion and contraction of piping and for structural settlement that may affect the piping.

28.5(3) *Piping in concrete.* Piping in concrete or masonry walls or footings shall be placed or installed in chases or recesses which will permit access to the piping for repair or replacement.

28.6(135) Base of stacks. Bases of cast-iron stacks shall be supported on concrete, brick laid in cement mortar, metal brackets attached to the building construction or by other methods approved by the administrative authority.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971]

CHAPTER 29
INDIRECT WASTE PIPING AND SPECIAL WASTES

29.1(135) Indirect waste piping.

29.1(1) *General.* Wastes from the following shall discharge to the building drainage system through an air gap serving the individual fixtures, devices, appliances or apparatus.

29.1(2) *Food handling.* Establishments engaged in the storage, preparation, selling, serving, processing or otherwise handling of food shall have the waste piping from all refrigerators, ice boxes, rinse sinks, cooling or refrigerating coils, laundry washers, extractors, steam tables, egg boilers, coffee urns or similar equipment discharge indirectly into a water-supplied sink or receptor and the waste outlet shall terminate at least two inches above the flood rim of such sink or receptor.

29.1(3) *Commercial dishwashing machines.* Dishwashing machines shall be connected to the water distribution system through an air gap or similarly reliable method of protection to the water supply. The contents of the machine shall be protected from the backflow of sewage or wastes through an air gap (air break) or similarly reliable method of connection to the drainage system.

29.1(4) *Interceptor.* An interceptor may be placed on the outlet side of the dishwashing machine or on the discharge side of the indirect waste receptor.

29.1(5) *Connection.* Drains, overflows or relief vents from the water supply system shall not be directly connected to the drainage system.

29.1(6) *Sterile materials.* Appliances, devices or apparatus such as stills, sterilizers and similar equipment requiring water and waste and used for sterile material shall be indirectly connected or provided with an air gap between the trap and the appliance.

29.1(7) *Drips.* Appliances, devices or apparatus not regularly classed as plumbing fixtures but which have drips or drainage outlets may be drained by indirect waste pipes discharging into an open receptacle as provided in 29.1(2).

29.2(135) Material and size. The material and size of indirect waste pipes shall be in accordance with the provisions of the other rules of this code applicable to sanitary drainage piping, except that refrigerator and similar indirect fixtures or appliances may be provided with waste pipes, trapped and of a size not less than one and one-fourth inches for one to two traps; one and one-half inches for three to six traps; and two inches for six to twelve traps.

29.3(135) Length.

29.3(1) *Waste pipe.* Any indirect waste pipe exceeding three feet in a length shall be trapped.

29.3(2) *Venting of indirect wastes.* When indirect wastes extend more than one floor above the fixture they discharge over, they must be vented full size through the roof.

29.3(3) *Cleaning.* Indirect waste piping shall be so installed as to permit ready access for flushing and cleansing.

29.4(135) Air gap or backflow preventer.

29.4(1) *Provision for air gap.* The air gap between an indirect waste pipe outlet and a drainage system component shall be at least twice the effective diameter of the indirect waste pipe served as follows:

a. By extending the indirect waste pipe to an open, accessible slop sink, floor drain, or other suitable fixture which is properly trapped and vented. The indirect waste shall terminate a sufficient distance above the flood level rim of the receiving fixture to provide the required air gap and shall be installed in accordance with other applicable sections of this code;

b. By providing a break (air gap) in the drain connection on the inlet side of the trap serving the fixture, device, appliance or apparatus.

29.4(2) *Receptor.* By extending the indirect waste pipe to an open, accessible slop sink, floor drain or other suitable fixture which is properly trapped or vented. The indirect waste shall terminate a sufficient distance above the flood level rim of the receiving fixture to provide the required air gap, and shall be installed in accordance with other applicable rules of this code.

29.4(3) *Inlet side of trap.* By providing a break (air gap) in the drain connection on the inlet side of the trap serving the fixture, device, appliance or apparatus.

29.5(135) Receptors.

29.5(1) *Installation.* Waste receptors serving indirect pipes shall not be installed in any toilet room, nor in any inaccessible or unventilated space.

29.5(2) Reserved for future use.

29.5(3) *Strainers and baskets.* Suitable strainers, baskets or beehive strainers shall be provided on indirect waste receptors or floor drains receiving such drainage.

29.5(4) *Splashing.* All plumbing receptors receiving the discharge of indirect waste pipes shall be of such shape and capacity as to minimize splashing or flooding. No plumbing fixture which is used for domestic or culinary purposes shall be used to receive the discharge of an indirect waste pipe.

29.6(135) Clear water wastes. Waste lifts, expansion tanks, cooling jackets, sprinkler systems, drip or overflow pans or similar devices which waste clear water only shall discharge onto a roof or into the building drainage system through an indirect waste or over a suitable floor drain.

29.7(135) Condensers and sumps.

29.7(1) *Direct connection prohibited.* No steam pipe shall connect to any part of a drainage or plumbing system, nor shall any water above 212° F. be discharged into any part of the drainage system. Such pipes may be indirectly connected by discharging through an interceptor or device designed to render such wastes harmless to the plumbing or drainage systems.

29.7(2) *Indirect connection required.* No high pressure steam or blowoff exhaust shall be directly connected to the building drain or sewer. When such waste is directed through an approved and properly vented expansion chamber, condenser or similar device designed to reduce the pressure to a safe level and the temperature to or below 212° F., such devices shall discharge to the building sewer.

29.8(135) Drinking fountains. Drinking fountains may be installed with indirect wastes.

29.9(135) Special wastes.

29.9(1) *Acid waste.* Acid and chemical waste pipes and jointing materials shall be of materials unaffected by the discharge of such wastes.

29.9(2) *Neutralizing device.* In no case shall corrosive liquids, spent acids or other harmful chemicals which might destroy or injure a drain, sewer, soil or waste pipe, or which might create noxious or toxic fumes, discharge into the plumbing system without being thoroughly diluted or neutralized by passing through a properly con-

structed and acceptable dilution or neutralizing device. Such device shall be provided with a sufficient intake of diluting water or neutralizing medium, so as to make its contents noninjurious before being discharged into the soil or sewage system.

29.10(135) Swimming pools.

29.10(1) *Waste piping.* Piping carrying waste water from swimming or wading pools including pool drainage, back wash from filters or water from scum gutter drains or floor drains which serve walks around pools shall be installed as an indirect waste pipe utilizing any existing circulation pump, if necessary, when indirect waste pipe is below the sewer grade.

29.10(2) Plans and specifications for public swimming pools shall be submitted for approval to the Iowa state department of health before construction begins.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971]

CHAPTER 30
WATER SUPPLY AND DISTRIBUTION

30.1(135) Quality of water supply.

30.1(1) *Potable water.* Potable water is water which is satisfactory for drinking, culinary and domestic purposes and meets the requirements of accepted standards including those of the state department of health.

30.1(2) *Acceptable sources.* Where a public supply of potable water is not available, requirements satisfactory to the administrative authority shall be observed.

30.1(3) *Nonpotable water.* Where an adequate supply of potable water is not available, nonpotable water may be used for cooling, flushing water closets and urinals and other fixtures not requiring potable water, provided such water shall not be accessible for drinking or culinary purposes, nor cross-connected with a potable water supply.

30.2(135) Color code. All piping conveying a nonpotable water should be adequately and durably identified by a distinctive yellow-colored paint so that it is readily distinguished from piping carrying potable water. (See Safety Color Code for Marking Physical Hazards, ANSI Z53.1-1967, or current issue thereof.)

30.3(135) Water supply. Every building in which plumbing fixtures are installed and are for human occupancy or habitation shall be provided with an ample supply of pure and wholesome water.

30.4(135) Protection of potable water supply.

30.4(1) *Cross-connections.* Potable water supply piping, water discharge outlets, backflow prevention devices or similar equipment shall not be so located as to make possible their submergence in any contaminated or polluted liquid or substance.

30.4(2) *Approval of devices.* Before any device for the prevention of backflow or backsiphonage is installed, it shall have first been certified as meeting the requirements of American Standard Backflow Preventers in Plumbing Systems, ANSI A40.6-1943, or current issue thereof, by a reputable testing laboratory. Devices installed in a potable water supply system for protection against backflow shall be maintained in good working condition by the person or persons having control of such devices, and if found to be ineffective or inoperative shall require the repair or replacement thereof.

30.4(3) *Backflow.* The water distributing system shall be protected against backflow. Every water outlet shall be protected from backflow, preferably by having the outlet end from which the water flows spaced a distance above the flood-level rim of the receptacle into which the water flows sufficient to provide a "minimum required air gap" as defined in American Standard Air Gaps in Plumbing Systems, ANSI A40.4-1942, or current issue thereof. Where it is not possible to provide a minimum air gap, the water outlet shall be equipped with an accessibly located backflow preventer complying with American Standard Backflow Preventers in Plumbing Systems, ANSI A40.6-1943, or current issue thereof, installed on the discharge line of the manual control valve.

30.4(4) *Special device.* Where it is not possible to provide either a minimum air gap or a backflow preventer, as may be the case in connection with cooling jackets, condensers or other industrial or special appliances, the administrative authority shall require other means of protection approved by the state department of health.

30.5(135) Vacuum breakers and air gaps.

30.5(1) *Flushometer valves.* Flushometer valves shall be equipped with approved vacuum breakers. Vacuum breakers shall be installed on the discharge side of flushing valves with the critical level at least four inches above the overflow rim of the fixture served.

30.5(2) *Flushing tanks.* Flushing tanks shall be equipped with approved antisiphon ball cocks. The ball cock shall be installed with the critical level of the vacuum breaker at least one inch above the full opening of the overflow pipe. In cases where the ball cock has no hush tube, the bottom of the water supply inlet shall be installed one inch higher than the opening of the overflow pipe.

30.5(3) *Trough urinals.* Trough urinals when permitted shall be equipped with a vacuum breaker installed on the discharge side of the last valve and not less than 30 inches above the spray pipe.

30.5(4) *Lawn sprinklers.* Lawn-sprinkler systems shall be equipped with a backflow preventer on the discharge side of each of the last valves. The backflow preventer shall be at least six inches above the surrounding ground. Where combination control valves and backflow preventers are installed, the bottom of the valve shall constitute the bottom of the backflow preventer.

30.5(5) *Water valve outlet.* Fixture faucets with hose attachments shall be protected by a backflow preventer installed six inches above the highest point of usage and on the discharge side of the valve.

Faucets or valves independent of fixtures with hose attachments used for special purposes including morgue table cleaning, garbage can washing, special sinks and chemical sinks, wherever the end of the water supply hose may become submerged shall also be protected as above.

30.5(6) *Swimming pools.* The water supply for each swimming or wading pool shall be protected from the pool water by installing the water supply piping to provide a minimum required air gap as defined in Air Gaps in Plumbing Systems, ANSI A40.4-1942, or current issue thereof.

30.6(135) Water supply system.

30.6(1) *Water service pipe.* Materials for water service piping shall be of brass, lead, cast iron, wrought iron, open-hearth iron or steel, Type K copper or plastic. (See chapter 23 for standards.) All threaded ferrous pipe and fittings shall have been galvanized (zinc coated) or cement lined. All ferrous pipe threaded joints shall be coal tar enamel coated and wrapped at the time of installation in the trench. Copper pipe and tubing shall be installed so that the color marking is clearly visible at the time of inspection.

Plastic pipe and fittings marked to show approval by the National Sanitation Foundation Testing Laboratory may be used as a water service pipe when installed in accordance with the instructions of the manufacturer. It shall not be installed in any chase or tunnel that is heated or which contains hot water, hot air or steam piping. It shall terminate at a point not more than 12 inches inside the building wall, floor or foundation. When passed through or under a foundation wall or footing or through a floor, the pipe shall be installed within a sleeve two pipe diameters larger in size. Provisions shall be made to accommodate the rate of expansion and contraction in plastic pipe being approximately ten times greater than that found in ferrous pipe and five times greater than that found in copper pipe. Flexible plastic pipe shall be laid in snake fashion to provide a uniform slack of at least two inches per 100 feet. Plastic pipe shall not be jacked or pulled. Plastic pipe used for water service lines shall be installed so that the markings will be clearly visible at the time of inspection at intervals of not more than five feet showing an internal diameter of not less than three-fourths inch, a pressure rating of at least 125 pounds per square inch, the applicable CS or ASTM standard, name or trade-mark of the manufacturer, formulation identification code and approval of the National Sanitation Foundation by the National Sanitation Foundation insigne which shall also appear on the fittings along with the trade-mark of the manufacturer.

30.6(2) *Separate trenches.* The water service pipe and the building drain or building sewer shall be not less than ten feet apart horizontally, and shall be separated by undisturbed or compacted earth.

The water service pipe may be placed in the same trench with the building drain or building sewer, provided the following conditions are met [Also see 31.2(2)]:

a. The bottom of the water service pipe, at all points, shall be at least 12 inches above the top of the sewer line at its highest point.

b. The water service pipe shall be placed on a solid shelf excavated at one side of the common trench. Where ground conditions do not permit a shelf, the pipe may be laid on a solidly tamped backfill.

c. The number of joints in the service pipe shall be kept to a minimum.

d. No portion of the building drain or building sewer shall be under pressure.

30.6(3) *Stop-and-waste valve combination.* Combination stop-and-waste valves and cocks shall not be installed in any underground potable water supply system unless an approved system of watertight piping from the weep hole of the stop-and-waste valve is installed to drain to a lower protected level.

30.6(4) *Private water supply.* No private water supply shall be interconnected with any public water supply unless the private supply meets the requirements of the state department of health and the specific written approval of the administrative authority having jurisdiction is obtained.

30.7(135) Water pumping and storage equipment.

30.7(1) *Pumps and other appliances.* Water pumps, tanks, filters, softeners, compressors and all other appliances and devices shall be protected against contamination.

30.7(2) *Water supply tanks.* Potable water supply tanks shall be properly covered to prevent the entrance of foreign material or insects into the water supply. Soil or waste lines shall not pass directly over such tanks.

30.7(3) *Pressure tanks, boilers and relief valves.* The drains from pressure tanks, boilers, relief valves and similar equipment shall only be connected to the drainage system through an indirect waste or over a drain.

30.7(4) *Cleaning, painting, repairing water tanks.* A potable water supply tank used for domestic purposes shall not be lined, painted or repaired with any material which will affect either the taste or the potability of the water supply when the tank is returned to service. Tanks shall be disconnected from the system during such operations to prevent any foreign fluid or substance entering the distribution piping.

30.8(135) Water supply tanks—booster system.

30.8(1) *When required.* When the water pressure from the city mains during flow is insufficient to supply all fixtures freely and continuously, the rate of supply shall be supplemented by a gravity house tank or booster system.

30.8(2) *Support.* All water supply tanks shall be supported in accordance with the regulations which apply or with adequate structural design.

30.8(3) *Overflow pipes for water supply tank.* Overflow pipes for gravity tanks shall discharge above a roof or catch basin, or they shall discharge over an open, water supplied sink. Adequate overflow pipes properly screened against the entrance of insects and vermin shall be provided.

30.8(4) *Tank supply.* The water supply inlet within the tank shall be at an elevation no less than is required for an air gap in an open tank with overflow, but in no case shall the elevation be less than four inches above the overflow.

30.8(5) *Drains.* Water supply tanks shall be provided with valved drain lines located at their lowest point and discharged as an indirect waste or as required for overflow pipes in 30.8(3).

30.8(6) *Size of overflow.* Overflow drains for water supply tanks shall be adequately sized according to the supply.

30.8(7) *Gravity and suction tanks.* Tanks used for domestic water supply, combined supply to fire standpipes and domestic water system, or to supply standpipes for fire-fighting equipment only shall be equipped with tight covers which are vermin and rodent proof. Such tanks shall be vented with a return bend vent pipe having an area not less than one-half the area of the down feed riser, and the vent opening shall be covered with a metallic screen.

30.8(8) *Pressure tanks.* Pressure tanks used for supplying water to the domestic water distribution system, combined supply to fire standpipes and domestic water system, or to supply standpipes for fire equipment only shall be equipped with a vacuum-breaking device located on the top of the tank. The air inlet of this device shall be covered with a metallic screen.

30.9(135) Disinfection of potable water system piping.

30.9(1) *When required.* The administrative authority having jurisdiction may require when necessary that the potable water system or any part thereof installed or repaired be disinfected in accordance with one of the following methods before it is placed in operation.

30.9(2) *Distribution system.* The system, or part thereof, shall be filled with a solution containing 100 parts per million of available chlorine and allowed to stand two hours before flushing and returning to service.

30.9(3) *Storage tank.* In the case of a potable water storage tank where it is not possible to disinfect as provided in 30.9(2), the entire interior of the tank shall be swabbed with a solution containing 200 parts per million of available chlorine, and the tank thoroughly flushed before returning to service.

30.10(135) Water distribution pipe, tubing and fittings. Materials for water distribution pipes and tubing shall be of brass, copper, lead, cast iron, wrought iron, open-hearth iron or steel pipe with appropriate approved fittings. (See chapter 23 for standards.) All threaded ferrous pipe and fittings shall have been galvanized (zinc coated) or cement lined, and when such pipe and fittings are used underground inside buildings, they shall be coal tar enamel coated and the threaded joints wrapped at the time of installation. Type K copper may be used under and aboveground. Types L and M may be used aboveground only. Copper pipe and tubing shall be installed such that the color marking is clearly visible at the time of inspection.

Plastic pipe and fittings marked to show approval by the National Sanitation Foundation Testing Laboratory and having properties suitable for the purpose intended may be used underground outside of any structure for cold water purposes including sprinkler systems serving lawns, golf courses and similar installations. Provisions shall be made to accommodate the rate of expansion and contraction in plastic pipe being approximately ten times greater than that found in ferrous pipe and five times greater than that found in copper pipe. Flexible plastic pipe shall be laid in snake fashion to provide a uniform slack of at least two inches per 100 feet. Plastic pipe shall not be jacked or pulled.

30.11(135) Allowance for character of water.

30.11(1) *Selection of materials.* When selecting the material and size for water supply pipe, tubing or fittings, due consideration shall be given to the working pressure and action of the water on the interior and of the soil, fill or other material on the exterior of the pipe. No material that would produce toxic conditions in a potable water supply system shall be used for piping, tubing or fittings.

30.11(2) *Used piping.* No piping material that has been used for other than a potable water supply system shall be reused in the potable water supply system.

30.12(135) Water supply control.

30.12(1) *Water supply control.* A main shutoff valve on the water service pipe shall be provided near the curb, and also, an accessible shutoff valve shall be provided inside near the entrance of the water service pipe into the building.

30.12(2) *Tank controls.* Supply lines taken from pressure or gravity tanks shall be valved at or near their source.

30.12(3) *Separate controls for each family unit.* In two-family or multiple dwellings, each family unit shall be controlled by an arrangement of shutoff valves which permit each group of fixtures or the individual fixtures to be shut off without interference with the water supply to any other family unit or other portion of the building.

30.13(135) Sizing the water supply system.

30.13(1) *Water service pipe.* The water service pipe from the street main to the water distribution system for the building shall be of sufficient size to furnish an adequate flow of water to meet the requirements of the building at peak demand, and in no case shall be less than three-fourths inch nominal diameter.

If flushometers or other devices requiring a high rate of water flow are used, the water service pipe shall be designed to supply this flow.

30.13(2) *Demand load.* The demand load in the building water supply system shall be based on the number and kind of fixtures installed and the probable simultaneous use of these fixtures.

30.14(135) Sizing the water distribution system.

30.14(1) *Design factors.* The sizing of the water distribution system shall conform with good engineering practice. Design factors used to determine pipe sizes shall be adequate in the judgment of the administrative authority.

30.14(2) *Size of fixture supply.* The minimum size of a fixture supply pipe shall be as follows:

Type of fixture or device	Pipe size (inch)
Bath tubs	½
Combination sink and tray	½
Drinking fountain	⅜
Dishwasher (domestic)	½
Kitchen sink (residential)	½
Kitchen sink (commercial)	¾
Lavatory	⅜
Laundry tray, 1, 2 or 3 compartments	½
Shower (single head)	½
Sinks (service, slop)	½
Sinks, flushing rim	¾
Urinal (flush tank)	⅜
Urinal (direct flush valve)	¾
Water closet (tank type)	⅜
Water closet (flush valve type)	1
Hose bibbs	½
Wall hydrant	½

For fixtures not listed, the minimum supply branch may be made the same as for a comparable fixture.

The minimum three-fourths inch service should be carried to the hot water heater or third branch opening in the usual residence.

30.15(135) Hot water distribution. The sizing of the hot water distribution piping shall conform to good engineering practice. [See 30.14(135).]

30.16(135) Safety devices.

30.16(1) *Pressure relief valve.* Pressure relief valves shall be installed for all equipment used for heating or storage of hot water. The rate of discharge of such a valve shall limit the pressure rise for any given heat input to ten percent of the pressure at which the valve is set to open. The setting shall not exceed the tank working pressure.

30.16(2) *Temperature relief valves or energy shutoff devices.* Temperature relief valves or energy shutoff devices shall be installed for equipment used for the heating or storage of hot water. Each temperature relief valve shall be rated as to its BTU capacity. At 210° F., it shall be capable of discharging sufficient hot water to prevent any further rise in temperature. As an alternative to the temperature relief valve, and in lieu thereof, an energy shutoff device may be used which will cut off the supply of heat energy to the water tank before the temperature of the water in the tank exceeds 210° F.

30.16(3) *Approvals.* Combination pressure and temperature relief valves, separate pressure and temperature relief valves or energy shutoff devices, which have been tested and approved by, or meet the specification requirements of the American Gas Association, the Underwriters' Laboratories, Inc., or other recognized approval authorities, shall be considered acceptable.

30.16(4) *Relief valve location.* Temperature relief valves shall be so located in the tank as to be actuated by the water in the top one-eighth of the tank served and in no case more than three inches away from such tank. Pressure relief valves may be located adjacent to the equipment they serve. There shall be no check valve or shutoff valve between a relief valve and the heater or tank for which it is installed.

30.16(5) *Relief outlet wastes.* The outlet of a pressure, temperature or other relief valve shall not be connected to the drainage system as a direct waste but rather directed over a fixture if available or to the floor.

30.16(6) *Pressure marking of storage tank.* Hot water storage tanks shall be permanently marked in an accessible place with the maximum allowable working pressure.

30.17(135) Miscellaneous.

30.17(1) *Drain cock.* All storage tanks shall be equipped with adequate drain cocks.

30.17(2) *Line valves.* Valves in the water supply distribution system, except those immediately controlling one fixture supply, when fully opened shall have a cross-sectional area of the smallest orifice or opening through which the water flows at least equal to the cross-sectional area of the nominal size of the pipe in which the valve is installed.

30.17(3) *Water used for processing.* Water used for cooling of equipment or similar purposes shall not be returned to the potable water distributing system. When discharged to the building drainage system, the waste water shall be discharged through an indirect waste pipe or air gap.

30.17(4) *Pilot flame safety.* All automatic or semiautomatic water heaters using a burner having a pilot flame or low flame burner shall be provided with a suitable safety device which will prevent the escape of fuel in event the pilot flame is extinguished or fails.

[Filed July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971]

CHAPTER 31
DRAINAGE SYSTEM

31.1(135) Materials.

31.1(1) *General.* Pipe, tubing and fittings for drainage systems shall comply with the provisions in chapter 23.

31.1(2) *Aboveground piping within buildings.* Soil and waste piping for a drainage system within a building shall be of cast iron, galvanized wrought iron, galvanized open-hearth iron, galvanized steel, lead, brass, seamless copper pipe or copper tube Types K, L, M, DWV or plastic.

Seamless copper pipe or copper tube Types K, L and M may be used in all buildings. Copper tube Type DWV may be used in single- or two-family dwellings provided that copper tube has proven to be a suitable material resistant to corrosion in the locality where used. All copper pipe and tube shall be installed so that the color marking is clearly visible at the time of inspection on the full length of each piece installed.

Plastic pipe and fittings except fixture traps marked to show conformance with ASTM Designations D2661-68 or D2665-68 or current issue thereof and standard number 14 of the National Sanitation Foundation Testing Laboratory may be used in buildings not exceeding two stories in height under the following conditions:

a. No vertical stack shall exceed 35 feet in height. No horizontal branch shall exceed 15 feet in length.

b. All installations shall be made in accordance with recommendations of the manufacturer when found specifically conforming with other sections of these rules and the installation procedures appearing in the appendix of the applicable ASTM standard.

c. Installations shall not be made in any space where the surrounding temperature will exceed 140°F.

d. A variance in application of these materials may be allowed by the administrative authority in a particular case when specifically certified as warranted by a professional engineer or professional architect.

31.1(3) *Underground piping within buildings.* Drains within buildings when underground shall be of cast iron, lead or seamless copper pipe or copper tubing Types K or L. All copper pipe and tubing shall be installed so that the color marking is clearly visible at the time of inspection on the full length of each piece installed.

31.1(4) *Fittings.* Fittings in the drainage system shall conform to the type of piping used.

31.2(135) Building sewer.

31.2(1) *Separate trenches.* The building sewer when installed in a separate trench from the water service pipe may be of cast-iron soil pipe, vitrified clay or concrete sewer pipe.

Asbestos cement sewer pipe may be used at single- or two-family dwellings. Bituminized-fiber sewer pipe may also be used at single- and two-family dwellings in a separate trench from the water service pipe if specifically permitted by municipal ordinance or county regulation.

For single- or two-family dwellings served by private sewage disposal systems, bituminized-fiber or rigid plastic sewer pipe may be used for the building sewer. Joints shall be installed to remain watertight and rootproof.

31.2(2) *One trench.* The building sewer when installed in the same trench with the water service pipe shall be of cast-iron soil pipe or vitrified clay pipe installed to remain watertight and rootproof. When vitrified clay is used, the joints shall be made as specified in the first and second paragraphs of 24.2(7). The water service pipe shall be installed as specified in 30.6(2).

31.2(3) *Sewer in filled ground.* A building sewer or building drain installed in filled or unstable ground shall be of cast-iron pipe, except that nonmetallic piping may be laid upon an approved concrete pad if installed in accordance with 31.2(1).

31.2(4) *Sanitary and storm sewers.* Where separate systems of sanitary drainage and storm drainage are installed in the same property, the sanitary and storm building sewers or drains may be laid side by side in one trench.

31.2(5) *Old house sewers and drains.* Old house sewers and house drains may be used in connection with new buildings or new plumbing and drainage work only when they are found, on examination, to conform in all respects to the requirements governing new house sewers.

31.2(6) *Separate building sewer.* Each new building or existing building in which plumbing is installed shall have an independent connection with a public or private sewer, except as provided below.

Exception: Where one building stands in the rear of another building or an interior lot and no private independent sewer is available or can be constructed to the rear building through an adjoining alley, court, yard or driveway, the drain from the front building may be extended to the rear building and the whole will be considered as one building drain.

31.3(135) Drainage piping installation.

31.3(1) *Horizontal drainage piping.* Horizontal drainage piping shall be installed at a uniform slope, but at slopes not less than permitted in 31.3(2-4).

31.3(2) *Small piping.* Horizontal drainage piping of three-inch diameter and less shall be installed with a fall of not less than one-quarter inch per foot.

31.3(3) *Large piping.* Horizontal drainage piping of larger than three-inch diameter shall be installed with a fall of not less than one-eighth inch per foot.

31.3(4) *Minimum velocity.* Where conditions do not permit building drains and sewers to be laid with a fall as great as that specified, then a lesser slope may be permitted providing the computed velocity will be not less than two feet per second.

31.4(135) Fixture units.

31.4(1) *Values for fixtures.* Fixture-unit values as given in table 31.4(2) designate the relative load weight of different kinds of fixtures which shall be employed in estimating the total load carried by a soil or waste pipe and shall be used in connection with the tables of sizes for soil, waste and drain pipes for which the permissible load is given in terms of fixture units.

TABLE 31.4(2) *Fixture units per fixture or group*

Fixture type	Fixture-unit value as load factors	Minimum size of trap (inches)
1 bathroom group consisting of water closet, lavatory and bathtub or shower stall	Tank water closet ..... 6 Flush-valve water closet ... 8	
Bathtub[1] (with or without overhead shower)	2	1-½
Bathtub[1]	3	2
Bidet	3	Nominal 1-½
Combination sink-and-tray	3	1-½
Combination sink-and-tray with food disposal unit	4	Separate traps 1-½
Dental unit or cuspidor	1	1-¼
Dental lavatory	1	1-¼
Drinking fountain	½	1
Dishwasher,[2] domestic	2	1-½
Floor drains[3]	1	2
Kitchen sink, domestic	2	1-½
Kitchen sink, domestic, with food-disposal unit	3	1-½
Lavatory[4]	1	Small P. O. 1-¼
Do	2	Large P. O. 1-½
Lavatory, barber, beauty parlor	2	1-½
Lavatory, surgeon's	2	1-½
Laundry tray (1 or 2 compartments)	2	1-½
Shower stall, domestic	2	2
Showers (group) per head[2]	3	
Sinks:		
Surgeon's	3	1-½
Flushing rim (with valve)	8	3
Service (Trap standard)	3	3
Service (P trap)	2	2
Pot, scullery, etc.[2]	4	1-½

Urinal, pedestal, siphon jet, blowout	8	Nominal	3
Urinal, wall lip	4		1-½
Urinal stall, washout	4		2
Urinal trough[2] (each 2-foot section)	2		1-½
Wash sink[2] (circular or multiple), each set of faucets	2	Nominal	1-½
Water closet:			
Tank-operated	4	Nominal	3
Valve-operated	8		3

[1]A shower head over a bathtub does not increase the fixture value.

[2]See paragraphs 31.4(3) and 31.4(4) for method of computing unit value of fixtures not listed in table 31.4(2) or for rating of devices with intermittent flows.

[3]Size of floor drain shall be determined by the area of surface water to be drained.

[4]Lavatories with 1¼-or 1½-inch traps have the same load value; larger P.O. plugs have greater flow rate.

31.4(3) *Unlisted fixtures.* Fixtures not listed in table 31.4 (2) shall be estimated in accordance with table 31.4(3).

TABLE 31.4(3)

Fixture drain or trap size	Fixture-unit value	Fixture drain or trap size	Fixture-unit value
1¼ inches and smaller	1	2½ inches	4
1½ inches	2	3 inches	5
2 inches	3	4 inches	6

31.4(4) *Values for continuous flow.* For a continuous or semicontinuous flow into a drainage system, such as from a pump, pump ejector, air-conditioning equipment or similar device, two fixture units shall be allowed for each gallon-per-minute of flow.

31.5(135) Determination of sizes for the drainage system.

31.5(1) *Maximum fixture-unit load.* The maximum number of fixture units that may be connected to a given size of building sewer, building drain, horizontal branch, vertical soil or waste stack is given in tables 31.5 (2) and 31.5(3).

TABLE 31.5(2) *Building drains and sewers*

Diameter of pipe (inches)	Maximum number of fixture units that may be connected to any portion of the building drain or the building sewer.[1]			
		Fall per foot		
	1/16 inch	⅛ inch	¼ inch	½ inch
2			21	26
2½			24	31
3		20[2]	27[2]	36[2]
4		180	216	250
5		390	480	575
6		700	840	1000
8	1400	1600	1920	2300
10	2500	2900	3500	4200
12	3900	4600	5600	6700

[1]Includes branches of the building drain.

[2]Not over 2 water closets.

TABLE 31.5(3) *Horizontal fixture branches and stacks*

Diameter of pipe (inches)	Maximum number of fixtures that may be connected to—			
			More than 3 stories in height	
	Any horizontal[1] fixture branch	1 stack of 3 stories in height or 3 intervals	Total for stack	Total at 1 story or branch interval
1¼	1	2	2	1
1½	3	4	8	2
2	6	10	24	6
2½	12	20	42	9
3	20[2]	30[3]	60[3]	16[2]
4	160	240	500	90
5	360	540	1100	200
6	620	960	1900	350
8	1400	2200	3600	600
10	2500	3800	5600	1000
12	3900	6000	8400	1500

[1]Does not include branches of the building drain.
[2]Not over 2 water closets.
[3]Not over 6 water closets.

31.5(4) *Minimum size of soil and waste stacks.* No soil or waste stack shall be smaller than the largest horizontal branch connected thereto except that a 4x3 w.c. connection shall not be considered as a reduction in pipe size. No main house sewer or drain shall be less than four inches in diameter.

31.5(5) *Minimum size of stack-vent or vent stack.* Any structure on which a building drain is installed shall have at least one stack-vent or vent stack carried full size through the roof not less than three inches in diameter.

31.5(6) *Future fixtures.* When provision is made for the future installation of fixtures, those provided for shall be considered in determining the required sizes of drain pipes. Construction to provide for such future installation shall be terminated with a plugged fitting or fittings at the stack so as to form no dead end.

31.6(135) Offsets on drainage piping.

31.6(1) *Offsets of 45 degrees or less.* An offset in a vertical stack, with a change in direction of 45 degrees or less from the vertical, may be sized as a straight vertical stack. In case a horizontal branch connects to the stack within two feet above or below the offset, a relief vent shall be installed in accordance with 32.18(3).

31.6(2) *Waste stacks serving kitchen sinks.* In a one- or two-family dwelling only in which the waste stack or vent receives the discharge of a kitchen-type sink and also serves as a vent for fixtures connected to the horizontal portion of the branch served by the waste stack, the minimum size of the waste stack up to the highest sink branch connection shall be two inches in diameter. Above that point the size of the stack shall be governed by the total number of fixture units vented by the stack.

31.6(3) *Above highest branch.* An offset above the highest horizontal branch is an offset in the stack-vent and shall be considered only as it affects the developed length of the vent.

31.6(4) *Below lowest branch.* In the case of an offset in a soil or waste stack below the lowest horizontal branch, no change in diameter of the stack because of the offset shall be required if it is made at an angle not greater than 45 degrees. If such an offset is made at an angle greater than 45 degrees, the required diameter of the offset and the stack below, it shall be determined as for a building drain. [See table 31.5(2).]

31.6(5) *Offsets of more than 45 degrees.* A stack with an offset of more than 45 degrees from the vertical shall be sized as follows:

a. The portion of the stack above the offset shall be sized as for a regular stack based on the total number of fixture units above the offset.

b. The offset shall be sized as for a building drain. (See table 31.5(2), column 5.)

c. The portion of the stack below the offset shall be sized as for the offset, or based on the total number of fixture units on the entire stack, whichever is the larger. (See table 31.5(3), column 4.)

d. A relief vent for the offset shall be installed as provided in chapter 32, and in no case shall a horizontal branch connect to the stack within two feet above or below the offset.

31.7(135) Sumps and ejectors.

31.7(1) *Building drains below sewer.* Building drains which cannot be discharged to the sewer by gravity flow shall be discharged into a tightly covered and vented sump from which the liquid shall be lifted and discharged into the building gravity drainage system by automatic pumping equipment or by any equally efficient method approved by the administrative authority. [Also see 31.7(9)]

31.7(2) *Design storage period.* The designed storage of drainage in a sump or ejector shall not exceed a period of 12 hours.

31.7(3) *Design.* Sump and pumping equipment shall be so designed as to discharge all contents accumulated in the sump during the cycle of emptying operation.

31.7(4) *Venting.* The system of drainage piping below the sewer level shall be installed and vented in a manner similar to that of the gravity system.

31.7(5) *Duplex equipment.* Sumps receiving the discharge of more than six water closets shall be provided with duplex pumping equipment.

31.7(6) *Vent sizes.* Building sump vents shall be sized in accordance with table 32.21(5) but shall in no case be sized less than one and one-half inches.

31.7(7) *Separate vents.* Vents from pneumatic ejectors or similar equipment shall be carried separately to the open air as a vent terminal.

31.7(8) *Connection.* No direct connection of a steam exhaust shall be made with the building drainage system.

31.7(9) *Sumps in single-family dwellings.* In single-family dwellings sumps of approved construction to which no fixtures except one floor drain are connected, and which receive only laundry wastes or basement drainage, need not be air-tight nor vented.

31.8(135) Floor drains.

31.8(1) *Accessibility.* Floor drains shall connect into a trap so constructed that it can be readily cleaned and of a size to serve efficiently the purpose for which it is intended. The drain inlet shall be so located that it is, at all times, in full view.

31.8(2) *Connection.* Floor drains subject to sewage backflow shall not be directly connected to the drainage system without suitable protection.

31.8(3) *Provision for evaporation.* Floor-drain trap seals subject to evaporation shall be of the deep-seal type or shall be fed from an approved plumbing fixture. All automatic floor-drain primers directly connected with the water supply are prohibited.

31.8(4) *Size.* Basement floor drains shall be not less than three inches in size and shall connect to the sewer at least five feet from the base of the stack unless vented.

31.9(135) Frost protection. No soil or waste pipes shall be installed or permitted outside of a building or concealed in outside walls or in any place where they may be subjected to freezing temperatures, unless adequate provision is made to protect them from frost.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971, August 15, 1972]

CHAPTER 32
VENTS AND VENTING

32.1(135) Materials.

32.1(1) *Vents.* Pipe, tubing and fittings for the vent piping system shall comply with the provisions in chapter 23.

32.1(2) *Specific type.* Standards given in table 23.5(135) apply to the specific materials approved for use and as indicated in the various paragraphs in this chapter as they apply to the venting system.

32.1(3) *Aboveground piping.* Vent piping aboveground shall be of cast iron, galvanized wrought iron, galvanized ferrous alloys, lead, brass, seamless copper pipe or copper tube or plastic.

Seamless copper pipe or copper tube Types K, L and M may be used in all buildings. Copper tube Type DWV may be used in single- or two-family dwellings provided that copper has proven to be a suitable material resistant to corrosion in the locality where used. All copper pipe and tube shall be installed so that the color marking is clearly visible at the time of inspection on the full length of each piece installed.

Plastic pipe and fittings marked to show conformance with ASTM Designation D2661-68 or ASTM Designation D2665-68 or current issue thereof and standard number 14 or the National Sanitation Foundation Testing Laboratory may be used in buildings not exceeding two stories in height under the following conditions:

a. No vertical stack shall exceed 35 feet in height.

b. All installations shall be made in accordance with recommendations of the manufacturer when found specifically conforming with other sections of these rules and the installation procedures appearing in the appendix of the applicable ASTM standard.

c. Installation shall not be made in any space where the surrounding temperature will exceed 140°F.

d. A variance in application of these materials may be allowed by the administrative authority in a particular case when specifically certified as warranted by a professional engineer or professional architect.

32.1(4) *Underground.* Vent piping placed underground shall be of cast iron soil pipe, lead, seamless copper pipe or copper tubing Types K or L. All copper pipe and tubing shall be installed so that the color marking is clearly visible at the time of inspection on the full length of each piece installed.

32.1(5) *Fittings.* Fittings shall conform to the type of pipe used in the vent system as required by 32.1(2, 3).

32.1(6) *Acid system.* Vent piping of acid waste systems shall conform to that required for acid waste pipe.

32.2(135) Protection of trap seals. The protection of trap seals from siphonage or back pressure shall be accomplished by the appropriate use of soil or waste stacks, vents, revents, back vents, loop vents, circuit or continuous vents or combinations thereof, installed in accordance with the requirements of this chapter.

32.3(135) Vent stacks.

32.3(1) *Installation.* A vent stack or a main vent shall be installed with a soil or waste stack whenever back vents, relief vents or other branch vents are required in two or more branch intervals.

32.3(2) *Terminal.* The vent stack shall terminate independently above the roof of the building or shall be connected with the extension of the soil or waste stack (stack-vent) at least six inches above the flood-level rim of the highest fixture.

32.3(3) *Main stack.* Every building in which plumbing is installed shall have at least one main stack, which shall run undiminished in size and as directly as possible, from the building drain through to the open air above the roof.

32.4(135) Vent terminals.

32.4(1) *Roof extension.* Extensions of vent pipes through a roof shall be terminated at least six inches above it or above flood level.

32.4(2) *Roof garden.* Where a roof is to be used for any purpose other than weather protection, the vent extensions shall be run at least six feet above the roof.

32.4(3) *Flashings.* Each vent terminal shall be made watertight with the roof by proper flashing of copper, lead or similarly durable materials.

32.4(4) *Flag poling.* Vent terminals shall not be used for the purpose of flag poling, TV aerials or similar purposes, except when the piping has been anchored to the construction and approved as safe by the administrative authority.

32.4(5) *Location of vent terminal.* No vent terminal from a drainage system shall be directly beneath any door, window or other ventilating opening of the building or of an adjacent building, nor shall any such vent terminal be within ten feet horizontally of such an opening unless it is at least two feet above or back of the top of such an opening.

32.4(6) *Vent terminals of existing buildings.* Where a new building is higher than an adjacent existing building, the owner of the new building shall defray the cost of complying with 32.4(5) as approved by the administrative authority.

32.4(7) *Extensions outside building.* No soil, waste or vent pipe extension shall be run or placed on the outside of a wall of any new building, but shall be carried up inside the building.

32.5(135) Frost closure. The roof terminal of any stack or vent shall be increased in size as shown in the following table:

1¼	inches increased to	2½	inches
1½	inches increased to	2½	inches
2	inches increased to	4	inches
2½	inches increased to	4	inches
3	inches increased to	5	inches
3½	inches increased to	5	inches
4	inches increased to	6	inches

32.6(135) Vent grades and connections.

32.6(1) *Grade.* All vent and branch-vent pipes shall be so graded and connected as to drip back to the soil or waste pipe by gravity.

32.6(2) *Vertical rise.* Where vent pipes connect to a horizontal soil or waste pipe, the vent shall be taken off above the center line of the soil pipe, and the vent pipe shall rise vertically, or at an angle not more than 45° from the vertical, to a point at least six inches above the flood-level rim of the fixture it is venting before offsetting horizontally or before connecting to the branch vent.

32.6(3) *Height above fixture.* A connection between a vent pipe and a vent stack or stack-vent shall be made at least six inches above the flood-level rim of the highest fixtures served by the vent. Horizontal vent pipes forming branch vents, relief vents or loop vents shall be at least six inches above the flood-level rim of the highest fixture served.

32.7(135) Bars and soda-fountain sinks.

30.7(1) *Bar and soda-fountain wastes.* A bar or soda fountain may be drained indirectly over a sink or other receptacle and such sink or receptacle shall be located in full view on the same floor level as the bar or fountain it serves, and shall connect directly to the sewer and be properly vented. All such bar or soda-fountain connections shall be installed under the approval of the proper administrative authority.

32.7(2) *Sumps.* Sinks or sumps, receiving indirect waste, shall be located in a properly lighted and ventilated space.

32.8(135) Fixtures back-to-back. Two fixtures set back-to-back or adjacent to each other within the distance allowed between a trap and its vent may be served with one continuous soil or waste-vent pipe, provided that each fixture wastes separately into an approved double fitting having inlet openings at the same level. [See 32.10(2)]

32.9(135) Fixture vents.

32.9(1) *Distance of trap from vent.* Each fixture trap shall have a protecting vent so located that the slope and the developed length in the fixture drain from the trap weir to the vent fitting are within the requirements set forth in table 32.9(3).

32.9(2) *Trap-seal protection.* The plumbing system shall be provided with a system of vent piping which will permit the admission or emission of air so that under normal and intended use the seal of any fixture trap shall not be subjected to a pressure differential of more than one inch of water.

32.9(3) *Table.* Distance of fixture trap from vent, using sanitary Tee connection:

Size of fixture and drain (inches)	Distance trap to vent feet	inches
1¼	5	0
1½	6	0
2	8	0
3	12	0
4	12	0

32.9(4) *Trap dip.* The vent pipe opening from a soil or waste pipe, except for water closets and similar fixtures, shall not be below the top weir of the trap.

32.9(5) *Crown vent.* No back vent shall be installed within two pipe diameters of the trap weir.

32.10(135) Common vent.

32.10(1) *Individual vent.* An individual vent, installed vertically, may be used as a common vent for two fixture traps when both fixture drains connect with a vertical drain at the same level.

32.10(2) *Common vent.* A common vent may be used for two fixtures set on the same floor level but connecting at different levels in the stack, provided the vertical drain is one pipe size larger than the upper fixture drain but in no case smaller than the lower fixture drain, whichever is the larger and that both drains conform to table 32.9(3).

32.11(135) Vents for fixture trap below trap dip.

32.11(1) *Hydraulic gradient.* Fixture drains shall be vented within the hydraulic gradient between the trap outlet and vent connection, but in no case shall the unvented drain exceed the distance provided for in table 32.9(3).

32.11(2) *Different levels.* If any stack has fixtures entering at different levels, the fixtures other than the fixture entering at the highest level shall be vented, except as may be permitted in other rules of this chapter.

32.12(135) Wet venting.

32.12(1) *Single bathroom groups.* A group of fixtures located on the same floor level may be group vented, providing that the highest fixture trap of such a group is not more than four feet above the lowest fixture trap, but such installations shall be subject to the following limitations:

a. One fixture of two or less units may drain into the vent of a three-inch closet branch.

b. One fixture of two or less units may drain into the vent of a one and one-half inch bathtub waste pipe.

c. Two fixtures of two or less units may drain into the vent of a two-inch bathtub waste serving two or less tubs providing that they drain into the vent at the same level.

32.12(2) *Double bathroom group.* Where bathrooms or water closets or other fixtures are located on opposite sides of a wall or partition or are adjacent to each other within the prescribed distance, such fixtures may have a common soil or waste pipe and common vent. Water closets having a common soil and vent stack shall drain into the stack at the same level.

32.12(3) *Multistory bathroom groups.* On the lower floors of a multistory building, the waste pipe from one or two lavatories may be used as a wet vent for one or two bathtubs or showers provided that:

a. The wet vent and its extension to the vent stack is two inches in diameter.

b. Each water closet below the top floor is individually back vented.

c. The vent stack is sized as given in the following table:

Size of vent stacks

Number of wet-vented fixtures	Diameter of vent stacks (inches)
1 or 2 bathtubs or showers	2
3 to 5 bathtubs or showers	2½
6 to 9 bathtubs	3
10 to 16 bathtubs	4

32.12(4) Reserved for future use.

32.12(5) *Basement closets.* Basement closets or floor drains may be vented by the waste line from a first floor sink or lavatory having a one and one-half inch waste and vent pipe.

32.13(135) Stack venting. A group of fixtures, consisting of one bathroom group and a kitchen sink or combination fixture, may be installed without individual fixture vents in a one-story building or on the top floor of a building, providing that the highest fixture trap of such a group is not more than four feet above the lowest fixture trap.

32.14(135) Individual fixture reventing.

32.14(1) *Horizontal branches.* With the fixtures located in the same room, one sink and one lavatory or three lavatories (within eight feet developed length of a main-vented line) may be installed on a two-inch horizontal waste branch without reventing, provided the branch is not less than two inches in diameter throughout its length, and provided that the wastes are connected into the side of the branch and the branch leads to its sanitary tee stack connection with a slope of not more than one-fourth inch per foot.

32.14(2) *Where required.* When fixtures other than water closets or floor drains discharge downstream from a water closet, each fixture connecting downstream shall be individually vented, except as in 32.23(135).

32.14(3) *Limits of fixture units above highest bathroom groups.* A fixture or combination of fixtures whose total discharge rating is not more than three fixture units may discharge into a stack not less than three inches in diameter without reventing, provided such fixture connections are made above the connection to the highest bathroom group, and the fixture unit rating of the stack is not otherwise exceeded, and their waste piping is installed as otherwise required in 32.14(1). When this is done, vents from lower fixtures shall be carried above the highest fixture waste connection to the stack.

32.15(135) Circuit and loop venting.

32.15(1) *Battery venting.* A branch soil or waste pipe to which two but not more than eight water closets, pedestal urinals, trap standard to floor, shower stalls or floor drains are connected in battery shall be vented by a circuit or loop vent which shall take off in front of the last fixture connection. In addition, lower-floor branches serving more than three water closets shall be provided with a relief vent taken off in front of the first fixture connection.

32.15(2) *Dual relief vents.* Two-circuit vented horizontal branches serving a total of not more than eight water closets in the same branch interval shall have a dual relief vent. Where the vents are joined, the point of joining shall be at least six inches above the flood-level rim of the highest fixture connected to either branch. When other fixtures discharge above such a branch, each branch shall be provided with a vent.

32.15(3) *Vent connections.* When the circuit, loop or relief vent connections are taken off the horizontal branch, the vent branch connection shall be taken off at vertical angle or from the top of the horizontal branch.

32.16(135) Pneumatic ejectors. Relief vents from a pneumatic ejector shall not be connected to a fixture-branch vent but shall be carried separately to a main vent or stack-vent or to the open air.

32.17(135) Relief vents. Soil and waste stacks in buildings having more than ten branch intervals shall be provided with a relief vent at each tenth interval installed, beginning with the top floor. The size of the relief vent shall be equal to the size of the vent stack to which it connects. The lower end of each relief vent shall connect to the soil or waste stack through a Y below the horizontal branch serving the floor and the upper end shall connect to the vent stack through a Y not less than three feet above the floor levels.

32.18(135) Offsets at an angle less than 45° from the horizontal in buildings of five or more stories.

32.18(1) *Offset vents.* Offsets less than 45° from the horizontal, in a soil or waste stack, except as permitted in 31.6(135), shall comply with 32.18(2, 3).

32.18(2) *Separate venting.* Such offsets may be vented as two separate soil or waste stacks, namely, the stack section below the offset and the stack section above the offset.

32.18(3) *Offset reliefs.* Such offsets may be vented by installing a relief vent as a vertical continuation of the lower section of the stack or as a side vent connected to the lower section between the offset and the next lower fixture or horizontal branch. The upper section of the offset shall be provided with a yoke vent. The diameter of the vents shall be not less than the diameter of the main vent or of the soil and waste stack, whichever is the smaller.

32.19(135) Main vents to connect at base. All main vents or vent stacks shall connect full size at their base to the building drain or to the main soil or waste pipe, at or below the lowest fixture branch. All vent pipes shall extend undiminished in size above the roof, or shall be reconnected with the main soil or waste vent.

32.20(135) Vent headers. Stack-vents and vent stacks may be connected into a common vent header at the top of the stacks and then extended to the open air at one point. This header shall be sized in accordance with the requirements of table 32.21(5), the number of units being the sum of all units on all stacks connected thereto, and the developed length being the longest vent length from the intersection at the base of the most distant stack to the vent terminal in the open air as a direct extension of one stack.

32.21(135) Size and length of vents.

32.21(1) *Length of vent stacks.* The length of the vent stack or main vent shall be its developed length from the lowest connection of the vent system with the soil stack, waste stack or building drain to the vent stack terminal, if it terminates separately in the open air, or to the connection of the vent stack with the stack-vent, plus the developed length of the stack-vent from the connection to the terminal in the open air, if

the two vents are connected together with a single extension to the open air.

32.21(2) *Size of individual vents.* The diameter of an individual vent shall be not less than one and one-fourth inches or less than one-half the diameter of the drain to which it is connected.

32.21(3) *Size of relief vent.* The diameter of a relief vent shall be not less than one-half the diameter of the soil or waste branch to which it is connected.

32.21(4) *Size of circuit or loop vent.* The diameter of a circuit or loop vent shall be not less than one-half the size of the diameter of the horizontal soil or waste branch or the diameter of the vent stack, whichever is the smaller.

32.21(5) *Size of vent piping.* The size of vent piping shall be determined from its length and the total of fixture units connected thereto, as provided in table 32.21(5). Twenty percent of the total length may be installed in a horizontal position.

TABLE 32.21(5) *Size and length of vents*

Size of soil or waste stack (inches)	Fixture units connected	Diameter of vent required (inches)								
		1¼	1½	2	2½	3	4	5	6	8
		Maximum length vent (feet)								
1¼	2	30	.....	.....	.....	.....	.....	.....	.....	.....
1½	8	50	150	.....	.....	.....	.....	.....	.....	.....

8	600	.....	.....	.....	.....	.....	50	150	500	1300
8	1400	.....	.....	.....	.....	.....	40	100	400	1200
8	2200	.....	.....	.....	.....	.....	30	80	350	1100
8	3600	.....	.....	.....	.....	.....	25	60	250	800
10	1000	.....	.....	.....	.....	.....	.....	75	125	1000
10	2500	.....	.....	.....	.....	.....	.....	50	100	500
10	3800	.....	.....	.....	.....	.....	.....	30	80	350
10	5600	.....	.....	.....	.....	.....	.....	25	60	250

32.22 Reserved for future use.

32.23(135) Vents not required. No vents will be required on a downspout or rain leader trap, a backwater valve, a subsoil catch basin trap, on a three-inch basement floor drain or a water closet, provided its drain branches into the house drain on the sewer side at a distance of five feet or more from the base of the stack and the branch line to such floor drain or water closet is not more than 12 feet in length.

32.24(135) Special waste and vent installations. Where unusual design and structural conditions appear to preclude or prevent the conventional installations of plumbing in accord with this code, the administrative authority should be consulted.

[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971, August 15, 1972]

CHAPTER 33
STORM DRAINS

33.1(135) General.

33.1(1) *Drainage required.* Roofs, paved areas, yard, courts and courtyards shall be drained into a storm sewer when such a sewer is abutting the property, or otherwise available as required by the local administrative authority.

Such drainage may be discharged into a combined sewer system where such a system is available and where not prohibited by the administrative authority having jurisdiction.

33.1(2) *Prohibited drainage.* Storm water shall not be drained into sewers intended for sewage only.

33.1(3) *Traps.* Leaders or downspouts, when connected to a combined sewer, shall be trapped.

33.1(4) *Expansion joints.* Expansion joints or sleeves shall be provided where warranted by temperature variations or physical conditions.

33.1(5) *Subsoil drainage.* No subsoil drainage system shall be installed to drain into a sewer intended for sanitary sewage unless approval is obtained from the proper local administrative authority.

33.1(6) *Subsoil drain.* Where subsoil drains are placed under the cellar or basement floor or are used to surround the outer walls of a building, they shall be made of open-jointed, horizontally split or perforated clay tile or perforated bituminized-fiber pipe, asbestos-cement pipe or rigid plastic pipe not less than four inches in diameter. They shall be drained over an open floor drain that is supplied with water; and the subsoil drain shall be equipped with an approved type of back water valve if the building is subject to flooding. Subsoil drains may discharge into a properly installed sump. Such sumps do not require vents. The building storm and subsoil drainage systems shall be connected to a storm sewer when such a sewer abuts the property.

33.1(7) *Building subdrains.* Building subdrains located below the public sewer level shall discharge into a sump or receiving tank, the contents of which shall be automatically lifted and discharged into the drainage system as required for building sumps. [See 31.7(135)]

33.2(135) Materials.

33.2(1) *Inside conductors.* Conductors placed within a building or run in a vent or pipe shaft shall be of cast iron, galvanized steel, galvanized wrought iron, galvanized ferrous alloys pipe, brass, copper tubing or lead.

33.2(2) *Outside leaders.* When outside leaders are of sheet metal and connected with a building storm drain or storm sewer, they shall be connected to a cast iron drain extending above the finish grade, or the sheet metal leader shall be protected against injury.

33.2(3) *Underground storm drains.* Building storm drains underground, inside the building, shall be of cast iron soil pipe or copper pipe or copper tubing.

33.2(4) *Building storm drains.* Building storm drains, which are underground and beneath the building, shall be of cast iron soil pipe, seamless copper pipe or copper tubing. Reinforced concrete pipe meeting ASTM specification C76-70, or current issue thereof, may be used as an alternate to the above described materials when specifically approved by the administrative authority.

33.2(5) *Building storm sewers.* The building storm sewer shall be of cast iron soil pipe, vitrified clay pipe, concrete pipe, bituminized-fiber pipe or asbestos-cement pipe. Cement mortar joints may be used in clay and cement pipe.

33.3(135) Traps.

33.3(1) *Main trap.* Storm water drains connected to a combined sewage system shall be trapped except where the roof or gutter opening is located in accord with the requirements for vent terminals, 32.4(5). One trap may serve several conductors but traps must be set below frost or inside the building.

33.3(2) *Material.* Storm water traps, when required, shall be of cast iron or copper pipe or copper tubing.

33.3(3) *Exception.* No traps shall be required for storm water drains which are connected to a sewer carrying storm water exclusively.

33.3(4) *Size.* Traps for individual conductors shall be the same size as the horizontal branch to which they are connected.

33.3(5) *Location.* Conductor traps shall be so located that an accessible clean-out may be installed on the building side of the trap.

33.4(135) Conductors and connections.

33.4(1) *Prohibited uses.* Conductor pipes shall not be used as soil, waste or vent pipes, nor shall soil, waste or vent pipes be used as conductors.

33.4(2) *Protection.* Rain water conductors installed along alleyways, driveways or other locations where they may be exposed to damage shall be protected by metal guards, recessed into the wall or constructed from ferrous alloy pipe.

33.5(135) Roof drains.

33.5(1) *Material.* Roof drains shall be of cast iron, copper, lead or other acceptable corrosion-resisting material, securely bolted or screwed to the conductor or leader.

33.5(2) *Strainers.* All roof areas, except those draining to hanging gutters, shall be equipped with roof drains having strainers.

33.5(3) *Flat decks.* Roof drain strainers for use on sun decks, parking decks and similar areas, normally serviced and maintained, may be of the flat surface type, level with the deck.

33.5(4) *Roof drain flashings.* The connection between roofs and roof drains which pass through the roof and into the interior of the building shall be made watertight by the use of proper flashing material or roof connection.

33.6(135) Size of leaders and storm drains.

33.6(1) *Leaders.* Vertical leaders shall be sized on the maximum projected roof area, according to the following table:

TABLE 33.6(1)
Size of vertical leaders

Diameter of leader or conducted[1] (inches)	Maximum projected roof area (sq. feet)
2	720
2½	1,300
3	2,200
4	4,600
5	8,650
6	13,500
8	29,000

[1]The equivalent diameter of a square or rectangular leader may be taken as the diameter of that circle which may be inscribed within the cross-sectional area of the leader.

NOTE: See footnote to table 33.6(2).

33.6(2) *Building storm drain.* The size of the building storm drain or any of its horizontal branches having a slope of one-half inch or less per foot shall be based upon the maximum projected roof area to be handled according to the following table:

TABLE 33.6(2)
Size of horizontal storm drains

Diameter of drain (inches)	Maximum projected roof area for drains for various slopes		
	⅛ inch sq. ft.	¼ inch sq. ft.	½ inch sq. ft.
3	822	1,160	1,644
4	1,880	2,650	3,760
5	3,340	4,720	6,680
6	5,350	7,550	10,700
8	11,500	16,300	23,000
10	20,700	29,200	41,400
12	33,300	47,000	66,600
15	59,500	84,000	119,000

Tables 33.6(1) and 33.6(2) are based on a maximum rate of rainfall of four inches per hour.

33.6(3) *Roof gutters.* The size of semicircular gutters shall be based on the maximum projected roof area, according to the following table:

TABLE 33.6 (3) *Size of gutters*

Diameter of gutter[1] inches	Maximum projected roof area for gutters of various slopes			
	1/16 inch	⅛ inch	¼ inch	½ inch
	(sq. ft.)	(sq. ft.)	(sq. ft.)	(sq. ft.)
3	170	240	340	480
4	360	510	720	1020
5	625	880	1250	1770
6	900	1360	1920	2770
7	1380	1950	2760	3900
8	1990	2800	3980	5600
10	3600	5100	7200	10000

[1]Gutters other than semicircular may be used provided they have an equivalent cross-sectional area.

33.7(135) Size of combined drains and sewers. In computing the size of combined building drains or sewers to which storm drains serving a roof, court or paved area are to be connected, the area drained may be converted to equivalent fixture unit loads by placing a value of 256 fixture units on the first 1,000 square feet, or portion thereof, of area to be drained; and one additional fixture unit for each 3.9 square feet thereafter.

33.8(135) Values for continuous flow. Where there is a continuous or semicontinuous discharge into the building storm drain or building storm sewer, as from a pump, ejector, air-condi-

tioning plant or similar device, each gallon per minute of such discharge shall be computed as being equivalent to 24 square feet of roof area, based on a four-inch rainfall.
[Filed prior to July 1, 1952; amended December 28, 1955, March 18, 1964, September 15, 1971]

CHAPTER 34
INSPECTION AND TESTS

34.1(135) Inspections. All new plumbing work, and such portions of existing systems as may be affected by new work or any changes, shall be inspected to insure compliance with all the requirements of this code and to assure that the installation and construction of the plumbing system is in accordance with approved plans.

34.2(135) Notification.

34.2(1) *Advance notice.* It shall be the duty of the holder of a permit to give notice to the administrative authority when plumbing work is ready for test or inspection.

34.2(2) *Responsibility.* It shall be the duty of the holder of a permit to make sure that the work will stand the test prescribed before giving the notification.

34.2(3) *Retesting.* If the administrative authority finds that the work will not pass the test, necessary corrections shall be made and the work shall then be resubmitted for test or inspection.

34.2(4) *Tests.* Tests shall be conducted in the presence of the administrative authority or of his duly appointed representative.

34.3(135) Plumbing plans. All plans and specifications required to be submitted shall be examined by the administrative authority for acceptability under the provisions of this code.

34.4(135) Violations. Notices of violations shall be mailed or delivered by the administrative authority to the person responsible at the time inspection was made.

34.5(135) Covering of work.

34.5(1) *Requirements.* No drainage or plumbing system or part thereof shall be covered until it has been inspected, tested and accepted as prescribed in this code.

34.5(2) *Uncovering.* If any building drainage or plumbing system or part thereof which is installed, altered or repaired is covered before being inspected, tested and approved, as prescribed in this code, it shall be uncovered for inspection after notice to uncover the work has been issued to the responsible person by the administrative authority.

34.6(135) Material and labor for tests. The equipment, material and labor necessary for inspection or tests shall be furnished by the person to whom the permit is issued or by whom inspection is requested.

34.7(135) Tests of drainage and vent systems. The piping of the plumbing, drainage and venting systems shall be tested with water or air. After the plumbing fixtures have been set and their traps filled with water, the entire drainage system shall be submitted to a final inspection. The administrative authority may require the removal of any cleanouts to ascertain if the pressure has reached all parts of the system.

34.8(135) Methods of testing drainage and vent systems.

34.8(1) *Water test.* The water test shall be applied to the drainage system either in its entirety or in sections. If applied to the entire system, all openings in the piping shall be tightly closed, except the highest opening, and the system filled with water to point of overflow. If the system is tested in sections, each opening shall be tightly plugged except the highest opening of the section under test, and each section shall be filled with water, but no section shall be tested with less than a ten-foot head of water. In testing successive sections, at least the upper ten feet of the next preceding section shall be tested, so that no joint or pipe in the building (except the uppermost ten feet of the system) shall have been submitted to a test of less than a ten-foot head of water. The water shall be kept in the system or in the portion under test for at least 15 minutes before inspection starts; the system shall then be tight at all points.

34.8(2) *Air test.* The air test shall be made by attaching an air compressor testing apparatus to any suitable opening, and after closing all other inlets and outlets to the system, forcing air into the system until there is a uniform gauge pressure of five pounds per square inch or sufficient to balance a column of mercury ten inches in height. This pressure shall be held without introduction of additional air for a period of at least 15 minutes.

34.9(135) Building sewer.

34.9(1) *Test required.* Building sewers shall be tested.

34.9(2) *Method.* Test shall consist of plugging end of building sewer at point of connection with the public sewer and filling the building sewer with water and testing with not less than a ten-foot head of water.

34.10(135) Inspection and tests not required. No test or inspection shall be required where a plumbing system or part thereof is set up for exhibition purposes and has no connection with a water or drainage system.

34.11(135) Tests of water supply system. Upon completion of a section or of the entire water supply system, it shall be tested and proved tight under a water pressure not less than the working pressure under which it is to be used. The water used for tests shall be obtained from a potable source of supply.

34.12(135) Tests of interior leaders. Leaders or downspouts and branches within a building may be tested by water or air in accordance with 34.8(1,2).

34.13(135) Certificate of approval. Upon satisfactory completion and final tests of the plumbing system, the administrative authority shall keep a permanent record thereof and shall issue a written approval upon request.

34.14(135) Defective plumbing. Wherever there is reason to believe that the plumbing system of any building has become defective, it shall be subjected to test or inspection, and any defects found shall be corrected as required in writing by the administrative authority.

All installed plumbing systems and fixtures attached thereto found defective or in an insanitary condition shall be repaired, renovated, replaced or removed within ten days upon written notice from the proper administrative authority. When defective plumbing is found to be dangerous to the health of the occupants of a building or to the patrons of a food establishment, the proper administrative authority shall notify the health officer having jurisdiction, and said health officer shall take immediate steps to protect the health of such occupants or patrons. In the event the proper administrative authority is of the opinion the defect found endangers the public water supply, the defects shall be immediately corrected or the plumbing system disconnected from the public water supply.

[Filed July1, 1952; amended December 28, 1955, March 18, 1964]

CHAPTER 35 to 37
Reserved for future use

TITLES IV to VIII

Reserved for future use

CHAPTER 38 to 50

TITLE IX

HOSPITALS AND RELATED INSTITUTIONS

CHAPTER 51
HOSPITALS

51.1(135B) Definitions.

51.1(1) *Hospital.* A hospital shall mean a place which is devoted primarily to the maintenance and operation of facilities for the diagnosis, treatment or care over a period exceeding 24 hours of two or more nonrelated individuals suffering from illness, injury or deformity, or a place which is devoted primarily to the rendering over a period exceeding 24 hours of obstetrical or other medical or nursing care for two or more nonrelated individuals, or any institution, place, building or agency in which any accommodation is primarily maintained, furnished or offered for the care over a period exceeding 24 hours of two or more nonrelated aged or infirm persons requiring or receiving chronic or convalescent care and shall include sanatoriums, rest homes, nursing homes, boarding homes or other related institutions within the meaning of this Act. Provided, however, nothing in this Act shall apply to hotels or other similar places that furnish only food and lodging or either to their guests. "Hospital" shall include, in any event, any facilities wholly or partially constructed or to be constructed with federal financial assistance pursuant to Public Law 725-79th Congress, approved August 13, 1946.

51.1(2) *Medical staff.* The medical staff of a hospital shall be defined as an organized body composed of all licensed physicians who are appointed to the staff of a hospital by its governing board.

51.1(3) *Registered nurse.* A registered nurse shall be a person from an accredited school of nursing and registered in the state of Iowa.

51.2(135B) Classification. Classification of hospitals and compliance with:

51.2(1) *Classification.* For the purpose of administering the hospital licensing law, all institutions subject to licensure shall be classified in the following manner:

a. General hospital. Any institution providing hospital care, including general medical, surgical or maternity care and treatment.

b. Specialized hospital or sanatorium. Any institution providing specialized care and treatment, e.g., tuberculosis, pediatrics, mental diseases, orthopedics, etc.

51.2(2) *Compliance requirements for each classification.*

a. General hospitals. Any hospital classified as a general hospital shall comply with all of the general regulations for hospitals, and they shall comply with regulations pertaining to specialized services, insofar as such specialized services are provided in the hospital.

b. Specialized hospitals and sanatoriums. Specialized hospitals and sanatoriums shall comply with all general regulations for hospitals and all regulations pertaining to such specialized services as are provided by the hospital, sanatorium or institution.

51.3(135B) License.

51.3(1) *Separate license required.* Separate license shall be required for each hospital even though more than one is operated under the same management. Separate license is not required for separate buildings on the same grounds.

51.3(2) *License not required.* The following are not deemed to come within the meaning of the hospital licensing law and shall not be required to obtain a license thereunder:

a. Any institution for well children, day nursery and child care center, foster boarding homes or houses and homes for handicapped children. However, such institutions as have a dual function, including nursing and medical care, and care of the sick are required to be licensed.

b. Homes, houses or institutions for aged persons which limit their functions to board and room and provide no medical or nursing care and house no bedridden persons.

c. Dispensary or first-aid stations maintained for the care of employees, students, customers, members of any commercial or industrial plant, educational institution or convent.

51.3(3) *Posting of license.* The license shall be conspicuously posted on the premises.

51.4(135B) General regulations for the administration of hospitals.

51.4(1) *Governing board.* The governing board or the owner or the person or persons designated by the owner as the governing authority shall be the supreme authority in the hospital, responsible for the management, control, and appointment of the medical staff and functioning of the institution subject to the laws of the state of Iowa. The governing board shall appoint a medical staff which shall consist of one or more licensed physicians who shall be responsible to the governing authority for the clinical and scientific work of the hospital.

51.4(2) *Medical staff.*

a. A roster of medical staff members shall be kept, and a copy of said roster shall be reported annually to the state department of health.

b. All hospitals shall have one or more licensed physicians designated for emergency call service at all times.

51.4(3) *Nursing staff.*

a. The department of nursing shall be organized to provide complete and efficient nursing care to each patient, and the authority, responsibility and function of each nurse shall be clearly defined.

b. All nurses employed in a hospital who practice nursing as a graduate or registered nurse shall be legally licensed in Iowa to practice their profession or shall obtain such license at the next examination.

c. There shall be a superintendent or director of nursing service who shall be a competent well-trained person with administrative and executive ability, and shall be a graduate nurse and registered in the state of Iowa or shall obtain such license at the next examination or by reciprocity.

d. Supervisors and head nurses shall have had preparation courses and experience commensurate with the responsibility of the specific assignment.

e. Applications for employment as a registered nurse shall be submitted, in writing, to the person responsible for nursing personnel, and each application shall contain accurate information as to the education, training, experience, personal background of each applicant. A complete physical examination, including indicated X-ray and laboratory examinations, shall be required at the time of employment and at regular intervals thereafter.

f. All nonprofessional workers performing patient-care service shall be under the supervision of a registered nurse. Their duties shall be defined and they shall be instructed in all duties assigned to them. At the time of employment, a complete physical examination, including X-ray of chest and laboratory examinations, shall be required and at regular intervals thereafter.

g. Nursing care shall be that amount of professional and nonprofessional care essential to provide proper treatment for the well-being and the recovery of the patient.

h. Policies, procedures, and rules with which each employee shall be familiar shall be established for the administrative and technical guidance of the personnel of the hospital.

i. Personnel absent from duty because of any disease in a communicable stage shall be excluded from duty in the hospital until examined by a physician designated for that purpose.

j. There shall be at least one registered nurse on duty or on call at all times.

51.5(135B) Records.

51.5(1) *Medical records.* Accurate and complete medical records shall be written for all patients and signed by the attending physician; these shall be filed and stored in an accessible manner in the hospital and in accordance with the statute of limitations.

51.5(2) *Hospital records.*

a. Admission records. A register of all admissions to the hospital shall be kept in accordance with Iowa law.

b. Death records. A register of all deaths in the hospital shall be kept, including all information required on a standard certificate.

c. Birth records. A register of all births in the hospital shall be kept, including all information required on a standard certificate.

d. Narcotic records. Narcotic records shall be maintained in accordance with the laws and regulations pertaining thereto.

51.6(135B) Reports to the state department of health.

51.6(1) *Annual reports.* Annual report shall be filed with the state department of health within three months after termination of each fiscal year on forms furnished by same. The reports shall include: Total number of admissions during year, total number discharged during year, total number of deaths during year, bed capacity, average percentage of bed occupancy, total patient days, average length of stay, number of major operations, number of minor operations, number of

autopsies, complete maternity statistics as required by the state department of health and a report of any changes in the physical plant within the past year.

51.6(2) *Communicable disease report.* The hospital or institution shall co-operate with the attending physician in the reporting of all reportable diseases occurring or being treated within the hospital or institution to the proper authorities, as provided by the laws of Iowa and the rules of the Iowa state department of health.

51.7(135B) Plans and specifications for new hospital construction.

51.7(1) Hospitals shall be licensed by the state department of health, when the following requirements have been fulfilled:

a. In locating an institution, the local zoning restrictions shall be obtained from the local civil authorities.

b. New hospitals shall be so located that they are free from undue noises from railroads, freight yards, main traffic arteries, schools and children's playgrounds.

c. The site shall be free from smoke, foul odors and dust from nearby industrial plants.

d. Hospitals must be served by good roads, kept passable at all times of the year.

51.7(2) When construction is contemplated, either for new buildings, additions to existing buildings or material alterations to existing buildings, the preliminary plan or sketch shall be submitted in duplicate to the state department of health for review and approval, preferably before the preparation of working drawings in accordance with chapter 135B of the Code.

a. Complete construction plans and specifications for the building or remodeling hereafter shall be submitted to the state department of health in triplicate for review and approval before construction begins, and shall be in accordance with all the applicable laws, rules and local municipal codes in accordance with chapter 135B of the Code.

b. Plans and specifications for any new hospital additions to an existing hospital, or structural change of an existing hospital shall show that every consideration has been given to features of design that are necessary to insure efficient care of the patient and protection of patients from any material or human source of infection, such as the segregation of various hospital departments, the room arrangements in these departments and the sanitary features of the heating, lighting, ventilating and plumbing facilities.

c. The plans and specifications for the design and construction of a new hospital, or addition to an existing hospital, or major structural change in an existing hospital shall be in accordance with all the applicable laws, rules and local municipal codes; the sanitary facilities, including the system of water supply, plumbing, sewerage, garbage, refuse disposal and equipment shall be selected, constructed and installed in accordance with existing laws and rules pertaining to environmental sanitation; and features of design and arrangement shall be in substantial accordance with recognized standards for hospitals.

d. Plans and revisions shall be certified by an engineer or architect licensed to practice in the state of Iowa or eligible for licensure in Iowa.

51.8(135B) Design, equipment and maintenance of the physical plant.

51.8(1) The hospital structure and its component parts and facilities shall be kept in good repair and maintained with consideration for the safety and comfort of the patient.

51.8(2) Walls, floors and ceilings shall be constructed of materials and maintained to permit frequent cleaning or disinfection necessary for the safe care of patients.

51.8(3) Beds must be spaced so as to provide adequate room for nursing procedures and to prevent the transmission of infection. The following allowances of floor space are minimum:

Single patient rooms—100 sq. ft.
Multiple rooms or wards—80 sq. ft. per bed
Pediatric beds or cribs—40 sq. ft. per bed
Full-term nursing bassinets—20 sq. ft. per bassinet.

51.8(4) Doors to patients' rooms shall be wide enough to permit the removal of any occupied bed used in the rooms. Where it is not practical to widen the corridors and the doors of the individual rooms, the state fire marshal may accept in lieu thereof, mattresses which have been equipped with two straps on each side and one on each end. These straps, which are to be used as hand grips, shall be substantially fastened to the mattress and of sufficient strength so that the patients may be easily removed from the beds and transported to the outside.

51.8(5) Vision panels shall be required in all double acting doors.

51.8(6) Each patient's room shall have at least one window opening to the outside to permit ventilation and a source of natural light.

51.8(7) No room shall be used for the bed care of patients which can only be reached by passing through another patient's room.

51.8(8) There shall be space and facilities for the proper storage of all drugs, supplies, linen and equipment.

51.8(9) Every room, including storerooms, hallways and others, shall have sufficient artificial light to make all parts clearly visible and to permit efficient performance of all necessary work.

51.8(10) All utility rooms shall be provided with lighting and ventilation and necessary plumbing.

51.8(11) Safe emergency lighting facilities shall be provided and distributed so as to be readily available to personnel on duty at all times.

51.8(12) An adequate number of stairways shall be provided with handrails and shall be of size and design permitting the removal of patients on a stretcher.

51.8(13) There shall be more than one means of egress leading to the outside of the building from each floor. Egresses are to be located as near to opposite ends of the building as practical.

51.9(135B) Heating and ventilating.

51.9(1) The heating plant shall be adequate to maintain a cold weather temperature of 70°F. throughout the building and a higher temperature where required.

51.9(2) Kitchens, bathrooms and service rooms shall be so located and ventilated by window or mechanical means to prevent offensive odors from entering patients' rooms and the public halls.

51.10(135B) Water supply.

51.10(1) The water shall be obtained from a municipal water supply or from a private supply system, the location, construction and operation of which is acceptable to the state department of health.

51.10(2) The water shall be distributed to conveniently located taps and fixtures in the building.

51.10(3) Hot water shall be available at sinks and lavatories at all times.

51.11(135B) Sewage disposal. Sewage shall be discharged into a municipal sewerage system where such a system is available, otherwise the sewage shall be collected, treated and disposed of in an independent sewerage system which complies with standards of design and operation approved by the state department of health.

51.12(135B) Plumbing.

51.12(1) All plumbing shall be installed and maintained in accordance with the Iowa state plumbing code.

51.12(2) Adequate toilet, lavatory and bath facilities shall be provided on each floor where patients are cared for in the institution.

51.12(3) Cross connections, back siphonage defects and particularly water operated suction apparatus are prohibited.

51.13(135B) Sterilizing equipment.

51.13(1) Adequate facilities shall be provided for the sterilization of utensils, instruments, supplies and water in accordance with the needs of the patients treated. The facilities shall be carefully maintained and routinely checked to assure continuous efficiency.

51.13(2) Adequate facilities with proper safeguards shall be provided for the preparation, storage and dispensing of sterile equipment and supplies.

51.14(135B) Anesthesia storage. Hospitals using anesthetic gases, capable of exploding under certain conditions of concentration, humidity, etc., shall take all reasonable precautions to avoid explosion hazards in storage or in use.

51.15(135B) Screens. Screens shall be provided for any outside or inside aperture which could transmit any insect vector carrying infectious material in jeopardy to the welfare and safety of patients. All screen doors shall be equipped with self-closing devices.

51.16(135B) Incineration. Incineration facilities shall be provided for the disposal of infected dressings, surgical and obstetrical wastes and other similar materials.

51.17(135B) Laundry. The hospital shall make provisions for the proper cleansing of linen and washable goods. Where linen is sent to an outside laundry, the hospital shall be responsible for the effectiveness of cleansing methods used and the proper care of contaminated linens.

51.18(135B) Hand-washing facilities. There shall be hand-washing facilities throughout the institution, within or conveniently located with regard to every patient's room or patient-caring service. Hand-scrubbing sinks or lavatories, foot pedal preferred, shall be provided in operating, delivery and labor rooms, nurseries, examining and treatment rooms, dietary facilities, toilet rooms and rooms used for the isolation of patients. Hand-scrubbing sinks shall be designed to make it possible to wash the hands without break in technique. The use of a common towel is prohibited.

51.19(135B) Food service.

51.19(1) *Floors.* The floors of all rooms in which food or beverage is stored, prepared or served or in which utensils are washed shall be of such construction so as to be easily cleaned, shall be smooth, and shall be kept clean and in good repair. The floors shall be composed of such material as to constitute a minimal hazard when wet or greasy.

51.19(2) *Walls and ceilings.* Walls and ceilings of all rooms shall be kept clean and in good repair. All walls and ceilings of rooms in which food or beverage is stored or prepared shall be finished in light color. The walls of all rooms in which food or beverage is prepared or utensils are washed shall have a smooth, washable surface up to the level reached by splash or spray.

51.19(3) *Doors and windows.* When flies are prevalent, all openings into the outer air shall be effectively screened and doors shall be self-closing, unless other effective means are provided to prevent the entrance of flies.

51.19(4) *Lighting.* All rooms in which food or beverage is stored or prepared, or in which utensils are washed shall be well lighted.

51.19(5) *Ventilation.* All rooms in which food or beverage is stored, prepared or served or in which utensils are washed shall be well ventilated. A system of forced air ventilation shall be used in the cooking area.

51.19(6) *Toilet facilities.* Every hospital shall be provided with adequate and conveniently located toilet facilities for its employees engaged in food handling. Toilet rooms shall not open directly into any room in which food, beverage or utensils are handled or stored. The doors of all toilet rooms shall be self-closing. Toilet rooms shall be kept in a clean condition, in good repair and well lighted and ventilated. Hand-washing signs shall be posted in each toilet room used by employees.

51.19(7) *Water supply.* Running water under pressure shall be easily accessible to all rooms in which food is prepared or utensils washed.

51.19(8) *Lavatory facilities.* Adequate and convenient hand-washing facilities shall be provided within the kitchen area or adjacent to kitchen area, including hot and cold running water, soap and approved sanitary towels and shall be readily accessible to employees. The use of a common towel is prohibited.

51.19(9) *Construction of utensils and equipment.* All multiuse utensils, cases, counters, shelves, tables, refrigerating equipment, sinks and other equipment or utensils used in connection with the operation of the food service shall be so constructed as to be easily cleaned and shall be kept in good repair. Utensils containing or plated with cadmium or lead shall not be used, provided, that solder containing lead may be used for joining.

51.19(10) *Cleaning and bactericidal treatment of utensils and equipment.*

a. All equipment including cases, counters, shelves, tables, refrigerators, stoves, hoods and sinks shall be kept clean and free from dust, dirt, insects and other contaminating material. All cloths used by maids, chefs and other employees shall be clean. Single-service containers shall be used only once.

b. All multiuse eating and drinking utensils shall be thoroughly cleaned and effectively subjected to an approved bactericidal process after each usage. All multiuse utensils used in the preparation or serving of food and beverage shall be thoroughly cleansed and effectively subjected to an approved bactericidal process immediately following the day's operation. Drying cloths, if used, shall be clean and shall be used for no other purpose.

c. No article, polish or other substance containing any cyanide preparation or other poisonous material shall be used for the cleansing or polishing of utensils.

51.19(11) *Storage and handling of utensils and equipment.* After bactericidal treatment utensils shall be stored in a clean, dry place protected from insects, dust and other contaminations; and shall be handled in such a manner as to prevent contamination as far as practicable. Single-service utensils shall be purchased only in sanitary container, shall be stored therein in a clean, dry place until used, and shall be handled in a sanitary manner.

51.19(12) *Disposal of wastes.* All wastes shall be properly disposed of, and all garbage and trash shall be kept in suitable receptacles in such manner as not to become a nuisance.

51.19(13) *Refrigeration.* All readily perishable food and beverage shall be kept at or below 40° F. except when being prepared or served. All refrigerators shall be provided with thermometers.

51.19(14) *Wholesomeness of food and beverage.* All food and beverage shall be clean, wholesome, free from spoilage and prepared so as to be safe for human consumption. Milk and fluid milk products shall be served in the individual original containers in which they are received from the distributor or from a bulk container equipped with an approved dispensing device. This requirement shall not apply to cream which may be served from the original bottle or from a dispenser approved for such service.

51.19(15) *Storage and serving of food and beverage.* All food and beverage shall be so stored and served as to be protected from dust, insects, vermin, depredation and pollution by rodents, unnecessary handling, droplet infection, overhead leakage and other contamination. Foods shall be properly cleaned before storage. All means necessary for the elimination of flies, roaches and rodents shall be used.

51.19(16) *Cleanliness of employees.* All employees shall wear clean outer garments and shall keep their hands clean at all times while engaged in handling of food, beverage, utensils or equipment. Employees shall not expectorate or use tobacco in any form in rooms in which food is prepared.

51.19(17) *Miscellaneous.* The premises of all hospitals shall be kept clean and free of litter or rubbish. None of the operations connected with the food service shall be conducted in any room used as living or sleeping quarters. Adequate lockers or dressing rooms shall be provided for employees' clothing and shall be kept clean. Soiled linens, coats and aprons shall be kept in containers provided for this purpose.

51.19(18) *Ice.* All ice used in contact with food or beverage shall be safe in quality, meeting

state department of health standards for drinking water. It shall be handled and dispensed in a sanitary manner. No ice used for human consumption shall be stored in proximity to an area where wastes are disposed.

51.19(19) *Milk and milk products.* There shall be a safe supply of milk, cream and milk products for human consumption. Where pasteurized or Grade A raw milk is not available, condensed, evaporated or dried milk shall be used.

51.19(20) *Food-handling employees.*

a. The hospital or institution shall require a medical certificate, given by a reputable physician, for every person handling food in the hospital, stating as the result of a physical examination and the indicated laboratory procedure that the employee is free from an infectious or communicable disease in a communicable stage or a carrier of disease, and is physically and mentally able to perform his duties. Such certificate shall be renewed at least once yearly.

b. No person suffering from any infectious or contagious disease or who is a disease carrier shall be employed in the hospital.

51.19(21) *Disposal of waste.* Suitable facilities shall be provided for storage, collection and disposal of garbage at frequent intervals in a manner which does not create a nuisance, will not permit the transmission of contagious diseases or provide a breeding place for flies.

51.20(135B) Dietary department of the hospital.

51.20(1) *Dietitian.* The dietary department should be under the supervision of a trained dietitian or a person skilled in the handling, preparation and serving of foods and the supervision and management of food handlers.

51.20(2) *Dietary departments not supervised by a trained dietitian.* In hospitals where a trained and qualified dietitian is not employed, the services of a trained dietitian or a nutritionist available to the community or a nutrition consultant of the state department of health shall be obtained periodically to consult with the personnel of the dietary department on the storing, preparing and serving of food and the planning of menus.

51.20(3) *Food provided patients and employees.* Food provided patients or employees shall fulfill all the requirements of a diet selected and prepared in accordance with accepted nutritional standards of the national research council. The duties of both the skilled and unskilled employees shall be assigned so that these requirements are fulfilled.

51.21(135B) Facilities and equipment for patient care. Hospital equipment shall be selected, maintained and used in accordance with the needs of the patients.

51.21(1) *Furnishings, supplies and equipment.*

a. Bed. A hospital bed with suitable mattress, pillows and necessary coverings shall be provided for each patient. After the discharge of each patient, the bed and room furnishings shall be thoroughly cleansed.

b. Bedside furniture. There shall be a chair and bedside table for each patient, unless clinically contraindicated.

c. Linen. A supply of towels, wash cloths, bath blankets and all other linen which comes directly in contact with the patient shall be provided as needed for each individual patient. No such linen shall be interchangeable from one patient to another before being properly cleansed or laundered.

d. Individual equipment. Individual bedpans, wash basins and mouth wash cups shall be provided for each patient. This equipment shall be properly cleansed and stored. Individual thermometers shall be supplied and disinfected before each use.

51.21(2) *Hot-water bags.* Hot-water bags shall be of the proper temperature to protect against burning, and shall be covered before being placed in a bed. Any electrical heating appliance used for patient care shall be carefully checked periodically.

51.21(3) *Restraints.* Restraints shall be applied only when they are necessary to prevent injury to the patient or to others, and shall be used only when alternative measures are not sufficient to accomplish their purposes. There must be a written order signed by the attending physician approving the use of restraints either at the time they are applied or as soon thereafter as possible. Careful consideration shall be given to the methods by which they can be speedily removed in case of fire or other emergency.

51.21(4) *Signals.* Means of signaling nurses shall be provided within easy reach of all patients confined to bed.

51.21(5) *Screens.* Screens or curtains shall be provided in wards or semiprivate rooms in order to secure privacy of each patient.

51.21(6) *Storage space.* There shall be satisfactory storage space for clothing, toilet articles and other personal belongings of patients and all articles shall be marked or identified.

51.22(135B) Storage of medicines.

51.22(1) All medicines, poisons and stimulants kept in a nursing service division shall be plainly labeled and stored in a specially designated medicine cabinet, closet or storeroom, and made accessible only to authorized personnel. The cabinet for drugs shall be well illuminated.

51.22(2) Narcotics must be securely locked at all times and accessible only to persons in charge.

51.22(3) All medications which cannot be reused with safety shall be discarded when orders have been discontinued or patient has been dismissed.

51.22(4) There shall be adequate refrigeration for biologicals and such drug products as require refrigeration.

51.23(135B) Control of infectious, contagious and communicable diseases. In hospitals accepting communicable disease patients, there shall be facilities and proper procedures for the prevention and control of infectious, contagious and communicable diseases, and the hospital and its staff shall provide for compliance with the rules for the control of communicable diseases as provided by the state department of health.

51.23(1) *Segregation.* There shall be facilities and proper arrangement of departments, rooms and patients' beds to provide for the prevention of cross-infections and the control of infectious, contagious and communicable diseases.

a. The maternity and newborn infant services shall be segregated from other services, so as to avoid transmission of infections, and there shall be provisions for removal of infectious maternity or newborn cases to a location where proper isolation can be carried out.

b. There shall be facilities for the isolation or segregation of unclean or infectious medical or surgical cases, and there shall be facilities and proper procedures for the cleansing of rooms and surgeries, immediately following the care of an infectious or contagious case.

c. Segregation of infectious cases shall include policies for the medical, nursing and lay staffs, providing for proper isolation technique in order to prevent cross-infection between patients, departments and services in the hospital.

d. In planning new hospitals or additions to existing hospitals, there shall be complete separation of obstetrical and surgical services; also, there shall be one or more rooms for contagion, according to the size of the hospital and the needs of the community. Rooms planned for isolation of patients shall have adjoining lavatory and toilet facilities isolated from the rest of the hospital.

51.23(2) *Visitors.* The governing authority of the hospital shall establish proper policies for the control of visitors to all services in the hospital in accordance with hospital practice.

a. In maternity hospitals and maternity departments, not more than two visitors in addition to the husband shall be permitted to a patient during visiting hours, and no visitors under 14 years of age shall be permitted beyond the lobby of a maternity hospital or the visitors' waiting rooms of a maternity department.

b. Whenever babies are shown to visitors there must be a complete separation by a glass window.

c. Visitors with colds or any other apparent signs of infection shall be excluded from the hospital.

51.24(135B) Fire prevention and safety.

51.24(1) Facilities and construction shall be in accordance with rules of the state and local fire authorities and shall be so certified by the local authority.

51.24(2) There shall be at least one piece of first-aid fire fighting equipment on each floor of every hospital building. Where special hazards exist the type of fire-fighting equipment recommended by the state fire marshal shall be used.

51.24(3) Fire extinguishers shall be inspected periodically and recharged; the date of check shall be registered on the tag attached to extinguisher.

51.24(4) A system of warning occupants and attendants of fire shall be provided. The type, location, device and central point shall be determined by the local fire authority or the state fire marshal.

51.24(5) All employees shall be instructed in the fire prevention facilities of the institution, use of fire fighting apparatus and the methods of removing patients from the building. A person within the institution shall be designated to give these instructions and to be responsible for evacuating patients in case of fire.

51.24(6) All parts of the heating system shall be constructed and maintained so as to eliminate fire hazards. Metal and asbestos protection must be provided for all steam pipes and hot water pipes when placed nearer than two inches from woodwork.

51.24(7) Laundry chutes and dumbwaiter shafts shall be lined with fireproof materials and have close-fitting doors. No shaft shall terminate in the attic.

51.24(8) Elevator shafts shall be enclosed with fireproof material. There shall be no open grille work in new construction.

51.24(9) Plain lettered red exit lights shall be located at fire exits on each floor and shall be kept burning between sunset and sunrise.

51.24(10) All exit doors shall open outward.

51.25(135B) Pharmacy service.

51.25(1) The pharmacy operating in connection with a hospital shall comply with 51.22(135B), and shall comply with the provisions of the pharmacy law requiring registration of drug stores and pharmacies and the rules of the Iowa state board of pharmacy examiners.

51.25(2) In all hospitals with a pharmacy or drug room, this service shall be under the com-

plete supervision of a pharmacist licensed to practice in the state of Iowa.

51.26(135B) Radiology service.

51.26(1) There shall be safe X-ray equipment and competent operators in the hospital or available for the hospital's use in the immediate community, sufficient for radiography, fluoroscopy and the development of films.

51.26(2) Adequate protection for the patients, the operators, and nearby personnel shall be provided.

51.27(135B) Laboratory service.

51.27(1) Sufficient laboratory and pathological facilities shall be provided in the hospital, or arrangements made with nearby hospitals or laboratories to provide these services in accordance with the needs of the patients treated in the hospital.

51.27(2) Minimum laboratory facilities for urinalysis and blood counts shall be provided in every hospital.

51.27(3) All laboratory services shall be under the supervision of a physician, preferably a clinical pathologist.

51.28(135B) Emergency and out-patient services. All hospitals shall provide space and facilities for emergency care and treatment, including the administration of blood or blood plasma and intravenous medication, facilities for the control of bleeding, the emergency splinting of fractures and for the administration of oxygen and anesthesia. Competent personnel shall at all times be available or on call for the care of emergencies.

51.29(135B) Surgical departments. Hospitals providing for the surgical care of patients shall provide an operating room or rooms, graduate nursing personnel, modern surgical equipment in good repair to assure safe and aseptic treatment of all surgical patients, and to protect all clean or elective surgical patients from cross-infection.

51.29(1) *Surgery location and equipment.*

a. There shall be at least one room provided for surgery in all hospitals providing surgical care.

b. The operating room shall have impervious floors and washable walls.

c. There shall be satisfactory means of illumination of the operating field, as well as general illumination. Safe and adequate auxiliary lighting shall also be provided.

d. Minimum facilities for sterilization (substerilizing) shall be provided in close proximity to the operating room.

51.29(2) *Surgical beds and wards.* In hospitals providing care for surgical patients, provisions shall be made for the setting aside of surgical beds, and the arrangement shall be in a manner such as to protect elective and clean surgical cases from cross-infection from unclean or infectious surgical cases.

51.29(3) *Pathology examination service.* It shall be the policy of all hospitals providing services for surgical care to have available facilities for the pathological examination of tissue specimen, either on the premises or by arrangement through affiliation or other means with a competent pathological laboratory.

51.30(135B) Obstetric service. All general or specialized hospitals providing for the obstetrical care of maternity patients shall be properly organized and equipped to provide accommodations for mothers and newborn infants; the supervision of the maternity department shall be under the direction of a qualified registered nurse; there shall be accommodations for the isolation of infected cases; there shall be facilities and quarters for a formulary for newborn infants providing for equipment, personnel and food-handling apart from the possibility of cross-infection from adult patients or chemical poisons, particularly, boric acid in powder or solution.

51.30(1) *Location and arrangement of obstetric and newborn services.* Obstetric and newborn services shall be so located and arranged as to provide for complete protection of mothers and newborn infants from infection and from cross-infection from patients in other services in the hospital.

a. Room or rooms shall be set aside for the use of maternity patients for labor and delivery, and every precaution shall be taken to prevent the housing of patients with an infectious, contagious or communicable disease; recognized policies shall be established for the thorough and complete cleansing of such rooms after care of a patient with an infectious condition. Proper nursing techniques shall be carried out by personnel assigned to the obstetrical service to insure safe care within this area.

b. There shall be exclusive rooms for the care of newborn infants and provisions for a suspect nursery for infants suspected of a contagious, infectious or communicable disease; there shall be provisions for the complete isolation of infants with a known infectious, contagious or communicable disease. Newborn and older infants admitted from the outside shall not be cared for in the normal newborn nursery.

51.30(2) *Labor and delivery room services.* The number of rooms for labor and delivery and the technical equipment for these rooms shall be commensurate with the needs of the hospital; there shall be in all hospitals facilities and supplies for the treatment, including the administration of plasma to maternity patients suffering from shock or hemorrhage.

51.30(3) *Care of the newborn.*

a. In all hospitals providing maternity care or care of the newborn infant, there shall be nursing personnel exclusively assigned to the service, and proper facilities to provide for segregation of newborn infants, control of the spread of diseases of the newborn, particularly epidemic diarrhea and impetigo, facilities for care of the premature infant, including incubators. Necessary policies and procedures shall be established to insure safe care.

b. In every hospital providing care of maternity patients and care of the newborn, there shall be at least one premature care incubator of a design approved by the state department of health.

51.30(4) *Formulary.* In every hospital providing care for the newborn, there shall be space set aside for a formulary providing for the storage, handling and preparation of infant formulas apart from food provided to adult patients. No drugs or other extraneous substances shall be kept in the formulary.

51.30(5) *Reporting of children born out of wedlock.* Children taken from the hospital by persons other than their own parent or parents and referrals for child placement or adoption shall be in accordance with the laws and the rules of the state department of social services.

51.31(135B) Pediatric services. All hospitals providing pediatric care shall be properly organized and equipped to provide adequate service.

51.31(1) A hospital providing care for children shall have registered nursing personnel commensurate with the needs of the hospital and the size of the service.

51.31(2) Hospitals providing pediatric care shall have proper facilities for the caring of children apart from the services for adult patients. Apart from the newborn nursing service, there shall be proper facilities and procedures for the isolation of children with infectious, contagious or communicable diseases.

51.32(135B) Tuberculosis hospitals.

51.32(1) Any hospital or sanatorium primarily intended for the reception, diagnosis, care and treatment of tuberculosis cases shall be considered a tuberculosis hospital or sanatorium, and shall conform to all the requirements set forth in the foregoing standards and regulations for general hospitals and special hospitals, except that maternity facilities need not be provided as part of the tuberculosis hospital service if provision is made for adequate prenatal care at the institution and arrangements are made for the delivery, postpartum care of the mother and the care of the infant at some available licensed hospital that does provide maternity service.

51.32(2) The professional staff shall be personnel especially qualified in the diagnosis and treatment of tuberculosis.

51.32(3) All patients diagnosed or suspected of having tuberculosis shall be segregated from the noninfectious patients in the hospital.

51.32(4) The use of infectious disease precautions (isolation technique) shall be established for the protection of the patients, hospital personnel and visitors, and the necessary instruction given to patients, personnel and visitors to insure this procedure.

51.32(5) Personnel employed at tuberculosis hospitals shall have a complete physical examination which shall include skin tests with tuberculin and a chest X ray at the start of service of employment, and annually thereafter, unless indicated at shorter intervals.

51.33(135B) Nervous and mental disease hospitals.

51.33(1) Any nervous and mental disease hospital operating as a nervous and mental disease hospital must be devoted primarily to the care of mental cases, have a staff of professional personnel especially qualified in the diagnosis and treatment of mental illnesses.

51.33(2) Hospitals admitting mental patients shall be under the direction of a well-qualified physician who is experienced in psychiatry.

51.33(3) There shall be in attendance at all times a registered nurse with special training or experience in the care of mental patients.

51.33(4) Nervous or mental patients shall be admitted to mental hospitals in accordance with the commitment laws of Iowa.

51.33(5) Patients should be grouped according to age, degree of activity, kind and duration of mental illness. Children under 16 years of age, alcoholics and drug addicts, patients with favorable prognosis shall be segregated, as well as patients with tuberculosis or other communicable diseases.

51.33(6) Facilities for isolation as recommended by the attending physician shall be provided.

51.33(7) Rules pertaining to general hospitals are applicable to mental hospitals, except that maternity facilities need not be provided as part of the mental hospital service if provision is made for adequate prenatal care of the mother, and the care of the infant at some available licensed hospital that does provide maternity service.

51.34(135B) Contagious disease hospital. Any contagious disease hospital operating as a contagious disease hospital, which is not primarily a tuberculosis hospital, shall conform to all the requirements and facilities which will insure adequate care for the patients served.

51.35(135B) Penalty and enforcement. See sections 135B.14 through 135B.16.

51.36(135B) Validity of rules. If any provision of these rules or the application thereof to any person or circumstances shall be held invalid, such validity shall not affect the provisions or application of these rules which can be given effect without the invalid provision or application, and to this end the provisions of these rules are declared to be severable.

TITLE X

HEALTH CARE FACILITIES

CHAPTER 56
GENERAL PROVISIONS

56.1(135C) Definitions. For the purpose of these rules, the following terms shall have the meaning indicated in this chapter. The definitions set out in section 135C.1 shall be considered to be incorporated verbatim in the rules. The use of the words "shall" and "must" indicate those standards are mandatory. The use of the words "should" and "could" indicate those standards are recommended.

56.1(1) *"Administrator"* means a person who administers, manages, supervises and is in general administrative charge of a health care facility whether or not such individual has an ownership interest in such facility and whether or not his functions and duties are shared with one or more individuals.

56.1(2) *"Alcoholism"* means a state of dependency resulting from excessive or prolonged consumption of alcoholic beverages.

56.1(3) *"Ambulatory"* means able to walk or move about without the aid of another person or of a mechanical device such as a wheelchair.

56.1(4) *"Basement"* means that part of a building where the finish floor is more than 30 inches below the finish grade of the building.

56.1(5) *"Bedfast"* means a person who because of his condition is required to remain in bed all of the time and is dependent upon others for assistance to move to safety in an emergency.

56.1(6) *"Board"* means the provision of regular meals.

56.1(7) *"Chairfast"* means capable of sitting but lacking the capability of bearing own weight even with the aid of a mechanical device or another individual.

56.1(8) *"Commissioner"* means the commissioner of public health.

56.1(9) *"Communicable disease"* means a disease capable of spread from man to man or from animal to man.

56.1(10) *"Department"* means Iowa state department of health.

56.1(11) *"Direction"* means guidance or a standing operating procedure provided by the administrator or director of nursing service to personnel of the health care facility to provide for continuing quality care in the absence of the responsible person.

56.1(12) *"Director of nursing service"* means either a registered nurse or licensed practical nurse, as required by the category of health care facility, is currently licensed by the Iowa board of nursing and who has been delegated by the administrator the authority to provide, direct and supervise nursing care, and who shall assist the administrator in planning for adequate staff, the employment of competent personnel and the purchase of necessary equipment and supplies.

56.1(13) *"Distinct part"* means a clearly identifiable area or section within a health care facility, consisting of at least a nursing unit, wing, floor or building containing contiguous rooms.

56.1(14) *"Drug addiction"* means a state of dependency resulting from excessive or prolonged use of drugs as defined in chapter 204 of the Code.

56.1(15) *"Existing nursing or custodial home"* means a health care facility licensed prior to the effective date of these rules.

56.1(16) *"Mental illness"* means a condition which makes the person potentially dangerous to himself or others.

56.1(17) *"New nursing or custodial home"* means one licensed after the effective date of these rules.

56.1(18) *"Nursing care"* means a planned program of services which meets the physical and emotional needs of the patient, is supervised or administered by a qualified nurse and includes those services which a patient normally can do for himself.

56.1(19) *"Personal care"* means assistance with the activities of daily living which the recipient can provide for himself only with difficulty or not at all. Examples are help in walking and getting in and out of bed, assistance with personal hygiene and bathing, help with dressing and feeding, supervision over medications which can be self-administered and other types of personal assistance.

56.1(20) *"Qualified nurse"* means a registered or practical nurse currently licensed under Iowa law.

56.1(21) *"Rehabilitation"* means a program of care given to chronically ill, disabled and

aged patients in nursing homes to help them to do more for themselves and become less dependent upon others.

56.1(22) *"Restraint"* means a mechanical device applied to a person to limit movements for therapeutic or protective reasons. Restraints include anklets, wristlets, manacles, restraining sheets and strait jackets.

56.1(23) *"Supervision"* means the direct overseeing and management of programs and services.

56.2(135C) Licensing. On approval of the department, after co-ordination with the state fire marshal, special variations and considerations may be granted from these rules and standards providing that it does not endanger the health, safety or welfare of any resident or patient and that alternate means to effect the same degree of protection shall be used when such variances are permitted. Details regarding future plans of compliance must be indicated in writing to the department.

56.2(1) *General requirements.*

a. In order to obtain a license a health care facility must:

(1) Meet the physical standards set forth in 56.13(135C);

(2) Have a written agreement with another reasonably accessible health care facility offering greater care providing for the transfer and timely acceptance of a resident or patient whose condition requires greater care;

(3) Have a written agreement with a hospital for the timely admission of a resident or patient who, in the opinion of the attending physician, requires hospitalization;

(4) Must meet the requirements of a particular category of health care facility.

b. The resident care program, staffing, services and equipment provided shall determine the licensure category into which the health care facility or distinct part shall be placed. A health care facility may be shifted from its present licensed category to a category more appropriate to its actual operations and services offered if the health care facility fails to substantially meet the required minimum standards and rules within a specific period reasonably related to the nature of the deficiencies as indicated by the department.

c. The licensee of a health care facility may elect at any time to change its licensed category by submission of a completed application, fee, necessary information and meeting such requirements as provided for in the standards and rules governing operation.

d. The license shall be suitably framed and displayed in a conspicuous place where it can be read at the main entrance inside the health care facility.

e. The license shall be valid only in the possession of the person to whom it is issued.

f. The posted license shall reflect accurately the current status of the health care facility and the category of the health care facility.

g. The department shall be notified at once by letter of any reduction or loss of staff lasting more than seven days which places its staffing below that required for licensing.

h. The health care facility must comply with all applicable statutes and local ordinances prior to licensing and renewal of license.

i. Prior to the purchase, transfer or assignment of a health care facility, the prospective purchaser shall:

(1) Inform the department of his intent;

(2) Obtain and submit a written request from the licensee that information from the department's files concerning the health care facility may be revealed to him by the department.

j. Prior to the purchase, transfer or assignment of a health care facility, the licensee shall:

(1) Inform the department of the pending sale of the health care facility;

(2) Give evidence that all standards and rules are substantially in satisfactory compliance or shall be made so prior to the completion of the sale of the health care facility.

k. Infants and children under the age of 16 shall not be admitted to health care facilities for adults unless given prior written approval by the department. A distinct part of a health care facility, segregated from the adult section, may be established based on a program of care submitted by the licensee or applicant which is commensurate with the needs of the residents or patients of the health care facility and has received the department's review and approval.

56.2(2) *Applications.*

a. Application shall be made on forms furnished by the department.

b. The application shall be submitted to the department 30 days prior to proposed opening date of the health care facility or expiration date of the license.

c. Prior to accepting residents or patients, a satisfactory fire safety certificate from the state fire marshal shall be on file with the department.

d. The license fee shall be submitted with the application.

e. An eight and one-half by eleven-inch drawing of the floor plan of the health care facility shall be submitted with all initial license applications and which include the following information:

(1) Room measurements;
(2) Room numbers;
(3) Use of each room;
(4) Windows and door location;
(5) Bed placement.

f. A photograph of the health care facility shall accompany the application.

g. Licenses expire one year after the date of issuance indicated on the license.

56.2(3) *Notifications required by the department.*

a. Any structural change in the health care facility or premises shall not be undertaken until notification has been made in writing to the department.

b. Proposed structural changes must be approved by the department.

c. The department shall be notified immediately in writing of any proposed change in location, name or ownership of the health care facility.

d. A new application shall be submitted prior to a change of the health care facility's ownership.

56.2(4) *Hearings.*

a. The hearing shall be conducted by the commissioner or a duly qualified employee of the department who has been designated in writing by the commissioner as a hearing officer, to conduct the hearing.

b. The commissioner or hearing officer may compel by subpoena or subpoena duces tecum the attendance and testimony of witnesses and the production of books and papers, and administer oaths to witnesses.

c. The hearing shall be conducted at such time and place as designated by the department.

d. The commissioner or hearing officer shall permit the applicant or licensee to appear in person and to be represented by counsel at the hearing at which time the applicant or licensee shall be afforded the opportunity to present all relevant matter in support of his application for license or renewal of license or in resisting the revocation or suspension thereof and cross-examine witnesses.

e. When the hearing has been conducted by a hearing officer, the commissioner shall review the record and findings of fact before rendering a decision. Extenuating circumstances shall not be the basis for any exception from the commissioner's ruling or used as a defense by the applicant or licensee.

f. The commissioner or hearing officer is authorized to conduct such hearing in an informal manner without recourse to the technical common law rules of evidence, but such evidence received shall be substantial, reliable and probative.

g. All subpoenas issued by the commissioner or hearing officer may be served as provided for in civil action. The fees of witnesses for attendance and travel shall be the same as the fees for witnesses before the district court and shall be paid by the party to the proceeding at whose request the subpoena is issued.

56.3(135C) Administration.

56.3(1) *The licensee shall:*

a. Assume the responsibility for the overall operation of the health care facility.

b. Be responsible for compliance with all applicable laws and with the rules of the department.

c. Establish written policies for the operation of the health care facility.

d. Designate in writing the individual authorized to act in the absence of the licensee.

56.3(2) *General policies.*

a. Each health care facility shall have some one person in charge:

(1) Who shall be at least 19 years of age,

(2) Who shall be empowered to act on behalf of the licensee during his absence concerning the health, safety and welfare of the residents or patients.

b. All persons involved in service to the residents or patients in a health care facility shall be in good physical and mental health, of good moral character and competent to perform the assigned task.

c. Meal planning and food preparation shall be performed by a person who has a good understanding of nutritional needs and proper food sanitation practices.

d. No person with a current record of habitual alcohol intoxication or addiction to the use of drugs shall manage or assist in the management of a health care facility.

e. No person under the influence of alcohol or drugs shall be permitted to provide services in a health care facility.

f. No person with a contagious or infectious disease shall be allowed to provide services in a health care facility.

g. There shall be written policies for emergency medical care and for sudden illnesses among residents or patients.

h. Visiting hours.

(1) There shall be posted daily visiting hours, both day and evening;

(2) Relatives shall be permitted to visit residents or patients for special reasons at any reasonable time;

(3) Each resident or patient shall be privileged to have privacy with his visitors, physician or any agency representative who has responsibility for the resident's or patient's care.

i. Religious services.

(1) Transportation arrangements shall be made for residents or patients who desire to attend church services;

(2) Resident's or patient's request to see a clergyman shall be honored;

(3) A resident's or patient's right to his own religious convictions or absence of them shall not be infringed upon.

j. Mail.

(1) Residents or patients shall receive their mail unopened;

(2) Outgoing mail shall not be censored, controlled or restricted;

(3) Assistance with correspondence shall be provided when requested.

k. A telephone shall be accessible to the residents or patients within the health care facility to make personal calls.

56.4(135C) Admission, transfer and discharge.

56.4(1) *General admission policies.*

a. No health care facility shall admit more residents or patients than the number of beds for which it is licensed.

b. There shall be no more beds erected than is stipulated on the license.

c. There shall be no more beds erected in a room than its size and other characteristics will permit.

d. No resident or patient shall be admitted or retained in a health care facility who is in need of greater services than the health care facility can provide.

e. The admission of a resident or patient to a health care facility shall not give the health care facility or any employee of the health care facility the right to manage, use or dispose of any property of the resident or patient except as may be necessary for the safety and orderly management of the health care facility as required by these rules.

f. The admission of a resident or patient shall not grant the health care facility the authority or responsibility to manage the personal affairs of the resident or patient except as may be necessary for the safety of the resident or patient and safe and orderly management of the health care facility as required by these rules.

g. A health care facility shall provide for the safekeeping of personal effects, funds and other property of its residents or patients. The health care facility may require that items of exceptional value or which would convey unreasonable responsibilities to the licensee be removed from the premises of the health care facility for safekeeping.

h. A health care facility shall keep complete and accurate records of all funds and other effects and property of its residents or patients received by it for safekeeping.

i. Funds or properties received by the health care facility, belonging to or due a resident or patient, expendable for his account, shall be trust funds.

(1) Trust funds shall be kept separate from the funds and property of the health care facility and other residents or patients;

(2) A trust fund shall be specifically credited to this resident or patient and expended only for this resident or patient;

(3) The health care facility shall furnish for any resident or patient upon request a complete and certified statement of all funds or other properties which have been entrusted to the management of the health care facility. This statement may be requested by the resident or patient, the legal representative, any governmental unit contributing funds or other property to the account of the patient or resident, or private charitable agency contributing funds or other property to the account of the patient or resident.

j. No owner, administrator, employee or representative of a health care facility shall pay any commission, bonus or gratuity in any form whatsoever, directly or indirectly, to any person for residents or patients referred to such health care facility.

56.4(2) *Restrictions.*

a. A person who is in an active stage of alcoholism, drug addiction, mental illness or communicable disease shall not be admitted or retained in the health care facility.

b. A person who is unduly disturbing or dangerous to himself or other resident or patient shall not be admitted or retained in the health care facility.

56.4(3) *Contracts.* Each resident or patient shall be covered by a contract executed at the time of admission or prior to admission. It shall:

a. Be signed by a representative of the health care facility and the resident or patient or his legal representative; each party to the contract shall have a duplicate of the original; the health care facility shall keep all contracts on file for at least one year after its expiration date;

b. State the program of care and services to be provided by your health care facility;

c. State all the charges that will be made and methods of their payments; in the event of discharge or death or transfer there shall be an agreement in regard to refund of advance payments;

d. Enumerate personal services the resident or patient requires and charges which will be made for them; supplemental charges for additional services as they become necessary to the resident or patient also shall be listed;

e. State any other responsibilities of the resident or patient and of the facility which are in addition to those required by chapter 135C of the Code;

f. Not be construed or drawn so as to relieve the health care facility of any obligations imposed upon it by chapter 135C of the Code and standards and rules promulgated by the department;

g. Stipulate how personal funds will be dispersed;

h. State the conditions under which the involuntary discharge or transfer of resident or patient would be effective;

i. State the conditions of voluntary discharge or transfer;

j. Provide for its being amended to reflect changing costs or circumstances with notification to the resident or patient or legal representative at least 30 days prior to the effective date of changes.

56.4(4) *Discharge or transfer.*

a. Prior notification shall be made to the next of kin or legal representative prior to transfer

or discharge of a resident or patient who is not capable of managing his own affairs.

b. Proper arrangements shall be made by the health care facility for the welfare of the resident or patient prior to transfer or discharge in the event of an emergency or inability to reach the next of kin or legal representative.

c. The licensee shall not refuse to discharge or transfer a resident or patient when the physician, family, resident or patient or legal representative requests such discharge or transfer.

d. The attending physician shall be consulted or notified of all cases of discharge or transfer.

e. Prior to transfer or discharge of a resident or patient to another health care facility, arrangements for the orderly implementation of this procedure shall be arranged in advance with the health care facility to which the transfer will be made.

f. Where a sponsoring agency is involved, it shall be informed of the discharge or transfer of any resident or patient in which it has an interest.

g. When a resident or patient is transferred, discharged or deceased, the appropriate record shall be completed.

56.5(135C) Medical services.

56.5(1) Each resident or patient in a health care facility shall have a designated physician licensed to practice in Iowa, who may be called when needed.

56.5(2) Each resident or patient admitted to a health care facility shall have had a physical examination prior to admission. A record of the examination, signed by the physician, shall be a part of the resident's or patient's record.

56.5(3) Arrangements shall be made to have a physician available to furnish medical care in case of emergency.

56.5(4) Physicians admitting residents or patients into a health care facility shall be requested to meet with the care review committee when it is deemed necessary by the licensee or the committee members.

56.6(135C) Records.

56.6(1) *Resident or patient record.* The licensee shall keep a permanent record on all residents or patients admitted to a health care facility with all entries current, dated and signed.

The record shall include:

a. Name and home address of resident or patient;

b. Birth date, sex and marital status of resident or patient;

c. Church affiliation;

d. Physician's name, telephone number and address;

e. Dentist's name, telephone number and address;

f. Name, address and telephone number of next of kin or responsible agent;

g. Name, address and telephone number of person to be notified in case of emergency;

h. Condition on admission, transfer and discharge;

i. Certification by the physician that the resident or patient does not require a higher degree of care;

j. Attendance of a physician or other professional services;

56.6(2) *Incident records.*

a. Report of incidents shall be in detail.

b. The person in charge at the time of the incident shall prepare and sign the report.

c. The report shall cover all accidents where there is apparent injury or where hidden injury may have occurred.

d. The report shall cover all accidents or unusual occurrences within the health care facility or on the premises affecting residents or patients or visitors.

e. The report shall be kept on file in the health care facility.

56.6(3) *Personal records.* Personal records shall contain:

a. Confidential record:

(1) Factual information regarding personal statistics, family and responsible relative resources, financial status and other confidential information;

(2) Individualized social service assessment summary, if any, and planning;

(3) Accessible to professional staff involved in planning for services to meet needs of the resident or patient;

(4) Shall be kept on file in the health care facility.

b. Resident's or patient's chart:

(1) Statement of resident's or patient's problems and needs;

(2) Recommendations;

(3) Social service plans and recommendations, if any, for the resident's or patient's record shall be recorded with the date and worker's signature.

c. When the resident's or patient's records are closed, the information shall become a part of the final record.

56.6(4) *Death record shall include:* Notification of physician, notification of family and disposition of body.

56.6(5) *Retention of records.*

a. Records shall be retained in the health care facility for five years following termination of services.

b. Records shall be retained within the health care facility upon change of ownership.

c. The resident's or patient's records shall be kept confidential and shall be revealed only to persons authorized by law.

d. The resident's or patient's record shall be released to the individual's physician when the health care facility ceases to operate.

56.6(6) *Reports to the department.* The licensee shall furnish statistical information to the department on request.

56.7(135C) Resident or patient care program and other services.

56.7(1) A program of resident or patient care on a 24-hour basis shall be established in writing which is commensurate with the needs of the residents or patients in the health care facility.

56.7(2) A resume of the resident or patient care program and other services provided in the health care facility shall be submitted to the department for review and approval prior to licensure of the health care facility.

56.7(3) *Resident or patient care and personal services.*

a. Beds shall be made daily and adjusted as necessary. A complete change of linen shall be made at least once a week and more often if necessary.

b. Each resident or patient shall receive sufficient supervision so that his personal cleanliness is maintained.

c. Residents or patients shall have clean clothing as needed to present a neat appearance, be free of odors and to be comfortable. Clothing shall be appropriate to their activities and to the weather.

d. Residents or patients shall receive kind and considerate care at all times and shall not be abused physically, mentally or verbally in any way.

e. Residents or patients shall be encouraged to leave their rooms and make use of the recreational room or living room of the health care facility.

f. Residents or patients sharing a bedroom shall be of the same sex except where the room is occupied by husband and wife.

g. Residents or patients of one sex shall not be required to pass through another's bedroom to reach a bathroom, living room, dining room, corridor or other common areas of the health care facility.

h. Residents or patients shall not have their personal lives regulated or controlled beyond reasonable adherence to meal schedules, bedtime hours and other elements of group living.

i. Uncontrollable residents or patients shall be transferred or discharged from the home in accordance with contract arrangements and requirements of chapter 135C of the Code.

56.8(135C) Drugs.

56.8(1) *Drug storage.*

a. A cabinet with a lock shall be provided which can be used for the storage of drugs, solutions and prescriptions.

b. A bathroom shall not be used for drug storage.

c. The drug storage cabinet shall be kept locked.

d. The medicine cabinet key shall be in the possession of a responsible employee.

e. Medications requiring refrigeration shall be kept in a refrigerator.

f. All potent, poisonous or caustic drugs shall be stored separately from other drugs. They shall be plainly labeled and stored in a specific, well-illuminated cabinet, closet or storeroom and made accessible only to authorized persons.

g. All flammable materials shall be specially stored and handled in accordance with applicable local and state fire regulations.

56.8(2) *Drug safeguards.*

a. All prescribed medications shall be clearly labeled indicating the resident's or patient's full name, physician's name, prescription number, name and strength of drug, dosage, directions for use, date of issue and name, address and telephone number of pharmacy or physician issuing the drug. Standard containers shall be utilized for dispensing drugs. Paper envelopes shall not be considered standard containers.

b. Medication containers having soiled, damaged, illegible or makeshift labels shall be returned to the issuing pharmacist, pharmacy or physician for relabeling or disposal.

c. There shall be no medications or any solution in unlabeled containers.

d. The medications of each resident or patient shall be kept or stored in the originally received containers.

e. Labels on containers shall be clearly legible and firmly affixed. No label shall be superimposed on another label of a drug container.

f. When a resident or patient is discharged or leaves the health care facility, the unused prescription shall, upon written order by the physician, be sent with him or with a responsible agent.

g. Unused prescription drugs prescribed for residents or patients who have deceased shall be destroyed by the charge person with a witness and notation made on the resident's or patient's record.

h. Prescriptions shall be refilled only with the permission of the attending physician.

i. No medications prescribed for one resident or patient may be administered to or allowed in the possession of another resident or patient.

56.9(135C) Food service department.

56.9(1) *Nutrition and meal service.*

a. The food served shall be provided in amounts required to meet the recommended daily allowances and the special nutritional needs of the residents or patients in accordance with the physician's orders, *Food for Fitness, A Daily Food Guide,* Leaflet No. 424, U.S. Department of Agriculture, can be used as a guide for planning meals which will generally meet the recommended daily allowances. The four food groups listed below are the same as in Leaflet No. 424 and Basic Food Groups for Menu Planning in the *Simplified Diet Manual* (third edition), Nutrition Service, Iowa

State Department of Health, Iowa State University Press, Ames, Iowa, 1969.

(1) Milk—two or more cups served as beverage or used in cooking;

(2) Meat group—two or more servings of meat, fish, poultry, eggs, cheese or equivalent—at least five ounces edible portion per day;

(3) Vegetable and fruit group—four or more servings. This will include a citrus fruit or other fruit and vegetable important for vitamin C; a dark green or deep yellow vegetable for vitamin A, at least every other day; and other vegetables and fruits, including potatoes;

(4) Bread and cereal group—four or more servings of whole grain, enriched or restored.

NOTE: Other foods to round out meals and snacks to satisfy individual appetites and provide additional calories.

b. Family Food Budgeting for Good Meals and Good Nutrition, No. 94, revised in 1971, Table 2. Basic Low Cost Family Food Plan, U.S. Department of Agriculture, shall be used as the established food portion requirements for residents and patients.

56.9(2) *Storage, preparation and service.*

a. All food and drink shall be clean, wholesome, free from spoilage and safe for human consumption.

b. The use of foods from salvaged, damaged or unlabeled containers shall be prohibited.

c. All perishable or potentially hazardous food shall be stored at safe temperatures (45° F. or below or 140° F. or above).

d. No perishable food shall be allowed to stand at room temperature any longer than is required to prepare and serve.

e. Table service shall be attractive. Dishes shall be free of cracks, chips and stains.

56.9(3) *Sanitation.*

a. Food Service Sanitation Manual, 1962—U.S. Department of Health, Education and Welfare, Public Health Service, U.S. Government Printing Office, Washington, D.C., shall be used as the established, nationally recognized reference for establishing and determining satisfactory compliance with food service sanitation.

b. Persons handling food shall be knowledgeable of good sanitation practices including emphasis on hand washing.

c. The use of tobacco shall be prohibited in the kitchen.

d. Clothing of food handlers shall be clean and washable.

e. There shall be no animals or birds in the food preparation area.

f. All foods while being stored, prepared, displayed, served or transported shall be protected against contamination from flies, dust, rodents and other vermin. Foods shall be protected from unclean utensils and work surfaces, unnecessary handling, coughs and sneezes, flooding, drainage and overhead leakage.

g. Dishes, silverware and cooking utensils shall be properly cleansed by prerinsing or scraping, washing, sanitizing and air drying.

h. No dishes shall be towel dried.

i. The walls, ceilings and floors of all rooms in which food is prepared and served shall be in good repair, smooth, washable, of a light color and shall be kept clean.

j. Spillage and breakage shall be cleaned immediately.

k. All garbage not mechanically disposed of shall be kept in nonabsorbent, cleanable containers pending removal. All filled containers shall be covered and stored in a sanitary manner.

56.10(135C) Orientation.

56.10(1) There shall be an organized orientation program:

a. The program shall be planned and implemented to resolve or reduce personal, family, business and emotional problems that may interfere with the medical or health care, recovery and rehabilitation of the individual.

b. Services are concerned with the psychosocial needs of residents, the social milieu of the facility and other aspects of institutional life.

c. The total well-being of the resident in achieving a satisfying day-to-day living experience shall be the primary emphasis of the orientation program.

56.10(2) Reserved for future use.

56.11(135C) Care review committee.

56.11(1) Each health care facility shall establish a care review committee in accordance with section 135C.25, which shall operate within the scope of these rules for health care facilities.

56.11(2) *Purpose.*

a. The committee shall represent the rights of the consumer in the health care facility for determination of appropriate care, of services available in the health care facility and the determination of any discriminative practices.

b. The committee shall consider the needs of the residents or patients in respect to the services the health care facility is authorized to render.

c. The committee shall relate itself to the physical, personal, spiritual and social needs of the individual resident or patient.

56.11(3) *Composition of the committee.*

a. Each care review committee shall consist of at least three members and no more than five.

b. The licensee shall appoint the members of the committee from church groups, recognized service clubs, public office holders, retired professionals or other individuals who have an interest in the provision of health care services and protection of dependent persons.

c. Membership of the care review committee shall be evaluated by the department prior to renewal of license each year.

d. A care review committee found to be functioning unsatisfactorily by the department may be required to replace such membership by new appointments made by the licensee.

e. The members of the care review committee shall not be employed by or related to the licensee nor a public employee involved with the sponsoring or placement of residents or patients or who inspects or otherwise evaluates the health care facility, residents or patients.

f. The committee shall elect a chairman and secretary at its first meeting and shall meet at such intervals and on such occasions as required to accomplish its purpose.

g. Information concerning the operation of the health care facility and residents or patients residing therein is a privileged communication and shall not be disclosed publicly in such a manner as to identify individuals or the health care facility.

h. The committee shall be made acquainted and knowledgeable by the licensee of the rules of the department governing the operation of the health care facility and the services it is licensed to provide.

56.11(4) *Function of the committee.*

a. The committee shall determine whether the health care facility is fulfilling the contract for services and program of care as agreed upon in the contract.

b. The care review committee may function for more than one facility.

c. Committee members may recommend that the resident or patient be transferred due to the inability or failure of the facility to provide services needed by the resident or patient.

d. Each resident or patient shall be reviewed on an annual basis and the committee shall summarize its findings and its recommendations for each individual resident or patient.

e. The committee members shall make themselves available and be responsive to the right to be heard regarding any complaint against the health care facility.

f. The committee shall determine through its observations, conference with the resident or patient and consultation with others that adequate services are being provided. Determination shall be made regarding the following: Cleanliness of resident or patient, absence of signs of malnutrition and dehydration, preservation of the highest level of independent functioning in relation to each individual's physical and mental capabilities, consideration of the resident's or patient's psychosocial needs, situations affecting resident's or patient's welfare and safety, sanitation of the health care facility and grounds, the physical structure of the health care facility contains no physical barriers which would prevent any resident or patient from freely using the services of the health care facility or exiting to the outside.

g. The opinions, suggestions and ideas of the committee shall be given to the licensee at the conclusion of each meeting.

h. The committee may report to the department for counsel and guidance in situations where the licensee fails to recognize the intent of their findings and recommendations.

i. The committee shall be available to meet with the department upon request.

j. Any official agency will have the privilege of meeting with the committee to discuss problems in the health care facility pertinent to the agency's official capacity.

56.11(5) *Assistance to the committee.*

a. All physicians admitting residents or patients to the health care facility shall have the responsibility of assisting the care review committee when necessary.

b. The physician's certification of care shall be made available to the committee by the licensee.

c. The licensee of a health care facility shall meet with the committee on a consultation basis and furnish information upon request to the committee.

d. Committee members may seek advice and counsel from allied health professionals, from specialists in the community or from appropriate state agencies.

56.11(6) *Limitations of the committee.*

a. The medical treatment of the individual resident or patient shall not be an area of concern for the care review committee except when direction is provided by the resident's or patient's personal physician.

b. The committee shall not have access to the medical record of the resident or patient.

c. The committee shall not have access to the confidential record prepared by the staff of the social services department. The person responsible for the social services shall be available to the committee to interpret the psychosocial needs of the individual.

56.12(135C) Safety.

56.12(1) The *Safety Manual for Nursing Homes and Homes for the Aged,* published by the National Safety Council, Washington, D.C., 1962, shall be used as the established criteria in determining satisfactory compliance with safety requirements in health care facilities.

56.12(2) All health care facilities shall meet the fire safety rules as promulgated by the state fire marshal.

56.12(3) The size of the health care facility and needs of the residents and patients shall be taken into consideration in evaluating safety precautions and practices.

56.12(4) *Administration.*

a. The licensee of a health care facility shall be responsible for the provision and maintenance of a safe environment for residents or patients and personnel.

b. The administrator shall have a written emergency plan to be followed in the event of fire, tornado, explosion or other emergency.

56.12(5) *Resident or patient care.*

a. Each resident or patient shall receive adequate supervision to insure against hazard from himself, others or elements in his environment.

b. Residents or patients shall be permitted to smoke only where proper facilities are provided. Smoking shall not be permitted in bedrooms. Smoking by residents or patients considered to be careless shall be prohibited except when the resident or patient is under direct, competent supervision.

56.12(6) *Housekeeping.*

a. Resident's or patient's personal possessions which may constitute a hazard to himself or others shall be removed and stored. The health care facility shall be kept free of any unnecessary accumulations of equipment, personal possessions, boxes, trunks, suitcases, papers, broken or unusable furniture and similar items.

b. Polishes used on floors shall provide a nonslip finish.

c. Throw or scatter rugs shall not be permitted.

d. Floor coverings torn or split shall be replaced or repaired in a professional manner.

e. Entrances, steps and outside walkways shall be kept free from ice and other hazards.

f. Residents or patients shall not have access to storage areas for all cleaning agents, bleaches, insecticides or any other poisonous, dangerous or flammable materials. These substances shall be used only under controlled conditions by personnel knowledgeable and trained in their use.

56.13(135C) Building, furnishings, equipment and supplies.

56.13(1) *Building.*

a. The health care facility shall be in a neighborhood free from excessive noise, dirt, polluted or odorous air or similar disturbances. There shall be area available for outdoor activities calculated at 25 square feet per licensed bed. Open air porches may be included in meeting such requirements.

b. General requirements.

(1) Every home located within the corporate limits of a municipality shall comply with all the applicable local ordinances.

(2) The Handbook of the Illuminating Engineering Society shall be used as the established, nationally recognized criteria for determining satisfactory lighting requirements within a health care facility.

(3) For purposes of computation of usable floor space in bedrooms and other living areas of the health care facility, that part of the room having no less than seven feet of ceiling height shall be used. Usable floor space shall not include space needed for door swings, irregularities in the rooms such as alcoves and offsets or wardrobes being used as a substitute for closet space.

(4) No part of any room shall be enclosed, subdivided or partitioned unless such part is separately lighted and ventilated and meets such other requirements as its usage and occupancy dictates.

(5) No room in a basement shall be occupied for living purposes unless it meets with the approval of the department.

(6) Rooms in which beds are erected shall not be used for purposes other than bedrooms.

(7) Light fixtures shall be so equipped to prevent glare.

(8) Rechargeable battery-operated emergency lights in good working condition shall be available at all times.

(9) Exposed heating pipes, hot water pipes or radiators in rooms and areas used by residents or patients and within reach of residents or patients shall be covered or protected to prevent injury or burns to residents or patients.

(10) Beds shall not be placed in such a manner that the side of the bed is against the radiator or in close proximity to it unless it is so covered as to protect the residents or patients from contact with it or from excessive heat.

(11) All fans located within seven feet of the floor shall be protected by screen guards. (Mesh or screen of not less than 16 gauge is recommended.)

(12) All toilet, bath and shower facilities shall be supplied with adequate safety devices appropriate to the needs of the individual residents or patients. Raised toilet seats shall be available for residents or patients who are aged or infirm.

(13) Whenever glass sliding doors or transparent panels are used, they shall be marked conspicuously.

(14) Night lights shall be provided in potentially dangerous areas.

(15) All stairways in resident or patient occupied areas shall have substantial handrails on both sides.

(16) Upon entry into any room, there shall be a light switch adjacent to the door.

(17) Each stairway shall have protective barriers and doorway landings shall be provided.

(18) All windows shall be supplied with curtains and shades or drapes which are kept clean and in good repair.

56.13(2) *Furnishings, equipment and supplies.* All furnishings and equipment shall be durable, cleanable and appropriate to its function and in accordance with the department's approved program of care.

1. All resident or patient areas shall be decorated, painted and furnished to provide a homelike atmosphere.

2. Upholstery materials shall be moisture- and soil-resistant.

56.13(3) *Bedrooms.*

a. Each resident or patient shall be provided with a standard, single or twin bed, substantially constructed and in good repair. Rollaway beds, metal cots or folding beds are not acceptable.

b. Each bed shall be equipped with casters or glides, clean springs in good repair; a clean, comfortable, well-constructed mattress approximately five inches thick and standard in size for the bed; clean, comfortable pillows of average bed size; and moisture-proof covers and sheets as necessary to keep the mattress and pillows dry and clean.

c. Single bedrooms shall have a minimum of 80 square feet of usable floor space.

d. Multiple bedrooms shall have a minimum of 60 square feet of usable floor space.

e. Every licensed custodial and nursing home constructed after November 1, 1957, shall now provide and after January 1, 1975, every licensed custodial and nursing home shall provide the following:

(1) Single bedrooms shall have a minimum of 100 square feet of usable floor space.

(2) Multiple bedrooms shall have a minimum of 80 square feet of usable floor space per bed.

f. Nonambulatory residents or patients shall not be housed above the first floor unless suitably sized elevators, commensurate with the resident's or patient's condition are provided. They shall be installed and maintained in accordance with the *American Standard Safety Code for elevators, dumbwaiters and escalators.*

g. The window area in all bedrooms shall be at least one-eighth of the floor area.

h. Each resident or patient shall have a bedside table with a drawer to accommodate personal possessions.

i. There shall be a comfortable chair, either a rocking chair or arm chair, per resident or patient bed. The resident's or patient's personal wishes shall be considered.

j. There shall be a chest of drawers for the resident's or patient's clothing. In a multiple bedroom, drawer space shall be assigned each resident or patient.

k. There shall be a wardrobe or closet in each resident or patient room. In a multiple bedroom, closet or wardrobe space shall be assigned each resident or patient sufficient for his needs.

l. Reading lamps shall be provided each resident or patient in his room.

m. Walls, ceilings and floors shall have easily cleanable surfaces, shall be kept clean and in good repair.

n. Usable floor space of a room shall be no less than eight feet in any one dimension.

o. Beds and other furnishings shall not obstruct free passage to and through doorways.

56.13(4) *Dining and living rooms.*

a. Every health care facility shall have a dining room and a living room accessible to all residents or patients. Each of these rooms shall:

(1) At no time be used as a bedroom;

(2) Provide a minimum of 180 square feet of usable floor space and be no less than ten feet in any one dimension;

(3) Provide a minimum of 15 square feet of usable seating area per licensed bed.

b. Dining room area.

(1) Dining tables and chairs shall be provided;

(2) Tables shall be of sturdy construction with smooth, durable, nonpermeable tops that can be cleaned with a detergent and sanitizing solution;

(3) Dining chairs shall be sturdy and comfortable.

c. Living room area.

(1) Comfortable arm chairs and sofas shall be provided;

(2) A television and radio shall be provided and shall be kept in good working order;

(3) Magazine racks and book shelves shall be provided.

d. A combination dining and living room area may be used as a multipurpose area if of adequate size and approved by the department. This room may be used for dining, social and diversional activities.

56.13(5) *Family and employee accommodations.*

a. If the family or employees live within the health care facility, there shall be provided separate living quarters, including bathing, toilet and recreation facilities.

b. In health care facilities where the total occupancy of family, employees and residents or patients is five or less, one toilet and one tub or shower shall be the minimum requirement.

56.13(6) *Supplies.*

a. There shall be an adequate supply of linen so that each resident or patient shall have at least two wash cloths, hand towels and bath towels per week.

b. A complete change of bed linens shall be available in the linen storage area for each bed.

c. Sufficient light weight, clean, serviceable blankets shall be available. All blankets shall be laundered as often as necessary for cleanliness and freedom of odors.

d. Each bed shall be provided with clean, washable bedspreads. There shall be a supply available when changes are necessary.

e. Uncrowded and convenient storage shall be provided for linens, pillows and bedding.

56.14(135C) Maintenance, housekeeping and sanitation.

56.14(1) Each health care facility shall establish a maintenance program to insure the

continued maintenance of the health care facility, to provide good housekeeping procedures, and insure sanitary practices throughout the health care facility.

56.14(2) *Maintenance.*

a. The building shall be maintained in a clean, orderly condition and in good repair.

b. The electrical systems, including appliances, cords and switches, shall be maintained to guarantee safe functioning and comply with the National Electrical Code.

c. All plumbing fixtures shall function properly and comply with state plumbing code.

d. Yearly inspections of the heating and cooling systems shall be made to guarantee safe operation.

e. The grounds and any other buildings shall be maintained in a sanitary and orderly condition and shall be kept free of breeding areas for flies and rodents.

f. Draperies and furniture shall be attractive and in good repair.

g. There shall be a maintenance program to maintain the interior and exterior in good repair. Cracks in plaster, peeling wallpaper or paint shall be promptly repaired or replaced in a professional manner.

56.14(3) *Housekeeping.*

a. Procedures shall be established for daily and weekly cleaning schedules.

b. Each resident or patient unit shall be cleaned on a routine schedule.

c. There shall be an established procedure for thorough cleaning of each resident or patient unit where the resident or patient remains for an indefinite period.

d. All rooms, corridors, linen closets and storage areas shall be kept in a sanitary, orderly condition.

e. All odors shall be kept under control by cleanliness and proper ventilation. Odors caused by unsanitary conditions or by poor housekeeping shall not be masked.

f. All storage areas, attics and basements shall be kept free of discarded furniture, equipment and accumulations of refuse.

56.14(4) *Laundry.*

a. If laundry is done in the health care facility, the following shall be provided:

(1) A clean, dry, well-lighted room to accommodate a washer and dryer of adequate size to serve the needs of the health care facility;

(2) The laundry room, when possible, should be divided into separate areas, one for sorting soiled linen and one for sorting and folding clean linens;

(3) The laundry shall be located in such a manner that it is not necessary to transport linen through the dietary area;

(4) In facilities not built expressly as health care facilities, the department may make an exception to the above regulations providing soiled linens are transported in leakproof, clean and closed containers.

b. If laundry is not done in the health care facility, an area shall be provided:

(1) For collecting and counting soiled linen;

(2) For receiving and storage area for clean linens; the receiving area must be separate from the soiled linen area.

c. The laundry room shall be painted in a light color. Floors, walls and ceilings shall be smooth, washable and in good repair.

d. Resident's or patient's personal laundry shall be marked with an identification.

56.14(5) *Water supply.*

a. Every health care facility shall have an adequate and sanitary water supply from an approved source. A municipal source of supply shall be considered as meeting this requirement.

b. Private sources of supply shall be surveyed and shall comply with the recommendations of the Iowa state department of health.

c. Private sources of supply shall be tested annually and the report submitted with the annual application for license.

d. Individual testing schedules for private sources of supply may be set at the discretion of the Iowa state department of health.

e. A bacterially unsafe source of supply shall be grounds for denial, suspension or revocation of license.

f. Hot and cold running water under pressure shall be available in the health care facility.

56.14(6) *Food and drink.* All food and drink consumed within the health care facility shall be clean and wholesome and comply with all local ordinances and applicable provisions of state and federal laws.

56.14(7) *Miscellaneous.* No animals shall be allowed within the health care facility except with written approval of the department and under controlled conditions.

56.14(8) *Heating.* A centralized heating system capable of maintaining a minimum temperature of 78°F. shall be provided. Unit or space heaters are prohibited from being used or stored in the health care facility.

56.14(9) *Sewerage system.*

a. Sewage shall be collected and disposed of in a manner approvable by the department. Disposal into a municipal system will be considered as meeting this requirement.

b. Private sewerage systems shall be surveyed and shall comply with the recommendations of the Iowa state department of health.

c. Every health care facility shall have an interior plumbing system complete with flushing device.

56.14(10) *Garbage and waste disposal.*

a. All garbage shall be stored and disposed of in a manner that will not permit transmission of disease, create a nuisance or provide a breeding or feeding place for vermin or insects.

b. All containers for refuse shall be water tight, rodent proof and have tight fitting covers.

c. Containers shall be returned to a clean condition each time the containers are emptied.

d. All wastes shall be properly disposed of in compliance with local ordinances and state codes.

56.14(11) *Screens.*

a. Screens of 16 mesh per square inch shall be provided at all openings.

b. Screen doors shall swing outward and be self-closing. At the discretion of the state fire marshal, screens for fire doors may swing in.

These rules are intended to implement section 135C.14 of the Code.

CHAPTER 57
ADULT FOSTER HOME

57.1(135C) Definitions. See 56.1(135C).

57.2(135C) Licensing. Each adult foster home shall comply with the provisions relating to licensing as stated in 56.2(135C).

57.3(135C) Administration. Each adult foster home shall comply with the provisions relating to administration as stated in 56.3(135C). In addition, each adult foster home shall comply with the following:

57.3(1) *General policies.* Family members shall be qualified to provide services and supervision required to meet the needs of the resident.

57.3(2) Reserved for future use.

57.4(135C) Admission, transfer and discharge. Each adult foster home shall comply with the provisions relating to admission, transfer and discharge as stated in 56.4(135C). In addition, each adult foster home shall comply with the following:

57.4(1) *General admission policies.* No resident who is in need of nursing care or custodial care shall be admitted or retained in an adult foster home.

57.4(2) Reserved for future use.

57.5(135C) Medical services. Each adult foster home shall comply with the provisions relating to medical services as stated in 56.5(135C). In addition, each adult foster home shall comply with the following:

57.5(1) Residents shall be admitted to an adult foster home based on a written order by a physician certifying that the individual being admitted requires only accommodation, board and supervision; but does not require nursing or custodial care.

57.5(2) Licensee shall require residents to keep him advised of current medications, treatments and diet so that the licensee will be knowledgeable and can offer supervision when required.

57.6(135C) Records. Each adult foster home shall comply with the provisions relating to records as stated in 56.6(135C).

57.7(135C) Resident care program. Each adult foster home shall comply with the provisions relating to resident or patient care program as stated in rule 56.7(135C). In addition, each adult foster home shall comply with the following:

57.7(1) *Resident care and personal services.*

a. Additional services shall be provided the resident on a temporary basis for short illnesses and minor ailments when the resident's physician so directs. A resident requiring bed care or nursing services for more than 72 hours shall be transferred to a facility licensed to provide nursing care.

b. Residents in the facility shall be required to bathe at least once a week.

c. Medications ordered by the physician shall be self-administered under the supervision of the charge person.

d. Residents shall not share a bedroom with a family member or employees of the owner or operator.

e. Residents physically and mentally able shall be permitted to leave the health care facility and environs unless good cause is established for refusing such permission.

57.7(2) Reserved for future use.

57.8(135C) Drugs. Each adult foster home shall comply with the provisions relating to drugs as stated in 56.8(135C). In addition, each adult foster home shall comply with the following:

57.8(1) Residents residing in an adult foster home are individuals who are essentially capable of managing their own affairs, which includes self-administration of medications.

57.8(2) As a convenience the licensee may provide storage and handling of medications. This service shall be permitted under the following conditions as provided in 56.8(135C), 56.8(1)—Drug storage and 56.8(2)—Drug safeguards.

57.9(135C) Food service. Each adult foster home shall comply with the provisions relating to food service as stated in rule 56.9(135C). In addition, each adult foster home shall comply with the following:

57.9(1) Food service shall be provided the residents in a family setting using the kitchen or dining room.

57.9(2) Residents shall be served at the time the family is served.

57.9(3) *Sanitation.*

a. Washing and sanitizing of dishes and utensils shall meet approved sanitation procedures and practices. Mechanical dishwashers are recommended.

b. All dishes, silverware and cooking utensils shall be stored in a closed cabinet.

c. All appliances and work areas shall be kept clean.

57.10(135C) Orientation program. Each adult foster home shall comply with the provisions relating to orientation program as stated in 56.10(135C).

57.11(135C) Resident activities.

57.11(1) Adult foster home personnel shall encourage activity for the resident.

57.11(2) The residents shall be encouraged and assisted in continuing hobbies or special interests.

57.11(3) The resident shall be included as much as possible in the recreational and social gatherings of the family.

57.11(4) The resident shall be permitted and assisted where necessary to attend the church of his choice and to participate in church functions.

57.12(135C) Care review committee. Each adult foster home shall comply with the provisions relating to care review committee as stated in 56.11(135C).

57.13(135C) Safety. Each adult foster home shall comply with the provisions relating to safety as stated in 56.12(135C).

57.14(135C) Buildings, furnishings and equipment. Each adult foster home shall comply with the provisions relating to buildings, furnishings and equipment as stated in 56.13(135C). In addition, each adult foster home shall comply with the following:

57.14(1) *Bath and toilet facilities.*

a. Toilet and bathing facilities shall be adequate to meet the needs of the resident and family.

b. Provision shall be made for bars to hold individual towel and wash cloth.

57.14(2) *Living room.*

a. Every adult foster home shall permit residents to use the family living room.

b. Visitors of the residents shall be permitted to use the family living room.

57.14(3) The dining area shall be sufficiently large to accommodate eating facilities for residents and the family.

57.15(135C) Maintenance, housekeeping and sanitation. Each adult foster home shall comply with the provisions relating to maintenance, housekeeping and sanitation as stated in 56.14(135C).

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 58
BOARDING HOME

58.1(135C) Definitions. See 56.1(135C).

58.2(135C) Licensing. Each boarding home shall comply with the provisions relating to licensing as stated in 56.2(135C). In addition, each boarding home shall comply with the following:

58.2(1) *Licenses for distinct parts.*

a. Separate licenses may be issued for distinct parts of a facility which are clearly identifiable, containing contiguous rooms in a separate wing of building or on a separate floor of the facility and which provide care and services of separate categories.

b. The following requirements shall be met for a separate licensing of a distinct part:

(1) Shall serve only residents or patients who require the category of care and services immediately available to them within that part.

(2) The distinct part shall meet all the standards and rules pertaining to the category for which a license is being sought.

(3) A distinct part must be operationally and financially feasible.

(4) A separate staff with qualifications appropriate to the care and services being rendered are regularly assigned and working in the distinct part under responsible management.

(5) Separately licensed distinct parts may have certain services, e.g., management, building maintenance, laundry and dietary in common with each other.

58.2(2) *Classification within categories.* Special variations and considerations may be granted a health care facility which is operated wholly or utilizes a distinct part of the facility for people who have special problems such as retardation, physical disabilities, are children, have a physical or mental dependency or a condition in common which can best be treated in a specialized environment under an approved program of care commensurate with the needs of the residents of the facility.

a. Such a facility or distinct part thereof shall be provided with the kind of equipment, numbers of qualified staff and operated in such fashion as to meet with the approval of the department.

b. On approval of the department, the state fire marshal and the department of social services, other variations from the established rules and standards for a licensed health care facility of that category may be made as is necessary to successfully implement the specialized program

providing that it does not endanger the health, safety or welfare of any resident or patient and that alternate means to effect the same degree of protection shall be used when such variances are permitted.

c. Day care services for children and adults and types of related community medical, nursing and residential services compatible with the licensed facility's program may be offered as special services in a health care facility if its programs meet with the approval of the department and such additional equipment, space, service facilities and staff as are necessary for its implementation.

58.3(135C) Administration. Each boarding home shall comply with the provisions relating to administration as stated in 56.3(135C).

58.3(1) *The licensee shall:*

a. Be responsible for the selection and direction of competent personnel to provide services for the resident care program.

b. Be required to maintain financial records.

58.3(2) *General policies.*

a. There shall be written policies for resident care programs and services as outlined in these rules.

b. There shall be written personnel policies to include job summary, hours of work, salary, vacation, sick leave and responsibilities.

c. Health examinations.

(1) Health examinations for all employees shall be available for review.

(2) Health examinations for all personnel shall be done at the commencement of employment and at least yearly.

(3) Health examinations shall be in sufficient detail to determine freedom from clinical evidence of any disease in a communicable form.

58.4(135C) Personnel.

58.4(1) *General qualifications.*

a. Persons employed in a boarding home shall be qualified to provide services and supervision required to meet the needs of the residents.

b. All personnel employed in a boarding home shall be no less than 16 years of age nor more than 70 years of age. Exception to the above regulation may be made on an individual basis on a written request to the department.

c. A training program for all personnel is recommended.

d. In facilities licensed for 16 beds or more, persons in charge of meal planning and food preparation shall have had special training approved by the department.

e. Recognized retarded individuals may be employed but only after an individual request has been made to and approved by the department.

f. Return to duty by personnel following contagious or infectious disease may be made subject to a physician's approval.

58.4(2) Personnel in the facility shall be sufficient to provide 24-hour coverage for residential care services.

a. The person in charge shall be at least 19 years of age, shall have had experience in the facility and shall have had training to carry out the assignments and to take care of emergencies and sudden illnesses.

b. Persons carried on the resident census shall not perform tasks which would replace paid employees to fulfill staffing requirements. Work programs for residents shall be done only in accordance with physician's orders. Types of tasks given residents will be subject to approval of the department.

58.5(135C) Admission, transfer and discharge. Each boarding home shall comply with the provisions relating to admission, transfer and discharge as stated in 56.4(135C). In addition, each boarding home shall comply with the following:

58.5(1) *General admission policies.* No resident shall be admitted or retained in a boarding home who is in need of nursing or custodial care.

58.5(2) Reserved for future use.

58.6(135C) Medical services. Each boarding home shall comply with the provisions relating to medical services as stated in 56.5 (135C). In addition, the boarding home shall comply with the following.

58.6(1) Residents shall be admitted to a boarding home only on a written order by a physician certifying that the individual being admitted requires accommodation, board and supervision, and does not require nursing or custodial care.

58.6(2) The licensee shall require residents to keep him advised of current medications, treatments and diet so that appropriate supervision can be rendered when it is required.

58.7(135C) Records. Each boarding home shall comply with the provisions relating to records as stated in 56.6(135C). In addition, each boarding home shall comply with the following:

58.7(1) *Personnel.* An employment record shall be kept for each employee consisting of the following information: Name and address of employee; social security number of employee; date of birth; date of employment; experience and education; references (names and addresses of three); position in the home; date and reason for discharge and resignation. A record of the employee's physical examination shall be kept in the home and available for review.

58.7(2) Reserved for future use.

58.8(135C) Resident care program and other services. Each boarding home shall comply with the provisions relating to resident care

program and other services as stated in 56.7(135C). In addition each boarding home shall comply with the following:

58.8(1) *Resident care and personal services.*

a. Additional services shall be provided the resident on a temporary basis for short illnesses and minor ailments when the resident's physician so directs.

b. A resident requiring bed care or nursing services for more than 72 hours shall be transferred to a health care facility licensed to provide nursing care.

c. Residents in the facility shall be required to bathe at least once a week.

d. Residents shall not share a bedroom with a family member or employees of the owner or operator.

e. Physically and mentally able residents shall be permitted to leave the facility and environs at reasonable times unless there are justifiable reasons established for refusing such permission.

58.8(2) Reserved for future use.

58.9(135C) Drugs. Each boarding home shall comply with the provisions relating to drugs as stated in 56.8(135C). In addition, each boarding home shall comply with the following:

58.9(1) Residents residing in a boarding home are individuals who are essentially capable of managing their own affairs, which includes self-administration of medications. Residents who are unable or cannot be trusted to take their own medications shall be transferred to a facility licensed to offer personal services.

58.9(2) As a convenience, the licensee may provide storage and handling of medications. This service shall be in compliance with 56.8(1)—Drug storage and 56.8(2)—Drug safeguards.

58.10(135C) Food service. Each boarding home shall comply with the provisions relating to food service as stated in 56.9(135C). In addition, each boarding home shall comply with the following:

58.10(1) *Organization of food service.*

a. A trained cook manager or a person who is in training to meet this requirement shall be employed.

b. Food service personnel shall be on duty for a 12-hour span extending from the preparation of breakfast through supper.

c. There shall be written policies and procedures which are applicable to the food service facility. A schedule of duties to be performed daily shall be posted in each area.

d. There shall not be more than a 14-hour span between the evening meal and breakfast.

58.10(2) *Menus, storage, preparation and service.*

a. Menus shall be written at least one week in advance.

b. Menus shall include a variety of foods prepared in various ways.

c. Records of menus as served and amended shall be filed and maintained for 30 days and shall be available for review by departmental personnel.

d. A file of tested recipes adjusted to the number of people fed in the facility shall be maintained.

e. Supplies of staple foods for a minimum of a one-week period and of perishable foods for a minimum of a two-day period shall be maintained on the premises. Minimum food portion requirements shall conform to the amounts listed for a low cost plan as provided in *Family Food Budgeting for Good Meals and Good Nutrition,* Revised 1971, No. 94, "Table 2 Basic Low Cost Family Food Plan", U.S. Department of Agriculture.

f. Ice shall be stored and handled in such manner as to prevent contamination. Ice scoops should be sanitized daily and kept in a clean container.

58.10(3) *Sanitation.*

a. Mechanical dishwasher or a three-compartment sink is required.

b. Directions for the dishwashing procedure shall be posted and available to all kitchen personnel. The proper procedure shall be utilized for the welfare of the residents and employees.

c. Dishwashing machine must provide a wash temperature of 140° F. and a rinse temperature of 180° F. The machine shall have temperature gauges.
