Class A. Interior finish flame spread 0-25.
Class B. Interior finish flame spread 25-75.
Class C. Interior finish flame spread 75-200.

45.10(34) *Panic hardware.* Panic hardware shall cause the door latch to release when pressure of not to exceed 15 pounds is applied to the releasing devices in the direction of exit travel. Such releasing devices shall be bars or panels extending not less than two-thirds of the width of the door and placed at heights not less than 30 nor more than 44 inches above the floor. Only approved panic hardware shall be used on exit doors.

45.11(100) Existing custodial, basic nursing, intermediate nursing, skilled nursing homes and extended care facilities.

45.11(1) *Application.*

a. This subrule of the regulations shall apply to existing custodial, basic nursing, intermediate nursing, skilled nursing homes and extended care facilities. They shall hereafter be referred to as health care facilities. These regulations shall constitute the minimum requirements for existing homes for approval by the state fire marshal's office. Further, and more stringent, requirements may be required by other governmental divisions, or subdivisions, as a requirement for participation in various programs, or to comply with local codes and regulations. Any nursing or custodial home licensed and in operation on the effective date of these regulations shall be considered as complying with these regulations for existing nursing and custodial homes if they are in compliance with all requirements of this subrule. All existing nursing and custodial homes not in compliance with this subrule shall comply within one year from the effective date of these regulations.

b. The state fire marshal in enforcing the requirements of this subrule may modify them under the following two conditions:

(1) If the building in question was licensed as a nursing home or custodial care institution prior to adoption or amendment of these requirements.

(2) Only those requirements whose application would be clearly impractical in the judgment of the state fire marshal shall be modified.

c. Requirements may be modified by the state fire marshal to allow alternative arrangements that will secure as nearly equivalent safety to life from fire as practical; but in no case shall the modification afford less safety than compliance with the corresponding provisions contained in the following parts of these regulations. A reasonable time shall be allowed for compliance with any part of this subrule, commensurate with the magnitude of expenditure and the disruption of services. When alternate protection is installed and accepted, the institution shall be considered as conforming for purposes of these regulations.

d. No existing building shall be converted to a nursing home or custodial care institution unless it complies with all requirements for new buildings.

e. Additions or structural alterations to existing facilities must have written approval from the state fire marshal, and must submit working plans and specifications for review and approval prior to work being started.

45.11(2) *Floor areas.*

a. All floors having a maximum occupancy above 30 persons, shall be divided into two sections by a one-hour fire wall or fire partition with ample room on each side for the total number of beds on each floor.

b. Corridor length between smokestop partitions, horizontal exits, or from either to the end of the corridor shall not exceed 150 feet on any patient occupied sleeping floor.

c. Any smokestop partition shall have at least a one-hour fire-resistance rating and shall be continuous from wall to wall and floor to floor or roof arch above. Openings in a smokestop partition shall be protected by fixed wire glass panels in steel frames, maximum size of 1296 square inches each panel, or 1¾-inch solid core wood doors with vision panel in each door, wire glass not over 720 square inches, as a minimum requirement. Such doors shall be self-closing or may be so installed that they may be kept in an open position provided they meet the requirements of "*d*". Doors in smokestop partitions are not required to swing with exit travel. Ample space shall be provided on each side of the barrier for the total number occupants on both sides.

d. Any door in a fire separation, horizontal exit or a smokestop partition may be held open only by an approved electrical device. The device shall be so arranged that the operation of the required detection, alarm or sprinkler system will initiate the self-closing action.

e. Every interior wall and partition in buildings of fire-resistive and noncombustible construction shall be of noncombustible materials.

f. Every patient sleeping room shall have an outside window or outside door arranged and located to permit the venting of products of combustion and to permit any occupant to have access to fresh air in case of emergency.

g. Interior finish of exit corridors, and means of egress, shall be Class A (flame spread of 25 or less). Interior finish of rooms shall be Class A or B (flame spread of 75 or less). If over four-bed capacity, shall have Class A finish.

45.11(3) *Exit details.*

a. Exits shall be of the following types or combinations thereof as defined by the National Fire Protection Association.

(1) Horizontal exits.

(2) Doors leading directly outside the buildings (without stairs).

(3) Ramps.

(4) Stairways, or outside stairs.

(5) Seven-foot spiral slides. Approved only where installed prior to effective date of these regulations.

(6) Exit passageways.

(7) Smoke towers.

b. At least two exits of the above types, remote from each other, shall be provided for every floor or section of the building. At least one exit in every floor or section shall be of type 2, 3, 4, 6 or 7, as listed above. Exterior fire escape stairs may be accepted as a second means of exit.

c. At least one required exit from each floor above or below the first floor shall lead directly, or through an enclosed corridor, to the outside. A second or third required exit, where a more direct exit is impracticable, may lead to a first floor lobby having ample and direct exit to the outside.

d. Travel distance (1) between any room door intended as exit access and an exit shall not exceed 100 feet; (2) between any point in a room and an exit shall not exceed 150 feet; (3) between any point in a patient occupied sleeping room or suite and an exit access door of that room or suite shall not exceed 50 feet. The travel distance in (1) or (2) above may be increased by 50 feet in buildings completely equipped with an automatic fire extinguishing system.

e. Exit doors shall not be locked against the egress by bolt key locks, hooks or padlocks. A latch type lock is permissible that locks against outside entrance. Panic hardware shall be installed on exit doors accommodating over 30 patients.

45.11(4) *Construction and arrangement.* All stairs, ramps or other ways of exit for areas shall be of such width and so arranged as to avoid any obstruction to the convenient removal of nonambulatory persons by carrying them on stretchers or on mattresses serving as stretchers. A standard 44 inch wide stairway or ramp is the minimum permitted, slope of ramp shall be 1 to 1 3/16 in 12. Where persons are to be carried on mattresses or stretchers, extra space may be needed to make turns at stair landings. Minimum dimension of a stair landing shall be 60 inches.

45.11(5) *Access.*

a. Every sleeping room, unless it has a door opening to the ground level shall have an exit access door leading directly to a corridor which leads to an exit. One adjacent room such as a sitting or anteroom may intervene if all doors along the path of exit travel are equipped with nonlockable hardware.

b. Any required aisle, corridor, or ramp shall be not less than 48 inches in clear width when serving as means of egress from patient sleeping rooms. It shall be of such width and so arranged as to avoid any obstructions to the convenient removal of nonambulatory persons carried on stretchers or on mattresses serving as stretchers.

c. Corridors and passageways to be used as a means of exit, or part of a means of exit, shall be unobstructed and shall not lead through any room or space used for a purpose that may obstruct free passage. Corridors and passageways which lead to the outside from any required stairway shall be enclosed as required for stairways.

d. All rooms must be equipped with a door, at least 1 3/4-inch solid core wood, or equivalent. Divided doors shall be of such type that when the upper half is closed, the lower section shall close.

(1) No locks shall be installed on patient room doors, except for mentally disturbed patients and an attendant, with key on person, shall be in view of this corridor at all times.

(2) All doorways to patient occupied spaces, and all doorways from patient occupied spaces, and the required exits shall be at least 42 inches in clearance width in nursing homes and 32 inches in custodial homes.

(3) Doors to patient rooms shall swing in except any room accommodating more than four persons shall swing with exit travel.

(4) Residential type of occupancy room doors may be locked by the occupant if they can be unlocked on the corridor side, and keys are carried by attendants at all times.

(5) Doors to basements, furnace rooms, and hazardous areas shall be kept closed and marked, "FIRE DOOR — PLEASE KEEP CLOSED".

45.11(6) *Protection of vertical openings.*

a. Each stairway between stories shall be enclosed with partitions having a one-hour fire-resistance rating, except that where a full enclo-

sure is impractical the required enclosure may be limited to that necessary to prevent a fire originating in any story from spreading to another story.

b. All doorways in stairway enclosures or partitions shall be provided with approved self-closing fire doors, except that no such doors shall be required for doorways leading directly outside the buildings, and all doors shall be kept closed unless held open by an approved electrical device, actuated by an approved smoke detection device located at top of stairwell, and connected to alarm system.

c. Any elevator shaft, light and ventilation shaft, chute and other vertical opening between stories shall be protected as required above for stairways.

45.11(7) *Sprinkler system.*

a. Automatic fire extinguishing protection shall be provided throughout all health care facilities, covered in this regulation, except those of fire-resistive construction, of any height, or protected noncombustible construction not over one story in height, or one story one-hour protected frame construction.

b. Any required automatic sprinkler system shall be in accordance with approved standards for systems in light hazard occupancies, and shall be electrically interconnected with the manual fire alarm system. The main sprinkler control valve shall be electrically supervised so that at least a local alarm will sound when the valve is closed.

c. The sprinkler piping for any isolated hazardous area which can be adequately protected by a single sprinkler may be connected directly to a domestic water supply system having a flow of at least 22 gallons per minute at 15 pounds per square inch residual pressure at the sprinkler. An approved shutoff valve shall be installed between the sprinkler and the connection to the domestic water supply.

45.11(8) *Fire detection and alarm system.*

a. There shall be an automatic fire detection system in all health care facilities covered in this regulation, except where there is a sprinkler system which shall include an approved manual fire alarm system.

b. Requirements for automatic fire detection systems. The system shall meet the following standards:

(1) Automatically detect a fire.

(2) Indicate at a central supervised point the location of the fire.

(3) Sound alarm signal throughout the premises for evacuation purposes.

(4) Provide assurance the system is in operating condition by electric supervision.

(5) Provide auxiliary power supply in the event of main power failure.

(6) Underwriters Laboratory listed equipment to be used throughout system.

(7) Provide a manual test switch.

(8) Installation of equipment and wiring shall be in a neat and workmanship like manner.

(9) Shall be tested by competent person at least semiannually. Date of test and name noted.

(10) To include smoke, or products of combustion, detection devices as required by any rule in these regulations.

(11) Properly located manual alarm stations.

c. Where fire detection systems are installed to meet the requirements of this regulation they shall be approved electrically supervised systems protecting the entire building, including unoccupied spaces such as attics. Detectors shall be approved, combined rate of rise and 135°F., or smoke, or products of combustion type and properly installed. Where fixed temperature devices are required, they shall be constructed to operate at 165° F., or less, except that in spaces where high temperature is normal, devices having a higher operating point may be used. Operation of a detection, or alarm, device shall cause an alarm which is audible throughout the building.

45.11(9) *Fire extinguishers.*

a. Approved type fire extinguishers shall be provided on each floor, so located that a person will not have to travel more than 75 feet from any point to reach the nearest extinguisher. An additional extinguisher shall be provided in or adjacent to, each kitchen or basement storage room.

b. Type and number of portable fire extinguishers shall be determined by the fire marshal.

45.11(10) *Heating and building service equipment.*

a. Air conditioning, ventilating, heating, cooking and other service equipment shall be in accordance with state regulations governing same, or nationally recognized standards such as National Fire Protection Association standards governing the type of equipment, and shall be installed in accordance with the manufacturer's specifications. Central heating plants shall be separated from patient occupied spaces by at least a one-hour fire separation. Activation of the fire alarm system shall shut down the air distribution system.

b. Portable comfort heating devices are prohibited.

c. Any heating device, other than a central heating plant, shall:

(1) Be so designed and installed that combustible material will not be ignited by it or its appurtenances.

(2) If fuel fired, be chimney or vent connected, take its air for combustion directly from the outside, and be so designed and installed to provide for complete separation of the combustion system from the atmosphere of the occupied area. In addition, it shall have safety devices to immediately stop the flow of fuel and shut down the

equipment in case of either excessive temperatures or ignition failure.

Exceptions:

Approved suspended unit heaters may be used, except in means of egress and patient sleeping areas, provided such heaters are located high enough to be out of the reach of persons using the area and provided they are equipped with the safety devices called for in subparagraph (2) above.

Fireplaces may be installed and used only in areas other than patient areas, provided that these areas are separated from patient sleeping spaces by construction having a one-hour fire-resistance rating and they comply with the appropriate standards. In addition thereto, the fireplace must be equipped with a heat tempered glass fireplace enclosure guaranteed against breakage up to a temperature of 650° F. If, in the opinion of the fire marshal, special hazards are present, a lock on the enclosure and other safety precautions may be required.

d. Combustion and ventilation air for boiler, incinerator or heater rooms shall be taken directly from and discharged directly to the outside air. No incinerator flue shall connect to boiler or furnace flue.

e. Every incinerator flue, rubbish, trash or laundry chute shall be of a standard type, properly designed and constructed, and maintained for fire safety. Any chute other than an incinerator flue shall be provided with automatic sprinkler protection installed in accordance with applicable standards.

An incinerator shall not be directly flue fed. Existing flue fed incinerators shall be sealed by fire-resistive construction to prevent further use. Any trash chute shall discharge into a trash collecting room, used for no other purpose and separated from the rest of the building with construction of at least one-hour fire-resistance rating, and provided with approved automatic sprinkler protection.

45.11(11) *Attendants, evacuation plan.*

a. Every health care facility covered in these regulations, shall have at least one competent attendant on duty on each floor, awake and dressed therein at all times, and in addition, one stand-by attendant within hearing distance and available for emergency service. These attendants shall be at least 18 years of age and capable of performing the required duties of evacuation. No person other than the management or a person under management control shall be employed as an attendant.

b. Every health care facility covered in these regulations shall formulate a plan for the protection of all persons in the event of fire and for their evacuation to areas of refuge and from the building when necessary. All employees shall be instructed and kept informed respecting their duties under the plan. This plan is to be posted where all employees may readily study it. Fire drills shall be held at least once a month for each shift. Infirm or disturbed patients need not exit from building. Record of same to be kept available for inspection.

45.11(12) *Smoking.*

a. Smoking may be permitted only where proper facilities are provided. Smoking shall not be permitted in sleeping quarters, or dormitories, except bedfast patients, or persons considered not responsible, upon written orders of the patient's physician, under direct, responsible supervision, clothing, and bed linens to be of approved fire-retardant material, properly treated to be fire-retardant.

b. Ash trays of noncombustible material, and safe design, shall be provided in all areas where smoking is permitted.

c. "NO SMOKING" signs shall be posted in all patient occupied rooms, stating the smoking regulations in that particular facility.

45.11(13) *Exit signs and lighting.*

a. Signs bearing the word "EXIT" in plainly legible block letters shall be placed at each exit opening, except at doors directly from rooms to exit corridors or passageways and except at doors leading obviously to the outside from the entrance floor. Additional signs shall be placed in corridors and passageways wherever necessary to indicate the direction of exit. Letters of signs shall be at least six inches high, or four and one-half inches high if internally illuminated. All exit and directional signs shall be maintained clearly legible by electric illumination or other acceptable means when natural light fails.

b. All stairways and other ways of exit and the corridors or passageways appurtenant thereto shall be properly illuminated at all times to facilitate egress in accordance with the requirements for exit lighting.

c. Emergency lighting system of an approved type shall be installed so as to provide, automatically, the necessary exit illumination in the event of failure of the normal lighting system within the building. An approved, rechargeable, battery powered, automatically operated device will be acceptable.

45.11(14) *Combustible contents.*

a. All draperies, curtains and cubicle curtains shall be noncombustible, or rendered and maintained flame retardant. Waste baskets to be of noncombustible, nonthermoplastic material.

b. Fresh cut flowers and decorative greens, as well as living vegetation, may be used for decoration, except those containing pitch or resin.

c. Carpeting and carpet assembly as installed after effective date of these regulations, shall comply with the fire marshal's specifications pertaining to same.

45.11(15) *Occupancy restrictions.*

a. A patient bedroom shall not be located

in a room where the finish floor is more than 30 inches below the finish grade at the building.

b. Occupancies not under the control of, or not necessary to, the administration of a nursing and custodial home are prohibited therein with the exception of the residence of the owner or manager.

45.11(16) *Maintenance.*

a. Regular and proper maintenance of electric service, heating plants, alarm systems, sprinkler systems, fire doors and exit facilities shall be a requisite for nursing and custodial homes of all classes.

b. Storerooms shall be maintained in a neat and proper manner at all times.

c. Excessive storage of combustible materials such as paper cartons, magazines, paints, sprays, old clothing, furniture and similar materials shall be prohibited at all times in nursing and custodial homes.

45.12(100) New custodial, basic nursing, intermediate nursing, skilled nursing homes and extended care facilities.

45.12(1) *Application.*

a. New custodial, basic nursing, intermediate nursing, skilled nursing homes and extended care facilities shall be those constructed after the effective date of these regulations.

b. It shall also include the above type of health care facilities that are to be remodeled, or additions to existing facilities.

c. Any addition shall be separated from any existing nonconforming structure by a noncombustible partition having a two-hour fire-resistance rating.

d. This section of the regulations shall apply to new custodial, basic nursing, intermediate nursing, skilled nursing homes and extended care facilities. They shall hereafter be referred to as health care facilities. These regulations shall constitute the minimum requirements for new homes, or additions, for approval by the fire marshal's office. Further, and more stringent, requirements may be required by other governmental divisions, or subdivisions as a requirement for participation in various programs, or to comply with local codes and regulations.

e. When new construction is contemplated for a facility, preliminary plans may be submitted for review. Working drawings, plans and specifications shall be submitted to the state fire marshal for review and approval. Written approval by the state fire marshal shall be required prior to construction.

45.12(2) *Construction.*

a. Buildings of one story in height only may be constructed of protected noncombustible construction, fire-resistive construction, protected ordinary construction, protected wood frame construction, heavy timber construction, or unprotected noncombustible construction. (See 45.12(9) for automatic sprinkler requirements.)

b. Buildings two stories or more in height shall be constructed of at least fire resistive construction.

c. Other types of construction not permitted.

d. The enclosure walls of stairways, ramps, exit passageway elevator shafts, chutes and other vertical openings between floors shall be of noncombustible materials having a fire-resistance rating of at least two hours in buildings of any height.

45.12(3) *Division of floor areas.*

a. Each floor used for patient sleeping rooms, unless provided with a horizontal exit, shall be divided into at least two compartments by a smokestop partition.

b. Corridor length between smokestop partitions, horizontal exits, or from either, to the end of the corridor on any institutional sleeping floor shall not exceed 150 feet. Not more than 30 persons shall occupy any one such partitioned area.

c. Any smokestop partition shall have a fire-resistance rating of at least one hour. Such a partition shall be continuous from outside wall to outside wall and from floor slab to the underside of the slab above, through any concealed spaces such as between the hung ceiling and the floor or roof above. Such a partition shall have openings only in a public room or corridor. At least 30 net square feet per institutional occupant for the total number of institutional occupants in adjoining compartments shall be provided on each side of the smokestop partition.

d. Any corridor opening in smokestop partitions shall be protected by a pair of swinging doors, each leaf to be a minimum of 44 inches wide. In addition, any smokestop door shall conform to the following minimum standards:

(1) Smokestop doors shall be at least 1¾-inch solid core wood doors designed to close the opening completely with only such clearance as is reasonably necessary for proper operation. Stops are required on the head and sides. Positive latching hardware and center mullions are prohibited.

(2) Smokestop doors shall be selfclosing and may be held in an open position only if they meet the requirements of "*e*".

(3) Vision panels are required in all doors in smokestop partitions. They shall be wired glass in approved metal frames not exceeding 720 square inches.

e. Any door in a fire separation, horizontal exit or a smokestop partition may be held open only by an approved electrical device. The device shall be so arranged that the operation of the required detection, alarm or sprinkler system will initiate the self-closing action.

45.12(4) *Exit details.*

a. Exits shall be restricted to the following permissible types:

(1) Doors leading directly outside the building.

(2) Stairs and smokeproof towers.

(3) Ramps.
(4) Horizontal exits.
(5) Outside stairs.
(6) Exit passageways.

b. At least two exits of the above types, remote from each other, shall be provided for each floor or fire section of the building. At least one exit in each floor or fire section shall be as indicated in 1, 2, 5 or 6 as listed above.

c. At least one required exit from each floor above or below the first floor shall lead directly, or through an enclosed corridor, to the outside. A second or third required exit, where a more direct exit is impracticable, may lead to a first floor lobby having ample and direct exits to the outside.

d. Travel distance (1) between any room door intended as exit access and an exit shall not exceed 100 feet; (2) between any point in a room and an exit shall not exceed 150 feet; (3) between any point in a patient sleeping room or suite and exit access door of that room or suite shall not exceed 50 feet. The travel distances in (1) or (2) above may be increased by 50 feet in buildings completely equipped with an automatic fire extinguishing system.

e. Exit doors shall swing with egress and shall not be locked against the egress by bolts, key locks, hooks or padlocks. A latch type lock is permissible that locks against outside entrances. Panic hardware shall be installed on exit doors accommodating over 30 patients.

f. Every patient sleeping room shall have an outside window or outside door arranged and located so that it can be opened from the inside without the use of tools or keys to permit the venting of products of combustion and to permit any occupant to have direct access to fresh air in case of emergency. The maximum allowable sill height shall not exceed 36 inches above the floor except that the window sill in special nursing care areas may be 60 inches above the floor.

g. The capacity of any required exit shall be based on its width in units of 22 inches. The capacity of exits providing travel by means of stairs shall be 22 persons per exit unit; and exits providing travel without stairs, such as doors or horizontal exits shall be 30 persons per exit unit.

45.12(5) *Construction and arrangement.* All stairs, ramps, or other ways of exit for areas shall be of such width and so arranged as to avoid any obstruction to the convenient removal of nonambulatory persons by carrying them on stretchers or on mattresses serving as stretchers. A standard 44-inch wide stairway or ramp is the minimum permitted; slope of ramp shall be 1 to 1 3/16 in 12. Where persons are to be carried on mattresses or stretchers extra space may be needed to make turns at stair landings. Minimum dimension of a stair landing shall be 60 inches.

45.12(6) *Access.*

a. Each occupied room shall have at least one doorway open directly to the outside, or to a corridor leading directly or by a stairway or ramp to the outside.

b. Aisles, corridors and ramps required for exit access or exit shall be at least eight feet in clear and unobstructed width except that corridors and ramps in adjunct areas not intended for the housing, treatment or use of inpatients may be a minimum of six feet in clear and unobstructed width.

c. Corridors and passageways to be used as a means of exit or part of a means of exit, shall be unobstructed and shall not lead through any room or space used for a purpose that may obstruct free passage. Corridors and passageways which lead to the outside from any required stairway shall be enclosed as required for stairways. Corridors shall be separated from use areas by walls having a fire-resistance rating of at least one-hour construction and without transfer grilles whether or not such grilles are protected by dampers actuated by fusible links.

d. Interior finish in means of egress shall be Class A. Interior finish of rooms may be Class A or B, except in rooms of over four capacity shall be Class A.

Exceptions:

(1) Doors between all rooms and corridors, other than doors to hazardous areas, horizontal exits or stair doors, shall be of no less than 1¾-inch solid-core wood doors and shall be without undercuts or louvers. The doors shall be provided with latches of a type suitable for keeping the door tightly closed and acceptable to the state fire marshal.

(2) Fixed wire glass vision panels may be placed in corridor walls, provided they do not exceed 1,296 square inches in size and are installed in approved steel frames. Fixed wired glass vision panels may be installed in wood dooors, provided they do not exceed 720 square inches in size and are installed in approved steel frames.

(3) Waiting areas of 250 square feet or less on a patient occupied sleeping floor may be open to the corridor provided that they are located to permit direct supervision by the staff. Such areas shall be equipped with an electrically supervised automatic fire detection system actuated by smoke or products of combustion other than heat. Not more than one such waiting area is permitted in each smoke compartment.

(4) Waiting areas of 600 square feet or less on floors other than patient occupied sleeping floors may be open to the corridor, provided that they are located to permit direct supervision by the staff and so arranged as not to obstruct any access to required exits. Such areas shall be protected by an electrically supervised automatic fire detection system actuated by smoke or other products of combustion other than heat.

45.12(7) *Doors.*

a. All rooms must be equipped with a door. Divided doors shall be of such type that when the upper half is closed the lower section shall close.

b. No locks shall be installed on patient room doors, except for mentally disturbed patients, and an attendant, with key on person, shall be in view of this corridor at all times.

c. All doorways to patient occupied spaces, and all doorways between the patient occupied spaces and the required exits shall be at least 46 inches in clear width.

d. Doors to patient rooms shall swing in, except any room accommodating more than four persons shall swing with exit travel.

e. Residential type of occupancy room doors may be lockable by the occupant, if they can be unlocked on the corridor side and keys are carried by attendants at all times.

f. Doors to basements, furnace rooms and hazardous areas shall be kept closed and marked, "FIRE DOOR—PLEASE KEEP CLOSED".

45.12(8) *Protection of vertical openings.*

a. Every stairway, elevator shaft, light and ventilation shaft, chute and other opening between stories shall be enclosed or protected to prevent the spread of fire or smoke.

(1) Each floor opening, as specified, shall be enclosed by substantial walls having fire-resistance not less than required for stairways, with approved fire doors or windows provided in openings therein, all so designed and installed as to provide a complete barrier to the spread of fire or smoke through such openings.

(2) The enclosing walls of floor openings serving stairways or ramps shall be so arranged as to provide a continuous path of escape, including landing and passageways, providing protection for persons using the stairway or ramp against fire or smoke therefrom in other parts of the building. Such walls shall have fire resistance as follows:

New buildings four stories or more in height, two-hours noncombustible construction.

Other new buildings, one-hour.

Wired glass in metal frames may be accepted in existing buildings and in new buildings.

b. A door in an exit stairway enclosure shall be self-closing, and shall normally be kept closed and shall be marked, "FIRE EXIT—PLEASE KEEP DOOR CLOSED".

45.12(9) *Automatic sprinklers.*

a. Automatic fire extinguishing protection shall be provided throughout all health care facilities covered in this regulation, except those of fire-resistive construction, or one-story protected noncombustible construction. (45.12(2)).

b. Required automatic sprinkler systems shall be in accordance with approved standards for systems in light hazard occupancies, and shall be electrically interconnected with the fire alarm system. The main sprinkler control valve shall be electrically supervised so that at least a local alarm will sound when the valve is closed.

45.12(10) *Fire alarm and detection system.*

a. Where fire detection systems are installed to meet the requirements of this regulation, they shall be approved electrically supervised systems protecting the entire building, including unoccupied spaces such as attics. Detectors shall be approved combined rate of rise and 135°F., or smoke, or products of combustion type, and properly installed. Where fixed temperature devices are required, they shall be constructed to operate at 165°F., or less, except that in spaces where high temperature is normal, devices having a higher operating point may be used. Operation of a detection, or alarm, device shall cause an alarm which is audible throughout the building.

Requirements for automatic fire detection system. The system shall meet the following standards.

(1) Automatically detect a fire.

(2) Indicate at a central point notice of the fire.

(3) Sound alarm signal throughout the premises for evacuation purposes.

(4) Provide assurance the system is in operating condition by electric supervision.

(5) Provide auxiliary power supply in the event of main power failure.

(6) Underwriters Laboratory listed equipment to be used throughout system.

(7) Provide a manual test switch.

(8) Installation of equipment and wiring shall be in a neat and workmanship like manner, and according to manufacturers instructions.

(9) Shall be tested by competent person at least semiannually. Date of test and name listed.

(10) To include smoke, or products of combustion detection devices as required by any rule in these regulations.

(11) Properly located manual alarm stations.

b. Every building shall have an electrically supervised manually operated fire alarm system integral with detection system in accordance with approved standards. The fire alarm system shall be installed to transmit an alarm automatically to the fire department, where available, that is legally committed to serve the area in which the health care facility is located, by the most direct and reliable method approved by local regulations. Manual alarm stations shall be located at each exit door, nurses station, kitchen, boiler and mechanical room, and other locations as required by the fire marshal.

c. There shall be an automatic fire detection system in all homes except where there is a sprinkler system.

d. The actuation of any detector system, manual alarm, or sprinkler system shall activate the alarm system.

45.12(11) *Fire extinguishers.*

a. Approved type fire extinguishers shall be provided on each floor, so located that a person will not have to travel more than 75 feet from any point to reach the nearest extinguisher. An addi-

tional extinguisher shall be provided in, or adjacent to, each kitchen or basement storage room.

b. Type and number of portable fire extinguishers shall be determined by the fire marshal.

c. Hoods over cooking ranges, etc. shall be protected by an approved automatic extinguishing system.

45.12(12) *Heating and building service equipment.*

a. Air conditioning, ventilating, heating, cooking and other service equipment shall be in accordance with state regulations governing same, or nationally recognized standards such as National Fire Protection Association standards governing the type of equipment, and shall be installed in accordance with the manufacturer's specifications. Central heating plants shall be separated from patient occupied spaces by at least a one-hour fire separation. Activation of the fire alarm system shall shut down the air distribution system.

b. Portable comfort heating devices are prohibited.

c. Any heating device other than an approved central heating plant shall:

(1) Be so designed and installed that combustible matter will not be ignited by it or its appurtenances.

(2) If fuel fired, be chimney or vent connected, take its air for combustion directly from outside, and be so designed and installed to provide for complete separation of the combustion system from the atmosphere of the occupied area. In addition, it shall have safety devices to immediately stop the flow of fuel and shut down the equipment in case of either excessive temperatures or ignition failure.

Exceptions:

Approved suspended unit heaters may be used except in means of egress and patient sleeping areas, provided such heaters are located high enough to be out of the reach of persons using the area and provided they are equipped with the safety devices called for in subparagraph 2 above.

Fireplaces may be installed and used only in areas other than patient sleeping areas, provided that these areas are separated from sleeping spaces by construction having a one-hour fire-resistance rating and they comply with the appropriate standards. In addition thereto, the fireplace must be equipped with a hearth that shall be raised at least four inches, and a heat tempered glass fireplace enclosure guaranteed against breakage up to a temperature of 650°F. If, in the opinion of the fire marshal, special hazards are present, a lock on the enclosure and other safety precautions may be required.

Combustion and ventilation air for boiler, incinerator or heater rooms shall be taken from, and discharged directly to the outside air. No incinerator flue shall connect to boiler or furnace flue.

Every incinerator flue, rubbish or laundry chute shall be of a standard type, properly designed and constructed and maintained for fire safety. Any chute other than an incinerator flue shall be provided with automatic sprinkler protection installed in accordance with applicable standards, such as Standard No. 13, Automatic Sprinklers, of National Fire Protection Association.

No incinerator shall be directly flue fed. Any trash chute shall discharge into a trash collecting room, used for no other purpose, and separated from the rest of the building with construction of at least one-hour fire-resistance rating, and provided with an approved automatic sprinkler protection.

45.12(13) *Attendants, evacuation plan.*

a. Every nursing and custodial home shall have at least one competent attendant on duty on each floor awake and dressed therein at all times, and, in addition one standby attendant within hearing distance and available for emergency service. These attendants shall be at least 18 years of age, and capable of performing the required duties of evacuation. No person other than the management or a person under management control shall be considered as an attendant.

b. Every health care facility covered in this regulation shall formulate a plan for the protection of all persons in the event of fire and for their evacuation to areas of refuge and from the building when necessary. All employees shall be instructed and kept informed respecting their duties under the plan. This plan is to be posted where all employees may readily study it. Fire drills shall be held at least once a month. Infirm or disturbed patients need not exit from building. Record of same to be kept available for inspection.

c. Every bed intended for use by patients shall be easily movable under conditions of evacuation, and shall be equipped with the size and type of caster to allow easy mobility.

45.12(14) *Smoking.*

a. Smoking may be permitted in nursing and custodial homes only where proper facilities are provided. Smoking shall not be permitted in sleeping quarters or dormitories, except bedfast patients, or persons considered not responsible, upon written orders of the patient's physician and under direct responsible supervision. Clothing and bed linens to be of approved fire-retardant material or properly treated to be fire-retardant.

b. Ash trays of noncombustible material and safe design shall be provided in all areas where smoking is permitted.

c. "NO SMOKING" signs shall be posted in all patient occupied rooms, stating the smoking regulations in that particular facility.

45.12(15) *Exit signs and lighting.*

a. Signs bearing the word "EXIT" in plainly legible block letters shall be placed at each exit opening, except at doors directly from rooms

to exit corridors or passageways and except at doors leading obviously to the outside from the entrance floor. Additional signs shall be placed in corridors and passageways wherever necessary to indicate the direction of exit. Letters of signs shall be at least six inches high, or four and one-half inches if internally illuminated. All exit and directional signs shall be maintained clearly legible by electric illumination or other acceptable means when natural light fails.

b. All stairways and other ways of exit and the corridor or passageways appurtenant thereto shall be properly illuminated at all times to facilitate egress in accordance with the requirements for exit lighting.

c. Emergency lighting system of an approved type shall be installed so as to provide necessary exit illumination in the event of failure of the normal lighting system within the building. An approved type will be an electric generator, on the premises, driven by an independent source of power, either operated simultaneously, through separate wiring circuits, with the regular lighting circuits, or shall come into operation automatically upon failure of the regular lighting circuit. It shall be capable of repeated operation without manual intervention. In one story buildings with 50, or less occupants, an approved rechargeable battery powered, automatically operated, device may be used.

45.12(16) *Combustible contents.*

a. All draperies, curtains and cubicle curtains shall be noncombustible or rendered and maintained flame retardant. Waste baskets to be of noncombustible, nonthermoplastic material.

b. Fresh cut flowers and decorative greens, as well as living vegetation, may be used for decoration, except those containing pitch or resin.

c. Carpeting and carpet assembly, as installed shall comply with the state fire marshal's specifications pertaining to same.

45.12(17) *Occupancy restrictions.*

a. A patient bedroom shall not be located in a room where the finish floor is more than 30 inches below the finish grade at the building.

b. Occupancies not under the control of, or not necessary to, the administration of a nursing and custodial home are prohibited therein with the exception of the residence of the owner or manager.

c. Sections of health care facilities covered in this regulation may be classified as other occupancies if they meet all of the following conditions:

(1) They are not intended to serve occupants for purposes of housing, treatment, customary access, or means of egress.

(2) They are adequately separated from areas of the health facility occupancies by construction having a two-hour fire-resistance rating.

45.12(18) *Maintenance.*

a. Regular and proper maintenance of electric service, heating plants, alarm systems, sprinkler systems, fire doors and exit facilities shall be a requisite for nursing and custodial homes of all classes.

b. Storerooms shall be maintained in a neat and proper manner at all times.

c. Excessive storage of combustible materials such as papers, cartons, magazines, paints, sprays, old clothing, furniture and similar materials shall be prohibited at all times in nursing and custodial homes.

[Filed October 12, 1971]

CHAPTER 46
FIRE SAFETY RULES FOR SCHOOL AND COLLEGE BUILDINGS

46.1(100) General requirements.

46.1(1) Every building or structure, new or old, designed for school or college occupancy, shall be provided with exits sufficient to permit the prompt escape of students and teachers in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life in case of fire or other emergencies will not depend solely on any single safeguard; additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

46.1(2) Every building or structure shall be so constructed, arranged, equipped, maintained and operated as to avoid undue danger to lives and safety of its occupants from fire, smoke, fumes or resulting panic during the period of time reasonably necessary for escape from the building or structure in case of fire or other emergency.

46.1(3) Exits shall be provided of kinds, numbers, location and capacity appropriate to the individual building or structure, with due regard to the character of the occupancy, the number of persons exposed, the fire protection available and the height and type of construction of the building or structure, to afford all occupants convenient facilities for escape.

46.1(4) Fire escapes, where specified, shall be installed and the design and use of materials shall be in accordance with chapter 103 of the Code, and the fire escape regulations set forth in these rules.

46.1(5) All changes or alterations to be made in any school or college building, whether new or existing, shall conform with the applicable provisions of these rules and before any construction of new or additional installation is undertaken, drawings and specifications thereof made to scale shall be submitted to the state fire marshal, in duplicate, for his approval. Within a reasonable time (ten days) after receipt of the drawings and specifications, the state fire marshal shall cause the same to be examined and if he finds that they conform as submitted or modified with the requirements of this division, he shall forthwith sig-

nify his approval of the application either by endorsement thereon or by attachment thereto, retain one copy for his files and return to the applicant the other copy plus any additional copies submitted by the applicant. If the drawings and specifications do not conform with applicable requirements of this division as aforesaid, he shall within the time aforesaid notify the applicant accordingly.

46.1(6) Each school building of two or more classrooms, not having a principal or superintendent on duty, shall have a teacher appointed by the school officials to supervise school fire drills and be in charge in event of fire or other emergency. This subrule shall not apply to college buildings.

46.1(7) Compliance with these rules shall not be construed as eliminating or reducing the necessity for other provisions for fire safety of persons using a school or college building under normal occupancy conditions nor shall any provision of these rules be construed as requiring or permitting any conditions that may be hazardous under normal occupancy conditions.

46.1(8) In existing multistoried buildings where there is substantial compliance with these rules, the state fire marshal may waive specific requirements of these rules. Such waivers shall be granted only after taking into consideration: The age of the regular occupants of the building, the use to which the building is put, the potential hazard to occupants occasioned by noncompliance, the design of the building and difficulty of installing the fire safety device, the excessive cost of full compliance and availability of funds therefore.

46.2(100) Definitions.

46.2(1) *School and college buildings.* For the purpose of these rules, school and college buildings are those used as a gathering of groups of persons for the purpose of instruction and they are distinguished from other types of occupancies in that the same occupants are regularly present and are subject to discipline and control.

46.2(2) *Elementary school.* An elementary school shall be those buildings that include kindergarten through sixth grade (K-6).

46.2(3) *Classroom.* Any room originally designed, or later suitably adapted to accommodate some form of group instruction on a day by day basis, excluding such areas as auditoriums, gymnasiums, lunch rooms, libraries, multipurpose rooms, study halls and similar areas. Storage and other service areas opening into and serving as an adjunct to a particular classroom shall be considered as part of that classroom area.

46.2(4) *Exit.* An exit is a way to get from the interior of a building or structure to the open air outside at the ground level. It may comprise vertical and horizontal means of travel such as doorways, stairways, ramps, corridors, passageways and fire escapes. An exit begins at any doorway or other point from which occupants may proceed to the exterior of the building or structure with reasonable safety under emergency conditions.

46.2(5) *Story.* If the finished floor level directly above a basement or cellar is more than six feet above grade, such basement or cellar shall be considered a story.

46.2(6) *Basement.* A basement is a story partly underground but having at least one-half of its height measuring from floor to ceiling above the grade level of the adjoining ground.

46.2(7) *New construction.* Those buildings designed and constructed after the effective date of these rules.

46.2(8) *Approved.* Approved is defined as being acceptable to the state fire marshal. Any equipment or device which bears the seal of the Underwriters' Laboratories, Inc., Factory Mutual Laboratory, American Standards Association, or the American Gas Association shall be accepted as approved. In the case of standards for safety, the criteria shall be the National Fire codes as published by the National Fire Protection Association.

46.2(9) *Fire alarm system.* A fire alarm system shall be an electrically energized system approved by the state fire marshal, using component parts approved by the Underwriters' Laboratories, Inc., and providing facilities of a type to warn the occupants of an existence of fire so that they may escape or to facilitate the orderly conduct of fire exit drills.

46.2(10) *Interior finish material.* Interior finish material shall be classified in accordance with the method of tests of surface burning characteristics of building material National Fire Protection Association Standard No. 255, Test Methods, Surface Burning—Building Materials, 1969. Classification of interior finish material shall be in accordance with tests made under conditions simulating actual installations, provided that the state fire marshal may by rule establish the classification of any material on which a rating by standard test is not available. Interior finish material shall be grouped in the following classes in accordance with their flame spread and related characteristics:

Class A. Interior finish flame spread 0-25.
Class B. Interior finish flame spread 25-75.
Class C. Interior finish flame spread 75-200.

46.2(11) *Portable classroom building.* A building designed and constructed so that it can be disassembled and transported to another location, or transported to another location without disassembling.

46.3(100) Exits.

46.3(1) The population of all school buildings, for the purpose of determining the re-

quired exits and the required space for classroom use shall be determined on the following basis:

a. The square feet of floor space for persons in school buildings shall be one person for each 40 square feet of gross area.

b. In the case of individual classrooms in schools, there shall be 20 square feet of classroom space for each student.

c. In gymnasiums and auditoriums, the capacity for seating shall be on the basis of six square feet net per person.

46.3(2) Exits shall be provided of kinds, numbers, location and capacity appropriate to the individual building.

46.3(3) Exits shall be so arranged and maintained as to provide free and unobstructed egress from all parts of every building or structure at all times when the building or structure is occupied. No locks or fasteners to prevent free escape from the inside of any building shall be installed.

46.3(4) Exits shall be clearly visible or routes to reach them shall be conspicuously indicated in such manner that every occupant of every educational building who is physically and mentally capable will readily know the direction of the escape from any point and each path of escape in its entirety shall be so arranged or marked that the way to a place of safety outside is unmistakable.

46.3(5) In all school buildings where artificial illumination is needed, electric exit signs or directional indicators shall be installed and adequate lighting provided for all corridors and passageways.

46.3(6) Where additional outside stairs or fire escapes are required by law, they shall be Class B, double width (44 inches), and shall extend to the ground. Platforms for outside stairs or fire escapes shall have a minimum dimension of 44 inches. Outside stairs and fire escapes shall be constructed in accordance with the state law and regulations. Fire escapes shall not be permitted on new construction.

46.3(7) There shall be a minimum of two means of exit remote from each other from each floor of every school building. The traveled distance from any point to an exit shall not exceed 150 feet measured along the line of travel. In sprinklered buildings, the distance may be increased to 200 feet.

46.3(8) Every room with a capacity of 50 persons or over and having more than 1000 square feet of floor area shall have at least two doorways as remote from each other as practicable. Such doorways shall provide access to separate exits but may open onto a common corridor leading to separate exits in opposite directions.

46.3(9) Each elementary classroom shall have a secondary avenue of escape. This may be a door leading directly outside the building, a window [see 46.6(100)], another door to an alternate corridor or a connecting door to a second room and thence to a secondary route of escape. In one-room classroom buildings the second exit shall be a door remote from the door used for normal entrance.

46.4(100) Corridors.

46.4(1) Corridors used as means of access to exits, and corridors used for discharge from exits, shall provide a clearance of at least six feet in width, except in the case of buildings constructed prior to the effective date of this rule. Room doors or locker doors swinging into corridors shall not, at any point in the swing, reduce the clear effective width of the corridor to less than six feet, nor shall drinking fountains or other equipment, fixed or movable, be so placed as to obstruct the required minimum six-foot width.

46.4(2) *Open clothing storage in existing buildings.*

a. In existing buildings, where clothes are hung exposed in exit corridors, they shall be separated by partitions of sheet metal or equivalent material. Partitions shall be placed at six-foot intervals, be a minimum of 18 inches in depth, extend at least one foot above the coat hooks and within eight inches of the floor.

b. Where open clothing is hung in exit corridors as described above, an automatic fire detection system shall be installed in the corridor. Sprinkler systems may be installed in lieu of the automatic detection system.

46.4(3) In new construction, open clothing storage shall not be permitted in exit corridors.

46.4(4) Except as permitted in 46.4(2), no combustible materials shall be stored in exit corridors.

46.4(5) The walls of corridors, used for exit facilities, shall be solid partitions of non-combustible finish material.

46.4(6) Where borrowed light panels of clear glass are used in exit corridors, the requirements of 46.18(100), of these rules, shall apply, except that clear glass windows in doors and transoms may be permitted in existing buildings when nonhazardous activities are carried on in the classroom.

46.4(7) Any single corridor or combination of corridors having an unbroken length of 300 feet or more shall be divided into sections by smoke barriers consisting of smoke stop doors. Doors may be of ordinary solid wood type not less than 1¾ inches thick with clear wired glass panels. Such doors shall be of self-closing type and may be either single or double. They shall close the opening completely with only such clearance as is reasonably necessary for proper operation. Underwriters' Laboratories, Inc., listed electro-magnetic holders may be used to hold these doors open pro-

vided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

46.4(8) There shall be no dead end in any corridor or hall more than 20 feet beyond the exit.

46.5(101) Doors.

46.5(1) The entrance and exit doors of all school buildings and the doors of all classrooms shall open outward.

46.5(2) Doors shall be provided for main exit facilities leading to a platform connecting with either outside stairs or fire escapes. Doors leading to outside stairways or fire escapes shall have a minimum width of 40 inches, except that on existing buildings where it is not practical to install a door of 40-inch width, a narrower door at least 30 inches in width may be installed.

46.5(3) The main exit and entrance doors and doors leading to fire escapes shall be equipped with panic type latches that cannot be locked against the exit.

46.5(4) Doors protecting stairways and doors leading to fire escapes or outside stairs may have wire-glass panes installed providing that the size of any single pane does not exceed 900 square inches.

46.5(5) Doors protecting vertical openings or fire doors installed where protection of hazardous rooms or areas are required shall be equipped with door closers and shall not be blocked open. Underwriters' Laboratories, Inc., listed electromagnetic holders may be used to hold these doors open provided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

46.5(6) *Classroom doors.*

a. Classroom doors, in new construction, shall be 36 inches wide. In existing buildings, doors of not less than 30 inches in width may be used. Doors must be a minimum of 1¾-inch solid core wood.

b. School buildings designed without doors to classrooms shall meet the requirements of 46.18(100).

46.5(7) Boiler, furnace or fuel-room doors, communicating to other building areas, shall be 1½-hour rated doors and frames, normally closed and hung to swing into the boiler room.

46.5(8) Doors to storage of combustibles off corridors shall be at least 1¾-inch solid core wood.

46.5(9) Doors from classrooms to corridors may have closeable louvers up to 24 inches above the floor. No other louvers or openable transoms shall be permitted in corridor partitions.

46.6(100) Windows.

46.6(1) Windows below or within ten feet of an outside stairway or fire escape shall have panes of wire-glass.

46.6(2) Where a window is to be used as a secondary avenue of escape for elementary classrooms [see 46.3(100)], it shall (without the use of tools) be easily opened from the inside to provide a clear opening of adequate size to use in an emergency. The bottom of this window shall not exceed 34 inches above the floor. In existing buildings, solid platforms or permanent steps may be permitted to meet the requirements of this subrule.

46.6(3) Double hung or hinged windows, having a clear opening equal to or greater than 30 inches by 30 inches, will meet the standards of 46.6(2), providing the other requirements of 46.6(2) are followed.

46.7(100) Stairway enclosures and floor cutoffs.

46.7(1) In buildings of more than one story, stairs shall be enclosed with protected noncombustible construction except those in accordance with 46.7(2). Doors shall be 1¾-inch solid wood construction, or better, with wire-glass allowable.

46.7(2) In existing buildings of two stories with no basement, where such buildings are fire-resistive construction throughout, or fire-resistive first story and noncombustible or heavy timber second story, the stairs need not be enclosed, provided, (*a*) all exit-way finish is Class A [flame spread rating not exceeding 25], (*b*) no open storage of wardrobe, books, or furniture in exit ways or spaces common to them and (*c*) the stairs from the second floor lead directly to an outside door or vestibule leading to the outside of the building.

46.7(3) In new construction, the enclosures or protection of vertical openings shall be of the same type of construction as the surrounding material used for walls and partitions.

46.7(4) In existing buildings, the stairway enclosures or the protection of vertical openings shall be the equivalent of wood studding with gypsum lath and plaster on both sides. The doors shall be at least 1¾-inch solid core wood doors. Maximum 900 square inch glass panels allowable.

46.7(5) Stairways from boiler, furnace or fuel rooms, communicating to other building areas, shall be enclosed at top and bottom. The entire stair enclosure shall be noncombustible construction. The doors (other than to the boiler room) may be 1¾-inch solid wood with a maximum of 900 square inches of wired glass allowable.

46.7(6) Except as provided elsewhere in this section, interior stairways used as exits shall be enclosed. The construction of the enclosure shall be in accordance with the provisions of 46.7(1).

46.7(7) Cutoffs between floors for stairways not used as exit facilities shall use the same type of construction as provided in 46.7(1).

46.8(100) Interior finishes.

46.8(1) The interior finishes of all exit corridors and passageways shall have Class A fin-

ish with a flame spread rating of not more than 25 as determined by the "fire tunnel tests" conducted by the Underwriters' Laboratories, Inc., and assigned to materials used for interior finish.

46.8(2) Whenever the fire marshal determines the fire hazard is great enough, Class A materials for room finishes shall be used in science laboratories, shop areas and such other areas as the fire marshal shall designate, in addition to those areas designated by 46.8(1).

46.8(3) In new construction, all interior finishes shall be Class C or better.

46.8(4) In existing buildings, ceiling finishes not meeting the requirements of 46.8(1) or 46.8(3) may be corrected by the use of a fire-retardant treatment provided however, if the material is combustible, it shall be adhered to a continuous backing. The treatment may be used in lieu of replacing the finished material providing the material used for treatment is listed by Underwriters' Laboratories, Inc., and is applied in strict accordance with the manufacturers' directions.

46.9(100) Construction.

46.9(1) Types of construction as defined in the National Fire Protection Association Pamphlet No. 220, Standard Types of Building Construction, 1961.

a. Fire-resistive.
b. Heavy timber.
c. Noncombustible.
d. Ordinary.
e. Wood frame.

46.9(2) Noncombustible, ordinary or wood frame construction may be modified by using materials giving one-hour or greater fire protection.

46.9(3) Types of construction permitted:

a. One-story buildings and one-story wings on multistory buildings may be any of the types designated in 46.9(1), or combinations thereof, but with ordinary or wood frame construction, protected materials shall be used.

b. One-room portable classroom buildings may be of lesser construction provided the interior finish of the classroom complies with 46.8(2) and 46.8(3) as use requires. Only noncombustible types of insulation may be used in such instances and each building shall be a minimum of 20 feet from another building.

c. Two-story buildings may be constructed of fire-resistive or protected noncombustible materials throughout, or the first story may be constructed of fire-resistive or protected noncombustible materials with the second story having either heavy timber or noncombustible materials.

d. Buildings of more than two stories shall be fire-resistive throughout.

46.9(4) Construction of the floor located above a basement shall be of fire-resistive or protected noncombustible materials.

46.9(5) Construction of the floor located above a crawl space or a pipe tunnel shall be of fire-resistive or noncombustible materials except in portable one-room classroom buildings an Underwriters' Laboratories, Inc., approved fire-retardant paint may be used.

46.9(6) Portable classroom buildings shall maintain a minimum of 20 feet distance from another building if complying with 46.9(3) "*b*". One-room portable classroom buildings located 20 feet or less between adjacent walls shall have not less than a one-hour, fire-rated separation. All portable classroom buildings with raised floors shall be skirted to the ground with material equal to the siding of the building.

46.9(7) Boiler rooms, furnace rooms or fuel rooms which have no stories located above may be constructed of fire-resistive, noncombustible, protected heavy timber or protected ordinary materials.

46.9(8) Boiler rooms, furnace rooms or fuel rooms with building above shall be of two-hour, fire-resistive construction.

46.10(100) Fire alarm systems.

46.10(1) All schools having two or more classrooms shall be equipped with a fire alarm system. Alarm stations shall be provided on each floor and so located that the alarm station is not more than 75 feet from any classroom door within the building. Horns or bells that provide a distinctive sound different from other bell systems shall be provided that will give audible warning to all occupants of the building in case of a fire or other emergency. A test device shall be provided for the purpose of conducting fire drills and tests of the alarm system. One-room classroom buildings placed in a complex of other classrooms shall be connected to the central alarm system.

46.10(2) Underwriters' Laboratories, Inc., equipment and component parts shall be used in the installation of the fire alarm system. The electrical energy for the fire alarm system shall be on a separate circuit and shall be taken off the utility service to the school building ahead of the entrance disconnect.

46.10(3) Whenever the fire marshal determines it advisable, he may require that the fire alarm system be extended or designed to provide automatic fire detection devices in unsupervised areas, boiler rooms, storerooms or shop areas.

46.11(100) Electrical wiring.

46.11(1) The electrical wiring of any educational building shall have enough circuits to provide adequate service without the need of overfusing the circuits.

46.11(2) The electrical wiring and component parts shall be properly maintained and serviced so as to eliminate the overheating or shorting that could cause a fire.

46.11(3) In new construction, electrical wiring shall be in metal raceways.

46.11(4) All exit lights shall be connected ahead of the service disconnect.

46.12(100) Heating equipment.

46.12(1) Heating equipment shall be installed, where applicable, in rooms constructed in accordance with 46.9(6) and 46.9(7).

46.12(2) Installation for any heating equipment shall be in accordance with the manufacturer's instruction and conditions of safe operation.

46.12(3) Acceptable evidence for complying with 46.12(2) shall be labeling or listed equipment by Underwriters' Laboratories, Inc., The American Gas Association Testing Laboratories, or approval of the state fire marshal.

46.12(4) Oil burning equipment shall be installed, maintained and operated in accordance with chapter 25 of the flammable liquid rules of the state of Iowa.

46.12(5) All gas burning equipment shall be installed and maintained in accordance with chapter 39 of the liquefied petroleum gas rules of the state of Iowa.

46.12(6) Floor-mounted flame heating equipment shall not be allowed to be installed in any classroom.

46.13(100) Gas piping.

46.13(1) Gas piping shall be in accordance with chapter 39 of the liquefied petroleum gas rules of the state of Iowa.

46.13(2) All gas service lines into buildings shall be brought out of the ground before entering the building and shall be equipped with a shutoff valve outside the building.

46.13(3) Gas piping cannot run in enclosed space without proper venting.

46.14(100) Fire extinguishers.

46.14(1) Each school building shall be equipped with fire extinguishers of a type, size and number approved by the state fire marshal.

46.14(2) National Fire Protection Association Standard No. 10, Installation of Portable Fire Extinguishers, 1969 is applicable. Vaporizing extinguishers containing halogenated hydrocarbon extinguishing agents shall not be approved.

46.15(100) Basement, underground and windowless educational buildings.

46.15(1) In existing school buildings, basement classrooms may be used provided there is compliance with either paragraphs "*a*" and "*d*", or compliance with paragraphs "*b*", "*c*", "*d*" and "*e*" below.

a. Direct approved egress door from classrooms to the outside.

b. Classroom doors open into a corridor that leads directly outside.

c. Inside stairs from basement corridors, serving basement classrooms, shall not communicate with other stories above.

d. Doors from basement classroom corridors, to other areas of the basement, shall be at least 1¾-inch solid core wood and equipped with door closers.

e. Buildings, unless of fire-resistive construction, using the basement area for classroom purposes, shall have sprinkler or automatic alarm systems in the entire basement area.

46.15(2) In new construction, basement rooms shall not be used for classroom purposes in elementary and junior high school buildings. This provision shall not apply to that portion of a building built on a sloping site which faces the lower grade level.

46.15(3) After October 17, 1969, in new construction only, underground or windowless educational buildings shall be provided with complete approved, automatic sprinkler systems.

46.15(4) After October 17, 1969, in new construction only, underground or windowless educational buildings shall have approved automatic smoke venting facilities in addition to automatic sprinkler protection.

46.15(5) After October 17, 1969, in new construction only, underground or windowless educational buildings for which no natural lighting is provided shall be provided with an approved type emergency exit lighting system.

46.15(6) After October 17, 1969, in new construction only, where required exit from underground structures involves upward travel, such as ascending stairs or ramp, such upward exits shall be cut off from main floor areas. If the area contains any combustible contents or combustible interior finish, it shall be provided with outside vented smoke traps or other means to prevent the exit serving as flues for smoke from any fire in the area served by the exits, thereby making the exit impassable.

46.15(7) After October 17, 1969, in new construction only, every windowless building shall be provided with outside access panels on each floor level, designed for fire department access from ladders for purposes of ventilation and rescue of trapped occupants.

46.16(100) Fire hazard safeguards in new and existing buildings.

46.16(1) Ventilating ducts discharging into attics of combustible construction shall be blocked off, protected with fire dampers or extended in a standard manner through the roof.

46.16(2) Cooking ranges and other cooking appliances in food service area kitchens shall be provided with ventilating hoods, grease filters,

and shall be vented to the outside in an approved manner.

46.16(3) Discarded furniture, furnishings or other combustible material shall not be stored or allowed to accumulate in attics or concealed spaces. Designated storage space shall be provided for equipment that may be used periodically throughout the school year and necessary to the school operation or curriculum schedule.

46.16(4) Space under stairways in existing buildings shall not be used for storage unless the storage area is lined with material that will provide a one-hour, fire-resistant rating and provided with a tight-fitting door that has a comparable fire-resistant rating. Except when removing or storing stock, the door shall be kept closed and locked.

46.16(5) Waste paper baling and storage shall be in a room without ignition hazards and separated from other parts of the building by fire-resistant construction. Storage of paint products and flammable liquids shall be in a fire-resistive room or approved metal cabinet.

46.16(6) *Decorative materials.*

a. No furnishings, decorations, wall coverings, paints etc., shall be used which are of a highly flammable character or which in the amounts used will endanger egress due to rapid spread of fire or formation of heavy smoke or toxic gases.

b. Highly flammable finishes such as lacquer and shellac are not permitted.

c. Draperies, curtains, loosely attached wall coverings, cloth hangings and similar materials shall be noncombustible or flame-proof in corridor exit ways and assembly occupancies. In other areas up to ten percent of the wall area may have combustible coverings and hangings.

46.16(7) Spray finishing operations shall not be conducted in a school building except in a room designed for the purpose, protected with an approved automatic extinguishing system, and separated vertically and horizontally from such occupancies by construction having not less than two-hour fire resistance. National Fire Protection Association Standard No. 33, Spray Finishing, 1969, shall be applicable for construction and operation of all paint spray booths.

46.17(100) Automatic sprinklers.

46.17(1) Where automatic sprinkler protection is provided, other requirements of these regulations may be modified to such extent as permitted by other provisions in this section.

46.17(2) Automatic sprinkler systems shall be of standard, approved types so installed and maintained as to provide complete coverage for all portions of the premises protected, except insofar as partial protection is specified in other paragraphs of this section.

46.17(3) Automatic sprinkler systems for schools shall be those designed to protect occupancy classifications that are considered light hazard occupancies.

46.17(4) Automatic sprinkler systems shall be provided with water flow alarm devices to give warning of operation of the sprinkler due to fire, and such alarm devices shall be installed so as to give warning throughout the entire school building. The sprinkler alarm detection may be connected to the fire alarm system required by state law.

46.17(5) Partial automatic sprinkler systems shall provide complete protection in the basement and other hazardous areas. Above the basement area, stairwells and corridors shall be sprinklered. Nonhazardous classrooms are not required to be sprinklered for partial systems.

46.17(6) *Water supplies.*

a. All automatic sprinklers installed in school buildings shall be provided with adequate and reliable water supplies.

b. Public water supplies for sprinkler systems in schools shall have a minimum of four-inch service pipe providing a minimum of 500 gallons of water per minute and shall have at least 15 pounds pressure at the highest sprinkler head.

c. Where public water supply is not available and a pressure supply tank is used, the tank shall be a minimum of 6000 gallons capacity. The pressure tank shall operate at an air pressure adequate to discharge all of the water in the tank.

46.17(7) All automatic sprinkler systems required by these regulations shall be maintained in a reliable operating condition at all times and such periodic inspections and tests as are necessary shall be made to assure proper maintenance.

46.17(8) In existing buildings of ordinary or better construction, stairway enclosures will not be required if protected by a partial or standard sprinkler system. Basement cutoffs of vertical openings will be required. This modification of open stairways is permitted only in buildings that do not exceed a basement and two full stories.

46.18(100) Open plan buildings.

46.18(1) An "open plan building" is defined as any building where there are no permanent solid partitions between rooms or between rooms and corridors that are used for exit facilities.

46.18(2) Open plan buildings shall have enclosed stairways and any other vertical openings between floors protected in accordance with 46.17(1).

46.18(3) Open plan buildings shall not exceed 30,000 square feet in undivided area. Solid walls or smoke stop partitions shall be provided at intervals not to exceed 300 feet. Such walls or partitions shall have doors of a type that are at least

1¾-inch solid core wood doors and the partitions shall be the equivalent of one-hour construction.

46.18(4) Any cafeterias, gymnasiums or auditoriums shall be separated from the rest of the building by solid walls and no exits from other parts of the building shall require passing through such assembly areas.

46.18(5) Open plan buildings that do not have a direct exit door from each classroom to the outside shall be protected by a complete automatic fire detection system.

46.18(6) A sprinkler system may be installed in lieu of an automatic fire detection system in an open plan building.

46.18(7) Distance of travel to the nearest exit in an open plan building shall not exceed 100 feet from any point except that in a sprinklered building the distance may be increased to 150 feet.

[Filed June 22, 1962; amended April 6, 1965 and October 17, 1969]

CHAPTER 47
NEW COLLEGE BUILDINGS

47.1(100) Exits.

47.1(1) Exits shall be provided of kinds, numbers, location and capacity appropriate to the individual building or structure, with due regard to the character of the occupancy, the number of persons exposed, the fire protection available, and the height and type of construction of the building or structure, to afford all occupants convenient facilities for escape.

47.1(2) The population of all college buildings, for the purpose of determining the required exits and the required space for classroom use, shall be determined on the following basis.

a. The square feet of floor space for persons in college buildings shall be one person for each 40 square feet of gross area.

b. In gymnasiums and auditoriums, the capacity for seating shall be on the basis of six square feet net per person.

47.1(3) Exits shall be so arranged and maintained as to provide free and unobstructed egress from all parts of every building or structure at all times when the building or structure is occupied. No locks or fasteners to prevent free escape from the inside of any building shall be installed.

47.1(4) Exits shall be clearly visible or routes to reach them shall be conspicuously indicated in such manner that every occupant of every educational building who is physically and mentally capable will readily know the direction of the escape from any point and each path of escape in its entirety shall be so arranged or marked that the way to a place of safety outside is unmistakable.

47.1(5) In all college buildings where artificial illumination is needed, electric exit signs or directional indicators shall be installed and adequate lighting provided for all corridors and passageways.

47.1(6) Fire escapes shall not be permitted on new construction.

47.1(7) There shall be a minimum of two means of exit remote from each other from each floor of every college building. The traveled distance from any point to an exit shall not exceed 150 feet measured along the line of travel. In sprinklered buildings, the distance may be increased to 200 feet.

47.1(8) Every room with a capacity of 50 persons or over and having more than 1000 square feet of floor area shall have at least two doorways as remote from each other as practicable. Such doorways shall provide access to separate exits but may open onto a common corridor leading to separate exits in opposite directions.

47.2(100) Corridors.

47.2(1) Corridors used as means of access to exits, and corridors used for discharge from exits, shall provide a clearance of at least six feet in width. Room doors or locker doors swinging into corridors shall not, at any point in the swing, reduce the clear effective width of the corridor to less than six feet, nor shall drinking fountains or other equipment, fixed or movable, be so placed as to obstruct the required minimum six-foot width.

47.2(2) In new construction, open clothing storage shall not be permitted in exit corridors.

47.2(3) No combustible materials shall be stored in exit corridors.

47.2(4) The walls of corridors, used for exit facilities, shall be solid partitions of noncombustible finish material.

47.2(5) Where borrowed light panels of clear glass are used in exit corridors, the requirements of 47.15(100) shall apply.

47.2(6) Any single corridor or combination of corridors having an unbroken length of 300 feet or more shall be divided into sections by smoke barriers consisting of smoke stop doors. Doors may be of ordinary solid wood type not less than 1¾ inches thick with clear wired glass panels. Such doors shall be of self-closing type and may be either single or double. They shall close the opening completely with only such clearance as is reasonably necessary for proper operation. Underwriters' Laboratories, Inc., listed electromagnetic holders may be used to hold these doors open provided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

47.2(7) There shall be no dead end in any corridor or hall more than 20 feet beyond the exit.

47.3(100) Doors.

47.3(1) The entrance and exit doors of all college buildings and the doors of all classrooms shall open outward.

47.3(2) Doors protecting stairways may have wire glass panes installed providing that the size of any single pane does not exceed 900 square inches.

47.3(3) Doors protecting vertical openings or fire doors installed where protection of hazardous rooms or areas are required shall be equipped with door closers and shall not be blocked open. Underwriters' Laboratories, Inc., listed electromagnetic holders may be used to hold these doors open provided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

47.3(4) *Classroom doors.*

a. Classroom doors shall be 36 inches wide. Doors must be a minimum of 1¾-inch solid core wood.

b. College buildings designed without doors to classrooms shall meet the requirements of 47.15(100) of these rules.

47.3(5) Boiler, furnace or fuel room doors, communicating to other building areas, shall be one and one-half hour rated doors and frames, normally closed and hung to swing into the boiler room.

47.3(6) Doors to storage of combustibles off corridors shall be at least 1¾-inch solid core wood.

47.3(7) Doors from classrooms to corridors may have closeable louvers up to 24 inches above the floor. No other louvers or openable transoms shall be permitted in corridor partitions.

47.4(100) Stairway enclosures and floor cutoffs.

47.4(1) In new college buildings, stairs shall be enclosed with protected noncombustible construction. Doors shall be 1¾-inch solid wood construction, or better, with wire glass allowable.

47.4(2) In new construction, the enclosures or protection of vertical openings shall be of the same type of construction as the surrounding material used for walls and partitions.

47.4(3) Stairways from boiler, furnace or fuel rooms, communicating to other building areas, shall be enclosed at top and bottom. The entire stair enclosure shall be noncombustible construction. The doors (other than to the boiler room) may be 1¾-inch solid wood with a maximum of 900 square inches of wired glass allowable.

47.5(100) Interior finishes.

47.5(1) The interior finishes of all exit corridors and passageways shall have Class A finish with a flame spread rating of not more than 25 as determined by the "fire tunnel tests" conducted by the Underwriters' Laboratories, Inc., and assigned to materials used for interior finish.

47.5(2) Whenever the fire marshal determines the fire hazard is great enough, Class A materials for room finishes shall be used in science laboratories, shop areas and such other areas as the fire marshal shall designate, in addition to those areas designated by 47.5(1).

47.5(3) In new construction, all interior finishes shall be Class C or better.

47.6(100) Construction.

47.6(1) Types of construction as defined in the National Fire Protection Association Pamphlet No. 220, Standard Types of Building Construction, 1961:

a. Fire-resistive.
b. Heavy timber.
c. Noncombustible.
d. Ordinary.
e. Wood frame.

47.6(2) Noncombustible, ordinary or wood frame construction may be modified by using materials giving one-hour or greater fire protection.

47.6(3) Types of construction permitted:

a. One-story buildings and one-story wings on multistory buildings may be any of the types designated in 47.6(1), or combinations thereof, but with ordinary or wood frame construction, protected materials shall be used.

b. One-room portable classroom buildings may be of lesser construction provided the interior finish of the classroom complies with subrules 46.8(2) and 46.8(3) as use requires. Only noncombustible types of insulation may be used in such instances and each building shall be a minimum of 20 feet from another building.

c. Two-story buildings may be constructed of fire-resistive or protected noncombustible materials throughout, or the first story may be constructed of fire-resistive or protected noncombustible materials with the second story having either heavy timber or noncombustible materials.

d. Buildings of more than two stories shall be fire-resistive throughout.

47.6(4) Construction of the floor located above a basement shall be of fire-resistive or protected noncombustible materials.

47.6(5) Construction of the floor located above a crawl space or a pipe tunnel shall be of fire-resistive or noncombustible materials except in portable one-room classroom buildings an Underwriters' Laboratories, Inc., approved fire-retardant paint may be used.

47.6(6) Portable classroom buildings shall maintain a minimum of 20 feet distance from another building if complying with 46.9(3)"*b*". One-room portable classroom buildings located 20

feet or less between adjacent walls shall have not less than a one-hour, fire-rated separation. All portable classroom buildings with raised floors shall be skirted to the ground with material equal to the siding of the building.

47.6(7) Boiler rooms, furnace rooms or fuel rooms which have no stories located above may be constructed of fire-resistive, noncombustible, protected heavy timber or protected ordinary materials.

47.6(8) Boiler rooms, furnace rooms or fuel rooms with building above shall be of two-hour, fire-resistive construction.

47.7(100) Fire alarm systems.

47.7(1) All schools having two or more classrooms shall be equipped with a fire alarm system. Alarm stations shall be provided on each floor and so located that the alarm station is not more than 75 feet from any classroom door within the building. Horns or bells that provide a distinctive sound different from other bell systems shall be provided that will give audible warning to all occupants of the building in case of a fire or other emergency. A test device shall be provided for the purpose of conducting fire drills and tests of the alarm system. One-room classroom buildings placed in a complex of other classrooms shall be connected to the central alarm system.

47.7(2) Underwriters' laboratory equipment and component parts shall be used in the installation of the fire alarm system. The electrical energy for the fire alarm system shall be on a separate circuit and shall be taken off the utility service to the school building ahead of the entrance disconnect.

47.7(3) Whenever the fire marshal determines it advisable, he may require that the fire alarm system be extended or designed to provide automatic fire detection devices in unsupervised areas, boiler rooms, storerooms or shop areas.

47.8(100) Electrical wiring.

47.8(1) The electrical wiring of any educational building shall have enough circuits to provide adequate service without the need of overfusing the circuits.

47.8(2) The electrical wiring and component parts shall be properly maintained and serviced so as to eliminate the overheating or shorting that could cause a fire.

47.8(3) In new construction, electrical wiring shall be in metal raceways.

47.8(4) All exit lights shall be connected ahead of the service disconnect.

47.9(100) Heating equipment.

47.9(1) Heating equipment shall be installed, where applicable, in rooms constructed in accordance with 47.6(6) and 47.6(7).

47.9(2) Installation for any heating equipment shall be in accordance with the manufacturer's instruction and conditions of safe operation.

47.9(3) Acceptable evidence for complying with 47.9(2) shall be labeling or listed equipment by Underwriters' Laboratories, Inc., The American Gas Association Testing Laboratories, or approval of the state fire marshal.

47.9(4) Oil burning equipment shall be installed, maintained and operated in accordance with chapter 41.

47.9(5) All gas burning equipment shall be installed and maintained in accordance with chapter 39.

47.9(6) Floor-mounted flame heating equipment shall not be allowed to be installed in any classroom.

47.10(100) Gas piping.

47.10(1) Gas piping shall be in accordance with chapter 39.

47.10(2) All gas service lines into buildings shall be brought out of the ground before entering the building and shall be equipped with a shutoff valve outside the building.

47.10(3) Gas piping cannot run in enclosed space without proper venting.

47.11(100) Fire extinguishers.

47.11(1) Each college building shall be equipped with fire extinguishers of a type, size and number approved by the state fire marshal.

47.11(2) National Fire Protection Association Standard No. 10, Installation of Portable Fire Extinguishers, 1969 applicable. Vaporizing extinguishers containing halogenated hydrocarbon extinguishing agents shall not be approved.

47.12(100) Basement, underground and windowless educational buildings.

47.12(1) Basement classrooms may be used provided there is compliance with paragraph "*a*" or "*b*" and compliance with paragraphs "*c*" and "*d*" below.

a. Direct approved egress door from classrooms to the outside.

b. Classroom doors open into a corridor that leads directly outside.

c. Inside stairs from basement corridors, serving basement classrooms, shall not communicate with other stories above unless of fire-resistive construction.

d. Doors from basement classroom corridors, to other areas of the basement, shall be Class B and equipped with door closers except that solid frames and solid core wood doors, not less than 1 ¾ inches thick, shall be permitted.

47.12(2) Underground or windowless educational buildings shall be provided with complete approved, automatic sprinkler systems.

47.12(3) Underground or windowless educational buildings shall have approved automatic smoke venting facilities in addition to automatic sprinkler protection.

47.12(4) Underground or windowless educational buildings for which no natural lighting is provided shall be provided with an approved type emergency exit lighting system.

47.12(5) Where required exit from underground structures involves upward travel, such as ascending stairs or ramp, such upward exits shall be cut off from main floor areas. If the area contains any combustible contents or combustible interior finish, it shall be provided with outside vented smoke traps or other means to prevent the exit serving as flues for smoke from any fire in the area served by the exits, thereby making the exit impassable.

47.12(6) Every windowless building shall be provided with outside access panels on each floor level, designed for fire department access from ladders for purposes of ventilation and rescue of trapped occupants.

47.13(100) Fire hazard safeguards in new buildings.

47.13(1) Ventilating ducts discharging into attics of combustible construction shall be blocked off, protected with fire dampers or extended in a standard manner through the roof.

47.13(2) Cooking ranges and other cooking appliances in food service area kitchens shall be provided with ventilating hoods, grease filters and shall be vented to the outside in an approved manner.

47.13(3) Discarded furniture, furnishings or other combustible material shall not be stored or allowed to accumulate in attics or concealed spaces. Designated storage space shall be provided for equipment that may be used periodically throughout the school year and necessary to the college operation or curriculum schedule.

47.13(4) Storage facilities for materials and supplies shall be in storage rooms designed for this purpose.

47.13(5) Waste paper baling and storage shall be in a room without ignition hazards and separated from other parts of the building by fire-resistant construction.

47.13(6) Storage of paint products and flammable liquids shall be in a fire-resistive room or approved metal cabinet.

47.13(7) *Decorative materials.*

a. No furnishings, decorations, wall coverings, paints etc., shall be used which are of a highly flammable character or which in the amounts used will endanger egress due to rapid spread of fire or formation of heavy smoke or toxic gases.

b. Highly flammable finishes such as lacquer and shellac are not permitted.

c. Draperies, curtains, loosely attached wall coverings, cloth hangings and similar materials shall be noncombustible or flameproof in corridor exit ways and assembly occupancies. In other areas up to ten percent of the wall area may have combustible coverings and hangings.

47.13(8) Spray finishing operations shall not be conducted in a school building except in a room designed for the purpose, protected with an approved automatic extinguishing system, and separated vertically and horizontally from such occupancies by construction having not less than two-hour fire resistance. National Fire Protection Association Standard No. 33, Spray Finishing, 1969, shall be applicable for construction and operation of all paint spray booths.

47.14(100) Automatic sprinklers.

47.14(1) Automatic sprinkler systems shall be of standard, approved types so installed and maintained as to provide complete coverage for all portions of the premises protected, except insofar as partial protection is specified in other paragraphs of this section.

47.14(2) Automatic sprinkler systems for college buildings shall be those designed to protect occupancy classifications that are considered light hazard occupancies.

47.14(3) Automatic sprinkler systems shall be provided with water flow alarm devices to give warning of operation of the sprinkler due to fire, and such alarm devices shall be installed so as to give warning throughout the entire building. The sprinkler alarm detection may be connected to the fire alarm system required by state law.

47.14(4) *Water supplies.*

a. All automatic sprinklers installed in college buildings shall be provided with adequate and reliable water supplies.

b. Public water supplies for sprinkler systems in college buildings shall have a minimum of four-inch service pipe providing a minimum of 500 gallons of water per minute and shall have at least 15 pounds pressure at the highest sprinkler head.

c. Where public water supply is not available and a pressure supply tank is used, the tank shall be a minimum of 6000 gallons capacity. The pressure tank shall operate at an air pressure adequate to discharge all of the water in the tank.

47.14(5) All automatic sprinkler systems required by these regulations shall be maintained in a reliable operating condition at all times and such periodic inspections and tests as are necessary shall be made to assure proper maintenance.

47.15(100) Open plan buildings.

47.15(1) An "open plan building" is defined as any building where there are no permanent solid partitions between rooms or between rooms and corridors that are used for exit facilities.

47.15(2) Open plan building shall have enclosed stairways and any other vertical openings between floors protected in accordance with 47.4(1).

47.15(3) Open plan buildings shall not exceed 30,000 square feet in undivided area. Solid walls or smoke stop partitions shall be provided at intervals not to exceed 300 feet. Such walls or partitions shall have doors of a type that are at least 1¾-inch solid core wood doors and the partitions shall be the equivalent of one-hour construction.

47.15(4) Any cafeterias, gymnasiums or auditoriums shall be separated from the rest of the building by solid walls and no exits from other parts of the building shall require passing through such assembly areas.

47.15(5) Open plan buildings that do not have a direct exit door from each classroom to the outside shall be protected by a complete automatic fire detection system.

47.15(6) A sprinkler system may be installed in lieu of an automatic fire detection system in an open plan building.

47.15(7) Distance of travel to the nearest exit in an open plan building shall not exceed 100 feet from any point except that in a sprinklered building, the distance may be increased to 150 feet.

[Filed April 6, 1965; amended October 17, 1969]

CHAPTER 48
EXISTING COLLEGE BUILDINGS

48.1(100) Exits.

48.1(1) Exits shall be provided of kinds, numbers, location and capacity appropriate to the individual building or structure, with due regard to the character of the occupancy, the number of persons exposed, the fire protection available, and the height and type of construction of the building or structure, to afford all occupants convenient facilities for escape.

48.1(2) The population of all college buildings, for the purpose of determining the required exits and the required space for classroom use, shall be determined on the following basis.

a. The square feet of floor space for persons in college buildings shall be one person for each 40 square feet of gross area.

b. In gymnasiums and auditoriums, the capacity for seating shall be on the basis of six square feet net per person.

48.1(3) Exits shall be so arranged and maintained as to provide free and unobstructed egress from all parts of every building or structure at all times when the building or structure is occupied. No locks or fasteners to prevent free escape from the inside of any building shall be installed.

48.1(4) Exits shall be clearly visible or routes to reach them shall be conspicuously indicated in such manner that every occupant of every educational building who is physically and mentally capable will readily know the direction of the escape from any point and each path of escape in its entirety shall be so arranged or marked that the way to a place of safety outside is unmistakable.

48.1(5) In all college buildings where artificial illumination is needed, electric exit signs or directional indicators shall be installed and adequate lighting provided for all corridors and passageways.

48.1(6) Where additional outside stairs or fire escapes are required by law, they shall be Class B, double width 44 inches, and shall extend to the ground. Platforms for outside stairs or fire escapes shall have a minimum dimension of 44 inches. Outside stairs and fire escapes shall be constructed in accordance with the state law and regulations.

48.1(7) There shall be a minimum of two means of exit remote from each other from each floor of every college building. The traveled distance from any point to an exit shall not exceed 150 feet measured along the line of travel. In sprinklered buildings, the distance may be increased to 200 feet.

48.1(8) Every room with a capacity of 50 persons or over and having more than 1000 square feet of floor area shall have at least two doorways as remote from each other as practicable. Such doorways shall provide access to separate exits but may open onto a common corridor leading to separate exits in opposite directions.

48.1(9) In existing buildings where exits do not comply with the requirements of 48.1(100) and in which hazardous conditions exist because of the number, width, construction or location of exits, the fire marshal may order additional exits to assure adequate safety of the occupants but under no condition may outside fire escapes exceed 50 percent of the required stairs.

48.2(100) Corridors.

48.2(1) Corridors used as means of access to exits, and corridors used for discharge from exits, shall provide a clearance of at least six feet in width, except in the case of buildings constructed prior to May 6, 1965. Room doors or locker doors swinging into corridors shall not, at any point in the swing, reduce the clear effective width of the corridor to less than six feet, nor shall drinking fountains or other equipment, fixed or movable, be so placed as to obstruct the required minimum six-foot width.

48.2(2) *Open clothing storage in existing buildings.*

a. In existing buildings, where clothes are hung exposed in exit corridors, they shall be sepa-

rated by partitions of sheet metal or equivalent material. Partitions shall be placed at six-foot intervals, be a minimum of 18 inches in depth, extend at least one foot above the coat hooks and within eight inches of the floor.

b. Where open clothing is hung in exit corridors as described above, an automatic fire detection system shall be installed in the corridor. Sprinkler systems may be installed in lieu of the automatic detection system.

48.2(3) Except as permitted in 48.2(2), no combustible materials shall be stored in exit corridors.

48.2(4) The walls of corridors, used for exit facilities, shall be solid partitions of noncombustible finish material.

48.2(5) Where borrowed light panels of clear glass are used in exit corridors, the requirements of 48.16(100), shall apply, except that clear glass windows in doors and transoms may be permitted in existing buildings when nonhazardous activities are carried on in the classroom.

48.2(6) Any single corridor or combination of corridors having an unbroken length of 300 feet or more shall be divided into sections by smoke barriers consisting of smoke stop doors. Doors may be of ordinary solid wood type not less than 1¾ inches thick with clear wired glass panels. Such doors shall be of self-closing type and may be either single or double. They shall close the opening completely with only such clearance as is reasonably necessary for proper operation. Underwriters' Laboratories, Inc., listed electromagnetic holders may be used to hold these doors open provided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

48.2(7) There shall be no dead end in any corridor or hall more than twenty feet beyond the exit.

48.3(100) Doors.

48.3(1) The entrance and exit doors of all college buildings and the doors of all classrooms shall open outward.

48.3(2) Doors shall be provided for main exit facilities leading to a platform connecting with either outside stairs or fire escapes. Doors leading to outside stairways or fire escapes shall have a minimum width of 40 inches, except that on existing buildings where it is not practical to install a door of 40-inch width, a narrower door at least 30 inches in width may be installed.

48.3(3) The main exit and entrance doors and doors leading to fire escapes shall be equipped with a latching device that cannot be locked against the exit.

48.3(4) Doors protecting stairways and doors leading to fire escapes or outside stairs may have wire-glass panes installed providing that the size of any single pane does not exceed 900 square inches.

48.3(5) Doors protecting vertical openings or fire doors installed where protection of hazardous rooms or areas is required shall be equipped with door closers and shall not be blocked open. Underwriters' Laboratories, Inc., listed electromagnetic holders may be used to hold these doors open provided they are hooked into the fire alarm system and a smoke detector is located at a strategic point near the doors.

48.3(6) *Classroom doors.*

a. In existing buildings, doors of not less than 30 inches in width may be used. Doors must be a minimum of 1¾-inch solid core wood.

b. Buildings designed without doors to classrooms shall meet the requirements of 48.16(100).

48.3(7) Boiler, furnace or fuel room doors, communicating to other building areas, shall be 1½-hour rated doors and frames, normally closed and hung to swing into the boiler room.

48.3(8) Doors to storage of combustibles off corridors shall be at least 1¾-inch solid core wood.

48.3(9) Doors from classrooms to corridors may have closeable louvers up to twenty-four inches above the floor. No other louvers or openable transoms shall be permitted in corridor partitions.

48.4(100) Windows. Windows below or within ten feet of an outside stairway or fire escape shall have panes of wire glass.

48.5(100) Stairway enclosures and floor cutoffs.

48.5(1) In buildings of more than one story, stairs shall be enclosed with protected noncombustible construction except those in accordance with 48.5(2). Doors shall be 1¾-inch solid wood construction, or better, with wire glass allowable.

48.5(2) In existing buildings of two stories with no basement where such buildings are fire-resistive construction throughout, or fire-resistive first story and noncombustible or heavy timber second story, the stairs need not be enclosed, provided, (*a*) all exit-way finish is Class A [flame spread rating not exceeding twenty-five], (*b*) no open storage of wardrobe, books or furniture in exit ways or spaces common to them and (*c*) providing these stairs from the second floor lead directly to an outside door or vestibule leading to the outside of the building.

48.5(3) In existing buildings, the stairway enclosures or the protection of vertical openings shall be the equivalent of wood studding with gypsum lath and plaster on both sides. The doors shall be at least 1¾-inch solid core wood doors. Maximum 900 square-inch glass panels allowable.

48.5(4) Stairways from boiler, furnace or fuel rooms, communicating to other building areas, shall be enclosed at top and bottom. The entire stair enclosure shall be noncombustible construction. The doors (other than to the boiler room) may be 1¾-inch solid wood with a maximum of 900 square inches of wired glass allowable.

48.5(5) Except as provided elsewhere in this rule, interior stairways used as exits shall be enclosed. The construction of the enclosure shall be in accordance with the provisions of 48.5(1).

48.5(6) Cutoffs between floors for stairways not used as exit facilities shall use the same type of construction as provided in 48.5(1).

48.5(7) Where existing buildings because of layout or construction make it impossible to comply with 48.5(100), the fire marshal shall make an analysis of the building and may then order remedial construction or installation of fire detection or equipment which will correct hazardous conditions.

48.6(100) Interior finishes.

48.6(1) The interior finishes of all exit corridors and passageways shall have Class A finish with a flame spread rating of not more than twenty-five as determined by the "fire tunnel tests" conducted by the Underwriters' Laboratories, Inc., and assigned to materials used for interior finish.

48.6(2) Whenever the fire marshal determines the fire hazard is great enough, Class A materials for room finishes shall be used in science laboratories, shop areas, and such other areas as the fire marshal shall designate, in addition to those areas designated by 48.6(1).

48.7(100) Construction. All additions to existing buildings shall comply with 47.6(100).

48.8(100) Fire alarm systems.

48.8(1) All schools having two or more classrooms shall be equipped with a fire alarm system. Alarm stations shall be provided on each floor and so located that the alarm station is not more than 75 feet from any classroom door within the building. Horns or bells that provide a distinctive sound different from other bell systems shall be provided that will give audible warning to all occupants of the building in case of a fire or other emergency. A test device shall be provided for the purpose of conducting fire drills and tests of the alarm system. One-room classroom buildings placed in a complex of other classrooms shall be connected to the central alarm system.

48.8(2) Underwriters' Laboratories, Inc., equipment and component parts shall be used in the installation of the fire alarm system. The electrical energy for the fire alarm system shall be on a separate circuit and shall be taken off the utility service to the school building ahead of the entrance disconnect.

48.8(3) Whenever the fire marshal determines it advisable, he may require that the fire alarm system be extended or designed to provide automatic fire detection devices in unsupervised areas, boiler rooms, storerooms or shop areas.

48.9(100) Electrical wiring. Electrical service in existing buildings and all remodeling or additions to the electric service shall comply with 47.8(100).

48.10(100) Heating equipment.

48.10(1) Heating equipment shall be installed, where applicable, in rooms constructed in accordance with 47.6(6) and 47.6(7).

48.10(2) Installation for any heating equipment shall be in accordance with the manufacturer's instruction and conditions of safe operation.

48.10(3) Acceptable evidence for complying with 47.10(2) shall be labeling or listed equipment by Underwriters' Laboratories, Inc., The American Gas Association Testing Laboratories, or approval of the state fire marshal.

48.10(4) Oil burning equipment shall be installed, maintained and operated in accordance with chapter 41.

48.10(5) All gas burning equipment shall be installed and maintained in accordance with chapter 39.

48.10(6) Floor-mounted flame heating equipment shall not be allowed to be installed in any classroom.

48.11(100) Gas piping.

48.11(1) Gas piping shall be in accordance with chapter 39.

48.11(2) All gas service lines into buildings shall be brought out of the ground before entering the building and shall be equipped with a shutoff valve outside the building.

48.11(3) Gas piping cannot run in enclosed space without proper venting.

48.12(100) Fire extinguishers.

48.12(1) Each college building shall be equipped with fire extinguishers of a type, size and number approved by the state fire marshal.

48.12(2) National Fire Protection Association Standard No. 10, Installation of Portable Fire Extinguishers, 1969 applicable. Vaporizing extinguishers containing halogenated hydrocarbon extinguishing agents shall not be approved.

48.13(100) Basements. In existing college buildings, basement classrooms may be used provided there is compliance with paragraph "1" or "2" and compliance with paragraphs "3", "4" and "5":

1. Direct approved egress door from classrooms to the outside.

2. Classroom doors open into a corridor that leads directly outside.

3. Inside stairs from basement corridors, serving basement classrooms, shall not communicate with other stories above unless of fire-resistive construction.

4. Doors from basement classroom corridors, to other areas of the basement, shall be Class B and equipped with door closers except that solid frames and solid core wood doors, not less than 1¾ inches thick, shall be permitted.

5. Buildings, unless of fire-resistive construction, using the basement area for classroom purposes, shall have sprinkler or automatic alarm systems in the entire basement area.

48.14(100) Fire hazard safeguards in existing buildings.

48.14(1) Ventilating ducts discharging into attics of combustible construction shall be blocked off, protected with fire dampers or extended in a standard manner through the roof.

48.14(2) Cooking ranges and other cooking appliances in food service area kitchens shall be provided with ventilating hoods, grease filters, and shall be vented to the outside in an approved manner.

48.14(3) Discarded furniture, furnishings or other combustible material shall not be stored or allowed to accumulate in attics or concealed spaces. Designated storage space shall be provided for equipment that may be used periodically throughout the school year and necessary to the college operation or curriculum schedule.

48.14(4) Space used for storage under stairways in existing buildings shall not be allowed unless the storage area is lined with material that will provide a one-hour, fire-resistant rating and provided with a tight-fitting door that has a comparable fire-resistant rating. Except when removing or storing stock, the door shall be kept closed and locked.

48.14(5) Waste paper baling and storage shall be in a room without ignition hazards and separated from other parts of the building by fire-resistant construction.

48.14(6) Storage of paint products and flammable liquids shall be in a fire-resistive room or approved metal cabinet.

48.14(7) *Decorative materials.*

a. No furnishings, decorations, wall coverings, paints, etc., shall be used which are of a highly flammable character or which in amounts used will endanger egress due to rapid spread of fire or formation of heavy smoke or toxic gases.

b. Highly flammable finishes such as lacquer and shellac are not permitted.

c. Draperies, curtains, loosely attached wall coverings, cloth hangings and similar materials shall be noncombustible or flame-proof in corridor exit ways and assembly occupancies. In other areas up to ten percent of the wall area may have combustible coverings and hangings.

48.14(8) Spray finishing operations shall not be conducted in a school building except in a room designed for the purpose, protected with an approved automatic extinguishing system, and separated vertically and horizontally from such occupancies by construction having not less than two-hour fire resistance. National Fire Protection Association Standard No. 33, Spray Finishing, 1969, shall be applicable for construction and operation of all paint spray booths.

48.15(100) Automatic sprinklers.

48.15(1) Subrules 48.15(2)–48.15(9) shall apply, if upon inspection by the fire marshal a building or area is deemed hazardous for life safety and a sprinkler system installation is ordered.

48.15(2) Where automatic sprinkler protection is provided, other requirements of these rules may be modified to such extent as permitted by other provisions in 48.15(100).

48.15(3) Automatic sprinkler systems shall be of standard, approved types so installed and maintained as to provide complete coverage for all portions of the premises protected, except insofar as partial protection is specified in other subrules of 48.15(100).

48.15(4) Automatic sprinkler systems for college buildings shall be those designed to protect occupancy classifications that are considered light hazard occupancies.

48.15(5) Automatic sprinkler systems shall be provided with water flow alarm devices to give warning of operation of the sprinkler due to fire, and such alarm devices shall be installed so as to give warning throughout the entire building. The sprinkler alarm detection may be connected to the fire alarm system required by state law.

48.15(6) Partial automatic sprinkler systems shall provide complete protection in basement and other hazardous areas. Above the basement area, stairwells and corridors shall be sprinklered. Nonhazardous classrooms are not required to be sprinklered for partial systems.

48.15(7) *Water supplies.*

a. All automatic sprinklers installed in college buildings shall be provided with adequate and reliable water supplies.

b. Public water supplies for sprinkler systems in college buildings shall have a minimum of four-inch service pipe providing a minimum of 500 gallons of water per minute and shall have at least 15 pounds pressure at the highest sprinkler head.

c. Where public water supply is not available and a pressure supply tank is used, the tank shall be a minimum of 6000 gallons capacity. The pressure tank shall operate at an air pressure adequate to discharge all of the water in the tank.

48.15(8) All automatic sprinkler systems required by these regulations shall be maintained in a reliable operating condition at all times and such periodic inspections and tests as are necessary shall be made to assure proper maintenance.

48.15(9) In existing buildings of ordinary or better construction, stairway enclosures will not be required if protected by a partial or standard sprinkler system. Basement cutoffs of vertical openings will be required. This modification of open stairways is permitted only in buildings that do not exceed a basement and two full stories.

48.16(100) Open plan buildings.

48.16(1) In existing college buildings, where the design of the building lends itself to the classification of an open plan building, the requirements for fire safety of 48.15(2)-48.15(9) shall apply.

48.16(2) This will include regulations for all buildings where there are no permanent solid partitions between rooms or between rooms and corridors that are used for exit facilities.

48.16(3) Open plan buildings shall have enclosed stairways and any other vertical openings between floors protected in accordance with 48.5(1).

48.16(4) Open plan buildings shall not exceed 30,000 square feet in undivided area. Solid walls or smoke stop partitions shall be provided at intervals not to exceed 300 feet. Such walls or partitions shall have doors of a type that are at least 1¾-inch solid core wood doors and the partitions shall be the equivalent of one-hour construction.

48.16(5) Any cafeterias, gymnasiums or auditoriums shall be separated from the rest of the building by solid walls and no exits from other parts of the building shall require passing through such assembly areas.

48.16(6) Open plan buildings that do not have a direct exit door from each classroom to the outside shall be protected by a complete automatic fire detection system.

48.16(7) A sprinkler system may be installed in lieu of an automatic fire detection system in an open plan building.

48.16(8) Distance of travel to the nearest exit in an open plan building shall not exceed 100 feet from any point except that in a sprinklered building, the distance may be increased to 150 feet.

[Filed April 6, 1965; amended October 17, 1969]

CHAPTER 49
FIRE SAFETY RULES FOR HOTELS, APARTMENT HOUSES, DORMITORIES, LODGING OR ROOMING HOUSES

49.1(100) General principles and requirements—applicable to all classes of buildings in these rules.

49.1(1) Each building or structure referred to in these rules, whether new or old, designed for human occupancy, shall be provided with exits sufficient to permit the prompt escape of occupants in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life, in case of fire or other emergencies, will not depend solely on any single safeguard. Additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure.

49.1(2) Exits shall be so arranged and maintained as to provide free and unobstructed egress from all parts of every building or structure at all times when the building or structure is occupied. No locks or fastenings to prevent free escape from the inside of any building shall be installed on exit doors. Exit doors shall open outward and be indicated with the word "Exit."

49.1(3) Exits shall be visible or the route to reach them shall be conspicuously indicated in such manner that every occupant of every building or structure will readily know the direction of escape from any point within the building.

49.1(4) In buildings or structures where artificial illumination of exit signs is required, adequate and reliable illumination shall be provided for all of the exit signs.

49.1(5) All vertical ways of exit and other vertical openings between floors of buildings shall be suitably enclosed or protected as necessary to afford reasonable safety to the occupants while using the exits and also to prevent the spread of fire, smoke or fumes through vertical openings from floor to floor before occupants have evacuated the building.

49.1(6) *Window exits.* Window exits opening onto outside fire escape platforms are permissible in Class B hotels, apartments, lodging and rooming houses provided the window is easily opened without the use of tools and is sufficient size to allow an adult to pass through.

49.1(7) *Dead-end corridors.* Dead-end corridors cannot exceed the first 20 feet of exit travel from any room door with means of exit in only one direction in a Class A or Class B hotel.

49.1(8) *Gas piping.* All gas piping and the installation of gas appliances shall be in accordance with the provisions of chapter 39.

49.1(9) *Electrical wiring and appliances.* The electric wiring, lighting and installation of all

electrical appliances shall be in accordance with the standards of the current edition of the National Electric code.

49.1(10) *Fire protection equipment and devices.* Approved type fire extinguishers shall be provided on each floor, so located that they will be accessible to the occupants, and spaced so that no person will have to travel more than 75 feet from any point to reach the nearest extinguisher. Additional extinguishers may be installed in areas that constitute a special hazard. Type and number of portable fire extinguishers shall be determined by the state fire marshal.

49.1(11) In all buildings or structures of such size, arrangement or use, where delayed detection of a fire could endanger the occupants, the fire marshal may require an automatic fire detection alarm system.

49.1(12) In cases of practical difficulty or unnecessary hardship, the state fire marshal may grant exceptions to these rules but only when it is clearly evident that reasonable safety is thereby secured. Existing buildings and structures shall not be occupied or used in violation of the provisions of these rules.

49.1(13) Nothing in these rules shall be construed to prohibit better types of building construction, more exits or otherwise safer conditions than the minimum requirements specified in these rules.

49.1(14) Compliance with these rules shall not be construed as eliminating or reducing the necessity for other provisions for safety of persons under normal occupancy conditions nor shall any provisions be construed as requiring or permitting any condition that may be hazardous under normal occupancy conditions of buildings or structures.

49.2(100) Definitions.

49.2(1) For the purpose of these rules, the following definitions and classifications shall be used.

49.2(2) *Hotels—Class A.* Class A hotels shall include all buildings or group of buildings, under the same management, in which there are more than 25 sleeping accommodations for hire, primarily used by transients who are lodged with or without meals, whether designated as a hotel, inn, club, motel, or by any other name. So-called apartment-hotels shall be classified as hotels.

49.2(3) *Hotels—Class B.* Class B hotels shall include all buildings or group of buildings, under the same management, in which there are 25 or less sleeping accommodations for hire, primarily used by transients who are lodged with or without meals, whether designated as a hotel, inn, club, motel or by any other name. So-called apartment-hotels shall be classified as hotels. Class B hotels, more than two stories in height, shall be limited to sleeping accommodations for ten persons only in each story above the second story.

49.2(4) *Apartment houses.* This includes buildings furnishing living quarters for three or more families living independently from each other with independent cooking facilities whether designed as an apartment house, tenement, garden apartment or using any other name.

49.2(5) *Dormitories.* This shall include buildings where group sleeping accommodations are provided for persons not members of the same family group. There may be several occupying large rooms or there may be a series of closely associated rooms under joint occupancy and single management. These buildings may be called college dormitories, fraternity houses, sorority houses, nurses' homes, convents or similar types of occupancy.

49.2(6) *Lodging or rooming houses.* This shall include buildings or groups of buildings, under the same management, in which separate sleeping rooms are rented providing sleeping accommodations for a total of more than four persons who are nonrelated. Accommodations may be for either transients or permanent guests, with or without meals, but without separate cooking facilities for individual occupants.

49.2(7) *Row housing.* Contiguous individual family units two stories in height, separated by fire walls from roof level to basement floor with no access through the fire wall, shall not be classed as an apartment house but shall be classed as single family dwellings for the purpose of these rules only.

49.3(100) Hotels.

49.3(1) This rule shall apply to hotels as defined in 49.2(100), 49.2(2) and 49.2(3).

49.3(2) *Exits.*

a. No less than two exits, as remote from each other as practical, shall be accessible from every floor. Exits and ways of access thereto shall be so arranged that from every point in any opened area, or from any room door, exits will be accessible in at least two different directions except as provided in 49.1(7).

b. The exits, as specified in 49.3(2)"*a*", shall be such that it will not be necessary to travel more than 100 feet from the door of any room to reach the nearest exit, except that where an automatic sprinkler system is provided, the distance may be increased to 150 feet.

c. Types of exits from upper floors. Exits from upper floors shall be in accordance with the following types: (1) Enclosed stairways, (2) horizontal exits, (3) outside stairways, (4) fire escapes, Class B.

d. Construction and arrangements of exits. All stairs, ramps or other ways of exit shall be of such width and so arranged as to avoid any obstruction to the rapid evacuation of the hotel in the

event of fire. Fire escapes shall be constructed as specified in chapter 103 of the Code.

e. Exits from public hallways or passageways in Class A hotels shall have illuminated signs with the word "EXIT" in letters 6 inches high and ¼ inch wide. Where the exits are not visible from every point of the hallway or passageway, directional signs shall be provided to indicate the exit. Class B hotels shall have exits plainly marked and if artificial illuminated signs are necessary, they shall be the same as required for Class A hotels.

f. In Class B hotels, the second means of exit may be a Class C fire escape in accordance with section 103.7, providing the hotel does not exceed four full stories in height.

g. There shall be conspicuously displayed, in each sleeping room of Class A hotels, a legible floor plan showing the arrangement of exits and the direction of travel to reach them from the guest room.

49.3(3) *Protection of vertical openings.*

a. All stairways, elevator shafts and other vertical openings shall be enclosed or protected with material equal to one-hour, fire-resistive construction. All required exit stairs, which are located so that it is necessary to pass through the lobby or other open space to reach the outside of the building, shall be continuously enclosed down to the lobby level.

b. Unprotected vertical openings may be permitted in fire-resistive buildings with class A finish, or in sprinklered buildings, not to exceed two floors. This paragraph is to permit open stairways from the lobby to the mezzanine level or open stairs from the lobby to basement areas used for hotel purposes.

c. Wire glass, not to exceed 900 square inches in any single frame, may be used in stairway doors.

d. All doors to stairway enclosures shall be equal to the fire-resistive construction required in 49.3(3)"*a*", and shall be a self-closing type.

49.3(4) *Interior finish.* The exit ways, lobbies, public assembly meeting rooms and corridors shall have Class A interior finish. Class A finish shall mean the use of materials having a flame spread of less than 25 as rated by the National Board of Underwriters Laboratories.

49.3(5) *Basements.* Basements used only for storage, heating equipment or other purposes than hotel occupancy, open to guests or to the public, shall have no unprotected openings to floors used for hotel purposes.

49.3(6) *Special hazard areas.* All rooms or areas of hazardous occupancy such as those containing boilers, furnaces, refrigerating machinery, transformers, or storage areas, shall be separated or cut off from other parts of the building by fire walls or fire doors.

49.3(7) *Fire alarm systems and evacuation.*

a. Each hotel, both Class A and Class B, shall have an alarm device of such character and so located as to arouse all the occupants of the building in case they are endangered by fire. In Class A hotels, an alarm sending station shall be provided at the hotel desk or other convenient control point under the continuous supervision of responsible employees. Additional alarm sending stations or automatic fire detection devices may be required when, in the opinion of the state fire marshal, it is necessary to install such devices because of the size or number of occupants in the hotel.

b. The hotel management shall formulate a plan and instruct the employees on the proper procedure to immediately notify the public fire department in case of fire.

c. Hotels having 15 or less guests, with each room having a telephone operated from a central switchboard, can waive the requirements of 49.3(7)"*a*".

49.3(8) *Fire extinguishers.* Each hotel, both Class A and Class B, shall have fire extinguishers of a size and type and so located as to be effective in extinguishing a small fire. There shall be one Class 2A fire extinguisher located in each corridor on each floor that is accessible to all occupants of the floor. In the case of large buildings, the number of fire extinguishers shall be determined by having one Class 2A extinguisher for each 2500 square feet or less of floor area. In hotel kitchens, boiler rooms, paint storage rooms, electric vault rooms, or other areas where there are special hazards to protect, there shall be a minimum of one Class 8B-C fire extinguisher. In the case of hotels having inside standpipe equipped with hose that will reach all areas of the floor, the requirement for Class 2A extinguishers may be waived.

49.4(100) Apartment houses.

49.4(1) Any apartment building which complies with all of the requirements of 49.3(100), may be considered as a hotel and the following paragraphs waived.

49.4(2) Each living unit shall have access to at least two separate exits which are remote from each other and are reached by travel in different directions, except that a common path of travel may be permitted for the first 20 feet; that is, a dead-end corridor serving apartments may be permitted not to exceed 20 feet in length.

49.4(3) *Protection of vertical openings.* The protection of vertical openings in apartment buildings shall meet the same requirements as set forth in 49.3(3).

49.4(4) *Interior finish.* Interior finish in apartment buildings shall meet the requirements as set forth in 49.3(4).

49.4(5) *Exit lighting and signs.* All apartment buildings two or more stories high, and having more than ten apartment units, shall have corridor and exit signs. The illumination of corridor and exit signs shall be such that people of normal vision can move freely and the exit signs shall be legible at all times from any common corridor area.

49.4(6) *Hazardous occupancies.* Hazardous occupancies in apartment buildings such as boiler rooms, utility rooms and general storage areas shall be protected by walls and fire doors constructed of materials providing at least a minimum of one-hour fire rating.

49.5(100) Dormitories.

49.5(1) Any dormitory meeting all of the requirements in 49.4(100), will be acceptable and the following provisions may be waived.

49.5(2) *Exits.*

a. All dormitories shall have exits so arranged that from any sleeping room or open dormitory sleeping area there will be access to two separate and distinct exits in different directions with no common path of travel unless the room or space is subject to occupancy of not more than ten persons and has a door opening directly to the outside of the building at street or grade level.

b. Exits shall be so arranged that it will not be necessary to travel more than 100 feet from any point to reach the nearest outside door, stair or fire exit.

c. Exits from upper floors shall be sufficient to provide at least one unit of exit width for every 30 persons. All exit stairways and other vertical openings shall be enclosed or protected with material equal to one-hour, fire-resistive construction. Wire glass, not to exceed 900 square inches in any single frame, may be used in the protection of vertical openings.

d. Corridor and exit ways in dormitories shall have emergency lighting and illuminated exit signs with the word "EXIT" in letters 6 inches high and ¼-inch wide. Where exit signs are not visible from every point of a hallway or passageway, directional signs shall be provided to indicate the exit.

49.5(3) *Interior finish.* All interior finish of dormitories in the corridors, stairways and exit ways shall be Class A. Class A finish is also required in sleeping rooms providing accommodations for more than two persons.

49.5(4) *Fire alarm systems.* A manual fire alarm system shall be required for every dormitory and in the case of college, university and school buildings, fire drills shall be regularly conducted and all residents informed as to the meaning of the fire alarm signals and the proper procedure to follow in case the fire alarm is sounded.

49.5(5) *Fire extinguishers.* Extinguishers shall be required in dormitories in accordance with 49.3(8).

49.5(6) *Construction and arrangement.* Dormitories shall be so arranged as to provide 125 square feet for residents as it relates to the gross area of the building. All new construction shall be in accordance with the applicable provisions of the following paragraphs.

a. Fire-resistive construction. There is no limit to the area and height of the building.

(1) Columns and piers shall have a fire-resistance rating of not less than three hours.

(2) Floors shall have a fire-resistance rating of two hours.

(3) Roofs shall have a fire-resistance rating of not less than one and one-half hours.

(4) Beams, girders and trusses shall have a fire-resistance rating of two hours.

(5) Walls bearing exterior and interior portions shall have a fire-resistance rating of three hours.

(6) Partitions shall have a fire-resistance rating of two hours.

b. Noncombustible construction. Noncombustible construction is limited to two stories except when protected with an approved sprinkler system.

(1) General—all structural including walls, partitions, columns, piers, beams, girders, joists, trusses, floors and roofs shall be of approved noncombustible rating not less than one-hour fire-resistive.

(2) Exterior walls shall have fire-resistive rating of two hours.

c. One-story buildings shall be constructed of not less than one-hour, fire-resistant construction throughout except that boiler rooms, heating rooms and combustible storage rooms shall be two-hour, fire-resistant construction. Protected wood frame construction, when roof and floor construction and their supports have one-hour, fire-resistance and stairways and other openings through floors are enclosed with partitions having one-hour, fire-resistance, shall be acceptable as one-story buildings for dormitories.

d. Other types of construction for dormitories not permitted.

e. The ratings noted in the above paragraphs are those specified in the National Fire Protection Association codes.

49.6(100) Lodging or rooming houses.

49.6(1) *Exits.* There shall be two means of exit from each floor remote from each other. These exits shall be accessible to all residents on each floor in case of an emergency. One means of exit for lodging or rooming houses may be a fire escape. Class C, as described in section 103.7, providing however, there are not more than ten adults on any floor and the building does not exceed four stories in height.

49.6(2) Any sleeping room below the street floor shall have a direct access to the outside of the building.

49.6(3) The general requirements for fire safety as set out in 49.1(100), shall be applicable in lodging and rooming houses when, in the opinion of the state fire marshal, such specific safeguards are needed to insure the safety to life in the event of fire and whether specifically mentioned or not, lodging and rooming houses shall meet the intent of 49.1(100).

49.6(4) No frame dwelling, more than three stories in height, shall be occupied or remodeled for use as a lodging or rooming house.

TITLE VI

EXPLOSIVE MATERIALS

CHAPTER 56
EXPLOSIVE MATERIALS CODE

56.1(101A) The standard of "Manufacture, Transportation, Storage and Use of Explosives and Blasting Agents" number 495, 1970 edition of the National Fire Protection Association together with its references to other specific standards referred to shall be the rules governing explosives and blasting agents in the state of Iowa.

56.2(101A) An inspection of all storage facilities shall be made at least every six months and inspection forms filled out in triplicate, the original to be sent to the department of public safety, attention of state fire marshal, the first copy given to the occupant, and second copy to be retained by the inspecting department.

56.3(101A) Inventory shall be of such that it shows amount of explosive material on hand, quantities dispensed and to whom, and quantity on hand at the end of each calendar working day. Any time a shortage appears it shall be reported immediately to the chief of police or sheriff having jurisdiction, who in turn shall cause a federal form 4712 (Department of Treasury, Internal Revenue Service) to be implemented, a copy of which shall be sent to the Iowa Department of Public Safety, attention of state fire marshal.

TITLE VII

CRIMINAL INVESTIGATION

CHAPTER 61
CRIMINAL CONSPIRACY UNIT

61.1(749) Information from private sources. The unit may accept information from private sources voluntarily made which relates to organized crime such as those investigations involving conspiracies in supplying illegal goods and services, including but not limited to gambling, prostitution, loan sharking, narcotics, labor racketeering, antitrust and other activities for unlawful monetary gain.

61.2(749) Investigations. Investigations shall only be initiated by directive of the governor, attorney general, as provided by statute, or commissioner of the department of public safety, or at the request of a county attorney, a sheriff or mayor of a municipality. Investigations shall not be instituted at the request of a private citizen or private organization.

61.3(749) Confidential nature of files. The files, reports, notes and correspondence collected and compiled by the unit shall be confidential in nature and shall be so preserved in a confidential manner.

61.4(749) Use of unit facilities. The resources of the unit, personnel, facilities and equipment shall be used to gather information that is directly related to criminal activity. The unit may also render aid and assistance to the general criminal investigative section of the bureau of criminal investigation as such needs may arise.

The resources of the unit, personnel, facilities and equipment shall not be used to gather and maintain information that is fundamentally the personal or political beliefs or concerns of any individual or group, where such beliefs or concerns are not directly related to criminal activity.

61.5(749) Written record. A written record shall be kept by the unit of all individuals receiving information from the criminal conspiracy files where such individuals have requested information from the unit.

61.6(749) Reliability of information. All information maintained within the files of the unit shall reflect the degree of reliability and the assessment of the reliability shall be attached to and made a part of the file. The assessment of the reliability shall be signed by the individual making the assessment.

61.7(749) Prohibited techniques. All use of statutorily illegal investigative techniques shall be prohibited and any use of such techniques shall result in discharge or disciplinary action.

[Filed September 1, 1971;
amended February 9, 1972]

CHAPTER 62
CRIMINALISTICS LABORATORY

62.1(749A) Laboratory capabilities. The laboratory shall be capable of and equipped to perform analysis in the following fields:

1. Physiological fluids.
2. Hairs and fibers and other trace evidence.
3. Comparative microscopy.
4. Wet chemistry.

5. Instrumental analysis.
6. Document examination, writings, typewriting.
7. Polygraph.
8. Photography.
9. Latent prints.
10. Crime scene services.
11. Any other capabilities and analysis necessary to completely fulfill the responsibilities of a full-service forensic laboratory.

62.2(749A) Evidence packaging. Evidence may be packaged, labeled, sealed and dated in any manner which is acceptable to the personnel of the laboratory. Such acceptance to be subject, on an individual basis, to examination of each piece of submitted evidence. In the event that the standards of the laboratory are not met, with regard to the integrity of the chain of custody of a piece of evidence, the laboratory will maintain material for use in packaging on the spot.

62.3(749A) Evidence submission to the laboratory. Evidence may be submitted to the laboratory via: Hand carry, certified mail, or registered mail. Evidence submitted to the laboratory by the above noted methods should be labeled as to the laboratory section or type of examination required, e.g. Attention: Firearms section; Attention: Chemistry section; Attention: Document section; Attention: Microanalysis; Attention: Photography section; Attention: Identification section; Attention: Toxicology section; Attention: Toolmarks section; Attention: Drug section; Attention: Polygraph section.

62.4(749A) Investigational information on submitted evidence. The laboratory requires, to make its files complete, a copy of the investigational report or a synopsis of the investigation. This document should include all names of suspects and victims, all dates and times involved, type of crime, examinations requested of the laboratory and all names, dates and times involved in the evidentiary chain of this piece of evidence. It is also important to have all pertinent information regarding the submitting authority including names, case number and locations in the event further information or communication is necessary.

62.5(749A) Handling, storage and return of evidence. Acceptance of evidence subject to correct packaging, will be handled on an individual basis by the members of the staff. A piece of evidence will be received, generally by the person who will examine it, marked and taken into his custody. It will be the policy of the laboratory to return all evidence to the submitting authority for his storage and custody. Evidence will be returned to the submitting authority unless the examiner deems it necessary and reasonable for him to maintain custody.

62.6(749A) Distribution of reports. Reports will be made out in quadruplicate. One copy will remain with the laboratory file, one copy will be mailed to the submitting authority and two copies will be mailed to the county attorney of the respective county. Results of laboratory analysis cannot be made available to any person or organization other than the submitting agency and county attorney without a written court order.

62.7(749A) Evidence submission to experts for the defense. Evidence will not leave the hands of the laboratory except to be entered in court or to be returned to the submitting authority without a proper court order. Evidence which will be presented to experts examining them for the defense will be packaged and transferred in a manner prescribed by the laboratory and such transfer will always take place at the laboratory. It will be the responsibility of the defense witness to maintain his own security, instrumentation, examination facilities and custodial chain. In the event that a sample of evidence is so small that it is consumed on analysis, the court will be so notified in writing. In the event that a sample of evidence is so small that giving the defense a sample would leave the laboratory with no sample, the court will be informed of this fact in writing.

62.8(749A) Report form. Reports issued by the laboratory will be prepared on a specially designed form. The front of this form gives all the information regarding the case including: Names, dates, submitting agency, all case numbers and type of crime. The front of this report form also includes section 749A.2. The front of this report form also includes the findings of the examining person and the signature of said person. The back of this report includes a receipt form itemizing all the evidence and all the pertinent data involving the laboratory portion of the custodial chain including: Names, times, dates, submitting and handling persons. The front and back of this report form may be supplemented with extra sheets for lengthy report bodies or receipt lists.

62.9(749A) Receipt forms. A receipt of evidence form will be filled out upon receiving materials for examination. This receipt form will include spaces for all the pertinent data of the case and should be made out in duplicate. One copy of the receipt form will be returned to the submitting authority. The second copy will remain with the laboratory file documenting the laboratory's activities.

62.10(749A) Statistics and records. The laboratory will compile and maintain records involving its case work. These statistics will run on a fiscal year basis and will provide data for monthly and year end reports.

62.11(749A) Destruction of evidence. It shall be the policy of the laboratory to destroy evidence whenever such destruction is authorized by the submitting agency. This destruction may be pursued by any method acceptable to the laboratory and such destruction may include preservation by the laboratory for use as standard materials or for use as training materials.

[Filed December 16, 1971]

PUBLIC SAFETY PEACE OFFICERS' RETIREMENT SYSTEM TRUSTEES

CHAPTER 1
RETIREMENT AND BENEFIT PROCEDURE

1.1(97A) Computation of the average final compensation shall be made using the salary stated for the rank held by the member for the five years immediately preceding retirement or death. Overtime compensation if any and authorized periods without pay shall not be considered in this computation.

1.2(97A) Age at retirement for computation of annuity shall mean age at the nearest birthday, however, the age of qualification for benefits under chapter 97A shall mean the age on last birthday.

1.3(97A) In the event of retirement on accidental disability before age 55, the age shall be advanced three years for computation of the annuity. For accidental disability age 55 and later and for ordinary disability the age shall not be so advanced.

1.4(97A) Accidental disability may be granted by the board on the basis of under age 55 provided that:

1.4(1) Application was on file before the applicant attained age of 55.

1.4(2) Applicant has not been refused disability on the application. If so, a new application must be filed.

1.4(3) The fact that processing of an application causes such a lapse of time that the applicant passes age 55 shall not be an impediment of qualifying for accidental disability two-thirds.

1.5(97A) If an active member's widow should remarry, the widow's benefit will continue to be paid to the guardian of any child for his benefit so long as said child remains under age 18. If the amount to be received for the child or children will exceed $1,000.00 a conservator must be named by the court. This is in addition to the child's regular benefit.

1.6(97A) The escalation of benefits authorized in section 97A.6(15) "*a*" be computed using two different methods. (Forms R1 through R10)

1.7(97A) Date of retirement shall mean the first day on retirement and not the last day on duty.

1.8(97A) In the event of payment of workmen's compensation benefits on account of disability or death for which benefits are payable under chapter 97A, the retirement or other benefit shall be adjusted by the actuarial equivalent of the total workmen's compensation. This is in lieu of causing the beneficiary to repay the workmen's compensation directly.

1.9(97A) Errors in payments to beneficiaries when discovered shall be adjusted in accordance with section 97A.13. This shall be construed to mean that the total under or over payments shall be commuted to monthly income using the current annuity table and at the beneficiary's age at the nearest birthday at the time of correction. In the event that the error involves a child or children, the monthly benefit shall be adjusted over the balance of the child or children's eligibility, however, if the child or children are no longer on the rolls due to having attained age 18, a lump sum settlement shall be made. Errors referred to in this rule shall be adjusted only after presentation to and approval by the board.

1.10(97A) As soon as possible after the close of each calendar year, a statement of account shall be furnished to each active member which must include the following information:

Balance in the annuity savings fund at the beginning of the year.

Contribution for the year.

Interest additions for the year.

Balance in the annuity savings fund at the year end.

At the same time as above a form 1099 shall be prepared for each person who received benefits and any other person who has ceased to be a member during the year. The forms 1099 must detail the following information:

Total pension paid during the year.

Total refund of contribution during the year.

Total interest paid during the year.

The current pamphlets dealing with retirement and sick pay benefits should be obtained from internal revenue service and mailed with all forms 1099.

1.11(97A) When a member retires, if the retirement date requested, and approved by the board is before the expiration of accrued vacation time, the member shall receive vacation pay in addition to the retirement benefit for the vacation period.

1.12(97A) Initial benefit for a child specified in section 97A.6(8) "*f*", (13) "*a*", "*b*", is ruled by this board to be six percent of the monthly salary of a senior patrolman.

1.13(97A) If a member enters the armed services of the United States or its allies under section 97A.9 and fails to return as provided in said section the following shall govern.

1.13(1) When a request is received for payment of contributions and interest from the annuity savings fund, payment of the contributions with interest computed to the date of payment shall be made unless the period of absence exceeds four years.

1.13(2) If the period of absence exceeds four years, section 97A.3(2) shall apply and interest shall be computed for a four-year period only.

1.14(97A) The minimum payment of $50.00 per month authorized in section 97A.6(8) "*b*" is a minimum only and the recomputation authorized in section 97A.6(15) "*a*" shall be made using correct original benefit and not the $50.00 minimum. The benefit payable shall be the $50.00 minimum until the recomputed benefit exceeds $50.00 at which time the recomputed benefit shall be paid.

1.15(97A) Applications for retirement shall be made not more than ninety nor less than thirty days in advance of the date of retirement, with election for one-hundred percent refund, fifty percent refund or no refund of member's contribution. Such election when received by the board shall be final and irrevocable.

1.16(97A) The following books of account shall be maintained by the secretary.

1.16(1) Self-balancing combination journal recording all receipts, disbursements and necessary adjustments.

1.16(2) Self-balancing ledger of control accounts.

1.16(3) Subsidiary ledger of the annuity savings fund.

1.16(4) Schedules at the close of the year which shall detail all control accounts except:

a. Pension reserve account.
b. Pension accumulation account.
c. Annuity reserve account.

1.17(97A) Computation of retirement benefits for a partial month shall be on the actual number of days in the month, i.e., monthly benefits divided by the number of days in the month multiplied by the number of days due.

1.18(97A) Section 97A.6(13) applies to the widow and children only if the widow was married to the deceased pensioner at or before the time of his retirement and the children are the natural children of the deceased pensioner or were legally adopted at or before the time of his retirement.

1.19(97A) It is hereby ruled by the board of trustees that under section 97A.4, eleven months of service in any year shall be equivalent to one year of service, however, in no case should a member receive more than one year of service credit for each twelve-month period.

1.20(97A) The official annuity table to be used in computation of annuities due under the provisions of chapter 97A shall be the 1951 Group Annuity Table with four percent interest and ages retrogressed one year effective January 1, 1970.

1.21(97A) In the event a member is retired before attaining five years of service, his average final compensation shall be the total of his earnable compensation from the date he was sworn into service divided by the number of months of service.

1.22(97A) The secretary shall present to the board at each regular meeting the last two abstracts of benefits with a detailed reconciliation between the two totals.

1.23(97A) The secretary shall reconcile the cash account as soon as possible after the close of the month, and after deducting $5,000.00 report the book balance to the investment counsellor in the office of the treasurer of state as available to be invested.

1.24(97A) Application for benefits under chapter 97A shall be made on forms R15 and R16 as the circumstances require. No benefit will be granted if this requirement is not met except for the return of contribution in the case of resignation, the request may be submitted in letter form which must include written approval of the proper division chief showing the date of termination.

1.25(97A) Upon a receipt by the secretary of an application for benefits other than resignation of member form R11 through R14 as needed will be delivered to the accounting section of the department of public safety. The accounting section will complete the certification of salary stated on the department payroll. Upon receipt of the certification, the secretary will proceed to compute the retirement allowance.

1.26(97A) In the event of the death of a member, the date of death will be considered to be the last day on the payroll for earned compensation or on pension and the next day following will be the first day for the widow's and children's benefit. Accrued vacation pay will be paid in addition to the widow's and children's benefits.

1.27(97A) When the widow of a deceased active member is to receive an annuity payment from the member's contributions, the age of the widow at her nearest birthday shall govern. The computation shall be the widow's birth date subtracted from the first date that widow's benefits begin to accrue.

1.28(97A) Age referred to in section 97A.8(1) "*a*" shall mean the age at the nearest birthday on the date when the individual becomes a member of Peace Officers' Retirement, Accident and Disability System. The secretary to the board shall furnish the birth date and age to be used by the payroll department of the department of public safety in the case of any additions to the membership.

These rules are intended to implement section 97A.5(4) of the Code.

[Filed December 9, 1970]

REAL ESTATE COMMISSION

CHAPTER 1
BROKERS AND SALESMEN

1.1(117) Conduct of examinations. All examinations for licenses as real estate brokers or salesmen shall be conducted on the Thursday preceding the second Tuesday of the months of February, March, May, July, September and November by the commission or its authorized representative in the State Capitol Building, Des Moines, Iowa, or such other place as designated by the commission.

1.2(117) Refund of fee. If for any reason an applicant fails to qualify for a license, the fee submitted with his application shall not be refunded.

1.3(117) Limited filing period. An applicant is required to take the examination prescribed by the commission on the date of the next scheduled examination following the date of filing the application. This requirement may be waived by the commission if satisfactory evidence is presented by the applicant showing that extenuating circumstances prevented compliance.

1.4(117) Reapplying after failure. An applicant who fails to qualify for a license is prohibited by law from reapplying for the same or a higher status until six months have elapsed from the date of the last rejection.

1.5(117) Listing contract termination. The use of a listing contract which does not have a definite termination will be considered as detrimental to the public interest.

1.6(117) Filing a formal complaint. A formal complaint against a licensee must be prepared and signed in triplicate on forms approved by the commission.

1.7(117) Renewal procedure following expiration. All licenses expire as of December 31 of the year of issuance. A licensee who fails to make proper application for renewal prior to expiration will be required to make an original application in which he must certify under oath that he has not acted in the capacity of a real estate broker or salesman during the time that he has not had a license.

1.8(117) Salesman's license limited. The holder of a real estate salesman's license may not advertise to buy, sell, rent or exchange real estate without including in the advertisement the name of his employer.

1.9(117) Broker acting as buyer. A broker shall not buy for himself either directly or indirectly property listed with him, nor shall he acquire any interest therein without first making his true position clear to the owner. Satisfactory proof of this fact must be produced by the broker upon request of the commission.

1.10(117) Examinations passed by commission. The commission shall pass upon the examination papers of applicants for either broker's or salesman's license.

1.11(117) Conversion of licenses. A broker's license cannot be converted to a salesman's license or vice versa.

1.12(117) Commission controversies. The commission is not authorized by law nor will it consider or conduct hearings involving disputes over fees or commissions between co-operating brokers, brokers and salesmen and other brokers.

1.13(117) Qualifying a firm. All members of a partnership or officers of a corporation or association who are actively engaged in the real estate brokerage business must qualify and obtain a broker's license before the firm itself can obtain a license.

After a partnership, corporation or association is licensed any new member, or officer, actively engaged in the real estate brokerage business, must qualify for a real estate license as required in 117.15.

1.14(117) Refunds to purchaser. When for any reason the owner fails or is unable to consummate the deal, the broker has no right to any portion of the money deposited with him by the purchaser, even though the commission is earned. The money must be returned to the purchaser and the broker should look to the owner for his compensation.

1.15(117) Lotteries prohibited. Lotteries and schemes of sales involving selling of certificates, chances or other devices, whereby the purchaser is to receive property to be selected in an order to be determined by chance, or by some means other than the order of prior sale, or whereby property more or less valuable will be secured according to chance, or the amount of sales made, or whereby the price will depend upon chance, or the amount of sales made, whereby the buyer may or may not receive any property, are declared to be methods by reason of which the public interests are endangered.

1.16(117) Signs on property. Placing a sign on any property offering it for sale, rent, or lease without the consent of the owner shall be held as against the best interests of the general public.

1.17(117) Regular and called meetings of the commission. Regular meetings of the commission shall be held in the offices of the commission in the state capitol or at such other place in or out of the city of Des Moines, Iowa, as designated by the commission on the Friday of the following week of the date of each monthly examination. Special meetings when deemed necessary may be called by the director of the real estate

commission, who shall set the time and place of such meeting.

1.18(117) Broker required to furnish progress report. At the expiration of 30 days after an offer to buy has been made by a buyer and accepted by a seller, either party may demand and the broker shall furnish a detailed statement showing the current status of the transaction. On demand by either party the broker shall furnish a detailed current statement on 30-day intervals thereafter until the transaction is closed.

1.19(117) Enforcing a protective clause. To enforce a protective clause beyond the expiration of an exclusive listing contract, the broker must furnish to the owner prior to the expiration the names and addresses of all persons to whom the property was presented during the active term of the listing.

1.20(117) Offering of prizes. The offering of prizes or anything of value as an inducement to buy or sell real estate shall be considered payment of a commission to a person who is not a licensed broker or salesman under the provisions of this chapter and a violation thereof.

1.21(117) Part-time brokers or broker-salesman. A duly licensed broker whose principal business is other than that of a real estate broker, or one who operates as a salesman for another duly licensed broker, may not sponsor a salesman for his 12-month apprenticeship period.

[Filed May 25, 1953; amended June 11, 1953, May 31, 1957, January 15, 1963, May 10, 1966, July 13, 1967]

RECIPROCITY BOARD

CHAPTER 1
INTERSTATE OPERATION OF VEHICLES

1.1(326) Trip-leased vehicles. The reciprocal or proration agreements negotiated by the Iowa reciprocity board on behalf of the state of Iowa extend benefits to leased vehicles on the basis of the residence of the lessee with the exception of household goods carriers. Theoretically, the state of Iowa could require a prorate carrier to file a supplemental application to include any vehicles leased even though the duration of the lease was for a shorter period of time than 30 days. The Iowa reciprocity board has broad statutory authority to negotiate agreements with such conditions, restrictions, and privileges or lack of them as the board might deem advisable. To avoid undue restriction of interstate and intrastate commerce, the board has developed the following policy with respect to restrictions on single trip-lease operations.

1.1(1) Prior to a single trip-lease movement of a commercial vehicle (tractor, truck or semitrailer) by a carrier who has prorated his fleet, the lessee must complete an Iowa Trip-Lease Identification Card if:

a. The leased vehicle is not registered fully in Iowa or if;

b. The leased vehicle has not already been prorated in Iowa at a percent equal to or greater than the percent for which the lessee's fleet has been prorated.

1.1(2) The Iowa Trip-Lease Identification Card is obtained from the Iowa reciprocity board. The applicant must estimate his needs in advance and secure the cards necessary to comply with these requirements. There is a charge of one dollar for each set of identification cards. No expiration date is shown on the card, so the applicant need not hesitate to purchase same in advance of need.

1.1(3) At the close of each calendar quarter the carrier is required to file a single trip mileage report, and at that time the carrier is billed a prorate fee for each trip. The fee due Iowa for each single trip lease is computed by dividing the single trip Iowa miles by the average annual miles operated by the lessee's vehicles in the compact states during the base period multiplied by the full annual Iowa registration fee for the vehicle leased. The Iowa reciprocity board makes the necessary adjustment when the leased vehicle has already been prorated with Iowa at a lower percent. Under no circumstances is the carrier permitted to trip lease a vehicle owned or under a lease of 30 days duration or longer to the lessee.

The Iowa carrier who has not registered his vehicles on a prorate basis is permitted to trip lease any vehicle fully licensed in Iowa or prorated with Iowa without carrying the Iowa trip-lease identification. If the vehicle being operated on a trip-lease basis is registered in another state and has not been prorated with Iowa, the following requirements must be met:

a. There must be documentary evidence that the vehicle is being operated pursuant to a trip-lease arrangement.

b. The vehicle must be registered in the state of residence of the registered owner.

c. State of registration must be a state with whom Iowa has reciprocity.

d. If the vehicle is a truck or tractor having a laden gross weight in excess of twelve thousand pounds, the vehicle must be identified with an Iowa reciprocity permit.

e. The vehicle must be "headed" towards its home state.

1.1(4) The nonresident carrier who is not subject to prorate registration in Iowa is permitted to trip lease any vehicle fully licensed in Iowa or

prorated with Iowa without carrying the Iowa trip-lease identification. If the vehicle so operated is registered outside Iowa and has not been prorated with Iowa, the following requirements must be met:

a. There must be documentary evidence that the vehicle is being operated pursuant to a trip lease arrangement.

b. The vehicle must be registered in the state of residence of the registered owner.

c. State of registration must be a state with whom Iowa has reciprocity.

d. If the vehicle is a truck or tractor having a laden gross weight in excess of 12,000 pounds, the vehicle must be identified with an Iowa reciprocity permit.

e. The vehicle must be "headed" towards its home state.

1.2(326) Restrictions on trailer interchange and trailer interline. The prorate carrier may apply for the privilege of interchange or interline of trailers by completing the appropriate Iowa form. To qualify for this privilege the applicant must certify that he has included all his trailers (owned or under permanent lease) in his Iowa prorate registration application; and that if any trailers are added to the fleet during the registration year that these additional trailers will also be prorated with Iowa. In addition, the applicant must prorate at least one trailer for each tractor to qualify for the privilege of trailer interchange or interline or both.

1.2(1) The privilege will not extend to any trailer owned or under permanent lease to a carrier who has qualified as a prorate fleet operator in Iowa for the current registration year unless that trailer is carrying the proper evidence of its prorate registration in Iowa.

1.2(2) The privilege will not extend to any trailer owned or under permanent lease to the nonprorate carrier unless the vehicle is properly registered in a state with whom Iowa has reciprocity. The vehicle must be registered in the state of residence of the owner.

1.2(3) The privilege will not extend to any trailer for which there is not documentary evidence displayed of a bona fide interchange or interline.

The prorate carrier who has qualified for this privilege is issued Iowa registration receipts or cab cards for its power units stamped "Interchange."

1.2(4) An operation by a qualified carrier of an interchanged trailer will be permitted if the documentary evidence contained in the interchange agreement, between carriers, indicates that the trailer "traded" is properly registered in Iowa.

1.2(5) An operation by a qualified carrier of an interlined trailer will be permitted if the registration on the trailer is from the state of residence of the owner of the trailer and from a state with which Iowa has reciprocity. The load must be a through load having originated with the owner of the trailer if the movement is in the direction away from the home state of the trailer owner and state of registration. Any subsequent movements of the trailer regardless of load must be in the general direction back toward the home state of the owner of the trailer.

1.3(326) Iowa temporary registrations. To facilitate the movement of vehicles in interstate or intrastate commerce by the carrier who has registered his vehicles on a prorate basis, Iowa issues the Iowa temporary proration registration which may be completed by the carrier at the time the vehicle is added to the fleet whether by lease or by purchase. This method was devised to reduce the operation cost of the carrier who had prior thereto found it necessary to telephone the office for telegraphic authority. The Iowa temporary proration registration is purchased in advance for one dollar each from the Iowa reciprocity board and must be completed in triplicate—one copy to be retained by the carrier, one copy to be carried in the cab of the vehicle and the third copy to be mailed to the Iowa reciprocity board. These temporary proration registrations are valid for a period of fifteen days and are not renewable. These registrations are issued with the understanding that the carrier will prepare immediately a supplemental proration registration application to qualify the vehicle in question.

1.4(326) Iowa reciprocity permits. The nonresident carrier who does not qualify as a fleet operator and is not subject to proration is required to have an Iowa reciprocity permit on any truck or tractor having a combined laden gross weight in excess of 12,000 pounds when operated interstate on the Iowa highways. In addition, the carrier who does not qualify as a fleet operator but whose vehicle or vehicles is licensed in one of the states with which Iowa has prorate agreements is required to have an Iowa reciprocity permit on the trailing units as well as the power units. There is an annual fee of one dollar for each reciprocity permit. The vehicle covered by the reciprocity permit is permitted to engage only in interstate commerce in the state of Iowa. The vehicle which is being operated under reciprocity permit is not permitted to engage in intrastate commerce even though that movement might be simultaneous with the movement in interstate commerce.

The vehicle covered by the Iowa reciprocity permit is authorized to engage in interstate operation in Iowa provided the carrier has proper operating authority, as required, from the Iowa state commerce commission. The vehicle is not permitted to operate in Iowa at a greater weight than shown on his registration, and the vehicle cannot operate in Iowa on a license plate whereunder the registration is limited geographically, purposewise or mileagewise.

1.5(326) Denial of reciprocal privileges. It is the policy of the Iowa reciprocity board to afford a carrier the opportunity to be heard prior to the withdrawal of any benefits or privileges granted by the state of Iowa pursuant to the Uniform Vehicle Proration and Reciprocity Compact and the Midwest Vehicle Proration Compact. It is also the policy of the Iowa reciprocity board to afford a resident carrier the opportunity to be heard if the benefits or privileges granted pursuant to either compact agreement are withdrawn, in whole or in part, by a contracting state. The Iowa reciprocity board then determines if it should intercede on behalf of the carrier; however, such intercession is not mandatory.

1.6(326) Organizational data. The Iowa reciprocity board meets in regular session on the first Thursday of each month at 9:00 a.m. in the hearing room of the Iowa state commerce commission; however, the chairman or a majority of the members of the board may call a special meeting at any time. All meetings are open to the public. It is the policy of the board to require all individuals or groups or delegations to submit requests for hearings to the Iowa reciprocity board in writing 15 days in advance of such hearing, stating fully the subject to be presented.

1.7(326) Policy with respect to allowance of credit. If a vehicle is deleted from the prorate fleet and replaced with a comparable unit, the unexpired registration fees paid to the state of Iowa on the deleted unit are to be applied to fees due Iowa on the replacement units. If the deleted unit is a leased vehicle, the carrier must complete a notarized certification that any unexpired registration fees paid by the lessor to the lessee have been refunded to the lessor prior to the request that credit for these fees be applied to a replacement unit.

[Filed January 15, 1963]

REGENTS, BOARD OF

CHAPTER 1
ADMISSION RULES COMMON TO THE THREE STATE UNIVERSITIES

1.1(262) Admission of freshman students. A student desiring admission must meet the requirements in this rule and also any special requirements for the curriculum, school or college of his choice.

He must submit a formal application for admission and must have the secondary school provide a certificate of high school credits, including a complete statement of the applicant's high school record, rank in class, scores on standardized tests and certification of high school graduation. The applicant must also submit any other evidence such as a certificate of health that may be required by the individual institution of higher learning.

1.1(1) *A graduate of an approved Iowa high school* who has the proper subject-matter background, who is in the upper one-half of his graduating class, and who meets specific curricular requirements will generally be admitted upon certification of graduation, if he applies for admission.

A candidate who is not in the upper one-half of his graduating class may be required to take special examinations and may after a review of his entire record and at the discretion of the admissions officers: (*a*) Be admitted unconditionally, (*b*) be admitted on probation, (*c*) be required to enroll for a tryout period during a preceding summer session, or (*d*) be denied admission.

1.1(2) *A graduate of an accredited high school in another state* must meet at least the same standards as a graduate of an Iowa high school. The options for admission by probation or tryout enrollment may not be open to these students. Each college reserves the right to demand higher standards from graduates of out-of-state high schools.

1.1(3) *A graduate of a nonapproved high school* must submit all data as required above and in addition must take examinations which will demonstrate his general competence* to do successful college work.

1.1(4) *An applicant who is not a high school graduate* must submit all data required above insofar as it exists and must take examinations to demonstrate general competence* to do college work. Evidence of specific competence for admission to a given curriculum will also be required.

1.2(262) Admission of undergraduate students by transfer from other colleges.

1.2(1) *Students from accredited colleges and universities.* Transcripts of record are given full value if coming from colleges or universities accredited by the North Central Association of Colleges and Secondary Schools or similar regional associations. For schools not regionally accredited the recommendations contained in the current issue of the Report of Credit Given by Educational Institutions published by the American Association of Collegiate Registrars and Admissions Officers will be followed.

a. Each applicant shall submit an official transcript bearing the original seal and signature

*Examinations for the determination of general competence to do college work are determined by the Iowa committee on secondary school and college relations and are comparable for all three state institutions. Competence established at one is acceptable at all three, but due to different specific curricular requirements, does not guarantee admission to either of the other two.

of the official in charge of records from each college or university which the student has attended previously. The student will also submit any other records or letters which the college may require to support his application for admission.

b. A transfer applicant shall be expected to have maintained a "C" average (2.00 based on an "A" grade being 4 points) for all college work previously attempted and not be under suspension from the last college attended. Students who are not residents of Iowa may be expected to have maintained a 2.25 grade index.

c. A student who is below the above standard may be permitted to take entrance examinations. If the applicant successfully completes the examinations he may be admitted on probation.

d. In general transfer applicants under academic suspension from the last college attended will not be considered for admission during the period of suspension or if for an indefinite period, until six months have passed since the last date of attendance. When eligible for consideration the applicant will be considered as in "*c*" above.

e. A transfer applicant under disciplinary suspension will not be considered for admission until a clearance and a statement of the reason for suspension is filed from the previous college. When it becomes proper to consider an application from a student under suspension, the college must take into account the fact of the previous suspension in consideration of the application. An applicant granted admission under these circumstances will always be on probation and his admission subject to cancellation.

f. Applicants for admission by transfer who do not meet the standards may be denied.

g. Transfer credit from a junior college will not be accepted if that credit is earned after the total number of hours of credit accumulated by this student at all institutions attended exceeds one-half of the number of hours needed for the earning of the baccalaureate degree.

1.2(2) *Students from nonaccredited colleges.* A college may refuse to recognize credit from a nonaccredited college or may admit the applicant on a provisional basis and provide a means for the validation of some or all of the credit. The validation period shall not be less than one semester and will ordinarily be a full academic year. The college will specify to the student the terms of the validation process at the time of provisional admission. Each student from a nonaccredited college will be considered on his merits and his admission or rejection is at the discretion of the admissions officer.

1.3(262) Application deadlines. Applicants for admission must submit the required applications for admission and the necessary official transcripts and other required documents to the admissions officer of the appropriate college at least ten days prior to the beginning of orientation for the session for which the student is applying. Applications for admission from students who are required to take entrance examinations will not be considered unless the examinations can be completed at least five days before the beginning of orientation. This rule may be waived by the admissions officer only for adequate reasons.

This rule does not apply to the colleges of medicine and dentistry at the university and the college of veterinary medicine at the Iowa State University. Rules applying to these are given in the following: 2.4(262), 2.8(262) and 2.25(3).

All new undergraduate students must complete the Iowa College Scholarship and Placement Tests or the equivalent as determined by the admissions officer before the beginning of orientation for the session in which the student first registers.

1.4(262) Classification of residents and nonresidents for admission and fee purposes.

1.4(1) *General.* Students enrolling at one of the three state institutions shall be classified as resident or nonresident for admission, fee and tuition purposes by the registrar. The decision shall be based upon information furnished by the student and all other relevant information. The registrar is authorized to require such written documents, affidavits, verifications, or other evidence as are deemed necessary to establish the domicile of a student, including proof of emancipation, adoption, award of custody, or appointment of a guardian. The burden of establishing that a student is exempt from paying the nonresident fee is upon the student.

For purposes of resident and nonresident classifications, the word "parents" as herein used shall include legal guardians or others standing in loco parentis in all cases where lawful custody of any applicant for admission has been awarded to persons other than actual parents.

1.4(2) *Residence for tuition purposes.* Rules regarding residence for admission, fee and tuition payments are generally divided into two categories—those that apply to students who are under the age of 19 and those who are 19 years of age or older. The requirements in these categories are different. Domicile within the state means adoption of the state as a fixed permanent home and involves personal presence within the state. The two categories are discussed in more detail below.

1.4(3) *Students who are minors.* The residence of a minor shall follow that of the parents at all times, except in extremely rare cases where emancipation can be proved beyond question. The residence of the father during his life, and after his death, the residence of the mother, is the residence of the unemancipated minor; but if the father and the mother have separate places of residence, the minor takes the residence of the parent with whom he lives or to whom he has been assigned by court

order. The parents of a minor applying for admission will be considered residents of Iowa only if they have a domicile within the state at the time of the beginning of the semester, quarter or session in which the minor is first enrolled at Iowa State University or the state University of Iowa, or University of Northern Iowa, and if the parents establish such domicile for purposes other than to qualify their child for resident tuition.

A minor admitted before his parents have moved to Iowa may be reclassified as a resident at the beginning of the next semester or quarter in which the student is enrolled after his parents have a domicile in Iowa. A minor student whose parents move their residence from Iowa to a location outside of Iowa shall be considered to be a nonresident at the beginning of the next semester, quarter, or session in which the student is enrolled after the date of the parents removal from the state.

A minor under legal guardianship shall not be granted resident status if the primary purpose of the guardianship is to qualify the minor for resident tuition.

A minor living with and being supported by a relative or a friend who is a resident of Iowa, but not a minor's legal guardian, may be granted resident status if he has lived with the relative or friend at least three years prior to high school graduation.

1.4(4) *Students over 19 years of age and married students under 19 years of age.* A student 19 years of age or older and a married student under 19 years of age shall be classified as a resident if (*a*) the student's parents were residents of the state at the time such student reached majority or was married and the student is not domiciled in another state, or (*b*) who after marriage or reaching majority has established a bona fide residence in the state of Iowa by residing in the state for at least 12 consecutive months immediately preceding the beginning of the semester, quarter or session. Bona fide residence in Iowa means that the student is not in the state primarily to attend a college; that he is in state for purposes other than to attempt to qualify for resident status.

Any nonresident student who reaches 19 years of age or is married while under 19 years of age while a student at any school or college does not by virtue of such fact attain residence in this state for admission or tuition payment purposes.

1.4(5) *General facts.* The resident status for admission, fee and tuition purposes of a married student shall usually be determined under these rules irrespective of the classification of the spouse. Married students under 19 years of age shall be considered to have attained majority as of the date of their marriage.

Persons who are moved into the state as the result of military or civil orders from the government, or the minor children of such persons, are entitled to resident status. However, if the arrival of the parents is subsequent to the time of the beginning of the semester, quarter or session in which the minor child is first enrolled, nonresident tuition will be charged in all cases until the beginning of the next semester, quarter or session in which the student is enrolled.

Dependents of persons whose legal residence is permanently established in Iowa, who have been classified as residents for tuition purposes may continue to be classified as residents so long as such residence is maintained, even though circumstances may require extended absence of said persons from the state. It is required that persons who claim an Iowa residence while living in another state or country will provide proof of the continual Iowa domicile such as (*a*) evidence that they have not acquired a domicile in another state, (*b*) they have maintained a continuous voting record in Iowa, and (*c*) they have filed regular Iowa income tax returns during their absence from the state.

Ownership of property in Iowa, or the payment of Iowa taxes, does not in itself establish residence.

A student from another state who has enrolled for a full program or substantially a full program in any type of educational institution will be presumed to be in Iowa primarily for educational purposes, and will be considered not to have established residence in Iowa. Continued residence in Iowa during vacation periods or occasional periods of interruption to the course of study does not of itself overcome the presumption.

All students not classified as resident students shall be classified as nonresidents for admission, fee and tuition purposes.

A student who willfully gives incorrect or misleading information to evade payment of the nonresident fees and tuition shall be subject to serious disciplinary action and must also pay the nonresident fee for each semester, quarter or session attended.

An alien who has entered the United States on an immigration visa and who has established a bona fide residence in Iowa by living in the state for at least 12 consecutive months immediately preceding the beginning of the semester, quarter or session may be eligible for resident classification providing he is in the state for purposes other than to attempt to qualify for resident status as a student.

Men in military service (except career servicemen) who listed Iowa as their residence prior to entering service and who, immediately upon release, return to Iowa to establish their residence or enter college, will be classified as residents unless their parents moved from the state while the individual was still a minor.

Change of classification from nonresident to resident will not be made retroactive beyond the semester, quarter, or session in which application for resident classification is made.

1.4(6) *Review committee.* The decision of the registrar on the residence of a student for ad-

mission, fee and tuition purposes may be appealed to a review committee. The finding of the review committee may be appealed to the board of regents.

[Filed December 17, 1958; amended January 28, 1959, May 26, 1959, October 28, 1959, September 15, 1959, September 30, 1960, July 12, 1967, June 14, 1972]

CHAPTER 2
SUPPLEMENTAL SPECIFIC RULES FOR EACH INSTITUTION

The following requirements are in addition to those given in chapter 1 of regents board rules.

UNIVERSITY OF IOWA

2.1(262) Formal application for admission. All applicants for admission to any college of the University of Iowa must submit a formal application for admission with the required official transcripts and other supporting material as required to the dean of admissions and registrar. Students may not be registered until they have been issued an admission statement by the dean of admissions and registrar.

2.2(262) Parietal rule. All unmarried freshmen and sophomore students are required, as a condition of registration at the state University of Iowa for the semester or session, to reside in university residence halls, except that such residence shall not be required of any student beyond the time the student, following the normal course from secondary school to college, would have completed three years at the college level; and except as hereinafter provided. Failure of a student to comply with this condition of registration is cause for denial or cancellation of registration.

2.2(1) *Exemptions.* Students subject to the parietal rule may request an exemption for the following reasons:

a. Actual local residence with parent, legal guardian, grandparent, adult sister or brother, or adult aunt or uncle, providing the parietal rules do not apply to both parties concerned.

b. Medical necessity certified in writing by a licensed physician, subject to the approval of the university which shall establish appropriate standards of general application for the determination of medical necessity.

c. Mandatory religious obligations impossible of performance in the residence halls which the student attests in writing that he in fact regularly observes and which a clergyman of the student's religious faith certifies in writing are mandatory.

d. Actual local residence in a place of bona fide employment certified in writing by the employer as a necessary condition of employment and in exchange for which the student receives at least one-half of the rent normally charged.

e. Actual local residence in a social fraternity or sorority chapter house or other residential living unit operated and maintained by a recognized student organization exclusively for its members, which residential living unit has been approved by the university as providing those housing, dining and student life facilities which are essential to carrying out the philosophy of higher education contemplated by the establishment of the parietal rule.

f. Actual residence in state University of Iowa residence halls for four semesters. Residence hall residence for two summer sessions is equivalent to one semester.

g. The student making the request is a veteran of the armed forces of the United States who has been discharged or released from active duty service.

All requests for exemption from the parietal rule shall be submitted to the university at least 30 days prior to the beginning of the semester or session for which exemption is requested, unless a later time is authorized. The university may require that requests be submitted on prescribed forms and that supporting documents or other evidence be provided, and the burden is on the student to demonstrate to the satisfaction of the university that he is entitled to an exemption. The university is authorized to establish further internal procedures for the administration of these rules and to delegate to appropriate university staff personnel any duty or function prescribed herein.

2.2(2) *Enforcement.* Failure of a student subject to the parietal rule to comply with this condition of registration is cause for denial or cancellation of registration. If, upon registration or at any time thereafter, a student subject to the parietal rule is found not to be in compliance therewith, including the failure of a student who has been granted an exemption to comply with the conditions thereof, a written notice shall be sent to the student affording him a reasonable opportunity to submit proof of compliance or otherwise to show cause why his registration should not be denied or canceled or his exemption revoked. If the student fails to submit proof or show cause satisfactory to the university, his registration shall forthwith be denied or canceled or his exemption revoked, as the case may be. Upon subsequent application and proof of compliance satisfactory to the university and upon payment of all required fees, the student shall be registered or reinstated in accordance with established procedures.

2.2(3) *Review.* A student aggrieved by any adverse decision with respect to the administration of the parietal rule may request an administrative review of the decision by the university. Such request shall be made in writing and shall state with particularity the reasons therefor. Pending administrative review, the student's registration shall not be denied or canceled. After review,

the decision of the university is final, subject to the student's right to request a review by the state board of regents in accordance with procedures established by the board. Unless otherwise ordered by the board, a student must be in compliance with the parietal rule as a condition of continued registration at the university pending board action on the request for review.

2.2(4) *Definitions.* As used herein, the following words shall mean:

a. "University" means the state University of Iowa or the appropriate university administrator to whom any particular duty or function prescribed herein is delegated.

b. "Parietal rule" means the condition of registration at the university established by these rules.

c. "Freshman" student means any undergraduate student registered for nine or more semester hours who has not previously earned 28 or more semester hours of credit toward a baccalaureate degree at the university.

d. "Sophomore" student means any undergraduate student registered for nine or more semester hours who has not previously earned 56 or more semester hours of credit toward a baccalaureate degree at the university.

For the academic year 1971-72 the rules shall apply only to freshman students and to sophomore transfer students who have not previously completed at least 13 semester hours while in residence at the university.

[Filed June 18, 1971; amended June 14, 1972, July 17, 1972]

2.3(262) College of business administration.

2.3(1) *Application for admission.* Applications for admission to the college of business administration should be submitted to the director of admissions.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.3(2) *Requirements for admission.* For admission to the college of business administration an applicant must have—

a. Completed specific course work as prescribed by the faculty of the college.

b. Attained satisfactory scores on the university's required admission examinations.

c. Maintained a satisfactory grade-point average on all courses undertaken, and on all courses undertaken at the University of Iowa, and on all courses undertaken in business and economics.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimal requirements listed above, however, does not assure admission to the college of business administration. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

[Filed March 23, 1964;
amended March 10, 1966]

2.4(262) College of dentistry.

2.4(1) *Application for admission.* Address all inquiries regarding admission to the Director of Admissions and Registrar, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Applicants for admission to dentistry are encouraged to complete a program leading to a baccalaureate degree before entering dentistry. Applicants should consider a combined program of liberal arts and dentistry which would qualify them for a baccalaureate degree upon the completion of the freshman year in dentistry. Preference will be given to students who have the baccalaureate degree or who have completed the requirements for the degree in a combined program.

Fulfillment of the specific requirements for admission listed does not insure admission to the college of dentistry. From the applicants meeting the minimum requirements, the admissions committee will select the applicants who in their judgment appear to be best qualified for the study and practice of dentistry.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work outlined below will suffice to meet the minimal academic requirements for admission to the college of dentistry.

The college curriculum must include at least three academic years of accredited work comprising not less than 96 semester hours and including specific required science courses as prescribed by the faculty of the college. Electives should be chosen so as to give the applicant a well-rounded educational background.

In order to meet minimum scholarship requirements the applicant should attain a cumulative grade-point average of 2.5. Since the quality of course work in predental science is basic to success in dentistry, special consideration to such college work is given by the admissions committee. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of admissions

and the committee on admissions of the college of dentistry.

Applicants who have completed the requirements for admission to dentistry five or more years prior to seeking admission to this college of dentistry will be considered by the admissions committee only under exceptional conditions.

Applicants from those who are more than 30 years of age will be considered for acceptance only in exceptional cases.

Preference will be given to applicants who are residents of Iowa, but consideration will also be given to outstanding nonresidents.

Personal interviews will be required of applicants for admission to the college of dentistry. Applicants will be notified when they should appear for the required interviews with members of the admissions committee.

All applicants must complete the dental aptitude tests sponsored by the council on dental education of the American Dental Association. Tests are given three times annually. The University of Iowa is a testing center.

To facilitate early selection, applicants for admission to the college of dentistry are urged to complete the aptitude test no later than October to enable the admissions committee to begin its selection in December.

Accepted applicants are required to make the required deposit within two weeks after notification of favorable action on their applications. This deposit is not refundable but is credited toward the first fee payment. The applicant who fails to make the deposit within the time specified forfeits his place in the entering class.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and a successful vaccination against smallpox prior to registration.

2.4(2) *Advanced standing.* Applications for admission with advanced standing are handled as individual cases.

[Filed March 10, 1966]

2.5(262) College of engineering. Address all inquiries regarding admission to the Director of Admissions, University of Iowa, Iowa City, Iowa.

Closing dates for receiving applications will be announced well in advance of the opening date of any session.

2.5(1) *Admission of freshman students.* The applicant must submit a formal application for admission and must have the secondary school provide a certificate of high school credits, including a complete statement of the applicant's high school record, rank in class, scores on standardized tests, and certification of high school graduation. The applicant must also submit any other evidence such as a certificate of health that may be required by this university.

Each applicant must have attained satisfactory scores on the university's required admission examinations, maintained a satisfactory cumulative grade-point average, achieved satisfactory rank in graduating class, and successfully completed all prerequisite courses. The university with the approval of the state board of regents shall establish and periodically review specific minimum requirements for admission to the college of engineering. Among the items to be so determined are test score, grade-point average, class rank and prerequisite courses. These specific determinations will be published in the university catalog.

From applicants who do not meet minimum admission requirements, the director of admissions may after a review of the applicant's record: (*a*) Admit unconditionally, (*b*) admit on probation, (*c*) require enrollment for a tryout period during a preceding summer session or (*d*) deny admission.

2.5(2) *Admission of undergraduate students by transfer.* The applicant must submit a formal application and official transcript of college work. Each applicant should have:

a. Maintained satisfactory progress in mathematics.

b. Attained satisfactory scores on the university's required admission examinations.

c. Maintained a satisfactory cumulative grade-point average on all college work undertaken.

From applicants who do not meet recommended requirements, the director of admissions will review individual records and may offer probationary admission.

[Filed March 23, 1964;
amended March 10, 1966]

2.6(262) Graduate college. Graduates of any college or university accredited by regional accrediting associations may if the academic record is satisfactory be admitted to the graduate college. Admission to the graduate college is not the equivalent of acceptance as a candidate for an advanced degree. Such acceptance is given usually after the completion in residence of work at the university and upon recommendation of the major department and approval by the dean of the graduate college. The acceptance of a student as a degree candidate is determined upon the merits of each individual case.

A student who is within four semester hours of having satisfied all the requirements for the bachelor's degree in the University of Iowa may be given a tentative admission to the graduate college.

2.7(262) College of law.

2.7(1) *Application for admission.* Address all inquiries concerning admission to the Director of Admissions, University of Iowa, Iowa City, Iowa. Beginning students may enter the college of

law only in the summer session or the fall semester. Except for good cause shown, applications for admission must be filed by May 1 preceding the fall semester in which the applicant wishes to enter.

To be considered for admission, an applicant should have attained a cumulative grade-point average of at least 2.3 on all college work undertaken. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of admissions.

Applicants for admission must present a baccalaureate degree from an approved college or university prior to commencing work in the college of law.

Each applicant for admission must take the Law School Admission Test administered by the Educational Testing Service, Princeton, New Jersey, and have his score forwarded to the college of law. The test is given several times per year and may be taken at numerous locations in the United States and throughout the world. Applicants are urged to take the test in the fall or winter preceding the fall semester for which they are making application. Except upon a showing acceptable to it, the admissions committee will not consider applications from students who fail to take the test prior to the June 1 preceding the fall semester in which they wish to enter.

Fulfillment of the specific requirements for admission listed above does not insure admission to the college of law. From the applicants meeting the minimum requirements, the admissions committee of the college of law will select those applicants who, in their judgment, appear to be best qualified for the study and practice of law. The law admissions committee may require personal interviews of applicants.

2.7(2) *Admission with advanced standing.* A transfer student may be eligible for admission if he (*a*) has attended a school approved by the Association of American Law Schools; (*b*) is in good standing at the time of his withdrawal (evidenced by a letter from the dean of the school from which he is transferring); (*c*) meets the admission requirements for beginning students; and (*d*) has done substantially above average work in the law school he attended. Where an applicant has completed more than one year of law study, advanced standing will be permitted only in exceptional cases. Applicants for admission with advanced standing should comply with the procedures required for admission to the first-year class.

[Filed May 22, 1964; amended September 18, 1964, December 14, 1966, November 17, 1972]

2.8(262) College of medicine.

2.8(1) *Application for admission.* Address all inquiries regarding admission to the Director of Admissions and Registrar, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Applications from those who are more than 30 years of age will be considered for acceptance only in exceptional cases.

Fulfillment of the specific requirements for admission listed below does not insure admission to the college of medicine. From the applicants meeting the specific requirements, the admissions committee of the college of medicine will select those applicants who in their judgment appear to be best qualified for the study and practice of medicine.

Prior to entrance an applicant must:

a. Have received the baccalaureate degree; or

b. Have completed three years of a combined baccalaureate-medicine curriculum which qualifies him to receive the baccalaureate degree on completion of the first year in medicine; or

c. Have completed three years of a baccalaureate program which includes the general graduation requirements of the college of liberal arts of the University of Iowa for the combined baccalaureate degree.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work as outlined below will suffice to meet the minimal academic requirements for admission to the college of medicine.

Applicants who have completed the baccalaureate degree and required courses five or more years prior to seeking admission to this college of medicine will be considered by the admissions committee only under exceptional conditions.

The college curriculum must include at least three years (equivalent to 96 semester hours) including specific required science courses as prescribed by the faculty of the college.

Students planning to study medicine should bear in mind that other college work is required in addition to prerequisite sciences because it offers an opportunity to secure a well-rounded education, which is of special importance to those entering the medical profession. In the selection of applicants, preference will be given to those who give evidence of having obtained such a broad education.

To be considered for admission, an applicant must have attained a grade-point average of at least 2.5 for all college work undertaken. As the quality of work in premedical science is very basic to success in medicine, special attention will be given by the admissions committee to grades in science. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of

admissions and the committee on admissions of the college of medicine.

Preference will be given to applicants with high scholastic standing who are residents of Iowa, and consideration will also be given to outstanding nonresidents. Applicants for admission are required to take the medical college admissions test which is administered for the Association of American Medical Colleges. Applicants are requested to complete this test in May or October of the year preceding that for which they are applying for admission. Students may make arrangements to apply for this examination through the university examination service, the University of Iowa.

Personal interviews will be required. Applicants will be contacted for the appointment for required interviews.

Applicants accepted for admissions are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through Student Health Service, an X-ray film of the chest and successful vaccination against smallpox prior to registration.

2.8(2) *Admission to advanced standing.* If their work preparatory to entering a college of medicine would have met entrance requirements of this college, students from other approved medical colleges may be admitted to advanced standing according to the following conditions:

Only applicants of high scholastic standing will be considered.

They must present certificates showing that they have satisfactorily completed courses equivalent to those already pursued by the class they wish to enter.

The committee on admission to advanced standing will decide in each case whether examinations in the various subjects will be required.

Applications will be considered only upon receipt of a statement from the dean or registrar of the college from which the applicant comes, showing the actual amount of time the student has spent in the study of medicine, the courses taken, and the grades received, together with a statement of the work preparatory to entering upon the course in medicine.

No advanced standing will be granted to students from other than approved medical schools. Students may be granted subject credit upon recommendation of the head of the department concerned, for work taken in other than medical schools.

2.8(3) *Unclassified students.* Applicants for admission to the college of medicine who are not candidates for a degree but who desire to register for special subjects, will be admitted to any lecture or laboratory course only upon complying with all the regular requirements for admission to such course or by action of the faculty upon recommendation of the professor in charge of the course.

[Filed March 23, 1964; amended November 15, 1963, March 10, 1966]

2.9(262) College of nursing. Applications for admission to the college of nursing should be submitted to the Director of Admissions, University of Iowa, Iowa City, Iowa. Applicants for admission to the undergraduate program in nursing must present a minimum of 30 semester hours completed in an accredited college. For admission to the college of nursing an applicant must have:

1. Completed specific coursework as prescribed by the faculty of the college. The director of admissions will provide a list of the coursework required.
2. Completed the American College Tests.
3. Performed satisfactorily on all courses undertaken.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and, upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimum requirements listed above, however, does not assure admission to the college of nursing. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

[Filed July 18, 1962; amended July 22, 1965, November 17, 1972]

2.10(262) College of pharmacy.

2.10(1) *General basis for admission.* Fulfillment of the specific requirements for admission does not insure admission to the college of pharmacy. From the applicants meeting the specific requirements, the admissions committee will select those applicants who in their judgment appear to be best qualified. Applicants for admission to pharmacy should have graduated from an approved high school or have an equivalent amount of training.

2.10(2) *College work.* The college work as outlined below will meet the minimum academic requirements for admission to the college of pharmacy. The minimum should include 32 semester hours of college level work exclusive of credit in military and air science and physical education. The 32 semester hours must include:

Communication skills. Applicants must have demonstrated satisfactory achievement in communication skills according to the requirements of the college of liberal arts at the state University of Iowa. Applicants from other institutions may meet this requirement by presenting six semester hours of credit in English composition and rhetoric and

two semester hours of credit in speech or an eight-semester-hour year course in communication skills.

Inorganic chemistry and qualitative analysis, eight semester hours.

College mathematics, eight semester hours.

Physics or zoology, eight semester hours.

Students from other institutions may substitute a comparable eight-semester-hour course in biology in lieu of zoology.

Military or air science (if available) 0-2 semester hours.

Students who present minor deficiencies in meeting the above requirements may be admitted to the college of pharmacy upon the recommendation of the dean of admissions and the college of pharmacy.

2.10(3) *Scholarship and application deadline.* To be considered for admission to the college of pharmacy, students must have earned a 2.0 or C average on all collegiate work undertaken. The minimum grade-point average of 2.0 is based on the state University of Iowa's marking system in which the grade of "A" is equivalent to four points. Applications for admission and the required official transcripts should be filed before March 1 for the class to enter pharmacy in September.

2.10(4) *Required tests.* Applicants for admission are required to take the American College Testing Program test.

2.10(5) *Current requirements.* Applicants who have completed work in a college of pharmacy accredited by the American Council on Pharmaceutical Education may if their college academic average is acceptable be admitted and granted advanced standing toward the degree of bachelor of science in pharmacy.

2.11(262) College of liberal arts. Applicants for admission to liberal arts must meet the rules that are common to the three state institutions in Iowa as listed in 1.1(262), 1.2(262) and 1.3(262).

2.12(262) College of education. Students at the university desiring professional work in education are registered in the college of liberal arts or the graduate college. Requirements for permission to take teacher-training courses are listed in the university catalogue.

2.13 to 2.24 Reserved for future use.

IOWA STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY

2.25(262) Undergraduate students. A minimum of one unit of algebra is required for admission to all curricula. A nonhigh school graduate, in addition to meeting standards in 1.1(262), must be at least 17 years of age and have an unqualified recommendation from his high school principal. Requirements for admission to the several colleges are given below.

2.25(1) *College of agriculture.* A minimum of one and one-half units of algebra is required of students entering any four-year curriculum. In addition, the curricula in agricultural journalism, forestry, industrial education and landscape architecture require one unit of geometry. Students who have not completed all of the required mathematics courses may take geometry or third semester algebra at Iowa State University. The requirements for admission to agricultural engineering are the same as for the college of engineering.

2.25(2) *College of engineering.* One unit of geometry and one and one-half units of algebra are required. Students who have not completed all of these courses may take geometry or third semester algebra at Iowa State University.

2.25(3) *College of home economics.* Two units of mathematics are required. One of the units must be algebra. The other unit may be algebra, geometry or trigonometry in any combination. Students who have not completed all of the required mathematics courses may take geometry or third semester algebra at Iowa State University.

2.25(4) *College of sciences and humanities.* For the curricula in sciences and humanities and chemical technology one and one-half units of algebra and one unit of geometry are required. Students who have not completed all of these courses may take geometry and third semester algebra at Iowa State University. For the curriculum in physical education for men one unit of algebra is required.

2.26(262) College of veterinary medicine.

2.26(1) *Admission.* Applicants for admission to the college of veterinary medicine must present 1½ units of algebra and 1 unit of geometry from an approved high school and a total of not less than 90 quarter (60 semester) credits from an approved college or university.

The specific college credits will be prescribed by the faculty of the college.

Preprofessional students at Iowa State University enroll in either the college of agriculture or the college of sciences and humanities. A preveterinary student at Iowa State University may elect a three-year preveterinary program which when combined with the veterinary curriculum will lead to a Bachelor of Science Degree in the college of agriculture or in the college of sciences and humanities.

All preveterinary students must have completed at least 45 quarter (30 semester) credit hours prior to filing an application for admission to the college of veterinary medicine. Applications must be filed with the director of admissions and records (Room 104 Beardshear Hall) prior to March 1 of the year in which the applicant seeks admission. A transcript of all high school and college credits must accompany the application. All preveterinary re-

quirements must be fulfilled by the time of filing or scheduled for completion by June 15 of the year in which the applicant seeks admission. A list of courses in progress at the time of filing or scheduled for completion by June 15 should accompany the application and transcript. Preprofessional college credits must average at least 2.25 on a four-letter marking system with "A" as the highest mark (4.0) and "D" as the lower mark (1.0). The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Because of limited facilities, admission to the college of veterinary medicine is on a competitive and selective basis. A preadmission conference with members of the veterinary faculty or other persons designated by the dean is required. High school records, scholastic performance in preprofessional course studies, aptitude, character and personality are given special consideration in the selection of candidates. Other qualifications being equal, residents of the state of Iowa are given preference.

Admission to the college of veterinary medicine is granted annually at the beginning of the fall quarter only.

2.26(2) *Readmission.* Any student who voluntarily withdraws from the college of veterinary medicine or who is dropped for cause, forfeits his standing and must make written application for reinstatement to this college 30 or more days prior to the opening of the quarter in which the student desires readmission.

[Filed September 30, 1960;
amended March 21, 1967]

2.27(262) Graduate college.

2.27(1) *Qualifications.* An applicant who is a graduate of an institution in the United States whose requirements for the bachelor's degree are substantially equivalent to those at Iowa State University, and who ranks in the upper one-half of his class, may be admitted to the graduate college. Admission does not constitute acceptance as a candidate for a degree.

Admission to the graduate college may not be granted to a graduate of an institution in the United States which is not accredited by a recognized regional association.

2.27(2) *Restricted admission.* An applicant may be granted restricted admission upon the recommendation of the department head and approval of the graduate dean. Acceptance of credit earned under restricted admission and transfer to unrestricted admission requires recommendation by the department head and the approval of the graduate committee.

Graduates of recognized universities located outside the United States may be granted restricted admission only.

2.28(262) Technical institute. One unit of geometry and one and one-half units of algebra are required. Students who have not completed all of these courses may take geometry or third semester algebra at Iowa State University. Provided, however, that unconditional admission to the technical institute may be granted to students who are not in the upper one-half of their graduating class.

2.29 to 2.34 Reserved for future use.

UNIVERSITY OF NORTHERN IOWA

2.35(262) Admission policies for undergraduate students. A student must have filed an application for admission with the required transcripts and other supporting material, have met all conditions named in chapter 1 of regents board rules, and been issued an admissions statement by the director of admissions and registrar before he is permitted to register in the college. In considering an application, consideration is given to scholarship, health, character and personality. Individual students may be required by the committee on admission and retention to come to the campus for interview and tests. Those who do not give reasonable promise of success as a college student may be denied.

2.36(262) Parietal rule. All unmarried freshmen and sophomore students are required, as a condition of registration at the University of Northern Iowa for the semester or session, to reside in university residence halls, except as hereinafter provided. Failure of a student to comply with this condition of registration is cause for denial or cancellation of registration.

2.36(1) *Exemptions.* Students subject to the parietal rule may request an exemption for the following reasons:

a. Actual local residence with parent, legal guardian, or adult close relative, providing the parietal rule does not apply to both parties concerned.

b. Medical necessity certified in writing by a licensed physician, subject to the approval of the university which shall establish appropriate standards of general application for the determination of medical necessity.

c. Mandatory religious obligations impossible of performance in the residence halls which the student attests in writing that he in fact regularly observes and which a clergyman of the student's religious faith certifies in writing are mandatory.

d. Actual local residence in a place of bona fide employment certified in writing by the employer as a necessary condition of employment and in exchange for which the student receives at least one-half of the rent normally charged.

e. Actual local residence by sophomore students who wish to live in houses operated by university recognized student organizations of which they are members; such houses must meet at least the minimum housing standards of the city of Cedar Falls and the university's own regulations governing student organizations and their operation of houses.

All requests for exemption from the parietal rule shall be submitted to the university at least 30 days prior to the beginning of the semester or session for which exemption is requested, unless a later time is authorized. The university may require that requests be submitted on prescribed forms and that supporting documents or other evidence be provided, and the burden is on the student to demonstrate to the satisfaction of the university that he is entitled to an exemption. The university is authorized to establish further internal procedures for the administration of these rules and to delegate to appropriate university staff personnel any duty or function prescribed herein.

2.36(2) *Enforcement.* Failure of a student subject to the parietal rule to comply with this condition of registration is cause for denial or cancellation of registration. If, upon registration or at any time thereafter, a student subject to the parietal rule is found not to be in compliance therewith, including the failure of a student who has been granted an exemption to comply with the conditions thereof, a written notice shall be sent to the student affording him a reasonable opportunity to submit proof of compliance or otherwise to show cause why his registration should not be denied or canceled or his exemption revoked. If the student fails to submit proof or show cause satisfactory to the university, his registration shall forthwith be denied or canceled or his exemption revoked, as the case may be. Upon subsequent application and proof of compliance satisfactory to the university and upon payment of all required fees, the student shall be registered or reinstated in accordance with established procedures.

2.36(3) *Review.* A student aggrieved by any adverse decision with respect to the administration of the parietal rule may request an administrative review of the decision by the university. Such request shall be made in writing and shall state with particularity the reasons therefor. Pending administrative review, the student's registration shall not be denied or canceled. After review, the decision of the university is final, subject to the student's right to request a review by the state board of regents in accordance with procedures established by the board. Unless otherwise ordered by the board, a student must be in compliance with the parietal rule as a condition of continued registration at the university pending board action on the request for review.

2.36(4) *Definitions.* As used herein, the following words shall mean:

a. "University" means the University of Northern Iowa or the appropriate university administrator to whom any particular duty or function prescribed herein is delegated.

b. "Parietal rule" means the condition of registration at the university established by these rules.

c. "Freshman" student means any undergraduate student registered for nine or more semester hours who has not previously earned 31 or more semester hours of credit toward a baccalaureate degree at the university.

d. "Sophomore" student means any undergraduate student registered for nine or more semester hours who has earned at least 32 and not more than 63 semester hours of credit toward a baccalaureate degree at the university.

[Filed June 18, 1971; amended July 17, 1972]

2.37(262) Teaching curricula. Application for approval in a teacher education program may be filed after a student has earned at least 24 semester hours credit. The student must pass such tests and meet such other standards as may be prescribed by a teacher education committee. For full approval, a student must have at least a 2.20 grade index at this college. The committee may grant provisional approval for students in exceptional cases, but may not grant full approval until all standards have been met. Normally a student will be expected to meet full approval by the beginning of the junior year if he wishes to complete requirements in the minimum time. Transfer students cannot earn full approval before the end of the first semester enrolled at University of Northern Iowa.

A student may, at the time of admission to the college, declare an intent to enter a teaching program and be assigned a teacher adviser from his first enrollment. The college must give special consideration to scholarship, health, character, personality, and quality of potential leadership of an applicant for a teaching curriculum. [Amendment filed and indexed November 21, 1961]

2.38(262) Admission requirements for graduate students. A graduate of a college or university accredited by the National Council for the Accrediting of Teacher Education or by the North Central Association of Colleges and Secondary Schools or a corresponding regional agency will be granted admission to graduate study if his application for admission has been approved by the registrar.

A graduate of a college or university that is not accredited may be granted conditional admission at the discretion of the registrar. Admission to graduate study does not guarantee admission to candidacy for an advanced degree.

CHAPTER 3
PERSONNEL ADMINISTRATION

ORGANIZATION AND ADMINISTRATION

3.1(19A) Creation and purpose. The purpose of these rules is to give effect to the provisions of chapter 19A of the Code to establish an efficient, effective and uniform system of personnel administration for board of regents institutions

and staff, to provide equal employment opportunity for all and career opportunities comparable to those in business and industry.

3.2(19A) Covered employees. All employees of the board of regents, except those exempted by the state merit employment Act, will be covered under the rules of this system. Employees hired into permanent positions one year or more prior to the date of implementation of these rules will be given permanent status and full rights hereunder. Employees hired less than one year prior to the date of implementation of these rules will be required to complete a probationary period in accordance with 3.90(19A). Service immediately prior to the date these rules are implemented will count as probationary time.

3.3(19A) Administration. Under authority of the board of regents and the supervision of its executive secretary, a merit system co-ordinator will be appointed; and in co-operation with institutional resident directors, will be responsible for the development and operation of the system in compliance with the objectives and intent of the state merit employment Act. At each board of regents institution the head thereof will designate an administrator to serve as resident director of the system. With co-ordination by the merit system co-ordinator the resident director will be responsible through the chief executive at his institution for conducting a program of personnel administration in accordance with these rules.

3.3(1) *Records and reports.* The resident directors will maintain an individual file on each employee that will include a record of all personnel transactions affecting that individual. The resident directors will also maintain records on operations conducted under these rules and will periodically as requested, and at least annually, report a summary of such operations to the merit system co-ordinator. The resident director will establish, in co-operation with employing departments, a program that will provide for the regular evaluation, at least annually, of the qualifications and performance of all employees.

3.3(2) *Nondiscrimination.* All programs and transactions administered under these rules will be conducted on the basis of merit and fitness without discrimination or favor because of political or religious opinions or affiliations or national origin, race, sex or age except as prescribed or permitted under state and federal law.

3.3(3) *Political activity.* No employee covered under this system will engage in any partisan political activity that is prohibited by law.

Those employees who are by law subject to the provisions of the federal Hatch Act will be informed of such provisions by the resident director at their institution and will be required to adhere thereto.

3.3(4) *Revisions and additions.* In accordance with the provisions of chapter 19A of the Code, these rules may be revised at any time. In addition, supplementary rules subject to chapter 17A of the Code, not inconsistent with these rules may be made applicable to any department, program or service, whenever such additional merit system provisions are required as a condition of eligibility for federal funds.

[3.1 to 3.3 Filed July 12, 1971;
amended July 17, 1972]

3.4 to 3.13 Reserved for future use.

DEFINITIONS

3.14(19A) Definitions.

3.14(1) *"Certification"* is the determination, in accordance with the rules, by the resident director of the people from which an employing department may select to fill a vacancy.

3.14(2) *"Class"* consists of one or more positions involving similar work of the same level of difficulty and responsibility. To classify means to allocate a position to a class.

3.14(3) *"Demotion"* is a change from one class to another class which is assigned to pay grade having a lower minimum rate.

3.14(4) *"Eligibility lists"* are lists of the names of qualified applicants who have passed the examination prescribed for a particular class of position.

3.14(5) *"Eligibility register"* consists of the names of the three available candidates who have the highest standing on an eligibility list.

3.14(6) *"Examination"* is a test of fitness that is applied to determine the eligibility of an applicant for a class.

3.14(7) *"Grievance"* is a dispute or complaint concerning the interpretation or application of merit system or institutional rules governing terms of employment and working conditions.

3.14(8) *"Permanent employee"* is an employee who has completed the probationary period and thereby acquired permanent status in accordance with the rules of the system.

3.14(9) *"Position"* means a group of specific duties, tasks and responsibilities assigned to one employee. A position may be full-time or part-time, temporary or permanent, occupied or vacant.

3.14(10) *"Probationary period"* is a work test period that is a part of the examination process following an original appointment during which an employee is required to demonstrate his or her fitness for the position to which appointed.

3.14(11) *"Promotion"* is a change from one class to another class which is assigned to a pay grade having a higher minimum pay rate.

3.14(12) *"Reduction in force"* is a layoff resulting from a shortage of funds or work, a change in duties or organization.

3.14(13) *"Re-employment"* is the reappointment of an employee who has been laid off.

3.14(14) *"Reinstatement"* is the reappointment of an employee who has resigned in good standing.

3.14(15) *"Resident director"* is the person appointed by the head of each regents institution to administer the merit system rules at that institution.

3.14(16) *"Suspension"* is a leave of absence without pay enforced as a disciplinary measure.

[3.14 Filed June 14, 1972]

3.15 to 3.24 Reserved for future use.

CLASSIFICATION

3.25(19A) Preparation and maintenance of the classification plan. In co-operation with the resident directors, under co-ordination of the merit system co-ordinator and subject to approval by the board of regents, a classification plan will be prepared to cover all the positions under this system. The plan will be developed and maintained so that all positions that are substantially similar and comparable in regard to the kind and difficulty of work and the level of responsibility are included in the same class, so that the same minimum qualifications are required for all positions in the same class (except as provided in 3.69(2) of these rules), so that the same type of examination may be used in filling all positions in a class, and so that the same pay schedule may be equitably applied (except for geographical differences) to all positions in the class. For each class of position the plan will include a class title, a definition of the job, examples of the kind of work performed, the minimum qualifications for the class including special requirements when applicable.

3.26(19A) Administration of the classification plan. Each position in the classification plan will be reviewed periodically by the resident director, or at the request of an employing department or an employee in accordance with 3.127(19A) of these rules. Subject to the appeal provisions of these rules, classification and reclassifications will be the responsibility of the resident director at each institution. All such transactions will be regularly reported to and may be reviewed by the merit system co-ordinator who will be responsible for the uniform maintenance of the plan for all positions under the system.

In co-operation with the resident directors, under co-ordination of the merit system co-ordinator and subject to approval by the board of regents, new classes may be established and existing classes changed or abolished to meet the needs of the institutions and to properly reflect changes in work and the organization thereof. When the classification of a position is changed, the encumbent will be entitled to continue service in the position provided he meets the minimum qualifications or provided the duties have not changed appreciably. If the encumbent is not eligible to continue he may be transferred, promoted, demoted or laid off in accordance with the rules. Changes in classification will not be used to avoid other provisions of these rules relating to layoffs, promotions, demotions and dismissal.

[3.25, 3.26 Filed June 14, 1972]

3.27 to 3.36 Reserved for future use.

COMPENSATION PLAN

3.37(19A) Preparation, content and adoption of the pay plan. The board of regents will adopt a pay plan for all the classes established in the classification plan. The pay plan will consist of a schedule or schedules of numbered grades with minimum, maximum and intermediate steps for each grade. Each class will be assigned to a pay grade. The plan will be developed to reflect the relative difficulty and responsibility of the work involved in the various classes, what is paid for similar work by other employers in the pertinent labor market, and the availability of funds. The plan will be uniformly applicable to all regents institutions except for variances approved on the basis of geographical differences. Prior to final approval by the board of regents, the plan will be the subject of a public hearing conducted after reasonable and adequate notice at each board of regent institution. After approval by the board of regents the plan will be submitted for approval to such other authority as required by law.

3.38(19A) Review and revision of the pay plan. At least once each year the complete pay plan will be reviewed for revision by the board of regents in the same manner and following the same procedure stated in 3.37(19A). At any time new classes may be established and other revisions may be made in the plan to reflect proper relationships and to facilitate recruitment and retention. Such changes will be effective after approval by the board of regents and other authority as required by law.

3.39(19A) Administration of the pay plan. Within the provisions of these rules, the pay plan will be uniformly administered by the resident directors under co-ordination by the system co-ordinator for all classes in the system. Except as otherwise provided in these rules and in the pay plan, all employees will be paid at one of the steps of the pay grade to which the class is assigned and such pay will constitute the total cash remuneration the employee receives for his work in that position. Prerequisites such as subsistence and maintenance allowances will be considered a part of pay and the value of such will be deducted from an employee's rate of pay.

3.39(1) *Entrance salaries.* The entrance salary for an employee in any position under this system will be the minimum salary of the pay grade to which that class of position is assigned except as provided for the following:

a. Appointment based on a scarcity of qualified applicants. At the request of an institution and on the basis of economic or employment conditions which make it difficult or impossible to recruit at the minimum rate of the pay grade to which a class of position is assigned, a resident director, subject to approval by the merit system co-ordinator, may authorize for a designated period of time recruitment for that class at a rate higher than the minimum. Where such a higher entrance rate is authorized all employees in the same class and under the same conditions, who are earning less than the higher entrance rate, will be increased to that higher rate.

b. Appointment based on exceptional qualifications. Employees whose qualifications substantially exceed the minimum required, or who possess outstanding experience relative to the demands of the position, may at the request of an institution, be appointed at a rate higher than the minimum, provided that the pay of all other employees with similar qualifications working under the same conditions at the same institution are raised to that higher rate. Such appointments must be approved by the resident director and reported to the merit system co-ordinator. Such appointments which necessitate the adjustment of the salaries of employees other than the appointee will, in addition, require prior approval of the merit system co-ordinator.

3.39(2) *Merit increases.* Except as may be otherwise provided in the pay plan, a merit increase is the result of a change in salary from one step to the next higher step in the pay grade to which the class is assigned. Employees will be eligible for merit increases in accordance with the schedule prescribed in the pay plan. All increases in base rates of pay, except for special assignment in accordance with 3.39(6) and reassignment in accordance with 3.39(8) will establish new eligibility dates. Merit increases in pay will not be made retroactively but may be denied or deferred on the basis of work performance. An employee whose merit increase is denied or deferred will, prior to the scheduled effective date of increase, be informed of such action by a written statement from his or her employing department which specifies the reason for the denial or deferral. An extra meritorious increase to the next highest step in the pay range may be approved by the resident director for exceptional service, on written request from a department head and with the approval of the chief executive of the institution. No employee will be given more than one such increase in any 12-month period, nor will any employee who has served in his position for less than three months receive an extra meritorious increase. Extra meritorious increases will be reported to the merit system co-ordinator who will periodically submit a report thereon for review by the board of regents.

3.39(3) Reserved for future use.

3.39(4) *Pay on demotion.* The pay of an employee who is demoted will be determined by his department head as approved by the resident director, and set at any step within the new pay grade that does not exceed the rate at which the employee was paid in the position from which he was demoted.

3.39(5) *Pay on reinstatement, re-employment or return from leave.* An employee who returns from a leave, who is reinstated, or who is re-employed, will if returned to the same class, be paid at a rate no less than what the employee was last paid and no higher than that provided at the step of the pay grade at which the employee was last paid.

3.39(6) *Pay for special assignment.* Employees who are given special assignments in accordance with 3.102(2) of these rules will be paid for the duration of such assignment, at the minimum step of the pay grade to which the class of position whose duties the employee is performing is assigned, or, if the employee is already paid at a rate equal to or higher than the minimum, he will be paid at the next higher step, provided that the class of position whose duties the employee is temporarily performing is in a pay grade with a higher minimum rate than the grade from which the employee is regularly paid. If the class of position to which the employee is temporarily assigned under 3.102(2) is in the same pay grade or a grade with a lower minimum than the grade from which the employee is regularly paid, he will receive his regular salary during the period of special assignment.

3.39(7) *Pay on transfer.* Employees who are transferred from one position to another in the same class, or from one class to another in the same pay grade, will receive no adjustment in salary as a result thereof. The pay of an employee whose transfer involves a change in pay grade will be determined in accordance with the provisions of these rules regarding promotion or demotion.

3.39(8) *Pay on reassignment of the class of position to a different pay grade.* If the class of position is reassigned to a higher pay grade, all employees in that class will be raised to the minimum of the new pay grade. Those who are already being paid at a rate equal to or more than the minimum will be raised to the next higher step.

If the class of position is reassigned to a lower pay grade, the employee's rate of pay will remain the same.

3.39(9) *Pay for part-time employment.* Pay for part-time employment will be proportionately equivalent to the rate for full-time employment.

3.39(10) *Pay for overtime.* Employees covered under the provisions of the Fair Labor Standards Act will be paid for overtime work in accordance with the requirements of the law.

3.39(11) *Pay for call back.* Employees who are called back to work after completing their regular work schedule will be paid for a minimum period of two hours; employees who are called back to work after completing their regular work schedule will be paid for a minimum period of two hours, regardless of the time worked. Employees who are called back and work in excess of two hours will be paid for actual time worked.

[3.37 to 3.39 Filed June 14, 1972]

3.40 to 3.49 Reserved for future use.

APPLICATION AND EXAMINATION

3.50(19A) Applications. Applications for admission to examination for employment will contain no question so formed as to elicit any information concerning national origin, race, sex, or political or religious affiliation, and the truth of statements made on the application will be certified by the signature of the applicant.

3.51(19A) Examinations. Entrance to the service will be conducted on an open competitive basis. Examinations must be approved by the merit system co-ordinator and will be one of two kinds: Original entry or promotional. Examinations may, at the designation of the resident director, be conducted on a continuous basis, or they may be offered periodically as need or anticipated need for employees arises. Examinations will be practical in nature, constructed to reveal the capacity to successfully perform the job for which the applicant is competing, and will be rated objectively. They will be structured for necessary minimum levels of competence.

3.52(19A) Character of examinations. Examinations may be assembled or unassembled and may include written, oral, physical, or performance tests, or any combination of these. They may take into consideration such factors as education, experience, aptitude, knowledge, character, physical fitness, or other qualifications or attributes which enter into the determination of the relative fitness of applicants.

3.52(1) *Assembled examinations.* Assembled examinations will be conducted for those classes for which written tests are practical. Such examinations may include one or more of the following in addition to the written tests: Skill demonstration tests, physical tests, oral interviews and evaluations of training and experience.

3.52(2) *Unassembled examinations.* For those classes of a craft nature or where peculiar and exceptional qualifications are required and competition through an assembled examination is impractical, an unassembled examination may be held. Such examinations will consist of an evaluation of a statement of training and experience and such other materials as the applicants may be required to submit as evidence of fitness for a position, and may include oral interviews for evaluation of personal and technical qualifications and evaluations of other factors which enter into the determination of the relative fitness of applicants.

3.52(3) *Simplified examination procedure.* For positions involving unskilled, semiskilled, domestic, attendant or custodial work, where the character or conditions of employment make it impractical to supply the needs of the institution through procedures prescribed above, the resident director may adopt or authorize the use of such other procedures as he determines to be appropriate which will assure the selection of such employees on the basis of merit and fitness. Examinations so given will conform with and utilize such methods, forms and techniques as the director may require.

3.53(19A) Announcement of examinations. Announcement of examinations will be made publicly and will include the title, the current salary range and the minimum qualifications for the class; the date, time and place where the examination will be offered; and the manner in which applications for examination can be made. Announcements of original entry examinations will, in addition to other publication or distribution prescribed by the resident director, be displayed in the institution's employment office and distributed to all the state employment offices of the Iowa employment security commission. Announcements of promotional examinations will be displayed in the institution's employment office and at other locations on campus as may be prescribed by the resident director to bring such announcements to the attention of employees.

3.53(1) *Continuous examinations.* Announcement of original entry and competitive promotional examinations that are conducted on a continuous basis will be made at least once every six months, and will include a statement to the effect that applications will be accepted until further notice.

3.53(2) *Noncontinuous examinations.* Announcements of examinations not conducted on a continuous basis will include a statement indicating the latest date for filing application, and will be made public at least 15 days before the closing date for accepting applications. If, at the closing date, the resident director determines that the number of qualified applicants is insufficient to warrant offering the examination, he may extend that date and reschedule the examination, providing that persons who have applied to take the examination are notified.

3.54(19A) Eligibility to compete in examinations. Anyone who applies for employment in a specific class at a regents institution and

who meets the minimum qualifications prescribed for that class, and who is not rejected or disqualified under 3.55(19A), will have the right to take an examination when offered for that class.

3.55(19A) Rejection or disqualification of applicants. The resident director may reject any applicant or, after examination, may refuse to certify any candidate if it is found that the person:

1. Does not meet the minimum required qualifications for the class;
2. Is so disabled that he cannot perform the duties of the job;
3. Habitually uses narcotics or uses intoxicating beverages to excess;
4. Has made a false statement of material fact in his application;
5. Has information concerning the examination to which he is not entitled;
6. Has reached or will within one year reach normal retirement age;
7. Has been convicted of a felony or an indictable misdemeanor which makes him unsuitable for employment in a particular class or position;
8. Has been dismissed from private or public service for a cause that would be detrimental to his employment with the regents.

A disqualified applicant or eligible will promptly be notified in writing of such action at his last known address. A disqualified applicant or eligible may request review of the reason for his disqualification. Such request will be in writing and upon receipt the resident director will give full consideration to the request, and notify the applicant of his decision in writing.

3.56(19A) Administering the examination program.

3.56(1) *Security.* Necessary security precautions and procedures will be exercised by the resident director to maintain the highest integrity in the examination program.

3.56(2) *Notification of results.* Applicants will be notified in writing of the results of their test(s) as soon as possible, and test scores will be made available only to the applicant, the resident director and his staff, prospective employing departments, and the merit system co-ordinator.

3.56(3) *Review of ratings.* Any applicant may request a review of his test ratings, provided such a request is made within 15 days after notification of examination results. Such reviews will be made available only to the applicant and prospective employing departments.

3.56(4) *Retaking examinations.* Applicants may apply to retake examinations, but may not take the same form of a written examination more than once in any three-month period. Performance examinations, such as typing and shorthand tests, may at the discretion of the resident director, be retaken after one week but may not thereafter be repeated more than once a month.

3.56(5) *Transfer of examination results.* At the request of an applicant who has passed an examination for employment in a class at any regents institution, the results of that examination will be forwarded to any other regents institution, and the name of that applicant will be placed on the register of eligibles for that class at that institution in accordance with these rules. Such a request will be made by the applicant in writing to the resident director at the institution where the examination was taken, will specify the other regents institutions at which the applicant wishes to be considered for employment, and will contain a statement from the applicant indicating that he will be reasonably available for interviews should his name be certified for appointment. The examination results will be forwarded by the resident director at the examining institution to the resident director at the institution(s) specified by the applicant and the resident director who receives the examination results will notify the applicant of said receipt.

A resident director may refuse to accept the results of a promotional examination taken by an employee of another regents institution.

3.56(6) *Applicants address.* It will, at all times, be the responsibility of the applicant to see that his address on file with the resident director is current and correct.

3.56(7) *Disposition of examinations.* After an examination is completed and scored, the completed examination will be forwarded to the office of the merit system co-ordinator for filing.

3.56(8) *Veterans preference.* Veterans preference as provided by law.

[3.50 to 3.56 Filed May 11, 1971]

3.57 to 3.66 Reserved for future use.

CERTIFICATION AND SELECTION

3.67(19A) Eligibility lists. Insofar as possible, eligibility lists will be established and maintained by the resident director to fill the employment needs of the institution. Provision is hereby made for three kinds of eligibility lists: Re-employment, promotional and original entry, each of which will be maintained by class of position.

Re-employment lists will consist of the names of permanent employees who have been laid off or demoted without prejudice in accordance with these rules and will be maintained in the reverse order of layoff or demotion. Re-employment rights will not apply to positions in a class higher than the class from which an employee was laid off or demoted.

Original entry and promotional lists will be established as the result of competitive examinations and will consist of the names of all applicants who have qualified by passing examinations and who have not been disqualified in accordance with

these rules. They will be maintained in order of test score achievement beginning with the highest.

3.67(1) *Removal of names from eligibility lists.* In addition to the causes for rejection or disqualification set forth under 3.55(19A), the resident director may permanently or temporarily remove names from eligible lists for the following reasons:

a. On receipt of a written statement from the eligible that he no longer desires consideration for a position in the class.

b. Appointment through certification from such eligible list to fill a permanent position.

c. Failure to respond within five working days to the written inquiry of the resident director relative to availability for appointment.

d. Declination of appointment without good cause or under conditions which the eligible previously indicated he would accept.

e. Failure to appear for a scheduled employment interview or to report for duty within a reasonable time specified by the employing department.

f. Failure to maintain a record of his current address with the resident director as evidenced by the return of a properly addressed unclaimed letter or other evidence.

g. Willful violation of any of the provisions of these rules.

3.67(2) *Duration of eligibility lists.* Eligibility lists will exist for a period of time no less than one year and no more than three years. Names may be added to or deleted from eligibility lists in accordance with these rules. The names of applicants who have not been appointed or otherwise removed from lists will be removed at the termination of the designated period of time.

3.67(3) *Notification of removal from eligibility lists.* Applicants whose names are removed from eligibility lists for any reason other than 3.67(1)"*a*" or 3.67(1)"*b*", will be immediately notified of such removal in writing by the resident director.

3.67(4) *Precedence of eligibility lists.* For appointment to permanent positions, eligibility lists will be used as follows:

Re-employment lists, including the names of qualified employees who may have accepted demotion in lieu of layoff, will supersede promotional and original entry lists.

In the absence of re-employment lists, vacancies will be filled by the promotion of qualified employees in accordance with these rules whenever practical and feasible.

Original entry eligibility lists will follow re-employment and promotion in the order of precedence.

3.68(19A) Personnel requisitions. Requests to fill vacancies in permanent positions will be initiated in writing by the requesting department and forwarded to the resident director. The request will include the class of the position to be filled, the number of vacancies and the date of need.

3.69(19A) Certification from eligibility lists. The resident director will certify the names of eligible candidates in the following manner:

From a re-employment list the resident director will certify for appointment the name of the one person at the head of the list if the vacancy to be filled exists in the college or operating division from which that person was laid off or demoted, or the names of the first three people if the vacancy occurs in a college or operating division other than the one from which the employee was terminated or demoted.

From promotional lists the resident director will certify for one vacancy the names of the three persons with the highest standing on the list, with one additional name in the order of their standing on the list for each additional vacancy or, if the number of vacancies exceeds four, the upper one-half of the promotional list, whichever is greater.

From original entry eligibility lists the resident director will certify the names of the three people with the highest standing on the list at the time the vacancy is declared.

3.69(1) *Eligibility registers.* An eligibility register will consist of the names of three available candidates who have the highest standing on an eligibility list. If a complete register is not available from a promotional eligibility list, the resident director may certify and refer enough other candidates in the order of their standing on an original entry eligibility list so that an employing department may have a choice of selection from three candidates. If a complete original entry register is not available, the resident director may refer additional candidates for appointment in accordance with these rules.

In the interest of speed and efficiency in the selection process, candidates may be certified and referred to more than one vacancy at the same time. However, with reasonable regard for candidates standing highest on eligibility lists, a resident director will not be required to make simultaneous certification of the same name on different certifications made concurrently for the same class of position. If more than one vacancy in the same class exists at the same time in one department, the resident director may certify and refer to that department three candidates plus one additional candidate for each vacancy in excess of one.

3.69(2) *Special qualifications.* An employing department may request in writing that the resident director certify for appointment candidates who have special qualifications in addition to the minimum qualifications prescribed in the class specifications. If, in the judgment of the resident director, such a request is validly related to job performance, he may certify, in the order of their standing on the register, only the names of eligibles who have such special qualifications.

3.70(19A) Selection of employees. Employing departments will notify the resident director of all vacancies in permanent positions as far in advance of the date of need as possible. The resident director will certify as approved for appointment names of candidates in accordance with these rules, and will refer the certified candidates to be interviewed by the department in which the vacancy exists. Final selection will be made by the employing department. Nothing in these rules will require a department to hire any candidate, and nothing will preclude the filling of vacancies in accordance with other provisions in these rules, such as those concerning transfers, promotions, demotions and reinstatements. When a properly certified candidate is selected by a department, the department will so notify the resident director.

[3.67 to 3.70 Filed May 11, 1971]

3.71 to 3.80 Reserved for future use.

APPOINTMENTS AND PROBATION

3.81(19A) Appointments. All appointments under this system will be made in accordance with all the provisions of these rules including those concerning certification and selection unless otherwise specified.

3.82(19A) Temporary appointments. Temporary appointments may be made to fill temporary positions or to fill permanent or continuous positions in the absence of an appropriate register. Temporary appointments will not be made for more than six months, and successive temporary appointments will not be allowed.

3.83(19A) Emergency appointments. Appointments may be made without reference to the provisions of these rules regarding minimum qualifications, certification and selection, to provide for services needed in cases of emergency. Such appointments will be made only for the duration of the emergency and in no case will exceed 60 calendar days in any 12-month period at any or all employing departments of board of regents institutions.

3.84(19A) Irregular appointments. Irregular appointments may be made and approved by the resident director to provide for services needed on a periodic basis. Employees appointed on this basis will not work more than eight months in any year, but may, at the request of an employing department, be returned to duty in successive years.

3.85(19A) Project appointment. When it is known in connection with a particular job, project, grant or contract that the services of an employee will be needed only for a limited duration, a project appointment may be made. Such an appointment will not be made for more than six months, however with the approval of the resident director it may be extended for one additional six-month period. Any extension beyond one year must be approved by the merit system co-ordinator on the basis of a limited need that could not otherwise be efficiently and effectively filled. Successive project appointments will not be allowed.

3.86(19A) Provisional appointments. In the absence of a register the resident director may approve a provisional appointment for a person who meets the minimum qualifications of the class in which the vacancy exists but who has not passed the examination for that class. A provisional appointee must immediately apply for examination and be examined as soon as practical. After certification from an appropriate register and successful completion of six months of active service in the class, a provisional appointee will have completed his probationary period and will have permanent status.

A provisional appointment will not exceed six months and successive provisional appointments will not be allowed.

3.87(19A) Permanent appointments. A candidate who is certified from an eligibility register and appointed with the approval of the resident director to a permanent position, and who successfully completes a probationary period in accordance with these rules, will have permanent status.

3.88(19A) Work test appointments. Work test appointments may be made and approved by the resident director to those positions for which a simplified examination procedure [3.52(3)] has been approved. At the successful completion of six months of service in a class to which a person received a work test appointment, he will have permanent status in that class.

3.89(19A) Reinstatement. A permanent employee who has resigned in good standing may be reappointed without certification from an eligibility list, to a position in the same class from which he resigned or a lower class, provided that such reappointment is made within a period of time no greater than the period of his previous employment and in no case more than two years after the date of his resignation and provided there is no re-employment register for that class.

3.90(19A) Probationary period.

3.90(1) *Purpose.* The probationary period will be an important part of the examination and selection process, and will be used by the employing department to closely observe and evaluate the employee's work, to train and aid the employee in adjustment to his position, and to reject and dismiss any employee whose performance fails to meet standards.

3.90(2) *Duration of probation.* A candidate who is certified from an original entry eligibility list and appointed to a permanent position will be on probation until he completes one year of active service in the class to which appointed. If a

probationary employee is not dismissed during this time, he will, at the conclusion of the probationary period, have permanent status in that class. A period of temporary employment immediately preceding a permanent appointment to the same class may, at the request of the employing department, be counted as probationary service.

3.90(3) *Layoffs during probation.* A certified employee who is laid off without prejudice during his probationary period will, upon written request to the resident director, be returned to the register from which he was certified.

3.90(4) *Dismissal during probation.* A certified employee who is rejected and dismissed during his probationary period, may be returned to the register from which he was appointed if, in the judgment of the resident director, he may be able to perform satisfactorily in another position.

[3.81 to 3.90 Filed May 11, 1971; amended July 17, 1972]

3.91 to 3.100 Reserved for future use.

PROMOTIONS, DEMOTIONS, TRANSFERS AND TERMINATIONS

3.101(19A) Promotions.

3.101(1) *Selection.* In accordance with these rules and as far as practical and feasible, all vacancies will be filled by the promotion of qualified permanent employees, based on individual performance and examination results with due consideration for length of service and capacity for the new position.

3.101(2) *Qualifications.* A candidate for promotion must be certified by the resident director as possessing the qualifications required in the job specification for the class to which the candidate wishes to be promoted, and must qualify for the new position by promotional competitive or noncompetitive examination.

3.101(3) *Promotional eligibility lists.* The names of all permanent employees who receive passing grades on competitive promotional examinations will be placed on a promotional eligibility list in the order of their test score achievement, beginning with the highest. The duration of a promotional eligibility list will be the same as that established for the original entry list for the same classification.

3.101(4) *Promotion by competitive examination.* Examinations will be announced in accordance with 3.53(19A) and examination will be open to all qualified permanent employees of the institution at which the vacancy exists, or with the approval of the employing department and the resident director of that institution, the promotional examination may be made open to any permanent qualified employee at any institution under this system. Certification and selection will be made in accordance with 3.67(19A) to 3.70(19A).

3.101(5) *Promotion by noncompetitive examination.* Upon written request from an employing department indicating the reasons therefor, a resident director may approve a noncompetitive promotion within a department and certify for such a promotion a permanent employee who has passed the appropriate examination and otherwise meets the qualifications for the class. Such a request will be approved by the resident director only if the reasons specified are in the interests of efficiency and effectiveness in the operation of the department.

3.102(19A) Transfers.

3.102(1) *Reassignments.* An employee may be reassigned at any time from one position to another in the same class within a department, except that a probationary employee who was certified to fill his position on the basis of special qualifications as provided in 3.69(2) will not be reassigned unless the new position requires the same special qualifications which justified the original certification.

3.102(2) *Special assignment.* When the services of an employee are temporarily needed in a position in the same or a different class within the institution other than the position to which the employee is assigned, he may be given special assignment, with the prior approval of the resident director and involved departments, to perform the duties of such position for a period not to exceed three months without change in title or status. In unusual circumstances, an extension of a special assignment for no more than one additional three-month period may be approved by the merit system co-ordinator on written request from the resident director.

3.102(3) *Intra- and inter-institutional transfers.* With his approval a permanent employee may be transferred from one position to another in the same class or to a position in another class in the same pay grade, from one department to another department in the same or different institution under this system, provided both departments involved approve the transfer, and the resident director certifies that the employee meets the minimum qualifications for the class and has passed an appropriate examination.

Transfers to higher or lower classes will be governed by the provisions of these rules concerning promotion or demotion, respectively.

3.103(19A) Demotion (voluntary). If, for any reason, an employee wishes to be demoted to a position in a lower class, the resident director may, upon written request from the employee and with the approval of involved departments, effect such a demotion provided the employee is certified by the resident director as meeting the qualifications required for the lower class. Voluntary demotion will not be subject to appeal.

3.104(19A) Terminations.

3.104(1) *Resignations.* To resign in good standing an employee must notify the employing department of his intention to resign in writing at least ten days prior to the effective date of resignation, except in cases where the employing department agrees to a shorter period of notice. An employee who fails to give proper notice may, at the request of the employing department, be barred from future certification to that department or from reinstatement as provided for in these rules. Employees who resign will have no rights of appeal under these rules.

3.104(2) *Termination on expiration of appointment.* On expiration of an appointment of limited duration the employing department will report such action in writing to the resident director.

3.104(3) *Retirement.* Employees who are terminated at the normal retirement age prescribed by their institution or who retire voluntarily in accordance with 3.104(1) will be considered to have terminated in good standing and without prejudice and will have no rights of appeal under these rules.

3.104(4) *Reduction in force.* An institution may lay off an employee when it deems necessary because of shortage of funds or work, a material change in duties or organization or abolishment of one or more positions. Reduction in force will be accomplished in a systematic manner and will be made in accordance with formula developed by the institution and reviewed and approved by the merit system co-ordinator for its conformance to these rules:

a. Reduction in force will be made by class of position.

b. Reduction in force may be made by organizational unit within an institution or institution-wide, as designated by the institution, provided such designation is reported to the merit system co-ordinator before the effective date of the reduction.

c. The order of reduction in force will be by type of appointment as follows: Emergency, temporary, irregular, provisional, probationary, permanent.

d. Each employee affected by a reduction in force will be notified in writing of the layoff and the reasons therefor at least ten days prior to the effective date of the layoff.

e. There will be competition among all employees in the class of position or positions affected by the layoff based on a retention points system that will consist of points for length of service and performance evaluation of all employees in the class within the organizational unit or units affected. Retention points will be calculated as follows:

(1) Length of service credit will be allowed at the rate of one point for each month of service. For the purpose of computing length of service credits, the institution will include all continuous periods of employment between the date of the original appointment and the date of the layoff. Approved leaves of absence without pay, suspensions and layoffs for periods exceeding 15 consecutive days will not be counted; however the periods of service immediately preceding and following such periods will be counted. An employee who is returned to duty following approved military service will have all such time counted as continuous service. When an employee is off the payroll of the institution for more than 15 consecutive days for a reason other than an approved leave of absence, suspension, layoff or military service, the date that he returns to duty will be considered the date of original appointment for purposes of computing retention points.

(2) Performance evaluation credit will be allowed at the rate of one point for each month of service rated as satisfactory under a performance evaluation plan approved by the institutions and the merit system co-ordinator. An additional point will be added for each month of service during which performance is rated one or more levels above satisfactory. No credit will be allowed for service rated less than satisfactory. No performance evaluations which are made less than three months prior to a reduction in force will be used in determining performance evaluation credits. In the absence of a performance evaluation review, service will be considered as satisfactory and one point will be given for each month thereof.

(3) Length of service and performance evaluation points for service less than full time will be prorated in accordance with the percent of fractional employment. Reduction in force retention points will be the total of length of service and performance evaluation points in accordance with the approved formula.

f. Employees will be placed on the layoff list beginning with the employee with the greatest number of retention points at top. Layoffs will be made from the list in reverse order. Copies of the computation of retention points will be made available to affected employees. One copy will be retained by the resident director and one copy will be forwarded to the merit system co-ordinator at least ten days prior to the effective date of the layoff.

g. When two or more employees have the same total of retention points, the order of termination will be determined by giving preference for retention to the employee who has the highest total budgeted earnings in the class of position affected by the layoff.

h. The reduction in force formula approved by the merit system co-ordinator will be posted by the resident director so that all employees will have access to it.

i. An affected employee may appeal a reduction in force by filing, within five days after notification as provided in paragraph "*d*" of this

subrule, a written grievance with the resident director (at Step 3 of the grievance procedure provided in 3.129(19A) or at a comparable step of a procedure approved under 3.129(1). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

j. A permanent employee in a class of position in which layoffs are to be effected may, in lieu of layoff, elect voluntary demotion to a position in the next lower class of position in the same series, or, in the absence of a lower class in the same series, to a class of position which the employee has formerly occupied while in the continuous employment of the institution. Such demotion or the occupying of a formerly held position will not be permitted, however, if the result thereof would be to cause the layoff of a permanent employee with a greater combined total of retention points. To exercise the right of voluntary demotion or to occupy a formerly held position in lieu of layoff, the employee must notify the resident director in writing of such election not later than five days after receiving notice of layoff. Any permanent employee displaced under these provisions will have the right of election as provided herein.

An employee who is laid off or who accepts voluntary demotion in lieu of layoff will, at his request, have his name placed on a re-employment eligibility list in accordance with 3.67(19A) to 3.70(19A).

[3.101 to 3.104 Filed July 12, 1971; amended July 17, 1972]

3.105 to 3.114 Reserved for future use.

DISCIPLINARY ACTIONS

3.115(19A) Causes for disciplinary action. All employees may be subject to disciplinary action for any of the reasons specified in section 19A.9(16).

3.116(19A) Disciplinary actions. Disciplinary action will be reasonable, timely and related in severity to the seriousness of the offense, however, this will not preclude reasonable penalties of varying severity for an accumulation of offenses.

3.116(1) *Suspension.* A department head may, for cause in accordance with 3.115(19A), suspend any employee for such length of time as it considers appropriate but not to exceed ten days at any one time or 20 days in any 12-month period. The department head will inform the affected employee of the suspension and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the suspension will be sent by the department to the resident director and will be maintained in the employee's personal file. The employee may appeal the action directly to Step 2 of the grievance procedure specified in 3.129(19A) or to a comparable step in a grievance procedure approved in accordance with 3.129(1). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

3.116(2) *Reduction of pay within grade.* A department head may, for cause in accordance with 3.115(19A), reduce the pay of an employee to a lower step within the pay grade assigned to the class of position. The department head will notify the affected employee of the reduction, the reasons therefor and the duration thereof, in writing within 24 hours of the time the action is taken. A copy of the reduction notice will be sent by the department to the resident director and will be maintained in the employee's personal file. The employee may appeal the action directly to Step 2 of the grievance procedure specified in 3.129(19A) or a comparable step in a grievance procedure approved in accordance with 3.129(1). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

3.116(3) *Demotion.* A department head may, for cause in accordance with 3.115(19A), demote an employee to a vacant position of like status in a lower class provided the employee meets the qualifications for that lower class. The department head will notify the affected employee of the demotion and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the notice of demotion will be sent by the department to the resident director and will be maintained in the employee's personal file. The employee may appeal the action directly to Step 2 of the grievance procedure specified in 3.129(19A) or a comparable step in a grievance procedure approved in accordance with 3.129(1). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

3.116(4) *Discharge.* A department head may, for cause in accordance with 3.115(19A), discharge any employee. The department head will notify the affected employee of the discharge and the reasons therefor in writing within 24 hours of the time the action is taken. A copy of the notice of discharge will be sent by the department to the resident director and will be maintained in the employee's personal file. The employee may appeal the action directly to Step 2 of the grievance procedure specified in 3.129(19A) or a comparable step in a grievance procedure approved in accordance with 3.129(1). If not satisfied with the decision rendered at that step, the employee may pursue his appeal in accordance with the grievance procedure.

[3.115 and 3.116 Filed July 12, 1971]

3.117 to 3.126 Reserved for future use.

GRIEVANCES AND APPEALS

3.127(19A) Appeals on position classification. A permanent employee may initiate a

request for a review of the classification of his position to his department head. The department head may forward the request to the resident director with or without his support. Within ten days after the receipt of a written request from an employee, the department head or his representative will discuss the request with the employee and will inform him of its disposition. If the employee is not satisfied with the decision of his department, he may request that the resident director review his classification.

A department head may initiate a request for the review of the classification of any position under his jurisdiction, or he may forward to the resident director a request from any of his permanent employees.

The resident director will respond to requests for review of position classification as soon as reasonably possible and no later than 45 days after the receipt of such a request. If not satisfied with the decision of the resident director, a department head or a permanent employee may request that he review his decision. If not satisfied with the final decision of the resident director, a department head or an affected permanent employee may appeal such decision to a qualified classification review committee appointed by the board of regents.

The classification review committee will conduct such investigation as it deems necessary to determine the proper allocation of the position, and will notify the involved parties of its decision within 45 days after receipt of the appeal. The decision of the review committee will stand until significant changes in the duties and responsibilities of the position can be shown.

3.128(19A) Appeals on application, examination and certification procedures. Any applicant may appeal an action which he alleges to be in violation of these rules concerning applications, examinations or certification. The aggrieved applicant will first discuss the matter with the resident director and, if not satisfied with the explanation and decision given, may within 20 days after the occurrence of the alleged violation file a written appeal with the resident director at Step 3 of the grievance procedure provided in 3.129(19A), or at a comparable step of a procedure approved under 3.129(1). If the applicant is not satisfied with the decision rendered at that step he may pursue his appeal in accordance with the grievance procedure. If the grievance concerns the form or content of the application or an examination as approved by the merit system co-ordinator, the co-ordinator will act jointly with the resident director and at subsequent steps in response to an appeal.

3.129(19A) Grievances. Disputes or complaints by permanent employees regarding the interpretation or application of institutional rules governing terms of employment or working conditions (other than general wage levels) or the provisions of these merit system rules (other than disputes whose resolution is provided for in 3.127(19A) and 3.128(19A) will be resolved in accordance with the following procedure, except at institutions where a varied procedure has been approved by the merit system co-ordinator in accordance with 3.129(1).

Step 1. A dissatisfied employee will first discuss his problem with his immediate supervisor. It is presumed that the majority of disputes, complaints or misunderstandings will be resolved at this point. If the employee is still dissatisfied after such discussion, he may within ten days after the occurrence of the matter leading to his dissatisfaction or within ten days after such time that the employee has, or could reasonably be expected to have, knowledge of such occurrence, file a written grievance with his immediate supervisor. The supervisor will review the grievance with the employee and will transmit his decision to the employee in writing within five days after receiving the grievance.

Step 2. If the employee is not satisfied with the decision of his supervisor, he may within five days after receiving that decision appeal it to his department head. Such an appeal will be in writing and will contain all of the information included in the initial grievance, the decision of the supervisor, and any other pertinent information the employee may wish to submit. The appeal will be signed and dated by the employee. The department head will investigate the grievance and will give the employee or a representative of his choosing the right to present his case orally. The department head may affirm, reverse or modify the supervisor's decision and will notify the employee of his decision in writing within ten days after receiving the appeal.

Step 3. If the employee is not satisfied with the decision of his department head, he may within five days after receiving that decision, appeal it to the dean of the college or the head of the major operating division in which he is employed. The dean or the division head and the resident director will jointly represent the institution at this step of the appeal procedure. The appeal will be in writing and will include all of the information included in the initial grievance and subsequent appeals, all the decisions related thereto, and any other pertinent information the employee may wish to submit. The appeal will be signed and dated by the employee.

The dean of the college or head of the division and the resident director will investigate the grievance and will give the employee or a representative of his choosing the right to present his case orally. The institutional representatives may affirm, reverse or modify the decision of the department head, and will notify the employee of their decision in writing within ten days after receiving the appeal.

Step 4. If the employee is not satisfied with the decision rendered at Step 3 of the grievance procedure, he may within five days after receiving that

decision appeal it to the chief administrator of the institution. The appeal will be in writing and will include all of the information included in the initial grievance and subsequent appeals, all decisions related thereto, and any other pertinent information the employee may wish to submit. The appeal will be signed and dated by the employee.

The chief administrator or his designee will investigate the grievance and will give the employee the right to present his case orally. The chief administrator may affirm, reverse or modify the decision rendered at Step 3 and will notify the employee of his decision in writing within ten days after receiving the appeal.

Step 5. If the employee is not satisfied with the decision rendered under Step 4, he may within five days after receiving that decision request a hearing before the appeals board. Such a request will be in writing, will include all of the information included in the initial grievance and subsequent appeals, all of the decisions related thereto, and any other pertinent information the employee may wish to submit.

The appeal will be signed and dated by the employee and will be directed to the merit system coordinator who will arrange for a hearing before the appeals board. The appeals board will inform both parties in writing of its decision within 45 days after the appeal is filed with the merit system coordinator.

A written grievance will contain a brief description of the complaint or dispute and the pertinent circumstances and dates of occurrence. It will specify the institutional or merit system rule which has allegedly been violated and will state the corrective action desired by the employee.

At each step of the grievance procedure, the employee may be represented by one or two persons of his choosing. The name of such representatives will be noted on the written grievance and on each subsequent appeal. Presentations, reviews, investigations and hearings held under this procedure may be conducted during working hours, and employees who participate in such meetings will not suffer loss of pay as a result thereof.

If an employee does not appeal a decision rendered at any step of this procedure within the time prescribed by these rules, the decision will become final. If an institutional representative does not reply to an employee's grievance or appeal within the prescribed time, the employee may proceed to the next step. With the consent of both parties, any of the time limits prescribed in these rules may be extended.

3.129(1) *Institutional grievance procedure.* An institution may develop a grievance procedure for all or a segment of its employees that varies from the procedure prescribed in 3.129(19A), provided that such a procedure begins with discussion between an employee and his immediate supervisor and provides for a final hearing in accordance with Step 5 of the grievance procedure prescribed herein. Such an institutional procedure will incorporate all the rights provided employees in this chapter, will be made known to the employees to whom it applies, and must be approved by the merit system co-ordinator. In the absence of an approved institutional procedure, 3.129(19A) will apply.

3.129(2) *Appeals board.* The board of regents will appoint for three year terms (except for the initial appointments which may vary in duration) at least five persons who will be available to serve as members of an appeals board. Such persons will be knowledgeable in the field of employee relations or a related field and will have demonstrated their ability to make sound, impartial and objective judgments.

Appointments will be made on a nonpartisan basis, and the names of persons so appointed will make up a list from which three will be selected to hear a dispute appealed to the last step of the grievance procedure and render a decision thereon subject only to review by the courts.

While all members of the appeals board will function in an impartial manner, they will be selected one by each of the parties to the dispute; the two members so selected will, by mutual agreement or by alternately striking names from the list, select the third member.

The members of the appeals board will elect one of their number to serve as chairman. The chairman will establish procedures for the conduct of the hearing in a fair and informal manner that will afford each party reasonable and ample opportunity to present his case and to rebut the presentation of the other. The chairman will be responsible for presenting the decision of the appeals board to the involved parties and to the board of regents within the prescribed time.

[3.127 to 3.129 Filed July 12, 1971]

3.130 to 3.139 Reserved for future use.

VACATIONS AND LEAVES OF ABSENCE

3.140(19A) Attendance. Employing departments will establish work schedules and other regulations regarding attendance that they deem necessary in accordance with these rules and the policy and rules of their institution, and such schedules and rules will be made known to affected employees.

3.141(19A) Vacations. Permanent and probationary employees will accrue and take vacations as provided by law. Employees will be entitled to take only that vacation time which they have accrued and while employee preferences will be given major consideration, employing departments will have final authority to schedule vacations.

Permanent part-time employees will accrue vacation in an amount equivalent to their fractional employment. An employee who is transferred, promoted or demoted from one position to another position under this system will not lose any accumulated vacation time as a result thereof.

3.142(19A) Holidays. Permanent and probationary employees will be granted holidays approved by the board of regents.

3.143(19A) Sick leave. Permanent and probationary employees will accrue sick leave as provided by law and will be entitled to such leave on presentation of satisfactory evidence of illness or injury. A permanent part-time employee will accrue sick leave in an amount equivalent to his fractional employment, and no employee will be granted sick leave in excess of his accumulation.

An employee who is transferred, promoted or demoted from one position to another position under this system will not lose any accumulated sick leave as a result thereof.

A permanent employee who is still incapacitated after exhausting all accumulated sick leave and vacation time will, at his or her request, be placed on the re-employment lists for the class of position he or she previously occupied and on re-employment lists for lower level classes for which qualified, when the employee is able and qualified to return to work. Such an employee's acceptance of re-employment in a lower class will not affect his or [her] standing on the re-employment list for the class that the employee formerly occupied.

3.144(19A) Military leave. Permanent and probationary employees will be granted military leave as provided by law, with pay not to exceed 30 calendar days in any 12-month period.

3.145(19A) Maternity leave. The time during which an employee is unable to work because of a disability caused or contributed to by pregnancy, miscarriage, abortion, childbirth and recovery therefrom will be treated as sick leave in accordance with 3.143(19A). If an employee's accumulated sick leave is insufficient to cover the period of disability, she will at her request be granted a leave of absence without pay for the duration of that period. Any request for absence which is beyond the period of disability will be considered as a leave of absence without pay in accordance with 3.149(19A) or as vacation in accordance with 3.141(19A).

3.146(19A) Court and jury service. When, in obedience to the subpoena or direction by proper authority, an employee appears as a witness or serves as a member of a jury in any public or private litigation, he will be entitled to his regular compensation provided he surrenders to his employing institution any pay he receives, other than reimbursement for travel or personal expenses, for such service.

3.147(19A) Voting leave. Any person entitled to vote in a public election is entitled to time off from work with pay on any public election day for a period not to exceed two hours in length. Application for time off for voting should be made to the employee's supervisor prior to election day. The time to be taken off may be designated by the supervisor. Time off for voting may be granted only if the employee's working hours do not allow a three-hour period outside of working hours during which the polls are open.

3.148(19A) Funeral leave. In the event of death in the immediate family, an employee may be excused with pay for a period from the date of death to and including the date of the funeral not to exceed, except under special circumstances, three days. Immediate family is interpreted to include husband or wife, mother and father and mother-in-law and father-in-law, son and daughter and son-in-law and daughter-in-law, brother and sister and brother-in-law and sister-in-law. For other relatives, an employee may be excused with pay for a period not to exceed, except under special circumstances, one day.

3.149(19A) Leave of absence without pay. In the best interests of the institution and its employees and with approval of the resident director, a department head may grant an employee's request for a leave of absence without pay for up to one year. With the same approval such a leave may be extended for no more than one additional year.

On conclusion of a leave of absence without pay, an employee, if qualified, will be returned to the position from which he was granted leave or to another position in the same class. If such a position no longer exists, the layoff provisions of these rules will take effect.

3.150(19A) Election leave. Employees who become candidates for public office will be granted election leaves as provided by law.

[3.140 to 3.150 Filed July 13, 1971;
amended July 17, 1972, September 21, 1972]

CHAPTER 4
TRAFFIC AND PARKING AT UNIVERSITIES

UNIVERSITY OF IOWA

4.1(262) Purpose. The purpose of these rules is to provide for the policing, control and regulation of traffic and of parking vehicles on the campus of the state University of Iowa.

4.2(262) Definitions. For the purpose of these rules, the following definitions shall apply unless the context clearly requires otherwise, and all other words shall have meaning according to their common usage.

4.2(1) *University.* "University" means the state University of Iowa.

4.2(2) *Student.* "Student" means any person registered with the university for academic credit who is not employed by the university on a full-time salaried or equivalent basis.

4.2(3) *Employee.* "Employee" means any person regularly employed by the university who is not a student.

4.2(4) *Visitor.* "Visitor" means any person who owns, operates or parks a vehicle on the university campus who is not a student or an employee.

4.2(5) *Vehicle.* "Vehicle" means any wheeled or treaded device used or designed for use as a means of transportation or conveyance of persons or property.

4.2(6) *Motor vehicle.* "Motor vehicle" means any vehicle which is self-propelled and has four or more wheels in contact with the ground.

4.2(7) *Motorcycle.* "Motorcycle" means any vehicle which is self-propelled and has less than four wheels in contact with the ground.

4.2(8) *Bicycle.* "Bicycle" means any wheeled vehicle which is not self-propelled and which is designed to be pedaled by the rider.

4.2(9) *Director.* "Director" means the director of parking at the university or any other person designated by the president of the university to perform any function or duty of the director hereunder.

4.3(262) General traffic.

4.3(1) A violation of these rules, other than for impoundment or parking or registration violations, on the institutional roads and property of the university is a public offense and the sanction shall be that of state law or of the city in which the violation occurs. Where no sanction for the violation is specifically stated, the doing of such an act is a nonindictable misdemeanor. The violation is tried and enforced by the court having jurisdiction over the situs of the violation.

4.3(2) Faculty, staff, students and visitors are expected to know and comply with the state motor vehicle laws, the traffic ordinances of the city of Iowa City, the city of Coralville, the state University of Iowa traffic and parking rules, and the directions and limitations set by them.

4.3(3) The director shall cause speed limit signs and traffic control signs and devices to be erected and maintained on the campus.

4.3(4) The director shall have the authority to establish one-way streets and to make temporary changes in traffic patterns, including street closures, where necessary because of construction or special events being held on the campus.

4.3(5) The maximum speed limit on all campus drives, roads and streets is 15 miles per hour unless otherwise posted.

4.3(6) A map of the campus clearly identifying speed zones and the location of traffic control signs and devices shall be published and available for public inspection during normal business hours in the office of the director and in the office of the state board of regents.

4.3(7) Pedestrians shall be given the right of way at all crosswalks or when in compliance with existing traffic controls.

4.3(8) Driving of vehicles, motor vehicles and motorcycles on university property other than streets or roads is prohibited, unless specific areas have been designated for such use by the director or special permission has been granted by the director for emergency conditions.

4.3(9) Driving of vehicles, motor vehicles and motorcycles in parts of streets or roads marked as bicycle lanes is prohibited.

4.3(10) The director shall have authority to have accidents which occur on the campus investigated by the university security department and charges filed thereon.

4.4(262) Registration. Vehicles shall be registered as follows.

4.4(1) *Students.* Every motor vehicle and motorcycle which is operated or maintained by a student within Johnson County, Iowa, must be registered with the university and a registration decal must be displayed on the vehicle in the manner prescribed by the director. Any student who operates or maintains a motor vehicle or motorcycle in Johnson County or who owns a vehicle which is so operated or maintained is responsible for the proper registration of such vehicle and the display of the registration decal thereon.

4.4(2) *Employees.* Motor vehicles and motorcycles owned or operated by employees may be registered with the university if the employee so desires, but registration of such vehicles is not required unless the employee desires parking privileges on the campus. A registration decal may be issued for display on vehicles registered by employees.

4.4(3) *Procedure.* Applications for registration shall be submitted to the director in the manner he prescribes. No student shall register any vehicle owned or actually maintained by another student. No fee shall be charged for registration without parking privileges.

4.5(262) Parking facilities. The director may set aside and designate certain areas of the

campus for the parking of motor vehicles, motorcycles and bicycles, and the use of any lot, ramp or part of the parking facilities so established may be restricted to students, employees or visitors. The director shall cause signs to be erected and maintained clearly identifying those areas of the university campus designated for vehicle parking, and any restrictions applicable thereto shall be conspicuously posted.

4.5(1) *Parking control devices.* Gates and other devices may be installed and maintained to control access to any parking facility.

4.5(2) *Parking meters.* Parking meters, toll houses and other devices may be installed and maintained to regulate the use of any parking facility.

4.5(3) *Hours of operation.* Reasonable hours shall be established for the normal operation of the parking facilities and a schedule of hours of operation shall be published and available for public inspection in the office of the director.

4.5(4) *Closing.* The director may temporarily close any parking facility for cleaning, maintenance or other university purpose, or may temporarily restrict or reassign the use of any facility as may be necessary or convenient. The director shall give advance notice of such temporary closing, restriction or reassignment by posting or otherwise when practical.

4.5(5) *Restricted zones.* The director may designate areas of the campus as restricted zones, such as loading zones or service vehicle zones, and such restricted zones shall be conspicuously posted. No parking shall be permitted in such restricted zones except as authorized.

4.5(6) *No parking.* Vehicle parking on the campus shall be restricted to designated parking facilities, and no parking shall be permitted at any other place on the campus. Vehicles shall not be parked in such a manner as to block or obstruct sidewalks, crosswalks, driveways, roadways or designated parking stalls. No parking is permitted in prohibited zones, such as in the vicinity of fire hydrants or fire lanes, and such zones shall be conspicuously posted or marked by painted curbs or other standard means.

4.5(7) *Motorcycle parking.* The director may designate areas of the parking facilities for motorcycle parking, and such areas shall be conspicuously posted. Motorcycles shall be parked only in areas designated for motorcycle parking, and no other vehicles shall be parked in such areas.

4.5(8) *Bicycle parking.* The director may install and maintain bicycle parking racks or designate other facilities for bicycle parking. Bicycles shall be parked only in bicycle racks or other facilities designated for bicycle parking.

4.6(262) Parking privileges. Students and employees may be granted parking privileges on the campus in accordance with these rules and upon such reasonable terms and conditions as may be established by the university.

4.6(1) *Students.* Students may be granted parking privileges in parking facilities designated for student use. Optional plans and facilities may be offered as determined by the director. Reasonable classifications may be established on the basis of a student's age, class, college or department, course load, proximity of his residence to the campus, physical disability, employment, the availability of facilities or any other relevant criterion to determine the eligibility of students for parking privileges or any optional plan or facility.

4.6(2) *Employees.* Employees may be granted parking privileges in parking facilities designated for employee use. Optional plans and facilities may be offered as determined by the director. Reasonable classifications may be established on the basis of an employee's job classification, length of service, place of work or the nature thereof, physical disability, the availability of facilities or any other relevant criterion to determine the priority of employees for assignment of parking privileges or any optional plan or facility.

4.6(3) *Visitors.* Visitors may be granted parking privileges in parking facilities designated for visitor parking. Optional plans and facilities may be offered as determined by the director. Reasonable classifications may be established on the basis of the time, duration or purpose of the visit, physical disability, the availability of facilities, or any other relevant criterion to determine the eligibility of visitors for parking privileges or any optional plan or facility.

4.6(4) *Procedure.* Applications for parking privileges shall be submitted to the director in the manner he prescribes. No student shall apply for parking privileges for any vehicle owned or actually maintained by another student. The director shall determine the eligibility and priority of each applicant for parking privileges within the classifications established in 4.6(1), 4.6(2) and 4.6(3) and shall make all parking assignments. A parking decal or other means of identification may be issued to each applicant who is granted parking privileges, and such decal or other identification must be displayed on the vehicle in the manner prescribed by the director. Parking privileges shall not be granted to a student and to an employee for the same vehicle, and a student parking decal and an employee parking decal shall not be displayed on the same vehicle.

4.6(5) *Parking fees.* The university may assess and collect from students, employees and visitors reasonable fees or charges for parking privileges and the use of parking facilities. The amount of such fees and charges shall be established by the university and approved by the state

board of regents, and a schedule of all parking fees and charges shall be published and available for inspection during normal business hours in the office of the director and in the office of the state board of regents. Parking fees and charges may be assessed and collected on an annual, semester, monthly or hourly basis. Parking fees and charges may be added to student tuition bills and may by agreement be withheld from the salaries or wages of employees by payroll deduction. Parking fees and charges may be collected by means of parking meters or toll houses. Use of any parking facility constitutes an implied agreement to pay the prescribed fee or charge therefor.

4.6(6) *University business.* Special parking privileges may be granted for vehicles being used on official university business on the conditions and in the manner prescribed by the director.

4.6(7) *Responsibility.* Any person who owns or operates a vehicle which is parked on the campus or in whose name the vehicle is registered or parking privileges have been granted is responsible for the proper parking of the vehicle at all times when it is on the campus and for all parking violations involving the vehicle.

4.6(8) *Liability.* Parking privileges granted hereunder constitute a license to use university parking facilities and do not constitute a lease of such facilities or a bailment of the vehicle by the university. Use of university parking facilities is at the owner's or applicant's risk, and the university shall not be liable or responsible for loss of or damage to any vehicle parked on the campus.

4.6(9) *Revocation.* Parking privileges on the campus may be revoked by the university for good cause at any time upon five days' written notice and refund of any advance payment of parking fees or charges on a pro rata basis for the revoked period.

4.7(262) Violations. Sanctions may be imposed for violation of registration and parking rules as follows.

4.7(1) *Notice of violations.* The university shall give written notice of all parking violations. Such notice may be given by means of a notice of parking violation placed conspicuously on the offending vehicle, and such notice shall constitute constructive notice of the violation to the owner and operator of the vehicle and to any person in whose name the vehicle is registered or parking privileges have been granted.

4.7(2) *Sanction.* Reasonable monetary sanctions may be imposed upon students and employees for violation of vehicle registration or parking rules. The amount of such sanctions, not to exceed ten dollars for each offense, shall be established by the university and approved by the state board of regents. A schedule of all sanctions for improper registration and parking shall be published and available for public inspection during normal business hours in the office of the director and in the office of the state board of regents. Registration and parking sanctions may be assessed against the owner or operator of the vehicle involved in each violation or against any person in whose name the vehicle is registered or parking privileges have been granted and charged to their university account. Registration and parking sanctions may be added to student tuition bills or may be deducted from student deposits or from the salaries or wages of employees or from other funds in the possession of the university.

4.7(3) *Impoundment.* Any vehicle parked on the campus in violation of parking rules may be impounded and removed. The university shall give written notice of impoundment to the owner of the vehicle or to the person in whose name the vehicle is registered or parking privileges have been granted. A reasonable fee may be charged for the cost of impoundment and storage, which fee must be paid prior to the release of the vehicle. Impounded vehicles which are not claimed within 60 days will be deemed abandoned property and may be sold under procedures set forth in chapter 579 of the Code and the proceeds of the sale will be applied to the payment of the costs of impoundment, storage and sale. The balance, if any, shall be sent to the owner.

4.7(4) *Appeals.* Students and employees may appeal any registration, impoundment or parking violation. Appeals shall be submitted to the director in writing within ten days after notice of the violation or impoundment was given and shall state succinctly the grounds of the appeal. The director may allow additional time for appeal for good cause shown. Appeals shall be considered by an impartial committee to be chosen in a manner approved by the president of the university. The president may designate more than one committee to hear such appeals. On request, the appellant shall be afforded the opportunity for an administrative hearing by the appeal committee and shall be given reasonable notice of the time and place of the hearing. The decision of the appeal committee may be reviewed de novo by the district court as provided by law.

4.8(262) Administration of rules. The president of the university shall be responsible for the proper administration of these rules. He is authorized to establish procedures not inconsistent with these rules as may be reasonably necessary and convenient for the effective administration of his duties hereunder, and any procedure so established shall be published and available for public inspection during normal business hours in the office of the director and in the office of the state board of regents. The president may delegate his authority under these rules to the director or to any other person designated by the president to perform any function or duty hereunder.

[4.1 to 4.8 Filed September 22, 1971;
amended December 22, 1972]

4.9 to 4.24 Reserved for future use.

IOWA STATE UNIVERSITY OF SCIENCE AND TECHNOLOGY

4.25(262) General traffic.

4.25(1) The motor vehicle laws of the state of Iowa are in effect on campus and other Iowa State University property.

4.25(2) Faculty, staff, students and visitors are expected to know and comply with the state motor vehicle laws, the traffic ordinances of the city of Ames and the Iowa State University traffic and parking rules.

4.25(3) The maximum speed limit on all campus drives, roads and streets is 25 mph unless otherwise posted.

4.25(4) Pedestrians shall be given the right of way at all crosswalks or when in compliance with existing traffic controls.

4.25(5) Driving of motor vehicles on campus walks and lawns is prohibited except when special permission has been granted by the physical plant department for emergency conditions.

4.25(6) Driving of motor vehicles in parts of streets or roads marked as bicycle lanes is prohibited.

4.25(7) All motor vehicles shall use mufflers that will control noise to levels that do not exceed the following when measured on the "A" scale of a standard sound level meter at slow response:

Distance	Sound Level
At 25 feet	86 dBA
At 50 feet	80 dBA

4.25(8) All violations of the motor vehicle laws of the state of Iowa will be referred to the municipal court of the city of Ames.

4.26(262) Two- or three-wheeled motor vehicles.

4.26(1) All operators or drivers of two-wheeled motor vehicles (motorcycles, motor scooters, motorbikes or others) shall know and comply with all laws, ordinances and rules as required for all motor vehicles in 4.25(262).

4.26(2) Two-wheeled motor vehicles are prohibited on campus lawns, walks and designated bicycle lanes.

4.26(3) Driving two-wheeled motor vehicles on university property other than streets or roads is prohibited, unless specific areas have been designated for such use by the physical plant department.

4.26(4) Every two-wheeled motor vehicle shall at all times be equipped with a muffler in good working order and in constant operation to prevent excessive or unnecessary noise when driven on campus. Muffler cutout, bypass or similar device is prohibited.

4.26(5) All provisions herein apply equally to three-wheeled motor vehicles.

4.26(6) Battery-powered motor driven wheel chairs for invalids or the handicapped are not considered to be included in these regulations.

4.27(262) Snowmobiles. Operation of snowmobiles is prohibited on all university property unless specific areas have been designated for such use by the physical plant department.

4.28(262) Restricted access streets.

4.28(1) Certain streets or portions of streets are closed to general motor vehicle travel during the hours of 7 a.m. to 5:30 p.m. Mondays through Fridays and 7 a.m. to 12 noon on Saturdays. They are open at all other hours. See Map 1 for identification of restricted access streets.

4.28(2) Emergency and service vehicles will be permitted on restricted access streets by use of key cards or other control devices issued by the traffic office.

4.28(3) Parking lots which have access only from restricted access streets will be used only for motor vehicles carrying reserved permits. Permit holders for these lots will be issued key cards allowing entrance to the restricted access streets.

4.28(4) Changes in hours of closing and specifically restricted streets or roads may be modified by action of the president or his authorized representatives.

4.29(262) General parking.

4.29(1) *Parking privileges* in university parking lots, on or off campus, are available, upon application, to eligible members of the faculty, staff, student body or visitors, subject to provisions set forth hereinafter.

4.29(2) *Restrictions.*

a. Parking of motor vehicles on campus, except at meters, is restricted to vehicles bearing current official university parking permits. (See 4.36(2)"*b*" for publicly owned vehicles.)

b. The restriction stated in 4.29(2)"*a*" applies during the hours from 7 a.m. to 6 p.m. Mondays through Fridays and 7 a.m. to 12 noon Saturdays, except on official university holidays when the university is closed.

c. Quarter breaks and seasonal holidays for students are not official holidays.

d. All other rules in this "Traffic and Parking Regulations" are in effect 24 hours a day every day.

4.29(3) *Illegal parking.*

a. Parking is prohibited at crosswalks, building entrances, fire hydrants, fire lanes and other areas posted "No parking at any time" or marked by a yellow line. Violators will be towed away.

b. Parking is prohibited in any areas on campus other than those that have been designat-

ed for parking and are identified by signs controlling their use. (See Map 1)

c. Parking is prohibited in Loading Zone areas except for loading and unloading in posted time limitations. This restriction applies 24 hours per day. Violators will be towed away.

4.29(4) *Improper parking.*

a. Head-in parking shall be used in all parking lots at all times.

b. Vehicles shall be parked within stall marker lines where such lines are provided.

c. Parking of motor vehicles, motorcycles and small cars in odd-shaped spaces in parking lots is prohibited.

d. Taking any motor vehicle into any university building is prohibited, except where a shop or garage is especially designated for the purpose of vehicle repair or storage.

e. Four-wheel vehicles shall at no time park in areas designated for motorcycles.

4.29(5) Iowa State University assumes no liability or responsibility for damage to any vehicle parked in any university parking areas.

4.29(6) The university reserves the right to close temporarily any parking area on or off campus for university purposes. Advance notice of closing will be given when practical.

4.29(7) Parking in the Memorial Union Parking Ramp and adjacent metered parking lot is subject to rules, time and fees established by the Memorial Union.

4.30(262) Registration of motor vehicles.

4.30(1) Every student, while enrolled at Iowa State University, who owns or has a motor vehicle in his possession during all or part of the academic year, must register the vehicle(s) and display upon it (them) a current student identification sticker.

4.30(2) Any resident of university married student housing, whether currently enrolled or not, who owns or has a motor vehicle in his possession during all or part of the academic year, must register the vehicle(s) and display upon it (them) a current student identification sticker.

4.30(3) A student or resident, so identified in 4.30(1) and 4.30(2), failing to register such vehicle(s) or to display a current identification sticker(s) thereon is subject to a penalty as set forth in 4.51(262).

4.30(4) Students operating motor vehicles bearing a current staff or reserved permit are not required to display a student identification sticker.

4.30(5) Students who have indicated at academic registration that they do not own or have a motor vehicle in their possession and who subsequently acquire one shall obtain and affix an identification sticker on the vehicle before operating it on campus.

4.30(6) Student identification stickers are issued upon registration of the vehicle, without charge.

4.30(7) Identification stickers are in effect from the date of issue to the following August 31.

4.30(8) Registration of any motor vehicle shall be in only one name. Proxy registration is prohibited.

4.30(9) Falsification of information on a registration or a parking permit application is subject to a penalty as set forth in 4.51(2)"*a*".

4.30(10) The identification sticker is for identification only and is not a permit to park in university parking lots, except when the parking regulations so permit. See 4.29(2).

4.30(11) A student is held responsible for the official registration of his vehicle(s) which is completed only with the proper display of the identification sticker.

4.30(12) Such registration carries with it the responsibility for knowledge of these regulations.

4.30(13) Upon issuance of a new license [registration] plate, the person in whose name vehicle is registered at the university shall report the new license [registration] number to the traffic office within seven days after issuance.

4.31(262) Residence hall parking.

4.31(1) Residence hall parking lots contain open and 24-hour reserved parking areas.

a. Open areas are available to vehicles bearing the appropriate residence hall parking permit.

b. Buchanan Hall parking lot is restricted at all times to Buchanan Hall residents only.

c. Reserved areas are restricted to vehicles bearing the applicable residence hall permit and are reserved 24 hours per day.

4.31(2) Residence hall parking permits are issued to student residents of the various halls at no charge. Residence hall parking permits are issued quarterly at registration. Students shall be required to show automobile registration before permit is issued.

4.31(3) The parking permit fee for residence hall employees for parking in residence hall reserved lots shall be at the rate of $20.00 per year, and may be obtained as stated in 4.33(12) and 4.33(13).

4.31(4) Car pool privileges for residence hall employees in residence hall reserved lots are available under conditions set forth in 4.40(262).

4.31(5) Vehicles bearing residence hall parking permits may be parked in on-campus lots only during times not restricted under 4.29(2). They may be parked in metered areas at any time upon payment of appropriate meter fee.

4.32(262) Student parking on campus.

4.32(1) Students and graduate assistants (C base staff members living within the area enclosed by the nonpermit boundary, are not eligible for, and therefore will not be issued, permits for parking in campus parking lots, except for physical disabilities certified by the director of the University Student Health Service and special traffic committee action. See 4.35(262).

4.32(2) Students and graduate assistants (C base staff members) living outside the area designated in 4.32(1) are eligible for and may obtain parking permits to park their vehicles on campus.

4.32(3) Vehicles bearing a student on-campus parking permit may be parked only in metered areas and campus parking lots designated as "Permit".

4.32(4) The fee for a student and graduate assistant (C base staff members) on-campus parking permit is:

Fall, Winter and Spring	$6.00 per quarter
Summer Quarter	$3.00

4.32(5) No refunds will be made on quarterly permits after they have been affixed.

4.32(6) All students, regardless of location of residence, may park in metered areas upon payment of the appropriate parking meter fee.

4.33(262) Faculty and staff—general parking.

4.33(1) Faculty and staff members employed by the university one-half time or more on an A, B, E or H base are eligible for staff parking permits.

4.33(2) All staff members, 70 years of age or over, who are on part-time basis assignment of regular duty for only three months per year are eligible, upon request, for a general parking permit free of charge.

4.33(3) All staff members, 65 years of age or over, who are fully retired and not on the university payroll are eligible, upon request, for an annual visitor's parking permit free of charge.

4.33(4) Eligible faculty and staff members may obtain a staff parking permit only for those vehicles bearing current Iowa license [registration] plates.

4.33(5) Members of the armed services assigned to the university as staff members may obtain parking permits for vehicles bearing current out-of-state license [registration] plates, as provided for by the Code.

4.33(6) In each academic year eligible university faculty and staff members who expect to park a motor vehicle on campus or who own a motor vehicle which will be parked on campus by another driver during the hours set forth in 4.29(2) shall obtain a parking permit and display it on the vehicle as set forth in 4.42(262).

4.33(7) Eligible faculty and staff members may obtain parking permits upon application to the traffic office and payment of appropriate fee.

4.33(8) A faculty or staff member will not be issued parking permits for more than one car except as provided in 4.41(262).

4.33(9) More than one type of permit may be issued for any one car providing the vehicle registrant is eligible for each type of permit and that appropriate fees are paid.

4.33(10) If more than one member of a family is employed by the university, each member may apply for any parking permit for which he or she is eligible.

4.33(11) See 4.35(262) for provisions for physically handicapped or medically disabled persons.

4.33(12) The fee for a general or Ames laboratory staff parking permit is $20.00 for the year September 1 to August 31.

4.33(13) An applicant for a general or Ames laboratory staff parking permit may remit the annual parking permit fee by check with the application, or authorize a single payroll deduction for the full annual parking permit fee. Payment in currency will not be accepted except when made in person at the traffic office.

4.33(14) General and Ames laboratory staff parking permits are issued on an annual basis only. Refunds may be obtained for unexpired quarters on a quarterly basis, upon written request including remnants of the permit removed from the vehicle. No refunds are made for the spring and summer quarter. See 4.44(262).

4.33(15) New faculty or staff members starting employment after the beginning of the academic year may obtain parking permits at the following fees for the remainder of the year:

Beginning employment during:	General Permit	Reserved Permit
Fall Quarter	$20.00	$60.00
Winter Quarter	14.00	40.00
Spring Quarter	8.00	30.00
Summer	3.00	20.00

4.33(16) Vehicles bearing a general or Ames laboratory staff parking permit may be parked in any parking lot designated as "Staff" or "Permit". They may not be parked in "Reserved" areas, nor in metered areas without payment of the appropriate meter fee.

4.33(17) Parking in Ames laboratory Lot 28AL or area in Lot 26, is restricted to vehicles bearing Ames laboratory parking permits.

4.34(262) Faculty and staff—reserved parking.

4.34(1) Eligible faculty or staff members, as defined in 4.33(1) may apply for assignments in "Reserved" parking lots or areas.

4.34(2) Assignment of reserved parking permits will be by reserved parking lot or areas only, and not by individual parking stall.

4.34(3) Individual stall assignment is available only to the president and vice-presidents of the university and for university-owned vehicles upon approval of request.

4.34(4) A vehicle bearing a reserved parking permit shall be parked only in the parking lot or area to which it is assigned.

4.34(5) A vehicle bearing a reserved parking permit shall not be parked in any other lot, or in a metered area without payment of the appropriate meter fee.

4.34(6) Applicants for reserved parking permits will be assigned into reserved parking lots or areas as close to their preferred location as possible, under the following order of precedence and in the order of receipt of application within each category:

a. Medical: Certified by the director of the University Student Health Service.

b. Members of the Administrative Board.

c. University department-owned vehicles.

d. Faculty and staff.

4.34(7) Parking of an unauthorized vehicle in an assigned reserved parking lot or area will subject the violator to a fine (4.51(2)"*d*") and to having the vehicle towed away.

4.34(8) Car pool privileges are available. [4.40(262)]

4.34(9) The fee for a "Reserved" parking permit is $60.00 for the year September to August 31.

4.34(10) Reserved parking permits are issued on an annual basis only. Refunds may be obtained for unexpired quarters only on a quarterly basis upon written request enclosing remnants of the permit removed from the vehicle. No refunds are made during the spring or summer quarters. See 4.44(262).

4.34(11) An applicant for a reserved parking permit may remit the annual parking permit fee by check with the application, or authorize a single payroll deduction for the full annual parking permit fee. Payment in currency will not be accepted except when made in person at the traffic office.

4.34(12) Reserved parking is in effect during the hours set forth in 4.29(2).

4.35(262) Provisions for handicapped and disabled.

4.35(1) Physically handicapped or medically disabled students may obtain the following special parking privileges upon issuance of a letter by the director of the Student Health Service indicating the character, extent and probable duration of the disability and certifying need for special parking:

a. General faculty and staff parking permit [4.33(262)] at a fee of $6.00 per quarter and $3.00 for summer.

b. Reserved parking permit in a specified reserved parking lot [4.34(262)] for a fee of $20.00 per quarter and $10.00 for summer. Also see 4.28(3).

c. Special parking meter permit for parking at any parking meter at any time, for an unlimited period for a fee of $30.00 per quarter and $30.00 for the summer quarter.

4.35(2) Physically handicapped or medically disabled faculty or staff members may obtain the following special parking privileges upon issuance of a letter by the director of Student Health Service indicating the character, extent and probable duration of the disability and certifying the need for special parking:

a. Reserved parking permit [4.34(262)]. Also see 4.28(3).

b. Special parking meter permit for parking at any parking meter at any time, for an unlimited period for a fee of $30.00 per quarter and $30.00 for the summer quarter.

4.36(262) Parking publicly owned vehicles.

4.36(1) Publicly owned vehicles are subject to all university traffic and parking rules.

4.36(2) Publicly owned vehicles, federal or state, shall be parked overnight in the car pool area provided by the university, unless otherwise accommodated.

a. Such vehicles are not required to display a university parking permit, but must be registered by the person responsible for them at the traffic office.

b. These vehicles may be parked in "Staff" or "Permit" parking lots for periods not exceeding three hours. They shall not be parked in "Reserved" areas if they do not display an appropriate reserve permit. If parked in a metered area, the appropriate meter fee shall be paid.

4.36(3) Publicly owned vehicles that are to be parked in "Staff" or "Permit" lots for more than three hours shall be provided with and display a general staff parking permit. See 4.33(262).

4.36(4) University-owned department vehicles required in the operation of the department may apply for a reserved parking stall. Upon approval of the application the assignment will be made free of charge.

4.36(5) Vehicles granted a reserved stall must be parked in that stall. If parked elsewhere on campus, they must be parked in a metered area and pay the appropriate meter fee.

4.37(262) Visitor parking.

4.37(1) Occasional visitors on campus shall park either in metered parking spaces or the Memorial Union Ramp.

a. A limited number of meter parking permits which authorize all-day parking at any parking meter on the campus is available from the traffic office for a fee of $1.00 per day. Such permit is not valid in the lot immediately east of the Memorial Union nor in the Ramp.

b. Visitors who have frequent occasion to visit the campus on business may apply for a visitor's parking permit. See 4.33(262).

4.37(2) Visitors enrolled in short course of more than one week duration are considered as students. See 4.32(262).

4.37(3) Faculty members who are in charge of short courses and conferences may apply to the university traffic committee for issuance of special parking permits to short course enrollees. Assignments to parking lots may be made provided the short course is scheduled at such a time and limited to such a number of enrollees that the assignments do not interfere with normal parking.

4.37(4) Fees for special parking permits for short course enrollees shall be designated by the traffic committee.

4.37(5) Visitors enrolled in short courses or conferences of less than one week duration, who do not have a special parking permit, shall park either in the Memorial Union Ramp or in parking meter areas.

4.38(262) Metered parking.

4.38(1) Metered parking spaces are provided in most campus parking lots and on some campus streets.

4.38(2) Metered parking spaces are open to all (faculty, staff, students and visitors) upon payment of the proper fee for the time the space is occupied.

4.38(3) The meter parking fee is five cents for each 30-minute period.

4.38(4) The time limits shall be as indicated on the meter. Meters with orange bands just below the heads are one-half hour only. All other meters are one hour or longer.

4.38(5) A limited number of meter parking permits which authorize all-day parking at any parking meter on the campus is available from the traffic office for a fee of $1.00 per day. Such permit is not valid in the lot immediately east of the Memorial Union nor in the Ramp.

4.38(6) Care should be taken to assure that the vehicle being parked is within the marked area corresponding to the correct meter.

4.38(7) Violation for overtime parking in metered spaces is subject to penalty. See 4.51(4).

4.38(8) Multiple violation citations may be issued for consecutive time limits exceeded.

4.38(9) An inoperative parking meter shall be reported immediately to the traffic office. An officer will be dispatched immediately to check meter.

4.39(262) Two- or three-wheeled motor vehicle parking.

4.39(1) Two- or three-wheeled motor vehicles (motorcycles, motor scooters and motor bikes) shall be parked only in areas designated for such parking. Small irregular areas in parking lots shall not be used for such purpose unless so designated.

4.39(2) Parking permits for parking such motor vehicles in areas designated for that purpose may be purchased for a fee of $2.00 per quarter.

4.39(3) Such motor vehicles may be parked in metered areas upon payment of the meter fee.

4.39(4) More than one such motor vehicle may be parked in the same stall provided all vehicles are completely within the designated stall area.

4.39(5) If an overtime citation is made where multiple vehicles are parked in one stall the violation penalty will be charged against each vehicle individually. See 4.38(7).

4.40(262) Car pools.

4.40(1) Car pools consisting of up to five motor vehicles may apply for a parking permit.

4.40(2) Each vehicle in the car pool shall be registered, and upon registration will be issued a car pool identification sticker. See 4.42(1). This sticker is not a parking permit.

4.40(3) The car pool will be issued one transferable parking permit which shall be on display in the car parked on campus. See 4.42(6).

4.40(4) If more than one car of a car pool is to be parked on campus simultaneously, the extra car or cars must be parked in a metered area and appropriate meter fee paid. Note 4.38(5) for all-day meter permit.

4.40(5) Car pool privileges are available to eligible faculty-staff members for either general (4.33) or reserved (4.34) parking permits, and to eligible students (4.32).

4.40(6) The parking permit fee for a car pool is as follows:

a. Reserved assignment permit—$60.00 per year. Subject to 4.34(262).

b. General parking permit—$20.00 per year. Subject to 4.33(262).

c. Student parking permit—$6.00 per quarter. Subject to 4.32(262).

4.40(7) One member of the car pool shall submit the application for all members of the car

pool, and such member shall be responsible for payment of the full parking permit fee.

4.40(8) The fee for replacement of a lost or stolen transferable car pool parking permit shall be in accordance with the schedule set forth in 4.33(15).

4.40(9) Two- or three-wheeled motor vehicles may not be included in a car pool because of the vulnerability to theft of the transferable car pool parking permit.

4.41(262) Second car.

4.41(1) Anyone having two or more cars which may be used alternately for parking on campus, should apply for car pool privileges and use car pool procedure for parking on campus.

4.41(2) In the event of an emergency, breakdown, or repair, a temporary equivalent parking permit for a period not to exceed two weeks, will be issued without charge when application is made in person at the traffic office. (Traffic office is open at 7:30 a.m.)

4.41(3) An all-day meter parking permit may be obtained as described in 4.38(5).

4.42(262) Affixing and removal of permits.

4.42(1) Student identification stickers, car pool identification stickers and parking permits other than car pool permits, shall be firmly affixed on the inside of the rear window at the lower edge on the driver's side of standard body type vehicles. On pickups or convertibles, and other types of vehicles without fixed rear windows, they shall be affixed on the lower right edge of the windshield. On station wagons they shall be affixed on the extreme rear of the left side window.

4.42(2) On motorcycles, stickers and identifications shall be affixed to handlebar adjacent to steering column with number visible from top.

4.42(3) Identification stickers and student parking permits shall be properly affixed by midnight of the first day of classes or the day they are obtained, if after classes begin.

4.42(4) Faculty and staff parking permits shall be properly affixed by midnight of the first day that classes are in session for the academic year, or within three working days after becoming a staff member.

4.42(5) Stickers or parking permits taped or clipped on windows are not considered firmly affixed.

4.42(6) Transferable car pool parking permits shall be hung from the interior rear view mirror so that they will be readable from outside. On sport cars, transferable car pool permits may be locked to the dashboard or steering column in a manner approved by the traffic department.

4.42(7) Expired identification stickers and parking permits shall be removed in a manner that leaves no trace of the sticker or permit upon the window of the car before a new sticker or permit is affixed. Expired stickers and permits shall be similarly removed before a vehicle is parked on campus.

4.43(262) Replacement of permits.

4.43(1) In the event that a motor vehicle is sold or transferred to a new owner or user, the identification sticker or parking permit shall be removed. If so removed and parts thereof recovered and returned to the traffic office, a new corresponding sticker or permit will be issued free of charge for the replacement vehicle.

4.43(2) Upon substantial evidence presented in writing that the original parking permit has been lost, stolen or destroyed, a duplicate sticker will be issued upon payment of the following appropriate fee:

a. Car pool transferable permit	See 4.33(15)
b. Restricted access key card	$2.00
c. Reserved parking permit	$5.00
d. General parking permit	$2.00
e. Student parking permit	$1.00
f. Motorcycle parking permit	$1.00
g. Student ID sticker	no charge
h. Residence hall parking permit	no charge

4.44(262) Refunds.

4.44(1) Fees for faculty and staff parking permits issued on an annual basis may be refunded for the unexpired quarters on a quarterly basis upon written application enclosing the remnants of the permit removed from the vehicle. No refunds are made for the spring and summer quarter.

4.44(2) The schedule of refunds for "General" or "Reserved" faculty and staff parking permits is as follows:

	General	Reserved
Any time during Fall Quarter	$14.00	$42.00
Any time during Winter Quarter	8.00	24.00
Any time during Spring or Summer Quarter	none	none

4.44(3) No refunds will be made on parking permits issued on a quarterly basis if the permit has been affixed.

4.45(262) Definition of bicycle.

4.45(1) The term "bicycle" as used herein includes every device propelled by human power upon which any person may ride, having two or more wheels.

4.45(2) Any bicycle equipped with a motor shall be considered a motor vehicle and subject

to the traffic and parking regulations for motor vehicles.

4.45(3) A single wheeled device called a "unicycle" shall be subject to the same rules as bicycles.

4.46(262) Applicability of bicycle.

4.46(1) The rules set forth herein are applicable only on university lands. It should be noted that regulations are provided by the Ames Municipal Code, Chapter 7 for bicycle operation in the city of Ames.

4.46(2) The rules set forth herein apply whenever a bicycle is operated upon any street, sidewalk, public way or a path set aside for the exclusive use of bicycles, subject to those exceptions stated herein.

4.46(3) Every person operating a bicycle, whether as owner or not, shall conform to all provisions of the rules set forth herein and shall be punished for any violation thereof.

4.47(262) Bicycle traffic.

4.47(1) *Applicability of traffic laws.* Every person riding a bicycle on a street or roadway is granted all the rights and is subject to all the regulations applicable to the driver of any vehicle on that street or roadway and to the special rules herein, except those provisions of the laws which by their nature have no application.

4.47(2) *Obedience to traffic control devices.*

a. Any person operating a bicycle shall obey the instructions of official traffic-control signals, signs and other control devices applicable to motor vehicles, unless otherwise directed by a police officer.

b. Whenever authorized signs are erected indicating that no right or left or U turn is permitted, no person operating a bicycle shall disobey the direction of any such sign, except where such person dismounts from the bicycle to make any such turn, in which event such person shall obey the regulations applicable to pedestrians.

4.47(3) *Bicycle paths.* Whenever a usable path or bikeway has been provided in or adjacent to a street or roadway, bicycle riders shall use such path or bikeway and shall not use the street or roadway.

4.47(4) *Sidewalks.* Bicycle riders shall not use sidewalks where adjacent bicycle paths or bikeways have been provided or designated. Adjacent includes a path or bikeway so marked if on the opposite side of a street or road from the designated sidewalk. Attention is called to the Ames Municipal Code which prohibits riding on the sidewalk on the south side of Lincoln Way between Stanton Avenue and Hayward Avenue.

4.47(5) *Restricted access streets.* Where campus streets have been closed to motorized traffic, bicycle riders shall use those streets and shall not use the adjacent sidewalks.

4.47(6) *Right of way of pedestrians.* Whenever any person is riding a bicycle, such person shall yield the right of way to any pedestrian and shall give audible signal before overtaking and passing any such pedestrian. See 4.50(2).

4.47(7) *Lawn areas.* Bicycle riders shall not ride on lawns or any areas not designated as a bikeway.

4.48(262) Parking bicycles.

4.48(1) *Parking.* Bicycles shall be parked in bicycle racks provided. They shall not be parked on lawns or on walks.

4.48(2) *Buildings.* Bicycles shall not be taken inside any university buildings.

4.49(262) Operation of bicycles.

4.49(1) *Riding.* A person propelling a bicycle shall not ride other than astride a permanent and regular seat attached thereto.

4.49(2) *Number of passengers.* No bicycle shall be used to carry more than one person per seat.

4.49(3) *Reckless operation.* No person shall operate a bicycle in a reckless manner or in such a way as to endanger other persons or property.

4.49(4) *Emerging from alley, driveway, parking area.* The operator of a bicycle emerging from an alley, driveway or parking area shall, upon approaching a sidewalk or the sidewalk area extending across any alleyway, yield the right of way to all pedestrians approaching on said sidewalk or sidewalk area and upon entering the roadway yield the right of way to all vehicles approaching on said roadway.

4.49(5) *Clinging to vehicles.* No person riding upon any bicycle shall attach the same or himself to any moving vehicle.

4.49(6) *Carrying articles.* No person operating a bicycle shall carry any package, bundle or article which prevents the rider from keeping at least one hand upon the handlebars.

4.50(262) Equipment.

4.50(1) *Lamps, reflectors required.* Every bicycle when in use during the hours from one-half hour after sunset to one-half hour before sunrise shall be equipped with a lamp on the front which shall emit a white light visible from a distance of at least 500 feet to the front and with a red reflector on the rear of a type which shall be visible from all distances from 50 feet to 300 feet to the rear when directly in front of lawful upper beams of headlamps on a motor vehicle. A lamp emitting a red light visible from a distance of 500 feet to the rear may be used in addition to the red reflector.

4.50(2) *Signal device required; siren, whistle prohibited.* No person shall operate a bicycle unless it is equipped with a bell or other device capable of giving a signal audible for a distance of at least 100 feet, except that a bicycle shall not be equipped with nor shall any persons use upon a bicycle any siren or whistle.

4.50(3) *Brake required.* Every bicycle shall be equipped with a brake which will enable the operator to make the braked wheel skid on dry, level, clean pavement.

4.51(262) Penalties.

4.51(1) The person to whom a parking permit or identification sticker has been issued by the university shall be responsible for all parking violations involving the vehicle bearing the respective sticker.

4.51(2) Violation of any of the rules governing the use of motor vehicles on campus will subject the violator to a penalty according to the following schedule:

a. Falsification of registration information [4.30(9)]. ..... $15.00 each offense

b. Illegal use of permit or restricted access key-card. ..... $15.00 each offense

c. Failure to display identification sticker [4.30(1)]. ..... $10.00 each offesne

d. Parking in a reserved area when parking restrictions apply [4.29(2)]. Vehicle will be towed away. ..... $10.00 plus towing fee

e. Illegal parking [4.29(3)].
..... $5.00 each offense

f. Failure to exhibit the proper transferable car pool permit [4.40(262)].
..... $3.00 each offense

g. Improper parking [4.29(4)] and in restricted areas (other than reserved areas) when restrictions apply. ..... $2.00 each offense

h. Failure to completely remove expired parking or identification sticker [4.42(5)].
..... $1.00 each offense

4.51(3) If a vehicle has accumulated five or more violation tickets and the fines for these violations have not been paid, the vehicle will be towed away and impounded.

4.51(4) Meter violations.

a. Violation for overtime parking in a metered parking stall is subject to a fine of $1.00 for each violation.

b. Multiple tickets may be issued for consecutive time limits exceeded.

c. Courtesy fine-depository boxes are available in the vicinity of the metered areas.

d. The meter violations are separate from those indicated in 4.51(2).

4.51(5) Parking by fire hydrants, fire lanes, blocking sidewalks, speeding, failure to stop and other moving traffic violations will be referred to the municipal court of Ames under the Code of Iowa.

4.51(6) Moving bicycle violations of these regulations identified under 4.47(1) and 4.47(2) will be referred to the municipal court of Ames under the Code of Iowa.

4.51(7) All other moving bicycle violations are subject to a penalty of $1.00.

4.51(8) The bicycle owner is responsible for all parking violations.

4.51(9) Bicycle parking violations will subject the owner to penalties according to the following schedule:

	If bicycle is	
	Registered in Ames	Unregistered in Ames
a. Bicycle in university building	$1.00	$3.00
b. Parking in place other than bicycle rack or designated bicycle parking area	$1.00	$3.00

4.51(10) Registered bicycle owners will be sent a notice and billed for the amount of the penalty.

4.51(11) Unregistered bicycles will be impounded and can be claimed after identification and payment of penalty.

4.51(12) Bicycles impounded and unclaimed after three months will be sold at auction.

4.52(262) Institutional appeals.

4.52(1) Filing of an appeal or giving notice of intention of appeal shall be made at the traffic office.

4.52(2) An appeal of a parking violation ticket issued under these rules must be submitted in writing to the traffic appeals board within seven days after issuance of the violation ticket or the right to appeal will be forfeited and the amount of the fine billed.

4.52(3) A violator may, upon written request, have a personal hearing before the traffic appeals board.

4.52(4) Reappeal of cases which have been heard and acted upon may be instituted only if new pertinent and substantial evidence is to be introduced.

4.52(5) Fourth and subsequent appeals of one or more violations of all types shall be subject to an additional $5.00 service charge if the appeal is denied.

4.52(6) The traffic appeals board has two sections, one for faculty and staff and another for students. Appeals and correspondence should be addressed to the proper section of the appeals board, Traffic Office, ISU Campus, Ames, Iowa 50010.

4.53(262) District court appeal. Appeal from traffic appeals board ruling may be heard *de novo* by the district court.

4.54(262) Disciplinary action. Habitual and flagrant violations of these rules shall subject the violator to disciplinary action.

4.54(1) The cases of student violators shall be referred to the Dean of Students or the All-University Judiciary, or both.

4.54(2) Faculty and staff members are subject to deductions of penalties and fines from their pay checks.

4.55(262) Suggestions. Written suggestions to promote traffic safety on the campus are welcomed by the traffic committee. Please address such suggestions to the University Traffic Committee, The Hub.

[4.25 to 4.55 Filed August 31, 1971; amended July 24, 1972]

4.56 to 4.65 Reserved for future use.

UNIVERSITY OF NORTHERN IOWA

4.66(262) Purpose. The purpose of these rules is to provide for the policing, control and regulation of parking of vehicles on the campus of the University of Northern Iowa.

4.67(262) Definitions. For the purpose of these rules, the following definitions shall apply unless the context clearly requires otherwise, and all other words shall have meaning according to their common usage.

4.67(1) *University.* "University" refers to the University of Northern Iowa, located in Cedar Falls, Iowa.

4.67(2) *Student.* A "student" is any person registered with the university for academic credit or for short courses or workshops for more than a one week period.

4.67(3) *Employee.* An "employee" is any person regularly employed by the university who is not a student.

4.67(4) *Visitor.* A "visitor" is any person who owns, operates, or parks a vehicle on the university campus who is not a student or an employee.

4.67(5) *Vehicle.* A "vehicle" is any wheeled device used or designed for use as a means of transportation or conveyance of persons or property.

4.67(6) *Motor vehicle.* A "motor vehicle" is any vehicle which is self-propelled and has four or more wheels in contact with the ground.

4.67(7) *Motorcycle.* A "motorcycle" is any vehicle which is self-propelled and has less than four wheels in contact with the ground.

4.67(8) *Bicycle.* A "bicycle" is any two-wheeled vehicle which is not self-propelled and which is designed to be pedaled by the rider.

4.67(9) *Supervisor.* "Supervisor" refers to the supervisor of security at the university or to any other person or persons designated by the president of the university to perform any function or duty of the supervisor hereunder.

4.67(10) *Committee.* "Committee" refers to the traffic and safety committee at the university.

4.68(262) Registration. Vehicles shall be registered as follows.

4.68(1) *Students.* Every motor vehicle and motorcycle which is operated or maintained by a student within Black Hawk County, Iowa, which may, at any time, use university parking facilities, must be registered with the university and a registration permit be displayed on the vehicle in the manner prescribed by the supervisor. Any student who operates or maintains a motor vehicle or motorcycle in Black Hawk county or who owns a vehicle which is so operated or maintained and which may, at any time, use university parking facilities, is responsible for the proper registration of such vehicle and the display of the registration permit thereon.

4.68(2) *Employees.* Motor vehicles and motorcycles owned or operated by employees may be registered with the university if the employee so desires, but registration of such vehicles is not required unless the employee desires parking privileges on the campus. A registration permit may be issued for display on vehicles registered by employees.

4.68(3) *Procedure.* Applications for registration shall be submitted to the supervisor in the manner he prescribes. No student shall register any vehicle owned or actually maintained by another student.

4.69(262) Parking facilities. The university may set aside and designate certain areas of the campus for the parking of motor vehicles, motorcycles and bicycles, and the use of any lot, ramp, or part of the parking facilities so established may be restricted to students, employees or visitors. The supervisor shall cause signs to be erected and maintained clearly identifying those areas of the university campus designated for vehicle parking, and any restrictions applicable thereto shall be conspicuously posted.

4.69(1) *Parking control devices.* Gates and other devices may be installed and maintained to control access to any parking facility.

4.69(2) *Parking meters.* Parking meters, toll houses and other devices may be installed and maintained to regulate the use of any parking facility.

4.69(3) *Hours of operation.* Reasonable hours shall be established for the normal operation of the parking facilities and a schedule of hours of operation shall be published and available for public inspection in the office of the supervisor.

4.69(4) *Closing.* The supervisor may temporarily close any parking facility for cleaning, maintenance, or other university purpose, or may temporarily restrict or reassign the use of any facility as may be necessary or convenient. The supervisor shall give advance notice of such temporary closing, restriction, or reassignment by posting or otherwise when practical.

4.69(5) *Restricted zones.* The supervisor and committee may designate areas of the campus as restricted zones, such as loading zones or service vehicle zones, and such restricted zones shall be conspicuously posted. No parking shall be permitted in such restricted zones except as authorized.

4.69(6) *No parking.* Vehicle parking on the campus shall be restricted to designated parking facilities, and no parking shall be permitted at any other place on the campus. Vehicles shall not be parked in such a manner as to block or obstruct sidewalks, crosswalks, driveways, roadways or designated parking stalls. No parking is permitted in prohibited zones, such as in the vicinity of fire hydrants or fire lanes, and such zones shall be conspicuously posted or marked by painted curbs or other standard means.

4.69(7) *Motorcycle parking.* The supervisor and committee may designate areas of the parking facilities for motorcycle parking, and such areas shall be conspicuously posted. Motorcycles shall be parked only in areas designated for motorcycle parking, and no other vehicles shall be parked in such areas.

4.69(8) *Bicycle parking.* The supervisor and committee may install and maintain bicycle parking racks or designate other facilities for bicycle parking. Bicycles shall be parked only in bicycle racks or other facilities designated for bicycle parking.

4.70(262) Parking privileges. Students and employees may be granted parking privileges on the campus in accordance with these rules and upon such reasonable terms and conditions as may be established by the university.

4.70(1) *Students.* Students may be granted parking privileges in parking facilities designated for student use. Optional plans and facilities may be offered as determined by the supervisor and committee. Reasonable classifications may be established on the basis of a student's age, class, college or department, course load, proximity of his residence to the campus, physical disability, employment, the availability of facilities, or any other relevant criterion to determine the eligibility of students for parking privileges or any optional plan or facility.

4.70(2) *Employees.* Employees may be granted parking privileges in parking facilities designated for employee use. Optional plans and facilities may be offered as determined by the supervisor and committee. Reasonable classifications may be established on the basis of an employee's job classification, length of service, place of work or the nature thereof, physical disability, the availability of facilities, or any other relevant criterion to determine the priority of employees for assignment of parking privileges or any optional plan or facility.

4.70(3) *Visitors.* Visitors may be granted parking privileges in parking facilities designated for visitor parking. Optional plans and facilities may be offered as determined by the supervisor and committee. Reasonable classifications may be established on the basis of the time, duration or purpose of the visit, physical disability, the availability of facilities, or any other relevant criterion to determine the eligibility of visitors for parking privileges or any optional plan or facility.

4.70(4) *Procedure.* Applications for parking privileges shall be submitted to the supervisor in the manner he prescribes. No student shall apply for parking privileges for any vehicle owned or actually maintained by another student. The supervisor shall determine the eligibility and priority of each applicant for parking privileges and shall make all parking assignments. A parking permit or other means of identification may be issued to each applicant who is granted parking privileges, and such permit or other identification must be displayed on the vehicle in the manner prescribed by the supervisor.

4.70(5) *Parking fees.* The university may assess and collect from students, employees, and visitors reasonable fees or charges for parking privileges and the use of parking facilities in an amount not to exceed $100 per calendar year. The amount of such fees and charges shall be established by the university and approved by the state board of regents, and a schedule of all parking fees and charges shall be published and available for inspection during normal business hours in the office of the supervisor and in the office of the state board of regents. Parking fees and charges may be assessed and collected on an annual, semester, monthly, or hourly basis. Parking fees and charges may be added to student tuition bills and may by agreement be withheld from the salaries or wages of employees by payroll deduction. Parking fees and charges may be collected by means of parking meters or toll houses. Use of any parking facility constitutes an implied agreement to pay the prescribed fee or charge therefor.

4.70(6) *University business.* Special parking privileges may be granted for vehicles being used on official university business on the conditions and in the manner prescribed by the supervisor and committee.

4.70(7) *Responsibility.* Any person who owns or operates a vehicle which is parked on the campus or in whose name the vehicle is registered or parking privileges have been granted is responsible for the proper parking of the vehicle at all times when it is on the campus and for all parking violations involving the vehicle.

4.70(8) *Liability.* Parking privileges granted hereunder constitute a license to use university parking facilities and do not constitute a lease of such facilities or a bailment of the vehicle by the university. Use of the university parking facilities is at the owner's or applicant's risk, and the university shall not be liable or responsible for loss of or damage to any vehicle parked on the campus.

4.70(9) *Revocation.* Parking privileges on the campus may be revoked by the university for good cause at any time upon five days' written notice and refund of any advance payment of parking fees or charges on a pro rata basis for the revoked period.

4.71(262) Violations. Sanctions may be imposed for violation of registration and parking rules as follows:

4.71(1) *Notice of violations.* The university shall give written notice of all parking or registration violations. Such notice may be given by means of a notice of parking violation placed conspicuously on the offending vehicle, and such notice shall constitute constructive notice of the violation to the owner and operator of the vehicle and to any person in whose name the vehicle is registered or parking privileges have been granted.

4.71(2) *Fines.* Reasonable monetary fines may be imposed upon students and employees for violation of vehicle registration or parking rules. The amount of such fines, not to exceed $20 for each offense, shall be established by the university and approved by the state board of regents. A schedule of all fines for improper registration and parking shall be published and available for public inspection during normal business hours in the office of the supervisor and in the office of the state board of regents. Registration and parking fines may be assessed against the owner or operator of the vehicle involved in each violation or against any person in whose name the vehicle is registered or parking privileges have been granted and charged to their university account. Registration and parking fines may be added to student tuition bills or may be deducted from student deposits or from the salaries or wages of employees or from other funds in the possession of the university.

4.71(3) *Impoundment.* Any vehicle parked on the campus in violation of parking or registration rules may be impounded and removed. The university shall give written notice of impoundment to the owner of the vehicle or to the person in whose name the vehicle is registered or parking privileges have been granted. A reasonable fee may be charged for the cost of impoundment and storage, which fee must be paid prior to the release of the vehicle. Impounded vehicles which are not claimed within 60 days will be deemed abandoned property and may be sold, under procedures set forth in chapter 579 of the Code, and the proceeds of the sale will be applied to the payment of the costs of impoundment, storage and sale. The balance, if any, shall be sent to the owner.

4.71(4) *Hearing.* Students and employees may have a hearing on any registration or parking violation. A hearing request shall be submitted to the supervisor in writing within seven days after notice of the violation was given and shall state the grounds of the hearing request. The supervisor may allow additional time within which to request a hearing for good cause shown. Hearings shall be conducted by an impartial committee to be chosen in a manner approved by the president of the university. The person requesting said hearing shall be afforded the opportunity for an administrative hearing by the hearing committee and shall be given reasonable notice of the time and place of the hearing. The decision of the hearing committee shall be final and may be reviewed *de novo* by the district court as provided by law.

4.72(262) Effect of rules. These rules constitute a condition of registration as a student at the university and a condition of employment as an employee of the university. Registration as a student or acceptance of employment constitutes an acceptance of these rules and an agreement to pay all prescribed fees and monetary fines imposed in accordance with these rules.

4.73(262) Administration of rules. The president of the university shall be responsible for the proper administration of these rules. He is authorized to establish procedures not inconsistent with these rules as may be reasonably necessary and convenient for the effective administration of his duties hereunder, and any procedure so established shall be published and available for public inspection during normal business hours in the office of the supervisor and in the office of the state board of regents. The president may delegate his authority under these rules to the supervisor or to any other person designated by the president to perform any function or duty hereunder.

These rules are intended to implement chapter 262 of the Code.

CHAPTER 5
STATE HYGIENIC (BACTERIOLOGICAL) LABORATORY
IOWA CITY, IOWA

GENERAL REGULATIONS

5.1(263) Specimens examined.

5.1(1) *Classification.* This being a public health laboratory, all specimens submitted to it must have a direct, or probable significance to the public health.

5.1(2) *Who may submit specimens.*

a. Physicians and others licensed in one of the healing arts. Licensed physicians, osteopaths and other licensed practitioners may submit specimens needed for the control of diphtheria, typhoid fever, tuberculosis, undulant fever and in general any transmissible disease in which such tests are required by the Iowa state department of health.

b. Veterinarians (duly licensed) may submit specimens involving diseases of animals which are transmissible to man, if such examinations are required by the state department of health.

c. State department of health may submit specimens needed to carry out its fundamental responsibilities.

d. Local departments of health. Only specimens needed in special investigations will be accepted, i. e., we cannot undertake to receive specimens of a routine nature.

e. Private individuals. Specimens submitted by private individuals will be accepted only for private water supplies and only when collected under conditions specified by the laboratory, and when accompanied by the appropriate fee.

5.2(263) Charges.

5.2(1) *Specimens examined free of charge.* Specimens submitted relating to diseases communicable from man to man or from animals to man, provided such examinations are required by the rules of the Iowa state department of health.

5.2(2) *Specimens for which fees are charged.*

a. Water specimens may be charged for at rates to be determined by the Iowa state board of regents subject only to any limitation imposed by law.

b. Specimens not covered by statute, by rules of the Iowa state department of health or as in this subrule, may be examined and charged for at a rate commensurate with the actual cost involved.

[Filed September 29, 1952]

CHAPTER 6
UNIVERSITY OF IOWA HOSPITALS

ADMISSION OF PATIENTS

6.1(255) Indigent patients.

6.1(1) *The quota system.* At the beginning of each fiscal year the hospital administration computes the county quota of indigent patients that may be admitted for treatment to the university hospitals. This is done in full accordance with section 255.16 which provides that "...there shall be treated at the university hospital during each fiscal year a number of committed indigent patients from each county which shall bear the same relation to the total number of committed indigent patients admitted during the year as the population of such county shall bear to the total population of the state according to the last preceding official census."

a. The 1950 Census of Population Report obtained from the U. S. Bureau of the Census is being used.

b. The quota is established after careful consideration of the amount of appropriated funds, the physical capacity of the hospital and the availability of trained personnel necessary for patient care.

c. If, after announcement of the quota at the beginning of the fiscal year, it becomes necessary to lower or raise it during the year's operation, the hospital administration reserves the right of so doing.

6.1(2) *The commitment process.* Chapter 255 of the Code describes in some detail the machinery provided at the county level for the processing of commitment papers for indigent patients. The hospital administration accepts no responsibility for the legal performance of county officials nor for the determination of indigency nor for the determination of legal residency of committed patients.

a. Routine. In the normal routine of admitting an indigent patient, the hospital requires:

(1) Commitment Form No. 11, signed and certified by a judge of a juvenile court or the signature of a judge of a district court which at the same time serves as a juvenile court. The Commitment Form No. 11 remains an acceptable document only for the fiscal year in which it is initiated with the one exception that it does remain effective into a new fiscal year if the patient is under continuous treatment during the transition from one fiscal year into the new. In this situation the commitment paper becomes void immediately upon discharge of the patient. The content of the abovementioned form follows in full detail the description set forth in section 255.12.

(2) Physician's Report No. 4, acceptably signed by only a doctor of medicine or osteopathy. The hospital accepts without question the doctor's statement of need for hospitalization, as well as the doctor's evaluation of the patient's inability to pay for physician's services and hospital care.

b. Emergency. In cases of true emergency, which the director of welfare or the overseer of the poor is responsible for determining, the hospital will accept indigent patients without Commitment Form No. 11 and Physician's Report No. 4. The hospital insists, however, upon a guarantee, in telegraphic form, of the commitment by either of

the above two authorities, as well as the opportunity of agreeing to the use of the hospital facilities prior to the assignment of an actual appointment.

6.1(3) *The admission.* Any indigent patient directed to the university hospitals in conformity with the policies described in 6.1(1) and 6.1(2) above will be admitted;

a. Providing, as outlined in section 255.1 the patient "...is pregnant or is suffering from some malady or deformity that can probably be improved or cured or advantageously treated by medical or surgical treatment or hospital care."

b. Excepting, as described in section 255.15, if "...the presence of the patient in the hospital would be dangerous to other patients, or there is no reasonable probability that he may be benefited by the proposed treatment or hospital care."

c. Additionally, patients whose diagnosis is determined or accepted as being psychopathic, will not be admitted.

d. Additionally, patients whose diagnosis is determined or accepted as being active pulmonary tuberculosis, will not be admitted.

e. Finally, patients will not be accepted for diagnostic and therapeutic treatment by ancillary services only. Referrals must be to and through definite clinical departments.

The hospital administration holds that:

(1) The determination of any of these factors rests with the admitting physician of the hospital or the admitting physicians of the interested clinical departments.

(2) The determination of whether or not the patient shall be classed as inpatient or outpatient rests with the university hospitals' physicians as provided in section 255.21.

(3) It will attempt to discharge the responsibilities reflected in the establishment of the quota at the beginning of each fiscal year but it reserves the right to control the volume of patients on a day-to-day basis and, likewise, to indicate the preference for clinical types of illnesses based upon clinical departmental needs.

(4) It accepts the full responsibility for all appointment schedules and the notification of incoming patients as to their date of admission and mode of transportation as approved by the local authorities.

(5) It reserves the right to refuse admission of nonemergent cases when the approved machinery for admission has been circumvented.

6.1(4) *The charge to quotas:* The hospitals' physicians who are delegated the responsibilities of admitting shall ascertain the clinical service to which the incoming patient is to be admitted. This is done after review of the referring physician's medical report but not necessarily in accordance with this report.

a. The first admission of any patient during a fiscal year shall be charged to the quota of the county initiating the Commitment Form and Physician's Report. Subsequent admissions during the same fiscal year by the same patient shall not be charged to the county's quota.

b. Any admission to obstetrics, orthopedics, or otolaryngology for cleft palate procedures may be accomplished without charge to county quotas as provided in section 255.16. These patients if subsequently seen in any other clinical department then become a charge to the county's quota.

c. The charge to the county's quota is made at the time of the admission of the patient and not at the time of the receipt of the commitment forms.

d. The hospital administration accepts the responsibility for issuing a monthly statement of quota "usage" to each Iowa county. This report will list the name of the patient, the clinical department in which the patient was treated, the date of admission, the residency of the patient and the current status of the county's quota balance.

6.2(255) Excess quota patients.

6.2(1) Section 255.16 refers to the admission of patients from counties which have exceeded the established county quota plus ten percent, as determined by the hospital administration at the beginning of each fiscal year.

6.2(2) Admitting policies for this category of patients are identical to those applicable to indigent patients. See 6.1(2) and 6.1(3) above.

6.3(255) Clinical pay patients.

6.3(1) The university hospitals provide a limited number of accommodations for patients of moderate financial means as allowed under section 255.19.

6.3(2) All applications for admission under this patient category are initiated by the patient's local referring physician through submission of Hospital Form No. 63. In this form the referring physician endorses the medical need and the patient's inability to pay private rates for hospital service and physician's service. Hospital Form No. 63 is directed to the physician upon his request and appointments are made, if possible, upon receipt of the physician's medical report and properly endorsed application.

a. The hospital will accept applications from nonresidents of Iowa.

b. The selection of patients to be admitted in this category is based upon the hospital's ability to care for patients additional to those under the indigent program, and also upon their value as interesting clinical cases.

(1) The hospital will not provide transportation for this category of patient.

(2) The hospital will not provide accommodations outside the hospital for ambulatory patients.

(3) At the time of registration the patient is interviewed and asked to pay the estimated

cost of one week's hospitalization, and, during this interview, he is asked to explain such insurance coverages as might be applied to his hospital bill or physician's bill and proper assignments of such insurance policies are obtained.

6.4(255) County clinical pay patients.

6.4(1) The university hospitals provide a limited number of accommodations for patients of moderate financial means as allowed under section 255.19.

6.4(2) All applications for admission under this patient category are initiated by the patient's local referring physician through submission of Hospital Form No. 63. In this form the referring physician endorses the medical need and the patient's inability to pay private rates for hospital service and physician's services. However, in variance with the procedure outlined under 6.3(255) above for clinical pay patients, the hospital requires the endorsement of the form by the director of social welfare or the overseer of the poor of the county in which the patient resides. Hospital Form No. 63 is directed to the physician upon his request and appointments are made, if possible, upon receipt of the physician's medical report and properly endorsed application.

a. The selection of patients to be admitted in this category is based upon the hospital's ability to care for patients additional to those under the indigent program, and also upon their value as interesting clinical cases.

b. The hospital will not provide transportation for this category of patient.

c. The hospital will not provide accommodations outside the hospital for ambulatory patients.

d. In variance with 6.3(2)"*b*"(3) above, the patient is not required to pay a deposit in advance of his hospitalization inasmuch as the cost is guaranteed by the local county. However, during the initial interview he is asked to explain such insurance coverages as might be applied to his hospital bill or physician's bill, and proper assignments of such insurance policies are obtained.

6.5(255) Private patients.

6.5(1) The university hospitals provide a limited number of accommodations for patients able to pay the full cost of hospital service as well as the charges for physician's services. Provision for these accommodations is specified in section 255.19.

6.5(2) All requests for admission under this patient category are initiated either by the patient's local referring physician or through direct contact between patient and a clinical member of the faculty of the college of medicine.

a. The selection of patients to be admitted in this category is based upon the availability of hospital accommodations and the scheduling and staffing problems in the particular clinical department.

b. The hospital and the clinical department will accept both residents and nonresidents of Iowa.

c. The type of patients selected for inclusion in this category follows the limitations set forth for indigent patients under 6.1(3).

(1) The hospital will not provide transportation for this category of patient.

(2) The hospital will not provide accommodations outside the hospital for ambulatory patients.

(3) At the time of registration, the patient is interviewed and given a full explanation of the estimated costs of hospital and professional services likely to accrue during his hospitalization. During this interview he is asked to explain such insurance coverages as might be applied to either charge area and the proper assignments of such insurance policies are obtained. Agreement is reached with the patient regarding the method of completely discharging his potential indebtedness.

6.6(255) State services for crippled children. Indigent patients under 21 years of age who have a crippling condition included in the approved state services for crippled children plan, but who are unable to obtain legal commitment under the law, may be admitted and treated at the university hospitals with the expense paid from the federal funds administered by this service. Application will be made to the director of the state services for crippled children, state University of Iowa, Iowa City.

6.7(255) State institution patients. In accordance with section 255.28, patients may be admitted from the state board of regents and the state board of social welfare to the university hospitals for medical care. Form No. 71 authorizing treatment will be completed and forwarded to the university hospitals. Transportation to and from the university hospitals will be provided by the patient's institution.

6.8(255) Aid to the blind. Eligibility for this category is determined by the division of public assistance of the state of Iowa. The approved application, together with a physician's report, is sent to the university hospitals and an appointment is made for the patient.

6.9(255) Sterilization cases. Upon receipt of a letter from the state board of eugenics, authorizing sterilization, an appointment date is set for the patient. The patient may be admitted as indigent, clinical pay, county clinical pay, or private, dependent upon the patient's circumstances as outlined under those categories above.

6.10(255) Ward special. All cases of diagnosed venereal disease with the specific exception of gonorrhea fall within this category. The procedure for admission under this category is identical with 6.4(255) above with the exception of:

6.10(1) Clinical Pay Form No. 63 need not be signed by the director of social welfare or the overseer of the poor.

6.10(2) The cost is guaranteed by the public health service.

6.11(255) Veterans. Veterans are admitted and treated at the university hospitals either as a clinical pay or private patient as outlined above, dependent upon the authorization received from the Veterans Administration.

6.12(255) University students. University students are treated at the university hospitals as clinical pay patients as outlined above. They are referred by student health service who guarantees a portion of the cost of hospitalization as outlined in their policies. The student is expected to pay the remainder, if any.

[Filed September 29, 1952]

REVENUE DEPARTMENT
STATE BOARD OF TAX REVIEW

CHAPTER 1
CONDUCT OF APPEALS

1.1(421) Definitions. For the purposes of these rules the following definitions shall govern:

1. "Board" or "state board" shall refer to the state board of tax review created by chapter 421 of the Code.
2. "Department" shall refer to the Iowa department of revenue.
3. "Director" shall refer to the director of the Iowa department of revenue.
4. "Secretary" shall refer to the secretary of the state board of tax review.

1.2(421) Notice of appeal. Jurisdiction is conferred upon the state board by giving written notice to the department within 30 days of the rendering of the decision, order or directive from which such appeal is taken.

Notice of appeal may be given by certified mail with return receipt requested addressed to the department of revenue to the attention of the director; or, by service on the director or an assistant director as provided by the Iowa rules of civil procedure.

Notice shall be proved by affidavit of mailing signed by appellant or his duly authorized representative, with return receipt and a copy of the notice attached filed with the secretary or, filing with the secretary a copy of the notice of appeal with return of service attached.

1.3(421) Contents of notice of appeal. The written notice of appeal shall substantially state in separate numbered paragraphs the following:

1. The appellant's name and legal residence.
2. The date appellant received the director's decision, order or directive.
3. The amount of assessment, nature of tax, year or other period, date of assessment and approximate amount of total tax liability in controversy.
4. A clear and concise assignment of each and every error.
5. A clear and concise statement of the facts upon which the affected taxpayer relies as sustaining the assignment of error.
6. The relief requested.
7. The signature of affected taxpayer or his counsel, together with address to which all subsequent correspondence, notice or papers shall be served or mailed.

1.4(421) Certification by director. Within 15 days after notice of appeal is given the director shall certify to the board all records, documents, reports, audits, a copy of the decision, order or directive from which appeal is taken and all other information pertinent thereto.

1.5(421) Motions and special appearances. All motions or special appearances shall be in writing and shall be filed with the state board within 15 days after the filing of the pleading attacked and shall set forth the reasons and grounds thereof. The state board shall act upon such motions or special appearances as justice may require. Motions based on matters which do not appear of record shall be supported by affidavit.

1.6(421) Responsive pleadings. Responsive pleadings shall be filed with the state board within 15 days after the filing of pleading responded to, unless attacked by motion or special appearance as provided in rule 1.5(421), and then responsive pleadings shall be filed within 15 days after ruling on said motion or special appearance.

1.7(421) Docketing. Appeals shall be assigned consecutive file numbers. The state board shall cause to be kept a well bound, blank record book with suitable index. There shall be entered therein each action and each act done with the proper dates as follows:

1. The title of the appeal.
2. Brief statement of the type of tax, year or period, date of assessment, and the amount involved including tax, penalty, interest and costs.
3. The manner and time of service of notice of appeal.
4. The appearance of all parties.
5. Notice of hearing, together with manner and time of service.
6. The decision of the state board or other disposition of the case and the date thereof.

1.8(421) Filing of papers. After filing proof of giving notice, all motions, pleadings, briefs and other papers to be filed shall be in quadruplicate with the secretary who shall send copies to members of the state board and to all other parties of record, unless represented by counsel of record, then to each counsel.

1.9(421) Hearing an appeal. Hearing an appeal shall be de novo. The case may be submitted on an agreed statement of the facts with written briefs and arguments. Or, the state board, on its own motion or at the written request of any party, may allow the production of evidence, by oral testimony or otherwise, and the submission of the case on oral arguments, or any combination of the foregoing.

1.10(421) Amendments. The board, upon its own motion or upon motion of either party showing good cause filed prior to setting the appeal for hearing, may order a party to file a further and better statement of the nature of his claim or defense. Such a motion filed by a party shall point out defects complained of and the details desired.

The state board may set such motions for hearing or may rule thereon ex parte.

The state board may at any time during the course of the hearing grant motion of either party to amend to conform to the proof.

1.11(421) Appearances by appellant. Any appellant may appear in person, or, in the case of corporations, partnerships or other associations, by its duly authorized representative, or by an attorney at law or a C.P.A. authorized to practice in the state of Iowa.

1.12(421) Prehearing procedure. The state board, on its own motion or on the written request of any party, may order a prehearing conference to consider:

1. The desirability of amending pleadings.
2. Agreeing to the admission of facts, documents or records not really controverted, to avoid unnecessary proof.
3. Limiting the number of witnesses.
4. Settling any facts of which the state board is to be asked to take judicial notice.
5. Stating and simplifying the factual and legal issues.
6. Consolidation or separation of cases.
7. Possibility of compromise.
8. Manner of submission of case.
9. Any other matter which may aid, expedite or simplify the hearing.

The state board shall make an order reciting any action taken at the prehearing conference which will control the subsequent course of the case relative to matters it includes, unless modified to prevent manifest injustice.

1.13(421) Continuances. Any hearing may be continued for good cause. Requests for continuance prior to the hearing shall be in writing, promptly filed with the state board immediately upon the cause becoming known.

1.14(421) Place of hearing. Unless otherwise designated by the state board, the hearing shall be held in the office of the State Board of Tax Review, Lucas State Office Building, Des Moines, Iowa 50319.

1.15(421) Members participating. All appeals shall be heard by a minimum of two members of the state board. Orders and decisions shall be signed by one member of the board and shall name members participating. Decisions shall affirm, modify, remand or reverse the director's decision, order or directive. A majority decision by the state board shall govern and control. Written dissenting decisions may be filed.

1.16(421) Presiding officer. The chairman of the state board or his designated member shall preside at the hearing.

1.17(421) Rulings of the chair. The presiding member shall rule upon motions, objections and other evidentiary matters arising during a hearing, or such rulings may be deferred to the state board or reserved.

1.18(421) Liberal rules of evidence. The common law and statutory rules of evidence shall be liberally construed in hearings before the state board.

1.19(421) Transcript of hearing. Hearings shall be stenographically reported and a transcript thereof shall be made if in the opinion of the state board a permanent record is deemed necessary. Either party may provide a certified court reporter at their own expense.

1.20(421) Suspension or alterations of rules. The board may in its discretion, on its own motion, or upon request by the parties, amend, modify or suspend any of its rules or may adopt other or different rules for the conduct of hearings and procedure before the board. However, no such change shall be made retroactively to the detriment of any party.

[Filed December 9, 1969]

REVENUE DEPARTMENT

[**Editors' Note:** *The following rules of the former State Tax Commission are in the process of revision. However, the revised and corrected rules were not received in time for publication in this volume.*]

[*Rules relating to motor fuel tax previously promulgated by the Treasurer of State have been printed under that heading.*]

RULES RELATING TO THE ASSESSMENT AND COLLECTION OF THE INDIVIDUAL INCOME TAX ON RESIDENT AND NONRESIDENT INDIVIDUALS, PARTNERSHIPS, ESTATES AND TRUSTS AND THE BUSINESS TAX ON DOMESTIC AND FOREIGN CORPORATIONS

[Filed September 27, 1955]

INCOME TAX REGULATIONS

22.4-1 Definitions. Words and phrases not defined in the Act, but used herein, are defined by the commission as follows:

a. "Carrying on trade or business" and similar terms:

1. The terms "trade or business carried on" and "carrying on a trade or business" mean a regular and systematic course of transactions with the public (whether by the owner or by his agents or other representatives) at or from a store, a shop, a factory, an office or an agency, such activity being carried on with a fair measure of permanency and continuity.

2. These terms do not include any casual or isolated transactions, income in the form of compensation for labor or for personal services rendered, transactions or activities the income from which may be exempt from taxation. These terms include the practice of a profession and the renting of properties.

3. If a taxpayer pursues an undertaking constantly, relying on his profit therefrom for his income or a part thereof, he is carrying on a business or occupation. A "trader" in securities who trades regularly and constantly with the public on his own account and makes it his business is carrying on a trade or business.

4. The owning and renting of real estate is regarded as a trade or business.

b. The term "fair market value" has been judicially defined as being "the price which property will bring when it is offered for sale by one who is willing, but is not compelled to sell it, and is bought by one who is willing or desires to purchase, but is not obligated to do so." The term implies the existence of a public of possible buyers at a fair price, and recognizes that the property has no "fair market value" when market conditions are such that there would be no trading in the property in question at a fair price.

c. The words "include" and "including" as used in these regulations shall not be deemed to exclude things otherwise within the meaning of the term defined.

d. The term "income tax" includes personal net income tax and the business tax on corporations.

e. The words "intangible property" mean money, bank deposits, shares of stocks, bonds, notes, credits, evidences of debt, choses in action, or evidence of interest in property, and all property other than tangible property.

f. The words "integrated with" mean inseparably connected with.

g. The words "tangible property" mean real property and personal property that has bodily form and substance, and does not include property defined as intangible property.

h. The term "computed tax" means the amount of tax remaining after deduction of personal exemption, and credit for dependents.

22.5-1 Who are taxpayers. The word "taxpayer" includes under this division:

a. Every resident of the state of Iowa;

b. Every estate and trust resident of this state whose income is in whole or in part subject to the state income tax;

c. Nonresident individuals and estates and trusts (those with situs outside of Iowa) receiving taxable income from property owned in Iowa or from business, trade, profession or occupation carried on or followed in this state.

A minor or an incompetent may also be a taxpayer.

[Amended August 24, 1962]

22.5-2 Meaning of domicile. In general the terms "domicile" and "residence" are frequently used synonymously; however, they are not, when accurately used, convertible terms. "Domicile" is of more extensive significance than "residence" and includes beyond mere physical presence at the particular locality positive or presumptive proof of an intention to constitute it a permanent abiding place. "Residence" is of a more temporary character than domicile. What constitutes domicile is a question of fact rather than of law, frequently depending upon a variety of circumstances and the commission may require a statement of circumstances in determining a particular case.

A domicile once acquired continues until a new one is acquired by intent to change, actual removal and a new abode, with abandonment of the former domicile. Receipt by a taxpayer of a homestead tax credit is deemed conclusive evidence of Iowa domicile. Where a resident of Iowa removes to another state and establishes his residence in such other jurisdiction, but retains the voting privilege in Iowa, such individual is held not to have abandoned his Iowa domicile, and the state income tax will be legally imposed upon the entire income of

such individual. Prima facie, the wife's domicile follows that of her husband. Ordinarily the domicile of an infant follows that of the father and after his death that of the mother until remarriage. The domicile of a ward is not necessarily determined by that of the guardian.

Domicile of members of the armed forces is to be determined as follows:

a. Residents. Persons who were residents of Iowa at the time of becoming members of the armed forces will be considered as continuing to be residents of Iowa, notwithstanding absence from the state by reason of such service.

b. Nonresident. Conversely, persons who were nonresidents of this state at the time of becoming members of the armed forces will not be held subject to the Iowa income tax by reason of their presence in this state in pursuance of military orders.

22.6-1 Fiduciary defined. A "fiduciary" for income tax purposes is one who holds in trust an estate to which another has the beneficial title, or in which another has a beneficial interest, or receives and controls income of another, as in the case of a receiver. There may be a fiduciary relationship between an agent and a principal, but the word "agent" does not denote a fiduciary.

22.6-2 Taxing income from estates and trusts. An estate or trust is a taxable entity. A fiduciary may compute the income of the estate or trust on either a "cash basis" or an "accrual basis" depending upon the method of accounting used by him. In filing its first return an estate may choose the same accounting period as the decedent, or it may choose a calendar year or any fiscal year it wishes. If it chooses the same accounting period as the decedent had, its first return will be for a short period to fill out the unexpired full year of the decedent. A full-year specific exemption credit is allowed on a short-period return, without proration. If the estate or trust is required to file a federal income tax return, the basis used on the state return must be the same as that used on the federal return.

22.6-3 Taxable income of estates or trusts. In the case of estates or trusts, the words "taxable income" mean the taxable income (without a deduction for personal exemption) as computed for federal income tax purposes under the Internal Revenue Code of 1954, but with the adjustments specified in section 422.7, Code of Iowa, 1954. Under the provisions of the Internal Revenue Code of 1954, the taxable income of an estate or trust is found by substracting from its gross income allowable deductions, amounts distributable to beneficiaries, to the extent of its distributable net income, and the proper exemption amount. This is the case whether the fiduciary is an individual, a group of individuals, a corporation, or other representative.

The Internal Revenue Code of 1954 provides that gross income of an estate or trust includes:

1. Income accumulated in trust for the benefit of unborn or unascertained persons or persons with contingent interests, and income accumulated or held for future distribution under the terms of the will or trust;

2. Income which is to be distributed currently by the fiduciary to the beneficiaries, and income collected by the guardian of an infant which is to be held or distributed as the court may direct;

3. Income received by the estate of a deceased person during the period of administration or settlement of the estate; and

4. Income which, in the discretion of the fiduciary, may be either distributed to the beneficiaries or accumulated.

However, all these items eventually are not entirely taxed to the estate or trust. The income in (1) is taxed to the estate or trust; the income in (2) is usually deductible by the fiduciary and is taxed to the beneficiary, whether distributed or not; the income specified in (3) and (4) may be eventually taxed to the fiduciary or to the beneficiary, depending upon the amounts which are properly paid or credited to the beneficiary.

22.6-4 Period of administration defined. The "period of administration or settlement of the estate" is the period required by the executor or administrator to perform the ordinary duties pertaining to administration, the collection of assets and the payment of debts or legacies. It is the time actually required for this purpose, whether longer or shorter than the period specified in the statute for the settlement of estates. Where an executor, who is also named as trustee, fails to obtain his discharge as executor, the period of administration continues up to the time when the duties of administration are complete and he actually assumes his duties as trustee, whether pursuant to a court order or not.

22.6-5 Filing individual returns for a decedent.

a. An executor or administrator of the estate of a deceased person shall file a final individual income tax return for the decedent for the year of decedent's death. Either Form IT-1 or Form NR-1 should be used, depending on whether decedent was a resident or nonresident of Iowa. Such return is due on or before the last day of the fourth month after the expiration of the decedent's normal tax year.

A return for the period starting with the decedent's normal tax year to the date of death may be submitted in advance of its regular due date however, and, in some cases, may be necessary in order to obtain the certificate of acquittance as provided in section 422.27, Iowa Code, 1958, as amended.

In making such return the fiduciary shall use the same method of computing the income, either the cash or accrual basis, as was last used by the

decedent in reporting income prior to death. If the commission discovers from an examination of such return or of the fiduciary return for decedent's estate, or otherwise, that decedent had not filed Iowa individual returns for prior years, and where it appears that decedent may have had sufficient taxable income to require returns from him, the fiduciary shall be responsible for making and filing individual returns for the decedent for the preceding taxable years. In any case where there is no fiduciary acting and no administration is had on decedent's estate at the time the final Iowa individual return of income for the decedent is due, then the surviving spouse, if there is one, or next of kin of decedent who has knowledge of decedent's income shall be responsible for making and filing such decedent's final return. Such accounting of a decendent's income will be required before the certificate of acquittance mentioned in subsection 1 of section 422.27 of the Code, will be issued.

b. A joint return may be filed where one or both spouses die during the year, where the taxable year of both begins on the same day, whether such year is a fiscal or calendar year. The fiduciary of decedent's estate may join with the surviving spouse in the filing of a joint return. In the case of a joint return, it is made for the regular taxable year of the survivor and the short period of the decedent.

A joint return cannot be filed where the surviving spouse remarries before the close of the taxable year in which the decedent died, nor can such joint return be filed in those cases where it is necessary to file a return for the decedent (for a short period) in advance of its regular due date as provided in paragraph "*a*".

c. If the decedent was on the accrual method of accounting, then amounts which would accrue only because of his death are not to be included on his final individual return.

d. Deductions of a decedent are not to be accrued on his final individual return unless his accounting method require it, but are deductible instead by the estate or other person who paid them or is liable for their payment.

e. In general, the same rules must be applied to a final individual return for a decedent as in the case of any living taxpayer.

f. A final individual return for the year that death occurred is required for a decedent if his taxable income amounted to $600 or more. If no such return is required in any case, then the fiduciary of decedent's estate, if one is acting, or the surviving spouse or next of kin, shall advise the fiduciary income tax department of the Iowa state tax commission by not later than the last day of the fourth month after the expiration of the decedent's normal tax year that no final individual return for decedent was required.

g. No proration of the personal exemption credit is required because of death of decedent during the taxable year. On the final separate return of a decedent the deceased is entitled to the personal exemption credit of a single person and to the single person exemption credit of the surviving spouse if the survivor had no gross income and was not a dependent of anyone else provided, however, that the exemption of the surviving spouse will not be allowed on a return required to be filed (for a short period) in advance of its regular due date as provided in paragraph "*a*". A decedent, who furnished over half the support to a person otherwise qualifying as a dependent, would be entitled to the full exemption for such dependent, without proration.

h. In computing income of a decedent for tax years commencing after December 31, 1954, the provisions of chapter 208, Acts of the 56th G. A. are to be followed.

i. The final individual return of income for a decedent or the joint return of a surviving spouse and a decedent shall be mailed to or delivered to the Iowa State Fiduciary Income Tax Division, State Office Building, Des Moines 19, Iowa.

[Amended August 24, 1962]

22.6-6 Fiduciary returns of income for estates and trusts.

a. Fiduciary returns of income for estates and trusts are to be made on Form IT-4. A copy of the federal fiduciary return must accompany Iowa Form IT-4. Such returns are due on or before the last day of the fourth month after the expiration of the tax year of the estate or trust. Such returns shall be mailed to the Iowa State Fiduciary Income Tax Division, State Office Building, Des Moines 19, Iowa.

[Amended August 24, 1962]

b. An estate or trust is allowed to establish as its taxable year a calendar year or fiscal year, depending on what basis the accounting records of the estate or trust are kept. In the case of an estate for a deceased person, the first fiduciary return of income should ordinarily commence with the day next after date of decedent's death, and in making such first return the estate may choose the same accounting period as the decedent, or it may choose a calendar year or any fiscal year it wishes. The state of Iowa fiduciary return must cover the same period of time as that covered by a federal fiduciary return for the estate or trust for the particular year.

[Amended August 24, 1962]

c. If the gross income of an estate or trust for a tax year amounts to $600 or more, the fiduciary thereof shall make and file an Iowa fiduciary return of income for the estate or trust. In the case that the estate or trust is ready for closing and where the fiduciary applies for an income tax clearance certificate for filing under the provisions of section 422.27, there shall be filed a final fidu-

ciary return for the estate or trust regardless of the amount of income or whether any income was received by the fiduciary. Such final fiduciary return shall be filed at the time application is made for such certificate of acquittance, and will be required regardless of whether or not the fiduciary makes a federal fiduciary return of income covering such final period of time.

[Amended August 24, 1962]

d. A fiduciary in making an Iowa fiduciary return for an estate or trust shall include thereon all items of income reported or reportable for federal income tax purposes under the Internal Revenue Code of 1954. In determining the Iowa taxable income of the fiduciary, the personal exemption deduction of the fiduciary for federal income purposes cannot be taken. The adjustments specified in section 422.7, Code of Iowa, 1958, as amended, must be made.

[Amended August 24, 1962]

e. A fiduciary in taking deductions from income of an estate or trust on an Iowa fiduciary return shall include items of deductions reported or reportable for federal income tax purposes under the Internal Revenue Code of 1954, but in taking a deduction for taxes paid or accrued, the fiduciary is permitted to take a deduction for federal income tax paid or accrued by the estate or trust in the tax year, but the amount of such deduction shall be adjusted by any amount of federal income tax refunded to the estate or trust in that tax year, so that the said refund will be made subject to the Iowa tax. Also, for Iowa income tax purposes, the fiduciary will not be permitted to include as a deduction any amount of Iowa income tax paid by the fiduciary.

f. The fiduciary shall show on the Iowa fiduciary return the amount of income of the estate or trust distributed or distributable to beneficiaries as reported on the federal fiduciary income tax return, and shall also show the amount of taxable income of the estate or trust distributed or distributable to beneficiaries for Iowa income tax purposes. In those cases where for federal income tax purposes only part of the year's income is distributed or distributable to beneficiaries, the distribution for federal income tax purposes will differ in most cases from the amount that for Iowa income tax purposes is distributed or distributable. Such difference being brought about by adjustments to income and deductions required under the Iowa income tax law as amended. The amount of income to be shown on the Iowa fiduciary returns as distributed or distributable shall bear the same ratio to the net income of the estate or trust for Iowa income tax purposes as that between the amount distributed or distributable for federal income tax purposes and the net income for such federal income tax purposes.

Example: A trust has income and deductions for federal and Iowa income tax purposes as follows:

	Federal	Iowa
Total income	$20,000.00	$18,000.00
Deductions	4,000.00	8,000.00
Interest, taxes, depreciation, charitable deductions and miscellaneous deductions		
Net income	$16,000.00	$10,000.00
Deduction for distribution to beneficiaries	$ 8,000.00	$ 5,000.00

For federal income tax purposes the ratio of the distribution to net income was $\frac{\$\ 8,000.00}{\$16,000.00}$ and the ratio equals fifty percent.

For Iowa income tax purposes, 50 percent of $10,000.00, net income, equals $5,000.00 to be shown distributed to beneficiaries.

However, in any case where such method of determining the distribution amount for Iowa income tax purposes is in conflict with or contrary to the terms of the will or trust instrument in the case, the fiduciary may use such other method in determining the distribution amount as appears proper under the facts in the case, and consistent with the amount distributed to the beneficiaries for federal income tax purposes. Any such method of arriving at the distribution amount for Iowa tax purposes shall be fully explained on the Iowa fiduciary income tax return.

In case distribution of income of an estate or trust is made to nonresident beneficiaries, the fiduciary shall show on the Iowa fiduciary income tax return the part of the distributive share of any nonresident beneficiary that is subject to the Iowa income tax in the hands of the nonresident distributee and the part of such share not subject to the Iowa tax.

g. In the case of a trust, the fiduciary shall state on the Iowa fiduciary return of income whether the trust is a "simple trust" or a "complex trust" with respect to the matter of determining the deduction allowable for distributions to beneficiaries for federal income tax purposes.

h. A trust or estate may not deduct as a distribution to a beneficiary, and a beneficiary is not taxable on, any amount which constitutes a gift or bequest of a specific sum and which is paid or credited all at once or in not more than three installments. However, an amount will not be treated as an excluded gift or bequest if the governing instrument provides that the specific sum is payable only from the income of the estate or trust.

i. The fiduciary shall be allowed to take a specific exemption credit of $15, the same as allowed a single person, regardless of whether the return covers a period of less than twelve calendar

months. Neither estates nor trusts are allowed credit for dependents.

[Amended August 24, 1962]

j. In computing the Iowa tax on the taxable income of the fiduciary the same tax rates are to be used as apply in the case of individuals.

k. A fiduciary shall act as a withholding agent and make withholdings for the Iowa income tax in accordance with the provision of section 422.16, Code of Iowa, 1958, and regulations thereunder, in those cases where income of an estate or trust subject to the Iowa tax is distributed to a beneficiary who is a nonresident of the state of Iowa. Such withholdings to be reported on Forms NR-5 and NR-5A.

[Amended August 24, 1962]

l. It is improper to pay any tax on a final fiduciary return, inasmuch as the income received during the final period is distributable and taxable to the beneficiaries. In any case in which it is believed that tax is due and payable on a final fiduciary return, a statement in support of such filing must be submitted with the final return. Such statement should set forth the reasons for paying the tax on the final return and the statutory authority on which the fiduciary relies.

[Filed August 24, 1962]

m. If the internal revenue service has audited returns of the decedent and such audits resulted in additional tax, then such audits must be submitted by the fiduciary as soon as available, but not later than the date request is made for certificate of acquittance as provided in section 422.27, Iowa Code, 1958, as amended. If federal audits of the deceased are in process but not final at the time of requesting of the clearance heretofore mentioned, then a statement advising the fiduciary department to that effect must be submitted with such request.

[Filed August 24, 1962]

22.6-7 Copy of inventory of estate or trust required, also copy of will or trust instrument. In the case of an estate for a deceased person, a copy of the final report to the court and the probate inventory showing the items of real and personal property inventoried into the estate, and their values as used for state inheritance tax purposes, must be filed with the fiduciary income tax department, and should accompany the first fiduciary return of income filed for the estate with said department. If the decedent died testate a copy of the will should also accompany the first fiduciary return of income. In the case of a trust, a list of the assets comprising the trust and a copy of the written instrument under which the trust was created must be filed with the first fiduciary return of income.

In addition to the required trust instrument, there shall also be filed a statement by the fiduciary indicating the provisions that determine the taxability of the income to the trust beneficiaries or the grantor. If the trust instrument is later amended, a copy of the amendments and a statement as to its effect on the taxability of the trust income must be attached to the return for the year to which such amendments apply.

In the case of a guardianship, a list of the assets that comprised the guardianship matter must be filed with the first return of income filed under the guardian's jurisdiction. Such copies should be certified by the fiduciary as true and complete copies.

One filing will suffice, but in each subsequent return the fiduciary should state the prior return to which such copy or copies were attached. If the trust instrument is amended in any way, a copy of the amendment must be filed with the return for the taxable year in which the amendment was made. Where a statement is made by the fiduciary to the effect that the immediate filing of the will, trust instrument, or inventory will work undue hardship on the fiduciary, such return may be filed as soon as practical after the filing of the return, but not more than three months later.

[Amended August 24, 1962]

22.6-8 Returns by guardian.

a. A guardian of a minor or of any other person under legal guardianship must make a return of income for his ward and pay the tax due thereon in those cases where the ward has gross or net income sufficient in amount to require the filing of a state income tax return, unless, in the case of a minor under guardianship, the minor himself proceeds to make and file his return or causes it to be made and filed. In the case of an incompetent ward who is married and living with husband or wife, the aggregate gross or net income of such husband and wife will be controlling in determining whether a return must be made. Ordinarily, the individual income tax blank should be used.

b. In the case of a guardian of a minor, an incompetent person or other ward, where it becomes necessary to terminate the guardianship matter and to have the certificate of the commission to file with the guardian's final report to the court, the guardian shall make a final fiduciary return on Form IT-4. Such fiduciary return shall reflect the income (if any) received by the guardian during the period commencing with the ward's regular tax year to the date of termination of the guardianship matter. The fiduciary return mentioned heretofore shall also be filed in cases where the death of the ward is the reason for requesting a certificate of acquittance. The income shown on the fiduciary return shall be shown as distributed to the ward and will be taxable on the ward's current year return (IT-1), or on the final return Form IT-1 if the ward is deceased. Under no circumstances is tax due and payable on such fiduciary return. The

return in these cases is merely an information return. In cases where more than one ward is under guardianship, a separate fiduciary return (IT-4) must be filed for each ward. A final return of a deceased ward is required to be filed if the taxable income for such final period amounts to $600 or more. If no individual returns of income have been filed by or for the person under guardianship for the years prior to the year of closing the guardianship, a statement must accompany the final return explaining why no such returns were filed.

c. The first return of the ward shall be accompanied by a list of the assets in the guardianship matter. If no returns are required to be filed, then such lists shall accompany the fiduciary return mentioned in paragraph "*b*" above.

[Amended August 24, 1962]

22.6-9 Income of estates and trusts taxed to the beneficiaries.

a. In any case where income of an estate or trust is distributed or distributable for federal income tax purposes to beneficiaries, and a deduction is taken for the amount of such distributed or distributable income determining the taxable income of the fiduciary, the beneficiaries to whom the income was paid or credited shall include their respective shares of such income on their individual returns in reporting income to this state. Nonresidents of Iowa beneficiaries are required to report to this state only such part of their distributive share of income of an estate or trust as is derived from Iowa sources.

b. Amounts of income of estates and trusts shown distributed or distributable to beneficiaries on federal fiduciary returns of income will in most every case not be taxable in the same amount to the respective beneficiaries in reporting the income of such beneficiaries for Iowa income tax purposes. If the fiduciary of the estate or trust fails to advise the beneficiary as to what part of his distributive share of the income is subject to the Iowa income tax, the beneficiary should make inquiry before proceeding to report such income on his Iowa individual return, so that he may make necessary and proper adjustments to the amount of his distributive share of such income in determining his Iowa taxable income.

c. Capital losses of an estate or trust will reduce the taxable income of the estate or trust, but no part of the loss is deductible by the beneficiaries. If the estate or trust distributes all of its income, the capital loss will result in no tax benefit for the year of the loss. However, under the Internal Revenue Code of 1954, on termination of an estate or trust, any unused capital loss carry-over of the estate or trust is available to the beneficiaries.

d. If the taxable year of a beneficiary is different from that of the estate or trust, the amount to be included in the gross income of the beneficiary shall be based on the distributable net income of the estate or trust and the amounts paid, credited, or required to be distributed to the beneficiary during any taxable year or years of the estate or trust ending within or with his taxable year.

e. A beneficiary of an estate or trust in reporting on his Iowa income tax return his distributive share of the income thereof shall show the name and location of the estate or trust.

22.7-1 Adjusted gross income for federal income tax purposes under the Internal Revenue Code. [As amended through 1960.] In determining Iowa taxable income, each taxpayer starts with the adjusted gross income which he reported for federal income tax purposes for the year. This must be used even though it contains income which the state of Iowa is constitutionally prohibited from taxing. Adjustments to that starting amount are described in rules 22.7-2 through 22.7-4 and 22.7-11 through 22.7-13. The proper handling of adjusted gross income and adjustments where spouses file separate returns is described in rule 22.7-7.

[Amended August 24, 1962]

22.7-2 Interest and dividends from federal securities. The state is prohibited by federal law from taxing dividends received from corporations owned or sponsored by the federal government, or interest derived from obligations of the United States, and its possessions, agencies and instrumentalities. Therefore, if adjusted gross income for federal income tax purposes included any dividends or interest of this type, an adjustment must be made on the Iowa return, deducting the amount of such dividends or interest.

Any interest or dividend received from the following sources is exempt and to be deducted:

Commodity Credit Corporation
Farmers Home Corporation
Federal Deposit Insurance Corporation
Federal Farm Loan Corporation
Federal Home Loan Banks
Federal Intermediate Credit Banks
Federal Land Banks
Federal Savings and Loan Insurance Corporation
National Farm Loan Associations
Joint Stock Land Banks
Home Owners' Loan Corporation
Production Credit Corporation
Central Bank for Cooperatives
Reconstruction Finance Corporation
United States Housing Authority
United States Maritime Commission
War Finance Corporation
Federal Housing Administration
National Mortgage Associations

Any interest or dividend received from the following sources is not exempt:

Federal or State Savings and Loan Associations
Tennessee Valley Authority

Panama Canal Bonds
Philippine Bonds
Building and Loan Associations
Exempt State Corporations

Interest received in the following instances is not exempt:

a. On refunds of federal income tax.

b. On interest-bearing certificates issued in lieu of tax exempt securities, such income losing its identity when merged with other funds.

c. On debentures issued to mortgagees of mortgages foreclosed under the provisions of the National Housing Act.

d. On promissory notes of a federal instrumentality.

22.7-3 Interest and dividends from foreign securities, and securities of state and other political subdivisions. Interest and dividends from foreign securities and from securities of states and other political subdivisions are to be included in Iowa taxable income. For constitutional reasons or because of specific exemption, such interest and dividends may not have been subject to federal income tax, and therefore not included in adjusted gross income for federal income tax purposes. To the extent such income has been so excluded, it must be added to adjusted gross income in order to arrive at Iowa taxable income.

22.7-4 Basis for purposes of determining capital and other gains and losses. In some instances adjusted gross income for federal income tax purposes will include capital gains or losses, or gains or losses from property other than capital assets, where the basis for computing gain or loss on such property was established prior to January 1, 1934. In such case, the taxpayer may use as his basis the higher of cost, adjusted for depreciation allowed or allowable to January 1, 1934, or fair market value as of that date. If as a result of this provision a basis is to be used for purposes of Iowa income tax which is different from the basis used for purposes of federal income tax, appropriate adjustment must be made in the computation of Iowa taxable income.

22.7-7 Adjusted gross income—separate returns by spouses. If spouses filed a joint return for federal income tax purposes and are filing separate returns for Iowa income tax purposes, allocation of adjusted gross income between them becomes necessary. Each return must show the adjusted gross income reported on the federal return, and the division between each spouse. Income may not be allocated on arbitrary basis. Wage and salary income shall be allocated to the spouse earning the same. Income from property or business shall be allocated to the spouse owning the property or business. If the title to property or business is in one of the spouses, prima facie that property or business is owned by that spouse. Adjustments for exempt and nonexempt interest and dividends, and basis for gains and losses, shall be subject to the same rules of allocation between the spouses. Statements explaining the allocation must be attached to both returns.

22.7-9 Interstate or foreign commerce. Taxation of income derived from transactions in interstate or foreign commerce does not constitute such a burden on such commerce as to render the income immune from taxation by the state.

22.7-10 Income from federal, state or municipal contracts. Any compensation or income derived by a taxpayer from a contract performed for the United States, a state, or a political subdivision thereof, is taxable income.

22.7-11 Capital gains occurring prior to 1955 tax year. As capital gains and losses were not included in "gross income" and not subject to Iowa income tax, for any tax year of a taxpayer prior to the tax year beginning in 1955, any capital gains and losses on transactions occurring in such prior tax years are not to be reflected in "taxable income" for Iowa income tax purposes even though under the method of accounting adopted by the taxpayer for federal tax purposes a portion of the gain or loss is reflected in federal taxable income for years which begin in 1955 or thereafter. For example, if a farmer sells his farm on a 20-year contract in 1952, and reports his profit on the installment basis for federal income tax purposes, his Iowa return for 1955 and subsequent tax years should be so adjusted as to exclude that profit in determining Iowa taxable income.

[Amended August 24, 1962]

22.7-12 Installment sales made prior to 1955 tax year. Persons engaged in the business of selling personal property who kept records on the installment basis and reported on such basis for federal tax purposes were required to report for Iowa income tax purposes on the accrual basis for tax years beginning prior to January 1, 1955. To the extent that their returns for tax years beginning January 1, 1955, or thereafter reflect installment sales reported for Iowa income tax purposes on the accrual basis in those prior years, adjustment should be made on the returns for those years beginning on or after January 1, 1955.

22.7-13 Capital loss carry-over. If taxpayer has a net capital loss in any tax year which began prior to January 1, 1955, and for federal tax purposes carries forward the amount of such loss to a tax year beginning on or after January 1, 1955, he, however, is not entitled to carry that amount forward to such tax years for Iowa income tax purposes, and shall make such adjustments on his Iowa return as are necessary to prevent those amounts from being reflected in his Iowa taxable income for those years.

22.8(1)-1 Tax credit for income earned out-of-state. If an Iowa resident pays income tax to another state or foreign country on any of his

income, he is entitled to a net tax credit; that is, he may deduct from his Iowa net tax (not from gross income) the amount of income tax actually paid to the other state or country, provided the amount deducted as a credit does not exceed the amount of Iowa net income tax on the same income which was taxed by the other state or foreign country.

[Amended August 24, 1962]

22.8(1)-2 Computation of tax credit. The limitation on the tax credit must be computed according to the following formula: Income earned in another state or country and taxed by such other state or country shall be divided by the total income of the taxpayer resident of Iowa. Said quotient multiplied times the net Iowa tax as determined on the total income of the taxpayer as if entirely earned in Iowa shall be the maximum tax credit against the Iowa net tax.

[Amended August 24, 1962]

22.8(1)-3 Proof of claim for tax credit. The credit may be deducted from Iowa net income tax if written proof of such payment to another state or foreign country is furnished to the state tax commission. The commission will accept any one of the following as proof of such payment:

1. A photo copy, or other similar reproduction of either

a. The receipt issued by the other state or foreign country for payment of the tax, or

b. The canceled check (both sides) with which the tax was paid to the other state or foreign country together with a statement of the amount and kind (that is, whether wages, salaries, property or business) of total income on which such tax was paid. Or when attached to a copy of the return filed with another state or foreign country.

2. A copy of the income tax return filed with the other state or foreign country which has been certified by the tax authority of that state or foreign country and showing thereon that the income tax assessed has been paid to them.

3. If resident employees are employed in other states at intervals throughout the year, as would be the case if employed in operating trains, planes, motor buses, trucks, etc., between this state and other states and foreign countries, and are paid on a daily, weekly or monthly basis, the gross income from sources within this state includes that portion of the total compensation for personal services which the total number of working days employed within the state bears to the total number of working days both within and without the state. If the employees are paid on a mileage basis, the gross income from sources within this state includes that portion of the total compensation for services which the number of miles traveled in Iowa bears to the total number of miles traveled both within and without the state.

[Amended August 24, 1962]

22.8(2)-1 Income of nonresidents.

a. Except to the extent provided otherwise in section 422.8(2), all income of nonresidents derived from sources in Iowa is subject to Iowa income tax. Net income received from the carrying on of a business, trade, profession, or occupation in Iowa must be reported. Income from property, trust, estate or other source in Iowa must be reported.

Income from the sale of property (located in Iowa including that used in connection with the trade, profession, business or occupation of the nonresident) is taxable Iowa income. Any income from such property prior to its sale is also taxable income. Income received from a trust or an estate (where such income is from Iowa sources) is taxable regardless of the situs of the estate or trust.

Annuities, interest on bank deposits and interest-bearing obligations, and dividends are allocated to Iowa only to the extent to which they are derived from a business, trade, profession, or occupation carried on within the state of Iowa.

Except that dividends received in lieu of or in partial payment of an amount of wages or salary due for services performed in Iowa by a nonresident shall be considered taxable Iowa income.

b. Income from the sale of property referred to in paragraph "*a*" above remains taxable Iowa income regardless of the fact that such property may be removed from Iowa prior to its sale, or regardless of the fact that such sale is consummated outside of Iowa, provided that said property was sold before subsequent use outside of Iowa. [Amended August 24, 1962]

22.8(2)-2 Compensation for personal services of nonresidents.

a. The Iowa taxable income of a nonresident includes compensation for personal services to the extent that such services were rendered within the state of Iowa. In the case of a nonresident of Iowa who is an officer or employee of a corporation that has an office or place of business in the state of Iowa, and does business in this state, and where the nonresident while located outside the state of Iowa performs duties that are connected with the management or conduct of the business of the corporation carried on within the state of Iowa, the salary or other compensation of the nonresident is not subject to the Iowa income tax, but if said nonresident comes into the state of Iowa in a tax year and performs personal services for the corporation or performs any duties in connection with the management of the business, the Iowa taxable income of such nonresident shall include that portion of his total compensation received from his employer for personal services for the tax year which the total number of working days that he was employed within the state of Iowa bears to the total number of working days within and without the state of Iowa. Compensation for personal services rendered by a nonresident of Iowa wholly

outside the state of Iowa is not Iowa taxable income in the hands of such nonresident even though payment thereof be made by a resident of Iowa or from the office or other place of business in the state of Iowa of the employer or payor. If a nonresident of Iowa performs personal services within the state of Iowa for an employer only part time or part of his time during a tax year, and performs no personal services for such employer outside the state of Iowa during that year, then his entire compensation for the personal services performed in this state will be Iowa taxable income in the hands of the nonresident and must be reported to this state.

Compensation received from the United States government by nonresidents of Iowa members of the armed forces thereof who are temporarily present in the state of Iowa pursuant to military or naval orders is exempt from the state of Iowa income tax.

b. Income from commissions earned by a nonresident traveling salesman, agent or other employee for services performed or sales made whose compensation depends directly on the volume of business transacted by him, will include that proportion of the compensation received which the volume of business transacted by such employee within the state of Iowa bears to the total volume of business transacted by him within and without the state, allowable deductions will be apportioned on the same basis. However, in any case where there is a separate accounting kept by a nonresident or his employer of the business transacted in the state of Iowa by the nonresident in connection therewith, then such amount of compensation shall be reported to this state by the nonresident and no apportionment of the total volume of business transacted within and without the state will be permitted.

c. Nonresident actors, singers, performers, entertainers, wrestlers, boxers, etc., must include in their taxable income as income from sources within this state the gross amount received for performances within this state.

d. Nonresident attorneys, physicians, engineers, architects, etc., even though not regularly employed in carrying on their profession in this state, must include in taxable income as income from sources within this state the entire amount of fees or compensation received for services performed in this state on behalf of their clients.

e. If nonresident employees (excluding employees mentioned in subsection "*a*" of this regulation) are employed continuously in this state for a definite portion of any taxable year, the gross income of the employees from sources within this state includes the total compensation for the period employed in this state.

f. If nonresident employees are employed in this state at intervals throughout the year, as would be the case if employed in operating trains, planes, motor buses, trucks, etc., between this state and other states and foreign countries, and are paid on a daily, weekly or monthly basis, the gross income from sources within this state includes that portion of the total compensation for personal services which the total number of working days employed within the state bears to the total number of working days both within and without the state. If the employees are paid on a mileage basis, the gross income from sources within this state includes that portion of the total compensation for services which the number of miles traveled in Iowa bears to the total number of miles traveled both within and without the state. If the employees are paid on some other basis, the total compensation for personal services must be apportioned between this state and other states and foreign countries in such manner as to allocate to Iowa that portion of the total compensation which is reasonably attributable to personal services performed in this state.

g. A uniform rule for the exclusion from gross income of amounts received by employees under employer-financed accident and health plans is provided in the Internal Revenue Code of 1954 as amended through 1960. A nonresident in reporting Iowa earnings to this state may deduct from his gross Iowa earnings such portion of the amount received under such plans deductible for federal income tax purposes from his entire earnings as represents the ratio of his Iowa portion of his earnings to the total earnings to which the deductible or excludable amount was connected. [Amended August 24, 1962]

h. The apportionment of income under paragraphs "*a*", "*b*", "*c*" and "*f*" above will be the responsibility of the employer and the employer's apportionment of such income shall be the basis for assessment of the income tax imposed on the nonresident. [Filed August 24, 1962]

22.8(2)-3 Taxing the earnings of nonresident officers or directors of corporations. In the case of a nonresident who is an officer or director of a corporation that has an office in this state of Iowa, or a place of business in this state, or carries on a business in this state, the compensation of such nonresident for personal services rendered the employer, which may have to do with the management of the business being carried on in Iowa, shall be subject to the Iowa income tax law in the hands of the nonresident only to the extent that such compensation pertains to personal services performed for the employer within the state of Iowa by the nonresident. See the provisions of rule 22.8(2)-2 for instructions as to apportioning such income to the state of Iowa. Allowable deductions from such income must be properly apportioned also.

22.8(2)-4 Income from sources within and without the state. In the case of income derived from any business, trade, profession, or occupation carried on partly within and partly without the state, only such income as is fairly and equitably attributable to that portion of the busi-

ness, trade, profession, or occupation carried on in this state, or to services rendered within the state, shall be included in the gross income of a nonresident taxpayer. The apportionment and allocation of such income shall be made under rules and regulations prescribed by the commission, which shall in any event, require the entire amount of such income both within and without the state to be shown in the return which the nonresident shall, and must file. If such allocation or apportionment is required, secure the necessary blank from the state income tax division. For definition of "business carried on" see rule 22.4-1 (a).

22.8(2)-5 Apportionment of business income from business carried on both within and without the state.

a. If a nonresident, or a partnership or trust with a nonresident member, carried on business [as "business carried on" is defined in rule 22.4-1 (*a*)] both within and without the state, the net income therefrom must be so apportioned as to allocate to the state of Iowa a proportion of such income on a fair and equitable basis, in accordance with approved methods of accounting.

b. If books of the taxpayer are not kept in such a manner as to regularly disclose the proportion of his net income derived from business carried on within this state, then the amount attributable to business within this state shall be in that proportion which the gross sales made within the state bear to the total gross sales. The gross sales within the state shall be taken to be the gross sales made through, from or by offices, agencies, branches, or stores located within the state, regardless of the location of the purchaser or the destination of the goods sold.

c. If the books of the taxpayer are so kept as to regularly disclose the portion of his business income which is derived from sources within this state and it is shown by the taxpayer to the satisfaction of the commission that the income assignable to this state is more clearly and equitably reflected by the separate accounting method, returns on this basis will be accepted. In any event the entire income received by the taxpayer and the basis of allocation shall be shown in his return.

d. If the business, trade, profession or occupation carried on within the state is an integral part of a unitary business carried on both within and without the state, or if the business within the state is so connected with the part without the state that the net income of the part within the state cannot be accurately determined independently of the part without the state, the gross income of the entire business, trade, profession or occupation must be reported. Thus, if a nonresident engaged in the business of manufacturing and selling goods maintains a factory outside the state and sales office in the state, or vice versa, he must report the gross income from the entire business.

22.8(2)-6 Income from intangible personal property.

a. Income of nonresidents from rentals or royalties for the use of, or the privilege of using in this state, patents, copyrights, secret processes and formulas, goodwill, trade-marks, franchises, and other like property is taxable, regardless of whether or not the patent, copyright, etc., has a business situs in this state within the meaning of "*c*" below, since income arising from the use of property, whether tangible or intangible, within the state is income from sources within the state. Thus, for example, if a resident of New York, who is a patent holder, signs a contract in New York to license the manufacture and sale in Iowa by another person of the patented product in consideration of the payment of royalties on the basis of the number of units manufactured, the royalty income received is taxable. Similarly, if the author of a play, who is a resident of Illinois, receives fees for the public performance of his play in Iowa, the income received is taxable.

b. Income of nonresidents from intangible personal property such as shares of stock in corporations, bonds, notes, bank deposits and other indebtedness is taxable as income from sources within this state only if the property has a situs for taxation in this state, except that if a nonresident buys or sells stocks, bonds, or other such property in Iowa, places orders in Iowa to buy or sell such property, so regularly, systematically and continuously as to constitute doing business in this state, the profit or gain derived from such activity is taxable as income from a business carried on here, irrespective of the situs of the property for taxation.

c. Intangible personal property has a business situs in this state if it is employed as capital in the state, or if the possession and control of the property has been localized in connection with a business, trade or profession in this state, so that its substantial use and value attach to and become an asset of the business, trade or profession in this state. For example, if a nonresident pledges stocks, bonds or other intangible personal property in Iowa as security for the payment of indebtedness, taxes, etc., incurred in connection with a business in this state, the property has a business situs here. Again, if a nonresident maintains a branch office here and a bank account on which the agent in charge of the branch office may draw for the payment of expenses in connection with the activities of this state, the bank account has a business situs here.

If tangible property of nonresident has acquired a business situs here, the entire income from the property including taxable gains from the sale thereof, regardless of where the sale is consummated, is income from sources within this state.

d. Income of a nonresident beneficiary from an estate or trust, distributed or distributable to the beneficiary out of income from intangible personal

property of the estate or trust, is not income from sources in this state and is not taxable to the nonresident beneficiary unless the property is so used by the estate or trust as to acquire a business situs in this state within the meaning of "*b*" above, or, in the case of royalties, patents, copyrights, secret processes and formulas, good will, trade-marks, trade names, franchises and other like property, unless the estate or trust permits or licenses the property to be used in this state in the manner described in "*c*" above.

Whether or not the executor or administrator of an estate or the trustee of a trust is a resident of this state is immaterial, insofar as the taxation of income of beneficiaries from the estate or trust is concerned.

22.8(2)-7 Federal income tax refunded. Any federal income tax (either paid by a nonresident or withheld from his compensation) which is later refunded to the taxpayer shall be included as gross Iowa income by the nonresident for the year such refund is received, in the same proportion that such federal tax was deducted by the nonresident in a prior Iowa income tax return.

A nonresident shall also include as gross Iowa income any state or local tax refunded to him, if such tax was deducted in a prior Iowa income tax return.

22.8(2)-8 Distributive shares of nonresident partners. A member of an Iowa partnership who is a nonresident is taxable only upon that portion of his distributive share of the partnership income which is derived from sources within this state. However, if the partnership derives any income from sources within the state, the nonresident members of the partnership are taxable upon their distributive shares of such income regardless of whether the partnership sustains losses from property located, or activities or business engaged in, outside this state, and regardless of the amount of such losses, even though such losses equal or exceed the income from sources within this state so that the total operations of the partnership result in a net loss.
See rule 22.15(2)-4.

22.8(2)-9 Interest and dividends from governmental securities. Interest and dividends from federal securities subject to the federal income tax under the Internal Revenue Code of 1954, are not to be included in determining the Iowa net income of a nonresident, but any interest and dividends from securities and from securities of state and other political subdivisions exempt from federal income tax under the Internal Revenue Code of 1954, as amended through 1960, are to be included in the Iowa net income of a nonresident to the extent that same are derived from a business, trade, profession, or occupation carried on within the state of Iowa. [Amended August 24, 1962]

22.8(2)-10 Gains from sales or exchange of property. If a nonresident realizes any gains from sales or exchanges of property within the state of Iowa, such gains are subject to the Iowa income tax, and shall be reported to this state by the nonresident. In determining whether a short-term or long-term capital gain is involved, the provisions of the Internal Revenue Code, 1954, as amended through 1960, are to be followed. [Amended August 24, 1962]

22.8(2)-11 Apportionment schedule. Where allocation or apportionment of income is required, the taxpayer should apply to the State Nonresident Income Tax Division, State Office Building, Des Moines, Iowa, for form NR-2, apportionment schedule.

22.8(2)-12 Taxpayers moving in or out of the state. A taxpayer moving into the state during the tax year need only report his earnings for the period of residence. This also applies to a person moving out of the state. If itemized deductions are used for federal income tax purposes they must be adjusted to reflect only the deductions attributable to the period of Iowa residence. Federal income tax withheld or paid must be adjusted in the same manner as the income. Personal exemption and credit for dependents need not be prorated.

For example, if your income for the years is from one source, reported in one total, use a fraction of the months of out-state residence and subtract that portion of your income from the total reported on line 4, page 1. The remainder will represent your Iowa earned income. If you moved into Iowa August 1, the ratio would be 5/12 Iowa income and 7/12 outstate income. [Amended August 24, 1962]

22.8(3)-1 Net operating loss. Net operating loss carry-backs and carry-overs. In years beginning after December 31, 1954, net operating losses shall be deductible for Iowa corporations and individual income tax purposes to the same extent they are deductible for federal corporation and individual income tax purposes for the same period, provided:

1. The following adjustments shall be made:

a. Subtract interest and dividends from federal securities.

b. Add interest and dividends from foreign securities and from securities of state and other political subdivisions exempt from federal income tax under the Internal Revenue Code of 1954, as amended through 1960.

c. Add federal income tax paid or accrued and subtract Iowa income tax paid or accrued if considered in computing federal adjusted gross or net income.

2. Adjustments shall be made to reflect refunds of federal and Iowa income taxes.

a. In the case of cash basis taxpayers, the refunds of the U. S. income taxes shall be reflected

in the return for the year in which the refunds are received.

b. In the case of accrual basis taxpayers, the refunds of U. S. income taxes shall accrue to the year in which the net operating loss occurs.

3. With respect to corporations doing business both within and without Iowa, adjustments shall be made to reflect the apportionment of the operating loss on the basis of business done within and without the state of Iowa.

a. After making the adjustments as provided in paragraphs 1 and 2 hereof, the net operating loss deductible for Iowa income tax purposes shall be that percent of the total loss which represents the business done within the state of Iowa as compared to the total business done by the taxpayer during the year in which the loss occurs.

4. Casualty losses are also treated like a net operating loss and may also be carried back two years and carried forward five years on losses occurring prior to January 1, 1958. Losses occurring after January 1, 1958 may be carried back three years and forward five years. [Filed August 24, 1962]

22.9-1 Allowable deductions—in general. The United States Supreme Court has said: "Whether and to what extent deductions shall be allowed depends upon legislative grace; and only where there is a clear provision therefor can any particular deduction be allowed. * * * Obviously, therefore, a taxpayer seeking a deduction must be able to point to an applicable statute and show that he comes within its terms."

22.9-2 Optional standard deduction. An optional standard deduction is provided in the Iowa income tax law. Before determining the amount of the deduction, federal income tax payments, as adjusted in accordance with rule 22.9-5, must be subtracted from net income. The optional standard deduction is then computed as five percent of the remaining balance, but may not exceed $250. (Where joint returns are filed, the optional standard deduction is limited to five percent of net income after deduction of federal income tax, not to exceed $250). Where spouses file separate returns, each may take the optional standard deduction of five percent, not to exceed $250. In the case of separate returns, if one spouse takes the optional standard deduction, the other spouse must also take the optional standard deduction. If the federal optional standard deduction was taken on the federal return, the optional standard deduction or the Tax Table as provided, for incomes less than $5,000.00 (choice optional) must be used on the Iowa income tax return. [Amended August 24, 1962]

22.9-3 Itemizing deductions. If deductions were itemized on the federal return, to the extent allowable thereon the same deductions must be itemized on the Iowa return. Deductions are subject to the adjustment specified in rules 22.9-4 through 9-7. [Amended August 24, 1962]

22.9-4 Iowa income taxes. Iowa income taxes paid or accrued during the tax year are permissible deductions for federal tax purposes, but are not for purposes of determining Iowa net taxable income. To the extent such taxes were included in deductions allowable for federal income tax purposes, they must be subtracted on the Iowa return. [Amended August 24, 1962]

22.9-5 Federal income taxes. The amount of federal income taxes paid or accrued during the tax year may not be deducted from income for purposes of federal income tax. Such amount is, however, a permissible deduction for Iowa income tax purposes. Therefore, the amount paid or accrued should be included in deductions. Such totals should include:

1. The entire amount withheld during the taxable year from compensation of the taxpayer for the payment of federal income tax.

2. Tax paid at any time during the taxable year on a return of declared or estimated tax, or on any amendment to such return.

3. Any additional assessment on a prior return paid during the taxable year. Tax paid on final and completed federal income tax return filed by the taxpayers for the preceding taxable year.

4. If during the taxable year, you received a refund of federal income tax withheld from your compensation, or paid by you, that refund must first be used to reduce the amount deducted for federal income tax. [Amended August 24, 1962]

22.9-6 and 22.9-7 [Rescinded October 11, 1972]

22.9-8 Itemized deductions—separate returns filed by spouses. If one spouse uses the optional standard deduction on his separate return, the other spouse must also use the optional standard deduction. See rule 22.9-2. Where both spouses itemize deductions, the deductions must be divided between them according to the portion thereof paid or accrued, as the case may be, by each or in the ratio that each spouse's separate income bears to the total adjusted gross income of both spouses. A spouse may not deduct an amount for taxes paid on property held in the name of the other spouse. [Amended August 24, 1962]

22.9-10 Verification of deductions required. Deductions from gross income, otherwise allowable, will not be allowed in cases where the commission requests the taxpayer to furnish information sufficient to enable it to determine the validity and correctness of such deductions, until such information is furnished.

22.9-12 Deductions from Iowa income allowed nonresidents.

a. The Iowa income of a nonresident shall be determined in accordance with the provisions of rules 22.8(2)-1 through 22.8(2)-12. Such income figure must be arrived at before deductions are taken for federal income tax paid or accrued as the case may be, and before the deductions provided

for in subsection "c" hereof are taken in computing the Iowa taxable income of the nonresident.

b. Federal income tax withheld or paid. A nonresident may deduct from his Iowa income a ratio of federal income tax paid or withheld in the same year covered by his Iowa nonresident return, in the proportion that the nonresident's income as computed for Iowa income tax purposes bears to his adjusted gross income for federal income tax purposes under the Internal Revenue Code of 1954, as amended through 1960.

Federal income taxes paid during the current year on prior years federal income tax returns will not be allowable on the nonresident return unless nonresident returns have been filed for such prior years.

Example: A nonresident had in 1960 total earnings of $6,300.00 as a factory worker. Of such amount he earned $4,200.00 while employed in the state of Iowa. Federal income tax withheld and paid by him in year 1960 amounted to $900.00. Ratio of federal adjusted gross income and Iowa income equalled 66-⅔%. Therefore, his deduction from Iowa income for federal income tax paid would be ⅔ of $900.00, or the amount of $600.00. See rule 22.8(2)-7 as to reporting as taxable income any refunds of federal income tax received.

c. Deductions from Iowa income. In computing the Iowa taxable income of nonresident individuals, there shall be deducted from Iowa income the larger of the following amounts:

1. An optional standard deduction of five percent of the Iowa income after deduction of the proper ratio of federal income tax, not to exceed $250.

2. The total of contributions, interest, taxes, medical expense, childcare expense, losses and miscellaneous expenses deductible for federal income tax purposes under the Internal Revenue Code of 1954, with the following adjustments:

a. Subtract the deduction for Iowa income taxes.

b. If the nonresident had income for the tax year from both within and without the state of Iowa, then after subtracting the deduction for Iowa income taxes, he may use as a deduction from Iowa income only a ratio of his total of contributions, interest, taxes, etc., representing the proportion that the nonresident's income as computed for Iowa income tax purposes bears to his adjusted gross income for federal income tax purposes under the Internal Revenue Code of 1954. [Amended August 24, 1962]

Example: X, a nonresident of Iowa, had a 1955 federal adjusted gross income of $12,000.00; his Iowa income being $6,000.00. His 1955 federal income tax return showed itemized deductions for contributions, interest, taxes, medical expense, and miscellaneous expenses in total sum of $4,500.00, of which $150.00 was for Iowa income tax paid. The ratio of his Iowa income to his federal adjusted gross income was 50 percent. Therefore, 50 percent of the total expenses of $4,500.00 less $150.00, would be $2,175.00, the portion of the nonresident's total deductions deductible in computing his Iowa taxable income for the year 1955.

22.12-1 Personal exemption of a single person. A single person may deduct from the computed tax a personal exemption of $15. The term "single person" includes, for income tax purposes, an unmarried person, a widowed person, a divorcee, or a married person not living with husband or wife. [Amended August 24, 1962]

22.12-2 Personal exemption of married person.

a. A married person living with husband or wife at the close of the taxable year, or living with husband or wife at the time of the death of that spouse during the taxable year, may, if a single joint return is filed deduct from the computed tax a personal exemption of $30. Where each spouse files a separate return, each is entitled to deduct from the computed tax a personal exemption of $15. The personal exemption may not be divided between the spouses in any other proportion.

b. Whether a husband and wife are living together must depend upon the character of the separation, if they are not in fact together. If merely occasionally or temporarily a wife is away on a visit, or a husband is absent from home on business, or in the armed forces, the joint home being maintained, they will be considered living together. The unavoidable absence of a wife or husband at a sanatorium or asylum on account of illness does not invalidate the exemption. If, however, the husband voluntarily and continuously makes his home at one place and the wife at another, they are not living together within the meaning of the act. A resident alien with a wife abroad is not entitled to the joint exemption.

c. A nonresident taxpayer will be allowed to deduct a personal exemption for the entire year. [Amended August 24, 1962]

22.12-3 [Rescinded October 11, 1972]

22.12-4 Credit for dependents. A taxpayer may deduct from his computed tax an exemption of seven and one-half dollars for each dependent. "Dependent" has the same meaning as provided by the Internal Revenue Code of 1954, and the same dependents may be claimed for Iowa income tax purposes as the taxpayer is entitled to claim for federal income tax purposes. The dependent credit on tax is to be taken by the spouse, furnishing the major portion of the support for the dependent. If each spouse furnished 50 percent, they may elect between them which spouse is to be entitled to claim the dependent. The dividing of dependent credits applies only to the number of dependents and not to the money credits for a particular dependent. [Amended August 24, 1962]

22.12-5 Head of household. A head of household is a single individual (single meaning unmarried, divorced or widowed), who during the taxable year furnished over half of the cost of

maintaining a household for the entire year for at least one relative.

Your father or mother must qualify as your dependent and must live in a home you maintain for him or her. It is not necessary that you or your parent live in the same household. However, maintaining a parent in a home for the aged is not maintaining a household for such parent.

Your unmarried child, grandchild or stepchild must live in your household which you maintain as the principal residence for both you and them. It is not necessary that such person qualify as a dependent in order for you to claim head of household benefit for the double exemption only, if you maintain the home for them.

All other relatives must live with you in your household and must qualify as your dependents.

DO NOT CLAIM THIS UNLESS YOU CLAIMED TO BE HEAD OF HOUSEHOLD ON YOUR FEDERAL RETURN.

The surviving spouse rule provided by the federal law does not allow the double exemption for any year following the death of the deceased spouse. Iowa regulation will permit under this rule by the federal the privilege of head of household classification. [Filed August 24, 1962]

22.13-1 Return by resident individual taxpayer.

a. For each taxable year every resident of Iowa, single or married and not living with spouse, whose taxable income as defined in section 422.7 is $1500 or over, must make, sign and file a return.

Every married individual having a taxable income for the taxable year of $2350 or over must make, sign and file a return.

Husband and wife, each having independent income, must file either a joint return or separate returns if their aggregate net income for the taxable year was $2000 or over.

b. In determining whether returns must be filed, income from all sources, taxable under this division, in the case of residents, must be considered; in the case of nonresidents, only income from sources within this state should be considered. If the status of a person as a resident or nonresident changes during the taxable year, returns are required if the sum of the income, from sources taxable, received or accrued, during the period the person was a resident, and the income from sources within this state, received or accrued, during the period the person was a nonresident, equals or exceeds the amounts specified in "*a*" above.

c. Whether or not an individual is the head of a household or has dependents is immaterial in determining his liability to render a return.

d. If separate returns are filed by husband and wife, each may include in his return only such income as is attributable to him in accordance with the provisions of those regulations. Each may claim one-half of the credit for personal exemption.

e. Return of taxpayer for the year in which he died, see rule 22.6-5.

f. If a taxpayer is unable to make his own return, the return shall be made by a duly authorized agent or by the guardian or other person charged with the care of the person or property of such taxpayer. A power of attorney must accompany a return made by an agent.

g. A return not signed by the taxpayer or his authorized agent, or not accompanied by such portion of the tax as is by law required to be paid at the time of filing of the return, shall not be deemed completely executed and filed as required by law.

h. Each taxpayer having a social security number must enter that number on his return at places indicated. If not so entered the return may be considered not completed.

i. Each taxpayer receiving wages, salaries, or other taxable income must attach to his return, filed with the state tax commission, a copy of information at source form, showing such income. [Amended August 24, 1962]

22.13-2 Amended returns changing basis of reporting income. Although husband and wife originally filed a joint return or separate returns they, after the due date for filing that return or those returns, will be permitted to file amended separate returns or an amended joint return as the case may be. An election to file joint or separate returns may be made anew each year regardless of election of prior year. [Amended August 24, 1962]

22.13-3 Amended returns. Whenever a taxpayer who has filed a return for Iowa income tax purposes files an amended return for federal income tax purposes for the same year, he shall also file an amended return for Iowa income tax purposes.

22.13-4 Due date for returns. The due date for filing income tax returns is the last day of the fourth month after the end of the taxable year, whether the return be on the basis of the calendar year or a fiscal year. The due date for filing returns of information on forms IT-5 and IT-5A and returns of withholding agents on forms NR-5 and NR-5A is the last day of the fourth month after the close of the calendar year. Returns not filed on or before the due date will be subject to penalties for delinquency.

22.13-5 Method of accounting; accounting period. The return is to be computed on the same basis and for the same accounting period as the taxpayer's return for federal income tax purposes. Where the director of internal revenue has consented to permit taxpayer to change the basis of his returns or his accounting period, a copy of that consent must be filed with the state tax commission.

22.13-6 Copy of federal income tax return to be filed by nonresident. Under the provisions of section 12, chapter 208, Acts of 55th General Assembly (Code section 422.13 amend-

ed), a nonresident taxpayer shall file a copy of his federal income tax return for the current tax year with his Iowa nonresident income tax return. Such copy shall include full and complete copies of all farm business, capital gains and other schedules that were filed with such federal return. Such copies are to be accompanied by a written statement by the nonresident setting forth that they represent true and complete copies of his federal return.

However, in those cases where the nonresident has only Iowa wage or salary income to report and elects to take the optional standard deduction of five percent of Iowa net income not to exceed $250, he may omit filing a copy of his federal return provided he completely lists his items of adjusted gross income for federal income tax purposes on his Iowa nonresident return, but in such cases, if the audit of such nonresident return reveals that a copy of the nonresident's federal return is necessary to complete such audit, the copy shall be furnished by the nonresident upon his receiving a request therefor.

22.15(1)-1 Returns of information—where filed. Returns of information, as required by section 422.15 relating to returns of information and by section 422.16, relating to withholding of nonresidents income, shall be made on forms IT-5, IT-5A and IT-5B. In the case of residents these forms should be delivered to the State Income Tax Division, State Office Building, Des Moines 19, Iowa, on or before the last day of the fourth month after the close of the calendar year for which the returns are made. In the case of nonresidents, such forms must be submitted on or before January 31, following the close of the calendar year for which such returns are made, and must accompany the withholding agent's reconciliation form NR-5.

In the case of nonresidents of Iowa, the amount reportable by the employer on information returns shall be the income to be reported by such nonresident on his income tax Form NR-1. The method of apportionment of the income to such nonresident for Iowa income tax purposes is contained in rules 22.8(2)-2 and 22.8(2)-3. Although, to make necessary a return of information the income must be fixed and determinable, it need not be annual or periodical. It must be made of any payment which will constitute taxable income to the recipient. The commission may require any person or organization acting at any time during the year as a broker or other agent in stock, bond, or commodity transactions to report the name and address of each customer or client during the preceding taxable (or calendar) year, together with an itemized statement of cost, selling price, and gain or loss involved in each individual transaction during any preceding calendar year. [Amended August 24, 1962]

22.15(1)-2 Who shall make returns of information. Returns of information shall be made to the state tax commission by every

a. resident of the state and every nonresident carrying on a business, trade, etc., in the state;

b. officer and employee of the state and of municipal corporations and political subdivisions of the state;

c. officer or employee of the United States and of its agencies and instrumentalities;

d. individual, partnership, estate, trust, and corporation maintaining an office or place of business in this state (whether or not a paying agency is maintained within the state and whether or not such entities are exempt from taxation under the Iowa income tax law) making payments in a calendar year of fixed or determinable income of $1000 or more to any individual. If payments made to nonresidents were subject to withholding, a form IT-5A or IT-5B must be submitted regardless of the amount of income. [Amended August 24, 1962]

22.15(1)-3 What is included in calculating amounts for returns of information.

a. Returns of information are required of all amounts paid or credited to one payee, if such payments aggregate the minimum amount specified for such returns during the calendar year, irrespective of the basis of reporting by the payor or by the payee, including income constructively received by the payee. The necessity of reporting is not limited to payments of income of a single kind, equaling or exceeding the required amounts, but information returns are required if the aggregate payments of income of all kinds (including living quarters and board furnished) on which information returns are required, equal or exceed $1000. For example, if a payor pays to a payee $900 for personal services, $300 for rent and $50 for interest, he is required to report such payments on forms IT-5, IT-5A or IT-5B as the aggregate of the payments equal $1250. Or, if an employee received compensation of $900 and is furnished living quarters and board worth $360, the total amount which must be reported will be $1260.

b. Fees for professional services to attorneys, physicians, and members of other professions, and taxable payments for commodities come within the meaning of "fixed and determinable income" and are required to be reported in returns of information as required by this regulation.

c. For the purpose of a return of information, an amount is deemed to have been paid when it is credited or set apart to the taxpayer.

d. Corporations are required to report payments of dividends in amounts of $100 or over. [Amended August 24, 1962]

22.15(1)-4 Payments of which no return of information required. Payments of the following classes need not be reported on returns of information:

a. Interest coupons payable to bearer.

b. Income specifically exempt from taxation.

c. Bills paid for merchandise, telegrams, freight, storage and similar charges.

d. To employees for board and lodging while

traveling in the course of their employment, where such payments are in reimbursement of expenses paid by such employees.

e. Of rent paid to real estate or rental agencies (but the agent must report payment to the landlord if the aggregate amount for the calendar year is large enough to require a return of information to be filed).

f. Distribution by partnerships to resident partners and by fiduciaries to resident beneficiaries. Fiduciaries must submit information forms if any of the distributions made are to nonresidents and are subject to withholding under section 422.16.

g. Annuities representing the return of capital. But interest or other accumulations in excess of $1000 for the calendar year must be reported.

h. To nonresident employees for services rendered entirely without the state.

i. To nonresidents of annuities, interest on bank deposits, interest on bonds, notes or other interest bearing obligations or dividends, unless received by the nonresident in connection with a business, trade, profession or occupation carried on in this state, subject to taxation under division II of this Act. [Amended August 24, 1962]

22.15(1)-5 Penalty for failure to make returns of information. Where returns of information are not made as required by the law, the taxpayer required to make such returns will not be permitted to deduct from his gross income any amounts for which returns of information are delinquent; and the return of such taxpayer will not be considered properly filed until such required returns of information have been made.

22.15(1)-6 Returns of information—how made. Returns of information shall, in all cases, be made for the calendar year. The returns shall be made on forms IT-5A and IT-5B for both residents and nonresidents. In the case of residents a verified summary IT-5 shall accompany the IT-5A and IT-5B, and such report shall be due on or before April 30 of the year following the year of payment. In the case of nonresidents, such form shall be submitted with reconciliation form NR-5 (withholding agent's reconciliation report) and shall be due on or before January 31 of the year following the year of payment.

THE SOCIAL SECURITY NUMBER must appear on all forms IT-5A and IT-5B. [Amended August 24, 1962]

22.15(2)-1 Partnerships and limited partnerships. The partnership or limited partnership required to file a return under the provisions of section 422.15(2) shall be a partnership or limited partnership required to file partnership return for purposes of federal income tax. If the partnership has elected for federal income tax purposes to be taxable as a corporation, it shall be so taxable for purposes of Iowa income tax. In addition the partnership shall be required to have filed a partnership agreement with the county auditor of the county in which the partnership is located, or said partnership shall be required to have a partnership income tax return on file with the district director of the internal revenue service. [Amended August 24, 1962]

22.15(2)-2 Distribution and taxation of partnership income. A partnership as such is not taxable under the Act but the members of a partnership (including limited partnerships organized under chapter 545 of the Code) are taxable (except as otherwise provided in rule 22.8(2)-9 respecting nonresident members) upon their distributable shares of the net income of the partnership whether distributed to them or not, and despite the fact that he or they employ an accounting basis (cash receipts, for example) different from that of the partnership (accrual basis, for example). If the result of the partnership operation is a net loss (i.e., excess of allowable deductions from gross income) the loss may be deducted by the partners (except as otherwise provided respecting nonresident members) in the same proportion that net income would have been taxable to the partners. If the partner reports his income on the same taxable year basis as that of the partnership, his distributable share of the net income (or loss) of the partnership for such taxable year shall be included in or deducted from gross income in his individual return for that year. If, however, the taxable year of the partner is different from that of the partnership, his distributable share shall be included in or his proportion of the loss deducted from gross income for the year in which the taxable year of the partnership ends.

22.15(2)-3 Partnership returns. Every partnership deriving income (*a*) from property owned within this state or (*b*) from a business, trade, profession or occupation carried on within the state, must make a return of income regardless of the amount of gross or net income and regardless of the residence of the partners, except as specified in rule 22.15(2)-1. The return shall be made on form IT-3 and signed by one of the partners. The return shall be made on the same period basis, calendar or fiscal, as the partnership accounts are kept, irrespective the partners are reporting their incomes on a different period basis.

22.15(2)-4 Contents of partnership return. The return of a resident partnership or of a partnership with one or more nonresident members, but whose income is derived entirely or partially from sources within this state, shall state specifically (*a*) the net income, and the capital gains or losses reported on the federal partnership return, (*b*) the names and addresses of the partners, and (*c*) their respective shares in said amounts.

22.15(2)-5 General provisions as to partnerships.

a. A partnership engaged in carrying on business in this state is an Iowa partnership. Its return must state the entire net income and capital gains

or losses reported on the federal partnership return, regardless of the source of the same.

b. The distributable share of a resident of Iowa, of the income of a partnership carrying on business in another state, constitutes taxable income to him, except in cases governed by the provisions of section 422.8(1).

22.16-1 Duties of withholding agent. Withholding is required in the manner set forth under paragraph 12 hereof on income derived by nonresidents from the following sources:

1. Personal service, including salaries, wages, commissions and fees for personal service wholly performed within this state and such portions of similar income of nonresident traveling salesmen or agents as may be derived from services rendered in this state.

2. Rents and royalties from real or personal property located within this state.

3. Interest or dividends derived from securities or investments within this state, when such interests or dividends constitute income of any business, trade, profession or occupation carried on within this state and subject to taxation under the Act.

4. Income derived from any business of a temporary nature carried on within this state by a nonresident, such as contracts for construction and similar contracts.

5. The distributive share of a nonresident beneficiary of an estate or trust, limited, however, to the portion thereof subject to Iowa income tax in the hands of the nonresident.

6. Income derived from sources within this state by attorneys, physicians, engineers, accountants, etc., as compensation for services rendered clients in this state.

7. Compensation received by nonresident actors, singers, performers, entertainers, wrestlers, etc., for performances in this state.

8. The income of nonresidents employed in operating trains, boats, planes, motor buses, trucks, etc., within the state, who are paid on a daily, weekly or monthly basis. The gross income of such employees subject to withholding will include that portion of the total compensation of such employees which the total number of working days employed within the state bears to the total number of working days both within and without the state; and if the employment is on a mileage basis, the income apportionable to Iowa and subject to withholding will be similarly apportioned.

9. The gross income of a nonresident (not engaged in carrying on a business, trade, profession or occupation on his own account, but employed and receiving compensation for his services) includes compensation for personal services only, if and to the extent that, such services are rendered within this state. Compensation for personal services rendered by a nonresident wholly without the state is excluded from gross income of the nonresident regardless of the fact that payment of such compensation may be made by a resident individual, partnership or corporation.

10. The gross income from commissions earned by a nonresident traveling salesman, agent or other employee for services performed or sales made whose compensation depends directly on volume of business transacted by him, includes that proportion of the total compensation received which the volume of business or sales by such employee within this state bears to the total volume of business or sales within and without the state.

11. Payments made to landlords by agents, including elevator operators, for grain or other commodities which have been received by the landlord as rent constitute taxable income of the landlord when sold by him.

12. The law contains special provisions with respect to the collection of income tax due on income derived from sources in Iowa by nonresidents of the state of Iowa by requiring that certain percentages of such Iowa gross income be withheld at source.

The term "withholding agent" means any individual, fiduciary, corporation, association or partnership in whatever capacity acting, including all officers and employees of the state or of any municipal corporation or political subdivision of the state that is obligated to pay or distribute or has control of paying or distributing any Iowa gross income (not specifically exempt from Iowa income tax to nonresidents of Iowa) in excess of $1500 in any calendar year to any nonresident of Iowa.

Excepting as provided herein and in rules 22.17-1, every withholding agent shall deduct and withhold in each calendar year four percent of all gross income in excess of $1500, which such withholding agent pays or distributes, including the four percent so withheld, to any nonresident of Iowa during such calendar year, provided, however, that all income derived entirely from salaries or wages not exceeding $4000, the amount withheld shall be two percent. In lieu of the percentages heretofore set forth, the commission is authorized and has prepared withholding tables to be used in cases of payment of wages or salaries to nonresidents. These tables may be acquired by writing to the nonresident section of the Iowa Income Tax Division, State Tax Commission, State Office Building, Des Moines, Iowa. [Amended August 24, 1962]

22.16-2 Where only one percent of income is required to be withheld. In the case of a business carried on within this state, the income of which is subject to withholding, the Act provides that the nonresident taxpayer may file with the commission a verified statement, in such form and containing such information as the commission shall prescribe, showing that any income therein described is derived from a source upon which the net income will be less than 20 percent of the gross income, whereupon the commission, if satisfied

that such statement is correct, shall give to the nonresident a certificate directing a designated withholding agent to withhold but one percent of the income described in such certificate in excess of $7500. [Amended August 24, 1962]

22.16-3 Returns by withholding agents. Withholding agents are required to make and file certain returns. The Act prescribes that returns shall be made upon the basis of each calendar year on such forms and at such times throughout the year as the commission shall prescribe. The commission has, effective for the calendar year 1963 (and subsequent years), ordered that all withholdings deducted from payments made to nonresidents shall be remitted to the income tax division, nonresident section, in quarterly payments as follows:

Withholdings made during the months of January, February and March, due on or before April 30.

Withholdings made during the months of April, May, and June, due on or before July 31.

Withholdings made during the months of July, August and September, due on or before October 30.

Withholdings made during the months of October, November and December, due on or before January 31 of the following year.

Withholdings shall be remitted with form NR-5A, and a form NR-5A must be submitted for each quarter even though no withholdings were made during such quarter. A summary of the four quarters of withholding must be made at the end of each calendar year. Form NR-5 should be used for this purpose. A copy of each IT-5A or IT-5B, as given to the nonresident employee or payee, must accompany form NR-5. Remittance for each quarterly payment of withholding should be made to the treasurer of the state of Iowa. Withholding agents shall prepare and forward to each nonresident employee or payee a form IT-5A or IT-5B, regardless of the amount of income involved, if withholding has been deducted from payments made. [Amended August 24, 1962]

22.16-4 Requirements for filing Iowa nonresident returns.

a. Every nonresident individual having a taxable income for the tax year from Iowa sources taxable under the Iowa income tax law as amended, of $1500 or over, if single, or if married and not living with husband or wife; or having such a taxable income for the tax year of $2350 or over, if married and living with husband or wife, shall make and sign a return. [Amended August 24, 1962]

b. If husband and wife living together have an aggregate taxable Iowa income of $2000 or over, each shall make such a return, unless the income of each is included in a single state of Iowa joint return. [Amended August 24, 1962]

c. Form NR-1 shall be used by nonresidents in reporting Iowa income to this state. Such form may be obtained by applying to the Iowa Nonresident Income Tax Division, State Office Building, Des Moines 19, Iowa. Completed returns are to be filed with or mailed to that same Division on or before the last day of the fourth month after the expiration of the nonresident's tax year. If Iowa tax is due, the return must be accompanied by remittance payable to Treasurer of State of Iowa.

22.17-1 [Rescinded October 11, 1972]

22.21-1 Time and place for filing return. A return of income must be filed on or before the last day of the fourth month following the close of the taxpayer's taxable year, whether the return be made on the basis of the calendar year or for a fiscal year. The due date is the last day upon which a return is required to be filed, or the last day of the period covered by an extension of time granted by the commission. When the due date falls on Sunday or a legal holiday, the return will be due the day following such Sunday or legal holiday. If placed in the mails the return should be posted in ample time to reach the income tax division, under ordinary handling of the mails on or before the date on which the return is required to be filed. Mailed returns should be addressed to the STATE INCOME TAX DIVISION, State Office Building, Des Moines 19, Iowa. (Such form of address is desirable in order to prevent returns being missent to the federal income tax department.)

If a return is placed in the mails, properly addressed and postage paid, in ample time to reach the income tax division on or before the due date for filing, no penalty will attach should the return not be received until after that date.

22.21-2 Extension of time for filing returns. It is important that the taxpayer render, on or before the due date, a return as nearly complete and final as it is possible for him to prepare. However, when good cause exists by reason of sickness, unavoidable absence, or otherwise, the commission is authorized to grant an extension of time in which to file such return, provided the taxpayer files form IT-8, or in the case of corporations form IT-136, in triplicate.

In no case shall an extension exceed three months, except in cases where taxpayer is abroad. The application for an extension must be made prior to the due date of the return, or before the expiration of an extension previously granted. As a condition to granting an extension of time, the commission may require that a tentative return be filed and the payment of the first installment of tax shown due on that return, if that tax is over $50; if $50 or less the full amount is to be paid. If the time for filing is extended and the tax payable is over $50, interest at six percent per annum from date the return originally was required to be filed to date of actual payment on one-half of the total tax is to be paid by taxpayer; if the total tax is $50 or less, interest is to be computed on full amount of tax. An extension of time to file return does not extend the time for payment of the second installment. [Amended August 24, 1962]

22.21-3 Payment of tax by uncertified checks. The income tax division will accept uncertified personal checks in payment of income taxes, provided such checks are collectible at par, that is, for their full amount without any deduction for exchange or other charges. The date on which the income tax division receives the check will be considered the date of payment, so far as the taxpayer is concerned, unless the check is returned dishonored. If one check is remitted to cover two or more persons' taxes, the remittance must be accompanied by a letter of transmittal stating (*a*) the name of the drawer of the check; (*b*) the amount of the check; (*c*) the amount of any cash, money order or other instrument included in the same remittance; (*d*) the name of each person whose tax is to be paid by the remittance; and (*e*) the amount of payment on account of each person.

22.21-4 Procedure with respect to dishonored checks. If any check is returned unpaid, all expenses incident to the collection thereof will be charged to the taxpayer. If any taxpayer whose check has been returned by the depository bank uncollected should fail at once to make the check good, the commission will proceed to collect the tax as though no check had been given. A taxpayer who tenders a certified check in payment for taxes is not relieved from his obligation until the check has been paid.

22.21-5 and 22.21-6 [Rescinded October 11, 1972]

22.21-7 Certification of correctness of the return. The return shall be authenticated by a signed declaration of its correctness. The return may be made by an agent if the taxpayer is (*a*) too ill to make it or (*b*) is absent from the state for 60 days before the due date. A power of attorney must accompany the return made by an agent. The person or persons actually preparing the return (if other than the taxpayer or his agent) must also sign the declaration. Verification by oath is not required.

22.21-8 Optional method of filing. Pages 1 and 2 of form IT-1, if properly completed may be filed as a short-form return, IF A COMPLETE FACSIMILE OR PHOTOCOPY OF YOUR FEDERAL RETURN AND SUPPORTING SCHEDULES IS ATTACHED.

To properly complete the short-form method:

1. Enter Adjusted Gross Income (Form 1040, page 1) at line 9, page 1, of your return. (In the event your Federal Adjusted Gross Income includes income not subject to Iowa income tax, or you have income subject to Iowa income tax but not to federal income tax—attach a schedule of such income, and enter the amount shown on form 1040 as adjusted on that schedule.)

2. If deductions were itemized on form 1040 enter the total of itemized deductions (Page 2, form 1040), less the Iowa income tax included in that total, at line 12, page 1, of your state return.

3. It will not be necessary to complete lines 4 through 8, page 1. You are required, however, to use all other lines from 10 through 18.

If you choose this method of preparing the return, failure to comply with the above requirements will constitute an incomplete return. [Amended August 24, 1962]

22.21-9 Use of and completeness of prescribed forms. Returns shall, in all cases, be made by residents, nonresidents, fiduciaries, partnerships and corporations on forms supplied by the tax commission. When a taxpayer elects to submit alternative forms, the prescribed form, including all schedules and questionnaires, must also be completed. Taxpayers not supplied with the proper forms shall make application for same to the commission or to any county treasurer or field auditor, in ample time to have their returns made, verified and filed on or before the due date. Each taxpayer shall carefully prepare his return so as to fully and clearly set forth the data required. Imperfect, incorrect or incomplete returns will not be accepted as meeting the requirements of the statute. For lack of a prescribed form, a statement made by a taxpayer disclosing his gross income and the deductions therefrom may be accepted as a tentative return, and if verified and filed within the prescribed time, will relieve the taxpayer from liability to penalties, provided that without unnecessary delay such a tentative return is replaced by a return made on the proper form. Each question shall be answered and each direction complied with in the same manner as if the forms and instructions were embodied in these regulations. [Amended August 24, 1962]

22.21-10 [Rescinded October 11, 1972]

22.22 Supplementary returns. If within the regular or legally extended statutory period for audit, it becomes known to the taxpayer that the amount of income reported to be federal adjusted gross or federal net income, was erroneously stated on the Iowa return, or changed by internal revenue service audit, or otherwise, the taxpayer shall file a supplementary return with supporting schedules. A copy of the revenue agent's report will be acceptable in lieu of a supplementary return. [Filed August 24, 1962]

22.25-1 Power to examine and audit may be delegated. Section 422.25 (1) provides that the commission shall examine returns within three years and determine the correct amount of the tax. Section 422.25 (1) permits the determination of the correct amount of the tax within the limits of the statute of limitations if the commission discovers from any source that all or portions of the income have been omitted either through understatement of net income or overstatement of deductions. Section 422.64 [Code 1966] permits the commission to appoint and remove such agents, auditors, clerks and employees as it deems necessary, and to prescribe the duties of such persons. The commission hereby delegates to the

director of the income tax division the power to examine return and make audits; and to determine the correct amount of tax due, subject to review by the commission or appeal to the commission. The power so delegated may further be delegated by the director to such auditors, agents, clerks and employees of the income tax division as he shall designate. [Amended August 24, 1962]

22.25-2 Notice of discrepancies. An agent, auditor, clerk or employee of the income tax division, designated by the director to examine returns and make audits, who discovers discrepancies in returns or learns that the income of the taxpayer may not have been listed, in whole or in part, or that no return was filed when one was due, is authorized to notify the taxpayer of his discovery by ordinary mail. Such notice shall not be termed an assessment. It may inform the taxpayer what amount would be due from him if the information discovered is correct.

22.25-3 Right of taxpayer upon receipt of notice of discrepancy. A taxpayer who has received notice of a discrepancy in connection with a return may pay the additional amount stated to be due. If payment is made, and the taxpayer wishes to contest the matter, he should then file claim for refund. However, payment will not be required until assessment has been made (although interest will continue to run if payment is not made). If no payment is made, the taxpayer may discuss with the agent, auditor, clerk or employee who notified him of the discrepancy, either in person or through correspondence, all matters of fact and law which he considers relevant to the situation. Documents and records supporting his position may be required.

22.25-4 Power of agent, auditor, etc., to compromise tax claims. No employee of the commission has the power to compromise any tax claims. The power of the agent, auditor, clerk or employee who notified taxpayer of the discrepancy is limited to the determination of the correct amount of tax.

22.25-5 Review of director. In the event taxpayer and the agent, auditor, clerk, or employee cannot agree as to the correct amount of tax, and taxpayer refuses to pay the amount determined to be correct, the matter may be referred to the director for review.

22.25-6 Formal notice of assessment. If following review no agreement is reached, and taxpayer does not pay the amount determined to be correct, a formal notice of assessment shall be sent to the taxpayer by certified mail. Also, if the period in which the correct amount of tax can be determined is nearly at an end, a formal notice of assessment may be sent without compliance with rules 22.25-3, 4 and 5, or a jeopardy assessment may be made under the provisions of section 422.30. All formal notices of assessment shall be signed either by the chairman or the vice-chairman of the commission. [Amended August 24, 1962]

22.25-7 [Rescinded October 11, 1972]

22.25-8 Periods of limitation.

a. In case errors in computing taxable income and tax due are apparent on the return itself, the correct amount of tax due may be determined by the commission within three years from the time the return is filed. If a transaction has been fully disclosed in the return or on a schedule or statement incorporated with the return, so that upon examination of the return the proper treatment of the transactions could be ascertained, but it was incorrectly reflected in taxable income on the return, the three-year limitation is applicable.

b. If a taxpayer fails to include in his return such items of gross income as defined in the Internal Revenue Code of 1954, as will under that Code extend the statute of limitations for federal tax purposes to six years, the correct amount of tax due may be determined by the commission within six years from the time the return is filed.

c. If a taxpayer files a false or fraudulent return with intent to evade tax, the correct amount of tax due may be determined by the commission at any time after the return has been filed.

d. While the burden of proof of additional tax owing under the six-year period or the unlimited period is upon the commission, a prima facie case of omission of income, or of making a false or fraudulent return, shall be made upon a showing of a federal audit of the same income, a determination by federal authorities that the taxpayer omitted items of gross income or made a false or fraudulent return, and the payment by the taxpayer of the amount claimed by the federal government to be the correct tax or the admission by the taxpayer to the federal government of liability for that amount.

e. Subsections "*b*" and "*c*" do not apply to returns for tax years beginning before January 1, 1949. [Amended August 24, 1962]

22.27-1 Certificate of acquittance. Issuance of the certificate of acquittance referred to in section 422.27, Code 1958, as amended, is entirely dependent on the fulfillment of the obligations imposed on the fiduciary under applicable sections of the law and rules created thereunder. Specific rules are shown as 22.6-1, 2, 3, 4, 5, 6, 7, 8 and 9. Failure to comply with the requirements of these rules or relative sections of the law will result in denial of the certificate of acquittance until such requirements are met. [Filed August 24, 1962]

22.28-1 Manner of filing appeals to the commission.

1. Appeals to the state tax commission should be in writing and should be addressed to the STATE INCOME TAX DIVISION, State Office Building, Des Moines 19, Iowa. An appeal should set forth all facts upon which the appellant intends to rely,

together with a statement of the reasons of the appellant for making such appeal.

2. If taxpayer desires a personal hearing, notice to that effect should be given, whereupon the commission will set a date for such hearing and the taxpayer will be notified of such a date.

22.28-2 Hearings—who may appear. At any hearing the taxpayer may appear and present his appeal in person. He may be present and may have his case presented by his attorney or accountant.

22.28-3 Hearings—burden of proof. A taxpayer who has appealed has the burden of proof that the assessment levied against him is incorrect, and in what respects it is incorrect.

22.28-4 Hearings—who before. Hearings on appeal shall be held before the commission. At least two members of the commission must be present.

22.28-5 Record—evidence. Hearings usually will be informal, but where it is considered necessary, a formal record may be made. Evidence presented need not be formally introduced nor objected to by any party to the hearing. In the discretion of the commission, relevant evidence, which is because of its nature inadmissible in a court of law, may be introduced. All evidence in the files of the commission shall be available to the commission. However, the taxpayer should be informed of the substance of any documents or other evidence of which he has not been apprised, and he should have opportunity to rebut such evidence.

22.28-6 Remand to auditor, agent, clerk or employee. If from the hearing it appears that the matters at issue can be settled between the auditor, agent, clerk or other employee who initially determined that the return was incorrect or was not filed, and the taxpayer, the commission may remand the matter to the auditor, agent, clerk or other employee without decision. Such action shall not be taken if protested by the taxpayer.

22.28-7 Decision. Unless the matter on appeal is remanded in accordance with rule 22.28-6, the commission shall render a decision thereon within a reasonable period of time. (Payment of the assessment after hearing and before decision shall be deemed a waiver of decision.) The determination of the commission shall be in the form of a findings and order, setting forth sufficiently to apprise the taxpayer of the reasons for the determination, the findings of fact, conclusions of law, and decision. The decision of the majority of the commissioners shall be the decision of the commission. In case a commissioner dissents from the commission's decision, he may set forth his findings, conclusions, and reasons for his dissent. The decision may confirm the assessment as made, and sustain it; it may modify the assessment in various particulars; or it may ascertain that the assessment should not be confirmed in any respect. The findings and order of the commission shall be furnished to the taxpayer by registered mail.

22.30-1 Jeopardy assessments.

a. A jeopardy assessment made pursuant to section 422.30 is due and payable when the notice of the assessment is served upon the resident or nonresident taxpayer, and may not be paid in installments. Proceedings to enforce the payment of the assessment by seizure or sale of any property of the taxpayer, or by garnishment, may be instituted immediately.

b. A jeopardy assessment may be made in a case where a return has been filed, and the commission believes for any reason that collection of the tax will be jeopardized by delay; or in a case where a taxpayer fails to file a return, whether or not formally called upon to do so, in which case the commission is authorized to estimate the income of the taxpayer upon the basis of available information, and to add thereto interest and penalties. The payment of tax under a jeopardy assessment does not deprive the taxpayer of the right to claim a refund of any part of the tax paid, to which he can prove himself entitled.

22.30-2 Waiver of period of limitation. Where it appears that the collection of tax may be jeopardized by delay, an estimated tax, based on available information, will be assessed against the taxpayer, the assessment to be subject to such later adjustments as may be found necessary. If the taxpayer files with the commission a written waiver of the period of limitation, the limit of time for audit of the taxpayer's return will thereby be extended for a designated period. A waiver, when granted, carries limitation of 36 months interest to be assessed on the year waived. [Amended August 24, 1962]

22.32-1 Definitions.

a. The term "corporation" as used in chapter 422 of the Code and in these regulations includes not only corporations which have been created or organized under the laws of Iowa, but also those which are qualified to do, or are doing business in Iowa, in a corporate or organized capacity, by virtue of creation or organization under the laws of the United States or of some state, territory or district or of a foreign country. The term "corporation" is not limited to the artificial entity usually known as a corporation, but includes also an association, a trust classed as an association because of its nature or its activities, a joint stock company, and certain kinds of partnerships. Any association or organization which is required to report as a corporation, for federal income tax purposes under the Internal Revenue Code of 1954, shall be considered to be a corporation for the purposes of Iowa income tax on corporations. [Amended August 24, 1962]

b. The term "association" is not used in the law in any narrow or technical sense. It includes any

organization, created for the transaction of designated affairs, or the attainment of some object, which like a corporation continues notwithstanding that its members or participants change, and the affairs of which, like corporate affairs, are conducted by a single individual, a committee, a board, or some other group, acting in a representative capacity. It is immaterial whether such organization is created by an agreement, a declaration of trust, a statute, or otherwise. It includes a voluntary association, a joint stock association or company, a "business" trust, a "Massachusetts" trust, a "common law" trust, a partnership association, and any other type of organization (by whatever name known) which is not, within the meaning of the law, a trust or an estate, or a partnership. An "Investment" trust of the type commonly known as a management trust is an association, and a trust of the type commonly known as a fixed investment trust is an association if there is power under the trust agreement to vary the investment of the certificate holders. If the conduct of the affairs of a corporation continues after the expiration of its charter, or the termination of its existence, it becomes an association.

22.33(1)-1a Basis of corporate tax. The determination of taxable income of a corporation is accomplished on a different basis than in the case of other taxpayers. Individual residents of Iowa, and partnerships, estates, and trusts domiciled in Iowa are subject to the tax on all net income received by them, from sources within or without the state. In the case of corporations whose income is subject to the tax, the tax is levied and collected only upon such net income as may accrue to the corporation from business carried on in the state plus certain net income from sources without the state which by law follows the home office of the corporation. [Amended August 24, 1962]

22.33(1)-1b Corporations electing partnership-type taxation. The foregoing paragraph applies to shareholders of small corporations electing under sections 1371-1377 IRC to distribute the corporation's income to the shareholders. The corporation income in its entirety is then subject to individual reporting. The shareholders will report in their individual returns their share of the corporations income computed without benefit of outstate-instate allocation. [Filed August 24, 1962]

22.33(1)-2 Corporations carrying on business entirely within the state of Iowa. If a corporation carries on its trade or business entirely within the state of Iowa, no allocation or apportionment of its income may be made. The corporation will be considered to be carrying on business entirely within the state of Iowa if its sales, or other activities are carried on only in Iowa, even though it may own subsidiary corporations which function in other states and from which it receives income in the form of interest, dividends, rents, royalties, or otherwise. [Amended August 24, 1962]

22.33(1)-3 Corporations not carrying on business entirely within the state of Iowa. All corporations not within rule 22.33(1)-2 shall be deemed not to carry on business entirely within the state of Iowa. The net income of such corporations shall be apportioned or allocated to Iowa and outside Iowa in accordance with rule 22.33(1)-4 through 22.33(1)-10, and rule 22.33(2)-1. For the purpose of these regulations the word "apportioned" shall mean assigned by a percentage ratio and the word "allocated" shall mean assigned specifically within or without the state. The word "domicile" if used in these regulations shall mean the home office of the corporation. [Amended August 24, 1962]

22.33(1)-4 Interest, dividends, rents and royalties (less related expenses) received in connection with business. All interest, dividends, rents and royalties shall be allocated as directed by section 422.33(1,*a*). [Amended August 24, 1962

22.33(1)-5 Application of related expenses. Sections 422.35, 422.33 (1) and rule 22.33(1)-3, direct that the allocation and apportionment of income, by subsections "*a*" and "*b*", of section 422.33, as interpreted by rule 22.33(1)-4 through 10, deal only with the separation of NET income. Therefore, determination and application of RELATED expenses must be made, as hereinafter directed, BEFORE allocation or apportionment within or without Iowa.

The word "RELATED" as used in line two of section 422.33(1,*a*), shall mean those expenses which are directly related and also those indirectly related.

Indirect expenses to be determined and LIMITED as follows: Where a corporation has assets producing interest, dividends, rents and royalties, borrows money for any corporate purpose, the interest paid shall be deemed indirectly related to the production of interest, dividends, rents and royalties.

All rents paid, and royalties paid for the right to extract and process natural resources, shall be deemed expenses indirectly related to rent and royalty income from tangible property, even though not paid for the use of the property produing the income.

However: Indirect expense, as determined above, shall not exceed the amount of income (less other related expenses), to which it is deemed related. [Amended August 24, 1962]

22.33(1)-6 Allocation of net income from interest, dividends, rents and royalties. In the allocation provided by section 422.33 (1,*a*), the business to which these earnings are connected is the business activity of the assets producing the income. In general the part of the

net income attributable to business within the state shall be in that proportion which the gross business activity within the state of the assets producing each type of income, bears to the total gross business activity of the assets producing each type of income; subject however to the following specific allocations:

a. NET rent income shall be allocated to Iowa in that proportion which the gross rent charged for the use of the asset while being used in Iowa, during the tax year, bears to the total gross rent charged for the use of the asset during the tax year.

b. NET royalty income, from the extraction and processing of natural resources, shall be allocated to Iowa in that proportion which the gross sales of the product within Iowa, during the tax year, bear to the total gross sales of the product, during the tax year.

c. NET royalties, not allocable as directed by paragraph "*b*" above, shall be allocated to Iowa; unless the taxpayer presents detailed schedule(s), establishing to the satisfaction of the commission, that the asset(s) was (were) used without Iowa.

d. NET interest on tax refunds shall be allocable to Iowa in that proportion which the tax refunded is a recovery of tax expendable against income subject to Iowa corporation income tax.

e. NET interest received by a corporation, during the tax year, because of indebtedness evidenced by notes, mortgages, contracts, accounts receivable and any other written or oral evidence of indebtedness, shall be allocated to Iowa; unless the taxpayer files detailed schedule(s), establishing to the satisfaction of the commission, that the money representing the indebtedness was used without Iowa.

f. NET dividend income, received by a corporation during the tax year, shall be allocated to Iowa in that proportion which, the taxable Iowa net income of the dividend paying corporation(s), for the tax year in which the dividend was paid, bear(s) to the total on the same Iowa basis. [Amended August 24, 1962]

22.33(1)-7 Net gains and losses from the sale of assets.

a. Gain or loss from sale of assets USED IN THE BUSINESS as determined by the United States Internal Revenue Code section 1231, as revised by Iowa Code section 422.35, shall be apportioned or allocated within and without the state as follows:

Corporations determining Iowa taxable income, by a ratio of sales, gross receipts or other business activity ratio, shall apportion gain or loss from sale or exchange of assets USED IN THE BUSINESS, as determined by said federal code section 1231, by the business activity ratio applicable to the year the gain or loss is determined.

Corporations having ONLY assignable income shall assign gain or loss from sale of assets USED IN THE BUSINESS as follows: Gain or loss from the sale of assets used in the business shall be assigned within Iowa, in that proportion which, the gross income from the assets sold, was assignable within Iowa, during the three tax years first prior to the year the assets were sold, bears to the comparable total assignable both within and without Iowa. If the assets had no gross earnings or if none of the earnings were subject to Iowa corporation income tax, during said three preceding tax years, the gain or loss from the sale of tangible and intangible personal property shall be assigned to the domicile of the recipient and gain or loss from realty shall be assigned to the location of the realty.

b. Gain or loss from the sale of CAPITAL assets as determined by the United States Internal Revenue Code as revised by Iowa Code section 422.35, exclusive of gains and losses determined by subsection "*a*" of this regulation, shall be apportioned or assigned within and without the state as follows:

Gains or losses from sale of TANGIBLE personal property shall be apportioned or assigned as directed by subsection "*a*" of this regulation.

Gain or loss from the sale of REALTY and INTANGIBLE personal property, shall be assigned as directed by subsection "*a*", paragraph (3) of this regulation. [Amended August 24, 1962]

22.33(1)-8 Where income is derived from business other than the manufacture or sale of tangible personal property.

a. This regulation applies to corporations receiving net income from business of types not covered by rules 22.33(1)-4, 22.33(1)-6, 22.33(1)-7, 22.33(1)-9 or 22.33(1)-10.

b. The term "income from personal or business service" includes income which is received by a corporation for rendering personal or business service, fees and commissions, including those derived from conducting an auction, agency, brokerage or commission business. It is immaterial whether the services are performed by the principal owner or stockholders or by other employees of the corporation.

Income received by a corporation from personal or business services is allocable to Iowa regardless of where the services were performed if the corporation is domiciled in Iowa, or has a business situs in Iowa.

Income received by a corporation doing business in Iowa from personal or business services performed in Iowa is allocable to Iowa, even though the corporation has no Iowa domicile or business situs.

c. Any other net income must be specifically allocated or equitably apportioned within and without Iowa on a basis which the taxpayer can substantiate, to the satisfaction of the commission, as just and equitable. [Amended August 24, 1962]

22.33(1)-9 Where income is derived from the manufacture or sale of tangible personal property.

a. The Act provides specifically but one method of apportioning net income derived from the manufacture or sale of tangible personal property,

which provides that the part of such income attributable to business within the state shall be that proportion which the gross sales made within the state bear to the total gross sales.

Nonapportionable income assignable to Iowa shall be added to the apportionable income assigned to this state as determined by use of the apportionment fraction to determine the total net taxable income.

b. The gross sales of a corporation within the state includes sales for delivery to a purchaser within the state, but does not include sales for delivery to a common carrier for transportation out of the state.

For example, if a corporation sells to a customer at its place of business in this state, and delivers the property to the purchaser, the sale is a sale within the state and the income derived therefrom is taxable in this state, regardless of the ultimate destination of the property. If, however, a sale is made and the property is not delivered to the purchaser thereof, but to a common carrier for transportation to a place outside of the state, the income derived therefrom will not be taxable in Iowa.

The gross sales of a corporation within the state shall be taken to be the gross sales of goods sold and delivered within the state, including:

1. Goods sold and delivered within the state to a common carrier and consigned to a point within the state, regardless of where such shipment may be afterwards consigned by the purchaser.

2. Goods sold and delivered within this state to a common carrier and consigned to a point without this state, but diverted by the purchaser and actually delivered to a point within the state.

Goods sold and delivered within the state to a common carrier for transportation out of the state and which are actually delivered outside of the state shall be excluded.

Goods delivered to the purchaser in Iowa from stocks of merchandise kept within the state shall be included as Iowa sales in determining the proportion of the net income subject to the tax even though such transactions were handled through an office outside the state.

c. In the case of corporations engaged in the manufacture or sale of tangible personal property, the apportionment fraction represents the ratio of the sales made within this state during the taxable year to the total sales wherever made. For explanation of what constitutes a sale within Iowa see subparagraph "*b*" hereof.

The right to apportion or allocate taxable income by corporations does not extend to resident individuals, partnerships, estates or trusts. In the case of income of a nonresident, such apportionment or allocation is permissible in certain cases, but under rules different from those applicable to corporation income. [Amended August 24, 1962]

22.33(1)-10 Allocation of income of public utility, transportation and communications corporations. Net income of these corporations, other than interest, dividends, rents and royalties, which is not specifically assigned by rules 22.33(1)-7, 22.33(1)-8 or 22.33(1)-9 shall be apportioned as follows:

1. *Railroads.* Where net income is derived from railroad operations, the part thereof attributable to business within the state shall be that proportion which the trackage owned and operated within the state, bears to the total trackage owned and operated, as reported to the interstate and Iowa state commerce commissions.

2. Air line, truck and bus line companies, freight car and equipment companies shall determine their Iowa proportion of gross receipts of gross revenues by taking the proportion of mileage traveled in Iowa to the total mileage traveled within and without the state. This provision is applicable to corporations only.

3. Oil, gasoline, and gas pipe line companies shall determine the proportion of transportation revenue derived from interstate business that is attributable to Iowa by the proportion of Iowa traffic units to total traffic units. The "Traffic Unit" of an oil pipe line is defined as the transportation of one barrel of oil for a distance of one mile; the "Traffic Unit" of a gasoline pipe line is defined to be the transportation of one gallon of gasoline for a distance of one mile; and a "Traffic Unit" of a gas pipe line is defined to be the transportation of 1000 cubic feet of natural or casinghead gas for a distance of one mile.

4. Telephone and telegraph companies shall determine the Iowa proportion of revenues by taking the Iowa proportion of used wire mileage to the entire used wire mileage of the system. [Amended August 24, 1962]

22.33(2)-1 Allocation of income in special cases. Whenever it shall appear to the commission that the statutory method of apportionment will not properly reflect the taxable net income assignable to the state, the commission may permit or require a taxpayer to determine the taxable net income by other methods. If a taxpayer feels that the allocation and apportionment as prescribed by section 422.33(1), in his case, results in an injustice, such taxpayer may petition the commission to be permitted to determine the taxable net income, allocable or apportionable to the state on some other basis. Such petition must be in writing, and shall set forth in detail the facts upon which the petition is based. The burden of proof will be on the taxpayer as to the validity of the method and its results.

The taxpayer must first file his return as prescribed by section 422.33(1). If a change to some other method is desired a statement of objections and an alternative method shall be filed. The commission shall require detail and proof within such time as they may reasonably prescribe. If the commission shall conclude that the statutory method is in fact inapplicable and inequitable, the commission shall prescribe a special method. Since a prescribed method, is the discretion of the commission and without knowledge of what the

discretion of future commissions will be, it is not possible to grant or deny its use beyond the years under audit at the time the special method is prescribed. The taxpayer's continued use of a prescribed method will be subject to change within the statutory, or legally extended period for audit. [Amended August 24, 1962]

22.33(2)-2 Separate accounting methods. The use of the separate accounting method may be authorized by the commission where it is shown to the satisfaction of the commission that this method will more clearly and equitably reflect the income assignable to this state. Ordinarily the separate accounting method is not satisfactory for a manufacturing business. It may be permitted to be used for merchandising businesses where separate records are kept of sales, costs of sales, and expenses for Iowa business, as in the case of a corporation branch carrying on business entirely within Iowa. Overhead items of income and expense must be allocated to the business within and without Iowa on a basis which utilizes the factors by which such items are measured. For example, federal income taxes are based upon income, and their allocation must be based upon the ratio of taxable income within this state to the total income for the year in which the taxes are assessed, despite the fact that such ratio may differ from the ratio of the year in which the taxes are paid.

General overhead items, such as officers' salaries, rent, etc., should be allocated to business within and without the state upon a basis which the taxpayer can substantiate as being equitable and just. Improper allocation of such general overhead expense by the taxpayer may necessitate the use of the statutory method of assigning income to Iowa. Expenses connected with interest, dividends and rentals realized from investments must be applied against the investment income. The balance of such income is allocated specifically according to the domicile of the recipient or place of integration of property from which income is received. Where a selling organization within Iowa disposes of the company's entire product manufactured in Iowa to the exclusion of any other products manufactured elsewhere, the commission may permit the use of the separate accounting method, provided that the sales are not made to other branches of the selling corporation, or to an affiliated corporation.

22.34-1 Exemption of farmers and fruit growers associations and like organizations. The exemption under section 422.34(6) will be denied if the association markets the products of nonmembers, provided the value of such products marketed for nonmembers exceeds five percent of the value of the products marketed for members and nonmembers.

Mutual farm telephone companies or rural electrification associations which operate by assessing members or stockholders for merely the amounts necessary for the payment of operating expenses will be exempted when application with proper showing is made to the commission.

22.34-2 Application for exemption. Corporations and organizations claiming exemption from taxation under the foregoing provisions shall be required to provide good and sufficient evidence to the commission showing their right to exemption as claimed. The burden is upon the corporation claiming exemption to establish same without request by the commission. In no event shall corporations be exempt from providing information at the source as to compensation or other items of value paid by them to employees and others, as required by section 422.15, and related provisions.

22.34-3 Form of application for exemption. An application should be made in behalf of the corporation or association claiming exemption, by the president and secretary thereof, requesting such exemption under section 422.34 and must contain the following information:

1. The character of the organization.
2. The purpose for which it was organized.
3. The actual activities.
4. The sources of income and its disposition.
5. Whether or not any of the net income is credited to surplus or may inure to the benefit of any private individual or stockholder, and if so, in what manner and to what extent.
6. Whether or not exemption from filing federal income tax returns has been granted by the bureau of internal revenue. If not, state reason.
7. If exemption is claimed under section 422.34(6) the following data must be furnished:

a. State the value of products marketed during the year for members $ ....., nonmembers $ .....

b. State the value of purchases made during the year for members $ ..... , nonmembers $.....

c. State the value of purchases made during the year for persons who are neither members nor producers $.....

d. If the organization deals with nonmember patrons state whether or not they are treated the same as members insofar as the charges made for service or the distribution of patronage dividends is concerned.

8. In general, all facts relating to the operation of the business which affect the right to exemption. There must be attached to the application:

a. A certified copy of the articles of incorporation.

b. A certified copy of the bylaws.

c. A copy of the latest financial statement, showing assets, liabilities, receipts, and disbursements of the organization.

The statements supporting the claim for exemption must be sworn to.

22.35-1 Adjustments to "net income" of corporations. Adjustments to "net income" under Division III of chapter 422 of the Code shall be made similar to those required to be made to "net income" under Division II of chapter 422 of the Code by rules 22.7-2, 22.7-3, 22.7-4, 22.7-11, 22.7-12, 22.7-13, 22.9-4 and 22.9-10. Rule 22.22 is also applicable to corporation returns. [Amended August 24, 1962]

22.35-2 Allocation of net operating loss and federal income taxes. Corporations subject to the allocation provisions of section 422.33, and to rules 22.33(1)-1 through 22.33(1)-9, 22.33(2)-1 are permitted to deduct only such portion of deduction for net operating loss and for federal income taxes as is fairly and equitably allocable to Iowa. [Amended August 24, 1962]

22.36-1 Returns by corporations. Every corporation upon which the tax is imposed must file a true and accurate return of its income or loss for the taxable period, if incorporated in or licensed in Iowa. Such return shall be sworn to by the president, vice-president, or other principal officer, and by the treasurer or assistant treasurer. If the corporation was inactive during the taxable period, the return must contain a statement to that effect. A corporation existing during any portion of the taxable year is required to make a return, regardless of the amount of its income or loss.

22.36-2 Income tax of corporations in liquidation. When a corporation is in process of liquidation, or in the hands of a receiver, the income tax returns must be made upon oath or affirmation of the persons responsible for the conduct of the affairs of such corporation, and must be filed at the same time and in the same manner as required of other corporations.

22.36-3 Distributions in liquidation. Amounts distributed to stockholders in complete liquidation of a corporation are to be treated as in full or part payment in exchange for the shares held by the stockholders. Such a transaction constitutes the sale or exchange of a capital asset.

22.36-4 Income tax returns for corporations dissolved. Corporations which have been dissolved during the income year must file income tax returns for the period prior to dissolution which has not already been covered by previous returns. Officers and directors are liable for filing of corporation income tax returns and for the payment of taxes, if any, for five years after date of dissolution.

Where a corporation dissolves and disposes of its assets without making provision for the payment of its accrued Iowa income tax, liability for the tax follows the assets so distributed and upon failure to secure the unpaid amount, suit to collect the tax may be instituted against the stockholders and other persons receiving the property, to the extent of the property received, except bona fide purchasers for a valuable consideration.

22.36-5 Penalty for failure to file a corporation return. If a corporation required by the Act to file any report or return (including returns of information at source) or to pay any tax or fee, fails to do so within 90 days after the time prescribed for making such returns or payment, the commission may certify such fact to the secretary of state, who shall thereupon cancel the articles of incorporation or certificate of authority (as the case may be) of such corporation, and the rights to such corporation to carry on business in the state of Iowa as a corporation shall thereupon cease. Any person or persons who shall exercise or attempt to exercise any powers, privileges, or franchises under articles of incorporation or certificate of authority after the same are canceled, as provided in the Act, shall pay a penalty of not less than $100, nor more than $1000, to be recovered in an action brought by the commission.

22.36-6 Returns of information as to dividends paid. Every domestic corporation and every foreign corporation doing business in Iowa (whether or not exempt from payment of income tax) shall file returns of information as required by section 422.15, and shall also make complete return under oath of all dividends paid in amounts of $100 or over during the calendar year to Iowa resident stockholders, or to a nonresident business, carried on in this state. The credit on tax provided by section 422.11 [Code 1954] will not be allowed in any case where the corporation fails to so report the amount of dividends paid.

22.36-7 Additional information required from foreign corporations. Foreign corporations are required to file a copy of their federal income tax return for the current tax year with the return required by section 422.36. However, if the form provided for filing corporate returns, by the state tax commission, contains space upon which the information on the federal tax return may be copied, the taxpayer may insert that information on the form provided by the state and will not be required to file a copy of the federal income tax return in addition.

22.37-1 Consolidated returns. Authority to grant or withhold permission to file a consolidated return in the case of affiliated corporations, as well as to require such returns, is by the Act vested in the commission. Ordinarily, the making of consolidated returns will not be permitted, but this inhibition shall not be construed as denying the right of any corporation to make application to the commission for the privilege of filing a consolidated return, setting forth in such application in detail the reasons therefor, together with statements showing the income and deductible expenses of each affiliate and a consolidated statement showing the combined income and deductible expenses of the affiliated concerns. A consolidated return will in no case be permitted by the commission where it appears that the total taxable income of the affiliates is thereby reduced. Each

corporation is, under the law, a separate and distinct entity; and the ownership of all, or of substantially all, of the stock of one corporation by another corporation or by the stockholders of another corporation, does not operate to change this condition. The commission may, however, require the making of a consolidated return if thereby the taxable income of the corporations affected will be more clearly disclosed.

22.37-2 Evasion of tax by corporations. Where a corporation which is liable to taxation fixes its income through purchases, sales, contracts, or other arrangements in such a manner as to benefit stockholders or affiliated interests, and thereby create an improper net income for the corporation, the commission may determine the income on such a basis as will give effect to the fair and reasonable profits which might have been realized but for such contract or arrangement. The section of the Act which gives authority to this regulation was enacted primarily for the purpose of preventing the diversion of profits from Iowa by means of stockholders or affiliated interests located outside of Iowa.

Some common forms of diversion of income are:

1. Sales at more or less than fair value.
2. Purchases at more or less than fair value.
3. Fixing profits in advance by contract.
4. Payment of unreasonable officers' salaries, rents, royalties, interest and other charges against income.
5. Billing the product to an affiliate at factory cost. Such practices are made possible by forming separate corporations or sales agencies outside the state, and selling products to them at arbitrary prices, reducing the apparent income of the Iowa concern, this profit being realized by the foreign affiliate or sales agency, in a state where no state income tax applies. In such cases the commission may require that consolidated returns be made, or that statements be submitted showing the operations of the Iowa corporation and of the affiliated corporations or sales agencies. The income attributable to Iowa is then determined by apportionment by the statutory method, or by valuing the products sold by the Iowa corporation at a fair market value, and adjusting fictitious deductions on an equitable basis, in accordance with attendant facts and circumstances.

In recent years there has been a tendency on the part of corporations operating both within and without the state to form separate corporations for the purpose of carrying on the manufacturing and sales operations. If the manufacturing company operates in Iowa, it sells its products to the sales company outside of Iowa at prices which may or may not result in a proper profit to the manufacturing company. If the sales company operates within the state, it buys its products from the manufacturing company outside the state at prices which may or may not result in proper profit to the sales company. The intercompany prices may be based upon the market value of the product transferred, factory cost, factory cost plus a certain percent, or be purely arbitrary prices calculated to result in a certain profit which has been predetermined.

In determining whether the profit shown for Iowa is proper, due consideration must be given to both the operations within and without the state. Any arrangement by which either the sales or manufacturing company is permitted to show all of the profit, or substantially all of it, will be subject to question.

Billing the product at factory cost attributes no profit to manufacturing activity and cannot be considered as reflecting a proper income. The percentages which may be used on the factory cost are capable of great variations, resulting in a lack of uniformity of income. In the great majority of cases, the total profit realized from combined manufacturing and selling activities is of such a nature that it cannot be assigned to the several activities for purposes of the income tax except by apportionment in accordance with section 422.33.

The taxable income of a corporation operating in Iowa cannot be fixed by contract with its stockholders or other affiliated interests. If contracts between affiliated interests were permitted to establish income, any portion or all of the income earned in Iowa might be removed from the state. For purposes of determining taxable income, contracts between affiliated corporation or other interests may be disregarded on the theory that such contracts are in fact made by one and the same interest and not between persons dealing at arm's length.

The commission is empowered to require consolidated returns where it appears that the income of the corporation operating in Iowa is so intermingled with the income of one or more affiliated corporations as to make separate accounting of the Iowa income impossible. The consolidated income is then apportioned to Iowa, with due regard to the business both within and without the state, in accordance with section 422.33.

22.38-1 All the provisions of rules 22.15(1)-1 through 22.22, insofar as the same are applicable, shall apply to corporations taxable under Division III, chapter 422, of the Code. [Amended August 24, 1962]

22.39-1 All the provisions of rules 22.25-1 through 22.25-8, respecting payment and collection, shall apply in respect to the tax due and payable by a corporation taxable under Division III, chapter 422, of the Code.

22.41-1 All the provisions of rules 22.28-1 through 22.28-7 and the provisions of rules 22.30-1 and 22.30-2, shall be applicable to corporations taxable under Division III, chapter 422, of the Code. [Amended August 24, 1962]

22.61-1 Federal rulings and regulations. In determining whether "taxable income", "adjusted gross income", "net operating loss deduction" or any other deduction, or "dependents"

are as computed for federal tax purposes under, or have the same meaning as provided by, the Internal Revenue Code of 1954, the commission will use any applicable rulings and regulations that have been duly promulgated by the commissioner of internal revenue, unless it finds that an otherwise applicable ruling or regulation is illegal or unauthorized.

22.63-1 Examination of federal returns of taxpayers. Under federal law, federal income tax returns are public records, but open for inspection only by specified personnel. Proper taxing officials of a state, upon request by its governor, are permitted to inspect such returns including audits thereof made by the internal revenue service. Iowa authorizes the commission to make such an examination, by the provision of section 422.63(1) [Code 1966] which provides that the commission shall have power "to examine or cause to be examined by any agent or representative designated by it, books, papers, records, or memoranda." Certain agents and representatives of the commission are designated, and have been granted permission by the commissioner of internal revenue, to inspect federal returns and allied records filed with or obtained by the internal revenue service. Those agents and representatives of the commission who are designated by the director, income tax division, are authorized to examine any other books, papers, records, or memoranda. The commission has power to require that such books, papers, records or memoranda be produced, by procedure involving penalties for failure to comply.

22.63-2 Bank records. The commission has power to require the taxpayer to produce his canceled checks, check stubs and bank statements. Where the taxpayer has lost or destroyed such records, the commission may examine any photostatic or carbon copies thereof in the possession of the bank with which taxpayer's account was maintained.

22.66-1 Refund of overpaid tax. The income tax law imposes upon the commission the obligation of refunding to taxpayers all income tax in excess of amounts legally due, paid by the taxpayers. When the taxpayer believes that he has overpaid his tax, he should file with the state income tax division a claim for refund of the amount overpaid.

A claim for refund shall be made on form IT-6 and shall be sworn to before a notary public or other person authorized to take acknowledgments. Upon a claim for refund, the commission may redetermine the entire tax liability of the taxpayer, and even though no new assessments can be made on account of the expiration of the period of limitation, the taxpayer is nevertheless not entitled to a refund unless he has overpaid his tax. Claims for refunds must be filed in duplicate.

There shall be set out in the claim (*a*) the taxpayer's name, address and occupation or business; (*b*) the taxable year or years involved; (*c*) the amount of tax assessed or paid, with date of payment; (*d*) the identification number stamped on check (if payment is by check); (*e*) the amount of refund requested; and (*f*) a complete statement of the facts on the basis of which the taxpayer believes that a refund should be made. Where the claim involves taxes paid in different years, a statement for each year should be made.

If a refund is claimed by a fiduciary or other legal representative of a deceased person, for refund of tax theretofore paid by the decedent, (or by another fiduciary), suitable documentary evidence, validating the authority of the one by whom the claim is filed, must be attached to the claim. However, if a fiduciary files a return and thereafter a claim is filed by the same fiduciary for a refund of tax paid on such return, such documentary evidence need not be supplied, provided a statement is made in the claim to the effect that the return on the basis of which the refund is claimed was filed by the same fiduciary, who is still acting; but such evidence may later be required by the commission.

Where a claim is filed by an agent of the taxpayer, a power of attorney must accompany the claim.

Claims for refund are not required where the amount withheld by a withholding agent is found to be in excess of the tax liability.

[Filed September 27, 1955;
amended October 11, 1972]

DIVISION IV

[Chapter 422 of the Code]

RETAIL SALES TAX

PART I
SALES TAX REGULATIONS

All rules are applicable to the administration of the use tax law unless otherwise indicated.

1. Information and opinions. A taxpayer who desires either information or an opinion as to the application of retail sales or use tax, shall make a request in writing addressed to the Division of Retail Sales and Use Tax, State Tax Commission, Des Moines, Iowa 50319.

The request shall state all pertinent facts in respect to the transaction necessary to understand the case and shall be accompanied by a copy or an abstract of contracts or other documents, if any.

It is not the policy of the commission to give opinions based on hypothetical questions. The employees of the commission are prohibited from giving opinions or answers to hypothetical questions.

When a formal ruling is desired, the procedure prescribed in rule 5 shall be followed.

1.1 Correspondence.

When writing

(a) Mention the retail sales tax permit number which appears above taxpayer's name on the sales tax permit.

(b) Refer to the name under which the retail sales tax permit was issued.

If taxpayer's name is John Doe and he owns the South Side Grocery with retail sales tax permit No. 00-0000, when he writes for information, he should sign his letter with the BUSINESS NAME as well as his own:

Example:

South Side Grocery
By John Doe
00-0000

1.2 Administration. The administration of the retail sales and use tax law is delegated to the state tax commission. The law does not provide for any organization, except for the commission itself; therefore, the organization of the various divisions are creations of the commission and may be changed from time to time as the commission deems necessary.

The division of retail sales and use tax is one of the subdivisions created by the commission. This division is charged with the administration of the retail sales and use tax, subject always to the rules and direction of the commission.

Sections 422.59 and 422.61

1.3 Service of notice. Notices required by law to be served by the commission may be served by personal service. All except notices of appeal may be served by mailing the notice to the person for whom it is intended by registered mail, addressed to such person at the address given in the last return filed by him or if no return has been filed to such address as may be obtainable. The time required by law commences to run from the date of the registration and posting of the notice. For the convenience of this division practically all notices authorized to be served by registered mail are so served.

Section 422.57

1.4 Statute of limitations. The law specifically exempts the enforcement of both retail sales and use tax from the general provisions of the statute of limitations. Therefore there are no limitations on any proceeding or action to appraise, assess, determine or enforce the collection of either the retail sales or use tax. However, there is a limitation on the examination of the books, papers or records of the taxpayer, as the law provides that no examination of the records of a taxpayer shall include any transaction completed five or more years prior to the examination. For the purpose of this limitation the examination is considered to have been made on the date that the employee starts making an audit of the books, records or papers of the taxpayer. There is, therefore, no prohibition against the assessment, collection or the enforcement of tax from any taxpayer after the lapse of five years where the knowledge that tax is due and has not been paid is obtained by any method other than the examination of the books, papers or records of the taxpayer.

Sections 422.57 and 422.63

1.5 General regulations.

1. Auditors, inspectors and other employees of the commission, have official credentials. The taxpayer should demand proof of the identity of persons claiming to represent the commission. No charge is made for assistance given in or out of the office of the commission. No gratuities of any kind shall be accepted by any employee of this commission.

2. Taxpayers shall mail ALL REMITTANCES to the STATE TAX COMMISSION, Division of Retail Sales and Use Tax. Checks, money orders and drafts shall be payable to the "TREASURER" of the State of Iowa.

3. All employees authorized to collect money are supplied with official receipt forms. When cash is paid to any employee, the taxpayer should demand an official receipt. Such receipt shall show: The taxpayer's address, permit number, the purpose for which payment is made and the amount of the payment. The taxpayer shall retain all receipts. Any other than official receipts for payment will not be recognized by this division.

4. The original portion of the return blank is the only form which will be accepted as a return. The duplicate should be retained by the taxpayer for his file record. Notify this division immediately when business is discontinued. If the business is sold, notify this division giving the name of the successor.

5. A FINAL RETURN must be submitted within 30 days after terminating business. [Amended August 5, 1958]

6. No remittance should be mailed to the commission unless it is accompanied by a return. The name of the sender and the tax for which the remittance is sent in payment should be stated, together with the permit number and address of the sender. The commission administers many taxes. No tax can be properly credited unless the above information is given.

7. No department of this division is permitted to waive the requirements of the law. Employees are bound by the law and cannot follow personal inclinations.

8. Every return must be signed and dated.

9. Careful preparation of returns will assist both the taxpayer and the commission.

10. IT IS UNLAWFUL TO DO RETAIL BUSINESS, EVEN FOR A SHORT TIME, WITHOUT A RETAIL SALES TAX PERMIT.

1.6 Power and extent of the authority of the commission to make rules. The power and authority of the commission to prescribe and promulgate rules for the sales and use taxes are granted under the express authority of section 422.61 [Code 1966].

2 Retailers required to keep record. The law provides that every taxpayer shall keep and preserve such records as the commission may require to determine the amount of tax for which he is liable.

By virtue of the provisions of the law, the commission requires that each taxpayer shall keep such records as to show:

1. A daily record of all cash and time payments and credit sales.

2. A record of the amount of all merchandise purchased, including all bills of lading, invoices and copies of purchase orders arranged serially as to dates thereof.

3. All deductions and exemptions allowed by law or claimed in filing sales or use tax returns.

4. True and complete inventories of the value of the stock on hand taken at least once each year. This includes inventories of merchandise accepted as part payment of the selling price of new merchandise.

Such records shall be preserved for a period of five years and shall be open for examination at any time by the commission or its duly authorized agents.

If an assessment has been made and an appeal to the commission or to a court is pending, books and records as above specified relating to the period covered by such proposed assessment must be preserved until the final disposition of the appeal.

Failure to keep adequate records and to preserve the same as hereby required, shall be grounds for revocation of the retailer's retail sales tax permit.

Section 422.50

3 Audit of records. The law confers upon the commission the right and the duty to examine or cause to be examined the books, papers, records and memoranda of a taxpayer for the purposes of verifying the correctness of returns filed or to estimate the tax liability of any person. The right to examine records includes the right to examine copies of the taxpayer's state and federal income tax returns. When a taxpayer fails or refuses to produce the records for examination when requested by the commission or its employees, the commission has authority to require, by a subpoena the attendance of the taxpayer and any other witness whom the commission deems necessary or expedient to examine and to compel the taxpayer and witness to produce books, papers, memoranda and documents relating in any manner to retail sales and use tax.

The sales and use tax division now has the legal obligation to inform a taxpayer when an examination of the books and records of any taxpayer has been completed for sales and use tax purposes. This requirement will be carried out in letter form by designated personnel in the Des Moines office rather than through comments on the part of field auditor who transcribed the audit data from the records of the taxpayer. The commission then has a further legal obligation to give the taxpayer notice of the tax and interest penalty due within the maximum period of one year after the taxpayer was informed of the audit conclusion date.

This rule is intended to implement section 422.54(1) of the Code. [Amended November 30, 1964]

Section 422.63 [Code 1966]

3.1 Assessments. All accounts receivable are debited against the taxpayer by means of an assessment. A retail sales tax return or a use tax return filed by a taxpayer constitutes a self-assessment. Where such return is made to the commission not accompanied by payment of the tax due or if the tax paid is insufficient an official assessment shall be made against the taxpayer for the amount shown to be due by the return.

Where a debit against taxpayer shall have been determined by the commission as a result of a field audit or from any information received by the commission from any source other than a return filed by the taxpayer, the commission shall serve notice, by registered mail, on the taxpayer as required by section 422.57 requiring the taxpayer to file a corrected or sufficient return within 20 days after the date of such notice. If such a return is not filed by the taxpayer, the commission shall determine the amount of tax due as provided for in section 422.54 and the division of retail sales and use tax shall issue a formal assessment and file a lien against the delinquent taxpayer as provided by law and rule 13.

If the taxpayer is not satisfied with the determination of the amount of tax due and desires to object to the assessment, he shall, within 30 days after the mailing of the notice of assessment by registered mail, request a hearing before the commission as provided for in rule 5. After such hearing, the commission shall give notice of its redetermination to the person liable for the tax. Such redetermination shall be final unless the taxpayer appeals to the district court as provided for in section 422.55 and rule 6.

Section 422.54

3.2 Collections. When an assessment shall have been made, the commission shall proceed with collection of such assessment. If the taxpayer refuses or neglects to pay the amount found due as evidenced by the assessment, the commission shall proceed to enforce collection by means of distress and sale, proceeding substantially in compliance with section 445.6. For the purpose of enforcing the collection of taxes or penalty or both the words "The Treasurer" shall be construed as "The State Tax Commission" wherever the same may be found in said section.

In the event the commission determines it expedient or advisable, it may by law or in equity, enforce taxes or penalties or both which it has determined to be due. In such action the attorney general shall appear for the commission and shall have the assistance of the county attorney in the county in which the action is pending.

The remedies for the enforcement and collection of retail sales and use tax are cumulative and no action taken by the commission or the attorney general shall be construed to be an election on the part of the state or any of its officers to pursue any remedy to the exclusion of any other remedy provided by law.

Sections 422.26, 445.6, 626.29, 626.30 and 626.31.

3.3 No property exempt from distress and sale. Section 422.56, by reference, makes section 422.26 a part of the retail sales and use tax law and provides that said section shall apply in respect to retail sales and use taxes or penalties determined to be due by the commission. The commission shall proceed to collect tax or penalty or both, after the same shall have become delinquent, BUT NO PROPERTY OF THE TAXPAYER SHALL BE EXEMPT FROM THE PAYMENT OF SAID TAX.

Sections 422.56 and 422.26

4 Information is confidential. All information obtained by auditors, inspectors, officials and employees in the performance of their official duties is strictly confidential. Information so received cannot be disclosed except as provided by law. The only information which an auditor, inspector or employee may give to any person not an employee of this commission, is to inform such persons whether or not a taxpayer has a retail sales tax permit and the number thereof. This exception is due to the fact that the law requires that the permit of the taxpayer shall be conspicuously posted in the taxpayer's place of business at all times.

Any person from whom the taxpayer is seeking credit, or with whom the taxpayer is negotiating a sale of personal property, may request information as to the amount of unpaid retail sales or use tax, or both, due from the taxpayer which would create a lien on the personal property of the taxpayer. Upon being satisfied that a person making the request has a legitimate interest, such information will be furnished by the division.

Sections 422.65 and 422.56 [Code 1966]

5 Hearings. The law makes it the duty of the commission to review any assessment to which the taxpayer objects and to review any matter within its jurisdiction to investigate or determine when requested to do so by a taxpayer or upon its own motion.

Any taxpayer may be heard by the commission upon making application in writing directed to the Chairman, State Tax Commission, Des Moines, Iowa, for the following reasons:

1. When an assessment against a taxpayer has been issued out of any division of the commission and the taxpayer wishes to contest the validity or amount thereof. Applications to be heard on assessments must be made within thirty days after the notice thereof. (See section 422.54.)

2. When an opinion has been rendered or a decision made by a department or employee of the commission adverse to the interest of a taxpayer.

3. When any taxpayer, or any association or organization representing taxpayers, advocates the adoption, modification or rescission of any rule within the power of the commission to make.

4. When any taxpayer has any grievance cognizable by the commission.

Section 422.63 [Code 1966]

6 Appeals. It is a condition precedent to the right to appeal to the district court from the determination or order of the commission: That the taxpayer shall have requested a hearing within the time prescribed by law; that the matter shall have been presented to the commission and that the commission shall have made a determination or order adverse to the taxpayer.

Within 60 days after the taxpayer shall have received legal notice of the determination or order of the commission, he may appeal to the district court of the county in which he resides or in which his permanent place of business is located. An appeal is perfected by written notice thereof to the chairman of the commission served as an original notice. Appeals are triable in equity and all matters presented to the court are determined anew. The burden of proof shall be upon the taxpayer. The taxpayer or the commission may appeal from the decision of the district court to the supreme court of the state without regard to the amount involved. Appeals to the supreme court are taken in the same manner as appeals from equity actions.

Section 422.55

7 Administration of oaths. Each member of the commission and each employee thereof when authorized by the commission is empowered to administer oaths and take affirmations in all matters pertaining to their respective duties, with the exception of claims for refund and employee's expense accounts.

By virtue of the authority granted in section 421.21, the commission has authorized each field auditor, each office auditor, each field inspector, the head of each department and each office employee of this commission to administer oaths and take affirmations in any matter pertaining to the business of the division of retail sales and use tax except in respect to expense accounts and claims for refund.

This means that the above-mentioned employees may administer oaths to persons making affidavits or verifications, authorized or required by any department of the division of retail sales and use tax except as hereinbefore mentioned.

The name and official title of the employee administering an oath must be subscribed to the jurat. See rule 215.

Section 421.21

8 Public officers required to give information. The law provides that all public officers of the state shall give information to the tax commission with reference to any matter pertaining to

taxes. The giving of information to the commission shall include the giving of any necessary information to the commission, officers, supervisors, inspectors and employees where such information is necessary in the performance of the duties pertaining to the administration of the retail sales and use tax laws or of any other revenue law administered by the commission.

Section 421.18

9 Definitions. The following words and phrases when used in these rules shall have the meaning ascribed to them in section 422.42; person, sales, retail sale, sale at retail, business, retailer, gross receipts, relief agency, commission; and the words motor vehicle and trailer shall have the meaning ascribed to them in section 423.1(7) [Code 1966]; and the word trailer when used herein shall mean and include semitrailer as defined in the last mentioned section.

Sections 422.42 and 423.1(7) [Code 1966] [Amended August 5, 1958]

10 Applies to sales tax only. **Nature of retail sales tax.** The retail sales tax consists of four parts which are as follows:

1. A tax of two percent on the gross receipts from all sales of tangible personal property consisting of goods, wares and merchandise sold at retail. [Filed August 10, 1962]

2. A service tax of two percent of the gross receipts from the sale of service or the furnishing of service of gas, electricity, water, heat and communication service which service tax includes the gross receipts from the sales of such service by all municipal corporations furnishing gas, electricity, water, heat or communication service to the public in its proprietary right.

3. A tax on tickets or admissions to places of amusement or athletic events at the rate of two percent of the gross receipts from the sale of such tickets or admissions.

4. An amusement tax effective on and after the first day of July, 1947, which is a tax of two percent upon the gross receipts derived from all forms of commercial amusement devices and commercial amusement enterprises, operated or conducted within the state. The amusement tax covers all receipts from the operation of musical devices, weighing machines, shooting galleries, billiard and pool tables, pin ball machines, coin-operated devices selling merchandise not subject to the general sales tax, and the gross receipts from devices or systems or where prizes are in any manner awarded to patrons and on the gross receipts charged for the participation in any game or amusement; and in addition thereto upon the gross receipts from any amusement operated for profit not specified in section 422.43(2, 3) [Code 1966] and upon the gross receipts upon any other amusement from which no tax is collected for tickets or admissions. Notwithstanding the fact that the state taxes all forms of amusement, the tax is imposed on the gross receipts from the amusement and nothing in the law legalizes any game of skill or chance or coin-operated devices prohibited by law. The tax is on the gross receipts, not on the operation of the devices. [Amended August 5, 1958]

The tax is not imposed upon the articles sold, but is in the nature of a tax on the gross receipts from the total transactions, each of which is called the "sale". The term "sale" includes the exchange of property and any installment, credit, conditional or consignment sale and includes any other kind of a sale or transfer for any consideration. Blanket orders for future delivery, "will-call" orders and offer orders or agreements to sell in the future do not become taxable sales unless and until completed by the transfer of title or possession of the property.

The tax is imposed upon the seller. The seller also has a duty to reimburse himself by adding the tax or the average equivalent thereof to the sale price. The seller is liable for the tax, whether or not he complies with the law and passes said tax on to the consumer.

Returns and payments are made quarterly, the tax is due on the first day of the month following the end of each quarter and is delinquent after the last day of the same month. [Amended August 5, 1958]

Returns shall be mailed to the State Tax Commission, Division of Retail Sales and Use Tax, Des Moines, Iowa, together with a remittance payable to the Treasurer of the State of Iowa.

Forms for reporting the tax are mailed to retailers by the commission. Only the addressographed forms furnished by the commission shall be used in making a return.

IT IS UNLAWFUL TO DO RETAIL BUSINESS, EVEN FOR A SHORT TIME, WITHOUT A RETAIL SALES TAX PERMIT.

Section 422.43 [Code 1966]

10.1 Used or second-hand tangible personal property. The sale of used or second-hand tangible personal property in the form of goods, wares or merchandise is taxable in the same manner as new property. This condition eliminates any consideration for second-hand merchandise to be treated differently for sales tax purposes than new merchandise when sold at retail. [Filed August 10, 1962] [253 Iowa 994]

10.2 Tangible personal property purchased from the U. S. Government. Tangible personal property purchased from the government of the United States or any of the government agencies is exempt from the provisions of the retail sales tax law, but such purchases are taxable to the purchaser under the provisions of the use tax law. Persons making purchases from the United States government unless exempt from the provisions of section 422.44 shall report and pay use tax measured by two percent of the purchase price of such purchases. [Amended August 10, 1962]

Section 422.44

10.3 Tangible personal property used or consumed by the manufacturer thereof. Where a manufacturer uses or consumes tangible personal property which has been manufactured, compounded, fabricated or assembled by the manufacturer, sales or use tax is imposed depending upon the facts. The measure of tax is two percent of the fabrication or production cost. [Filed August 10, 1962]

Section 422.42 (10, 11) [Code 1966]

11 Applies to sales tax only. **Returns—instructions—payment of tax. Time and place for filing.**

Sales tax is due the first day of the month following the close of the quarterly period. Returns are delinquent after the last day of the month immediately following the close of each quarterly period. [Amended August 5, 1958]

The return, together with payment of the full amount of tax due, shall be mailed to the Division of Retail Sales and Use Tax, State Tax Commission, State Office Building, Des Moines 19, Iowa, in the addressed envelope enclosed with the blank return. Always use that envelope.

All checks, drafts or money orders, for payment of the tax shall be made payable to the TREASURER OF THE STATE OF IOWA.

No cash should be sent through the mail. If money or stamps are enclosed such payment is received only at taxpayer's risk.

BASIS OF TAX

The tax is computed on gross receipts from all sales of tangible personal property, the furnishing or service of gas, electricity, water, communication service and the sale of tickets or admission to places of amusement and athletic events, less allowable deductions.

GROSS RECEIPTS means the total amount of the sales, valued in money, whether received in money or otherwise, provided, however, that when sales are made by conditional sales contract, or any other manner of sale which provides that payment of the principal sum shall be extended over a period longer than sixty days from date of sale, for the purpose of computing tax, only such portion of the sale amount that has actually been paid during the quarterly period covered by the return need be included in gross receipts.

RATE OF TAX

The tax shall be computed at the rate of two percent of the gross receipts less allowable deductions.

EXEMPTIONS—See Rules 29, 29.1 and 29.2.

Gross receipts from sales as follows are exempt from tax under the provisions of the law:

Sales in interstate commerce.

Sales made by or to the United States government.

Sales to the state of Iowa, counties, cities, school districts, etc., except for municipal gas, electric or heat plants, see Rule 11.1(*d*). Except, sales made BY the state of Iowa are not exempt. [Amendment filed August 19, 1954]

Sales, furnishing or service of transportation service.

Sales of tickets or admissions to state, county, district and local fairs.

Gross receipts from sales made by (but not sales to) educational, religious or charitable activities, where the entire net proceeds of such sales are expended for educational, religious or charitable purposes.

Sales of tangible personal property upon which the state of Iowa now imposes a special tax. See rule No. 29.2.

Sales of new motor vehicles and new trailers. See part IV of these rules.

Proper records must be maintained to prove all exemptions.

Section 422.51

11.1 Applies to sales tax only. **Sales tax return and the preparation thereof.**

Computation of Tax

Item 1. Total Gross Sales for period. Enter at that item the amount of total gross sales for the period covered by the return. The amount shall include all sales, both charge and cash sales, without deduction for services, sales for resale, returned goods, discounts, traded-in property, etc., provided however, that in the case of installment sales only such amount as has actually been received in cash during the quarterly period need be included in gross sales.

(*a*) Enter at that item: All tangible personal property which has been purchased tax free for resale, and subsequently consumed or used by the taxpayer either in the operation of the business, or for private or individual purposes, compute tax on the basis of cost of such property.

Item 2. Deductions. Enter at that item, under the proper classification, the deductions enumerated and explained in the return. All amounts deducted must have been previously included in ITEM 1 of the return.

(*a*) Sales of Services. Enter at that item sales of services which are not taxable under the law. Labor and services, when properly segregated in accordance with the rules, are not taxable.

(*b*) Sales for purpose of resale or processing. Enter at that item the total for the period of all sales made for the purpose of resale to authorized purchasers or for "processing" purposes as defined in the law and not for consumption or use by the buyer.

This rule is intended to implement section 422.42(3), Code 1962.

(*c*) Sales in Interstate Commerce. Enter at that item all sales made in interstate commerce as defined in these regulations.

(*d*) Sales, for public purposes, to United States government—state of Iowa—counties, cities, public school districts, public libraries, etc. Enter as this item all sales for the period made directly to the United States government, the state of Iowa and to counties, cities, public school districts, public libraries, county and municipal hospitals, etc.,

except that sales to any tax levying body used by or in connection with the operation of any municipally-owned utility engaged in selling gas, electricity or heat to the general public are not exempt from sales tax. This tax exemption also does not apply to construction jobs for instrumentalities of federal, state, county or municipal governments. See Rule 49.

This rule is intended to implement sections 422.42(10) and 422.42(11), Code 1962. [Amendment filed August 19, 1954; November 30, 1964]

Section 422.46

(*e*) Sales of gasoline, diesel fuel and those sales of liquor which are subject to a special tax in excess of the sales tax rate.

This rule is intended to implement section 422.46, Code 1962. (See rule 29.2) [Amended August 5, 1958; August 10, 1962; November 30, 1964]

(*f*) Sales of new motor vehicles and new trailers which are required to be registered in Iowa. Enter at that item all sales of new motor vehicles and new trailers which are required to be registered in Iowa and which are subject to the use tax before registration, payable to the county treasurer. All sales of new motor vehicles and new trailers must be included in ITEM 1 on PAGE 1 of the return.

(*g*) Traded-in tangible personal property. Detailed instructions are covered in our rule 40. [Amended November 30, 1964]

(*h*) Returned goods. Enter at that item the total amount for the period where the full sale price is refunded either in cash or credit to the customer for goods returned. This deduction applies only to transactions where sales tax was previously reported and remitted by the seller.

This rule is intended to implement section 422.42(6), Code 1962. [Amended November 30, 1964]

(*i*) Discounts. Enter at that item the total amount for the period covering discounts allowed by the seller and taken by the customer, with sales tax only collected and due on the net charge. No credit can be allowed for any discounts given on sales not subject to sales tax.

This rule is intended to implement section 422.42(6), Code 1962. [Amended November 30, 1964]

(*j*) Bad Debts Charged Off. Enter at that item (if any) the amount represented by accounts which, during the period, are found to be worthless and are actually charged off as bad debts, provided, however, that such accounts are the result of charges covering taxable sales. [Amended August 5, 1958]

If such accounts charged off are later collected by the retailer, the amount of such recovery must be included in the subsequent gross sales of the return covering period in which recovery is made.

(*k*) Other Allowable Deductions. Use this space for entering the total of all allowable deductions for the period which are not expressly included in the classifications above.

Explain fully. Attach a separate sheet to the return, if necessary.

Item 3. Total Deductions. Enter at that item the total amount of the deductions itemized under ITEM 2 ("*a*" to "*k*" inclusive).

Item 4. Net Sales Upon Which Tax Is to Be Computed. Enter at that item the amount obtained by subtracting the amount entered as ITEM 3 from the amount entered as ITEM 1 (*b*).

Item 5. Amount of Tax. Enter at that item the amount of tax due. This amount shall be two percent of ITEM 4, provided, however, that where ITEM 4 includes two percent tax collected from the consumer, deductions may be made for such tax before computing the amount of tax due.

Section 422.52

11.2 Applies to sales tax only. **Interest Penalty.** Returns are due on the first day of month following close of each quarterly period, with the rate of interest penalty applying in the following manner for the filing of quarterly returns after July 4, 1963:

First month after the quarterly period no interest penalty.

Second month after the quarterly period five percent interest penalty.

Third month after the quarterly period five and one-half percent interest penalty.

Fourth month after the quarterly period six percent interest penalty.

(etc.)

Add one-half of one percent for each additional month or fraction thereof during which the tax is unpaid.

This rule is intended to implement section 422.54 and section 422.58, Code 1962, as amended by chapter 265, section 2, Acts of the 60th General Assembly.

12 Rescinded October 11, 1972.

13 Liens affecting the property of persons from whom either retail sales or use tax or both are due and owing. The law creates a lien in favor of the state of Iowa on all property and rights to property, whether real or personal, belonging to any person, firm or corporation liable to pay a tax or penalty or both imposed by law, who refuses or neglects to pay the same.

Section 422.26

14 A lien attaches to personal property without notice. Section 422.56 is made a part of chapter 423, by reference thereto in section 423.17, said chapter 423 being the codification of the use tax as amended.

Section 422.56

15 Retail sales tax permit required. No person shall engage in the business of selling tangible personal property at retail in Iowa until he shall have procured a retail sales tax permit. The fee for each permit is fifty cents. The fee shall accompany the application.

A sales tax permit shall be procured for each separate business location where retail sales are made. [Amendment filed August 19, 1954]

Doing business without a retail sales tax permit is a misdemeanor punishable by fine or imprisonment.

Co-operative associations, clubs, chambers of commerce, rural electrification associations, lodges, churches and all similar organizations, must procure a retail sales tax permit and remit the tax if regularly engaged in selling, even though they may be nonprofit organizations. (See rule 123.)

Retail sales tax permits are issued on application to the division of retail sales and use tax.

Section 422.53

15.1 Application for permit. An application for a Permanent Retail Sales Tax Permit shall be made upon form ST-2 provided by the commission and shall furnish all information requested on the form.

If the business, for which an application for permit is made, is operated under a trade name, the application shall state the trade name as well as the individual owner's name, in the case of a sole ownership by an individual; or the trade name and the name of all partners, in the case of a partnership.

The application shall be signed by the owner in the case of an individual business; by all parties in the case of a partnership; by a properly authorized officer in the case of a corporation, or association.

The application shall state the date when the applicant began selling tangible personal property at retail in Iowa from the location for which the application for permit is made, as well as other information requested on the application blank.

Section 422.53

15.2 Permits not transferable—sale of business. Retail sales tax permits are not transferable. When a permittee sells his business, he shall have his permit canceled and the purchaser of the business shall make application for a new permit in his own name.

15.3 Permits—consolidated return optional. When a permittee has procured more than one retail sales tax permit, one consolidated retail sales tax return may be made reporting sales made at all locations for which he holds a permit, provided arrangements have been made with the retail sales and use tax division. A taxpayer may make a separate return for each permit held.

Form ST-51, revised, is required in all cases in which the taxpayer makes a consolidated return which includes the sales made at more than one location.

That form must be completely filled out and convey all information required in accordance with the column headings. No report shall be made except upon the regulation form ST-51, revised.

Enter in column 1, for each location, the total amount of gross sales as required in ITEM 1 of the return.

Enter in column 2, for each location, the total amount of net taxable sales after making allowable deductions as required in ITEM 4 of the return.

Enter in column 3, for each location, the amount of tax as required in ITEM 5 of the return.

All working papers used in the preparation of the information required in form ST-51, revised, must be kept available for examination by the commission or its duly authorized agents, as provided by law.

15.4 Retailers operating seasonal business. When a retailer makes sales on a seasonal basis, a regular tax permit is not necessary, but the commission's prescribed identification card, ST-174, must be completed and posted as authority to collect and remit sales tax. [Amended August 10, 1962]

Section 422.53(7)

15.5 Regular permit holders responsible for sales tax collection. Where a regular permit holder sells merchandise by trucks, canvassers, or itinerant salesmen over fixed routes, or selling within the county in which the permanent place of business is located, or a contiguous county and the regular permit holder is liable for reporting and paying retail sales tax, then the seller shall be required to have on his person or in his vehicle, a form ST-157 authorizing such operation. Said form shall be imprinted with the permit number, name and address of the retailer, printed from the addressograph plate of the vendor. This regulation with reference to form ST-157 shall not apply to any permittee operating stands or concessions at fairs or carnivals. In case a permanent permittee operates a stand, concession or booth at a fair or carnival, such permittee shall account for sales tax on a nonpermit basis. [Amendment filed August 19, 1954]

15.6 Reinstatement of canceled permit. When a person who has previously held a retail sales tax permit and has canceled said permit, wishes to re-engage in business in the same county, said person may make application for reinstatement of the permit by applying to the commission on form ST-2. Upon receipt of the fee of fifty cents, a new permit will be issued. Form ST-2 is furnished upon request to the commission or one of its field agents.

If a person who has previously held a permit and has canceled same wishes to reengage in business in a different county, application must be made for a new permit on form ST-2 and a fee of 50 cents remitted with said application. The permits are issued for places and persons.

Where a taxpayer re-enters business in the same county in which he had previously been in business the permit number of the canceled permit shall be reassigned to him.

15.7 Reinstatement of revoked permit. When a sales tax permit has been revoked by the commission and the permittee thereafter makes application for reinstatement thereof for a new permit, the fee shall be one dollar.

A permit which has been revoked will be reinstated only on such terms and conditions as the case warrants. In no event will a revoked permit be reinstated unless and until the taxpayer assures the commission that the cause for which the permit was revoked will not be repeated.

Section 422.53

15.8 Change of location in same county. Where the ownership, tax liability and county have not changed, but where it becomes necessary to replace an active permit by reason of: (*a*) Loss or destruction of said permit, (*b*) change of address by permit holder within the same county or (*c*) change of coding and the like, form ST-33 "Request for Correction or Replacement of Retail Sales Tax Permit" is to be used without additional permit fee. [Amended August 10, 1962]

Section 422.53(4)

15.9 Change of location—not in the same county. When a permittee changes his business location to a different county, then the permit shall be submitted for cancellation with form ST-30 and an application for a new permit made for the new location. A 50-cent fee is required for a new permit.

15.10 Applies to sales tax only. **Tax procedure for itinerant merchants.** Itinerant retailers who do not have a permanent or a fixed place of business in Iowa are required to report and remit sales tax on a nonpermit basis. Some of the merchants who operate in this category are carnivals, circuses, concession stands and associated types of businesses.

For tax collection purposes, all itinerant merchants shall inform the state tax commission of their Iowa itinerary at least ten days in advance of their appearance in Iowa. [Filed August 19, 1954; amended August 5, 1958]

16 Applies to sales tax only. **Retail sales tax permit must be posted.** A retail sales tax permit, WITHOUT WHICH IT IS UNLAWFUL TO ENGAGE IN OR TRANSACT BUSINESS AS A RETAILER, must be conspicuously posted at all times in the taxpayer's place of business in such manner and in such position that it may readily be seen and read by the public. [Amended August 19, 1954]

Section 422.53

16.1 Applies to sales tax only. **Notice to the public.** Every person engaged in carrying on or transacting business of selling at retail within this state, shall post a NOTICE TO THE PUBLIC in the taxpayer's place of business, in such manner and in such position that it may be readily seen and read by the public. The following is the notice.

NOTICE TO PUBLIC

THE RETAIL SALES TAX LAW PROVIDES:

Sec. "422.49. It shall be unlawful for any retailer to advertise or hold out or state to the public or to any consumer, directly or indirectly, that the tax or any part thereof imposed by this division will be assumed or absorbed by the retailer or that it will not be considered as an element in the price to the consumer, or if added, that it or any part thereof will be refunded."

This notice shall be conspicuously posted so that it may readily be seen and read by the purchasing public.

STATE TAX COMMISSION
Division of Retail Sales and Use Tax
Des Moines, Iowa

The notice shall be obtained from the state tax commission for each place of business in this state and must be posted.

17 Tax not to be included in price. Except when provided by this rule, when any retailer shall price mark any article for retail sale and display or advertise the same with such price mark to the public, the price so marked or advertised shall include only the retail sale price of such article.

Example: The advertised or marked price is $1.00. When sale is made the purchaser pays or agrees to pay $1.02, representing the purchase price plus tax, which, when added, becomes a part of the sale price or charge.

This rule does not prohibit advertising or displaying the sales price plus tax as in the following examples:

"This dress $10.00 plus tax," or

"This dress $10.00 plus 20 cents tax."

Section 422.48, Section 422.49

18 Retail bracket system. The retailer is required, insofar as practicable, to add the sales tax, or the average equivalent thereof, to the sale price and to collect the same from the consumer or user. Competing retailers and organizations or associations of retailers are authorized by statute to provide for uniform methods of passing such tax to the consumer with the co-operation of this commission.

In pursuance of the foregoing provisions, the Iowa Retail Dealers' Association, with the approval of this commission, has adopted the following bracket system for the application of the tax:

Sales Tax Schedule

$0.01-$0.14	$0.00	$2.75-$3.24	$0.06
.15- .65	.01	3.25- 3.74	.07
.66- 1.24	.02	3.75- 4.24	.08
1.25- 1.74	.03	4.25- 4.74	.09
1.75- 2.24	.04	4.75- 5.24	.10
2.25- 2.74	.05	5.25- 5.74	.11

In purchases of larger amounts than $5.74, the tax will be computed at straight two percent, one-half cent or more being treated as one cent.

The commission will co-operate with all retailers as far as practicable in applying the sales tax schedule, but in no event shall the same be administered in any manner that will result in the collection of substantially more than two percent of the amount on which tax should be computed.

See rule No. 186.

Section 422.48.

19 Rescinded October 11, 1972.

20 Computation of the tax on admissions. The tax is imposed at the rate of two percent upon the gross receipts from admissions. When the charge for admission includes the federal tax, the amount thereof will be deductible from the gross receipts, provided the taxpayer maintains such records that the amount thereof is determinable.

Admissions to places of amusement may advertise their total admission price, but must use the statement, "Including State Sales Tax." On all sales of less than 50 cents, the fractional plan of collecting the sales tax shall be used, as in the following example:

State Sales Tax	$ .005
Admission	.245
Total	$ .25

When one of several theaters or places of public amusement is under one management, it will be necessary to post in each such place where readily readable by the public, a price card showing as to each price of admission, the fractional amount of admission, the fractional amount of the sales tax, and the total charge for admission. In all sales of 50 cents or more, the retail sales tax bracket may be applied.

When theaters or other places of public amusement operate stores or stands for the sales of tangible personal property, and sell the same at retail, they must collect and remit the tax on the gross receipts from such activities. No refund or credit can be allowed by reason of nonuse of any ticket of admission unless the charge for it is refunded the patron.

When a single ticket or charge covers admission to more than one attraction under the same management or ownership, the tax is computed on the basis of a single charge. [Amended August 10, 1962]

Applies to sales tax only.

For tax on other amusements see rules 111.1 to 111.6.

21 Applies to sales tax only. **Sale of business.** When any retailer sells his business, he shall make a return within the succeeding month thereafter, and pay all sales tax due. Any unpaid sales tax shall be due prior to the transfer of title of any personal property to the grantee and becomes delinquent one month after sale. A lien for taxes due attaches to the property to be sold and the purchaser of the business is personally liable for any sales tax unpaid by the former owner, to the extent of the value of the property purchased. The purchaser is required to withhold sufficient purchase money to cover any sales taxes or penalties due and unpaid, until the former owner produces a release from the sales and use tax division showing that the taxes have been paid in full, or that there are no taxes due.

Each retailer discontinuing business shall maintain his records for a period of five years, unless a release from such provision shall be given by the commission. [Amended August 5, 1958; August 10, 1962]

Section 422.51 (2)

21.1 Bankruptcy, insolvency or assignment for benefit of creditors. Under the provision of law which permits the commission to require returns, other than for quarterly periods, if it deems it necessary or advisable in order to insure the payment of the tax, the commission holds that in cases of bankruptcy, insolvency or assignment for the benefit of creditors by the taxpayer that the tax shall be due and payable immediately and delinquent one month after such taxes become due and payable. [Amended August 10, 1962]

Section 422.51 (2)

22 Retail sales tax return to include total gross sales. The retail sales tax return filed by the taxpayer shall include the entire gross receipts from the sale of tangible personal property or taxable services during the period covered by the return and appropriate deductions taken on the return for the nontaxable or exempted receipts. See rule 11.1.

Section 422.42

22.1 Conditional sales to be included in gross sales. Where sales of tangible personal property are made at retail in Iowa subject to the sales tax under a conditional sales contract, the terms of which stipulate that the payment of the principal sum is extended over a period in excess of 60 days from the date of the sale, the seller may report the tax on that portion of the sales price actually collected and received during the quarterly period covered by the return, provided the seller maintains adequate records. If, however, sales are made on a conditional sales basis as above stated, but the seller assigns, negotiates or sells the finance paper, the seller is deemed to have received full consideration for the sale and will be liable for the remittance of the sales tax on the total sales price at the close of the quarterly period during which the paper has been assigned, negotiated or sold.

On conditional sales agreements where the payments of the principal sum extend longer than sixty days from the date of the sale, the seller may bill the purchaser for the full amount of the sales tax due computed on the entire contract price and remit the tax to this department at the close of the quarterly period during which the sale is made.

In other words, the seller may elect to report and remit on a collection basis, in which case the seller will only bill the purchaser for the tax due on the amount of payments collected, or the seller may bill the full amount of the tax due computed on the total sale on the first down payment, under which circumstances the tax must be remitted by the seller to the commission at the close of the quarterly period when the sale is made.

Section 422.42

22.2 Service and handling charges. Where merchandise is sold at a fixed price and there is added thereto an additional fee or charge called, service or handling charges or any other name by which the same may be called, the commission holds that such fees and charges are part of the selling price of the article and retail sales tax shall be computed on the gross receipts from the sale of such property including service, handling and other like charges.

23 Repossessed goods. When tangible personal property which has been repossessed either by the original seller or by a finance company is resold to final users or consumers, the gross receipts from such sales are subject to the retail sales tax law.

When a retailer sells tangible personal property at retail in Iowa on credit terms and it becomes necessary for the retailer to repossess the tangible personal property sold, the retailer may take a deduction on his retail sales tax return filed for that quarterly period during which the repossession was made in an amount to cover the unpaid balance of the account of the purchaser, provided the retailer has previously included in his net taxable sales to the commission and remitted the sale tax thereon concerning the total receipts from the original sale of the repossessed property.

If the retailer has previously reported in his net taxable sales only the amount of payments actually received on the purchase price of the repossessed property, then no sales tax deduction shall be allowed to the retailer.

Where the retailer has collected sales tax on the full contract price from the purchaser on the first installation concerning a conditional sales contract and has remitted the full amount of tax to this department, the retailer will not be entitled to take a deduction for the goods returned, unless the tax is returned to the purchaser on the unpaid balance before repossession.

24 Certificates of resale or processing. The receipts from the sale of tangible personal property in Iowa for delivery in Iowa for the purpose of "resale" or "processing" by the purchaser are not subject to the sales tax.

The burden of proof is upon the seller to determine at the time of the sale whether the sale is made for the purpose of "resale" or "processing" by the purchaser and therefore exempt from the sales tax, or whether the property is purchased for purposes other than "resale" or "processing" and therefore subject to the tax.

Persons engaged in the business of selling tangible personal property at retail in Iowa are required to hold a retail sales tax permit. Such persons when purchasing tangible personal property for the purpose of resale should furnish to their supplier a certificate of resale indicating that the property is being purchased for resale and showing on their certificate their retail sales tax permit number, in order that their supplier may omit the billing of sales tax.

Persons engaged in selling tangible personal property in Iowa for delivery in Iowa but who are not making "sales at retail" are not required to hold a retail sales tax permit. Such persons when purchasing tangible personal property for resale should furnish to their supplier a certificate of resale stating that the property purchased was being purchased for the purpose of resale and advising that they do not hold a retail sales tax permit for the reason that they are not selling at retail in Iowa.

Persons engaged in educational, religious, or charitable activities, who sell tangible personal property at retail in Iowa in connection with such activities, are exempted from the payment of sales tax on their gross receipts derived from such sales by the provisions of section 422.45, provided the entire net proceeds therefrom are expended for educational, religious, or charitable purposes. Therefore, such persons are entitled to purchase tax free that property which they are to resell in connection with such activities by giving to their suppliers a proper certificate of resale, indicating that they are using the property for the exempted purpose as herein outlined, explaining that they do not hold a sales tax permit for the reason that their receipts from the sale of tangible personal property in connection with such activities are exempted from the sales tax.

Processors or fabricators who purchase tangible personal property which forms an integral or component part of the product which they are manufacturing and which is ultimately sold at retail are entitled to purchase such property tax free on the theory of "processing." Such purchasers should furnish to their suppliers a certificate of processing, stating that the property purchased by them will be used by them so as to form an integral or component part of other tangible personal property intended to be sold ultimately at retail; that they hold retail sales tax permit No. . . . . , in event that they are selling at retail; or that they are not selling at retail in Iowa and therefore are not required to hold a retail sales tax permit.

Suggested forms of certificate of resale or processing, the substance of which should be employed in the certificate taken may be found in this rule.

Where the retailer repeatedly sells the same type of property to the same customer for "resale" or "processing" the seller may, at his risk, take a blanket certificate covering more than one transaction. For use tax certificate, see rule 187.

ST-1 CERTIFICATE OF RESALE
(By retailer)

The undersigned hereby certifies that the tangible personal property purchased from

..... is
Name and Address of Seller

purchased for the purpose of resale by the undersigned; that the undersigned holds retail sales tax permit No.....and will account to the state for any sales tax due as a result of a sale of this property at retail in Iowa by the undersigned.

....
Address of Purchaser Signature of Purchaser

ST-2 CERTIFICATE OF RESALE
(By wholesaler)

The undersigned hereby certifies that the tangible personal property purchased from

..... is
Name and Address of Seller

purchased for the purpose of resale; that the undersigned is solely engaged in selling tangible personal property at wholesale and does not sell to final consumers, and, therefore, does not hold a retail sales tax permit.

....
Address of Purchaser Signature of Purchaser

ST-3 CERTIFICATE OF PROCESSING
(By processor selling at retail)
(Component part material)

The undersigned hereby certifies that the tangible personal property purchased from

ST-7F CERTIFICATE OF EXEMPTION
(Farm or Agricultural exemptions)

To: .....
Name and Address of Retailer

A. This certificate is to be used only when the purchase is exempted from Iowa retail sales tax by the provisions of chapter 212, Acts of the 57th G.A. of Iowa (section 422.42, Code 1958) because it is:

ITEM

(a) fuel consumed in farm tractors or other such vehicles engaged in agricultural production, ... $.....
("fuel" does not include lube-oil or greases)

(b) materials, but not tools or equipment, which are to be used in

(1) disease control (livestock) $.....
(2) disease control (plants) ..... $.....
(3) weed control ..... $.....
(4) insect control ..... $.....
(5) health promotion (livestock) ..... $.....
(6) health promotion (plants) $.....

as a part of agricultural production for market.

B. Total purchase price ..... $.....
C. Less exempted purchases .... $.....
D. Net taxable purchases ..... $.....

The undersigned purchaser hereby certifies, for the purpose of claiming exemption from Iowa retail sales tax, that the amount of purchases listed after above item(s).

.....
shown above are to be used for the purposes and

the amounts stated therein and the name of the product purchased is indicated after the above "reason" for its claimed exemption and are therefore exempted from retail sales tax by Chapter 212, Acts of the 57th G.A. of Iowa [section 422.42, Code 1958] and the Iowa State Tax Commission's rules pertaining thereto.

It is further understood that this certification is subject to verification and investigation by this retailer, as well as, by representatives of the State Tax Commission.

.....
Signature of Purchaser

.....
Date Address of Purchaser

[Amended August 5, 1958]

(See rule 94.1—Sales to farmers)

24.1 Gross receipts expended for educational, religious or charitable purposes. The only time that an organization is exempt from sales tax when serving food or furnishing entertainment, is when the entire net receipts are expended for educational, religious or charitable purposes. When the facts do not indicate that the entire net proceeds are to be expended for any of the above-mentioned purposes then the gross receipts from such activities are taxable.

25 Tangible personal property used in processing—when exempt. Receipts from the sale of tangible personal property to processors and manufacturers which property, by the means of fabrication, compounding, manufacturing or germination, becomes an integral part of other tangible personal property intended to be sold ultimately at retail, are exempt from the retail sales tax.

Section 422.42

25.1 Fuel used in processing—when exempt. Receipts from the sale of tangible personal property, which is to be consumed as fuel in creating power, heat or steam for processing or generating electric current, are exempt from the retail sales tax.

The exemption provided in the case of tangible personal property consumed as fuel in creating heat applies only where such heat is directly applied in the actual processing of tangible personal property intended to be sold ultimately at retail, as distinguished from heat which is used for the purpose of heating buildings, whether such buildings be manufacturing or processing plants, warehouses or offices.

Persons engaged in operating refrigeration or cold storage locker plants to store property belonging to others are rendering a service, the gross receipts from which are not subject to sales tax. Such operators of course are not exempt when purchasing electrical energy for use in creating refrigeration or other purposes in connection with such service.

Laundering, dry cleaning and repairing or renovation of tangible personal property belonging to others are not considered processing within the meaning of this rule, therefore, fuel used to create power, heat or steam for laundries, dry cleaners and persons rendering services on property of other people is not deemed to be used for processing and therefore such fuel is not exempted from the retail sales tax.

Fuel used in processing is exempt to creameries, dairies or ice cream factories only to the extent that such fuel or electricity, as the case may be, is used in the actual fabricating, manufacturing or compounding of the finished product and does not include fuel used for storage after the manufacturing process is completed.

The storage of property in cold storage or refrigeration plant is deemed to be a service and the electricity or fuel used in creating the cold is not exempted from the sales tax.

Fuel consumed in heating greenhouses is not considered as fuel consumed in processing and therefore is not exempted from sales tax. See rule 96.

STATEMENT WITH RESPECT TO GAS CONSUMED AS FUEL FOR PROCESSING

(Make a Separate Statement for Each Location)

....., hereinafter called the consumer, is using gas furnished by the..... at the premises known as ..... and is claiming exemption from payment of the two percent tax imposed under section 422.42 of the Code, 1950, 1954.

The character of business for which such gas is used is .....

In support of this claim the consumer represents and declares that such gas is used for the purpose indicated by the following approximate percentages:

In order to determine the percentage of gas used for nonprocessing, which is subject to the two percent sales tax, an inventory of active connected load in cubic feet per hour must be made by the consumer for processing and for nonprocessing operations.

a. Processing connected load in cubic feet per hour capacity used for the following PROCESSING operations—(Indicate use and number of cubic feet).

..... cubic feet of gas
..... cubic feet of gas
..... cubic feet of gas
..... cubic feet of gas
..... cubic feet of gas
..... cubic feet of gas
Total processing ..... cubic feet of gas

b. Nonprocessing—(Indicate use and number of cubic feet).

Used for heating the building, general hot water service, or miscellaneous uses, not for processing.

..... cubic feet of gas
..... cubic feet of gas
..... cubic feet of gas

Total nonprocessing ..... cubic feet of gas
Grand total connected load ..... cubic feet of gas
Percentage nonprocessing..... %

Webster's New International Dictionary defines Process-ed and Process-ing:

"1. To issue, to take out, process against, or to serve process upon. 2. To subject to some special process or treatment. Specif. A. To heat, as fruit, with steam under pressure, so as to cook or sterilize. B. To subject (esp. raw materials) to a process of manufacture, development, preparation for the market, etc.; to convert into marketable form, as livestock by slaughtering, grain by milling, cotton by spinning, milk by pasteurizing, fruits and vegetables by sorting and repacking; in past part, often distinguished from raw. C. To make usable, marketable, or the like as waste matter or in inferior, defective, decomposed substance or product, by a process, often a chemical process; as to process (rancid) butter, rayon waste, coal (dust), (beet) sugar. D. to produce or copy by photomechanical methods; to develop, fix, wash and dry, or otherwise treat (an exposed film or plate). E. Office practice—to produce (a letter) mechanically."

NOTE: In case gas used for nonprocessing operations is separately metered, notify the company to read these meters and the actual figures will be used at the average rate. Where gas used for nonprocessing operations is separately metered, thereby enabling the gas company to properly apply the exemption without determining percentage of use, the details on this form need not be furnished by the consumer. Instead, write in the statement, "All gas used for processing is separately metered."

These connected loads are subject to verifications and if found incorrect back taxes and penalties will be enforced.

This affidavit is made and delivered to the

.....
Name of Supplier

in support of claim for exemption from the tax as provided in section 422.42, of the Code, on fuel consumed at the above described premises, said company requiring this statement to offer to the State Tax Commission, as evidence that said tax is not applicable to such fuel.

In the event the Tax Commission should find that tax exemption has been erroneously allowed, the undersigned consumer agrees to reimburse the supplier on demand in the amount of such tax, together with any penalties which may have accrued.

25.2 Electricity used in processing—when exempt. Receipts from the sale of electricity to be used in the processing of tangible personal property intended to be sold ultimately at retail, are exempt from the retail sales tax.

The exemption provided in the case of electricity applies only upon the gross receipts from sales of electricity where such energy shall be consumed as power or otherwise directly constituting use or consumption in the actual processing of tangible personal property intended to be sold ultimately at retail, as distinguished from electricity which is consumed for the purpose of lighting, ventilating or heating of manufacturing plants, warehouses or offices. Where practicable, therefore, electricity consumed as power or directly used in actual processing shall be separately metered and separately billed by the supplier thereof to clearly distinguish such energy so consumed from electricity which is consumed for purposes or under conditions where the exemption would not apply. To effectuate the practical administration of the law, where it is impracticable to separately meter electricity which is exempt from that electricity upon which the tax will apply, the purchaser may furnish to his supplier a statement with respect to electrical energy used for processing which will enable the supplier to determine what percentage of electricity in the case of each purchaser is subject to the exemption. The following suggested forms have been submitted to the tax commission by representatives of both suppliers and consumers and its use in arriving at an equitable determination of a basis for exemption is acceptable to the commission. Where such statement is accepted by the supplier as a basis for determining the exemption, any changes in the total active connected load affecting the percentage of exemption would necessitate the filing of a new and revised statement by the purchaser. Where the electric energy is separately metered enabling the supplier to accurately apply the exemption in the case of processing energy, no statement need be filed by the purchaser, since the supplier under such conditions will separately record and compute the consumption of exempt energy apart from that energy which is subject to the tax.

STATEMENT WITH RESPECT TO
ELECTRICAL ENERGY USED FOR PROCESSING

(Make a Separate Statement
for Each Location)

..... hereinafter called the Consumer is using electric energy furnished by the ..... Company at the premises known as ..... and is claiming exemption from the payment of the two percent tax imposed under section 422.42, Code 1950.

In support of this claim the consumer represents and declares, that such energy is used for processing, consumption or resale, as distinguished from lighting and other uses not processing.

The character of business for which such electrical energy is used is .....

That such electric energy is used for the purposes indicated by the following approximate percentages:

In order to determine the percentage of energy used for nonprocessing, which is subject to the two percent sales tax, an inventory of active connected load in watts must be made by the consumer for processing and for nonprocessing operations. One horsepower of electric motor capacity shall be considered 850 watts (efficiency 86.6%).

Active connected load shall be that which is normally operated. Standby emergency equipment eliminated. Active lighting load shall be that which is normally used during dark hours, emergency lighting not exceeding 25% of the total may be eliminated.

(a) Processing connected load in watts used for the following processing operations.

	.....Watts
	.....Watts
	.....Watts
	.....Watts
	.....Watts
Total Processing	.....Watts

(b) Nonprocessing

Lighting, including factory lighting stoker motors, pump motors, ventilating motors, fan motors used for heating and ventilating the building, not for process.	.....Watts
Office equipment	.....Watts
Miscellaneous equipment (including refrig. for drinking water, etc.)	.....Watts
	.....Watts
	.....Watts
Total active connected load nonprocessing	.....Watts
Grand total connected load	.....Watts
Percentage of active connected load nonprocessing	.....Watts

Webster's New International Dictionary defines Process-ed and Process-ing:

"1. To issue, to take out, process against, or to serve process upon. 2. To subject to some special process or treatment. Specif. A. To heat, as fruit, with steam under pressure, so as to cook or sterilize. B. To subject (esp. raw materials) to a process of manufacture, development, preparation for the market, etc.; to convert into marketable form, as livestock by slaughtering, grain by milling, cotton by spinning, milk by pasteurizing, fruits and vegetables by sorting and repacking;—in past part. often distinguished from raw. C. To make usable, marketable, or the like as waste matter or an inferior, defective, decomposed substance or product, by a process, often a chemical process; as to process (rancid) butter, rayon waste, coal (dust), (beet) sugar. D. To produce or copy by photomechanical methods; to develop, fix, wash and dry, or otherwise treat (an exposed film or plate). E. Office practice—to produce (a letter) mechanically."

NOTE: In case energy used for nonprocessing operations is separately metered, notify your power company to read these meters and the actual figures will be used at the average rate. Where energy used for nonprocessing operations is separately metered thereby enabling the power company to properly apply the exemption without determining percentage of use, this form need not be furnished by the consumer.

These connected loads are subject to verification and if found incorrect, back taxes and penalty will be enforced.

This affidavit is made and delivered to the ..... Company in support of claims of exemption for the tax provided in section 422.42, of the Code, on electrical energy consumed at the above described premises and said company requested to offer this statement to the State Tax Commission, as evidence that said tax is not applicable to such electrical energy.

25.3 Steam used in processing—when exempt. Receipts from the sale of steam used in processing of tangible personal property intended to be sold ultimately at retail, are exempt from the retail sales tax.

The exemption provided in the case of steam applies only upon gross receipts from sales of steam where such steam is actually used directly in the processing of tangible personal property intended to be sold ultimately at retail, as distinguished from steam which is consumed for other purposes including the heating of buildings, irrespective of whether such buildings may be factories or processing plants, warehouses or offices. As in the case of electricity, where practicable, steam which is actually consumed directly for processing shall be separately metered to distinguish the steam so consumed from steam which is consumed for purposes other than for processing including the heating of buildings.

25.4 Commercial fertilizer and agricultural limestone. Receipts from the sale of commercial fertilizer or agricultural limestone, are

exempt from the retail sales tax. See ruling of the attorney general of March 28, 1945.

25.5 Patterns and dies. Persons engaged in the business of making and selling patterns and dies to be used by other persons, in the manufacture of tangible personal property, are deemed to sell such patterns and dies at retail, the gross receipts from the sale thereof are, therefore, subject to the retail sales tax, if sold by a vendor in this state and if purchased from a vendor outside this state the purchaser is taxable by the provisions of the use tax law.

When manufacturers purchase, or fabricate from raw materials purchased, dies, patterns, jigs, tooling, and other manufacturing or printing aids for the account of customers who acquire title to the property upon delivery thereof, or upon the completion of the fabrication thereof by the manufacturers, the manufacturers will be regarded as purchasing such property either as agent for, or resale to, their customers. The tax will apply, accordingly, with respect to either the manufacturer as agent of his customer, or with respect to the sale by the manufacturer to the customer.

In determining whether the manufacturer purchases the property on behalf of, or for resale to, his customer, the terms of the contract with the customer, the custom of usage of the trade and any other pertinent factors will be considered. For example, if the customer issues a purchase order for a pattern, die, or other tool, or on the purchase order for the goods itemizes or otherwise specifies the particular pattern, die or tool which will be required by the manufacturer to manufacture the goods desired by the customer, and the manufacturer obtains such item pursuant to the customer's specific order, billing, itemizing, or otherwise identifying it to the customer separately from the billing for the article manufactured therefrom, and either delivers it to the customer or holds it as bailee for the customer, it will be presumed that the manufacturer acquired the property on behalf of the customer or for immediate resale to him.

Manufacturers who manufacture or fabricate patterns, dies, jigs and tooling for their own use are liable for retail sales tax on the fabrication or production costs thereof. [Amended August 10, 1962]

Sections 422.42 (3), 422.42 (11) and 423.1 (1)

25.6 Explosives used in mines, quarries and elsewhere. Persons engaged in the business of selling explosives to miners, quarrymen or other persons are subject to the payment of retail sales tax on the gross receipts from the sale of such property when sold at retail in this state. The purchaser shall be liable for use tax upon all purchases for use in this state not subject to the retail sales tax. [Amended August 10, 1962]

25.7 Electrotypes, type, zinc etchings, halftones, stereotype, color process plates and wood mounts. Electrotypes, type, zinc etchings, halftones, stereotype, color process plates and wood mounts are taxable under the provisions of the retail sales tax law when sold to users or consumers. The above-mentioned articles do not become an integral or component part of merchandise intended to be sold ultimately at retail. The law imposes a retail sales tax on articles used directly in connection with manufacturing or printing, which do not become an integral part of the finished products intended to be sold ultimately at retail. [Amended August 10, 1962]

25.8 Monotype and linotype makers and makers of photo-offset plates. Where a person is engaged in the business of casting monotype or linotype or in making photo-offset plates for others, the casting of types and making of plates is a service, where the title to the type metal and plate is retained by the maker thereof. The gross receipts from such services are not to be included in the gross receipts on which retail sales tax is computed.

Such type and plate maker is liable for use tax on monotype and linotype metal used in the performance of the service hereinbefore referred to, and on the zinc plates from which photo-offset plates are made, where such metal and plates are procured outside the state of Iowa and are liable to pay retail sales tax on said metal and plates when purchased in the state of Iowa.

25.9 Sale of bottled gas: Also sale of bottled gas cylinders and converting equipment. Butane and other like gases are at times sold in cylinders or drums, to persons who do not have access to orthodox gas service, and the gas thus purchased may be used for cooking, heating and other purposes. In some instances gas of this type may be used for propelling tractors or motor vehicle equipment and in such instances converting equipment is necessary in order that fuel in the type of gas may be used.

When gas of this type is sold and a motor vehicle fuel tax is collected thereon by the seller, then no sales tax or use tax is to be collected by the seller at the time of the sale. If motor vehicle fuel tax, imposed by the state of Iowa, is not collected by the seller at the time of the sale, then Iowa sales tax or Iowa use tax must be collected and remitted to the state tax commission, unless the transaction is otherwise specifically exempted from the sales tax or use tax laws.

If sales tax or use tax is not collected by the seller and paid to the state at the time of the sale, then any sales or use tax due will be collected by the treasurer of the state of Iowa at the time the user of the product makes application for a refund of the motor vehicle fuel tax.

The cylinders or drums which are loaned by the distributor or dealer of the gas and the title to which remains in the dealer would be subject to sales or use tax as the case may be. Likewise, gas converter equipment which might be sold to an ultimate consumer would be subject to a sales or use tax, as the case might be. Concerning purchas-

es of cylinders or pressure tanks see commission's orders of January 23, 1950 and December 5, 1950.

(For leased equipment see rules 126 and 126.1)

26 Processing activities. The following enumerated activities by a processor are regarded as "processing activities," and therefore, receipts from sales of electricity or steam used directly to perform such activities by a processor are not subject to sales tax. Likewise, receipts from sales of coal, fuel oil, gas, or other tangible personal property, to be consumed as fuel by processors for performing such activities, are not subject to sales tax.

1. Manufacturing of tangible personal property of all kinds intended to be sold ultimately at retail, except that heating and lighting of the plant and office are not regarded as processing.
2. Pasteurizing of milk for sale.
3. Cooking of food for sale and keeping same warm until served, except that refrigeration, ventilation, and air conditioning are not regarded as processing.
4. Welding, shaping, and otherwise fabricating iron and steel products for sale, except that cutting or junking scrap iron is not regarded as processing.
5. Washing, grading, and crushing of rock and gravel for sale.
6. Hatching or incubation of chicks, except that the operation of brooders is not regarded as processing.
7. The purification of water for sale, except that the pumping of water is not regarded as processing.
8. Grinding feed and hulling oats for sale, drying, sorting and grading grain for sale and elevating it within elevators for such drying, sorting and grading, except that elevating grain into railroad cars or trucks is not regarded as processing.

The above list is not all-inclusive, but is intended only as a guide in the determination of activities that are considered "processing" activities as compared with activities not so considered. [Amended August 10, 1962]

26.1 Chemical compounds used to treat water. Chemical compounds, placed in the water, to be sold at retail, are used in processing. Therefore, the receipts from the sale of such chemical compounds for that purpose are exempt from sales tax. Likewise, persons purchasing chemicals for such purposes from out-of-state are exempt from use tax.

Chemical compounds used to treat water which is not to be sold at retail are used in processing and are not exempt from either sales or use tax.

EXAMPLE: Boiler compounds used to treat water used in boilers, which water is not to be sold at retail, are subject to sales tax or use tax. Similarly, chlorine or other chemicals used to treat water for a swimming pool are not used in processing and are taxable.

On the other hand, special boiler compound used by brewers where live steam is injected into the mash, which steam liquefies and becomes an integral part of the beverage intended to be sold at retail, does become a part of the finished product, is exempt from either sales or use tax, as the case may be.

27 Applies to sales tax only. **Date of sale.** A sale takes place when the ownership of, or title to, tangible property passes to the purchaser, except in transactions whereby the possession of the property is transferred but the seller retains the title as security for payment of the selling price, in which case the sale is deemed to take place at the time the possession of the goods is transferred to the buyer.

Where there is a contract to sell unascertained goods, title does not pass until the goods are ascertained. Where the contract is to sell specific or ascertained goods, title passes to the buyer at such time as the parties to the contract intend it to be transferred, regard being had for terms of the contract and conduct of the parties, usages and customs of trade and the circumstances of the case.

In cases where the intention of the parties is not indicated, the following general rules may serve as a guide in determining when title transfers:

(1) Where there is an unconditional contract to sell specific goods in a deliverable state, title to the goods passes to the buyer when the contract is made, and it is immaterial that the time of payment or the time of delivery or both are postponed.

(2) Where there is a contract to sell specific goods, and the seller is bound to do something to the goods for the purpose of putting them into a deliverable state, title does not pass until such things be done to the goods.

(3) If the contract to sell requires the seller to deliver the goods to the place of business of the buyer, or to some other designated place, or calls for payment by the seller of transportation charges to one place or another, the title does not pass until the goods have been delivered to the buyer, or have reached the place agreed upon.

All relevant facts in each case must be examined in view of these principles to determine when title to property transfers.

28 Sales to the American Red Cross and U.S.O. The receipts from the sale of tangible personal property to the American Red Cross, the Navy Relief Society and U.S.O. are exempted from the Iowa retail sales tax.

Purchases made by the Red Cross or the Navy Relief Society or U.S.O. in interstate commerce for use in Iowa are exempted from the use tax.

29 Applies to sales tax only. **Exemptions from retail sales tax.** There are three methods by which the gross receipts from the sale of tangible personal property are not chargeable with sales tax. They are:

1. By specific exemptions, Code section 422.45.
2. Exclusion by definition, Code section 422.42.
3. Credit on tax, Code section 422.46.

This rule deals with the specific exemptions only. Exclusion by definition will be dealt with in rule 29.1 and credit on tax in rule 29.2.

The following are specifically exempted:

1. The gross receipts from sales of tangible personal property which the state is prohibited from taxing under the constitution or laws of the U. S. or under the constitution of this state. This exemption applies to retail sales to the state of Iowa and the U. S. government and its duly authorized agencies. The matter of the taxation of state and federal government is fully discussed in rules 47, 48, 50 and 50.1. Sales to counties, cities, towns and school districts are exempt. Rule 49. [Amended August 5, 1958]

Interstate sales are exempt from the retail sales tax when actual delivery of the tangible personal property sold is made outside the state or the property sold is shipped to a point outside the state of Iowa. For further regulation as to sales in interstate commerce see rule 55.

2. The gross receipts from the sales, furnishing or service of transportation service. This exemption applies to transportation service only and is not an exemption for freight and delivery charges when those charges become a part of the cost of the goods sold. The regulations as to this exemption may be found in rules 41 and 108.

3. The gross receipts from sales of tickets or admissions to state, county, district and local fairs, and the gross receipts from educational, religious or charitable activities, where the entire net proceeds therefrom are expended for educational, religious or charitable purposes. This exempts tickets for admission to state, county, district and local fairs. The exemption does not apply to concessionaires or any activities which are not directly and entirely controlled by the several fairs. The fact that fairs enter into contracts with concessionaires on a percentage basis for the privilege of exhibitions or entertainment does not exempt the concession from payment of tax on its gross receipts. On the other hand, sales of tickets for grandstand seats, horse shows and other activities operated entirely by the fair association, are exempt from retail sales tax. The other portion of this exemption relating to the gross receipts from educational, religious, or charitable activities is limited to those functions which clearly come within the term, educational, religious and charitable activities and does not include the operating places of business separate and apart from the main purpose of said activities. In order to take advantage of this exemption, the proceeds from such activities must be earmarked so as to show that the entire net proceeds are in fact expended or are to be expended for the purposes herein set forth. Rule 128.

4. That part of the gross receipts from sales of tangible personal property accepted as part consideration in the sale in Iowa of other property which is not in excess of the original trade-in valuation, provided the seller keeps an accurate record of the identity of such tangible personal property so as to show the name and address of the persons from whom acquired and to whom sold, and the exact trade-in and sale price.

The application of this exemption is fully discussed in rule 40. However, the keeping of accurate and detailed records as provided by law and rule 2 is a condition precedent to this exemption.

5. Senate File 54, passed by the 51st General Assembly and approved by the governor, became effective by publication April 12, 1945.

Section one (1) of the Act exempts purchases from the United States government from the provisions of the retail sales tax law. However, section two (2) of the Act provides that tangible personal property purchased from the government of the United States or any of its agencies is subject to the use tax law. [Amended August 5, 1958]

Section 422.45

29.1 Applies to sales tax only. **Exclusion by definition.** It is a primary rule of statutory construction that the legislature is its own lexicographer. That is, when the legislature by law defines anything, that thing, in the eyes of the law, is as the legislature describes it regardless of the facts. In the statutory definition of "retail sale" or "sale at retail," certain things are defined as not being sales at retail which in the normal use of the language would be such sales. Exclusions by definition are:

a. Commercial fertilizer and agricultural limestone, see rule 25.4.

b. Another exclusion is electricity or steam when purchased and used in the processing of tangible personal property intended to be sold ultimately at retail. This exclusion is fully discussed in rules Nos. 25.2 and 25.3.

c. Tangible personal property used in processing.

This exemption applies only to property which enters into and becomes a part of some other article of tangible personal property intended to be sold at retail. That is, for any article to be excluded from the tax, that property must become an ingredient or component part of some other property to be sold at retail and it is exempt only when it becomes a part of other tangible personal property by means of fabrication, compounding, manufacturing or germination. This exemption is explained in rule 25.

d. Tangible personal property which is to be consumed as fuel in creating heat, power or steam for processing or for generating electrical current. Further discussed in rule No. 25.1. [Amended August 5, 1958]

Section 422.42

29.2 Applies to sales tax only. **Credit on retail sales tax.** When a special state tax is imposed on the sale of alcoholic liquor, gasoline, and diesel fuel at retail in Iowa, the rate of the special tax provides the statutory basis for the exclusion of sales tax on alcoholic liquor, diesel fuel and gasoline sales.

This rule is intended to implement section 422.46, Code of Iowa, 1962, and chapter 114, sec-

tion 31, Acts of the 60th General Assembly. [Amended August 5, 1958; August 10, 1962; November 30, 1964]
Section 422.46

30 Casual sales. Effective March 21, 1963, "Casual sales" have been legislatively defined and exempted from sales tax. This excludes any individual, partnership, corporation or association which is a retailer under the sales tax law from collecting or reporting sales tax on the sale of tangible personal property where such sales are on a nonrecurring basis and are for other than profit purposes.

This rule is intended to implement chapter 263, sections 1 and 2, Acts of the 60th General Assembly. [Amended August 5, 1958; Rescinded August 10, 1962; Amended November 30, 1964] [See 253 Iowa 994]

31 Applies to sales tax only. **Bad debts.** Bad debts are allowable as a credit on retail sales tax when all the following facts have been shown:

1. That retail sales tax has been previously paid on the gross receipts from the accounts on which taxpayer claims credit for tax;
2. That the accounts have been found to be worthless;
3. That the taxpayer has records to show that the accounts have actually been charged off on his books for income tax purposes.

Credit for bad debts is not allowable on merchandise which was exempt from retail sales tax when sold.

Credit for bad debts is allowable on retail sales tax only at the time such accounts are charged off for income tax purposes.

Where credit on tax has been taken on account of bad debts and the debts are subsequently paid, the proceeds from the collection of such accounts must be included in the gross receipts for the quarterly period in which payment is made.
Section 422.46

31.1 Recovery of bad debts by collection agency or attorney. Where bad debts have been charged off and later recovered in whole or in part through the services of a collection agency or an attorney, the full amount of the debt recovered should be included with the gross sales in the quarter in which collection is made. The services of an agency or an attorney are services purchased by a retailer and nothing more.

The amount collected by an agency or attorney is made in behalf of the retailer so that the actual recovery made by the retailer is 100 percent of the amount paid to the collection agency or attorney. The amount retained by the collector is merely a payment for services rendered.

32 Discounts—when deductible. A discount is an abatement from the face of an account, with the remainder, the actual purchase price of the goods charged in the account. The purchaser entitled to the discount never owes the face of the bill as his debt, his debt being the net of the bill after the agreed discount has been deducted. The word "discount" therefore simply means to buy at a reduction.

Any discounts allowed by retailers and taken on taxable retail sales are proper deductions in collecting and reporting sales tax. This is not the case where a retailer offers a discount to a purchaser but bills and collects sales tax on the gross charge rather than the net charge. The customer must receive the benefit of the discount in order for the retailer to exclude it from his gross receipts.

Certain retailers (e.g.—gas and electric companies) bill their customers on a gross and net basis, with the difference considered to be a discount for payment purposes. Where a customer does not resolve the bill within the net payment period, sales tax applies on the gross charge shown on the billing.

If an over-allowance is granted by a retailer for merchandise received as consideration on a retail sale, it is not deemed to be a discount for sales tax purposes. All discounts allowed on transactions other than retail sales are not proper deductions for sales tax purposes.

This rule is intended to implement section 422.42(6), Code 1962. [Amended August 10, 1962; November 30, 1964]

32.1 Trading stamps not a discount. The Iowa Supreme Court held in the Benner Tea Company vs. Tax Commission* case that the issuance of trading stamps by a retailer was not considered to be a discount for calculating and reporting sales tax. [Filed August 10, 1962]

33 Applies to sales tax only. **Defective merchandise.** If merchandise is sold to a customer who finds a defect in the goods and secures an allowance on the purchase price, the seller may deduct from gross receipts the amount allowed for defects.

No allowance shall be made for the credit on any merchandise which is exempt from the retail sales or use tax. No allowance shall be made for goods sold for resale and returned. No allowance shall be made for return of defective merchandise where the amount of the sale has not been reported in the taxpayer's gross sales and sales tax computed thereon.

33.1 Applies to sales tax only. **Returned merchandise.** When merchandise which has been sold by a taxpayer is returned by the customer who secures an allowance or a return of the purchase price, the seller may deduct the amount allowed as credit or refund provided that the merchandise is taxable merchandise and that the tax thereon has been either charged or paid.

No allowance shall be made for the return of any merchandise which is exempt from the retail sales or use tax. No allowance shall be made for goods sold for resale and returned. No allowance

*252 Iowa 843

shall be made for return of merchandise where the amount of the sale has not been reported in the taxpayer's gross sales or sales tax previously paid thereon.

Section 422.42

34 Applies to sales tax only. **Goods damaged in transit.** If the title of goods shipped by a retailer has passed to the consumer and thereafter the goods are damaged in the course of transit to the consumer, the retailer will be liable for the tax upon the full selling price of the goods as the sale will have been completed. If the title to the goods did not pass to the consumer, the sale to the consumer is not completed and there will be no tax on the retailer for the amount agreed to be paid by the consumer.

If the goods are destroyed, the tax will not apply to the damages paid the retailer for their destruction. If the goods are not destroyed and if upon the payment of damages the carrier acquires title to the goods in their damaged condition, the tax will apply to that portion of the damages paid which represents the fair retail value of the goods in their damaged condition at the time the carrier obtained title thereto unless they are purchased by the carrier for the purpose of resale.

Amounts paid as damages to owners who are not in business are not subject to the tax.

35 Applies to sales tax only. **Consignment sales.** Where retailers receive articles of tangible personal property on consignment from others and the consigned merchandise is sold in the ordinary course of business along with other merchandise owned by the retailer, such retailers or consignees are held to be making sales at retail. In such cases, the returns shall be filed and the tax remitted to the state by the consignees, along with their remittances and returns of gross receipts from the sale of other merchandise.

Where a person operates for the purpose of selling property for others, such person is deemed to be a retailer and shall procure a retail sales tax permit and be liable for the retail sales tax, the same as if the property sold had belonged to him. [Amended November 30, 1964]

This rule is intended to implement section 422.42(5), Code 1962.

36 Applies to sales tax only. **Leased departments.** Where a person who holds a retail sales tax permit and is engaged in the sale of tangible personal property at retail in Iowa leases a part or parts of the premises where his retail business is conducted to other persons who are independently engaged on the leased premises in selling tangible personal property at retail in Iowa, the receipts from which are subject to the retail sales tax, the lessor shall immediately notify the commission as to the name and home office address of the lessee, the type of merchandise the lessee is engaged in selling, and the date when the lessee began making such sales at retail in Iowa on said leased premises.

The lessor shall furnish such information on Form ST-200 which will be provided by the commission upon request and indicate on such form whether the lessee has secured a retail sales tax permit and will account directly to the commission for the sales tax due, or whether the lessor will incorporate in his sales tax return the receipts from the sales at retail of the lessee subject to the law.

If the lessor fails to notify the commission that a department has been leased and to furnish information as to the lessee's address, starting date, and type of business, the lessor shall be held responsible for the sales tax due as a result of the sales at retail made by the lessee subject to the sales tax law, unless the lessee shall have properly remitted the tax due.

The lessor who has leased a department or departments shall show on the reverse side of his, the lessor's retail sales tax return ST-50, the names and addresses of all lessees operating a leased department and after the name of each lessee shall show the amount of net taxable sales made by said lessee and which net taxable sales are included in the lessor's return, in the instance where the lessor is accounting for the lessee's sales; or the sales tax permit number of the lessee, where the lessee is reporting his tax directly to the commission.

The lessor shall notify the commission immediately when the lessee has terminated his selling activities.

Hereinafter set out is Form ST-200, a copy of which will be furnished by the commission upon request for the lessor's use in reporting the leased departments. A separate report should be made for each lessee.

Form ST-200

LESSOR'S NOTICE OF LEASING DEPARTMENT
TO THE: IOWA STATE TAX COMMISSION
RETAIL SALES TAX DEPARTMENT

. . . . . .
(Name and Business Address of Lessor)

hereby notifies you that it is operating a place of business at the above address and is there engaged in selling tangible personal property at retail in Iowa, for which it holds retail sales tax permit No. . . . . .

That on the . . . . . day of. . . . . , 19 . . . . . , it leased a space or a department in said place of business to the lessee hereinafter described, for the lessee's use in selling tangible personal property at retail in Iowa.

. . . . . .
(Name of Lessee)

. . . . . .
(Address of Lessee's Principal Place of Business—Street—City—State)

. . . . . .
(Type of Tangible Personal Property which Lessee is selling at Retail)

. . . . . .
(Date Lessee began Selling at Retail from Leased Premises, day, month, year)

Will lessor report and remit to the Retail Sales Tax Department under its (the lessor's) permit No. . . . . the retail sales tax on

sales at retail made by lessee from the above leased location?.....
(Answer "Yes" or "No")

Will lessee report and remit directly to the Sales Tax Department the retail sales tax on sales made at retail by the lessee from the above leased location?.....
(Answer "Yes" or "No")

Does the lessee now hold a retail sales tax permit for the above leased location? .....
(Answer "Yes" or "No")

If the answer is "Yes" what is the number of the permit so held?.....

.....
(Name of Lessor)

By .....
(Date)

NOTE: The sales tax permit number appears above the taxpayer's name on the sales tax permit.

37 Federal excise taxes. After the passage of the Revenue Act of 1941, the commission ruled that federal manufacturers' excise tax imposed by that Act may not be deducted from the selling price of tangible personal property as a base for computing the Iowa retail sales tax or use tax, except sales made directly to the user or consumer by the manufacturer.

The commission further held that the retailers' excise tax is not imposed until the sale is actually made. Therefore, the retailers' excise tax is not part of the selling price of the tangible personal property and is not included in the base on which the retail sales or use tax is computed.

In all cases where the retailers' excise tax is billed or charged as a separate item, or in any event, where it has been definitely shown by the retailers that the retailers' federal excise tax was included in the price for which the article was sold, deductions from gross sales can be made in an amount equal to the tax paid by the retailer to the federal government.

Federal manufacturers' excise taxes are to be included in the gross sales on which tax is computed, unless, the manufacturer acts as retailer and sells directly to the consumer, in which case, the tax may be deducted in computing gross sales. The manufacturer's federal excise tax is considered as part of the wholesale price and is not to be deducted by the retailer when making a sale at retail.

37.1 Federal manufacturers' excise taxes. This commission has consistently held that federal manufacturers' excise taxes levied by prior revenue acts constituted a part of the purchase price of articles subject to the tax when sold to retailers and was, therefore, a part of the tax base for the purpose of computing Iowa sales tax. This rule has not been changed.

EXAMPLE 1. Sale by Manufacturer Direct to Consumer:

The "X" Adding Machine Company, an Iowa manufacturer, sold to "Y," an Iowa consumer, an adding machine which it had manufactured. The "X" Adding Machine Company invoiced the adding machine to "Y" as follows:

X Adding Machine	$150.00
Federal Tax	15.00
	$165.00

The Iowa sales tax is $3.00, 2% of $150.00.

EXAMPLE 2: Sale by Retailer:

The "A" Vacuum Cleaner Company sold for resale an electric vacuum sweeper which it had manufactured to the "B" Electric Appliance Company, an Iowa company, and the invoice read as follows:

Model 1040 Sweeper	$40.00
Federal Tax	4.00
	$44.00

The "B" Electric Appliance Company sold the vacuum sweeper to "C," an Iowa consumer, and invoiced it as follows:

Model 1040 Sweeper	$64.00

The Iowa sales tax is $1.28, 2% of $64.00 and this would be so, had the invoice read:

Model 1040 Sweeper	$60.00
Federal Tax	4.00
	$64.00

37.2 Federal retailers excise taxes. The federal government imposes on jewelry, furs, toilet preparations and luggage sold at retail, a tax equivalent to ten percent of the price for which it is sold.

The tax commission holds that the retailers excise tax is imposed on the purchaser and does not subject it to the Iowa sales tax. This type of federal tax is different in application than the manufacturers excise tax and it likewise affects the Iowa sales tax. [Amended August 10, 1962]

37.3 Federal admission tax. Certain admission charges previously exempted from federal admission taxes are denied exemption by the Revenue Act of 1941. Such exemption has previously applied to charges for admission when all the proceeds from all such charges inured to the benefit of charitable, religious or educational organizations or to agricultural fairs. Although the amendment to the federal admission tax law provides for the collection of the federal admission tax on all amounts *charged for admissions*, unless specifically exempted, the method of computing the Iowa admissions tax as outlined in rule 20, is unaltered, except that the federal excise tax shall not be considered a part of the admission on which the Iowa sales tax is computed. [Amended August 5, 1958]

37.4 Federal excise tax on electric light bulbs. The federal tax on electric light bulbs is a manufacturers tax and not a retailers tax, therefore, the retail sales tax must be computed on the full selling price of the electric light bulbs including the so-called excise tax added to the selling price by the retailer. [Amended August 10, 1962]

37.5 Federal excise tax on auto parts. The federal excise tax on automobile parts is a manufacturers' tax, therefore, the tax must be computed on the full selling price including the so-called tax, for the same reason as set forth in rule 37.4.

37.6 Federal tonnage tax. The federal tonnage tax, being a tax similar to the federal retailer's excise tax, does not become a part of the selling price of tangible personal property sold at retail and is, therefore, excluded from the gross receipts on which retail sales tax is computed. This rule applies only to tax on delivery after a retail sale shall have been made. Tax on transportation prior to a retail sale becomes part of the cost of the goods and is not exempt from the gross receipts upon which retail sales tax is computed.

38 Sale of Motor Vehicles—New and Used—By Dealers. Section 423.8 exempts from the retail sales law, receipts derived from the sale at retail in Iowa of new motor vehicles and new trailers which are required to be registered under the motor vehicle laws of Iowa. However, motor vehicle or trailer dealers, selling at retail in Iowa are required to hold a retail sales tax permit and upon filing their quarterly sales tax returns shall show the amount of their gross recepts derived from the sale of such new motor vehicles or new trailers and shall take appropriate deductions, in the space provided on the return Form ST-50, for such items.

Persons engaged in the business of selling at retail in Iowa used motor vehicles or used trailers are not exempted from retail sales tax, but are liable for the payment of sales tax on such gross receipts, subject to the provisions of the "Trade-in" rule 40, and the provisions of the sales tax law.

However, the purchaser of a new motor vehicle or new trailer is subject to the payment of use tax when such item is registered in Iowa under the Iowa motor vehicle law, and the county treasurer or the motor vehicle registration division, department of public safety, whichever issues the registration, shall collect the use tax and furnish a receipt therefor as provided for by section 423.7 and Rule 199.

"New motor vehicle" shall mean any motor vehicle of a type subject to registration under the laws of this state which has not been previously registered in this or any other state.

"Used motor vehicle" shall mean any other motor vehicle than a "new motor vehicle". [Filed August 5, 1958]

Sections 423.1(7), 427.7 and 423.8

39 Dealers selling new trailers, including house, farm and other trailers. Section 423.8, Code of Iowa, provides that motor vehicle and trailer dealers are exempted from sales tax with respect to their receipts from retail sales of new motor vehicles or new trailers, as these terms are defined in the motor vehicle law of Iowa, which are required to be registered under such motor vehicle law.

The Iowa motor vehicle law, was amended, effective July 4, 1961, by chapter 108, Acts 59G.A., to provide that all "House Trailers" and "Mobile Homes" be registered under section 321.123, whether or not for highway use.

This means that Iowa dealers receipts from sales at retail of new house trailers and new mobile homes made on and after July 4, 1961, are exempted from sales tax. Such dealers should report such receipts on their quarterly sales tax returns to the state tax commission and take appropriate deductions under 2 (F) of the return.

The county treasurer or state motor vehicle registration division shall, before issuing a registration for a new house trailer or new mobile home sold on or after July 4, 1961, collect the use tax due and give a proper receipt therefor and report and remit same in its monthly report to the commission.

With respect to each "Mobile Home" and each "House Trailer" for which application for registration is made, which has not been previously registered in Iowa under the motor vehicle law, as well as such units which may have been registered in another state, but have been purchased by non-Iowa consumers, the office issuing the registration shall collect any use tax due, or secure an affidavit form UT-503 and state thereon the reason why use tax is not due, if this be the case, even though the applicant may have acquired the unit before July 4, 1961.

A consumer before July 4, 1961, buying a house trailer or mobile home either new or used, from an Iowa dealer, where the use tax was not paid nor the sales tax paid the dealer would be a situation where tax would appear due, and section 321.30(6) of the motor vehicle law provides registration shall be refused if the required sales tax was not paid to the dealer, as well as section 423.7 of the use tax law providing use tax due shall be paid before registration. If there is a proper basis for exemption, the complete facts should be given on affidavit form UT-503, the reverse side to be used if space is needed.

The office issuing the registration need not review, for sales or use tax purposes, an application for registration of a mobile home or house trailer purchased by the applicant longer than five years before the date of the application for registration. [Amended August 10, 1962]

Section 321.123

Sections 423.7 and 423.1 (7)

40 Rescinded October 11, 1972

41 Freight, delivery and other transportation charges. When tangible personal property is sold at retail in Iowa and under the terms of the sales agreement the seller is to deliver the property to the buyer at a certain point and does so deliver it, the charge made by the seller for delivering the property shall be considered a part

of the gross receipts of the seller from the sale and subject to the sales tax, even though the charge is separated, in the seller's billing to the consumer, or even though the purchaser pays the carrier and deducts the charge from the billing.

When tangible personal property is sold at retail in Iowa and the seller under the terms of the sales agreement has no responsibility to deliver the property sold to the buyer, but does so deliver it, any charges for freight or transportation separately stated in the billing to the consumer and in the seller's records are not a part of the gross receipts from the sale and are not subject to the sales tax.

In other words, freight or transportation charges which occur before the sale is completed are the expense of the seller and are a part of the tax base on which the tax is computed whether or not they are separately shown, whereas, freight or transportation charges which occur after the sale is completed is the expense of the buyer, and if separated on the seller's records and billing to his customer are not a part of the tax base on which the tax is computed. [Amended August 10, 1962]

Sections 422.42 (6), 422.42 (2) and 422.45 (2)

42 Installation charge where tangible personal property is sold at retail. In general the gross receipts derived from the furnishing of services rendered apart from the sale of tangible personal property are not subject to the retail sales tax.

Where the sale of tangible personal property involves a charge for the installation of the property sold, in instances where the property remains personal after installation, the sales tax shall be measured by two percent of the entire receipts from the sale, including the installation, unless the installation charge is set out separately and apart to the purchaser from the charge made for the personal property installed.

The value of labor or services used in connection with the fabrication of tangible personal property is never to be excluded from the receipts on which the tax is computed, where the tangible personal property fabricated is sold at retail.

43 Wholesalers and jobbers selling at retail. Sales made by a wholesaler or jobber to a purchaser for use or consumption by himself or in his business, and not for resale, are subject to the sales tax even though made at wholesale prices or in wholesale quantities. Such wholesalers or jobbers must keep accurate records of sales and pay the retail sales tax on sales for use or consumption.

Sales made to employees or through employees to consumers are subject to the sales tax. [Amendment filed August 19, 1954]

Where wholesalers principal business is selling tangible personal property for resale purposes, a request to the tax commission should be made to only include the retail or taxable sales on the quarterly return. When this request is honored, it will not be necessary for the wholesaler to report all retail sales in the gross sales and then deduct them intact. [Amended August 10, 1962]

Section 422.51

44 Materials and supplies sold to retail stores. Receipts from the sales of materials and supplies to retail stores for their use and not for resale are subject to the sales tax. The retail store is the final buyer and ultimate consumer of such items as fuel, cash registers, adding machines, typewriters, stationery, display fixtures and numerous other commodities which are not sold by the store to its customers.

45 Applies to sales tax only. **Trustees, receivers, executors and administrators.** Where trustees, receivers, executors or administrators, by virtue of their appointment, continue to operate, manage or control a business involving the selling of tangible property or engage in liquidating the assets of a business by means of sales made in the usual course of trade, they must hold retail sales tax permits and collect and remit the sales tax. Such officers are liable to collect and pay either sales or use tax notwithstanding the fact that they may have been appointed by a state or federal court.

A retail sales tax permit of a ward, decedent, cestui que trust, bankrupt, assignor or a debtor for whom a receiver has been appointed which is valid at the time fiduciary relation is created shall continue to be a valid permit for the fiduciary to continue the business for a reasonable time or for closing out the business for the purpose of settling an estate or terminating or liquidating a trust.

46 Applies to sales tax only. **Mortgagees and trustees.** The receipts from a sale of tangible personal property at public auction pursuant to the provisions of a chattel mortgage are not taxable if (1) the sale is made by virtue of a court decree of foreclosure by an officer appointed by the court for that purpose or (2) if the property is bid in by the mortgagee.

The tax applies to receipts from other foreclosure sales where goods and chattels are sold at retail.

47 Sales by or to the United States government. Sales of tangible personal property made directly by or to the United States government or to recognized agencies or departments of the United States government are not subject to the sales tax. Sales to a United States post office, a veterans hospital, or to any other recognized agency, instrumentality or department under federal control are not subject to the tax. [Amended August 10, 1962]

Sales of food stuffs and meals by a cafeteria or a restaurant operated by a United States post office, whether made to federal employees or to others, are not subject to the tax.

Sales at retail made directly to patients, inmates or employees of an institution or department of the United States government are taxable sales since

not made directly to the government. However, sales similarly made by post exchanges and other establishments organized and controlled by federal authority are not subject to the tax.

AGENCIES AND ACTIVITIES IN FEDERAL AREAS WHICH ARE DEEMED FEDERAL INSTRUMENTALITIES

Post funds
Post exchanges
Company funds
Officers club funds
Athletic activities funds
Public relations officers funds
Provost marshal activities funds
War department theater activities funds
Recreation center board activities funds
Noncommissioned officers' club activities funds.

48 Sales to the United States government or to the state of Iowa. Sales to the United States government or to the State of Iowa, or to federal bureaus, departments or instrumentalities, are not taxable, provided such sales are ordered on prescribed government forms of purchase order, and are paid for directly to the seller by warrant on government funds. [Amended August 10, 1962]

48.1 Applies to sales tax only. **Sales by the government of the United States.** Sales made by the government of the United States are exempt from the retail sales tax.

49 Sales to agencies or instrumentalities of federal, state, county and municipal government exempt. Construction contractors taxable. The gross receipts of all sales of goods, wares or merchandise used for public purposes to any tax-certifying or tax-levying body of the state of Iowa or governmental subdivision thereof, including the state board of regents, board of control of state institutions, state highway commission and all divisions, boards, commissions, agencies or instrumentalities of state, federal, county or municipal government which derive disbursable funds from appropriations or allotments of funds raised by the levying and collection of taxes, except sales of goods, wares, or merchandise used by or in connection with the operation of any municipally-owned public utility engaged in selling gas, electricity or heat to the general public, are exempt from sales and use tax.

This tax exemption does not apply to construction contractors who create or improve real property for federal, state, county and municipal instrumentalities or agencies thereof. The contractors therefore are subject to sales and use tax on all personal property they purchase regardless of the identity of their construction contract sponsor. [Filed August 19, 1954; amended November 30, 1964]

See section 422.45

This rule is intended to implement section 422.45(5), (6), as amended by chapter 264, Acts of the 60th General Assembly.

50 Sales to certain corporations organized under federal statutes. Sales of tangible personal property or taxable services to the following corporations are sales for final use or consumption to which the sales tax applies: Federal savings and loan associations, national banks, federal savings and trust companies, and other organizations of like character.

50.1 Sales to certain federal corporations. As a result of the decision of the United States Supreme Court in Federal Land Bank of St. Paul v. Bismarck Lumber Company, 314 U. S. 95, 62 S. Ct. 1, this commission holds that the following federal corporations are immune from the imposition of retail sales tax and consumers use tax in connection with their purchases.

1. Federal Land Banks
2. Federal Deposit Insurance Corporation
3. Home Owners' Loan Corporation
4. Commodity Credit Corporation
5. Federal Farm Mortgage Corporation
6. Federal Home Loan Banks
7. Reconstruction Finance Corporation
8. Defense Plant Corporation
9. Defense Supplies Corporation
10. Metals Reserve Company
11. Rubber Reserve Company
12. Reconstruction Finance Corporation Mortgage Company
13. Federal National Mortgage Association
14. Disaster Loan Corporation

The federal statutes creating the above corporations contain provisions substantially identical with section 26 of the federal farm loan Act which the court construed as barring the imposition of state and local retail sales taxes.

This rule applies only to the imposition of the tax upon the federal agencies as the ultimate consumers and does not limit the authority of this commission to require the agencies to collect the retail sales tax or consumers use tax upon sales made by them.

51 Applies to sales tax only. **Relief agencies.** Relief agencies, except those operated directly by the state of Iowa, are not exempt from retail sales tax, however, the law does provide that a relief agency may apply to the commission for refund for the amount of sales tax paid by it upon purchase of goods, wares or merchandise used for free distribution to the poor and needy.

In order that refund of sales tax paid on purchases used in free distribution to the poor and needy may be considered, the following requirements must be complied with:

1. Application shall be filled in with pen and ink or typewritten on form ST-52 supplied by the commission.

2. Name of agency, and the quarterly period for which refund is claimed must be shown on the face of all applications.

3. Applications shall be signed, notarized, and filed with the commission in duplicate.

4. Applications shall include only payments made during one quarterly period, and shall be filed within forty-five days after the end of that quarterly period.

5. Applications shall include only payments made for goods, wares or merchandise used for free distribution to the poor and needy.

6. In the "Warrant or Voucher Number" column, applicant shall show the number of warrant or voucher that was tendered to the merchant in payment of the purchases listed. The date on which the warrant or voucher was issued must be shown above the listings of the warrants or vouchers issued on that date.

7. Name of the merchant or company from whom the merchandise was purchased shall be shown in the "Purchased From" column.

8. Merchant or company's sales tax permit number shall be shown in the column entitled "Permit Number," as well as the address of that merchant in column entitled "Address."

9. In the column provided for "Type of Purchase" applicant shall describe as clearly as possible the nature of the merchandise purchased. Applicants shall not use such indefinite terms as merchandise, supplies, hardware, repairs and the like, as such terms do not furnish sufficient information.

10. The amount of the warrant or voucher and the amount of tax paid shall be shown in the columns so provided. Each individual column must be totaled at the bottom of every page. The last page of the application must also show the grand totals.

11. The relief agency shall prove to the satisfaction of the commission that the person making the sales has included the amount thereof in the computation of his gross receipts and that such person has paid the tax levied by the retail sales tax Act on such sales to the relief agency.

12. Where purchases shall have been made for institutions such as county poor farms, orphanages and the like, the portion of the purchases consumed by the employees is not refundable, therefore, so that correct percentage figures may be determined, those institutions which file applications for refund of sales tax are required to submit with their applications one copy of form entitled "Charitable Institution Questionnaire." Such information must be furnished on this questionnaire to properly determine percentage basis for the refund.

There is no provision in the law for the refund of use tax paid by relief agencies.

Section 422.47

52 Containers—including packing cases, shipping cases, wrapping material, etc. Receipts from the sale of containers, labels, cartons, packing cases, wrapping paper, wrapping twine, bags, bottles, shipping cases, and similar articles and receptacles sold to manufacturers, producers, wholesalers, retailers, or jobbers, which are used by the groups last mentioned as containers which hold or encompass the tangible personal property which they are engaged in selling, either for resale or at retail, provided the charge made for the property sold includes the container and the title to the container passes to the purchaser with the merchandise sold, are not subject to the Iowa retail sales tax.

The receipts from the sale of containers as hereinbefore described are subject to the retail sales tax when such containers are sold to persons who use such containers in connection with the sale of tangible personal property where such person retains the title to the container. In many such cases the seller at retail of tangible personal property purchasing containers makes a deposit charge to insure the return of the container.

Receipts from the sale of containers as hereinbefore described, when made to persons who are solely engaged in rendering service, the receipts from which are not subject to the retail sales tax law, and where the containers are used in connection with the rendition of such services, are subject to the retail sales tax.

Sales of containers, cartons, packing cases, wrapping paper, bags, and similar articles and receptacles sold to other than manufacturers, producers, wholesalers, and jobbers, may be divided into two groups, as follows:

a. Those which ordinarily are delivered with the merchandise sold to the final buyer or ultimate consumer where no separate charge is made therefor. This class includes such items as boxes, cartons, paper bags, wrapping paper and wrapping twine, in which purchases are delivered to customers. The sale of such containers is not taxable except in the case of such containers and supplies sold to one whose gross receipts are not taxable by reason of being service institutions, such as dry cleaners, laundries and similar service. Persons rendering service are the consumers of such items, and sales of them are taxable.

b. Containers which are used for the purpose of delivering tangible personal property sold to customers, which are to be, or may be, returned to the seller of the tangible personal property. This class includes such containers as milk bottles, water bottles, carboys, drums, and many others, the title to which remains in the seller and which are ordinarily used by him in making other deliveries. He consumes or uses them in his business and the sale to him of such containers is taxable. Such tax liability is not avoided if a deposit is made by, or required of the customer, to secure the redelivery of the container.

52.1 Tangible personal property used to insure safe delivery of other tangible personal property intended to be sold ultimately at retail. Packing paper, lining paper (including paper used to line cars, boxes and crates), excelsior and blocks and like tangible personal property used to insure safe delivery of

tangible personal property intended to be sold ultimately at retail, the title to which passes to the purchaser, is exempt from retail sales and use tax.

The gross receipts from the sale of like tangible personal property used in the performance of a service are taxable.

52.2 Labels, tags and nameplates. Labels, tags and nameplates when attached to tangible personal property subject to the retail sales tax shall be considered part of the container and all of the provisions of rule 52 shall apply thereto.

52.3 Paper plates, paper cups, paper dishes, paper napkins, paper and wooden spoons and forks, straws and butterchips. Where paper cups, plates, dishes, napkins, spoons, forks, straws, butterchips and wooden spoons and forks are sold with taxable tangible property and are expended by such use, then the sale of such property to retailers is considered a sale for resale and is not taxable under the retail sales or use tax laws.

Where the above-mentioned articles are sold in connection with service or for free distribution by retailers, separate and apart from a retail sale, then said articles will be deemed to be a retail sale and are taxable.

The purchase of placemats by retailers who sell meals, subjects the purchaser to either sales or use tax, depending upon the source of supply. [Amended November 30, 1964]

This rule is intended to implement sections 422.42(3) and 423.1(1), Code 1962.

52.4 Containers—wholesale bakeries. Bakeries purchasing metal or wooden containers for use in delivering bread or other bakery products to retailers are considered to be the consumer of such containers unless title and possession passes to the retailer at time of delivery. If bakery retailers contend the title or possession passes to their retail customers on any containers used in delivering bakery products, proper showing must be made by the bakeries to support that contention. [Filed June 30, 1955, amended August 10, 1962]

53 Applies to sales tax only. **Tangible personal property purchased for resale but incidentally consumed by the purchaser.** Retailers engaged in the business of selling tangible personal property who take merchandise from stock for personal use, consumption or gift, must report and pay sales tax on such merchandise. Such retailers may consider all their wholesale purchases as being made for resale purposes, and shall be liable for the tax on such items as they themselves consume or give away. Such retailers must enter on their books the cost of all such property that they have removed from stock for personal consumption or gifts, and must pay the tax measured by two percent of the amount of the cost to them. Articles taken from stock should be reported on the regular retail sales tax return under item 1 "*a*". [Amended August 10, 1962]

54 Sales by employers to employees—employees' meals. Where an employer furnishes tangible personal property to employees without charge, or uses merchandise through gifts or consumption, the cost of all such merchandise must be included in item 1 "*a*" of the quarterly return with sales tax thus reported.

When an accurate record of meals consumed by employees, the family of the retailer and himself is not kept, the commission requires sales tax to be reported at the rate of five dollars per week per person. The total quarterly amount must be shown in item 1 "*a*" of the tax return. [Amended August 5, 1958]

55 Sales in interstate commerce—goods shipped from this state. When tangible personal property is sold within the state and the seller is obligated to deliver it to a point outside the state or to deliver it to a carrier or to the mails for transportation to a point without the state, the retail sales tax does not apply, provided the property is not returned to a point within this state. The most acceptable proof of transportation outside the state will be:

(a) A waybill or bill of lading made out to the seller's order calling for delivery; or

(b) An insurance or registry receipt issued by the United States postal department, or a post-office department's receipt; or

(c) A trip sheet signed by the seller's delivery agent and showing the signature and address of the person outside the state who received the delivered goods.

When tangible personal property is sold and delivered in this state to the buyer or his agent, the sales tax applies even though the buyer may subsequently transport that property out of the state. Sales tax also applies when personal property is sold in Iowa to a common carrier and then delivered by the purchasing carrier to a point outside of Iowa for use. [Amended August 10, 1962] [Attorney General September 9, 1960]

GOODS COMING INTO THIS STATE

When tangible personal property is purchased in interstate commerce for use or consumption in this state, where delivery is made in this state, and the seller is engaged in the business of selling such tangible personal property in this state for use or consumption, such sale is subject to the retail sales tax, regardless of the fact that the purchaser's order may specify that the goods are to be manufactured or procured outside this state and shipped directly from the point of origin to the purchaser. The seller is required to report all such transactions and to collect and remit to this state retail sales tax on all such sales.

If the above conditions are met, it is immaterial (1) that the contract of sale is closed by acceptance outside the state or (2) that the contract is made before the property is brought into the state.

Delivery is held to have taken place in this state (1) when physical possession of the tangible personal property is actually transferred to the buyer

within this state, or (2) when the tangible personal property is placed in the mails or on board a carrier at a point outside the state (f. o. b. or otherwise) and directly to the buyer in this state. See rule 180.

55.1 Sales not considered as interstate commerce. When the contract to sell takes place within the state of Iowa (offer and acceptance) and the seller delivers the goods from a point outside of Iowa directly to the buyer in Iowa, the sale is deemed to be an intrastate sale and the seller's receipts therefrom subject to the retail sales tax, if the sale is at retail and not otherwise exempted.

Adoption of this rule is not considered by the commission as a change in its holding as to such transactions, but merely as a clarification of rule 55.

55.2 Certificate of out-of-state delivery. Taxpayers making sales of tangible personal property delivered out of state may use the following certificate in lieu of trip sheets. Where the certificate is used it must be made out at the time of the sale and is especially designed for use when delivery is made by truck.

CERTIFICATE OF OUT-OF-STATE DELIVERY

Salescheck: The salescheck must show quantity, description of articles and price.

The undersigned hereby certifies that he delivered the merchandise described to the out-of-state address shown on the salescheck number set forth below:

SALES CHECK NUMBER .....
DATE OF DELIVERY .....
NAME OF TRUCK LINE .....
DRIVER'S SIGNATURE .....
ICC PERMIT NO. .....

I hereby certify that I received the merchandise described on the above salescheck.

Date ..... Signed .....

56 Premiums and gifts. Persons who give away or donate tangible personal property are deemed to be (for tax purposes) the final users or consumers of such property.

Therefore, the gross receipts from the sale of tangible personal property to such persons for such purposes are subject to the retail sales tax.

Where tangible personal property is purchased tax-free for the purpose of resale in the regular course of business by a retailer and subsequently given away or donated by the retailer, the retailer shall include in his retail sales tax return under item 1 "*a*" at his cost price the value of such property.

When a retailer selling tangible personal property at retail in Iowa, the gross receipts from which are subject to the tax, furnishes with said property a premium at the time of the sale, it shall be considered that the premium is sold together with the tangible personal property and that the receipts from the property cover the sale of the premium. In such instances the retailer is considered purchasing the premium for the purpose of resale. However, where the retailer is engaged in selling tangible personal property at retail, the receipts from which are not subject to the tax, but who furnishes a premium with the property sold, the retailer, for tax purposes, is considered as consuming or using the premium furnished. [Amended August 5, 1958]

56.1 Gift certificates. Where gift certificates are sold by persons engaged exclusively in selling taxable tangible personal property, services or amusement the tax shall be added at the time the gift certificate is sold. No sales tax will then be added at the time the gift certificate is redeemed by the donee. [Amended August 5, 1958]

57 Owners or operators of buildings. Owners and operators of buildings who purchase materials, shelving, janitors' supplies, electric light bulbs and other articles, which are used by them in maintaining the building, are the users or consumers of the personal property so purchased and shall pay retail sales tax to the supplier from whom such articles are purchased.

Where owners or operators of buildings remeter and bill their tenants for electric current, gas or any other taxable service consumed by the tenants, such owners or operators may purchase the electric current, gas or other taxable service tax-free, for resale, in which case the said owners or operators must hold retail sales tax permits and are liable for the tax upon the gross receipts from the sale of such service. Where the building owners or operators purchase all of the electric current, gas, and other services, for resale, and consume a portion thereof in the operation of the building, they shall be liable for the tax on the cost of the electric current or gas purchased for resale and later consumed. That portion consumed by the owner or operator shall be reported under Item 1 "*a*" on the retail sales tax return.

Where a building sells heat to other buildings or other persons and charges for such service as a sale of heat, then such transactions are taxable at the rate of two percent of the gross receipts from such sales.

Where heat is furnished to tenants as a service to them, incidental to the renting of the space in the same manner as janitor, elevator and cleaning services, then there would be no tax, as heat in that case is not sold as a separate service and is not billed separately. In any case where heat is sold separately and is billed to the tenant separately, then such services are taxable.

Buildings making the sales of heat are required to procure a retail sales tax permit and report and pay the tax quarterly.

58 Tangible personal property made to order. Where retailers, such as dry goods merchants or tailors, contract to fabricate items of tangible personal property, such as carpeting, curtains, drapes, tents, awnings, clothing, auto tops and the like, from materials available in stock or through placing orders for materials which have been selected by customers, the total receipts from

the sale of such fabricated articles must be included in the gross receipts upon which the sales tax is computed. Such retailers may not deduct labor or service charges of fabrication or production notwithstanding that such charges may be separately billed to customers apart from charges for materials.

These cases should be distinguished from instances where repairmen perform labor or services in repairing or altering items of tangible personal property belonging to their customers, in which the event the labor or service charges do not come within the provisions of either the sales or use tax law. To illustrate the tax status of the service charge, assume that a customer purchases a dress or article of ladies wearing apparel, and the title had passed to the customer, any subsequent charges made and segregated for alteration would be exempt from sales tax. [Amended August 10, 1962]

59 Applies to sales tax only. **Operators of vending machines selling merchandise—operators of machines and devices for commercial amusement.**

1. The retail sales tax law was amended to impose a tax, beginning July 1, 1947, of two percent of the gross receipts derived from the operation of all forms of amusement devices and commercial amusement enterprises, such as music boxes, weighing machines, pin-ball machines and other slot operated devices used for commercial amusement purposes. Receipts from the sale of merchandise through vending machines is also subject to a tax of two percent.

2. Frequently persons who own vending machines, vending merchandise by coin operation or otherwise, as well as persons who own coin-operated amusement machines and devices place them on location throughout the state in places of business belonging to and operated by others, giving to the owner of the place of business a share of the receipts the device takes in for the privilege of operating the machine at that location. These persons are called operators.

3. The operator of machines and devices which are out on location as before described are retailers for the purpose of the retail sales tax law and are required to hold a retail sales tax permit and report the entire gross receipts received from the operation of such machines and devices and remit two percent tax thereon. The operator, who has machines out on locations belonging to others, shall hold one regular retail sales tax permit for his principal place of business, whether same is located in the state of Iowa or outside the state of Iowa, and shall file a quarterly return which will include all gross receipts from all such machines or devices operated by him in Iowa during the quarterly period covered by the return. The return form ST-50 shall be filed by said operator to which shall be attached and made a part thereof form ST-51A, upon which the operator shall list the following information:

a. The total number of units of each type of machine or device operated, together with the total receipts derived from each type.

4. The retail sales tax department will furnish to such type operator a sticker, form ST-103, for each unit operated in the state by the operator and said sticker shall be applied to each unit, reflecting the retail sales tax permit number of the operator, under which permit the sales tax on the receipts from the machine is reported and returned to the state. No device or machine or gadget operated for commercial amusement purposes shall be operated without said sticker ST-103 being attached thereto in a prominent place, indicating the sales tax permit number of the operator thereof.

5. Billiard and pool tables, shooting galleries and other similar undertakings which are ordinarily operated in a regular place of business owned and managed by the operator thereof would not come within the provisions of this rule with respect to holding one permit for the entire state or with respect to filing ST-51A as an addition to the regular retail sales tax return form ST-50. Likewise the provision with reference to the regular sales tax permit and form ST-51A would not apply to devices operating at fairs, circuses and carnivals which are temporarily within the state of Iowa. Concerning the latter see rule 15.10.

Any changes or modifications reflected herein from previous rulings of the commission in regard to this subject shall be effective as of January 1, 1951. [Amended August 5, 1958]

Section 422.42

59.1 Inspection fee on weighing scales not a credit against sales tax due. Section 422.46, Code of Iowa, 1950, 1954, provides that where the state now imposes a special tax concerning the sale of tangible personal property, that the special tax shall be applied as a credit against the retail sales tax due as a result of the sale of such tangible personal property at retail in Iowa.

In 1947 the retail sales tax law was amended by an addition to section 422.43, under the provisions of which a tax of two percent was imposed upon the gross receipts derived from the operation of all forms of amusement devices and commercial amusement enterprises conducted within the state of Iowa and said tax covered all receipts from the operation of weighing machines as well as other items. The department of agriculture collects a three dollar per year fee as an inspection fee for inspecting weighing scales.

It is the commission's holding and ruling that the three dollars per year inspection fee paid on the inspection of such scales is not a credit against the retail sales tax due on the receipts from the operation of weighing scales, as is contemplated in section 422.46.

The 1947 amendment specifically and expressly taxed the receipts from the operation of weighing machines and further section 422.46 affords a credit only where tangible personal property is sold and a special tax is imposed by the state in

connection with the sale of such tangible personal property.

60 Applies to sales tax only. **Deposits or prepayments on purchase price.** Where retailers accept from their customers prepayments or deposits representing part of the purchase price of merchandise, the possession of which is not to be delivered to the purchaser until the full amount of the purchase price shall have been paid, the time of the sale is determined by the terms of the sale and the intention of the parties.

If the buyer makes a deposit on the purchase price of specific goods which have been selected in a deliverable state, and the seller appropriates the specific goods for the purpose of future delivery to the buyer, title to the goods passes and the sale is consummated at the time the deposit is made. The prepayment or deposit must be included in the gross receipts on which the seller's tax is computed. If specific goods are neither selected by the buyer nor appropriated to the sale by the seller, title to the goods does not pass until the buyer selects specific goods and such goods are appropriated to the sale by the seller. In the latter case, the sale takes place when possession of the goods is delivered to the buyer. The seller must include in his gross receipts the total amount of the purchase price thereof.

61 Applies to sales tax only. **Auctioneers—public auctions.** Any person [as defined in section 422.42 (1)] who sells at retail through auctions is a retailer under the sales tax law and must hold a sales tax permit. Property sold at retail is taxable regardless of the ownership of such property. Property such as livestock sold for feeding purposes is exempt as a resale transaction, along with others that can be similarly classified.

Some retail establishments that operate through auctions are sale pavilions, community sales, furniture auctions and the like. [253 Iowa 994; 115 NW2d 178] [Amended August 10, 1962]

62 Applies to sales tax only. **Transient or itinerant sellers.** Persons not regularly engaged in selling at retail and not having a permanent place of business, but who are temporarily engaged in selling from trucks, portable roadside stands, concessionaires at state, county, district or local fairs, carnivals and the like, shall report and remit the tax on a nonpermit basis.

Transient or itinerant sellers may be required to post a bond if in the judgment of the commission it is deemed necessary and advisable to secure the collection of the tax imposed under Division IV of the sales tax law. A cash bond of not less than one hundred dollars or a surety bond of not less than five hundred dollars issued by a solvent surety company authorized to do business in Iowa, is acceptable. The amount and type of the bond shall be determined by the commission.
[Filed August 19, 1954]

63 Applies to sales tax only. **Peddlers and street vendors.** Hawkers, peddlers and street vendors who do not have regularly established places of business are temporary retailers within the meaning of the law, and such persons are required to report and remit sales tax on a nonpermit basis. [Amendment filed August 19, 1954; August 10, 1962]

64 Repairmen engaged in altering or repairing property belonging to others. Persons engaged in the business of repairing or altering tangible personal property belonging to others are deemed to be rendering a service, the gross receipts from which are not subject to the retail sales tax. The repairman, however, is deemed to be the final user or consumer (for tax purposes) of all tangible personal property which he purchases for use in the rendition of such service, even though the title to the property used in the repair work is passed on to his customer.

A person who is exclusively engaged in repairing tangible personal property belonging to others need not hold a retail sales tax permit. Therefore, the gross receipts from the sale of tangible personal property to such repairman for such purpose would be subject to the retail sales tax.

If, however, a person engaged in repairing tangible personal property belonging to others is also engaged in selling similar tangible personal property at retail in Iowa, such person must hold a retail sales tax permit. Those repairmen holding a retail sales tax permit, when purchasing tangible personal property, a part of which they will consume in their repair work and a part of which they will sell at retail, will be permitted to purchase all such property tax-free on the theory of resale by giving to their suppliers a certificate of resale showing their sales tax permit number.

The repairman holding a retail sales tax permit should then include under Item 1 "*a*" of his retail sales tax returns, at his purchase price, the value of the tangible personal property used or consumed by him in his repair work, to which amount should be added his receipts from his sales at retail in Iowa. [Amended August 10, 1962]

65 Insect or pest exterminators. Persons engaged in the business of exterminating insects, rodents and other pests, render services, the gross receipts from which are not taxable; however, the gross receipts of persons selling the disinfectants, chemicals and supplies to persons rendering such services, are taxable, except as follows:

If the exterminator is using chemicals or sprays in furnishing insect control to farmers or pest control (but not rodent control) to farmers as a part of agricultural production for market, then that portion so used is exempted from sales tax. [Amended August 10, 1962] [See rule no. 94.1(3)]

Section 422.42 (3)

65.1 Weed exterminators. Persons using tangible personal property for the extermination

or destruction of weeds are the final users or consumers of tangible personal property used for such destruction. Sales tax should therefore, be charged on the gross receipts from the sale of weed exterminators of every kind and character, except as follows:

If the exterminator is using chemicals or other property in furnishing weed control service to farmers as a part of agricultural production for market, that part of such items are exempt from retail sales tax. [Amended August 10, 1962] [See rule no. 94.1 (3)]

Section 422.42 (3)

66 Furniture repairers and upholsterers. Persons engaged in repairing or reupholstering furniture belonging to others are deemed to be engaged in rendering service, the receipts from which are not subject to the sales tax. On the other hand, such repairmen are deemed to be the final users or consumers of all tangible personal property which they purchase for use in the rendition of such service. Being the final consumer, they should pay the sales tax to their Iowa suppliers when such materials are purchased in Iowa and should report the use tax directly to this commission when such materials are purchased from out-of-state sources, unless the out-of-state supplier is registered with the use tax department and authorized to collect the use tax for the state, in which last instance the use tax should be paid to the registered supplier.

Persons who are exclusively engaged in repairing or reupholstering furniture belonging to others need not hold a retail sales tax permit, inasmuch as they do not collect any sales tax from their customers, but should anticipate that the tax is increasing their cost of material two percent when preparing the charge.

However, if the furniture repairman or upholsterer is also engaged in selling tangible personal property at retail in Iowa, then such persons shall procure a retail sales tax permit and report and remit two percent of their gross receipts from retail sales directly to the commission.

The person who repairs or upholsters furniture for the purpose of selling such furniture at retail is making sales at retail, the receipts from which are subject to sales tax.

67 Watch, clock and jewelry repair. Watch, clock and jewelry repairmen are consumers of watch, clock and jewelry repair parts and materials such as crystals, winds, and chain links used in repairing watches, clocks and jewelry. They are, however, retailers of wrist watch straps, metal bands, watches, clocks, chains and other tangible personal property which they sell to customers in the regular course of business. [Amended August 10, 1962]

68 Furriers and fur repairers. Persons engaged in altering, remodeling, and repairing cloth, fur or other garments belonging to others are deemed to be engaged in rendering a service, the receipts from which are not subject to the retail sales tax.

Such repairman is deemed to be the final user or consumer of all tangible personal property which he purchases for use in completing such services.

Therefore, persons selling to such repairmen tangible personal property for such purposes are making sales at retail, the receipts from which are subject to the retail sales tax.

However, if the repairman, in addition to rendering such services, is also engaged in selling tangible personal property at retail, such repairman is required to hold a retail sales tax permit and remit to the commission two percent of his gross receipts from such sales.

69 Shoe repairers. Persons engaged in the business of repairing shoes render a service. They are purchasers for use or consumption of tangible personal property (except taps and rubber heels) used by them incidentally in the rendering of such service. Consequently, sales of leather, including strips, bends and other findings to shoe repairers for use in connection with the rendering of such service, are sales at retail and are taxable.

Taps and rubber heels are purchased by shoe repairers for resale and the gross receipts from sales by them at retail of such articles are subject to the sales tax notwithstanding the fact that such taps or rubber heels are attached to the shoes of their customers.

Taps are defined as leather or composition half soles which previous to the time of purchase by the shoe repairer have been cut to half sole shape and do not include strips, bends, or other sole materials which may, subsequent to purchase, be cut and used for sole purposes.

Furthermore, the sale by shoe repairers of all tangible personal property not directly used in connection with their repair services, but sold for use or consumption, represents taxable sales at retail. Therefore, shoe repairers are retailers of taps, rubber heels, shoes, polishes, laces and other such property.

Gross receipts, for the purpose of this rule, on items other than those identified in the preceding paragraph will be considered as being an amount equal to the cost of such other items plus a markup of forty percent. Items so identified may be purchased tax free from the suppliers with the repairers including the gross receipts from the sale of same in their sales tax returns.
[Amended August 10, 1962] [See 225 Iowa 103]

70 Harness and mattress repairers. Persons engaged in repairing harnesses or mattresses belonging to others are rendering a service, the receipts from which are not subject to the retail sales tax. Persons solely engaged in such repair services are not required to hold a retail sales tax permit, inasmuch as they do not collect any sales tax from their customers.

On the other hand, such repairmen are deemed to be the final users or consumers of the tangible personal property which they purchase for use in the rendition of such services.

Therefore, persons selling to such repairmen tangible personal property for their use in such services are making sales at retail, the receipts from which are subject to the retail sales tax.

However, if the repairman, in addition to rendering such services, is also engaged in selling tangible personal property at retail, such repairman is required to hold a retail sales tax permit and remit to the commission two percent of his receipts from such sales.

71 Applies to sales tax only. **Bookbinders, paper cutters, etc.** Persons engaged in the business of binding books, magazines or other printed matter belonging to other persons are deemed to render services, receipts from which do not come within the purview of the sales tax law. Sales of cloth, leather, cardboard, glue, thread or other such items of tangible personal property, to bookbinders for use in performing such services are sales at retail, and the sellers must collect and remit the tax on such sales.

Where a bookbinder binds his own books, magazines or printed matter and sells the finished products to users or consumers, or makes and sells at retail loose-leaf or detachable binders, he must collect and remit tax with respect to the entire receipts from such sale.

Persons engaging in the business of papercutting, folding, gathering, padding, or punching circulars, office forms or other printed matter belonging to other persons, are deemed to be rendering services, and do not come within the provisions of the law. Sales of tangible personal property to such persons for use or consumption in the performance of these services constitute sales at retail and are taxable.

72 Printers, mimeographers and multigraphers. Printers, mimeographers, multigraphers and the like, are engaged in the business of processing personal property, and their sales of printed or mimeographed matter, such as books, letterheads, bills, envelopes, advertising circulars and the like to purchasers who either use or consume them, lease them, or distribute them free of charge, but do not sell them, are sales at retail, the receipts from which are taxable.

Such persons may not deduct from the selling price of such property the charges for labor or service rendered in its production, even though the same may be billed to the customer separate from the charge for the stock, except where a charge for addressing, folding, enclosing and sealing is billed separately to the customer.

On commercial printing involving use of U. S. postal cards or stamped envelopes purchased by the printer, etc., the tax must be collected on the basis of the selling price of the job, less the amount of postage involved.

No tax arises from the service of typesetting performed by a printer, where title to the metal does not pass to the consumer.

See rule 25.7 for electrotypes, type, zinc etchings, half-tones, stereotype, color process plates and wood mounts.

73 Abstracts and law briefs. Persons engaged in the business of furnishing abstracts of title are rendering a service to their customers and their gross receipts from this source are not taxable. Likewise, the gross receipts from the furnishing of, or sale of, law briefs, whether typewritten or printed, are considered sales of service and not subject to the tax.

The sale of paper or other materials used in the making up of title abstracts or law briefs to abstract companies or those furnishing law briefs, are sales to purchasers for use or consumption, and the sellers of such paper or supplies are liable for the tax upon their gross receipts from such sales.

This rule applies only to abstracts of title, abstracts of record and briefs ordered specially prepared for some certain person. It does not apply to the sale of printed briefs or commercial sales of printed matter, whether by subscription, sale or contract. Such sales are taxable.

74 Tennis racket restringing and repairing. Persons engaged in repairing and restringing tennis rackets are retailers of the strings and other tangible personal property furnished, and tax applies to the retail selling price thereof. If a lump sum charge is made for materials and labor, fifty percent thereof is regarded as the retail selling price of the materials furnished. [Amended August 10, 1962]

75 Clay pigeons. Gun clubs furnishing clay pigeons to their members are regarded as performing a service even though the charges for the services are based on the number of clay pigeons furnished. Consequently, the receipts from the sale of the clay pigeons to the clubs are taxable.

Where a gun club or other person furnishes the service or facilities for trap or skeet shooting to the general public or to persons not members of a regularly organized and established club, the furnishing of such facilities shall be deemed to be operating an amusement device, the gross receipts from which are taxable under the provisions of the retail sales tax law.

Where a gun club makes retail sales to their members or other consumers, tax is imposed on the gross receipts. [Amended August 10, 1963]

76 Advertising service. Charges for advertising in newspapers, magazines or other publications are not taxable. Likewise, charges made by advertising agencies for preparing and placing such advertising are charges for services and are not taxable.

The tax applies, however, to gross receipts from sales of tangible personal property to advertisers

or advertising agencies for use or consumption in preparing advertising, such as paper, ink, paint, tools, office supplies and art work purchased from independent artists, engravers, charges for making metal plates, electrotypers' charges for making electrotypes or matrices and printers' charges for production of pamphlets, booklets, brochures and other printed materials.

Advertising agents engaged in producing drawings for advertising purposes are regarded as the consumers of the materials used in the performance of such services where the title remains with the agency. Sales to them are retail sales, subject to the tax. Charges made by such advertising agents are not taxable. [249 Iowa 1207]

This rule applies to advertising agencies who solicit newspapers, magazines and other periodicals. [Amended August 10, 1963]

77 Newspapers, magazines, trade journals, etc. Publishers of newspapers are deemed to be rendering a service to their subscribers and the gross receipts from the sale of newspapers to the public are therefore not taxable. The sales of magazines, trade journals, and other periodicals when sold to consumers or users are sales at retail and the gross receipts from such sales are taxable.

Advertising which appears in newspapers, magazines, trade journals, and other periodicals, is not subject to sales tax. Where trade publications, advertising pamphlets or circulars, and the like are distributed free by the publisher, the publisher is liable for sales tax on the cost of the distributed material. [Amended August 10, 1962] [See rule no. 134]

Section 422.42 (3)

78 Tire repairing and vulcanizing. Persons engaged in the business of repairing or vulcanizing tires and tubes belonging to others render services, the receipts from which are not subject to the retail sales tax. However, such persons are deemed to be (for tax purposes) the final users or consumers of all tangible personal property which they purchase for use in the rendition of such services. Such persons who are exclusively engaged in rendering such services are not required to hold a retail sales tax permit, inasmuch as they do not collect any sales tax, as such, from their customers.

Therefore, persons selling tangible personal property to such repairmen for use in rendering such services are making sales at retail, the receipts from which are subject to the retail sales tax.

If, however, the repairman in addition to rendering such services, also sells tangible personal property at retail in Iowa, then he must hold a retail sales tax permit and remit to the commission.

79 Retreading and recapping tires. Persons engaged in the business of retreading or recapping tires belonging to others are rendering services, the receipts from which are not subject to the retail sales tax. Such repairmen are deemed to be the final users or consumers of all tangible personal property which they purchase for use in rendering such services.

Therefore, persons selling tangible personal property to such repairmen for use in the rendition of such services are making sales at retail, the receipts from which are subject to the sales tax. Tax applies to the sale of retreaded or recapped tires which sale price includes any amount allowed for the customer's old tires or other merchandise traded-in. [Amended August 10, 1962]

79.1 Tire mileage contracts. Some tire companies pursuant to a "tire mileage contract" agree to furnish satisfactory tire equipment to their customers at a stipulated amount per mile of motor vehicle operation, the tire companies retaining title to the tires and possessing authority to remove tires and replace them with new or used ones, to move tires from wheel to wheel and to remove tires for inspection or repair. The receipts from such transactions in Iowa are subject to retail sales tax.

80 Rewinding motors. Persons engaged in the business of rewinding motors or transformers belonging to others are deemed to be engaged in rendering a service, the receipts from which are not subject to the retail sales tax. However, the repairman is deemed to be (for tax purposes) the final user or consumer of all tangible personal property which he purchases for use in the rendition of such services.

A person who is exclusively engaged in such repair service is not required to hold a retail sales tax permit.

However, if such person, in addition to rendering such service, is also engaged in selling tangible personal property at retail in Iowa, then such person should hold a retail sales tax permit and report to the commission two percent of his receipts derived from such retail sales in Iowa.

81 Automobile washing and chassis lubrication. Automobile washing and greasing jobs are considered services, the receipts from which are not subject to sales tax.

Grease, lubricants, or other articles consumed incidentally in rendering such services are purchased for final consumption and are subject to the tax as retail sales.

Where grease, lubricants or other articles are sold separate and apart from chassis lubrication, and in cases where the customer is billed separately for greases or lubricants not included in the lump sum price of chassis lubrication, the tax applies upon the gross receipts from such sales.

82 Laundries, dry cleaners, rug cleaners, etc. Persons engaged in the operation of laundries, dry cleaning establishments, rug cleaning establishments and like services, render services, the receipts of which are not subject to the retail sales tax.

On the other hand, such groups are deemed to be (for tax purposes) the final users or consumers of all tangible personal property which they purchase for use in the rendition of such services.

Therefore, persons selling tangible personal property to such groups are making sales at retail, the receipts from which are subject to the retail sales tax.

83 Blacksmith and machine shops and similar activities. Blacksmiths and machine shop operators are generally engaged in repairing tangible personal property belonging to others with the receipts for their work, as such, exempt from sales tax as a service. All personal property acquired by such operators for this "service" is subject to sales or use tax.

When a blacksmith or machine shop operator also fabricates finished articles from raw materials and sells such articles at retail, sales tax applies on the total charge, which includes the fabrication labor. A sales tax permit must be held for selling at retail with tax remitted on the sales plus any items consumed in service work, which were purchased tax exempt because of their dual use by such blacksmiths and machine shop operators. [Amended August 5, 1958]

84 Automobile refinishers and painters. Tax does not apply to charges for repainting or refinishing used articles. Tax, however, does apply on sales to the refinisher of paint and other materials used in his service work. [Amended August 5, 1958; August 10, 1962]

85 Painters and paperhangers. Painters, paperhangers, refinishers, floor waxers, wallpaper cleaners, interior decorators and those people rendering renovation services, are primarily rendering a service not covered by the Act, and receipts from their charges are not taxable. Sales of wallpaper, paint, varnish, waxes, polishes, cleaning fluids, and materials used by these persons in the performance of rendering their services constitute sales to these persons for use or consumption, the gross receipts from which are taxable.

Painters and paperhangers engaged in making retail sales are required to hold a sales tax permit with the gross receipts from their sales subject to tax. [Amended August 10, 1962]

Section 422.53

86 Signs and sign painters. Persons engaged in the business of painting signs on billboards, buildings or other property belonging to others render service which is not taxable. Sales of paint, brushes, and other tangible personal property to sign painters for use by them are sales at retail, subject to the tax.

Where a sign painter paints a sign on his own personal property and sells the finished product, he makes a sale at retail which is subject to the sales tax without any deduction for cost of materials or labor.

86.1 The tax liability of artists fulfilling orders and the preparation of commercial drawings, sketches and paintings on special order for commercial use. Where retailers or commercial houses place special orders with artists for use in making cuts or other advertising matter, the artists are rendering services and not making sales at retail in the preparation of such drawings.

This rule is strictly limited to artists' work hereinbefore described and does not include signs, sign paintings, placards and other paintings made and offered for sale in the usual course of retail business or other painting and art work.

[Amended August 10, 1962]

Section 422.42(5)

87 Sales of signs at retail. Persons engaged in selling to users or consumers illuminated signs, bulletins or other stationary signs, whether manufactured by themselves or by others, are selling tangible personal property at retail, the receipts from which are taxable, even where the purchase price of the sign includes a charge for maintenance or repair service in addition to the charge for the sign.

Charges for services rendered subsequent to the sale of a sign, which are billed separately, are not taxable, but all tangible personal property used in making such repairs is taxable.

88 Motor vehicle repair shops and garages. The gross receipts from sales of tangible personal property to purchasers for use, either separately or in connection with motor vehicle repair work, such as automobile parts, accessories, tires, batteries, oils, and like articles, are taxable. Where the parts or accessories are used in a repair job, and are billed to the customer separate and apart from the charge for labor or services, the tax will be computed on the retail selling price of the property so used, provided the repairman keeps books so as to show separate charges for personal property sold and for labor or services performed.

Personal property so billed and taxed to the customer may be purchased tax-free by the repairman, if he is holder of a retail sales tax permit.

89 Oculists, ophthalmologists, optometrists and opticians. Oculists, ophthalmologists, optometrists and opticians render professional services with their receipts exempt from sales tax. They are, however, the consumers of ophthalmic materials including eyeglasses, contact lenses, frames and lenses used or furnished in the performance of this service work. Tax, therefore, applies on all items acquired for this work.

If oculists, opthalmologists, optometrists or opticians sell tangible personal property in addition to rendering their professional services, they must hold a retail sales tax permit and report all sales tax due from their retail sales.

[Amended August 10, 1962]

Section 422.42 (5)

90 Physicians and surgeons. Physicians and surgeons generally render professional services and the receipts for such services are not subject to retail sales tax. Any tangible personal property acquired by physicians or surgeons for furnishing professional services to their patients is subject to either sales or use tax, depending upon whether acquisition of the property was from Iowa retailers or out-of-state suppliers.

There are numerous instances whereby physicians and surgeons aside from rendering professional services as provided above, dispense drugs, medicines, and other items to their patients and others. Transactions of this kind classify the dispensers (the physicians and surgeons) as "retailers" under the sales tax law and subject their sales (drugs and medicines or other items) to sales tax. A sales tax permit must be held for the reporting of the tax on the respective sales.

Where the physicians or surgeons consume the same type of personal property that they also sell at retail, all such property may be purchased tax exempt with tax reported on the consumed portion under item 1 "*a*" of the quarterly tax report. [Amended August 10, 1962]

Section 422.42 (5)

91 Hospitals, infirmaries and sanatoriums. Hospitals, infirmaries, sanatoriums and like institutions are engaged primarily in the business of rendering services. They are not liable for sales tax with respect to their gross receipts from meals, bandages, dressings, X ray, photographs, or other tangible personal property, where such items of tangible personal property are used in the rendering of hospital service. This is true, irrespective of whether or not such tangible items are billed separately to their patients. Hospitals, infirmaries and sanatoriums are deemed to be the purchasers for use or consumption of such tangible personal property that is used in furnishing services. Sales tax should, therefore, be remitted to the Iowa retailers on that property when acquired, with use tax the proper medium with out-of-state suppliers.

There are numerous instances whereby hospitals, infirmaries, sanatoriums and like institutions dispense drugs and medicines to their patients and others. Transactions of this kind classify the dispensers (hospitals, infirmaries, sanatoriums, and like institutions) as "retailers" under the sales tax law and subject their sales (drugs, and medicines) to sales tax. A sales tax permit must be held for the reporting of the tax on the respective sales.

Where the hospitals, infirmaries, sanatoriums and like institutions consume the same type of personal property that they also sell at retail, all such property may be purchased tax exempt with tax reported on the consumed portion under Item 1 "*a*" of the quarterly tax report. [Amended August 10, 1962]

Section 422.42(5)

91.1 Hospitals operating nurses training schools. Hospitals are normally the persons who conduct nurses training schools for the training of student nurses entering the nursing profession.

Where hospitals purchase tangible personal property, the title to which is passed on to the student nurses in consideration of the nurses' services rendered to the hospital in connection with the training course, no tax would be due to the supplier selling to the hospital such items and the hospital would owe no tax as a result of this transfer from the hospital to the student nurse under the provisions of subsection 4 of section 422.45, Code of Iowa, which is a part of the retail sales tax law.

Likewise the hospital would owe no use tax when purchasing tangible personal property for the purpose of transfer to the student nurses.

Items such as nurses' uniforms, the title to which passes to the student nurses, food which is served to the student nurses in the form of meals, as well as books, the title to which passes to the nurses, would not be subject to tax. However, reference books and other items of tangible personal property, the title to which remains in the hospital, but which the student nurses are permitted to use, would not be exempt from either sales or use tax.

92 Veterinarians. Purchases of drugs, medicines, bandages, dressings, serums, tonics, and the like, which are used in treating livestock raised as a part of agricultural production are exempt from sales tax. Where these same items are used in the treating of animals maintained as pets for hobby purposes, sales tax is due as the statutory exemption is not met.

If veterinarians engage in retail sales in addition to furnishing professional services, they must account for sales tax on the gross receipts from such sales. [Amended August 10, 1962]

Section 422.42(3)

93 Barber and beauty shops. Barbers and beauty shop operators primarily render personal services, not subject to the sales tax. Cosmetics, tonics, lotions, shaving soaps and other materials used or consumed in rendering such services are purchased for use or consumption, and the sellers thereof must collect and remit the tax thereon, as well as upon sales to them of tools, and equipment used or consumed by them. Use tax is likewise due where merchandise, tools and equipment are acquired outside of Iowa. [Amended August 10, 1962]

94 Sales by farmers. Sales of grain, livestock, or any other farm, garden, or horticultural products by the producer thereof, ordinarily constitute sales for resale or for processing and as such are not subject to the tax.

Where farmers sell eggs, poultry, fruit, vegetables, dairy products to ultimate consumers or users, they must hold a sales tax permit and report sales tax on the gross receipts from their sales. [Amended August 10, 1962]

Section 422.42(5)

94.1 Sales to farmers and others. (Exemption of Certain Products Related to Agricultural Production)

1. Feeds sold for use in feeding livestock or poultry for market and, effective December 27, 1956, antibiotics administered as an additive to feed or drinking water for livestock or poultry produced for market are not subject to the sales or use tax.

2. If purchased on or after July 4, 1957, materials, excluding tools and equipment, to be used in disease control, weed control, insect control or health promotion of plants or livestock produced as a part of agricultural production for market and tangible personal property consumed in implements of husbandry engaged in agricultural production are exempted from the sales tax. Such items continue to be subject to the use tax. The term "tangible personal property consumed in implements of husbandry", as used above, is construed to include only motor vehicle fuel used in farm tractors or used in operating farm equipment drawn or propelled by farm tractors engaged in agricultural production.

3. Sales of control materials, but not tools or equipment, to persons engaged in the business of exterminating insects or weeds, but not rodents, when used as a part of agricultural production for market are exempted from sales tax the same as sales made directly to farmers for the same purposes.

4. Sales of health promotion materials, but not tools or equipment, to persons engaged in health promotion of plants or livestock, when used as a part of agricultural production for market are exempted from sales tax the same as sales made directly to farmers for the same purposes. [Filed August 5, 1958]

95 Filling stations, sales of gasoline and other petroleum products.

A "person" who operates a filling station is making retail sales of tangible personal property and is also consuming other personal property in rendering services to his customers. Many filling stations sell spark plugs, radiator caps, batteries, tires, motor oil, transmission and differential greases, beverages, tobacco products, etc., at retail and sales tax is applicable on the respective gross receipts.

All items consumed by the filling station operators in rendering services to their customers are subject to either sales or use tax when acquired. Some of the items in this group are sponges, soap, chamois, polish, wax, tire patches, chassis lubricants, water, tools, service equipment and any other commodities essential to service work.

Sales tax does not apply on gasoline sold by a filling station as a credit provision is contained in section 422.46 of the sales tax law for the special tax imposed by the state. [Amended August 5, 1958]

95.1 Filling of tractor tires with calcium chloride. The sale of calcium chloride for filling tractor tires is taxable. Where segregation is made as to the labor of installing calcium chloride within the tractor tires, no sales tax is due on the labor charge. If segregation is not made, sales tax is due on the total charge. [Amended August 10, 1962]

Section 422.42 (6)

96 Florists and nurserymen. Florists and nurserymen selling flowers, plants, trees, shrubs, grass and seeds at retail are liable for tax on their gross sales, notwithstanding the fact that such merchandise shall have been produced by the seller. This rule applies regardless of whether such articles are sold from a store, a curb, a market, a greenhouse, a farm, or any other place.

Florists are engaged in the business of selling tangible personal property at retail and are liable for payment of the sales tax, measured by receipts from sales of flowers, wreaths, bouquets, potted plants, and other items of tangible personal property.

Where a nurseryman or florist sells shrubbery, young trees and similar items, and as a part of the transaction transplants them in the land of the purchaser for a lump sum or flat rate, the transaction is considered a construction contract with the nurseryman or florist the consumer of all personal property expended. [Amendment filed August 19, 1954]

Where florists conduct transactions through a florists' telegraphic delivery association, the following rules will apply in the computation of tax liability:

1. On all orders taken by an Iowa florist and telegraphed to a second florist in Iowa for delivery in the state, the sending florist will be held liable for tax measured by two percent of his receipts from the total amount collected from the customer, except cost of telegram where separate charge is made therefor.

2. In cases where an Iowa florist receives an order pursuant to which he gives telegraphic instructions to a second florist located outside Iowa for delivery of flowers to a point outside Iowa, tax will likewise be owing with respect to the total receipts of the sending florist from the customer who placed the order.

3. In cases where Iowa florists receive telegraphic instructions from other florists located either within or outside of Iowa for the delivery of flowers, the receiving florist will not be held liable for tax with respect to any receipts which he may realize from the transaction. In this instance, if the order originated in Iowa the tax will be due from, and payable by, the Iowa florist who first received the order and gave telegraphic instructions to the second florist.

Fuel used by greenhouses and others for the purpose of growing of plants is not deemed to be processing and is, therefore, not exempted from the retail sales tax. Again this holding of the com-

mission is based on the case of Kennedy v. Iowa Board of Assessment and Review, 224 Iowa 405, said case holding that the growing of plants is not a processing activity.

96.1 Sod and dirt. The sale of sod and dirt by a person engaged in such business is taxable in the same manner as the sale of other tangible personal property. Where a person selling sod contracts to sod a given area for a fixed or lump sum fee, then such contractor shall be governed by the rules relating to lump sum contractors performing contracts for the improvement of real property. Persons selling sod or dirt at retail are required to procure a retail sales tax permit. [Amended August 10, 1962] [253 Iowa 994]

97 Hatcheries. When egg-type cockerel chicks, broiler chicks and turkey poults are sold for consumption, sales tax applies on the gross receipts from such sales.

Where pullets and poults are sold for production purposes, the receipts from such sales are exempt from sales tax. This exemption also applies to hatcheries where they hatch pullet chicks and then raise them until sixteen to twenty weeks of age when they are sold as started pullets.

Services furnished by hatcheries which are exempt from sales tax include the custom hatching of eggs and the custom brooding of chicks. [Amended August 10, 1962]

Section 422.42(3)

98 Seeds, plants, bulbs and like property. Seeds, roots, plants, bulbs, shrubbery and like property may be sold tax-free by retailers when such sales are made to one engaged in the business of operating a nursery or a commercial garden. Where a sale is made to a final consumer, it is taxable. The tax liability depends upon the use to which the seeds and other items are to be put, and not on the kind or variety of the same.

This rule applies also to seeds, roots, plants, bulbs, and like personal property purchased by farmers engaged in regular agriculture, in other words, all seeds purchased by farmers for commercial planting are exempt from the retail tax.

98.1 Materials used for seed inoculations. All forms of inoculation, whether for promotion of better growth and healthier plants or for prevention or cure of mildew of plants, or disease of seeds and bulbs, are intended for the same general purpose; therefore, no retail sales tax is imposed on any material used for inoculation or for any of the purposes abovementioned.

98.2 Plant hormones. The gross receipts from the sale of plant hormones are exempted from the retail sales tax.

See rule No. 25.4, commercial fertilizer.

99 Dairy products sold by co-operatives to members or patrons. No sales tax exemption shall be allowed on gross receipts from the sale of dairy products to customers or patrons of creameries. Gross receipts from stockholders or members of co-operative creameries or creamery associations, resulting from the exchange of butter or other dairy products for cream supplied by said stockholders or members shall be included in the receipts on which retail sales tax is computed. Gross receipts from the sale or exchange of buttermilk for feeding livestock intended for sale are not taxable.

100 Rural electrification associations. Rural electrical co-operative associations are required to collect and remit the sales tax on sales of electric energy to domestic, commercial, or industrial consumers. They should execute resale certificates to the companies from whom they purchase electric current for resale and obtain certificates from consumers to whom they sell for processing.

Associations are required to collect and remit the sales tax on all sales by them of appliances to users or consumers and to pay the retail sales tax on the purchase of all supplies and equipment which they do not sell, except as otherwise provided in these rules.

101 Sales of fertilizers. The word "fertilizer" means a commodity containing one or more substances to increase the available plant food content of the soil and as a result becomes a part of the products grown therein for the purpose of producing for sale or aiding in such production for sale. Sales of commercial fertilizers are not subject to the tax.

See ruling of attorney general of March 28, 1945.

102 Sales of livestock and poultry feeds. Sales of feed for poultry or livestock are not taxable. Vitamins and minerals are considered and defined by the dictionary as a food or a food supplement. Antibiotics when to be administered as an additive to feed or drinking water and vitamins and minerals sold for livestock and poultry are exempted from the sales tax. Vitamins sold for human consumption are not exempted. [Amended August 5, 1958]

(See Rule No. 94.1(1)—Sales to Farmers)

102.1 Sales of pet and bird feeds. Sales of pet and bird feeds for dogs, cats and other pets are not exempt from the retail sales tax except where such animals are raised for sale by a person regularly engaged in raising dogs and pets and who has at the time the exemption is claimed, procured a retail sales tax permit for the sale of such pets.

102.2 Sales of bedding and litter. The sale of bedding and poultry litter, except straw, is not exempted from the retail sales tax. Straw, because of its dual purpose, shall be construed as feed and governed by the provisions of rule No. 102.

102.3 Sales of pets. The sale of dogs, cats, birds and the like sold as pets are subject to sales

tax. The retailer who sells such pets must procure a sales tax permit and report all sales tax on the gross receipts therefrom.

The sale of horses is subject to sales tax. The term "horse" is here used in its generic sense and includes all variations of equestrian quadruped whether a pony, mule, gelding, stallion, mare, filly, jackass, or ass, regardless of the purpose for which the sale is made, except that sales made to a bona fide dealer for the purpose of resale are nontaxable. Any dealer making retail sales of "horses," as herein used, must procure a sales tax permit and report all sales and remit the sales tax on the gross receipts therefrom.

A "dealer" may be defined as one who engages in the purchase and sale, or sale, of horses as defined herein, or one who is required to be registered as a dealer under the federal packers and stockyard Act as amended.

There is further excluded from the purview of this rule, the sale of any "horse" for the purpose of "processing" as defined by section 422.42(3), Code of Iowa.

Proof of sale for processing may be had by production of a slaughter affidavit issued on forms provided by and under authority of the state secretary of agriculture in pursuance of his duties under the law. [Filed August 10, 1962; amended November 30, 1964]

This rule is intended to implement section 422.43, Code of Iowa. (This rule was not approved by the Department Rules Review Committee)

103 Meal tickets, coupon books and merchandise cards. Where meal tickets, coupon books or merchandise cards are sold by persons engaged exclusively in selling taxable commodities or services, the tax shall be levied at the time the meal ticket, coupon books or merchandise cards are sold to the customers. No tax will then be added at the time of actual purchase of merchandise or services. For example, a person purchasing a meal ticket entitling him to $5.50 worth of meals, and paying $5.00 therefor, will pay ten cents tax at the time he purchases the ticket. For each meal subsequently consumed, the restaurant, cafe, cafeteria, etc., will punch out of the card the net price of the meal exclusive of the tax.

104 Hotels, lodging and boarding houses. The gross receipts of hotels and lodging houses from charges for rooms and other hotel service are not taxable. Where a hotel or lodging house provides both rooms and meals to the public, the tax shall apply to the entire charge, except that if the charge for meals and drinks is segregated, the tax will apply only to the receipts from their sale.

Sales to hotels or lodging houses of food supplies which become component parts of taxable meals served by them are not subject to the tax.

Where hotels, lodging and rooming houses operate amusements or amusement devices or coin operated machines, the gross receipts therefrom shall be included in the gross receipts from sales on which the tax is computed. [Amendment filed August 19, 1954]

105 Railway dining cars. The sale of meals or other tangible personal property on railway trains and dining cars being operated in or through the state of Iowa, constitutes sales at retail, the gross receipts from which are taxable, provided such meals or other tangible personal property are ordered within the boundaries of the state. It is immaterial whether or not such meals or other property be consumed within the state.

Where beer, cigarettes, cigarette papers or other articles of tangible personal property which have been purchased in a state other than Iowa for resale in dining cars, such articles of tangible personal property are to be included in the gross receipts on which sales tax is computed. [Amended November 30, 1964]

105.1 Applies to sales tax only. **Sales on trains.** Persons selling tangible personal property on trains other than in railway dining cars are making retail sales within the meaning of the law and are requird to procure a retail sales tax permit. [Amendment filed August 19, 1954]

106 Student fraternities and sororities. Student fraternities and sororities are not considered to be engaged in the business of selling tangible personal property at retail within the meaning of the sales tax Act, when they provide their members with meals and lodging, for which a flat rate or lump sum is charged. Sellers of foods, beverages and other tangible personal property to such organizations for use in the preparation of meals are, in such instances, making sales at retail and will be held liable for the tax.

However, where student fraternities or sororities engage in the business of serving meals to persons other than members, for which separate charges are made, or where they operate canteens through which tangible personal property is sold at retail, as to such sales they become liable for the tax.

Where student fraternities or sororities do not provide their own meals but these are provided by caterers, concessionaires or other persons, such caterers, concessionaires or other persons will be held liable for the tax with respect to their receipts from meals so furnished. A similar liability attaches to persons engaged in the business of operating boarding houses, whether for students or other persons.

107 Applies to sales tax only. **Truckers engaged in retail business.** Truckers or haulers who sell tangible personal property to ultimate users or consumers, such as feed, ice, building supplies and other items, are taxable on the gross receipts from such sales. It is immaterial whether sales are few and infrequently made, the fact that the trucker makes sales is evidence that he is engaged in retail business in direct competition with established merchants. Therefore, when truckers

make sales to ultimate users or consumers, they must collect and remit the tax to this commission. (Coal truckers, see rule No. 109; foreign truckers, see rule No. 110.)

108 Delivery charges on purchase of coal, fuel and other merchandise by retailers. The transportation or delivery charges from any source of supply, such as a mine or other points, to a retailer's place of business, are not a basis for a deduction from gross receipts when such tangible personal property is subsequently sold at retail.

109 Applies to sales tax only. **Iowa mine operators selling to coal truckers and haulers.** Operators of mines in Iowa are deemed retailers of coal and subject to the collection and remittance of the sales tax in the following cases:

1. On all sales or deliveries to truckers and haulers who do not have an established place of business.

2. Where a trucker or hauler procures coal at the mine for delivery to one by whom he is employed to procure and deliver the coal.

It is immaterial in either case whether the mine operator received payment for the coal from the user or consumer or from the trucker or hauler, as he is deemed to be a retailer of tangible personal property for use or consumption. For nonresident truckers, see rule No. 110.

Section 422.42

110 Applies to sales tax only. **Foreign truckers selling at retail in Iowa.** Foreign truckers or persons engaged in selling tangible personal property at retail in Iowa by means of hauling said property into the state with motor vehicles bearing foreign license plates, are required to report and remit sales tax on a nonpermit basis. If, in the judgment of the commission, it is deemed necessary and advisable in order to secure the collection of this tax, the seller shall be required to post either a cash bond of not less than one hundred dollars, or a surety bond of not less than five hundred dollars, issued by a solvent surety company authorized to do business in Iowa. The type of the bond to be determined by the commission. [Filed August 19, 1954]

111 Applies to sales tax only. **Admissions tax.** The tax is imposed upon the gross receipts from the sale of admissions, by ticket or otherwise (whether by single ticket or by season or subscription tickets) to places at which amusement, entertainment, or recreation is provided. The term admission does not include regular dues paid which entitle one to usual club or similar organization privileges even though one of the privileges is the right to participate. But where the chief or sole privilege of a so-called membership is a right to admission to certain particular performances or to some place for a definite number of occasions, the amount paid for such membership is taxable. The liability for collection and payment of the tax rests upon the one who charges and collects for the admissions. Where theaters or other places of public amusement operate cigar stores, soda fountains, candy stores, and such concessions selling tangible personal property, they incur liability and must hold retail sales tax permits and collect and remit the tax. Complimentary tickets shall be taxable on the regular admission charge of a ticket for a like seat.

The charge for booth reservations is in the nature of an admission to the particular booth in the same manner that a reserved seat is a special admission to a particular place in a circus, theater or like place of amusement. For the reason stated, retail sales tax must be computed on the gross receipts for admission to places of amusement including the amount collected for booth reservation.

The operation of a checkroom is a service. It is in no manner an admission to any amusement or athletic event. Therefore, the gross receipts from the operation of coat or hat checkrooms should not be included in the gross receipts on which retail sales tax is computed.

Membership fees should not be included in the gross receipts on which the amusement tax is computed, where the organization is a legitimate one and membership fees are bona fide. However, on purely commercial golf courses or like amusements where the membership fee is nothing more or less than a season ticket, then the receipts from the so-called membership fees shall be included in the gross on which tax is computed.

111.1 Amusements. The gross receipts from amusements of every kind and character operated for profit, and the gross receipts from games of every kind and character operated for profit or gain are taxable under the provisions of section 422.43.

The tax applies to both legal and illegal amusements. The collection of tax or the issuance of a retail sales tax permit shall not be construed to condone or legalize any games of skill or chance or slot-operated devices prohibited by law. The amusement tax is not a privilege tax but is a tax on the gross receipts from amusements computed after the gross receipts shall have been received.

Gross receipts mean and include all money taken in by the operator of any amusement, game or device operated for profit in the state of Iowa, whether received in money, trade, barter or donations.

The gross receipts from spindles of numbers and glass jar numbers of "tips" and other like games include the total amount taken in by the operator of such games. Pay out in cash or otherwise to winners is not deductible from the gross receipts on which the tax is to be computed.

The gross receipts from slot machines, where the jackpot is locked and will not pay when the player "hits the jackpot," is the total amount which the operator thereof takes from the machine, notwith-

standing the fact that there is a guaranteed amount to be paid to the winner of the jackpot. Where the jackpot is refilled from the amount deposited in the machine by the player and drops when the player "hits the jackpot," the gross receipts is the amount which the operator of such machine takes from the receptacle in which the proceeds from the machine are deposited.

The gross receipts from operation of a slot machine that vends coins is the amount of money removed from the said machine. That is true even though the jackpot may be guaranteed and paid out independently of the machine. In other words the sales tax must be computed as two percent of all money taken from the machine regardless of what happens to the money after having been removed therefrom.

The gross receipts from fortune telling and fortune tellers are taxable amusements within the meaning of the law. Every concession at a fair, carnival or like place is considered an amusement where an admission is charged or a collection of voluntary contributions taken by the person operating the concession. The only exemption is advertising booths at which no taxable personal property is sold and where entertainment is furnished without charge or contribution.

Where cigarettes are given away on punch boards, the cigarettes are not deductible even though tax has been paid on the cigarettes. Punch boards are considered amusement games. A punch board giving cigarettes away is no different from any other board, the cigarettes merely become a prize in a game.

The tax applies on the gross receipts from the sale of chances by all organizations. The only exception is when the entire net proceeds of the sale are expended for educational, religious or charitable purposes.

A person operating amusements is required, as far as practicable, to collect sales tax from patrons. The law which provides for tax on amusements and games, is an amendment to the sales tax law, therefore, all of the provisions of the sales tax law apply to amusement tax.

Any municipal swimming pool, golf course or other playground and athletic activity operated solely by a municipality and not for profit is not covered by this Act, and, therefore, not subject to the tax. All private pools, golf courses and other playground and athletic activities are within the provisions of the statute and are taxable. [Amended August 5, 1958 and October 10, 1958]

Section 422.43

For tax on admissions see rule No. 20.

111.2 River steamboats. River steamboats hauling passengers on pleasure rides on the Mississippi river or any other river within the state or which forms a boundary line between this and another state is an amusement enterprise within the meaning of the law, where passengers are picked up or tickets sold to them on the Iowa side of the river the gross receipts from such sales are taxable.

Section 1.3 of the Code provides that the state has jurisdiction on the waters of any river or lake which forms a common boundary between this or any other state and therefore such boat rides and amusements are not to be considered as interstate transportation.

For tax on admissions see rule No. 20.

111.3 Rental of personal property in connection with the operation of amusements. The law provides for a tax of two percent on the gross receipts from commercial amusements. The gross receipts upon which retail sales tax shall be computed shall include the rental of personal property in connection with the operation of amusements. Such rentals shall include towels, swim suits, boats, golf clubs, roller skates, saddle horses and all other personal property or equipment used by patrons in connection with the operation of commercial amusements notwithstanding the fact that the rental of such personal property may be billed separately. [Amended November 30, 1964]

For tax on admissions see rule No. 20.

111.4 Admissions to state, county, district and local fairs. The law with reference to tax on amusements and entertainments may be found in section 422.43. The law in subsection 4 of Code section 422.45 exempts the gross receipts from sales of tickets or admissions to state, district, county, or local fairs. There is no doubt that the sale of tickets or admissions to a fair, notwithstanding the fact that an automobile or other prizes shall be given away to the holder of the lucky ticket of admission, is exempted. Moreover, the law which placed a tax on amusement devices provides, "but no tax shall be imposed upon any activity exempt from sales tax under the provisions of subsection 4 of section 422.45, Code of 1946", which grants exemptions as follows:

"The gross receipts from sales of tickets or admissions to state, county, district and local fairs, and the gross receipts from educational, religious, or charitable activities, where the entire net proceeds are expended for educational, religious, or charitable purposes."

It is evident that it was the intention of the legislature to exempt tickets or admissions to state, county, or local fairs; such an exemption is not affected by the tax on amusements. Therefore, there is no sales tax on tickets or admissions to a fair even though a prize may be given in connection therewith.

The exemption as to state, county and local fairs applies to all of the activities and admissions to events operated solely by the fair association in connection with a fair. Therefore, the exemption applies equally to admissions to the fair, to the grandstand, to horse races and other performances and also to evening entertainments in front of the grandstand conducted by the fair association.

The exemption does not apply to any entertainment of activity conducted by a concessionaire even though the fair association may be interested in the concession and obtains a percentage of the receipts.

For tax on admissions see rule No. 20.

111.5 Horse show not a fair—fair defined. The holding of a horse show does not constitute a state, county, district or local fair. Subsection 4 of the Code section 422.45 exempts the gross receipts from the sale of tickets of admission to state, county, district and local fairs from the imposition of a retail sales tax. The fact that the fair association is a nonprofit organization is not material, for retail sales tax is not concerned with either profit or loss but is a tax on the gross receipts from the sale of tangible personal property at retail and the sale of tickets or admissions to places of amusement. There can be no doubt that a horse show is an amusement, notwithstanding the fact that it is sponsored by a county fair association.

The term "Fair" is defined in section 174.1, Code of 1950, 1954, as follows:

"1. 'Fair' shall mean a bona fide exhibition of agricultural, dairy and kindred products, livestock and farm implements."

It will be noted that the several things to be exhibited are connected by the conjunctive word "and". A show which exhibits horses primarily for entertainment is neither a state, district, county or local fair, therefore, the gross receipts from the sale of tickets of admission to such an exhibition are subject to the retail tax.

The powers of a fair association which is designated as a "society" in the Code are defined in Code section 174.2 as follows:

"POWERS OF SOCIETY. Each society may hold annually a fair to further interest in agriculture and to encourage the improvement of agricultural products, livestock, articles of domestic industry, implements and other mechanical devices. It may offer and award such premiums as will induce general competition."

The society is limited to the holding of one fair annually. It is implied from the powers granted the society that the one annual fair is the only fair to be held.

For tax on admissions see rule No. 20.

111.6 Commercial amusement enterprises—companies or persons which contract to furnish show for fixed fee. Prior to the enactment of chapter 226, Acts of the Fifty-second General Assembly, the tax was limited to two percent of tickets or admissions to places of amusement. Said chapter 226 is now included in section 422.43. A tax is imposed beginning with the first day of July, 1947, upon the gross receipts derived from the operation of all forms of amusement devices and commercial amusement enterprises so that it is not necessary for the operator of an amusement device to charge an admission. The gross receipts are taxable without regard to the manner in which such gross receipts are received. For the reasons above stated, any circus, show, carnival company or person contracting with persons to put on a show for a fixed fee is liable for tax at the rate of two percent of the amount paid in for such performances or operation of the amusement device.

For tax on admissions see rule No. 20.

Section 422.43

112 Applies to sales tax only. **Skating rinks.** The gross receipts from the operation of an ice or roller skating rink are taxable, including receipts from renting the rink to individuals and parties and fees charged for rental of skates. Skating being an amusement all of the provisions of rules No. 111 and 111.1 apply thereto.

113 Sales of ice. All sales of ice for domestic or commercial consumption are taxable.

Persons making retail sales of ice must pay the tax even though the purchaser thereof uses the same in cooling perishable personal property which is to be resold by him.

Sales of cube ice to restaurants or taverns, which is placed in drinks sold at the place of business, are not subject to the sales tax. Sales of ice for use in air cooling devices or refrigerator units are taxable.

The gross receipts from the sale of ice are taxable where ice is sold to railroads or other persons to be used for icing or reicing cars belonging to the carrier, other carriers or persons owning such cars.

Persons selling ice are required to hold a retail sales tax permit and remit tax to the commission in accordance with the provisions of this rule. Railroads are deemed to be the consumers and not retailers where ice is used by them for icing or reicing cars for shippers even though a charge is made for such service.

114 Photographers and photostaters. Tax applies to sales of photographs and photostat copies, whether or not produced to the special order of the customer, and to charges for the making of photographs or photostat copies out of materials furnished by the customer. No deduction is allowable on account of such expenses of the photographer as travel time, rental of equipment, or salaries or wages paid to assistants or models, whether or not such expenses are itemized in billings to customers.

Tax does not apply to sales to photographers and photostat producers of tangible personal property which becomes an ingredient or component part of photographs or photostat copies sold, such as mounts, frames and sensitized paper, but does apply to sales to the photographer or producer of materials used in the process of making the photographs or photostat copies and not becoming an ingredient or component part thereof, such as chemicals, trays, films, plates, proof paper, and cameras. [Amended August 10, 1962]

Section 422.42 (3)

114.1 Photo finishers. Tax applies to charges for printing pictures or making enlargements from negatives furnished by the customer but not to charges for developing the negatives if such charges are separately stated. Tax does not apply to charges for tinting or coloring pictures furnished to the finisher by the customer. Tax applies to sales to photo finishers of all tangible personal property used by them in developing negatives, finishing pictures, and coloring or tinting pictures furnished by customers, except sensitized paper upon which the prints are made, and frames and mounts sold along with the finished pictures. [Amended August 10, 1962]

Sections 422.42 (6) and 422.42 (5)

114.2 Sales of photographs to newspaper or magazine publishers for reproduction. The sale of photographs by a person engaged in the business of making and selling photographs to newspaper or magazine publishers for reproduction is taxable. [Amended August 10, 1962]

Section 422.42 (6)

115 Gravel and stone. Where a contract is entered into between a contractor and a county and the contract calls for a stockpile delivery along a road to be improved, there is a sale of tangible personal property to the county. Sales tax does not apply on such transactions for it qualifies for the sales tax exemption enacted by the 55th General Assembly that became effective on July 4, 1953. Where a contract provides not only for the sale and delivery of materials but also for the conversion thereof into realty improvements, the contractor is the ultimate consumer of the material used and is liable for tax. The tax would apply on the purchase price of the material or the production cost thereof. [Amended August 10, 1962]

EXAMPLE 1: A contractor enters into contract with a county to furnish the materials and labor necessary for the construction of a cement culvert. That is a construction contract. The contractor is considered the ultimate consumer of the materials used, and is liable for the tax thereon as stated in the above paragraph.

Sections 422.42 (6), 422.42 (10) and 422.42 (12)

116 Antiques, curios, old coins or collectors' postage stamps. Curios, antiques, art work, coins, collectors' postage stamps and such articles sold to or by art collectors, philatelists, numismatists and other persons who purchase or sell such items of tangible personal property for use and not primarily for resale, are sales at retail subject to the tax.

Stamps, whether canceled or uncanceled, which are sold by a collector or person engaged in retailing stamps to collectors, are taxable.

The distinction between stamps which are purchased by a collector and stamps which are purchased for their value as evidence of the privilege of the owner to have certain mail carried by the U.S. government, is that which determines whether or not a stamp is taxable or not taxable. In other words, a stamp becomes an article of tangible personal property having intrinsic value when, because of the demand, it can be sold for a price greater than its face value. On the other hand when a stamp has only extrinsic value as evidence of the right to certain services or as indicating that certain revenue has been paid it is not subject to either retail sales tax or use tax.

It is not the custom to trade in stamps which have no inherent value, but when, because of scarcity of the stamp, its value as a piece of printed paper increases in proportion to the demand or scarcity of such an article; then the stamp becomes an article of tangible personal property and its sale is taxable.

Stamps are not taxable when purchased for and intended to be used for obtaining postal service or indicating that certain revenue has been paid.

117 Pawnbrokers. Pawnbrokers are primarily engaged in the business of lending money for the repayment of which they accept as security tangible personal property from the owner or pledgor.

In case the pledgor does not redeem the property pledged or pawned within specified statutory time, such property is forfeited to the pawnbroker, to whom title thereto passes at such time.

Where pawnbrokers thereafter sell such articles at retail, they are making sales within the sales tax law, and must collect and remit the tax thereon.

118 Druggists and pharmacists. Pharmacists and registered prescription druggists engaged in the business of selling drugs and medicines on prescription, and other merchandise at retail, are liable for tax on the gross receipts from such sales.

Sales made by pharmacists or prescription druggists to physicians, surgeons, dentists, veterinarians, or other consumers and users are sales at retail and are taxable.

(See rules Nos. 92, 94.1 and 102)

119 Memorial stones. Persons engaged in the business of selling memorial stones are selling tangible personal property, and when such stones are sold to final buyers, the gross receipts from such sales are taxable. Where the seller of a memorial stone agrees to erect a stone upon a foundation, the total gross receipts from the sale, including the erection of the foundation and the stone, are taxable, since the foundation is deemed to be a part of the sale of the memorial stone, and the total selling price, including the foundation, represents the sale at retail.

Charges for inscription, or other work incident to preparing a stone for the customer before it is erected, constitute a part of the selling price of the stone, and are therefore taxable.

Charges for inscription upon a stone subsequent to the erection of same, are considered sales of service upon which no sales tax applies.

120 Applies to sales tax only. **Commercial telephone exchanges.** All telephone companies operating an exchange must hold a retail sales tax permit and all companies operating more than one exchange must have a sales tax permit for each business office that it maintains. They must collect and remit sales tax upon the gross receipts from such operations. [Amended August 10, 1962]

The tax shall apply to receipts from the transmission of messages and conversation wholly within the state, for which the exchange collects the charge. In the case of a pay station, the exchange must pay the tax on the total receipts therefrom. Where a minimum amount is guaranteed to the exchange from any pay station, the tax shall be computed on the full amount collected.

Fees known as switch board charges paid to a commercial telephone exchange by telephone lines, not operating switch boards, must be included in the gross receipts of such commercial exchange.

Commercial telephone companies which levy assessments upon their subscribers on a quarterly, semiannual, annual or any other basis, must include the amount of such assessments in their gross receipts.

In computing the tax due this state, federal taxes separately billed the customer shall be excluded.

Exemption: Receipts from telephone services rendered in connection with essential governmental functions of the United States, state of Iowa, counties, cities, school districts and other governmental subdivisions of the state of Iowa are exempt from tax, except sales to any tax levying body used by or in connection with the operations of any municipally-owned utility engaged in selling gas, electricity or heat to the general public. [Amendment filed August 19, 1954]

Collection of the tax from users: The tax on local exchange service shall be computed on the amount billed by the exchange to each subscriber or member for such service and the amount of the tax shall be indicated on the toll statement, excluding the federal tax on the toll calls.

Telegrams charged to the account of telephone subscribers and billed by the telephone company shall appear on the toll bill with the tax added.

Where one commercial telephone company furnishes another commercial telephone company services or facilities which are used by the second company in furnishing telephone service to its customers, such services or facilities furnished to the second company are in the nature of a sale-for-resale and the charges therefor are exempt from the sales tax.

120.1 Communication services furnished by hotel to its guests. Hotels in the state of Iowa, as a common practice, purchase telephone communication service from telephone companies and furnish such services to the guests of the hotel. The hotel makes a charge for this communication service to its guests in an amount which exceeds the cost of such service to it from the telephone company.

The retail sales tax shall apply to the entire charges which the hotel makes to its guests for such communication service whether the guest calls be local or long distance, except that interstate calls are exempt.

However, for the efficient administration of the law, the hotel shall remit to the telephone company a tax of two percent of the gross receipts which the telephone company derives from the charges for all communication services, except interstate calls, and the telephone company shall be responsible for reporting and remitting such tax to the state.

In addition to the foregoing, the hotel shall report to the state as its gross receipts, the amount which it charges its guest which is over and above the amount of the guest call charges to the hotel by the telephone company, sales tax or federal excise tax not considered, and remit two percent tax thereon.

Hotels making such extra charges on guest calls must hold a retail sales tax permit, but a separate permit is not needed where one is held for other sales at the same location.

The provisions of this rule relating to the method of reporting and remitting the tax shall apply to communication service rendered on and after March 1, 1951.

121 Applies to sales tax only. **Sales to telephone and telegraph companies.** Receipts from sales of tangible personal property to telephone and telegraph companies are taxable under the provisions of the retail sales tax law.

For purchases subject to use tax, see rule No. 191.

122 Applies to sales tax only. **Telegraph service.** Sales of service for the transmission of messages, night letters, day letters and all other messages of similar nature from person to person within this state are subject to the retail sales tax. Any such service between an Iowa resident and a nonresident is considered interstate commerce, exempt from the tax.

123 Applies to sales tax only. **Private clubs.** Private clubs, such as country clubs, athletic clubs, fraternal and other similar social organizations, are retailers of tangible personal property sold by them, even though the sales are made to members only. Therefore, such organizations shall procure a retail sales tax permit and report and pay retail sales tax on the gross receipts of all sales made by such clubs, less the allowable deductions.

Where clubs operate amusements or amusement devices or coin-operated machines the gross receipts therefrom shall be included with the gross receipts from other taxable sales on which the tax is computed. [Amendment filed August 19, 1954]

124 Aircraft sales. A. The receipts from the sale of aircraft at retail in Iowa are subject to the retail sales tax.

Persons selling aircraft in Iowa for the purpose of resale shall secure from the purchaser a certificate of resale in substantially the form as follows:

The undersigned .....
Name and Address of Purchaser
hereby certifies that the .....
Description of Purchase
is being purchased for the purpose of resale only; that same will not be used for any other purpose than that of demonstration in connection with the sale of same in the regular course of business; that same is not to be used in conducting a flying school or rendering passenger service for hire; that the undersigned holds retail sales tax permit No. .....

.....
Signature of Purchaser

B. In event an aircraft is purchased tax-free on the theory of resale by a person regularly engaged in selling such equipment at retail in Iowa, but is subsequently appropriated by the retailer for use in conducting a flying school or rendering passenger service for hire, or for personal private use or for any other purpose than strictly demonstration in the regular course of sales, the retailer shall be liable for the payment of the sales tax on such equipment so appropriated at the close of the quarterly period during which the equipment was placed to such use. The tax will be due on such equipment computed on the retailer's purchase price and the cost of which should properly be shown under item 1 "*a*" of the retail sales tax return blank ST-50.

125 Schools sponsoring national defense training school courses. Local schools purchasing tangible personal property to be paid for by federal funds, outside the state of Iowa, for use in national defense training school courses in Iowa, are not subject to the payment of use tax, nor are Iowa retailers subject to the payment of sales tax when such property is sold to local schools for such purpose.

Iowa retailers may be exempt from payment of sales tax in respect to property sold to such schools for defense training purposes, if the seller secures from the school a statement certifying the use to be made of the property and indicating the project or training course number. A local school, when purchasing from out-of-state suppliers registered to collect the use tax, should give a like certificate to such registered supplier in order that the billing of the use tax may be omitted.

126 Rentals off tangible personal property business.

1. Persons who are engaged in the business of leasing, renting or loaning tangible personal property, to users or consumers, but who are not in the business of selling the type of property being leased, rented or loaned, shall for the purpose of the retail sales tax law and the use tax law be deemed and regarded as consumers or users of such property so leased, rented or loaned. This means that retailers making sales in Iowa of such property to such persons for such purposes are selling at retail within the meaning of the retail sales tax law and the gross receipts so derived are subject to sales tax.

2. Further, this means that such persons who purchase out of Iowa the property to be so rented, leased or loaned to lessees for use in Iowa, owe use tax to the state of Iowa, based upon their purchase price of the property so purchased, the use tax to be paid by such persons to the non-Iowa vendor (if registered to collect Iowa use tax) or otherwise directly to the Iowa state tax commission, except, in the case of motor vehicles or trailers the use tax is payable to the county treasurer in Iowa who issues the original Iowa registration for the vehicle. [Amended August 5, 1958]

126.1 Leasing or renting of tangible personal property to lessees who use or consume the property, by persons engaged in such business, but who are also engaged in the business of selling the same type of property to consumers or users.

1. Persons engaged in the business of leasing, renting, or loaning to users or consumers in Iowa the same type of tangible personal property which they are also engaged in the business of selling at retail, will, when they lease, rent or loan tangible personal property with an option to purchase to users or consumers, be deemed and considered as making sales at retail within the meaning of section 422.42 (3), Code of Iowa, and therefore, subject to the payment of sales tax measured by the amount of gross rental receipts plus the amount of gross sales receipts when the item is sold. Sales tax shall be remitted to the state on such transaction in the same manner as is provided in section 422.42(6), Code of Iowa, for sales made under conditional sales contract, except new motor vehicles and new trailers shall be subject to the provisions of section 423.7 and 423.8 and use tax shall be paid in full to the county treasurer or state motor vehicle registration division before the original Iowa registration is issued.

2. Persons out of Iowa, who lease, rent or loan tangible personal property with an option to purchase, to lessees to be used by the lessee in Iowa, shall be considered and deemed to be making a sale of the property and the lessee shall be considered and deemed to be making a purchase of the property within the meaning of section 423.1 (2), Code of Iowa, and such lessees shall be subject to the payment of use tax measured by the total amount of rental receipts plus any amount paid as purchase price. Retailers collecting use tax for the state, who lease with an option to purchase, shall collect the use tax and remit to the state as provided by rule No. 188 and section 423.13.

3. A transaction called a lease with an option to purchase, where the rental receipts are nominal and the option to purchase is not exercised by the

lessee within a reasonable time, will be deemed and regarded as a rental without an option to purchase and the tax will be applied according to the provisions of Rule No. 126. [Amended August 5, 1958]

See rule No. 166.

127 Purchases or sales by schools—sales tax. 1. When purchasing coal, library books, supplies, equipment, etc., except new motor vehicles, in Iowa for consumption, or use by the school but not for sale, schools are required to pay the two percent sales tax to the retailer at the time of purchase, the same as private individuals. Effective July 4, 1953, public schools are exempt from sales tax. [Amendment filed August 19, 1954]

2. When purchasing textbooks and other supplies in Iowa for sale and not for consumption or use, schools are not required to pay the two per cent sales tax.

3. When selling to pupils textbooks or supplies that belong to the school district where the net proceeds go into the general fund, the seller appointed by the board as depository agent is not required to collect the two percent sales tax whether such seller is a retail merchant or some person appointed to make such sales at the school building, but if such books or supplies are privately owned the seller must collect said tax.

4. When selling tickets to athletic games and other school activities, where the entire net proceeds thereof are expended for school purposes, schools are not required to collect the two percent state sales tax.

Use Tax. 1. When purchasing coal, library books, supplies, equipment, etc., except new motor vehicles, outside of Iowa for consumption or use by the school or for rental purposes but not for sale, schools, in the event the said use tax has not been paid to their supplier, are required to pay the two percent use tax direct to this commission, the same as private individuals. Effective July 4, 1953, public schools are exempt from use tax. [Amendment filed August 19, 1954]

2. When purchasing textbooks and other supplies outside of Iowa for sale and not for consumption or use, schools are not required to pay the two percent use tax.

3. When purchasing new motor vehicles outside or inside of Iowa for use by the school, two percent use tax imposed thereon shall be paid by the school to the county treasurer of the county in which the vehicle is required to be registered. Effective July 4, 1953, public schools are exempt from use tax. [Amendment filed August 19, 1954]

127.1 School lunch program. The act of the 52nd General Assembly which provided for refund of taxes paid to tax certifying and tax levying bodies did not in any manner change the law in regard to exemption of tangible personal property purchased for resale. For many years past, purchases made by schools for resale have been exempted from sales tax under the provisions of rule No. 24. Therefore, purchases of groceries, meats and other articles of food which are to be resold by the school are exempt from the retail sales tax upon presenting, to the retailer, a certificate of resale ST-5.

When school lunches are resold to pupils, such transaction is also exempt from the retail sales tax by virtue of subsection 4 of section 422.45 for the reason that the entire net proceeds of a school lunch program are returned to that program or to the school district and such net proceeds, if any, are therefore expended for educational purposes.

128 Applies to sales tax only. **Activities of schools and religious or charitable organizations.** The gross receipts from educational, religious, or charitable activities, where the entire net receipts are expended for educational, religious, or charitable purposes only, are exempt from the sales tax.

Such exemption is available, in the case of a school or college, when athletic activities constitute a curricular or extracurricular activity of the school or college, and are subject to its management and control.

A religious or charitable organization claiming this exemption must be an established and recognized organization devoted to educational, religious, or charitable purposes.

No claim for such exemption will be allowable unless it is clearly shown that the entire net proceeds of the activity are to be devoted to educational, religious, or charitable purposes.

Each claim for such exemption will be considered in the light of the particular circumstances.

This rule is applicable in the case of receipts from lectures, dances, and entertainments sponsored by the same kind of organizations.

129 Undertakers and funeral directors. The funeral director or undertaker is engaged in the business of selling tangible personal property such as caskets, grave vaults, and occasionally grave clothing and flowers. He is likewise engaged in rendering service, such as embalming, and providing livery service and other accessories necessary and convenient in conducting funerals. He is liable for tax measured only by his gross receipts from sales of tangible personal property, as distinguished from services which he renders.

Where funeral directors and undertakers charge lump sums to customers covering the entire cost of the funeral, without dividing the charge for tangible personal property and the charge for services in rendering a bill to the customer, for the purpose of reporting the sale of funeral supplies and merchandise, funeral directors shall report the full amount of the funeral bill, less any cash advanced for purposes such as the purchase of a cemetery lot or grave, opening and closing of grave, other cemetery expenses, remuneration of minister, choir, use of church, press notices or any other cash advanced.

Retail sales tax shall be reported and paid at the rate of two percent on fifty percent of the total funeral bill, less cash advanced. All other plans or methods of reporting retail sales tax by funeral directors for the sale of funeral supplies and merchandise are hereby declared to be null and void.

The funeral director must keep his books so as to show clearly the receipts, cash advances, invoices, sales records, and such other pertinent facts as may from time to time be required by this commission.

The funeral director is considered to be purchasing for resale caskets, grave vaults, grave clothing, embalming fluid, cosmetics, chemicals, etc., the tax on which is passed on to his customers and the funeral director should purchase such items tax free from his suppliers on the theory of resale. The tax on such merchandise shall be accounted for on the basis of two percent of fifty percent of the charge for a complete funeral.

The funeral director is considered to be using or consuming office furniture or equipment, funeral home furnishings, advertising calendars, booklets, motor vehicles and accessories, embalming instruments and equipment, grave equipment, stretchers, baskets and other items which the funeral director uses or consumes in the operation of his business and the title and possession to which are not passed on to his customer. With respect to these items the funeral director should pay the sales tax to his Iowa supplier when the items are bought in this state and should remit use tax directly to the commission when such items are purchased out-of-state, unless the out-of-state supplier is registered with the commission and authorized to collect the use tax for the state, in which last instance the use tax should be paid to the registered supplier.

Where a funeral director is engaged to prepare a body and place it in a casket for shipment out of the state in what is known to the trade as "shipouts" the retail sales tax shall apply. The delivery of the casket is deemed to have taken place when the body was placed therein.

130 Dentists. Dentists render professional services, the gross receipts from which are not subject to the retail sales tax. On the other hand, the dentist is deemed to be the final user or consumer of all tangible personal property purchased by him for his use in the rendition of his professional service, except "repair work" furnished to him by Iowa dental laboratories, the last subject being hereinafter discussed.

The dentist being the final user or consumer of the tangible personal property which he purchases for use in the rendition of his professional services, should pay the sales tax to his Iowa suppliers on all such purchases made in Iowa with the exception of "repair work" furnished by Iowa dental laboratories.

The dentist should also report and remit the use tax directly to the commission concerning all tangible personal property purchased from out-of-state suppliers, unless the out-of-state supplier is registered with this department and authorized to collect the use tax for the state, in which last instance the use tax due should be paid to the registered supplier.

The Iowa dental laboratory will bill its Iowa dentist customers for sales tax on the full charge made for all new work which involves the sale of tangible personal property to the dentist. Charges which are made by Iowa dental laboratories to the dentist for services classified as "repair work" are not subject to sales tax, insofar as the Iowa dentist is concerned. The Iowa dental laboratory is deemed to be the final user or consumer of the tangible personal property which the laboratory uses in completing the "repair work" furnished to the dentist. The Iowa dental laboratory will arrive at the amount of material used in such "repair work" by deducting eighty-five percent of the full charge made for the repair work and compute the sales tax at the rate of two percent on the balance, or two percent of fifteen percent of the total charge for the repair work.

Where the Iowa dentist has "repair work" furnished by dental laboratories located outside the state, who are not registered for the collection of the use tax, the Iowa dentist when reporting and remitting use tax on such "repair work" shall compute the tax on fifteen percent of the total charge made for the "repair work."

"Repair work" within the meaning of this rule shall consist of:

DENTURES	PARTIALS (Metal Work)	BRIDGE
1. Tooth or teeth	1. Solder clasp	1. Grind-in tooth or teeth
2. Broken	2. Solder bar	2. Repair crown
3. Repair post-dam	3. Repair new clasp (add on)	3. Assemble bridge
4. Relines	4. Add rest lug	4. Add porcelain
5. Periphery border	5. Add saddle	
6. Reface (new gum)	6. Add tang to clasp	
7. Vulcanize clasp to place	7. Add retention to bar	
8. Back up anterior teeth		
9. Repair broken horn (Anterior)		

131 Applies to sales tax only. **Iowa dental laboratories.** Iowa dental laboratories are engaged in selling tangible personal property to and performing services for Iowa dentists.

The receipts of the Iowa dental laboratories from the sale of tangible personal property to dentists are subject to the Iowa retail sales tax law, with the exception of "repair work" furnished to Iowa dentists.

The Iowa dental laboratory is deemed to be the final user or consumer of the tangible personal

property which it uses in order to complete "repair work" furnished to Iowa dentists. Being the final consumer of such materials, laboratories should account to the commission in their retail sales tax returns under item 1 "*a*" thereof the value of such materials used in the "repair work." The tax is not passed on to the dentist as an item of tax with respect to "repair work." The laboratory shall arrive at the amount of material used in the repair work by determining fifteen percent of the full charge made to the dentist for the repair work and compute the two percent tax on that figure.

The Iowa dental laboratory should purchase tax-free all tangible personal property which forms a component or integral part of the new work or "repair work" which it is furnishing to Iowa dentists or other dentists, on the theory of resale.

The Iowa dental laboratory is deemed to be the final user or consumer of all other tangible personal property, including tools, office supplies, equipment, and any other tangible personal property which does not form a component part of the new work or "repair work" furnished to Iowa dentists. With respect to these items it should pay the sales tax to its Iowa suppliers when purchasing in this state, or should remit the use tax directly to the commission when such items are purchased from out-of-state suppliers, unless the out-of-state supplier is registered with this commission and authorized to collect the use tax for the state, in which last instance the use tax should be paid to the registered supplier.

The Iowa dental laboratory is required to hold a retail sales tax permit.

"Repair work" within the meaning of this rule shall consist of:

DENTURES	PARTIALS (Metal Work)	BRIDGE
1. Tooth or teeth	1. Solder clasp	1. Grind-in tooth or teeth
2. Broken	2. Solder bar	2. Repair crown
3. Repair post-dam	3. Repair new clasp (add on)	3. Assemble bridge
4. Relines	4. Add rest lug	4. Add porcelain
5. Periphery border	5. Add saddle	
6. Reface (new gum)	6. Add tang to clasp	
7. Vulcanize clasp to place	7. Add retention to bar	
8. Back up anterior teeth		
9. Repair broken horn (Anterior)		

For regulations as to out-of-state dental laboratories, see rule No. 198.

132 Dental supply houses. Dental supply houses are engaged in selling tangible personal property to dentists and dental laboratories.

The gross receipts from the dental supply house derived from the sale of tangible personal property sold for delivery in Iowa to dentists are subject to the retail sales tax.

The gross receipts of the dental supply house from the sale of tangible personal property sold for delivery in Iowa to Iowa dental laboratories are subject to the retail sales tax, except that property which the dental laboratory uses in forming a component part of the tangible personal property furnished to his dentist customers, which includes new work and repair work. When the dental laboratory is purchasing tangible personal property, a part of which is to form a component part of the property which it is selling and a part of which it is to use or consume, the laboratory may give to its supplier a certificate of resale covering the entire purchase, after which the supplier will omit the billing of the sales tax. Dental laboratories making intrastate sales to Iowa dentists or Iowa dental laboratories are required to hold a retail sales tax permit.

Dental laboratories making interstate sales to Iowa dentists or dental laboratories are required to register for the collection of use tax, in event they come within the mandatory requirements of the use tax law, in the matter of registering and collecting the use tax for the state.

133 News distributors and magazine distributors. News distributors and magazine distributors engaged in selling magazines and periodicals intrastate in Iowa to magazine boys or girls or other persons who are engaged in part-time distribution of such magazines are deemed to be making sales at retail, the receipts from which are subject to the retail sales tax.

Such news distributor's or magazine distributor's receipts from the sale of magazines or periodicals to street newsstands will be subject to the retail sales tax, provided the operator of the newsstand does not hold a retail sales tax permit.

134 Magazine subscriptions by independent dealers. The gross receipts from the sale of subscriptions to magazines or periodicals, derived by independent distributors or dealers in the state of Iowa who secure such subscriptions as independent dealers or distributors, are subject to the retail sales tax and such independent distributors or dealers must hold a retail sales tax permit and report two percent of receipts derived from such subscriptions.

If, however, the person securing the subscription in Iowa is acting as an agent for an out-of-state publisher or subscription agency and the subscription is forwarded to such out-of-state principal for acceptance and fulfillment by shipment of the magazines to the subscribers in Iowa, the receipts from such subscriptions are subject to the retail sales tax law. (See rule No. 190.) The commission has found that it is necessary for the practical administration of the law to hold an agent selling magazine subscriptions liable for the collection of either the retail sales tax or use tax as the case may be.

135 Applies to sales tax only. **Sales by finance companies.** Finance companies who repossess or acquire tangible personal property in connection with their finance business and who sell tangible personal property at retail in Iowa are required to hold a retail sales tax permit and remit to the commission 2 percent of their receipts of such sales at retail in Iowa. For rules in reference to motor vehicles, see No. 207 and No. 209.

136 Sales of baling wire—binder twine. The sale of baling wire and binder twine to farmers is subject to sales tax. If baling wire is used by a farmer in baling hay for sale on the public market, it would be tax exempt as an item for resale.

Commercial balers who are employed to bale hay are subject to sales tax on all baling wire acquired by them. [Amended August 10, 1962]

137 Applies to sales tax only. **Claim for refund of sales tax.** See section 422.66.

Refunds of sales tax are made by the commission only to those persons who have remitted such sales tax directly to it.

Persons claiming refund of sales tax shall prepare such claim on official claim for refund blanks, form ST-52A, which forms are furnished by the commission. The claims for refund must be filed in duplicate with the commission, each of which should be properly sworn to in the presence of a notary public or clerk of district court. Such claims should be fully executed and clearly state the reasons and facts on which the claim for refund is based.

Section 422.67

For refund to tax certifying and tax levying bodies—see rule No. 49. For refund to relief agencies see rule No. 51.

PART II

MATERIALS AND SUPPLIES USED IN CONSTRUCTION

Rules Nos. 138 to 169, inclusive

Materials and supplies sold to owners, construction contractors and subcontractors for the erection of buildings, and the alteration, improvement and repair of real property.

138 Construction contract. A construction contract is one under the terms of which a party agrees to furnish the necessary building or structural equipment and materials and install or erect same on the project site, in connection with the construction, alteration or repair of a building or other structure or improvement on land, but does not include the furnishing and installation of machinery and equipment used within the structure for manufacturing or processing operations, or other purposes, which is not directly intended as an addition to, or essential to, the building structure. (See rule No. 143 relating to the furnishing and installation of machinery and equipment.)

138.1 General construction contractor. A general construction contractor is a person who contracts to furnish the necessary materials and labor for the performance of a construction contract and generally is one who contracts to build the entire project or a major portion thereof. The person with whom the general construction contractor contracts is ordinarily the owner of the land and structure thereon.

138.2 Special construction contractor. A special construction contractor is one who contracts directly with the sponsor of the project to furnish the necessary materials and labor to complete a special portion of a construction project which is not included in the general contract.

138.3 Construction subcontractors. A construction subcontractor is a person who contracts to furnish the necessary materials and labor for the completion of a portion of the general construction contract for erection or installation on the job site. The construction subcontractor ordinarily contracts with the general contractor to perform a certain part of the work which the general contractor has undertaken under the general construction contract, but sublets.

138.4 Sponsor. A sponsor is the other party to a contract, where a construction general contractor or a construction special contractor or a construction subcontractor contracts to do construction work, under class "A", "B", "C" or "D" contract. The general contractor is considered to be a sponsor of his subcontractors. [Filed December 27, 1956]

138.5 Materials supplier not a subcontractor.

1. A person who sells tangible property, in the form of building or structural material, to a construction contractor, where the person makes no erection or installation of the material at the job site, is not to be regarded as a subcontractor.

2. Such a person is a material supplier or a retailer selling tangible personal property. (See rule No. 138.7, par. 2.)

138.6 Classification of construction contracts. Construction contracts are generally let under one of four classes of contracts, viz:

Class (A) those in which the contractor or subcontractor agrees to furnish the materials and supplies and necessary services for a lump sum;

Class (B) those in which the contractor or subcontractor agrees to furnish the materials and supplies and necessary services on a cost plus basis;

Class (C) those in which the contractor or subcontractor agrees to furnish the materials and supplies and necessary services on a time and material basis with an upset or guaranteed price which may not be exceeded;

Class (D) those in which the contractor or subcontractor agrees to sell the materials and supplies at any agreed price or at the regular retail price and to render the services either for an additional agreed price or on the basis of labor employed.

138.7 General construction contractors, special construction contractors and construction subcontractors under contracts, class "A" (lump sum), class "B" (cost plus) and class "C" (time and material with upset price) and class "D" are consumers.

1. For the purpose of retail sales tax and use tax, construction contractors, including general, special and sub using class "A", "B", "C" or "D" contracts, are regarded as the consumers or users of all tangible personal property which they purchase, acquire or manufacture for use in completing their respective construction contracts. [Filed December 27, 1956]

2. This means these should pay the retail sales tax to their Iowa supplier when purchases of tangible personal property are made in this state, in other words, Iowa retailers making local intrastate sales to such persons of tangible personal property, to be used for such purposes, are making sales at retail the receipts from which are subject to retail sales tax. If the contractor uses tangible personal property in completing the construction, on which he has himself manufactured or fabricated, the tax will be two percent of his manufactured or fabricated cost.

3. This likewise means, that these contractors purchasing, acquiring or manufacturing tangible personal property outside the state of Iowa, for such use in Iowa, owe use tax on such out-of-state purchases, measured at the rate of two percent of the purchase price, or in the case of a product manufactured by himself, the contractor owes two percent of his cost of manufacture.

4. The use tax should be paid by the general construction contractor, special construction contractor or construction subcontractor, directly to the state tax commission, using the consumer's use tax return form UT-510, unless the out-of-state vendor from whom purchased is registered with the use tax department and does bill and collect the Iowa use tax for the state.

5. The construction, general, special or subcontractor, when bidding on a lump sum basis, should anticipate that the sales or use tax will increase his cost of building materials two percent and make the necessary allowance in his bid before submission, inasmuch as the tax is not collected from the sponsor over and above the contract price on such contract.

6. Sums paid to the owner of the land for the privilege of removing sand, gravel, rock, stone or other minerals from the land for use by one whose principal business is laying pavement or constructing streets, roads, or highways which materials are used by them for that purpose are not payments for the purchase of tangible personal property. Therefore, the transaction is not subject to sales tax.

7. The screening, washing, crushing, sizing and otherwise processing of sand, gravel, rock, stone or other minerals is not "manufacturing" by one whose principal business is laying pavement or constructing streets, roads or highways within the provisions of section 422.42(11). Therefore, if the contractor is the owner or lessee of land and removes or causes minerals to be removed from the land and uses the minerals in the performance of a contract for laying pavement or constructing streets, roads or highways, such use does not constitute a sale under the provisions of section 422.42(11), Code of Iowa, and is not subject to sales tax.

8. The mixing of crushed rock, sand and gravel with fluxing oil or similar materials and heating the mixture to regulated temperatures before using is not manufacturing by one whose principal business is laying pavement or constructing streets, roads or highways. And if a person so processing such materials uses the processed materials in the performance of a contract for laying pavement or constructing streets, roads or highways, such use does not constitute a sale under the provisions of section 422.42(11), Code of Iowa, and therefore is not subject to sales tax. Likewise, the combining of crushed rock or gravel, sand, cement and water and applying the same to prepared road surfaces is not manufacturing by one whose principal business is laying pavement or constructing streets, roads or highways and the cost of such processing is not subject to sales tax.

9. When sand, gravel, stone, rock or other minerals have been removed from their natural deposit and are then sold for use by the purchaser thereof as the ultimate consumer, a sale of tangible personal property is involved and such sale is subject to sales or use tax.

10. When crushed rock, sand or gravel are mixed with fluxing oil or similar materials and such mixtures heated to regulated temperatures and after such processing are sold for use by the purchaser thereof as the ultimate consumer, a sale of tangible personal property is involved and such sale is subject to sales or use tax.

11. When sand, gravel, stone or rock are combined with cement and water and the resulting combination is sold for use by the purchaser thereof as the ultimate consumer, a sale of tangible personal property is involved and such sale is subject to sales or use tax. [Amended November 30, 1964]

Paragraphs six through eleven are intended to implement section 422.42(11), Code of Iowa, as interpreted by Associated General Contractors vs. Iowa State Tax Commission 255 Iowa 673.

140 Contractors own tools and equipment. The contractor owes use tax on his own tools or equipment which are used by him on the job site in Iowa, provided, same have been purchased since April 16, 1937 (the effective date of the Iowa use tax law) and provided these have not been purchased by him in Iowa subject to retail sales tax. If acquired outside of Iowa within the date herein set forth, the contractor would owe use tax on such equipment to the state of Iowa measured at the rate of two percent of his purchase

price. If the contractor has paid sales tax or use tax to another state with respect to such equipment used in Iowa, he may secure credit for the foreign tax payment by making an affirmative showing to the use tax department concerning the purchase price, the amount of sales or use tax paid to the foreign state, together with the purchase date and description of the equipment. If the foreign tax paid is equal to the Iowa tax no further tax is due and if less than the Iowa tax, the difference is due the state of Iowa.

141 Contractor using in Iowa construction tools and construction equipment leased to him by others owning the equipment. Where the contractor has leased equipment from others, which he is using in connection with the construction work but which is not a part of the machinery or equipment furnished to the sponsor in performance of the contract, the owner of such leased equipment is or may be liable for the payment of use tax. The owner leasing such equipment to such contractor for such use in Iowa would owe use tax on any equipment purchased since April 16, 1937 and be entitled to credit for any sales tax or use tax he may have paid to a foreign state on such equipment, in the same manner as the contractor would on his own tools or equipment. The owner is exercising one of the rights of ownership over the property leased in Iowa which is taxed under the definition of "use". (See rule 166 relating to leased tangible personal property.) Any sales or use tax, due from such owner leasing equipment to the contractor completing a contract in Iowa, becomes a lien upon the rental fees due him from the contractor, under the provisions of the use tax law.

143 Machinery and equipment sales contracts with installation involved.

1. At times persons contract to furnish and install machinery and equipment in plants, shops and factories and other places where the machinery of equipment is intended to be used primarily in the production, manufacturing or processing of tangible personal property or other purposes not primarily essential to the building structure itself, but which incidentally may, on account of the nature of the machinery or equipment furnished, be more or less securely attached to the realty, but which does not lose its identity as a particular piece of equipment or machinery.

2. Such contracts are not to be considered as construction contracts for the purpose of the sales and use tax regulations and sales and use tax regulations applying to construction contracts do not apply to these transactions.

3. On the other hand, these transactions are to be considered as sales of tangible personal property by the supplier. If the sale is a local intrastate sale to a consumer or to any other person for any purpose other than resale, the sale is at retail and the receipts therefrom subject to retail sales tax.

4. If, on the other hand, the sales transaction is one in interstate commerce and if the sale is to a consumer in Iowa or other person taxable under the definition of "use", then the transaction comes within the scope of the use tax law and the purchaser is liable for the payment of use tax.

5. The measure of retail sales tax, in event the sale is local intrastate, is two percent of the contract price, unless the seller separates the installation charge for services on the job site from the selling price of the machinery or equipment itself. (See rule No. 42, Re: Installation charges.)

6. The measure of use tax is two percent of the full contract price, unless the charges for installation services on the job site are separated in the contract from the selling price of machinery or equipment itself. (See rule No. 42, Re: Installation charges.)

7. If the installation charge on the job site is set out separately by the seller to the buyer, then sales tax or use tax, as the case may be, applies only to the purchase price of the machinery or equipment.

8. However, if the installation charge is separated from the price of the machinery or equipment, and the seller in performing the installation phase of the contract use tangible personal property in the installation work, then the seller shall be responsible for sales tax or use tax on the installation material itself measured at his cost.

9. The method of making a return and the payment of tax in the case of contracts for the sale and installation of machinery or equipment shall be the same as those rules applying to ordinary retailers under sales tax or retailers under use tax. (See sales tax rules, Nos. 11.1, 15 and 18.) (See use tax rule No. 181.)

10. A person who contracts to furnish and install machinery or equipment, as described in this rule and rule 144, may not contract directly with the ultimate owner of the equipment, normally the sponsor of the project, but his contract may be with the general construction contractor on the project, or a special construction contractor on the project or a subcontractor on the project. Inasmuch as his transaction is regarded as a sale, in event his contract is not with the ultimate owner of the equipment, but is with one of the contractors or subcontractors, then his sale will be considered a sale to such persons for the purpose of resale. This means the general contractor, special contractor or subcontractor, who is the other party to the contract, is making the sale at retail and will be required to bill the ultimate owner for the sales tax on such machinery or equipment so furnished. In such case, the person supplying the machinery or equipment shall secure from the other party to his contract a certificate of resale as provided for in sales tax rule No. 24 or use tax rule No. 187.

144 Distinguishing "construction contracts" from "machinery and equipment sales contracts."

1. At times it becomes difficult to distinguish in certain installations between a "construction contract" and a "machinery and equipment sales contract."

2. Inasmuch as the principles of application of sales and use tax vary with the type of contract and inasmuch as it is necessary for the efficient and uniform administration of these taxes, the commission is under this rule, attempting to place various sorts of these contracts into their proper category for the purpose of applying sales tax or use tax as the case may be.

3. Therefore, there is hereinafter listed (paragraph 4) those contracts which the commission holds fall within the category of "construction contracts" and to these the rules applying to construction contract should be followed, together with a listing (paragraph 5) of those transactions which the commission holds come within the category of "machinery and equipment sales contracts" and to these latter the rules pertaining to the sale of machinery and equipment to be installed by the buyer, are to be followed.

4. "Construction contracts" described in rules No. 138 and No. 138.7:

1. Brick work
2. Builders hardware
3. Caulking materials work
4. Cement work
5. Electric conduit work
6. Electric wiring and connections
7. Flooring work
8. Glass and glazing work
9. Gravel work
10. Concrete work
11. Lathing work
12. Leadwork
13. Lime work
14. Lumber and carpenter work
15. Macadam work
16. Millwork installed
17. Mortar work
18. Oil work
19. Painting work
20. Papering work
21. Piping valves and pipe fitting work
22. Plastering work
23. Putty work
24. Reinforcing mesh work
25. Roofing work
26. Sanding work
27. Sheet metal work
28. Steelwork
29. Stonework
30. Stuccowork
31. Tile work
32. Wallboard work
33. Wall coping work
34. Wallpaper work
35. Weather stripping work
36. Wire net screen work
37. Wood preserving work
38. Lighting fixtures
39. Plumbing fixtures
40. Furnaces, boilers and heating units (for space heating)
41. Air conditioning units (central plant installation as distinguished from portable units)
42. Refrigeration units (central plants installation as distinguished from portable units)
43. Passenger and freight elevators
44. Awnings and venetian blinds
45. Burglar alarm and fire alarm fixtures
46. Vault doors and equipment
47. Prefabricated cabinets, counters and lockers (installed)
48. Signs (other than portable)
49. Automatic sprinkler systems (fire protection)
50. Electric transmission lines
51. Electric distribution lines
52. Road construction (concrete, bituminous, gravel, etc.)
53. Underground sewage disposal
54. Underground water mains
55. Underground gas mains

5. "Machinery and equipment sales contracts" with installation by seller, described in rule No. 143:

1. Portable machines, equipment and tools
2. Furniture
3. Vehicles
4. Lathes
5. Drills
6. Presses
7. Cranes
8. Core ovens
9. Generators
10. Turbines (steam)
11. Electric motors (driving processing equipment)
12. Power switchboards
13. Boilers (not for space heating)
14. Stokers and furnaces (not for space heating)
15. Coal handling equipment (not for space heating)
16. Ash removal equipment (not for space heating)
17. Turbo-generator units
18. Manufacturing equipment and machinery used to handle, fabricate, manufacture raw materials into finished products and which is not primarily essential to the building structure itself
19. Paint booths and spray booths
20. Conveying systems handling raw materials or finished products
21. Diesel engines (for processing)
22. Coal pulverizing equipment (not for space heating)

6. The foregoing cataloging of the types of contracts mentioned is not intended to exhaust this subject, but it is the commission's interpretation of the categories in which each should be placed. From time to time it is the intention of the commission to catalog other transactions of this type in their proper places and add to the listings found in this rule. This is for the purpose of uniformity in the application of the sales and use tax to all per-

sons who may be concerned. Information concerning any transaction which is not found in this published rule may be secured by inquiry to this department.

145 Mixed, "construction contract" and "machinery and equipment sales contract."

1. There are occasions when a construction contract may be let, included in which is the furnishing and installation of machinery and equipment on a turn-key job basis. In other words, the construction contract is mingled with a machinery and equipment sales contract.

2. Where a contractor performs such a mixed contract for a lump sum, he will be considered to be the consumer, for the purpose of sales and use tax, of all structural or building materials supplied and installed and will be regarded as the retailer of the machinery and equipment furnished and installed.

3. If such a mixed contract is let for a lump sum amount, the machinery and equipment furnished and installed will be considered, for the purpose of this rule only, as being sold by the contractor for an amount equal to his cost of the equipment delivered at the job site, provided such machinery and equipment is listed as a "machinery and equipment sales contract" under the provisions of rule No. 144.

146 Machinery and equipment sales contractors are retailers.

1. Contractors furnishing and installing machinery and equipment as provided in rules 143 and 144 are retailers and would be required to apply for and hold a retail sales tax permit and report and remit two percent of the gross receipts from such sales, provided the transactions were local intrastate sales at retail in Iowa. (See sales tax rules No. 11.1 and No. 15.)

2. If such contractors selling equipment and machinery with installation involved are making interstate sales, they would be required to collect the amount of use tax due from the customer and report and remit same to this office quarterly in the same manner as other retailers selling subject to use tax. (See rules Nos. 170 and 181.) [Amendments filed December 27, 1956]

147 Certain construction contractors may also be retailers and need retail sales tax permit.

1. Some contractors may operate retail places of business where over-the-counter sales at retail are made as well as other sales for resale, etc.

2. Some types of contractors have a dual personality, namely, being consumers on their construction work under class "A", "B", "C" and "D" construction as well as retailers in over-the-counter sales. (See sales tax rule No. 168.1)

3. Such contractors, because of being engaged in selling at retail, are required to apply for and hold a retail sales tax permit. On their retail sales they bill their customer for the sales tax over and above the selling price and report two percent of the gross receipts from retail sales as sales tax directly to this office using the retail sales tax return blank ST-50.

4. When such contractors purchase quantities of building materials, etc., some of which are sold over the counter at retail and some of which are used by the contractor in completing construction contracts under class "A", "B", "C" and "D", he is unable to determine at the time of purchase what portion will be used for each purpose. Therefore, such type contractor will be entitled to purchase tax-free from his supplier, by furnishing a certificate of resale to said supplier, all materials a part of which may be resold at retail (over-the-counter sales) and a part of which may be used in the construction work. The contractor of course would not be entitled to purchase tax-free for resale his own tools or equipment or any building materials or supplies, which are not subject to retail sales, but only that material a part of which may be resold and a part of which may be used in construction contracts. (See rule No. 24—certificate of resale.)

5. When filing his retail sales tax return the contractor will show under "Item 1." of sales tax return blank ST-50, his total gross sales for the quarter, which would include the amount of the over-the-counter sales at retail where no installation is involved, plus the amount of any over-the-counter sales for resale, etc.

6. Under "Item 1. *a*," of the retail sales tax return blank ST-50 the contractor would show the cost to him of all materials purchased tax-free for resale but used or consumed by him in completing construction contracts under class "A", "B", "C" or "D".

7. Appropriate deductions for items included in "Item 1," may be taken under "Item 2" and the net taxable sales plus the cost of materials used in construction contracts class "A", "B", "C" and "D" (Item 1. "*a*") are then grouped together and a two percent tax paid directly to the commission with the sales tax return.

8. Concerning the contractor's purchases of his own tools or equipment or other items which are not to be resold, the contractor should pay the sales tax to the Iowa supplier if these purchases are made in this state.

9. If the purchases mentioned in the last paragraph are made by the contractor outside the state of Iowa, then the contractor shall include such purchases in the consumer's use tax return UT-510 directly to this office, unless the out-of-state vendor from whom the purchase is made is registered with the use tax department and does bill and collect the Iowa use tax for the state. [Amendments filed December 27, 1956]

148 Sponsor's return of information. Upon request by this commission or any division thereof, sponsors who have awarded lump sum contracts are required to furnish to this commis-

sion or to any division thereof full information as to all contracts let and to furnish the names of the general and special contractors entering into a contract with the sponsor and such other information germane to the contract let as is requested by this commission or any division thereof. In the event that the sponsor purchases any material direct from suppliers in addition to the material furnished by either the general or special contractors, then such purchasers of material shall be reported to this commission or to any division thereof upon forms furnished by said division.

149 Consumer's use tax returns and tax due quarterly.

1. Consumer's use tax returns, under the law, are required to be filed on a calendar quarterly basis consisting of three calendar months.

2. The quarterly periods for the year ending March 31, June 30, September 30 and December 31.

3. The full month is allowed following the close of each quarterly period in which to file the return and remit the tax before becoming delinquent. [Amended October 10, 1958]

150 Nonresident construction contractors required to make separate reports and returns on each individual Iowa construction contract.

1. Construction contractors, who are not residents of Iowa and who do not maintain a place of business in Iowa where full records are kept concerning sales and use tax transactions, are required to make a special report to the commission concerning each individual construction contract class "A", "B", "C" or "D" performed by it in Iowa, unless specifically relieved from doing so in writing by the commission, or its department handling these matters. [Filed December 27, 1956]

2. The report shall consist of the filing of the following listed forms and supplying the information therein requested:

3. Form ST-42. List of subcontractors, if any, to whom the nonresident contractor has awarded a construction contract, under the terms of which his sub is to furnish its own material and install same on the job site. The further information as to the amount of the subcontract, the type of subcontract and the date let should be indicated. This information should be submitted on each project as soon as the information is available.

4. Form ST-43. List of material suppliers, both in Iowa and outside of Iowa from whom tangible personal property has been purchased for use in completing the particular construction contract in question, which should include all structural materials and supplies, as well as the contractor's own tools or equipment used on the job site. The information on this form should show the type of merchandise purchased, the purchase price and whether or not Iowa sales tax or use tax was paid to the supplier at the time of purchase. If a sales tax or use tax, imposed by a foreign state, was paid at the time of purchase, the name of the state should be listed together with the name and address of the supplier to whom the tax was paid, as well as the amount and type of tax.

5. Form UT-527 summary sheet of contract should be executed for each construction contract and which consists of a summary of the entire contract.

6. Form ST-43 and UT-527 should be filed by the construction contractor with the commission at the time of the filing of the final consumer use tax return on the particular contract in question.

7. The nonresident contractor is required to file quarterly use tax returns during the progress of the job, unless he has received permission in writing from the commission or its department handling such matters to file at the close of the job. (See rule No. 151 concerning special permission for reporting by the job.)

8. The construction contractor may at the close of the job request a letter of release, concerning sales and use tax, from the commission, the original of which will be sent to the sponsor and a copy to the construction contractor, provided, the required reports, returns and tax have been properly submitted. [Amendment filed December 27, 1956]

151 Use tax returns by contract job.

1. This commission, having considered the matter of certain contractors making use tax returns by contract jobs instead of by quarters, finds it necessary in some cases, in order to insure the payment to the state of the amount of such tax, to grant permission to make returns and file reports by the contract job instead of by quarterly periods. Such permission may be granted only where a contract is to be completely performed within six months. The retail sales and use tax division of this commission may grant, upon application of such contractors, permission to file use tax returns and remit the tax due on account of purchases made, as reported by said returns, for each and every job performed by such a lump-sum contractor instead of making use tax returns by quarterly periods. (See section 423.13.)

2. In cases where a contractor has obtained permission to make returns and file reports by the job instead of by the quarterly periods, the use tax payable to the state of Iowa shall be due immediately upon the purchase of tangible personal property upon which the law imposes such a tax. The use tax so imposed shall become delinquent thirty days after the contract shall have been completely performed or immediately in case of insolvency or bankruptcy of the contractor. [Amended October 10, 1958]

152 Payment of final estimate must be withheld. The sponsor of a construction contractor, class "A", "B", "C" or "D", if the latter is a nonresident of Iowa, as defined in rule No. 150, shall not make payment of the final estimate due the contractor unless and until such sponsor shall have received a release from the retail sales and

use tax division of this commission showing that the contractor performing such contract has paid all retail sales and use tax due to the state of Iowa and that all required forms, returns and reports have been made to this commission or the division of retail sales and use tax. [Amendment filed December 27, 1956]

153 Liability of sponsors for retail sales and use tax due the state from general and special contractors. A lien on personal property and rights to personal property is created by operation of law for retail sales and use taxes due the state of Iowa without the necessity of recording or the giving of any notice whatsoever.

154 Money due a contractor is a right to property. Money due a general or a special construction contractor is a right to personal property on which a lien attaches for any retail sales or use tax owing to the state.

155 Sponsors are required to withhold payment. Sponsors are required to withhold payment of the final estimate until the general or special construction contractor shall have secured a release from the retail sales and use tax division of this commission reciting that all required returns and reports have been made and that all taxes have been paid.

156 Liability of sponsors who fail to withhold payment. Sponsors who pay general and special construction contractors in full are liable to the state for the payment of any retail sales or use tax not collected from such a general or special construction contractor on which the law had imposed a lien in favor of the state.

157 Release of sponsors. Sponsors who withhold payment due the general or special contractors are released from any liability created by the lien laws of the state of Iowa when such a release in writing is secured from this commission.

158 Taxes paid by general or special construction contractors received subject to audit. A release to a sponsor does not operate as a final release to the general construction contractor, special construction contractor or construction subcontractors as all tax accounts are released subject to an audit of the taxpayer at any future date.

159 Liability of general construction contractors for retail sales and use tax due the state from subcontractors. A lien on personal property and rights to personal property is created by operation of law without the necessity of recording or the giving of any notice whatsoever for retail sales and use taxes due the state.

160 Money due a subcontractor is a right to the property. Money due a subcontractor is a right to personal property on which a lien attaches for any retail sales or use tax owing to the state.

161 General construction contractors required to withhold payment. General construction contractors who pay subcontractors in full are liable to the state for the payment of any retail sales or use tax not collected from such subcontractor for the reason that such general contractor paid money to the subcontractor on which the law had imposed a lien in favor of the state.

162 Release of general contractors. General construction contractors who withheld payment due subcontractors are released from any liability created by the lien laws of the state of Iowa when such a release in writing is secured from this commission.

163 Taxes paid by subcontractors received subject to audit. A release to a general construction contractor does not operate as a final release of the subcontractor as all tax accounts are released subject to an audit of the taxpayer at any future date.

164 Iowa construction contractors must file certain reports.

1. Iowa construction contractors, who maintain a place of business in this state where complete records are kept concerning sales and use tax transactions, will not be required to file forms UT-527 and ST-43, concerning each construction contract in Iowa, unless specifically requested to do so by the commission or its department handling such matters.

2. However, Iowa construction contractors should file with the sales and use tax department form ST-42 whenever they sublet a construction subcontract to a nonresident subcontractor. This information should be submitted immediately the subcontract is let. The information shall include the name and out-of-state address of the subcontractor, the general nature of the work, the contract price and the date let, together with the name of the project where the subcontractor is to perform his contract.

3. The Iowa construction contractor shall file quarterly consumer's use tax returns, reporting and remitting any use tax due from him concerning all of his activities in the state of Iowa during the quarterly period covered by the return.

4. If the Iowa contractor desires to report and remit the use tax on the job basis, permission must be secured from the commission or its department as provided in rule No. 151.

165 Industrial materials and equipment not readily obtainable in Iowa are exempt to construction contractors under class "A", "B", "C" or "D".

1. The use tax law under part "c" of subsection 1 of section 423.1, Code of Iowa, exempts from the use tax "industrial materials and equipment, which are not readily obtainable in Iowa, and which are directly used in the actual fabricating, compounding, manufacturing or servicing of tangible personal property intended to be sold ultimately at retail."

2. Construction contractors, including general, special and sub, under class "A", "B", "C" and "D", are consumers, under provisions of Rule No. 138.7, of all tangible personal property which they purchase for use in completing construction contracts in Iowa. Therefore, such construction contractors are not "processors" within the meaning of the use tax law and would therefore not be exempt from use tax on any tangible personal property purchased by them outside the state of Iowa for use in completing such construction contracts in the state of Iowa, even though the item involved might be "not readily obtainable in Iowa." [Filed December 27, 1956]

167 Contracts with federal, state or local governments. A construction contractor performing a class "A", "B", "C" or "D" construction contract for the United States government, the state of Iowa, counties, towns, school districts or any other political subdivision of the state of Iowa is not exempt from the payment of either the retail sales or use tax. Therefore, a contractor performing such a contract for any of the above-mentioned governments or governmental subdivisions or agencies must make such reports and returns of either the retail sales or use tax as is required for contracts with private sponsors. [Filed December 27, 1956]

168 A purchaser, who is a "processor" may be exempt from use tax when purchasing under a machinery or equipment sales contract with installation by the seller.

1. A purchaser who purchases machinery or equipment to be installed by the seller may be exempt from use tax, provided the machinery or equipment is directly used in the actual fabricating, compounding, manufacturing or servicing of tangible personal property intended to be sold ultimately at retail, and provided the sales transaction is one in interstate commerce, thus coming within the scope of the use tax law, and not coming within the scope of the retail sales tax law.

2. On the other hand, if the contract to furnish and install the machinery or equipment with installation by the seller is one in intrastate commerce, then the purchaser is not exempt from the payment of sales tax to his supplier, inasmuch as the transaction comes within the scope of the retail sales tax law and no exemption exists in the retail sales tax law because the item sold at retail in Iowa is "not readily obtainable in Iowa." (See use tax rule 172 A.)

168.1 Sales of building materials, supplies, equipment, etc., are at retail and taxable when sold to construction contractors, subcontractors, owners or builders.

Sales to or purchases by construction contractors or subcontractors, of building materials, supplies or equipment for the erection of building or the alteration, repair or improvement of real property are subject to the sales tax or use tax, whichever applies, even though the class of construction contract being performed is "CLASS (D)" as described in rule No. 138.6. In other words, the rules of the commission shall be applied to construction contractor's or construction subcontractor's purchases, where a "CLASS (D)" contract is being fulfilled, in the same manner and to the same extent as though a Class "A", "B" or "C" contract was being fulfilled.

Iowa suppliers selling such items to such constructors for such purposes shall bill and collect from them the sales tax and report and return same to the state.

Likewise, out-of-Iowa suppliers, who are required to collect *use tax* for the state, shall, when selling such items to such constructors for such purposes, bill and collect from such persons the Iowa use tax and return same to the state quarterly.

If a construction contractor or construction subcontractor (who does not hold a retail sales tax permit) purchases such items from an out-of-Iowa supplier who does not collect the Iowa tax, then such purchaser shall make a return (consumer's use tax return Form UT-510) directly to the state tax commission and remit the Iowa use tax thereon.

A person who is engaged exclusively in construction work as contractor or subcontractor is not required to hold a retail sales tax permit and such a permit should not be issued to such persons.

All such taxes on items hereinbefore mentioned shall be reported and paid *as indicated*, with the following exception, to wit: In some instances construction contractors or construction subcontractors are in a dual business, which includes substantial reselling on an "over the counter" basis the same type of building materials, supplies and equipment to others at retail in Iowa, as are used by them in their own construction work. We are in this rule referring to such persons as contractor-retailer. Because of the retail business ("over the counter" sales) such contractor-retailer is required to apply for and hold a retail sales tax permit. For the efficient administration of the statute and to simplify the accounting procedure in reporting and paying the tax in such instances, it is hereby provided that such contractor-retailer will be permitted to purchase all construction materials, supplies and equipment (for both purposes) tax-free, only provided he holds a valid retail sales tax permit and certifies in writing to this fact to his supplier, describing the permit number of such permit and certifying to the resale of such merchandise. Such buyers shall furnish such certificates to their suppliers and the suppliers shall secure and maintain such certificates to support the noncollection and nonpayment of tax on such sales.

Purchases may be made, under the same circumstances, from out-of-Iowa suppliers, tax-free.

Of course, the contractor-retailer would then be required to report and return the tax on all the items (both construction and "over the counter")

directly to the commission with his quarterly sales tax return on the basis of his cost as to items consumed by him in construction and on the basis of the selling price on "over the counter" items.

Tax must be paid by the contractor-retailer to his supplier, when purchasing *his own* tools, equipment, etc., or for his employees. [Filed December 27, 1956]

169 When machinery or equipment sales contract with installation by seller is in interstate commerce and when in intrastate commerce.

1. When a seller agrees to furnish and install machinery or equipment in Iowa and where the offer and acceptance take place within the state of Iowa, the transaction will be regarded as a local intrastate sale, the receipts therefrom being subject to retail sales tax, if the sale is at retail and not otherwise expressly exempted by the retail sales tax law.

2. When a seller contracts to furnish and install machinery or equipment in Iowa and the offer and acceptance take place outside the state of Iowa, but the property is located in the state of Iowa prior to the agreement to sell, then the contract will be considered one in intrastate commerce, the receipts from which are subject to retail sales tax, provided, the sale is at retail in Iowa and not otherwise expressly exempted by the provision of the retail sales tax law.

3. Where the seller contracts to furnish and install machinery or equipment in Iowa and the offer and acceptance take place outside the state of Iowa, but the title to the property does not pass to the buyer outside the state of Iowa, but passes to the buyer upon installation in Iowa by the seller, then the transaction shall be regarded as a sale in intrastate commerce, the receipts therefrom being subject to the retail sales tax law, if the sale is at retail in Iowa and not otherwise expressly exempted by the provisions of the retail sales tax law.

4. Where the seller contracts to furnish and install machinery or equipment in Iowa and the offer and acceptance take place outside the state of Iowa and the title to the property passes to the buyer outside the state of Iowa, then the transaction will be regarded as a sale in interstate commerce and the receipts therefrom to be exempted from the retail sales tax law. On the other hand, this transaction will be regarded as one coming within the scope of the use tax law and the provisions of the use tax law and rules of the commission pertaining thereto shall apply.

PART III
USE TAX
Rules Nos. 170 to 198, Inclusive

170 Applies to use tax only. **General statement concerning the application of the use tax law.** The use tax law imposes a tax on the purchaser for the privilege of using tangible personal property in the state of Iowa, where the property used in Iowa was not sold in Iowa subject to the sales tax law, with express exemptions. Generally speaking, this means that a person who purchases tangible personal property from out-of-state suppliers for "use" in Iowa and not for "resale" or "processing" is liable for the payment of use tax. The measure of the use tax is two percent of the purchase price.

The purchaser for "use" should pay the use tax to the seller, if the seller is registered with the commission and authorized to collect the use tax for the state. If the seller is not registered with the commission and authorized to collect the use tax for the state, the purchaser should remit the use tax directly to the commission.

The consumer's use tax return blank, Form UT-510, is the proper form for the purchaser to use in reporting and remitting the use tax directly to the commission, unless the purchaser happens to be the holder of a certificate of registration under the use tax law and files retailer's use tax returns, under which last instance the value of the property used or consumed may be shown and reported under Item 4 of the retailer's use tax return blank. Form UT-511.

Under the use tax law, a collection responsibility is placed upon all interstate sellers who sell tangible personal property for delivery in Iowa for "use" in Iowa, provided the seller maintains in the state directly or through subsidiary a warehouse, sales office, or distribution house, or other place of business, or has an agent operating in the state either temporarily or permanently. Such a seller is required to apply for (on Form UT-507) and hold a certificate of registration under the use tax law and file retailer's use tax returns (UT-511). Each registered seller is required to bill its Iowa customers for all use tax due, showing the use tax as a separate item on the invoice and indicating thereon its registration number.

An exception from the general provisions hereinbefore stated is in the case of new motor vehicles and new trailers. The receipts from the sale at retail in Iowa of new motor vehicles and new trailers are expressly exempted from the sales tax. The law imposes use tax on new motor vehicles and trailers. The use tax law provides that county treasurers and the state motor vehicle department be charged with the responsibility of collecting two percent of the full purchase price of new motor vehicles and new trailers for "use" in Iowa as use tax, before issuing auto registration plates. The county treasurers and state motor vehicle department also collect use tax due where cars previously bearing foreign registration plates are registered for "use" in Iowa.

For further information as to the collection of use tax on motor vehicles and trailers, see Part IV, rules Nos. 199 to 234.

171 Applies to use tax only. **"Use" defined.** "Use" is defined in subsection 1 of section 423.1, Code of Iowa, 1946. In substance, a taxable use is

the exercise of any right of ownership over tangible personal property in Iowa, by any person owning the property, except the right to sell the property in the regular course of business and the right to process or manufacture the property into another article of tangible personal property intended to be sold ultimately at retail, subject to exemptions.

"Processing" of property is defined by this section to include: Personal property which forms an integral or component part of the manufactured product which is intended to be sold ultimately at retail; that property which is consumed as fuel in creating power, heat or steam for processing or for generating electric current; that property which is used as industrial material and equipment (which does not form a component or integral part of the manufactured product) but which is *directly* used in the actual fabricating, compounding, manufacturing or servicing of tangible personal property intended to be sold ultimately at retail, provided such property is not readily obtainable in Iowa.

Persons who are using tangible personal property in the state of Iowa, within the meaning of "use," are expressly exempted from use tax if the property has been subjected to the Iowa retail sales tax law.

Section 423.1

172 and 172A [Rescinded October 11, 1972]

173 Applies to use tax only. **Use tax law became effective in Iowa, April 16, 1937.** Persons who "use" tangible personal property in the state of Iowa who purchased such property on or after April 16, 1937, are liable for the payment of use tax on the same, unless expressly exempted. Persons who "use" tangible personal property in the state of Iowa which they have purchased prior to April 16, 1937, are not liable for the payment of use tax.

Sections 423.2, 423.3

174 Applies to use tax only. **Measure of the use tax.** The measure of the use tax is two percent of the purchase price.

Purchase price means the total amount for which tangible personal property is sold, valued in money, whether paid in money or otherwise; provided that cash discounts allowed and taken on sales shall not be included.

Where a manufacturer used tangible personal property in this state, fabricated or manufactured by the manufacturer outside the state, the measure of use tax shall be two percent of the manufacturer's cost of production.

Section 423.1

175 Applies to use tax only. **Consumer's use tax return.** A person who purchases tangible personal property from out-of-state sources for use in Iowa subject to the use tax law is liable for the payment of the use tax and is required to file a consumer's use tax return, Form UT-510, with the commission, reporting and remitting use tax on all property which has been delivered into Iowa during the quarterly period covered by the return unless the seller from whom he made the purchase is registered with the commission and authorized to collect the use tax for the state. Under the last circumstances the use tax should be paid by the purchaser to the registered seller, which seller in turn forwards the use tax to the commission quarterly.

The purchaser may ascertain when the seller is registered and authorized to collect the use tax for the state by inspecting the billing or invoice, inasmuch as the registered seller is required to show the Iowa use tax separately on the invoice together with his Iowa registration number.

The use tax imposes at the time the tangible personal property comes to rest in this state and is required to be reported at the close of that quarterly period during which it comes to rest. The measure of the use tax is two percent of the full purchase price, valued in money, whether paid for in money or otherwise. This means that where property is traded in as part consideration of the purchase price, the tax shall be computed on the full selling price before any amount is deducted for property traded in.

The quarterly periods for the year end on March 31, June 30, September 30, and December 31. A full month is allowed after the close of each quarterly period in which to file a consumer's use tax return before becoming delinquent. Penalties are imposed if the tax is not paid before the last day of the month following the close of each quarterly period.

For the convenience of those persons who regularly purchase tangible personal property outside the state subject to the use tax, the commission places such names upon its permanent mailing list, at the request of the taxpayer, in order that the taxpayer may receive a consumer's use tax return blank at the close of each quarterly period.

Those persons who may only occasionally purchase tangible personal property outside the state, concerning which use tax would be due, and who do not wish to be placed on the mailing list for the reception of a consumer's use tax return blank at the close of each quarterly period will be required to make a special request for such blanks when tax is due. The request may be made to the commission at Des Moines or to any of the commission's field agents. [Amended October 10, 1958]

See UT Form No. 510 in section V.

176 Applies to use tax only. **Purchases made on a conditional sales basis.** When a person is making a return of purchase made on a conditional sales contract and there remains an unpaid balance thereon, such return shall include tax computed at the rate of two percent on the full purchase price of such property notwithstanding the fact that there is an unpaid balance.

178 Applies to use tax only. **Sales tax or use tax paid to another state.** Section 423.25, Code of Iowa, 1946, provides that where an article of tangible personal property has been subjected

to tax with respect to its sale or its use by another state equal to the amount of tax imposed by the Iowa use tax law, no further tax shall be due the state of Iowa with respect to the use of that property in this state by the person who has paid said tax to another state.

If the amount of tax paid by a person to another state on a given article of tangible personal property is less than the amount of tax imposed by the Iowa use tax law, the tax shall be due the state of Iowa in the amount of the difference of tax so paid to the foreign state and the tax due under the Iowa law.

Persons claiming exemption from payment of use tax on the grounds that they have paid tax to another state with respect to the sale or use of the property in question must prove to the satisfaction of the commission, the county treasurer, or the state motor vehicle department that such tax has been paid.

Section 423.25.

179 Applies to use tax only. **Persons having books or other tangible personal property belonging to them repaired by repairmen located outside the state of Iowa.** Persons who own tangible personal property in the state of Iowa and who send such property or cause such property to be sent outside the state for the purpose of having it repaired, reconditioned, or altered, and where the repairman uses tangible personal property in connection with the repair thereof, the owner will be liable for the payment of use tax measured by two percent of the full charge made for the repair service, unless the out-of-state repairman bills such person as separate items the charges made for labor and those made for material furnished, in which last instance the tax may be computed on two percent of the charge made for the tangible personal property furnished by the repairman.

180 Interstate commerce. 1. Goods coming into this state.

When tangible personal property is purchased in *interstate commerce* for use or consumption in this state and (1) the seller is engaged in the business of selling such tangible personal property in this state for use or consumption and (2) delivery is made in this state, such sale is subject to the use tax law. Such sale is taxable regardless of the fact that the purchaser's order may specify that the goods are to be manufactured or procured by the seller at a point outside this state and shipped directly to the purchaser from the point of origin, and the seller is required to report all such transactions and collect and remit to this state the use tax on all taxable purchases.

If the conditions above are met it is immaterial (1) that the contract of sale is closed by acceptance outside the state or (2) that the contract is made before the property is brought into the state.

Delivery is held to have taken place in this state (1) when physical possession of the tangible personal property is actually transferred to the buyer within this state or (2) when the tangible personal property is placed in the mails at a point outside this state directed to the buyer in this state or placed on board a carrier at a point outside this state (or otherwise) and directed to the buyer in this state.

Engaging in business in this state shall include any of the following methods of transacting business: Maintaining directly, indirectly or through a subsidiary, an office, distribution house, sales house, warehouse or other place of business or by having an agent, salesman or solicitor operating within the state under the authority of the seller or its subsidiary irrespective of whether such place of business, agent, salesman or solicitor is located in this state permanently or temporarily or whether such seller or subsidiary is qualified "to do business in this state."

2. Goods shipped from this state.

When tangible personal property is sold within the state and the seller is obligated to deliver it to a point outside of the state or to deliver it to a carrier or to the mails for transportation to a point outside the state, the retail sales tax or use tax does not apply, provided that the property is not returned to a point within the state. The most acceptable proof of transportation outside the state will be:

a. A waybill or bill of lading made out to the seller's order and calling for delivery; or

b. An insurance receipt or registry issued by the United States postal department, or a post-office department receipt Form 3817; or

c. A trip sheet signed by the seller's delivery agent and showing the signature and address of the person outside this state who received the goods delivered.

However, where tangible personal property pursuant to a sale is delivered in this state to the buyer or to an agent of his, the retail sales tax applies notwithstanding that the buyer may subsequently transport the property out of the state. [Amended August 10, 1962]

See rule No. 55.

181 Applies to use tax only. **Interstate vendors—registration and billing of tax.** Each "retailer maintaining a place of business in this state" as defined in subsection 6 of section 423.1, Code of Iowa, shall, before collecting the use tax required to be collected, make application to the commission for a certificate of registration upon Form UT-507-A, to be provided by the commission. Each certificate of registration issued bears an individual number, the number appearing immediately above the registrant's name on the certificate. The holder of the certificate shall bill the use tax due as a separate item on the billing or invoice to the purchaser for "use" in Iowa and indicate thereon his registration number. This evidence in the hands of the purchaser who remits use tax to the registered seller shall constitute such

purchaser's receipts for the tax having been so paid. The billing shall be in substantially the form as shown hereafter:

MERCHANDISE $.....
2% IOWA USE TAX $.....
IOWA REGISTRATION NO.....

See form "certificate of registration" in section V.

Section 423.9

182 Interstate vendor's application for certificate. The interstate vendor's application for certificate of registration under the use tax law shall show the name of the person to whom the certificate is to be issued; the address of the location from which the returns thereunder are to be filed; the names and addresses of the officers in the case of a corporation; the names of all partners in the case of a partnership; the name of the owner in the case of an individual ownership; the date when the applicant (as "retailer maintaining a place of business in this state") began selling tangible personal property in interstate commerce for delivery in Iowa for "use" in Iowa subject to the use tax law; the names and addresses of all offices, warehouses, or other places of business in Iowa either owned or controlled by the applicant or its subsidiary; the names and addresses of all agents of the applicant operating in the state either temporarily or permanently; the names and addresses of all out-of-state locations from which tangible personal property will be delivered into Iowa for "use" in Iowa from which billing for the merchandise will be made.

It will not be necessary that more than one certificate be held in order to report and remit all use tax due, even though shipment and billings may be made from several out-of-state locations. However, if desired, the commission, when practicable, will issue more than one certificate of registration to the same person for separate out-of-state locations.

Section 423.9

183 Applies to use tax only. **Registered retailers required to collect all use tax due on all tangible personal property sold for delivery in Iowa.** Each retailer registered with the commission under the provisions of section 423.9 of the use tax law and each retailer registered and authorized to collect the use tax under the provisions of section 423.10 of the use tax law shall collect from his customer and remit to the commission all use tax due on all tangible personal property sold for delivery in Iowa by the retailer, unless the commission shall expressly authorize the retailer to do otherwise.

Section 423.5

183.1 Applies to use tax only. **Vendors, authorized or required to collect Iowa use tax for the state, when selling tangible personal property to railroads for use in Iowa.** With respect to railroads operating in Iowa who also operate in states other than Iowa, the Iowa state tax commission hereby authorizes and requires these to report and remit all use tax due the state of Iowa directly to the state on a quarterly basis, as provided by law, rather than through registered retailers authorized and required to collect use tax for the state.

A specific written authorization will be issued by the use tax division with proper numerical designation to railroads who are operating in other states, as well as Iowa, and a photostatic copy of same shall be furnished to its vendors by each concerned railroad to whom such an authorization has been issued, when it purchases from vendors collecting Iowa use tax. The collecting vendor shall retain said authorization copy as a part of its records and shall then omit the billing and collection of Iowa use tax from such accounts, so long as the authorization is effective.

However, each registered retailer shall attach to each of its retailers use tax returns to Iowa, a schedule listing the amount of sales in dollars and the authorization number of those railroads to whom it sold and from whom it did not collect and remit the Iowa use tax.

These authorizations and the above-described handling shall have no application to sales made subject to the Iowa retail sales tax law, where the seller must return and remit the due sales tax directly to the state.

The right is reserved to cancel these authorizations upon reasonable notice.

The provisions of this rule shall be effective as of January 1, 1962. [Filed and indexed January 10, 1962]

Sections 423.6, 423.10, 423.13, 423.14, 423.23

184 Applies to use tax only. **Retailer's use tax returns.** Retailer's use tax return blanks, Form UT-511, are furnished to each holder of a certificate of registration at the close of each quarterly period consisting of three months, for the taxpayer's use in reporting and remitting use tax due for the preceding quarterly period. The quarterly periods for the year end on March 31, June 30, September 30, and December 31. The full month which next follows the quarterly period is allowed in which to file returns and remit tax without becoming delinquent, unless the commission shall otherwise provide.

Retailer's use tax return blanks are not furnished to persons who do not hold a certificate of registration under the use tax law, for the purpose of filing with the commission. Registration is necessary before retailer's use tax return blanks for filing are furnished.

If the certificate holder uses or consumes tangible personal property in the state of Iowa subject to the use tax law, the value of such purchases made during a given quarterly period should be included under Item 4 of return blank UT-511.

If the certificate holder delivers property from more than one out-of-state location from which separate bills are made, return Form UT-512 shall be filed with Form UT-511, showing the amount of

taxable sales made from each respective location.

The holder of a certificate of registration under the use tax law shall file a return for each quarterly period, irrespective of whether or not tax may be due. In case no tax is due during a given quarterly period, proper memoranda should be noted on the return, same executed and filed. [Amended August 5, 1958]

See Form UT-511 and UT-512 in section V.

Section 423.13

185 Applies to use tax only. **Cancellation of certificate of registration.** Immediately the holder of a certificate of registration terminates his selling activities or when his liability for reporting and remitting use tax concerning sales made in interstate commerce has ceased, such person shall notify the commission and secure Form UT-517 for the purpose of requesting cancellation of the certificate of registration.

See Form UT-517 in section V.

186 Applies to use tax only. **Bracket system to be used by registered vendors.** Sellers registered with the commission and authorized to collect the use tax for the state may use the bracket system disclosed in rule No. 18 which was adopted under the provisions of the Iowa retail sales tax law, where registered vendors have occasion to sell tangible personal property, the purchase price of which is less than one dollar.

The registered seller is required to remit to the commission two percent of the purchase price of all taxable property sold for "use" in Iowa.

See rule No. 18.

187 Applies to use tax only. **Certificates of resale—processing.**

1. Chapter 423, Code of Iowa, defines, subsection 1 of section 423.1, the word "use" as meaning and including "the exercise by any person of any right or power over tangible personal property incident to the ownership if that property, except that it shall not include processing, or the sale of that property in the regular course of business."

2. Sale in the regular course of business means the resale of the tangible, personal property purchased, either by a wholesaler who is regularly engaged in selling such property (but does not sell at retail to final consumers), or by a retailer who regularly sells such property at retail (to final consumers).

3. Persons selling at wholesale in Iowa but who do not sell at retail (to final consumers) are not required to hold retail sales tax permits.

4. Persons regularly engaged in selling at retail (to final consumers) in Iowa (intrastate sales) are required to hold retail sales tax permits.

5. In the use tax law, the term "used in processing" is classified into three parts, namely: (*a*) Raw materials which are purchased by an Iowa processor and which by means of fabrication, compounding, manufacturing, or germination, become an integral part of other tangible personal property intended to be sold ultimately at retail; (*b*) fuel which is consumed in creating power, heat or steam for processing or for generating electric current; (*c*) industrial materials and equipment (which do not form an integral or component part of other tangible personal property intended to be sold ultimately at retail) which are directly used in the actual fabricating, compounding, manufacturing, or servicing of tangible personal property intended to be sold ultimately at retail, provided such property is not readily obtainable in Iowa.

6. Section 423.5, Code of Iowa, provides that where tangible personal property is sold in interstate commerce for delivery in Iowa, it is presumed that the property is sold for "use" in Iowa and the registered seller is required to collect the use tax from the purchaser. In event the tangible personal property sold for delivery in Iowa is not sold for "use" in Iowa and, therefore, not subject to the use tax, the seller is required to secure from the purchaser a proper written certificate showing the use to be made of the property.

7. Where tangible personal property is sold for delivery in Iowa but is actually sold for "resale" or "processing" within the meaning of the use tax law (and, therefore, exempt from the use tax), the seller shall secure from the purchaser a proper written certificate before omitting the billing and collection of the Iowa use tax. For the purpose of uniformity, the certain forms of certificate are suggested. While no rigid form of certificate is prescribed, the substance of the suggested forms should be contained in the certificate taken.

8. Where the registered seller repeatedly sells the same type of property to the same Iowa customer for "resale" and "processing," the seller may, at his risk, take a blanket certificate covering more than one transaction.

For sales tax certificate, see rule 24.

UT-1 CERTIFICATE OF RESALE

(By retailer)

The undersigned hereby certifies that the tangible personal property purchased from .....
..... is for the
(Name and Address of Seller)
purpose of resale; that the undersigned holds Retail Sales Tax Permit No. ..... and will account to the Iowa State Tax Commission for any sales tax due as a result of the sale of this property.

....
Address of Purchaser Signature of Purchaser

UT-2 CERTIFICATE OF RESALE

(By wholesaler)

The undersigned hereby certifies that the tangible personal property purchased from .....
..... is for the
(Name and Address of Seller)
purpose of resale; that the undersigned is solely engaged in selling tangible personal property at wholesale and does not sell to final consumers, and therefore, does not hold a Retail Sales Tax Permit.

....
Address of Purchaser Signature of Purchaser

UT-3 CERTIFICATE OF PROCESSING
(By processor selling at retail)
(Component part material)

The undersigned hereby certifies that the tangible personal property purchased from .....
..... is to be used
(Name and Address of Seller)
in the fabricating, compounding, manufacturing, or germination of other tangible personal property intended to be sold ultimately at retail, and that said property will form an integral part of the property sold; that the undersigned holds Retail Sales Tax Permit No. .....

....
Address of Purchaser Signature of Purchaser

UT-4 CERTIFICATE OF PROCESSING
(By processor not selling to final consumer)
(Component part material)

The undersigned hereby certifies that the tangible personal property purchased from .....
..... is to be used
(Name and Address of Seller)
in the fabricating, compounding, manufacturing, or germination of other tangible personal property intended to be sold ultimately at retail and that said property will form an integral part of the property sold; that the undersigned is not engaged in selling tangible personal property at retail in Iowa and, therefore, does not hold a Retail Sales Tax Permit.

....
Address of Purchaser Signature of Purchaser

UT-5 CERTIFICATE OF PROCESSING
(Industrial materials and equipment)
(Not component part material)

The undersigned hereby certifies that the tangible personal property purchased from .....
..... is to be used
(Name and Address of Seller)
as industrial materials or equipment; that said property will not form an integral or component part of other tangible personal property intended to be sold ultimately at retail, but that said property will be directly used by the undersigned in the actual fabricating, compounding, manufacturing or servicing of tangible personal property intended to be sold ultimately at retail; that said property, or similar property for use for a similar purpose, is not readily obtainable in Iowa; that the undersigned is engaged in the business of .....
.....
Description of Purchaser's Business

....
Address of Purchaser Signature of Purchaser

188 Applies to use tax only. **Registered retailers selling tangible personal property on a conditional sales contract basis.** Retailers registered with the commission and authorized to collect the use tax for the state when selling tangible personal property for delivery in Iowa for "use" in Iowa on a conditional sales contract basis, where the payment of the principal sum or a part thereof is extended over a period longer than sixty days, may collect from the consumer and report to the commission the use tax on those payments due during the quarterly period covered by the return, provided the retailer carries on his return as a deduction, the outstanding unpaid balance of conditional sales contracts for which he has not remitted the use tax.

It is pointed out that the law provides that the retailer may report on a collection basis; however, at his option, the retailer may also report and remit on a total sales basis, in which case he is entitled to bill his customers and collect therefrom the use tax computed on the full purchase price as a part of the first installment, under which circumstances the retailer must report and remit to the commission the full amount of the tax computed on the full selling price in the return for the quarterly period during which the sale and delivery was made.

Section 423.13

189 [Rescinded October 11, 1972]

190 Applies to use tax only. **Sellers of subscriptions to magazines and periodicals.** Sellers of subscriptions to magazines and periodicals who solicit such subscriptions in Iowa as sales agents or representatives are deemed to be retailers and are required to procure a retail sales tax permit and pay sales tax on all orders procured, unless the person for whom sales are being made is a permittee under the provisions of the sales tax law or is legally registered with the commission to collect and pay use tax.

192 Applies to use tax only. **Purchases by federal government—state of Iowa—political subdivisions of the state, including counties, cities, towns, school districts, etc.** The state of Iowa and state institutions as well as the federal government and federal institutions are not required to pay the use tax when purchasing tangible personal property directly for use in Iowa.

Also, all tax certifying or tax levying bodies of Iowa or governmental subdivisions thereof are, beginning July 4, 1953, exempted from sales tax or use tax concerning all purchases used for public purposes, EXCEPT purchases used by or in connection with the operation of any municipally-owned public utility, engaged in selling gas, electricity or heat to the general public, the latter being subject to tax on the same basis and subject to the same rules as such a business would be if privately operated.

Beginning with sales of tangible personal property made on and after July 1, 1947, vendors registered to collect use tax shall omit the billing and collection of Iowa use tax when selling to ANY TAX CERTIFYING OR TAX LEVYING BODY OF IOWA OR ANY GOVERNMENTAL SUBDIVISION thereof.

This has no application to retail sales tax, in the event sales are made subject to the retail sales tax law, but applies to USE TAX only.

Listed below are TAX CERTIFYING OR TAX LEVYING BODIES OF IOWA AND GOVERNMENTAL SUBDIVISIONS, for the purpose of explanation and which may not be all-inclusive:

Counties	Rural independent school districts
Cities	County and municipal hospitals
Towns	Public libraries
Townships	Consolidated school districts
Township schools	
Public schools	
Independent school districts	

Municipally-owned utilities will remit use tax due directly to the commission. [Amendment filed August 19, 1954]

See rules 50.1 and 192.1.

192.1 Consumers purchasing from the federal government or any of its agencies subject to use tax. Consumers purchasing tangible personal property, for "use" in Iowa, from the federal government or any of its agencies, on or after April 12, 1945, are liable for the payment of Iowa use tax.

The exception from the foregoing is as follows:

1. Purchases by counties or municipal corporations, from the federal government or any of its agencies, where the tangible personal property purchased is located in the state of Iowa at the time of purchase, are not subject to the use tax.

2. Consumers purchasing from the federal government or any of its agencies, industrial materials and equipment which are ordinarily not readily obtainable in Iowa from other sources, are exempted from the use tax when such industrial materials and equipment are directly used in the actual fabricating, compounding, manufacturing or servicing of tangible personal property intended to be sold ultimately at retail.

Since April 16, 1937, persons, including counties and municipal corporations, purchasing tangible personal property from the federal government or any of its agencies, for "use" in Iowa, which property was located outside the state of Iowa at the time of purchase, were liable for its payment of use tax and are still subject to use tax on such purchases so made.

Section 422.44, section 423.3.

193 Applies to use tax only. **Penalties for late filing of use tax returns.** Use tax returns are required to be filed on or before the last day of the month following the close of the quarterly period for which the return is filed.

If the return is filed after the last day of the month following the close of the quarterly period, five percent of the net tax is imposed as penalty for late filing. For each additional month of delay, one percent is added to the five percent penalty for the first month. [Amended August 5, 1958]

Section 423.18.

194 Applies to use tax only. **Registered vendors repossessing goods sold on conditional sale contract basis.** Where a retailer, who is registered with the commission and authorized to collect the use tax for the state, repossesses tangible personal property which has been sold on a conditional sales contract basis concerning which the retailer has remitted use tax to the commission on the full purchase price, the retailer may take a deduction on his retailer's use tax return during the quarterly period in which the goods were repossessed in an amount equal to the credit allowed to the purchaser's account for the goods returned, provided the retailer returns to the purchaser the use tax at the rate of two percent of the unpaid balance. If the purchaser does not claim use tax from the registered seller on the unpaid balance and the registered seller does not return to the purchaser the use tax on the unpaid balance, the registered seller may not take a deduction on his retailer's use tax return for the returned goods.

195 Applies to use tax only. **Fuel which is consumed in creating power, heat, or steam for processing or for generating electric current.** Tangible personal property purchased outside the state and consumed in creating power, heat, or steam for processing of tangible personal property intended to be sold ultimately at retail or for generating electric current, is exempt from use tax by the provisions of section 423.1, Code of Iowa. If the property purchased to be consumed as fuel in creating power, heat, or steam for processing is also used in the heating of the factory or office or for ventilating the building or for lighting the premises or for any use other than that of direct processing, that portion of the property so used is subject to the use tax, and that part of the property directly used in the processing is exempt from use tax.

The purchaser when buying tangible personal property part of which is exempt as fuel under the provisions of the law should, when purchasing from an out-of-state seller registered and authorized to collect the use tax for the state, furnish to such registered seller a written certificate certifying as to the value of the property which is to be used for processing and therefore exempt, and also the value of the property which is not to be used in processing and is therefore taxable, in order that the registered seller may properly bill the amount of use tax due.

See also rule No. 25.

Section 423.1

196 Applies to use tax only. **Federal manufacturers' or retailers' excise taxes may be excluded from the amount on which the use tax is computed, upon certain conditions.** The manufacturer who manufactures tangible personal property and who pays a federal manufacturers excise tax to the federal government with respect to the sale of that property may, when selling directly to users or consumers in the state of Iowa, exclude the amount of federal tax when computing the Iowa use tax, provided the federal excise tax is set out separately on the billing or invoice to the consumer customer.

The dealer who buys tangible personal property from a manufacturer, which manufacturer has paid a federal manufacturers excise tax concerning the sale to the dealer, may not exclude the federal manufacturers' excise tax from the amount on which the use tax is computed even though the dealer purchasing for resale from the manufacturer and selling to the consumer should show the manufacturers excise tax separately on the billing to his consumer customer. The federal manufacturers excise tax is a part of the dealer's cost of merchandise and is lost when the dealer fixes his selling price to the consumer.

Persons selling furs, jewelry, and toilet preparations to consumers in Iowa in connection with which sales they are required to pay a federal retailers excise tax may exclude the amount of federal retailers tax before the Iowa use tax is computed, provided the federal retailers excise tax is separately shown on the billing to the consumer customer and proper records are maintained.

197 Applies to use tax only. **Claim for refund of use tax.** Claims for refund of use tax must be made upon forms provided by the commission for such purposes (Form UT-513). Each claim for refund shall be filed in duplicate with the commission, fully executed and clearly stating the facts and reasons upon which the claim for refund is based and sworn to in the presence of a notary public or clerk of district court.

The use tax will be refunded only to those persons who have remitted the tax directly to the commission except use tax having been paid to the county treasurer or to the state motor vehicle department with respect to motor vehicles will be refunded, upon proper showing, directly to the person paying the tax to the county treasurer or state motor vehicle department.

Section 423.23, of the Code, which is a part of the use tax law, incorporates by reference section 422.66, Code of Iowa, which provides as follows:

See Form UT-513 in section V.

Section 422.66.

198 Out-of-state dental laboratories. Out-of-state dental laboratories registered with the commission for the collection of the use tax may, when furnishing "repair work" to Iowa dentists, remit the use tax on the same basis as does the Iowa dental laboratory under the provisions of rule No. 131.

PART IV

COLLECTION OF USE TAX

By County Treasurers and by the State Motor Vehicle Department on Motor Vehicles and Trailers

Rules No. 199 to 234, inclusive

199 Applies to use tax only. **Use tax on motor vehicles.** Imposition of use tax, see Code section 423.2. Also see Code section 423.7.

From the law [section 423.7] it is clear that it is the duty of the county treasurer to collect the use tax on automobiles, trucks and trailers when first registered in the state of Iowa. County treasurers should not accept affidavits of exemption unless the claim of exemption is clearly within the provisions of one of the exemptions set forth on affidavit forms UT-503, UT-503A, UT-515 or UT-626A, except as hereinafter provided. [Amended August 5, 1958]

200 Used vehicles. Code section 423.7 refers to new motor vehicles and new trailers. Authority for the collection of use tax on used motor vehicles and trailers by the county treasurer is found in this rule and subsection five of section 422.64.

By virtue of the authority granted in the above subsection, the commission does hereby authorize and direct county treasurers to collect use tax upon each used motor vehicle and used trailer registered in Iowa for the first time unless such vehicles come within exemptions mentioned herein.

Section 422.64 is made a part of the use tax law by reference thereto in section 423.23.

200.1 Bicycles with attached motors. Where a motor on which the tax has been paid is attached to a bicycle on which the tax has been paid and the resultant motor vehicle is registered with the treasurer as required by law, such motor vehicle shall be exempt from tax. Therefore, the applicant for registration should prepare an affidavit stating the facts and file that affidavit with the county treasurer, or in the event the county treasurer has required the applicant for registration to pay the tax, then a claim for refund should be made stating the correct facts of the case.

201 Applies to use tax only. **County treasurers' monthly reports.**

The law, Code section 423.7, provides that county treasurers shall collect use tax on new motor vehicles and new trailers before such motor vehicles or trailers shall be registered by the county treasurer, said section also provides that the county treasurer shall on or before the tenth day of each month remit the tax collected to the commission.

The county treasurer shall make reports on forms furnished by the commission and such reports shall be made as follows:

On page 1 of the county treasurer's monthly report of use tax collections and exemptions, shall be listed each new or used motor vehicle for which registration was issued and which has been exempt from use tax by reason of an affidavit accepted by the county treasurer. In addition thereto, motor vehicles purchased outside the state of Iowa, where the purchase price has been established by the execution of affidavit number UT-515, shall be listed. The tax shall be reported and remitted for each motor vehicle registered where the tax applies. In each case where the tax does not apply, the original affidavit made by the purchaser must accompany the county treasurer's monthly report to explain the exemption.

Code section 423.7 provides that the use tax report shall be forwarded on or before the tenth day of the month following the month in which the tax was collected.

Each motor vehicle and trailer, whether new or used, which is registered for the first time in Iowa, and each motor vehicle and each trailer registered or purchased in a state other than Iowa the year preceding its registration in this state, is taxable, provided such a motor vehicle or trailer was purchased by the applicant on or after the sixteenth day of April, 1937. Use tax must be collected before the county treasurer issues registration plates, unless a legal reason for exemption from payment of the use tax is shown to exist. No exemption from use tax shall be allowed unless the applicant clearly proves the right to such an exemption. The burden of proof is on the applicant.

Whenever a legal reason for exemption from use tax is proven, such exemption must be claimed and verified by a return of information in the form of an affidavit which states the facts on which claimant relies for such exemption. Each affidavit must be in duplicate, the original copy thereof being forwarded to the commission with the county treasurer's monthly report; the duplicate shall be retained by the county treasurer for his files.

Section 423.6, section 423.7.

202 Applies to use tax only. **Rate of use tax.** Use tax is imposed at the rate of two percent of the total delivered price of the motor vehicle or trailer. The total delivered price shall include freight and manufacturer's tax as well as all additional accessories, such as radios, heaters and other equipment delivered with the motor vehicle or trailer. Trade-in allowance cannot be deducted when a used car is traded in as part payment. Provided, however, that gasoline furnished with the power vehicle shall not be included in the total delivered price. Where gasoline is billed separately or itemized separately on the bill to the purchaser, it may be excluded from the memorandum of sale required to be furnished to the county treasurer in the case of the sale of a new motor vehicle.

203 [Rescinded October 11, 1972]

204 Applies to use tax only. **Claim for refund of use tax.** No claim for refunds will be considered by this commission unless such claim is accompanied by verification, on a form provided by this commission, from the county treasurer in whose office the motor vehicle was registered.

205 Applies to use tax only. **Automobile dealers defined.** Dealers shall include only persons who are holders of a retail sales tax permit and are also licensed automobile dealers. Where a dealer files an affidavit of exemption from use tax, the sales tax permit number of the dealer must be shown on each affidavit except in the case of a finance company holding a retail sales tax permit to sell repossessed cars to individuals, in which case the finance company is not required to be a holder of a dealer's license. (Modified by use tax rule No. 235.)

206 Applies to use tax only. **Automobile dealers' exemption.** Exemptions provided for dealers apply only in cases where registration is applied for in the name of the dealer holding a retail sales tax permit. Such an exemption is not allowable where members of the firm, salesmen or other persons connected with the firm register vehicles in their own individual names. (Modified by use tax rule No. 235.)

207 Applies to use tax only. **Finance companies.** Where a finance company repossesses a motor vehicle or trailer registered in a state other than Iowa, it may register such vehicle without payment of use tax by signing affidavit form number UT-626 referring to that portion of the affidavit which claims exemption by reason of the fact that the vehicle is being registered solely for the purpose of resale. Retail sales tax shall be collected by the finance company when the vehicle is sold. (Modified by use tax rule No. 235.)

208 [Rescinded October 11, 1972]

209 Selling repossessed vehicles at wholesale. Where finance companies dispose of repossessed vehicles at wholesale, that is, where such vehicles are sold to dealers, exemption must be claimed by making the return of information in the form of an affidavit stating the facts. No form of affidavit is provided for finance companies disposing of their repossessed cars by wholesale.

210 Federal, state and vehicles owned by tax certifying or tax levying bodies of Iowa or governmental subdivisions thereof. Federal or state vehicles owned by any tax certifying or tax levying body of Iowa or governmental subdivision thereof are exempt from sales or use tax EXCEPT those used in connection with or by a municipally-owned public utility engaged in selling GAS, ELECTRICITY OR HEAT to the general public. [Filed August 19, 1954]

211 Applies to use tax only. **Vehicles inherited.** Where a motor vehicle or trailer registered in a state other than Iowa is received by an Iowa resident as an inheritance from a decedent, the Iowa use tax is not imposed upon such a car. Where a motor vehicle or trailer is inherited, the county treasurer must require a special affidavit to be made before the vehicle is registered; no form is provided for such a case.

212 Applies to use tax only. **Exchange of vehicles.** When a resident of Iowa exchanges an automobile for a vehicle registered in another state, use tax is due when the Iowa resident makes application for registration of the car so received. The measure of the tax is two percent of the Iowa resident's declared valuation of the car being registered. This valuation must be established by affidavit form number UT-515.

213 Applies to use tax only. **Four affidavit forms furnished.** Four returns of information in the form of affidavits are provided by this commission. They are forms UT-503, UT-503-A, UT-514 and UT-515. When any of the above-named forms of affidavit are used, the following rules must be observed:

The venue must be established, that is, the name of the county in which the affidavit is sworn to must be inserted in the heading of the affidavit.

Paragraph "A" must be used if the owner is just one individual and does not use a trade name. If paragraph "A" is used, do not use paragraph "B".

Paragraph "B" must be used if the owner is a corporation, a partnership, an individual doing business under a trade name, or if one individual makes affidavit on behalf of another individual.

The number of the paragraph on which the applicant relies for exemption must be written in the space of the same, in paragraph "A," if "A" is used, or in paragraph "B," if "B" is used.

The make, year and type, motor number and Iowa registration number must be written in the space provided for such information.

"A" must not be used if "B" is required.

The person swearing to an affidavit shall subscribe his own signature not the name of the firm.

Example: If Peter Johnson signs an affidavit on behalf of the Johnson Motor Company, a corporation of Cherokee, Iowa, he should use paragraph "B," the heading of which should be made as follows: I, Peter Johnson, salesman for the Johnson Motor Company, a corporation. In the place designated for signature in the affidavit should be only the name "Peter Johnson."

Note: There has been filed in the Code editor's office a copy of an order of the state tax commission rescinding the above rule 213, which order was filed in the office of the secretary of state June 27, 1952. No certificate appears with the rescinding order that it had been filed for approval as to form and legality with the attorney general nor any certificate that it was so approved or remained in his office for twenty days and no action taken thereon. [Acts 54 G.A., ch 51.]

214 Applies to use tax only. **Gifts.** Cars given to Iowa residents are taxable. Use tax must be paid at the time the application is made for the first registration in this state. It is immaterial whether the application is made by the donor or the recipient of the gift. If application for registration is made by the recipient of the gift and no evidence can be obtained as to the price the donor paid for the motor vehicle or trailer, use tax must be computed and paid upon the normal delivered price of a like car in the county where the application for registration is made.

215 Administration of oaths. Persons authorized by chapter 78 and section 421.21, Code, may administer oaths in respect to affidavits authorized and required by this commission to verify exemptions from use tax on motor vehicles and trailers.

Section 421.21.

See rule No. 7.

216 Applies to use tax only. **Returns of information.** Four forms of affidavits are furnished by this commission on which to make return of information verifying exemption from use tax on motor vehicles and trailers. The affidavits are forms UT-503, UT-626 and UT-515, which are explained in rules No. 217 to 231, inclusive, except rules 228, 229 and 230.

218 Applies to use tax only. **Affidavit form UT-503, Par. (3).**

"That I am a resident of the State of ....., and not a resident of the State of Iowa, and that said motor vehicle or trailer belongs to me individually and was brought by me into the State of Iowa for my individual use and enjoyment while within the State of Iowa."

The above exemption should be claimed only in case a resident of a state other than Iowa is in this state for a short time and is using his motor vehicle or trailer, or both, *for personal reasons.* This exemption is not intended to and does not exempt persons who bring vehicles into the state of Iowa for use either directly or indirectly in the transaction of business in this state.

Example 1: Where a contractor brings vehicles into this state to be used on construction work, such vehicles are subject to use tax unless exempted by some other provision of the law.

Example 2: Where a salesman or representative of some firm brings either his own or his firm's vehicle into this state for use in connection with his work as such salesman or representative, he is not entitled to exemption under paragraph (3). Therefore, use tax shall be collected.

219 Applies to use tax only. **Affidavit form UT-503, paragraph (4). Homemade trailers.** All new trailers purchased on or after April 16, 1937, for use in Iowa are subject to use tax, use tax being payable to the office which issues the registration plates, at the time the original certificate of registration is secured.

If a consumer, who is not engaged in the business of selling new trailers or is not engaged in the business of manufacturing new trailers, purchases articles of tangible personal property and assembles same into a homemade trailer, no use tax is to be collected by the office that issues the original certificate of registration for such trailer. On the other hand, the owner of such trailer under these circumstances would owe sales tax to his Iowa supplier when purchasing the parts and would likewise owe use tax if such parts are purchased outside of Iowa, the use tax to be reported and remitted directly to the state tax commission, unless the vendor from whom purchase is made is registered with and does bill and collect the Iowa use tax for the state. The purchaser in such in-

stances does not purchase a new trailer, as such, and therefore owes no use tax on the completed unit to the county treasurer.

This exemption would not be in order, where a person engaged in the business of selling new trailers or of manufacturing new trailers applies for original certificate of registration in Iowa for the purpose of the use or consumption of the trailer by himself. In such cases use tax would be due at the rate of two percent of the purchase price, where the trailer was purchased as such, or two percent of the cost of manufacture where the trailer was manufactured.

Example 1: Where a manufacturer of vehicles brings a vehicle into the state of Iowa for use of the manufacturer or any of its agencies, and the particular car was not constructed for the individual use of the manufacturer, it is taxable.

220 Applies to use tax only. **Affidavit form UT-503, paragraph 5.**

"That said motor vehicle or trailer was purchased in the state of ....., and that a tax with respect to its sale or use was paid by me/it to that state at the rate of ..... %, purchase price $ ....., tax $.....".

The above exemption is allowed for the reason that it is not the intention of the use tax law that a tax shall be levied more than once on the property in the hands of the same individual. In order to prove the above exemption, the applicant for registration must show that the applicant is the identical person who paid retail sales tax or use tax on the same vehicle in a state other than Iowa.

The exemption provided for in paragraph 5 shall be allowed only when the amount of tax paid in another state is equal to or greater than the amount of use tax which would have been collected by this state if the vehicle had been purchased in Iowa. In Iowa, use tax is collected on the full purchase price which includes the federal manufacturer's tax, freight and all accessories delivered with the car at the time of its sale. If the amount of tax paid in another state does not equal the amount of tax that would have been collected on such a purchase, had the purchase been made in Iowa, then the difference between the tax which was paid in another state and the tax which would have been paid if the vehicle had been purchased in Iowa, must be collected before it is registered in this state.

221 Applies to use tax only. **Affidavit form UT-503, paragraph 5a.**

"That said motor vehicle or trailer was formerly licensed by me/it in the State of Iowa and a Sales Tax or Use Tax paid to the State of Iowa by me/it."

The above exemption is allowable only in case the applicant had previously registered the same car in Iowa and had paid either retail sales or use tax, then moved the vehicle out of the state, registering it in another state and later returning to the state of Iowa. In such a case the applicant must establish that he is the identical person who had previously registered the vehicle in this state and that the Iowa retail sales tax or use tax had been paid to the state of Iowa at the time of the original registration.

222 Applies to use tax only. **Affidavit form UT-503, paragraph 6.**

"That said motor vehicle or trailer was purchased by me in the state of ....., when I was a resident of said state and for use therein, and I have now changed my residence to the state of Iowa."

The exemption provided in paragraph 6 may be allowed only in the case where the resident of another state actually moves from that state into the state of Iowa and brings with him a motor vehicle or trailer. A corporation organized under the laws of another state cannot claim exemption by reason of moving into this state. A corporation does not change its residence.

Example 1: Where a salesman or representative of a corporation moves from another state into this state bringing with him the vehicle licensed in the name of the corporation, there is no change of residence on the part of the owner of the vehicle and no exemption shall be allowed. The above would be effective if the owner were a corporation, a partnership, or a person, if the car sought to be registered were intended to be used for business purposes in the state of Iowa.

223 Applies to use tax only. **Affidavit form UT-503, paragraph 7.**

"That I am a resident of the state of ....., and not a resident of the state of Iowa; that said motor vehicle was purchased for use in the state of ....., and is being registered in Iowa for the sole purpose of facilitating movement to that state."

The above paragraph is to be used for the purpose of securing exemption in case a resident of another state purchases a car in the state of Iowa and registers such a car for the sole purpose of driving the car out of the state.

Example 1: If a resident of another state should be driving through Iowa and wreck his car and should trade the wrecked car for a new one with which to travel on through the state, the car purchased for the purpose of continuing the journey would be exempted from the Iowa use tax and paragraph 7 should be used in support of the applicant's claim of exemption.

226 Applies to use tax only. **Exemptions from use tax upon registration of motor vehicles and trailers by reason of use in interstate transportation or interstate commerce.** A motor vehicle or trailer to be exempt from the Iowa use tax, under the provisions of subsection 2 of Code section 423.4, upon the grounds that it is used in interstate transportation or interstate commerce must clearly come within one or more of the following provisions. It must be shown:

1. That the motor vehicle or trailer is to be used exclusively in interstate transportation or interstate commerce; that is, the motor vehicle or trailer sought to be exempted is not intended to be used at any time for intrastate business;

2. That the motor vehicle or trailer sought to be exempted from use tax is intended to be used on a regular route between fixed termini, at least one terminus to be located outside the state of Iowa;

3. That the motor vehicle or trailer sought to be exempted from use tax must be intended to be used as a common carrier under all rules and regulations governing common carriers;

4. That motor vehicles or trailers, which are not common carriers, operate between a point in Iowa and points outside the state of Iowa in the transportation of goods, wares, or merchandise of the owner and make no deliveries in Iowa except such deliveries as are made to the warehouse of the owner.

A motor vehicle which is used for personal transportation of representatives of a person, firm or corporation, having its principal place of business in the state of Iowa or having a branch office or place of business in the state of Iowa, is not considered as being used in interstate commerce, notwithstanding the fact that such a vehicle may from time to time be used to transport persons across the state lines.

Any motor vehicle or trailer which is intended to be used at any time for the transaction of purely intrastate business or the making of purely intrastate deliveries is not considered to be used exclusively in interstate transportation or interstate commerce and the use tax imposed by law should be collected when such a motor vehicle or trailer is registered in Iowa for the first time.

Form UT-503-A is hereby designated as the official form on which to make affidavit in support of claim for exemption from payment of use tax for the reason that a motor vehicle or trailer is used *exclusively* in interstate commerce or interstate transportation.

No claimant shall be exempt until such claimant shall have established his right under this rule beyond all doubt and shall have made affidavit on form UT-503-A in which such a claimant sets forth the manner in which such a motor vehicle is used in the business of the applicant and shows by the statement made on said form UT-503-A that the motor vehicle is to be used in such manner as to be clearly exempt under the provisions hereinbefore set forth. [See note following 227.]

231 [Rescinded October 11, 1972]

232 Applies to use tax only. **Incorrect affidavits.** Affidavits of exemption which are not correct in both substance and form cannot be accepted by this commission in lieu of use tax. In case of doubt, the county treasurer shall collect use tax. It is always the privilege of the taxpayer to file a claim for refund if he believes use tax has been erroneously collected.

233 Dealers selling new trailers, including house, farm and other trailers. Section 423.8 Code of Iowa provides that motor vehicle and trailer dealers are exempted from sales tax with respect to their receipts from retail sales of new motor vehicles or new trailers, as these terms are defined in the motor vehicle law of Iowa, which are required to be registered under such motor vehicle law.

The Iowa motor vehicle law was amended, effective July 4, 1961, by chapter 108, Acts 59GA to provide that all "House Trailers" and "Mobile Homes" be registered under section 321.123, whether or not for highway use. This means that Iowa dealers receipts from sales at retail of new house trailers and new mobile homes made on and after July 4, 1961, are exempted from sales tax. Such dealers should report such receipts on their quarterly sales tax returns to the state tax commission and take appropriate deductions under 2 (F) of the return.

The county treasurer or state motor vehicle registration division shall, before issuing a registration for a new house trailer or new mobile home sold on or after July 4, 1961, collect the use tax due and give a proper receipt therefor and report and remit same in its monthly report to the commission.

With respect to each "Mobile Home" and each "House Trailer" for which application for registration is made, which has not been previously registered in Iowa under the motor vehicle law, as well as such units which may have been registered in another state, but have been purchased by non-Iowa consumers, the office issuing the registration shall collect any use tax due, or secure an affidavit form UT-503 and state thereon the reason why use tax is not due, if this be the case, even though the applicant may have acquired the unit before July 4, 1961.

A consumer before July 4, 1961, buying a house trailer or mobile home either new or used, from an Iowa dealer, where the use tax was not paid nor the sales tax paid the dealer would be in a situation where tax would appear due, and section 321.30(6) of the motor vehicle law provides registration shall be refused if the required sales tax was not paid to the dealer, as well as section 423.7 of the use tax law providing use tax due shall be paid before registration. If there is a proper basis for exemption, the complete facts should be given on affidavit form UT-503, the reverse side to be used if space is needed.

The office issuing the registration, need not review for sales or use tax purposes, an application for registration of a mobile home or house trailer purchased by the applicant longer than five years before the date of the application for registration. [Amended August 10, 1962]

Sections 321.123, 423.1 (7) and 423.7

233.1 Homemade trailers for personal use. (See Rule 219).

234 Powers and duties of motor vehicle registration division, Department of Public Safety of Iowa. When a motor vehicle or trailer (new or used) is registered or titled with the latter division, that division shall have all of the powers and duties in respect to the collection of and reporting to the state tax commission of use tax, granted to and respective county treasurers of Iowa by chapter 423, Code of Iowa, and by state tax commission rules and regulations adopted pursuant thereto in collecting use tax on motor vehicle and trailers registered or titled in their several counties. [Amended August 5, 1958]

235 Use tax to be collected by the county treasurers and the state motor vehicle registration division. (Applies to "new motor vehicles" and "new trailers".)

A. In each case where an original Iowa registration is issued for a "New Motor Vehicle" or a "New Trailer", as these terms are defined in the use tax law, the county treasurer or the state motor vehicle division, whoever issues the registration, shall collect from the applicant a use tax of two percent of the applicant's purchase price, except only as otherwise provided herein.

B. An original registration may be issued for a NEW MOTOR VEHICLE or a NEW TRAILER WITHOUT the collection of use tax only in the following situations:

1. When the applicant is applying for a registration for a "New House Trailer" or a "New Farm Trailer" and can prove he has paid the Iowa sales tax to the dealer selling the trailer (as provided in Rule No. 233) or that he purchased the unit from a consumer who paid the sales tax to the dealer selling the unit. An affidavit (in duplicate) stating the facts should be made and filed by the applicant with the office who issues the registration, a copy to be retained by the office and the original to be sent to the use tax department with the monthly use tax report.

2. Where a CONSUMER is applying for registration of a "homemade trailer" never before registered, where he built the trailer himself from parts which he purchased at retail and upon which he paid a tax to the seller. These facts should be established by the applicant executing and filing in duplicate with the office issuing the registration, an affidavit, a copy to be retained by that office and the original to be sent to the use tax department with the monthly report. The term "homemade trailer" does not include those trailers which are manufactured by a person in such a business, for the purpose of rental or sales. (See Form UT-503 Affidavit No. 4.)

3. When a nonresident of Iowa applies for a "nonresident—in transit" registration ($5.00) for a new motor vehicle which he has purchased in Iowa and for which he intends to secure permanent registration in a state other than Iowa. Such an applicant should establish such facts by executing an affidavit in duplicate and filing same with the office issuing the registration, a copy to be retained by that office and the original to be sent to the use tax department with the monthly use tax report. (See Form UT-503 Affidavit No. 7.)

4. When a nonresident of Iowa is applying for a truck, truck tractor, or semitrailer (but not passenger buses) registration for the sole purpose of complying with the motor truck reciprocity law and complies by properly executing affidavit Form UTMVR-611 (in triplicate) and presents same to the office issuing the registration, one copy to be sent with the monthly report to the use tax department, and one to the state motor vehicle registration division.

5. Where the applicant is a tax certifying or tax levying body of Iowa or governmental subdivision thereof and is to use the unit for public purposes, except municipally-owned electric, gas or heat departments selling to the public would owe use tax on units used in these departments.

6. Where the applicant for an Iowa registration for a new unit has paid and can prove sales tax or use tax or occupational tax payment by him to a state other than Iowa, credit shall be allowed for such tax so paid and proven, against the Iowa tax. If equal to the Iowa tax, no further tax should be collected, and if less than the Iowa tax, the difference shall be collected by Iowa. Iowa tax is measured at the rate of two percent of the applicant's purchase price, before any amount is deducted for property traded in, in event of a trade-in deal.

C. Chapter 110, Acts of the 54th General Assembly, [322.2(6)], defines "used motor vehicles" to mean "any motor vehicle of a type subject to registration under the laws of this state, which has been previously registered or for which a certificate of title has been issued in this or any other state."

D. For the purpose of this rule a new motor vehicle or a new trailer is one subject to registration under the laws of this state, which has not been previously registered or titled in this or any other state.

E. Licensed auto dealers are not required under the new motor vehicle "Title" law to register used foreign motor vehicles, but are required to secure a title for such units within forty-eight hours after they arrive in this state. Dealers, when applying for a title on such foreign used vehicles, should execute a resale affidavit Form UT-626 in duplicate and file with the office issuing the title, a copy to be retained by that office and the original to be sent to the use tax department with the monthly use tax report.

F. Upon adoption of this rule Affidavit Form UT-514 shall be abolished and its use no longer permitted in lieu of use tax.

G. Any and all opinions and rules of the state tax commission, including rules numbered 205, 206, 207, 228, 229 and 230 of the commission's 1953 Sales and Use Tax Regulations, which are to be found in 1952 I. D. R. which are inconsistent

herewith, are hereby amended and modified as of the effective date of this rule, to conform herewith.

The provisions of this rule, numbered 235, shall be effective the first day of April, 1954, and any modifications of previous rules hereby made shall not apply prior to April 1, 1954. [Filed March 15, 1954]

CHAPTER 5
SALES AND USE TAX ON SERVICES

Preamble. The Code, section 423.2, as amended, imposes, on and after October 1, 1967, a complementary tax on the use in this state of the enumerated services rendered, furnished, or performed in Iowa, or on the use in Iowa of the product or result of such services obtained outside this state. The following regulations specifically deal with the interpretation of each service taxed as enumerated in the Code, section 422.43, as amended. All of the following regulations are applicable to the tax imposed by both sections 422.43 and 423.2, of the Code, as amended, unless otherwise stated. The rules and regulations governing the administration of the Retail Sales Tax, chapter 422 of the Code, as amended, and the Use Tax, chapter 423 of the Code, as amended, applicable to tangible personal property also apply to the administration of such sales and use tax on the gross receipts from the rendering, furnishing, or performing of services, imposed by sections 422.43 and 423.2 of the Code, as amended.

5.1(422) Definition. The phrase "persons engaged in the business of" as used herein shall mean persons who offer the named service to the public or to others for a consideration whether such persons offer the service continuously, part time, seasonally, or for short periods.

5.2(422) Alteration and garment repair. Persons engaged in the business of altering or repairing any type of garment or clothing are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Included are the services rendered, furnished, or performed by tailors, dressmakers, furriers, and others engaged in similar occupations. When the vendor of garments or clothing agrees to alter same without charge when an individual purchases such garments or clothing, no tax on services in addition to the sales tax paid on the purchase price of the article shall be charged. However, if the vendor makes an additional charge for alteration, that additional charge shall be subject to the tax on the gross receipts from the services.

5.3(422) Armored car. Persons engaged in the business of providing armored car service to others are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Armored car" shall mean a wheeled vehicle affording defensive protection by use of a metal covering, or other elements of ordnance.

5.4(422) Automobile repair. Persons engaged in the business of repairing motor vehicles are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include any type of restoration, renovation, or replacement of any motor, engine, working parts, accessories, body, or interior of the motor vehicles, but shall not include installation of new parts or accessories, which are not replacements, added to the motor vehicles. "Motor vehicle" shall mean a vehicle commonly used on a highway propelled by any power other than muscular power.

5.5(422) Battery, tire, and allied. Persons engaged in the business of installing, repairing, maintaining, restoring, or recharging batteries, and services joined and connected therewith; and persons engaged in the business of installing, repairing, maintaining tires, and services joined or connected therewith, for any type of vehicle or conveyance are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.6(422) Investment counseling. Persons engaged in the business of counseling others, for a consideration, as to investing in and disposition of both real and personal property, tangible as well as intangible, are engaged in and are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Persons engaged in the business of counseling others relative to investment in or disposition of property or rights, whether real, personal, tangible, or intangible, where a charge is made for such counseling, are rendering, furnishing, or performing services, the gross receipts from which are subject to tax. Where such services are rendered incidental to trust services, as in the case of trustees, guardians, executors, administrators, and conservators, the gross receipts from such incidental services are not subject to tax.

5.7(422) Bank service charges. The gross receipts from bank services rendered, furnished, or performed by banks and charged to the customer are receipts which are subject to the tax.

"Bank service charges" are all charges assessed to and collected from the depositor in cash or by debit in connection with and arising out of a periodic analysis of his checking account, whether based on activity, balance maintained, fixed maintenance cost allocation, or any combination thereof, and all service charges made in connection with checking accounts. For example, but not limited to:

Flat charge by account or activity.

Per check or average balance.

Thrifty accounts. PAYC (pay as you check) accounts.

Deposits. (Per item or out-of-town checks.)

"Bank" is an institution empowered to do all banking business, such as power and right to issue

negotiable notes, discount notes and receive deposits, and "banking business" consists in receiving deposits payable on demand and buying and selling bills of exchange.

5.8(422) Barber and beauty. Persons engaged in the business of haircutting, hair styling, hair coloring, wig care, manicuring, pedicuring, applying facial and skin preparations, and all like activities which tend to enhance the appearance of the individual are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Each "barber, beauty, or other beautification shop or establishment" shall receive only one sales tax permit and remit the tax as one enterprise no matter what business arrangement exists between the owner of the shop and those who work therein.

5.9(422) Boat repair. Persons engaged in the business of repairing watercraft are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include any type of restoration, renovation, or replacement of any motor, engine, working part, accessory, hull, or interior of the watercraft, but shall not include installation of new parts or accessories, which are not replacements, added to such watercraft.

5.10(422) Car wash and wax. Persons engaged in the business of washing or waxing cars are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. The gross receipts from such service shall be taxable whether it is performed by hand, machine, or coin-operated devices. "Cars" are defined as any motor vehicle as defined in chapter 321 of the Code.

5.11(422) Carpentry. Persons engaged in the business of building, making, or repairing, as a carpenter, as the trade is known in the usual course of business, of any structures are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Such structures may be either real or personal property.

5.12(422) Roof, shingle, and glass repair. Persons engaged in the business of repairing, restoring, or renovating roofs, or shingles, or restoring or replacing glass, whether such glass is personal property or affixed to real property, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.13(422) Dance schools and dance studios. The gross receipts from services rendered, furnished, or performed by dance schools or dance studios are subject to tax. A "dance school" is any institution established primarily for the purpose of teaching any one or more types of dancing. A "dance studio" is any room or group of rooms in which any one or more types of dancing are taught. If other activities such as acrobatics, exercise, baton twirling, tumbling, or modeling are taught in dance schools or studios, the gross receipts from the teaching of such activities are subject to tax.

5.14(422) Dry cleaning, pressing, dyeing, and laundering. Persons engaged in the business of rendering, furnishing, or performing dry cleaning, pressing, dyeing, and laundering services, including those who engage in such business by means of coin-operated washers, ironers or manglers, dryers, and dry cleaning machines are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.15(422) Electrical repair and installation. Persons engaged in the business of repairing or installing electrical wiring, fixtures, switches in or on real property, or repairing or installing any article of personal property powered by electric current are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include mending or renovation of existing parts, replacing of defective parts, or cleaning of the article. "Installation" shall include affixing electrical wiring, fixtures, or switches to real property, affixing any article of personal property powered by electric current to any other article of personal property, or making any article of personal property, powered by electric current, operative with respect to its intended functional purpose.

5.16(422) Engraving, photography and retouching. Persons engaged in the business of engraving on wood, metal, stone, or any other material, taking photographs, or renovating or retouching an existing likeness or design are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.17(422) Equipment rental. Persons engaged in the business of furnishing equipment to other persons for their use are rendering, furnishing, or performing a service subject to tax measured by the gross receipts of fees charged for the use of such equipment. For this purpose "equipment" is defined as any functional personal property, the function of which contributes to the purposes of the person who shall have obtained it for use, whether such use involves equipment which functions in a state of rest or in a state of motion. This rule is not to be so construed as to be at variance with subsection 2 of section 422.45 of the Code.

5.17(1) *Contract entered into prior to June 15, 1967.* Where equipment rented pursuant to a contract entered into prior to June 15, 1967, results in gross receipts from charges for such rental, such gross receipts attributable to the portion of the rental period occurring prior to June 15, 1969, pursuant to such contract, shall not be a basis for the tax; gross receipts, under such contract, attributable to the portion of the rental period occurring on and after June 15, 1969, shall be a basis for the tax.

5.17(2) *Contract entered into after June 15, 1967.* Where equipment rented pursuant to a contract entered into after June 15, 1967, and prior to October 1, 1967, results in gross receipts from charges for such rental, such gross receipts attributable to the portion of the rental period occurring before October 1, 1967, pursuant to such contract, shall not be a basis for the tax; but such gross receipts as are attributable to the portion of the rental period occurring on and after October 1, 1967, shall be a basis for the tax. Correspondingly, gross receipts of rental charges for such equipment pursuant to rental periods beginning on and after October 1, 1967, shall be a basis for the tax.

5.18(422) Excavating and grading. Persons engaged in the business of excavating and grading for the purpose of constructing roads, highways, thoroughfares for travel or transportation from place to place, driveways, paths, routes, roadbeds and borrow pits, or any other type of way; the excavating and digging of basements and any other type of recessional dugout, or the forming of any type of cavity, by concaving or convexing in the ground by digging or scooping; also the digging of pipe lines of all types, sewers, cesspools or septic pools, swimming and water areas, for recreational or any other purpose, drainage ditches and creeks and the general forming of earth by contouring, terracing, damming, sloping, or ridging to retard erosion or speed drainage, and building a line connecting the various points on a line surface that have the same elevation, and any other type of earth moving, forming, or moulding are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.19(422) Farm implement repair. Persons engaged in the business of repairing, restoring, or renovating implements, tools, machines, vehicles, or equipment, but not including installation of new parts or accessories which are not replacements, used in the operation of farms, ranches, or acreages on which growing crops of all kinds, livestock, poultry, or fur-bearing animals are raised or used for any purpose are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.20(422) Flying service. Persons engaged in the business of teaching a course of instruction in the art of operation and flying of an airplane, and instructions in repairing, renovating, or reconditioning an airplane are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.21(422) Furniture, rug, upholstery, repair and cleaning. Persons engaged in the business of repairing, restoring, renovating, or cleaning furniture, rugs, or upholstery are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Furniture" shall include all indoor and outdoor furnishings wherever used. "Rugs" shall include all types of rugs and carpeting. "Upholstery" shall include all materials used to stuff or cover any piece of furniture.

5.22(422) Fur storage and repair. Persons engaged in the business of storing for preservation and future use, refurbishing, repairing, and renovating, including addition of new skins, furs are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. The term "furs" shall include both natural and manufactured simulated products resembling furs.

5.23(422) Golf and country clubs and all commercial recreation. Fees, dues, or charges paid to golf and country clubs are subject to tax. "Country clubs" shall include all clubs or clubhouses providing social activities, including golf and other recreation for members. Persons providing facilities for recreation for a charge are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Recreation" shall include all activities pursued for pleasure, including sports, games, and activities which promote physical fitness, but shall not include admissions otherwise taxed under section 422.43 of the Code.

5.24(422) House and building moving. Persons engaged in the business of moving houses, or buildings from one location to another, whether for repair or otherwise, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.25(422) Household appliance, television, and radio repair. Persons engaged in the business of repairing household appliances, television sets, or radio sets, but not including installation of new parts or accessories which are not replacements [see 5.15(422)], are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include mending or renovation of existing parts of such appliances, television sets, radio sets, and all other household appliances as well as replacing defective parts of such articles. "Household appliances" shall include all mechanical devices normally used in the home, whether or not used therein.

5.26(422) Jewelry and watch repair. Persons engaged in the business of repairing jewelry or watches are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Jewelry or watch repair" shall include any type of mending, restoration, or renovation of parts, or replacement of defective parts.

5.27(422) Machine operator. Persons engaged in the business of operating machines of all kinds, where a fee is charged, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Machine operator" is a person who exercises the privilege of

managing, controlling, and conducting a mechanical device or a combination of mechanical powers and devices used to perform some function and thereby produce a certain effect or result. For the purpose of this rule, the meaning ascribed to "machine" in 5.28(422) shall apply.

5.28(422) Machine repair of all kinds. Persons engaged in the business of repairing machines of all kinds are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Machine" shall include all devices having moving parts and operated by hand, powered by a motor, engine, or other form of energy. It is a mechanical device or combination of mechanical powers and devices used to perform some function and produce a certain effect or result.

5.29(422) Meat, fish, and fowl processing. Persons engaged in the business of processing meat, fish, or fowl for another for the use or consumption of such other person are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. A meat, fish, or fowl packer or processor who processes such products for sale at retail to the ultimate consumer [, said processing including, but not limited to, freezing or cold storage thereof by the packer or processor, or by a person performing such service for the packer or processor] would not be rendering, furnishing, or performing a service the gross receipts from which would be subject to tax. However, if a person purchases meat, fish, or fowl and then hires another to process that product for use or consumption by such person, the gross receipts from the rendering, furnishing, or performing such services are subject to tax.

5.30(422) Motor repair. Persons engaged in the business of repairing motors powered by any means whatsoever are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include mending or renovation of parts, replacement of defective parts or subassemblies of the motor, but shall not include installation of new parts or accessories which are not replacements.

5.31(422) Motorcycle, scooter, and bicycle repair. Persons engaged in the business of repairing motorcycles, scooters, and bicycles are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include mending or renovation of parts, replacement of defective parts or subassemblies, but shall not include installation of new parts or accessories which are not replacements.

5.32(422)(1-5) [Rescinded October 19, 1972]

5.33(422)(1-3) [Rescinded October 19, 1972]

5.34(422) Oilers and lubricators. Persons engaged in the business of oiling, changing oils, or lubricating and greasing vehicles and machines of all types having moving parts or powered by a motor or engine, or other form of energy, heavy equipment vehicles or implements, whether such equipment functions in a state of rest or in a state of motion, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.35(422) Office and business machine repair. Persons engaged in the business of repairing office and business machines are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include mending and renovation of existing parts, replacement of defective parts or subassemblies, but shall not include installation of new parts or accessories which are not replacements.

5.36(422) Painting, papering, and interior decorating. Persons engaged in the business of painting, papering, and interior decorating are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Painting" shall mean covering of both interior and exterior surfaces of tangible personal or real property with a coloring matter and a mixture of a pigment, or sealant, with some suitable liquid to form a solid adherent when spread on in thin coats for decoration, protection, or preservation purposes, and all necessary preparations therefor. "Papering" shall mean applying wallpaper or wall fabric to the interior of houses or buildings and all necessary preparations thereto including surface preparation. "Interior decoration" shall mean the service of designing or decorating the interiors of houses or buildings, counseling with respect to such designing or decoration, or the procurement of furniture, fixtures, or home or building decorations. When any person provides interior decorating service without charge as an incident to the sale of real or personal property, no sales tax in addition to that paid on the purchase price or any part thereof of the personal property shall be charged.

5.37(422) Parking lots. Persons engaged in the business of providing parking space for any vehicle are rendering, furnishing, or performing a service the gross receipts from which are subject to tax, irrespective of the method of collection utilized. "Parking lots" shall include any facility used primarily for parking vehicles, whether an outdoor lot or a building. "Parking lots" shall also include any parking facility provided by the lessor of a building to his lessees if the lessor makes a separate charge for the parking space above and beyond the rental charge for other space in the building. "Parking lots" shall also include any facility used primarily for parking vehicles even if such facility is used seasonally or for even shorter duration, such as providing parking space at the time of a show, fair, carnival, or similar event.

5.38(422) Pipe fitting and plumbing. Persons engaged in the business of pipe fitting and plumbing are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Pipe fitting and plumbing" shall mean the trade of fitting, threading, installing, and repairing of pipes, fixtures, or apparatus used for heating, refrigerating, air conditioning, or concerned with the introduction, distribution, and disposal of a natural or artificial substance.

5.39(422) Wood preparation. Persons engaged in the business of wood preparation or treatment for others are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Wood preparation" shall include all processes whereby wood is sawed from logs into measured dimensions, planed, sanded, oiled, or treated in any manner before being used to repair an existing structure or create a new structure or part thereof. But where such preparation is engaged in solely for the purpose of processing lumber or wood products for ultimate sale at retail, such "preparation" may not be deemed as rendering, furnishing, or performing a service the gross receipts from which would be subject to tax.

5.40(422) Private employment agencies. Persons engaged in the business of providing listings of available employment, counseling others with respect to future employment, or aiding another in any way to procure employment are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.41(422) Printing and binding. Persons engaged in the business of printing or binding any printed matter other than for the purpose of ultimate sale at retail, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Printing" shall include any type of printing, lithographing, mimeographing, multigraphing, typing incidental to multiple reproduction(s) listed herein, photocopying, and similar reproduction. The following activities are representative of services the gross receipts from which are subject to tax: The printing of pamphlets, leaflets, stationery, envelopes, folders, bond and stock certificates, abstracts, law briefs, business cards, matches, mechanical pencils and pens, campaign posters, and banners for the users thereof.

5.42(422)(1,2) [Rescinded October 19, 1972)

5.43(422) Sewing and stitching. Persons engaged in the business of sewing and stitching are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.44(422) [Rescinded October 19, 1972]

5.45(422) Shoe repair and shoeshine. Persons engaged in the business of repairing any type of footwear such as shoes, boots, and sandals are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Repair" shall include the mending or renovation of existing parts and the replacement of defective parts, but shall not include installation of new parts or accessories which are not replacements, of the footwear in any manner. "Shoeshine service" is meant to be the shining of shoes in connection with the repair thereof and shoeshine service administered alone would not require the vendor to charge the user of the service the specified tax.

5.46(422) Storage warehouse and storage locker. Persons providing facilities for storing any type of personal property are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Storage warehouses and storage lockers" shall include, but are not limited to, any facility provided for the purpose of storing household or building furnishings, foods, clothes, and furs, luggage, automobiles, airplanes, or any other tangible personal property. (See "Warehouses" Infra)

5.47(422) Telephone answering service. Persons engaged in the business of providing telephone answering service, whether by person or machine, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.48(422) Test laboratories. Persons engaged in the business of operating a laboratory for testing any substance for any experimental, scientific, or commercial purpose are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Testing directly related to personal health services is not subject to tax under this rule.

5.49(422) Termite, bug, roach, and pest eradicators. Persons engaged in the business of eradicating, or preventing the infestation by termites, bugs, roaches, and all other living pests are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. Persons who eradicate, prevent, or control the infestation of any type of pest by means of spraying are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. This rule is not to be so construed as to be at variance with subsection 3 of section 422.42 of the Code.

5.50(422) Tin and sheet metal repair. Persons engaged in the business of repairing tin or sheet metal, whether the same has or has not been formed into a finished product are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.51(422) Turkish baths, massage, and reducing salons. Persons engaged in the business of operating turkish baths, reducing salons, or in the business of massaging are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Turkish baths"

shall mean any type of facility wherein the individual is warmed by steam or dry heat. "Reducing salons" shall mean any type of establishment which offers facilities or a program of activities for the purpose of weight reduction. "Massaging" shall include the kneading, rubbing, or manipulating of the body to condition the body, but not include any body manipulation undertaken as a practice of one or more of the healing arts. Persons engaged in the business of operating health studios which, as a part of their operation, offer any or all of the services of turkish baths, massages, or reducing facilities or programs shall be subject to tax upon the gross receipts from the above-named service.

5.52(422) Vulcanizing, recapping, or retreading. Persons engaged in the business of recapping or retreading tires for any vehicle, or vulcanizing any type of product, for others are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.53(422) Warehouses. Persons engaged in the business of warehousing goods for others are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. A "warehouse" is a building or place adapted to the reception and storage of goods and merchandise, and, in a more limited sense, is a building or place in which a warehouseman deposits the goods of others in the course of his business.

5.54(422) Weighing. Persons engaged in the business of weighing any item of tangible personal property are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.55(422) Welding. Persons engaged in the business of welding materials whether for the purpose of mending existing articles, adding to them, or creating new articles are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. "Welding" is the act of fusing materials by means of heating to a plastic, adhesive state and uniting them with one another or to a material commonly united to each.

5.56(422) Well drilling. Persons engaged in the business of drilling or digging wells for extracting water, oil, natural gas, or any other natural substance or for the introduction, distribution, storage, or disposal of a natural or contrived substance are rendering, furnishing, or performing a service the gross receipts from which are subject to tax.

5.57(422) Wrapping, packing, and packaging of merchandise. Persons engaged in the business of wrapping, packing, and packaging of merchandise are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. If the person "wraps, packs, or packages" merchandise as a service incidental to the sale of such merchandise and does not charge for the service, no sales or use tax in addition to that paid on the purchase price of the merchandise need be collected, or remitted. However, if a separate charge be made for wrapping, packing, or packaging, the gross receipts therefrom are subject to the tax.

5.58(422) Wrecking service. Persons engaged in the business of wrecking, tearing down, defacing, or demolishing tangible personal or real property, or any parts thereof, are rendering, furnishing or performing a service the gross receipts from which are subject to tax.

5.59(422) Wrecker and towing. Persons engaged in the business of towing any vehicle by means of pushing, pulling, or carrying, or freeing any vehicle from mud, snow, or any other impediment, including hoisting incidental thereto, are rendering, furnishing, or performing a service the gross receipts from which are subject to tax. The gross receipts from service charges made when any person travels to any place to lift, extricate, or tow any vehicle or to salvage any vehicle are subject to the tax. Towing does not include transporting operable vehicles from one location to another where no operative aspect of such vehicle is integral to such transporting. A "vehicle" is that in or on which a person or thing is, or may be, carried from one place to another.

5.60(422) [Rescinded October 19, 1972]

[Filed September 30, 1967; amended March 13, 1968, October 19, 1972]

INHERITANCE TAX

1.1(450) The Commissioners 1958 Standard Ordinary Mortality Table. Where death occurs on or after July 4, 1965, inheritance tax shall be computed by use of the Commissioners 1958 Standard Ordinary Mortality Table.

This rule is intended to implement chapter 450 of the Code.

[Filed July 5, 1955; amended September 4, 1959, December 8, 1959, February 26, 1960, January 18, 1961, February 8, 1961, May 19, 1961, December 7, 1961, December 28, 1961, July 31, 1963, May 13, 1964, November 17, 1965, March 8, 1966]

CHAPTER 9
EQUALIZATION OF VALUATIONS OF CLASSES OF PROPERTY

9.1(441) Abstract of assessment. Each county assessor and city assessor in the state shall use the form of abstract prescribed and furnished by the department of revenue, and shall certify the data and figures contained in the abstract to the department promptly after the final adjournment of the regular or extended session of the local board of review. The actual values and taxable values of property reported on the abstract filed by each assessor jurisdiction shall be reviewed and

considered by the director of revenue in the equalization of valuations process.

9.2(441) Adjusted valuations. The director of revenue shall proceed to review the current year abstracts of assessment filed by each assessor jurisdiction commencing on the first Monday in July, and may commence sending tentative property valuation notices on and after the second Monday in July of the same year to the county auditors of the counties whose reported actual values and taxable values of real and personal property the director has reviewed and made a determination as to whether the values of any kind or class of property reported are in need of an adjustment for purpose of equalization of valuations in the several counties.

9.3(441) Determination of level of assessment for each class of property.

9.3(1) *Agricultural realty outside and within incorporated cities and towns (more than ten acres).*

a. Use of assessment-sales ratio study. Basic data shall be that submitted to the department of revenue by county recorders and assessors in accordance with section 421.17(6), which, as provided in section 441.21(1), shall be refined by eliminating any reported abnormal sales of real estate or by adjusting same to eliminate the effect of factors which distort market value of said real estate, as primarily determined from communications by and between the department with buyers and sellers of agricultural property sold and reported to the department by county recorders and assessors. The basic data used shall be for the year immediately prior to the year of equalization of valuations, but if in the opinion of the director of revenue such basic data is not adequate for a statistical sample, other prior years' sales adjusted for subsequent changes in either assessed value or market value may be used. The assessment-sales ratio to be used for these classes of property shall be determined from the assessment-sales ratio study and such assessment-sales ratio shall be used in determining market value, as provided in section 441.2(1)"*b*".

b. Use of income capitalization study.

(1) The capitalization rate established by the state board of tax review pursuant to section 441.2(1)"*a*" shall be used in the capitalization of income procedure.

(2) The average net income per acre for each county shall be developed and determined by and from studies made by the department of revenue in conjunction and co-operation with appropriate departments of Iowa State University, Ames, Iowa. Where necessary, adjustment may be made for known special circumstances such as assessments or costs for levees, drainage or irrigation. Wherever possible emphasis shall be given to the results of reports of soil surveys completed since January 1, 1949, in determining the productivity and earning capacity of agricultural property.

(3) The income value shall be determined by dividing the average net income per acre by the capitalization rate.

c. Determining actual value per acre of agricultural realty.

(1) The average value per acre of agricultural property in a county shall be determined by combining 50 percent of the market value and 50 percent of the income value determined under these rules.

(2) Comparison shall be made by the director of revenue of the determined actual value per acre figures with the per acre values shown by the latest annual Iowa brokers' survey conducted by personnel of Iowa State University, Ames, Iowa, and pertinent data and figures contained in the federal farm census, and also pertinent data and figures assembled by field representatives of the department of revenue assigned to giving assistance in assessment matters to county and city assessors and local boards of review, and reference shall be made to other related material from reliable sources.

9.3(2) *Residential realty outside and within incorporated cities and towns (ten acres or less).*

a. Use of assessment-sales ratio study. Basic data shall be that submitted to the department of revenue by county recorders and assessors in accordance with section 421.17(6), which, as provided in section 441.21(1), shall be refined by eliminating any reported abnormal sales of real estate or by adjusting same to eliminate the effect of factors which distort market value of said real estate. The basic data used shall be for the year immediately prior to the year of equalization of valuations, but if in the opinion of the director of revenue such basic data is not adequate for a statistical sample, other prior years' sales adjusted for subsequent changes in either assessed value or market value may be used. Other pertinent data and figures from reliable sources will be considered in the equalization of valuations process, if it is found that the sales reported are not representative of these classes of property for any assessor's jurisdiction for the purpose of determining the level of assessment for taxation purpose.

b. Use of other relevant data. Population trends and figures reported by the U.S. Census Bureau for the year 1970 for Iowa cities and towns, and the number of dwellings by cities and towns accounted for on the abstract of assessment for the current year of each assessor jurisdiction, and the average taxable value of the number of dwellings so accounted for will be used for comparative valuation purposes. Reference shall be made to any other pertinent information.

9.3(3) *Mercantile or commercial realty outside and within incorporated cities and towns.*

a. Use of assessment-sales ratio study. Basic data shall be that submitted to the department of revenue by county recorders and assessors in accordance with section 421.17(6), which, as

provided in section 441.21(1), shall be refined by eliminating any reported abnormal sales of real estate or by adjusting same to eliminate the effect of factors which distort market value of said real estate. The basic data used shall be for the year immediately prior to the year of equalization of valuations, but if in the opinion of the director of revenue such basic data is not adequate for a statistical sample, other prior years' sales adjusted for subsequent changes in either assessed value or market value may be used. Other pertinent data and figures from reliable sources will be considered in the equalization of valuations process, if it is found that the sales reported are not representative of these classes of property for any assessor's jurisdiction for the purpose of determining the level of assessment for taxation purpose.

b. Use of income data. The large variety of business enterprises and the numerous types and sizes of commercial buildings, as well as the great number of different businesses carried on in every assessor jurisdiction, do not permit the direct use of an income factor. Any pertinent income data and figures relating to Iowa commercial or mercantile properties obtained from a reliable source shall be considered in the equalization of valuations process.

c. Use of other relevant information.

(1) Consideration shall be given to relevant information assembled by field representatives of the department of revenue assigned to assisting local assessors and local boards of review in the assessment of mercantile or commercial realty located within assessor jurisdictions in the state and whose duties require them to travel into and through all counties of the state, which places them in a position to observe these classes of property and to have knowledge of methods used by the local assessors in valuing such classes of property.

(2) Population trends and figures reported by the U.S. Census Bureau for the year 1970 for Iowa cities and towns, and data as to retail sales in Iowa cities and towns as contained in the latest annual Iowa retail sales tax reports issued by the department of revenue will be used for comparative valuation purposes.

9.3(4) *Industrial and manufacturing property outside and within incorporated cities and towns.*

a. What is included in these classes of realty. Lands, lots, industrial buildings and structures, also machinery used in manufacturing establishments and for purpose of taxation regarded as real estate under section 428.22.

b. Use of assessment-sales ratio study. Basic data shall be that submitted to the department of revenue by county recorders and assessors in accordance with section 421.17(6), which, as provided in section 441.21(1), shall be refined by eliminating any reported abnormal sales of real estate or by adjusting same to eliminate the effect of factors which distort market value of said real estate. The basic data used shall be for the year immediately prior to the year of equalization of valuations, but if in the opinion of the director of revenue such basic data is not adequate for a statistical sample, other prior years' sales adjusted for subsequent changes in either assessed value or market value may be used. Other pertinent data and figures from reliable sources will be considered in the equalization of valuations process, if it is found that the sales reported are not representative of these classes of property for any assessor's jurisdiction for the purpose of determining the level of assessment for taxation purpose.

c. Use of income data. The numerous types and sizes of industrial or manufacturing buildings located in the several assessor jurisdictions in the state and the many different products manufactured and the great variations in the number of employees in the manufacturing plants do not permit the direct use of an income factor.

d. Use of other relevant information. Consideration shall be given to relevant information assembled by field representatives of the department of revenue assigned to assisting local assessors and local boards of review in the valuing and assessing of industrial or manufacturing realty located within assessor jurisdictions in the state, and particular consideration will be given to the findings of representatives of the department of revenue as to the extent to which each assessor in the state has valued and assessed these classes of property in compliance with industrial or manufacturer's guidelines given all assessors in the state by the department of revenue. Any substantial deviation which can be justified, from those guidelines shall be taken into consideration in the equalization of valuations process. Data regarding Iowa manufacturers published by the Iowa development commission, Des Moines, Iowa, shall also be considered, as will be pertinent data published by the U.S. department of commerce.

9.3(5) *Forest and fruit-tree reservations.*

a. Use of assessment-sales ratio study. Forest and fruit-tree reservations shall be assessed on a taxable valuation as provided under section 441.22. Any sales of either forest reservations or fruit-tree reservations reported to the department of revenue by county recorders and assessors in accordance with section 421.17(6) will not be used.

b. Use of income data. Income from any forest reservation or fruit-tree reservation is restricted by reason of provisions of chapter 161 of the Code.

c. Use of other relevant information. As long as the present statutory limitations pertaining to forest reservations and fruit-tree reservations are in effect, it will be recognized that the equalization of the valuations of such classes of property is accomplished by operation of law (section 441.22).

9.3(6) *Livestock and tangible personal property—use of relevant data.* Reference shall be

made to guidelines contained in the most recent Iowa Personal Property Price Guide compiled by the department of revenue in conjunction with the price guide committee of the Iowa State Association of Assessors, a copy of which guide was made available to each assessor jurisdiction in the state, and in any case where it is evident the reported actual value and assessed value of this kind and class of property justifiably deviates from those guidelines such will be considered in the equalization of valuations process. Any other pertinent data published by the U.S. government or by any department or agency of the state of Iowa shall be considered.

9.4(441) Judgment of assessors and local boards of review. Nothing stated in these rules should be construed as prohibiting the exercise of honest judgment, as provided by law, by the assessors and local boards of review in matters pertaining to valuing and assessing of individual properties within their respective jurisdiction.

9.5(441) Protests against proposed increases in valuations of property described on tentative property valuation notices. The director of revenue shall take into consideration all pertinent facts contained in a written protest submitted by and in any oral presentation made against a proposed increase in the valuation of a kind or class of property by those officials and others who it is provided in section 441.48 may protest. The director of revenue in the case any such protest is made shall not issue a final property valuation notice without first taking into consideration such facts presented.

9.6(441 and 421) Reconvening of local boards of review—equalization of valuations of kinds and classes of property. Tentative property valuation notice showing a proposed percentage increase in the reported valuations for a kind or class of real property. The director of revenue shall in such cases order the local board of review to reconvene in special session for the purpose of hearing any and all protests that any affected property owner or taxpayer within the jurisdiction of said board may have, whose valuations of property, if adjusted pursuant to the tentative property valuation notice issued by the director to the county auditor of the county would result in a greater taxable value than permitted by section 441.21 and where the property owner or taxpayer is able to show to the satisfaction of the local board of review that an inequity would result if the provisions of such tentative notice would be applied to his property, the local board of review in such cases would be authorized to exonerate the property owner from all or the appropriate part of the percentage increase so ordered by the director, by adjusting the taxable value of the property of the owner thereof to 27 percent of actual value. Any such adjustment made by the local board of review shall not exceed the percentage increase provided for in the director's tentative notice, and action taken by it at such special session shall be reported to the director of revenue who shall review same and either approve or disapprove same.

[Filed May 11, 1971]

MOTOR FUEL TAX

[Transferred from Treasurer of State]

1. Withdrawals from marine and pipeline terminals.

Par. 1. No person, firm or corporation owning, leasing, possessing or operating a marine or pipe line with one or more outlets, terminals or storage facilities in the state of Iowa shall withdraw any motor vehicle fuel or petroleum product therefrom except through meters and accompanying accessories installed at the points of withdrawal, all of which, including the installation, shall have been first approved by the treasurer of state.

Par. 2. No change shall be made in the methods of withdrawal until after the new method has first been approved by the treasurer of state.

Par. 3. Reports of withdrawals, on prescribed forms, shall be made to the treasurer of state, as required by him.

Par. 4. The treasurer of state reserves the right to waive the provisions of paragraph 1 of this regulation when withdrawals are made solely into railroad tank cars and the treasurer of state is satisfied that such withdrawals are accurately recorded and accounted for.

2. Transportation of liquefied gas by liquefied gas retailers. The transportation in any conveyance by a liquefied gas retailer of liquefied gas in bottles or drums in a gross amount of not to exceed 700 pounds at any one time shall not be construed to be a transportation in bulk so as to require the liquefied gas retailer so transporting to hold a motor vehicle fuel transport license.

3. Use of double-faced carbon in preparation of refund invoices. Only double-faced carbon paper shall be used in preparing invoices showing the purchase of motor vehicle fuel on which a refund of the state gasoline tax is to be claimed.

4. Enforcement officers designated. Each auditor, each inspector and each investigator employed in the motor vehicle fuel tax division shall act as an enforcement officer in enforcing chapter 324, of the Code, shall be vested with the powers of peace officers in the performance of such duties.

SPECIAL FUEL

No diesel fuel shall be dispensed or delivered by an Iowa licensed special fuel dealer into the fuel supply tank of any motor vehicle, except through a state of Iowa sealed metered computing pump permanently installed at a licensed special fuel dealer's location.

INTERSTATE MOTOR VEHICLE FUEL USE

In compliance with section 324.54 of the Iowa motor vehicle fuel tax law. A permittee has the privilege of entering or leaving this state with any amount of motor vehicle fuel. For that privilege the permittee must pay tax on all motor vehicle fuel purchased in this state, and shall pay tax on the amount consumed less the amount purchased in the month for which the report is made.

Each permittee shall file a report each month. If no travel takes place in Iowa write NONE after "Miles Traveled in Iowa."

The report must be filed with the treasurer of state on or before the last day of the calendar month following the month in which the fuel was imported into this state in the fuel tanks of motor vehicles. Add ten percent penalty for late filing.

The operation for each month shall be separate. No credit for excessive motor vehicle fuel purchased in Iowa in one month shall be taken for any subsequent month.

The mileage shall be the actual miles traveled in Iowa and the tax shall be computed on the total amount of motor vehicle fuel consumed in this state during the month.

Each permittee must be prepared to prove by adequate records the correctness of the "Miles Traveled in Iowa" and the "Average Miles per Gallon" to the field auditors of this division.

The tax shall be computed separately under each section on the total number of gallons of motor vehicle fuel consumed in the state of Iowa.

No allowance shall be made for fuel purchased in excess under one section to offset fuel purchased under the other section.

A permittee shall not deduct 20 gallons per trip.

Proof of motor vehicle fuel purchased in Iowa shall be in the form of original invoices of purchases. These invoices are not to be mailed to the state of Iowa, but are to be kept in the permit holder files except when requested.

When errors in computation result in an overpayment of taxes a credit memorandum in the amount of the overpayment will be issued and is to be used as credit on the next month's report. Credit memorandums not used within 60 days from date of issue will be canceled.

MOTOR VEHICLE FUEL TAX COMPUTATION

For the purpose of determining the amount of liability of tax imposed, the motor vehicle fuel tax on all purchases of a distributor shall be reported and computed on either gallons loaded or adjustment of 60° F. figure for one calendar year. Any change must be requested from the motor vehicle fuel tax division in writing.

Where a distributor has more than one motor vehicle fuel supplier, the distributor shall not report and compute the tax on purchases from one supplier on 60° F. temperature adjustment and from other suppliers on gallons loaded.

Invoiced gallonage shall mean the amount shown on the Bill of Lading or Manifest.

The state recommends that the same motor vehicle fuel sales invoices as required by section 324.17 of the Iowa motor vehicle fuel tax law for sales invoices subject to tax refund be used for sales to truckers. The state however will accept sales to trucker invoices meeting simpler specifications as follows:

a. Name and address of the filling station must be printed and name and address of the purchaser must be written or stamped on each invoice.

b. It must be the original top invoice prepared by the seller with double-faced carbon paper under the original. Carbon copies are not acceptable.

c. Invoices must bear serial numbers. General merchandise sales pads bearing numbers 1 to 50 only, are not acceptable.

d. Credit card invoices are acceptable if issued as credit sales. Credit card invoices issued covering cash sales are not acceptable.

e. Date, type of fuel and gallons must be shown on the invoice.

IDENTIFICATION OF MOTOR VEHICLE FUEL HIGHWAY TRANSPORTS

A vehicle as used in the statute shall mean the trailer tank unit, or other similar transport equipment used for transportation of motor fuel, the purpose of which is to contain and transport motor vehicle fuel in quantities of four thousand gallons or more on the public highways of the state of Iowa. A motor vehicle fuel transport license plate is to be attached to the front and rear end of any such unit. The two plates on each vehicle must be identical and shall not be transferred from one vehicle to another.

REFUNDS OF MOTOR VEHICLE FUEL TAX

Any invoice in support of a claim for refund must be filed within three calendar months from the date of purchase of the fuel. The filing date shall be the date the claim is received in the office of the treasurer of state and not the date the claim is signed, or the envelope is postmarked. Any invoice not received within the time limitation will be disallowed and deducted from the claim.

DIESEL FUEL TAX

Before selling diesel fuel in bulk to dealers and users, the seller must ascertain if the purchaser has a tax-free or a tax paid special fuel license with the state of Iowa.

A distributor or supplier must sell special fuel dealers and special fuel users according to the type of special fuel license issued to the dealer or user by the state of Iowa.

All dealers and users who are sold diesel fuel in bulk must have a tax-free or tax paid special fuel license.

REFUNDS TO NONLICENSEES

a. The name and address of each person for whom the service was performed.

b. The date and amount of processing of products of each job.

c. A copy of the invoice covering the service performed on each job.

d. The date and mileage of each trip made.

e. If the owner or operator has a current special fuel Users License with the state, a record must be kept of the gallons of fuel dispensed from bulk storage into the fuel tank of each vehicle.

f. All records pertaining to the refund claim are to be made available to the state on request.

TAX CREDIT MEMORANDUMS

9 (324) The application for motor fuel or special fuel tax credit memorandum shall contain the following information:

a. Date of job or work.

b. Type of job or work.

c. Amount of work performed each job.

d. Customer name and address.

e. Invoice or bill of lading number of each job.

f. Type of fuel used each job.

g. Gallons of fuel used for each nonhighway job or operation for which the application is made.

h. Application for tax credit memorandum on the fuel used for nonhighway purpose must be submitted with the motor vehicle fuel tax report of the same month. Claims submitted covering any other period will not be allowed.

This rule is intended to implement section 324.16.

10 (324) The application for motor fuel or special fuel tax credit memorandum shall be submitted as follows:

Application Form MVF 41 for tax credit memorandum on the fuel used in a bordering state must be submitted with the motor vehicle fuel tax report Form MVF 14 of the same month. Claims submitted covering any other period will not be allowed.

SALES INVOICE

11 (324) Every retail motor vehicle fuel dealer when making a sale of motor vehicle fuel which has been dispensed into the fuel supply tank of a motor truck, shall give to each purchaser upon demand a sales invoice meeting the following requirements:

Name and address of the service station must be machine printed and name and address of the purchaser must be written or stamped on each invoice. Where more than one station is owned by the same company the firm name and home address must be machine printed and the station locations may be rubber stamped. It must be the original top invoice prepared by the seller with doublefaced carbon paper under the original. Invoices must bear serial numbers of three or more digits. Credit card invoices are acceptable if issued as credit sales. Credit card invoices issued covering cash sales are not acceptable. Such a sales invoice must be issued on demand even though the sale be on an open account or charge basis and in such event must be marked to show this fact at the time of issuance. Date, type of fuel and gallons must be shown on the invoice.

This rule is intended to implement section 324.54 of the Code.

INTERSTATE OPERATIONS PERMIT

If a person engaging in interstate operations is operating in a lessor-lessee arrangement, it shall be the responsibility of the lessee to secure a permit as required under section 324.53 and to compute, report and remit all motor vehicle fuel taxes due the state of Iowa.

This rule is intended to implement sections 324.52 and 324.53 of the Code.

SECRETARY OF STATE

CHAPTER 1
UNIFORM COMMERCIAL CODE

1.1(554) Forms for financing statements.

1.1(1) The form to be used for filing financing statements pursuant to section 554.9403 shall conform to the following standards in order to be entitled to be filed for a fee of one dollar and fifty cents.

a. The forms shall be eight inches wide and either five or ten inches in length with all information printed on one side.

b. The debtor block shall be in the extreme upper left-hand corner.

c. The secured party block shall be immediately adjacent to the right of the debtor block.

d. Filing officers block shall be in the extreme upper right-hand corner.

e. The signature(s) of the secured party(ies) and debtor(s) shall be located in the lower right- and left-hand corners and identified accordingly.

f. It shall consist of three copies, to wit: An alphabetical, numerical and acknowledgment copy.

1.1(2) Forms not conforming to the above standards, but otherwise conforming to the requirements of the law are entitled to be filed for a fee of two dollars and fifty cents.

1.1(3) Forms conforming to the above standards and accompanied by an additional document or writing are entitled to be filed for a fee of two dollars and fifty cents.

1.2(554) Forms for financing statement changes.

1.2(1) The form to be used for filing financing statement changes pursuant to sections 554.9404, 554.9405 and 554.9406 shall conform to the following standards in order to be entitled to be filed for a fee of one dollar and fifty cents.

a. The form shall be eight inches wide and five inches in length with all information printed on one side.

b. The debtor block shall be in the extreme upper left-hand corner.

c. The secured party block shall be immediately adjacent to the right of the debtor block.

d. Filing officers block shall be in the extreme upper right-hand corner.

e. The form may be used for continuation, partial release, assignment, termination or amendment and must clearly indicate by express use of one of the above-capitalized terms for which purpose it is being used.

f. The signature(s) of the secured party(ies) shall be located in a lower corner.

g. If an amendment, the signature of the debtor(s) shall be located in a lower corner.

h. It shall consist of three copies, to wit: An alphabetical, numerical and acknowledgment copy.

i. The acknowledgment copy of an original financing statement filing may be used for termination by execution of the termination portion thereof.

1.2(2) Forms not conforming to the above standards, but otherwise conforming to the requirements of the law are entitled to be filed for a fee of two dollars and fifty cents.

1.2(3) Forms conforming to the above standards and accompanied by an additional document or writing are entitled to be filed for a fee of two dollars and fifty cents.

1.3(554) Forms for requests of information.

1.3(1) The form to be used for filing requests for information, pursuant to section 554.9407 shall conform to the following standards in order to be entitled to be filed for a fee of two dollars.

a. The forms shall be eight inches wide and ten inches in length with all information printed on one side.

b. The debtor block shall be in the extreme upper left-hand corner.

c. The party requesting information block shall be immediately adjacent to the right of the debtor block.

d. Filing officers' block shall be in the extreme upper right-hand corner.

e. It shall contain a space for reporting file number, number of pages, date and hour of filing, and names and addresses of secured parties.

f. It shall consist of two copies, to wit: A copy for certification and a filing officer's accounting copy.

1.3(2) Forms not conforming to the above standards but otherwise conforming to the requirements of the law are entitled to be filed for a fee of three dollars.

1.4(554) Requests for copies. Requests for copies of filings must clearly specify the file number, number of pages and date and hour of filing for all copies requested.

1.5(554) Telephone requests. Requests for information on UCC filings by telephone will not be honored by the office of the secretary of state. County recorders are not required to honor such requests.

1.6(554) Real estate index. Financing statements and financing statement changes covering fixtures or crops and containing a description of real estate shall not be indexed in the real estate index in the county recorders' offices.

These rules are intended to implement chapter 554 of the Code.

[Filed November 14, 1967]

CHAPTER 2
REGISTRATION AND PROTECTION OF MARKS

2.1(548) Classification. The following general classes of goods and services are established, but do not limit or extend the applicant's or registrant's rights, and a single application for registration of a mark may include any or all goods upon which, or services with which, the mark is actually being used comprised in a single class, but in no event shall a single application include goods or services upon which the mark is being used which fall within different classes of goods or services.

The said classes are as follows:

GOODS

Class	Title
1	Raw or partly prepared materials
2	Receptacles
3	Baggage, animal equipments, portfolio and pocketbooks
4	Abrasives and polishing materials
5	Adhesives
6	Chemicals and chemical compositions
7	Cordage
8	Smokers' articles, not including tobacco products
9	Explosives, firearms, equipments, and projectiles
10	Fertilizers
11	Inks and inking materials
12	Construction materials
13	Hardware and plumbing and steam-fitting supplies
14	Metals and metal castings and forgings

15 Oils and greases
16 Paints and painters' materials
17 Tobacco products
18 Medicines and pharmaceutical preparations
19 Vehicles
20 Linoleum and oiled cloth
21 Electrical apparatus, machines and supplies
22 Games, toys and sporting goods
23 Cutlery, machinery, and tools, and parts thereof
24 Laundry appliances and machines
25 Locks and safes
26 Measuring and scientific appliances
27 Horological instruments
28 Jewelry and precious-metal ware
29 Brooms, brushes and dusters
30 Crockery, earthenware and porcelain
31 Filters and refrigerators
32 Furniture and upholstery
33 Glassware
34 Heating, lighting and ventilating apparatus
35 Belting, hose, machinery packing, and non-metallic tires
36 Musical instruments and supplies
37 Paper and stationery
38 Prints and publications
39 Clothing
40 Fancy goods, furnishings and notions
41 Canes, parasols and umbrellas
42 Knitted, netted and textile fabrics, and substitutes thereof
43 Thread and yarn
44 Dental, medical and surgical appliances
45 Soft drinks and carbonated waters
46 Foods and ingredients of foods
47 Wines
48 Malt beverages and liquors
49 Distilled alcoholic liquors
50 Merchandise not otherwise classified
51 Cosmetics and toilet preparations
52 Detergents and soaps

SERVICES

Class Title

100 Miscellaneous
101 Advertising and business
102 Insurance and financial
103 Construction and repair
104 Communication
105 Transportation and storage
106 Material treatment
107 Education and entertainment

2.2(548) Assistance in applications. The secretary of state cannot give legal advice as to the nature and extent of the protection afforded by law nor advice as to the registrability of a specific mark except as questions may arise in connection with pending applications.

2.3(548) Incomplete or defective applications. An application will not be filed unless the application and accompanying facsimiles or specimens are in proper form, comply with the statutory requirements and are accompanied by the statutory fee. Specimens or facsimiles which are metal need not be submitted, a facsimile being preferable in order to avoid filing problems. Documents not filed will be returned with a statement of the reasons therefor.

2.4(548) Registration dates. The registration date is the date on which the mark is actually posted in the registration indices of the office of the secretary of state, after the application has been examined and found acceptable.

2.5(548) Form of application. The application shall be on a current form supplied by the secretary of state, be completed in the English language and plainly written or typed. If the mark or any part thereof is not in the English language, it must be accompanied by a sworn translation.

2.6(548) Withdrawal of application. Prior to actual registration of the mark, the applicant, by written request, may withdraw the application.

2.7(548) Plurality of goods in single application. A single application may recite a plurality of goods, or a plurality of services, comprised in a single class, provided the particular identification of each of the goods or services be stated and the mark is used or has been actually used on or in connection with all of the goods or in connection with all of the services specified.

2.8(548) Single class in one application. A single application to register a mark for both goods and services or for goods or services in different classes will be rejected. Applications must be restricted to goods or services comprised in a single class.

2.9(548) Conflicts. Whenever application is made for registration of a mark or trade name which so resembles a mark registered in this state or a mark previously used in this state by another and not abandoned, as to be likely, when applied to the goods or services of the applicant, to cause confusion or mistake or to deceive, a conflict shall be declared to exist and registration denied.

2.10(548) Conflicts between applications. Conflicts between pending applications will be resolved on the basis of the claimed date of first use. The secretary of state may require affidavits and other proof of first use.

2.11(548) Record change on automatic transfer. In the event of mergers or consolidations of corporations, a certified copy of such documents may be accepted to transfer ownership of marks.

If the name of the owner of record of a mark is changed, and request for a change of the records is made, then written proof of such change can be made by sworn affidavit showing the manner or mode by which the change of ownership was made.

2.12(548) Change of address. If the registered owner of a mark changes the address set

forth on the registration, then written notice of such change of address must be given to the secretary of state. Such notice must clearly identify the mark or marks involved and must request that the change of address be noted on the records of the registration on file.

[Filed December 11, 1970]

CHAPTER 3
DEPUTY COMMISSIONERS OF ELECTIONS

3.1(47) Deputy secretary of state and deputy county auditor to act. In the absence or disability of the state commissioner of elections the deputy secretary of state shall perform all of the duties of the state commissioner of elections. In the absence or disability of the county commissioner of elections the deputy county auditor shall perform all of the duties of the county commissioner of elections.

3.2(47) County commissioner of elections may appoint special deputies. The county commissioner of elections may appoint the city clerks of the cities within his county as special deputies to assist him in the conduct of elections. However, the county commissioner of elections shall bear full responsibility for all acts of the special deputies as they relate to elections.

These rules are intended to implement chapter 47 of the Code.

[Filed August 8, 1972]

CHAPTER 4
BALLOTS FOR THE OFFICES OF PRESIDENT AND VICE PRESIDENT

4.1(49) Form of ballot. Paper ballots for voting for president and vice president only shall be printed at the order of the county commissioner of elections in all counties within the state for those voters who have not met the 30-day durational residency requirement in Iowa. In areas of the state where voter registration is required, those persons who are not properly registered shall not be permitted to vote the special presidential ballot, nor any other ballot. The form of the special presidential ballot shall be in substantially the form of the absent voter's ballot, except that only the names of the candidates for president and vice president shall be printed thereon. A supply of special presidential ballots shall be furnished to the chairman of the election board in each precinct in the county at the same time other election supplies are furnished to him.

4.2(49) Voting booths. The county commissioner of elections shall provide, in each election precinct, a private booth in which the voter may mark a special presidential ballot. The judge of election shall provide each booth with an appropriate writing instrument. In precincts where voting machines are used, the county commissioner of elections may use a voting machine as a voting booth. The election judge shall be provided with a temporary removable screen or curtain to ensure the privacy of the voter in marking the special presidential ballot within a voting machine. An election judge shall instruct the voter voting the special presidential ballot not to move the lever inside the voting machine, thereby preventing the voter from casting any ballots on the machine.

4.3(49) Counting of ballots. In precincts using paper ballots, the judges of election shall deposit the special presidential ballots in the same locked container with all other ballots, and the special presidential ballots shall be counted along with all other ballots.

In precincts using voting machines, the paper ballots cast by those electors voting for president and vice president only shall be deposited in a locked container along with any other paper ballots cast at that election in that precinct. Immediately upon the closing of the polls, the judges of election shall open the locked container and unfold the ballots; after which, under the supervision of all of the judges, the ballots shall be registered on the voting machine the same as if the voter had registered it in person.

These rules are intended to implement chapter 49 of the Code.

CHAPTER 1
CONDITIONS OF ELIGIBILITY

1.1(249A) Persons covered.

1.1(1) *Money payment recipients.* Medical assistance will be available to all recipients of old-age assistance, aid to dependent children, aid to the blind and aid to the disabled and their dependent relatives whose needs are included in the assistance grant.

1.1(2) *Medical only recipients.* Medical assistance will be available to those individuals and families who are not receiving assistance under one of the money payment public assistance categories as follows:

a. Individuals or families who would be eligible for one of the money payment public assistance programs, except for an eligibility requirement in effect in the applicable money payment program which is prohibited by federal law and regulations in a medical assistance program.

b. Individuals receiving care in skilled nursing homes who would be eligible for a grant of

assistance based on the department's standards, if they were receiving care in a licensed noncertified nursing home.

1.2(249A) Medical resources. Medical resources include health and accident insurance, eligibility for care through Veterans Administration, Crippled Childrens Program, Title XVIII of the Social Security Act (Medicare) and other resources for meeting the cost of medical care which may be available to the recipient. Such resources must be used when reasonably available. Payment will be approved only for those services or that part of the cost of a given service for which no medical resources exist.

[Filed March 11, 1970]

CHAPTER 2
APPLICATION AND INVESTIGATION

2.1(249A) Place of filing. Application should be filed in the county department of social welfare in the county where the applicant resides. However, if medical care is required by the applicant while visiting in another county, application may be made in that county. The latter county will complete the forms used in the application process and forward them to the county of residence which will complete the determination of eligibility.

2.2(249A) Method of filing. Application may be made by the person himself, or by someone acting responsibly in his behalf. A person filing an application in behalf of the applicant should be a relative, friend or other person interested in the applicant's welfare and familiar with his affairs.

2.3(249A) Investigation. Applications will be investigated by the county department of social welfare and a decision rendered regarding eligibility within 30 days of the date of application.

2.4(249A) Notification of decision. The applicant will be notified in writing of the decision of the county department of social welfare regarding his eligibility for medical assistance. If he has been determined to be ineligible an explanation of the reason will be provided.

2.5(249A) Date of approval of medical assistance. The effective date of approval of medical assistance will be the first day of the month preceding the month in which application is made providing the applicant was eligible on that date. If the applicant was not eligible during the month preceding application the effective date of approval will be the date on which eligibility was attained. No payment will be made for medical care received prior to the effective date of approval.

2.6(249A) Certification for services. The state department of social services shall issue an appropriate medical assistance identification card to an individual determined eligible for the benefits provided under the medical assistance program.

2.7(249A) Reinvestigation. Reinvestigation will be made as often as circumstances indicate but in no instance shall the period of time between reinvestigations exceed 12 months.

[Filed March 11, 1970]

CHAPTER 3
CONDITIONS OF PARTICIPATION FOR PROVIDERS OF MEDICAL AND REMEDIAL CARE

3.1(249A) Physicians. All physicians (doctors of medicine and osteopathy) licensed to practice in the state of Iowa are eligible to participate in the program. Physicians in other states are also eligible if duly licensed to practice in that state.

3.2(249A) Retail pharmacies. Pharmacies are eligible to participate providing they are licensed as such in the state of Iowa or duly licensed in other states.

3.3(249A) Hospitals. All hospitals licensed in the state of Iowa and certified as eligible to participate in Part A of the Medicare program (Title XVIII of the Social Security Act) are eligible to participate in the medical assistance program. Hospitals in other states are also eligible if duly licensed and certified for Medicare participation in that state.

3.4(249A) Dentists. All dentists licensed to practice in the state of Iowa are eligible to participate in the program. Dentists in other states are also eligible if duly licensed to practice in that state.

NOTE: DENTAL LABORATORIES—Payment will not be made to a dental laboratory.

3.5(249A) Podiatrists. All podiatrists licensed to practice in the state of Iowa are eligible to participate in the program. Podiatrists in other states are also eligible if duly licensed to practice in that state.

3.6(249A) Optometrists. All optometrists licensed to practice in the state of Iowa are eligible to participate in the program. Optometrists in other states are also eligible if duly licensed to practice in that state.

3.7(249A) Opticians. All opticians in the state of Iowa are eligible to participate in the program. Opticians in other states are also eligible to participate.

NOTE: Opticians in states having licensing requirements for this professional group must be duly licensed in that state.

3.8(249A) Chiropractors. All chiropractors licensed to practice in the state of Iowa are eligible to participate. Chiropractors in other states are also eligible if duly licensed in that state.

3.9(249A) Home health agencies. Home health agencies are eligible to participate provid-

ing they are certified to participate in the Medicare program. (Title XVIII of the Social Security Act)

3.10(249A) Medical equipment and appliances, prosthetic devices and sickroom supplies. All dealers in medical equipment and appliances, prosthetic devices and sickroom supplies in Iowa or in other states are eligible to participate in the program.

3.11(249A) Ambulance service. Providers of ambulance service are eligible to participate providing they meet the eligibility requirements for participation in the Medicare program. (Title XVIII of the Social Security Act)

3.12(249A) Skilled nursing homes. Nursing homes and hospitals or distinct parts thereof currently licensed as such by the Iowa state department of health are eligible to participate in the program providing these facilities meet all of the conditions for participation as extended care facilities in the Medicare program. (Title XVIII of the Social Security Act) In addition to these requirements such facilities must also meet the requirements of the 1967 Life Safety Code of the National Fire Protection Association.

[Filed March 11, 1970]

CHAPTER 4
AMOUNT, DURATION AND SCOPE OF MEDICAL AND REMEDIAL SERVICES

4.1(249A) Physicians services. Payment will be approved for all medically necessary services and supplies provided by the physician including services rendered in the physician's office or clinic, the home, in a hospital, nursing home or elsewhere.

Exceptions—Drugs dispensed by physician. There is no provision for payment for drugs dispensed by a physician unless it is established that there is no licensed retail pharmacy in the community in which the physician maintains his office.

4.2(249A) Retail pharmacies. Payment will be approved for the following when ordered by a legally qualified practitioner (physician, dentist or podiatrist):

1. Legend drugs and devices requiring a prescription by law.
2. Insulin.
3. Medical and sickroom supplies when ordered by the physician for a specific rather than an incidental use.

4.3(249A) Hospitals. Payment will be approved for not more than ten days of inpatient hospital care per admission. There are no limitations on the amount of outpatient care for which payment will be made so long as such care is medically necessary. If the recipient is eligible for inpatient or outpatient hospital care through the Medicare program payment will be made for deductibles and coinsurance applicable in that program. Payment will be approved for ward or other multiple bed accommodations. No payment will be approved for a private room.

4.4(249A) Dentists. Payment will be approved for services and supplies within the scope of a schedule of dental procedures furnished each dentist participating in the program.

4.5(249A) Podiatrists. Payment will be approved only for certain podiatric services. Each podiatrist participating in the program is furnished with a list of podiatric services for which payment will be approved.

4.6(249A) Optometrists. Payment will be approved only for certain optometric services and supplies. Each optometrist participating in the program is furnished with a list of services and supplies for which payment will be approved.

4.7(249A) Opticians. Payment will be made only for certain services and supplies provided by opticians. Each optician participating in the program is furnished a list of services and supplies for which payment will be approved.

4.8(249A) Chiropractors. Payment will be made only for certain chiropractic services. Each chiropractor participating in the program is furnished a list of chiropractic services for which payment will be approved.

4.9(249A) Home health agencies. Payment will be approved for care in the same amount and subject to the same conditions effective in the Medicare program. (Title XVIII of the Social Security Act)

4.10(249A) Medical equipment and appliances, prosthetic devices and sickroom supply dealers. Payment will be made for all medical equipment and appliances, prosthetic devices and sickroom supplies required by the recipient because of his condition. The written prescription of the physician is necessary in all cases. If the item required by the recipient is costly and will be needed only a brief period consideration shall be given to rental rather than purchase of the item.

4.11(249A) Ambulance service. Payment will be approved for ambulance service if it is required by the recipient's condition and the recipient is transported to the nearest hospital with appropriate facilities or to one in the same locality, from one hospital to another, to the patient's home or to a skilled nursing home. Payment for ambulance service to the nearest hospital for outpatient service will be approved only for emergency treatment. Ambulance service must be medically necessary and not merely for the convenience of the patient.

4.12(249A) Skilled nursing homes. Payment will be approved for care in skilled nursing homes providing skilled nursing care is medi-

cally necessitated by the recipient's condition. The definition of "skilled nursing care" is identical to that in effect for extended care beneficiaries in the Medicare program. There are no limitations on the amount of care for which payment will be approved so long as skilled nursing care as defined above is medically necessary. Payment will be approved for multiple bed or ward accommodations. No payment will be approved for a private room.

[Filed March 11, 1970]

CHAPTER 5
OTHER POLICIES RELATING TO PROVIDERS OF MEDICAL AND REMEDIAL CARE

5.1(249A) Principles governing reimbursement of providers of medical and remedial care. Payment for services of providers of care participating in the medical assistance program will be made on the basis of "reasonable cost" for institutional providers (hospitals and skilled nursing homes). The determination of reasonable cost for institutional providers will be made utilizing the methods and criteria in effect for these providers in the Medicare program. (Title XVIII of the Social Security Act)

The department with the advice of representatives of the various professional groups participating in the program has developed schedules of maximum allowances for use in determining payment to noninstitutional providers of care. Providers of care must accept reimbursement based upon reasonable charges as determined by the department making no additional charges for the service.

5.2(249A) Disciplinary action against provider of care. The department reserves the right to remove from participation in the medical assistance program any practitioner or provider of care who has violated the department's requirements for participation. Although not limited to the following practices, the following are illustrative practices which would be considered just cause for removal from participation of a provider of remedial care and services.

5.2(1) Billing for services or supplies not provided or for services and supplies different from those actually provided.

5.2(2) Provision of services or supplies in an amount in excess of that medically necessary for the proper treatment of the patient.

5.2(3) Persistent refusal to comply with the department's rules governing participation in the program.

5.2(4) Unprofessional, unethical or other questionable practices relating to care and treatment of recipients.

Any overpayments made to providers of service shall be recovered by the department.

5.3(249A) Appeal by provider of care. Any provider of care who is dissatisfied with a decision rendered by the carrier with reference to reimbursement for services provided or the medical necessity of such service may file an appeal with the department of social services. The appeal which must be submitted in writing and state the complaint of the provider of care shall be filed with the department of social services. On receipt of the appeal a hearing will be arranged before the hearing officer of the department of social services. At the time of the hearing the provider of care may present such evidence as he desires. Following the hearing a decision will be rendered by the commissioner of the department of social services and such decision shall be final.

[Filed March 11, 1970]

CHAPTER 6
PROCEDURE AND METHOD OF PAYMENT

6.1(249A) The carrier function in medical assistance.

6.1(1) *General administrative responsibilities of carrier.* The carrier designated by the department will perform the following primary functions:

a. Receive, process and pay claims submitted by providers of medical and remedial care participating in the program.

b. Make available instructional materials and billing forms to providers participating in the program.

c. Provide reports, statistical and accounting information as required by the department.

d. Participate with staff of the department in analysis and evaluation of policies and procedures.

e. In co-operation with the department develop and carry out a continuous program of cost and utilization review which is applicable to all groups of providers participating in the program. The purpose of cost and utilization review is to assure that only required medical and health services are being received by recipients of medical assistance and that the cost of such services is not in excess of that charged the general public.

6.1(2) *Method of selection of carrier.* The department will receive sealed bids from prospective carriers for the medical assistance program. Basis of competitive bidding will be a per claim rate which would be applicable to all claims processed by the carrier under the program. A certified check payable to the Iowa department of social services in the amount of $5,000.00 shall be filed with each proposal. This check may be cashed and the proceeds retained by the department as liquidated damages if the bidder fails to execute a contract and file security as required by the specifications for the faithful performance thereof. Proposals containing any reservations not

provided for in the specifications may be rejected and the department reserves the right to waive technicalities and to reject any or all bids.

6.1(3) *Reimbursement of carrier for performance of contract.* All allowable costs other than amounts paid providers of medical and remedial care and services shall be referred to as administrative costs.

a. Rate per claim. Administrative costs other than those not associated with the processing of claims as set forth below shall be based on a fixed rate per claim handled. Between July 1 and September 30 of each year a complete administrative cost analysis will be submitted to the department by the carrier. If the cost analysis indicates that the rate per claim handled is in excess of the cost of administration the carrier will refund to the department the overpayment and adjust the per claim charge as of October 1. If the cost analysis indicates an administrative cost in excess of the claim rate the carrier shall submit an additional billing to the department but in no event shall the additional billing exceed ten percent of the immediately preceding claim rate.

b. Costs not associated with processing of claims. Administrative costs of the carrier which are not included in the claim rate and which are approved by the department for reimbursement may be billed as separate items. The following costs may be billed:

(1) Printing of informational materials and billing forms.

(2) Initial and subsequent mailings of billing forms and instructions to providers of care.

(3) Establishment of office routine but not to include materials, supplies or any office or processing equipment.

(4) Any special studies, reports or projects requested by the department which are not specified in the contract.

(5) Costs of utilization review.

6.2(249A) Submission of claims. Providers of medical and remedial care participating in the program will submit claims for services rendered to the carrier on a montly basis. Following audit of the claim the carrier will make payment to the provider of care.

6.3(249A) Amounts paid provider from other sources. The amount of any payment made directly to the provider of care by the recipient, relatives, or any source shall be deducted from the established cost standard for the service provided to establish the amount of payment to be made by the carrier.

6.4(249A) Time limit for submission of claims. Providers of medical and remedial care should submit claims to the carrier on or prior to the fifth day of the month following the month in which the service was provided. Payment will not be made on any claim where the amount of time that has elapsed between the date the service was rendered and the date the claim is received by the carrier exceeds 180 days.

[Filed March 11, 1970]

CHAPTERS 7 to 12
Reserved for future use.

TITLE II
OLD-AGE ASSISTANCE

CHAPTER 13
APPLICATION FOR AID

13.1(249) Definitions.

13.1(1) *Department.* Whenever "department" is used in this title it shall mean the Iowa department of social services.

13.1(2) *County.* Whenever "county" is used in this title it shall mean the county department of social services.

13.2(249) Application. The applicant shall file his application for old-age assistance on Public Assistance Application, Form PA-2207-0. If the applicant has a guardian the guardian shall sign the application.

13.3(249) Date of application. The date of application is the date the applicant, his guardian or persons acting on his behalf communicate to the agency a request for assistance.

13.4(249) Procedure with application. The decision with respect to eligibility shall be based primarily on information furnished by the applicant, except the county shall contact each legally responsible relative of the applicant to determine his ability to contribute to the applicant's support. The applicant shall be informed by the county that the application form must be returned within ten days from the date of application or the application will be denied.

13.5(249) Time limit for decision. The applicant shall receive a money payment or a written notice of denial within 30 days from the date of application, except when a decision is delayed by failure of the applicant to supply information.

[Filed April 7, 1972]

CHAPTER 14
GRANTING ASSISTANCE

14.1(249) Need. Need for assistance is determined by comparing the income and resources of the applicant with the standards set forth herein.

14.1(1) *Definition of the eligible group.* The eligible group consists of the recipient, his spouse and dependent children. Their needs shall be included in the grant unless one or more is eligible for a grant of assistance in his own right.

14.1(2) *Basic needs.* The schedule of living costs is used to determine the basic needs of the eligible group. It is divided into sections I and II.

Section I will be used when the basic needs of the entire eligible group are included in one grant of assistance. Section II will be used when members of the eligible group receive two or more grants of assistance. The schedule of living costs represents 100 percent of basic needs. When funds in the old-age assistance program are insufficient to provide assistance on a 100 percent basis the allowances in the schedule shall be reduced proportionately and equitably.

SCHEDULE OF LIVING COSTS

I. Eligible Group In One Grant		II. Members of eligible group (spouses, or parents and their dependent children) receive two or more grants of assistance.							
(a)	(b)	1	2	3	4	5	6	7	8
1	139								
2	212	106							
3	280	93	187						
4	341	85	171	256					
5	393	79	157	236	314				
6	437	73	146	219	291	364			
7	494	71	141	212	282	353	423		
8	555	69	139	208	278	347	417	486	
9	594	66	132	198	264	330	396	462	528
Beyond a nine member eligible group add $66 for each additional person.									

a. When more than one grant of assistance is received by the recipient, his spouse and dependent children living together, the assistance grant in each program shall be computed according to the rules governing those programs.

b. When an adult person who would ordinarily be a member of the eligible group is eligible for assistance in his own right, but refuses to apply, the basic needs of the other members of the eligible group shall be established by the schedule in the same manner as though he were included, but the amount of his needs shall be deducted from the total needs of the eligible group.

c. When the needs of a dependent may be included in either the old-age assistance grant or another grant of assistance being received in the same household, his needs shall be included in the manner most beneficial to the individual or family.

14.1(3) *Special needs.* On the basis of demonstrated need the following special needs shall be allowed, in addition to the basic needs.

a. Property repair. When the department agrees that expensive repairs or improvements are necessary to make or keep the recipient's homestead habitable, an allowance shall be included in the grant.

b. When a legal notice has been served on a recipient property owner requiring the removal of dead or dangerous trees from his homestead an allowance shall be included in the grant to cover the lowest established cost.

c. Special tax assessment. An allowance sufficient to cover the annual payment due on an assessment on a homestead shall be included in one month's grant.

d. Meals eaten or prepared away from home. When in the judgment of the worker such meals are necessary to maintain the recipient in an independent living arrangement, an allowance shall be included in the grant when it has been established that 20 or more of the recipient's meals per month are eaten or prepared away from home.

e. Personal services. An allowance for personal services may be included in the assistance grant only when the physical or mental condition of the recipient prevents him from performing those tasks necessary to the maintenance of an independent living arrangement. No allowance shall be made for those services only indirectly related to the individual's welfare such as yard work, snow shoveling, errands and seasonal or irregular housecleaning. An allowance for personal services shall not be included in the grant of a recipient living in a congregate living arrangement when the monthly charge for residence includes such service. When such service is required by the recipient and is provided by a person who is not an employee of the landlord, an allowance may be included in the grant. When personal services are provided by a needy responsible relative who would otherwise have remunerative employment, his needs shall be included in the grant in the same manner as a dependent of the recipient.

f. Transportation to receive medical care. An allowance for transportation to receive medical care, not to exceed the charge that would be made by the most economical source of public transportation, shall be given when the following conditions are met:

(1) The source of such care is located outside the town or city limits of the community in which the recipient resides; or

(2) The recipient resides in a rural area and must travel to a city or town to receive necessary care; and

(3) The type of care is not available in the community in which the recipient resides, or he has been referred by his attending physician to a specialist in another community; and

(4) There is no resource available to the recipient through which necessary transportation might be secured free of charge.

In the case of a child too young to travel alone, or an adult or child who because of physical or mental incapacity is unable to travel alone, an allowance subject to the above conditions shall be given for the transportation costs of an escort.

14.2(249) Income.

14.2(1) All assured income, whether in cash or in kind shall be considered in establishing that need exists and the amount of the assistance grant, except the following income of the recipient which shall be exempted.

a. The first $20 per month of earned income plus one half of the excess of said income. In no case shall the total earned income exempted be more than $50.

b. Loans and grants obtained and used under conditions that preclude their use for current living costs.

c. Income of less than $1.00 per month from any one source.

14.2(2) Diversion of income. All nonexempt income of the recipient shall be used to meet his requirements. The ineligible spouse of a recipient may use his income to:

a. Meet the needs of his dependent children when such needs cannot be included in the assistance grant.

b. Meet the established medical needs for himself, dependent children or the recipient which cannot be met under the medical assistance program.

[Filed May 10, 1972; amended June 28, 1972, August 30, 1972, December 28,1972]

[Amendments filed 12-28-72 without Attorney General Advisory opinion.]

CHAPTER 15
PROPERTY

15.1(249) "Home" as referred to in section 249.9 shall mean homestead as defined in chapter 561 of the Code.

When the recipient abandons his homestead or is out of his home for six months or more except for reasons of illness and it is apparent that he will not live there again, the property is no longer considered a home and should be rented or liquidated. Any income from rentals shall be considered in computing the grant. When the recipient is unwilling to make income from this source available to meet his needs the established net rental value shall be shown as income.

When the recipient is absent from the homestead due to illness, the property shall continue to be considered as the homestead and rental income shall be considered only when actually available to the recipient.

15.2(249) "Mobile home" as used in these rules means any living facility not permanently constructed on the land it occupies. Mobile homes are legally classified as personal property. However, for purposes of establishing eligibility only, they shall be considered in the same category as real estate when used as a homestead.

When the value of a mobile home owned by the applicant or recipient, when added to other personal property, causes the total value of personal property to exceed limitations, it will be necessary for the individual to offer to transfer title of the mobile home to the department. A decision regarding transfer of title will be made by the department. If no transfer of title is required, eligibility will not be affected and the value of the mobile home will be disregarded in subsequent determinations of the value of personal property.

15.3(249) Out-of-state property. The old-age assistance lien does not attach to out-of-state real property. An applicant or his spouse will be required to:

15.3(1) Sell the property prior to approval.

15.3(2) Present to the department a written consent to an absolute conveyance of all interest in such property. Upon receipt of such written consent, assistance may be granted. The department will reach a decision regarding conveyance of such property based on the equities in such property.

15.3(3) These policies also apply to recipients who acquire out-of-state property following approval for assistance.

15.4(249) Transfer of real property. A transfer of real estate for which an applicant has received the equivalent of the monetary value of the property in the form of satisfaction of legal debts contracted prior to the date of application or in the form of support furnished subsequent to the date of transfer shall not be deemed a transfer to qualify for assistance under section 249.9(6).

An applicant who has transferred property within five years prior to the date of application under conditions precluding eligibility for old-age assistance may establish eligibility by:

15.4(1) Regaining the property transferred.

15.4(2) Acquiring a property of equal value.

15.4(3) Arranging for a grant of lien to the department, equal to his equity in the property at the time of transfer.

When the applicant is unable or unwilling to make such arrangement he shall be ineligible for a number of months equal to the applicant's equity minus consideration received divided by the average state grant, rounded to the nearest dollar, for the month preceding the date of application. If the applicant is married and living with his spouse the average grant shall be multiplied by two.

15.5(249) Liquidation of real property. When a recipient sells real property the following rules shall apply.

15.5(1) When the recipient sells his homestead he may use the proceeds to purchase a new homestead.

15.5(2) When real property other than the homestead is sold and the recipient requests permission at the time of the sale, proceeds may be used to reduce a mortgage or make needed repairs or required improvements on the homestead.

15.5(3) Any proceeds from the sale of real property not used to purchase, repair, improve or increase the recipient's equity in his homestead shall be reimbursed to the state for assistance received by the recipient or his spouse.

15.5(4) Any funds remaining, after the state has been fully reimbursed for assistance granted, shall be the property of the recipient or his spouse. The recipient shall be subject to the same rules of eligibility as a new applicant.

15.6(249) Life estate. Life estate is treated in the same manner as any other equitable interest in real property. The procedure applicable to the transfer of real property applies when a life estate is transferred. The value of a life estate shall be computed by multiplying four percent of the net value of the property at the time of transfer by the life expectancy of the individual according to the commissioners standard ordinary mortality table.

15.7(249) Liquidation of assigned personal property including an interest in estate. Assigned personal property shall be held in trust in the department until liquidated.

15.7(1) When an estate passes an interest in real property to a recipient, that portion of the inheritance derived from real property shall apply towards reimbursing the state for assistance granted. That which is derived from personal property shall be subject to the same rules as other assigned personal property.

15.7(2) When assigned personal property is liquidated during the lifetime of the recipient the department shall first be reimbursed for any expenses assumed in protecting the value of the property. The department will distribute the balance in the following order:

a. Refund to the recipient, upon county recommendation, an amount to which he would be entitled without affecting his eligibility for assistance.

b. Refund to the recipient an amount sufficient to cover the cost of repairs or improvements on the homestead, on receipt of a recommendation from the county setting forth the expenditures required.

c. Reimburse the department for assistance issued.

d. Any remaining balance shall be refunded to the recipient.

15.7(3) When assigned personal property is not liquidated or the refund resulting from the liquidation is not issued until after the death of the recipient, the proceeds will be distributed in the following order.

a. To reimburse the department for payments made in protecting the value of the property.

b. To reimburse a person or persons who have an established prior interest in the property and such interest was acknowledged at the time the assignment was made.

c. To reimburse the department for assistance paid.

d. Any balance remaining shall be released to the recipient's estate or his heirs.

15.8(249) Management of property deeded to the department. When the life tenant abandons the property, arrangements will be made to rent the property. Rentals may be paid to the recipient and treated as income in computing his grant, or paid directly to the department.

15.9(249) Assignment of life insurance. The department will accept assignment of life insurance when no adjustment can be made to bring it within eligibility limitations.

[Filed June 14, 1972]

CHAPTER 16
RESPONSIBLE RELATIVES

16.1(249) Relative's liability. The applicant or recipient or the social service agency authorizing assistance may begin suit at any time to compel support by legally responsible relatives.

16.2(249) Confidential report—responsible relative, form PA-2118-1, will be submitted to those relatives living within the state and PA-2120-1 to those relatives residing outside of Iowa. The proper form will be mailed or given to all children regardless of location immediately after the interview with the applicant. Thereafter, a form must be sent to responsible relatives of the recipient when information is received indicating a change of circumstances which might affect the liability, but all responsible relatives shall be contacted at least once every five years.

16.3(249) Guide for determining relative's liability. The procedures for determining the liability of a responsible relative are predicated upon the laws and rules governing the Iowa individual income tax return. When the responsible relative has not filed an Iowa tax return, informa-

tion will be used from the federal individual tax return and adjusted in such a manner as to permit the computation of his liability on the same basis as though he had filed an Iowa return. The table following sets forth that portion of income subject to Iowa tax to which the responsible relative is entitled as an exemption in computing his liability for support.

In accordance with the provisions of the Code of Iowa, the following table of exemptions has been established on the basis of those personal exemptions allowed in the filing of Iowa individual income tax returns plus an additional allowance based on the consumer's price index to compensate for the present day cost of living.

Marital Status of Responsible Relative	Yearly Exemption of Net Taxable Income
Single Person	$ 4,374
Man and wife	6,561
Man and wife and 1 dependent	7,532
Man and wife and 2 dependents	8,506
Man and wife and 3 dependents	9,297
Man and wife and 4 dependents	10,026
Man and wife and 5 dependents	10,755
Man and wife and 6 dependents	11,484
Man and wife and 7 dependents	12,102
Man and wife and 8 dependents	12,685
Man and wife and 9 dependents	13,268
Man and wife and 10 dependents	13,851

In the event the relative or his spouse is blind or over the age of 65 the following exemptions are applicable:

Single person (blind or aged)	$ 6,561
Single person (blind and aged)	8,019
Married couple:	
Entitled to three tax credits	8,019
Entitled to four tax credits	9,297
Entitled to five tax credits	10,387
Entitled to six tax credits	11,484

When a responsible relative is widowed or separated from his spouse and maintains a home for his dependent child, his exemption shall be the same as that of a man and wife with dependent children.

Any net taxable income over and above the exemptions listed in the above table is considered as the basis for computing the amount of the relative's annual contribution. The amount of such contribution is determined by applying the following formula:

Twenty percent of the first $1,000.00 or any part thereof in excess of the exemption.

Thirty percent of the second $1,000.00 or any part thereof in excess of the exemption.

Forty percent of the third $1,000.00 or any part thereof in excess of the exemption.

Fifty percent of the fourth or any subsequent $1,000.00 or any part thereof in excess of the exemption.

16.4(249) County board may adjust liability. The county board has the authority to reduce or waive the liability of a responsible relative on the basis of undue hardship. It shall, therefore, be the responsibility of the county board to weigh the evidence submitted and determine a reasonable basis for payment that will not constitute a financial hardship and put an unreasonable burden on the relative. However, no liability shall be waived because of any opinion as to the adequacy or inadequacy of the exemptions permitted by the table of exemptions set forth in 16.3.

TITLE III

AID TO THE BLIND

CHAPTER 23
APPLICATION FOR AID

23.1(241) Definitions.

23.1(1) *Department.* Whenever "the department" is used in this title it shall mean the Iowa department of social services.

23.1(2) *County.* Whenever the "county" is used in this title it shall mean the county department of social services.

23.2(241) Application. The application for aid to the blind shall be submitted on Public Assistance Application, Form PA-2207-0. When the applicant has a guardian, the guardian shall sign the application.

23.3(241) Date of application. The date of application is the date the applicant, his guardian or persons acting on his behalf communicate to the agency a request for assistance.

23.4(241) Procedure with application. Unless both eyes are missing blindness must be

established through an examination by a physician or an optometrist of the applicant's choice. The report of the examination shall describe the current visual condition of the applicant based on an examination made after, or within six months prior to the date of application. The cost of the examination will be paid by the department. The applicant shall be informed by the county that the application form must be returned within ten days from the date of application or the application will be denied.

23.5(241) Degree of blindness. When upon review of the examiner's report the state ophthalmologist finds that the applicant's vision is limited to not more than 20/200 central visual acuity in the better eye with corrective glasses, or a field defect in which the peripheral field has contracted to an extent that the widest diameter of this visual field subtends to an angular distance no greater than 20 degrees the applicant meets the visual requirements for aid to the blind.

23.6(241) Time limit for decision. The applicant shall receive a money payment or a written notice of denial within 30 days from the date of application, except when a decision is delayed by the failure of the applicant to supply information or delay in receiving the examiner's report with respect to degree of blindness.

[Filed December 27, 1971; amended April 7, 1972]

CHAPTER 24
GRANTING ASSISTANCE

24.1(241) Need. Need for assistance is determined by comparing the income and resources of the applicant or recipient with the standards set forth herein.

24.1(1) *Resources.* An applicant may have the following resources and be eligible for aid to the blind.

a. A homestead without regard to its value. A mobile home or similar shelter shall be considered as a homestead when it is occupied by the recipient. The value of any other real estate shall be considered with personal property.

b. Household goods and heirlooms.

c. An automobile necessary for transportation.

d. Personal property, including cash surrender value of life insurance, not exceeding $1500 for a single person or $2000 for a married couple not separated or estranged. No additional exemptions are allowed for dependents.

24.1(2) *Definition of eligible group.* The eligible group consists of the recipient, his spouse and dependent children. Their needs may be included in the grant, unless one or more may be eligible for a grant of assistance in his own right.

24.1(3) The schedule of living costs is used to determine the basic needs of the eligible group. It is divided into sections I and II. Section I will be used when the basic needs of the entire eligible group are included in one grant of assistance, or when only the aid to the blind recipient is included in the blind grant. Section II will be used when members of the eligible group receive two or more grants of assistance and the aid to the blind grant includes the needs of a person besides the recipient. The schedule of living costs represents 100 percent of basic needs. When funds in the aid to the blind program are insufficient to provide assistance on a 100 percent basis the allowances in the schedule shall be reduced proportionately and equitably.

SCHEDULE OF LIVING COSTS

I. Eligible Group In One Grant		II. Members of eligible group (spouses, or parents and their dependent children) receive two or more grants of assistance.							
(a)	(b)	1	2	3	4	5	6	7	8
1	139								
2	212	106							
3	280	93	187						
4	341	85	171	256					
5	393	79	157	236	314				
6	437	73	146	219	291	364			
7	494	71	141	212	282	353	423		
8	555	69	139	208	278	347	417	486	
9	594	66	132	198	264	330	396	462	528
Beyond a nine-member eligible group add $66 for each additional person.									

a. In addition to his basic needs, an allowance to cover the special need of each blind person shall be included in determining the total requirements, except for persons receiving a nursing or custodial care allowance based on the evaluation schedule for public assistance.

b. When more than one grant of public assistance is received by the recipient and his spouse and dependent children living together, the computation of the assistance grants in other programs shall be computed according to the rules governing those programs, but in no case shall the aid to the blind grant be computed on a base of less than provided for in section 241.3.

c. When the aid to the blind recipient requires the services of a responsible relative who is needy and has sacrificed employment to provide such service, the needs of the relative may be included in the grant on the same basis as a spouse.

d. The needs of a person who would ordinarily be a member of the eligible group and is eligible for assistance in his own right, shall not be included in the aid to the blind grant.

e. When the needs of a dependent may be included in either the aid to the blind assistance grant or in another grant of assistance being received in the household the choice shall be in such manner as to benefit the individual or family.

24.1(4) *Special needs.* On the basis of demonstrated need the following special needs shall be allowed, in addition to the basic needs.

a. Property repair. When the department agrees that expensive repairs or improvements are necessary to make or keep the recipient's homestead habitable an allowance shall be included in the grant.

b. Tree removal. When a legal notice has been served on a recipient property owner requiring the removal of dead or dangerous trees from his homestead an allowance shall be included in the grant to cover the lowest established cost.

c. Special tax assessment. An allowance in an amount sufficient to cover the annual payment due on an assessment on a homestead shall be included in one month's grant.

d. School expenses. Any specific charge for a child's education made by the school or in accordance with school requirements in connection with a course in the curriculum shall be allowed. This does not include ordinary expenses for school supplies.

e. Child care. When a need is established for child care by reason of a parent's health, inadequacy or absence from the home other than for reason of employment, an allowance for child care not to exceed the going rate in the community shall be made.

f. Meals eaten or prepared away from home. When in the judgment of the worker such meals are necessary to maintain the recipient in an independent living arrangement, an allowance shall be included in the grant when it has been established that 20 or more of the recipients meals per month are eaten or prepared away from home.

g. Personal services. An allowance for personal services may be included in the assistance grant only when the physical or mental condition of the recipient prevents him from performing those tasks necessary to the maintenance of an independent living arrangement. No allowance may be made for those services only indirectly related to the individual's welfare, such as yard work, snow shoveling, errands and seasonal or irregular house cleaning. An allowance for personal services shall not be included in the grant of a recipient living in a congregate living arrangement when the monthly charge for residence includes such service. When such service is required by the recipient and is provided by a person who is not an employee of the landlord, an allowance may be included in the grant.

h. Transportation to receive medical care. An allowance for transportation to receive medical care, not to exceed the charge that would be made by the most economical source of public transportation, shall be given when the following conditions are met:

(1) The source of such care is located outside the town or city limits of the community in which the recipient resides; or

(2) The recipient resides in a rural area and must travel to a city or town to receive necessary care; and

(3) The type of care is not available in the community in which the recipient resides, or he has been referred by his attending physician to a specialist in another community; and

(4) There is no resource available to the recipient through which necessary transportation might be secured free of charge.

In the case of a child too young to travel alone, or an adult or child who because of physical or mental incapacity is unable to travel alone, an allowance subject to the above conditions shall be given for the transportation costs of an escort.

24.2(241) Income.

24.2(1) All assured income, whether in cash or in kind shall be considered in establishing that need exists and the amount of the assistance grant, as established in 24.1(3), except the following income of the recipient which shall be exempted.

a. Five dollars of any income.

b. The first $85 per month of earned income plus one half the earned income in excess of $85 per month.

c. Income as necessary for a period not to exceed 12 months, for an individual who has an approved plan for achieving self-support.

d. Loans and grants, such as scholarships, obtained and used under conditions that preclude their use for current living costs.

e. Income of less than one dollar per month from any source.

24.2(2) Intermittent income which may exceed the eligible group's needs for a calendar month may be prorated or result in a cancellation of the assistance grant, as elected by the recipient.

24.2(3) *Diversion of income.* The total requirements of the dependents of the aid to the blind recipient, who are not eligible for another type of public assistance, are considered a part of his requirements. All income, except that which may be disregarded, shall be considered available to meet such requirements. The recipient may elect to direct his income to support his dependents who are eligible to receive aid to dependent children.

24.2(4) *Period of adjustment.* When the aid to the blind recipient no longer meets the visual requirements and need exists, aid to the blind shall be continued for a period not to exceed three assistance warrants after it has been determined the recipient no longer meets visual requirements.

[Filed December 27, 1971; amended May 10, 1972, June 28, 1972, August 30, 1972, December 28, 1972]

[Amendments filed August 30, 1972 and December 29, 1972 without advisory opinion of Attorney General]

CHAPTERS 25 to 32
Reserved for future use

TITLE IV

AID TO DISABLED PERSONS

CHAPTER 33

APPLICATION FOR AID

33.1(241A) Definitions.

33.1(1) *Department.* Whenever "department" is used in this title it shall mean the Iowa department of social services.

33.1(2) *County.* Whenever "county" is used in this title it shall mean the county department of social services.

33.1(3) *Disability.* "Disability" as used in these rules means a permanent, total physical or mental impairment of such severity that the individual requires assistance from another person in performing the normal activities of daily personal functioning.

33.1(4) *Permanent disability.* "Permanent disability" as used in these rules means an impairment of major importance which medical determination indicates is likely to continue throughout the lifetime of the individual and is not likely to respond to any known therapeutic procedures.

33.1(5) *Total disability.* "Total disability" as used in these rules means an impairment so severe as to substantially preclude engagement in a useful occupation including homemaking.

33.1(6) *Useful occupation.* "Useful occupation" as used in these rules means productive activities which add to the economic wealth, or produce goods or services to which the public attaches a money value.

33.2(241A) Application. The application for aid to disabled persons shall be submitted on Public Assistance Application, form PA-2207-0. When the applicant has a guardian, the guardian shall sign the application.

33.2(1) *Date of application.* The date of application is the date the applicant, his guardian or person acting in his behalf communicates to the county a request for assistance.

33.2(2) *Procedure with application.*

a. Disability. The bureau of medical services of the department shall determine disability based on medical and social information submitted by the county. The applicant shall furnish the county with a written statement from a qualified physician concerning his impairment, the diagnosis, prognosis and the effect of the impairment on the applicant's activity. The medical report of disability must describe the current condition of the applicant based on an examination made within six months prior to the date of application. When the applicant does not have such a report, arrangements shall be made for referral to a qualified physician of the applicant's choice. When an examination is required, the cost of the examination shall be paid by the department.

b. Other requirements. The decision with respect to eligibility, except for disability shall be based primarily on information furnished by the applicant. The applicant shall be informed by the county that the application form must be returned within ten days from the date of application or the application will be denied.

33.2(3) *Time limit for decision.* A decision with respect to eligibility for aid to disabled and the amount of assistance to which he is entitled shall be made and the applicant notified within ten days after the county is notified of the decision of the bureau of medical services regarding disability.

[Filed August 12, 1959; amended January 5, 1972, April 7, 1972]

CHAPTER 34

GRANTING ASSISTANCE

34.1(241A) Need. Need for assistance is determined by comparing the income and resources of the applicant or recipient with the standards set forth herein.

34.1(1) *Resources.* An applicant or recipient may have the following resources and be eligible for aid to disabled persons.

a. A homestead without regard to its value. A mobile home or similar shelter shall be considered as a homestead when it is occupied by the recipient. The value of any other real property shall be considered with personal property.

b. Household goods and heirlooms.

c. An automobile necessary for transportation.

d. Life insurance having a cash surrender value not in excess of $1,000 for the recipient and his spouse; however, if the face value of such insurance does not exceed the amount of $1,000 the cash surrender value need not be determined for eligibility purposes.

e. Property, real or personal, not to exceed $500 for the recipient plus $200 for a spouse and each dependent child.

34.1(2) *Definition of eligible group.* The eligible group consists of the recipient plus the spouse living with the recipient, his minor dependent children, physically or mentally incapacitated adult children and a responsible relative providing required personal services or nursing care. Such person's needs shall be included in the grant except when he is eligible for a grant of assistance in his own right.

34.1(3) *Basic needs.* The schedule of living costs is used to determine the basic needs of the eligible group. It is divided into sections I and II. Section I will be used when the basic needs of the entire eligible group are included in one grant of assistance. Section II will be used when members of the eligible group receive two or more grants of assistance. The schedule of living costs represents 100 percent of basic needs. When funds in the aid to the disabled assistance program are insufficient to provide assistance on a 100 percent basis the allowances in the schedule shall be reduced proportionately and equitably.

SCHEDULE OF LIVING COSTS

I. Eligible Group In One Grant		II. Members of eligible group (spouses, or parents and their dependent children) receive two or more grants of assistance.							
(a)	(b)	1	2	3	4	5	6	7	8
1	139								
2	212	106							
3	280	93	187						
4	341	85	171	256					
5	393	79	157	236	314				
6	437	73	146	219	291	364			
7	494	71	141	212	282	353	423		
8	555	69	139	208	278	347	417	486	
9	594	66	132	198	264	330	396	462	528
Beyond a nine-member eligible group add $66 for each additional person.									

[No advisory opinion by Attorney General]

a. When more than one grant of assistance is received by the recipient, his spouse and dependent children living together, the assistance grant in each program shall be computed according to the rules governing those programs.

b. When an adult person who would ordinarily be a member of the eligible group is eligible for assistance in his own right, but refuses to apply, the basic needs of the other members of the eligible group shall be established by the schedule in the same manner as though he were included, but the amount of his needs shall be deducted from the total needs of the eligible group.

c. When the needs of a dependent may be included in either the aid to disabled grant or another grant of assistance being received in the same household, his needs shall be included in the manner most beneficial to the individual or family.

d. When the aid to disabled recipient requires the services of a responsible relative who is needy and has sacrificed employment to provide such service, the needs of the relative shall be included in the grant.

34.1(4) *Special needs.* On the basis of the demonstrated need the following special needs shall be allowed, in addition to the basic needs.

a. Property repair. When the department agrees that expensive repairs or improvements are necessary to make or keep the recipient's homestead habitable, an allowance shall be included in the grant.

b. Tree removal. When a legal notice has been served on a recipient property owner requiring the removal of dead or dangerous trees from his homestead an allowance shall be included in the grant to cover the lowest established cost.

c. Special tax assessment. An allowance sufficient to cover the annual payment due on an assessment on a homestead shall be included in one month's grant.

d. School expenses. Any specific charge for a child's education made by the school or in accordance with school requirements in connection with a course in the curriculum shall be allowed. This does not include ordinary expenses for school supplies.

e. Child care. When a need is established for child care by reason of a parent's health, inadequacy or absence from the home other than for reason of employment, an allowance for child care not to exceed the going rate in the community shall be made.

f. Meals eaten or prepared away from home. When in the judgment of the worker such meals are necessary to maintain the recipient in an independent living arrangement, an allowance shall be included in the grant when it has been established that 20 or more of the recipient's meals per month are eaten or prepared away from home.

g. Personal services. An allowance for personal services may be included in the assistance grant only when the physical or mental condition of the recipient prevents him from performing those tasks necessary to the maintenance of an independent living arrangement. No allowance shall be made for those services only indirectly related to the individual's welfare, such as yard work, snow shoveling, errands and seasonal or irregular house cleaning. An allowance for personal services shall not be included in the grant of a recipient living in a congregate living arrangement when the monthly charge for residence includes such service. When such service is required by the recipient and is provided by a person who is not an employee of the landlord, an allowance may be included in the grant.

h. Transportation to receive medical care. An allowance for transportation to receive medical care, not to exceed the charge that would be made by the most economical source of public transportation, shall be given when the following conditions are met:

(1) The source of such care is located outside the town or city limits of the community in which the recipient resides; or

(2) The recipient resides in a rural area and must travel to a city or town to receive necessary care; and

(3) The type of care is not available in the community in which the recipient resides, or he has been referred by his attending physician to a specialist in another community; and

(4) There is no resource available to the recipient through which necessary transportation might be secured free of charge.

In the case of a child too young to travel alone, or an adult or child who because of physical or mental incapacity is unable to travel alone, an allowance subject to the above conditions shall be given for the transportation costs of an escort.

34.2(241A) Income.

34.2(1) All assured income, whether in cash or in kind shall be considered in establishing that need exists and the amount of the assistance grant as established in 34.1(3) except the following income of the recipient which shall be exempted.

a. The first $20 per month of earned income plus one half the earned income in excess of $20 per month, but the total exemption of earned income shall not exceed $50 per month.

b. Loans and grants, such as scholarships, obtained and used under conditions that preclude their use for current living costs.

c. Income of less than one dollar per month from any source.

34.2(2) Intermittent income which may exceed the eligible group's needs for a calendar month may be prorated or result in a cancellation of the assistance grant, as elected by the recipient.

34.2(3) *Diversion of income.* All nonexempt income of the recipient shall be used to meet his requirements. The ineligible spouse of a recipient may use his income to:

a. Meet the needs of his dependent children when such needs cannot be included in the assistance grant.

b. Meet the established medical needs for himself, dependent children or the recipient which cannot be met under the medical assistance program.

[Filed August 12, 1959;

TITLE V

AID TO DEPENDENT CHILDREN

CHAPTER 43
APPLICATION FOR AID

43.1(239) Definitions.

43.1(1) *Department.* Whenever "the department" is used in this title it shall mean the Iowa department of social services.

43.1(2) *County.* Whenever "the county" is used in this title it shall mean the county department of social services.

43.2(239) Application. The application for aid to dependent children shall be submitted on Public Assistance Application, Form PA-2207-0. When the applicant has a guardian, the guardian shall sign the application.

43.3(239) Date of application. The date of application is the date the applicant, his guardian or persons acting on his behalf communicate to the county a request for assistance.

43.4(239) Procedure with application. The decision with respect to eligibility shall be based primarily on information furnished by the applicant. The applicant shall be informed by the county that the application form must be returned within ten days from the date of application or the application will be denied.

43.5(239) Time limit for decision. The applicant shall receive a money payment or a written notice of denial within 30 days from the date of application, except when a decision is delayed by failure of the applicant to supply information.

[Filed June 23, 1955; amended August 30, 1972]

[No advisory opinion by Attorney General]

CHAPTER 44
GRANTING ASSISTANCE

44.1(239) Need. Need for assistance is determined by comparing the income and resources of the applicant with the standards of need set forth herein.

44.1(1) *Resources.* An applicant may have the following resources and be eligible for aid to dependent children.

a. A homestead without regard to its value. A mobile home or similar shelter shall be considered as a homestead when it is occupied by the recipient. The value of any other real property shall be considered with personal property.

b. Household goods and heirlooms.

c. Life insurance not to exceed $1000 in face value multiplied by the number of eligible persons. However, when the face value exceeds these limitations, the cash value shall be substituted for the face value in determining whether the insurance is within the limitations.

d. An equity not to exceed a value of $2500 in an automobile or automobiles.

e. Savings from income earned by eligible children after the family has been approved for assistance.

f. A reserve of other property, real or personal, not to exceed $500 for the first person in the eligible group plus $200 for each additional eligible person.

g. When the value of any resource is exempted in part, that portion of the value which exceeds the exemption shall be considered in computing whether the eligible group's property is within the reserve defined in paragraph "*f*".

44.1(2) *Definition of the eligible group.* The eligible group consists of the eligible children plus the following adult members of the family living in the home with them. Their needs shall be included in the grant unless one or more is eligible for a grant of assistance in his own right.

a. The natural or adoptive parent, or both parents if one is incapacitated.

b. The needy relative who assumes the role of parent.

c. The needy relative who acts as payee when the parent is in the home, but is unable to act as payee.

d. The incapacitated stepparent when he or she is the legal spouse of the natural or adoptive parent by ceremonial or common law marriage.

e. The nonincapacitated stepparent when he or she is the legal spouse of the natural or adoptive parent by ceremonial or common law marriage and such stepparent is required in the home to care for the dependent children or the incapacitated parent. Such services must be required to the extent that if the stepparent were not available, it would be necessary to pay for the care of the children or the incapacitated parent by inclusion of an allowance in the assistance grant.

[No Advisory Opinion by Attorney General]

44.1(3) *All children must apply.* All dependent children living in the home who meet the eligibility requirements for aid to dependent children other than for income and resources and are not eligible for a grant of assistance in their own right, must be included in the eligible group.

44.1(4) *Basic needs.* The schedule of living costs is used to determine the basic needs of the eligible group. It is divided into sections I and II. Section I will be used when the basic needs of the entire eligible group are included in one grant of assistance. Section II will be used when members of the eligible group receive two or more grants of assistance, or when the needs of members of the family who are not included in the eligible group are used in determining the basic needs of the eligible group. The schedule of living costs represents 100 percent of basic needs. When funds in the aid to dependent children program are insufficient to provide assistance of a 100 percent basis the allowances in the schedule shall be reduced proportionately and equitably.

SCHEDULE OF LIVING COSTS

I. Eligible Group In One Grant		II. Members of eligible group (spouses, or parents and their dependent children) receive two or more grants of assistance.							
(a)	(b)	1	2	3	4	5	6	7	8
1	139								
2	212	106							
3	280	93	187						
4	341	85	171	256					
5	393	79	157	236	314				
6	437	73	146	219	291	364			
7	494	71	141	212	282	353	423		
8	555	69	139	208	278	347	417	486	
9	594	66	132	198	264	330	396	462	528
Beyond a nine-member eligible group add $66 for each additional person.									

a. When more than one grant of assistance is received by the family, the assistance grant in each program shall be computed according to the rules governing those programs.

b. When an adult person who would ordinarily be a member of the eligible group is eligible for assistance in his own right, but refuses to apply, the basic needs of the other members of the eligible group shall be established by the schedule in the same manner as though he were included, but the amount of his needs shall be deducted from the total needs of the eligible group.

c. When the needs of a dependent may be included in either the aid to dependent children grant or another grant of assistance being received in the same household, his needs shall be included in such manner as is most beneficial to the individual or family.

d. The needs of a child in a nonparental home when the relative is not a member of the eligible group shall be in the needs of one person in two-member family.

e. When a child is attending the Iowa Braille and Sight Saving School or the Iowa School for the Deaf, his needs shall be included in the grant.

f. When an unmarried mother under the age of 18 is living with her parents who are not on public assistance, the needs of the unmarried mother shall not be included in the grant.

44.1(5) *Special needs.* On the basis of demonstrated need the following special needs shall be allowed, in addition to the basic needs.

a. Property repair. When the department agrees that expensive repairs or improvements are necessary to make or keep the recipient's homestead habitable, an allowance shall be included in the grant.

b. Tree removal. When a legal notice has been served on a recipient property owner requiring the removal of dead or dangerous trees from his homestead an allowance shall be included in the grant to cover the lowest established cost.

c. Special tax assessment. An allowance sufficient to cover the annual payment due on an assessment on a homestead shall be included in one month's grant.

d. School expenses. Any specific charge for a child's education made by the school or in accordance with school requirements in connection with a course in the curriculum shall be allowed. This does not include ordinary expenses for school supplies.

e. Child care. When a need is established for child care by reason of a caretaker's health, enforced absence from the home, or for some other emergent and compelling reason beyond the control of the child's caretaker, other than for reasons of employment, an allowance for child care not to exceed the going rate in the community shall be made.

f. Personal services. An allowance for personal services may be included in the assistance grant only when the physical or mental condition of the adult recipient prevents him from performing those tasks necessary to daily living or because of lack of skill needs assistance in household maintenance or management. No allowance shall be made for those services only indirectly related to the individual's welfare such as yard work, snow shoveling, errands and seasonal or irregular housecleaning. When personal services are provided by a needy responsible relative who would otherwise have remunerative employment, his needs shall be included in the grant in the same manner as a dependent of the recipient.

g. Transportation to receive medical care. An allowance for transportation to receive medical care, not to exceed the charge that would be made by the most economical source of public transportation, shall be given when the following conditions are met.

(1) The source of such care is located outside the town or city limits of the community in which the recipient resides; or

(2) The recipient resides in a rural area and must travel to a city or town to receive necessary care; and

(3) The type of care is not available in the community in which the recipient resides, or he has been referred by his attending physician to a specialist in another community; and

(4) There is no resource available to the recipient through which necessary transportation might be secured free of charge.

In the case of a child too young to travel alone, or an adult or child who because of physical or mental incapacity is unable to travel alone, an allowance subject to the above conditions shall be given for the transportation costs of an escort.

44.2(239) Income.

44.2(1) All assured income, whether in cash or in kind shall be considered in establishing that need exists and the amount of the assistance grant, except the following income of the eligible group which shall be exempted.

a. The first $30 per month of earned income plus one third of the excess of said income.

b. The earnings of an eligible child under 14 years of age.

c. The earnings of an eligible child 14 years of age or over who is

(1) A full-time or part-time student attending school pursuing a course of study leading to a diploma or its equivalent; or,

(2) Regularly attending a course of vocational or technical training designed to fit him for gainful employment; or,

(3) Is a participant in the Job Corps program under the Economic Opportunity Act of 1964; and,

(4) Is not a full-time employee.

d. Loans and grants obtained and used under conditions that preclude their use for current living costs.

e. Income of less than $1.00 per month from any one source.

f. Compensations or benefits received by a child that are restricted by law to his use and benefit only when such child is not included in the eligible group. Such income shall be used to meet the needs of the child, the needs of the dependent parent, and any excess conserved to meet the future needs of the child.

44.2(2) The income of a stepparent shall be given the same consideration and treatment as that of a natural parent, except that the disregard of the first $30 per month plus one-third of the excess of earned income shall not apply.

44.2(3) *Diversion of income.* Nonexempt income of the eligible group may be diverted to:

a. Meet the unmet needs of dependent but ineligible children of the aid to dependent children parent or parents living in the family group.

b. Meet the established medical needs of the eligible group or of ineligible but dependent children which cannot be met under the medical assistance program.

c. Permit payment by an aid to dependent children parent of court-ordered child support to children of a previous marriage not living with him when such payment is actually being made.

44.2(4) At the time of application all earned and unearned income of the eligible group, except the earnings of children under 14 years of age, shall be considered in determining if there is need according to the schedule of living costs. If a deficit exists, the eligible group shall then be given the appropriate exemptions in determining the amount of the grant. The same procedure shall be followed in considering income in the case of reapplication except when for any one of the four months immediately preceding the date of reapplication, the needs of the individual having the income were met in whole or in part by an aid to dependent children grant. Such person is automatically eligible for the exemptions from earned income.

44.3(239) Suitability of home. The home shall be deemed suitable until such time as the court has ruled it unsuitable and, as a result of such action, the child has been removed from the home.

44.4(239) The relative who is granted assistance on behalf of eligible children must be over 18 years of age or have reached his majority through marriage.

44.5(239) A child may be considered as meeting the requirement of living with a specified relative if his home is with one of the following:

Father—adoptive father.

Mother—adoptive mother.

Grandfather—grandfather-in-law, meaning the subsequent husband of the child's natural grandmother, i.e., stepgrandfather—adoptive grandfather.

Grandmother—grandmother-in-law, meaning the subsequent wife of the child's natural grandfather, i.e., stepgrandmother—adoptive grandmother.

Great-grandfather—great-great-grandfather.

Great-grandmother—great-great-grandmother.

Stepfather, but not his parents.

Stepmother, but not her parents.

Brother—brother-of-half-blood—stepbrother—brother-in-law—adoptive brother.

Sister—sister-of-half-blood—stepsister—sister-in-law—adoptive sister.

Uncle—aunt, of whole or half blood.

Uncle-in-law—aunt-in-law.

Great uncle—great-great-uncle.

Great aunt—great-great-aunt.

First cousins—nephews—nieces.

44.6(239) After assistance has been approved, eligibility for continued assistance shall be determined as of the first of each month.

44.7(239) Assistance shall be continued to the recipient with whom the child has been living when the child leaves the home for a temporary period, provided the recipient maintains control over the child during such absence.

44.8(239) Deprivation of parental care and support.

44.8(1) A child is deprived of care and support by reason of continued absence from the home when the parent is estranged from the family, and not out of the home to secure employment or for other reasons which separate him from the family on the basis of living arrangement. However, an estrangement need not exist when the absence is due to one of the following:

a. Imprisonment.

b. Commitment or admission to an institution for any reason.

c. Induction into military service for the first tour of duty.

44.8(2) Aid to dependent children is available to a child of unmarried parents the same as to a child of married parents if all eligibility factors are met.

44.8(3) A parent is considered incapacitated when, because of a physical or mental defect, he is unable to secure employment equal to that which he would have if no defect existed, or is unable to perform the housekeeping duties required to maintain a home for the child.

44.8(4) If a child is deprived of support or care of a natural parent, the presence of an able-bodied stepparent in the home shall not disqualify a child for assistance, provided that other eligibility factors are met. The income and resources of a stepparent shall be given the same consideration as that of a natural parent.

44.9(239) A child is considered regularly attending school if he is carrying a program of supervised education or vocational training consistent with the standards of an appropriate educational or vocational education authority, either as a part of a regular school program or under special arrangements adapted to the individual child's educational needs. He shall also be considered in regular attendance in months in which he is not attending because of official school or training program vacation, illness, convalescence or family emergency.

44.10(239) Period of adjustment. When a parent recovers from the condition which caused incapacity, or when an absent parent returns to the home, assistance shall continue if there is need for a period not to exceed the issuance of three warrants.

44.11(239) Removal from county. When a recipient temporarily moves to another county for educational purposes only, he shall not be deemed to lose residence in the original county and financial responsibility shall not be transferred.

[Filed June 23, 1955; amended April 12, 1972, August 30, 1972, November 20, 1972, December 28, 1972]

[Amendments filed November 20, 1972 and December 22, 1972 without advisory opinion of Attorney General]

CHAPTERS 45 to 52

TITLE VI

GENERAL PUBLIC ASSISTANCE PROVISIONS

CHAPTER 53
FAIR HEARINGS AND APPEALS

53.1(217) Definitions.

53.1(1) *Department.* Whenever "the department" is used in this title, it shall mean the Iowa department of social services.

53.1(2) *County.* Whenever "the county" is used in this title, it shall mean the county department of social services.

53.1(3) *Agency.* "Agency" as used in these rules means both the Iowa department of social services and the county department of social services.

53.1(4) *Claimant.* "Claimant" as used in these rules denotes the applicant or recipient who claims or asserts a right on demand; also referred to as the appellant.

53.1(5) *Appellant.* "Appellant" as used in these rules denotes the applicant or recipient who claims or asserts a right or demand or the party who takes an appeal from a fair hearing to an Iowa district court.

53.1(6) *Appeal.* "Appeal" as used in these rules denotes a review of a decision made by the county, at the request of a recipient or applicant.

53.1(7) *Fair hearing.* "Fair hearing" as used in these rules denotes a hearing in which authority is fairly exercised consistently where the fundamental principles of justice are embraced within the conception of due process of law.

53.1(8) *Joint or group hearings.* "Joint or group hearings" as used in these rules denotes an opportunity for several applicants or recipients to present their case jointly when all have the same complaint against agency policy.

53.1(9) *Issues of fact or judgment.* "Issues of fact or judgment" denotes issues of the application of state law or policy to the facts of the individual applicant or recipient's personal situation.

53.1(10) *Presumption.* "Presumption" as used in these rules denotes an inference drawn

from a particular fact or facts, or from particular evidence, which stands until the truth of such inference is disposed.

53.1(11) *Due Process.* "Due process" as used in these rules denotes the right of a person affected by an agency decision to present his complaint at a fair hearing and to be heard, by testimony or otherwise, and to have the right of controverting, by proof, every material fact which bears on the question of the individual's rights in the matter involved, without undue delay or hinderance.

53.2(217) Informing individuals of their rights.

53.2(1) *Written and oral notification.* It shall be the duty of all counties to advise each applicant and recipient of his right to appeal any adverse decision affecting his status.

Written notification of the right to and procedure for requesting a fair hearing before the department, of the right to be represented by others at the hearing, and of any provision for payment of legal fees by the department must be given at the time of application and at the time of any agency action affecting the claim for assistance.

Written notification shall be given on the application form and pamphlets prepared by the agency for applicants and recipients. Explanation shall be included in the agency pamphlet explaining the various provisions of the program. Oral explanation should also be given explaining the policy on hearings during the application process and at the time of any contemplated action by the agency when the need for such discussion is indicated. Applicants and recipients not familiar with English shall be communicated their right by providing a translation into the language understood by them in the form of a written pamphlet or orally. In all cases when an applicant is illiterate or semiliterate, he shall, in addition to receiving the written pamphlet on his rights, be advised of each right to the satisfaction of his understanding.

53.2(2) *Advising applicant or recipient.* The applicant or recipient shall be advised that he may be represented at fair hearings by others, including legal counsel, law students, relatives, friends or any other spokesman of his choice or that he may represent himself. The agency will advise the applicant or recipient of any legal services which may be available to him and assist him in securing such services if he so desires.

53.3(217) Opportunity for a fair hearing. All aggrieved applicants and recipients are entitled to request and receive a fair hearing before the department. Applicants and recipients are also entitled to a prompt response when it becomes known to the agency, either by written or oral means, of their desire for the opportunity to have their case brought before the department for a fair hearing.

The applicant or recipient shall be first given the opportunity to review the problem with the agency staff, if he so desires, at an informal discussion. This procedure shall not be used to delay, avoid or preclude a fair hearing, but is designed to assist the applicant or recipient in the preparation of his fair hearing.

The right of appeal shall not be limited or interfered with in any way, even though the individual's complaint may be without basis in fact, or due to his own misinterpretation of law, agency policy or methods or implementing policy. Facts of harassing, threats of prosecution, denial of pertinent information needed by the claimant in preparing his appeal, as a result of the claimant's communicated desire to proceed with the appeal, shall be taken into consideration by the hearings officer, in reaching a final decision. Such evidence will raise a presumption of denial of due process, and will be referred to the proper official of the department for appropriate administrative action.

53.3(1) *Filing the appeal.* When an applicant for or recipient of assistance or service, or person acting responsibly for him, expresses orally or in writing to the county or the department, his dissatisfaction with any decision, action or failure to act with reference to his case, such department shall determine from the nature of the complaint whether the individual wishes to appeal and receive a hearing before a representative of the department. The county shall encourage the claimant to complete such complaint in writing, on the form provided, and shall provide any instructions or assistance he may require in completing the form. Provided that when the claimant for any reason is unwilling to complete or sign forms or letters, nothing in this rule shall be construed to preclude his right to perfect his appeal. So long as the desire for a fair hearing has been communicated to the department by the claimant or his representative, it shall be considered as an appeal.

When a request for a fair hearing is made within 30 days after notification, a hearing shall be held. When the request for a hearing is made more than 30 days after notification, the commissioner shall determine whether a hearing shall be held.

53.3(2) *Procedural considerations.* Upon receipt of the notice of appeal, the appeals and hearing officer in the department shall:

a. Register the appeal.

b. Send an acknowledgement of receipt of the appeal to the applicant or recipient, or his representative or both, advising that the hearing will be scheduled within a reasonable time and that he may anticipate notification as to the date, time, place and other pertinent information with due regard for the convenience of the claimant.

If the claimant is residing outside the state, he will also be advised that he may return to Iowa and arrangements will be made for the hearing in the county to which he returns or he may designate a person to represent him in the Iowa county re-

sponsible for the case and in which he resided before leaving the state.

A copy of the acknowledgement of receipt of appeal will also be sent to the county, including copies of any correspondence with a claimant who is outside the state, regarding arrangements for the hearing.

c. Establish the date, time and place of the hearing, with due regard for the convenience of the claimant.

d. Send a letter to the claimant, advising him of the date, time and place of the hearing, of the manner in which the hearing will be conducted, that he may present any evidence orally or documented in any way he may desire, bring witnesses of his choice and be represented by others, including an attorney.

A copy of this letter will be forwarded to the chairman of the county board of social welfare, the county director, the area office and any other individual when circumstances peculiar to the case indicate that the notification may be desirable.

53.3(3) *Joint or group hearings.* When more than one individual protests the same agency policy, joint or group hearings may be allowed. Recipients who request a group hearing shall be given one. If there is disagreement between the agency and the claimant as to whether his complaint may be included in group hearings, the hearing officer shall make the decision. The hearing officer may limit the discussion to the sole issue under appeal, hence, when a claimant's request for a fair hearing involves issues in addition to one serving as a basis for the group hearing, his appeal shall be severed from the group and handled separately. A claimant scheduled for a group hearing may withdraw and request an individual hearing. In a group hearing, individual claimants must be afforded the right to make individual presentations and to be represented by persons of their own choosing.

53.3(4) *Conduct of hearings.* The hearing will be conducted by an appeals and hearing officer designated by the commissioner of social services. It shall be an informal rather than a formal judicial procedure designed to serve the best interests of the applicant or recipient. The claimant shall have the right to examine any material introduced as evidence during the hearing. He shall also have the right to introduce on his own behalf any evidence on points at issue he believes necessary and to challenge and cross-examine any statements made by others, and to present evidence in rebuttal. A verbatim record shall be kept of the evidence presented.

53.3(5) *Dismissal and abandonment of hearing.* A request for a hearing may be dismissed by the agency only when the claimant or his representative submits in writing a request to withdraw his appeal or when the claimant abandons his right of hearing. When neither the claimant nor his representative appears at the time and place agreed upon for the hearing, and within a reasonable time after the mailing of an inquiry, or personal contact by the agency, as to whether he wishes any further action on his request for a hearing and no reply is received, the hearing request shall be considered abandoned.

53.3(6) *Responsibility of the county department.* Upon the receipt by the county of the letter setting the date, time and place of the hearing, the county shall contact the claimant to remind him of the date, time and place of the hearing and determine whether the arrangements are satisfactory. Assistance shall also be offered in assembling any information, documents or other evidence which the claimant may wish to present at the hearing.

53.4(217) Publication and distribution of hearing procedures. The publication and wide distribution of hearing procedures in the form of rules or a clearly stated pamphlet shall be made available to all applicants, recipients, claimants, appellants and other interested groups and individuals.

53.5(217) Advance notice of intent to terminate, reduce or suspend assistance. Whenever the county proposes to terminate, reduce or suspend assistance, it shall mail notice of the pending action to the recipient at least 15 days prior to the time of the anticipated action. The notice must give full details of the reason for the pending action, the right to a fair hearing, the right of the individual to have a conference with agency staff on the issue, and the circumstances under which he may have his assistance continued pending the fair hearing decision.

Advance notice is not required when the recipient of a one-person case has died. When a child receiving aid to dependent children has died, notice of any change in the assistance grant shall go to the payee.

During the advance notice period, the recipient may have a conference to discuss his situation and the agency shall provide him with a full explanation of the reasons for the pending action and give the recipient an opportunity to offer facts to support his contention that the pending action is not warranted. The recipient may be accompanied by a representative, legal counsel, friend, law student or other spokesman and such individuals may represent the individual if he is not able to be present.

The advance notice is paramount in all instances of proposed discontinuance, reduction or suspension of assistance and payments must continue during the 15-day advance notice period.

53.6(217) Request for fair hearing and continuation of assistance. Whether or not there is a conference, when the recipient files an appeal during the advance notice period, assistance must be continued until the hearing decision is reached, unless the county determines that the issue is not one of fact or judgment. When the issue

is one of fact or judgment, rather than a general state policy, and the recipient files an appeal for a fair hearing during this advance notice period, assistance must be continued at the same level until the hearing decision has been reached.

53.7(217) Information and referral for legal services. The county shall advise persons appealing any agency decision of legal services in the community that are willing to assist them.

53.8(217) Convenience of the claimant considered. Notice must be given in writing with adequate preliminary information about the hearing procedure. If the claimant is incapacitated due to illness or other disability and is housebound, hospitalized or in a nursing home, or lives a great distance from the place hearings are usually held, the place of the hearing shall be at the convenience of the claimant even to the extent of holding the hearing in the claimant's home. Nothing in this rule shall preclude a physically able claimant from attending a hearing agreed upon by both parties, unless he elects to send his designee or representative in his place.

53.9(217) Impartiality of the hearing official. The hearing officer shall not be connected in any way with previous actions or decisions on which the appeal is made.

53.10(217) Claimant's right to a medical examination of his own choice. When the hearing involves medical issues, a medical assessment or examination by a person or physician other than the one involved in the decision under question shall be obtained and the report made a part of the hearing record if the hearing officer or claimant considers it necessary. Any medical examination required shall be performed by a physician satisfactory to the claimant at agency expense.

53.11(217) Limitations of persons attending. The hearing shall be limited in attendance to the following persons other than the claimant, his representative, and such witnesses as he may wish to present:

53.11(1) The county welfare worker responsible for the case.

53.11(2) The supervisor of such worker.

53.11(3) The county director.

53.11(4) Members of the county board of social welfare.

53.11(5) The county attorney.

53.11(6) Such other persons as may be specifically authorized to attend for the purpose of offering testimony pertinent to the issues in controversy.

Nothing in this rule shall be construed to allow members of the press, news media or any other citizens group to attend the hearing without the consent of the claimant and then, only on the approval of the hearing officer.

53.12(217) Rights of claimants during hearings. The county shall provide the claimant, or his representative, opportunity prior to as well as during the hearing, to examine all materials to be offered as evidence. Off-the-record, or confidential information which the claimant or his representative does not have the opportunity to examine shall not be included in the record of the proceeding or considered in reaching a decision.

The hearing officer shall enable the claimant and his witness to give all evidence on issues in dispute and the claimant and his representative shall have opportunity, without undue influence, to advance arguments. The claimant shall have the opportunity to confront and cross-examine witnesses at the hearing and to present evidence in rebuttal. The claimant must be allowed to present his case in the way he desires, including relating his cause in his own style, by relative or friend, or legal counsel. In hearings involving non-English speaking claimants provisions shall be made for securing an interpreter for the claimant at agency expense.

53.13(217) Prompt, definitive and final action. Withdrawal or abandonment by the claimant shall constitute the only grounds for dismissal before a final agency decision is reached as a result of the hearing. A maximum of 60 days shall be adhered to in all cases as the time for final administrative action unless the agency grants a delay at the claimant's request.

53.14(217) Basis for decision. The decision shall be based only on the evidence and testimony introduced at the hearing. The record of the proceeding which constitutes the official record shall be available to the claimant or his representative at a convenient time and place accessible to him or his representative, to examine upon request. If any additional material is made part of the hearing record, it too shall be made available.

53.15(217) Hearing decision and notification to claimant. When the transcript of proceedings of the hearing has been received in the department, it shall be reviewed, together with any material or documents introduced and made a part of the hearing record. The decision may affirm, modify or reverse the action of the county board of social welfare, however, the hearing officer retains jurisdiction over the pending case until the commissioner of the department of social services reaches a decision based on the evidence and the recommendations of the hearing officer. The case may be referred back to the hearings officer for a resumption of the hearing if the materials submitted are insufficient or do not substantiate the recommendation. Remanding the case to the hearing officer for further consideration shall not in any way be construed as a substitute for definitive and final administrative action.

The final decision shall indicate the specific reasons for the decision and identify the supporting data. A notice of the decision, including a brief

summary statement of the basis of such decision and corrective action to be taken shall be mailed to the claimant with a copy to the county by the appeals and hearing officer. The decision rendered by the hearing authority shall be binding upon the department and the county.

53.16(217) Time limit on implementation. Prompt, definitive and final administrative action to carry out the decision rendered shall be taken within 60 days from the date of the appeal. Should the claimant request a delay in the hearing in order to prepare his case or for other essential reasons, reasonable time, not to exceed 30 days except with the approval of the hearings officer, will be granted and such extra time may be added to the 60 days. Immediately upon receipt of the copy of the decision, the county shall take the action required by the decision and shall submit a report of that action to the appeals and hearing officer in the department.

When the hearing decision is favorable to the claimant, or when the agency decides in favor of the claimant prior to the hearing, corrective payments, retroactive to the date of the incorrect action, shall be made.

53.17(217) Accessibility of hearing decisions to local agencies and the public. Summary reports of all hearing decisions shall be made available to counties and the public. Such information shall be presented in a manner consistent with requirements for safeguarding personal information concerning applicants and recipients.

53.18(217) Right of judicial review. The hearing decision shall advise the claimant of his right to a judicial review by the district court. When a claimant is dissatisfied with the hearing decision, and appeals such decision to the district court, the department shall furnish copies of such documents or supporting papers as the appellant and his legal representative may need in order to perfect his appeal to district court.

CHAPTERS 54 to 57
Reserved for future use

CHAPTER 58
WORK AND TRAINING PROGRAMS

58.1(249C) Persons eligible. Persons who are receiving public assistance and are eligible for work and training programs include:

58.1(1) The payee, his or her spouse, and dependent children who are in the eligible group.

58.1(2) Dependent children, 16 years of age and over, who are not in school or training and for whom there are no educational plans under consideration for implementation within the next three months.

58.1(3) Caretaker relatives and other essential persons in the eligible group. Caretaker relatives who are providing the child with a family home, but are not legally responsible for the child's support, and are themselves not a needy person shall not be eligible for work and training programs.

58.2(249C) Education and training plans. All education and training plans must receive approval of the department.

58.2(1) The plan shall include occupational evaluation and assessment.

58.2(2) The plan may be utilized to obtain a high school diploma or the equivalent thereof.

58.2(3) The plan may include institutional training with a vocational goal. Academic courses which are required to complete the training may be a part of the plan.

58.2(4) No allowance may be made to meet the expense of correspondence courses unless the central office of the department approves them.

58.2(5) Training plans shall be based on the length of time and cost of similar plans in the community or in the near locale. The length of training shall be determined by the period it would take a trainee to reach his goal. Payments for dependent children terminate when the child reaches his twentieth birthdate.

58.3(249C) Incentives and disregards. All income earned for work under an education or training program shall be applied to reduce the cost of public assistance paid to the person or his family except that income exemptions allowed in the public assistance programs shall be allowed for these earnings.

58.4(249C) Training expenses. An allowance shall be made for expenses of training. This shall include tuition, books, fees, including graduation, GED testing and certificate fees, and any other fees required for completion of the training, and required uniforms and tools. A work and training allowance of $44 per month shall be provided to a person participating in a full-time training plan. A full-time training plan consists of at least 25 hours per week in training. A person participating in a part-time training plan shall receive an allowance for transportation at a rate of ten cents per mile to and from the training site with a maximum of $44 per month. No allowance shall be made for any item that is being paid for through earnings that are diverted for that purpose.

58.5(249C) Supportive service. The county and area caseworkers shall provide supporting and follow-up services to participants in a work or training program, including family planning, budgeting, child care, medical services, employability planning, job placement and other services involved in completing the training plan or finding a job.

58.6(249C) Public or private training. On-the-job training shall be carried out in conjunction with the local employment service and its rules shall be followed.

58.6(1) If the training includes work experience, nonprofit organizations shall be used exclusively, and the length of this training shall be no longer than 26 weeks. When a trainee is in training longer than ten weeks there should be definite possibilities of a job.

58.6(2) Institutional training can be provided by both public and private agencies.

58.7(249C) Health and safety. A medical report, not older than six months, completed by a licensed physician shall be contained in the case record prior to approval of training.

58.7(1) The physician should indicate to the best of his knowledge that the person is capable of completing the training or continuing with appropriate employment.

58.7(2) If physical or emotional disabilities are present, these shall be under control prior to enrollment in the training program.

58.7(3) If the work or training is so hazardous that safety glasses, hard hats and so forth are needed, these safety precautions shall be provided.

CHAPTERS 59 to 63
Reserved for future use

CHAPTER 64
RELIEF FOR NEEDY INDIANS

252.43 Relief for Indians

The Director of Social Welfare in Tama County has been designated by the State Department of Social Welfare to administer relief for needy Indians residing on the reservation.

A. *General Relief.* The program of relief for needy Indians provides for the State Department of Social Welfare, upon authorization of the Tama County Director of Social Welfare, to order the State Comptroller to write warrants, in favor of an Indian residing on the reservation for those items designated by the state board. Warrants may also be issued to meet special needs when recommended by the Field Representative and approved, on an individual case basis, by the State Department of Social Welfare.

Eligibility Requirements

1. *Determining Amount of Assistance.* The standards used in the aid to dependent children program shall be used for those items for which provision is made through the program of relief for needy Indians.

2. *Need.* Need exists when an applicant lacks sufficient income and resources to meet established requirements.

3. *Age.* There are no age limitations.

4. *Resources and Income.* See (c), (d), (e), (f), (g) and (h), Section 241.3 (Aid to the Blind).

5. *Support from Relatives.* Responsible relatives shall be interviewed at the time of application and review. Any contribution made by the relative shall be taken into consideration in determining the amount of the grant.

Applications. See (b), (c), (d), (e), (f), (g), Section 249.11 (Old-age Assistance).

Investigations. See (a), Section 249.4 (Old-age Assistance).

Payment. Payment shall be made directly to the vendor by the State Department of Social Welfare for goods or services provided.

Limitations on Expenditures. The State Department shall notify the County Department, each month, of funds available for that month. The County Department of Social Welfare may not issue orders in excess of such amount.

Review. A review of cases receiving assistance on a regular basis shall be made as frequently as the circumstances require but in no instance shall the period of time between reviews be in excess of six months. In cases where temporary assistance is granted in emergencies the situation should be evaluated at any time additional assistance is requested.

[Filed December 19, 1961]

TITLE VII

FOOD STAMP PROGRAM

CHAPTER 65
ADMINISTRATION

65.1(234) Definitions.

65.1(1) *Department.* Whenever "department" is used in this title, it shall mean the Iowa department of social services.

65.1(2) *Food and nutrition service.* Whenever "food and nutrition service" is used in this title it shall mean that agency of the United States department of agriculture responsible for administration of the food stamp program enacted by the Food Stamp Act of 1964 as amended (Public Law 88.525).

65.1(3) *County.* Whenever "county" is used in this title it shall mean the county department of social services.

65.1(4) *Program.* Whenever "program" is used in this title it shall mean the food stamp program.

65.2(234) Chief administrator. The commissioner of the department shall be the chief administrator of the program.

65.3(234) Department responsibilities. The department shall have over-all responsibility for the administration of the program. These responsibilities shall include but shall not be limited to:

65.3(1) The over-all supervisory responsibility for the program.

65.3(2) The establishment of a quality control system.

65.3(3) Ascertaining that the county affords each food stamp applicant the right to a fair hearing in accordance with the policy established in the public assistance programs.

65.3(4) Ascertaining that applicant households are not discriminated against because of race, religious creed, political beliefs or national origin.

65.3(5) Establishing an outreach program which will inform potential recipients of program benefits.

65.4(234) County responsibilities. Each county shall have full local administrative responsibilities for the program. These responsibilities shall include but not be limited to:

65.4(1) Financing the cost of the operation.

65.4(2) Maintaining necessary security related to the selling of food coupons.

65.4(3) Retaining bonding and insurance necessary to assure that no loss will occur as a result of embezzlement, theft, robbery, fraud etc.

65.4(4) Responsibility for any loss due to fraudulent or negligent certification of ineligible recipients.

65.4(5) *Disclosure.* Each county shall restrict the disclosure of information obtained from food stamp applicants to persons directly responsible for the administration and enforcement of the program.

65.4(6) *Records and reports.* Each county shall maintain records for a period of three years from the month of origin of such records and submit information pertinent to the administration of the program.

65.4(7) *Prompt action.* Each county shall either approve or deny applications for food coupons within 30 days of receipt of application.

65.4(8) *Recipient claims.* Each county shall complete reports on the overissuance of food coupons and attempt collection of overissuances which are the result of fraud or misrepresentation.

65.4(9) *Refunds.* Food and nutrition service shall make refunds to recipients who have been overcharged for food coupons as a result of administrative error.

65.4(10) Counties shall not reduce any type of assistance because of participation in the program.

[Filed February 25, 1972;
amended April 7, 1972]

CHAPTER 66
ELIGIBILITY STANDARDS

66.1(234) Definitions.

66.1(1) *Household.* Whenever "household" is used in these rules it shall mean a group of persons, excluding roomers, who are not residents of an institution or boarding house, and who are living as one economic unit sharing common cooking facilities and for whom food is customarily purchased in common, provided that:

"Household" shall also mean a single individual living alone who purchases and prepares food for home consumption, or an elderly person and his spouse.

66.1(2) *Public assistance household.* Whenever "public assistance household" is used in these rules it shall mean that all members are recipients of old-age assistance, aid to the blind, aid to disabled, aid to dependent children, or are considered needy essential persons. The presence of a boarder, roomer, or live-in attendant, or foster children will not change the status of a public assistance household.

66.1(3) *Boarder.* Whenever "boarder" is used in this title it shall mean an individual to whom a household furnishes meals, or lodging and meals, for compensation at a monthly rate at least equal to the value of the monthly coupon allotment for a one-person household.

66.1(4) *Boarding house.* Whenever "boarding house" is used in this title it shall mean a place where three or more individuals are furnished meals or lodging and meals for compensation.

66.2(234) Household eligibility. Eligibility for and participation in the program shall be on a household basis. All persons, excluding roomers, residing in common living quarters shall be consolidated into a group prior to determining if such a group is a household.

66.3(234) Elderly persons. Eligible household members 60 years of age or older may use all or any part of the food coupons issued to them to purchase meals prepared for and delivered by a nonprofit meal delivery service authorized by food and nutrition service when he meets the following conditions:

66.3(1) He is not a resident of an institution or boarding house.

66.3(2) He is living alone or only with a spouse, whether or not he has cooking facilities in his home.

66.3(3) He is housebound, feeble, physically handicapped or otherwise disabled to the extent he is unable to prepare all meals.

66.3(4) When he has no cooking facilities, he elects to use food coupons issued to him to purchase meals prepared for and delivered to him by

a nonprofit meal delivery authorized by food and nutrition service to accept food coupons.

66.4(234) Income. All income shall be considered in determining eligibility for and the basis of coupon issuance of food coupons, except the following income which shall be exempted:

66.4(1) Earnings of a child under the age of 18 years of age who is a student.

66.4(2) Payment received under Title II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

66.4(3) Income-in-kind.

66.4(4) Infrequent or irregular income of less than $30 in a quarter.

66.4(5) Moneys received from insurance settlements, sale of property except for property related to self-employment, cash prizes, awards, and gifts, inheritances, retroactive lump-sum social security or railroad retirement pension payments, income tax refunds and similar nonrecurring lump-sum payments.

66.4(6) Ten percentum of income from compensation for services performed as an employee or training allowance not to exceed $30 per household per month.

66.4(7) All loans, except loans on which repayment is deferred until completion of the recipient's education.

66.4(8) Mandatory deductions from earned income which are not elective at the option of the employee such as local, state, and federal income taxes, social security taxes under FICA and union dues.

66.4(9) Shelter costs in excess of 30 percentum of the household's income after exclusion of all other deductions.

66.4(10) Payments for medical expenses exclusive of special diets, when the costs exceed ten dollars per month per household.

66.4(11) The payments for the care of a child or other persons when necessary for a household member to accept or continue employment.

66.4(12) Unusual expenses incurred due to an individual household's disaster or casualty losses which could not be reasonably anticipated by the household.

66.4(13) Education expenses which are for tuition and mandatory school fees, including such expenses which are covered by scholarships, education grants, loans, fellowships and veterans' educational benefits.

66.4(14) The total payments which are made to cover specific training costs when the recipient is participating in a training program sponsored by a local, county, state or federal government.

66.4(15) Court-ordered child support and alimony payments that are made.

66.5(234) Resources. The fair market value less encumbrances of all liquid and nonliquid resources is to be considered in determining eligibility, except for the following resources which are exempted:

66.5(1) The homestead, automobile, household goods, cash value of life insurance policies and personal effects.

66.5(2) Income-producing property which is producing income consistent with its fair market value, or other property such as another vehicle needed for purposes of employment, the tools of a tradesman or the machinery of a farmer, deemed essential to the household's means of self-support.

66.5(3) The total resources of a roomer or boarder, or of a member of the household other than the head of the household or his spouse, who has a commitment to contribute only a portion of his income to pay for services including food and lodging.

66.5(4) Indian lands held jointly with the tribe, or land that can be sold only with the approval of the bureau of Indian affairs.

66.6(234) Income and resource eligibility standards for public assistance households. Households consisting of public assistance members shall, if all other eligibility criteria are met, be determined to be eligible to participate in the program without regard to the income and resources of the household members.

66.7(234) Income and resource eligibility standards for nonpublic assistance households.

66.7(1) Income limitations for nonpublic assistance households shall be determined from the following table:

Household Size	Monthly Income
1	$178.00
2	233.00
3	307.00
4	373.00
5	440.00
6	507.00
7	573.00
8	640.00
9	693.00
10	746.00

Add $53.00 for each additional household member.

66.7(2) The maximum value of resources a household can have is $1500, except when a household consists of two or more persons with a member 60 years of age or older. Such households may have resources not in excess of $3000.

66.9(234) Work registration requirement. At the time of application and at the time of each recertification of eligibility, each able-bodied person in a household between the ages of 18 and 65, shall register for employment, and accept a bona fide offer of suitable employment. This shall include a person who is not working because of a strike or lockout at his usual place of employment. Persons exempt from this regulation are:

66.9(1) Mothers or other members of the household who have responsibility for the care of dependent children under the age of 18 years or for an incapacitated adult.

66.9(2) Students enrolled at least half-time in any school or training program recognized by any federal, state or local governmental agency.

66.9(3) Persons working at least 30 hours per week.

66.10(234) Residence. Applicants who live in the county in which they are applying meet the residency requirement, regardless of citizenship or the length of time they have resided in the county. Persons who are in the county for the purpose of a vacation do not meet this requirement.

66.11(234) Cooking facilities. The applicant must have cooking facilities which are used to prepare food for home consumption or be eligible as an elderly person to receive delivered meals.

66.12(234) Credit cards. If a member of a household possesses or have use of a credit card which gives the person unlimited income in the name of a person who is not a member of the household, the entire household shall be deemed ineligible.

[Filed February 25, 1972; amended April 7, 1972, August 30, 1972, December 28, 1972]

[Various amendments filed December 28, 1972 without advisory opinion by Attorney General]

CHAPTER 67
CERTIFICATION FOR FOOD COUPONS

67.1(234) Definitions.

67.1(1) *Affidavit.* Whenever "affidavit" is used in these rules it shall mean a signed statement, executed by the head of the household, or his authorized representative, who is making application for participation in the program on behalf of a household in which all members are included in a federally aided public assistance or general assistance grant.

67.1(2) *Authorized representative.* Whenever "authorized representative" is used in this title it shall mean a person designated by the head of the household to act in his behalf in the purchase and use of coupons and under certain conditions to act in his behalf in making application for the program.

67.2(234) Certification of public assistance households. Certification of public assistance households shall be based solely on the basis of information contained in an affidavit and the assistance case file.

67.3(234) Certification of nonpublic assistance households. Certification of nonpublic assistance households shall be made by means of a personal interview with the applicant or his authorized representative and completion of Form ADM-7101.

67.4(234) Application processing. The eligibility of an applicant shall be approved or denied within 30 days of a bona fide application.

[Filed February 25, 1972]

CHAPTER 68
ISSUANCE PROCEDURES

68.1(234) Basis of coupon issuance. After eligibility has been established households will be assigned a cash requirement for purchase and a total coupon allotment based on household size and income.

68.2(234) Frequency of coupon issuance. Eligible households may elect to purchase either a full month's or half month's issuance. At a minimum all counties shall provide for sale of coupons semimonthly on dates spaced approximately 15 days apart.

68.3(234) Variable purchase. Eligible households shall be permitted to elect at the time of issuance to purchase either the full monthly allotment, three-quarters the monthly allotment, or one-half the full monthly allotment, or one-quarter the monthly allotment.

68.4(234) Emergency issuance. Each county shall provide for the emergency issuance of food coupons for those households unable to purchase food coupons at the regularly scheduled hours due to unusual circumstances.

68.5(234) Public assistance withholding and mail issuance. Public assistance households may have the full monthly purchase price deducted from their grant and their food coupons mailed to them, provided the public assistance grant is equal to or greater than the monthly purchase requirement. The amount withheld shall be refunded to the recipient upon request and the return of the full monthly allotment of food coupons.

[Amendment filed December 28, 1972 without opinion of Attorney General]

CHAPTERS 69 to 74
Reserved for future use

TITLE VIII

WORK INCENTIVE PROGRAM

CHAPTER 75
ELIGIBILITY OF PERSONS

75.1(249C) Definitions.

75.1(1) *Department.* Whenever "department" is used in this title it shall mean the Iowa department of social services.

75.1(2) *County.* Whenever "county" is used in this title it shall mean the county department of social welfare.

75.2(249C) Persons who are eligible to participate in the work incentive program must be receiving aid to dependent children and include:

75.2(1) The payee, payee's spouse, and dependent children who are in the eligible group to receive aid to dependent children.

75.2(2) Dependent children, 16 years of age or older, who are not in school or training and for whom there are no "education" plans under consideration for implementation within the next three months. This includes unwed mothers under the age of 18 if an adequate child care plan can be arranged.

75.2(3) Caretaker relatives and other essential persons in the eligible group to receive aid to dependent children.

75.3(249C) Persons who are not eligible to participate in the work incentive program include:

75.3(1) A spouse or dependent child not in the eligible group to receive aid to dependent children.

75.3(2) A dependent child who has reached his twentieth birth date.

75.3(3) A caretaker relative who is providing the child with a family home, but is not legally responsible for the child's support and himself is not a needy person.

75.4(249C) The county shall refer eligible persons to the designated employment service for assignment to a work incentive project unless such participation would be harmful to the welfare of the individual or the family. However, such inappropriate person may be referred upon his request. Persons who are inappropriate for referral include:

75.4(1) Children attending school full time.

75.4(2) Mothers and other eligible persons whose presence in the home is required because no adequate child care is present.

75.4(3) Persons so remote from any project under the work incentive program that they cannot effectively participate.

75.4(4) Persons having illness, incapacity or advanced age to an extent that they are physically or mentally unable to undertake a program of work or training.

75.4(5) Persons whose presence in the home on a substantially continuous basis is required because of illness or incapacity of another member of the household.

[Filed February 23, 1972]

CHAPTER 76
PROGRAM REQUIREMENTS

76.1(249C) Participants. Persons participating in the work incentive program shall be assigned to one of three activities.

76.1(1) Regular employment or on-the-job training.

76.1(2) Formal institutional or work experience training.

76.1(3) Special work projects.

76.2(249C) Child care. Adequate child care arrangements must be made before participation in the work incentive program.

76.2(1) The day care home or center shall be approved or licensed by the appropriate authorities.

76.2(2) Child care expense up to a maximum of $100 per month per family shall be allowed. When an additional amount for child care is needed, prior approval from the department is needed.

76.3(249C) Medical examination. All persons referred to the work incentive program shall have a medical examination prior to referral. The report of such examination shall be no older than six months prior to the referral. Any physical or emotional condition present that would adversely affect the individual's participation in the program shall be overcome prior to referral.

76.4(249C) Work and training allowance. A training allowance, which includes moneys for transportation, noon lunches, clothing and other miscellaneous items, shall be allowed from the time a person is referred to completion of the program.

76.5(249C) Right of fair hearing and appeal. An individual referred for participation in the work incentive program has the same right to a fair hearing and appeal as prescribed by the department for the public assistance programs. An individual also has the right of a fair hearing and appeal through the employment service.

TITLE IX

SOCIAL SERVICE RESOURCES

CHAPTERS 81 and 82
Reserved for future use

CHAPTER 83
SUBSIDIZED ADOPTIONS

83.1(600) The Iowa department of social services through the director of the division of family and children's services shall administer the subsidized adoption program, in conformance with the legal requirements for adoption as defined in chapter 600 of the Code.

83.2(600) Application for the subsidy may be made on forms provided by the Iowa department of social services at any time in the adoptive process prior to the filing of the petition to adopt.

83.2(1) Withdrawal of the application for the subsidy shall be reported to the department of social services as soon as the agency has this information.

83.2(2) Review of eligibility based on continued need shall be made on an annual basis.

83.3(600) Conditions of eligibility.

83.3(1) *Adoptive parents.*

a. Income scales determining eligibility for maintenance and special services shall be compiled by the Iowa department of social services based on the current United States labor department's cost of living standards.

b. Income of the prospective adoptive parents used to determine eligibility shall be verified by the inspection of the parents' latest federal income tax report.

83.3(2) *Adoptive child.*

a. In section 600.14 the word "state" shall mean the director of the bureau of family and children's services, and the word "county" shall mean a county department of social welfare in Iowa. A "licensed child placing agency" shall mean an agency licensed by the director of the division of child and family services of the Iowa department of social services to place children.

b. Marriage on the part of the child shall terminate eligibility for subsidy.

c. If a child is a full- or part-time student, his earned income shall not be considered. If the child is not in school, his earnings shall be considered in the determination of the subsidy. The child's income other than earned income shall be considered.

83.4(600) The subsidy for maintenance includes provision of board, room, clothing, spending money, and ordinary medical and dental costs.

83.5(600) Special services.

83.5(1) The need for special services shall be established through a report from the agency having guardianship of the child, plus substantiating information from specialists providing the services.

83.5(2) Attorney fees for adoptive services may be considered a special service.

83.6(600) New applications will be taken at any time, but processed only so long as funds are available. Maintenance and special services already approved will continue.

TITLE X

COUNTY INSTITUTIONS

CHAPTER 97
NEGLECTED CHILDREN

STANDARDS FOR APPROVAL OF COUNTY INSTITUTIONS TO WHICH NEGLECTED, DEPENDENT AND DELINQUENT CHILDREN MAY BE LEGALLY COMMITTED

97.1(232) Buildings, grounds and equipment. Sanitation and health measures as determined and specified in the "Sanitation Handbook for Institutions for Children" compiled by the department of health and issued by the department of social welfare are met.

Each institution secures an annual fire inspection approved by the state fire marshal and meets the recommendations thereof.

Local building, zoning, sanitation and fire safety ordinances are met.

97.2(232) Personnel. The county boards of supervisors or the court, or the two acting jointly, employ a superintendent and a matron, together with such additional staff as they determine necessary for the sound and effective operation of the home.

Persons between the ages of 18 and 70 years, of unquestionable moral character, good intellectual capacity, sound physical and mental health and an ability to work constructively with children and youth are employed.

There is at least one staff person on duty in each building at all times who is readily accessible to the children and youth; such staff person is a woman when the care of girls over six years of age is involved; and at least one other staff person is on call and readily available for duty in case of an emergency.

97.3(232) Program. The institution has established a program of service and care which is focused on the best interests of the child, is nonpunitive in nature and focused not only on the immediate needs of the child but also directed toward long-term goals.

97.3(1) The institution has developed a statement of both admission and discharge policy

which clearly designates those children eligible for admission, the circumstances under which admission may be effected and the manner in which discharge takes place.

97.3(2) Children and youth held in secure detention are, insofar as is practical, kept separate and apart from those given shelter care and are segregated by sex.

97.3(3) A child care plan is developed by the institution for each child which incorporates, in accordance with his needs, consultation with child care, probation services, social work, educational, medical, psychiatric and psychological personnel.

97.3(4) The institution has a consulting physician whose duties include the development and supervision of a medical program for the institution and be responsible for the medical care of each child.

97.3(5) Nursing service is available as directed by the consulting physician.

97.3(6) The institution has a planned program of daily activity which provides for each child, in accordance with his individual needs, both recreation and education. Children and youth held in detention have freedom of movement and exercise at all times and at no time continuously confined in a locked room or cell for more than 24 hours.

97.3(7) When an educational program is established within the institution it meets the educational and teaching standards established by the state department of public instruction.

97.3(8) Food provided for the children conforms to the dietary recommendations of the state department of health.

97.4(232) Reports. The institution makes an annual report as provided in section 232.38, Code 1962.

[Filed December 19, 1962; amended December 20, 1962]

CHAPTERS 98 to 107
Reserved for future use.

TITLE XI

CHILDREN'S BOARDING HOMES

CHAPTER 108
NURSERIES

CHAPTER 109
Reserved for future use.

CHILD WELFARE SERVICES
STANDARDS FOR FOSTER CARE
PROGRAM AND FACILITIES

[Rules to rescind and substitute are pending]

Standards for nurseries.

Nurseries are licensed under the authority given in Chapter 237, 1954 Code of Iowa, in accordance with an opinion rendered by the Attorney General.

Definition.

1. The term "Nursery" shall mean and include the facilities of any home, institution or organization, whether known as a day care center, day nursery, co-operative day nursery, co-operative day nursery school or nursery school, which for profit or nonprofit, receives for temporary care, during part or all of the day, six or more children, over two years of age.

Licensing procedure.

2. A license for operating a nursery shall be "Full" or "Provisional." A provisional license for operating a nursery indicates one or more minimum requirements or standards are not fully met. A provisional license shall be issued for only one year on the same unmet requirement.

3. A license for operating a nursery shall designate the type of operation—"Preschool" or "Day Care."

4. A person or corporation applying for a license for operating a nursery must make application on the forms provided by the State Department of Social Welfare.

5. License application forms for licensing a nursery shall be signed by the board president or chairman of the incorporated nursery or by the executive or operator if there is no governing board.

6. Withdrawal or cancellation of the application for license for operating a nursery shall be reported to the State Department of Social Welfare, within 30 days.

7. A representative of the State Board of Social Welfare shall make a study of the nursery before a license for operating a nursery is granted or denied.

8. The nursery shall discontinue operation immediately when a license for operating a nursery is denied.

9. When a license for operating a nursery is withdrawn or revoked the nursery shall return the license to the State Department of Social Welfare within 30 days.

Organization and administration.

10. Every nursery not incorporated under the statutes of Iowa shall have a written statement of the objects and purposes for which the nursery is established and this statement shall be filed with the State Department of Social Welfare. The plans and practices of operation shall be consistent with the statement. Any change of the plans and practices shall be immediately transmitted to the State Department of Social Welfare in writing.

11. When a nursery is incorporated in the state of Iowa, a copy of said Articles of Incorporation shall be submitted to the State Department of Social Welfare; in the event any amendments to the

original articles are filed, a copy of said amendment or amendments shall be transmitted to the State Department of Social Welfare.

12. A nonprofit nursery shall have a governing board. The board or operating body shall formulate rules and policies within the objects and purposes of said nursery, insist the same be followed and assure itself the executive is fulfilling his function.

13. The board or operating body of a nonprofit nursery shall provide for the operation of said nursery with competent staff which meets the minimum requirements established by the State Department of Social Welfare and shall provide for revenue for adequate financing of said nursery.

14. The budget of a nonprofit nursery must be presented to the board or governing authority for approval prior to becoming effective.

15. The nursery shall maintain financial solvency, consisting of either resources or predictable income, not totally dependent on current fees, for at least a three months operating budget.

16. The nonprofit nursery shall prepare a monthly statement of receipts and expenditures.

17. Records of all financial transactions of profit nurseries shall be entered on the books kept by the operator, executive or owner.

18. The treasurer, executive and other persons handling the funds of a nonprofit nursery shall be bonded.

19. An accountant shall annually audit the books of the nonprofit nursery except the nursery operated and maintained by the state in accordance with the Iowa Code.

Personnel (qualifications and responsibilities).

20. The basic minimum staff of a nursery shall consist of the following: A mature operator or executive and teacher or child-care staff, dependent upon the number and age range of children served by the nursery.

The basic minimum staff of a nursery shall never be less than two persons to give direct care to children. Two staff members shall be on duty at all times except during the periods when the program is starting and ending each day. Until the group in care numbers six in the mornings, and after it is less than six at least one staff member must be on duty with the children and a second person must be within calling distance. When the second person is not a staff member, the nursery shall have written agreements with a person or persons, defining the arrangement(s).

The nursery's child-care or teaching staff shall be kept in the following ratio to groups of children in care.

At least one staff member for each group of:

6 two-year-olds
12 three-year-olds
15 four-year-olds
18 five-year-olds
18 six-year-olds
25 seven-year-olds and over seven-year-olds

Combinations of age grouping shall have staff determined on the youngest age group. In addition to the basic staff, one staff member shall be available as needed to give assistance to any group.

Separate maintenance staff shall be provided except when the direct child-care and teaching staff is in excess of the ratio given above.

21. The nursery operator or executive shall be a competent person, mentally and emotionally stable, who has ability to work with children as adjudged from past experience and training.

22. The nursery operator, executive or board shall provide a plan for staff training and development.

23. The nursery operator or executive shall be responsible for the nursery administration and program; for admission and discharge of children and be concerned for the child's development while in said nursery.

24. The nursery's child-care staff and teachers shall have a knowledge of child development and behavior; have the ability to give the children a feeling of security and comfort; and under the supervision of the executive or operator be responsible for the guidance and direct child-care.

25. A nursery licensed as a "School" shall have at least one teacher who is a high school graduate and has credits from an accredited college or university in the subjects listed below:

a. Four quarter credits or three semester hours in "Approved supervised teaching in preschool groups" (not less than 120 hours), and

b. Six quarter credits or four semester hours in "Family Relations and Community Life," and

c. Nine quarter credits or six semester hours in "Child Development, including child psychology, physical growth, and personality development, from birth to twelve years," and

d. Nine quarter credits or six semester hours in "Nursery school curriculum and procedure (including literature, music, art and science for children two to five years), selection of equipment and materials".

(One year's teaching experience under the supervision of a teacher who has these qualifications may be substituted for six quarter credits or four semester hours of the requirement given under "d".)

26. The nursery shall have at least one staff member with training and knowledge of child development and nursery management so as to impart his knowledge to the general staff and plan for orientation of new staff members.

27. Every staff member shall be in good physical condition and the same shall be evidenced by a report from a medical examiner, prior to employment, and thereafter at least every third year. A

staff member, who develops any symptoms of a communicable disease, at any time, shall be required to have a medical examination.

28. Personnel records for the nursery staff shall be complete including medical reports.

29. No administrative, professional or childcare staff member shall be younger than 16 or older than 70 years of age.

Plant and equipment.

30. No nursery shall be operated where any condition exists which would be injurious to the moral or physical welfare of a child or children.

31. No nursery shall be operated in a setting or building where the care of the aged, infirm or incapacitated is given on a planned or licensed basis.

32. The premises of the nursery shall be in a sanitary condition acceptable to the state department of health.

33. Premises used for outdoor play by the nursery shall be maintained in good condition throughout the year; shall be kept free from litter, rubbish and inflammable material at all times and shall be fenced off when the nursery grounds are located on a busy thoroughfare.

34. Any new building or remodeling plan for a nursery shall be approved, prior to construction, by the state department of social welfare.

35. In any large nursery program the administrative offices shall be kept separate from the areas used by the children. Space in each nursery shall be provided for clerical work and for confidential records and other materials which need to be kept on file in the nursery.

36. The nursery shall have sufficient rooms available for the various types of activities and for the care of children by age groups.

37. The nursery shall have napping facilities for each preschool age child if time spent at the nursery is longer than three hours and shall provide a washable cot and bedding for each preschool age child. There shall be at least two feet of space on all sides of the cot except where it touches the wall.

38. The nursery shall have a room which can be used for isolation for any child having or suspected of having a communicable disease.

39. Individual toilet articles, including towels (paper or cloth) and facilities for keeping them shall be provided in the nursery. Sanitary dispensing and disposal units for paper cups and towels shall be provided in the nursery.

Fire safety.

40. The nursery, before a license is issued, must be inspected by the local fire department or the state fire marshal. All recommendations for fire safety as determined by the inspection of the nursery and approved by the state department of social welfare must be carried out.

41. A nursery using second story facilities shall provide the building with an approved fire escape. The nursery shall provide fire extinguishers within the building at places recommended by the fire department and the nursery premises shall be kept free from fire hazards and accumulations of combustible materials.

Equipment and materials.

42. The nursery shall provide equipment for the use of the children suited to their needs, size and abilities for both indoor and outdoor activity. The total shall include materials and equipment to encourage muscular activity; social and dramatic play; intellectual growth and creative expression; and shall be of safe construction and materials and easily cleaned. The nursery shall have permanent outdoor play equipment.

Standards of Service

43. The nursery's admission and intake policies shall be defined, formulated and commensurate with the needs of the children and with the purpose of the program.

44. The nursery program shall be appropriate to the defined purpose of the nursery and shall not be a duplication of the elementary public school curriculum.

45. The nursery shall establish definite financial agreements and fee policies for the children served.

46. The nursery shall have and maintain social, factual and medical data regarding each child and his family.

47. The nursery shall establish definite medical policies with respect to admission and readmission with provision for the following mandatory requirements.

The nursery shall require each child to have a preadmission physical examination and immunizations for smallpox, diphtheria, whooping cough, tetanus and any other immunization the local or state health authority deems necessary. A child without immunizations shall be admitted only when such procedures are started immediately. Booster shots shall follow recommendations as set forth by the Manual of "Approved Procedures and Techniques" of the State Department of Health.

Exemption—Nothing in this rule shall be construed to require medical treatment or immunization for the minor child of any person who is a member of a well-recognized church or religious denomination, and whose religious convictions in accordance with the tenets or principles of his church or religious denomination are against medical treatment for disease.

48. The nursery shall have the parents' written consent for emergency medical care for each child and shall administer no medicine to any child in care without a doctor's direct verbal or written authorization.

49. A daily health inspection shall be given each child upon his arrival at the nursery for the purpose of the early detection of signs of apparent

illness, communicable disease or any unusual condition or significant behavior which may adversely affect the child or the group.

50. Any child, becoming acutely ill or injured while in care, shall be isolated from the group until other provision for care is made and he shall have immediate medical care.

51. The nursery shall plan menus so each child will receive all he needs of each of the dietary essentials.

52. Breakfast shall be available at the nursery to children who come in the morning without it and shall be a balanced meal providing at least one-fourth to one-third of the child's total daily nutritive requirements. Children remaining at the nursery for as long as five hours shall be served a full balanced meal providing at least one-third of the child's total daily nutritive requirements.

53. The nursery shall allow at least one-half hour for eating a meal. Mealtime for the preschool age child shall not follow directly a period of extreme activity.

54. The nursery shall provide case work service to the child and to his family when needed.

55. The professional staff of the nursery shall have joint responsibility for planning for the child's discharge from the nursery.

56. In the nursery, a balance must be achieved between the stability of certain necessary routines and flexibility necessary to provide creative play experiences. Adult standards shall not be superimposed and children in care should be allowed to develop at their own rate. The same basic principles shall apply to all nursery programs and a nursery having both preschool and school age children shall develop and maintain separate programs for each classification.

57. The program for the preschool age group shall present evidence that it is closely related to the optimum development of each child and the activities planned accordingly. It shall daily include: Free, directed activity and vigorous and quiet play in and out of doors with opportunities for each child to develop free expression through work with raw materials and use of traditional materials.

58. The educational program for the nursery "school" shall be dependent upon the qualifications of staff and the program.

Records and Reports

59. The nursery shall keep records and reports on the children in care including:

a. A master file or index book containing identifying family information on all children given care.

b. A card file or index book for children under care.

c. A case folder for every family receiving day care service, containing identifying family information, pertinent information about each child in care and the health record of each child. These case records shall be kept in locked files at the nursery.

60. A good bookkeeping system, including proper fiscal files, shall be maintained by the nursery.

61. The nursery shall make available to the state department of social welfare all reports requested and at the time requested.

CHAPTER 110
STANDARDS FOR CHILDREN'S BOARDING HOMES

[Rules to rescind and substitute are pending]

Authority

Since 1925, the laws of Iowa have recognized the responsibility of the state for safeguarding the interests of children cared for away from their own homes. At that time, the first children's boarding home law was passed, requiring certain homes caring for children to be inspected and licensed by the bureau of child welfare of the board of control. The Child Welfare Act of 1937 (chapter 235 of the Code of Iowa) transferred this duty to the department of social welfare (section 235.3).In order to insure minimum standards of child care in boarding homes, the state Board of Social Welfare is directed by law to formulate rules and regulations for the conduct of such homes, with which all boarding homes must comply.

General Provisions

1. DEFINITION BY AGE AND NUMBER OF CHILDREN: The law limits the necessity of securing a license to homes boarding three or more children under 14 years of age at any one time. Agencies should, however, safeguard children entrusted to their care by applying the same minimum standards to homes caring for less than three children and to those over 14 years of age. It is not necessary for three children to be in the home at all times to keep the license active. A home equipped for and prepared to give care to three or more children can retain a license, even though the active population is less.

2. TUITION: When a boarding home is licensed, the school district is entitled to receive tuition from the state department of public instruction for any children attending school whose parents or guardians do not reside in the same school district as the boarding parents, and who are public charges (section 238.23 of the Code of Iowa). Tuition privileges do not stop when the child becomes 14 years old. The tuition law says "any child of school age."

3. CERTIFICATE OF APPROVAL: The division of child welfare will issue upon request of the supervising agency, and after a satisfactory inspection, a Certificate of Approval to boarding homes which can provide adequately for only one or two children. This certificate is a token of recognition of the fact that the home meets all the standards for a

licensed home, but it does not afford the privilege of school tuition.

4. DAY CARE HOMES: Private homes, caring for children during the daytime only (chiefly for employed mothers during the war emergency) must comply in general with the same standards as full-time care homes, and must be licensed to care for more than two children at a time.

Licensing

1. RELATIONSHIP OF THE DIVISION OF CHILD WELFARE TO CHILDREN'S BOARDING HOMES: The division of child welfare of the state department of social welfare has the sole power to issue or revoke a license for the conduct of a children's boarding home.

VISITATION AND INSPECTION: The division of child welfare, through its officials or authorized agents, may visit and inspect a children's boarding home at any time, but it is required to visit each home every six months.

Applications to operate a boarding home, signed by the foster parents, shall be submitted to the division of child welfare of the state department of social welfare, through the supervising agency.

All permanent records pertaining to children's boarding homes shall be kept in the files of the division of child welfare, which records shall include the license, foster home evaluations, reports of sanitary inspection, master file card, and population reports.

2. DURATION OF LICENSE: A license for the conduct of a children's boarding home is effective only for the period of one year from the date of issue. If the boarding family should move to another location, the new residence must meet the housing and sanitation standards of the state department of health in order to keep the license in force. Licenses will be renewed only upon a re-evaluation of the boarding home. Withdrawal or cancellation of a boarding home application must be reported to the division of child welfare of the state department of social welfare.

3. LIMITATION IN NUMBER OF CHILDREN: A license shall not be issued for more than four children, except by special permission of the director of the division of child welfare. This number shall include boarding children over fourteen years of age. There should be no more than two children under two nor a total of more than six children under fourteen years of age, boarding and own, in the boarding home at one time. An exception may be made to this standard if necessary to keep together a large family of children needing boarding care, or for children who remain in the boarding home for short periods only. Institutions caring for larger numbers of children will also be licensed under the boarding home statutes.

The number of children which may be cared for at any one time in the home of the applicant is specified in the license and may not be exceeded without permission of the division of child welfare of the state department of social welfare.

4. SUPERVISION: A license shall not be issued to a boarding home applicant independent of a supervising agency which must be approved by the division of child welfare, state department of social welfare. Boarding homes should not accept children for care from more than one agency at the same time.

5. COMPULSORY HEALTH REPORTS: A report of the sanitary and health conditions of the boarding home premises must be submitted each year before a license can be issued. Such inspection shall be as directed by the state department of health.

The report of the sanitary conditions of the boarding home premises applies only to the residence occupied at the time of application. Any change of address shall require a new health or sanitary inspection.

6. REVOCATION OF LICENSE: Intentional or persistent violation of any one of the rules and regulations for the conduct of children's boarding homes shall be cause to revoke a boarding home license.

7. POSTING OF LICENSE: The statute requires the posting of the license in a conspicuous place in the licensed home (section 237.10 of the Code of Iowa). How this will be done may be left to the discretion of the individual boarding mother.

Physical Standards

1. LOCATION OF BOARDING HOME: The boarding home must be in a reputable neighborhood, and one that is conducive to the health and safety of the child.

The boarding home must be accessible for church and school attendance, and for medical and supervisory service.

2. BUILDING AND EQUIPMENT:

a. *Sanitation:* The boarding home shall conform in fire protection, building construction, sanitation and maintenance to the ordinances of the city in which it is located and to the laws of the state. Each home shall conform in the above and in the following manners to the standards and regulations of the state department of health: Refrigeration of food; the size, ventilation and lighting of sleeping rooms; the screening of all openings to the house; heating facilities; the adequacy of indoor and outdoor play space for children; the water supply; sewage disposal; toilet facilities; and garbage disposal; and to any other question relating to health and sanitation and safety. This will be determined for each home at the time the health inspection is made.

Standards for cleanliness throughout the premises and the housekeeping shall be reasonably good and of the standard set by the supervising agency. However, the emphasis should be on homemaking rather than on housekeeping.

b. *Health Requirements:* Isolation quarters shall be provided for children with contagious diseases.

Separate beds shall be provided for each child and equipped with comfortable springs, clean mattress and bedding. Children of the same family

and sex shall constitute the only exception to this standard.

Usually not more than four children should sleep in one room even though the room has sufficient cubic air space to comply with the housing law.

No bed for a boarding child shall be placed in an attic, basement, stairway, storeroom or unfinished room. It is not advisable to provide sleeping quarters for boarding children in rooms used for general family purposes, i.e., kitchen, dining room, living room.

Personal Qualifications of the Boarding Home

1. CHARACTER: All members of the household must be of good character, habits, and reputation.

2. HEALTH: All members of the household must be in good health with no disqualifying physical or mental handicaps. All members of the foster family shall be free from communicable disease and history of present and recurring mental disease. Acceptable evidence of this fact shall be required.

3. FINANCIAL STATUS: The financial status of the foster family should be such that the security to the child will not be jeopardized.

4. OCCUPATIONAL LIMITATIONS: The foster mother shall not regularly be employed outside her home. No boarding home shall conduct a rooming or boarding house, or carry on any commercial work which is or will be a detriment to the welfare of the child.

Homes caring for convalescent or maternity patients may not be licensed as boarding homes for children, and boarding homes may not accept convalescent or maternity patients.

Homes used for the care of aged persons are not to be used for the care of children except where the aged persons, by virtue of their relationship or long standing friendship, are considered a part of the family group.

5. FAMILY RELATIONSHIPS: Home life should be harmonious enough to give the children the emotional stability they need. All members of the family must be willing to accept the boarding child into the home as a member of the family group. They should be able to give the child experience in normal family life.

6. RELIGION: So far as it is practicable, boarding parents should be of the same religious belief as the parents of the child.

Care of the Child

1. MEDICAL CARE: A thorough physical examination of each child shall be provided by a competent physician upon admission to the boarding home. Foster parents should insist upon being assured of the physical fitness of the child before accepting him as a member of the household.

Diagnosis and treatment in case of illness or accident shall be given by a competent physician. No "home remedies" shall be regularly administered by foster parents without the knowledge and approval of a physician and the supervising agency.

To provide for emergency illness and accidents, every boarding home shall provide itself with first aid equipment and shall receive instructions for its use by a physician or a registered nurse.

A report of the child's illness, injury and temporary indisposition shall be made as soon as possible to the supervising agency, or to the child's parents if the child was placed directly by them in the foster home.

2. SOCIAL AND HYGIENIC CARE: Management of the foster home must be conducive to regularity in habits of sleeping and eating and the care of the body.

The standards of cleanliness and personal hygiene used in the care of the child, taught to him, and maintained by the foster family, shall be in conformity with good health practices and ordinary social acceptability.

A nutritious and adequate dietary shall be established. A formula for feeding infants shall be prescribed by a physician.

Children over six years of age, and preferably not over four years, shall not sleep in the same room with children of the opposite sex.

No child over three, and preferably not over one year of age, shall regularly sleep in a room with the boarding parents.

Individual toilet articles such as combs, toothbrushes, towels and wash cloths shall be provided. Adequate space shall be set aside for each child's clothing and personal possessions.

The clothing of the child shall be clean and neat and of such quality as not to distinguish it from other children in the community.

3. STATUS OF CHILD IN THE HOME: The child shall be treated as a member of the foster family during the period of his care, sharing the privileges and duties of the household according to his age and capacity, and receiving care and training according to his special abilities or limitations.

4. SCHOOL AND CHURCH ATTENDANCE: Children of suitable age shall attend regularly church services and religious schools of their own religious faith insofar as is reasonable and possible. Any deviation from this rule shall be discussed with the supervising agency. Children shall attend public or parochial schools regularly as provided by law except during periods of illness or for other adequate reasons approved by the supervising agency.

5. RELATIONSHIP TO SUPERVISING AGENCY: Foster parents shall consult with the supervising agency at all times with regard to care and training of the foster child and on plans for him when it involves more than the day-by-day routine. Foster parents' relationship with the child's own family shall not include plans for the foster child without the knowledge of the supervising agency.

Foster parents must secure permission from the supervising agency before taking or allowing the child to go on vacation trips, visits to relatives, etc.

A boarding child must be left in charge of a competent adult person, who has been approved by the supervising agency, during the absence of the foster parents.

Exception is made to these procedures in the case of parents who have their children cared for in boarding homes temporarily and retain full legal control of them, in which case parental consent is necessary.

Records and Reports

1. ADMISSION AND DISCHARGE: The foster parents shall keep a permanent register of all children accepted for care. The register shall have recorded in it, the child's full name, the name and address of the parents or guardian, the name of the supervising agency, date of admission, date of discharge, and the name of the agency or persons to whom the child was discharged.

2. MONTHLY REPORTS: Monthly reports of the number of children in each boarding home shall be submitted by the supervising agency to the division of child welfare of the state department of social welfare on forms supplied by the division of child welfare.

The licensed child-placing agencies will use Forms CW-2702 and CW-2703.

FEDERAL FUNDS IN THE PAYMENT OF FOSTER CARE

[Filed April 22, 1959]

Use of Federal Funds in the Payment of Foster Care

Foster care payment is defined as foster care service for which payment may be made by the Department from federal funds.

The reimbursement from federal funds for foster care payment is available to a county department of social welfare for a child or youth under the age of twenty-one receiving services and residing in an approved foster family home under public or private agency supervision, or for a child who is living in an approved care facility under voluntary or public support (excluding state institutions); and is in need of financial support because one or more of the following conditions has deprived him of parental support:

1. The death, physical or mental incapacity, or continued absence from home of one or both parents.

2. The abandonment of the child by his parent, guardian or custodian.

3. The neglect or refusal to provide proper subsistence, education, medical or surgical care, or other necessary care for the child's health, morals or well-being, providing a juvenile court has assumed temporary responsibility.

4. Foster care service has been voluntarily requested by his parent, guardian or custodian but without the ability of the person responsible for him to pay all or a portion of the cost of foster care.

An approved foster family home or an approved child care facility is one which holds either a "Certificate of License" or a "Certificate of Approval" issued by the state board of social welfare.

Each county department of social welfare is responsible for making available service and payment for all types of foster care when needed. Foster care services are a basic part of the county child welfare program.

County departments are responsible for paying their share of the cost of foster care for children having settlement within their borders, in accordance with the provisions of chapter 252, Code of Iowa. When a child's settlement cannot be determined or when he has no settlement in this state, the county department giving service would be reimbursed from federal funds for the full cost of such care.

Reimbursement to county departments will be made from federal funds on a ratio determined by the relationship between the amount of federal funds budgeted by the state board of social welfare, less the funds used for children or youth without legal settlement in an Iowa county, and the total cost submitted by all counties active in the program for a given month.

The plan made for foster care for a child shall be approved by an authorized representative of the county board of social welfare and shall be subject to review and acceptance by the state department of social welfare.

Reimbursement from federal funds shall be made for the following costs of foster care:

1. For basic foster care in a foster family home under public or private agency supervision and for such care in an agency or in an institution.

2. An allowance beyond the basic rate for special care may be made within the limits established by the state board.

3. Clothing as needed and approved by the county department.

4. Medical care and drugs as needed and approved by the county department.

5. Transportation as approved for special purposes by the county department.

As far as practicable, the child's parents shall carry as much of the cost of foster care as they are financially able to bear without jeopardizing their personal and family security.

Reports shall be received by county departments at not less than six-month intervals from all private agencies or other public facilities providing foster care services, indicating the progress of the child or youth in such care.

County departments shall maintain the necessary financial records as developed by the state department in its procedures covering its activities in relation to foster care payment. Such records shall be made available for audit and shall be subject to review by the employees of the state department.

County departments shall certify each month the expenditures that have been made from county funds as foster care payments on the forms provided by the state department.

CHAPTER 111
Reserved for future use

CHAPTER 112
LICENSING REQUIREMENTS FOR INSTITUTIONAL CARE

The following rules for children's institutions provide for the conduct of those "Children's Boarding Homes" defined in Chapter 237, Code of Iowa, which offer care to six or more children.

112.1(237) Organization and administration. Profit and nonprofit institutions shall maintain financial solvency which insures adequate care of the children and youth for whom responsibility is assumed and shall have sufficient resources, predictable income, or both, not totally dependent upon current fees, for a three months' operating period.

112.2(237) Personnel and personnel practices.

112.2(1) Personnel standards shall be in writing, presented to each new employee and shall be consistent with the Iowa labor statutes.

112.2(2) Only persons between the ages of eighteen and seventy of good moral character, intellectual capacity and sound mental and physical health shall be employed to provide direct child care services.

112.2(3) The sound health of every staff member shall be evidenced by a physical examination prior to his employment and every three years thereafter unless necessitated more frequently due to the employee's health.

112.2(4) A personnel record shall be maintained for each employee setting forth the following information:

Name and address of employee.
Social security number of employee.
Date of birth.
Date of employment.
Experience and education.
References (information from three sources).
Position in the agency.
Date of discharge or resignation.
Records of physical examinations as required.
Hours of work.

112.2(5) Each institution shall establish written ratios of child care staff to the children under care in accordance with the needs of the children which shall be approved by the state board of social welfare.

There shall be at least one staff person on duty in each building who is readily accessible to the children at all times. For girls over the age of six years, this person shall be a woman. A second staff person shall be on call and immediately available for duty in the event of an emergency.

112.3(237) Buildings, grounds and equipment.

112.3(1) The sanitary and health measures of the department of health shall be met.

112.3(2) Each institution shall secure an annual fire inspection which shall meet the approval of the state fire marshal and shall meet the recommendations thereof.

112.3(3) Local building and zoning ordinances shall be met.

112.4(237) Services.

112.4(1) The institution shall have written policies governing the type of care offered, the requirements for admission, and the provisions made for discharge.

112.4(2) The institution shall have written authorization prior to admission to provide care for each child, including authorization for medical and surgical care and hospitalization in an emergency. These authorizations shall be signed by parent or guardian and shall be filed in the child's record.

112.4(3) A medical and dental health program shall be developed and carried out for each child which shall include:

a. A physical examination within one week prior to admission.

b. A medical and dental diagnostic evaluation.

c. Prescribed corrective or rehabilitative treatment while in the care of the institution.

Exception: In case of an emergency a child may be admitted without a preliminary physical examination, provided that such an examination be given within three days after admission.

112.4(4) A child care plan shall be developed and recorded for each child which shall incorporate, in accordance with his needs, consultations with child care, social work, educational, medical, psychiatric and psychological personnel. Each child's progress shall be recorded at least quarterly and the child care plan re-evaluated annually.

112.4(5) Casework services shall be provided for each child as an integral part of the program. These services shall be provided by or supervised by a social worker with one year of graduate training in an accredited school of social work, plus one year of casework experience under a qualified social work supervisor, or two years of such graduate training.

112.4(6) Institutions caring for mentally retarded children shall provide the services of a clinical psychologist as an integral part of the services for each child. The psychologist providing this service shall meet the requirements of membership in the American Psychological Association.

112.4(7) There shall be a consulting physician who shall develop and supervise the medical program for the institution and be responsible for the medical care of each child.

When the institution offers a program of treatment for emotionally disturbed children, the medical program for such children shall include the consultation of a psychiatrist.

112.4(8) Nursing care shall be provided as directed by the designated consulting physician for the institution.

112.4(9) An educational program shall be provided for each child in accordance with his abilities and needs. The educational and teaching standards established by the state department of public instruction shall be met when an educational program is provided within an institution.

112.4(10) The food provided for the children shall conform to the dietary recommendations for the state department of health.

112.4(11) The institution shall have written policies governing religious training.

112.4(12) The institution shall have written policies approved by the state board of social welfare governing the discipline of the children in care.

112.5(237) Records and reports.

112.5(1) An individual case record shall be maintained for each child and this shall include the following:

a. Identifying information about the child and his family:

(1) His full name, birthplace and date.

(2) Parents' full names, including mother's maiden name.

(3) Parents' address.

(4) Religion of parent and child, if not the same.

b. Statement indicating who has legal custody, if other than parent, or court order.

c. Placement agreements and medical authorizations signed by parent or legal guardian. [112.4(2)]

d. A record of all medical and dental examinations and treatment. [112.4(3)]

e. Psychological examination and recommendations when required under item 112.4(6).

f. Summarized reports, at least quarterly, of child's progress and development while under care. [112.4(4)]

g. Reports of child care staff.

112.5(2) Reserved for future use.

[Filed July 25, 1962]

CHAPTER 113
REIMBURSEMENT

113.1(237) State reimbursement of county expenditures for foster care.

113.1(1) The foster care payment program shall provide for financial reimbursement to the county for a portion of that part of the cost of the care and services to children or youth under age nineteen or where specially authorized under the age of twenty-one as provided in section 234.1, or unmarried mothers of any age, paid from any county tax supported fund. The department will reimburse the county department from funds budgeted by the department for this purpose. The level of reimbursement is dependent upon funds available.

113.1(2) *Children of veterans and current servicemen.* If a veteran's or serviceman's child is placed in an alternative foster care setting rather than being admitted to the Juvenile Home or The Iowa Annie Wittenmyer Home, the state treasurer's office will reimburse the county for expenditures made for care on behalf of that child upon certification by the department in accordance with section 232.53.

113.2(237) Eligibility for reimbursement. Foster care reimbursement is available for any child or youth under the age of nineteen or where specially authorized under the age of twenty-one as provided in section 234.1 or any unmarried mother, regardless of age, receiving service in a facility licensed by the department, under public or private agency supervision, supported by private or public funds, or operated for profit; provided his parent, guardian or custodian has requested service from the county department and is unable to meet all or part of the cost of such care and the county department has assumed responsibility for supervising the placement.

CHAPTERS 114 to 149
Reserved for future use

TITLE XII

CHILD-PLACING AGENCIES

CHAPTER 150
LICENSING

150.1(238) Issuance and renewal. The state board of social welfare will issue or renew a license on an annual basis, without cost, for any child-placing agency which meets the following minimum standards applicable to all child-placing agencies as defined by chapter 238 of the Code.

150.1(1) *Applications.* An organization or corporation applying for a license must use forms provided by the state board of social welfare. The application signed by the operator or the appropriate officer shall be submitted to the state board of social welfare. It shall indicate the type of facility for which application is made.

a. Withdrawal or cancellation of the application shall be reported to the state board of social welfare within 30 days.

b. Each application shall be evaluated by the state board of social welfare.

c. Reports shall be submitted as requested by the state board of social welfare.

150.2(238) Provisional license. If all required standards are not fully met, but plans are under way to correct the defect, a provisional license for a period of one year may be issued at the discretion of the state board of social welfare. This can be renewed only on special review of reasons for delay in removing the deficiency and its possible effect on the children in care.

CHAPTER 151
ORGANIZATION AND ADMINISTRATION

151.1(238) Incorporation. The agency shall define its purpose and functions broadly in its articles of incorporation or if unincorporated, in written constitution and bylaws. The articles of incorporation or if unincorporated, written constitution and bylaws shall be submitted to the state board of social welfare.

151.2(238) Board. The agency shall have a governing board which together with the executive shall be responsible for making agency policy and for financing and general management of the agency.

151.2(1) *Membership.* The agency shall provide for continuity of board membership.

151.2(2) *Meetings.* The board shall meet regularly for the purpose of insuring the proper operation of the agency according to its defined purpose.

151.2(3) *Minutes.* The minutes of each meeting of the board shall be kept and made a part of the permanent records of the agency.

151.2(4) *Annual report.* The governing board shall require the executive to submit to them a written annual report, a copy of which shall also be sent to the state board of social welfare.

151.3(238) Financing and accounting. The agency shall have a sound plan of financing which gives assurance of sufficient funds to carry it through its first year of operation in order to carry out its defined purposes and provide proper care for children. Thereafter, it shall have sufficient resources, predictable income, or both, not totally dependent on fees, for a three-month operating period.

151.3(1) *Audit.* A certified public accountant shall conduct an audit of all financial accounts at least once a year and his report made a part of agency records. A financial record of all receipts, disbursements, assets and liabilities shall be maintained.

CHAPTER 152
PERSONNEL AND PERSONNEL PRACTICES

152.1(238) Staff. Staff members shall be persons of sound character, emotional stability and of sufficient ability and education to carry out adequately the duties assigned to them by the agency.

152.1(1) *Social work staff.* Each agency shall have sufficient trained social work staff to provide satisfactory service.

152.1(2) *Executive.* The executive shall be a person of broad knowledge and competent to administer the agency according to its stated objectives and have the qualifications of a casework supervisor if none is employed. He shall have proven executive ability and an understanding of children and their needs as well as vision and leadership.

152.1(3) *Casework supervisor.* The casework supervisor, if employed, shall have had one year of experience in casework practice and shall have successfully completed two years of training in an accredited school of social work or have been accepted as a member of Academy of Certified Social Workers.

152.1(4) *Clerical.* Every agency shall have clerical services to keep correspondence, records, bookkeeping and files current and in good order.

152.2(238) Personnel practices. The agency shall have a written statement of personnel practices adopted by the board. This statement shall be made available to an employee at the time of his employment and shall cover the following areas: Job classification for both professional and clerical positions, beginning salary, salary increases, vacation, sick leave, educational leave, retirement provisions, insurance covering workmen's compensation, attendance at social work conferences and institutes, probationary period in accordance with agency policies, an evaluation plan and hours of work.

Exception: If the employing agency does not have any of the above-enumerated policies, the written statement made available to the employee shall so state.

152.3(238) Personnel records. A personnel record shall be maintained for each employee or staff member and shall contain the following information: Application showing qualification and experience, statements from previous employers and personal references, reports of job performance including the annual evaluation, medical reports if any, dates of employment, separation and reason for separation.

The work and performance of each staff member shall be evaluated each year, made known to employee and made part of his record.

152.4(238) Staff development. Provision shall be made for improvement of staff competence through an in-service training program, attendance at professional conferences and workshops, and the use of current professional literature.

CHAPTER 153
SOCIAL SERVICES

153.1(238) Program services. An agency shall have an adequate social service program to meet the needs of the children under its care.

153.1(1) *Social study.* A complete social study shall be made prior to acceptance of a child for care, or in an emergency, within a reasonable period following acceptance.

153.1(2) *Home studies.* An adequate home study shall be made of all adoptive homes and foster family homes to determine their abilities to meet the needs of the individual children to be placed.

153.1(3) *Preschool children.* Children five years of age or under shall be placed in foster family homes while awaiting adoption except with special approval of the state board of social welfare.

153.1(4) *Placement agreement.* The agency shall obtain a signed placement agreement from the child's parents or guardian prior to accepting the child for placement.

a. The agreement shall authorize the agency to place the child.

b. The agreement shall authorize emergency medical treatment including the administering of anesthesia.

c. The agreement shall set forth the terms of payment for care.

153.1(5) *Limited case loads.* The number of cases carried by each worker shall be limited so as to allow time for effective service to each child and his family accepted for service. A maximum of 60 children or the equivalent shall be considered a case load for an individual caseworker.

153.1(6) *Supervision.* The agency shall provide its casework staff with adequate supervision to carry out the casework program.

153.2(238) Continuing social services. The agency shall make provision for continued social services while the child is in its care.

153.2(1) *Parent-child contacts.* Contacts between parents and children shall be encouraged except where visits are clearly detrimental to the child's welfare or where permanent separation is planned.

153.2(2) *Casework with the child.* The child shall have continued casework services which include evaluations of the child's progress, understanding of his changing needs, the use he is making of placement and the ultimate long-range plan.

153.2(3) *Supervision of foster home.* Frequency of supervisory visits will vary dependent upon the needs of the individual child and foster parents, but shall be frequent enough to insure adequate service to both.

153.2(4) *Adoption studies.* The agency shall prior to placement of a child for adoption secure and evaluate information regarding the adoptive family's emotional maturity, finances, health, relationships, and all factors which may affect their ability to accept the child, care for him and provide him an adequate home as he matures.

153.2(5) *Discharge and aftercare.* Before a child is discharged to parents or the court who placed him, the agency shall take responsibility for evaluating the future plan for the child. Follow-up service and supervision shall be provided for, either by the agency or referral to another appropriate agency in accordance with the individual's needs and desires of the child and his parents.

153.3(238) Licensing of foster family homes. All foster family homes shall be licensed prior to placing a child in the home.

A foster family home study shall be completed before a recommendation to license is submitted to the state department of social welfare.

CHAPTER 154
RECORDS

154.1(238) Case records. The agency shall be responsible for maintaining case records of all children accepted for care, all adoptive homes and all foster family homes.

154.1(1) *Access.* Authorized representatives of the department of social welfare shall have access to all records and shall respect their confidential nature.

154.1(2) *Contents.* The child's case record shall contain the intake study, parent's placement agreement, full identifying information, an explanation of custody or legal responsibility, reports of the child's progress, psychiatric or psychological reports and plans for discharge.

154.2(238) Medical records. The agency shall maintain a medical record for each child in care.

The medical record shall contain a record of all illnesses, immunizations, communicable diseases and follow-up treatments.

CHAPTER 155
RELIGION

155.1(238) Religious preferences. The religious preference of the natural parents shall be given consideration in the placement of the child.

CHAPTER 156
HEALTH SERVICES

156.1(238) Medical care. The agency shall see that each child under its care receives needed medical care.

156.1(1) *Health examination.* The agency shall require a thorough health examination of each child on admission to care.

The initial examination of the child shall include developmental history, previous illnesses, injuries and operations.

156.1(2) *Rehabilitation.* The agency shall take the necessary steps to assure physical rehabilitation, if indicated, of every child to fullest extent possible.

156.1(3) *Written authorization.* The agency shall obtain from parent or guardian written authorization for medical and surgical care including anesthesia and for necessary immunizations and vaccinations.

156.1(4) *Treatment.* Provision shall be made for prompt treatment in case of illness and for carrying out corrective measures and treatment of remedial defects or deformities, if possible.

156.2(238) Dental care. A thorough dental examination shall be made as soon as possible after acceptance for placement and at least once a year thereafter.

156.3(238) Hospital care. The agency shall provide hospitalization as needed for children under care.

156.4(238) Clothing. The agency shall assure adequate and individualized clothing for each child under care.

CHAPTER 157
EDUCATION

157.1(238) Education. The agency shall provide academic or vocational training in accordance with the abilities and needs of the individual children.

STATE PRESERVES ADVISORY BOARD

CHAPTER 1
MANAGEMENT OF STATE PRESERVES

1.1(111B) General provisions.

1.1(1) *Definitions.* As used in these rules, the following terms shall have the meanings indicated, except where the context otherwise requires. "Act" means "An Act to establish a system of state preserves and to provide for the control and management of same", as it is codified as chapter 111B of the Code. "Board" means the state preserves advisory board established by this Act. "Articles of dedication" means the term articles of dedication as that term is used in section 111B.9 of the Act. "Master Plan" means a plan for management of an individual preserve as described in part 1.7(111B) of these provisions. "Commission" means the state conservation commission of the state of Iowa. "Preserve" means an area of land or water, or both land and water, formally dedicated under the provisions of the Act.

In the management of preserves, in the state system of preserves, five major classes are recognized:

a. "Nature preserves". These areas which are of value primarily because they contain natural flora and fauna which have undergone little or no disturbance by modern man, or which contain species which are in danger of extinction in the state of Iowa.

b. "Archeological preserves". These are areas which contain deposits of archeological importance.

c. "Historical preserves". These are areas which contain structures or objects which are of significance in studying the tenure of man in Iowa since the advent of the first explorers.

d. "Geological preserves". These are areas which contain rare or distinctive geological features or deposits.

e. "Scenic preserves". These are areas which contain scenic features of scientific or educational value.

1.1(2) *Applicability of rules.* Management of each Iowa preserve shall be in accordance with these rules except only as may be provided in the articles of dedication of the preserve or in the master plan therefore.

There shall be a master plan for each preserve, such plan to be in the form hereinafter indicated.

Whenever it is required by the articles of dedication, or otherwise provided in the master plan, that there be a deviation from these rules in the management of a preserve, such deviation shall be set forth in detail, together with the reasons therefore, in the master plan. A deviation from these rules shall take effect only by majority vote of the board. Written notice of the change in these rules shall be given to the board members at least ten days prior to the vote of the board.

1.1(3) *Administration and custody.* The method of administration and custody of each preserve shall be designated in the master plan. The master plan shall designate an agency or individual as custodian of the preserve. In case of resignation, death, disability or other failure of the custodian to administer and manage a preserve in

accordance with these rules and the master plan, the commission may, with the approval of the board, undertake such custodial functions as may be necessary for the maintenance and protection of the preserve until the disability of the custodian is removed or a successor is designated.

1.1(4) *Reports.* The custodian shall submit periodic reports to the commission and the board in such form and at such time as the commission and the board may designate. The reports shall constitute a portion of the record to be kept for each preserve.

1.1(5) *Intrusions.* No intrusions, including but not limited to structures, easements, rights of way and other uses which are not related to the purposes and definition of a preserve as specified or as permitted by these rules, shall be allowed to continue or to be established unless recorded in the articles of dedication in the manner prescribed in the Act.

1.2(111B) Structures and facilities.

1.2(1) *Boundary marking.* Preserve boundaries which shall be recorded with the county recorder in the county or counties in which the preserve is located, shall be made clearly evident by placing permanent markers or fences as necessary.

1.2(2) *Access lanes.* Vehicular access lanes will be installed and maintained in preserves only where necessary to implement the use and protection of the areas. They will be located and constructed in accordance with the master plan. Their use will be limited to vehicles authorized in the master plan.

1.2(3) *Firebreaks.* Necessary boundary firebreaks shall be constructed in a buffer area outside the preserve if possible. Firebreaks within a preserve shall be kept to a minimum and shall be constructed only in accordance with the master plan.

1.2(4) *Trails and walks.* Location and form of any trails and walks, other than natural wildlife paths, shall be specified in the master plan. Trails and walks shall be adequate to provide for permitted use of a preserve and to prevent erosion, trampling of vegetation and other deterioration; but otherwise shall be kept to a minimum. Use of surface materials, footbridges and elevated walks is permissible when necessary and provided for in the master plan.

1.2(5) *Other structures and improvements.* Necessary signs, trash receptacles, service areas and minor structures required to house research instruments or hand tools are permitted if provided for in the master plan.

Signs and structures shall conform to such style and standards as the commission and the board may establish.

1.3(111B) Management of adjacent land.

1.3(1) *Buffer areas.* Buffer areas may be established adjacent to all areas, particularly small ones, wherever possible, in order to eliminate the adverse effects of external influences. Buffer areas may be controlled by ownership, dedication, easement or other appropriate means. Provisions for buffer areas shall be included in the master plan, where such areas are possible.

1.3(2) *Service areas.* Service areas may be established to provide access and parking, management facilities and visitor facilities. Provisions for necessary service areas shall be included in the master plan.

1.4(111B) Land management practices.

1.4(1) *Scenic and landscape management.* No measures will be taken to alter the features of the preserve which would destroy the characteristics for which the area is preserved.

1.4(2) *Removal or introduction of objects.* Except as provided in the master plan, there shall be no removal or consumptive use of any material, product or object from a preserve and there shall be no introduction of any material, product or object to a preserve.

1.4(3) *Environmental and biotic management.* The control of management of environmental or biotic factors will be restricted to those techniques in normal use in state parks unless further limited in the appendix of these management rules or designated otherwise in the master plan.

1.5(111B) Management of visitors and use.

1.5(1) *Use of preserves.* Use of preserves shall be allowed only to such extent and in such manner as will not impair the conditions for which the site is preserved. The master plan will define tolerance of the various portions of the area and shall set up controls and restrictions to be placed on access and use. A map of the allowable use, intensity zones, shall be included in the master plan. If the allowable use results in apparent disturbance of the area, the custodian will be empowered to restrict access until the classification can be reevaluated.

The above restrictions are designed to protect the areas and not to excessively restrict proper utilization. Whenever possible, maximum utilization of the preserve should be encouraged commensurate with its continued existence.

1.5(2) *Classes of visitors.* Visitors to a preserve may be divided into three classes: Casual (persons who come individually or in small groups without prior arrangements); Organized (persons who come in larger groups under more definite leadership); and Research (persons who come to carry on serious studies or creative work relating to matters within a preserve).

Provisions shall be made in the master plan and in custodial operations for handling each of these classes of visitors. The custodian shall classify visitors into these groups for purposes of visitor control and management of use of the preserve, and may restrict each class in such manner as is appropriate and necessary for the protection and proper management of the preserve.

1.5(3) *Character of visitor activity—prohibited activities and practices.* The principal visitor activities in a preserve shall be walking and observing. These activities shall be regulated to prevent disturbance of a preserve beyond what it can tolerate without permanent deterioration. Visitors without permits for research or educational activities shall generally be restricted to trails or walks and may be otherwise restricted in movement. Persons wishing to traverse a preserve elsewhere than on trails and walks shall obtain permission from the custodian.

Activities and uses which are unrelated to observation and study are prohibited unless included in the master plan. Prohibited activities include but are not limited to picnicking, camping, games and sports, horseback riding, wheeled vehicular traffic, gathering of plants or plant products, hunting, fishing, trapping, and removal, disturbance, molestation or defacement of minerals, fossils, plants, animals or natural features. There shall be no collecting except with the permission of the board. No dogs or other animals shall be brought into a preserve, leashed or unleashed unless permitted in the master plan.

There shall be no fires, littering or smoking except as permitted by the master plan.

1.5(4) *Access control.* Ingress and egress shall be allowed only at such locations and under such conditions as may be specified in the master plan.

The custodian shall have authority to further limit the number of visitors, the visiting hours, and the movement of visitors within the preserve or to restrict visitor presence and activities in such other manner as may be necessary for the protection and proper management of the preserve.

1.5(5) *Orientation and guidance of visitors.* There may be an interpretive program for the orientation and guidance of visitors. Exhibits, programs and printed materials may be provided in service areas. Guide service and labeled trails and walks may be provided within the preserve. The interpretive program shall conform to the provisions of the master plan and to such additional general or special rules as the board may establish.

1.5(6) *Permits for research or educational activities.* Research or educational activities not otherwise permitted in these rules or in the master plan may be authorized by the board if approved by the dedicator.

Each individual who wishes to engage in such activity must obtain a permit from the board in writing.

1.6(111B) Management research. In addition to the systematic accumulation of descriptive and management information in the master plan and to other routine or casual accumulation of such information, there shall be continuing studies of the general problems of managing nature preserves and the particular problems of each preserve in such manner as the board may determine.

1.7(111B) Plans and records.

1.7(1) *Master plan.* Responsibility for preparation, revision and adoption of the master plan for each preserve shall rest with the board. However, the custodian and other interested persons may participate in the formulation of master plans. Except for deviation from these rules, the master plan for each preserve and revisions thereto shall take effect upon approval by the board. A deviation from these rules shall take effect only as provided in 1.2(111B).

The master plan shall consist of text and maps. The amount of detail may vary according to circumstances. The form and content shall be as the board may establish. An up-to-date copy of the master plan shall be held by the custodian, the dedicator, the board and the commission.

1.7(2) *Record.* A record shall be kept in triplicate for each preserve. One copy shall be held by the custodian, one by the commission and one by the board. These copies shall be open to public inspection.

TREASURER OF STATE

[Rules relating to Motor Fuel Tax transferred to Revenue Department]

WATCHMAKING EXAMINERS

CHAPTER 1
GENERAL PROVISIONS

1.1(120) Examination time limit. All applicants must complete the practical examination within ten hours.

1.2(120) Passing grades. A passing grade in the examination for certificate of registration shall be an average of seventy-five percent, in each subject.

1.3(120) Retake requirements. Persons failing in the examination shall be required to take an examination in all subjects in which their grades were less than seventy-five percent, and upon receiving a passing grade in said subjects and a passing grade in the examination, a certificate of registration may be issued.

1.4(120) Examination grades—mailed out. Examination grades will not be given to applicant on the day of examination. All grades are determined by the board during meetings at which a quorum is present. The applicant shall be notified by mail.

1.5(120) Applicant failing—may be apprenticed. An applicant, failing to pass the required examination, may be apprenticed to a registered watchmaker, and issued a certificate as such. The applicant must, however, again appear for examination within six months.

1.6(120) Reserved for future use.

1.7(120) Repair records required. Every registered and apprentice watchmaker shall keep a repair record of all repairs made by him, for at least one year thereafter. This record shall set out the number for each respective repair, the date such repairs were made, what repairs were made, the price charged for such repair, and the name and address of the owner of each such repaired timepiece. The number of each repair job shall be marked on the inside of the back of the case.

1.8(120) Unethical conduct—defined. Unethical conduct is defined as follows:

1. It shall include and mean any conduct of a character which is likely to mislead, deceive or defraud the public.
2. The loaning of a certificate of registration to any person.
3. The failure to display the certificate of registration conspicuously at all times, as required by statute.
4. The representation that a watch has been cleaned, although its major parts, train wheels and mainspring, have not been disassembled and the cap jewels removed and all parts thereof properly cleaned, with the exception of watches cleaned by the ultra-sonic method.
5. Performance of any work upon a timepiece in an unworkmanlike or unskilled manner.
6. Representation that certain services or parts are necessary, or have been or will be used in the repair of a timepiece, when such parts or services are not necessary, and have not been used in such repairs.
7. Employment of any unregistered watchmaker to perform any watchmaking or repairs on timepieces.

1.9(120) No certificate of registration will be revoked while the holder thereof is an active member of the military or naval forces of the United States or engaged as a civilian in the service of the federal government for national defense work during a period of national emergency or limited national emergency, provided such holder is not, during said time, engaged in the practice of watchmaking in this state. Upon the return of the holder to the practice of watchmaking, his certificate may be renewed upon payment of the renewal fee of the then current year.

1.10(120) The standards of workmanship and skill.

1.10(1) Practical demonstration of applicant's skill in the manipulation of watchmaker's tools. Time limit ten hours.

Subject A. Applicant furnishes a pocket watch which will meet the following requirements: Twelve or sixteen size, 15 or more jewels, double roller and rivet-type staff. He is required to fit a factory staff and completely overhaul, repair and reassemble.

Subject B. Applicant given a bracelet size watch without a stem. Required to completely make and fit a stem.

Subject C. Applicant will be furnished the measurements of a balance staff and he is required to make a staff to measurements.

Bench, lathe and attachments, staking tool and cleaning machine are furnished. Applicants are asked to bring their own small tools, poising tool, calipers, tweezers, gravers, micrometer, screw drivers, polishing slips and steel for making staff and stem. This request is in the interest of the applicant, as we desire that each applicant work under the least possible handicap.

1.10(2) Examination of theoretical knowledge of watch construction, repair and adjustment. Time limit five hours.

Subject A. Written examination, 50 questions.

Requirements for passing: This examination, in effect, constitutes the definition of standards required by statute. Every individual, to receive a certificate of registration, legally empowering or licensing him to practice this profession, must have the ability to pass the above examination with a grade of at least 75 percent, in each part of the examination.

[Filed prior to July 4, 1952;
amended March 2, 1971]

INDEXER'S PREFATORY NOTE

The purpose of this index is to provide an entry into the Iowa Departmental Rules. In general, references are to chapter numbers which correspond to rule numbers of the respective departments.

A uniform system of numbering for the Iowa Departmental Rules has been suggested, and all departments, except the Revenue Department, have adopted it as of this printing.

Every attempt has been made to list all relevant subject matter under the department headings used in this index. The researcher should be cautioned that it may be appropriate to look under more than one main heading in some situations.

SCOTT CLEMENS
