d. All dishes, silverware and cooking utensils shall be stored in a closed cabinet.

e. All appliances, work and serving areas shall be kept clean.

f. The food service area shall be located so it will not be used as a passageway by residents or nonfood service staff.

g. The food preparation area shall not be used for serving meals to residents, staff or food service personnel.

h. Washing, ironing, sorting of either clean or dirty laundry and folding of laundry shall not be done in the food service area.

i. Poisonous compounds shall not be kept in food storage or preparation areas.

58.11(135C) Orientation programs. Each boarding home shall comply with the provisions relating to orientation programs as stated in 56.10(135C).

58.12(135C) Resident activities.

58.12(1) The resident shall be encouraged and assisted in continuing normal activities within his limitations and in accord with his interest.

58.12(2) The facility shall have a staff member to direct the activities.

58.12(3) A staff member shall utilize community service groups, volunteer groups and social and recreational opportunities in planning for resident activities.

58.12(4) Consultation services available from the department should be utilized.

58.12(5) All residents shall be encouraged to participate in the activity programs of the facility but no resident shall be forced to participate.

58.12(6) A variety of activities shall be provided to satisfy the needs and interests of the residents.

a. Arts and crafts shall be included in the activity program.

b. A recreational social program shall be considered as an important aspect of the activity program.

58.12(7) Hobbies or special interests which the resident has shall be encouraged.

58.12(8) Monthly program calendars should be prepared in advance and posted.

58.12(9) *Supplies.*

a. The health care facility shall make available a variety of supplies and equipment of the nature calculated to fit the needs of the residents.

b. Supplies and equipment shall include books, magazines, tables for card playing, daily newspapers, radio, television, etc.

c. Storage shall be provided for recreational equipment and supplies.

58.13(135C) Care review committee. Each boarding home shall comply with the provisions relating to care review committee as stated in 56.11(135C).

58.14(135C) Safety. Each boarding home shall comply with the provisions relating to safety as stated in 56.12(135C).

58.15(135C) Buildings, furnishings, equipment and supplies. Each boarding home shall comply with the provisions relating to buildings, furnishings, equipment and supplies as stated in 56.13(135C). In addition, each boarding home shall comply with the following:

58.15(1) *Furnishings and equipment.*

a. Night lights shall be provided in corridors, at stairways, bathrooms, toilets, attendant's stations and resident's bedroom.

b. Bedrooms shall not open directly into the food preparation area. Neither shall they be located in such a manner that it is necessary to pass through the kitchen to reach them.

c. Bedrooms shall open directly into a corridor or common living area. Bedrooms shall not be used as a thoroughfare.

d. Bath and toilet facilities.

(1) Provision shall be made for bars to hold individual towel and wash cloths.

(2) All lavatories shall have paper towel dispensers and an available supply of soap.

(3) Minimum numbers of toilet and bath facilities shall be one lavatory, one toilet for each ten residents and one tub or shower for each 15 residents or fraction thereof.

(4) There shall be a minimum of one bathroom with tub or shower, toilet stool and lavatory on each floor in multistory buildings. Separate toilets for the sexes shall be provided.

(5) Grab bars shall be provided at all toilet stools, tubs and showers where the resident is aged or infirm. Grab bars, accessories and anchorage shall have sufficient strength to sustain a dead weight of 250 pounds for five minutes.

(6) Toilet and bath facilities shall have an aggregate window area of at least four square feet. Facilities having a system of forced air ventilation are exempt from this regulation providing there is a complete air change every seven minutes.

(7) Hot water to resident lavatories, baths and showers shall not be more than 110°F.

e. Dining and living rooms. Every facility shall have a dining room and a living room accessible to all residents. Each of these rooms shall provide accommodation for the seating of all residents at one time.

58.15(2) Reserved for future use.

58.16(135C) Maintenance, housekeeping and sanitation. Each boarding home shall comply with the provisions relating to maintenance, housekeeping and sanitation as stated in 56.14(135C). In addition, each boarding home shall comply with the following:

58.16(1) *Janitor closet.*

a. Facilities shall be provided for storage of cleaning equipment, supplies and utensils.

b. Mops, scrub pails and other cleaning equipment used in the resident areas shall not be stored or used in the dietary area.

c. Water for filling scrub pails and drains for emptying scrub pails shall be available in the janitor's closet.

d. A janitor's sink shall be available for cleaning janitorial equipment and dumping waste water.

58.16(2) Reserved for future use.

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 59
CUSTODIAL HOME

59.1(135C) Definitions. See rule 56.1(135C).

59.2(135C) Licensing. Each custodial home shall comply with the provisions relating to licensing as stated in 56.2(135C). In addition, each custodial home shall comply with the following:

59.2(1) *Licenses for distinct parts.*

a. Separate licenses may be issued for distinct parts of a custodial home which are clearly identifiable, containing contiguous rooms in a separate wing or building or on a separate floor of the facility and which provide care and services of separate categories.

b. The following requirements shall be met for a separate licensing of a distinct part:

(1) Shall serve only residents who require the category of care and services immediately available to them within that part.

(2) The distinct part shall meet all the standards and rules pertaining to the category for which a license is being sought.

(3) A distinct part must be operationally and financially feasible.

(4) A separate staff with qualifications appropriate to the care and services being rendered are regularly assigned and working in the distinct part under responsible management.

(5) Separately licensed distinct parts may have certain services such as management, building maintenance, laundry and dietary in common with each other.

59.2(2) *Classification within categories.* Special variations and considerations may be granted a custodial home which is operated wholly or utilizes a distinct part of the facility for people who have special problems such as retardation, physical disabilities, are children, have a physical or mental dependency or a condition in common which can best be treated in a specialized environment under an approved program of care commensurate with the needs of the residents of the facility.

a. Such a facility or distinct part thereof shall be provided with the kind of equipment, numbers of qualified staff and operated in such fashion as to meet with the approval of the department.

b. On approval of the department, the state fire marshal and the department of social services, other variations from the established rules and standards for a licensed health care facility of that category may be made as is necessary to successfully implement the specialized program of care providing that it does not endanger the health, safety or welfare of any resident and that alternate means to effect the same degree of protection shall be used when such variances are permitted.

c. Day care services for children and adults and types of related community medical, nursing and residential services compatible with the licensed facility's program may be offered as special services in a health care facility if its programs meet with the approval of the department and such additional equipment, space, service facilities and staff as are provided for its implementation.

59.3(135C) Administration. Each custodial home shall comply with the provisions relating to administration as stated in 56.3(135C).

59.3(1) *The licensee shall:*

a. Appoint an administrator to discharge its responsibilities; his authority and duties shall be defined in a written statement endorsed by the licensee;

b. Have policies for the operation of the facility which shall be available for review;

c. Be responsible for the selection and direction of competent personnel to provide services for the resident care program;

d. Be required to maintain financial records;

e. The custodial home payroll records shall be made available for departmental review as needed.

59.3(2) *General policies.*

a. The charge person shall be capable of carrying out administrative duties and of assuming administrative responsibilities.

b. There shall be written policies for resident care programs and services as outlined in these rules.

c. There shall be written personnel policies to include job summary, hours of work, salary scale, responsibilities, vacation, sick leave and qualifications.

d. Health examinations for all personnel shall be done at the commencement of employment and at least yearly and shall be sufficient in detail to determine freedom from clinical evidence of any disease in a communicable form.

59.4(135C) Personnel.

59.4(1) *General qualifications.*

a. Persons employed in a custodial home shall be qualified through training as an aide or attendant or through experience to provide services and supervision required to meet the needs of the residents.

b. All personnel employed in a custodial home shall be no less than 16 years of age nor more than 70 years of age. Exception to the above regulation may be made on an individual basis on a written request to the department.

c. There shall be an on-going in-service training program for all personnel.

d. In facilities licensed for 16 beds or more, persons in charge of meal planning and food preparation shall have had training approved by the department.

e. Recognized retarded individuals may be employed for specific duties but only after an individual request has been made to the department and approval given.

f. Return to work of personnel having a contagious or infectious disease may be made subject to a physician's approval.

59.4(2) *Staffing.*

a. The department shall establish on an individual facility basis the numbers and qualifications of the staff required in the facility using as its criteria the services being offered and the needs of the residents.

b. Persons carried on the resident census shall not perform tasks which would replace paid employees to fulfill staffing requirements. Work programs for residents shall be done only in accor-

dance with physician's orders. Types of tasks given residents will be subject to departmental approval.

59.5(135C) Admission, transfer and discharge. Each custodial home shall comply with the provisions relating to admission, transfer and discharge as stated in 56.4(135C). In addition, each custodial home shall comply with the following:

59.5(1) *General admission policies.*

a. No resident shall be admitted or retained in a custodial home who is in need of nursing care.

b. The resident's record shall be complied with as set forth in these rules.

59.5(2) Reserved for future use.

59.6(135C) Medical services. Each custodial home shall comply with provisions relating to medical services stated in 56.5(135C). In addition, each custodial home shall comply with the following:

59.6(1) Each resident shall be admitted to a custodial home on a written order by his personal physician certifying that the individual being admitted requires only personal assistance with daily living and does not require nursing care.

59.6(2) Orders given by a physician for the treatment or medication of any resident shall be in writing.

59.6(3) Each resident shall be visited by or shall visit his physician at least once each year. This visit shall be recorded on the resident's record.

59.6(4) The facility shall make provisions for contacting the attending physician on indication of illness of resident.

59.7(135C) Records. Each custodial home shall comply with provisions relating to records stated in 56.6(135C). In addition, each custodial home shall comply with the following.

59.7(1) *Personnel.*

a. An employment record shall be kept for each employee consisting of the following information: Name and address of employee, social security number of employee, date of birth, date of employment, experience and education, names and addresses of three references, position in the facility, date of discharge or resignation, reason for discharge or resignation.

b. A record of the employee's annual physical examination shall be kept in the facility and shall be available for review.

59.7(2) *Resident records.* The administrator shall keep a permanent record of all residents admitted to the custodial home. The record shall include:

a. Physical examination and medical history;

b. Certification by the physician that the resident does not require nursing care and requires only custodial care services;

c. Medication;

d. Room assignment and disposition of valuables;

e. Unusual incidents and accidents;

f. Change of condition;

g. Upon discharge or referral, instructions given to resident or responsible agent and list of medications.

59.7(3) *Medication record.*

a. The medication record shall comply with these rules.

b. The Schedule II drug medication records shall be kept in accordance with state and federal laws.

59.8(135C) Resident care program and other services. Each custodial home shall comply with provisions relating to resident care program and other services stated in 56.7(135C). In addition, each custodial home shall comply with the following:

59.8(1) Reserved for future use.

59.8(2) *Resident care and personal services.*

a. Additional services shall be provided the resident on a temporary basis for short illnesses and minor ailments when the resident's physician so directs. A resident requiring bed care or nursing services for more than 72 hours shall be transferred to a facility licensed to provide nursing care.

b. Residents in the facility shall be required to bathe at least once a week.

c. Medications ordered by the physician shall be administered by the personnel employed to supervise resident's care.

d. Residents shall not share a bedroom with a family member or employees of the owner or operator.

59.8(3) *Resident privileges.*

a. Physically and mentally able residents shall be permitted to leave the facility and grounds at reasonable times unless there are justifiable reasons established for refusing such permission.

b. Living room and recreational areas shall be freely accessible to the residents at all reasonable times.

59.9(135C) Drugs. Each custodial home shall comply with the provisions relating to drugs as stated in 56.8(135C). In addition, each custodial home shall comply with the following:

59.9(1) *Drug storage.*

a. The drug cabinet shall have a work counter. Both the counter and cabinet shall be well lighted.

b. Running water shall be in close proximity to the medicine cabinet.

c. Schedule II drugs, as defined by chapter 204 of the Code, shall be kept in a locked box within the medication cabinet.

d. Bulk supplies of prescription drugs shall only be kept in a licensed pharmacy.

e. Inspection of drug storage condition shall be made by the administrator and a registered pharmacist not less than once every three months. The inspection shall be verified by a report signed by the administrator and the pharmacist and filed with the administrator. The report shall include, but not be limited to, certifying absence of the following: Expired drugs, deteriorated drugs, improper labeling, drugs for which there is no current physician's order, drugs improperly stored.

59.9(2) *Administration.*

a. A designated individual shall be responsible for the administration of all medications as prescribed by the physician.

b. The individual charged with the responsibility of administering medication shall have some knowledge of the purpose of the drug, its dangers and contraindications.

c. The person assigned the responsibility of medication administration must complete the procedure by personally preparing the dose and observing the actual act of swallowing the oral medication.

d. A written record of medications administered shall be made.

e. Records shall be kept of all Schedule II (ch. 204 of the Code) drugs received and dispensed.

59.9(3) *Other drug safeguards.*

a. Unused prescription drugs prescribed for residents who have deceased shall be destroyed by the person responsible for administration of medications. A witness shall be present and notation made in the resident's record regarding the disposition of the drugs. The drugs may also be returned to the dispensing pharmacist for destruction and a notation made in the record to that effect.

b. Instructions shall be requested of the Iowa board of pharmacy examiners concerning disposal of unused Schedule II drugs prescribed for residents who have died and for whom the Schedule II drug was discontinued.

c. There shall be a formal routine for the proper disposal of discontinued medications within a reasonable but specified time. These medications shall not be retained with the resident's current medications. Discontinued drugs shall be destroyed by a responsible person with a witness and notation made to that effect or returned to the pharmacist for destruction. Schedule II drugs shall be disposed of in accordance with the provisions of the Iowa board of pharmacy examiners.

d. All medication orders which do not specifically indicate the number of doses to be administered or the length of time the drug is to be administered shall be stopped automatically after a given time period. The automatic stop order may vary for different types of drugs. The personal physician of the resident, in conjunction with the pharmacist, shall institute these policies and provide procedures for review and enforcement.

e. No resident shall be allowed to keep in his possession any medications unless the attending physician has certified in writing on the resident's medical record that the resident is mentally and physically capable of doing so.

f. No medications or prescription drugs shall be administered to a resident without a written order signed by the attending physician.

g. No medicines prescribed for one resident may be administered to or allowed in the possession of another resident.

h. Injectable medications shall not be given in a custodial home, except by a qualified nurse in the event of a short illness of a resident.

59.10(135C) Food service. Each custodial home shall comply with the provisions relating to food service as stated in 56.9(135C). In addition, each custodial home shall comply with the following:

59.10(1) *Organization of food service department.*

a. A trained cook manager or a person who is in training to meet this requirement shall be employed.

b. Food service personnel shall be on duty for a 12-hour span extending from the preparation of breakfast through supper.

c. There shall be written policies and procedures which are applicable to food service.

d. There shall be written job descriptions covering each type of job in the food service department. These job descriptions shall be posted or kept in a notebook which is available for use in the food service area.

59.10(2) *Nutrition and meal service.*

a. Special nourishments shall be available when ordered by a physician.

b. It is recommended that personnel responsible for food services should receive instructions through available programs from various sources including the department.

c. There shall not be more than a 14-hour span between the evening meal and breakfast.

59.10(3) *Menus, storage, preparation and service.*

a. Menus shall be written at least one week in advance. Any substitution from the planned menu shall be recorded on the menu.

b. Menus shall include a variety of foods prepared in various ways. The same menu shall not be repeated on the same day of the following week.

c. Records of menus as served and amended shall be filed and maintained for 30 days and shall be available for review by departmental personnel.

d. A file of tested recipes adjusted to the number of people to be fed in the facility shall be

maintained. Methods of food preparation used shall conserve nutritive value, flavor and appearance.

e. Supplies of staple foods for a minimum of a one-week period and of perishable foods for a minimum of a two-day period shall be maintained on the premises. Minimum food portion requirements for a low cost plan shall conform to the amounts listed in "Family Food Budgeting for Good Meals and Good Nutrition, No. 94, Revised 1971, 'Table 2 Basic Low Cost Family Food Plan', U.S. Department of Agriculture".

f. Records of foods purchased shall be retained for three months and shall be made available for review by the department when there is a need to know.

g. Ice shall be stored and handled in such manner as to prevent contamination. Ice scoops should be sanitized daily and kept in a clean container.

59.10(4) *Sanitation.*

a. Hairnets or coverings (other than spray net) shall be worn by all food service personnel.

b. Poisonous compounds shall not be kept in food storage or food preparation areas.

c. Washing and sanitizing of dishes and utensils shall follow good sanitation procedure and practice.

d. A mechanical dishwasher or a three-compartment sink is required.

e. Directions for the dishwashing procedure shall be posted and available to all kitchen personnel. The proper procedure shall be utilized for the welfare of the residents and employees.

f. A dishwashing machine must provide a wash temperature of 140° F. and a rinse temperature of 180° F. The machine shall be provided with temperature gauges.

g. All dishes, silverware and cooking utensils shall be stored above the floor in a clean, dry place protected from flies, dust and other contaminants.

h. There shall be effective procedures established for cleaning all work and serving areas. A schedule for duties to be performed daily shall be posted in each food area.

i. The food service area shall be located so it will not be used as a passageway by residents or nonfood service staff.

j. Residents shall not be allowed in the food preparation area. The food preparation area shall not be used for serving meals to either residents, staff or food service personnel.

k. Washing, ironing, sorting of either clean or dirty laundry and folding of laundry shall not be done in the food service area; neither shall dirty linen be carried through this area unless it is in a sealed, leakproof container.

59.11(135C) Orientation programs. Each custodial home shall comply with the provisions relating to orientation programs as stated in 56.10(135C).

59.12(135C) Resident activities program.

59.12(1) Each custodial home shall have an activity program for the group and for the individual resident.

59.12(2) The residents shall be encouraged and assisted in continuing normal activities within limitations and in accord with their interests.

59.12(3) The facility shall designate a staff member to direct the activities program.

59.12(4) The staff member shall be qualified through experience or shall have had training in directing group activities.

59.12(5) The staff member shall utilize community service groups, volunteer groups and social recreational opportunities in planning for resident activities.

59.12(6) Consultation services available from the department should be utilized.

59.12(7) All residents shall be encouraged to participate in the activity program of the facility but no resident shall be forced to participate.

59.12(8) Residents shall understand as much as possible the objectives of the program.

59.12(9) A variety of activities shall be provided to satisfy the needs and interests of the residents.

59.12(10) Arts and crafts shall be included in the activity program.

59.12(11) An active social recreational program shall be considered as an important aspect of the activity program.

59.12(12) Monthly program calendars should be prepared in advance.

59.12(13) *Supplies and equipment.*

a. The facility shall make available a variety of supplies and equipment of a nature calculated to fit the needs of the residents.

b. Supplies and equipment shall include books, magazines, tables for card playing, daily newspapers, radio, television and similar materials.

c. Storage shall be provided for recreational equipment and supplies.

59.13(135C) Care review committee. Each custodial home shall comply with the provisions relating to care review committee as stated in 56.11(135C).

59.14(135C) Safety. Each custodial home shall comply with the provisions relating to safety as stated in 56.12(135C). In addition, each custodial home shall comply with the following:

59.14(1) The administrator shall have a written emergency plan to be followed in the event

of fire, tornado, explosion or other emergency. The plan shall be posted and make provision for:

a. Designation of responsibility;

b. The persons to notify;

c. Fire extinguisher locations;

d. Evacuation routes;

e. Procedures for evacuating residents and transportation to a place of safety;

f. Emergency lighting;

g. Plans for evacuation in the event of heating failure;

h. Immediate and succeeding steps of procedures to be followed in different emergencies.

59.14(2) Residents not fully in possession of their faculties and who have been known to wander shall be provided with identification wrist bands or other appropriate means of identification.

59.14(3) *Restraints.*

a. No form of restraint shall be used.

b. Residents shall not be kept behind locked doors.

c. Temporary seclusion of residents shall be used only when necessary to prevent injury to the resident or to others pending transfer to appropriate placement.

d. A dutch door (half door) equipped with a securing device which may be readily opened by personnel shall be considered an appropriate means of temporarily confining a resident in his room.

59.14(4) *Housekeeping.*

a. A procedure shall be established for training housekeeping personnel in safety practices.

b. Sufficient numbers of refuse containers shall be available so that accumulations of trash will not constitute a hazard.

59.15(135C) Building, furnishings and equipment. Each custodial home shall comply with the provisions relating to building, furnishings and equipment as stated in 56.13(135C). In addition, each custodial home shall comply with the following:

59.15(1) The stipulated requirements for lighting as stated shall be in effect:

a. Bath and toilet rooms—20 foot candles;

b. Kitchen—30 foot candles.

c. Attendant's station—20 foot candles;

d. Resident rooms—general—ten foot candles; reading—30-foot candles;

e. Dining room — 30 foot candles;

f. Recreation room—100 foot candles;

g. Corridors—ten foot candles;

h. Stairways—20 foot candles;

i. Exit stairways—five foot candles.

59.15(2) Night lights shall be provided in corridors, at stairways, bathrooms, toilets, attendant's stations and resident's bedrooms furnishing not less than one foot candle throughout the area at all times.

59.15(3) *Family and employee accommodations.* Operator's and employee's children shall not be allowed into the areas where custodial residents are housed or in service areas.

59.15(4) *Dining room.*

a. Provide accommodation for the seating of at least 50 percent of all residents at any one time.

b. The dining room shall be furnished appropriate to the size and function of the facility.

c. Dining tables and chairs shall be provided. Tables should be so constructed that a person seated in a wheelchair can dine comfortably.

59.15(5) *Living room.*

a. The living room shall be furnished appropriate to the size and function of the facility. It shall be maintained for the use of residents and their visitors and may be used for recreational activities.

b. The living room shall be furnished and arranged for multipurpose use, with comfortable, easy chairs; sofas; end tables; reading lights; racks for magazines and books; and other appropriate diversional therapy supplies.

c. Card tables or game tables shall be made available. The tables should be of a height to allow a person seated in a wheelchair to partake in the games or card playing.

d. Chairs of proper height and appropriate to their use shall be provided for seating residents at game tables and card tables.

59.15(6) *Bedrooms.*

a. Each room shall have sufficient mirrors to serve resident's needs.

b. Bedrooms shall open directly into a corridor or common living area. Bedrooms shall not be used as a thoroughfare.

c. The resident bedroom shall not be occupied by a family member or employees of the owner or operator.

d. Clothing shall be hung in closets or wardrobes available in each room.

e. There shall be an approved, electrically operated call system for any nonambulatory custodial resident.

59.15(7) *Bath and toilet facilities.*

a. Minimum numbers of bath facilities shall be one tub or shower for each 15 residents or fraction thereof.

b. Minimum number of toilet facilities shall be one lavatory and one toilet for each ten residents or fraction thereof.

c. There shall be a minimum of one bathroom with tub or shower, toilet stool and lavatory for each floor in multi-story buildings. Separate toilets for the sexes shall be provided.

d. Grab bars shall be provided at all toilet stools, tubs and showers. Grab bars and accessories shall have sufficient strength to sustain a dead weight of 250 pounds for five minutes.

e. Shower stalls shall be large enough to permit showering of residents in wheelchairs or shower chairs which have been manufactured for that purpose.

f. Separate toilet facilities shall be provided for the use of employees and the public.

g. Toilet and bath facilities shall have an aggregate window area of at least four square feet. Facilities having a system of forced air ventilation are exempt from this regulation providing there is a complete air change every seven minutes.

h. Toilet and bathing facilities shall not open directly into food preparation areas.

i. Individual towel and wash cloth bars shall be provided.

j. All lavatories shall have paper towel dispensers and soap.

k. Hot water to resident lavatories, baths and showers shall be no more than 110°F.

59.15(8) *Attendant's station.*

a. An attendant's station shall be provided which is centrally located in the resident area.

b. The station shall contain a minimum of 40 square feet. It shall have a well-lighted desk with the necessary equipment for the keeping of required records and for supplies.

59.16(135C) Maintenance, housekeeping and sanitation. Each custodial home shall comply with the provisions relating to maintenance, housekeeping and sanitation as stated in 56.14(135C). In addition, each custodial home shall comply with the following:

59.16(1) All personnel shall be thoroughly acquainted and trained in their jobs in order to assume the responsibility of their positions.

59.16(2) *Maintenance.*

a. Maintenance personnel shall follow established written procedures.

b. Maintenance personnel shall be provided a work schedule with sufficient detail to enable the worker to meet employer expectations.

c. Maintenance personnel shall be provided with appropriate equipment.

d. Where the repair of a ceiling, wall, floor or any other portion of a building has failed to correct a maintenance problem or structural defect, the renovation of that portion shall be made so that satisfactory compliance is achieved.

59.16(3) *Housekeeping.*

a. Clothing worn by personnel shall be clean and easily washable.

b. Housekeeping personnel shall be provided with appropriate and properly maintained equipment.

c. Bathtubs, shower stalls or lavatories shall not be used for laundering, cleaning utensils and mops for storage purposes.

d. Sufficient and appropriate facilities shall be provided for satisfactory cleaning and for the storage of housekeeping equipment and supplies.

e. All furniture, bedding, linens and appliances shall be cleaned before use by another resident.

f. Kitchen sinks shall not be used for the cleaning of mops, soaking laundry, cleaning or dumping waste water.

59.16(4) *Laundry.*

a. Except for related activities, the laundry room shall be used for no other purpose.

b. The laundry room shall contain no less than 145 square feet of floor space.

59.16(5) *Linen storage.*

a. Facilities shall be provided for the storage of clean linen.

b. If laundry is not processed in the facility, the linen storage area can be used as a receiving and counting area.

59.16(6) *Food and drink.* All Cooking stoves shall be provided with a properly sized exhaust system and hood to eliminate excess heat, moisture and odors from the kitchen.

59.16(7) *Janitor closet.*

a. Facilities shall be provided for storage of cleaning supplies and utensils.

b. Mops, scrub pails and other cleaning equipment used in the resident areas shall not be stored or used in the dietary area.

c. Water for filling scrub pails and drains for emptying scrub pails shall be available in the janitor's closet.

d. A janitor's sink shall be available for cleaning janitorial equipment and dumping waste water.

These rules are intended to implement section 135C.14 of the Code.

CHAPTER 60
BASIC NURSING HOME

60.1(135C) Definitions. See 56.1(135C).

60.2(135C) Licensing. Each basic nursing home shall comply with the provisions relating to licensing as stated in 56.2(135C). In addition, each basic nursing home shall comply with the following:

60.2(1) *Licenses for distinct parts.*

a. Separate licenses may be issued for distinct parts of a nursing home which are clearly identifiable, containing contiguous rooms in a separate wing or building or on a separate floor of the facility and which provide care and services of separate categories.

b. The following requirements shall be met for a separate licensing of a distinct part:

(1) Shall serve only patients who require the category of care and services immediately available to them within that part;

(2) The distinct part shall meet all the standards and rules pertaining to the category for which a license is being sought;

(3) A distinct part must be operationally and financially feasible;

(4) A separate staff with qualifications appropriate to the care and services being rendered are regularly assigned and working in the distinct part under responsible management;

(5) Separately licensed distinct parts may have certain services, e.g., management, building maintenance, laundry and dietary in common with each other.

60.2(2) *Classification within categories.* Special variations and considerations may be granted a health care facility which is operated wholly or utilizes a distinct part of the facility for people who have special problems such as retardation, physical disabilities, are children, have a physical or mental dependency or a condition in common which can best be treated in a specialized environment under an approved program of care commensurate with the needs of the residents or patients of the facility.

a. Such a facility or distinct part thereof shall be provided with the kind of equipment, numbers of qualified staff and operated in such fashion as to meet with the approval of the department.

b. On approval of the department, the state fire marshal, and the department of social services, other variations from the established rules and standards for a licensed health care facility of that category may be made as is necessary to successfully implement the specialized program of care providing that it does not endanger the health, safety or welfare of any resident or patient and that alternate means to effect the same degree of protection shall be used when such variances are permitted.

c. Day care services for children and adults and types of related community medical, nursing and residential services compatible with the licensed facility's program may be offered as special services in a health care facility if its programs meet with the approval of the department and such additional equipment, space, service facilities and staff as are provided for its implementation.

60.3(135C) Administration. Each basic nursing home shall comply with the provisions relating to administration as stated in 56.3(135C). In addition, each nursing home shall comply with the following:

60.3(1) The licensee may be a proprietorship, association, corporation or governmental unit. The licensee shall:

a. Appoint an administrator to discharge its responsibilities. His authority and duties shall be defined in a written statement endorsed by the licensee;

b. Be knowledgeable and comply with the rules and lawful orders and directions of the department concerning the facility;

c. Establish written policies for the operation of the facility which shall be available for review;

d. Establish job descriptions for the administrator and his assistants;

e. Be responsible for the selection and direction of competent personnel to provide services for the patient care program;

f. Be required to maintain financial and statistical records capable of verification by qualified persons. The records shall be kept on the accrual basis for accounting. Income records shall be maintained so as to show the individual charges for patient care and source of payment such as state patient, private patient, Title XVIII or Title XIX of the Social Security Act. All expenses including salaries must be reflected in applicable cost centers which must include but not be limited to administrative; property expense; plant operating expense; dietary expense; laundry and linen expense; housekeeping expense; nursing care expense; recreation expense; and personal purchases for patients;

g. Make the nursing home work record available for departmental review as needed. These records shall clearly reflect the hours of the days worked by all employees of the facility;

h. Notify the department:

(1) Thirty days in advance of the sale of the health care facility;

(2) Thirty days in advance of the closure of the health care facility;

(3) Of a change of administrator;

(4) Thirty days in advance of any contemplated changes in the physical plant, its functional operation or addition or deletion of major services.

60.3(2) *General policies.*

a. Each nursing home shall have some one person in charge, duly licensed as a nursing home administrator or acting in a provisional capacity in accordance with the laws of the state of Iowa and the rules of the Iowa board of examiners for nursing home administrators.

b. A licensed administrator may act as an administrator for more than one facility provided that the equivalent of two full days per week is spent in each facility.

c. A licensed administrator in charge of more than one facility shall employ a full-time individual designated as an assistant administrator for each facility.

d. The licensee may be the licensed nursing home administrator providing he meets the requirements as set forth in these regulations and devotes the required time to administrative duties. Residency in the facility does not in itself meet this requirement.

e. A provisional administrator may be appointed on a temporary basis by the nursing home licensee to assume the administrative responsibilities for a nursing home for a period not to

exceed six months when, through no fault of its own, the home has lost its administrator and has not been able to replace him provided:

(1) The department has been notified prior to the date of the administrator's appointment;

(2) That the board of examiners for nursing home administrators has approved the administrator's appointment and has confirmed such appointment in writing to the department.

f. In the absence of the administrator, a responsible person shall be designated in charge of the facility. The person designated shall:

(1) Be knowledgeable of the operation of the facility;

(2) Have access to records concerned with the operation of the facility;

(3) Be capable of carrying out administrative duties and of assuming administrative responsibilities.

g. There shall be written policies for patient care programs and services as outlined in these rules.

h. There shall be written personnel policies including the hours of work, salary scale, responsibilities, vacation allowance, sick leave, and attendance at educational programs.

i. There shall be a written job description developed for each category of worker. The job description shall include title of job, job summary, age range, qualifications (formal education and experience), skills needed, physical requirements, and responsibilities.

j. Health examinations for all personnel shall be done at the commencement of employment and, thereafter, at least yearly.

k. Health certificates for all employees shall be available for review.

l. Health examinations shall be in sufficient detail to determine freedom from:

(1) Clinical evidence of any disease in a communicable form;

(2) Boils or infected wounds;

(3) Acute or chronic inflammatory condition of respiratory system. A chest X ray or tuberculin skin test is required annually. A positive skin test requires a chest X ray;

(4) Evidence of a carrier state or an intestinal infection. Food handlers and nursing staff specifically shall be required to report disabilities and illnesses, especially boils, infected wounds, rashes, sores, acute respiratory infections and intestinal infections;

(5) The health care facility shall have written procedures to be followed in the event of sudden illnesses among employees and patients;

(6) The health care facility shall have established policies concerning the control, investigation and prevention of infections within the facility.

m. Religious services:

(1) Religious services shall be provided or arranged for the patients who desire to participate;

(2) Assistance to patients for chapel services shall be provided;

(3) Privacy shall be provided when requested for the clergyman's visit with individual patients.

60.4(135C) Personnel.

60.4(1) *General qualifications.*

a. Persons employed in a nursing home shall be qualified through training or through experience to perform the type of work for which they have been employed.

b. The nurse employed to supervise nursing service shall be a qualified nurse as defined in these regulations.

c. All nursing service personnel employed in a nursing home shall be no less than 18 years of age nor more than 70 years of age. Exception to the above regulation may be made on an individual basis upon submitting a written request to the department.

d. Effective July 1, 1973, nurse aides, orderlies or attendants shall be qualified, having completed or being currently enrolled in a nurse aide educational program approved by the department, and which may be provided by the facility.

e. There shall be an on-going in-service educational and training program for all personnel.

f. Persons in charge of meal planning and food preparation shall have had training approved by the department.

g. Recognized retarded individuals may be employed for specific duties but only after an individual request has been made to the department and approval has been given.

60.4(2) *Nursing supervision and staffing in a basic nursing home.*

a. A basic nursing home with a licensed bed capacity of one to 20 beds shall have a qualified nurse on duty a total of 56 hours per week. Nursing hours to be increased 1.12 hours per licensed bed per week for each bed over 20. (Example: A 50-bed nursing home would require 89.60 hours per week.)

b. At least one qualified nurse shall be employed eight hours per day each day of the week and shall be on duty tetween 6:00 a.m. and 7:00 p.m.

c. A qualified nurse's work week shall not exceed 48 hours per week. This person shall not be engaged in other full-time employment.

d. A qualified nurse shall be on call and available for service during those periods when a qualified nurse is not on duty.

e. Where only part-time nurses are employed, one nurse shall be designated director of nursing service. The person so designated shall be the nurse the best qualified and actively pursuing the responsibilities of the position.

f. A qualified nurse shall be employed to relieve the supervising nurses on holidays, vacation, sick leave, days off, absences or emergencies.

Pertinent information for contacting such relief person shall be posted.

g. If the director of nursing service acts in a dual role as an administrator, a qualified nurse must be employed to relieve her when she is performing in her administrative capacity.

h. There shall be at least one person, who shall be capable of rendering nursing service, awake, dressed and on duty at all times.

i. Nursing service for female patients shall be provided by female personnel. Unlicensed male personnel shall not be permitted to give care to female patients at any time unless a female nurse or aide is also in attendance. Consideration shall be shown the individual patient's feelings in this regard.

j. The aide placed in charge during the absence of the qualified nurse shall be at least 19 years of age, shall have had experience in the facility and shall have had special training to carry out her assignments and to take care of emergencies and sudden illnesses.

k. The department shall establish on an individual facility basis the numbers and qualifications of the staff required in the facility using as its criteria the services being offered and the needs of the patients.

l. A basic nursing home with a licensed bed capacity of 30 or more beds shall have at least two attendants on duty 11:00 p.m. to 7:00 a.m. If the attendants on this shift are assigned duties other than nursing service, the duties assigned to them shall not be away from the patient care area.

m. The department may require more qualified nurses on the various shifts commensurate with the needs of the patients. Additional nurse staffing shall be established by the department where distinct parts, multistoried nursing units and atypical situations occur.

n. Persons carried on the patient census performing work shall not be used to replace paid employees in fulfilling staffing requirements. Work programs for patients shall be done only in accordance with physician's orders. Types of tasks given patients will be subject to departmental approval.

60.5(135C) Admission, transfer and discharge. Each basic nursing home shall comply with the provisions relating to admission, transfer and discharge as stated in 56.4(135C). In addition, each basic nursing home shall comply with the following:

60.5(1) *General admission policies.*

a. Patients may be admitted and retained in a licensed nursing care facility which offers greater care and services than are required or needed by the individual.

b. No patient shall be admitted or retained in a nursing home who is in need of medical procedures or nursing care in excess of that which the facility can provide as determined by his physician.

c. No patient shall be admitted or retained in a nursing home who is in need of greater services than the facility is licensed to provide.

d. The admission record shall be complied with as set forth in these rules.

60.5(2) *Restrictions.* A person who is acutely ill or who requires medical services greater than those provided in the facility shall not be admitted or retained in the facility.

60.5(3) *Contracts.* State the type of nursing care and other services to be provided by the facility to the patient.

60.6(135C) Medical services. Each basic nursing home shall comply with the provisions relating to medical services as stated in 56.5(135C). In addition, each basic nursing home shall comply with the following:

60.6(1) Each patient in a nursing home shall be under the medical direction of a physician licensed to practice medicine in Iowa.

60.6(2) A patient shall be admitted to a nursing home only on a written order by the attending physician certifying that the individual being admitted requires no greater degree of nursing care than the facility is capable of providing as indicated by his license.

60.6(3) Each patient shall be permitted free choice of a physician.

60.6(4) On admission to a nursing home the patient's physician will indicate the time of the next routine visit and intervals of successive visits. All visits shall be recorded on the patient's record.

60.6(5) A schedule listing the names and telephone numbers of the physicians shall be posted in each nursing station.

60.6(6) Orders concerning medications and treatments shall be in effect for the specified number of days indicated by the physician. If not specified, the period shall not exceed 30 days. Reorders of medications or treatments shall be written on the physician's record.

60.6(7) Telephone orders shall be taken by the qualified nurse. However, in the absence of the nurse, the person in charge shall receive the order. Orders shall be written into the patient's record and signed by the person receiving the order. Telephone orders shall be submitted to the physician for his signature within 48 hours.

60.6(8) The qualified nurse or charge person in the absence of the nurse shall notify the physician of any accident, injury or change in the patient's condition.

60.6(9) Physicians admitting patients into a nursing home shall be requested to meet the care review committee when it is deemed necessary by the administrator, director of nursing service or the committee members.

60.7(135C) Records. Each basic nursing home shall comply with the provisions relating to records as stated in 56.6(135C). In addition, each basic nursing home shall comply with the following:

60.7(1) *Personnel.*

a. An employment record shall be kept for each employee consisting of the following information: Name and address of employee; social security number of employee; date of birth; date of employment; experience and education; names and addresses of three references; position in the facility; date of discharge or resignation; reason for discharge or resignation.

b. A record of the employee's annual physical examination shall be kept in the facility and available for review.

60.7(2) *Patient clinical records.* There shall be a separate clinical record for each patient admitted to a nursing home with all entries current, dated and signed.

60.7(3) The admission record shall include:

a. Admission diagnosis;

b. Mortician's name, address and telephone number;

c. Physical examination: The record of the physical examination and medical history shall include patient's name, sex and age; medical history; physical examination; diagnosis; statement of chief complaint; estimation of restoration potential; results of tuberculin skin test or chest X-ray and other diagnostic procedures.

d. Physician's orders. The record of the physician's orders shall include:

(1) Certification that the patient requires no greater degree of nursing care than the facility is licensed to provide;

(2) Medication;

(3) Treatments;

(4) Restorative and special medical procedures;

(5) Dietary needs.

e. Progress notes.

(1) Physicians shall enter a progress note at the time of each visit;

(2) Other professionals, i.e., dentists, social workers, physical therapists and others shall enter progress notes on a special form.

f. Laboratory and X-ray reports.

g. Nurses record. The nurses record shall include the following information:

(1) Admitting notes. Time and mode of transportation; room assignment; disposition of valuables; symptoms and complaints; general condition of patient; blood pressure and weight;

(2) Routine notes. Physician's visits; telephone calls to and from the physician; unusual incidents and accidents; change of condition; social interaction;

(3) Discharge and referral. Time and mode of transportation; patient's general condition; instructions given to patient or responsible agent; list of medications; completion of referral form for continuity of care;

(4) Death. Notification of physician, family and disposition of body.

h. Medication record. The medication record shall comply with these rules.

i. Schedule I and II (ch. 204 of the Code) drug records shall be kept in accordance with state and federal laws.

j. Death record.

(1) The death record shall include name, age, sex and race of deceased; date and time of death; physician's name and address; immediate cause of death; name and address of relative or legal representative notified of death; name and address of mortician receiving the body; signature of the physician or mortician;

(2) If the physician does not sign the death record, a copy of the death certificate shall be obtained by the facility as soon as it becomes available and made a part of the patient's medical record retained by the facility.

k. Transfer or referral form.

(1) The transfer or referral form shall include identification data from the admission record; name of transferring institution; name of receiving institution; date of transfer;

(2) Nurses report shall include patient attitudes; behavior; interests; functional abilities (activities of daily living); unusual treatments; nursing care; problems (likes and dislikes); nutrition; current medications (when last given); and condition on transfer;

(3) Physician's report shall include reason for transfer; medications; treatment; diet; activities; significant laboratory and X-ray findings; and diagnosis and prognosis.

l. Incident report.

(1) A printed incident report form shall be used;

(2) The nursing personnel on duty shall prepare and sign the form.

m. Consultation reports. Consultation reports shall indicate services rendered by allied health professionals in the facility or in health centered agencies such as dentists, physical therapists, podiatrists, oculists and others.

60.8(135C) Patient care program and other services. Each basic nursing home shall comply with the provisions relating to resident or patient care program and other services as stated in 56.7(135C). In addition, each basic nursing home shall comply with the following:

60.8(1) An organized program of patient care on a continuous, 24-hour basis commensurate with the needs of the patients shall be established in writing for the facility. The staffing and equipping of the facility shall be adequate to actively implement the program.

60.8(2) A resume of the nursing care program and other services provided in the facility

shall be submitted to the department for review and approval prior to licensure of the facility.

60.8(3) Individual patient care plans based on the nature of the illness or disability, treatment and care prescribed, long and short term goals and other pertinent information shall be developed. These plans shall be in writing, revised as necessary and kept current. They shall be made available to those rendering the services and for review by the department.

60.8(4) Reserved for future use.

60.8(5) Nursing care shall be given by a registered nurse, licensed practical nurse or delegated to other trained, nonprofessional personnel.

60.8(6) The program plan for a basic nursing home shall have the following actively implemented characteristic nursing services under the daily supervision of at least a licensed practical nurse with ancillary coverage on a 24-hour basis sufficient to meet the needs of the patient.

a. Supervised individual care to insure patients against hazard to themselves from others or the environment.

b. A qualified nurse shall be employed eight hours per day each day of the week and shall be on duty scheduled hours between 6:00 a.m. and 7:00 p.m.

c. Personal care or assistance with personal care according to needs of the patient such as bathing, daily hair care, routine shampoo, daily oral hygiene, nail care and shaving.

d. Emphasize activities of daily living and physical exercise in respect to the needs, capabilities and interest of the patient.

e. Bowel and bladder control program to meet individual needs, including care of in-dwelling catheters.

f. Observation and recording of vital signs and blood pressure.

g. Knowledge and skills required in techniques for transfer of patient to bed, to wheelchair, ambulation and similar activities.

h. Knowledge and training as necessary for prevention of skin irritation and treatment of uncomplicated decubitus ulcers.

i. Knowledge and training required for the administration of all medication. Injectable medications shall only be administered by a qualified nurse or physician.

j. Regular diets with modified diets for individual patient's needs, such as, diabetic.

k. Self-care initiated for feeding, grooming, ambulation and toilet activities.

l. Assistance with feeding patients (except tube feedings).

m. Provision of protective restraints as ordered by a physician and in accord with written patient care policies and procedures.

n. Emergency and arranged medical care in accord with written policies and procedures of the facility.

60.8(7) Every basic nursing home shall have a director of nursing service who shall:

a. Carry out the physician's orders, provide nursing services, treatments and procedures.

b. Plan for the nursing needs of the patients.

c. Have available a nursing procedure manual.

d. Promote preventive nursing procedures as appropriate for the patient's care and safety.

e. Provide and utilize the written nursing care plans for each patient.

f. Observe signs and symptoms and report to the physician reactions to treatments including drugs, and changes in patient's physical or emotional condition.

g. Plan in-service program and make provision for training nursing personnel, including aides, as necessary.

h. Plan with the physician, family and public health nursing and other health related agencies and facilities for the nursing care of the patient upon discharge from the nursing home.

i. Designate a responsible person to be in charge during her absence. If this person is not a qualified nurse, he shall be well instructed in his duties and responsibilities.

j. Be responsible for all assignments and work schedules for all nursing personnel and ancillary workers.

k. Be available for on-call service.

60.8(8) A waivered licensed practical nurse will not qualify as a director of nursing service in a facility of more than 20 beds.

60.9(135C) Drugs, storage and handling. Each basic nursing home shall comply with the provisions relating to drugs as stated in 56.8(135C). In addition, each basic nursing home shall comply with the following:

60.9(1) *Drug Storage.*

a. A cabinet with a lock, convenient to nursing service, shall be provided and used for storage of all drugs, solutions and prescriptions.

b. The cabinet shall have a work counter. Both counter and cabinet shall be well lighted, shall be kept clean and shall be well organized.

c. Running water shall be in close proximity to the medicine cupboard.

d. A bathroom shall not be used for drug storage in a nursing home.

e. The drug storage cabinet shall be kept locked.

f. The medicine cabinet key shall be in the possession of the person directly responsible for issuing medications.

g. Schedule II (ch. 204 of the Code) drugs shall be kept in a locked box within the medication cupboard.

h. Bulk supplies of prescription drugs shall not be kept in a nursing home unless a licensed pharmacy is established in the facility under the direct supervision and control of a pharmacist.

i. Inspection of drug storage condition shall be made by the director of nursing services and a registered pharmacist not less than every three months. The inspection shall be verified by a report signed by the nurse and pharmacist and filed with the administrator. The report shall include, but not be limited to, verifying absence of the following: Expired drugs; deteriorated drugs; improper labeling; drugs for which there is no current physician's order; drugs improperly stored.

j. If the facility permits registered nurses to dilute or reconstitute drugs at the nursing station, distinctive supplementary labels shall be available for the purpose. The notation on the label shall be made so as to be indelible.

k. Dilution and reconstitution of drugs and their labeling shall be done by the pharmacist whenever possible. If not possible, the following will be carried out only by the registered nurse:

(1) Adequate directions for dilution or reconstitution and expiration date should accompany the drug;

(2) A distinctive supplementary label shall be affixed to the drug container when diluted or reconstituted by the nurse for other than immediate use and bear the following on the label: Patient's name; dosage and strength per unit/volume; nurse's name; expiration date; date and time of dilution.

60.9(2) *Drug administration.*

a. A qualified nurse or a designated individual shall be responsible for the administration of all medications as prescribed by the physician. The nurse shall be held responsible for all medications.

b. The individual charged with the responsibility of administering medications shall have some knowledge of the purpose of the drug, its dangers and contraindications.

c. The person assigned the responsibility of medication administration must complete the procedure by personally preparing a unit dose, administering and observing the actual act of swallowing the oral medication.

d. A written record of medications administered shall be made.

e. Records shall be kept of all Schedule II drug medications received and dispensed in accordance with the controlled drug and substance Act.

f. Any unusual patient reaction shall be reported by the physician at once.

60.9(3) *Emergency medication kit.* A basic nursing home may provide an emergency medication tray containing prescription drugs. If such emergency medication tray is provided, there shall be compliance with the following requirements:

a. The prescription drugs as well as nonprescription items in the tray must be prescribed or approved by the physicians who provide emergency service to the facility.

b. The medication kit shall be stored in an accessible place.

c. The tray shall contain a list of its contents and quantities of each item on the outside cover and within the box.

d. The tray shall be closed with a seal which may be broken when the drugs are required in an emergency or for inspection.

e. A permanent record shall be kept of each time the tray is utilized.

f. The tray shall be inspected by a pharmacist at least every three months to determine the stability of items in the tray and to replace immediately any items removed and not replaced. A permanent record shall be kept of inspections by a pharmacist.

60.9(4) *Other drug service safeguards include:*

a. Unused prescription drugs prescribed for patients who have died shall be destroyed by the responsible nurse. A witness shall be present and notation made in the patient's record regarding the disposition of the drug. The drugs may also be returned to the dispensing pharmacist for destruction and a notation made to that effect.

b. Instruction shall be requested of the state board of pharmacy examiners concerning the disposal of unused Schedule II (ch. 204 of the Code) drugs prescribed for patients who have died or for whom the Schedule II drug was discontinued.

c. There shall be a formal routine for the proper disposal of discontinued medications within a reasonable but specified time. These medications shall not be retained with the patient's current medications. Discontinued drugs shall be destroyed by the responsible nurse or returned to the pharmacist for destruction. Drugs listed under the Schedule II drugs shall be disposed of in accordance with the provisions of the Iowa board of pharmacy examiners.

d. All medication orders which do not specifically indicate the number of doses to be administered or the length of time the drug is to be administered shall be stopped automatically after a given time period. The automatic stop order may vary for different types of drugs. The pharmacist, in consultation with the physicians serving the home, shall institute policies and provide procedures for review and enforcement of stop orders on drugs.

e. Prescriptions shall be refilled only with the permission of the attending physician.

f. No patient shall be allowed to keep in his possession any medications unless the attending physician has certified in writing on the patient's medical record that the patient is mentally and physically capable of doing so.

g. No medications and prescription drugs shall be administered to a patient without a written order signed by the attending physician.

60.9(5) A pharmacy operating in connection with a nursing home shall comply with the provisions of the pharmacy law requiring registra-

tion of pharmacies, and the regulations of the Iowa state board of pharmacy examiners.

60.9(6) In a nursing home with a pharmacy or drug supply, service shall be under the personal supervision of a pharmacist licensed to practice in the state of Iowa.

60.10(135C) Food service. Each basic nursing home shall comply with the provisions relating to food service as stated in 56.9(135C). In addition, each basic nursing home shall comply with the following:

60.10(1) *Organization of food service department.*

a. A trained cook manager or a person who is in training to meet that requirement shall be employed to supervise the food service activities. This requirement can be met by subscribing to the home study course offered by the health department, or the equivalent thereof.

b. Food service personnel shall be on duty for a 12-hour span extending from the preparation of breakfast through supper in the food service department.

c. Kitchen personnel shall not be assigned to patient care.

d. Nursing service, laundry or housekeeping personnel shall not be assigned to prepare food on the days after they have worked in either nursing service, laundry or housekeeping areas.

e. There shall be written policies and procedures governing the operation of the food service department.

f. There shall be written job descriptions for each type of position in the food service department. The job descriptions shall be posted or kept in a notebook and made available for use in the food service department.

60.10(2) *Nutrition and meal service.*

a. Simple therapeutic diets, if required, shall be ordered by a physician and such diets served as ordered. The established criteria to be used for planning simple therapeutic diets are the department's "Simplified Diet Manual".

b. Special nourishments shall be available when ordered by a physician.

c. Food shall be cut, chopped, ground or blended to meet individual needs.

d. Personnel responsible for simple therapeutic diets for patients with stable conditions should receive instructions on those diets through training programs from the department or training programs which meet the department's approval.

e. If a three or four or five meal plan is in effect, the nutritional value provided shall meet recommended daily allowances. The night feeding shall include foods which are good sources of protein.

f. There shall be no more than a 14-hour span between the evening meal and breakfast.

60.10(3) *Menus, storage, preparation and service.*

a. Menus shall be written at least one week in advance. The current menu shall be located in one or more accessible places in the dietary department for easy use by persons purchasing, preparing and serving food. Any substitutions for the planned menu shall be recorded on the menu.

b. Menus shall include a variety of food prepared in various ways. The same menu shall not be repeated on the same day of the following week.

c. Records of menus as served and amended shall be filed and maintained for 30 days and shall be available for review by departmental personnel.

d. A file of tested recipes adjusted to the number of people fed in the facility shall be maintained. Methods of food preparation used shall conserve nutritive value, flavor and appearance.

e. Supplies of staple foods for a minimum of a one-week period and of perishable foods for a minimum of a two-day period shall be maintained on the premises. *Family Food Budgeting for Good Meals and Good Nutrition*, No. 94, Revised in 1971, "Table 2 Basic Low Cost Family Food Plan", U.S. Department of Agriculture, shall be used as the established criteria for judging satisfactory compliance for minimum food portion requirements for patients.

f. Records of foods purchased shall be retained for three months and shall be made available to the department when there is a need to know.

g. Cooked foods being held for serving later shall be maintained at a temperature of 140°F. or higher.

h. Effective procedures shall be established to provide and maintain food at proper serving temperatures.

i. No perishable food shall be allowed to stand at room temperature any longer than is required for its preparation and serving.

j. Ice shall be stored and handled in such manner as to prevent its contamination. Ice scoops should be sanitized daily and kept in a clean container.

60.10(4) *Sanitation.*

a. Continuous on-the-job training should be encouraged.

b. Hairnets or head coverings (other than spray net) shall be worn by all food service personnel.

c. Containers of poisonous compounds shall not be kept in food storage or preparation areas.

d. Washing and sanitizing of dishes and utensils shall follow approved sanitation procedure and practice.

e. A mechanical dishwasher is required in all facilities of over 15 beds.

f. Directions for the dishwashing procedure shall be posted and available to all kitchen personnel. The proper procedure shall be utilized for the welfare of the patients and employees.

g. A dishwashing machine must provide a wash temperature of 140°F. and a rinse temperature of 180°F. The machine shall be provided with temperature gauges.

h. All dishes, silverware and cooking utensils shall be stored above the floor in a clean, dry place protected from flies, splash, dust and other contaminants.

i. There shall be effective procedures established for cleaning all work and serving areas. A schedule of duties to be performed daily shall be posted in each area.

j. The top surfaces of tables and counters on which food is prepared or served and drain boards for dishes shall be smooth, of tight jointed material and shall be covered with impervious material in good repair and shall be kept clean.

k. The food service area shall not be used as a passageway by patients or nonfood handling staff.

l. Patients shall not be allowed in the food preparation area.

m. The food preparation area shall not be used as a dining area for patients, staff or food service personnel.

n. All food preparation shall be performed in the kitchen. None of the food preparation operations shall be conducted in a room used for living, sleeping or laundry.

o. There shall be no washing, ironing, sorting or folding of laundry in the food service area. Neither shall unbagged, dirty linen be carried through this area unless it is in a sealed, leakproof container.

60.11(135C) Orientation programs. Each basic nursing home shall comply with the provisions relating to orientation programs as stated in 56.10(135C).

60.12(135C) Patient activities program.

60.12(1) Each facility shall have an organized activity program for the group and for individual patients developed in accordance with the age and condition of the patient.

60.12(2) The program shall be provided as an important adjunct for the active treatment program to encourage resumption of normal activities within limitations set by the patient's physician.

60.12(3) The facility shall designate a staff member to direct the activities program.

60.12(4) Requirements for the program shall include an activity director who shall:

a. Be qualified through experience or shall have had training in directing group activities.

b. Make use of all the available community service groups, social and recreational opportunities in planning for patient activities.

c. Be provided with sufficient time to implement an active, meaningful program.

d. Utilize consultation services available from the department.

60.12(5) *Volunteer or auxiliary assistance.*

a. Volunteer or auxiliary groups may assist the total activity program.

b. The director of the activity program shall be responsible for the organization and planning for volunteer or auxiliary groups.

60.12(6) *Participation of patients.*

a. All patients shall be encouraged to participate in the activity program of the facility but no patient shall be forced to participate.

b. Patients shall understand as much as possible the objectives of the program.

60.12(7) *Program.*

a. A variety of activities shall be provided to satisfy the needs and interests of the patients including arts and crafts.

b. An active social recreational program shall be considered as an important aspect of the activity program.

c. Suitable activities shall be provided for the patients unable to leave their rooms.

60.12(8) *Supplies and equipment.*

a. The facility shall make available a variety of supplies and equipment of a nature calculated to fit the needs of the patients.

b. Supplies and equipment shall include books, magazines, tables for card playing, daily newspapers, radio and television.

c. Storage shall be provided for recreational equipment and supplies.

60.12(9) *Records.*

a. Attendance records shall be kept.

b. Monthly program calendars should be prepared in advance.

c. Records shall be made available to the administrator and director of nursing.

60.13(135C) Dental, diagnostic and other services.

60.13(1) *Dental services.*

a. The nursing home personnel shall assist patients to obtain regular and emergency dental services.

b. Transportation arrangements shall be made when necessary for the patient to be transported to the dentist's office.

c. Dental services shall be performed only on the request of the patient, responsible relative or legal representative. The patient's physician shall be advised of the patient's dental problems.

d. All dental reports or progress notes shall be included in the clinical record.

e. Nursing personnel shall assist the patient in carrying out dentist's recommendations.

f. Dentists shall be asked to participate in the in-service program of the facility.

60.13(2) *Diagnostic services.*

a. The nursing home shall make provisions for promptly securing required clinical laboratory, X ray and other diagnostic services.

b. All diagnostic services shall be provided only on the written, signed order of a physician.

c. Agreements shall be made with the local hospital laboratory or independent laboratory to perform specific diagnostic tests when they are required.

d. Transportation arrangements for patients shall be made, when necessary, to and from the source of service.

e. Copies of all diagnostic reports shall be requested by the facility and included in the patient's clinical record.

f. The physician ordering the specific diagnostic service shall be promptly notified of the results.

g. Simple tests such as customarily done by nursing personnel for diabetic patients may be performed in the facility.

60.13(3) *Other services.*

a. The nursing home shall assist patients to obtain such supportive services as requested by the physician.

b. Transportation arrangements shall be made when necessary.

c. Services could include the need for prosthetic devices, glasses, hearing aids and other necessary items.

60.14(135C) Care review committee. Each basic nursing home shall comply with the provisions relating to care review committee as stated in 56.11(135C).

60.15(135C) Safety. Each basic nursing home shall comply with the provisions relating to safety as stated in 56.12(135C). In addition, each basic nursing home shall comply with the following:

60.15(1) *Administration.*

a. The administrator of a health care facility shall be responsible for the provision and maintenance of a safe environment for patients and employees.

b. The administrator shall have a written emergency plan to be followed in the event of fire, tornado, explosion or other emergency. The plan shall be posted and provisions made for: Designation of responsibility; the persons to notify; fire extinguisher locations; evacuation routes; procedures for evacuating helpless patients and transportation to a place of safety; emergency lighting supply; evacuation procedure in the event of failure of the heating plant; immediate and succeeding steps of procedures to be followed in different emergencies.

60.15(2) *Patient care.*

a. There shall be a readily available supply of self-help and ambulation devices such as wheelchairs, walkers and such other devices maintained in good repair that will meet the current needs of all patients.

b. Each ambulatory patient shall be provided with well-fitting shoes to provide support and prevent slipping.

c. Equipment for personal care shall be maintained in a safe and sanitary condition.

d. The expiration date for sterile equipment shall be exhibited on their wrappings.

e. Patients not fully in possession of their faculties and who have been known to wander shall be provided with identification wristbands or other appropriate means of identification.

f. Smoking by employees is prohibited in all rooms, wards and areas adjacent to where oxygen is being administered or in rooms where oxygen is stored.

g. Wherever full or empty tanks of oxygen are being used or stored they shall be securely supported in an upright position.

h. Electric heating pads, blankets or sheets shall be used only on the written order of a physician.

60.15(3) *Restraints.*

a. Restraints shall be used only in an emergency and only upon order by a physician.

b. The physician shall be called to certify the type of restraint or seclusion required in situations of a behavior or emotional problem patient who needs a specific type of restraint.

c. Any order by the physician must be in writing and shall contain the patient's name, date, time of order and reason for restraint.

d. The number of hours the patient is under restraint shall be recorded in the patient's record.

e. The bed patient under restraint shall have his position changed and the restraint removed at two-hour intervals. Notation of this action shall be recorded in the nurse's notes when bed restraints are utilized.

f. All orders for restraints shall be renewed on a weekly basis.

g. No form of restraint shall be used or applied in such manner as to cause injury to the patient.

h. Patients shall not be kept behind locked doors. A dutch door (half door) equipped with a securing device that may be readily opened by personnel shall be considered an appropriate means of temporarily confining a patient in his room.

i. Restraints shall be applied only when necessary to prevent injury to the patient or to others and shall be employed only when alternate measures are not sufficient to accomplish this purpose. A geriatric chair shall be considered an appropriate device to limit movement and prevent wandering.

j. Locked restraints or being restrained behind locked doors shall be permitted only in institutions of fire resistive construction with approved programs for the care of such persons.

k. Methods of restraints shall permit rapid removal of the patient in the event of fire or other emergency.

60.15(4) *Housekeeping.*

a. A definite procedure shall be established for training housekeeping personnel practices.

b. Sufficient numbers of noncombustible refuse containers shall be available so that accumulations of trash will not constitute a hazard.

c. Storage space shall be provided in the facility for the orderly storage of wheelchairs, walkers, bed rails, commodes and similar equipment not in current use. A hallway or corridor shall not be used for storage of such equipment. Bedside utensils shall not be stored in bathrooms or toilet facilities but in utility rooms appropriately supplied with enclosed cabinets.

60.16(135C) Supplies and equipment for nursing services.

60.16(1) The manual, *Hospital and Nursing Home Equipment Planning Guide,* U.S. Department of Health, Education and Welfare, Public Health Service, Division of Hospital and Medical Facilities, Architectural, Engineering and Equipment Branch, Washington, D.C. 20201, shall be used for establishing the types of and quantities of equipment and supplies needed for nursing services in nursing homes.

60.16(2) All nursing care equipment shall be properly sanitized or sterilized before use by another patient.

60.16(3) Sanitary and protective storage shall be provided for all equipment and supplies.

60.16(4) All items that must be sterilized shall be autoclaved unless sterile disposable items are furnished which are promptly disposed of after a single use.

60.16(5) Supplies and equipment for nursing and personal care sufficient in quantities to meet the needs of the patients shall be provided and, as a minimum, would include the following:

Bath basins
Soap containers
Denture cups
Emesis basins
Mouth wash cups
Bedpans
Urinals
Autoclave
Enema equipment
Commodes
Quart graduate measure
Thermometer for measurement of bath water temperature
Mouth thermometer
Rectal thermometer
Basins for sterilizing thermometers
Basins for irrigations
Asepto syringes
Sphygmomanometer
Stethoscope
Ice caps
Hot water bottles
Rectal tubes
Catheters and catheterization equipment
Douche nozzle
Invalid cushions
Wheelchairs
Moisture-proof draw sheets
Moisture-proof pillow covers
Moisture-proof mattress covers
Foot tubs
Metal pitcher
Disinfectant solutions
Alcohol
Lubricating jelly
Skin lotion
Paper towels
Paper handkerchiefs
Insulin syringes
2 cc hypodermic syringes
Hypodermic needles
Tourniquet
Medicine dispensing containers
Bandages
Adhesive
Applicators
Tongue blades
Toilet paper
Rubber gloves or disposable gloves
Suction machine
Portable linen hampers

60.17(135C) Buildings, furnishings, equipment and supplies. Each basic nursing home shall comply with the provisions relating to building, furnishings, equipment and supplies as stated in 56.13(135C). In addition, each basic nursing home shall comply with the following:

60.17(1) *Dining and living rooms.*

a. Provide accommodation for the seating of at least 50 percent of the patients in the dining room at any one time.

b. The dining room shall be furnished appropriate to the size and function of the facility.

c. Patients shall be encouraged to eat in the dining room.

d. The living room shall be furnished appropriate to the size and function of the facility. It shall be maintained for the use of patients and their visitors, and may be used for recreational activities.

e. Card tables or game tables shall be made available in the living room. The tables should be of a height to allow a person seated in a wheelchair to partake in the games or card playing.

f. Chairs of proper height and appropriate to their use shall be provided for seating patients at game tables and card tables.

60.17(2) *Bedrooms.*

a. After January 1, 1975, bedrooms shall contain no more than four beds.

b. Adjustable beds shall be provided for nonambulatory patients.

c. There shall be a chest of drawers for the patient's clothing. In multiple rooms, drawer space shall be assigned each patient sufficient for his needs.

d. Each room shall have sufficient mirrors to serve patients' needs.

e. Sturdy, adjustable overbed tables shall be provided for patients who are unable to eat in the dining room.

f. Bedrooms shall not open directly into the food preparation area. Neither shall they be located in such a manner that it is necessary to pass through the kitchen to reach them.

g. Bedrooms shall open directly into a corridor or common living area. Bedrooms shall not be used as a thoroughfare.

h. Floor coverings shall be easily cleaned and in good repair.

i. Floor coverings shall be installed in a professional manner.

j. Patient bedrooms shall not be occupied by family members or employees of the owner or operator.

k. Design of the room shall be such as to provide space between beds and between the foot of the beds and walls, furniture and other obstructions so as to permit free passage of a wheelchair or patient on crutches.

l. For each bed in every patient's room there shall be one clothes closet or wardrobe not less than 22 inches deep and 20 inches wide.

m. There shall be an approved, electrically operated nurse call system for each patient.

n. Beds shall not be placed with the head of the bed in front of a window or radiator.

o. Beds and other furnishings shall not obstruct free passage to and through doorways.

p. A bed screen shall be available in every patient room where:

(1) The patient is nonambulatory;
(2) The patient desires it;
(3) The relatives or guardian request it;
(4) Nursing services are being rendered.

60.17(3) *Bath and toilet facilities.*

a. Minimum numbers of toilet and bath facilities shall be one lavatory, one toilet and one tub or shower for each 15 patients or fraction thereof.

b. There shall be a minimum of one bathroom with tub or shower, toilet stool and lavatory on each floor of multistory buildings. Separate toilets for the sexes shall be provided.

c. Grab bars shall be provided at all toilet stools, tubs and showers. Grab bars and accessories shall have sufficient strength to sustain a dead weight of 250 pounds for five minutes. Raised toilet seats are highly desirable for patients who are aged and infirm.

d. Shower stalls shall be accessible and large enough to permit showering of patients in wheelchairs or shower chairs. Chairs shall have been manufactured for that purpose.

e. Separate toilet facilities shall be provided for the use of employees and the public.

f. Toilet and bath facilities shall have an aggregate window area of at least four square feet. Facilities having an approved system of forced air ventilation are exempt from this regulation providing there is a complete air change every seven minutes.

g. Toilet and bathing rooms shall not open directly into food preparation areas nor shall be located in such a manner that patients or employees carrying bedpans or urinals must pass through food preparation areas to reach them.

h. Individual towel and washcloth bars shall be provided.

i. All lavatories shall have paper towel dispensers and soap.

j. Hot water to patient lavatories, baths and showers shall not exceed 110°F.

60.17(4) *Nurses station.*

a. A nurses station shall be provided and be centrally located in the patient area.

b. The station shall contain a minimum of 80 square feet. It shall have a well-lighted desk with the necessary equipment for the keeping of required records, supplies, reference books and chart racks.

60.17(5) *Supplies.*

a. A first-aid or emergency kit shall be available in every nursing home.

b. There shall be disposable or one-time use items available appropriate to the size of the facility with provisions made for their proper disposal so as to prevent their reuse.

c. Convenient, safe storage shall be provided for bath and toilet supplies, bathroom scales, mechanical lift and shower chairs.

60.18(135C) Maintenance, housekeeping and sanitation. Each basic nursing home shall comply with the provisions relating to maintenance, housekeeping and sanitation as stated in 56.14(135C). In addition, each basic nursing home shall comply with the following:

60.18(1) Each facility shall establish a written maintenance program to insure the proper care of the building, to provide good housekeeping procedures and insure sanitary practices throughout the facility.

60.18(2) All personnel shall be thoroughly acquainted and trained in their jobs in order to assume the respective responsibilities of their positions.

60.18(3) *Maintenance.*

a. The building shall be maintained in a clean, orderly condition and in good repair.

b. Maintenance personnel shall:

(1) Follow established written procedures;

(2) Be provided with appropriate, well-constructed and properly maintained equipment;

(3) Be provided a work schedule with sufficient detail to enable the worker to meet employer expectations.

c. All plumbing fixtures shall function properly, free of cross-connections, be in good repair and comply with the state plumbing code.

d. When the repair of a ceiling, wall, floor or any other portion of a building has failed to correct a maintenance problem or structural defect, the renovation of that portion shall be made so that satisfactory compliance is achieved.

60.18(4) *Housekeeping.*

a. Any person engaged in housekeeping or laundry services shall not be simultaneously involved in the preparation of food, food service or patient care.

b. Clothing worn by personnel shall be clean and easily washable:

c. Housekeeping personnel shall be provided with well-constructed and properly maintained equipment appropriate to the function for which it is to be used.

d. Bathtubs, shower stalls or lavatories shall not be used for laundering, the cleaning of utensils and mops, or for storage.

e. Each floor shall provide for the cleaning and storage of housekeeping equipment and supplies.

f. All furniture, bedding, linens and appliances shall be cleaned before use by another patient.

g. Kitchen sinks shall not be used for the cleaning of mops, soaking laundry, cleaning bedside utensils, nursing utensils or dumping of waste water.

60.18(5) *Laundry.*

a. If laundry is processed in the home, the following facilities shall be provided:

(1) The laundry room in any facility serving more than 20 patients shall contain no less than 125 square feet of available floor space;

(2) Except for related activities, the laundry room shall not be used for other purposes;

(3) All soiled linens shall be collected in and transported to the laundry in closed, leakproof laundry bags or covered, impermeable containers;

(4) Procedures shall be written for the proper handling of wet, soiled and contaminated linens;

(5) The laundry room should be divided into separate areas, one for sorting and soaking soiled linens and one for sorting and folding clean linens;

(6) The laundry should be located in such a manner that it is not necessary to transport linen through the dietary area.

b. If laundry is not processed in the facility an area shall be provided:

(1) For collecting, storing and processing soiled linen;

(2) For soaking soiled and stained linen;

(3) For receiving, sorting and storage of clean linen;

(4) The receiving area must be separate from the soiled linen area.

60.18(6) *General requirements.*

a. The stipulated requirements for lighting as stated shall be in effect:

(1) Bath and toilet rooms—20 foot candles;

(2) Kitchen—30 foot candles;

(3) Nurses station—20 foot candles;

(4) Patient rooms—general—ten foot candles; reading—30 foot candles;

(5) Dining room—30 foot candles;

(6) Recreation room—100 foot candles;

(7) Corridors—ten foot candles;

(8) Stairways—20 foot candles;

(9) Exit stairways—five foot candles.

b. The total window area in each room shall be at least one-eighth of the superficial floor area.

c. Night lights shall be provided in corridors, at stairways, bathrooms, toilets, nurses stations and patient's bedrooms furnishing not less than one foot candle of light at the floor level at all times.

60.18(7) *Family and employee accommodations.* Operator's and employee's children shall not be allowed into the service areas or where patients are housed.

60.18(8) *Utility room.*

a. There shall be at least one utility room in each facility. In multistory facilities there shall be one utility room on each floor.

b. The utility room shall be divided into clean and soiled work areas, except that separate utility rooms for soiled and clean work may be used.

c. The clean area shall have at least one cupboard for storing clean supplies and shall have equipment for sterilizing supplies.

d. The soiled area shall have a service sink and a two-compartment sink large enough for the cleaning and sanitizing of bedpans, urinals and wash basins.

60.18(9) *Linen storage.*

a. Facilities shall be provided at each nursing unit for the storage of clean linen.

b. A central storage area shall be provided in close proximity to the laundry if adequate storage is not available in nursing units for surpluses.

c. If the laundry is not processed in the facility, the linen storage area can be used as a receiving and counting area.

60.18(10) *Kitchen exhaust systems.* All cooking stoves shall be provided with a properly sized and approved exhaust system and hood to

eliminate excess heat, moisture and odors from the kitchen.

60.18(11) *Garbage and waste disposal.* Special provision shall be made for the disposal of soiled dressings and similar items in a safe, sanitary manner.

60.18(12) *Janitor closet.*

a. Facilities shall be provided for storage of cleaning supplies and utensils.

b. Mops, scrub pails and other cleaning equipment used in the patient areas shall not be stored or used in the dietary area.

c. Water for filling scrub pails and drains for emptying scrub pails shall be available in the janitor's closet.

d. A janitor's sink shall be available for cleaning janitorial equipment and dumping waste water.

These rules are intended to implement section 135C.14 of the Code.

CHAPTER 61
INTERMEDIATE NURSING HOME

61.1(135C) Definitions. See 56.1 (135C).

61.2(135C) Licensing. Each intermediate nursing home shall comply with the provisions relating to licensing as stated in 56.2(135C) and 60.2(135C). An occupational therapy program shall not be required for licensure.

61.3(135C) Administration. Each intermediate nursing home shall comply with the provisions relating to administration as stated in 56.3(135C) and 60.3(135C).

61.4(135C) Personnel. Each intermediate nursing home shall comply with the provisions relating to personnel as stated in 60.4(135C). In addition each intermediate nursing home shall comply with the following:

61.4(1) *Nursing supervision and staffing.*

a. An intermediate nursing home with a licensed bed capacity of one to 75 beds shall have 168 hours of nursing service by qualified nurses per week. Nursing hours to be increased 1.12 hours per licensed bed per week for each bed over 75. (Example: A 100-bed facility would require 196 hours per week.)

b. The nurses' hours shall be scheduled so that there is a qualified nurse on duty 24 hours a day, seven days a week.

c. One registered nurse shall be designated director of nursing service. The director of nursing service shall work at least 40 hours per week and time of duty shall be between 6:00 a.m. and 7:00 p.m.

61.4(2) Reserved for future use.

61.5(135C) Admission, transfer and discharge policies. Each intermediate nursing home shall comply with the provisions relating to admission, transfer and discharge as stated in 56.4(135C) and 60.5(135C).

61.6(135C) Medical services. Each intermediate nursing home shall comply with the provisions relating to medical services as stated in 56.5(135C) and 60.6(135C). In addition each intermediate nursing home shall comply with the following.

61.6(1) Telephone orders shall be taken by the qualified nurse. Orders shall be written into the patient's record and signed by the person receiving the order. Telephone orders shall be submitted to the physician for his signature within 48 hours.

61.6(2) The qualified nurse shall notify the physician of any accident, injury, or change in the patient's condition.

61.7(135C) Records. Each intermediate nursing home shall comply with the provisions relating to records as stated in 56.6(135C) and 60.7(135C).

61.8(135C) Patient care program and other services. Each intermediate nursing home shall comply with the provisions relating to patient care program and other services as stated in 56.7(135C) and 60.8(135C). In addition each intermediate nursing home shall comply with the following:

61.8(1) The program plan for an intermediate nursing home shall have the following actively implemented characteristic nursing services under the daily supervision of a registered nurse with qualified nurse supervision on a 24-hour basis. Facilities not supplying all of the following services will be placed in the category of a health facility offering fewer services to patients.

a. Care and services emphasized by a higher level of nursing direction than a basic nursing home. Observation, nursing skills and supportive services are under the direction of a physician who shall act as a medical consultant for the intermediate nursing home and in an advisory capacity to its care review committee.

b. Nursing services shall be under the direction of a registered nurse.

c. A qualified nurse shall be on duty 24 hours a day, seven days a week.

d. Regular diets with a variety of modified and therapeutic diets for individual patient's needs.

e. Skilled nursing procedures under the supervision of a registered nurse, including oxygen therapy, intravenous infusions. Injectable medications shall be administered by qualified nursing personnel.

f. Knowledge and skill in the utilization of intermittent positive breathing equipment and nebulizers.

g. Knowledge and skill required for tube feedings and maintenance of tracheotomy.

h. Restorative nursing procedures such as gait training and bowel and bladder training in the case of patients who have been determined to have restorative potential and can benefit from the training.

i. Nursing services assist in the motivation of patients in a diversional and activity program.

61.8(2) The director of nursing services shall:

a. Evaluate and regularly re-evaluate the nursing needs of the patient.

b. Develop and implement the written nursing care plan for the patient.

c. Carry out physician's orders, provide nursing service, treatments, and diagnostic and preventive procedures requiring substantial specialized skill.

d. Develop and have available written nursing procedures.

e. Initiate preventive and rehabilitative nursing procedures as appropriate for the patients' care and safety.

f. Teach, supervise and counsel the patient and staff members regarding the nursing care needs and other relative problems of the patient.

61.9(135C) Drug storage and handling. Each intermediate nursing home shall comply with the provisions relating to drug storage and handling as stated in 56.8(135C) and 60.9(135C). In addition each intermediate nursing home shall comply with the following:

61.9(1) *Drug storage.* A kitchen or bathroom shall not be used for drug storage.

61.9(2) *Drug administration.*

a. A qualified nurse shall administer and be held responsible for all medications.

b. The person assigned the responsibility of medication administration must complete the procedure by personally preparing a unit dose, administering, and observing the actual act of swallowing the oral medication.

61.10(135C) Food service department. Each intermediate nursing home shall comply with the provisions relating to food service as stated in 56.9(135C) and 60.10(135C). In addition each intermediate nursing home shall comply with the following:

61.10(1) *Nutrition and meal service.* Therapeutic diets, if required, shall be ordered by a physician and such diets served as ordered. The established criteria to be used for planning therapeutic diets are the department's "Simplified Diet Manual".

61.10(2) Reserved for future use.

61.11(135C) Orientation programs. Each intermediate nursing home shall comply with the provisions relating to orientation programs as stated in 56.10(135C).

61.12(135C) Patient activities program. Each intermediate nursing home shall comply with the provisions relating to patient activities program as stated in 60.12(135C).

61.13(135C) Restorative services.

61.13(1) Restorative services shall be provided to maintain function or to improve the patient's ability to carry out the activities of daily living which, at a minimum, include restorative nursing procedures.

61.13(2) *Physical therapy services.*

a. The administrator shall arrange for a licensed physical therapist to provide physical therapy services for patients when such services are ordered by a physician.

b. Physical therapy shall be rendered only by a physical therapist licensed to practice in the state of Iowa. All personnel assisting with the physical therapy of patients must be under the supervision of a licensed physical therapist.

c. The licensed physical therapist shall:

(1) Evaluate the patient and prepare a physical therapy treatment plan conforming to the medical orders and goals.

(2) Consult with other personnel in the facility who are providing patient care, and with them plan for the integration of a physical therapy treatment program into the comprehensive patient care plan.

(3) Instruct and direct the nursing personnel responsible for administering selected restorative procedures between treatments.

(4) Participate in the facility's in-service education programs.

d. Treatment records in the patient's medical chart shall include:

(1) The physician's prescription for treatment.

(2) An initial evaluation note by the physical therapist.

(3) The physical therapy care plan defining clearly the long-term and short-term objective and outlining the current treatment program.

(4) Notes of the treatments given and changes in the patient's condition.

(5) A complete discharge summary to include recommendations for nursing staff and family.

e. There shall be adequate facilities, space, appropriate equipment and storage areas as are essential to the treatment of referred patients.

61.13(3) *Occupational therapy services.*

a. The administrator shall arrange for an occupational therapist to provide occupational therapy services when such services are ordered by a physician.

b. Occupational therapy shall be given or supervised by a therapist who is registered by the American Occupation Therapy Association.

c. The occupational therapist shall:

(1) Evaluate the patient's physical or psychosocial dysfunction as related to the need for occupational therapy.

(2) Develop the treatment plan and administer or direct treatment in accordance with the physician's prescription and the rehabilitation goals.

(3) Consult with other personnel with the facility who are providing patient care and with them plan for the integration of an occupational therapy treatment program into the comprehensive patient care plan.

61.14(135C) Dental, diagnostic and other services. Each intermediate nursing home shall comply with the provisions relating to dental, diagnostic and other services as stated in 60.13(135C).

61.15(135C) Care review committee. Each intermediate nursing home shall comply with the provisions relating to care review committee as stated in 56.11(135C).

61.16(135C) Safety. Each intermediate nursing home shall comply with the provisions relating to safety as stated in 56.12(135C) and in 60.15(135C).

61.17(135C) Supplies and equipment for nursing services. Each intermediate nursing home shall comply with the provisions relating to supplies and equipment for nursing services as stated in 60.16(135C).

In addition each intermediate nursing home shall comply with the following: Supplies and equipment for nursing and personal care sufficient in quantities to meet the needs of the patients shall be provided and, as a minimum, would include the following:

Oxygen therapy equipment
Subcutaneous equipment
Intravenous equipment
Naso-gastric feeding equipment
Tracheotomy care equipment

61.18(135C) Building, furnishings, equipment and supplies. Each intermediate nursing home shall comply with the provisions relating to building, furnishings, equipment and supplies as stated in 56.13(135C) and in 60.17(135C).

In addition each intermediate nursing home shall comply with the following:

61.18(1) *Bedrooms.* Adjustable hi-lo head and knee-type bed springs shall be provided for nonambulatory patients.

61.18(2) Reserved for future use.

61.19(135C) Maintenance, housekeeping and sanitation. Each intermediate nursing home shall comply with the provisions relating to maintenance, housekeeping and sanitation as stated in 56.14(135C) and in 60.18(135C).

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 62
SKILLED NURSING HOME

62.1(135C) General provisions. The standards and rules governing the accommodation, board, health care services and physical facilities provided in a skilled nursing home shall:

1. Be in accordance with those regulations imposed for certification as skilled nursing homes in the assistance programs as published in the Federal Register and Code of Federal Regulations under Title 45—Public Welfare—Chapter II — Social and Rehabilitation Service, Department of Health, Education and Welfare—effective as of April 12, 1972.

2. Conform with such other state statutes and rules as are required for licensing as an intermediate nursing home.

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 63
EXTENDED CARE FACILITY

63.1(135C) General provisions. The standards and rules governing the accommodation, board, health care services and physical facilities provided in an extended care facility shall:

1. Be in accordance with those regulations imposed for certification as extended care facilities in the Health Insurance for the Aged Program as published in the Federal Register and Code of Federal Regulations under Title 20—Employees' Benefits, Chapter III—Social Security Administration, Department of Health, Education and Welfare—effective as of April 12, 1972.

2. Conform with such other state statutes and rules as are required for licensing as an intermediate nursing home.

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 64
DESIGN AND CONSTRUCTION OF NEW CUSTODIAL HOMES

64.1(135C) General requirements.

64.1(1) Custodial homes shall contain the facilities described herein and shall be built in accordance with the construction requirements outlined. Facilities available through affiliation with an adjacent hospital need not be duplicated.

64.1(2) The rules apply to all new custodial homes, to buildings to be converted to custodial homes, and renovations, additions or functional alterations to existing custodial homes constructed after the effective date of the rules. Conversion of buildings or any of their parts not currently licensed as a custodial home must meet the rules governing construction of new custodial homes.

64.1(3) The facility shall be in a good neighborhood, free from excessive noise, dirt or polluted air, and away from railroads, industrial developments and similar disturbances. There shall be surrounding land for outdoor activities. Off-street parking shall be provided. Acceptance of each custodial facility site is subject to departmental approval.

64.1(4) When construction is contemplated, whether for a new building, addition to existing building, functional alteration to existing building, or conversion of existing building, the project sponsor shall:

a. File feasibility studies with the department for review and approval.

b. Submit preliminary plans to the department for review and approval.

c. Submit final working drawings, plans and specifications to the department for review and approval.

d. Receive written approval from the department before construction, alterations, additions or renovations are started.

64.1(5) Plans and specifications shall be certified by and bear the seal of an engineer or architect licensed to practice in Iowa.

64.1(6) The design shall be in accordance with all applicable statutes and local ordinances except as stated in these rules.

64.1(7) *Variations to standards.* Certain occupancies, conditions in the area, or conditions on the site may make compliance with the rules impractical or impossible. Certain conditions may justify minor modifications of the rules. In specific cases, variations to the rules may be permitted after the following conditions are considered:

a. Design and planning for the specific property offers improved or compensating features providing equivalent desirability and utility.

b. Alternate or special construction methods, techniques, and mechanical equipment, if proposed, offer equivalent durability, utility, safety, structural strength and rigidity, protection from corrosion, decay, and insect attack and quality of workmanship.

c. Variations permitted do not individually or in combination with others endanger the health, safety or welfare of any patient or resident.

d. Variations are limited to the specific project under consideration and are not construed as establishing a precedent for similar acceptance in other cases.

e. Occupancy and function of the building.

64.1(8) *Occupancy restrictions.*

a. Occupancies not under the control of or not necessary to the administration of the custodial facility are prohibited therein with the exception of the residence of the owner or manager.

b. Occupancies within the custodial facility that comply with the rules and conduct commercial business activities with the general public shall have an exit or entrance to the outside for the use of these customers.

64.2(135C) Operational care center.

64.2(1) The number of beds in an operational care center shall not exceed 60 unless additional services are provided. A minimum of four percent of the total bed capacity in the care center shall be in one-bed rooms, and no more than one-third of the total capacity shall be in four-bed rooms.

64.2(2) Each resident room shall meet the following requirements:

a. A maximum room capacity of four residents.

b. A minimum room area, exclusive of closets, toilet rooms, lockers, wardrobes and vestibules of 100 square feet in one-bed rooms and 80 square feet per bed in multibed wards.

c. Multibed rooms shall be designed to permit no more than three beds side by side parallel to the window wall with a three-foot working space between beds, lateral walls and room furnishings.

d. Window sill height shall not exceed 36 inches above the floor.

e. A resident call board shall be provided.

f. In single- and two-bed rooms, the lavatory may be located in a private toilet room.

g. A wardrobe or closet for each resident shall be provided with clear dimensions of one foot ten inches deep by two feet six inches wide with full-length hanging space; a clothes rod and shelf whall be provided.

h. Each resident room with more than one bed shall have suitable curtain tracks, rods or equivalent durable equipment provided to permit enclosing each bed for privacy.

i. Isolation room. At least one single room with private toilet shall be provided for purposes of isolation or incompatibility with other residents in the home. This room will be used for emergency purposes and for short, intermittent periods of time. The bed in this room will not be counted in the total licensed bed capacity of the home.

j. No bedroom shall be located on a floor which is more than 30 inches below the adjacent ground level.

k. Resident baths with one shower stall or one bathtub shall be provided for each 15 beds not individually served. Grab bars shall be provided at all bathing fixtures. Each bathtub or shower enclosure in central bathing facilities shall provide space for the private use of the bathing fixture, for dressing, and for a wheelchair and attendant. Showers in central bathing facilities shall not be less than four feet square, without curbs, and designed to permit use from a wheelchair. Soap dishes in showers and bathrooms shall be recessed. Each bathroom shall have a water closet and handwashing lavatory. Each facility must provide no less than one institutional type, free-standing bathtub accessible from both sides and with a

four-foot passage on one end. When bathtubs or showers are installed in resident room toilets, they shall be equipped with screwdriver stop check valves in the water supply system.

l. A janitor's room on each floor appropriate to the size and needs of the facility shall be provided for storage of housekeeping supplies and equipment including a floor receptor or service sink.

m. No room shall be located more than 120 feet from the operational care center, the clean workroom and the soiled workroom.

64.2(3) The size of each service area will depend on the number and types of beds within the care unit and shall include:

a. An operational care center for charting by employees, doctors' use, communications and storage of supplies and employees' personal effects.

b. An employees' toilet room convenient to the operational care center.

c. A clean workroom for storage and assembly of clean supplies containing a work counter and sink.

d. A soiled workroom containing a clinical sink, work counter and waste and soiled linen receptacles. This soiled workroom shall have a separate entrance and be physically separated from the clean workroom.

e. A medicine room adjacent to the operational care center with sink, refrigerator, locked storage and facilities for preparation of medication.

f. An enclosed storage space for clean linen storage which may be a designated area within the clean workroom.

g. An available stove or hot plate and some type of refrigeration for serving between-meal nourishments.

h. An equipment storage room for walkers, wheelchairs, bed rails and similar bulky equipment shall be provided in each operational wing. The area of this storage room may be used in calculating the total required general storage area.

i. A stretcher and wheelchair parking area or alcove.

64.2(4) Resident toilet rooms shall be provided as follows:

a. A toilet room may be provided directly accessible from each resident room. One toilet room may serve two resident rooms but not more than eight beds. The lavatory may be omitted from the toilet room if one is provided in each resident room. The minimum dimensions of any room containing only a water closet shall be three feet by six feet.

b. Water closets must be easily usable by wheelchair residents. Grab bars shall be provided at all water closets.

c. Doors to toilet rooms shall have a minimum width of two feet ten inches to admit a wheelchair.

64.3(135C) Resident's dining room, activities and recreation areas.

64.3(1) The total areas set aside for resident's dining, activities and recreation purposes shall be not less than 30 square feet per bed for the first 100 beds and 27 square feet per bed for all beds in excess of 100. Additional space shall be provided for outpatients if they participate in a day care program.

64.3(2) Areas appropriate for the activities program shall be provided which shall:

a. Be readily accessible to wheelchair and ambulatory residents.

b. Be of sufficient size to accommodate necessary equipment and permit unobstructed movement about of wheelchairs and residents and personnel responsible for instructing and supervising residents.

c. Have space to store activities program and recreational equipment and supplies within or convenient to the area or areas.

d. A minimum of 25 square feet per bed of outside recreation area shall be provided. Open air porches or roof gardens and decks may be included in meeting this requirement.

64.4(135C) Personal care room.

64.4(1) A personal care room with barber and beauty shop facilities shall be provided.

64.4(2) In facilities of less than 100 beds a multipurpose room with appropriate space and equipment may be utilized for such activities.

64.5(135C) Dietary department.

64.5(1) The construction, equipment and installation of the dietary department shall comply with or exceed the minimum standards set forth in the Public Health Service Publication No. 934 as amended. The equipment shall meet the minimum standards of the National Sanitation Foundation or be of comparable construction and composition. The facilities provided shall be adequate to meet the needs. The department shall include the following facilities unless commercially prepared dietary service, meals or disposables are to be used:

a. A food preparation center provided with a lavatory without a mirror.

b. Food serving facilities for residents and staff.

c. A dishwashing room provided with dishwashing equipment and a lavatory.

d. Potwashing facilities.

e. Refrigerated storage for at least a three-day supply of food.

f. Day storage for at least a three-day supply of food shall be provided if the dry storage room is not adjacent to the food preparation area.

g. A cart storage area.

h. Waste disposal facilities.

i. Can washing facilities.

j. Staff dining facilities.

k. Resident dining facilities.

l. Dietitian's space. Work space in facilities with less than 100 beds—appropriate work space may be provided in the kitchen.

m. A janitor's closet with storage for housekeeping supplies and equipment and floor receptor or service sink.

n. A toilet room with lavatory conveniently accessible for the dietary staff.

o. The outside service entrance to the food service area shall not open directly into the kitchen.

p. The food service area shall not be less than eight square feet per resident bed.

64.5(2) If a commercial service will be used or meals will be provided by an adjacent health care facility, dietary areas and equipment shall be designed to accommodate the requirements for sanitary storage, processing and handling.

64.5(3) Detailed layout plans and specifications of equipment shall be submitted to the department for review and recommendations before the new construction, alterations or the additions to existing kitchen begins.

64.5(4) *Storerooms.*

a. Dry or staple food items shall be stored off the floor in a room not subject to sewage or waste water backflow or contamination by condensation or rodents and vermin.

b. If necessary, mechanical ventilation shall be provided to maintain temperatures and humidity at a level appropriate for the type of food being stored.

c. No less than one linear foot of shelving (20 inches wide) per resident bed shall be provided for food storage.

64.6(135C) Administration department. The administration department shall include the following facilities:

1. A business office.
2. A lobby and information center appropriately sized and equipped.
3. An administrator's office.
4. An admitting and record area.
5. A public and staff toilet room.
6. A housekeeper's space which may be combined with the clean linen room in custodial homes of less than 100 beds.

64.7(135C) Laundry.

64.7(1) The laundry shall include the following facilities:

a. A soiled linen room.

b. A clean linen and mending room.

c. Linen cart storage.

d. Lavatories accessible from the soiled linen, clean linen and processing rooms.

e. A laundry processing room with equipment sufficient to process seven days' needs within the workweek.

f. A janitor's closet or alcove with storage for housekeeping supplies and equipment, floor receptor or service sink.

g. Storage for laundry supplies.

64.7(2) If laundry is processed outside the nursing home, the facilities required in paragraphs "*e*", "*f*" and "*g*" need not be provided.

64.8(135C) General storage area. General storage areas totaling not less than ten square feet per bed shall be provided.

64.9(135C) Locker rooms. Locker rooms with water closets and lavatories for staff and volunteers and rest space for employees shall be provided.

64.10(135C) Engineering service and equipment areas. The following engineering service and equipment areas shall be provided:

1. A boiler room, where required.
2. A maintenance shop. The maintenance shop may be located in an appropriate area other than the engineering service.
3. A storage room for building maintenance supplies which may be part of the maintenance shop in facilities of less than 100 beds.
4. A storage room for housekeeping equipment which may be provided in space available in the janitor's closet.
5. A refuse room for trash storage located conveniently to a service entrance.
6. A yard equipment storage room for yard maintenance equipment and supplies.

64.11(135C) Details and finishes.

64.11(1) Details and finishes shall be designed to provide a high degree of safety for the occupants by minimizing the opportunity for accident. Hazards such as sharp corners shall be avoided.

64.11(2) Minimum corridor widths shall be eight feet except that corridors in adjunct areas not intended for the housing, treatment or use of in-residents may be a minimum of six feet in width. Handrails may project into corridors. Minimum width of doors to all rooms needing access for beds or stretchers shall be three feet ten inches. Doors to resident toilet rooms and other rooms needing access for wheelchairs shall have a minimum width of two feet ten inches.

64.11(3) Such items as drinking fountains, telephone booths and vending machines shall be located so that they do not project into the required width of exit corridors.

64.11(4) Handrails with ends returned to the walls shall be provided on both sides of corridors used by residents in custodial homes with a clear distance of at least one and one-half inches between handrail and wall. Handrails shall be mounted with their top surfaces 31 to 34 inches above the finished floor. Handrails shall be installed on both sides of all outside and inside stairways.

64.11(5) All doors to resident-room toilet rooms and resident-room bathrooms shall be equipped with hardware which will permit access in any emergency.

64.11(6) All doors opening into corridors shall be swing-type except elevator doors. Alcoves and similar spaces which generally do not require doors are excluded from this requirement.

64.11(7) No doors shall swing into the corridor except closet doors.

64.11(8) Thresholds and expansion joint covers, if used, shall be flush with the floor.

64.11(9) Grab bars and accessories in resident toilet, shower and bath rooms shall have sufficient strength and anchorage to sustain a load of 250 pounds for five minutes.

64.11(10) Lavatories intended for use by residents shall be installed to permit wheelchairs to slide under.

64.11(11) Landings shall be provided at the top and the bottom of each stair run. There shall be an approved landing between the top step and the doorway regardless of the direction of the door swing.

64.11(12) Mirrors shall be arranged for convenient use by residents in wheelchairs as well as by residents in a standing position.

64.11(13) Paper towel dispensers shall be provided at all lavatories and sinks used for handwashing.

64.11(14) *Ceiling heights.*

a. Boiler room. Not less than two feet six inches above the main boiler header and connecting piping with adequate headroom under piping for maintenance and access.

b. Corridors, storage rooms, patient's toilet rooms and other minor rooms. Not less than seven feet six inches.

c. All other rooms. Not less than eight feet.

64.11(15) Boiler rooms, food preparation centers and laundries shall be insulated and ventilated to prevent any floor surface above from exceeding a temperature of 85°F.

64.11(16) Noise reduction criteria. Partition, floor and ceiling construction in patient areas shall comply with table 1.

Table 1

	Airborne Sound Transmission Class (STC) a/	Impact Noise Rating (INR) b/	
	Partitions	Floors	Floors
Residents' room to residents' room	45	45	−2
Corridor to residents' room	40	45	+5 c/
Public space to residents' room d/	50	50	+5 c/
Service areas to residents' room e/	55	55	+10 c/

a/ Sound transmission class (STC) shall be determined by tests in accordance with methods set forth in ASTM Standard E 90-66T.

b/ Impact noise rating (INR) shall be determined in accordance with criteria set forth in FHA Pub. No. 750. Tests shall be conducted in accordance with ISO Recommendations No. 140-1960.

c/ Impact noise limitation applicable only when corridor, public space, or service area is over residents' rooms.

d/ Public space includes lobbies, dining rooms, recreation rooms, treatment rooms and similar spaces.

e/ Service areas include kitchens, elevators, elevator machine rooms, laundries, garages, maintenance rooms, boiler and mechanical equipment rooms, and similar spaces of high noise or vibration or both. Mechanical equipment located on the same floor or above residents' rooms, offices, operational care centers, and similar occupied spaces shall be effectively isolated from such spaces with respect to noise and vibration.

NOTE: The requirements set forth in this table assume installation methods which will not appreciably reduce the efficiency of the assembly as tested. Location of electrical receptacles, grilles, duct work, and other mechanical items, and blocking and sealing of partitions at floors and ceilings shall not compromise the sound isolation required.

64.11(17) *Finishes.*

a. Floors generally shall be easily cleanable and shall have the wear resistance appropriate for the location involved. Floors in kitchens and related spaces shall be waterproof and greaseproof. In all areas where floors are subject to wetting, they shall have a nonslip finish.

b. Adjacent dissimilar floor materials shall be flush with each other to provide an unbroken surface.

c. Walls generally shall be washable and in the immediate area of plumbing fixtures the finish shall be moisture-proof. Wall bases in dietary areas shall be free of spaces that can harbor insects.

d. Ceilings generally shall be washable or easily cleanable. This requirement does not apply to boiler rooms, mechanical and building equipment rooms, shops and similar spaces.

e. Ceilings shall be accoustically treated in corridors in resident areas, operational care centers, nourishment stations and dining and recreation areas.

64.11(18) *Windows.*

a. The total window area in each resident room shall be not less than one-eighth of the superficial floor area.

b. Every resident room shall have an outside window that can be opened from the inside without tools.

64.11(19) In a means of egress from a resident room, if an exit is below the outside grade level, the exit access, exit or the exit discharge shall include an approved ramp.

64.11(20) Corridor doors shall be U.L. Class "C" fire doors or solid core wood doors of the flush type not less than one and three quarters inch thick and shall be without undercuts or louvers.

64.11(21) Fire escape and porch railings shall be designed to resist a horizontal thrust of 50 pounds per running foot of railing applied to the top of the railing.

64.12(135C) Elevator requirements.

64.12(1) All custodial homes where either resident beds or in-resident facilities such as diagnostic, recreation, resident dining or therapy rooms are located on other than the first floor, shall have electric or electrohydraulic elevators as follows:

a. At least one hospital-type elevator shall be installed where one to 59 resident beds are located on any floor other than the first. (For purposes of these requirements, the first floor is that floor first reached from the main front entrance.)

b. At least two elevators, one of which shall be hospital-type, shall be installed where 60 to 200 resident beds are located on floors other than the first, or where resident facilities are located on a floor other than those containing the resident beds.

c. At least three elevators, one of which shall be hospital-type, shall be installed where 201 to 350 resident beds are located on floors other than the first, or where in-resident facilities are located on a floor other than those containing the resident beds.

d. For facilities with more than 350 beds, the number of elevators shall be determined from a study of the facility plan and the estimated vertical transportation requirements.

64.12(2) *Cars and platforms.*

a. Elevator cars and platforms shall be constructed of noncombustible material, except that fire-retardant-treated material may be used if all exterior surfaces of the car are covered with metal.

b. Cars of hospital-type elevators shall have inside dimensions that will accommodate a resident's bed and attendants and shall be at least five feet wide by seven feet six inches deep. Car doors shall have a clear opening of not less than three feet eight inches.

c. Cars of all other required elevators shall have a minimum inside floor dimension of not less than five feet. Car doors shall have a clear opening of not less than three feet.

64.12(3) *Leveling.* Elevators shall have automatic leveling of the two-way automatic maintaining type with accuracy within plus or minus one-half inch.

64.12(4) *Operation.* Elevators (except freight elevators) shall be equipped with a two-way special service switch to permit cars to bypass all landing button calls and be dispatched directly to any floor.

64.12(5) *Field inspection and tests.* The contractor shall be required to cause inspections and tests to be made and shall deliver to the owner written certification that the installation meets the requirements set forth in this section.

64.12(6) Elevators shall be installed and maintained in accordance with the American Standard Safety Code for Elevators, Dumbwaiters and Escalators as published by the American Society of Mechanical Engineers, New York, New York.

64.13(135C) Construction.

64.13(1) Rules and standards governing fire safety shall be promulgated by the state fire marshal under section 100.35 for facilities defined by section 135C.1.

64.13(2) Foundations shall rest on natural, solid ground if a satisfactory soil is available at reasonable depths. All footings shall extend to a depth not less than one foot below the estimated frost line.

64.13(3) Interior finish of walls and ceilings of all exit ways, storage rooms and areas of unusual fire hazard shall have a flame spread rating of not more than twenty-five. All other areas shall have a flame spread rating of not more than seventy-five, except that up to ten percent of the aggregate wall and ceiling area may have a finish with a rating up to two-hundred.

64.13(4) Floor finish materials shall have a flame spread rating of not more than seventy-five. Flame spread ratings for each specific product shall be determined by an independent testing laboratory in accordance with ASTM Standard No. E 84-61. Carpeting shall have a smoke density factor of one-hundred or less.

64.13(5) Buildings of two stories or more in height shall be of no less than fire-resistive construction.

64.13(6) *Sprinklers.* Automatic fire extinguishing protection shall be provided throughout all homes except those of fire-resistive construction and except for one-story protected noncombustible construction.

64.13(7) No room in a cellar shall be occupied for living purposes.

64.13(8) No room in a basement shall be occupied for living purposes unless the room meets all the requirements of the department and receives approval of the department as fit for human habitation.

64.13(9) The buildings and all parts thereof shall be of sufficient strength to support all dead, live and lateral loads without exceeding the working stresses permitted for the materials of their construction in generally accepted good engineering practices.

64.14(135C) Mechanical requirements.

64.14(1) Prior to completion of the contract and final acceptance of the facility, the architect or engineer shall obtain from the contractor certification that all mechanical systems have been tested and that the installation and performance of such systems conform to the requirements of the plans and specifications.

64.14(2) Upon completion of the contract, the contractor shall furnish the owner with a bound volume containing operating instructions, manufacturer's catalog number, and description and parts list for each piece of equipment.

64.14(3) Incinerators, if provided, shall be gas, electric, or oil fired and shall be capable of, but need not be limited to, complete destruction of pathological wastes. Design and construction of incinerators and refuse chutes shall be in accordance with Part III of the National Fire Protection Association Standard No. 82. Incinerators shall meet the requirements of Iowa rules relating to air pollution control adopted under the authority of chapter 135B of the Code.

64.14(4) The steam and hot water systems shall comply with the following:

a. Boilers shall have the capacity, based upon the published Steel Boiler Institute's or Institute of Boiler and Radiator Manufacturers' net ratings, to supply the normal requirements of all systems and equipment.

b. Boiler feed pumps, condensate return pumps, fuel oil pumps, and circulating pumps shall be connected and installed to provide standby service when any pump breaks down.

c. Supply and return mains and risers of space heating and process steam systems shall be valved to isolate the various sections of each system. Each piece of equipment shall be valved at the supply and return end.

d. Boilers and smoke breeching, all steam supply piping and high pressure steam return piping, and hot water space heating supply and return piping shall be insulated with insulation having a flame spread rating of twenty-five or less and a smoke-developed rating of fifty or less.

64.14(5) The air conditioning, heating and ventilating systems shall comply with the following:

a. A minimum temperature of 78°F. shall be provided for all occupied areas at winter design conditions.

b. All air-supply and air-exhaust systems shall be mechanically operated. All fans serving exhaust systems shall be located at or near the point of discharge from the building. The ventilation rates shown on the table of pressure relationships and ventilation of certain nursing home areas shall be considered as minimum acceptable rates and shall not be construed as precluding the use of higher ventilation rates if they are required to meet design conditions.

c. Outdoor ventilation air intakes, other than for individual room units, shall be located as far away as practicable but not less than 25 feet from the exhausts from any ventilating systems or combustion equipment. The bottom of outdoor intakes serving central air systems shall be located as high as possible but not less than eight feet above the ground level, or, if installed through the roof, three feet above roof level.

d. The ventilation systems shall be designed and balanced to provide the general pressure relationship to adjacent areas shown in the pressure relationship and ventilation table.

e. Room supply air inlets, recirculation, and exhaust air outlets shall be located not less than three inches above the floor.

f. Corridors shall not be used to supply air to or exhaust air from any room except that exhaust air from corridors may be used to ventilate rooms such as bathrooms, toilet rooms, or janitor's closets which open directly on corridors.

g. Central systems designed for recirculation of air shall be equipped with a minimum of two filter beds. Filter bed No. 1 shall be located upstream of the conditioning equipment and shall have a minimum efficiency of 30 percent. Filter bed No. 2 shall be located downstream of the conditioning equipment and shall have a minimum efficiency of 90 percent. Central systems using 100 percent outdoor air shall be provided with filters rated at 80 percent efficiency. The above filter efficiencies shall be warranted by the manufacturer and shall be based on the National Bureau of Standards Dust Spot Test Method with Atmospheric Dust. Filter frames shall be durable and carefully dimensioned, and shall provide an airtight fit with the enclosing duct work. All joints between filter segments and the enclosing duct work shall be gasketed or sealed to provide a positive seal against air leakage.

h. A manometer shall be installed showing pressure drop across each filter bed serving central air systems.

i. Ducts shall be constructed of iron, steel, aluminum, or other approved metal or materials such as clay or asbestos cement.

j. Duct linings shall meet the erosion test method described in Underwriters' Laboratory, Inc., Pub. No. 181. Duct linings, coverings, vapor barriers and the adhesives used for applying them shall have a flame spread classification of not more than twenty-five and a smoke-developed rating not more than fifty.

k. Cold air ducts shall be insulated wherever necessary to maintain the efficiency of the system or to minimize condensation problems.

l. Exhaust hoods in food preparation centers shall have a minimum exhaust rate of 100 cubic feet per minute per square foot of hood face area. Cleanout openings shall be provided every 20 feet in horizontal exhaust duct systems serving hoods.

m. Boiler rooms shall be provided with sufficient outdoor air to maintain combustion rates of equipment and reasonable temperatures in the room and in adjoining areas.

PRESSURE RELATIONSHIPS AND VENTILATION
OF CERTAIN CUSTODIAL AND NURSING HOME AREAS

Area Designation	Pressure Relationship to Adjacent Areas	All Supply Air From Outdoors	Minimum Air Changes of Outdoor Air Per Hour	Minimum Total Air Changes Per Hour	All Air Exhausted Directly to Outdoors	Recirculated Within Room

\+ = Positive − = Negative 0 = Equal — = Optional
* = Applicable to nursing homes only

64.14(6) All plumbing and other piping systems shall be installed in accordance with the requirements of Public Health Service Publication No. 1038, *Report of Public Health Service Technical Committee on Plumbing Standards,* the state plumbing code and applicable provisions of local ordinances.

64.14(7) Plumbing fixtures shall meet the following requirements:

a. The material used for plumbing fixtures shall be of nonabsorptive acid-resistant material.

b. Lavatories and sinks required in resident care areas shall have the water supply spouts mounted so that its discharge point is a minimum distance of five inches above the flood rim of the fixture.

c. Clinical sinks shall have an integral trap in which the upper portion of a visible trap seal provides a water surface.

d. At least 50 percent of the water closets installed in the home shall be of the 18-inch geriatric type.

64.14(8) Water supply system shall meet the following requirements:

a. Every home shall have a safe and potable water supply. A municipal source of supply shall be considered as meeting this requirement.

b. Plans to develop a private source of supply must be submitted to the department for review and approval.

c. Systems shall be designed to supply water to the fixtures and equipment at a minimum pressure of 15 pounds per square inch during maximum demand periods.

d. Each water service main, branch main, riser and branch to a group of fixtures shall be valved. Stop valves shall be provided at each fixture.

e. Hot, cold and chilled water piping on which condensation may occur shall be insulated. Insulation of cold and chilled water lines shall include an exterior vapor barrier.

f. Backflow preventers (vacuum breakers) shall be installed on hose bibbs and on all fixtures to which hoses or tubing can be attached such as janitor's sinks and bedpan flushing attachments. The preventive device shall be installed at a level above which any permanently attached outlet can be raised.

g. Flush valves installed on plumbing fixtures shall be of a quiet operating type, equipped with silencers.

h. Bedpan flushing devices are recommended in the soiled workroom. If such devices are not provided in each resident toilet room, a hopper or clinic sink with adequate facilities shall be provided in each care unit.

i. Hot water distribution systems shall be arranged to provide hot water at each fixture at all times.

j. Plumbing fixtures which require hot water and which are intended for resident use shall be supplied with water which is controlled to provide a maximum water temperature of 110° F. at the fixture.

k. Plumbing fixtures in resident areas for utility or service used shall be provided with hot water at a minimum temperature of 140° F.

64.14(9) Hot water heaters and tanks shall meet the following requirements:

a. The hot water heating equipment shall have sufficient capacity to supply the water at the temperatures and amounts indicated below:

	Use		
	Clinical	Dietary	Laundry
Gal/hr/bed	6½	4	4½
Temp. °F	110	180	180

b. Storage tanks shall be provided and shall be fabricated of corrosion-resistant metals, unless other approved storage methods are provided.

64.14(10) Drainage systems shall meet the following requirements:

a. Piping over food preparation centers, food serving facilities, food storage areas and other critical areas shall be kept to a minimum and shall not be exposed. Special precautions shall be taken to protect these areas from possible leakage of or condensation from necessary overhead piping systems.

b. Building sewers shall discharge into a community sewerage system. Where such a system is not available, an approved discharge system shall be used.

64.15(135C) Electrical requirements.

64.15(1) The following general electrical requirements shall be complied with:

a. All material including equipment, conductors, controls and signaling devices shall be installed to provide a complete electrical system with the necessary characteristics and capacity to supply the electrical facilities shown in the specifications listed or indicated on the plans.

b. All materials shall be listed as complying with applicable standards of Underwriters' Laboratories, Inc. or other similarly established standards.

64.15(2) The contractor shall be responsible for testing all electrical installations and systems and shall show that the equipment is correctly installed and operated as planned or specified.

64.15(3) Circuit breakers or fusible switches that provide disconnecting means and overcurrent protection for conductors connected to switchboards and distribution panelboards shall be enclosed or guarded to provide a deadfront type of assembly.

a. The main switchboard shall be located in a separate enclosure accessible only to authorized persons.

b. The switchboard shall be convenient for use, readily accessible for maintenance, clear of traffic lanes, and in a dry, ventilated space devoid of corrosive fumes or gases.

c. Overload protective devices shall be suitable for operating properly in the ambient temperature conditions.

64.15(4) Lighting and appliance panelboards shall be provided for the circuits on each floor. This requirement does not apply to emergency system circuits.

64.15(5) All spaces occupied by people, machinery, and equipment within buildings, and the approaches thereto and parking lots shall have electric lighting.

a. Residents' bedrooms shall have general lighting and night lighting.

b. A reading lamp shall be provided for each resident.

c. At least one luminaire for night lighting shall be switched at the entrance to each resident room.

d. Resident's reading lights and other fixed lights not switched at the door shall have switch controls convenient for use at the luminaire.

e. All switches for control of lighting in resident areas shall be of the quiet operating type.

64.15(6) Convenience outlets shall meet the following requirements:

a. Each resident bedroom shall have duplex receptacles as follows: One on each side of the head of each bed (for parallel adjacent beds, only one receptacle is required between the beds); receptacles for luminaires, television, and motorized beds, if used; and one receptacle on another wall.

b. Single receptacles for equipment such as floor cleaning machines shall be installed approximately 50 feet apart in all corridors.

c. Duplex receptacles for general use shall be installed approximately 50 feet apart in all corridors and within 25 feet of ends of corridors.

64.15(7) A call signal shall be installed at each resident bed and in each resident toilet, bath and shower room.

a. The call signal in toilet, bath or shower rooms shall be an emergency call.

b. All calls shall register at the operational care center and shall actuate a visible signal in the corridor at the resident's door, in the clean workroom, and the soiled workroom.

c. In multicorridor units, additional visible signals shall be installed at corridor intersections.

d. In rooms containing two or more calling stations, signal indicating lights shall be provided at each calling unit.

64.15(8) Emergency electric service shall be provided in any facility licensed or designed for more than 50 beds as follows:

a. To provide electricity during an interruption of the normal electric supply that could affect the resident care or safety of the occupants, an emergency source of electricity shall be provided and connected to certain circuits for lighting and power.

b. The source of the emergency electric service shall be as follows:

(1) An emergency generating set, when the normal service is supplied by one or more central station transmission lines;

(2) An emergency generating set or a central station transmission line when the normal electric supply is generated on the premises.

c. The required emergency generating set, including the prime mover and generator, shall be located on the premises and shall be reserved exclusively for supplying the emergency electrical system.

Exception: A system of prime movers which are ordinarily used to operate other equipment and alternately used to operate the emergency generator will be permitted provided that the number and arrangement of the prime movers is such that when one of them is out of service (due to breakdown or for routine maintenance), the remaining prime mover can operate the required emergency generator and provided that the connection time requirements are met. The emergency generator set shall be of sufficient kilowatt capacity to supply all lighting and power load demands of the emergency system. The power factor rating of the generator shall be not less than 80 percent. Battery units may be used to augment the emergency lighting or for continuity of lighting during the interim transfer switching to the emergency generator immediately following an interruption of the normal service supply.

d. Emergency electric service shall be provided to circuits as follows:

(1) Exit ways and all necessary ways of approach thereto including exit signs and exit direction signs, exterior of exits, exit doorways, stairways and corridors;

(2) Dining and recreation rooms;

(3) Operational care center;

(4) Generator set location, switch-gear location and boiler room;

(5) Elevator, if required for emergency.

e. Provision shall be made for the following equipment essential to life safety and for the protection of important equipment or vital materials.

(1) Call board;

(2) Alarm system including fire alarm actuated at manual stations, water flow alarm devices of sprinkler systems if electrically operated, fire-detection and smoke detecting systems, paging or speaker systems if intended for issuing instructions during emergency conditions, and alarms required for nonflammable medical gas systems, if installed;

(3) Fire and water pumps, if installed;

(4) Sewage and sump lift pump, if installed;

(5) All required duplex receptacles in resident corridors;

(6) One elevator, where elevators are used for vertical transportation of residents;

(7) Equipment such as burners and pumps necessary for operation of one or more boilers and their necessary auxiliaries and controls, required for heating and sterilization;

(8) Equipment necessary for maintaining telephone service.

f. Where electricity is the only source of power normally used for space heating, the emergency service shall provide for heating of resident rooms. Emergency heating of resident rooms will not be required in areas where the design temperature is higher than 20° F., based on the Median of Extremes as shown in the current edition of the ASHRAE Handbook of Fundamentals, or the facility is supplied by at least two utility service feeders, each supplied by separate generating sources, or a network distribution system fed by two or more generators, with the health care facility feeders so routed, connected and protected that a fault any place between the generators and the facility will not be likely to cause an interruption of more than one of the service feeders.

g. The emergency electrical system shall be so controlled that after interruption of the normal power supply, the generator is brought to full voltage and frequency and connected within ten seconds through one or more primary automatic transfer switches to all emergency lighting, all alarms, nurses' call, equipment necessary for maintaining telephone service and receptacles in resident corridors. All other lighting and equipment required to be connected to the emergency system shall either be connected through the above described primary automatic transfer switching or shall be subsequently connected through other automatic or manual transfer switching. Receptacles connected to the emergen-

cy system shall be distinctively marked for identification. Storage-battery-powered lights, provided to augment the emergency lighting or for continuity of lighting during the interim of transfer switching immediately following an interruption of the normal service supply, shall not be used as a substitute for the requirement of a generator. Where fuel is normally stored on the site, the storage capacity shall be sufficient for 24-hour operation of required emergency electric services. Where fuel is normally piped underground to the site from a utility distribution system, storage facilities on the site will not be required.

64.15(9) An exit door alarm system shall be installed on the appropriate exit doors.

64.15(10) Drop cords, extension cords, or any type of flexible cord shall not be used as a substitute for fixed wiring.

64.15(11) Electrical metallic tubing or rigid heavywall conduit shall be used throughout the interior of the home grounded to the underground metallic water piping system.

64.15(12) Electrical system and equipment shall be in accordance with the applicable codes and regulations. Where such codes are not in effect the National Electric Code shall govern.

64.15(13) Electric lighting shall be provided throughout the facility in accordance with the recommended levels of the Illuminating Engineering Society Handbook.

64.16(135C) Codes and standards.

64.16(1) *General.* Nothing stated herein shall relieve the sponsor from compliance with building codes, ordinances and regulations which are enforced by city, county or state jurisdictions. Where such codes, ordinances and regulations are not in effect, it shall be the responsibility of the sponsor to consult one of the national building codes generally used in the area for all components of the building type which are not specifically covered by the minimum standards set forth herein provided the requirements of the code are not inconsistent with the minimum standards herein.

64.16(2) *List of referenced codes and standards.* The following codes and standards have been utilized in whole or in part in these rules and shall be used as references when specific details are required or interpretation is needed.

CHAPTER 65
DESIGN AND CONSTRUCTION OF NEW NURSING HOMES

65.1(135C) General requirements. Each nursing home shall comply with the provisions relating to general requirements as stated in 64.1(135C). In addition, each nursing home shall comply with the following: Nursing homes shall contain the facilities described herein and shall be built in accordance with the construction requirements outlined. Facilities available through affiliation with an adjacent hospital need not be duplicated.

65.2(135C) Operational care center. Each nursing home shall comply with the provisions relating to operational care centers as stated in 64.2(135C). In addition, each nursing home shall comply with the following:

65.2(1) Each patient room shall meet the following requirements:

No patient room shall be located more than 120 feet from a nurses' station, the clean workroom and the soiled workroom.

65.2(2) The size of each service area will depend on the number and types of beds within the care unit and shall include:

a. A clean workroom for storage and assembly of supplies for nursing procedures containing a work counter and sink.

b. A soiled workroom containing a clinical sink, work counter, and waste and soiled linen receptacles. This soiled workroom shall have a separate entrance and be physically separated from the clean workroom.

65.2(3) Patient toilet rooms shall be provided as follows: At least one room shall be provided for toilet training; shall be accessible from the nursing corridor, may serve the bathing area and shall provide a minimum of three feet clearance at the front and sides of the water closet.

65.2(4) Special purpose rooms for consultation, examination and treatment, and therapeutic and nursing procedures may serve more than one nursing unit on the same floor. Such shall provide lavatory, storage space and space for a treatment table.

65.2(5) A sterilizing room with an autoclave shall be provided. Such may serve more than one nursing unit and may be a designated area within the clean workroom.

65.3(135C) Patients' dining, activities and recreation areas. Each nursing home shall comply with the provisions relating to patients' dining, activities and recreational areas as stated in 64.3(135C). In addition, each nursing home shall comply with the following: Areas appropriate for the activities program shall be provided which shall be located so as to avoid interference with the comfort and nursing care of ill patients.

65.4(135C) Physical therapy unit.

65.4(1) If physical therapy is provided, the size of the area and the equipment shall be commensurate with the program.

65.4(2) If a physical therapy program is provided in the facility, the following physical therapy areas shall be provided:

a. An area which may also serve the occupational therapy unit.

b. Exercise and treatment areas including a lavatory and cubicle curtains around treatment areas. Such areas shall permit individual treatment and training in ambulation, stair-climbing and activities of daily living.

c. A hydrotherapy area with cubicle curtains.

d. Storage for physical therapy supplies and equipment.

e. A water closet located for convenient access by physical therapy patients which may also serve the occupational therapy unit.

f. Waiting space.

g. In facilities of less than 100 beds, a multipurpose room with appropriate space may be utilized for such areas.

65.5(135C) Occupational therapy unit. If occupational therapy is provided in the facility, the following occupational therapy areas shall be provided:

An office area which may also serve the physical therapy unit.

A therapy area including a sink or lavatory.

Storage for occupational therapy supplies and equipment.

A toilet room located for convenient access by occupational therapy patients.

In facilities of less than 100 beds, a multipurpose room with appropriate space may be utilized for such areas.

65.6(135C) Personal care room. Each nursing home shall comply with the provisions relating to personal care room as stated in 64.4(135C).

65.7(135C) Dietary department. Each nursing home shall comply with the provisions relating to dietary department as stated in 64.5(135C).

65.8(135C) Administration department. Each nursing home shall comply with the provisions relating to administration department as stated in 64.6(135C). In addition, each nursing home shall comply with the following: The administration department shall include a director of nurses' office which may be located in an appropriate area in facilities of less than 100 beds.

65.9(135C) Laundry. Each nursing home shall comply with the provisions relating to laundry as stated in 64.7(135C).

65.10(135C) General storage. Each nursing home shall comply with the provisions relating to general storage as stated in 64.8(135C).

65.11(135C) Locker rooms. Each nursing home shall comply with the provisions relating to locker rooms as stated in 64.9(135C).

65.12(135C) Engineering service and equipment areas. Each nursing home shall comply with the provisions relating to engineering services and equipment areas as stated in 64.10(135C). In addition, each nursing home shall comply with the following:

The following engineering and equipment areas shall be provided. An incinerator space which shall be in a separate room or outdoors, unless other acceptable methods of disposal of pathological wastes are approved by the department.

65.13(135C) Details and finishes. Each nursing home shall comply with the provisions relating to details and finishes as stated in 64.11(135C). In addition, each nursing home shall comply with the following:

65.13(1) *Finishes.* Floors in rooms used for storage of flammable anesthetic agents shall comply with NFPA Standard No. 56.

65.13(2) *Oxygen systems.* Where installed or used, the piping, outlets, manifold rooms and storage rooms shall be in accordance with the requirements of the current edition of the NFPA Bulletins Nos. 56 and 565.

65.14(135C) Elevator requirements. Each nursing home shall comply with the provisions relating to elevator requirements as stated in 64.12(135C).

65.15(135C) Construction. Each nursing home shall comply with the provisions relating to construction as stated in 64.13(135C).

65.16(135C) Mechanical requirements. Each nursing home shall comply with the provisions relating to mechanical requirements as stated in 64.14(135C). In addition, each nursing home shall comply with the following:

65.16(1) Water supply system shall meet the following requirements. Bedpan flushing devices are recommended in each patient toilet room and in the soiled workroom. If such devices are not provided in each patient toilet room a hopper or clinic sink with adequate facilities shall be provided in each nursing unit.

65.16(2) Nonflammable medical gas system installations shall be in accordance with the requirements of NFPA Standard No. 565.

65.17(135C) Electrical requirements. Each nursing home shall comply with the provisions relating to electrical requirements as stated in 64.15(135C). In additon, each nursing home shall comply with the following: Nurses' call systems which provide two-way voice communication shall be equipped with an indicating light at each calling station which lights and remains lighted as long as the voice circuit is operative.

65.18(135C) Codes and standards. Each nursing home shall comply with the provisions relating to codes and standards as stated in 64.16(135C).

These rules are intended to implement section 135C.14 of the Code.

[Filed May 23, 1972]

CHAPTER 66 to 70

Reserved for future use.

TITLE XI

MOBILE HOME PARKS

CHAPTER 71

LICENSING AND RESTRICTIONS

71.1(135D) Authority. Under the provisions of section 135D.16, the following rules governing the licensing and regulation of mobile home parks have been promulgated.

71.2(135D) Definitions.

71.2(1) "Department" is the state department of health which is the legally designated authority providing for licensing, inspection, and regulation of mobile homes and mobile home parks.

71.2(2) "Independent mobile home" is a mobile home which has a water closet and a bathtub or shower.

71.2(3) "Dependent mobile home" is a mobile home which does not have a water closet, nor a bathtub or shower.

71.2(4) "Mobile home space" is a plot of ground within a mobile home park designated for the accommodation of one mobile home.

71.2(5) "Independent mobile home space" is a mobile home space which has individual water and sewer connections available.

71.2(6) "Dependent mobile home space" is a mobile home space which does not have individual water and sewer connections available.

71.2(7) "Community building" is a building housing toilet and bathing facilities for men and women and a slop-water sink.

71.2(8) "Existing installations" are those installations which were constructed before January 1, 1954.

71.2(9) "New installations" are those which are proposed for construction after the effective date of these rules.

71.3(135D) License.

71.3(1) The application for the first annual license required for each park established within the state shall be made, in triplicate, on the form "Application for a License to Operate a Mobile Home Park". The application for a license form, with the appropriate annual license fee, shall be submitted to the department.

There also shall be included, with each application for the first annual license submitted, an application for a permit to construct a mobile home park and plans and specifications for the proposed park as specified in 71.4(135D).

71.3(2) The application for the annual license required for each subsequent year of operation shall be made, in triplicate, on the form "Application for Renewal of License to Operate a Mobile Home Park". The application forms, with the appropriate annual license fee, shall be submitted to the department.

Each application for renewal of license to operate a mobile home park throughout the year shall be submitted to the department on or before January 1 of each year. Each application for renewal of license to operate a park during the period May 1 to October 1 shall be submitted to the department on or before May 1 of each year.

71.3(3) Each application for a license, or application for renewal of license, relating to a mobile home park located within a municipality shall contain a certification of the local board of health (mayor, council, and health physician) that the park complies with municipal ordinances, codes, and other local regulatory measures, applicable thereto and not in conflict with the statute and these rules, before being submitted to the department.

71.4(135D) Permit.

71.4(1) The application for the permit required before constructing, reconstructing, or making alterations to the sanitary facilities in a park shall be made, in triplicate, to the department on the form "Application for a Permit to Construct, Reconstruct, or Remodel a Mobile Home Park." Plans and specifications for proposed new construction of, or alterations on, the water supply system, sewerage system, community building facilities, refuse disposal, and lighting in the park are required, and shall be attached to the application for a permit.

Plans and specifications relating to constructing, reconstructing, or making alterations to the sanitary facilities in all parks where a private water supply or a private sewage disposal system is used, or proposed for use, shall be prepared by an engineer registered under Iowa statute. This requirement may be waived for small parks at the discretion of the department.

If changes are proposed in the plans and specifications after a permit has been issued, a supplemental permit shall be obtained.

71.4(2) Each application for a permit relating to a park located within a municipality shall contain a certification of the local board of health (mayor, council, and health physician) that the construction, reconstruction, or alterations are in compliance with existing municipal ordinances, codes, or other local regulatory measures, applicable thereto and not in conflict with the statute and these rules, before being submitted to the department.

71.5(135D) Park site.

71.5(1) Each park shall be adequately lighted at night, particularly all walkways between the mobile homes and any community building or privies provided, with not less than 25 watt bulbs located at 100-foot intervals or equivalent lighting.

71.5(2) The number of mobile homes permitted in the park shall not exceed the number of spaces which can be serviced by the sanitary facilities in the park, and for which a license was issued.

71.5(3) Plans and specifications for the construction, reconstruction, or remodeling of swimming pools, wading pools, or bathhouses used in connection with such pools shall be submitted to the department as specified in 71.4(135D). The

design, construction, operation and maintenance of such facilities shall be based on the published "Policies Governing Design, Construction, Maintenance, and Operation of Swimming Pools" issued by the department.

71.6(135D) Toilet and washing facilities.

71.6(1) All plumbing fixtures and systems hereafter installed shall conform to local ordinances, or the state plumbing code when no local ordinance is in effect, and to these rules.

TABLE 1

Water Closet, Urinal, Lavatory, and Bathing Fixture Requirement Schedules for Community Buildings

NUMBER OF DEPENDENT MOBILE HOMES	MEN			WOMEN		
	WATER CLOSET	LAVATORY	BATHTUB OR SHOWER	WATER CLOSET	LAVATORY	BATHTUB OR SHOWER
1-10	1	1	1	1	1	1
11-20	2	2	1	2	2	1
21-30	3	3	2	3	3	2
31-40	4	4	2	4	4	2
41-50	5	5	3	5	5	3
51-60	6	6	3	6	6	3
61-70	7	7	4	7	7	4
71-80	8	8	4	8	8	4
81-90	9	9	5	9	9	5
91-100	10	10	5	10	10	5
101-110	11	11	6	11	11	6
111-120	12	12	6	12	12	6
121-130	13	13	7	13	13	7
131-140	14	14	7	14	14	7
141-150	15	15	8	15	15	8

When sanitary privies are furnished for use they shall be provided on the basis of one privy for each sex for each 10 mobile homes.

Urinals may be substituted for not more than one-third of the water closet fixtures for men. Each 18 inches of horizontal length of trough urinal shall be accepted in lieu of a single or separate urinal, i.e., 18 inches equals one, 36 inches equals two, 54 inches equals three, and 72 inches equals four. Trough urinals are prohibited in new construction.

71.6(2) A community building or buildings containing toilet and washing facilities shall be provided in each mobile home park, except when such facilities are provided for each mobile home space, or when only independent mobile homes are accepted in the park and individual water and sewer connections are available at each space harboring an independent mobile home, or when sanitary privies and leaching pits are used for waste disposal.

71.6(3) Each community building shall be conveniently located, well constructed with washable interior walls, well lighted, have adequate ventilation, all openings to toilet rooms effectively screened, and floors of concrete or other impervious material.

A general illumination level of at least five-foot-candles shall be maintained in each community building.

Each room housing toilet or laundry facilities shall be provided at least one window or a vent to the outside atmosphere. In new installations, window area at a ratio of ten percent of the floor area, with 50 percent of the total window area openable, or mechanical ventilation capable of making at least one air change every five minutes, shall be provided.

In new installations, all openings to community buildings shall be effectively screened. Solid doors opening outward and equipped with mechanical closing devices shall meet the requirements for screen doors.

A sanitary method of disposal of mop water shall be provided. In new installations, the floors shall be sloped to floor drains, and shall have concrete curbing or other impervious material extending at least six inches above the floor and forming a cove at the junction of the floor and side wall.

71.6(4) Where toilet and washing facilities are provided, each toilet room shall contain at least one water closet and one lavatory. Where separate facilities for males and females are provided, they shall be plainly marked by appropriate signs and shall be separated by a sound resistant wall if located in the same building. In new installations, separate water closet, lavatory and bathing facilities shall be provided for males and females in accordance with Table 1. 71.6(1).

In new installations, each water closet shall be in a separate compartment, with all partitions constructed of washable materials and all partition supports extending to the floor constructed of impervious materials.

In new installations, compartments shall be provided for bath and shower facilities. An individual dressing compartment not less than two and one-half by three feet in plan, so arranged to assure privacy, shall be provided in combination with and affixed to each shower compartment installed for women. The floor of such compartment shall be waterproof and elevated at least three inches above the floor of the shower stall, or a six-inch curbing provided, separating the shower and dressing compartments. Mats, grids and walkways made of wood, cloth, or other absorbent materials shall not be furnished for use in bath sections of community buildings.

A sanitary method of disposal of slop shall be provided. Unless waived, in new installations a slop sink supplied with hot and cold running water shall be provided in each community building, and such sink shall not be located in the laundry room.

An adequate supply of hot and cold running water shall be available in community buildings whenever needed by the occupants of the mobile home park.

In new installations, laundry facilities provided shall be separated by full partitions or walls from the toilet rooms.

71.6(5) When facilities are provided at each individual mobile home space, the building housing the facilities shall be located on the space served, be constructed in accordance with 71.6(3), contain a water closet, lavatory, shower with floor drain or tub, and be provided with an adequate supply of hot and cold water.

71.6(6) The interior of each community or individual space building, including all fixtures and equipment therein, shall be maintained in good repair and in a sanitary condition at all times. All plumbing fixtures shall be cleaned, such that all dirt and other visible foreign matter are removed, at least once each day. All waste paper and similar material shall be placed in suitable containers, and shall not be allowed to accumulate on the floor. All floors shall be swept and scrubbed at intervals sufficient to maintain a clean and sanitary condition. There shall be no evidence of insect or rodent harborages.

Such buildings shall have heating facilities capable of maintaining a temperature of at least 70° F. in cold weather. Gas-fired water or space heaters shall be vented to the outside.

The use of common drinking cups and common towels in the community building is prohibited.

71.7(135D) Water supply.

71.7(1) An adequate supply of safe potable water shall be provided in each mobile home park. Where a public water supply is available, abutting the property, such water shall be used.

71.7(2) Every new well shall be located at the highest favorable point practicable on the premises, and as far removed from any possible sources of pollution as the layout of the premises and the surroundings permit. Minimum distances between new wells and sources of pollution shall be maintained as shown in Table 2.

TABLE 2

Minimum Distances Between Wells and Sources of Pollution

SOURCE OF POLLUTION	Distance in Feet
Cesspool	100
Filter bed, soil absorption field seepage (leaching) pit, earth pit privy, or similar disposal unit	75
Sewer of tightly jointed tile or its equivalent, septic tank, sewer connected foundation drain, impervious concrete vault privy, or barnyard	50
Cast iron sewer with leaded or mechanical joints, independent clear water drain, or cistern	10
Cast iron sewer with leaded joints and encased in 6 inches of concrete	5
Pumphouse floor drain of cast iron pipe with leaded joints and draining to ground surface	2

Definitions:

Cesspool—used for disposal of raw sewage.

Seepage (leaching) pit—used for disposal of settled sewage, filter overflow, kitchen laundry, or similar wastes. Notes: The same distances apply to the suction pipe of a well, unless surrounded by a protective casing.

Existing wells will be considered as properly located when they meet the above minimum requirements with respect to sources of pollution. The above distances apply to clay and loam soils. Greater distances must be maintained in sand and gravel formations. For well deriving water from creviced limestone formations, see 71.7(12).

71.7(3) The upper terminal of all wells shall be watertight. Well platforms shall be of watertight reinforced concrete of a minimum thickness of six inches or equivalent watertight construction, with all openings constructed with raised shoulders to exclude surface wash or other foreign material. Covers for such openings shall be of the overlapping type. The platform shall be

sloped and satisfactory drainage to the ground surface provided. A watertight seal shall be provided for the annular space between the drop pipe and the casing.

71.7(4) In new installations, the upper surface of the well platform shall be at least six inches above the surrounding ground surface.

71.7(5) In new installations, the drop pipe opening through the well platform shall be formed, in drilled wells, by an extension of the well casing or, in bored or dug wells, by a length of iron pipe sleeve cast into the platform, of sufficient diameter to admit the pump cylinder. This casing extension or sleeve shall reach at least one inch above the platform, or higher if a flanged connection is used, for hand pumped wells; and at least six inches for power pump installations. Casings for power pump installations shall allow for a one-inch extension into the pump base. Well pits are prohibited in new installations. In existing installations, well pits will be accepted providing they are supplied with a gravity drain or a sump pump.

In new installations where a pump unit is not located over a well and the connecting pipe is under suction, that piping shall be encased in a protective conduit and buried at least five feet unless protected against freezing. If a buried suction line is located within ten feet of a sewer, the sewer shall be constructed of cast iron pipe with leaded joints. If the suction line is below the sewer, there shall be no joint in the suction pipe within ten feet of the sewer. An exposed suction pipe as in a basement room, shall be at least 18 inches above the floor.

71.7(6) The casing or curbing of all new wells shall be watertight to a depth of ten feet, and preferably 20 feet. New wells deriving water from acquifers below shattered limestone formations shall be constructed to exclude shallower waters. For additional information on proper well construction, see other publications of the department.

71.7(7) Storage reservoirs, hereafter installed, shall be located above ground-water level, and in such a location that surface and underground water flows away from the structure. All reservoirs shall be constructed of permanent, watertight material. Manhole covers shall be of the overlapping type. When the bottom of the reservoir is below the normal ground surface, the reservoir shall be located with respect to sources of contamination as specified for wells. Overflows and vents shall be turned downward and the opening covered with 24 mesh screen. Reservoir overflows and drains shall not be connected to a sanitary or storm sewer.

71.7(8) In new installations, the water supply pipes shall be of brass, copper, lead, cast iron, open hearth iron, wrought iron, or steel as specified in the state plumbing code.

In new installations, the water supply lines shall be separated horizontally from sanitary sewers by at least ten feet of undisturbed or compacted earth, except as specified below. When separated as above, the sewer lines may be constructed of cast iron, vitrified clay, concrete, cement-asbestos, or bituminized fiber sewer pipe, with tight approved and tested joints. When water and sewer lines cross, the water line shall be at least 12 inches above the top of the sewer line throughout a distance of ten feet horizontally, and no joints shall be made in the water line within this distance of ten feet.

In new installations, water and sewer lines may be laid in the same trench providing the bottom of the water line is laid at all points at least 12 inches above the top of the sewer line at its highest point, the water line is laid on a solid shelf excavated at one side of the common trench or on a solidly tamped backfill, the joints in the water line are kept at a minimum, and the sewer is constructed of cast iron with leaded or mechanical joints and shown to be watertight by test. In cases where cast iron is not a suitable sewer material, vitrified clay or other durable and corrosion-resistant material may be used provided it is installed to remain watertight and rootproof. Where a water service stub and a sewer pipe stub of vitrified clay or concrete have heretofore been placed in the same trench from the mains to the curb or property line, a park sewer of the same material may be extended in the same trench with the water line.

In new installations, minimum pipe sizes for the park water mains shall be in accordance with Table 3.

TABLE 3
Size of Water Pipe

Pipe Size (inches)	Mobile Homes Served
1	2— 10
1 1/4	11— 20
1 1/2	21— 35
2	36— 50
2 1/2	51—100
3	101—150
4	151— 300

In new installations, the minimum size water pipe from the park mains to each mobile home space shall be one-half inch, and the space water outlets shall be separated from the sewer outlets by not less than five feet. Each mobile home space water outlet shall terminate aboveground, shall be encased with concrete at least six inches thick and two feet deep unless otherwise protected, shall be provided with a control valve, shall be capped or otherwise protected when not in use, and shall be provided with a suitable flexible connection for attachment to the mobile home water line; and also shall be protected against freezing if the park is operated throughout the year. In new installations, control valves of the stop and waste type

may be installed provided a horizontal separation of at least ten feet from any part of the sewer system is maintained, or if an approved system of watertight piping from the weep holes of the valves is installed to drain to a lower, protected level.

Sanitary precautions shall be taken in laying all water pipes. They shall be laid where they will not come in contact with sewage during the laying process.

In the design of the water distribution system, a sufficient number of fire hydrants or outlets shall be provided throughout the park at proper locations for fire protection.

The water supply system shall be so installed as to prevent backflow of contaminated water from appliances, fixtures, drains and sewers; and shall not be connected with nonpotable or questionable supplies.

71.7(9) Drinking fountains, when provided, shall be of the guarded, inclined jet-type conforming to standards specified in local ordinances or in the state plumbing code where not covered by local ordinance.

71.7(10) Wells, storage reservoirs, and water lines when first installed, or when repaired in such a manner that contamination may gain entrance, shall be disinfected with chlorine. Following such disinfection, the water shall be sampled and a satisfactory bacteriological quality determined before the water is used for drinking or culinary purposes. Until water of such satisfactory bacteriological quality is assured, all water used for drinking and culinary purposes shall be boiled.

71.7(11) The potable water supply derived from each private system shall be of satisfactory quality as determined by a sample collected at the time of the annual inspection.

71.7(12) If a sample collected from a properly located [as determined from Table 2, 71.7(2)] well supply shows the water to be bacterially unsafe at the time when the sample was taken, the supply may be disinfected and an additional sample connected. If disinfection fails to eliminate the contamination, continuous chlorination of the water supply shall be provided.

If samples collected from an existing well whose only known defect is improper location [as determined by Table 2, 71.7(2)] show a consistently satisfactory bacterial quality, as determined by at least three consecutive samples collected at monthly intervals, the supply may be approved with or without continuous chlorination provided. Nature and type of subsoil, actual distance from sources of pollution, and construction of the well will be given consideration in determining whether continuous chlorination of the supply will be necessary. If samples collected from an improperly located supply show the water to be bacterially unsafe, the system will not be approved for use unless continuous chlorination is provided. No permit will be issued for extension of an existing water supply to serve an addition to a park where the well is improperly located unless continuous chlorination is provided.

An existing well deriving water, or a new well planned to derive water, from a shallow creviced limestone formation will be approved only when properly located, the formation is overlain with soil or unconsolidated material to a depth of at least 40 feet extending one-half mile from the well, and continuous chlorination is provided.

Only water with a nitrate nitrogen content of ten parts per million or less shall be furnished to infants. A water supply containing more than ten parts per million of nitrate nitrogen shall be placarded or posted stating the water shall not be used for infant feeding. The park operator shall notify all parents not to use the water for infant feeding.

71.7(13) Chlorinating equipment shall be maintained properly, and operated such that a minimum combined chlorine residual of 0.2 parts per million shall be maintained in the distribution system at all times. Daily records shall be kept of the quantity of water used when known and of the amounts of chlorine used. These daily records shall be filed with the department at the end of each week.

71.7(14) All abandoned wells shall be properly filled to prevent contamination of water-bearing formations and to eliminate accident hazards. In filling dug or bored wells, as much of the curbing as possible shall be removed.

71.8(135D) Sewage disposal.

71.8(1) Disposal of sewage and other water carried wastes shall be into a municipal sewerage system when the sewer abuts the property or is otherwise available. In mobile home parks where such connections are not available, disposal shall be into a private system designed, constructed and operated in accordance with good sanitation practice to meet the requirements of the department. Plans and specifications for new construction shall be submitted as specified in 71.4(135D).

71.8(2) The connection between the mobile home drain and the park sewer shall be made with a leakproof connector of durable, corrosion-resistant rubber or metal; flexible for a length of at least 24 inches and preferably throughout its length; attached at the inlet and outlet end with a water- and gas-tight joint; and constructed to pull apart in an emergency without serious damage to the mobile home piping or the park sewer.

It shall be the responsibility of the park operator to supervise the installation of the sewer connector. Flexible connectors shall be kept clean when not in use. Each sewer outlet shall be capped when not in use. There shall be no discharge of sewage or waste water from any mobile home onto the ground surface, nor shall there be any sewage odors from the sewer outlet.

71.8(3) In new installations, each space sewer lateral shall be connected to the sewer main

by use of an appropriate Y fitting, with short T fittings prohibited; shall connect with a P trap located below the frost line; and then shall extend vertically to not less than four inches above grade, with the individual sewer outlets not less than three inches in diameter. Extensions through the ground shall be protected against frost heaving and damage by a concrete apron at ground level.

In new installations, the outlet risers, P trap, and one connecting length of lateral at each space shall be constructed of cast iron with leaded joints. The remaining new sewers and drainage lines shall be constructed as specified for building drains and sewers.

In new installations, cleanouts shall be provided separated horizontally from water supply pipes by at least ten feet of undisturbed or compacted earth, except as provided in 71.7(8).

Changes in direction of new main sewer lines shall be with 45 degree fittings. Each new sewer main or branch shall terminate in a stack extending at least nine feet above the ground level and provided with a cleanout. Stacks may be constructed of cast iron, vitrified clay, concrete, cement asbestos, bituminized fiber, lead, or copper piping or tubing. Galvanized steel or wrought iron may be used aboveground.

In new installations, cleanouts shall be provided at each second change in direction or at intervals of 100 feet. Manholes may be substituted in lieu of cleanouts and stacks where a perforated cover will not create an odor nuisance or explosion hazard, and where surface water is excluded. A sufficient number of cleanouts or manholes shall be provided to allow rodding of the system.

Sanitary sewers within the mobile home park area shall not receive storm or surface water drainage.

71.8(4) The minimum size and slope of new sewer installations, exclusive of laterals serving individual mobile home spaces shall be determined in accordance with Table 4.

TABLE 4

Minimum Size and Slope of Sewer

Sewer Diameter (Inches)	Mobile Homes Connected (Number)	Slope Per 100 Feet (Inches)
4	2— 50	15
6	51—100	8
8	101—400	5

71.8(5) In new installations, the components of sewage treatment systems shall be separated from wells and other critical items by at least the distance specified in Table 5, 71.8(7).

71.8(6) Cesspools will not be approved for the disposal of toilet wastes except where installed and in use prior to January 1, 1954. There shall be no overflow or discharge to the ground surface from a cesspool.

TABLE 5

Minimum Separation Distances in Feet Required in Locating Sewage Treatment Plants

COMPONENT OF SEWAGE TREATMENT SYSTEM	PRIVATE WELL	PUBLIC WATER SUPPLY WELL	STREAM OR OPEN DITCH	DWELLING OR OTHER STRUCTURE	PROPERTY LINE
Sewer of cast iron, concrete encased	5	10	—	—	—
Sewer of cast iron, leaded joints, not encased	10	20	—	—	—
Sewer of tile or equivalent material, tight joints	50	75	—	—	—
Septic tank	50	75	—	10	—
Distribution box	50	75	—	—	—
Subsurface absorption field	75	200	—	10	5
Subsurface filter system	75	200	25	10	5
Seepage pit	75	200	25	20	10

Distances specified for public wells also apply to pump suction lines.
Existing systems will be considered as properly located when meeting the above minimum separation distances.

71.8(7) Seepage (leaching) pits will be approved for the disposal of kitchen and laundry wastes, in new construction, when complying with the following requirements:

a. The location of each pit shall conform to the standards shown in Table 5.

b. Each pit installed for disposal of kitchen wastes shall contain at least one and five-tenths, and each for disposal of kitchen and laundry wastes at least three, cubic yards of crushed rock or gravel below the inlet, with pits serving more than one mobile home or other buildings increased proportionately in size.

c. No pit shall penetrate the soil to a depth within three feet above the ground water stratum, nor to a total depth of over 12 feet.

d. Each pit shall be provided with an inlet pipe, to which a flexible leakproof connection from the mobile home drain shall be attached when the space is occupied and which shall be capped when the space is unoccupied.

e. Each pit shall be covered by not less than 12, nor more than 24 inches of loose filled earth.

f. There shall be no overflow or discharge to the ground surface from any seepage pit.

71.8(8) Privies shall be maintained in a clean and sanitary condition at all times. All privy pits shall be fly-tight, and there shall be no spillage or seepage of the pit contents to the ground surface. Pits shall be kept cleaned, or new pits provided when the contents are within 18 inches of the ground surface. When a privy is abandoned, the superstructure shall be removed and the pit contents covered with lime and at least 18 inches of compacted earth.

The proposed construction of sanitary privies in existing parks will be approved providing the present method of waste disposal is by privies. In the development of new parks or additions to existing parks, the installation of privies will be approved only when other satisfactory methods of waste disposal cannot be provided. New privies shall be constructed with insect-and rodent-tight pits and superstructure as shown in publications of the department or equal thereto.

71.8(9) When a septic tank is cleaned the sludge shall be handled in a sanitary manner and its disposal shall be by burial, placing in a public sewer system, or by other similar sanitary methods. Dumping directly into a stream or on land adjacent to a stream is prohibited.

71.9(135D) Refuse disposal.

71.9(1) The storage, collection, and disposal of refuse (which includes garbage, rubbish, and trash) from each park shall be conducted to avoid creation of health hazards such as rodent harborage, insect breeding areas, and air pollution. The park premises shall be kept free of debris and litter at all times.

71.9(2) All refuse shall be stored in fly-tight, watertight and rodent-proof metal containers having tight fitting lids; and shall not be allowed to be placed or to accumulate on the ground. Each container and lid shall be maintained in a sanitary condition and in good repair at all times.

Sufficient containers to supply a minimum capacity of 20 gallons for each four mobile homes, and to supply adequate storage space for all refuse produced between collections, shall be provided. In new installations, each container shall be placed on a holder or rack elevated at least 12 inches above the ground level, or an impervious slab at ground level; each of which shall be maintained in a sanitary condition at all times.

Refuse shall be collected from the containers at least once each week, and more often if necessary; and shall be incinerated, buried, or transported to a municipal, county, or private dump ground, or other similar disposal plant. No incinerator used for garbage disposal on the park premises shall create objectionable smoke or odor. No garbage or empty food cans shall be placed in a unit suitable for use only as a trash burner. A spark screen shall be provided for each incinerator and each trash burner. When refuse is buried on the premises, it shall be covered by at least 12 inches of compacted earth immediately.

71.10(135D) Supervision. The owner or authorized agent shall be personally liable and responsible for supervision of the park, maintenance of all sanitary appliances and fixtures in good repair and appearance, and conducting, when necessary, insect and rodent control measures including applying insecticides and rodenticides. It shall be the duty of the owner or agent to take promptly such action as may be required to enforce these regulations or, if necessary, to eject from the park any person who willfully or maliciously damages the sanitary appliances or fixtures provided, or does not adhere strictly to these regulations. Adequate equipment for maintaining the park in a strictly sanitary manner at all times shall be provided and maintained by the owner or agent.

71.11(135D) Cross-connection—water supplies. No public waterworks system, either publicly or privately owned, shall be cross-connected with any other waterworks system, either publicly or privately owned, unless the water in the latter system meets the standard of purity as required for public water supplies by the regulations of the department.

Any direct physical connection between pipes or piping of a public waterworks system and any other water system shall be deemed a cross-connection regardless of number or type of valves that may be inserted between the two systems, except in such instances where it is physically impossible for water from the secondary system to enter the public water system under any possible combinations of operating conditions, and in such instances connection shall be permitted only with the written approval of the department.

TITLE XIV
LOCAL BOARDS

CHAPTER 77
LOCAL BOARDS OF HEALTH

77.1(137) Organization of local boards of health.

77.1(1) *Officers of local board of health.* Each local board of health shall, at its first meeting during any calendar year, elect one of its members to serve as chairman until the first meeting of the following calendar year.

a. The local board of health may elect a vice-chairman, secretary, or other such officers as it may deem advisable.

b. In case of a vacancy of the office of chairman due to death, resignation, or other cause, a successor shall be elected at the next meeting of the board, who shall serve the remainder of the term.

77.1(2) *Meetings of local board of health.* The place, date and time of regular meetings of the local board of health shall be determined by vote of the board, and shall be published in a newspaper of general circulation, in the area in which the local board has jurisdiction.

a. Each local board of health shall meet at least four times yearly.

b. Special meetings of the board may be called as needed by the chairman, or by any three board members. At least 24 hours' notice shall be given of special meetings, except in case of emergency.

77.1(3) *Quorum of local board of health.* Fifty percent or more of the board membership shall constitute a quorum.

77.2(137) Operating procedures of local boards of health.

77.2(1) The following information shall be submitted to the state department of health:

a. Names, addresses, and telephone numbers of members of the local board of health, which shall be submitted within one month after their appointment.

b. Names of the chairman and any other officers elected by the board, which shall be submitted within one month after their election.

c. Names, addresses, and telephone numbers of board employees, information as to whether these are full- or part-time employees, and the salary they are to receive, which shall be submitted within one month following their employment.

d. Notice of resignation, discharge or other termination of the services of any employee, which shall be submitted within one month following termination.

e. A copy of the minutes of each regular and special meeting of the board, which shall include at least

(1) the date and place of the meeting,

(2) a list of members present,

(3) a report of any official board actions

and shall be submitted within one month of the date of the meeting.

77.2(2) An annual report of expenditures for the previous calendar year, to be submitted on forms provided by the state department of health, which shall be submitted prior to March 15, 1969, and each year thereafter.

77.3(137) Expenses of board of health members.

77.3(1) The following may be considered necessary expenses of board of health members:

a. Reimbursement for travel in private car on board of health business at a rate not to exceed ten cents per mile.

b. Actual lodging and meal expenses including sales tax on lodging and meals.

c. Actual expense of public transportation when traveling on board of health business.

d. Miscellaneous expenses related to performance of duties as approved by the board of health.

77.3(2) This rule shall not be construed as requiring the payment of reimbursement to any person or as prohibiting local boards from imposing additional restrictions or administrative requirements on expenses of their members.

These rules are intended to implement chapter 137 of the Code.

[Filed October 10, 1967; amended January 22, 1968]

CHAPTER 78
DISTRICT HEALTH DEPARTMENTS

78.1(137) Minimum standards for district health departments.

78.1(1) A district health department shall have jurisdiction over a total population of at least 25,000 persons as determined by the most recent decennial federal census.

78.1(2) All areas under the jurisdiction of a district health department shall be contiguous, and district boundaries shall follow one or more existing county boundaries.

78.1(3) A district health department shall have jurisdiction in all cities within the county or counties of which it is composed.

78.1(4) A district health department shall provide public health nursing services and environmental health services, and may provide such other health services as are deemed advisable and necessary.

78.1(5) The district board of health shall delegate responsibility for administration of the district health department to an individual who is a full-time employee in the department.

78.2(137) Preparation of district health department plan.

78.2(1) The state department of health shall prepare a proposed plan for formation of district health departments after consideration of the following factors:

a. Compliance with 78.1(1), 78.1(2) and 78.1(3).

b. Opinions and desires of existing local boards of health, as determined by questionnaire, conference, or other appropriate method.

c. Configuration of existing or proposed districts of other agencies whose activities are related to public health.

78.2(2) The plan shall consist of a map showing district boundaries, and a list of existing city and county boards of health in each district. The proposed plan shall be submitted to all existing local boards for consideration. At least 30 days shall be allowed for submission of comments by the local boards.

78.2(3) After consideration of comments by the local boards, the state department of health shall prepare a final plan and shall send copies to each local board.

78.2(4) Whenever any amendment to the final plan is proposed, the state department of health shall notify all affected local boards and shall allow at least 30 days for submission of comments.

78.2(5) Whenever amendments of the plan are made, the state department of health shall transmit copies of the amended plan to all local boards of health.

78.3(137) Approval of district health departments. Local boards of health desiring to form a district health department shall submit the following information:

78.3(1) A resolution passed by each local board of health within the district, as designated in the state plan, stating:

a. Its desire that a district health department be formed, and

b. Its approval of the plan for appointment of district board members.

78.3(2) Adequate assurance that, upon organization as a district, the minimum organizational and service standards specified in 78.1(4) and 78.1(5) will be met. Such assurance may include:

a. Listing of existing personnel in the district whose services will be utilized by the district board.

b. Copies of existing or proposed budgets or resolutions of intent from counties, cities or other organizations, indicating that funds will be provided for the districts local health fund.

c. Such other information as shall be acceptable to the commissioner of public health.

78.3(3) A plan for appointment of the district board of health, which shall include:

a. The number of members to be appointed, which shall not be less than five nor more than eleven.

b. The number of doctors of medicine and surgery or osteopathic physicians and surgeons to be appointed, which shall not be less than one nor more than three.

c. The term of office of the members, which shall not be less than two nor more than six years.

d. The dates of appointment of members. Except for appointment of the original board, and appointments for filling vacancies in unexpired terms, no more than 60 percent of the board members shall be appointed in any one year.

e. The appointing authority for each board member. Members may be appointed by:

(1) County boards of supervisors.

(2) City or town councils.

f. The method or methods of filling vacancies in unexpired terms of each board member.

g. Any other qualifications or restrictions relating to appointment of board members.

(1) When a district includes more than one county, at least one member shall be appointed from each county.

(2) When a district includes a city of over 25,000 population, at least one board member shall be appointed from such city.

78.3(4) Upon receipt of all necessary information, as specified in 78.3(1), 78.3(2) and 78.3(3), the state department of health shall review such information, and shall determine, within 30 days, whether the minimum standards specified in 78.1(137) will be met by the proposed district.

78.3(5) Upon determination that minimal standards will be met by the proposed district, the state department of health shall approve formation of the district, and shall set an effective date for district formation, which shall not be less than 30 days from the date of approval.

78.3(6) Notice of approval for district formation, including the effective dates, shall immediately be sent to:

a. The county board of health of each county in the district.

b. The board of supervisors of each county in the district.

c. The city board of health of each city over 25,000 population in the district, unless such board has been terminated.

78.3(7) Upon receipt of the notice of approval for district formation, each appointing authority shall, prior to the effective date of formation of the district, appoint board members as specified in the plan referred to in 78.3(3), who shall take office on the effective date.

78.4(137) Additions to district health departments.

78.4(1) The board of health of any county, or any city over 25,000 population which desires to be added to an existing district health department, shall submit an application to the district board of that district.

78.4(2) If addition of said city or county is approved by a majority of the members of the district board, the following information shall be submitted to the state board of health:

a. A resolution passed by the board of health of the applicant city or county, stating its desire to be added to the district, and approving the revised plan for appointment of district board members.

b. Adequate assurances, as described in 78.3(2), that minimum service standards will continue to be met following addition of the applicant city or county.

c. A revised plan for appointment of members of the district board of health, which shall conform with all requirements of 78.3(3).

d. A resolution or statement of agreement from each appointing authority whose authority to appoint board members is affected by the revised plan for appointment of district board members.

e. A resolution passed by the district board approving addition of the applicant city or county.

78.4(3) If addition of the applicant city or county to the district is approved by the state board of health, an effective date shall be set for the action, and notification sent to:

a. The district board of health.

b. The board of health of the applicant city or county.

c. The board of supervisors of the applicant county.

d. The council of the applicant city.

e. The council of each city and town within the applicant county.

78.4(4) Any new district board of health members required by the revised plan shall be appointed prior to the effective date by the appropriate authorities, and shall take office on the effective date.

78.5(137) Withdrawal from district health departments.

78.5(1) The board of supervisors of any county, or the city council of any city over 25,000 population, desiring to withdraw from a district health department, shall submit an application to the district board of health of that district.

78.5(2) If withdrawal of said county or city is approved by a majority of the members of the district board, the following information shall be submitted to the state board of health:

a. A resolution passed by the board of supervisors of the applicant county, or the city council of the applicant city, stating its desire to withdraw from the district and stating also its intent to:

(1) Apply for addition to another district, or

(2) Appoint a county or city board of health.

b. Adequate assurances, as described in 78.3(2) that minimum service standards will continue to be met in the district following withdrawal of the applicant county or city.

c. Assurance that minimum standards specified in 78.1(1), 78.1(2) and 78.1(3) will continue to be met in the district following withdrawal of the applicant county or city.

d. A revised plan for appointment of the district board of health, which shall conform with all requirements of 78.3(3).

e. A resolution passed by the district board approving withdrawal of the applicant city or county, and approving the revised plan for appointment of the district board of health.

78.5(3) If withdrawal of the applicant county or city from the district is approved by the state board of health, an effective date shall be set for the action, and notification sent to:

a. The district board of health.

b. The board of supervisors of the applicant county.

c. The council of the applicant city.

d. The council of each city or town within the applicant county.

78.5(4) Any new district board of health members required by the revised plan shall be appointed prior to the effective date by the appropriate authorities, and shall take office on the effective date.

These rules are intended to implement section 137.9 of the Code.

TITLE XV

MIGRATORY LABOR CAMPS

CHAPTER 81
GENERAL RULES FOR
MIGRATORY LABOR CAMPS

81.1(138) Shelters.

81.1(1) *Heating season.* The season requiring artificial heating as provided in section 138.13 is designated as the period between September 15 and June 1.

81.1(2) *Minimum floor space requirements.* The following floor space requirements shall be provided:

a. At least 50 square feet per occupant for sleeping purposes only in family units and dormitory accommodations.

b. At least 40 square feet per occupant for sleeping purposes only in accommodations using double bunk beds.

81.1(3) *Inspection.* The operator of a migrant labor camp shall be in possession of keys to all migrant shelters in order that inspections can be made of the facilities at any reasonable time.

81.1(4) *Register.* A register of all occupants of a migrant labor camp shall be maintained and open to inspection by the state department of health representatives at all times when the camp is occupied.

81.1(5) *Separate rooms.* Housing used for families with one or more children six years of age or older shall have a room or partitioned sleeping area for the husband and wife. The partition shall be of rigid materials and installed so as to provide reasonable privacy.

81.1(6) *Storage.* Arrangements for hanging clothing and storing personal effects for each person or family shall be provided.

81.2(138) Water supply.

81.2(1) *General.*

a. The water supply shall be of a safe bacterial and chemical quality.

b. Where a public water supply is available, such water shall be used in the camp. If a private water source under pressure is provided, the water system shall be capable of delivering at least 35 gallons per person per day to the camp site.

c. Cistern supplies consisting of roof or other surface runoff water shall not be used for drinking or culinary purposes.

d. The adequacy of a well as a source of water for drinking or culinary purposes shall be determined by inspection and bacteriological examination. Defects found by inspection or contaminated samples shall be sufficient grounds for requiring repair, chlorination or condemnation of the well.

e. Water containing 45 or more parts per million nitrates shall not be used for drinking or preparation of formula for infants under one year of age. When the supply contains nitrates in the quantity above, water for infant feeding shall be obtained from another source that has been tested and found to be bacterially satisfactory and contains less than 45 parts per million nitrates. A water supply containing 45 or more parts per million of nitrates shall be placarded or posted stating the water shall not be used for infant feeding.

f. Wooden well platforms or manhole covers are prohibited.

g. Hand pump bases shall be of the solid one piece type bolted, including suitable gaskets, secured to the well casing by thread or weld connection. Hand pumps secured to the platform by bolts cast in the concrete shall be provided with a rubber or neoprene gasket between the pump base and the platform to insure a watertight joint.

h. The pump head shall be of a type designed to prevent external water or other contaminating material from entering the water chamber.

i. The pump spout shall be of the closed, downward-directed type.

j. No hand-operated type of pump or cylinder which requires priming shall be used. No pail and rope, bailer, or chain-bucket systems shall be used.

81.2(2) *Existing pump pits.* Existing pump pits may be approved if the construction conforms to the following minimum standards:

a. Walls, floor and top of pit shall be of watertight concrete or masonry construction or equivalent. The well casing shall extend at least six inches above the pit floor.

b. A positive seal shall be provided for the annular opening between the casing wall and the drop pipe.

c. A positive drain shall be provided by either a watertight sump and automatic sump pump discharging with at least a six-inch free fall above the ground surface or an independent drain line discharging to the ground surface above any possible flood level. Pit drains discharging to any other drain or sewer are prohibited.

81.2(3) *Water supply systems.* The water supply system shall be installed so as to prevent backflow of contaminated water from appliances, fixtures, drains and sewers and shall have no cross-connections with any nonpotable supply or any other water supply which does not comply with these requirements.

81.2(4) *Water tanks.* All water to be hauled for a camp shall be obtained from an approved source. All equipment used for hauling or storage of potable water shall be thoroughly cleaned and disinfected with a solution containing at least 200 parts per million of chlorine immediately before use. No equipment, tanks or reservoirs used for hauling or storing potable water shall be used for any other purpose.

81.3(138) Waste disposal.

81.3(1) *Solid waste disposal.* Solid waste shall be disposed of in a sanitary disposal project approved by the state department of health, or if disposed of on the premises, the solid wastes shall be buried so as to create no health hazard or nuisance.

81.3(2) *Liquid waste.*

a. Existing wastewater disposal systems shall be located and constructed so as not to create a nuisance or condition of pollution.

b. Water-carriage toilets shall discharge to a septic tank and solid absorption system or other type disposal system approved by the state department of health located, designed and constructed in accordance with the specifications set forth in the state department of health publication "Residential Sewage Disposal Systems", the revision of April 1970.

c. A leaching pit or other type disposal system approved by the state department of health

shall be provided to receive the wastes from sinks, laundries, showers and tubs when no septic tank and absorption system is available. Such leaching pits shall be located and constructed in accordance with the specifications set forth in the state department of health publication "Residential Sewage Disposal Systems", the revision of April 1970.

81.4(138) Bathing facilities.

81.4(1) Showers shall be supplied with hot and cold water under pressure. Shower enclosures shall be sufficient to provide privacy for the user. An adjacent, enclosed dry area shall be provided for dressing. No duckboards, mats or other such accessories shall be permitted.

81.4(2) Automatic water-heating equipment, or storage tanks with hand fired heating coils, shall be equipped with combination pressure and temperature relief valves or separate pressure and temperature relief valves. Temperature relief valves shall be located in the top one-eighth or not more than three inches above the top of the tank served. Pressure relief valves may be located adjacent to the tank. Gas-fired or other combustion type waterheaters shall be vented to the outside atmosphere.

81.5(138) Central dining facilities.

81.5(1) *Physical facilities.* When central dining facilities are provided by a concessionaire, operator or the manager of a camp, the size of the kitchen and dining hall shall be commensurate with the capacity of the housing and shall be separate from the sleeping quarters.

81.5(2) *Requirements.* When central cooking and eating facilities are provided by a concessionaire, operator or the manager of a camp, such facilities shall comply with the laws and rules of the Iowa department of agriculture.

81.6(138) Safety and fire.

81.6(1) *Fire exits.*

a. Shelters of one story construction housing less than ten persons shall have two means of escape, one of which may be a readily accessible window with an openable space of at least 24 by 24 inches.

b. Sleeping quarters designed for ten or more persons, central dining facilities and common assembly rooms shall have at least two doors remotely separated so as to provide alternate means of escape.

c. Floors, above the first floor, used for sleeping quarters or common assembly rooms shall have a stairway and a permanent affixed exterior ladder or a second stairway.

81.6(2) *Shelter spacing.* In camps established after July 1, 1972, there shall be at least ten feet of space in all directions between shelters.

These rules are intended to implement section 138.18 of the Code.

CHAPTERS 82 to 85
Reserved for future use

TITLE XVI

DEAD HUMAN BODIES

CHAPTER 86
PLACES WHERE DEAD HUMAN BODIES ARE PREPARED FOR BURIAL OR ENTOMBMENT

86.1(156) Certificate of inspection. A certificate of inspection valid for a period of two years of places where dead human bodies are prepared for burial or entombment will be issued in the name of the funeral establishment and the current certificate shall be posted in a conspicuous place therein.

86.2(156) Preparation room. Any premises operated as a funeral establishment in which any licensed funeral director or embalmer prepares dead human bodies for burial or entombment shall contain a preparation room for that purpose.

86.3(156) Preparation room standards. The preparation room shall meet the following standards:

86.3(1) It shall be of such size and dimensions to accommodate and shall contain an embalming table, an appropriate sink or other liquid waste receptacle with sewer and water connections, instrument table, suitable cabinet or shelves, and handwashing facilities to include hot water, soap and towels.

86.3(2) Walls shall run from floor to ceiling and be covered with tile, plaster or sheet rock and finished so that the surface is washable and can be kept in a clean and sanitary condition at all times.

86.3(3) The floor of said room shall be of concrete with a glazed surface, or tile, or, if wooden, the floor shall be covered with intact linoleum that will prevent any fluid seepage into the floor. The seam between the wall and the floor shall be impermeable.

86.3(4) The preparation room shall be private. It shall not be used as a passageway from room to room. No toilet or commode shall be located within the preparation room. Only equipment necessary for use in preparation of bodies for burial or shipment shall be permitted in the preparation room. A supply of a suitable odorless disinfectant shall be kept on hand at all times.

86.3(5) There shall be a toilet and handwashing facility accessible elsewhere in the building.

86.3(6) Ventilation shall be provided by an exhaust fan vented to the outside of the building.

86.3(7) Doors and windows of the preparation room shall be so installed and constructed as to obstruct view from outside and to prevent fumes and odors from entering any other part of the building. All exterior doors and windows shall be screened.

86.3(8) There shall be adequate lighting. Light fixtures shall be easily cleanable and be kept clean.

86.3(9) The preparation room shall be provided with an adequate water supply. The building drainage system must be discharged into the municipal sewerage system where such a system is available. Where a municipal sewerage system is not available, the building drainage system must be discharged into a private system of waste disposal acceptable to the state department of health. Every plumbing fixture shall be provided with a proper air gap or other acceptable device to prevent flowback into the water supply.

86.3(10) The embalming table shall have a top composed of stainless steel, porcelain or other rustproof material and the edges shall be raised at least three-fourths inch around the entire table. There shall be a drain opening in the table. The drain opening shall be properly vented and connected to the building drainage system.

86.3(11) Each preparation room shall have a covered, watertight receptacle for solid refuse. All such waste materials shall be disposed of by incineration immediately at the conclusion of each embalming case so that all disease-producing organisms will be destroyed and the public health thereby protected.

86.3(12) All preparation rooms shall be maintained in a clean and sanitary condition. All embalming tables, sinks, receptacles, instruments and other appliances used in embalming dead human bodies shall be at least thoroughly cleaned with hot water and detergent or soap immediately after use. There shall be available a suitable means to sterilize instruments.

86.4(156) Correction of deficiencies. Any preparation room found to be deficient in meeting these standards shall not be used for the preparation of dead human bodies for burial or entombment until such deficiencies are corrected.

TITLE XVIII

VITAL STATISTICS

CHAPTER 96
VITAL RECORDS

96.1(144) Specification. The state registrar may require that a person requesting a copy of a vital record, examination, or search for a vital record specify in writing the name of the person whose vital records are to be copied, examined, or searched; the purpose of such request; and the signature and address of the person making the request.

96.2(144) Handling. Equipment or vital records shall not be physically handled except by the state registrar, deputy or authorized personnel. This rule shall not prevent copying vital records.

96.3(144) Birth certificates. The medical portion of a birth certificate shall be considered confidential.

96.4(144) Fee. A fee shall be charged by the state registrar of five dollars for each hour or portion thereof for supervision provided during search of records by applicant. All fees collected by the state registrar shall be added to the general fund of the state of Iowa.

These rules are intended to implement chapter 144 of the Code.

[Filed October 10, 1967]

CHAPTER 97
REPORTS

97.1(144) Reports by funeral directors and embalmers. Each funeral director and embalmer licensed in the state of Iowa shall submit to the state registrar (the commissioner of public health) on the first workday of each month a report of persons deceased in Iowa for whom said funeral director and embalmer had provided professional services during the preceding month. The report shall be made on a form supplied by the state registrar and shall include the name of the deceased and the date and place of death.

This rule is intended to implement chapter 144 of the Code.

[Filed July 8, 1969]

CHAPTER 98
LOCAL REGISTRARS

98.1(144) Appointment of local registrars. Each county registrar shall transmit to the state registrar, on a form prescribed and furnished by the state registrar, the names of those persons he selects as local registrars and deputy local registrars. The appointees are to assume the duties of office when approval is received from the state registrar. The county registrar may serve as local registrar.

98.2(144) Removal of local registrars. Failure to carry out the provisions of chapter 144 of the Code and rules adopted thereunder shall be considered reasonable cause for removal of local or deputy local registrars by the state registrar.

98.3(144) Duties of local registrars.

98.3(1) Each local registration officer shall serve as the agent of the state registrar in his district, and shall:

a. Maintain lists of hospitals, cemeteries, funeral directors and physicians in his district;

b. Maintain an adequate supply of all forms and blanks furnished by the state registrar and supply these to such persons as require them;

c. Notify the person responsible for the registration when any certificate submitted for registration is unacceptable and secure a complete and correct certificate.

98.3(2) For an event which occurred in his district, the local registrar shall sign each certificate of birth, death and fetal death and enter the date received by him.

98.3(3) Each shipment of certificates transmitted by the local registrar to the county registrar shall be accompanied by a transmittal form provided for that purpose. This same transmittal form shall also accompany these certificates when they are transmitted by the county registrar to the state registrar.

98.4(144) Absence, illness or disability of local registrar. In case of any extended absence of a local registrar, the county registrar and state registrar shall be notified in writing by the local registrar or deputy local registrar.

98.5(144) Forms property of state department of health. All forms, certificates and reports pertaining to the registration of vital events are the property of the state department of health and shall be surrendered to the state registrar or his representative upon demand. The forms supplied or approved for reporting vital events shall be used for official purposes as provided for by law, rules and instructions of the state registrar. No forms shall be used in the reporting of vital events or making copies of vital records except those furnished or approved by the state registrar.

98.6(144) Preparation of certificates. Death certificates must be prepared on a typewriter with a dark ribbon. All other certificates must either be prepared on a typewriter with a dark ribbon or written in dark, unfading ink. All signatures required shall be entered in dark, unfading ink. Unless otherwise directed by the state registrar, no certificate shall be complete and correct and acceptable for filing:

1. That does not have the names typed or printed legibly under all signatures for positive identification purposes;
2. That does not supply all items of information called for thereon or satisfactorily accounts for their omission;
3. That contains major alterations or erasures;
4. That does not contain genuine signatures;
5. That is marked "copy" or "duplicate";
6. That is a carbon copy;
7. That is prepared on an improper form;
8. That contains obviously improper or inconsistent data;
9. That is not prepared in conformity with these rules or instructions issued by the state registrar.

These rules are intended to implement section 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 99
DELAYED BIRTH, DEATH AND MARRIAGE REGISTRATION

99.1(144) Foundling registration. The certificate for a living infant of unknown parentage is to be filed on a regular live birth certificate and shall:

1. Have "foundling registration" plainly marked in the left top margin of the certificate;
2. Show the required facts as determined by approximation and have parentage data left blank;
3. Have the certification of the attendant changed to read "signature of custodian" indicating title, if any.

99.2(144) Birth registration—five days to one year. The registration of a birth after the statutory time prescribed for filing but within one year from the date of birth shall be registered on the standard form of live birth certificate. Such certificate shall not be marked delayed. In any case where the certificate is signed by one of the parents, a statement giving the reason why the certificate cannot be signed by the attendant must appear on the reverse side of the certificate. The state registrar may require additional evidence in support of the facts of birth or an explanation for the delay in filing in any case where there appears to him reason to question the adequacy of the registration.

99.3(144) Delayed birth registration—after one year. All births registered one year or more after the date of birth are to be registered on a special "delayed certificate of birth" form adopted by the state registrar.

99.4(144) Who may file delayed certificate. Any person born in Iowa and whose birth is not recorded in Iowa, or his parent, guardian, next of kin or other person acting for the registrant and having personal knowledge of the facts of birth, may file a delayed certificate of birth with the state registrar.

99.5(144) Delayed certificate to be signed. Each delayed certificate of birth shall be signed and sworn to before an official authorized to administer oaths by the person whose birth is to be registered if such person is 16 years of age or over and is competent to sign and swear to the accuracy of the facts stated therein; otherwise, the certificate shall be signed and sworn to by one of the parents, the guardian, the next of kin, or if

none of these exist, any other older person. In all cases when someone other than the applicant signs the certificate, such person must be older than the applicant and have personal knowledge of the facts of birth.

99.6(144) Facts to be established for delayed registration of birth. The minimum facts which must be established by documentary evidence shall be the following:

1. The full name of the person at the time of birth, except that an additional delayed certificate may reflect a name established by adoption or legitimation when such evidence is submitted;
2. The date of birth and place of birth;
3. The name of the mother;
4. The full name of the father, except that if the mother was not married to the father of the child at the time of birth or during the ten months preceding such birth, the name of the father shall not be entered on the delayed certificate unless the child has been adopted or legitimated or parentage has been determined by a court of competent jurisdiction or there is evidence of acknowledgement of paternity by both parents.

99.7(144) Documentary evidence.

99.7(1) To be acceptable for filing, the name of registrant and the date and place of birth entered on a delayed birth certificate shall be supported by at least:

a. Two pieces of documentary evidence if filed within seven years after the date of birth; or

b. Three pieces of documentary evidence if filed seven years or more after the date of birth.

99.7(2) Each document must be from an independent source and only one of which may be an affidavit of personal knowledge. Facts of parentage need be supported by only one document which may be one of the documents above other than an affidavit of personal knowledge. Documents presented shall be in the form of the original record or a duly certified copy thereof or a certification statement from the custodian of the record or document.

99.7(3) All documents submitted in evidence, other than an affidavit of personal knowledge, must have been executed at least ten years prior to the date of application or have been established prior to the applicant's tenth birthday.

99.7(4) An affidavit of personal knowledge, to be acceptable, must be prepared and signed before an official authorized to administer oaths, by one of the parents, the next of kin, or any other older person. In all cases the affiant must be older than the applicant and have personal knowledge of the facts of birth.

99.8(144) Abstraction and certification by state registrar. The state registrar or his designated representative shall abstract on the delayed certificate of birth a description of each document submitted to support the facts on the delayed birth certificate. This description shall include:

1. The title or description of the document;
2. The name and address of the affiant if the document is an affidavit of personal knowledge or of the custodian if the document is an original or certified copy of a record or certification statement;
3. The date of the original filing of the document being abstracted;
4. The information regarding the birth and parentage contained in the document.

99.9(144) Documents returned.

99.9(1) The state registrar or his authorized agent shall by his signature certify:

a. That no prior birth certificate is on file for the person whose birth is to be recorded;

b. That he has reviewed the evidence submitted to establish the facts of birth;

c. That the abstract of the evidence appearing on the delayed birth certificate accurately reflects the nature and content of the document.

99.9(2) All documents submitted in support of the delayed birth registration shall be returned to the applicant after review and abstraction.

99.10(144) Cancellation after one year. Delayed certificates not completed within one year may be canceled at the discretion of the state registrar. Upon cancellation, the state registrar shall return to the applicant all documents that have been submitted.

99.11(144) Duties of county registrar. Documentary evidence may be presented to the county registrar for review. If presented to the county registrar, he shall prepare an abstract for each document on a separate form provided by the state registrar. The abstracts along with the partially completed delayed certificate form and any affidavits that are being presented in evidence shall be transmitted to the state registrar for final determination of acceptability.

99.12(144) Delayed registration of death records.

99.12(1) The registration of a death after the statutory time prescribed for filing shall be registered on the standard form of death certificate in use at the time of registration.

99.12(2) If the attending physician or medical examiner at the time of death and the attending funeral director or person who acted as such are available to complete and sign the certificate of death, it may be completed without additional documentary evidence and filed with the state registrar. However, for those certificates filed one year or more after the date of death, the physician or medical examiner must state on the reverse side of the certificate that the information in the certificate is based on records kept in his files.

99.12(3) In the absence of the attending physician or medical examiner or the funeral director or person who acted as such, the certificate may be filed by a member of the immediate family of the deceased and shall be accompanied by:

a. An affidavit of the person filing the certificate swearing to the accuracy of the information in the certificate;

b. Two documents which identify the deceased and his date and place of death.

99.12(4) In all cases, the state registrar may require additional documentary evidence to prove the facts of death.

99.13(144) Delayed registration of marriage records.

99.13(1) A delayed certificate of marriage may be filed by the husband or wife, or survivor if either party has died, or an adult son or daughter for any marriage performed in Iowa and not recorded within the statutory time prescribed for filing.

99.13(2) To be acceptable for registration by the state registrar, the delayed certificate of marriage must be supported by:

a. A copy of the license or the application for the license; and

b. A statement transcribed from the official records where the marriage was performed or of the person who performed the ceremony proving that there was a marriage and the date and place of such marriage. Such statements must be prepared and sworn to by the custodian of such records; or

c. An affidavit from one witness to the wedding ceremony swearing to the facts of the marriage.

99.13(3) The delayed certificate of marriage shall be the form of marriage certificate in use at the time of registration.

These rules are intended to implement section 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 100
ESTABLISHMENT OF NEW CERTIFICATES OF BIRTH

100.1(144) Certificates, forms. The standard form of certificate of birth in use at the time of preparation of the new certificate of birth shall be used.

100.2(144) Data required. To establish a new certificate following legitimation or determination of paternity, the necessary data to locate the original record and appropriate parental data shall be on a form furnished or approved by the state registrar.

100.3(144) Certificate following adoption. A new certificate of birth may be prepared by the state registrar for a child born in Iowa upon receipt of an adoption report or certified copy of an adoption decree from the courts of Iowa, the several states of the United States, or a foreign nation.

100.4(144) Certificate following legitimation.

100.4(1) If the natural parents of a child intermarry after the birth of the child, a new certificate of birth may be prepared if the child was born in Iowa. However, if another man is shown as the father on the original certificate, a new certificate may be prepared only when a determination of paternity is made by a court of competent jurisdiction.

100.4(2) An affidavit of paternity prepared and signed by the natural parents and a certified copy of the parents' marriage record or a certified copy of the court determination of paternity must be submitted to the state registrar in order that a new certificate may be prepared.

100.5(144) Certificate following determination of paternity. A certified copy of the court determination of paternity along with the request of the mother that a new certificate be prepared must be submitted to the state registrar in order that a new certificate may be prepared.

100.6(144) Minimum information required. In addition to the information required by law, the new certificate shall also contain as a minimum the following items:

1. The name of the child;
2. The date and place of birth as transcribed from the original certificate;
3. The names and personal particulars of the adoptive parents or of the natural father;
4. The name of the attendant, printed or typed;
5. The same birth number as was assigned to the original certificate;
6. The original filing date.

100.7(144) Original certificate to be sealed. After preparation of the new certificate, the original certificate and the evidence upon which it was based are to be sealed and placed in a special file. The state registrar may inspect such sealed information for purposes of properly administering the vital statistics program.

These rules are intended to implement section 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 101
DEATH CERTIFICATION, AUTOPSY AND DISINTERMENT

101.1(144) Report of autopsy findings.

101.1(1) In cases where an autopsy is to be performed, it shall not be necessary to defer the entry of the cause of death pending a full report of microscopic and toxicological studies.

101.1(2) In any case where the gross findings of an autopsy are inadequate to determine the cause of death, the physician or medical examiner shall enter the cause as "pending" on the certificate and sign the certification. Immediately after the medical data necessary for determining the cause of death have been made known, the physician or medical examiner shall over his signature forward the cause of death to the registrar on a supplemental form provided by the state registrar.

101.1(3) In any case where the autopsy findings significantly change the medical diagnosis of cause of death, a supplemental report of the cause of death shall be made by the physician or medical examiner to the registrar as soon as the findings are available. Such report shall be made a part of the original certificate.

101.2(144) Attending physician not available. An associate physician, who relieves the attending physician while he is on vacation or otherwise unavailable, may certify to the cause of death in any case where he has access to the medical history of the case, provided that he views the deceased at or after death occurs and the death is from natural causes. In all other cases in which a physician is unavailable, the medical examiner shall prepare the medical certification of cause of death.

101.3(144) Hospital or institution may assist in preparation of certificate. When death occurs in a hospital or other institution and the death is not under the jurisdiction of the medical examiner, the person in charge of such institution or his designated representative where the cause of death is known may aid in the preparation of the death certificate as follows:

Place the full name of the deceased, date and place of death on the death certificate blank and obtain from the attending physician the medical certification of cause of death and his signature;

Present the partially completed death certificate identified by the name and the completed medical certification to the funeral director or person who acted as such.

101.4(135,144) Burial-transit permit.

101.4(1) The burial-transit permit shall be issued upon a form prescribed by the state registrar and shall state:

a. The name, age, sex, cause of death and other necessary details required by the state registrar;

b. That a satisfactory certificate of death has been filed;

c. That permission is granted to inter, remove or otherwise dispose of the body;

d. The name and location of the cemetery where interment of the body is to be made, or in case of cremation, the name of the person to whom the ashes are to be delivered.

101.4(2) The funeral director or embalmer, or person acting as such, shall deliver the burial-transit permit to the person in charge of the cemetery before interring, disposing of, or disinterring any body therein.

101.4(3) The person in charge of every cemetery shall see that all the requirements of this chapter relative to burial-transit permits have been complied with before any burial, disposal, or disinterment is made in said cemetery. Such person shall endorse upon said permit the date of burial or disposal over his signature, and shall return the same to the local registrar of the district in which the death certificate is filed within ten days from the date of burial, or within the time fixed by the state registrar. In case reburial is made in another cemetery after disinterment, the burial-transit permit shall accompany the body.

101.5(135,144) Disposition of fetus. In all cases where a fetus has reached a gestation period of 20 completed weeks, a burial-transit permit must be obtained for the disposition of the fetus.

101.6(135,144) Removal of dead body or fetus.

101.6(1) Before taking charge of a dead human body or fetus, the funeral director or person acting as such shall:

a. Contact the attending physician and receive assurance from him that death is from natural causes and that the physician will assume responsibility for certifying to the cause of death or fetal death; or

b. Contact the medical examiner if the case comes within his jurisdiction and receive authorization from him to remove the body.

101.6(2) If the dead body or fetus is to be removed from the registration district where death occurred or the body was found prior to the obtaining of a burial-transit permit, the funeral director shall also notify the local registrar of the registration district of such removal and give him the following information regarding the decedent and removal: Name of the decedent; sex; date and place of death; cause of death, if known; name and address of the funeral director; and the place to which the body is to be removed.

101.6(3) Under no circumstances may a dead body or fetus be finally disposed of or removed from the state prior to obtaining a burial-transit permit. When a dead body or fetus is removed from the state, the burial-transit permit shall accompany the body.

101.7(135,144) Disinterment permits.

101.7(1) Disinterment permits shall be valid for 30 days after the date of issuance. Disinterment permits are to be issued in triplicate on a form prescribed by the state registrar: One copy filed with the sexton or person in charge of the cemetery in which disinterment is to be made; one copy to be used during transportation and filed with the sexton or person in charge of the cemetery of reinterment; and one copy to be returned within

ten days after the date of disinterment by the funeral director or embalmer to the state registrar.

101.7(2) A dead body, properly prepared by an embalmer and deposited in a receiving vault, shall not be considered a disinterment when removed from the vault for final burial.

101.8(144) Extension of time. If the attending physician or medical examiner is unable to complete the medical certification of cause of death or if the funeral director is unable to obtain the personal information about the deceased within the statutory time period, the funeral director shall file a death certificate form completed with all information available. Such certificate shall be authority for the local registrar to issue a burial-transit permit. As soon as possible, but in all cases within 15 days, a supplemental report shall be filed with the local registrar providing the information missing from the original certificate.

These rules are intended to implement sections 135.11(12) and 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 102
CORRECTION AND AMENDMENT OF VITAL RECORDS

102.1(144) Application to amend records.

102.1(1) To amend a birth certificate, application may be made only by one of the parents, the guardian, or the registrant if of legal age.

102.1(2) To amend a death or fetal death certificate, application shall be made by the next of kin or the funeral director or person acting as such. Corrections or amendments to the medical certification of cause of death shall be requested by the attending physician or the medical examiner. The physician or medical examiner may by affidavit amend the cause of death within 90 days following the date of death or fetal death. Any amendment after 90 days following death or fetal death can be made only by court order. Provided, however, that the cause of death may be amended at any point upon submission of a report of autopsy findings.

102.1(3) To amend a marriage record, application shall be made by the parties married, the officiant, or by the next of kin.

102.1(4) To amend a divorce record, a certification must be received from the clerk of court maintaining the record from which the report was prepared stating in what manner such record has been amended. Those items appearing on the divorce record which are not a part of the divorce decree may be corrected or amended either by query or upon application of the parties to the divorce or their legal representatives.

102.2(144) Correction of minor errors within first year. Corrections of obvious errors, transposition of letters in words of common knowledge, or omissions, may be made by the state registrar within the first year after the date of the event, either upon his own observation, upon query, or upon request of a person with a direct and tangible interest in the record. If such additions or minor corrections are made by the state registrar, a notation as to the source of the information, together with the date the change was made and the initials of the authorized agent making the change, shall be made on the record. Certificates corrected under this section are not to be marked amended.

102.3(144) Amendments or major corrections.

102.3(1) All other corrections or amendments unless covered elsewhere in these rules or in the law, shall be supported by:

a. An affidavit setting forth

(1) Information to identify the certificate;

(2) The incorrect data as it is listed on the certificate;

(3) The correct data as it should appear.

b. One or more pieces of documentary evidence supporting the correction or amendment. If the application for correction or amendment is made one year or more after the event, the documentary evidence must be established at least five years prior to the date the correction or amendment is requested or within seven years of the date of event.

102.3(2) The state registrar may determine a priority of best evidence and may, at his discretion, require additional documentary evidence to support the requested correction or amendment. The state registrar shall evaluate the evidence submitted in support of any amendment, and when he finds reason to question its validity or adequacy, he may reject the amendment and shall advise the applicant of the reasons for this action.

102.4(144) Correction of same item more than once. Once a correction of an entry is made on a vital record, that entry shall not be corrected again unless:

1. It can be shown that the first correction was made through mistake; or
2. A court order is received from a court of competent jurisdiction.

102.5(144) Methods of amending certificates. Corrections or amendments shall be made by drawing a single line through the incorrect item, if listed, and inserting the correct or missing data immediately above it or to the side of it, or by completing the blank item, as the case may be. In all cases where a line must be drawn through an original entry, it must not obliterate the original entry. In addition, there shall be inserted on the certificate, or in a separate file, a statement identifying the affidavit and documentary evidence used as proof of the correct facts and

the date the correction was made. The word "amended" shall be placed on the certificate. In every case where the word "amended" is required to appear on the certificate, it shall appear on all copies of such certificates.

102.6(144) Change of given names within first year.

102.6(1) Until the registrant's first birthday, given names may be added or changed upon written request of:

a. Both parents; or

b. The mother in the case of a child born out of wedlock or the death or incapacity of the father; or

c. The father in the case of the death or incapacity of the mother; or

d. The guardian in the case of the death or incapacity of both parents.

102.6(2) This procedure may be employed to change a given name only once. Thereafter, and at any time after the first year, the given name may be changed only upon submission of a court order.

102.7(144) Addition of given names until seventh birthday.

102.7(1) Until the registrant's seventh birthday, the given name for a child whose birth was reported without a given name may be added based upon an affidavit signed by:

a. Both parents; or

b. The mother in the case of a child born out of wedlock or the death or incapacity of the father; or

c. The father in the case of the death or incapacity of the mother; or

d. The guardian or agency having legal custody of the registrant in the case of death or incapacity of both parents.

102.7(2) A certificate amended in this manner is not to be marked amended.

102.8(144) Addition of given name after seventh birthday. After the seventh birthday one or more pieces of documentary evidence must be submitted to substantiate the given name being added.

102.9(144) Legal change of name. For a legal change of name, a certified copy of the court order changing the name must be presented to the state registrar along with data to identify the birth certificate and a request that it be amended to show the new name.

These rules are intended to implement section 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 103
CONFIDENTIALITY OF RECORDS

103.1(144) Disclosure of data.

103.1(1) The state registrar or county registrar shall permit the inspection of a record or issue a certified copy of a record or part thereof only when he is satisfied that the applicant has a direct and tangible interest in the content of the record and that the information contained therein is necessary for the determination of a personal or property right.

a. A request from the registrant, a member of his immediate family, his guardian, or their respective legal representatives shall be considered to be a direct and tangible interest.

b. For the purpose of securing information or obtaining certified copies of vital records, the term legal representative shall include an attorney, physician, funeral director, insurance company, or an authorized agency acting in behalf of the registrant or his family.

c. For the purpose of securing and obtaining data from vital records, requests from natural parents of adopted children, in the absence of a court order, and requests from commercial firms or agencies requesting listings of names and addresses shall not be considered to be direct and tangible interest.

103.1(2) The state registrar may permit use of data of vital statistics records for research purposes subject to conditions the state registrar may impose to insure that the use of the data is limited to such research purposes.

103.1(3) The state registrar or county registrar may disclose data from vital statistics records to federal, state, county or municipal agencies of government which request such data in the conduct of their official duties, subject to conditions the state registrar may impose to insure that the use of the data is limited to official purposes.

103.1(4) Information on vital statistics records indicating a birth occurred out-of-wedlock may not be disclosed unless it can be shown that the information is needed to secure some benefit or privilege for the registrant and that the welfare of the registrant will not be compromised. Also such information may be made available for the official purposes of federal, state, county and municipal agencies charged by law with the duties of detecting or prosecuting crime, preserving the internal security of the United States, or for the determination of citizenship.

103.1(5) Whenever it shall be deemed necessary to establish an applicant's right to information from vital statistics records, the state registrar or county registrar may require written application, identification of the applicant, or a sworn affidavit.

103.1(6) No data shall be furnished from records for research purposes until the state registrar has prepared in writing the conditions under which the records may be used and received an agreement signed by a responsible agent of the research organization agreeing to meet with and conform to such conditions.

These rules are intended to implement section 144.3 of the Code.

[Filed June 8, 1971]

CHAPTER 104
COPIES OF VITAL RECORDS

104.1(144) Certified copies and verifications. Certified copies of vital statistics certificates may be prepared and issued by the state registrar or the county registrar.

104.1(1) Full or short form certified copies of vital records may be made by mechanical, electronic, or other reproductive processes, except that the medical and health data on birth and fetal death certificates, other than the cause of fetal death, shall not be included.

104.1(2) When a certified copy is issued, each certification shall contain a statement certifying that the facts are the true facts recorded in the issuing office; the date issued; the name of the issuing office; the registrar's signature or an authorized facsimile thereof; and the seal of the issuing office.

104.1(3) Confidential verifications of the facts contained in vital statistics records may be furnished by the state registrar to any federal, state, county or municipal government agency or other entity representing the interest of the registrant. Such confidential verifications shall be on forms prescribed and furnished by the state registrar or on forms furnished by the requesting agency and acceptable to the state registrar, or the state registrar may authorize the verification in other ways.

104.2(144) Cancellation of fraudulent records. When the state registrar is satisfied that a certificate was registered through fraud or misrepresentation, he shall give to the person named in the certificate a notice in writing of his intention to cancel said certificate. The notice shall give such person an opportunity to appear and show cause why the certificate should not be canceled. The notice may be served on such person, or in the case of a minor or incompetent, on his parent or guardian by forwarding the notice by certified mail to his last known address on file in the division. Unless such person or his parent or guardian shall within 30 days after the date of mailing the notice show cause satisfactory to the state registrar why the certificate shall not be canceled, the state registrar may cancel the certificate, and it shall not be available for certification.

These rules are intended to implement section 144.3 of the Code.

TITLE XIX

RENAL DISEASE PROGRAM

CHAPTER 111
LIMITATIONS OF ASSISTANCE AND REVIEW

111.1(135) Limitations of assistance and review.

111.1(1) All assistance from the renal disease program by the state department of health must be within the budget limitation for the program.

111.1(2) Where there is difficulty in determining the patient's eligibility, or upon request of the patient, the case shall be presented to a subcommittee of the renal disease advisory committee for review and recommendation.

[Filed October 11, 1972]

CHAPTER 112
RESIDENCE REQUIREMENTS

112.1(135) Residence requirement.

112.1(1) To be eligible for assistance from the renal disease program, a person shall be a resident of the state of Iowa except as provided in 112.1(2). Residence is that place in which a person is living for other than a temporary purpose. Residence once acquired continues until the individual abandons it and acquires residence elsewhere. Temporary absence is the absence of a person during which time he intends to return or because of a change in intent, he does return. A temporary absence from the state shall not be deemed to interrupt residence requirements.

112.1(2) A person who is a transient in travel status through the state may be eligible for assistance from the renal disease program if the following conditions exist:

a. An emergency situation requiring dialysis,

b. The individual is not possessed of real or personal property, whether located in the state or not, or financial resources sufficient to defray the cost of emergency renal dialysis, and

c. The individual is expected to continue his travel status as soon as such travel is safe and possible.

[Filed October 11, 1972]

CHAPTER 113
PATIENT FINANCIAL ELIGIBILITY

113.1(135) Financial eligibility.

113.1(1) Payment will be approved only for those services or that part of the cost of a given service for which no financial resources exist. Financial resources include health insurance, eligibility for care from veterans administration, Iowa or county departments of social services, Title XVIII (Medicare) and Title XIX (Medical Assis-

tance) of the Social Security Act, vocational rehabilitation, private foundations or other resources available to the patient for meeting the cost of renal disease treatment.

113.1(2) In determining eligibility for assistance from the renal disease program, it is necessary to take into consideration the value of real and personal property available to the patient. Such consideration and determination will be made on an individual case basis from information provided by or for the patient to the state department of health. A copy of the most recent federal income tax returns of the persons financially responsible for the medical care of the patient shall be submitted to the state department of health.

113.1(3) At the present level of funding, a maximum of $4,000 per patient assistance per year to an accepted patient is permitted. The directors of the renal dialysis evaluation centers shall determine the annual costs for renal dialysis which are not met by all other financial resources available to the patient. Financial assistance may be given for a percentage of unmet costs based upon income limitations as provided in "*a*" and "*b*":

a. Married and living in same household with spouse (including income of spouse)

Taxable Income	Assistance provided for percentage of unmet costs
Below $7,999.99	100%
$ 8,000 to $ 8,999.99	90%
$ 9,000 to $ 9,999.99	80%
$10,000 to $10,999.99	70%
$11,000 to $11,999.99	60%
$12,000 to $12,999.99	50%
$13,000 to $13,999.99	40%
$14,000 to $14,999.99	30%
$15,000 to $15,999.99	20%
$16,000 to $16,999.99	10%
$17,000 and above	0%

b. Single

Taxable Income	Assistance provided for percentage of unmet costs
Below $5,999.99	100%
$ 6,000 to $ 6,999.99	90%
$ 7,000 to $ 7,999.99	80%
$ 8,000 to $ 8,999.99	70%
$ 9,000 to $ 9,999.99	60%
$10,000 to $10,999.99	50%
$11,000 to $11,999.99	40%
$12,000 to $12,999.99	30%
$13,000 to $13,999.99	20%
$14,000 to $14,999.99	10%
$15,000 and above	0%

113.1(4) In the event the patient is a dependent minor, financial information shall be provided by the responsible parent or guardian of the minor. Consideration and determination of eligibility of the patient will be on an individual case basis from the financial information.

113.1(5) In making determinations of eligibility, both income and estate are to be considered. Where there are spouse and children, the estate should not be depleted to the point that spouse and children will become dependents of the state in case of death of the patient.

These rules are intended to implement chapter 135 of the Code.

CHAPTERS 114 to 120
Reserved for future use

TITLE XX

EYEGLASS LENSES

CHAPTER 121
STANDARD FOR IMPACT RESISTANCE AND METHOD OF TESTING

121.1(135) Standard for impact-resistant lenses. In order for a lens to be considered impact resistant, the lens must not fracture when subjected to the test specified below. For the purpose of these rules, a lens will be considered to have fractured if it cracks through its entire thickness, including a laminar layer, if any, and across a complete diameter into two or more separate pieces or if any lens material visible to the naked eye becomes detached from the ocular surface.

121.2(135) Method of testing lenses. All lenses used in eyeglasses or sunglasses must be capable of withstanding an impact test in which a ⅝-inch steel ball weighing approximately 0.56 ounces is dropped from a height of 50 inches upon the horizontal upper surface of the lens. The ball shall strike within a ⅜-inch diameter circle located at the geometric center on the exterior surface of the lens. The ball may be guided, but not restricted, in its fall by being dropped through a tube extending to within approximately 4 inches of the lens. The test shall be conducted with the lens supported by a tube (1-inch inside diameter, 1¼-inch outside diameter, and approximately 1-inch high) affixed to a rigid iron or steel base plate. The total weight of the base plate and its rigidly attached fixtures shall be not less than 27 pounds. For lenses of small minimum diameter, a support tube having an outside diameter of less than 1¼ inches may be used. The support tube shall be made of rigid acrylic plastic, steel or other suitable substance and shall have securely bonded on the top edge a ⅛- by ⅛-inch neoprene gasket having a hardness of 40±5, as determined by ASTM Method D 1415; a minimum tensile strength of 1,200

pounds, as determined by ASTM Method D 412; and a minimum ultimate elongation of 400 percent, as determined by ASTM Method D 412. The diameter and the contour of the lens support may be modified as necessary so that the ⅛- by ⅛-inch neoprene gasket supports the lens at its periphery. Each finished impact-resistant glass lens for prescription use shall be subjected to the impact test prescribed by this rule.

These rules are intended to implement chapter 135 of the Code.

CHAPTERS 122 to 125
Reserved for future use

TITLE XXI

TUBERCULAR PATIENTS

CHAPTER 126
APPLICATION FOR FREE TREATMENT

126.1(254) Residence requirement. Any legal resident of Iowa suffering from tuberculosis and agreeing to remain under treatment until discharged by the sanatorium as no longer having tuberculosis in a communicable stage may apply for a free treatment certificate. Any person actually residing in the state of Iowa with a bona fide intent to remain in the state of Iowa is to be considered a legal resident of Iowa for the purposes of administration of this law. Applicants are not limited to those who have acquired legal settlement in a county of this state.

126.2(254) Certifying agent. In counties maintaining a separate public tuberculosis hospital, the application is made to the board of hospital trustees. In counties which do not maintain such a hospital, the application is made either to the county director of social welfare or to the county overseer of the poor, whichever is designated by the board of supervisors.

126.3(254) Treatment costs considered a public health expenditure. In acting upon applications, the board of hospital trustees, county director of social welfare or overseer of the poor are to "consider expenditures of public funds for treatment of tuberculosis as expenditures for the protection of the public health and not as moneys advanced in the nature of welfare or relief." This principle constitutes legal recognition of the public interest in the hospitalization and segregation of tuberculous patients, as an important means of preventing the spread of infection to others. The motive for granting free care is protection to the public, and thus such protection becomes the paramount interest in considering applications for free care.

126.4(254) Issuance of certificates—controlling principles.

126.4(1) The board of hospital trustees, county director of social welfare or overseer of the poor are to grant free treatment to a tuberculous applicant who "is not possessed of sufficient income or estate to enable him to make payment of the costs of such treatment in whole or in part without affecting his reasonable economic security or support, in light of his resources, obligations and responsibilities to dependents."

126.4(2) The period of treatment, convalescence and rehabilitation varies for each patient, and the issuing officer shall give consideration to the probable length of such treatment and to the probable post-treatment period, during which the patient may not be able to work after being discharged from the sanatorium, and to the living costs of family and other dependents during the period of treatment, convalescence and rehabilitation, coupled with the need for support of the family in the event the patient does not recover.

126.4(3) The applicant shall not be required to encumber, sell or otherwise sacrifice a homestead required for the housing and maintenance of his family and dependents nor other property holdings to the extent that income from the same is required to provide the necessities of living for such family and dependents and certificates of free care shall not be denied by virtue of the existence of such property holdings by the applicant or those legally responsible for his care.

126.4(4) Employed members of the applicant's household or those legally responsible for his care shall be allowed to retain such wages as they may earn as are necessary to maintain the reasonable economic security and support of the applicant's household and their obligations and responsibilities to their own or to the applicant's dependents, and certificates of care shall not be denied because of the existence of any such wages or income.

126.4(5) Family savings in a reasonable amount, together with continued maintenance of existing life insurance policies on the applicant or his family in a reasonable amount, shall be preserved to the extent the same are needed to assure the family's economic security during the period of treatment, convalescence and rehabilitation and to provide such security for a reasonable period of family rehabilitation and adjustment in the event of the possible death of the applicant and the issuance of a certificate shall not be denied by virtue of such savings.

126.4(6) In the event the applicant is the head of the family, careful consideration shall be given to the probable loss of income and the consequent need to preserve property holdings, savings and other income sources to carry the family through the period of treatment, convalescence and rehabilitation, until such applicant can again provide reasonable security and support for the family and liquidation of his obligations to himself and his dependents.

126.4(7) In the event the applicant is a wife or mother, not the head of the family, consideration shall be given to the probable added family expense to maintain and operate the home and household until applicant can return and with safety assume in full her former responsibilities. In the event the applicant is a child or other member of the family, but not the head of such family, consideration shall be given to the possible financial needs devolving upon the applicant because of a probable death and disability of the head of his family.

126.4(8) In general, favorable consideration shall be given to applicants who are possessed of moderate resources. Applicants whose resources clearly indicate that all of the costs of treatment can be met without jeopardizing the family's welfare and independence during the period of treatment and the succeeding period of convalescence and rehabilitation shall be expected to meet such costs.

126.4(9) The object of the law and these rules is to obtain admission of the tuberculous patient to a tuberculosis sanatorium with a minimum of delay. Doubtful situations shall be resolved in favor of the public benefits resulting from hospitalization and segregation of a person with tuberculosis.

126.5(254) Postsanatorium treatment. Necessary postsanatorium treatment including check-up examinations and pneumothorax refills as prescribed by the sanatorium medical staff shall be within the scope of free treatment furnished under the law.

126.6(254) Review. Any applicant denied a certificate may have his application reviewed by a district court, who shall hear the matter anew under such rules and procedure as he may prescribe. The county director of social welfare, the overseer of the poor, or the board of hospital trustees, as the case may be, shall co-operate in furnishing to the court such information as it may require.

126.7(254) Forms.

126.7(1) Form T-1 is to be completed in duplicate at the time a patient requests free treatment. The original copy is to be a part of the certifying agency's record. The duplicate copy is to be forwarded promptly to the Iowa State Department of Health, Des Moines, Iowa.

126.7(2) Form T-2 is to be completed in quadruplicate by the certifying agency. The original copy is to be issued to the applicant who will present the certificate to the designated public tuberculosis sanatorium in accordance with such contracts, resolutions or actions as the board of supervisors of the county may have taken in connection with their provision for the treatment of tuberculous persons under chapter 254 of the Code. The second copy of T-2 shall be added to the certifying agency's file on the case. The third copy of T-2 shall be promptly filed with the county auditor of the county of legal settlement of the applicant. The fourth copy of T-2 shall be delivered promptly to the Iowa State Department of Health, Des Moines, Iowa. In the event the application for free care is denied, the Form T-2 shall be completed with a statement explaining the reason for rejection and the distribution of the copies shall be the same as the distribution for approved applications. Upon delivery of the decision where free care is denied, the certifying agency should inform the applicant of his privilege of requesting a review of his case before the judge of the district court in his county of legal residence.

126.8(254) Distribution of forms for applicants having no legal settlement. In case of an applicant not having a county of legal settlement in the state of Iowa or any rights for legal settlement in another state or when such settlement of the applicant is unknown, the certifying agency shall consider the application in the same manner as in other cases and appropriately issue certificates of free care, if the applicant is residing in the county where the application is made. In these cases, the certifying officer shall name the state tuberculosis sanatorium at Oakdale, Iowa, as the place of treatment in the certificate for free care. The original copy of Form T-2 shall then be issued to the applicant, as in other cases. The second copy of Form T-2 shall be retained in the agency files, as in other cases. The third copy of Form T-2 shall be delivered to the superintendent of the state tuberculosis sanatorium at Oakdale, Iowa. The fourth copy of Form T-2 shall be delivered to the Iowa State Department of Health at Des Moines, Iowa, as in other cases.

[Filed prior to July 1, 1952]

TITLE XXII

COUNTY MEDICAL EXAMINERS

CHAPTER 127

COUNTY MEDICAL EXAMINERS

127.1(339) Types of death under the jurisdiction of the county medical examiner.

127.1(1) *From violence.* Any accident, suicide or homicide resulting from physical, mechanical, chemical, electrical, thermal or related means. A medical examiner's investigation and report is required irrespective of the period of survival following injury and medical attendance at the time of injury or during a period of survival.

127.1(2) *Suddenly, when in apparent health.* This term should be reserved for the following situations:

a. Apparently instantaneous death without obvious cause.

b. Death during or following an unexplained syncope or coma.

c. Death during an unexplained, acute, or rapidly fatal illness.

127.1(3) *When unattended by a physician during the period of 36 hours immediately preceding death.* This term should be reserved for the following situations:

a. Found dead without obvious or probable cause.

b. Unattended by a physician during the terminal illness, particularly if such illness appears unrelated to a disease previously diagnosed and under treatment.

c. Accordingly, the medical examiner need not investigate or report a death resulting from or due to a terminal illness which had been diagnosed and where the patient was under treatment by a licensed physician, even though the physician had not seen the patient within the 36 hours preceding death. In these cases if the physician has not seen the patient within 20 days prior to death, then the cases should be referred to the medical examiner.

d. Fetal death (stillbirth) unattended by a physician. A fetal death (stillbirth) is a fetus born dead after reaching the twentieth week of gestation.

127.1(4) *As a result of, or following, an abortion.* All known deaths as a result of or following an abortion shall be reported to the county medical examiner by all parties, physicians and hospitals knowing the circumstances of such deaths.

127.1(5) *While in custody of the law.* Any death involving a person while in custody of the law or confined to any prison for any cause.

127.1(6) *In an accident in a gypsum or coal mine.* All deaths occurring in a gypsum or coal mine automatically become medical examiner's cases.

127.1(7) *In a suspicious, unusual, or unnatural manner.* Any death suspected having resulted from accident, suicide, or homicide, or any death not otherwise defined.

127.1(8) *From a disease which might constitute a threat to public health.* Any such death investigated by the medical examiner shall be reported to the local health authority.

127.2(339) Death certificates. The certificate of death shall be executed on the standard form and the certification of death shall be completed in full by the medical examiner and given to the funeral director to whom the body is released for burial arrangements. It is, however, the duty of the funeral director in charge of the remains to complete the particulars of the certificate and file the certificate with the local registrar in the county wherein death occurred. A death certificate must be filed before a burial or transit permit will be issued and prior to disposal of the body.

127.3(339) Cremation. Permit must be issued by county medical examiner in the county where the death occurred.

127.4(339) Taking charge of body.

127.4(1) The medical examiner, upon notification of death shall view the body.

127.4(2) In all cases coming under the jurisdiction of the medical examiner, the decedent shall not be moved from the place of death without the consent of the medical examiner.

127.4(3) The medical examiner may, after investigation and determination that the case is not under the jurisdiction of the medical examiner, refer the case to the attending physician.

These rules are intended to implement chapters 135 and 339 of the Code.

[Filed May 10, 1966]

TITLE XXIII

ANIMALS FOR SCIENTIFIC RESEARCH

CHAPTER 128
DOGS FOR SCIENTIFIC RESEARCH

128.1(351A) An institution as defined in section 351A.1 may make application to the department for authority to request dogs from a pound. Such application shall be on a form furnished by the department, and will include the following:

128.1(1) Name and principal function of institution;

128.1(2) The name and title of its principal officer or manager;

128.1(3) The names and qualifications of the principal persons in charge of research or teaching involving the use of dogs;

128.1(4) The names and qualifications of the principal persons in charge of dog care;

128.1(5) A description of the physical facilities available for the care and custody of dogs;

128.1(6) A general statement of the use proposed to be made of dogs.

128.2(351A) The department may make such investigation of the applicant as it deems necessary, and if satisfied that the institution is fit and proper and that the public interest would be served by so doing, the department will issue its authorization to the institution. The authorization will be in writing.

128.3(351A) An authorization will expire on June 30 of each year, but an institution may at any time apply for further authorization as provided herein for initial authorization.

128.4(351A) Authorized institutions shall at all times and in all respects comply with section 351A.5 and shall further comply with the following minimum requirements for the care and comfort of animals:

128.4(1) All dogs used for experimental purposes must be lawfully acquired and their retention shall be in strict compliance with the law.

128.4(2) Research projects involving live dogs must be performed by, or under the immediate supervision of, a qualified biological scientist.

128.4(3) The housing, care and feeding of all experimental dogs shall be supervised by a qualified veterinarian or other biological scientist competent in such matters.

128.4(4) Rooms in which dogs are to be housed shall be provided with a floor which can be kept clean, and the room shall be adequately lighted and ventilated. The temperature shall be held within reasonable limits. Cages should be of sufficient size to permit the dogs to stand and lie in a normal position. It is generally conceded that dogs maintained for long periods are in better physiological condition if they exercise regularly. Dogs housed out of doors should be given adequate protection from direct sunlight or inclement weather.

128.4(5) The food and water supplied to all experimental dogs, subject to the nature of the research, must be palatable, and of sufficient quantity and proper quality to maintain the dogs in good health.

128.4(6) In any operation likely to cause greater discomfort than the attending anesthetization, the dog shall first be anesthetized and be maintained in that condition until the operation is ended. Whenever anesthesia would defeat the purpose of the experiment, the experiment must be approved and directly supervised by the principal person in charge of the research as named in 128.1(351A).

128.5(351A) An institution reporting to a public body the noncompliance of any pound with the provisions of chapter 351A of the Code shall forthwith send a duplicate of such notice or report to the department. The department will make such investigation as is necessary, and notify the complaining institution and the public body receiving the report of the result of such investigation.

TITLE XXVI

LICENSING BOARDS

CHAPTER 135

MEDICAL EXAMINERS

(Medicine and Surgery, Osteopathy and Osteopathic Medicine and Surgery)

135.1(146, 147, 148, 150) General requirements.

135.1(1) He shall submit a completed application form with attached recent photograph accompanied by statutory fee.

Statements made in the said application shall be subscribed and sworn to by the applicant and attested under seal by a notary public.

135.1(2) He must be a citizen of the United States, or have legally declared his intention of becoming a citizen of the United States.

135.1(3) He must furnish evidence of good moral character by:

a. Providing the names of references as to his moral character and professional standing.

b. Presenting a photostatic copy of discharge papers, if the applicant has been in the military service at any time.

c. Answering the questions in application as to whether or not the applicant has ever been convicted of an indictable misdemeanor, felony, or violation of any state or federal narcotic Act.

135.1(4) Present a photostatic copy of a certificate of proficiency in the basic sciences issued to him by the state board of examiners in the basic sciences. This requirement is not applicable to resident physician's licenses or temporary licenses.

135.1(5) Present a photostatic copy of a diploma granting the degree Doctor of Medicine and Surgery or Osteopathic Medicine and Surgery or its equivalent issued to the applicant by a school or college of medicine and surgery or osteopathic medicine and surgery approved by the board of medical examiners.

a. The list of approved schools or colleges of medicine prepared by the Council on Medical Education and Hospitals of the American Medical Association and the Association of American Medical Colleges, and the list of colleges of osteopathic medicine and surgery, prepared by the American Osteopathic Association are accepted. However, such acceptance shall not apply to a diploma granted by an approved college of medicine and surgery or osteopathic medicine and surgery if the applicant did not complete his academic training at said approved college.

b. The medical examiners may accept in lieu of a diploma from a medical college approved by them, all of the following:

(1) A diploma issued by a medical college which has been neither approved nor disapproved by the medical examiners; and

(2) The completion of three years of training as a resident physician which training has either been approved by or is acceptable to the medical examiners; and

(3) The recommendation of the Educational Council for Foreign Medical Graduates.

135.1(6) He shall present a photostatic copy of a certificate indicating the completion of an internship in a hospital approved by the Iowa board of medical examiners.

The lists of hospitals approved for intern training in the United States and Canada, prepared by the Council on Medical Education and Hospitals of the American Medical Association and the Committee on Hospitals of the American Osteopathic Association, are accepted.

135.1(7) He must satisfactorily complete a state or national board examination and present a photostatic copy of a state license or national board certificate obtained by him as a result of such examination.

135.1(8) Each application must include a record of the number and date each license was issued, the manner in which such license or licenses were obtained, and a statement as to whether or not any license so issued has ever been suspended or revoked.

135.1(9) Each application shall include a chronologic statement as to all the places where the candidate has practiced, type of practice engaged in and the period of time so engaged.

135.1(10) Any candidate applying for licensure shall be required to appear for a personal interview before the board or before a member thereof, unless waived by the board.

135.2(147) Rules for conducting examinations.

135.2(1) The application accompanied by a fee of $50 must be on file at least 15 days before the date of examination.

135.2(2) The board of medical examiners may require written, oral and practical examinations of any applicant, but ordinarily applicants who pass the written examination will be excused from oral or practical examination.

135.2(3) The following is the schedule of subjects in which examinations are required:

Anatomy, including Histology and Embryology

Chemistry

Materia Medica, Pharmacology and Therapeutics

Medicine, including Psychiatry

Obstetrics and Gynecology

Pathology and Bacteriology

Pediatrics

Physiology

Public Health, Hygiene, Medical Jurisprudence

Surgery including Orthopedics, Urology, Eye, Ear, Nose and Throat

Two hours will be allowed for each examination.

135.2(4) A general average of not less than 75 percent will be required to pass, but no license will be granted to an applicant whose grade is below 70 percent in any one subject.

a. Any candidate who fails in his examination shall be entitled to take a second examination without further fee or application at any time within 14 months after the first examination. The candidate shall be required to repeat the entire examination in his second examination.

b. Thereafter, the candidate will be required to file a new application with fee of $50 and take the entire examination.

135.2(5) A senior student expecting to graduate from an approved college of medicine and surgery or osteopathic medicine and surgery may be admitted to the examination upon presentation of a statement from the dean of his college certifying his good standing; but his license will not be granted until he has furnished proof of graduation and satisfactory completion of his internship.

135.2(6) A student who has completed the first two years of study in a college approved by the board may be admitted to the examination in anatomy, chemistry, physiology, pathology and bacteriology, providing he:

a. Files with his application a certificate of good standing from the dean of said college.

b. Presents a photostatic copy of a certificate of proficiency in the basic sciences issued by the state board of examiners in the basic sciences.

c. Pays a fee of $25 to the board of medical examiners which fee shall not be returnable nor entitle said applicant to additional examinations, but after graduation applicant will be required to pay $25 only for the final examination.

In each instance wherein the candidate attains a general average of 75 percent in said examination, the ratings attained shall be credited upon his final examination after graduation. However, if the candidate receives a grade below 70 percent in any one subject, he shall be deemed to have failed the partial examination and said candidate will be required to repeat all of the partial examination subjects at the time he takes the entire examination following graduation from his professional school.

135.2(7) No candidate shall under any circumstances enter the examinations more than 30 minutes late unless excused by the board or a member thereof, and no candidate shall leave the room within 30 minutes after distribution of the examination papers. All time lost by being absent shall be included in the time allotted to the examination of that particular subject.

135.2(8) Candidates will not be permitted to communicate with each other during examination, or to have in their possession help of any kind. Any applicant who violates this requirement will be dismissed and deemed to have failed the entire examination.

135.2(9) All examinations shall be written legibly in English with pen and ink on examination paper provided by the board.

135.2(10) Each applicant will be given a confidential number which he shall inscribe at the

top center of each page of his examination; no other marks shall be placed on any paper whereby the identity of the candidate may become known. The pages are to be numbered in the upper right-hand corner.

135.2(11) Handwriting must be legible. Punctuation, grammar and general appearance of examination papers will be considered in grading papers.

135.3(147, 148) Licensure by reciprocity or interstate endorsement.

135.3(1) The fee is $100.

135.3(2) A license to practice medicine and surgery or osteopathy or osteopathic medicine and surgery by reciprocity or by endorsement may be issued on the basis of a written examination in substantially all of the subjects required by this board given by a state examining board having reciprocal relations with the Iowa board, provided that the applicant meets all other requirements for licensure in this state.

135.3(3) If any state with which this state reciprocates places any limitations or restrictions upon licentiates of this state, the same limitations or restrictions may be imposed upon licentiates of such state applying for admission to practice in this state on the basis of reciprocity or endorsement.

135.3(4) The statements made in the application must be reviewed and verified by the state examining board issuing the original license certifying under seal as to the subjects in which the applicant was examined, the grade obtained in each subject and the general average attained in the entire examination.

If the examination failed to include one or more of the subjects required by the board of medical examiners, the applicant may be required to take a supplemental examination in the subjects omitted, and the grades attained thereon shall be added to those of his former examination in order to determine the general average.

135.3(5) No reciprocal license or license by endorsement shall be issued to any applicant who has previously failed an examination in this state. However, he may apply for licensure by examination.

135.3(6) In all cases the board of medical examiners reserves the right to review the examination papers and grades upon which reciprocal or endorsement certification may be granted before accepting the same.

135.3(7) No reciprocal license or license by endorsement shall be issued except on the basis of a license received by examination, and the applicant must have completed at least one year of practice in the state from which he applies or other practice or training deemed by the board to be the equivalent thereof.

135.3(8) The board may require written, oral or a practical examination of an applicant for licensure by reciprocity or endorsement.

135.4(147, 148) License by endorsement of national board certificate.

135.4(1) The rules listed under the title "Licensure by Reciprocity Agreement or Interstate Endorsement" shall apply to all candidates for licensure by endorsement of national board credentials.

135.4(2) The certificate of examination granted by the National Board of Medical Examiners or the National Board of Osteopathic Examiners of the United States of America may be accepted in lieu of the examination required for licensure in Iowa.

135.4(3) A license to practice medicine and surgery or osteopathic medicine and surgery, issued by the duly constituted authority of another state, territory or foreign country, may be accepted in lieu of the examination required for licensure in this state.

This rule is intended to implement sections 147.47, 147.49, 147.51, 147.53, 147.80, 147.104, 148.3 and 150A.7 of the Code.

135.5(148) License to practice as a resident physician.

135.5(1) Limited licenses to practice medicine and surgery in hospitals as resident physicians only are granted on the basis of examination or endorsement for a period of one year, renewable for six additional years at a fee of three dollars annually on the first day of July following the date of issuance of such license.

135.5(2) Each applicant shall:

a. Submit a completed application form with attached photograph accompanied by a fee of $15.

b. Present a photostatic copy of a diploma issued by a school of medicine or college of medicine approved by the board of medical examiners.

c. Present a photostatic copy of a certificate indicating the completion of one year of internship in a hospital approved by the board of medical examiners.

d. Be a citizen of the United States or have legally declared intention of becoming a citizen of the United States.

The board may waive this requirement for foreign graduates, here for training and study only, who are properly admitted under visas of the state department of the United States.

135.5(3) Candidates may be required to satisfactorily complete an examination prescribed by the board.

a. The board may require written, oral or practical examination.

b. In any case, the board may require the candidate to appear for a personal interview before either the board or a member thereof.

c. Grades received in a state licensure or national board examination may be accepted in lieu of a written examination conducted by this board, in which instance:

(1) The applicant must furnish a photostatic copy of an original certificate of license or national board certificate obtained as a result of such examination.

(2) The statements made in the application must be reviewed and verified by the examining board issuing the original certificate, who will also certify, under seal, as to the schedule of subjects in which the applicant was examined, the grades given thereon and the general average attained.

135.6(148) Temporary licensure.

135.6(1) Temporary licenses may be granted on the basis of examination or endorsement for a period not to exceed one year.

135.6(2) Each applicant shall:

a. Submit a completed application form with attached photograph accompanied by a fee of $25.

b. Present a photostatic copy of a diploma issued by a school or college of medicine and surgery or osteopathic medicine and surgery approved by the board of medical examiners.

c. Present a photostatic copy of a certificate indicating the completion of one year of internship in a hospital approved by the board of medical examiners.

d. Be a citizen of the United States or have legally declared intention of becoming a citizen of the United States.

The board may waive this requirement of foreign physicians, here for teaching or training and study only, who are properly admitted under visas of the state department of the United States.

e. Furnish an affidavit from a licensed physician or the dean of an approved college in this state setting forth facts supporting the need that exists for the issuance of said license.

135.6(3) Candidates may be required to satisfactorily complete an examination prescribed by the board.

a. The board may require written, oral or practical examinations.

b. In any case, the board may require the candidate to appear for a personal interview before either the board or a member thereof.

c. Grades received in a license examination before the duly constituted authority of another state, territory, foreign country or before the national board of medical examiners or national board of osteopathic examiners may be accepted in lieu of a written examination conducted by this board, in which instance:

(1) The applicant must furnish a photostatic copy of his national board certificate or an original certificate of license obtained as a result of such examination.

(2) The statements made in the application must be reviewed and verified by the examining board issuing the original certificate, who will also certify, under seal, as to the schedule of subjects in which the applicant was examined, the grades given thereon and the general average attained.

135.7(150A) Major surgery requirement for osteopathic physician. An acceptable one-year postgraduate course in the subject of surgery prescribed by this board shall consist and be comprised of the following: Pathology, surgical diagnosis and technique, roentgenology, surgical anatomy, neuroanatomy, biochemistry, physiology, pharmacology and anesthesiology; together with one elective subject offered in the college's program of postgraduate education; or a one-year residency involving a thorough and intensive study of the practice of surgery, in an affiliated teaching hospital of an approved osteopathic college, such residency being approved by the bureau of hospitals and board of trustees of the American Osteopathic Association and the board of medical examiners.

This rule is intended to implement chapters 146, 147, 148, 150A of the Code.

[Filed November 20, 1951; amended May 13, 1964]

CHAPTER 136

CHAPTER 137
PHYSICAL THERAPY EXAMINERS

137.1(147) Definitions.

137.1(1) "Board" means the board of physical therapy examiners.

137.1(2) "Department" means the state department of health.

137.1(3) "Licensure by interstate endorsement" means the issuance of a license to practice physical therapy to an applicant who has been licensed in another state, to be considered on an individual basis for licensure in Iowa, if the applicant meets the qualifications required of a licensed physical therapist in Iowa.

137.2(147) General.

137.2(1) Licenses issued by the board shall be for licensure by examination or licensure by interstate endorsement. Each license shall be 8½ by 11 inches in size. Each license issued shall bear the signatures of all board members with their appropriate titles.

137.2(2) The board requires the completion of parts I, basic sciences; II, clinical sciences; and III, physical therapy, theory and procedure,

of the American Physical Therapy Association approved examination prepared by the Professional Examination Service.

137.2(3) The board will accept the certified grades provided by the Professional Examination Service for each of the three parts of the examination. A passing grade shall be required on each part of the examination.

137.2(4) An examinee failing one part of the examination shall be required to repeat only the part failed.

137.2(5) An examinee failing two or more parts of the examination shall be required to repeat the entire examination.

137.3(147) Licensure by examination.

137.3(1) Applications for licensure to practice physical therapy in Iowa shall be made directly to the Iowa State Department of Health, Lucas Building, Des Moines, Iowa, at least 15 days prior to a scheduled practical or oral examination by the board. The application form will be furnished by the department. The application shall include the following:

a. A notarized statement giving full name, current address, age, date of birth and place of birth.

b. Declaration as to licensures or registrations held and examinations taken.

c. A photograph at least 3 x 3½ inches in size taken within six months prior to the application for proper identification purposes.

d. A certified copy of the certificate or diploma awarded the applicant from a school of physical therapy accredited by the American Medical Association and the American Physical Therapy Association.

e. A certified copy of the grades achieved on parts I, basic sciences; II, clinical sciences; and III, physical therapy, theory and practice, of the American Physical Therapy Association approved Professional Examination.

f. Fee in the amount of $20 in the form of a check or money order made payable to the Iowa State Department of Health.

137.3(2) The board will conduct a practical or oral examination, or both, of all applicants for licensure.

137.3(3) The department will stamp each application with a date stamp upon its receipt at the department.

137.4(147) Licensure by interstate endorsement.

137.4(1) An individual from another state seeking a license to practice physical therapy in Iowa will be considered on an individual basis under the principle of interstate endorsement.

137.4(2) An out-of-state applicant shall complete the same application as that outlined in 137.3(147), and shall in addition attach a certified copy of any and all licenses to practice physical therapy he may hold from other states.

137.4(3) An applicant for licensure by interstate endorsement must have practiced physical therapy on a full-time basis for at least one of the immediately preceding three years or must have graduated from an approved school of physical therapy within a period of one year from the date of graduation to the time of application for licensure.

137.4(4) An applicant for licensure under this rule must include with this application a sworn statement of his previous physical therapy practice, detailing places of employment, dates of employment, and indicate whether or not he has ever had a license revoked or suspended. If his license has ever been revoked or suspended, then he must furnish a sworn statement detailing the circumstances.

137.4(5) The board will give a practical or oral examination, or both, to all applicants under this rule.

137.4(6) The board will accept certified grades from the American Registry of Physical Therapists reflecting satisfactory passage of the American Registry Examination prior to July 4, 1965. These grades may be considered in lieu of satisfactory passage of the American Physical Therapy Association approved Professional Examination Service Examination at the discretion of the board, under this rule only.

137.4(7) Fee in the amount of $40 in the form of a check or money order made payable to Iowa State Department of Health.

These rules are intended to implement chapters 135 and 147 of the Code.

[Filed July 12, 1966; amended May 11, 1971]

CHAPTER 138
Reserved for future use

CHAPTER 139
PODIATRY EXAMINERS

139.1(147, 149) Conducting examinations.

139.1(1) All applications for examination must be made upon the official forms supplied by the State Department of Health, Lucas Building, Des Moines, Iowa.

139.1(2) These application forms properly filled out shall be filed with the state department of health together with the applicant's diploma and the fee of $20, at least 15 days before the date of examination.

139.1(3) Each application form will require that a full statement be made of the number and date of each state examination taken by him prior to his application to this board, together with the average obtained thereon at each, and whether

or not any certificate issued him has ever been suspended or revoked.

139.1(4) The statements made in application form shall be subscribed and sworn to by the applicant and attested under seal by a notary public, or if executed outside the state of Iowa, by the clerk of a court of record.

139.1(5) A senior student expecting to graduate from an approved podiatry college at the end of the spring term may be admitted to the state examinations held in May or June upon a presentation of a certificate from the dean of his college stating that the applicant has conformed to all the college requirements and will be granted a diploma at commencement, but the examination papers of such applicant will not be rated until his diploma has been issued and verified by the state department of health.

139.1(6) No candidate shall under any circumstances enter the examination more than 30 minutes late unless excused by the examiners and no candidates shall leave the room after the distribution of the question papers. Candidates shall not be permitted to leave the room during the examination unless accompanied by one of the examiners or a clerk endorsed by the board.

139.1(7) The candidates will be seated at individual tables or desks and will not be permitted to communicate with each other during the hours of examination, nor to have in their possession help of any kind. Any applicant detected in seeking or giving help during the hours of examination will be dismissed and his papers canceled, but he will be entitled to return for another examination within 14 months.

139.1(8) All examinations shall be in writing and in the English language and shall be written with pen and ink. Special examination paper will be supplied by the department of health but pens and ink must be provided by the candidates.

139.1(9) Before commencing the examination each applicant will be given a confidential number which he shall inscribe at the upper left-hand corner of each page of the manuscript; no other marks shall be placed on any paper whereby the identity of the candidate may become known. The pages are to be numbered in the upper right-hand corner.

139.1(10) The examination questions will be prepared and the answers rated by the board members to whom the subjects have been assigned.

139.1(11) The handwriting of the candidate must be legible; proper punctuation and the use of capital letters and general appearance of examination papers will be considered in marking answers.

139.1(12) The following is the schedule of questions to be submitted to the candidates for examination:

Anatomy, bacteriology, chemistry, clinical and practical podiatry, podiatric medicine, diagnosis, dermatology, histology, materia medica, neurology, orthopedics, pathology, pharmacy, physiology, physiotheraphy, roentgenology, surgery and others as prescribed by the board of podiatry examiners.

139.1(13) There shall be assigned a time and place to each candidate for the purpose of being given an oral examination by the board of examiners in the following subjects: Personal history, ethics, theory in practice.

139.1(14) The board of examiners shall file with the department a brief summary and estimation of the answers to the oral examination of each candidate.

139.1(15) A general average of not less than 75 percent of the correct answers will be required to pass, but no certificate will be granted to an applicant whose grade is below 70 percent in any one subject.

139.1(16) Any candidate failing to pass in his first examination shall be entitled to a second examination within 14 months without filing a new application and fee, but for all examinations subsequent to the second one, a new application and fee of $20 shall be required.

139.1(17) At the conclusion of the examination each candidate will be required to sign the following:

Declaration of Honorable Conduct in Taking Examination:

We, the undersigned, each and severally declare that we are applicants for certificates from the Iowa State Department of Health as certified to it by the State Board of Podiatry Examiners authorizing us to practice Podiatry in Iowa, and that we were present and took the examination held at ..... , Iowa, on ..... , 19.....

We further declare we neither received nor extended any aid to others nor resorted to any means whatsoever to secure the required ratings to enable us to pass.

We further declare that we did not see any of the sets of questions used at this examination until they were handed out by the examiners.

139.1(18) *Citizenship.* All applicants for licensure must be citizens of the United States or have taken out first naturalization papers.

139.2(147, 149) Rules concerning reciprocal agreements.

139.2(1) All applications for license by reciprocal agreement must be made on the official forms supplied by the state department of health.

139.2(2) This application properly and completely filled out must then be filed with the

secretary of the state board of examiners 15 days prior to the date of the examiners' regular meeting usually held in June or in person to the secretary of the board at his office in the interim. This application must be accompanied with the fee of $40.

139.2(3) Each application will require attached thereto a photostatic copy of their diploma from the podiatry college from which they graduated, and a photostatic copy of their license from the state from which they are applying. Further, there shall be furnished and attached a complete transcript of credits and grades from their school plus a certified copy of their grades from their state board examination.

139.2(4) No person is eligible to apply for a license by reciprocal agreement in Iowa unless he can present satisfactory evidence of having practiced at least two years in the state from which he is applying.

139.2(5) No temporary certificate or special permits to practice podiatry shall be issued. The filing of application does not grant an applicant any privilege to practice podiatry in any manner whatsoever in the state of Iowa.

139.2(6) A license to practice podiatry in the state of Iowa by a reciprocal agreement shall be granted to an applicant only on the same basis on which such other state grants a certificate to an applicant from this state.

139.2(7) No license by reciprocal agreement shall be given to an applicant from another state that does not have educational requirements on a par with the Iowa podiatry law.

139.2(8) No license by reciprocal agreement shall be granted to an applicant unless he can furnish satisfactory evidence of membership in good standing in his state and national associations.

[Filed prior to July 1, 1952]

CHAPTER 140
Reserved for future use

CHAPTER 141
CHIROPRACTIC EXAMINERS

141.1(151) Rules of examinations.

141.1(1) The board will meet the first Monday in April, August and December to conduct examinations, or any business which may regularly come before it, and other meetings at the discretion of the board. The December meeting will be at the statehouse in Des Moines. Applications will be made on the regular forms provided for that purpose, and must be in the hands of the board 15 days prior to the date of the examination.

141.1(2) Candidates must answer correctly 70 percent of the questions in each subject and attain a general average of 75 percent.

141.1(3) *Application for examination.* Application shall be made direct to the secretary of the board.

141.1(4) *Photo.* An unmounted photo of the applicant, 3½ inches by 5½ inches, shall be pasted in space provided on application before filing with the board of examiners. This photo will be verified with the applicant before he is allowed to write the examination.

141.1(5) *Examination number.* Before commencing the examination, each applicant will be given a confidential number which he shall inscribe at the upper left-hand corner of each page of the manuscript; no other marks shall be placed on any paper whereby the identity of the candidate may become known. The pages are to be numbered in the upper right-hand corner.

141.1(6) Any failing paper must be reviewed by the entire board.

141.2(151) Rules pertaining to schools.

141.2(1) Recognized schools or colleges of chiropractic incorporated in this state will be required to regulate their clinics and conduct them in the following manner:

141.2(2) The schools shall maintain a department of patient adjusting, or student clinics. The student clinic shall be of two categories:

a. A school clinic.

b. An outpatient clinic.

141.2(3) The director of the student clinic and the director of outpatient clinic or service, must hold an Iowa chiropractic license.

141.2(4) Students adjusting in the school clinics must be under direct faculty supervision at all times.

141.2(5) Students with less than two months of clinical adjusting cannot do outpatient adjusting.

141.2(6) The school shall require of all students who adjust patients outside of regular school clinics that they apply for and obtain a written permit from the department of student clinics, designating the correct name, age, sex, address, together with the diagnosis and analysis of each patient under the student's care. Such permits shall not exceed ten at any one time for each student adjuster, and shall expire at the end of 14 days from date of issuing.

141.2(7) Technic used by the student must be approved by the director of outpatient service.

141.2(8) Permits must be shown to the patient.

141.2(9) Permits are valid for adjusting only in the city of school.

141.2(10) Students shall not be permitted to adjust other students outside of school clinics.

141.2(11) Permits must be returned to director if patient discontinues service.

141.2(12) Quarantine, placard and venereal cases shall not be adjusted by students.

141.2(13) Students shall not be permitted to make analytical X-ray pictures outside of school laboratory.

[Filed December 15, 1952]

CHAPTER 142
Reserved for future use

CHAPTER 143
OPTOMETRY EXAMINERS RECIPROCITY OR INTERSTATE ENDORSEMENT

143.1(147) Rules for examinations.

143.1(1) All applicants for examination shall apply to the State Department of Health, Lucas Building, Des Moines, Iowa 50319 for application forms.

143.1(2) The forms properly filled in shall be filed with the state department of health, together with satisfactory evidence of compliance with section 154.3(1,2) 15 days prior to the examination.

143.1(3) The examination for admission to practice optometry in Iowa shall consist of two parts:

a. Parts one and two of the written examination of the national board of examiners in optometry, which parts include the subjects of physiology of the eye, optical physics, anatomy of the eye, ophthalmology, and practical optometry passage of which shall satisfy the requirements of this part of the examination; and

b. Oral and practical examination as given by the Iowa board of optometry examiners with general average of not less than 75 percent correct answers as a requirement for passing.

143.1(4) Any applicant failing in his first examination shall be entitled to a second examination within 14 months after the first examination without filing a new application or fee.

143.2(147) Licensure by reciprocity or interstate endorsement.

143.2(1) All reciprocal agreements adopted and in force between the Iowa board of optometry examiners and other state licensing boards shall be governed by these rules.

143.2(2) Applicants for licensure to practice optometry in the state of Iowa, who are licensed by examination by any other state licensing board maintaining equal practice privileges, will be considered on an individual basis.

143.2(3) A license may be granted by the Iowa board of optometry examiners without an examination, or as much examination as may be required to establish proficiency and desirability to any such applicant, who, at the date of the original license issued, fully conformed to the educational and licensure requirements of said board of optometry examiners in Iowa.

143.2(4) All applications for reciprocity shall be made on the official forms supplied by the State Department of Health, Lucas Building, Des Moines, Iowa.

143.2(5) The application forms properly filled in, accompanied by (*a*) a fee of $40, (*b*) the state licensing certificate (or duplicate copy of same) of the state from which applicant desires to reciprocate, and (*c*) the optometry college diploma or in lieu thereof a certified statement from the authorities of the optometry college, regarding the issuance of the diploma and the date of same, shall be filed with the state department of health, at least 15 days prior to date of examination or board meeting.

143.2(6) Each applicant must furnish certified evidence of three or more years' practice in the state from which he desires to reciprocate, immediately preceding the filing of his application for reciprocity.

143.2(7) The statements made in the application must be reviewed and verified by the secretary of the state examining board issuing the original certificate, who will also certify as to the schedule of subjects in which the applicant was examined, and the rating given thereon and the general average attained.

143.2(8) If the examination failed to include one or more of the subjects required by the Iowa board, the applicant may be required to take a supplementary examination before this board in the subjects omitted, and ratings awarded thereon shall be added to those of his former examination in order to determine his general average.

143.2(9) Each applicant will be required to make on the application form a sworn statement of the number and date of each examination taken by him prior to his application to this board together with the ratings obtained thereon at each, a statement as to all the places where he has practiced, the character of practice engaged in (general, special or itinerant), and the length of time so engaged in each and whether or not any certificate issued to him has ever been suspended or revoked.

These rules are intended to implement chapter 147 of the Code.

[Filed November 14, 1967]

CHAPTER 144
OPTOMETRY EXAMINERS STUDY COMPLIANCE FOR LICENSE RENEWAL

144.1(147) General.

144.1(1) The optometric study compliance year shall extend from June 1 through May

31 during which period attendance at approved study sessions may be used as evidence of study fulfillment requirements for the subsequent license renewal year beginning July 1 and expiring June 30.

144.1(2) The educational requirement of two days shall be 12 clock hours of attendance and study at approved study sessions.

144.1(3) The required number of study hours may be obtained by one or all of the following methods:

a. The annual educational program or clinic of the Iowa optometric association;

b. Postgraduate study sessions or seminars at an accredited school of optometry;

c. Local study group programs approved by the board;

d. Other meetings or seminars either within or without the state of Iowa that may be approved in advance by the board with such request for approval to be made to the board at least 14 days prior to said meeting or seminar;

e. Home study material specified and approved by the board in cases of extenuating circumstances. Such will be allowed only upon submission of satisfactory evidence to the board of such circumstance and inability to acquire the number of study hours.

144.1(4) Certification to the board of attendance at any of the foregoing study sessions shall be made within seven days of said meeting by the secretary or chairman of the organization or group sponsoring said meeting, the dean of optometry school, or in the case of special meetings approved by the board, a person so designated by the board.

144.2(147) Local study groups.

144.2(1) Application to establish an authorized study group must be filed with the secretary of the board of optometry examiners by April 30 for subsequent study compliance year June 1 through May 31. Late applications may, with the judgment of the board, be acceptable, but the attendance to study groups making late application will be valid only from date of approval by the board of optometry examiners.

144.2(2) Each study group must apply to and be approved by the board of optometry examiners each study compliance year on appropriate forms to be obtained from the secretary of the board of examiners.

144.2(3) Failure of a study group to apply to and be approved by the state board of optometry examiners during any study compliance year will render attendance to the unapproved study group invalid as evidence for study compliance for license renewal for the subsequent license year.

144.2(4) An application for study group recognition will not be approved if the proposed meeting place is within 25 miles radius of the meeting place of an already existing study group.

144.2(5) No study group will be recognized that does not maintain a minimum membership of eight optometrists and each group must conduct not less than nine sessions or meetings during any one study compliance year. Each session or meeting shall not exceed two hours in duration and credit for study compliance for more than that amount of time will not be allowed, provided, however, that on prior request to the board approval may be given by the board in special circumstances for a session or meeting to exceed two hours.

144.2(6) The secretary of the board shall give written notice to all optometrists, licensed and practicing in Iowa, prior to June 1 of each year of all local study groups that have been approved by the board and the name of the person in each such approved study group that may be contacted for information concerning the dates, location, and subject matter of the various study meetings to be held by the particular study group. The secretary also at such time shall give notice of all other special meetings or seminars, if any, that have been approved as of June 1 by the board for credit toward the required hours for study compliance.

These rules are intended to implement chapter 147 of the Code.

CHAPTER 145
Reserved for future use

CHAPTER 146
EMBALMER EXAMINERS

146.1(156) Care of the dead.

146.1(1) *Duties of licensed embalmers.* It should be the duty of every person taking charge of the preparation for burial of the body of any person to ascertain whether such person died of a communicable disease.

146.1(2) *Communicable diseases.* For the purpose of the rules under this chapter, the following diseases are classified as communicable and reportable in Iowa:

Actinomycosis
Anthrax
Chickenpox (varicella)
Cholera
Conjunctivitis, acute infectious (of the newborn, not including trachoma)
Dengue
Diphtheria
Dysentery, amebic (amebiasis)
Dysentery, bacillary
Encephalitis infectious (lethargic and nonlethargic)

Favus
German measles (rubella)
Glanders
Gonorrhea
Hookworm disease (ancylostomiasis)
Influenza
Leprosy
Malaria
Measles (rubeola)
Meningococcus meningitis (cerebrospinal fever)
Mumps (infectious parotitis)
Paratyphoid fever
Plague, bubonic septicemic, pneumonic
Pneumonia, acute lobar
Poliomyelitis
Psittacosis
Puerperal infection (puerperal septicemia)
Rabies
Rheumatic fever (acute)
Rocky Mountain spotted (or tick) fever
Scarlet fever (scarlatina)
Septic sore throat
Smallpox (variola)
Syphilis
Tetanus
Trachoma
Trichinosis
Tuberculosis, pulmonary
Tuberculosis, other than pulmonary
Tularemia
Typhoid fever
Typhus fever
Undulant fever (brucellosis)
Whooping cough (pertussis)
Yellow fever

146.1(3) *Deaths from communicable disease.* Among the diseases listed in 146.1(2) as communicable and reportable, the only conditions requiring special care from the standpoint of the embalmer and of preparation of the body are the following: Anthrax, diphtheria, meningococcus meningitis (cerebrospinal fever), scarlet fever and smallpox.

146.1(4) *Licensed embalmer may enter isolation area.* When death has occurred from any of the diseases listed in 146.1(2), the licensed embalmer is hereby granted permission to enter the isolation area and to perform any and all of his professional duties.

146.1(5) *Protection of the embalmer.* In case of death from one of the diseases named in 146.1(3), the licensed embalmer must observe the following rules:

a. Before handling the body the embalmer and his assistants should be so clothed that their outer garments may afterwards be easily sterilized.

b. Rubber gloves should be worn in order to minimize the danger of contamination.

c. The body should be washed with an odorless disinfectant, preferably bichloride of mercury, 1-1,000 solution.

d. All garments of the funeral director and his assistants should be dipped in bichloride of mercury for 30 minutes and afterward boiled; they may then be sent to a public laundry.

e. The instruments should be sterilized by boiling.

f. The hands should be washed with soap and water followed by a disinfectant such as rubbing alcohol (70 percent alcohol) or bichloride of mercury, 1-1,000 solution.

g. Clothing of the deceased should be thoroughly disinfected.

h. If the deceased died of any of the diseases mentioned in 146.1(3), and is removed to a funeral home for preparation and embalming, the body must be wrapped in sheets which have been soaked in formaldehyde or bichloride of mercury (1-1,000).

146.1(6) *Preparation of the body when death occurs from a disease listed in 146.1(3).*

a. The body of any person who has died of any of the specified diseases shall be prepared by washing with a disinfectant solution, the plugging of all body cavities including the ears, nose, throat, mouth and rectum with such material as will absorb and retain all abnormal secretions or fluids.

b. In addition to the above-described preparation, the body should receive arterial and cavity injection.

c. The care and preparation of the body should be done entirely in private and no one should be in the preparation or embalming room except the licensed embalmers and their assistants until the body is fully prepared and dressed.

d. The body will then be placed in a casket and a licensed embalmer should himself close the lid as soon as the body is properly prepared.

e. After the body has been placed in a casket, it should be the duty of the licensed embalmer to see that the body is not handled or moved by any unauthorized person.

f. It shall be unlawful for any person except a licensed embalmer to open a casket that contains the body of any person dead of any of the above-mentioned diseases.

146.1(7) *Preparation of the body when death occurs from any other cause than the above-specified diseases.* The preparation of the body when death occurs from a noncommunicable disease should be the same as in paragraph "*a*," "*b*" and "*c*" of 146.1(6), except that in case of religious objections or impracticability of any nature, specified arterial and cavity injections may be omitted, provided that interment is to be made within the local health jurisdiction where the death occurred and within 48 hours after death. Nothing in this subrule shall be construed as preventing any school of embalming, recognized by the state department of health, from embalming bodies in the presence of their enrolled students.

146.1(8) *Method of preparing bodies for shipment to colleges.* Bodies dead of the diseases

named in 146.1(3) shall be embalmed. All other cases shipped during warm weather shall have two quarts of embalming fluid injected by means of a cannula inserted into the abdomen and thorax. The dead body is to be shipped so that it will reach its destination within 24 hours. All dead bodies [except those named in 146.1(3)] shipped to colleges during cold weather should, whenever possible, be sent without embalming.

146.1(9) *Standard embalming fluid.* The finished product shall contain not less than 15 percent of formaldehyde when diluted according to the directions on bottle or package.

146.1(10) *Embalming fluids—poisons.* No embalming fluid or other agent containing arsenic shall be used within the state of Iowa in the embalming or preservation of dead human bodies.

146.1(11) Special rules regulating all mortuaries, funeral homes and undertaking establishments in the state of Iowa.

a. The care and preparation of all persons dead of any cause shall be entirely private and no one shall be allowed in the embalming room except the licensed embalmers and their assistants until the body is fully prepared and dressed except by permission of the immediate family.

b. The commissioner of the state department of health shall have prepared suitable placards for framing, setting forth this ruling. These placards shall be furnished by the state department of health to all licensed embalmers. The licensed embalmer shall have them framed and permanently fastened to all doors of the preparation or embalming rooms. There shall also be one of these framed placards on display in the general office of every undertaking establishment in the state of Iowa.

146.1(12) *Depth of grave.* Except by special permission from the state department of health no interment of any human body shall be made in any public burial ground unless the distance from the top of the box, or any other type of container in which the casket is placed, is at least three feet from the natural surface of the ground. [Intended to implement section 135.11 (12, 16) of the Code.]

146.2(156) Funerals.

146.2(1) Communicable diseases such as diphtheria, scarlet fever and meningitis are regarded as being spread from person to person through transfer of the causative germ (through speech, coughing, sneezing) from the throat of the living, infected individual (patient or carrier) to others who are susceptible.

It is improbable that a dead body plays any part in transmitting disease to people in the same room or building. A possible exception to the foregoing statement might be the body of a patient who had died of smallpox in the severe form; the hazard of exposure in such instance would be limited to the embalmer or person who actually handled the body and who was not known to be immune through successful vaccination and revaccination.

146.2(2) *Regulations with reference to funerals are as follows.* Recommendations and regulations pertaining to funerals when death is attributed to communicable diseases including anthrax, diphtheria, meningococcus meningitis (cerebrospinal fever), poliomyelitis (infantile paralysis), scarlet fever and smallpox, are as follows:

a. In consideration of the fact that a dead body ordinarily plays no part in the spread of infection or of communicable disease, a hermetically sealed casket should not be required.

b. Persons who have been in the isolated area may be released from isolation for the purpose of accompanying the body to a funeral home, church or cemetery, provided that they:

(1) Use a separate car or means of conveyance;

(2) Remain in separate room or separate from the public and avoid nearness to others in attendance;

(3) Return to the area of isolation and remain there until premises are released from isolation.

c. When death is caused by meningitis of above-mentioned type, scarlet fever, diphtheria, poliomyelitis, or smallpox, the casket should remain closed when service is held indoors.

Special arrangements may be made for members and relatives of the immediate family to view the remains prior to the funeral service.

146.3(156) Unclaimed bodies for scientific use.

146.3(1) *When is body unclaimed?*

a. If the deceased did not express a desire that his body be buried or cremated.

b. If relatives or friends of the deceased did not request that he be buried or cremated.

146.3(2) *Expenses by relatives.* When relatives such as father, mother or children, who are financially able, request body to be buried or cremated they should pay expenses for burial or cremation.

146.3(3) *Obtaining county relief.* When relatives request burial or cremation and are not financially able to pay the expense then same should be paid out of the poor funds of the county, provided, of course, that application was made by said relatives in the same manner as in cases for relief for the support of the poor.

146.3(4) *Expenses by friend.* When friends of the deceased request burial or cremation, they either have to pay expenses or make application in the same manner as is made for the support of the poor.

146.3(5) *Friend distinguished from casual acquaintance.* Friend should be construed to mean one who has been more or less closely asso-

ciated with the deceased during his lifetime as distinguished from one who was only a casual friend or acquaintance.

146.3(6) *Delivery of bodies for scientific purposes.* Every coroner, funeral director, and managing officer of every public asylum, hospital, county home, penitentiary or reformatory, as soon as any dead body shall come into his custody, which is unclaimed and may be used for scientific purposes, shall at once notify the state department of health.

NOTE: The above rule does not relieve the funeral director of the responsibility of trying to locate the nearest relatives or friends of the deceased.

146.3(7) *Department instructions.* When the department receives the notice, you will be instructed as to disposition of the body. If body is consigned to the State University Medical College, Iowa City, or to College of Osteopathic Medicine and Surgery, Des Moines, you should immediately notify them to send you a shipping case.

146.3(8) *Expenses incurred by funeral director.* The necessary expenses, such as telephone calls, telegrams, and shipping expenses, shall be paid by the college. Persons preparing body to ship will expect to receive a reasonable fee for their services, the fees to be paid by the college receiving the body.

146.4(156) Disinterment.

146.4(1) *Permits requested in all cases.* No person shall disinter the dead body of a human being unless he is in possession of a written permit issued by the state department of health or by an order of the district court of the county in which the body is buried. All applications must be made upon the proper blank forms provided by the state department of health and must in all cases be signed by the next of kin of the deceased.

146.4(2) *Rules—disinterment permits.*

a. Permit to disinter will be issued only to a licensed embalmer, and then disinterment must in all cases be done under his personal supervision.

b. A separate application must be made for every body.

c. Names of persons and places must be written plainly so that no mistake can be made in the permit.

d. These applications for permits will be furnished on request from the state department of health.

e. Licensed embalmers will save delay and trouble in the removal of bodies by strictly conforming to these instructions.

f. Errors or omissions will necessitate returning the application for correction.

g. No permit is necessary to remove a body from any mausoleum, public or private receiving vault for burial in the same cemetery.

146.4(3) *Delivery of disinterment permit.* The licensed embalmer shall deliver the disinterment permit to the person in charge of the cemetery before disintering any body therein. When a body is to be moved from one cemetery to another the lower half of the permit is turned over to the sexton in charge of the cemetery in which the body is to be interred. If disinterment or reinterment takes place in the same cemetery, sexton retains the entire permit. If disinterred body is to be shipped by common carrier to a place outside of Iowa, only the upper half of the permit is furnished by the state department of health as the department cannot authorize a burial in a place over which it has no jurisdiction. In such cases it will be necessary to use a regular transportation of corpse permit.

146.4(4) *Removal of body from funeral home or repository.* Whenever a body is placed in a repository in a funeral home which is to be removed later for burial, a disinterment permit is to be obtained before the body is moved.

146.5(156) Transportation of dead.

146.5(1) All dead bodies except those addressed to the anatomical department of any institution in this state must be embalmed before shipment.

146.5(2) A copy of the original death certificate on the standard certificate of death form, signed by the attending physician, permit of local board of health or registrar, and a transit label signed by the shipping funeral director, and initial baggage agent, printed on strong paper, supplied through the state department of health, shall be required for the transportation by common carrier of bodies of persons dying in this state. The death certificate shall contain such information as is required in the standard form of death certificate if obtainable. The health officer's or registrar's permit shall authorize the transportation of the body of the person described in the physician's certificate. The shipping funeral director shall state on the shipping label how the body is prepared, and the local baggage agent shall state thereon the route, name and address of escort.

The physician's and health officer's or registrar's permit shall be given the escort, to be delivered with the body at destination. The shipping label shall be securely attached to the outside case. If the body is sent by express, the physician's certificate and the permit shall be attached to the express waybill and declared with the body at the destination, and the shipping label shall be attached to the outside case.

NOTE: If a body has been buried for 20 years and over and it is to be disinterred and shipped, see your local baggage agent as to rates of shipment. It is the understanding of the department that in many cases money may be saved if body is shipped as first class merchandise.

146.5(3) The transportation of bodies dead of diseases mentioned in 146.1(3) shall be thoroughly embalmed with an approved disinfectant fluid, all orifices shall be closed with absorbent cotton, the body shall be washed with a disinfectant fluid, enveloped in a sheet saturated with

the same, and placed at once in the casket, which shall be immediately closed.

146.5(4) No disinterred body, dead from any disease or cause, shall be transported by common carriers, unless approved by health authorities having jurisdiction at the place of disinterment, and a transit permit and transit label shall be required as provided in 146.5(2).

146.5(5) The outside case may be omitted in all instances when the body is transported in funeral director's service vehicle.

146.5(6) Every outside case shall bear at least four handles, and when over five feet six inches in length shall bear six handles.

146.5(7) An approved disinfectant fluid shall contain not less than five percent formaldehyde gas; the term embalming as employed in these rules shall require the injection by a licensed embalmer of not less than ten percent of the body weight for bodies of persons dead of disease, in 146.5(3), injected arterially, in addition to cavity injection; not less than six percent of the body weight injected arterially in all other cases, in addition to cavity injection, and ten hours shall elapse between the time of embalming and the shipment of the body.

146.5(8) The attached form of death certificate, health officer's or registrar's permit, and label as described herein, with these rules printed thereon, shall be used in this state for shipment of bodies as herein provided.

146.5(9) The use of the combination ambulance hearse is approved by the state department of health, provided it is operated in accordance with the rules of the local health officer.

146.5(10) *Burial of ashes.* The ashes of a cremated body shipped into this state shall be handled in the same manner as other shipped-in bodies.

The ashes of a cremated body shipped from points within the state shall be handled in the same manner as other bodies.

146.5(11) *Burial of several bodies in same grave.* By law each cemetery board or association has the power to make rules governing the control and operation of the cemetery or cemeteries under their jurisdiction. They may by rule permit or prohibit such burials.

146.5(12) *Bodies shipped to foreign countries.* Whenever a body is to be shipped to a foreign country it is necessary for the licensed embalmer to wire the official representative of the respective country at the port of embarkation asking for permission to ship the body. The name of deceased, date of death and cause of death must be stated. When authority is received, another wire is sent furnishing name of deceased, date of death, cause of death, time of departure from shipping point, approximate time of arrival at port and railroad over which the body is being transported. The name of the boat on which body is to be shipped should also be stated, if known.

146.5(13) Any violation of these rules shall be deemed a misdemeanor.

[Filed prior to July 1, 1952; amended February 24, 1958, June 10, 1960, March 15, 1972]

CHAPTER 147
FUNERAL DIRECTORS AND EMBALMER EXAMINERS

147.1(147, 156) Registration.

147.1(1) Any person desiring to enter either the funeral directing or embalming profession shall be required to appear before the board of funeral directors and embalmer examiners for a personal interview and registration, prior to entering a college of mortuary science, approved by the Iowa state board of funeral directors and embalmer examiners. This interview to take place at a regular board meeting at the offices of the state department of health in Des Moines, Iowa. After the applicant has been approved by the board and the required registration fee of five dollars has been paid to the state department of health, a certificate of registration will be issued to the applicant.

147.1(2) All certificates of registration for funeral directing or embalming will expire one year from date of issuance of the certificate by the state department of health. Re-registration, which must be consecutive and limited to one year only, may be granted by special approval of the board of funeral directors and embalmer examiners.

147.1(3) *Premortuary college educational requirements.* One academic year, of 36 weeks or a minimum of 30 semester hours, of instruction in a recognized college, junior college, or university, in a course of study approved by the board; or have equivalent education as defined by the board. After September 1, 1955, have completed two academic years of 36 weeks each or a minimum of 60 semester hours of instruction in a recognized college, junior college, or university, in a course approved by the board or have equivalent education as defined by the board.

147.2(147, 156) Examinations.

147.2(1) All applications for examination must be made upon the official forms supplied by the State Department of Health, Lucas Building, Des Moines, Iowa.

147.2(2) These blanks, properly filled in, shall be filed with the state department of health, together with satisfactory evidence of the required educational ability. The examination fee of ten dollars must be enclosed with the application, and such fee and application must be filed with the state department of health at least 15 days prior to the date of examination.

147.2(3) Applicants must present a diploma and transcript of grades to the state department of health with their application, showing the completion of training in a college of mortuary science, approved by the Iowa state board of funeral directors and embalmer examiners. (Photostatic copies of the diploma and transcript of grades will be accepted.)

147.2(4) Before commencing the examination, each applicant will be given a confidential number, which he shall inscribe at the upper left-hand corner of each page of manuscript, and no other marks shall be placed on any paper whereby the identity of the candidate may become known.

147.2(5) The examination shall consist of three sections. Embalmers:

a. Written examinations, which shall consist of an adequate number of questions as prepared by the board of funeral directors and embalmer examiners on required subjects.

b. Oral examination, which shall be given in proper manner by the members of the board.

c. Practical examination, which shall consist of demonstration and operative technique on a dead human body as directed. Restoration, cosmetic effect, lighting, casketing, and such other procedures as members of the board of funeral directors and embalmer examiners may feel necessary.

147.2(6) Funeral directors examination shall consist of two sections:

a. Written examinations, which shall consist of an adequate number of questions as prepared by the board of funeral directors and embalmer examiners on required subjects.

b. Oral examination, which shall be given in proper manner by the members of the board.

147.2(7) Applicants shall be examined in such subjects as the board of funeral directors and embalmer examiners shall prescribe, which shall include the following:

a. Embalmers. The examination shall include the subjects of anatomy, practical embalming, restorative art, sanitation, public health, business ethics and such other subjects as the board may designate and the laws of the state of Iowa and rules relating to communicable diseases, quarantine and causes of death.

b. Funeral directors. The examination shall include the subjects of funeral directing, burial or other disposition of dead human bodies, sanitary science, public health, transportation, business ethics, and such other subjects as the board may designate and the laws of the state of Iowa and rules relating to communicable diseases, quarantine and causes of death.

147.2(8) A certificate will not be granted to an applicant who falls below 75 percent in any one subject, which must be retaken at the next regularly scheduled examination. Should the applicant fall below 75 percent in more than two subjects, he will be required to rewrite all subjects at the next examination.

147.2(9) An applicant failing in his first examination shall be entitled to a second examination without filing a new application or payment of fee. The student must be seated, under this arrangement, at the next regular examination immediately following the failure.

147.2(10) An applicant detected seeking or giving help during the hours of examination will be dismissed and his papers canceled but he will be entitled to return for examination within 14 months.

147.2(11) The written examination is counted as three-fifths of the resultant, the oral as one-fifth, and the practical as one-fifth, of the final tabulation.

147.2(12) At the conclusion of the examination each candidate will be required to swear to the following by affixing his signature:

Declaration of Honorable Conduct in Taking Examination.

We, the undersigned, each and severally declare that we are applicants for certificate from the Iowa State Department of Health, as certified to it by the State Board of Funeral Directors and Embalmer Examiners, authorizing us to practice Funeral Directing and Embalming in Iowa, and that we were present and took the examination held in Des Moines, Iowa, ..., 19.....

We further declare upon honor that during said examination we neither received nor extended aid to others nor resorted to any unfair means whatsoever to secure the required ratings to enable us to pass.

We further declare that we did not see any of the questions used at this examination until they were handed out by the examiners.

147.2(13) A list of accredited schools of mortuary science, approved by the board of funeral directors and embalmer examiners shall be furnished the Director of Licensure and Registration, State Department of Health, Des Moines, Iowa, at their first regular meeting after July 1, each year.

147.3(147, 156) Studentship.

147.3(1) *Embalming.*

a. The applicant must serve a minimum of one additional year of studentship under the direct supervision of a licensed embalmer in good standing in the state of Iowa.

b. The applicant shall during this studentship, arterially embalm not less than 25 human bodies, under the direct supervision of his preceptor and report on blanks furnished by the state department to the secretary of the board quarterly.

c. Before being eligible to take the practical portion of the embalmers examination, he must have filed his 25 completed case reports with the secretary of the board.

147.3(2) *Funeral directors.*

a. The applicant must serve a minimum of one additional year of studentship under the direct supervision of a licensed funeral director in good standing in the state of Iowa.

b. The applicant shall during this studentship, direct or assist in the direction of not less than 25 funerals under the direct supervision of his preceptor and report on blanks furnished by the state department of health to the secretary of the board quarterly.

The course of studentship required under these regulations for embalmers and funeral directors may be taken concurrently.

No licensed embalmer shall permit any person in his employ or under his supervision or control to serve him as a student in embalming or funeral directing unless that person has a certificate of registration as a registered student, from the state department of health.

No licensed embalmer or funeral director or firm of embalmers or funeral directors shall have more than one student embalmer or student funeral director for the first 100 bodies embalmed or funerals conducted per year, and with a maximum of two students per firm.

No registered student shall advertise or hold himself out as a registered embalmer or funeral director or use the degree L.E. or F.D. or any other title or abbreviation indicating that he is an embalmer or funeral director.

Every person who is registered as a student with the state department of health shall have his certificate or registration posted in a conspicuous place in his preceptor's place of business.

Studentship begins upon approval and due notification by the board. Notice of termination of service; application for change of preceptor; and any other alteration must be made in writing and approval granted by the board before the status of the student is altered.

When, for any valid reason, the board of funeral directors and embalmer examiners feels that the education of a registered student being received under the supervision of his present preceptor, might be detrimental to the student or the profession at large, such student will be required to serve the remainder of his studentship under the supervision of a licensed embalmer or funeral director meeting the approval of the board.

147.4(147, 156) Reciprocity rules.

147.4(1) All applications for reciprocity licenses shall be made on the official forms supplied by the state Department of Health, Lucas Building, Des Moines, Iowa.

147.4(2) All applicants for reciprocity licenses will be required to pass the oral and practical examination before this board.

147.4(3) The application form properly filled in, accompanied by (*a*) a fee of $20, (*b*) the state licensing certificate (or a duplicate copy of same) of the state from which applicant desires to reciprocate and (c) the mortuary college diploma or in lieu thereof a certified statement from the authorities of the mortuary college regarding the issuance of the diploma and the date of same, shall be filed with the state department of health at least 15 days prior to date of examination or board meeting.

147.4(4) All applicants for reciprocity licenses must hold original license obtained upon examination in the state from which they reciprocate. Such examination shall have covered substantially the same subjects in which an examination is required in Iowa, showing the applicant has attained a general average of 75 percent or above.

147.4(5) Each applicant must furnish certified evidence of five or more years of actual practice in the state from which he desires to reciprocate, immediately preceding the filing of his application for reciprocity and must be vouched for by the board of funeral directors and embalmer examiners of this state. Applicant will also be required to give good sufficient reasons for desiring license by reciprocity.

147.4(6) An applicant holding an original license for less than five years from a state which has entered into a special agreement with the state of Iowa, and who has met all educational requirements of the state of Iowa, may be seated to take the entire examination upon approval of application by his state board and the Iowa board of funeral directors and embalmer examiners.

147.4(7) The statements made in the application must be reviewed and verified by the secretary of the state examining board or authorized persons issuing the original certificate, who will also certify under seal, as to the schedule of subjects in which the applicant was examined, and the ratings given thereon and the general average attained.

147.4(8) An applicant who has taken two or more examinations before this board and failed to attain at either a general average of 75 percent, and has subsequently obtained a certificate from an examining board of another state, shall not be eligible for admission to this state under reciprocal agreements existing with such state until five years from the date of his last examination by this board, and in all cases the Iowa state board of funeral directors and embalmer examiners reserves the right to review the examination papers and ratings upon which said certificate was granted, before accepting the same. The same privilege is hereby accorded the examining boards of the states with which the Iowa board reciprocates.

147.5(147, 156) Reinstatement. Reinstatement may be obtained without examination. Application to be made to the state department of health on the proper blank. All applications must have the approval of the state board of funeral directors and embalmer examiners.

147.6(147, 156) Code of ethics. Adopted by the Iowa state board of funeral directors and embalmer examiners meeting in executive session at the Statehouse, Des Moines.

Editor's Note: Copies may be obtained by addressing the board at the Statehouse, Des Moines, Iowa.

[Filed prior to July 1, 1952]

CHAPTER 149
COSMETOLOGY EXAMINERS

149.1(147) The board of cosmetology examiners will grant their approval for the issuance of an original school license to be issued by the Iowa state department of health, when the conditions hereinafter set out have been fully complied with and met; likewise the annual reissuance of a school license will be recommended by the board to the state department of health, when there is full compliance with the following rules pertaining to the operation of an approved school.

149.1(1) Cosmetology shops may be owned and maintained by the license holder of a school of cosmetology but no such shop shall be operated in connection with the school.

149.1(2) The schoolrooms shall be large enough to properly accommodate all of the enrolled students, and be so equipped as to provide for practical work, lectures and demonstration purposes. A separate room or rooms must be maintained for study and lecture purposes.

149.1(3) The daily class hour schedule shall consist of not more than eight hours of instruction or work per day for five or six days a week. Instruction shall not be given on Sunday. The daily class hours schedule shall be posted in the classroom. In special circumstances, students absent for legitimate reasons shall be allowed to make up any lost time not to exceed six hours during any one week to permit them to complete their training with their regular class.

149.1(4) The course of study in an approved school of cosmetology shall consist of not less than 2,100 hours training, and no school of cosmetology will be approved by the board of cosmetology examiners unless it complies with the requirements of study as provided in the following curriculum.

CURRICULUM

Demonstrations and lectures	**Hours**
Sanitation and sterilization	60
Hygiene and grooming	63
Professional ethics	40
Salesmanship	63
Public relations and psychology	63
Anatomy	63
Dermatology	42
Trichology	42
Nails	42
Chemistry and chemical hair straightening	70
Safety precautions	42
State law—rules and Code	21
Supervised practical instruction	
Sanitation and sterilization	60
Shampoos and rinses	70
Scalp and hair treatments	49
Hair shaping	210
Hair styling	315
Wiggery	49
Manicuring	49
Permanent waving	252
Hair coloring and lightening	280
Facial treatment and make-up	49
Safety precautions	49
Unassigned	
Specific needs	57
Total hours	2,100

149.2(147) Minimum school equipment. Equipment for classroom of 30 students shall consist of at least:

Four modern facial chairs with stool for each

Four lavatories with corresponding shampoo equipment

Twenty-four soap dispensers

Two towel cabinets

Two covered towel hampers

Two cabinets for facial cream, lotion, etc.

Six trays for facial supplies

Twelve hairdressing chairs or more

Eight mirrors

Two dry sterilizers in dispensary

One covered flat wet sterilizer, large

Twelve covered containers for hair pins

Twelve covered waste containers

Twenty-four covered sanitary containers for fingerwave lotion

Ten dryers (upright)

Two high frequencies

One vibrator (optional)

Three electric clippers

One scalp and facial steamer

Two croquignole permanent wave machines

Three cold wave methods or more

One therapeutic light

Equipment for sterilizing room shall consist of:

Lavatory

Stove

Large wet sterilizer

Large dry sterilizer

Covered soap container

Individual paper towel container

Closed cabinet and covered hamper for towels

Covered waste container

Manicuring equipment shall consist of:
Four manicure tables, fully equipped
Lights
Bowls
Covered container for supplies
Individual brushes, individual buffers
Chair and stool for each table
Miscellaneous equipment:
Closed cabinet for permanent wave equipment
Two dozen combs aside from students' individual combs
Two dozen brushes

149.3(147) Cosmetology instructors.

149.3(1) After May 19, 1971 instructors in approved schools of cosmetology in addition to being licensed in the state of Iowa as a cosmetologist shall:

a. Be 19 years of age or older;

b. Be a graduate of an accredited high school or the equivalent thereof;

c. Have 1000 hours teachers' training with the curriculum content to be determined by the cosmetology board of examiners or two years experience in the field of cosmetology;

d. Obtain certification from the school of training with final examination grade to be submitted to the division of cosmetology.

All persons working as instructors in a school of cosmetology in Iowa shall register with the cosmetology board of examiners within 90 days after effective date on forms supplied by the division of cosmetology.

149.3(2) An instructor may annually attend a cosmetology instructors institute approved by the cosmetology board of examiners to maintain instructor status.

A qualified instructor shall be responsible for and in direct charge of all theory classes and practical instructions at all times.

149.3(3) The number of instructors for each school shall be based on total student enrollment, with a minimum of two instructors for every 30 students enrolled.

149.3(4) A school shall not permit its instructors to work on its patrons, except when instructing or otherwise assisting students in said school.

149.3(5) Schools must file an enrollment card and a monthly report card for each licensed cosmetologist taking a teachers' training course. These cards must be on file in the state cosmetology office on or before the fifth of any month, subsequent to the beginning of the special training.

149.4(147) Students.

149.4(1) No student shall be given double time credit for working after school hours.

149.4(2) All students must be given their final school examination not later than upon the completion of 2,100 hours training and issued their diploma after receiving a passing grade.

149.4(3) No student shall be called from theory class to work on the public.

149.4(4) All students must be taught two types of pin curls.

149.4(5) All examination papers will be graded according to the confidential number, starting with No. 1.

149.4(6) All students must comb out the hairdress of patrons, whenever possible.

149.4(7) All work done by students on the public must be under the supervision of an instructor at all times.

149.4(8) Anyone taking instructors' course is not allowed to work on patrons for personal compensation in the school.

149.4(9) No students shall be allowed to work on the public until such time as they have received 200 hours training.

149.4(10) No brush-up students shall be allowed to accept compensation from either school or patron for work done in the school.

149.4(11) The student upon successfully passing the school examination and receiving the school diploma may, pending taking the state board examination, begin the teachers' training course.

149.4(12) All students enrolling in a cosmetology school must have two years high school training before being eligible for the Iowa cosmetology examination.

149.4(13) All approved schools of cosmetology shall display in the entrance room a sign indicating that all work is done exclusively by students.

149.5(147) Textbooks and charts. Adequate standard textbooks and charts must be provided by the school in a reference library for the use of the students. All schools must have a class schedule, one on file in the Health Department, cosmetology office, Lucas Building, Des Moines, Iowa, and a duplicate on display in the school. State cosmetology office to be notified of any changes in schedules.

149.6(147) The school shall furnish each student with a kit containing all the necessary equipment, also standard textbook in theory and electricity. (Pertinent pamphlets will be furnished upon receipt of application.)

149.7(147) Enrollment card and monthly report card. Cosmetology schools shall submit on or before the fifth day of each month to the cosmetology division of the state department of health a report of the names of the students enrolled, the total hours for each student previously reported, the total number of hours completed during the month for each student, and the total cumulative number of completed hours for each student at the end of the month.

149.8(147) Examination requirements. Examinees taking state board shall have at their disposal for the examination all necessary materials requested by the cosmetology board of examiners. Female examinees must have clean hair which must not be preshaped. Each male examinee must furnish his own model, who must be at least 16 years of age. A mannequin may be used by any examinee. Hair of models or mannequin must comply with the aforesaid requirements.

149.8(1) *Rules of the board pertaining to examinations.* All applications for examination must be made upon the official form supplied by the state Department of Health, Lucas Building, Des Moines, Iowa.

149.8(2) Application forms properly filled out shall be filed with the state Department of Health, Cosmetology Division, Des Moines, Iowa, with the fee of ten dollars, at least 15 days before the date of examination, as required by section 147.29.

149.8(3) All students who can complete their training prior to the date of examination may qualify for the examination if they file their applications at least 15 days prior to the examination date. However, the exact date of graduation should be shown on the application.

149.8(4) The statements made in the application form shall be subscribed and sworn to by the applicant and attested under seal by a notary public.

149.8(5) A certificate of good moral character, signed by two competent persons, personally acquainted with the applicant, including a recent photograph of the applicant, must be attached to the application.

149.8(6) No candidate shall under any circumstances enter the examination room more than 30 minutes late unless excused by the examiners, and no candidate shall leave the room within 30 minutes after the beginning of the examination, or the distribution of the question papers, and no candidate shall leave the room during the examination unless accompanied by one of the examiners.

149.8(7) Every applicant for examination must be able to speak, read and write the English language, or in lieu thereof furnish an interpreter.

149.8(8) The candidates will be seated at individual tables or desks and will not be permitted to communicate with each other during the hours of examination, or to have in their possession help of any kind. Any applicant detected in seeking or giving help during the hours of examination will be dismissed and his papers canceled.

149.8(9) All examinations shall be in writing in the English language and shall be written with pen and ink. Special examination paper will be supplied by the department, but pens and ink must be provided by the candidate.

149.8(10) Before commencing the examinations, each applicant will be given a confidential number which he shall inscribe at the upper left-hand corner of each page of manuscript; no other marks shall be placed on any paper whereby the identity of the candidate may become known. The pages are to be numbered in the upper right-hand corner.

149.8(11) Out-of-state requirements. All out-of-state applicants making application for the Iowa state board examination must be licensed in the state in which they received their training and they will be given credit for the number of hours required by their state at the time they took their training. The balance of the training must be taken in an approved Iowa cosmetology school. Even though the applicant has had more hours training than were required by that state, he will be given credit in Iowa only for the number of hours required by that state.

149.8(12) Any graduate taking the state board examination, who desires to practice cosmetology prior to examination, must obtain a temporary permit, fee for which is one dollar.

149.8(13) A certificate of license may be issued by the cosmetology board of examiners to an applicant who has passed satisfactorily an examination conducted by said board to determine fitness to practice cosmetology in accordance with the established rules of the board. The board shall not be confined to any specific system or method. Such examination shall be consistent with the prescribed curriculum for licensed cosmetology schools of this state and may include practical demonstrations and written and oral tests as the board deems appropriate for the requirements of the profession. Such examination is to be prepared and conducted by the board so as to determine whether or not the applicant possesses the requisite skill in such profession to perform properly all the duties thereof and has sufficient knowledge of the prescribed curriculum.

a. If the applicant fails to receive a passing grade in the first examination, the applicant must be re-examined in the entire examination at a regularly scheduled state board and obtain a passing grade.

b. Failure to appear and take the examination shall result in forfeiture of the fee and temporary permit unless the failure to appear shall have been due to illness or similar cause in which case written request setting forth reasons why forfeiture should not occur shall be made to the cosmetology board of examiners.

149.8(14) Any student arriving more than 30 minutes late for either the theory or practical examination will be disqualified from finishing the examination. Any student carrying out any examination questions or answers will be disqualified. In conducting the state board examinations, the first day will be devoted to the theory examination, and the following days will be devoted to

practical examination, according to the numbers given out to the students by the board.

149.8(15) Any candidate failing in his first examination shall be entitled to a second examination within 14 months without the filing of a new application fee.

149.8(16) The examination rooms will be closed to everyone except the students and examiners and members of the division of cosmetology.

149.8(17) At the conclusion of the examination each candidate will be required to sign the following:

Declaration of Honorable Conduct in Taking Examination

We, the undersigned, each and severally declare that we are applicants for certificates from the Iowa State Department of Health, as certified to it by the State Board of Cosmetology Examiners, authorizing us to practice cosmetology in Iowa, and that we were present and took the examination held at .....
....., Iowa, on.....
....., 19.....

We further declare upon honor that during said examination we neither received nor extended any aid to others nor resorted to any unfair means whatsoever to secure the required ratings to enable us to pass.

We further declare that we did not see any of the sets of questions used at this examination until they were handed out by the examiners.

These rules are intended to implement sections 147.29, 147.36, 147.90 and 157.4 of the Code.

[Filed prior to July 1, 1952; amended April 21, 1953, May 15, 1953, October 1, 1959, April 19, 1971]

CHAPTER 150
SANITARY CONDITIONS IN COSMETOLOGY SCHOOLS AND PLACES WHERE COSMETOLOGY IS PRACTICED

150.1(157) Rules and inspection reports. The owner or manager of every cosmetology school and place where cosmetology is practiced shall keep a copy of these rules to be furnished by the state department of health. All inspection sheets and sanitary rules shall be posted in a place so that they may be readily seen by the patrons. It is the responsibility of the manager to see that these rules are enforced. This includes all cosmetology schools and places where cosmetology is practiced.

150.2(157) Proper quarters. Every cosmetology school and place where cosmetology is practiced shall be well-lighted, well-ventilated and kept in a clean, orderly and sanitary condition at all times. All cosmetology work shall be practiced only in quarters especially equipped for such services.

150.2(1) *Practice of cosmetology in home.*

a. No cosmetology establishment shall be maintained in a home, unless a separate room is provided for that purpose. Such establishments shall have an outside, separate entrance leading directly to the establishment and any inside doors of said establishment leading to living quarters must be closed at all times during the business day.

b. From and after January 1, 1968, cosmetology shall not be practiced in a home, unless in addition to the aforesaid requirements, all doors of such establishments, leading to the living quarters are permanently sealed. This provision shall not apply to cosmetology establishments within a home in operation before January 1, 1968, unless the ownership of that establishment changes.

150.2(2) *Practice of cosmetology in connection with other business.* Cosmetology establishments operated in connection with any other business, except where food is handled, shall be separated either by complete or partial partitions. Should the cosmetology establishment be operated immediately adjacent with a business where food is handled, such establishment shall be entirely separated by a closed partition, and the door to such cosmetology establishment shall be closed at all times except when used for ingress and egress.

150.3(157) Sanitation and disinfection. Except as set forth in 150.3(3) all instruments in use in any cosmetology school or place in which cosmetology is practiced shall each time after use, be cleansed thoroughly with soap and hot water and then be immersed at least 20 minutes in an approved disinfectant solution in a covered flat container large enough to immerse completely all instruments, after which they should be dried and placed in a closed cabinet. All disinfectant solutions shall be labeled. The following disinfectant solutions have been approved by the state department of health: Formalin, ten percent solution; isopropyl alcohol, 70 percent solution; potassium mercuric iodide, one to 1000 solution; mercuric bichloride, one to 1000 solution; saponated cresol, two percent solution; or other solutions approved by the state department of health.

150.3(1) Every cosmetologist shall wash his hands with soap and water immediately before serving each patron.

150.3(2) Head coverings, hair pins, clips, rollers and curlers shall be washed and sanitized after each use as above directed.

150.3(3) All metallic instruments with a cutting edge shall be kept clean by wiping carefully after each use with cotton saturated with an approved disinfectant solution. It is recommended that the solutions used with metallic instruments be the isopropyl alcohol, 70 percent solution, or saponated cresol, two percent solution.

150.4(157) Towels, containers and other supplies. A clean and freshly laundered towel shall be used for each patron. A closed cabinet or drawer shall be provided for clean towels and linen and a covered hamper for soiled towels and linen. Whenever a haircloth or cape is used, as in cutting the hair or shampooing, a newly laundered towel or tissue paper neck strip shall be placed around the neck to prevent the haircloth or cape from touching the skin.

150.4(1) The headrest of every cosmetology chair shall be protected with fresh clean paper or cloth before its use for any patron. Rubber protective headrests are not permitted.

150.4(2) If a gown is used, each patron shall be furnished a freshly laundered gown.

150.4(3) Every operator shall have a minimum of 12 finger waving combs and brushes.

150.4(4) The use of dusters, common powder puffs, nail buffers and sponges is hereby prohibited.

150.5(157) Dispensers. Fluids and powders shall be applied to patrons from a shaker-type or aerosol dispenser. Creams and other semi-solid substances shall be removed from the containers with a clean spatula or similar article. Removing such substances with the fingers is prohibited. Creams shall be kept covered when not in use.

150.6(157) Permanent wave equipment. Spacers and rods, including rods used in cold waving permanent methods, shall be cleansed with soap and hot water after each use and placed in a closed cabinet.

150.7(157) Haircutting department. Anyone maintaining a haircutting department within a cosmetology establishment shall observe all rules on sanitation as prescribed for cosmetologists.

150.8(157) Water—sewer. Every cosmetology school or place where cosmetology is practiced shall be supplied with an adequate supply of potable hot and cold water under pressure. Water shall be applied to a patron by the use of a spray. The sewage disposal system shall not create a nuisance or result in pollution of a stream or watercourse.

150.9(157) Equipment, fixtures, furnishings. Shampoo boards, bowls, floors, walls, fixtures, and furniture of all cosmetology schools and places where cosmetology is practiced shall be of a washable nature and kept clean at all times. Furnishings other than those required for the operation of the facility are prohibited. Laundry equipment shall be in a completely separate room from a place where cosmetology is practiced.

150.10(157) Communicable diseases. No person shall act as a cosmetologist who is known to be infected with a communicable disease. A patron with open sores such as occur with ringworm, impetigo or other communicable diseases, shall not be served in a public cosmetology establishment.

150.11(157) Other disease carriers. Dogs, except guide dogs for the blind, cats, birds, and other pets shall not be permitted in a cosmetology school or place where cosmetology is practiced.

These rules are intended to implement chapters 135 and 157 of the Code.

[Filed October 13, 1967]

CHAPTER 151
Reserved for future use

CHAPTER 152
BARBER EXAMINERS

152.1(158) Course of study. Each Iowa school of barbering approved by the Iowa board of barber examiners shall conduct a course of study of at least 1,800 hours to be equally divided over a period of nine months. Such course of study shall include the following:

152.1(1) *Supervised practice[1] instruction.*

The following shall be included:	1,400 hours
Scalp care and shampooing	
Honing and stropping	
Shaving	
Facials, massage and packs	
Haircutting	
Hair tonics and singeing	
Dyeing and bleaching	
Hair styling	

152.1(2) *Demonstrations and lectures.*

The following shall be included:	361 hours
Law, ethics, economics, equipment, shop management and history of barbering	
Sanitation, sterilization, personal hygiene and first aid	
Bacteriology	
Anatomy	
Skin, scalp, hair and their common disorders	
Electricity, as applied to barbering	
Chemistry and pharmacology	
Scalp care	
Honing and stropping	
Shaving	
Facials, massage and packs	
Haircutting	
Hair tonics and singeing	
Dyeing and bleaching	
Instruments, soaps, shampoos, creams, lotions and tonics	

152.1(3) *Physician's lectures.*

The course of study shall include lectures of at least one hour per week by a licensed medical doctor.	39 hours

152.1(4) *Grand total.* Total 1,800 hours.

152.2(158) Qualifications of managers and instructors. A manager or instructor of a school of barbering, approved by the Iowa board of barber examiners, shall be registered with the Iowa state department of health as an instructor in barbering or shall pass an instructor's examination given by said board. To qualify for an instructor's examination, applicant shall submit to the board satisfactory evidence as to character and ability to operate a school of barbering, shall be a high school graduate or the equivalent thereof and be the holder of an Iowa license to practice barbering for either a five-year period immediately prior to the application, or have six months' experience as an assistant instructor immediately prior to the application.

152.3(158) Assistant instructors. Temporary permits may be issued to assistant instructors in an approved school of barbering provided the following qualifications are furnished. The person shall be of good moral character, shall be a graduate of an accredited high school or the equivalent thereof, shall be a graduate of an approved school of barbering and the holder of an Iowa barber license. After six months as an assistant instructor, said person shall make application for an instructor's examination. If he should fail to receive a passing grade, he may continue as an assistant instructor until the next regular examination by the board. If he should fail the second examination, he is not eligible for another examination and shall discontinue all connections with the school.

152.4(158) Application for approval and licensing. An application for approval and licensing of a proposed school shall be in writing and made to the board of barber examiners at its office in Des Moines, Iowa, for a hearing. Notice of the time and place fixed for a hearing shall be given to the applicant, and he shall appear in person before the board. At the hearing the applicant shall submit to the board the following information in typed form:

152.4(1) The exact location of the proposed school.

152.4(2) A statement of the maximum number of students proposed to be trained at any time as determined by the physical facilities.

152.4(3) Photostatic copy of the essential parts of all leases, with the lease of at least one year, or other documents, giving the owner of the school the right of possession of the premises.

152.4(4) Evidence that the applicant has sufficient finances to acquire the facilities and equipment required by the board and that finances are available to provide for operation of the proposed school for a minimum period of 12 months without income. Such evidence shall be presented by sworn affidavit of applicant and financial statement duly signed in affidavit form as to its truth and veracity.

152.4(5) A complete plan of the physical facilities to be utilized and as applied to sections relative to classroom and minimum equipment required.

152.5(147) Minimum equipment of school of barbering. Each school of barbering shall have the following minimum equipment:

152.5(1) One chair, lavatory and backstand, providing proper cabinet for immediate linen supply, and individual sterilizers for each chair. There shall be not less than ten such sets in the classroom equipped for practice on the general public.

152.5(2) One textbook of barbering for each student and instructor.

152.5(3) Electric equipment. One high frequency electrode, one twin vibrator, one dermal lamp, one scalp steamer, one infrared lamp.

152.5(4) One microscope.

152.5(5) Compressed air equipment for each barber chair.

152.5(6) Automatic lather mixer.

152.5(7) Complete supply of standard tonics, shampoos and cosmetics commonly used in barber shops.

152.5(8) Sufficient clean linen cabinet space.

152.5(9) One blackboard, not less than four by six feet in size.

152.5(10) One large bulletin board conspicuously located for posting rules, notices, and similar bulletins.

152.5(11) One set of record files.

152.5(12) One set of books used solely for history and activity of students.

152.5(13) One file for duplicate copies of reports sent to the state board of barber examiners.

152.5(14) The study and lecture room shall be equipped with the specified blackboard and charts showing illustrations of the skin, circulation of the blood, muscles and bones of the face, scalp, and neck. This room shall be used for the sole purpose of giving scientific instruction to students.

152.6(147) Miscellaneous requirements.

152.6(1) No school of barbering shall accept students nor be open for business until approved and licensed to operate as a school of barbering.

152.6(2) There shall be not more than two students enrolled for each barber chair installed in approved school of barbering.

152.6(3) No student shall be accepted unless he is at least 16 years of age, has a tenth grade education or the equivalent thereof, and is of good moral character.

152.6(4) Each school of barbering shall maintain a library of suitable reference books including all of the required books later mentioned in curriculum.

152.6(5) Each school of barbering shall hold regular classes for the teaching of both the theory and practice of all phases of barbering.

152.6(6) No one in any way connected with a school of barbering shall guarantee positions to students nor guarantee financial aid in equipping a shop.

152.6(7) Instructors shall familiarize students with the different standard supplies and equipment used in barber shops.

152.6(8) No student shall receive pay nor be allowed any rebates, refunds or commissions on any money taken in at the barber chair for service rendered to patrons.

152.6(9) Each school shall advertise only under the designation of a barber school and shall display conspicuously at the entrance to said school a sign in plain, block display lettering at least one inch in height, as follows:

"ALL WORK IN THIS SCHOOL DONE BY STUDENTS ONLY."

152.6(10) When school service prices are displayed or in any manner advertised by a school of barbering, they shall be followed by the words "STUDENT WORK" in lettering at least one-half the size of the lettering used to display the price.

152.6(11) Instructors, as well as students, shall be attired in washable uniforms, which must be kept clean and neat at all times during school hours.

152.6(12) All bottles and containers in use must be distinctly and correctly labeled, showing the intended use of the contents.

152.6(13) Smoking shall not be permitted in classrooms.

152.7(147) Attendance requirements.

152.7(1) All schools of barbering shall establish regular school hours. Any time lost by students shall be made up before diploma is issued.

152.7(2) Classes shall be held during daylight hours with the exception of the physician's lectures and demonstrations, which may be held during evening classes.

152.7(3) A minimum of five recitations per week of two hours each shall be given to all students. These periods shall include lectures, individual instruction and written examinations.

152.7(4) All examinations and other written papers shall be carefully graded and returned to students in order that they may see errors.

152.7(5) If a student enrolled in approved school of barbering should discontinue his attendance in the school and should desire to return after a period of 30 days, he shall not return until at such time that he could start with the regular class at the point in the textbook where he had previously left the school.

152.7(6) All students shall be given a complete course in barbering as prescribed in this curriculum.

152.7(7) No registered barber or student who has received an apprentice license as issued by the Iowa board of barber examiners may return to the school for postgraduate work unless it is for theoretical study only.

152.8(147) Records requirements.

152.8(1) Each school or college shall forward to the barber division, state department of health, a completed application for enrollment upon the date of admittance of student together with required credentials.

152.8(2) Each school shall keep a daily class record of each student showing the hours devoted to the respective subjects, the total number of hours in attendance, and days present and absent, which shall be subject to inspection by the examiners or representative thereof at any time.

152.8(3) An owner of a school shall furnish the state department of health at the end of each month the names of students therein, days absent by student, if any, and show the time devoted by student to each subject.

152.8(4) The manager of each school shall compile from his records a summary of each student's grades, hours and attendance, which shall be presented to the student upon graduation and which shall also be made a part of his application for registration by examination. The manager shall sign each copy of the required records and must certify said record is correct and that the student has received a diploma from his school.

152.9(147) Library requirements. Each school of barbering operating in Iowa shall maintain a library for the students enrolled therein consisting of all the following:

First Text on Anatomy by Francis S. Wildner, M.D.; *Anatomy* by Dr. Henry Gray; *Electricity & Light* by Eberhart; *Salesmanship & Business Efficiency* by Know; *Civic Sociology* by Ross; *Building Citizenship* by R. O. Hughes; *Elementary Economics* by Carver and Carmichael; *Manual of Ethics* by MacKenzie; *Chemistry for Today* by McPherson, Henderson & Fowler; the *American Pocket Medical Dictionary* by Dorland; a standard dictionary; *Diseases of the Hair & Scalp* by Hubbard; *Standardized Textbook of Barbering* by

the Associated Master Barbers and Beauticians of America; *Practical & Scientific Barbering Textbook* by the Journeymen Barbers, Cosmetologists, and Proprietors International Union of America; and current trade journals.

These rules are intended to implement chapters 135, 147 and 158 of the Code.

[Filed July 11, 1967]

CHAPTER 153
SANITARY OPERATION OF BARBER SHOPS AND BARBER SCHOOLS

153.1(158) Rules posted. The manager of each barber shop shall keep a copy of these rules posted in a conspicuous place in the shop.

153.2(158) License. Barbers shall display at their work cabinet the original license certifying the practitioner is a licensed barber; also the annual renewal. Barber shop licenses shall be in the name of the licensed operator and posted therein. An apprentice shall have a valid permit posted. One apprentice to each licensed barber; only two apprentices in any one barber shop.

153.3(158) Signs. Each barber school shall display a sign at its main entrance indicating a barber school; also a sign therein that barber services are given by students only.

153.4(158) Sanitation. Every barber shop shall be well lighted, properly ventilated, and kept in a clean, sanitary and orderly condition. All shops or schools established after July 1, 1967, shall have approved handwashing and toilet facilities accessible within the building. All shops established after July 1, 1967, shall have a minimum length of at least ten feet for a one-chair shop, 15 feet for a two-chair shop, and five feet additional length for each additional chair and a minimum width of not less than 12 feet.

153.5(158) Quarters. Barbering shall not be practiced in a residence unless the shop is completely separated from living quarters by a solid permanent partition. A direct outside entrance shall be provided.

153.6(158) Quarters adjacent to other business. A barber shop located in a room adjacent to a restaurant, tavern or grocery shall be in a completely separate room. Doors between the barber shop and the aforesaid shall be rendered unusable.

153.7(158) Candy, cigars, beverages, etc. To be dispensed only from sealed packages.

153.8(158) Plumbing. Barber shops shall have modern plumbing and an adequate supply of both hot and cold running water connected with the local water system. In communities where a water system is not available, a pressure gravity system shall be installed of adequate capacity to provide water in sufficient force to thoroughly saturate linens. Drain pipes shall be connected directly with an approved sewerage system.

153.9(158) Combs and brushes. Combs and brushes must be cleansed; then immersed in an efficient disinfectant. Combs shall be left in the solution or in a sterile cabinet at all times when not in use. Use of the common hair brush is prohibited.

153.10(158) Instruments. Instruments of the profession shall be thoroughly cleansed and then immersed for at least one minute in an approved disinfectant before being used. When not in use, they shall be kept in a clean closed compartment provided for and used only for the storage of such equipment. Electric clipper plates shall be properly sterilized by the open-flame method.

153.11(158) Disinfectants. All containers must be kept clean and well filled with an effective recognized disinfectant. A separate container shall be provided for each practicing barber.

153.12(158) Shaving mugs. Shaving mug, soap and brush shall be thoroughly rinsed with boiling water before each patron is served. Rubber or porous mugs are prohibited.

153.13(158) Bowls and strops. All cups, bowls and strops shall be kept clean at all times.

153.14(158) Dusters and brushes. The common neck duster or brush shall not be used in any public barber shop.

153.15(158) Hands. Every barber shall wash his hands thoroughly with soap and water before serving a patron.

153.16(158) Headrest. Each barber chair headrest shall be provided with a mechanical paper container and clean shaving paper.

153.17(158) Towels. Freshly laundered towels shall be used for each patron. In haircutting, shampooing, or similar activities, a freshly laundered towel or new neck strip shall be used to prevent the hair cloth from directly contacting the skin of the patron. Soiled towels shall not be left on lavatory or workstand but shall be immediately disposed of in a container for that purpose. All clean linens shall be kept in an enclosed dust-proof cabinet.

153.18(158) Styptic powder and alum. Alum or other material used to stop the flow of blood shall be used only in liquid or powder form.

153.19(158) Communicable diseases. A barber shall not practice who is infected with any communicable disease.

153.20(158) Other disease carriers. Dogs, cats, birds and other pets shall not be kept in a barber shop or school.

153.21(158) Managers' duty. It shall be the duty of each manager of a barber shop to ascertain that all barbers employed in the shop have an Iowa license to practice, and that all employees observe these rules and all other sanitary rules of

the local board of health and state department of health.

153.22(158) Disinfectant solutions. All disinfectant solutions shall be labeled. The following disinfectant solutions have been approved by the state department of health; formalin, ten percent solution; isopropyl alcohol, 70 percent solution; potassium mercuric iodide, one to 1000 solution; mercuric bichloride, one to 1000 solution; saponated cresol, two percent solution; or other solutions approved by the state department of health.

[Filed August 10, 1956; amended July 11, 1967]

HIGHER EDUCATION FACILITIES COMMISSION

CHAPTER 1
FEDERAL GRANTS FOR UNDERGRADUATE FACILITIES

1.1(261) The construction and equipment grants programs.

1.1(1) The "state plan for the higher education facilities Act of 1963" adopted by the higher education facilities commission on September 23, 1964, constitutes the basis for carrying out its functions under Title I of the higher education facilities Act of 1963 (public law 88-204) and applicable federal regulations.

1.1(2) Under part A, Title VI (public law 89-329), the commission administers a state plan to assist colleges and universities in obtaining federal grants for equipment and materials to improve undergraduate instruction. The commission assigns priorities, recommends grants and provides for hearings to applicants for funds.

1.1(3) Applicants for construction grants under Title I and instruction equipment grants under part A, Title VI may obtain state plans and application instructions from the Higher Education Facilities Commission Office, 201 Jewett Bldg., Des Moines.

CHAPTER 2
SCHOLARSHIP PROGRAM

2.1(261) A state-supported and administered scholarship program.

2.1(1) *Advisory committee.* An advisory committee selected from officers of Iowa secondary schools, public community colleges and vocational-technical schools, private colleges and universities, and state-supported universities shall be established by the commission. Members are appointed to serve two-year terms with the exception of the elected presidents of the Iowa personnel and guidance association and the Iowa association of college admissions counselors, who serve only for their one year in office. The committee shall make recommendations for all procedures involved in administering the program.

2.1(2) *Application forms.* Application forms shall be made available to all high schools each fall and filing deadlines scheduled to allow for announcement of awards in the spring.

2.1(3) *Eligibility for honorary scholarship.* An applicant for a state scholarship must meet the following initial requirements:

a. Be a citizen of the United States and a resident of Iowa.

(1) The legal residence of a minor student shall be that of his parent(s) or guardian.

(2) Independent students over 21 and married students must furnish evidence of Iowa residency, i.e., state income tax return or voter's registration certificate.

b. Be a graduate of an accredited high school before the end of the summer preceding entrance into college.

c. Take such standard tests as may be required by the commission and have his scores reported to the commission.

d. Have his high school report his rank in class and recommendation concerning his good character and citizenship.

2.1(4) *Eligibility for monetary scholarship.* Having qualified academically, an applicant competing for a monetary award must meet the following additional requirements:

a. Be accepted for admission as a freshman student at a participating college, university or other institution in Iowa.

b. File a statement of family financial circumstances on forms designated by the commission for the purpose of assessing his need for financial assistance.

2.1(5) *Criteria for awards.*

a. Academic potential for an applicant is determined by two factors, percentile rank in high school class and scores on a standard national test, combined in a six to four weighting ratio, respectively.

b. Financial need, defined as the difference between the applicant's resources and his anticipated expenses at the Iowa college of his choice, is evaluated on the basis of the confidential statement of family finances.

(1) An applicant's resources include the estimated amount of his parents' contribution toward college costs if he is a dependent, a minimum of $400 in self-help from the applicant and one-fifth of his personal assets, if any.

(2) College expenses include tuition and mandatory fees, room and board and a uniform allowance for other college-related expenses.

2.1(6) *Honorary and monetary awards.*

a. Honorary state scholarships are awarded to those applicants who qualify academically but do not meet the requirements for monetary awards, i.e., financial need and enrollment at an eligible Iowa institution, or who qualify fully but cannot be granted monetary awards owing to insufficient appropriated funds.

b. Monetary state scholarships are awarded to applicants who qualify both academically and financially, insofar as the appropriated funds permit.

(1) Monetary awards range from $100 to $800, not to exceed tuition and mandatory fees at the institution selected by the recipient.

(2) Awards are prorated on a quarterly or semester basis and are paid directly to the institution after certification that the recipient is in attendance.

(3) If a recipient is dismissed or withdraws from college before completion of the term, his award or portion thereof shall be refunded to the state of Iowa in conformity with the institution's accepted policy on refunds.

(4) Upon the request of the recipient, a scholarship may be transferred from one participating institution to another at the beginning of any college term. The amount of the scholarship may be decreased, if expenses are lower than at the original college choice.

(5) A recipient may request a leave of absence for a maximum of one calendar year if illness, financial circumstances or other reasons beyond his control prevent his enrollment or force his withdrawal from college.

2.1(7) *Acceptance forms.* A monetary scholarship recipient is required to complete an acceptance form, reporting financial aids anticipated from other sources and agreeing to the terms of the award.

2.1(8) *Eligible institutions.* The following categories of Iowa institutions for post-high school education are eligible to participate in the state of Iowa scholarship program:

a. Institutions holding accreditation by the North Central Association of Colleges and Secondary Schools.

b. State-supported area community colleges and vocational-technical schools accredited by the state department of public instruction.

c. Schools of professional nursing accredited by the state board of nursing.

d. Institutions which, in the absence of one of the above accreditations, can present satisfactory evidence that they have been in operation at least two full academic years and have been granted the status of candidate for membership in the North Central Association of Colleges and Secondary Schools.

2.1(9) *Renewal of state scholarships.*

a. A state scholarship recipient may receive renewal of his award, to the extent that funds are available, provided that he is in satisfactory standing with his college and continues to demonstrate need for financial assistance.

b. Renewal applications will be sent to the student's home address in the spring and must be filed by the date indicated thereon.

c. Renewal awards will be re-evaluated annually on the basis of changes in college costs or financial circumstances of the student.

CHAPTER 3
IOWA MEDICAL TUITION LOAN PLAN

3.1(261) Tuition loans for Iowa resident students who agree to become general practitioners (family doctors) and practice in Iowa.

3.1(1) *Eligibility requirements.* Student must have been a legal resident of Iowa for at least six months before date of application, such residency to be determined either by legal domicile of parent or guardian or by certification of applicant's voting registration in the state and filing of Iowa state income tax return by applicant or his spouse.

3.1(2) *Application form.* Student must file with the higher education facilities commission an application for each academic year in which he requests a loan. Application must bear the signature of his college dean, certifying that the student has been accepted for enrollment or is enrolled in good standing.

3.1(3) *Loan contract.* A separate loan contract with the executive director of the higher education facilities commission shall be negotiated for each academic year in which tuition is borrowed under this plan. The contract, which must be signed and notarized, will affirm the following conditions:

a. The borrower plans to practice general medicine in Iowa for at least five years after completion of his training, such training to include one year of internship either within or outside the state.

b. The full amount of the loan, less any canceled portion thereof, plus interest at nine percent per annum dating from issuance of the loan shall become due and payable according to the terms of the contract if the borrower discontinues medical training, enters a specialized field of medicine or establishes practice outside the state.

c. The borrower will notify the commission within 30 days of any change of address or intent to terminate his agreement.

d. If the borrower enters military service after completion of his medical training, the first two years of such service shall be applied toward cancellation of the debt.

e. Repayment shall be made in not more than ten equal semiannual installments, beginning within one month after termination of the agreement.

3.1(4) *Family practice residency.* A borrower who enters a "family practice residency" at an Iowa hospital shall be granted a maximum of two years' exemption from fulfillment of his agreement to enter private general practice in Iowa, but he shall not receive loan cancellation benefits for these two years.

3.1(5) *Payment of tuition under loan plan.* Payment shall be prorated by semester or quarter and made directly to the institution after certification that the student is in attendance and in good academic standing.

CHAPTER 4
IOWA TUITION GRANT PROGRAM

4.1(261) Tuition grants, based upon financial need, to full-time resident students attending accredited private institutions of higher education in Iowa.

4.1(1) *Financial need.* The need of tuition grant applicants for financial aid shall be evaluated annually on the basis of a confidential financial statement filed on forms designated by the commission.

4.1(2) *Tuition and mandatory fees.* Tuition and mandatory fees shall be defined as those college costs paid annually by all students enrolled on a full-time basis. These costs shall be reported annually to the commission.

4.1(3) *Iowa residency.* The criteria used by the state board of regents to determine residency are hereby adopted for this program, with the exception that the independent applicant must be domiciled, or if he is dependent, his parents must be domiciled, in the state at the time he applies for the grant.

4.1(4) *Disclaimer of dependency.* An applicant under 26 years of age who claims financial independence from his parents shall be required to file with the commission an affidavit (disclaimer of dependency) signed by this parent or guardian, stating that the applicant has received no parental support of any kind for the past 12 months, was not claimed as a dependent on the tax return for the past year, and will not be so claimed for the current year.

4.1(5) *Priority for grants.* Applicants are ranked in order of the estimated amount which their parents reasonably can be expected to contribute toward college expenses and awards are granted from lowest to highest parental contribution, insofar as funds permit.

[Filed January 28, 1971; amended June 29, 1972]

HIGHWAY COMMISSION

Editor's Note: The highway commission makes rules relating to the following subjects:

Manual of Uniform Traffic Control Devices
Arterial Highway Stops (Urban Primary Road Extensions)
Arterial Highway Stops (Rural Primary Roads)
Special School Stops
Special Speed Zones

Persons desiring information in regard thereto may address the Iowa State Highway Commission, Ames, Iowa.

CHAPTER 1
PRIMARY ROAD ACCESS CONTROL

1.1(306A) Statement of policy. The Iowa state highway commission recognizes that there is no fixed, final, nor positive set of rules which will ultimately and irrevocably cover, nor standards so universal as to lead to an inevitable conclusion in every situation which may arise with regard to access to primary roads, and that in connection with each such application said Iowa state highway commission must and shall consider the following:

1. Safety to the traveling public.
2. Protection of the rights of property owners, and in particular the rights of abutting property owners.
3. The rights and convenience of the traveling public and of property owners to have access to homes and business facilities.
4. The impact upon the economy of the state.
5. The perpetuation of the carrying capacity of the highway.

1.1(1) The Iowa state highway commission shall at all times recognize that no property owner shall be deprived of the right to reasonable, free and convenient access to his property without just compensation therefor.

1.1(2) The Iowa state highway commission shall at all times reserve the right to make exceptions to any and all rules where the exercise of sound and reasonable judgment indicates that the literal enforcement of any such rules would effect an undue hardship on any interested party, and the commission shall in the enforcement thereof use extraordinary care to see that no undue hardship or injustice results to any affected party, the community or state.

1.2(306A) Definitions. The following terms when used in the rules in this part have the following meanings:

1.2(1) *Commission.* The Iowa state highway commission as constituted under the laws of the state of Iowa.

1.2(2) *Acquisition.* To receive title by gift, purchase or condemnation.

1.2(3) *Fully controlled access highway.* A highway or street especially designed for through traffic and over, from or to which owners or occupants of abutting land or others shall have no right or easement of access by the reason of the fact that their property abuts upon such highway. Access to a fully controlled access highway shall be via interchanges at designated public roads.

1.2(4) *Expressway controlled access highway.* A highway or street especially designed for through traffic and over, from or to which owners or occupants of abutting land or others shall have no right or easement of access by the reason of the fact that their property abuts upon such highway. Access to an expressway controlled access highway shall be via interchanges and at designated public road intersections at grade.

1.2(5) *Planned controlled access highway.* A highway planned or designated by the commission to give preference to through traffic, but, in addition to selected public road intersections at grade, access to the highway at approved points will also be allowed.

1.2(6) *Access.* A means of ingress or egress to a property.

1.2(7) *Frontage.* The length along the highway right of way line of a single property tract. Corner property at a highway intersection has a separate frontage along each highway.

1.2(8) *Frontage road.* A local street or road or equivalent thereof, auxiliary to a primary road or primary road extension, for service to abutting property and adjacent areas. Such facility shall connect to a primary road, primary road extension or other system of public roads or streets.

1.2(9) *Entrance.* To provide access to or from abutting property and further identified by its normal peak hour potential traffic during an average day as follows:

a. Type "A" entrance. Up to four 12′ traffic lanes with median of approved design. An access that develops over 150 vehicles per hour. Possible examples: Sporadic, heavy concentration of vehicles such as drive-in theaters, race tracks, large industrial plants or continuous heavy traffic such as shopping centers, subdivisions, amusement parks.

b. Type "B" entrance. 30′ to 45′ width. An access that develops 20 vehicles and not more than 150 vehicles per hour. Possible examples: Service stations, small businesses, drive-in food stands and banks, light industrial plants, small drive-in theaters, cemeteries, airports, golf parks, etc.

c. Type "C" entrance. Single 18′-24′ width joint 24′-30′ width. An access that develops up to 20 vehicles per hour. Possible examples: Field, farm or residential (not more than three dwellings) entrances and any other entrance whose ability to generate traffic is less than 20 vehicles per hour.

1.2(10) *Sight distance.* The distance of clear vision along the highway in each direction from any given point of access where vehicle must stop before entering the highway. Vertical and horizontal sight distance is measured from a point 3.75′ above the entrance surface and to a point 4.5′ above the road.

On a four-lane divided highway when an entrance is proposed at a location not to be served by a median crossover, sight distance will be required on a two-lane basis against the flow of traffic only.

1.2(11) *Highway classification.*

a. Class I—Interstate system or other fully controlled access highway.

b. Class II—Expressway system, a four-lane divided highway with interchanges or separation at major intersections and grade crossings at designated minor public road intersections. Expressway controlled access highway.

c. Class III—Planned controlled access highways on which through traffic is given primary consideration.

d. Class IV—Planned controlled-access highways on which through traffic and land service traffic are given equal consideration.

1.2(12) *Built-up area.* An area which meets the following general criteria for the side of the primary road or primary road extension:

a. The lots or area abutting are presently developed with insufficient setback for a frontage road and the development in depth precludes the establishment of a frontage road to the rear of the lots or area.

b. Where a "built-up area" exists only on one side of the highway, the other side of the highway will also be considered as "built-up area" for the purpose of determining access requirements.

c. In the event that a frontage road or service road is developed, planned or can be developed through the area, the area shall not be considered a "built-up area."

1.2(13) *Fringe (suburban) area.* An area which meets the following general criteria for the side of the primary road or primary road extension.

a. The lots, parcels or area abutting, that include intermittent or unrelated development which will permit consideration of a frontage road in front of, or in the rear of the development.

b. For agricultural land inside corporate limits see "Rural area," 1.2(14).

1.2(14) *Rural area.* An area which meets the following general criteria for the side of the primary road.

All area not clearly coming within the criteria set forth for "built-up" or "fringe" areas and shall include agricultural land within the corporate limits of a city or town.

1.3(306A) General regulations and requirements for establishment of entrances.

1.3(1) The purpose of the rules for the establishment or location of highways, streets and private entrances is to provide access standards. In all instances before existing highway, street or entrance may be modified in any manner, or a new or additional highway, street or entrance constructed to a primary highway, an application for permit to construct or change the entrance should be submitted to the resident maintenance engineer and approved by the commission district engineers.

When road is under construction all applications should be submitted to the resident construction engineer who shall notify the right of way department immediately in regard to such access requests.

1.3(2) *Entrance permit. (Locations where access rights have not been acquired.)* The application to construct a new entrance or modify an existing entrance shall be initiated through the resident maintenance engineer in charge of the county in which the entrance is located. The application (Form 559) must be accompanied with a plat of the proposed development. Where applicable, evidence of tentative approval of appropriate city or county officials (in instances of county zoning) must accompany the application.

a. Written application referred to in 1.3(2) filed on appropriate commission forms, shall be submitted not less than 30 days prior to need of authorization.

b. Entrance permit applications shall be signed by the owner or owners of record. Dependent upon ownership of the property and other estates therein, other signatures may be required.

c. If an application for an entrance permit is not approved by the district engineer as provided in 1.3(1), the application may be resubmitted to the commission at Ames, Iowa. The commission shall act on said application no later than 60 days from the date of the receipt thereof. The applicant will be notified of date and time that his application will be considered.

1.4(306A) General regulations on control of access.

1.4(1) *Planned control. (Access not acquired.)* Where access control is established or designated over an existing public highway open and used for travel, intersecting roads or streets existing on the date said control is established and which are necessary for free and convenient access and which the commission deems are reasonably located and not likely to create undue hazard are hereby authorized and approved.

1.4(2) Additional streets or highways may be opened into or connected with the planned controlled-access highway upon written approval by the commission.

1.4(3) *Frontage roads.* When and where a frontage road is established and opened to public travel, access from the abutting property shall be to the frontage road.

a. The said access to frontage roads constructed and maintained by the commission shall be unlimited in number. The geometrics of the entrances shall be as provided for Class IV highways as described in 1.6(306A).

b. The said access to frontage roads maintained by other governmental agencies shall conform to those agencies' requirements.

1.5(306A) Access to Class III highways rural or fringe area where access rights have not been acquired.

1.5(1) *Type "A" and "B" entrances. Sight distance.* Sight distance shall not be less than the posted daytime speed requirements as stated below.

Posted Daytime Speed Limit	Required Sight Distance	Minimum Stopping Sight Distance
70 m.p.h.	950 feet	600 feet
60 m.p.h.	750 feet	475 feet
50 m.p.h.	550 feet	350 feet
40 m.p.h.	450 feet	275 feet
30 m.p.h.		200 feet

a. Four-lane Class III highways. Applicant shall locate an entrance in compliance with the required sight distance requirement.

b. Two- and three-lane Class III highways. If the required sight distance is not available on the applicant's highway frontage, the district engineer may approve an application for establishing access for a location at the maximum sight distance available on the applicant's frontage, but in no case less than the minimum stopping sight distance.

1.5(2) *Intersections.* Necessary access located 500 feet or more from the intersection of two primary roads or 300 feet or more from the intersection of a primary road and secondary road may be granted by the district engineer. Access may be granted by the district engineer within the widened portion of a channelized intersection in the event the median is over 750 feet long. Access may be authorized by the district engineer 500 feet or more from the center of an intersection and not closer than 250 feet to the end of the median, provided another access is constructed beyond the widened portion of the intersection and the access points are connected with a frontage road.

a. Access within the above limits may be allowed by the commission or the commission may elect to acquire the access rights.

b. Access may be directly opposite a primary road or secondary road in instances of a "T" intersection.

c. Access will not be permitted onto a secondary road within the primary road right of way

or area acquired for "daylighting" the intersection.

1.5(3) *Property lines.* The center line of the entrance at the edge of slab shall be no closer than 50 feet to the property line extended. (The property line extension from the right of way line to center line shall be at right angles to the center line of the highway.) The return of the drive shall not extend beyond the property line.

An entrance to serve two properties may be established, centered on the property line by mutual agreement of the property owners.

1.5(4) *Number and arrangement of entrances.* In general, commercial or industrial developments (other than service stations) will be granted one access point to the primary road. Service stations with adequate frontage will be granted two points of access to the primary road with a minimum distance of 30 feet between entrance toe of slopes along center line of ditch.

Developments with adequate frontage may be authorized two access points at not less than 660 feet intervals provided the minimum distance to the property line can be obtained. [See 1.5(3).]

1.5(5) *Width of entrance.*

a. Type "A". Each case will require special study. [For special commercial see 1.8(306A).]

b. Type "B". Thirty feet maximum for one-way use on divided highway may be increased to 45 feet to serve two properties 45 feet maximum for two-way use, in all cases.

1.5(6) *Entrance angle.* In general, entrance angle will be as near 90° to center line of the highway as site conditions will permit.

a. Entrances established for two-way operation for service stations or developments where two access points are authorized shall be 60° to 90° to center line.

b. In those instances, on a divided highway, where two access points are authorized for one-way operation, the "ingress" may be 45° to 60° to center line and the "egress" 60° to 90° to center line.

1.5(7) *Return radii.*

a. Type "A". Each case will require special study.

b. Type "B". For entrance angle of 90° to center line return radii at junction of entrance and pavement shall not exceed 45 feet. For entrance angle of 60° to center line, return radii of obtuse angle shall not exceed 60 feet and return radii of acute angle shall not exceed 20 feet.

1.5(8) *Slope and cross section of entrance.* The finished surface elevation of the entrance over the pipe, or place where pipe would normally be, shall be not less than four inches lower than shoulder elevation at the center line of the entrance to prevent water draining onto the pavement or traveled way.

The side slopes on the entrance shall not be steeper than 2:1.

1.5(9) *Type "C" entrances. Sight distance.* Sight distance shall not be less than the posted daytime speed requirements as stated below.

Posted Daytime Speed Limit	Required Sight Distance	Minimum Stopping Sight Distance
70 m.p.h.	950 feet	600 feet
60 m.p.h.	750 feet	475 feet
50 m.p.h.	550 feet	350 feet
40 m.p.h.	450 feet	275 feet
30 m.p.h.		200 feet

a. Four-lane Class III highways. Applicant shall locate an entrance in compliance with the required sight distance requirement.

b. Two- or three-lane Class III highways. If the required sight distance is not available on the applicant's highway frontage, the district engineer may approve an application for establishing access for a location at the maximum sight distance available on the applicant's frontage, but in no case less than the minimum stopping sight distance.

1.5(10) *Intersection.* Necessary access located 500 feet or more from the intersection of two primary roads or 300 feet or more from the intersection of a primary road and secondary road may be granted by the district engineer.

a. Access may be granted by the district engineer within the widened portion of a channelized intersection in the event the median is over 750 feet long. Access may be authorized by the district engineer 500 feet or more from the center of an intersection and not closer than 250 feet to the end of the median, provided another access is constructed beyond the widened portion of the intersection and the access points are connected with a frontage road.

b. Access within the above limits may be allowed by the commission or the commission may elect to acquire the access rights.

c. Access may be directly opposite a primary road or secondary road in instances of a "T" intersection.

d. Access will not be permitted onto a secondary road within the primary road right of way or area acquired for "daylighting" the intersection.

1.5(11) *Property lines.* Center line of entrance at edge of slab to be no closer than 35 feet to property line extended. (The property line extension from the right of way line to center line shall be at right angles to the center line of the highway.)

An entrance to serve two properties may be established, centered on the property line by mutual agreement of the property owners.

1.5(12) *Number and arrangement of entrances.* In general, noncommercial developments will be granted one access point to the primary road.

1.5(13) *Width of entrance.* An entrance shall have a top width of not less than 18 feet nor more than 24 feet measured parallel to the edge of the slab at culvert line.

An entrance to serve two properties shall have a top width of not less than 24 feet nor greater than 30 feet measured as above.

1.5(14) *Entrance angle.* The center line of the entrance shall be as near 90° as site conditions will permit. Normally the center line of that part of the entrance lying on the right of way shall be at right angles to the pavement for a minimum distance of 30 feet from the near edge of the pavement.

1.5(15) *Return radii.* An entrance of this type shall be flared with radii no more than 15 feet. Radii shall be measured from the edge of slab.

1.5(16) *Slope and cross section of entrance.* The finished surface elevation of the driveway over the pipe, or place where pipe would normally be, shall be not less than four inches lower than shoulder elevation at the center line of the entrance to prevent water draining onto the pavement or traveled way. The side slopes on the entrance shall not be steeper than 2:1.

1.6(306A) Access to Class IV highways rural or fringe area where access rights have not been acquired.

1.6(1) *Type "A" and "B" entrances. Sight distance.* Sight distance shall not be less than the posted daytime speed requirements as stated below.

Posted Daytime Speed Limit	Required Sight Distance	Minimum Stopping Sight Distance
70 m.p.h.	950 feet	600 feet
60 m.p.h.	750 feet	475 feet
50 m.p.h.	550 feet	350 feet
40 m.p.h.	450 feet	275 feet
30 m.p.h.		200 feet

a. Applicant shall locate an entrance in compliance with the required sight distance requirement whenever possible on his property fronting a highway.

b. If the required sight distance is not available on the applicant's highway frontage, the district engineer may approve an application for establishing access for a location at the maximum sight distance available on the applicant's frontage, but in no case less than the minimum stopping sight distance.

1.6(2) *Intersections.* Necessary access located 300 feet or more from the intersection of two primary roads or 150 feet or more from the intersection of a Class IV highway and a secondary road may be granted except within a "daylighted" area by the district engineer.

a. Access may be granted by the district engineer within the widened portion of a channelized intersection in the event the median is over 750 feet long. Access may be authorized by the district engineer 500 feet or more from the center of an intersection and not closer than 250 feet to the end of the median, provided another access is constructed beyond the widened portion of the intersection and the access points are connected with a frontage road.

b. Access within the above limits may be allowed by the commission, or the commission may elect to acquire the access rights.

c. Access may be directly opposite a primary road or secondary road in instances of a "T" intersection.

d. Access will not be permitted onto a secondary road within the primary road right of way or area acquired for "daylighting" the intersection.

1.6(3) *Property lines.* The center line of the entrance at the edge of slab shall be no closer than 40 feet to the property line extended. (The property line extension from the right of way line to the center line shall be at right angles to the center line of the highway.) The return on the drive shall not extend beyond the property line. An entrance to serve two properties abutting the primary road may be established centered on the property line, by mutual agreement of the property owners.

1.6(4) *Number and arrangement of entrances.* Commercial or industrial developments will be granted access where needed to the primary road, provided safety and construction standards are satisfactory with a minimum distance of 30 feet between entrance toe of slopes along center line of ditch.

1.6(5) *Width of entrance.*

a. Type "A". Each case will require special study. [For special commercial see 1.8(306A).]

b. Type "B". Forty-five feet maximum for two-way use, in all cases.

1.6(6) *Entrance angle.* In general, entrance angle will be as near 90° to center line of the highway as site conditions will permit.

Entrances for service stations or developments where two access points are authorized shall be 60° to 90° to center line.

1.6(7) *Return radii.*

a. Type "A". Each case will require a special study.

b. Type "B". For entrance angle of 90° to center line return radii at junction of entrance and pavement shall not exceed 45 feet. For entrance angle of 60° to center line return radii of obtuse angle shall not exceed 60 feet and return radii of acute angle shall not exceed 20 feet.

1.6(8) *Slope and cross section of entrances.* The finished surface elevation of the driveway over the pipe, or place where pipe would normally be, shall not be less than four inches low-

er than shoulder elevation at the center line of the entrance to prevent water draining onto the pavement or traveled way.

The side slopes on the entrance shall not be steeper than 2:1.

1.6(9) *Type "C" entrances. Sight distance.* Sight distance shall not be less than the posted daytime speed requirements as stated below.

Posted Daytime Speed Limit	Required Sight Distance	Minimum Stopping Sight Distance
70 m.p.h.	950 feet	600 feet
60 m.p.h.	750 feet	475 feet
50 m.p.h.	550 feet	350 feet
40 m.p.h.	450 feet	275 feet
30 m.p.h.		200 feet

a. Applicant shall locate an entrance in compliance with the required sight distance requirement whenever possible on his property fronting a highway.

b. If the required sight distance is not available on the applicant's highway frontage, the district engineer may approve an application for establishing access for a location at the maximum sight distance available on the applicant's frontage, but in no case less than the minimum stopping sight distance.

1.6(10) *Intersections.* Necessary access located 300 feet or more from the intersection of two primary roads or 150 feet or more from the intersection of a Class IV highway and a secondary road may be granted except within a "daylighted" area by the district engineer.

a. Access may be granted by the district engineer within the widened portion of a channelized intersection in the event the median is over 750 feet long. Access may be authorized by the district engineer 500 feet or more from the center of an intersection and not closer than 250 feet to the end of the median, provided another access is constructed beyond the widened portion of the intersection and the access points are connected with a frontage road.

b. Access within the above limits may be allowed by the commission, or the commission may elect to acquire the access rights.

c. Access may be directly opposite a primary road or secondary road in instances of a "T" intersection.

d. Access will not be permitted onto a secondary road within the primary road right of way or area acquired for "daylighting" the intersection.

1.6(11) *Property lines.* Center line of entrance at edge of slab shall be no closer than 30 feet to property line extended. (The property line extension from the right of way line to the center line shall be at right angles to the center line of the highway.)

An entrance to serve two properties may be established centered on the property line, by mutual agreement of the property owners.

1.6(12) *Number and arrangements of entrances.* Noncommercial developments will be granted access where needed to the primary road, provided safety and construction standards are satisfactory with a minimum distance of 30 feet between entrance toe of slopes along center line of ditch.

1.6(13) *Width of entrance.* An entrance shall have a top width of not less than 18 feet nor more than 24 feet measured parallel to the edge of the slab at culvert line.

An entrance to serve two properties shall have a top width of not less than 24 feet nor greater than 30 feet measured as above.

1.6(14) *Entrance angle.* The center line of the entrance shall be as near 90° as site conditions will permit. Normally the center line of that part of the entrance lying on the right of way shall be at right angles to the pavement for a minimum distance of 30 feet from the near edge of the pavement.

1.6(15) *Return radii.* An entrance of this type shall be flared with radii no more than 15 feet. Radii shall be measured from edge of slab.

1.6(16) *Slope and cross section of entrance.* The finished surface elevation of the driveway over the pipe, or place where pipe would normally be, shall be not less than four inches lower than shoulder elevation at the center line of the entrance to prevent water draining onto the pavement or traveled way.

The side slopes on the entrance shall not be steeper than 2:1.

1.7(306A) Access to Class III and IV highways in built-up area where access rights have not been acquired.

1.7(1) *Noncommercial, commercial or industrial developments.* Applicant is urged to contact the resident maintenance engineer for clarification of the following requirements.

1.7(2) *Intersections.* At street intersections on a primary road extension in built-up area, the minimum length of curb around the radius of a street return shall be determined as follows: The beginning of the curb drop for the entrance shall be no closer than five feet from the curb tangent point provided that: A curb drop shall not extend beyond the property line extended, or extend into a crosswalk.

a. On the intersecting street the curb drop for the entrance shall be no closer than the property line extended, or extend into the crosswalk. [See 1.7(9).]

b. When a primary road extension is improved, existing entrances shall be modified to conform to entrance requirements as stated above.

Where these requirements would necessitate alteration of existing facilities for practical operation or where purchase of access rights are not economically feasible, the length of curb may be reduced to not less than the tangent point on the primary intersection, and to the property line on the intersecting street.

c. If the intersection does not have an existing or planned curb and gutter to define the radius, the following right of way and traveled way assumptions shall be applied to the above requirements for determining the location of the entrance: Minimum width of traveled way of the primary road extension—52 feet back to back of curbs. (If right of way width is less than 66 feet—traveled way shall be assumed as 75 percent of platted width of primary road extension.) Minimum width of traveled way of the intersecting local road—31 feet back to back of curbs.

d. Minimum radius of curb return where interior angle of line of curb is between 30° and 120°—25 feet.

e. If interior angle of line of curb is greater than 120°, minimum radius to be 50 feet.

f. If interior angle of line of curb is less than 30°, minimum radius of return to be 20 feet.

1.7(3) *Channelized intersection or divided highways.* When there is a median in the primary road extension or the intersecting street, or both, the curb drop for the entrance shall be determined as stated above except that at the beginning or end of the median, or at a median break the nearest edge of the curb drop for an entrance shall not be closer than 20 feet from the end of the median measured at right angles to the median. This does not apply to entrances centered on the median break.

1.7(4) *Property lines.* Curb drop for entrances shall not extend beyond the property line extended on an interior lot line. (The property line extension from the right of way line to the center line shall be at right angles to the center line of the highway.) When rural type road section exists 1.6(3) or 1.6(11) shall apply.

An entrance to serve two properties may be established centered on the property line by mutual agreement of the property owners. [See 1.7(9).]

1.7(5) *Number and arrangement of entrances to Class III highways.* In general residential and commercial developments (other than service stations) will be granted one access point to the primary road or primary road extension. Service stations with adequate frontage may be granted two points of access to the primary road or primary road extension, provided the service station does not abut another primary road or primary road extension. A second entrance will be granted to service stations abutting another primary road or primary road extension if sufficient frontage is available to provide that the curb drop nearest the intersection is located 50 feet or more from the curb tangent point. Additional access will be considered for commercial development with 150 feet frontage or more on a primary road or primary road extension provided such development does not abut or have access to another street.

In an instance where more than one access is permitted to the primary road or primary road extension from an abutting property, there shall be a minimum of 15 feet between the near edges of the curb drops for driveways.

1.7(6) *Number and arrangement of entrances for Class IV highways.* Residential and commercial developments will be granted access where needed to the primary road or primary road extension, provided safety and construction standards are satisfactory.

1.7(7) *Width of entrances.*

a. Type "A". Each case will require special study.

b. Type "B". Thirty feet maximum for one-way use on divided highway. (May be increased to 45 feet to serve two properties.) Forty-five feet maximum for two-way use in all cases. [See 1.7(9).]

c. Type "C". Twenty-four feet maximum. (May be increased to 35 feet to serve two properties.)

d. In cases where the entrance sought is to be paved the district engineer may approve entrances which include a radius in conformance with the following criteria.

(1) The radius of the entrance shall have a barrier curb section from the back of the highway curb to the end of the radius. The size of the radius is dependent on available parking width and each radius shall be a true radius.

(2) The maximum radius for Type B entrance shall be 15 feet.

(3) The maximum radius for Type C entrance shall be ten feet.

(4) The entrance shall conform to all other provisions of 1.7(306A).

(5) The width of entrance available at the end of the entrance curbed section or end of the radii, shall not exceed the entrance width noted above for the type of entrance sought.

e. The total length of curb openings on a primary road or primary road extension for access to a property abutting the road or extension shall not exceed 60 percent of the property frontage.

1.7(8) *Entrance angle.* In general, entrance angle will be as near 90° to center line of highway as site conditions will permit.

a. Entrances established for two-way operations for service stations or developments where two access points are authorized shall be 60° to 90° to center line.

b. In those instances on a divided highway where two access points are authorized for one-way operation, the "ingress" may be 45° to 60° to center line and the "egress" shall be 60° to 90° to center line.

1.7(9) *Primary road extension.* On primary road extensions the location and geometrics of access must meet local requirements within the limitation of 1.7(306A) and access permits must have prior approval by authorized city officials.

1.8(306A) Access for special commercial developments on Class III and IV highways where access rights have not been acquired. Facilities which serve type of enterprise which generates heavy concentration of vehicles such as drive-in theaters, race tracks, baseball parks, amusement centers, shopping centers, industrial parks, etc., will require special study to be co-ordinated with commission planning and design sections to determine what facilities are required.

Time requirements set forth in 1.3(2) may be extended if necessary.

1.9(306A) Classification of primary highways for access control. Each of the primary highways of the state of Iowa is classified in accordance with 1.2(11) of these rules. This classification for each highway is available at the office of the Iowa State Highway Commission, Ames, Iowa.

[Filed May 18, 1966; amended April 14, 1971]

CHAPTER 2
SPECIAL PERMITS OPERATION AND MOVEMENT OF VEHICLES AND LOADS OF EXCESS SIZE AND WEIGHT

2.1(321E) General stipulations. All permits issued by permit issuing authorities will be subject to the following general stipulations.

2.1(1) Permit issuing authorities will in their discretion and upon application and with good cause being shown therefore issue permits for the movement of vehicles with indivisible loads carried thereon which exceed the maximum dimensions and weights specified in sections 321.452 through 321.466, but not to exceed the limitations of chapter 321E of the Code.

2.1(2) *By whom issued.* All permits for the movement of oversize vehicles or vehicles and loads on the primary road system of Iowa will be issued only through the traffic weight operations department of the Iowa state highway commission, Ames, Iowa, except those authorized to be issued by the resident maintenance engineers of the Iowa state highway commission. All permits for the movements on other systems of highways and streets will be issued by the authority responsible for the maintenance of such systems of highways or streets.

2.1(3) Permits so issued may be single-trip permits or annual permits and the Iowa state highway commission will issue single-trip permits on primary road extensions in cities and towns in conjunction with movement on the rural primary road system.

2.1(4) The state of Iowa and the Iowa state highway commission and any other permit issuing authority assume no responsibility for the property of the applicant.

2.1(5) During the moving of a vehicle or object under permit, the applicant shall comply with the terms and conditions of the permit and take all reasonable precautions to protect and safeguard the lives and property of the traveling public and adjacent property owners, and shall hold permit issuing authorities harmless of any damages that may be sustained by the traveling public or adjacent property owners or resulting to the highway systems of the state on account of movements made hereunder.

2.1(6) Nothing in the permit shall be construed as waiving any load limitations which have been or which might be established on any bridge or any road which is posted with embargo signs.

2.1(7) The permit and any supplements or additions thereto shall be void in case the weights or dimensions of the vehicle and load as operated exceed the weights or dimensions as provided in the permit and supplements or additions thereto. Provisions of the law as to maximum weight and dimensions, chapter 321E of the Code shall then apply.

2.1(8) No vehicle or combination of vehicles of illegal dimension with or without load shall be moved on the highways without permit except as provided in section 321.453 of the Code.

2.1(9) Permits are valid only for the transporting of a single article which exceeds statutory size or weight limits or both, and which cannot reasonably be divided or reduced to statutory size and weight limits, except in the transportation of property consisting of more than one article exceeding the statutory size limits when the statutory weight limitations are not exceeded and the additional articles transported do not exceed statutory size in any way in which such limits would not be exceeded by the single article.

2.1(10) Permits issued shall be in writing and shall be carried in the cabs of the vehicles for which the permits have been issued and shall be available for inspection at all times. The vehicle for which the permits have been issued shall be open to inspection by any peace officer or to any authorized agent of any permit granting authority.

2.1(11) Movements by permit shall be permitted only during daylight hours unless it is established by the issuing authority that the movement can be better accomplished at another period of time because of traffic-volume conditions. Except as provided in section 321.457 of the Code, no movement of over-dimension vehicles shall be permitted on Saturday, Sunday, holidays or days preceding or following holidays or special events when abnormally high traffic volumes can be expected. Those legal holidays are: New Year's Day,

Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day and Veterans' Day.

2.1(12) The towing unit for mobile homes or other towed loads, the weight of which towed load exceeds 4500 pounds, shall be a one and one-half ton or larger truck or truck tractor having dual wheels. The towing unit for towed loads exceeding ten feet in width shall have at least a 120-inch wheel base or shall have an empty gross weight of 6000 pounds or more. Hitching requirements shall be consistent with those of the Iowa department of public safety.

2.1(13) Fees and costs required under these rules shall normally be paid in the form of certified check, cashier's check, traveler's check or bank draft. Cash and personal checks may be accepted at the discretion of the issuing authority.

2.1(14) *Financial responsibility.* Proof of public liability insurance in the amounts of $100,000 bodily injury each person, $200,000 bodily injury each occurrence and $20,000 property damage will be required prior to the issuance of any permit. Such proof to be made by the submission of a certificate of insurance to the permit issuing authority.

2.1(15) *Movements on the interstate system (as defined in section 306.3(7) of the Code).*

a. Subject to the provisions of *"b", "c"* and *"d"* below, annual or single-trip permits will be issued for movements on the interstate system provided the interstate system is free from maintenance and construction work or other hazardous conditions on the specific permit route and abnormally high traffic volumes due to special events are not present on the specific permit route and where:

(1) An alternate primary route with a roadway width of 24 feet is not available, or

(2) The average daily traffic exceeds 3000 vehicles on the alternate primary route, or

(3) The travel distance is equal for both systems or is greater for the alternate primary route.

b. Annual permits may be issued for movements on the interstate system not to exceed 25 miles except that the movement of road construction machinery, equipment or material and agricultural machinery, equipment and materials may be for a distance exceeding 25 miles if such machinery, equipment and materials are to be used within the state of Iowa or are manufactured or assembled in the state of Iowa provided:

(1) A minimum speed of 40 miles per hour can be maintained.

(2) The vehicle with load does not exceed 11 feet 9 inches in width, 13 feet 6 inches in height, 70 feet 0 inches in over-all length and total gross weight of 73,280 pounds [18,000 pounds per axle according to the schedule in 2.1(16)].

c. Single-trip permits may be issued for movement, or a portion of a move, on the interstate system where in the opinion of the director of traffic-weight operations, the more proposed on the interstate system will be to the best interests of the safety of the traveling public provided:

(1) A minimum speed of 40 miles per hour can be maintained.

(2) The vehicle with load does not exceed 11 feet 9 inches in width, height limited to underpasses, power lines and other established height restrictions, 70 feet 0 inches in over-all length and total gross weight of 73,280 pounds [18,000 pounds per axle according to the schedule in 2.1(16)].

(3) The vehicle with load does not exceed 80 feet 0 inches in over-all length and the width does not exceed 8 feet 0 inches, the height does not exceed 13 feet 6 inches and the total gross weight does not exceed 73,280 pounds [18,000 pounds per axle according to the schedule in 2.1(16)] in special or emergency situations and only at the discretion of the permit issuing authority. In such cases the provisions of 2.1(15) *"a"* (1), (2) and (3) may be waived.

d. Single-trip or annual permits may be issued for mobile homes to make a portion of a move on the interstate system:

(1) At either the point of entry or exit from this state and then only for such distance necessary to make connection with the nearest primary highway route, or

(2) To bypass urban areas over specified routes provided:

The vehicle with load does not exceed 11 feet 9 inches in width, 13 feet 6 inches in height, 70 feet 0 inches in over-all length, and total gross weight of 73,280 pounds [18,000 pounds per axle according to the schedule in 2.1(16)].

e. Permits for movement on the interstate system shall be issued by the Traffic Weight Operations Office, Ames, Iowa, or by the Resident Maintenance Engineer's Office provided the proposed interstate system movement is approved by a telephone call to the Traffic Weight Operations Office, Ames, Iowa.

2.1(16) *Schedule of maximum axle weights and maximum gross weights including tolerance.*

Wheel Base Feet	Max. Ldg. Pounds Weight	Wheel Base Feet	Max. Ldg. Pounds Weight	Wheel Base Feet	Max. Ldg. Pounds Weight	Wheel Base Feet	Max. Ldg. Pounds Weight
13	48,000	22	58,000	31	76,000	40	87,000
14	48,000	23	60,000	32	78,000	41	88,000
15	48,000	24	62,000	33	80,000	42	89,000
16	48,000	25	64,000	34	81,000	43	90,000
17	48,000	26	66,000	35	82,000	44	90,000
18	50,000	27	68,000	36	83,000	45	90,000
19	52,000	28	70,000	37	84,000	46	90,000
20	54,000	29	72,000	38	85,000	47	90,000
21	56,000	30	74,000	39	86,000		Maximum

No single axle shall exceed 18,540 pounds.
No tandem axle shall exceed 34,000 pounds.
No triple axle shall exceed 42,000 pounds for gross weights of 75,000 pounds or less.
No triple axle shall exceed 48,000 pounds for gross weights exceeding 75,000 pounds.

2.1(17) Applications for permits and escort authorization for movements on the primary highway system shall be made and permits and authorizations shall be issued on highway commission Forms 563, 564, 566, 567 and 568 which are set out in 2.6(321E). Any applications to local authorities for permit or escort authorization made upon Forms 563, 564 and 566 through 568 shall be sufficient and accepted as properly made by local authorities.

Subject to the preceding, permit issuing authorities may adopt, amend or modify such forms provided that amended or modified forms adequately identify the applicant, the hauling vehicle and load, the manner and extent that the vehicle with load exceeds legal dimensions and weights specified in sections 321.452 through 321.466 of the Code, route and trip distance where applicable and authorization of issuing authority.

2.2(321E) Movements of loads exceeding 12 feet 5 inches in width.

2.2(1) Permits for the movement of indivisible loads exceeding 12 feet 5 inches in width shall be restricted to maximum trip distances in accordance with the schedules in 2.2(3), including adjustments for road widths of less than 24 feet and traffic volumes of less than 4000 vehicles per day and adjustments for gravel roads. (For 24-foot, 22-foot, 20-foot, 18-foot paved roadways and gravel surfaces where a=4000 or more vehicles per day, b=3000 or more vehicles per day, c=2000 or more vehicles per day, d=1000 or more vehicles per day, and e=under 1000 vehicles per day.)

2.2(2) A movement of an indivisible load over a highway or highways having sections carrying varying volumes of traffic and having varying surface widths shall be computed for the total distance of the lowest volume of traffic or the greatest highway width whichever produces the greatest distance by the schedule in 2.2(3). No part of the movement based on traffic volume and surface width shall exceed the distance established by the specific traffic volume and surface width for that section.

2.2(3) Computation of maximum trip distance when permits are issued by more than one authority to accomplish a single trip.

a. Permit issuing authorities shall issue permits for that portion of the total trip distance made upon roads within their jurisdiction using the schedule in 2.2(3). No permit issuing authority shall authorize a move for a distance exceeding the maximum trip distance allowable for the portion of the move within its jurisdiction.

b. The maximum trip distance allowable for a movement requiring permits from more than one issuing authority will be the greatest maximum distance allowed for any segment of the permit movement but shall not exceed 50 miles. The maximum distance shall not be extended by the fact that there is more than one issuing authority.

PAVED SURFACE

Actual Load Width	24′ roadway (pavement)					22′ roadway (pavement)

2.3(321E) Permits—their limitations and stipulations.

2.3(1) Annual permits (issued for a period of one year) for:

a. Vehicles and indivisible loads including mobile homes not to exceed the following dimensions and weights:

(1) Width—12 feet 5 inches including appurtenances.

(2) Length—70 feet 0 inches over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height (legal) 13 feet 6 inches.

(4) Weight (legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule in 2.1(16).]

(5) Unlimited distance.

b. Vehicles with indivisible loads not to exceed the following dimensions and weights:

(1) Width—14 feet 0 inches.

(2) Length—80 feet 0 inches over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height (legal) 13 feet 6 inches.

(4) Weight (legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule in 2.1(16).]

(5) Restricted to trip distances not to exceed 50 highway and street miles in total aggregate.

c. Vehicles with indivisible loads not to exceed the following dimensions and weights:

(1) Width—(legal) 8 feet 0 inches.

(2) Length—100 feet 0 inches over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height—(legal) 13 feet 6 inches.

(4) Weight—(legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule in 2.1(16).]

(5) Restricted to trip distances not to exceed 50 highway and street miles in total aggregate.

d. The movement of truck trailers manufactured or assembled in the state of Iowa shall be limited to the following:

(1) Width—(legal) 8 feet 0 inches.

(2) Length—65 feet over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height—13 feet 6 inches.

(4) Weight—(legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule in 2.1(16).]

(5) Not to exceed 45 miles per hour.

(6) Only on roadways of 24 feet in width or more.

(7) Solely for the purpose of delivery from the point of manufacture or assembly to a point outside the state.

e. A fee of ten dollars payable prior to issuance of the permit.

f. Annual permits will be issued only upon receipt of a fully completed application form by mail or when the applicant appears in person.

2.3(2) Single-trip permits (issued for the movement of a single load that exceeds statutory size from point of origin to point of ultimate destination) for:

a. Vehicles with indivisible loads including mobile homes not to exceed the following dimensions and weights:

(1) Width—12 feet 5 inches including appurtenances.

(2) Length—80 feet 0 inches over-all. No mobile home may be moved if the actual mobile home unit exceeds 65 feet in length. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height—(legal) 13 feet 6 inches.

(4) Weight—(legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule in 2.1(16).]

(5) Unlimited distance.

b. Vehicles with indivisible loads not to exceed the following dimensions and weights:

(1) Width—12 feet 0 inches.

(2) Length—80 feet 0 inches. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height—limited only to limitations of underpasses, bridges, power lines and other established height restrictions.

(4) Weight—(including all tolerances)—18,540 pounds (single axle). Weights for groups of axles, [see 2.1(16)]—75,000 pounds (total gross weight).

(5) Unlimited distance over specified routes.

c. Vehicles with indivisible loads not to exceed the following dimensions and weights:

(1) Width—12 feet 0 inches.

(2) Length—80 feet 0 inches over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet 0 inches.

(3) Height—limited only to limitations of underpasses, bridges, power lines and other established height restrictions.

(4) Weight—(including all tolerances)—18,540 pounds (single axle). Weights for groups of axles, [see 2.1(16)]—90,000 pounds (total gross weight).

(5) Unlimited distance over specified route.

d. Vehicles with indivisible loads subject to the following dimensions and weights:

(1) Width—exceeding 12 feet 0 inches and up to 40 feet 0 inches over-all width.

(2) Length—not to exceed 120 feet 0 inches over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet.

(3) Height—limited only to limitations of underpasses, bridges, power lines and other established height restrictions.

(4) Weight—(including all tolerances)—18,540 pounds (single axle). Weights for groups of axles, [see 2.1(16)]—90,000 pounds (total gross weight).

(5) Distance limited to the schedule of total trip distances. [See rule 2.2(321E)]—over specified routes, in all cases must be accompanied by an official escort approved by the issuing authority.

e. Vehicles especially designed for the movement of grain bins and vehicles with indivisible loads not to exceed the following dimensions and weights:

(1) Width—(legal) 8 feet 0 inches.

(2) Length—120 feet over-all. Front-end projection may in the discretion of the issuing authority exceed 15 feet 0 inches.

(3) Height—(legal) 13 feet 6 inches.

(4) Weight—(legal including all tolerances)—18,540 pounds (single axle), 34,000 pounds (tandem axle), 42,000 pounds (triple axle), and 73,280 pounds (total gross weight). [See schedule 2.1(16).]

f. Vehicles with indivisible loads exceeding the total gross weight of 90,000 pounds may be moved in special or emergency situations.

Weight—gross weight on any axle shall not exceed 18,540 pounds including tolerances.

g. Special or emergency situations (definitions).

(1) Shall be defined as those where it is necessary to co-operate with national defense officials.

(2) Or where it is necessary to co-operate with cities, towns, counties or other state agencies in response to national or other disasters.

(3) Or where it is necessary to co-operate with public or private utilities in order to maintain their public services.

(4) Or uncommon and extraordinary circumstances where the movement is essential to the existence of an Iowa business and the move may be accomplished without causing undue haz-

ards to the safety of the traveling public or undue damage to private or public property.

(5) The issuing authority at its discretion may require an additional escort either official or civilian approved.

h. Fees and costs.

(1) A fee of five dollars will be charged for each single-trip permit payable prior to the issuance of the permit.

(2) Permit issuing authorities may charge any permit applicant a fair and reasonable cost for the removal and replacement of natural obstructions or official signs and signals.

(3) Permit issuing authorities may charge any permit applicant a fair and reasonable cost for measures necessary to avoid damage to public property including structures and bridges payable prior to the issuance of the permit.

(4) Permit issuing authorities may require the applicant to file a bond, certified check or other assurance in an amount sufficient to cover the reasonably anticipated cost of damage or loss to private property, either real or personal, likely to be caused by or arising out of the movement of the vehicle and load. The amount of the above may be reduced either in whole or in part by the applicant's submission to the permit issuing authority of written permission from affected third parties stating in substance that the third party either owns or has the right of exclusive possession and control over the affected property and does by his signature consent to the move and states that the applicant has in hand paid or secured the payment of the anticipated cost of loss or damage to his property.

i. Single-trip permits for movement on the primary highway system shall be issued:

(1) By the traffic weight operations department (permit section), Iowa state highway commission, Ames, Iowa, upon receipt of permit application and the permit fee by mail.

(2) When the permit applicant appears in person at the traffic weight operations department (permit section), Ames, Iowa.

(3) By telephone—telegraph when load does not exceed 90,000 pounds total gross weight, width does not exceed 12 feet 5 inches, over-all length does not exceed 80 feet, height does not exceed 14 feet 4 inches (provided specific route will allow the height of the load). The permit section may be contacted directly by telephone except for the movement of mobile homes and buildings for which a permit must be submitted in person or by mail at the permit office. Upon approval of the permit application submitted, a telegram permit may then be issued provided that in cases where an escort is required for the move, an approved civilian or official escort is indicated on the application. In all cases the permit fee must be received prior to the issuance of the permit.

(4) By the highway commission resident maintenance engineer's office when the vehicle and load does not exceed (without traffic weight operations concurrence):

75,000 pounds total gross weight.

Twelve feet 5 inches in width and 18 feet 0 inches width of buildings.

Eighty feet 0 inches over-all length.

Fourteen feet 4 inches in height (provided specific route will allow the height of the load).

(5) By Iowa highway commission resident maintenance engineer's office when vehicle and load exceeds: (Must have traffic weight operations concurrence by telephone before the permit is issued).

75,000 pounds but not to exceed 90,000 pounds total gross weight.

Twelve feet 5 inches in width but not to exceed 40 feet provided official escort is obtained by the applicant.

Eighty feet 0 inches in length but not to exceed 120 feet 0 inches provided approved escort is obtained by the applicant.

Fourteen feet 4 inches in height provided affected public utilities are contacted and proper line crews are available.

2.3(3) Warning devices for overdimension vehicles and loads operating under single-trip or annual permit as follows:

a. Mobile homes must display:

(1) A sign at least 14 inches high by 5 feet long marked "Oversize Load" with a minimum of 10-inch black letters on a yellow background and mounted on the rear of the mobile home. Such sign must be mounted on the rear of the load at least 7 feet above the highway surface measuring from the bottom of the sign.

(2) A similar sign as in "*a*" (1) above, mounted on the front bumper of the towing unit.

(3) Red Flags at least 18 inches square placed in holders on each corner of the front bumper of the towing unit and on the corners of the rear of the load.

b. Buildings and other loads exceeding 8 feet 0 inches in width and up to 65 feet in length must display:

(1) A sign at least 14 inches high by 5 feet long marked "Wide Load" with a minimum of 10-inch black letters on a yellow background and mounted on the rear of the load.

(2) A similar sign as in "*b*" (1) above, mounted on the front bumper of towing unit.

(3) Red flags at least 18 inches square placed in holders on each corner of the front bumper of the towing unit and on the corners of the rear of the load.

c. Loads exceeding 65 feet in length must display:

(1) A sign at least 14 inches high by 5 feet long marked "Long Load" with a minimum of 10-inch black letters on a yellow background and mounted on the rear of the load.

(2) A similar sign as in "*c*" (1) above, mounted on the front bumper of the towing unit.

(3) Two red flags at least 18 inches square and elevated 2 feet above the load and mounted at each rear corner of the hauling vehicle

when overlength loads (example: poles, pipes, beams, etc.) are hauled where the above-described sign in "c" (1) is not practical. On these types of loads red flags or a flashing amber light shall be placed strategically on any load extension beyond the rear of the hauling vehicle. Such flashing light must be at least 5 inches in diameter and have at least 50 candlepower.

(4) Red flags at least 18 inches square placed in holders on each corner of the front bumper of the towing unit and on the rear corners of the load.

d. In those cases where the load being hauled is both long and wide and the over-all length exceeds 65 feet, the warning devices as described in "c" above shall be required.

e. Loads exceeding 73,280 pounds total gross weight shall not be required to display warning devices unless width or length exceeds legal dimensions.

f. All warning devices described in this subrule shall be clean at all times and shall be removed or covered when the vehicle is not being operated under permit.

g. Warning signs not consistent with the wording requirements as described in 2.3(3) "*a*", "*b*", and "*c*" must be approved by the permit issuing authority prior to their usage on oversize vehicles and loads. Coloring schemes and dimensions of signs shall be consistent with the above requirements.

2.4(321E) Escorting—civilian and official.

2.4(1) *Civilian escort authorization.*

a. A blanket authorization is an authorization issued by the permit issuing authority for the escorting of vehicles and loads subject to these rules under circumstances where the escort driver is an employee of the permit holder.

b. An individual authorization is an authorization issued by the permit issuing authority for the escort of vehicles and loads subject to these rules under circumstances where the escort driver is an agent but not an employee of the permit holder or is an individual or an employee of another under contract to provide escort service for the permit holder.

c. Permit issuing authorities may in their discretion issue blanket escort authorization to all annual permit holders and to permit holders when it is necessary to co-operate with:

(1) National defense officials.

(2) Cities, towns, counties or other agencies of this state or other states in response to national or other disasters.

(3) Public or private utilities in order that they may maintain their public service.

(4) Businesses where in the ordinary course of the permit holder's business it is necessary to move vehicles with loads that qualify for single-trip permits.

2.4(2) *General escorting requirements.*

a. Shall use a vehicle of a general size approximating that of a normal passenger automobile with sufficient mobility so as to be able to avoid and assist in the event of an emergency and of such design so as to afford clear and unobstructed vision both front and rear.

b. All escort operators shall be age twenty-one or over and shall be in possession of a valid chauffeur's license or have recently passed the written and vision examination for an Iowa chauffeur's license and have a valid operator's license.

c. Shall equip the escorting vehicle with an amber revolving light. Such light shall be at least seven inches high, seven inches in diameter with at least a 100-candlepower lamp and must provide 360° warning. During the escorting of a permit load, the revolving light shall be mounted on top of the escort vehicle and shall be burning. Additional escort vehicle markings may be approved or required by the permit issuing authority.

d. Two red flags shall be mounted on the front bumper of the escort vehicle.

e. Shall maintain a distance of approximately 300 feet in front of the load and where required from the rear of the same except when traveling within the corporate limits of a city or town at which time the escort shall maintain a reasonable and proper distance consistent with existing traffic conditions.

f. A separate escort shall be provided for each load hauled under escort.

g. All traffic laws shall be obeyed.

h. The operator of the escort vehicle shall warn traffic by means of a red flag, of the approaching load at danger points such as bridges and corners where the loaded vehicle is going to make a turn.

i. Shall immediately prior to an escort, find the escorting vehicles to be in safe operational condition.

2.4(3) *Individual authorization requirements.*

a. All such operators shall submit their full names, the date of their birth, chauffeur's license number and date of issuance in writing to traffic weight operations in Ames, Iowa.

b. In those cases where the escort vehicle is not operated under blanket civilian authorization, the owner of the escort vehicle shall file with traffic weight operations proof of public liability insurance in the amounts of $100,000-$200,000-$20,000. Such proof to be made by the submission of a certificate of insurance.

c. Upon compliance with the above, the individual civilian escort operator will receive proof of authorization from the director of traffic weight operations and shall be in possession of same throughout any move for which he is providing such service.

d. In consideration of the issuance of said authorization and in order to defray the expense of

the same, the director shall charge a fee of five dollars, which authorization shall be good and effective for a term of one year from the time of its issuance, subject to the applicant's subsequent compliance with official rules promulgated under authority of chapter 321E of the Code.

2.4(4) Except as otherwise specifically provided, approved civilian and official escorts shall be required for movement under single-trip permit as follows:

a. One approved civilian escort shall be required when the vehicle with load exceeds:

(1) The roadway lane width and the total gross weight of the vehicle with load is 73,280 pounds or less and its width does not exceed 12 feet 5 inches and its length does not exceed 80 feet 0 inches and its height does not exceed 13 feet 6 inches.

(2) The roadway lane width and the total gross weight of the vehicle with load is more than 73,280 pounds but less than 75,000 pounds and its width does not exceed 12 feet 0 inches and the length does not exceed 80 feet 0 inches.

(3) 75,000 pounds but not more than 90,000 pounds total gross weight and its width does not exceed 12 feet 0 inches and its length does not exceed 80 feet 0 inches.

(4) Eighty feet 0 inches in length but not more than 120 feet 0 inches in length, or the vehicle is one especially designed for the exclusive movement of grain bins with a length of more than 80 feet 0 inches but not more than 120 feet 0 inches and their widths do not exceed 8 feet 0 inches and their total gross weights do not exceed 73,280 pounds and their heights do not exceed 13 feet 6 inches.

b. An official escort operator shall include any peace officer, (sheriff, deputy sheriff, policeman, highway patrolman, and uniformed highway commission escort) on or off duty and may include any approved civilian escort, with at least two years of escorting experience, authorized by the permit issuing authority as an official escort. Proof of such authorization must be carried by the escort in addition to the civilian escort authorization. One such official escort shall be provided when the vehicle with load exceeds:

(1) Twelve feet 5 inches in width.

(2) Eighty feet 0 inches in length and either its width exceeds 8 feet 0 inches or its height exceeds 13 feet 6 inches or its total gross weight exceeds 73,280 pounds.

(3) 75,000 pounds total gross weight and either its width exceeds 12 feet 0 inches or its length exceeds 80 feet 0 inches.

(4) 90,000 pounds total gross weight.

2.4(5) Approved escorts shall be required when movement is made under annual permit as follows:

One approved civilian escort shall be required when:

a. Vehicle and load exceeds the roadway lane width of the highway or street being traversed.

b. The length of the vehicle and load exceeds 80 feet 0 inches.

2.5(321E) Permit violation. All permit violations are to be reported to traffic weight operations by the arresting officers who in turn will make periodic reports to the commission of the type and number of violations.

2.5(1) Permit violation reports by the arresting officer to include:

a. The time, date, location, summons number, the arresting officer's signature, the nature of the violation or violations, the name of the violator, the name of the permit holder and type and number of permit.

b. Remarks of the arresting officer.

The arresting officer shall note the circumstances of the violation to include those tending to show the nature of the same. The arresting officer should also indicate whether in his opinion the violation was intentional or inadvertent.

c. Remarks by the arrested driver.

(1) The arrested driver should read the arresting officer's report and should note any corrections to the report and give a summary of his reason for the violation.

(2) The arrested driver may sign the report.

d. Remarks by the magistrate.

(1) The magistrate before whom the case is presented shall be requested to indicate his decision and also his opinion as to whether the violation was intentional or inadvertent.

(2) The magistrate shall sign the report.

e. The report forms are to be submitted at the end of each day to traffic weight operations office in Ames, Iowa, by the arresting officer. Said forms shall be completed in triplicate, the original copy going to the arrested driver, the second copy to the Ames office and the third copy retained by the arresting officer.

f. The permit violation reports are to be filed by the traffic weight operations office and a record of the reports properly kept up to date.

2.5(2) Permit violation reports by traffic weight operations to the commission.

a. The director of traffic weight operations is to report to the Iowa state highway commission that a permit holder has accumulated violations on five or more occasions or has one violation in a manner as to indicate a willful violation by the permit holder.

b. Such report shall contain:

(1) The name of the permit holder in violation and the type and number of the permit.

(2) The director of traffic weight operations opinion as to whether or not the permit holder is operating in willful disregard for the safety of the traveling public and adjacent private or public property owners.

c. Such opinion shall be supported by a factual summary of all violations of sections 321.454, 321.456, 321.457, 321.463 and of chapter 321E of the Code as reported for every occasion upon which the violation occurred.

d. Before formulating such opinions the director of traffic weight operations shall consider the evidence relating to:

(1) The character of the violation.

(2) The gravity of the violation.

(3) The extent of the operations of any vehicles by or on behalf of the permit holder upon the public highways of this state which did not involve violations.

e. Such report shall contain recommendations by the director of traffic weight operations to amend, modify or revoke the permit.

2.5(3) Hearing to show cause why permit should not be amended, revoked or modified.

If the Iowa state highway commission shall concur in the recommendations as mentioned in 2.5(2) "*e*", above, the permit holder shall be notified of the time and place at which he might appear to present cause why the permit or future permits should not be amended, modified or revoked.

2.6(321E) Iowa state highway commission Forms 563, 564 and 566 through 568 to be used for the issuance of permits and escort authorization for movements of oversize-overweight vehicles and loads on the primary highway system of Iowa. Highway commission Form 569 is for the reporting of permit violations on Iowa roads.

AUTHORIZED CIVILIAN ESCORT PROVISIONS

1. Shall use a vehicle of a general size approximating that of a normal passenger automobile with sufficient mobility so as to be able to avoid and to assist in the event of an emergency and of such design so as to afford clear and unobstructed vision both front and rear.
2. All escort operators shall be age 21 or over and shall be in possession of a valid chauffeur's license or have recently passed the written and vision examination for an Iowa chauffeur's license and have a valid operator's license.
3. Shall equip the escorting vehicle with an amber revolving light. Such light shall be at least seven inches high, seven inches in diameter with at least a 100-candlepower lamp and must provide 360° warning. During the escorting of a permit load, the revolving light shall be mounted on top of the escort vehicle and shall be burning.
4. Two red flags shall be mounted on the front bumper of the escort vehicle.
5. Shall maintain a distance of approximately 300 feet in front of the load and where required from the rear of the same except when traveling within the corporate limits of a city or town at which time the escort shall maintain a reasonable and proper distance consistent with existing traffic conditions.
6. A separate escort shall be provided for each load hauled under escort.
7. All traffic laws shall be obeyed.
8. The operator of the pilot vehicle shall warn traffic by means of a red flag, of the approaching load at danger points such as bridges and corners where the loaded vehicle is going to make a turn.
9. Shall immediately prior to an escort, find the escorting vehicles to be in safe operational condition.

GENERAL PROVISIONS

State of Iowa and highway commission assume no responsibility for property of the permit holder by issuance of this permit.

The permit holder shall comply with terms and conditions of the permit, take all reasonable precautions to protect and safeguard the lives and property of the traveling public and adjacent property owners, and shall hold the state of Iowa and highway commission harmless of any damages that may be sustained on account of such move.

The permit holder shall hold the state and the highway commission harmless for any damages that may result to primary highways by movement made hereunder and shall reimburse state or highway commission for any expenditure which state or highway commission may have to make on account of such move.

Nothing in the permit shall be construed as waiving any load limitations which have been or which might be established on any bridge or any road with embargo signs nor the wheel base maximum load limitations of subrule 2.1(16) of the Rules for the issuance of permits.

Permit and any supplements or additions thereto shall be void in case the weights or dimensions of the vehicle and load as operated exceed the weights or dimensions as provided in the permit and supplements or additions thereto.

No vehicle or combination of vehicles of illegal dimensions, with or without load, shall be moved on Iowa highways without permit.

Permit is valid only for the transporting of a single article per move exceeding statutory size or weight limits or both, and which cannot reasonably be divided, or reduced to statutory size and weight limits, etc., except in the transportation of property consisting of more than one article exceeding the statutory size limits when the statutory weight limits are not exceeded and the additional articles transported do not exceed statutory size in any way in which such limits would not be exceeded by the single article.

Permit shall be carried in the cab of the vehicle for which the permit is issued and shall be available for inspection at all times. Vehicles for which permit is issued shall be open to inspection by any peace officer or any authorized agent of any permit granting authority.

Movements under permit shall be made only during daylight hours unless it is established by the issuing authority that movement can be better accomplished at another period of time because of traffic volume conditions. Except as provided in section 321.457 of the Code, no movement of overdimension vehicles shall be permitted on Saturdays, Sundays, or the day of, before or after the following holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day and Veterans' Day or days of special events when abnormally high traffic volumes can be expected.

The permit vehicle shall not exceed, consistent with the safety of the traveling public, that speed specified by this permit.

The permit holder must take steps necessary to avoid and reduce traffic congestion by maintaining proper traffic interval, temporarily relinquishing the travel way in order to provide a passing opportunity for fol-

lowing vehicles desiring to travel faster than the prescribed speed of the permit vehicle. This shall be done as soon as conveniently possible as soon as a group of two or more vehicles have accumulated in back of permit vehicle.

The permit holder must notify the Director of Traffic Weight Operations, Highway Commission, Ames, Iowa, in writing of the fact of the occurrence of any reportable motor vehicle accident involving any permit vehicle.

All vehicles and loads exceeding legal dimensions must display warning devices as stipulated in subrule 2.3(3) of the Rules for the issuance of permits.

GENERAL PROVISIONS

State of Iowa and Highway Commission assume no responsibility for property of permit holder by issuance of this permit.

The permit holder shall comply with terms and conditions of the permit, take all reasonable precautions to protect and safeguard the lives and property of the traveling public and adjacent property owners, and shall hold the state of Iowa and Highway Commission harmless of any damages that may be sustained on account of such move.

The permit holder shall hold the state and the Highway Commission harmless for any damages that may result to primary highways by movement made hereunder and shall reimburse state or Highway Commission for any expenditure which state or Highway Commission may have to make on account of such move.

Nothing in the permit shall be construed as waiving any load limitations which have been or which might be established on any bridge or any road posted with embargo signs nor the wheel base, maximum load limitations of subrule 2.1(16) of the Rules for the issuance of permits.

Permit and any supplement or additions thereto shall be void in case the weights or dimensions of the vehicle and load as operated exceed the weights or dimensions as provided in the permit and supplements or additions thereto.

No vehicle or combination of vehicles of illegal dimensions, with or without load, shall be moved on Iowa highways without permit.

Permit is valid only for the transporting of a single article per move exceeding statutory size or weight limits or both, and which cannot reasonably be divided, or reduced to statutory size and weight limits, etc., except in the transportation of property consisting of more than one article exceeding the statutory size limits when the statutory weight limits are not exceeded and the additional articles transported do not exceed statutory size in any way in which such limits would not be exceeded by the single article.

Permit shall be carried in the cab of the vehicle for which this permit is issued and shall be available for inspection at all times. Vehicles for which the permit is issued shall be open to inspection by any peace officer or any authorized agent of any permit granting authority.

Movements under permit shall be made only during daylight hours unless it is established by the issuing authority that movement can be better accomplished at another period of time because of traffic volume conditions. Except as provided in section 321.457 of the Code, no movement of overdimension vehicles shall

be permitted on Saturdays, Sundays or the day of, before or after the following holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day, and Veterans' Day or days of special events when abnormally high traffic volumes can be expected.

The permit vehicle shall not exceed, consistent with the safety of the traveling public, that speed specified by this permit.

The permit holder must take steps necessary to avoid and reduce traffic congestion by maintaining proper traffic interval, temporarily relinquishing the travel way in order to provide a passing opportunity for following vehicles desiring to travel faster than the prescribed speed of the permit vehicle. This shall be done as soon as conveniently possible as soon as a group of two or more vehicles have accumulated in back of permit vehicle.

The permit holder must notify the Director of Traffic Weight Operations, Highway Commission, Ames, Iowa, in writing of the fact of the occurrence of any reportable motor vehicle accident involving any permit vehicle.

Any vehicle and load exceeding 12'5" in width or exceeding 70' in length shall be limited to maximum trip distances of fifty miles. All vehicles and loads exceeding legal dimensions must display warning devices as stipulated in subrule 2.3(3) of the Rules for the issuance of permit.

Approved escort shall be provided for the movement of vehicles and loads which exceed the roadway lane width or eighty feet in length when operated under annual permit.

[Filed February 5, 1969; amended May 1, 1969, October 14, 1969, April 30, 1970, October 15, 1971]

CHAPTER 3
FUNCTIONAL CLASSIFICATION OF HIGHWAYS

3.1(306) Roads and streets to be classified. All roads and streets in legal existence as of January 1, 1970, shall be classified. All roads and streets in the category of "proposed" will be excluded from this classification study.

3.2(306) Meeting dates for county classification boards. Following the selection of the classification board members for each county, the three-member board shall meet as soon as practical for the purpose of organization and establishment of schedules. Subsequent meeting dates will be set at the discretion of the board but shall include one meeting annually in all subsequent years following the initial classification process.

3.3(306) Recording secretary. The designation of a recording secretary, who shall provide the minutes for each board meeting, will be the responsibility of each individual classification board.

3.4(306) Public hearing. Each respective county shall be responsible for the publishing of hearing information, for providing the place of the hearing and for recording the proceedings of the hearing.

3.5(306) Transcripts of hearings. Transcripts of hearings, tape recorded or typed, shall be the responsibility of the classification boards and will be retained in their files.

3.6(306) Order of classification. To achieve proper and logical functional classification it is necessary to select the highest order systems first and proceed from that point down through the hierarchy to the lowest order systems. System selection shall be carried out in the following order.

3.6(1) *Rural systems.*
a. Freeway-expressway
b. Arterial
c. Arterial connector
d. Trunk
e. Trunk collector
f. Area service

3.6(2) *Municipal systems.*
a. Freeway-expressway extensions
b. Arterial extensions
c. Arterial connector extensions
d. Trunk extensions
e. Trunk collector extensions
f. Municipal arterial
g. Municipal collector
h. Municipal service

3.7(306) Classifications of county line roads. When classifying county line roads, each county shall classify only the roads that border the county on the north and west. This procedure is for the purpose of eliminating confusion in record-keeping and for providing uniform classification plans.

3.8(306) Classification of roads on corporation lines. To eliminate double reporting of mileage, and provide uniform classification plans, all roads on corporation lines shall be classified as municipal streets and considered to be within the corresponding municipality. Where streets occur on corporation lines common to two municipalities the street classification shall be reported by the municipality on the south or east.

3.9(306) State park and institutional road system classification. This classification involves only identifying and tabulating the miles of road within each park or institution. The highway commission presently possesses all information necessary for this determination and will, therefore, complete this classification. To provide continuity of other systems the county classification boards shall, however, determine the location of extensions of freeway-expressways, arterials, arterial connectors, trunks, trunk collectors, municipal arterials, and municipal collectors within these areas.

3.10(306) Data submittal. Each county classification board shall submit the following data to the highway commission at the time they complete their initial classification and at any future time when adjustments in the classification are necessary.

3.10(1) *Letter of transmittal.*

3.10(2) *Network maps.* Each board shall submit a map of their county and one map of each municipality in the county showing the selected classifications by the following color codes. When future adjustments are required only maps of the effected area are required.

a. County map showing rural systems.

Freeway-expressway	Red
Arterial	Orange
Arterial connector	Green
Trunk	Blue
Trunk collector	Brown
Area service	Black

b. Municipal maps.

Freeway-expressway extensions	Red
Arterial extensions	Orange
Arterial connector extensions	Green
Trunk extensions	Blue
Trunk collector extensions	Brown
Municipal arterial	Purple
Municipal collector	Yellow
Municipal service	Black

3.10(3) *Mileage summary forms.* These forms will be furnished to the county classification boards by the highway commission with the requirement that each board fill in the following data.

a. Summary of mileage making up each functional class within the appropriate county and the cities and towns therein.

b. Listing of each segment of road contained in the individual classes except for the area service system and the municipal service system.

[Filed July 14, 1970]

CHAPTER 4
Reserved for future use

CHAPTER 5
OUTDOOR ADVERTISING

5.1(306B) Purpose. To provide execution of chapter 306B of the Code, hereinafter, called the "Act", the Iowa state highway commission hereby declares:

5.1(1) To promote the safety, convenience, and enjoyment of public travel and free flow of interstate commerce and to protect the public investment in the Iowa system of interstate and defense highways, hereinafter called the "Interstate System", it is in the public interest to control the use of and to improve areas adjacent to such system by controlling the erection and maintenance of outdoor advertising signs, displays and devices adjacent to that system.

5.1(2) It is a state policy that the erection and maintenance of outdoor advertising signs, displays, or devices within 660 feet of the edge of the right of way and visible from the main-traveled way of all portions of the interstate system, should be regulated, consistent with state standards as prepared and promulgated by the Iowa state highway commission.

5.2(306B) Definitions. The following terms when used in the standards in this [chapter] have the following meanings:

5.2(1) "Acquired for right of way" means acquired for right of way for any public road by the state of Iowa, federal government, or a county, city, or other political subdivision of the state, by donation, dedication, purchase, condemnation, use or otherwise. The date of acquisition shall be the date upon which title (whether fee title or a lesser interest) vested in the public for right of way purposes under applicable state law.

5.2(2) "Advertising device" includes any outdoor sign, display, device, figure, painting, drawing, message, placard, poster, billboard, or any other device designed, intended, or used to advertise or give information in the nature of advertising and having the capacity of being visible from the traveled portion of any highway of the interstate system in this state.

5.2(3) "Center line of the highway" means a line equidistant from the edges of the median separating the main-traveled ways of a divided interstate highway.

5.2(4) "Controlled portion of the interstate system" means all segments of that system of primary highways officially designated as part of the National System of Interstate and Defense Highways and approved by the appropriate authority of the federal government except:

a. Those segments of said system located without the boundaries of incorporated municipalities as such boundaries existed on September 21, 1959, wherein the land use as of September 21, 1959, was clearly established by Iowa law as industrial or commercial.

b. Those segments of said system located within the boundaries of incorporated municipalities as such boundaries existed on September 21, 1959, wherein the use of the real property adjacent to said system is subject to municipal regulation or control and which traverse areas zoned on or after September 21, 1959, industrial or commercial.

5.2(5) "Entrance roadway" means any public road or turning roadway, including acceleration lanes, by which traffic may enter the main-traveled way of an interstate highway from the general road system within Iowa, irrespective of whether traffic may also leave the main-traveled way by such road or turning roadway.

5.2(6) "Erect" means to construct, build, raise, assemble, place, affix, attach, create, paint,

draw or in any other way bring into being or establish.

5.2(7) "Exit roadway" means any public road or turning roadway, including deceleration lanes, by which traffic may leave the main-traveled way of an interstate highway to reach the general road system within Iowa, irrespective of whether traffic may also enter the main-traveled way by such road or turning roadway.

5.2(8) "Interstate System" means the system of highways as defined in Title 23 U.S.C., subsection "*d*" or amendments thereto.

5.2(9) "Legible" means capable of being read without visual aid by a person of normal visual acuity.

5.2(10) "Maintain" means to allow to exist.

5.2(11) "Main-traveled way" means the traveled way of an interstate highway on which through traffic is carried. In the case of a divided highway, the traveled way of each of the separated roadways for traffic in opposite directions is a main-traveled way. It does not include such facilities as frontage roads, turning roadways or parking areas.

5.2(12) "National Policy" means the provisions relating to control of advertising devices adjacent to the interstate system contained in Title 23 U.S.C. 131 or amendments thereto and the national standards promulgated pursuant to such provisions.

5.2(13) "Protected areas" means all areas inside the boundaries of Iowa which are adjacent to and within 660 feet of the edge of the right of way of all controlled portions of the interstate system within Iowa. Where a controlled portion of the interstate system terminates at an Iowa boundary which is not perpendicular or normal to the center line of the highway, "protected areas" also means inside the boundary of Iowa which are within 660 feet of the edge of the right of way of the interstate highway in the adjoining state.

5.2(14) "Scenic area" means any public park or area of particular scenic beauty or historical significance designated by or pursuant to Iowa law as a scenic area.

5.2(15) "Sign" means any outdoor sign, display, device, figure, painting, drawing, message, placard, poster, billboard, or other thing which is designed, intended, or used to advertise or inform, any part of the advertising or informative contents of which is visible from any place on the main-traveled way of a controlled portion of the interstate system.

5.2(16) "State" means the state of Iowa within the boundaries of which a portion of the interstate system is located.

5.2(17) "State law" means an Iowa constitutional provision or statute, or an ordinance, rule or regulation enacted or adopted by an Iowa agency or political subdivision of Iowa pursuant to Iowa Constitution or statute.

5.2(18) "Trade name" shall include brand name, trade-mark, distinctive symbol, or other similar device or thing used to identify particular products or services.

5.2(19) "Traveled way" means the portion of a roadway for the movement of vehicles, exclusive of shoulders.

5.2(20) "Turning roadway" means a connecting roadway for traffic turning between two intersection legs of an interchange.

5.2(21) "Visible" means capable of being seen (whether or not legible) without visual aid by a person of normal visual acuity.

5.2(22) "Advertising area" means portions of protected areas which are either zoned or unzoned commercial or industrial areas.

5.2(23) "Zoned commercial or industrial areas" means those portions of protected areas zoned industrial or commercial under authority of any law, regulation or ordinance of the state or any of its subdivisions.

5.2(24) "Unzoned commercial or industrial areas" means those portions of protected areas not zoned by state or local law, regulation or ordinance, which are occupied by one or more industrial or commercial activity, other than outdoor advertising signs, and the lands along interstate highways for a distance of 660 feet immediately adjacent to the activities.

All measurements shall be from the outer edges of the regularly used buildings, parking lots, storage or processing areas of the activities in from the property lines of the activities, and shall be along or parallel to the edge of pavement of the highway. Measurements shall not be from the property lines of the activities; unless said property lines coincide with the limits of the activities. Unzoned industrial or commercial areas shall not include land on the opposite side of the highway from the activities or land predominantly used for residential purposes.

5.2(25) "Commercial or industrial activity" means those activities generally recognized as commercial or industrial by zoning authorities in this state except that none of the following activities shall be considered commercial or industrial:

a. Outdoor advertising structures.

b. Agricultural, forestry, grazing, farming, and related activities, including, but not limited to, wayside fresh produce stands.

c. Transient or temporary activities.

d. Activities not visible from the main-traveled way.

e. Activities more than 300 feet from the nearest edge of the right of way.

f. Activities conducted in a building principally used as a residence.

g. Railroad tracks and minor spurs.

h. Activities normally and regularly in operation less than five months per year.

i. Should any commercial or industrial activity, which has been used in defining or delineating an unzoned area, be abandoned, any sign located within the former unzoned area shall be nonconforming.

5.2(26) "Advertised activity" means regularly used buildings, parking lots, storage or processing areas used in furtherance of the activity or activities being conducted on the property on which they are located.

5.2(27) "Premise" means those lands for sale or lease or used in the operation of the advertised activity. Except where the advertising device advertises the sale or lease of the real property the property line is not to be considered the boundary of the premise unless the land on which the sign is located is used in furtherance of the advertised activity for purpose other than outdoor advertising.

5.2(28) "Informational site" means an area or site established and maintained within or adjacent to the right of way of a highway on the interstate system by or under the supervision or control of the Iowa state highway commission wherein panels for the display of advertising and informational signs may be erected and maintained.

5.2(29) "Structure" means any sign-supporting device including but not limited to buildings.

5.3(306B) Measurements of distance. Distance from the edge of a right of way shall be measured horizontally along a line normal or perpendicular to the center line of the highway.

5.4(306B) Signs that may not be permitted in protected areas. Erection or maintenance of the following signs may not be permitted in protected areas.

5.4(1) Signs advertising activities that are illegal under state or federal laws or regulations in effect at the location of such signs or at the location of such activities.

5.4(2) Obsolete signs.

5.4(3) Signs that are not maintained in good repair so as to be legible.

5.4(4) Signs that are not securely affixed to a substantial structure.

5.4(5) Signs that are not consistent with all the standards as set forth in this policy.

5.5(306B) Signs that may be permitted in protected areas. Erection or maintenance of the following signs may be permitted in protected areas.

5.5(1) *Class 1—Official signs.* Directional or other official signs or notices erected and maintained by public officers or agencies pursuant to and in accordance with direction or authorization contained in Iowa law, for the purpose of carrying out an official duty or responsibility.

5.5(2) *Class 2—On premise signs.* Signs not prohibited by Iowa law which are consistent with the applicable provisions of this subrule and 5.7(306B) and which advertise the sale or lease of, or activities being conducted upon, the real property where the signs are located.

a. Not more than one such sign advertising the sale or lease of the same property may be permitted under this class in such a manner as to be visible to traffic proceeding in any one direction on any one interstate highway.

b. Not more than one such sign, visible to traffic proceeding in any one direction on any one interstate highway and advertising activities being conducted upon the real property where the sign is located, may be permitted under this class more than 50 feet from the advertised activity.

5.5(3) *Class 3—Signs which advertise activities being conducted within twelve air miles.* Signs in compliance with national policy and these rules which advertise activities being conducted within 12 air miles of the place where such signs are located.

5.5(4) *Class 4—Signs in the specific interest of the traveling public.* Signs in compliance with national policy and these rules which are designed to give information in the specific interest of the traveling public.

5.5(5) A Class 2 or Class 3 sign, except a Class 2 sign not more than 50 feet from the advertised activity, that displays any trade name which refers to or identifies any service rendered or product sold, used or otherwise handled more than 12 air miles from such sign, may not be permitted unless the name of the advertised activity which is within 12 air miles of such sign is displayed as conspicuously as such trade name.

5.5(6) Only information about public places operated by federal, state or local governments, natural phenomena, historic sites, areas of natural scenic beauty or naturally suited for outdoor recreation, and places for camping, lodging, eating and vehicle service and repair is deemed to be in the specific interest of the traveling public. For the purposes of the standards in this part, a trade name is deemed to be information in the specific interests of the traveling public only if it identifies or characterizes such a place or identifies vehicle service, equipment, parts, accessories, fuels, oils or lubricants being offered for sale at such a place. Signs displaying any other trade name may not be permitted under Class 4.

5.5(7) Notwithstanding the provisions of 5.5(5), Class 2 or Class 3 signs may display trade names in accordance with the provisions of 5.5(6).

5.5(8) Notwithstanding the provisions of 5.5(306B), Class 3 and Class 4 signs may be erected only in advertising areas.

5.5(9) Reserved for future use.

5.5(10) Reserved for future use.

5.6(306B) General provisions.

5.6(1) No Class 2, Class 3 or Class 4 sign may be permitted to be erected or maintained, in any manner inconsistent with the following.

5.6(2) No sign may be permitted which attempts or appears to attempt to direct the movement of traffic or which interferes with, imitates or resembles any official sign, signal or device.

5.6(3) No sign may be permitted which prevents the driver of a vehicle from having a clear and unobstructed view of official signs and approaching or merging traffic.

5.6(4) No sign may be permitted which contains, includes, or is illuminated by any flashing, intermittent or moving light or lights.

5.6(5) No lighting may be permitted to be used in any way in connection with any sign unless it is so effectively shielded as to prevent beams or rays of light from being directed at any portion of the main-traveled way of the interstate system, or is of such low intensity or brilliance as not to cause glare or to impair the vision of the driver of any motor vehicle, or to otherwise interfere with any driver's operation of a motor vehicle.

5.6(6) No sign may be permitted which moves or has any animated moving parts.

5.6(7) No sign may be permitted to be erected or maintained upon trees or painted or drawn upon rocks or other natural features.

5.6(8) No sign may be permitted to exceed 20 feet in length, width, or height, or 150 square feet in area, including border and trim but excluding supports, except Class 2 signs not more than 50 feet from, and advertising activities being conducted upon, the real property where the sign is located.

5.7(306B) Exclusions. The standards in this part shall not apply to markers, signs and plaques in appreciation of sites of historical significance for the erection of which provisions are made in an agreement between Iowa and the secretary of commerce, as provided in the Act, unless such agreement expressly makes all or any part of the standards applicable.

5.8(306B) Class 3 and 4 signs within informational sites.

5.8(1) Informational sites for the erection and maintenance of Class 3 and Class 4 advertising and informational signs may be established in accordance with the regulations for the administration of federal aid for highways. The location and frequency of such sites shall be as determined by agreements between the appropriate federal authority and the Iowa state highway commission.

5.8(2) Class 3 and Class 4 signs may be permitted within such informational sites in protected areas in a manner consistent with the following provisions:

a. No sign may be permitted which is not placed upon a panel.

b. No panel may be permitted to exceed 13 feet in height or 25 feet in length, including border and trim, but excluding supports.

c. No sign may be permitted to exceed 12 square feet in area, and nothing on such sign may be permitted to be legible from any place on the main-traveled way or in a turning roadway.

d. Not more than one sign concerning a single activity or place may be permitted within any one informational site.

e. Signs concerning a single activity or place may be permitted within more than one informational site, but no Class 3 sign which does not also qualify as a Class 4 sign may be permitted within any informational site more than 12 air miles from the advertised activity.

f. No sign may be permitted which moves or has any animated or moving parts.

g. Illumination of panels by other than white lights may not be permitted, and no sign placed on any panel may be permitted to contain, include, or be illuminated by any other lights, or any flashing, intermittent, or moving lights.

h. No lighting may be permitted to be used in any way in connection with any panel unless it is so effectively shielded as to prevent beams or rays of light from being directed at any portion of the main-traveled way of the interstate system, or is of such low intensity or brilliance as not to cause glare or to impair the vision of the driver of any motor vehicle, or to otherwise interfere with any driver's operation of a motor vehicle.

5.9(306B) Class 3 and 4 signs outside information sites.

5.9(1) The erection or maintenance of the following signs may be permitted within advertising areas outside informational sites.

a. Class 3 signs which are visible only to interstate highway traffic not served by an informational site within 12 air miles of the advertised activity.

b. Class 4 signs which are more than 12 miles from the nearest panel within an informational site serving interstate highway traffic to which such signs are visible.

c. Signs that qualify both as Class 3 and Class 4 signs may be permitted in accordance with either paragraphs "*a*" or "*b*" of this subrule.

5.9(2) The erection or maintenance of signs permitted under 5.9(1) may not be permitted in any manner inconsistent with the following:

a. In advertising areas in advance of an intersection of the main-traveled way of an inter-

state highway and an exit roadway, such signs visible to interstate highway traffic approaching such intersection may not be permitted to exceed the following number:

Distance from intersections	Number of signs
0-2 miles	0
2-5 miles	6
More than 5 miles	1 per 1,000 feet

The specified distances shall be measured to the nearest point of the intersection of the traveled way of the exit roadway and the main-traveled way of the interstate highway.

b. No Class 3 or Class 4 signs may be permitted in advertising areas to be less than 1000 feet apart. For purposes of this measurement, the same shall be made without reference to any structure or Class 2 sign or signs.

c. Such signs may not be permitted in advertising areas adjacent to any interstate highway right of way upon any part of the width of which is constructed an entrance or exit roadway.

d. Such signs visible to interstate highway traffic which is approaching or has passed an entrance roadway may not be permitted in advertising areas for 1000 feet beyond the furthest point of the intersection between the traveled way of such entrance roadway and the main-traveled way of the interstate highway.

e. No such signs may be permitted in scenic areas designated as scenic beautification areas under authority of section 313.67.

f. Not more than one such sign advertising activities being conducted as a single enterprise or giving information about a single place may be permitted to be erected or maintained in such manner as to be visible to traffic moving in any one direction on any one interstate highway.

5.9(3) No Class 3 or 4 signs other than those permitted by this rule may be permitted to be erected or maintained within advertising areas, outside informational sites.

5.10(306B) Authorization procedures. All persons either maintaining signs or intending to erect and maintain signs within controlled portions of protected areas shall make application to the Iowa state highway commission for an erection and maintenance permit.

5.10(1) Erection and maintenance permits shall serve to:

Inventory controlled portions of the interstate system, and

Evidence authorization to maintain signs erected or to erect and maintain signs, and

Evidence compliance with the Act and these rules.

5.10(2) Application for erection and maintenance permits shall:

Be initiated through the Iowa state highway commission resident maintenance engineer in charge of the county in which the sign is or is to be located.

Contain a written description with plat sufficient so as to enable said engineer to determine the proposed location of the sign.

Contain a general description including the height, width, and area including border and trim but excluding supports of the sign which is the subject of the application.

Where applicable, evidence of tentative approval of appropriate city or county officials (in instances of city or county zoning) must accompany the application.

Applications for the erection and maintenance of signs shall not be submitted less than 30 days prior to need of authorization.

5.11(306B) Compliance procedures.

5.11(1) The Iowa state highway commission shall acquire by gifts, purchase or condemnation all rights and interests of all persons in and to signs erected prior to the effective date of these amendments and additions to the May 18, 1966, rules which were erected either prior to the effective date of the Act or after the effective date of the Act and which did comply with national policy and rules promulgated by the Iowa state highway commission when erected within controlled portions of the interstate system where the real property upon which the sign is located is:

a. Not within an advertising area in cases of Class 3 and Class 4 signs, and

b. Within advertising areas where Class 3 or Class 4 signs may be located but not on real property eligible for the erection and maintenance of such signs under these rules, and

c. Within advertising areas in the cases of Class 3 or Class 4 signs or either within or without advertising areas in cases of Class 2 signs more than 50 feet from the advertised activity on real property eligible for the erection of such signs and the sign does not comply with these rules and is not made to so comply within 30 days after notice by certified mail to the owner of the device and the owner of the land upon which the sign is located.

5.11(2) Where necessary to determine which Class 3 or Class 4 sign or signs shall be authorized, preference shall be given first, to those signs erected within advertising areas located on real property eligible for the erection of such signs which do comply with these rules, and second, to those signs located on real property eligible for the erection of such signs which do not but can be made to comply with these rules, and third, to the applicants by order of their application. For this purpose, the second preference shall expire and the Iowa state highway commission shall not consider any application for an erection and maintenance permit therefor, except as it must under the third preference, unless the sign owner makes application for an erection and maintenance permit within 30 days from the effective date of these

additional rules, and the sign is made to comply with the same on or before the 20th day of December, 1967.

5.11(3) Any sign is a public nuisance where erected within controlled portions of the interstate system.

a. After the effective date of the Act which violates the provisions of the Act, or

b. After the effective date of those rules filed May 18, 1966, which fails to comply with such rules, or

c. After the effective date of these amendments and additions to the May 18, 1966, rules which fail to comply with the same.

5.11(4) The Iowa state highway commission shall after 30 days notice to remove, by certified mail, to the owner of the sign and to the owner of the land upon which the sign is located, file a petition in the district court of the county where such sign is located to abate any public nuisance where the real property upon which the sign is located is:

a. Not within an advertising area in cases of Class 3 and Class 4 signs, and

b. Within advertising areas where Class 3 or Class 4 signs may be located but not on real property eligible for the erection and maintenance of such signs under these rules.

5.11(5) The Iowa state highway commission shall after 30 days' notice to comply or have removed, by certified mail, to the owner of the sign and to the owner of the land upon which the sign is located and where the landowner or the sign owner fails to comply with such notice within the required 30 days, file a petition in the district court of the county where such sign is located to abate any public nuisance where the real property upon which the sign is located is within advertising areas in case of Class 3 and Class 4 signs, or either within or without advertising areas in case of Class 2 signs more than 50 feet from the advertised activity, on real property eligible for the erection of such signs and the sign does not comply with these rules.

MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAYS

The 1971 edition of the Manual on Uniform Traffic Control Devices for Streets and Highways prepared by the National Joint Committee on Uniform Traffic Control Devices now filed shall constitute the manual and specifications for a uniform system of traffic control devices for use upon the highways of this state.

[Filed March 11, 1965;
amended May 16, 1972]

Editor's Note: For information in regard to the manual, address the State Highway Commission offices at Ames, Iowa.

INDUSTRIAL COMMISSIONER

CHAPTER 1
WORKMEN'S COMPENSATION SERVICE

1.1(86) Injury and settlement reports. The following blanks shall be prepared and distributed by the industrial commissioner for the computation, adjustment and settlement of noncontroverted workmen's compensation claims.

This rule is intended to implement section 86.8(2).

1.1(1) *Form No. 1. First report of injury.* Under section 86.11 employers are required to file this form with the industrial commissioner within 48 hours after having notice or knowledge of an injury which temporarily disables an employee for more than seven days, or results in permanent disability, or death.

State of Iowa

STANDARD FORM FOR WORKMEN'S COMPENSATION SERVICE

EMPLOYER'S FIRST REPORT OF INJURY

Employers are required to file this report with the Iowa Industrial Commissioner, State Office Bldg., Des Moines, Iowa, when an injury temporarily disables an employee for more than seven days, or results in permanent disability, or death. Heads of all state departments must report all injuries if any medical or hospital expense is involved.

Employers are also required to report injuries resulting in disability of two days or more to the State Bureau of Labor, and should report all injuries to their insurance carrier.

EMPLOYER

1. Name of Employer _____
2. Address: No. and st. _____ city or town _____
3. Nature of business _____
4. Insured by _____
5. Address _____

TIME AND PLACE

6. Location of place where injury occurred _____
7. Date of injury _____ 19___ Hour of injury _____ A.M. _____ P.M.
8. Date disability began _____ Was injured paid in full for this day? _____
9. When did employer or foreman first know of injury? _____

INJURED EMPLOYEE

10. Name of injured _____
11. Address: No. and St. _____ city or town _____
12. Check (V) Married _____ Single _____ Male _____ Female _____ Age _____
13. Children under 16, or incapacitated regardless of age _____
14. Job classification _____ How long employed by you? _____
15. No. hours worked per day _____ Wages per hour $ _____
16. No. of days worked per week _____ Wages per day $ _____
17. Additional amount employee received in room, board, tips, laundry, $ _____

THE INJURY

18. Machine, tool, or thing causing injury _____
19. Was injury caused by failure of injured to use or observe safety appliance or regulation? _____
20. Describe how injury occurred: _____

Do not write in this space

21. Nature and extent of injury _____
22. Has injured returned to work? _____
    If so, date and hour _____
23. If not, probable length of disability _____
24. Name and address of physician _____
25. Name and address of hospital _____
26. Names and addresses of witnesses _____

FATAL CASES

27. Has injured died? _____ If so, give date of death _____
28. Name and address of widow or other dependents _____

Date of this report _____ Firm name _____

Signed by _____

Official Title _____

PB 11000

1.1(2) *Form No. 2. Surgeon's report.* This report, or an equivalent report in letter form, must be filed with the industrial commissioner in support of an application for commutation and application for compromise settlement, and in other cases when requested.

Form No. 2

APPLICATION FOR ADDITIONAL BENEFITS

FOR REHABILITATION TRAINING

Section 85.70, Code

"An employee who has sustained an injury resulting in permanent partial or permanent total disability, for which compensation is payable under this chapter, and who cannot return to gainful employment because of such disability, shall upon application to and approval by the Industrial Commissioner be entitled to a twenty dollar weekly payment from the employer in addition to any other benefit payments, during each full week in which he is actively participating in a vocational rehabilitation program recognized by the state board for vocational education. The Industrial Commissioner's approval of such application for payment may be given only after a careful evaluation of available facts, and after consultation with the employer or the employer's representative. An appeal of the decision of the Industrial Commissioner may be taken to the district court as described in Section 86.26 of the Code. Such additional benefit payment shall be paid for a period not to exceed 13 consecutive weeks except that the Industrial Commissioner may extend the period of payment not to exceed an additional thirteen weeks if the circumstances indicate that a continuation of training will in fact accomplish rehabilitation."

INSTRUCTIONS:

1. Fill out an original and 3 copies, each of which is to be signed by the employee, employer or the employer's representative, the Industrial Commissioner and a representative of D.R.E.S.

The undersigned employee states that he has sustained an injury, for which compensation is payable under this chapter, resulting in permanent partial or permanent total disability that prevents him from returning to gainful employment without additional training and applies for additional compensation of $20.00 per week for_____weeks beginning_____

_____, 19____, while in training at_____

NOTICE OF ELECTION

TO PROVIDE, SECURE AND PAY WORKMEN'S COMPENSATION

(Pursuant to Section 85.1, Code of Iowa 1971)

To the Industrial Commissioner of Iowa:

The undersigned, an employer of:
(Check applicable category)

- ☐ Household or Domestic Servants
- ☐ Persons whose employment is of a casual nature
- ☐ Persons engaged in agriculture
- ☐ Persons not in the course of the employer's business

hereby voluntarily elects to provide, secure and pay workmen's compensation to all of his employees within the category designated above in accordance with the provisions of the Iowa Workmen's Compensation Law, as set forth in Chapter 85, Code of Iowa 1971 and amendments thereof, and hereby gives notice to the Commissioner of that election.

WORKMEN'S COMPENSATION SERVICE
(Ink or Typewriter to Be Used in Filling Out All Forms)
WAIVER ON ACCOUNT OF PHYSICAL DEFECT

(To be mailed to the Industrial Commissioner in triplicate for approval and filing)

Sections 85.55 of the Iowa Workmen's Compensation Law as amended provides as follows:

"No employee or dependent to whom this chapter applies shall have power to waive any of the provisions of this chapter in regard to the amount of compensation which may be payable to such employee or dependent hereunder. However, any person who has some physical defect which increases the risk of injury, may, subject to the approval of the Industrial Commissioner, enter into a written agreement with his employer waiving compensation for injuries which may occur directly or indirectly because of such physical defect, provided, however, that such waiver shall not affect the employees's benefits to be paid from the second injury fund under the provisions of section 85.64."

This is to certify that the undersigned, a practicing physician for ---------- years, having an office in ---------- has examined ----------

on ----------, 19-----, and finds that he has the following physical defect:

and is able to perform such work as:

without undue hazard to his health or life.

---------- M. D.

I, ----------, of ----------,

aged ---------- years, in accordance with the terms of the aforesaid section, hereby waive compensation on behalf of myself, and in case of death resulting therefrom, for my dependents, for any injury sustained by me while in the employ of ---------- of ----------

which may occur directly or indirectly because of such aforesaid physical defect.

Dated at ---------- ----------, 19-----

Witnesses to Employee's Signature:

---------- ----------

Employee's Signature

---------- No. ---------- Street

Concurring parent or guardian if employee be a minor:

----------X

Parent Guardian

The undersigned employer agrees to this waiver and that the above employee will not be requested or required to do work of a more strenuous or hazardous nature than that suggested or recommended by the above named doctor, dated this ---------- day of ----------, 19-------.

Employer

I find the foregoing waiver appears to be in order and hereby approve the same.

----------, 19----- ----------

IOWA INDUSTRIAL COMMISSIONER

Submitted by: ----------

NAME ADDRESS

1.2(85, 86) Compromise settlements. All agreements providing for the final compromise settlement of a case where liability under the workmen's compensation Act is disputed shall be reduced to writing and submitted to the industrial commissioner for approval, together with such testimony or other evidence as he may require to establish that a bona fide dispute exists and liability is doubtful. Any such settlement, when approved by the industrial commissioner shall be binding upon the parties thereto and not subject to review under section 86.34.

This rule is intended to implement section 85.22(3), and section 86.14.

1.3(85) Commutation. In all proceedings where commutation may be approved by the industrial commissioner as provided in sections 85.45-85.48, a First Report of Injury and an approved Memorandum of Agreement or award of compensation must be filed. All doctors' reports relating to the extent of disability shall be submitted to the industrial commissioner with the Application for Commutation, together with such testimony or other evidence as the industrial commissioner may require to establish the required conditions. Only the unaccrued weekly benefits will be commuted and benefits will be considered as running from the first day of disability after the injury, less any periods when the employee was not disabled. Unless the employee is represented by a lawyer, or unless a hearing is held before the industrial commissioner, a full commutation entitling the employer to a release will not be ordered for a permanent injury to the body as a whole. In death cases, commutation will be ordered only where benefits are equitably apportioned among the widow and any minor dependents.

This rule is intended to implement sections 85.45-85.48.

1.4(85) Rate computation. The weekly Compensation Rate Table in the "Iowa Workmen's Compensation Law" published by the industrial commissioner is authorized for use under sections 85.36 and 85.37.

This rule is intended to implement sections 85.36 and 85.37.

1.5(85) Commutation table. The commutation table in the Iowa workmen's compensation law published by the industrial commissioner is authorized for use under section 85.47.

This rule is intended to implement sections 85.45-85.48.

This table shows the present value of any number of One Dollar future weekly payments discounted at five per centum, as authorized by section 85.47, for commuted lump sum settlements in advance of the dates due. For weekly payments of larger amounts multiply the tabular fraction by the number of dollars in the weekly payments.

COMMUTATION TABLE—IOWA

One Dollar Payments—First 52 Weeks

APPLICATION

for

REVIEW-REOPENING

To the Iowa Industrial Commissioner:

This claimant respectfully states that _____ received a personal injury arising out of and in the course of the employment at _____ on the _____ day of _____, 19____

1. Describe how injury occurred _____
2. Nature of injury _____
3. Length of time disabled from working (give dates) _____
4. Nature and extent of permanent disability, if any _____
5. Weekly compensation paid by employer or insurance carrier:
   _____ weeks at $_____ per week, $ _____
   _____ weeks at $_____ per week, $ _____
6. Names and addresses of doctors who treated employee _____
7. Was treatment authorized or supplied by employer? _____
8. If not, what are your expenses for doctors? $ _____
   Hospital and medicine $ _____
9. What is the dispute in this case? _____
10. In what counties or towns do you agree that hearing be held? _____
11. The claimant will be ready for hearing after _____ (date)

The claimant further states that an award for payments or agreement for settlement has been made under the provisions of Chapter 86, Code of Iowa, that the amount has not been commuted, and that since the last payment of compensation there has been a change in the condition of the employee to warrant an increase in compensation.

Wherefore, the claimant prays that this case be reopened as provided in Section 86.34, Code, that the above defendants be required to answer this application for reopening, that a time and place be fixed for hearing hereof, and that an order or award be made granting such relief as the said claimant may be entitled to in the premises:

1.7(86) Procedure in disputed cases. Practice and procedure at hearings before the industrial commissioner or his deputies will conform generally to that in any ordinary civil action.

A claimant seeking relief under any section of the workmen's compensation Act shall file his or her application with the industrial commissioner, together with two copies. Thereupon, the industrial commissioner shall serve notice of filing said application, together with a copy of the application, on the adverse party, who shall have 15 days in which to file answer or pleading. A reply to new matter in an answer, or for the purpose of raising points of law appearing on the face of the answer, shall be filed within ten days after the answer.

(This rule is intended to implement sections 86.14, 86.17, 86.18, 86.24, 86.34 and 86.35.)

1.8(86) Bringing in new parties. When the presence of new parties is required to grant complete relief in any proceeding arising under the workmen's compensation Act, the industrial commissioner may upon application, or his own motion, order them brought in by serving them with Notice of Filing an application, together with a copy of the application.

(This rule is intended to implement sections 86.14, 86.17 and 86.18.)

1.9(86) Amendments. Amendments may be made to any pleading before hearing or to conform to proof.

(This rule is intended to implement sections 86.17 and 86.18.)

1.10(86) Answer. In the answer, the employer and insurance carrier shall admit or deny each allegation of the claimant's application. The answer shall state the conceded extent of temporary or permanent disability, the wage rate, and the amount of benefits paid, and shall state in what counties or towns the employer and insurance carrier agree that the hearing be held. A defense other than a general denial must be pleaded as a special defense.

(This rule is intended to implement sections 86.14 and 86.35.)

1.11(86) Prehearing procedure. After issues are joined the industrial commissioner may in his discretion direct the parties in any proceeding brought under the workmen's compensation Act to appear before him at such place as the law provides to consider all matters which may aid, expedite or simplify the hearing of any proceeding.

(This rule is intended to implement sections 86.14, 86.17, 86.18 and 86.35.)

1.12(86) Extending time and continuances. For good cause the industrial commissioner may extend the time to comply with any rule. For good cause and when timely requested, the industrial commissioner may allow a continuance of adjournment of a hearing on such conditions as are fair and just.

(This rule is intended to implement sections 86.14, 86.17, 86.18 and 86.35.)

1.13(86) Shorthand reporter. When he deems it necessary, the industrial commissioner shall hire a shorthand reporter to report any proceeding, or the employer or insurance carrier shall arrange for a shorthand reporter to attend any proceeding when ordered by the industrial commissioner, and in either case he shall tax the expenses thereof as costs.

(This rule is intended to implement section 86.19.)

1.14(86) Depositions. Any party to a proceeding under the workmen's compensation Act may take the testimony of any person, including a party, by deposition upon oral examination or written interrogatories, for the purpose of discovery or for use as evidence in the proceeding, or for both purposes.

(This rule is intended to implement section 86.21.)

[Filed November 18, 1963]

INSURANCE DEPARTMENT

CHAPTER 1
CASUALTY AND FIRE INSURANCE
UNAUTHORIZED INSURANCE CARRIERS

1.1(515) Affidavit required. Within 30 days subsequent to the effective date of coverage on property in this state placed in unlicensed insurers, the agent shall file with the commissioner of insurance a sworn statement on Form No. SL163, a copy of which is attached hereto and by reference made a part hereof. Copies of Form No. SL163 are available in the office of the insurance commissioner and will be forwarded upon receipt of a request therefor from a qualified licensed insurance agent.

1.2(515) Evidence of coverage. Each agent placing coverage in unlicensed insurers shall deliver to the purchaser written evidence of the coverage listing the names and addresses of the insurers providing coverages and their relative participation in the risk. Said evidence shall plainly state on its face that the coverage is placed pursuant to sections 515.147 et seq., and that it is placed with an insurer or insurers not licensed to transact an insurance business in Iowa.

1.3(515) Escrow of taxes. Each agent placing coverage in unauthorized insurers shall maintain a separate bank account in which all sums due the state of Iowa in the form of taxes on

unauthorized insurance premiums shall be held. Failure to establish and maintain such accounts shall be deemed grounds for the revocation of all licenses held by said agent under the provisions of chapter 522 of the Code.

1.4(515) Annual report. On or before March 1 of each year, every agent who has placed insurance in unauthorized insurers during the preceding calendar year shall file with the commissioner of insurance a sworn report of all such business written during the preceding calendar year. Said report shall be accompanied by a remittance to cover the taxes due on said business and shall be filed on Form No. SL263, a copy of which is attached hereto, and by reference made a part hereof. Failure to file said return or pay the taxes imposed by sections 515.147 et seq., will be deemed grounds for the revocation of all licenses issued to the violator by the insurance department.

1.5(515) Prohibited insurers. From time to time the commissioner of insurance shall add the name or names of insurers in which it shall be unlawful to place business to a list contemplated by section 515.148. The names of said insurers shall be added by posting them in a conspicuous place in the office of the insurance department and by such other methods as in the opinion of the insurance commissioner will give all qualified agents in Iowa actual notice of his actions.

(These rules are intended to implement section 515.150 of the Code.)

[Filed August 1, 1963]

UNEARNED PREMIUM RESERVES ON MORTGAGE GUARANTY INSURANCE POLICIES

1.6(515) Unearned premium reserve factors. In the case of premiums paid in advance on ten-year policies, mortgage guaranty insurers shall apply the following annual factors or comparable monthly factors in determining the unearned premium reserve:

Years policy is in force	Unearned premium factor	Years policy is in force	Unearned premium factor
1	81.8	6	18.2
2	65.5	7	10.9
3	50.9	8	5.5
4	38.2	9	1.8
5	27.3	10	—0—

1.7(515) Contingency reserve. From the premium remaining after applying the appropriate factor from the table in 1.6(515) above, there shall be maintained a contingency reserve as prescribed in section 515C.4 of the Code.

(These rules are intended to implement sections 515C.3 and 515C.4 of the Code.)

[Filed November 21, 1963]

1.8 and 1.9 Reserved for future use.

1.10(515) Misleading policy titles. No policies of insurance of any kind, whether life, health and accident, fire, or casualty, will be approved which bear any title or name apt to mislead or confuse the purchaser, and such policy contracts must be identified by words entirely descriptive of their content.

1.11 and 1.12 Reserved for future use.

1.13(515) Collateral loans. The collateral pledged to secure a loan must qualify as a legal investment for insurance companies before the loan it secures may so qualify [section 515.35(7)]. The statute provides that a company may not invest in excess of 30 percent of its capital and funds in stocks and not more than ten percent of its capital and surplus in the stock or bonds, or both, of any one corporation.

Normally, a loan is little better than the collateral securing it. Therefore, in order to conform to the intent and purpose of the legislature it would appear that the same limitations should likewise be applied to the stock securing a collateral loan. The statute also provides that the value of the collateral must exceed the amount of the loan by ten percent.

1.14 Reserved for future use.

CANCELLATION AND NONRENEWAL OF AUTOMOBILE INSURANCE POLICIES

1.15(515D) Definitions. As used in these rules unless otherwise required by the context:

"Commissioner" shall mean the insurance commissioner of Iowa.

"Hearing officer" means the person who will preside over any hearings held pursuant to chapter 515D of the Code.

"Automobile insurance policy" means the same as the definition of "policy" as found in chapter 515D.

1.16(515D) Hearing officer. The commissioner may act as the hearing officer or he may elect to appoint and authorize some qualified person to act as the hearing officer who shall then be responsible for carrying out all the duties and functions of that position.

1.17(515D) Prehearing procedures. Whenever the commissioner has received from a named insured a written request for hearing that has been submitted within 15 days of receipt of notice of cancellation or nonrenewal, he shall within two days of such request cause to be issued and served upon the insurer effecting the cancellation or nonrenewal at issue a copy of the request or a statement of charges identifying the complainant and a notice of hearing thereon to be held at a time and place fixed in the notice, which hearing shall not be less than ten days after the date of such notice of hearing.

1.17(1) Notice of hearing shall also be sent to the named insured requesting the hearing.

1.17(2) Any statement of charges, notice or order may be served by anyone duly authorized by the commissioner, either in the manner provided by law for service of process in civil actions or by mailing same by certified mail to the parties affected by such statement of charges, notice or order, to his last known address. The verified return by the person so serving setting forth the manner of such service shall be proof of the same, and the return receipt of the certified mailed copy as aforesaid shall also be proof of the service of same.

1.18(515D) Hearing rules. Hearings shall be conducted in an open and equitable manner and such proceedings shall not require the observance of any formal rules of pleading or evidence.

1.18(1) The hearing officer may administer oaths, receive oral and documentary evidence and examine or cross-examine all witnesses when he deems it necessary.

1.18(2) The hearing officer shall have the power to subpoena witnesses, compel their attendance, and require the production of books, papers, records, correspondence or other documents which he deems relevant and necessary to establishing the existence of the proof or evidence used by the insurer as its reason for cancellation or intent not to renew.

1.18(3) The hearing officer may, and upon the request of any party shall, cause to be made a stenographic record of all the evidence and all the proceedings had at such hearing.

1.19(515D) Hearing order. At the conclusion of the hearing, or not later than three days thereafter, the hearing officer shall issue his written findings to the parties. If he finds for the named insured, he shall either order the insurer to rescind its notice of cancellation or nonrenewal or, if the date such action is to be effective has already elapsed, order the policy reinstated.

1.19(1) Such an order shall operate retroactively only to cover a period not to exceed 20 days from the date cancellation otherwise would have been effective, and prospectively from the date such order was issued.

1.19(2) No policy shall be reinstated while the named insured is in arrears in payment of premium on such policy.

1.19(3) Reinstatement or continuance of a policy by order of the hearing officer shall not operate in any way to extend the anniversary date provided in the policy.

[Filed August 1, 1963; amended November 21, 1963; January 13, 1971]

CHAPTER 2
LIFE INSURANCE POLICIES

2.1(508) Purpose. In the best interest of the citizens of Iowa and to maintain a fair and honest life insurance market, certain types of life policy forms and certain policy provisions shall be either prohibited, altered or clarified as set out herein.

2.2(508) Scope. These rules shall apply to all insurance policies issued by insurance companies holding a certificate of authority under the provisions of chapter 508 of the Code.

2.3(508) Definitions. Certain life insurance policy forms and provisions referred to herein shall have the following meaning:

2.3(1) *Founders policy.* The term or name assigned to a policy of insurance offered to the public by a newly organized stock life insurance company, issued on a participating basis with the representations that the purchasers will share preferentially in the future divisible surplus earnings of the company arising from all classes of business, both participating and nonparticipating, and all plans of insurance.

2.3(2) *Profit-sharing policy.* It is any policy form which contains provisions or is represented in such a way that the policyholder will be eligible to preferentially participate in any future distribution of general corporate profits.

2.3(3) *Coupon policy.* It is any policy or contract of life insurance, other than annuity, which contains in addition to basic life insurance benefits a series of annual pure endowment benefits evidenced in the policy contract by a series of coupons each of which matures on the maturation date of an annual pure endowment. For the purposes of these rules, policies containing annual pure endowments evidenced by coupons, pass books or other devices generally acquainted with savings, banking or investment institutions shall be considered coupon policies.

2.3(4) *Pure endowment benefit.* It is a guaranteed insurance benefit, actuarially determined, the payment of which is contingent upon the survival of the insured to a specific point in time.

2.4(508) Prohibitions, regulations and disclosure requirements. In accordance with the purpose expressed in 2.1(508) and in conjunction with the intent of section 508.28, the use of certain types of policy forms and policy provisions shall be subject to the following prohibitions and regulations:

2.4(1) *Policy names.* Any insurance policy labeled or described as a founders, charter or coupon policy or names of similar connotation shall not be approved for use in this state on or after the effective date of these rules, and furthermore no policies so named or labeled heretofore approved

shall be issued or delivered in this state on or after March 1, 1964.

2.4(2) *Founders policy.* No founders policy as herein defined shall be approved for use in this state on or after the effective date of these rules, and furthermore no founders policy as herein defined heretofore approved shall be issued or delivered in this state on or after March 1, 1964.

2.4(3) *Profit-sharing policy.* No profit-sharing policy shall be approved for use in this state on or after the effective date of these rules, and furthermore no profit-sharing policy heretofore approved shall be issued or delivered in this state on or after March 1, 1964. This subsection does not intend to restrict or prohibit the sale in this state of any participating life insurance policy where the dividend or abatement of premium is derived solely from the profits of that class of participating business.

2.4(4) *Coupon policy.* No coupon policy shall be approved or issued in this state after the effective date of these rules, and furthermore no coupon policy heretofore approved shall be issued or delivered in this state on or after March 1, 1964.

2.4(5) *Guaranteed pure endowment benefits.* No policy containing a series of guaranteed pure endowment benefits shall be approved for use after the effective date of these rules unless it meets the following requirements:

a. The gross premium charged for this benefit shall be separately stated in a size and style of type equal in prominence to that stating the gross premium for the other benefits contained in the policy.

b. The payment of any guaranteed pure endowment benefit shall not be made contingent upon the payment of premiums falling due on or after the time the pure endowment benefit has matured.

c. The amount of the guaranteed series of pure endowment benefits shall be expressed in dollar amounts and shall not be presented or defined, either in the policy or any sales and advertising material, as a "percentage" of any of the premiums or benefits contained therein.

d. No participating policy shall include as part of its benefits a guaranteed pure endowment benefit.

e. The language and terminology of the policy or any of the sales and advertising materials used in connection with any policy, which has a series of pure endowment benefits therein, shall not purport to represent the pure endowment benefit of the policy to be anything other than a guaranteed insurance benefit for which a premium is being paid by the policyholder.

2.5 and 2.6 Reserved for future use.

2.7(508) Discrimination. No policy of life or endowment insurance can legally be issued or delivered in the state of Iowa, if it shall purport to be issued or to take effect before the original application for insurance was made, if thereby the insured would rate at an age younger than his age at nearest birthday at the date when the original application was made.

However, this ruling shall not affect the conversion of life term contracts to other types in accordance with the provisions of term forms wherein it provides for the issuance of other type contract as of the date of the issuance of the term contract upon payment of the difference in premiums.

(These rules are intended to implement section 508.28 of the Code.)

[Filed November 21, 1963]

CHAPTER 3
LIFE INSURANCE COMPANIES—VARIABLE ANNUITIES CONTRACTS

3.1(508) Definitions. When used in this regulation:

"Contracts on a variable basis" or "variable contract" shall mean any (group or individual) policy or contract issued by an insurance company which provides for insurance or annuity benefits which may vary according to the investment experience of any separate or segregated account or accounts maintained by the insurer as to such policy or contract, as provided for in sections 508.31 and 508.32.

"Agent" shall mean any person who is qualified and licensed as a life insurance agent.

"Variable contract agent" shall mean an agent who sells or offers to sell any contract on a variable basis.

"Commissioner" shall mean the insurance commissioner of Iowa.

3.2(508) Insurance company qualifications.

3.2(1) No company shall deliver or issue for delivery variable contracts within this state unless it is licensed under chapter 508 of the Code, entitled "Life Insurance Companies", to do a life insurance or annuity business in this state; and the commissioner is satisfied that its condition or method of operation in connection with the issuance of such contracts will not render its operation hazardous to the public or its policy holders in this state. To this end the commissioner shall consider among other things:

a. The history and financial condition of the company,

b. The character, responsibility and fitness of the officers and directors of the company, and

c. The law and regulation under which the company is authorized in the state of domicile to issue variable contracts.

3.2(2) If the company is licensed and is a subsidiary of an admitted life insurance company, or affiliated with such company by common management or ownership, it may be deemed by the

commissioner to have satisfied the aforementioned provisions.

3.2(3) Before any company shall deliver or issue for delivery variable contracts within this state, it shall submit to the commissioner:

a. A general description of the kinds of variable contracts it intends to issue,

b. If requested by the commissioner, a copy of the statutes and regulations of its state of domicile under which it is authorized to issue variable contracts, and

c. If requested, biographical data with respect to officers and directors of the company.

3.3(508) Filing, policy forms and provision.

3.3(1) No contract on a variable basis or certificates evidencing variable benefits issued pursuant to any such contract shall be issued or delivered to any person in this state until a copy of the form of the same has been filed with and approved by the commissioner.

3.3(2) The commissioner shall disapprove or withdraw approval of any such contract form or certificate if:

a. Such contract or certificate contains provisions which are unjust, unfair, inequitable, ambiguous, misleading, likely to result in misrepresentation or contrary to law, or

b. Sales of such contracts are being solicited by any means of advertising, communication or dissemination of information which involves misleading or inadequate description of the provisions of the contract.

3.3(3) Any variable contract delivered or issued for delivery in this state and any certificates evidencing variable benefits issued pursuant to any such contract on a group basis shall contain a statement of the essential features of the procedures to be followed by the insurance company in determining the dollar amount of such variable benefits and shall state that such dollar amounts will vary to reflect investment experience and shall contain on its first page a clear and prominently placed statement to the effect that the benefits thereunder are on a variable basis.

3.3(4) Illustrations of benefits payable under any contract providing benefits payable in variable amounts shall not include projections of past investment experience into the future or attempted predictions of future investment experience. Hypothetical illustrations of rates to possible levels of annuity payments may be used if submitted to and not disapproved by the commissioner.

3.3(5) No individual variable annuity contract calling for the payment of periodic stipulated payments shall be delivered or issued for delivery in this state unless it contains in substance the following provision or provisions which in the opinion of the commissioner are more favorable to the holders of such contracts:

a. A provision that there shall be a period of grace of 30 days or of one month, within which any stipulated payment to the insurer falling due after the first payment may be made, during which period of grace the contract shall continue in force. The contract may include a statement of the basis for determining the date as of which any such payment received during the period of grace shall be applied to produce the values under the contract arising therefrom,

b. A provision that at any time within one year from the date of default, in making periodic stipulated payments to the insurer during the life of the annuitant and unless the cash surrender value has been paid, the contract may be reinstated upon payment to the insurer of such overdue payments as required by the contract and of all indebtedness to the insurer on the contract, including interest. The contract may include a statement of the basis for determining the date as of which the amount to cover such overdue payments and indebtedness shall be applied to produce the values under the contract arising therefrom,

c. A provision specifying the option available in the event of default in a periodic stipulated payment. Such options may include an option to surrender the contract for a cash value as determined by the contract and shall include an option to receive a paid-up annuity if the contract is not surrendered for cash, the amount of such paid-up annuity being determined by applying the value of the contract at the annuity commencement date in accordance with the terms of the contract.

3.3(6) Any variable contract evidencing variable benefits delivered or issued for delivery in this state shall stipulate the expense, mortality and investment increment factors to be used in computing the dollar amount of variable benefits or other contractual payments or values thereunder, and shall guarantee that expenses will not adversely affect such dollar amounts. In computing the dollar amount of variable benefits or other contractual payments or values under any variable contract, the annual net investment increment assumption shall not exceed five percent, except with the approval of the commissioner. "Expenses" as used in this paragraph may exclude some or all taxes, as stipulated in the contract.

3.3(7) To the extent that the level of benefits may be affected by mortality results, the mortality factor shall be determined from the Annuity Mortality Table for 1949, Ultimate, or any modification of that table not having a higher mortality rate at any age, or, if approved by the commissioner, from another table.

3.3(8) The reserve liability for variable annuities shall be established pursuant to the requirements of the standard valuation law in accordance with actuarial procedure that would recognize the variable nature of the benefits provided.

3.4(508) Separate account or accounts and investments. Any domestic life insurance company issuing variable contracts shall establish one or more separate or segregated accounts as provided in section 508.32 to invest and reinvest all or any of the amounts received in connection with such variable contracts subject to the following limitations.

3.4(1) Except as hereinafter provided, amounts allocated to any separate or segregated account and accumulation thereon may be invested and reinvested without regard to any requirements or limitations prescribed by the laws of this state governing the investments of life insurance companies; provided, that to the extent that the company's reserve liability with regard to benefits guaranteed as to dollar amount and duration and funds guaranteed as to principal amount or stated rate of interest is maintained in any separate or segregated account, a portion of the assets of such separate or segregated account at least equal to such reserve liability shall be, except as the commissioner may otherwise approve, invested in accordance with laws of this state governing the investments of life insurance companies. The investments in such separate or segregated account or accounts shall not be taken into account in applying the investment limitations applicable to the investments of the company.

3.4(2) With respect to 75 percent of the market value of the total assets in a separate or segregated account, no such company shall purchase or otherwise acquire the securities of any issuer, other than securities issued or guaranteed as to principal and interest by the United States, if immediately after such purchase or acquisition the market value of such investment, together with prior investments of such separate or segregated account in such security taken at market, would exceed five percent of the market value of the assets of said separate or segregated account; provided, however, that the commissioner may waive such limitation if in his opinion such waiver will not render the operation of such separate or segregated account hazardous to the public or the policyholders in this state.

3.4(3) The separate or segregated account shall not invest in the voting securities of a single issuer in an amount in excess of ten percent of the total issued and outstanding voting securities of such issuer. The foregoing shall not apply with respect to securities held in separate or segregated accounts, the voting rights in which are exercisable only in accordance with instructions from persons having interests in such accounts.

3.4(4) The limitations in 3.4(2), 3.4(3) and 3.4(6) shall not apply to the investments of a separate or segregated account in the securities of an investment company registered under the investment company Act of 1940, provided the investments of such investment companies comply in substance with 3.4(2) and 3.4(3) hereof.

3.4(5) Unless otherwise approved by the commissioner, assets allocated to a separate or segregated account shall be valued at their market value on the date of valuation or, if there is no readily available market, then as provided under the terms of the contract or the rules or other written agreement applicable to such separate or segregated account; provided, that the portion of the assets of such separate or segregated account equal to the company's reserve liability with regard to the benefits and funds referred to in 3.4(1), if any, shall be valued in accordance with the rules otherwise applicable to the company's assets.

3.4(6) All such common stock investments shall be in stock which is listed or admitted to trading on a securities exchange registered under the Securities Exchange Act of 1934 or which is publicly held and has been traded in the "over-the-counter market" and as to which current stock market quotations are readily available.

3.4(7) The provisions of section 508.8 and any regulations applicable to the officers and directors of insurance companies with respect to conflicts of interest shall also apply to members of any separate or segregated account's committee, board or other similar body. No officer or director of such company nor any member of the committee, board or body of a separate or segregated account shall receive directly or indirectly any commission or any other compensation with respect to the purchase or sale of assets of such separate or segregated account.

3.4(8) All contracts on a variable basis shall state that the portion of the assets of any such separate or segregated accounts equal to the reserves and other contract liabilities with respect to such account shall not be chargeable with liabilities arising out of any other business the company may conduct.

3.4(9) Notwithstanding any other provisions in these rules, a company may:

a. With respect to any separate or segregated account registered with the securities and exchange commission as a unit investment trust exercise voting rights in connection with any securities of a regulated investment company registered under the investment company Act of 1940 and held in such separate or segregated account in accordance with instructions from persons having interests in such accounts ratably as determined by the company, or

b. With respect to any separate or segregated account registered with the securities and exchange commission as a management investment company, establish for such account a committee, board or other body, the members of which may or may not be otherwise affiliated with such company and may be elected to such membership by the vote of persons having interests in such account ratably as determined by the company. Such committee, board or other body may have the power, exercisable alone or in conjunction with

others, to manage such account or accounts and the investment of its assets.

A company, committee, board or other body may make such other provisions in respect to any such separate or segregated account as may be deemed appropriate to facilitate compliance with requirements of any federal or state law now or hereafter in effect; provided that the commissioner approves such provisions as not hazardous to the public or the company's policyholders in this state.

3.4(10) No sale, exchange or other transfer of assets may be made by a company between any of its separate or segregated accounts or between any other investment account and one or more of its separate or segregated accounts unless, in case of a transfer into a separate or segregated account, such transfer is made solely to establish the account or to support the operation of the contracts with respect to such account to which the transfer is made and unless such transfer, whether into or from an account or accounts, is made by a transfer of cash or by a transfer of securities having a valuation which could be readily determined in the market place, and further provided that such transfer of securities must have been approved by the commissioner. The commissioner may authorize other transfers among such accounts if, in his opinion, such transfers would not be inequitable. The assets of such accounts shall not be pledged or transferred by the company or the separate or segregated account as collateral for a loan.

3.4(11) The company shall maintain in each such separate or segregated account assets with a value at least equal to the reserves and other contract liabilities with respect to such accounts, except as may otherwise be approved by the commissioner.

3.5(508) Required reports. Any company issuing individual variable contracts providing benefits in variable amounts shall mail to the contract holder, at least once in each contract year after the first, at his last address known to the company, a statement or statements reporting the investments held in the separate or segregated account and, in the case of contracts under which payments have not yet commenced, a statement reporting as of a date not more than four months previous to the date of mailing the number of accumulation units credited to such contracts and the dollar value of a unit or the value of the contract holder's account.

An insurer issuing contracts on a variable basis shall annually on or before March 1 submit to the commissioner an annual statement for the business of its separate or segregated accounts. This statement shall be on such form as may be prescribed by the National Association of Insurance Commissioners and shall include details as to all of the income, disbursements, assets and liability items associated with such account or accounts and such other information as the commissioner of insurance may reasonably require.

3.6(508) Examination of agents and other persons. No agent shall be eligible to sell or offer for sale a contract on a variable basis unless prior to making any solicitation or sale of such a contract, he also be licensed as a variable contract agent, however, any agent who participates only in the sale or offering for sale of variable contracts that are not registered under the federal Securities Act of 1933 need not be licensed as a variable contract agent.

3.6(1) Any agent applying for a license as a variable contract agent shall do so by filing with this department the form or forms approved for such use by the commissioner.

3.6(2) The licensing as a variable contract agent complying with 3.6(1) shall not become effective until such agent shall have satisfactorily passed a written examination upon securities and variable contracts. Such examination to be divided into two parts. Part I shall be on securities generally. Part II shall deal with variable contracts and shall be composed of at least 15 questions, but not more than 50 questions, concerning the history, purpose, regulation and sale of contracts on a variable basis.

3.6(3) The examination will be given in such places and at such times as the commissioner shall from time to time designate. Upon application for license as a variable contract agent, the applicant shall be notified of the date of the next examination.

3.6(4) The examination recommended for the testing of variable contract agents by the National Association of Insurance Commissioners and such other approved tests as the commissioner may deem adequate for such testing are to be used in this state, except as provided hereafter in 3.6(5) and 3.6(6).

3.6(5) A satisfactory alternative examination to Part I of the written examination called for in 3.6(2) above shall include any securities examination which is declared by the commissioner to be an equivalent examination on the basis of content and administration. The following examinations are deemed to be a satisfactory alternative examination:

a. Any state securities sales examination.

b. The National Association of Securities Dealers, Inc. Examination for Principals, or Examination for Qualification as a Registered Representative.

c. The various securities examinations required by the New York Stock Exchange, the American Stock Exchange, Pacific Stock Exchange, or any other registered national securities exchange which the commissioner approves as a satisfactory alternative examination.

d. The securities and exchange commission test given pursuant to section 15(b) (8) of the Securities Exchange Act of 1934.

e. The examination recommended for the testing of variable contract agents by the National Association of Insurance Commissioners, when adopted by the insurance department of any state or territory of the United States and approved for use by such department by the securities and exchange commission.

3.6(6) Any applicant for license as a variable contract agent shall not be required to take Part I of the National Association of Insurance Commissioner's examination if, at the time of application, evidence is presented that the applicant:

a. Has previously passed a satisfactory alternative examination as defined in 3.6(5) of these rules, or

b. Is currently registered with the federal securities and exchange commission as a broker-dealer, or

c. Is currently associated with a broker-dealer and has met qualification requirements with respect to such association.

3.6(7) Every applicant applying for license as a variable contract agent shall satisfactorily complete Part II of the examination required by 3.6(2) with a grade of at least 70 percent, or shall present evidence of a successful completion of either a variable contract examination given under the supervision of an insurance department of any state or territory of the United States which has adopted Part II of the examination recommended for the testing of variable contract agents by the National Association of Insurance Commissioners or has been examined and licensed by any such department prior to its adoption of the National Association of Insurance Commissioners model regulation.

3.6(8) Any applicant who fails to pass Part I of the examination required by 3.6(2) may not take Part I of the examination again until seven days after initially taking it. After a second such failure, such applicant may not take the examination again until 90 days after taking the second examination. After a third and any subsequent failure, such applicant may not take the examination again until 180 days after the third and any subsequent examinations.

Any applicant failing to pass Part II of the examination may take Part II again seven days after the first examination. After a second such failure, such applicant may not take the examination again until 90 days after taking the second examination. After a third and any subsequent such failure, such applicant may not take the examination again until 180 days after the third and any subsequent examinations.

3.6(9) Every application for a license as a variable contract agent shall be accompanied by an examination fee of five dollars per part to be taken. A fee of five dollars per part will be charged for each re-examination administered to an applicant.

3.6(10) Report of the results of any examination given pursuant to this rule shall be made by the department on any appropriate form approved by the commissioner.

3.6(11) Part I of the written examination provided for in 3.6(2) shall also be administered to other persons who are not required to be licensed to sell insurance in this state upon their submission of the form or forms approved for such use by the commissioner and payment of the examination fee.

3.6(12) Results of the examination administered pursuant to 3.6(2) will be reported by this department to the applicant or his company. In addition, examination results will be reported by this department to any other state insurance department requesting confirmation of the examination grade, either upon request of such department or upon request of the applicant or his company. A charge of one dollar shall be made for any certification requested.

3.6(13) Records of the examination grade of each applicant upon an examination administered by this department, or upon an examination deemed to be a satisfactory alternative examination and administered by another agency or authority and reported to this department, will be retained in the file pertaining to said applicant.

3.6(14) Any person licensed in this state as a variable contract agent shall immediately report to the commissioner:

a. Any suspension or revocation of his variable contract agent's license or life insurance agent's license in any other state or territory of the United States.

b. The imposition of any disciplinary sanction including suspension or expulsion from membership, suspension or revocation of or denial of registration imposed upon him by any national securities exchange, or national securities association, or any federal, or state or territorial agency with jurisdiction over securities or contracts on a variable basis.

c. Any judgment or injunction entered against him on the basis of conduct deemed to have involved fraud, deceit, misrepresentation or violation of any insurance or securities law or regulation.

3.6(15) The commissioner may reject any application, suspend, revoke or refuse to renew any variable contract agent's license upon any ground that would bar such applicant or such agent from being licensed to sell life insurance contracts or securities in this state. The rules governing any proceeding relating to the suspension or revocation of a life insurance agent's license shall also govern any proceeding for suspension or revocation of a variable contract agent's license.

3.6(16) Renewal of a variable contract agent's license shall follow the same procedure established for renewal of an agent's license to sell life insurance contracts in this state.

3.7(508) Foreign companies. If the law or regulation in the place of domicile of a foreign company provides a degree of protection to the policyholders and the public which is substantially equal to that provided by these regulations, the commissioner, to the extent deemed appropriate by him in his discretion, may consider compliance with such law or regulation as compliance with these regulations.

[Filed December 17, 1968]

CHAPTER 4
ORGANIZATION OF DOMESTIC INSURANCE COMPANIES

4.1(506) Definitions.

4.1(1) *Promoters.* Promoters shall mean any incorporator, organizer, founder or other person or corporation who, acting alone or in concert with other persons, is initiating or directing, or has within one year initiated or directed, the organization of a new insurance company.

4.1(2) *Public moneys.* Public moneys shall mean the price paid by persons other than promoters for securities.

4.2(506) Promoters contributions. Promoters shall invest of their own funds at least 20 percent of the proposed issue in cash. If something other than cash is contemplated to meet the requirements of this rule, it shall be valued by the commissioner of insurance in accordance with the provisions of section 492.7.

4.3(506) Escrow. All public moneys shall be escrowed 100 percent until the issue is sold unless sooner released by written order of the commissioner of insurance; in the event the issue is not completely sold, all expenses incurred in corporate organization, sale of securities and cost of liquidation shall be paid from funds acquired from promoters.

4.4(506) Alienation. In the event of a public offering, no securities held by promoters shall, for a three-year period from the date of acquisition, be alienated or hypothecated (except by operation of law) unless the operation of the insurance company produces earned surplus for two consecutive years.

4.5(506) Sales to promoters. In the event of a public offering, no securities shall be acquired by promoters at less than the public offering price.

4.6(506) Options. In the event of a public offering, stock options or warrants acquired by promoters shall not exceed ten percent of the issue.

4.7(506) Qualifications of management. The general plan of organization as contemplated in section 506.3 of the Code shall include proposed management personnel with biographical sketches, including state of residence and complete insurance experience of each.

4.8(506) Chief executive. The chief executive officer of a newly organized insurance company shall be a bona fide resident of Iowa and unless removed for cause and while acting in this capacity shall devote his entire time to such duties unless this requirement is specifically waived by written order of the commissioner of insurance. For purposes of this rule, a newly organized insurance company shall be deemed to be a company in existence for three years or less.

4.9(506) Directors. The majority of the directors shall be bona fide residents of the state of Iowa unless specifically waived by written permission of the commissioner of insurance.

(These rules were intended to implement section 506.1 of the Code.)

[Filed November 21, 1963]

CHAPTER 5
ACCIDENT AND HEALTH INSURANCE
BLANKET ACCIDENT AND SICKNESS INSURANCE

5.1(509) Purpose. The purpose of this regulation is to establish guidelines for insurers to make special risk coverage available to particular groups that will be exposed to specific hazards for a certain period of time.

5.2(509) Scope. These rules shall apply to all insurance companies holding a certificate of authority to transact the business of insurance under the provisions of chapters 508 and 515 of the Code.

5.3(509) Definitions.

5.3(1) Blanket accident and sickness insurance is hereby declared to be that form of accident, sickness or accident and sickness insurance designed to insure against specified hazards incident to or defined by reference to a particular activity or activities and covering groups of persons as enumerated in the following subparagraphs:

a. Under a policy issued to an employer, who shall be deemed the policyholder covering any group of employees defined by reference to specific hazards incident to an activity or activities of the policyholder.

b. Under a policy issued to a college, high school, junior high school, grade school, school district, school jurisdictional unit or other institution of learning; or to the head, principal, governing board of any such educational unit who or which shall be deemed the policyholder covering students, teachers or employees.

c. Under a policy issued to any religious, charitable or educational organization, or branch thereof, which shall be deemed the policyholder covering any group of members or participants defined by reference to specified hazards incident

to an activity or activities sponsored or supervised by such policyholder.

d. Under a policy issued to a sports team, youth camp, recreational organization or sponsor thereof, which shall be deemed the policyholder, covering members, campers, participants, employees, officials or supervisors.

e. Under a policy issued to any volunteer fire department, first aid, civil defense or other such volunteer organizations, which shall be deemed the policyholder, covering any group of members or participants defined by reference to specified hazards incident to an activity or activities or operations sponsored or supervised by such policyholder.

f. Under a policy issued to a newspaper or other publisher, which shall be deemed the policyholder, covering its carriers.

g. Under a policy issued to an association, other than a labor union, trade association or industrial association, which shall have a constitution and bylaws and which has been organized and is maintained in good faith for purposes other than that of obtaining insurance, which shall be deemed the policyholder, covering any group of members or participants defined by reference to specified hazards incident to an activity or activities or operations sponsored or supervised by such policyholder.

h. Under a policy issued to cover any other risk or class of risks which, in the discretion of the commissioner, may be properly eligible for blanket accident and sickness insurance. The discretion of the commissioner may be exercised on an individual risk basis or class of risks, or both.

5.3(2) Brochure shall mean an instrument, booklet or pamphlet setting forth a statement as to the insurance protection provided, to whom the insurance benefits are payable, sufficient information on the procedure an insured shall follow in filing a claim and such other provisions as are in the opinion of the commissioner of insurance necessary to inform the holder thereof as to his rights under the policy.

5.4(509) Required provisions. No blanket policy as herein defined shall be issued or delivered in this state unless a copy of the policy and brochure if required, has been approved by the commissioner of insurance. All policies of blanket accident or sickness insurance or combination thereof issued in this state shall contain in substance the following provisions:

5.4(1) A provision that the policy including endorsements and a copy of the application, if any, of the policyholder and the persons insured shall constitute the entire contract between the parties, and that any statement made by the policyholder or by a person insured shall in the absence of fraud, be deemed a representation and not a warranty. No such statement shall be used in defense of a claim under the policy, unless it is contained in a written application. If a copy of such application is not delivered to the person insured the insurer shall be precluded from introducing such application as evidence in any action involving any statements contained therein.

5.4(2) A provision that written notice of sickness or of injury must be given to the insurer within 20 days after the date when such sickness or injury occurred. Failure to give notice within such time shall not invalidate nor reduce any claim if it shall be shown not to have been reasonably possible to give such notice and that notice was given as soon as was reasonably possible.

5.4(3) A provision that the insurer will furnish either to the claimant or to the policyholder for delivery to the claimant such forms as are usually furnished by it for filing proof of loss. If such forms are not furnished before the expiration of 15 days after giving such notice, the claimant shall be deemed to have complied with the requirements of the policy as to proof of loss upon submitting within the time fixed in the policy for filing proof of loss, written proof covering the occurrence, the character and the extent of the loss for which claim is made.

5.4(4) A provision that in the case of claim for loss of time for disability, written proof of such loss must be furnished to the insurer within 90 days after the commencement of the period for which the insurer is liable, and that subsequent written proofs of the continuance of such disability must be furnished to the insurer at such intervals as the insurer may reasonably require, and that in the case of claim for any other loss, written proof of such loss must be furnished to the insurer within 90 days after the date of such loss. Failure to furnish such proof within such time shall not invalidate nor reduce any claim if it shall be shown not to have been reasonably possible to furnish such proof and that such proof was furnished as soon as was reasonably possible.

5.4(5) A provision that all benefits payable under the policy other than benefits for loss of time will be payable immediately upon receipt of due written proof of such loss, and that, subject to due proof of loss, all accrued benefits payable under the policy for loss of time will be paid not less frequently than monthly during the continuance of the period for which the insurer is liable, and that any balance remaining unpaid at the termination of such period will be paid immediately upon receipt of such proof.

5.4(6) A provision that the insurer at its own expense, shall have the right and opportunity to examine the person of the insured when and so often as it may reasonably require during the pendency of claim under the policy and also the right and opportunity to make an autopsy where it is not prohibited by law.

5.4(7) A provision that no action at law or in equity shall be brought to recover under the policy prior to the expiration of 60 days after written

proof of loss has been furnished in accordance with the requirements of the policy and that no such action shall be brought after the expiration of three years after the time written proof of loss is required to be furnished.

5.5(509) Application and certificates not required. An individual application need not be required from a person covered under a blanket accident and sickness policy, nor shall it be necessary for the insurer to furnish each person a certificate, however, a brochure as herein defined shall be issued to the policyholder for delivery to each person insured as defined in paragraphs "*b*" and "*g*" of subrule 5.3(1).

5.6(509) Facility of payment. All benefits under any blanket accident and sickness policy shall be payable to the person insured, to a designated beneficiary or beneficiaries, or to his estate, except that if the person insured be a minor or otherwise not competent to give a valid release, such benefits may be made payable to his parent, guardian or other person actually supporting him. The policy may also provide that all or a portion of any indemnities provided by any such policy on account of hospital, nursing, medical or surgical services may with the written consent of the insured be paid directly to the hospital or person rendering such services, but the policy may not require that the services be rendered by a particular hospital or person. Payment so made shall discharge the obligation of the insurer with respect to the amount of insurance so paid.

These rules are intended to implement section 509.6 of the Code.

[Filed November 16, 1965]

5.7 Reserved for future use.

ADVERTISING

5.8(507B) Purpose. The purpose of this regulation is to implement section 507B.4(1, *a*) which prohibits misrepresentation and false advertising of insurance policies. It is the intent of this section to establish specific guidelines for advertisements relating to accident and health insurance.

5.9(507B) Definitions.

5.9(1) An advertisement for the purpose of these rules shall include:

a. Printed and published material and descriptive literature of an insurer used in newspapers, free newspapers, shopping guides, magazines, radio and TV scripts, billboards and similar displays; and

b. Descriptive literature and sales aids of all kinds issued by an insurer for presentation to members of the public, including but not limited to circulars, leaflets, booklets, depictions, illustrations, and form letters; and

c. Prepared sales talks, presentations and material for use by agents and brokers, and representations made by agents and brokers in accordance therewith.

5.9(2) *"Policy"* for the purpose of these rules shall include any policy, plan, certificate, contract, agreement, statement of coverage, rider or endorsement which provides accident or sickness benefits, or medical, surgical or hospital expense benefits, whether on a cash indemnity, reimbursement, or service basis, except when issued in connection with another kind of insurance other than life, and except disability and double indemnity benefits included in life insurance and annuity contracts.

5.9(3) *"Insurer"* for the purpose of these rules shall include any individual, corporation, association, partnership, reciprocal exchange, inter-insurer, Lloyds, fraternal benefit society, health service organization and any other legal entity engaged in the advertisement of a policy as herein defined.

5.9(4) These rules shall also apply to agents and brokers to the extent that they are responsible for the advertisement of any policy.

5.10(507B) Advertisements in general. Advertisements shall be truthful and not misleading in fact or implication. Words or phrases, the meaning of which is clear only by implication or by familiarity with insurance terminology, shall not be used.

5.11(507B) Advertisements of benefits payable, losses covered or premiums payable.

5.11(1) *Deceptive words, phrases or illustrations.* Words, phrases or illustrations shall not be used in a manner which misleads or has the capacity and tendency to deceive as to the extent of any policy benefit payable, loss covered, or premium payable. An advertisement relating to any policy benefit payable, loss covered or premium payable shall be sufficiently complete and clear as to avoid deception or the capacity and tendency to deceive.

a. The words and phrases "all", "full", "complete", "comprehensive", "unlimited", "up to", "as high as", "this policy will pay your hospital and surgical bills" or "this policy will replace your income", or similar words and phrases shall not be used so as to exaggerate any benefit beyond the terms of the policy, but may be used only in such manner as fairly to describe such benefit.

b. A policy covering only one disease or a list of specified diseases shall not be advertised so as to imply coverage beyond the terms of the policy. Synonymous terms shall not be used to refer to any disease so as to imply broader coverage than is the fact.

c. The benefits of a policy which pays varying amounts for the same loss occurring under different conditions, or which pays benefits only

when a loss occurs under certain conditions, shall not be advertised without clearly and prominently disclosing the limited conditions under which the benefits referred to are provided by the policy.

d. All phrases indicating maximum total payment for hospital room and board expenses must prominently indicate the maximum daily benefit and the maximum time limit for hospital room and board expenses.

5.11(2) *Exceptions, reductions and limitations.* When an advertisement refers to any dollar amount, period of time for which benefit is payable, cost of policy, or specific policy benefit or the loss for which such benefit is payable, it shall also clearly disclose those exceptions, reductions and limitations affecting the basic provisions of the policy without which the advertisement would have the capacity and tendency to mislead or deceive.

a. The term "exception" shall mean any provision in a policy whereby coverage for a specified hazard is entirely eliminated; it is a statement of a risk not assumed under the policy.

b. The term "reduction" shall mean any provision which reduces the amount of the benefit; a risk of loss is assumed but payment upon the occurrence of such loss is limited to some amount or period less than would be otherwise payable had such reduction clause not been used.

c. The term "limitation" shall mean any provision which restricts coverage under the policy other than an exception or a reduction.

d. Waiting, elimination, probationary or similar periods. When a policy contains a time period between the effective date of the policy and the effective date of coverage under the policy or a time period between the date a loss occurs and the date benefits begin to accrue for such a loss, an advertisement shall clearly disclose the existence of such periods.

e. Pre-existing conditions. An advertisement shall clearly and prominently disclose the extent to which any loss is not covered if the cause of such loss is traceable to a condition existing prior to the effective date of the policy or a condition first manifested during a certain period of time.

When a policy does not cover losses traceable to pre-existing conditions, no advertisement of the policy shall state or imply that the applicant's physical condition or medical history will not affect the issuance of the policy or payment of a claim thereunder. This limits the use of the phrase "no medical examination required" and phrases of similar import.

f. Advertising of policies which are specifically tailored to augment benefits available to medicare insureds shall disclose in unmistakable language what medicare benefits the policy is designed to supplement, e.g., hospital benefits only and further which medicare benefits it will not supplement, e.g., does not pay doctors bills.

g. Advertisements shall not emphasize the total amounts payable under hospital indemnity coverage or other benefits in such policy, such as benefits for private duty nursing, unless it provides with substantially equal prominence and in close conjunction with such statements the actual amounts payable per day for such indemnity or benefit.

5.12(507B) Necessity for disclosing policy provisions relating to renewability, cancellability and terminations. An advertisement which refers to renewability, cancellability, or termination of a policy, or which refers to a policy benefit, or which states or illustrates time or age in connection with eligibility of applicants or continuation of the policy, shall disclose the provisions relating to renewability, cancellability and termination and any modification of benefits, losses covered or premiums because of age or for other reasons, in a manner which shall not minimize or render obscure the qualifying conditions.

5.13(507B) Method of disclosure of required information. All information required to be disclosed by these rules shall be set out conspicuously and in close conjunction with the statements to which such information relates or under appropriate captions of such prominence that it shall not be minimized, rendered obscure or presented in an ambiguous fashion or intermingled with the context of the advertisements so as to be confusing or misleading.

5.14(507B) Testimonials. Testimonials used in advertisements must be genuine, represent the current opinion of the author, be applicable to the policy advertised and be accurately reproduced. The insurer, in using a testimonial, makes as its own all of the statements contained therein, and the advertisement including such statements is subject to all of the provisions of these rules.

5.15(507B) Use of statistics. An advertisement relating to the dollar amounts of claims paid, the number of persons insured or similar statistical information relating to any insurer or policy shall not be used unless it accurately reflects all of the relevant facts. Such an advertisement shall not imply that such statistics are derived from the policy advertised unless such is the fact.

5.16(507B) Inspection of policy. An offer in an advertisement of free inspection of policy or offer of a premium refund is not a cure for misleading or deceptive statements contained in such advertisement.

5.17(507B) Identification of plan or number of policies.

5.17(1) When a choice of the amount of benefits is referred to an advertisement shall disclose that the amount of benefits provided depends upon the plan selected and that the premium will vary with the amount of the benefits.

5.17(2) When an advertisement refers to various benefits which may be contained in two or more policies, other than group master policies, the advertisement shall disclose that such benefits are provided only through a combination of such policies.

5.18(507B) Disparaging comparisons and statements. An advertisement shall not directly or indirectly make unfair or incomplete comparisons of policies or benefits or otherwise falsely disparage competitors, their policies, services or business methods.

5.19(507B) Jurisdictional licensing. An advertisement which is intended to be seen or heard beyond the limits of the jurisdiction in which the insurer is licensed shall not imply licensing beyond those limits.

5.20(507B) Identity of insurer. The identity of the insurer shall be made clear in all of its advertisements. An advertisement shall not use a trade name, service mark, slogan, symbol, or other device which has the capacity and tendency to mislead or deceive as to the true identity of the insurer.

5.20(1) The use of an address or addressee so as to mislead or deceive as to its true identity or licensing status is prohibited.

5.20(2) The use by an insurer or agent of envelopes or stationery which has printed thereon any name, service mark, slogan, symbol or other device which has the capacity or tendency to mislead or deceive or to imply that the insurer or the policy advertised is connected with a governmental or charitable agency such as the Social Security Administration, Medicare, or the Veterans Administration is specifically prohibited.

5.21(507B) Group or quasi-group implications. An advertisement of a particular policy shall not state or imply that prospective policyholders become group or quasi-group members and, as such, enjoy special rates or underwriting privileges, unless such is the fact.

5.22(507B) Introductory initial offers or limited enrollment periods.

5.22(1) An advertisement shall not state or imply that enrollment in a plan or under a policy is limited to a specific period unless the period of time to enroll is disclosed. An advertisement shall not state or imply that a particular policy or combination of policies is an introductory or initial offer and that the applicant will receive advantages by accepting the offer, if the insurer has offered such offer for the same or substantially the same product.

5.22(2) Not more than one limited enrollment period within which a particular insurance product may be purchased on an individual basis shall be offered to the same resident of the state of Iowa unless there has been a lapse of not less than 90 days between the close of the immediately preceding enrollment period for the same or substantially same product and the opening of the new enrollment period. This 90-day period applies to all advertising media, i.e., mail, newspapers, free newspapers, shopping guides, radio, television, magazines and periodicals by any one insurer. It is inapplicable to solicitations of employees or members of a particular group or association which otherwise would be eligible under provisions of the Code of Iowa.

5.22(3) Advertising in magazines, periodicals and newspapers printed and published in other states for circulation in the state of Iowa shall comply with the 90-day period applicable to publications originating in the state of Iowa.

5.23(507B) Approval or endorsement by third parties.

5.23(1) An advertisement shall not state or imply that an insurer or a policy has been approved or an insurer's financial condition has been examined and found to be satisfactory by a governmental agency, unless such is the fact.

5.23(2) An advertisement shall not state or imply that an insurer or a policy has been approved or endorsed by an individual, group of individuals, society, association or other organization, unless such is the fact.

5.24(507B) Service facilities. An advertisement shall not contain untrue statements with respect to the time within which claims are paid or statements which imply that claim settlements will be liberal or generous beyond the terms of the policy.

5.25(507B) Statements about an insurer. An advertisement shall not contain statements which are untrue in fact or by implication misleading with respect of the insurer's assets, corporate structure, financial standing, age or relative position in the insurance business.

5.26(507B) Advertising file. Each insurer shall maintain at its home or principal office a complete file containing every printed, published or prepared advertisement of individual policies and typical printed, published or prepared advertisements of blanket, franchise and group policies hereafter disseminated in this or any other state whether or not licensed in such other state, with a notation attached to each such advertisement which shall indicate the manner and extent of distribution and the form number of any policy advertised. Such file shall be subject to regular and periodical inspection by this department. All such advertisements shall be maintained in said file for a period of not less than three years.

5.27(507B) Certificate of compliance. Each insurer required to file an annual statement which is now or which hereafter becomes subject to the provisions of these rules must file with this

department together with its annual statement, a certificate executed by an authorized officer of the insurer wherein it is stated that to the best of his knowledge, information and belief the advertisements which were disseminated by the insurer during the preceding statement year complied or were made to comply in all respects with the provisions of the insurance laws of this state as implemented by these rules.

[Filed November 16, 1965; amended October 11, 1972]

CHAPTER 6
DOMESTIC STOCK INSURERS PROXIES
PROXY REGULATIONS

6.1(523) Application of regulation. This regulation is applicable to all domestic stock insurers having 100 or more stockholders; provided, however, that this regulation shall not apply to any insurer if 95 percent or more of its stock is owned or controlled by a parent or an affiliated insurer and the remaining shares are held by less than 500 stockholders. A domestic stock insurer which files with the securities and exchange commission forms of proxies, consents and authorizations complying with the requirements of the Securities and Exchange Act of 1934 and the Securities and Exchange Acts Amendments of 1964 and regulation X-14 of the securities and exchange commission promulgated thereunder shall be exempt from the provisions of this regulation.

6.2(523) Proxies, consents and authorizations. No domestic stock insurer, or any director, officer or employee of such insurer subject to 6.1(523) hereof, or any other person, shall solicit, or permit the use of his name to solicit, by mail or otherwise, any proxy, consent or authorization in respect of any stock of such insurer in contravention of this regulation and Schedules A and B hereto annexed and hereby made a part of this regulation.

6.3(523) Disclosure of equivalent information. Unless proxies, consents or authorizations in respect of a stock of a domestic insurer subject to 6.1(523) hereof are solicited by or on behalf of the management of such insurer from the holders of record of stock of such insurer in accordance with this regulation and the schedules thereunder prior to any annual or other meeting, such insurer shall, in accordance with this regulation and such further regulations as the commissioner may adopt, file with the commissioner, and transmit to all stockholders of record information substantially equivalent to the information which would be required to be transmitted if a solicitation were made.

6.4(523) Definitions.

6.4(1) The definitions and instructions set out in schedule SIS, as promulgated by the National Association of Insurance Commissioners, shall be applicable for purposes of this regulation.

6.4(2) The terms "solicit" and "solicitation" for purposes of this regulation shall include:

a. Any request for a proxy, whether or not accompanied by or included in a form of proxy; or

b. Any request to execute or not to execute, or to revoke, a proxy; or

c. The furnishing of a proxy or other communication to stockholders under circumstances reasonably calculated to result in the procurement, withholding or revocation of a proxy.

6.4(3) The terms "solicit" and "solicitation" shall not include:

a. Any solicitation by a person in respect of stock of which he is the beneficial owner;

b. Action by a broker or other person in respect to stock carried in his name or in the name of his nominee in forwarding to the beneficial owner of such stock soliciting material received from the company, or impartially instructing such beneficial owner to forward a proxy to the person, if any, to whom the beneficial owner desires to give a proxy, or impartially requesting instructions from the beneficial owner with respect to the authority to be conferred by the proxy and stating that a proxy will be given if the instructions are received by a certain date;

c. The furnishing of a form of proxy to a stockholder upon the unsolicited request of such stockholder, or the performance by any person of ministerial acts on behalf of a person soliciting a proxy.

6.5(523) Information to be furnished to stockholders.

6.5(1) No solicitation subject to this regulation shall be made unless each person solicited is concurrently furnished or has previously been furnished with a written proxy statement containing the information specified in Schedule A.

6.5(2) If the solicitation is made on behalf of the management of the insurer and relates to an annual meeting of stockholders at which directors are to be elected, each proxy statement furnished pursuant to 6.5(1) hereof shall be accompanied or preceded by an annual report (in preliminary or final form) to such stockholders containing such financial statements for the last fiscal year as are referred to in Schedule SIS under the heading "Financial Reporting to Stockholders." Subject to the foregoing requirements with respect to financial statements, the annual report to stockholders may be in any form deemed suitable by the management.

6.5(3) Two copies of each report sent to the stockholder pursuant to this rule shall be mailed to the commissioner not later than the date on which such report is first sent or given to stockholders or the date on which preliminary copies of solicitation material are filed with the commissioner pursuant to 6.7(1), whichever date is later.

6.6(523) Requirements as to proxy.

6.6(1) The form of proxy (*a*) shall indicate in bold-face type whether or not the proxy is solicited on behalf of the management, (*b*) shall provide a specifically designated blank space for dating the proxy and (*c*) shall identify clearly and impartially each matter or group of related matters intended to be acted upon, whether proposed by the management, or stockholders. No reference need be made to proposals as to which discretionary authority is conferred pursuant to 6.6(3) hereof.

6.6(2) Means shall be provided in the proxy for the person solicited to specify by ballot a choice between approval or disapproval of each matter or group of related matters referred to therein, other than elections to office. A proxy may confer discretionary authority with respect to matters as to which a choice is not so specified if the form of proxy states in bold-face type how it is intended to vote the shares or authorization represented by the proxy in each such case.

6.6(3) A proxy may confer discretionary authority with respect to other matters which may come before the meeting, provided the persons on whose behalf the solicitation is made are not aware a reasonable time prior to the time the solicitation is made that any other matters are to be presented for action at the meeting and provided further that a specific statement to that effect is made in the proxy statement or in the form of proxy.

6.6(4) No proxy shall confer authority (*a*) to vote for the election of any person to any office for which a bona fide nominee is not named in the proxy statement, or (*b*) to vote at any annual meeting other than the next annual meeting (or any adjournment thereof) to be held after the date on which the proxy statement and form of proxy are first sent or given to stockholders.

6.6(5) The proxy statement or form of proxy shall provide, subject to reasonable specified conditions, that the proxy will be voted and that where the person solicited specifies by means of ballot provided pursuant to 6.6(2) hereof a choice with respect to any matter to be acted upon, the vote will be in accordance with the specifications so made.

6.6(6) The information included in the proxy statement shall be clearly presented and the statements made shall be divided into groups according to subject matter, with appropriate headings. All printed proxy statements shall be clearly and legibly presented.

6.7(523) Material required to be filed.

6.7(1) Two preliminary copies of the proxy statement and form of proxy and any other soliciting material to be furnished to stockholders concurrently therewith shall be filed with the commissioner at least ten days prior to the date definitive copies of such material are first sent or given to stockholders, or such shorter period prior to that date as the commissioner may authorize upon a showing of good cause therefor.

6.7(2) Two preliminary copies of any additional soliciting material relating to the same meeting or subject matter to be furnished to stockholders subsequent to the proxy statements shall be filed with the commissioner at least two days (exclusive of Saturdays, Sundays or holidays) prior to the date copies of this material are first sent or given to stockholders or a shorter period prior to such date as the commissioner may authorize upon a showing of good cause therefor.

6.7(3) Two definitive copies of the proxy statement, form of proxy and all other soliciting material, in the form in which this material is furnished to stockholders, shall be filed with, or mailed for filing to, the commissioner not later than the date such material is first sent or given to the stockholders.

6.7(4) Where any proxy statement, form of proxy or other material filed pursuant to these rules is amended or revised, two of the copies shall be marked to clearly show such changes.

6.7(5) Copies of replies to inquiries from stockholders requesting further information and copies of communications which do no more than request that forms of proxy theretofore solicited be signed and returned need not be filed pursuant to this rule.

6.7(6) Notwithstanding the provisions of 6.7(1) and 6.7(2) hereof and of 6.10(5), copies of soliciting material in the form of speeches, press releases and radio or television scripts may, but need not, be filed with the commissioner prior to use or publication. Definitive copies, however, shall be filed with or mailed for filing to the commissioner as required by 6.7(3) hereof not later than the date such material is used or published. The provisions of 6.7(1) and 6.7(2) hereof and 6.10(5) shall apply, however, to any reprints or reproductions of all or any part of such material.

6.8(523) False or misleading statements. No solicitation subject to this regulation shall be made by means of any proxy statement, form of proxy, notice of meeting, or other communication, written or oral, containing any statement which at the time and in the light of the circumstances under which it is made, is false or misleading with respect to any material fact, or which omits to state any material fact necessary in order to make the statements therein not false or misleading or necessary to correct any statement in any earlier communication with respect to the solicitation of a proxy for the same meeting or subject matter which has become false or misleading.

6.9(523) Prohibition of certain solicitations. No person making a solicitation which is subject to this regulation shall solicit any undated or postdated proxy or any proxy which provides

that it shall be deemed to be dated as of any date subsequent to the date on which it is signed by the stockholder.

6.10(523) Special provisions applicable to election contests.

6.10(1) *Applicability.* This rule shall apply to any solicitation subject to this regulation by any person or group for the purpose of opposing a solicitation subject to this regulation by any other person or group with respect to the election or removal of directors at any annual or special meeting of stockholders.

6.10(2) *Participant or participant in a solicitation.*

a. For purposes of this rule the term "participant" and "participant in a solicitation" include: (1) The insurer; (2) any director of the insurer, and any nominee for whose election as a director proxies are solicited; (3) any other person, acting alone or with one or more other persons, committees or groups, in organizing, directing or financing the solicitation.

b. For the purposes of this rule the term "participant" and "participant in a solicitation" do not include: (1) A bank, broker or dealer who, in the ordinary course of business, lends money or executes orders for the purchase or sale of stock and who is not otherwise a participant; (2) any person or organization retained or employed by a participant to solicit stockholders or any person who merely transmits proxy soliciting material or performs ministerial or clerical duties; (3) any person employed in the capacity of attorney, accountant or advertising, public relations or financial adviser, and whose activities are limited to the performance of his duties in the course of such employment; (4) any person regularly employed as an officer or employee of the insurer of any of its subsidiaries or affiliates who is not otherwise a participant; or (5) any officer or director of, or any person regularly employed by any other participant, if such officer, director, or employee is not otherwise a participant.

6.10(3) *Filing of information required by Schedule B.*

a. No solicitation subject to this rule shall be made by any person other than the management of an insurer unless at least five business days prior thereto, or such shorter period as the commissioner may authorize upon a showing of good cause therefor, there has been filed, with the commissioner by or on behalf of each participant in such solicitation, a statement in duplicate containing the information specified by Schedule B and a copy of any material proposed to be distributed to stockholders in furtherance of such solicitation. Where preliminary copies of any materials are filed, distribution to stockholders should be deferred until the commissioner's comments have been received and complied with.

b. Within five business days after a solicitation subject to this rule is made by the management of an insurer, or such longer period as the commissioner may authorize upon a showing of good cause therefor, there shall be filed with the commissioner by or on behalf of each participant in such solicitation, other than the insurer, and by or on behalf of each management nominee for director, a statement in duplicate containing the information specified by Schedule B.

c. If any solicitation on behalf of a management or any other person has been made, or if proxy material is ready for distribution, prior to a solicitation subject to this rule in opposition thereto, a statement in duplicate containing the information specified in Schedule B shall be filed with the commissioner by or on behalf of each participant in such prior solicitation, other than the insurer, as soon as reasonably practicable after the commencement of the solicitation in opposition thereto.

d. If, subsequent to the filing of the statements required by paragraphs "*a*", "*b*" and "*c*" of this subrule, additional persons become participants in a solicitation subject to this rule, there shall be filed with the commissioner by or on behalf of each such person, a statement in duplicate containing the information specified by Schedule B, within three business days after such person becomes a participant, or such longer period as the commissioner may authorize upon a showing of good cause therefor.

e. If any material change occurs in the facts reported in any statement filed by or on behalf of any participant, an appropriate amendment to such statement shall be filed promptly with the commissioner.

f. Each statement and amendment thereto filed pursuant to this paragraph shall be part of the public files of the commissioner.

6.10(4) *Solicitations prior to furnishing required written proxy statement.* Notwithstanding the provisions of 6.5(1), a solicitation subject to this rule may be made prior to furnishing stockholders a written proxy statement containing the information specified in Schedule A with respect to such solicitation, provided that:

a. The statements required by 6.10(3) hereof are filed by or on behalf of each participant in such solicitation.

b. No form of proxy is furnished to stockholders prior to the time the written proxy statement required by 6.5(1) is furnished to such persons: Provided, however, that this paragraph "*b*" shall not apply where a proxy statement then meeting the requirements of Schedule A has been furnished to stockholders.

c. At least the information specified in paragraphs "*b*" and "*c*" of the statements required by 6.10(3) hereof to be filed by each participant, or an appropriate summary thereof, are

included in each communication sent or given to stockholders in connection with the solicitation.

d. A written proxy statement containing the information specified in Schedule A with respect to a solicitation is sent or given stockholders at the earliest practicable date.

6.10(5) *Solicitations prior to furnishing required written proxy statement—Filing requirements.* Two copies of any soliciting material proposed to be sent or given to stockholders prior to the furnishing of the written proxy statement required by 6.5(1) shall be filed with the commissioner in preliminary form at least five business days prior to the date definitive copies of such material are first sent or given to such persons, or shorter period as the commissioner may authorize upon a showing of good cause therefor.

6.10(6) *Application of this section to report.* Notwithstanding the provisions of 6.5(2) and 6.5(3), two copies of any portion of the report referred to in 6.5(2) which comments upon or refers to any solicitation subject to this rule, or to any participant in any such solicitation, other than the solicitation by the management, shall be filed with the commissioner, as proxy material subject to this regulation. Such portion of the report shall be filed with the commissioner, in preliminary form, at least five business days prior to the date copies of the report are first sent or given to stockholders.

(These rules are intended to implement chapter 523 of the Code.)

[Filed April 15, 1966]

SCHEDULE A

INFORMATION REQUIRED IN PROXY STATEMENT

Item 1. Revocability of proxy. State whether or not the person giving the proxy has the power to revoke it. If the right of revocation before the proxy is exercised is limited or is subject to compliance with any formal procedure, briefly describe such limitation or procedure.

Item 2. Dissenters' rights of appraisal. Outline briefly the rights of appraisal or similar rights of dissenting stockholders with respect to any matter to be acted upon and indicate any statutory procedure required to be followed by such stockholders in order to perfect their rights. Where such rights may be exercised only within a limited time after the date of the adoption of a proposal, the filing of a charter amendment, or other similar act, state whether the person solicited will be notified of such date.

Item 3. Persons making solicitations not subject to 6.10(523).

a. If the solicitation is made by the management of the insurer, so state. Give the name of any director of the insurer who has informed the management in writing that he intends to oppose any action intended to be taken by the management and indicate the action which he tends to oppose.

b. If the solicitation is made otherwise than by the management of the insurer, state the names and addresses of the persons by whom and on whose behalf it is made and the names and addresses of the persons by whom the cost of solicitation has been or will be borne, directly or indirectly.

c. If the solicitation is to be made by specially engaged employees or paid solicitors, state (1) the material features of any contract or arrangement for such solicitation and identify the parties, and (2) the cost or anticipated cost thereof.

Item 4. Interest of certain persons in matters to be acted upon. Describe briefly any substantial interest, direct or indirect, by stockholdings or otherwise, of any director, nominee for election for director, officer and, if the solicitation is made otherwise than on behalf of management, each person on whose behalf the solicitation is made, in any matter to be acted upon other than elections to office.

Item 5. Stocks and principal stockholders.

a. State, as to each class of voting stock of the insurer entitled to be voted at the meeting, the number of shares outstanding and the number of votes to which each class is entitled.

b. Give the date as of which the record list of stockholders entitled to vote at the meeting will be determined. If the right to vote is not limited to stockholders of record on that date, indicate the conditions under which other stockholders may be entitled to vote.

c. If action is to be taken with respect to the election of directors and if the persons solicited have cumulative voting rights, make a statement that they have such rights and state briefly the conditions precedent to the exercise thereof.

Item 6. Nominees and directors. If action is to be taken with respect to the election of directors furnish the following information in tabular form to the extent practicable, with respect to each person nominated for election as a director and each other person whose term of office as a director will continue after the meeting:

a. Name each such person, state when his term of office or the term of office for which he is a nominee will expire, and all other positions and office with the insurer presently held by him, and indicate which persons are nominees for election as directors at the meeting.

b. State his present principal occupation or employment and give the name and principal business of any corporation or other organization in which such employment is carried on. Furnish similar information as to all of his principal occupations or employments during the last five years, unless he is now a director and was elected to his present term of office by a vote of stockholders at a

meeting for which proxies were solicited under this regulation.

c. If he is or has previously been a director of the insurer, state the period or periods during which he has served as such.

d. State, as of the most recent practicable date, the approximate amount of each class of stock of the insurer or any of its parents, subsidiaries or affiliates other than directors' qualifying shares, beneficially owned directly or indirectly by him. If he is not the beneficial owner of any such stocks make a statement to that effect.

Item 7. Remuneration and other transactions with management and others. Furnish the information reported or required in Item One of Schedule SIS under the heading "Information Regarding Management and Directors" if action is to be taken with respect to (*a*) the election of directors, (*b*) any remuneration plan, contract or arrangement in which any director, nominee for election as a director, or officer of the insurer will participate, (*c*) any pension or retirement plan in which any such person will participate, or (*d*) the granting or extension to any such person of any options, warrants or rights to purchase any stocks, other than warrants or rights issued to stockholders, as such, on a pro rata basis. If the solicitation is made on behalf of persons other than the management, information shall be furnished only as to Item One-A of the aforesaid heading of Schedule SIS.

Item 8. Bonus, profit sharing and other remuneration plans. If action is to be taken with respect to any bonus, profit sharing, or other remuneration plan, of the insurer, furnish the following information:

a. A brief description of the material features of the plan, each class of persons who will participate therein, the approximate number of persons in each such class, and the basis of such participation.

b. The amounts which would have been distributable under the plan during the last calendar year to (1) each person named in item seven of this schedule, (2) directors and officers as a group, and (3) all other employees as a group, if the plan had been in effect.

c. If the plan to be acted upon may be amended (other than by a vote of the stockholders) in a manner which would materially increase the cost thereof to the insurer or to materially alter the allocation of the benefits as between the groups specified in paragraph "*b*" of this item, the nature of such amendments should be specified.

Item 9. Pension and retirement plans. If action is to be taken with respect to any pension or retirement plan of the insurer, furnish the following information:

a. A brief description of the material features of the plan, each class of persons who will participate therein, the approximate number of persons in each such class, and the basis of such participation.

b. State (1) the approximate total amount necessary to fund the plan with respect to past services, the period over which such amount is to be paid, and the estimated annual payments necessary to pay the total amount over such period; (2) the estimated annual payment to be made with respect to current services; and (3) the amount of such annual payments to be made for the benefit of each person named in item seven of this schedule, directors and officers as a group, and employees as a group.

c. If the plan to be acted upon may be amended (other than by a vote of stockholders) in a manner which would materially increase the cost thereof to the insurer or to materially alter the allocation of the benefits as between the groups specified in paragraph "*b*, 3" of this item, the nature of such amendments should be specified.

Item 10. Options, warrants, or rights. If action is to be taken with respect to the granting or extension of any options, warrants or rights (all referred to herein as "warrants") to purchase stock of the insurer or any subsidiary or affiliate, other than warrants issued to all stockholders on a pro rata basis, furnish the following information:

a. The title and amount of stock called for or to be called for, the prices, expiration dates and other material conditions upon which the warrants may be exercised, the consideration received or to be received by the insurer, subsidiary or affiliate for the granting or extension of the warrants and the market value of the stock called for or to be called for by the warrants, as of the latest practicable date.

b. If known, state separately the amount of stock called for or to be called for by warrants received or to be received by the following persons, naming each such person: (1) Each person named in item seven of this schedule, and (2) each other person who will be entitled to acquire five percent or more of the stock called for or to be called for by such warrants.

c. If known, state also the total amount of stock called for or to be called for by such warrants, received or to be received by all directors and officers of the company as a group and all employees, without naming them.

Item 11. Authorization or issuance of stock.

a. If action is to be taken with respect to the authorization or issuance of any stock of the insurer furnish the title, amount and description of the stock to be authorized or issued.

b. If the shares of stock are other than additional shares of common stock of a class outstanding, furnish a brief summary of the following, if applicable: Dividend, voting liquidation, preemptive, and conversion rights, redemption and sinking fund provisions, interest rate and date of maturity.

c. If the shares of stock to be authorized or issued are other than additional shares of common stock of a class outstanding, the commissioner may require financial statements comparable to those contained in the annual report.

Item 12. Mergers, consolidations, acquisitions and similar matters.

a. If action is taken with respect to a merger, consolidation, acquisition, or similar matter, furnish in brief outline the following information:

(1) The rights of appraisal or similar rights of dissenters with respect to any matters to be acted upon. Indicate any procedure required to be followed by dissenting stockholders in order to perfect such rights.

(2) The material features of the plan or agreement.

(3) The business done by the company to be acquired or whose assets are being acquired.

(4) If available, the high and low sales prices for each quarterly period within two years.

(5) The percentage of outstanding shares which must approve the transaction before it is consummated.

b. For each company involved in a merger, consolidation or acquisition, the following financial statements should be furnished:

(1) A comparative balance sheet as of the close of the last two fiscal years.

(2) A comparative statement of operating income and expenses for each of the last two fiscal years and, as a continuation of each statement, a statement of earnings per share after related taxes and cash dividends paid per share.

(3) A pro forma combined balance sheet and income and expenses statement for the last fiscal year giving effect to the necessary adjustments with respect to the resulting company.

Item 13. Restatement of accounts. If action is to be taken with respect to the restatement of any asset, capital, or surplus of the insurer, furnish the following information:

a. State the nature of the restatement and the date as of which it is to be effective.

b. Outline briefly the reasons for the restatement and for the selection of the particular effective date.

c. State the name and amount of each account affected by the restatement and the effect of the restatement thereon.

Item 14. Matters not required to be submitted. If action is to be taken with respect to any matter which is not required to be submitted to a vote of stockholders, state the nature of such matter, the reason for submitting it to a vote of stockholders and what action is intended to be taken by the management in the event of a negative vote on the matter by the stockholders.

Item 15. Amendment of charter, bylaws or other documents. If action is to be taken with respect to any amendment of the insurer's charter, bylaws or other documents as to which information is not required above, state briefly the reasons for and general effect of such amendment and the vote needed for its approval.

SCHEDULE B

INFORMATION TO BE INCLUDED IN STATEMENTS FILED BY OR ON BEHALF OF A PARTICIPANT (OTHER THAN THE INSURER) IN A PROXY SOLICITATION IN AN ELECTION CONTEST

Item 1. Insurer. State the name and address of the insurer.

Item 2. Identity and background.

a. State the following:

(1) Your name and business address.

(2) Your present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is carried on.

b. State the following:

(1) Your residence address.

(2) Information as to all material occupations, positions, offices or employments during the last ten years, giving starting and ending dates of each and the name, principal business and address of any business corporation or other business organization in which each such occupation, position, office or employment was carried on.

c. State whether or not you are or have been a participant in any other proxy contest involving this company or other companies within the past ten years. If so, identify the principals, the subject matter and your relationship to the parties and the outcome.

d. State whether or not, during the past ten years, you have been convicted in a criminal proceeding (excluding traffic violations or similar misdemeanors) and, if so, give dates, nature of conviction, name and location of court, and penalty imposed or other disposition of the case. A negative answer to this subitem need not be included in the proxy statement or other proxy soliciting material.

Item 3. Interest in stock of the insurer.

a. State the amount of each class of stock of the insurer which you own beneficially, directly or indirectly.

b. State the amount of each class of stock of the insurer which you own of record but not beneficially.

c. State with respect to the stock specified in "*a*" and "*b*" the amounts acquired within the past two years, the dates of acquisition and the amounts acquired on each date.

d. If any part of the purchase price or market value of any of the stock specified in paragraph "*c*" is represented by funds borrowed or otherwise obtained for the purpose of acquiring or holding such stock, so state and indicate the amount of the indebtedness as of the latest practicable date. If such funds were borrowed or ob-

tained otherwise than pursuant to a margin account or bank loan in the regular course of business of a bank, broker or dealer, briefly describe the transaction, and state the names of the parties.

e. State whether or not you are a party to any contracts, arrangements or understandings with any person with respect to any stock of the insurer, including but not limited to joint ventures, loan or option arrangements, puts or calls, guarantees against losses or profits, or the giving or withholding of proxies. If so, name the persons with whom such contracts, arrangements, or understandings exist and give the details thereof.

f. State the amount of stock of the insurer owned beneficially, directly or indirectly, by each of your associates and the name and address of each such associate.

g. State the amount of each class of stock of any parent, subsidiary or affiliate of the insurer which you own beneficially, directly or indirectly.

Item 4. Further matters.

a. Describe the time and circumstances under which you became a participant in the solicitation and state the nature and extent of your activities or proposed activities as a participant.

b. Describe briefly, and where practicable state the approximate amount of, any material interest, direct or indirect, of yourself and of each of your associates in any material transactions since the beginning of the company's last fiscal year, or in any material proposed transactions, to which the company or any of its subsidiaries or affiliates was or is to be a party.

c. State whether or not you or any of your associates have any arrangement or understanding with any person:

(1) With respect to any future employment by the insurer or its subsidiaries or affiliates; or

(2) With respect to any future transactions to which the insurer or any of its subsidiaries or affiliates will or may be a party.

If so, describe such arrangement or understanding and state the names of the parties thereto.

Item 5. Signature. The statement shall be dated and signed in the following manner:

I certify that the statements made in this statement are true, complete, and correct, to the best of my knowledge and belief.

Date	(Signature of participant or authorized representative)

[Filed April 15, 1966]

POLICYHOLDER
PROXY SOLICITATION

6.11(523) Application. These rules are applicable to all domestic mutual insurance companies.

6.12(523) Conditions—revocation. No proxy shall be valid unless signed and executed within two months prior to such meeting or election for which said proxy was given, and such proxy shall be limited to 30 days subsequent to the date of such meeting or election, and may be revoked at any time by the policyholder who executed the said proxy.

6.13(523) Filing proxy. All proxies shall be filed with the company at least one day prior to any meeting or election at which they are to be used.

6.14(523) Solicitation by agents—use of funds. Soliciting of proxies by an agent of a company either for personal use, or for the use of officers of the company or for any other person or persons, is forbidden. Company funds shall not be expended in procuring proxies.

These rules are intended to implement chapter 523 of the Code.

[Filed April 15, 1966]

CHAPTER 7
BENEVOLENT ASSOCIATIONS

7.1 and 7.2 Reserved for future use.

7.3(512A) Organization. Before any new benevolent association shall form or operate in this state, it shall first file with the commissioner for examination and approval one copy of its general plan of organization and operation, an original and two copies of its articles of incorporation, an original and one copy of any bylaws, and two copies of its certificate of membership with application blank. All fees for examination and filing in the office of the commissioner and the secretary of state as prescribed by law must accompany the association's submission.

7.3(1) The plan of organization and operation must set forth in detail any and all fees, dues and assessments to be made against the membership, the intended size and grouping of the membership, the method of member enrollment and procedure for replacement of deceased or left members, the establishment of any reserves or surplus funds, and the intended name and business address of the association. The plan shall also contain a biographical sketch of all organizers and officers and comply with the laws and regulations governing benevolent associations.

7.3(2) If an association is organized or becomes organized under chapter 504A of the Code for the purpose of selling or offering for sale stock to the public of this state such offer must be fully disclosed in the plan of organization and if such offer is exempt from registration the specific exemption must be set forth in the plan.

7.3(3) Reserved for future use.

7.3(4) Except where a public stock offer is made, the plan of operation for associations exist-

ing prior to the adoption of this regulation may be contained in its bylaws, however, such plan shall be in accordance with the laws and regulations pertaining to such associations.

7.4(512A) Membership. Each association shall have one or more groups or units consisting of not more than 1250 members per group or unit who may make voluntary contributions to the association for distribution to the beneficiary of a deceased member or to the members as contributions toward expenses incurred by accident or sickness.

7.4(1) If membership in the association is conditioned upon the payment of benefit assessments levied against the members, such loss or cancellation of membership shall take place only if a member, after being notified by mail of such assessment, has failed to remit his contribution within 30 days from the date of mailing of the benefit assessment notice. The association may thereafter serve notice of cancellation of membership which shall provide that if all delinquencies are not paid within ten days after mailing of such notice, all benefits of membership shall be fully terminated.

7.4(2) When a member has voluntarily contributed through benefit assessments an amount equal to the maximum benefits allowed through membership in the association, he shall be allowed to maintain his membership in good standing without further benefit contributions to the association. Such members shall be required to pay expense assessments.

7.5(512A) Fees, dues and assessments. Benevolent associations may make charges against the membership in the form of benefit assessments, enrollment fees or dues and operational expense fees.

7.5(1) An enrollment fee or dues to cover initial expenses may be charged but such fees or dues shall not exceed ten dollars per enrollee membership. If two or more enrollees are in one family, the enrollment fee shall not exceed eight dollars for each person, provided that the family unit enrolls at the same time.

7.5(2) A benefit assessment may be made against the group or unit membership to cover each valid claim presented by a member or the named beneficiary of a deceased member of that unit or group. The benefit portion of the assessment shall not exceed the maximum benefit payable as stated upon the certificate of membership by more than 20 percent of the maximum benefit payable to the claiming member or beneficiary of a member.

7.5(3) In addition to the benefit contribution an expense fee may be added as a separate item to each assessment or as a separate periodical assessment, provided the expense portion of any assessment represents actual costs directly related to the collection and payment of the certificate benefit, and further provided that said fee is identified as an expense charge. Reasonable directors' fees and salaries of officers shall be considered as expenses to the association.

7.5(4) Any assessment levied against the members of a group or unit, other than any reasonable corporate dividends or undivided profits as declared by the board of directors, shall be considered as trust funds belonging to the members of the group and shall not become the property of the association itself, except for that portion of the assessment or contribution added as a separate item for expenses in the collection and distribution of such fund.

7.6(512A) Reserve fund. Any moneys remaining after the payment of a benefit by the association, except the expense contribution and any reasonable corporate dividends or undivided profits, shall be maintained as a reserve fund to be used only for the benefit of the members of the specific group or unit from which it was collected. Such reserve funds shall be used periodically as determined by the board of directors to pay benefits to a claiming member or the beneficiary of a member without making an assessment against the membership of the group or unit.

Any association in existence before January 1, 1967, having presently in use an equally equitable plan for the periodic distribution of the reserve funds, can continue to use such plan provided it is fully disclosed in writing to the commissioner and has been approved by him for use.

7.7(512A) Certificates. In addition to the requirements of section 512A.7 as they concern the membership certificates, said certificate shall also contain sufficient information to inform a member or a member's beneficiary on the proper procedure in the filing of a claim, including any limitations or exclusions affecting the claim.

7.8(512A) Beneficiaries. In the application for membership, the applicant may designate a beneficiary or beneficiaries. If no beneficiary is named or the named beneficiary or beneficiaries do not survive the member, the estate shall become the beneficiary.

Each association shall have forms to provide for the change of beneficiary in the event a member wishes to change or add a beneficiary.

7.9(512A) Mergers. Should the membership of a group or unit fall below 50 percent of its established size as set forth in the plan of operation, such group or unit shall be merged into another existing group in the association and any funds of the depleted membership group shall become the reserve funds of the group into which it is merged.

If the entire membership of an association falls below 60 percent of its established size as described in its plan of operation, such association must make a bona fide attempt to merge with an-

other such association to protect the interests of the remaining members. Any reserve funds of the merging association shall become the reserve funds of the surviving merged association. If merger attempts are unsuccessful, the association must present a plan of reorganization to the commissioner for his approval.

7.10(512A) Directors and officers. Each benevolent association shall have at least three persons on its board of directors at all times and shall have more than one person act as corporate officer.

7.11(512A) Stockholders. If any benevolent association issues stock, such association shall have its stock owned by more than one stockholder.

7.12(512A) Bookkeeping and accounts. Each benevolent association shall maintain a set of books and records in accordance with normally accepted accounting procedures. Such books and records shall be used to supply the information requested in the annual statement provided each year by the insurance commissioner.

These rules are intended to implement chapter 512A of the Code.

[Filed November 30, 1967]

CHAPTER 8
EXAMINATION AND INVESTMENTS OF INSURANCE COMPANIES

8.1(507) Examination reports. Upon the completion of an examination a copy of the report will be furnished the company, association or society examined, whereupon the company, association or society will have ten days in which to determine whether or not it will demand a hearing before the commissioner of insurance. If a hearing is desired, then and in that event the company, association or society shall, within said ten days file with the commissioner of insurance a written application, attaching thereto the specific grounds upon which a hearing is desired. Within a reasonable time after the receipt of said application, the commissioner will fix a date for the hearing and notify the company, association or society thereof. Upon the completion of the hearing, or as soon as convenient thereafter, the commissioner shall render his decision, either orally or in writing at his discretion and file said report as part of the records in his department.

8.2(511) Life companies—investment in preferred stocks. The phrase "preferred dividend requirements as of the date of acquisition" is construed to include the dividend requirements of a new issue. Consequently, a new preferred issue will qualify if the net earnings of the corporation for each of the five preceding years have been not less than one and one-half times the sum of the annual fixed charges, contingent interest and the annual preferred dividend requirements including the new issue.

8.3(515) Reinsurance contracts. No credit will be given the ceding insurer for reinsurance made, ceded, renewed or otherwise becoming effective after July 1, 1940, unless the reinsurance agreements (treaty, facultative or otherwise) are with reinsurers authorized to do business in the state of Iowa, and substantially provide, or are amended by a supplemental contract to read in substance as follows:

In consideration of the continuing benefits to accrue hereunder to the assuming insurer, the assuming insurer hereby agrees that, as to all reinsurance made, ceded, renewed or otherwise becoming effective after July 1, 1940, the reinsurance shall be payable by the assuming insurer on the basis of the liability of the ceding insurer under the contract or contracts reinsured without diminution because of the insolvency of the ceding insurer.

8.4(515) Premium tax. The fact that the companies choose to call a stipulated amount a "policy fee" and do not include it under the term of "premium" would not have the effect of exempting this income from taxation. It is most assuredly a part of the premium or income received from policyholders for business done in Iowa and thus subject to taxation.

[Filed November 21, 1963]

CHAPTER 9
AGENTS LICENSING

9.1(522) License lost through merger. Since the statute provides that a license must be issued to every agent that transacts business for an insurance company that new license will have to be issued for the agents of the company that lost its identity in the new company.

9.2(522) Agents rebates illegal. A policyholder pays a premium in full by promissory note. Incorporated in the note is a clause whereby the insured is to pay a certain rate of interest. The note becomes due and the face amount of the note is paid, but not the interest. The policyholder pays the note in full, but does not pay the interest, the agent cancels the note and returns it to the policyholder, and the agent pays the interest himself.

The above transaction clearly comes within the prohibition found in chapter 507B of the Code, and constitutes rebating.

9.3(522) Agent license revocation. The commissioner will revoke the license of any agent who is found guilty of inducing any individual to lapse or cancel a policy of one insurer in order that such individual procure a policy of another insurer which in any way would operate to the prejudice of the interests of the individual.

[Filed November 21, 1963]

CHAPTER 10
Reserved for future use

CHAPTER 11
INSURANCE HOLDING COMPANY SYSTEMS

11.1(521A) Purpose. The purpose of these rules is to set forth rules and procedural requirements which the commissioner deems necessary to carry out the provisions of chapter 521A of the Code. The information called for by these rules is hereby declared to be necessary and appropriate in the public interest and for the protection of policyholders and shareholders in this state.

11.2(521A) Definitions. As used in these rules unless otherwise required by the context:

11.2(1) "Executive officer" means any individual charged with active management and control in an executive capacity (including a president, vice-president, treasurer, secretary, controller, and any other individual performing functions corresponding to those performed by the foregoing officers) of a person, whether incorporated or unincorporated.

11.2(2) "Foreign insurer" shall include an alien insurer except where clearly noted otherwise.

11.2(3) "Ultimate controlling person" means that person who is not controlled by any other person.

11.2(4) Other terms found in these rules and in section 521A.1 entitled "Definitions" shall retain the meaning as found in such section.

11.3(521A) Subsidiaries of domestic insurers. The authority to invest in subsidiaries under section 521A.2(3) is in addition to any authority to invest in subsidiaries which may be contained in any other provision of the insurance code.

An investment by a subsidiary under section 521A.2(3,*c*) may cause the total investment of the insurer to exceed any of the limitations contained in any of the individual Code provisions referred to in paragraph "*c*" provided that it does not exceed the aggregate amount which could be invested under all of those provisions with respect to the type of asset involved.

11.4(521A) Control acquisition of domestic insurer. Any person required to file a statement pursuant to section 521A.3 of the Code entitled "Acquisition of control of or merger with domestic insurer," shall furnish all the information requested on FORM A hereto annexed and hereby made a part of these rules.

11.4(1) If the person being acquired is a "domestic insurer" solely because of the provisions of section 521A.3(1), the name of the domestic insurer on the cover page should be as follows: "ABC Insurance Company, a Subsidiary of XYZ Holding Company."

11.4(2) Where a domestic insurer, including any other person controlling a domestic insurer, unless such other person is either directly or through its affiliate primarily engaged in business other than the business of insurance is being acquired, references to "the insurer" contained in FORM A shall refer to both the domestic subsidiary insurer and the person being acquired.

11.4(3) The applicant shall promptly advise the commissioner of any changes in the information so furnished arising subsequent to the date upon which such information was furnished but prior to the commissioner's disposition of the application.

11.4(4) *Exemptions.* No statement need be filed and no approval by the commissioner is required pursuant to section 521A.3 if the company being acquired is considered a domestic insurer solely by reason of section 521A.3(1) and provided such acquisition is subject to disclosure requirements in said company's state of domicile substantially similar to those imposed by section 521A.3.

11.5(521A) Registration of insurers. Any insured required to file a statement pursuant to section 521A.4 shall furnish all the information required on FORM B hereto annexed and hereby made a part of these rules.

11.5(1) An amendment to FORM B shall be filed within 15 days after the end of any month in which the following occurs:

a. There is a change in the control of the registrant, in which case the entire FORM B shall be made current;

b. There is a material change in the information given in Item 5 or Item 6 of FORM B in which case the respective item shall be made current.

11.5(2) Any other amendment to FORM B shall be filed within 90 days after the end of each fiscal year of the ultimate controlling person of the insurance holding company system. Such amendment shall make current all information in FORM B.

11.6(521A) Alternative and consolidated registrations. Any authorized insurer may file a registration statement on behalf of any affiliated insurer or insurers which are required to register under section 521A.4. A registration statement may include information regarding any insurer in the insurance holding company system even if such insurer is not authorized to do business in this state. In lieu of filing a registration statement on FORM B, the authorized insurer may file a copy of the registration statement or similar report which it is required to file in its state of domicile, provided:

1. The statement or report contains substantially similar information required to be furnished on FORM B; and

2. The filing insurer is the principal insurance company in the insurance holding company system.

11.6(1) The question of whether the filing insurer is the principal insurance company in the

insurance holding company system is a question of fact and an insurer filing a registration statement or report in lieu of FORM B on behalf of an affiliated insurer shall set forth a simple statement of facts which will substantiate the filing insurer's claim that it, in fact, is the principal insurer in the insurance holding company system.

11.6(2) With the prior approval of the commissioner, an unauthorized insurer may follow any of the procedures which could be done by an authorized insurer under 11.6(521A) above.

Any insurer may take advantage of the provisions of section 521A.4(7) or 521A.4(8) without obtaining the prior approval of the commissioner. The commissioner, however, reserves the right to require individual filings if he deems such filings necessary in the interest of clarity, ease of administration or the public good.

11.7(521A) Exemptions. A foreign or alien insurer otherwise subject to 521A.4, shall not be required to register pursuant to that section if it is admitted in the domiciliary state of the principal insurer [as that term is defined in 11.6(1)] and in said state if subject to disclosure requirements and standards adopted by the statute or rules which are substantially the same as those contained in section 521A.4, provided, the commissioner may require a copy of the registration statement or other information filed with the domiciliary state; or until July 1, 1971.

11.7(1) The state of entry of an alien insurer shall be deemed to be its domiciliary state for the purposes of these rules.

11.7(2) Any insurer not otherwise exempt or excepted from section 521A.4 may apply for an exemption from the requirements of said section by submitting a statement to the commissioner setting forth its reasons for being exempt.

11.8(521A) Disclaimers and termination of registration. A disclaimer of affiliation or a request for termination of registration claiming that a person does not, or will not upon the taking of some proposed action, control another person (hereinafter referred to as the "subject") shall contain the following information:

11.8(1) The number of authorized, issued and outstanding voting securities of the subject;

11.8(2) With respect to the person whose control is denied and all affiliates of such person, the number and percentage of shares of the subject's voting securities which are held of record or known to be beneficially owned, and the number of such shares concerning which there is a right to acquire, directly or indirectly;

11.8(3) All material relationships and bases for affiliation between the subject and the person whose control is denied and all affiliates of such person;

11.8(4) A statement explaining why such person should not be considered to control the subject.

A request for termination of registration shall be deemed to have been granted unless the commissioner, within 30 days after he receives the request, notifies the registrant otherwise.

11.9(521A) Extraordinary dividends and other distributions. Requests for approval of extraordinary dividends or any other extraordinary distribution to shareholders shall include the following:

11.9(1) The date established for payment of the dividend;

11.9(2) A statement as to whether the dividend is to be in cash or other property and, if in property, a description thereof of its cost, and its fair market value together with an explanation of the basis for valuation;

11.9(3) The amounts and dates of all dividends (including regular dividends) paid within the period of 12 consecutive months ending on the date fixed for payment of the proposed dividend for which approval is sought and commencing on the day after the same day of the same month in the last preceding year;

11.9(4) A balance sheet and statement of income for the period intervening from the last annual statement filed with the commissioner and the end of the month preceding the month in which the request for dividend approval is submitted;

11.9(5) A brief statement as to the effect of the proposed dividend upon the insurer's surplus and the reasonableness of surplus in relation to the insurer's outstanding liabilities and the adequacy of surplus relative to the insurer's financial needs.

11.9(6) The payment of an extraordinary dividend by an insurer whose total liabilities, as calculated for National Association of Insurance Commissioners annual statement purposes, are less than ten percent of its assets both before and after payment thereof is deemed automatically approved, provided such dividend is paid only from earned surplus. The insurer, however, shall give written notice to the commissioner of the declaration pursuant to section 521A.4(4).

FORM A

STATEMENT REGARDING THE
ACQUISITION OF CONTROL OF OR MERGER WITH A DOMESTIC INSURER

Name of Domestic Insurer
BY

Name of Acquiring Person (Applicant)

Filed with the Insurance Department of _____
(State of domicile of insurer being acquired)

Dated: _____,19____

Name, Title, Address and Telephone Number of Individual to Whom Notices and Correspondence Concerning This Statement Should be Addressed:

_____

_____

_____

_____

FORM A

Item 1. Insurer and method of acquistion.

State the name and address of the domestic insurer to which this application relates and a brief description of how control is to be acquired.

Item 2. Identity and background of the applicant.

(*a*) State the name and address of the applicant seeking to acquire control over the insurer.

(*b*) If the applicant is not an individual, state the nature of its business operations for the past five years or for such lesser period as such person and any predecessors thereof shall have been in existence. Briefly describe the business intended to be done by the applicant and the applicant's subsidiaries.

(*c*) Furnish a chart or listing clearly presenting the identities of the interrelationships among the applicant and all affiliates of the applicant. No affiliate need be identified if its total assets are equal to less than one-half of one percent of the total assets of the ultimate controlling person affiliated with the applicant. Indicate in such chart or listing the percentage of voting securities of each such person which is owned or controlled by the applicant or by any other such person. If control of any person is maintained other than by the ownership or control of voting securities, indicate the basis of such control. As to each person specified in such chart or listing indicate the type of organization (e.g., corporation, trust, partnership) and the state or other jurisdiction of domicile. If court proceedings looking toward a reorganization or liquidation are pending with respect to any such person, indicate which person, and set forth the title of the court, nature of proceedings and the date when commenced.

Item 3. Identity and background of individuals associated with the applicant.

State the following with respect to (1) the applicant if he is an individual or (2) all persons who are directors, executive officers or owners of ten percent or more of the voting securities of the applicant if the applicant is not an individual:

(*a*) Name and business address;

(*b*) Present principal business activity occupation or employment including position and office held and the name, principal business and address of any corporation or other organization in which such employment is carried on;

(*c*) Material occupations, positions, offices or employments during the last five years, giving the starting and ending dates of each and the name, principal business and address of any business corporation or other organization in which each such occupation, position, office or employment was carried on; if any such occupation, position, office or employment required licensing by or registration with any federal, state or municipal governmental agency, indicate such fact, the current status of such licensing or registration, and an explanation of any surrender, revocation, suspension or disciplinary proceedings in connection therewith.

(*d*) Whether or not such person has ever been convicted in a criminal proceeding (excluding minor traffic violations) during the last ten years and, if so, give the date, nature of conviction, name and location of court, and penalty imposed or other disposition of the case.

Item 4. Nature, source and amount of consideration.

(*a*) Describe the nature, source and amount of funds or other considerations used or to be used in effecting the merger or other acquisition of control. If any part of the same is represented or is to be represented by funds or other consideration borrowed or otherwise obtained for the purpose of acquiring, holding, or trading securities, furnish a description of the transaction, the names of the parties thereto, the rela-

tionship, if any, between the borrower and the lender, the amounts borrowed or to be borrowed, and copies of all agreements, promissory notes and security arrangements relating thereto.

(*b*) Explain the criteria used in determining the nature and amount of such consideration.

(*c*) If the source of the consideration is a loan made in the lender's ordinary course of business and if the applicant wishes the identity to remain confidential, he must specifically request that the identity be kept confidential.

Item 5. Future plans for insurer.

Describe any plans or proposals which the applicant may have to declare an extraordinary dividend, to liquidate such insurer, to sell its assets to or merge it with any person or persons or to make any other material change in its business operations or corporate structure or management.

Item 6. Voting securities to be acquired.

State the number of shares of the insurer's voting securities which the applicant, its affiliates and any person listed in Item 3 plan to acquire, and the terms of the offer, request, invitation, agreement or acquisition, and a statement as to the method by which the fairness of the proposal was arrived at.

Item 7. Ownership of voting securities.

State the amount of each class of any voting security of the insurer which is beneficially owned or concerning which there is a right to acquire beneficial ownership by the applicant, its affiliates or any person listed in Item 3.

Item 8. Contracts, arrangements or understandings with respect to voting securities of the insurer.

Give a full description of any contracts, arrangements or understandings with respect to any voting security of the insurer in which the applicant, its affiliates or any persons listed in Item 3 is involved, including but not limited to transfer of any of the securities, joint ventures, loan or option arrangements, puts or calls, guarantees of loans, guarantees against loss or guarantees of profits, division of losses or profits, or the giving or withholding of proxies. Such description shall identify the persons with whom such contracts, arrangements or understandings have been entered into.

Item 9. Recent purchases of voting securities.

Describe any purchases of any voting securities of the insurer by the applicant, its affiliates or any person listed in Item 3 during the twelve calendar months preceding the filing of this statement. Include in such description the dates of purchase, the names of the purchasers, and the consideration paid or agreed to be paid therefor. State whether any such shares so purchased are hypothecated.

Item 10. Recent recommendations to purchase.

Describe any recommendations to purchase any voting security of the insurer made by the applicant, its affiliates or any person listed in Item 3, or by anyone based upon interviews or at the suggestion of the applicant, its affiliates or any person listed in Item 3 during the twelve calendar months preceding the filing of this statement.

Item 11. Agreements with broker-dealers.

Describe the terms of any agreement, contract or understanding made with any broker-dealer as to solicitation of voting securities of the insurer for tender, and the amount of any fees, commissions or other compensation to be paid to broker-dealer, with regard thereto.

Item 12. Financial statements and exhibits.

(*a*) Financial statements and exhibits shall be attached to this statement as an appendix, but list under this item the financial statements and exhibits so attached.

(*b*) The financial statements shall include the annual financial statements of the persons identified in Item 2(c) for the preceding five fiscal years (or for such lesser period as such applicant and its affiliates and any predecessors thereof shall have been in existence), and similar information covering the period from the end of such person's last fiscal year, if such information is available. Such statements may be prepared on either an individual basis, or, unless the commissioner otherwise requires, on a consolidated basis if such consolidated statements are prepared in the usual course of business.

The annual financial statements of the applicant shall be accompanied by the certificate of an independent public accountant to the effect that such statements present fairly the financial position of the applicant and the results of its operations for the year then ended, in conformity with generally accepted accounting principles or with requirements of insurance or other accounting principles prescribed or permitted under law. If the applicant is an insurer which is actively engaged in the business of insurance, the financial statements need not be certified, provided they are based on the Annual Statement of such person filed with the insurance department of the person's domiciliary state and are in accordance with the requirements of insurance or other accounting principles prescribed or permitted under the law and regulations of such state.

(*c*) File as exhibits copies of all tender offers for, requests or invitations for, tenders of, exchange offers for, and agreements to acquire or exchange any voting securities of the insurer and (if distributed) of

additional soliciting material relating thereto; any proposed employment, consultation, advisory or management contracts concerning the insurer; annual reports to the stockholders of the insurer and the applicant for the last two fiscal years; and any additional documents or papers required by Form A or regulations sections 0.04 and 0.06.

Item 13. Signature and certification.

Signature and certification of the following form:

INSURANCE HOLDING COMPANY SYSTEM REGISTRATION STATEMENT

Filed with the Insurance Department of the State of _____

By

_____
Name of Registrant

On Behalf of the Following Insurance Companies

Name Address

_____

_____

_____

_____

_____

_____

Date: _____, 19____

Name, Title, Address and Telephone Number of Individual to Whom Notices and Correspondence Concerning This Statement Should Be Addressed:

_____

_____

_____

_____

FORM B

Item 1. Identity and control of registrant.

Furnish the exact name of each insurer registering or being registered (hereinafter called "the Registrant"), the home office address and principal executive offices of each; the date on which each Registrant became part of the insurance holding company system; and the method(s) by which control of each Registrant was acquired and is maintained.

Item 2. Organizational chart.

Furnish a chart or listing clearly presenting the identities of and interrelationships among all affiliated persons within the insurance holding company system. No affiliate need be shown if its total assets are equal to less than one-half of one percent of the total assets of the ultimate controlling person within the insurance holding company system. The chart or listing should show the percentage of each class of voting securities of each affiliate which is owned, directly or indirectly, by another affiliate. If control of any person within the system is maintained other than by the ownership or control of voting securities, indicate the basis of such control. As to each person specified in such chart or listing indicate the type of organization (e.g., corporation, trust, partnership) and the state or other jurisdiction of domicile.

Item 3. The ultimate controlling person.

As to the ultimate controlling person in the insurance holding company system furnish the following information:

(*a*) Name.

(*b*) Home office address.

(*c*) Principal executive office address.

(*d*) The organizational structure of the person, i.e., corporation, partnership, invididual, trust, etc.

(*e*) The principal business of the person.

(*f*) The name and address of any person who holds or owns ten percent or more of any class of voting security, the class of such security, the number of shares held of record or known to be beneficially owned, and the percentage of class so held or owned.

(*g*) If court proceedings looking toward a reorganization or liquidation are pending, indicate the title and location of the court, the nature of proceedings and the date when commenced.

Item 4. Biographical information.

Furnish the following information for the directors and executive officers of the ultimate controlling person: The individual's name and address, his principal occupation and all offices and positions held during the past five years, and any conviction of crimes other than minor traffic violations during the past ten years.

Item 5. Transactions, relationships and agreements.

(*a*) Briefly describe the following agreements in force, relationships subsisting and transactions currently outstanding between the Registrant and its affiliates:

(1) Loans, other investments, or purchases, sales or exchanges of securities of the affiliates by the Registrant or of the Registrant by its affiliates;

(2) Purchases, sales or exchanges of assets;

(3) Transactions not in the ordinary course of business;

(4) Guarantees or undertakings for the benefit of an affiliate which result in an actual contingent exposure of the Registrant's assets to liability, other than insurance contracts entered into in the ordinary course of the Registrant's business;

(5) All management and service contracts and all cost-sharing arrangements, other than cost allocation arrangements based upon generally accepted accounting principles; and

(6) Reinsurance agreements covering all or substantially all of one or more lines of insurance of the ceding company.

No information need be disclosed if such information is not material. Sales, purchases, exchanges, loans or extensions of credit or investments involving one-half of one percent or less of the Registrant's admitted assets as of the 31st day of December next preceding shall not be deemed material.

The description shall be in a manner as to permit the proper evaluation thereof by the commissioner, and shall include at least the following: The nature and purpose of the transaction; the nature and amounts of any payments or transfers of assets between the parties; the identity of all parties to such transaction; and relationship of the affiliated parties to the Registrant.

Item 6. Litigation or administrative proceedings.

A brief description of any litigation or administrative proceedings of the following types, either then pending or concluded within the preceding fiscal year, to which the ultimate controlling person or any of its directors or executive officers was a party or of which the property of any such person is or was the subject; give the names of the parties and the court or agency in which such litigation or proceeding is or was pending:

(*a*) Criminal prosecutions or administrative proceedings by any government agency or authority which may be relevant to the trustworthiness of any party thereto; and

(*b*) Proceedings which may have a material effect upon the solvency or capital structure of the ultimate holding company including, but not necessarily limited to, bankruptcy, receivership or other corporate reorganizations.

Item 7. Financial statements and exhibits.

(*a*) Financial statements and exhibits should be attached to this statement as an appendix, but list under this item the financial statements and exhibits so attached.

(*b*) The financial statements shall include the annual financial statements of the ultimate controlling person in the insurance holding company system as of the end of the person's latest fiscal year.

If at the time of the initial registration, the annual financial statements for the latest fiscal year are not available, annual statements for the previous fiscal year may be filed and similar financial information shall be filed for any subsequent period to the extent such information is available. Such financial statements may be prepared on either an individual basis, or unless the commissioner otherwise requires, on a consolidated basis if such consolidated statements are prepared in the usual course of business.

Unless the commissioner otherwise permits, the annual financial statements shall be accompanied by the certificate of an independent public accountant to the effect that such statements present fairly the financial position of the ultimate controlling person and the results of its operations for the year then ended, in conformity with generally accepted accounting principles or with requirements of insurance or other accounting principles prescribed or permitted under law. If the ultimate controlling person is an insurer who is actively engaged in the business of insurance, the annual financial statements need not be certified, provided they are based on the Annual Statement of such insurer filed with the insurance department of the insurer's domiciliary state and are in accordance with requirements of insurance or other accounting principles prescribed or permitted under the law and regulations of such state.

(*c*) Exhibits shall include copies of the latest annual reports to shareholders of the ultimate controlling person and proxy material used by the ultimate controlling person; and any additional documents or papers required by FORM B or regulations sections 0.04 and 0.06.

SIGNATURES

Signatures and certification of the form as follows:

[Filed November 19, 1970; amended December 14, 1972]

CHAPTERS 12 to 15
Reserved for future use

CHAPTER 16
MISCELLANEOUS

16.1(508, 515) Notes taken for insurance. No sale or disposition of first year premium notes by either the company or its agents prior to the issuance or delivery of such policy, and prior to the passing of the consideration therefor, shall be made.

Either one of the above-mentioned practices is considered, by this department, to be contrary to the best interests of the insuring public, and will,

in the future, be considered as just and sufficient cause for the cancellation or suspension of the license of any agent engaging therein.

16.1(1) A contract of insurance may specifically provide for a specific term of duration, in which event the contract automatically expires at the end of that term, without the giving of any notice. For illustration, a policy written for a term of one year with the premium paid in advance automatically expires at the end of the year.

16.1(2) However, in the event no definite term is fixed in the policy, or if the policy is for a definite period with premium payments made in installments at shorter intervals, or if the term of the policy is fixed and a promissory note is given for the entire premium, said note made payable at a shorter period, then before the policy can be legally forfeited or suspended for nonpayment of the premium when due or on the installment dates, or on or after the maturity of the note, a 30-day notice must be given. To that extent the company is required to give notice, otherwise no notice is required.

16.2 Investment of funds.

Ruling No. R21. By Department.

The Forty-first General Assembly of Iowa amended [508 & 511] (511.8) of the Code of 1924, relating to the investment of funds by life insurance companies organized in this state, by adding to paragraph one (1) of said section the following:

"Or federal farm loan bonds issued under the Act of Congress, approved July 17, 1916."

Doubt has arisen in the minds of company officials as to whether or not the amendment in question authorizes life insurance companies organized in Iowa to invest their funds in bonds issued by joint stock land banks.

In a written opinion of the attorney general of Iowa, bearing date May 25, 1925, it is held that, inasmuch as joint stock land banks were created under the Act of Congress approved July 17, 1916, bonds issued by such banks are included in the amendment aforesaid.

Therefore, it is the ruling of this department that such bonds are a legal investment for life insurance companies organized in this state. However, said amendment is not effective until July 4, 1925, and until said date no such investments should be made.

16.3(508, 515) Medical examinations. No life insurance policy, except those specifically excepted by section (508.28) and group insurance shall be issued in the state of Iowa unless based upon a medical examination of the applicant within such time as to give the company a reasonable opportunity to pass upon the same. A violation of this ruling will subject the company, association or society guilty thereof to a suspension of its certificate of authority to transact business in this state.

16.4(508,515) Computation of reserves. Iowa life insurance companies may report the nonadmitted excess item to this department on the basis of the true reserve instead of the mean reserve as has been the practice in the past. Under the true reserve system there will be no excess excepting in the case of indebtedness in excess of policy liabilities. The true reserve system eliminates all excess on account of due and deferred premiums, but there may be an excess equal to or in excess of the loading depending upon what premium the note represents, and how long it has been running when a premium note is taken for the gross premiums or when there is an overloan.

This concession is made to Iowa companies with the conviction that it removes many of the defects and disadvantages of the present practice of requiring the excess of the mean reserve.

As a corollary to the proposed system of determining this excess item, the business of the company must be reported upon a strictly paid for basis.

This department will not require that policies be lapsed if premium is not paid within a limited time after the due date, but no credit for an uncollected premium may be taken if more than 60 days past due, unless a premium note of the proper form has been taken therefor.

16.5(508, 515) Rebating. The acceptance at par of any security given in payment for insurance premium, which security was actually worth less than its par value at the time of such acceptance, would constitute an indirect rebate to the person from whom such securities were so accepted.

16.6(508, 515) Regulation of insurance. Certain insurance companies authorized by this department to transact business in this state have entered into contracts with business institutions not of a similar nature, whereby it is agreed that the company will issue policies to such institutions for issuance by such institutions to their patrons, in consideration of the patrons entering into some agreement for the purchase of commodities of the institution, or in payment of a small premium combined with the purchase of some commodity, the institution paying the net premium thereon,

Under the plan above set forth, it is impossible to ascertain whether the insurance is offered as an inducement to purchase, or the purchase is an inducement to the insurance. It appears to this department that one is an inducement to the other, and therefore an inducement promising returns and profits in connection with the sale of insurance contrary to section (506.10).

Further, it appears to this department that such a plan would not be conducive to sound insurance principles and the best interests of the insuring public, in that it would tend to discriminate between persons of the same class and therefore be contrary to public policy.

No contract of insurance shall be approved for use in this state, nor shall any contract of insurance be issued to a resident of this state, if such contract is to be used or is being used in connection

with any plan similar to that stated herein, unless the company shall first submit such plan to the commissioner of insurance and receive his approval thereto.

Nothing herein contained shall be construed to prohibit a business institution from offering to its patrons insurance at a specific premium to be paid wholly by such patron, provided the institution shall appoint a person in their employ as agent and secure a license for such person from this department.

Any violation of this ruling brought to the attention of this department shall be deemed cause for revocation of the license of the company so violating.

16.7(508, 515) Furriers customers policies. The attention of this department has been called to the practice of companies issuing through their marine departments the so-called "furriers customers policies," wherein a master contract is issued to the furrier designated as the assured, and individual certificates are by him issued to the customers, together with an annual storage or repair agreement.

The contracts submitted provide that such certificate be issued only in connection with such annual storage agreement, with an agreement for repairs, cleaning, altering, etc., or with a conditional sales contract, and, further, that any loss incurred thereunder shall be adjustable with the furrier and customer, or repaired by the furrier at a cost to the company.

It is the opinion of this department that the requirement that such contract be issued only in connection with the agreement above set forth is in violation of Ruling C2 [Regulation 16.6] recently issued by this department; and, further, that the agreement whereby the loss is adjustable at the option of the company with the furrier without considering the rights of the customer, and permitting the furrier to profit by the loss is not conducive to sound insurance and is contrary to public policy.

We are further of the opinion that the issuance of such a contract with certificates by a furrier, where such furrier holds a conditional sales contract, or agreement, is not contrary to public policy in that the furrier has a specific interest in the agreement, and contracts of this type may be issued under such circumstances, provided the terms of the contract stipulate that the loss is payable to the furrier and the customer as their interests appear, is not made subject to any other agreement, and provides that the term of the contract shall not extend beyond the period set forth in the conditional sales contract.

NOTE: The furriers customers form may be modified to meet the department's requirements and overcome objections herein contained.

16.8(508, 515) Expiration date of policy vs. charter expiration date. The mere fact that a corporate contract may extend beyond the term of the life of the corporation does not destroy it. We believe as a matter of public policy, insurance corporations frequently enter into such contracts. This is graphically illustrated in the case of a life insurance contract issued by a company with a limited corporate period. It has been held that the renewal of articles of incorporation is a continuation of the original corporate period which lends support to the proposition that it is within the public interest that contracts of this nature be permitted.

16.9(508, 515) Capital stock requirements for writing multiple lines. A stock, fire or casualty company with a paid-up capital of less than $300,000 may write full multiple lines, if possessed of surplus to policyholders of $500,000.

16.10(508, 515) Assessable and nonassessable policies. The two plans are not compatible with each other and are unfairly discriminatory within the intent and meaning of chapters 259 and 260, Acts of the 52nd General Assembly.

If there were some means through which the surplus funds of an association could be legally segregated between assessable and nonassessable policies, it might be possible to avoid this discrimination. However, the present statutes appear to make such funds available to the payment of the rightful claims of all policyholders of the association.

16.11(508, 515) Tax on gross premiums—life companies. In determining the gross amount of premiums to be taxed hereunder, there shall be excluded:

1. All premiums returned to policyholders or annuitants during the preceding calendar year, except cash surrender values.
2. All dividends that, during said year, have been paid in cash or applied in reduction of premiums or left to accumulate to the credit of policyholders or annuitants.

16.12(508, 515) Loans to officers, directors, employees, etc. No insurance company or association of any kind, domiciled in the state of Iowa, shall loan any portion of its funds to an officer, director, stockholder, employee or any relative or immediate member of the family of an officer or director.

The provisions of Code sections 508.8 and 511.12 shall likewise be applicable to fire and casualty companies.

16.13(508, 515) Single maximum risk—fidelity and surety risks. No insurance company is permitted under the limitations of section 515.49 to expose itself to any risk on a fidelity or surety bond in excess of ten percent of its surplus to policyholders, unless such excess shall be reinsured in accordance with the provisions of the statute.

SECURITIES DIVISION

CHAPTER 17
REGISTRATION AND OPERATION OF BROKER-DEALERS

17.1(502) General provisions. The broker-dealer shall be registered or reregistered as such under chapter 502 of the Code, if the commissioner of insurance finds that the applicant is qualified, has personnel with sufficient training, knowledge and experience in the securities business, is of good repute, and has otherwise fully satisfied the requirements of said chapter and the rules hereunder. The license period for each such broker-dealer shall be for one year from date of issuance, and renewable annually.

17.2(502) Applications. An application for an original or renewal broker-dealer license shall be filed on the appropriate form prescribed by the commissioner of insurance.

17.2(1) Broker-dealer applications shall be accompanied by the filing fee, consent to service of process, and the scheduled exhibits specified in the appropriate form.

17.2(2) Additional exhibits or information not specifically required, but essential to a full presentation of all material facts relating to applicant's qualification should be furnished and properly identified.

17.2(3) An applicant for renewal license need not furnish the identical information, schedules or exhibits submitted in connection with the prior application unless there has been a change in circumstances affecting such previous disclosures, or such data is specifically requested by the commissioner of insurance.

17.2(4) As provided in sections 502.11 and 502.18, a surety bond in the amount of $5,000.00 shall be executed upon the appropriate form prescribed by the commissioner of insurance and filed with the application for original or renewal registration of a broker-dealer.

17.2(5) The statutory fee of $50 for such registration and for each annual renewal shall be paid at the time the information and application is filed with the commissioner of insurance.

17.3(502) Examination requirements. A first time applicant for registration as a securities dealer will be required to pass a written examination to determine the skill, competency and knowledge of such applicant with respect to general securities matters, the Iowa securities law and regulations.

17.3(1) In the case of dealer applicants, the following classes of persons shall be subject to examination:

a. The principal of a sole proprietorship.

b. General partners of a partnership.

c. The executive officers of a corporation, provided that if it can be shown to the satisfaction of the commissioner of insurance that certain corporate officers are not active in the conduct of the applicant's business in Iowa, such officers shall not be required to take the examination.

17.3(2) The date, time and place for taking such examination shall be determined and announced by the commissioner of insurance, and notice thereof shall be published or circulated and available to applicants at the time of filing.

17.3(3) All registration applications involving individuals subject to examination must be filed with the commissioner of insurance at least five days prior to the date of examination.

17.3(4) Applicants must furnish with their application a company draft in the amount of five dollars to cover the examination fee.

17.3(5) Examinations shall be composed of two parts:

a. Part I shall cover the general securities subject matter. Part II shall cover the Iowa securities law and regulations.

b. The passing score on each part of the examination shall be 80 percent for broker-dealers.

17.3(6) Exemptions—the following classes of persons shall be exempt from Part I of the examination:

a. Applicants who have passed the New York Stock Exchange or National Association of Securities Dealers "Principal's" examination given on or after July 1, 1963.

b. Applicants who have passed an examination essentially identical in subject matter in another state, provided that the passing score attained on such examination was at least as high as required by this department.

17.4(502) Responsibility for agents. The ultimate responsibility for the quality and conduct of agents must be with the broker-dealer employing said agent. Said employer broker-dealer must bear the ultimate responsibility for proper supervision and control of said agent employee.

17.5(502) Net capital requirements for broker-dealers.

17.5(1) Unless exempted as provided in 17.5(2), every broker-dealer shall at all times have and maintain net capital necessary to comply with the following conditions:

a. His aggregate indebtedness to all other persons shall not exceed 2,000 percent of his net capital; and

b. He shall have and maintain net capital of not less than $5,000.00.

17.5(2) Exemptions:

a. The provisions of this rule shall not apply to any member in good standing and subject to the capital rules of the New York Stock Exchange, the American Stock Exchange, Midwest or Pacific

Coast Stock Exchange, whose rules, settled practices and applicable regulatory procedures are deemed by the commissioner of insurance to impose requirements more comprehensive than requirements of this rule; provided, however, that the exemption as to the members of any exchange may be suspended or withdrawn by the commissioner of insurance at any time, by sending ten days' written notice to such exchange, if it appears to the commissioner of insurance to be necessary or appropriate in the public interest, or for the protection of investors to do so. This exemption shall not be available to the members of any exchange whose capital rules do not provide that in the computation of net capital there shall be a deduction of not less than ten percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 40 to 49 calendar days; 20 percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 50 to 59 calendar days; and 30 percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 60 or more calendar days.

b. The commissioner of insurance may, upon written application, exempt the provisions of this section, either unconditionally or on specified terms and conditions, any broker-dealer who satisfies the commissioner of insurance that, because of the special nature of his business, his financial position, and the safeguards he has established for the protection of customers' funds and securities it is not necessary in the public interest or for the protection of investors to subject the particular broker-dealer to such provisions.

17.5(3) Definitions for the purpose of this rule:

a. The term "aggregate indebtedness" shall mean the total monetary liabilities of a broker-dealer arising in connection with any transaction including, among other things: Money borrowed; money payable against securities failed to receive the market value of securities borrowed (except for delivery against customers' sales) to the extent to which no equivalent value is paid or credited; customers' free credit balances; credit balances in customers' accounts having short positions in securities; and equities in customers' commodities futures accounts; but excluding:

(1) Indebtedness adequately collateralized, as hereinafter defined by securities or spot commodities owned by the broker-dealer;

(2) Indebtedness to other broker-dealers adequately collateralized, as hereinafter defined, by securities or spot commodities owned by the broker-dealer;

(3) Amounts payable against securities loaned which securities are owned by the broker-dealer;

(4) Amounts payable against securities "Failed to Receive" which securities were purchased for the account of, and have not been sold by, the broker-dealer;

(5) Indebtedness adequately collateralized, as hereinafter defined, by exempted securities;

(6) Amounts segregated in accordance with the commodity exchange Act and the rules and regulations thereunder;

(7) Fixed liabilities adequately secured by real estate or any other asset which is not included in the computation of "Net Capital" under this rule;

(8) "Liabilities" on open contractual commitments; and

(9) Indebtedness subordinated to the claims of general creditors pursuant to a satisfactory subordination agreement, as hereinafter defined.

b. The term "Net Capital" shall mean the net worth of a broker-dealer (that is, the excess of total assets over total liabilities), adjusted by:

(1) Adding unrealized profits (or deducting unrealized losses) in the accounts of the broker-dealer and, if such broker-dealer is a partnership, adding equities (or deducting deficits) in accounts of partners, as hereinafter defined;

(2) Deducting fixed assets and assets which cannot be readily converted into cash (less any indebtedness secured thereby) including, among other things, real estate; furniture and fixtures; exchange memberships; prepaid rent; insurance and expenses; good will; organization expenses; all unsecured advances and loans; customers' unsecured notes and accounts; and deficits in customer's accounts, except in bona fide cash accounts within the meaning of section 4(c) of regulation T of the board of governors of the federal reserve systems;

(3) Deducting the percentages specified below of market value of all securities, long and short (except exempted securities) in the capital, proprietary and other accounts of the broker-dealer including securities loaned to the broker-dealer pursuant to a satisfactory subordination agreement, as hereinafter defined, and if such broker-dealer is a partnership, in the accounts of partners, as hereinafter defined:

In the case of nonconvertible debt securities having a fixed interest rate and a fixed maturity date which are not in default, if the market value is not more than five percent below the face value, the deduction shall be five percent of such market value; if the market value is more than five percent but not more than 30 percent below the face value, the deduction shall be a percentage of market value, equal to the percentage by which the market value is below the face value; and if the market value is 30 percent or more below the face value, such deduction shall be 30 percent;

In the case of cumulative, nonconvertible preferred stock ranking prior to all other classes of stock of the same issuer, which is not in arrears as to dividends, the deduction shall be 20 percent;

On all other securities, the deduction shall be 30 percent, provided, however, that such deduction

need not be made in the case of: A security which is convertible or exchangeable for other securities within a period of 30 days, subject to no conditions other than the payment of money, and the other securities into which such security is convertible, or for which it is exchangeable, are short in the accounts of such broker-dealer or partner; or, a security which has been called for redemption and which is redeemable within 90 days.

(4) Deducting 30 percent of the market value of all "long" and all "short" futures commodity contracts (other than those contracts representing spreads of straddles in the same commodity and those contracts offsetting or hedging any "spot" commodity positions) carried in the capital proprietary or other accounts of the broker-dealer, and, if such broker-dealer is a partnership, in the accounts of partners as hereinafter defined;

(5) Deducting, in the case of a broker-dealer who has open contractual commitments, the respective percentages specified in subparagraph (4) above of the value (which shall be the market value whenever there is a market) of each net long and each net short position contemplated by any existing contractual commitment in the capital, proprietary and other accounts of the broker-dealer and, if such broker-dealer is a partnership, in accounts of partners, as hereinafter defined, provided, however, that this deduction shall not apply to exempted securities, and that the deduction with respect to any individual commitment shall be reduced by the unrealized profit, in an amount not greater than the percentage deduction provided for in subparagraph (3), (or increased by the unrealized loss) in such commitment; and that in no event shall an unrealized profit on any closed transaction operate to increase net capital;

(6) Deducting an amount equal to one and one-half percent of the total long or total short futures contracts in each commodity, whichever is greater, carried for all customers;

(7) Excluding liabilities of the broker-dealer which are subordinate to the claims of general creditors pursuant to a satisfactory subordination agreement, as hereinafter defined, and

(8) Deducting, in the case of a broker-dealer who is a sole proprietor, the excess of:

Liabilities which have not been incurred in the course of business as a broker-dealer over assets not used in the business;

Deducting ten percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 40 to 49 calendar days; deducting 20 percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 50 to 59 calendar days; and deducting 30 percent of the contract price of each item in the securities "Failed to Deliver Account" which is outstanding 60 or more calendar days.

The term "account of partners" where the broker-dealer is a partnership, shall mean accounts of partners who have agreed in writing that the equity in such accounts maintained with such partnerships shall be included as partnership property.

The term "contractual commitments" shall include underwriting, when issued, when distributed and delayed delivery contracts, endorsements of puts and calls, commitments in foreign currencies, and spot (cash) commodities contracts, but shall not include uncleared regular way purchases and sales of securities and contracts in commodities futures; a series of contracts of purchase of the same security conditioned, if at all, only upon issuance may be treated as an individual commitment.

Indebtedness shall be deemed to be "adequately collateralized" within the meaning of this rule, when the difference between the amount of the indebtedness and the market value of the collateral is sufficient to make the loan acceptable as a fully secured loan to banks regularly making comparable loans to broker-dealers in the community.

The term "satisfactory subordination agreement" shall mean a written agreement duly executed by the broker-dealer and the lender, which agreement is binding and enforceable in accordance with its terms upon the lender, his creditors, heirs, executors, administrators, and assigns, and which agreement satisfies all of the following conditions: It effectively subordinates any right of the lender to demand or receive payment or return of the cash or securities loaned to the claims of all present and future creditors of the broker-dealers; the cash or securities are loaned for a term of not less than one year; it provides that the agreement shall not be subject to cancellation by either party, and that the loan shall not be repaid and the agreement shall not be terminated, rescinded, or modified by mutual consent or otherwise if the effect thereof would be to make the agreement inconsistent with the condition of this rule or to reduce the net capital of the broker-dealer below the amount required by this rule; it provides that no default in the payment of interest or in performance of any covenant or condition by the broker-dealer shall have the effect of accelerating the maturity of the indebtedness; it provides that any notes or other written instruments evidencing the indebtedness shall bear on their face an appropriate legend stating that such notes or instruments are issued subject to the provisions of a subordination agreement which shall be adequately referred to and incorporated by reference; it provides that any securities or other property loaned to the broker-dealer pursuant to its provisions may be used and dealt with by the broker-dealer as part of his capital and shall be subject to the risks of the business; two copies of such agreement, and of any noted or written instruments evidencing the indebtedness, are filed within ten days after such agreement is entered into with the commissioner of insurance, to-

gether with a statement of the full name and address of the lender, the business relationship of the lender to the broker-dealer, and whether the broker-dealer carried funds or securities for the lender at or about the time the agreement was entered into.

The term "customer" shall mean every person except the broker-dealer; provided, however, that partners who maintain "accounts of partners" as herein defined, shall not be deemed to be customers insofar as such accounts are concerned.

17.6(502) Financial impairment. The requirement for the establishment and maintenance of minimum net capital and minimum ratio between net capital and aggregate indebtedness and the requirement for the posting and maintenance of surety bonds as herein specified are continuing requirements, and should a broker-dealer, during any portion of his or its registration fail to comply therewith, said registrant should immediately notify the commissioner of insurance in writing and request withdrawal, cancellation or voluntary suspension of registration until such requirements and conditions are met. Failure to do so will be grounds for immediate suspension or termination of registration.

17.7(502) Dealer financial reporting requirements.

17.7(1) Financial statements required to be submitted with an original application for registration as a securities dealer in Iowa must be audited or, in lieu thereof, a copy of the financial questionnaire required by a recognized stock exchange of which the dealer is a member, or a copy of the financial statements prepared pursuant to securities and exchange commission requirements.

17.7(2) Application for dealer registration renewal may be submitted with unaudited financial statements of a date within 30 days of date of submission of application, provided audited statements, or in lieu thereof, a copy of the financial questionnaire required by a recognized stock exchange of which the dealer is a member, or a copy of financial statements prepared pursuant to securities and exchange commission requirements, are furnished during the period to be covered by the dealer's registration as renewed.

17.7(3) Both original and renewal applications must submit net capital computations pursuant to securities and exchange commission rule 15c3-1, indicating a minimum net capital of at least $5,000.00, unless otherwise exempted.

17.7(4) When the net capital of any broker-dealer is reduced to seven percent or less of his aggregate indebtedness or is reduced to less than 125 percent of his required minimum net capital, he shall within 15 days of the date his net capital is so reduced, file a report with the commissioner of insurance in the form herein set forth, such report to be as of a date within such 15-day period. He shall in addition file a report in such form for each monthly accounting period thereafter, within ten days after the close of such accounting period, until the commissioner has in writing notified such broker-dealer to discontinue such reports. Each broker-dealer licensed after the effective date of this subdivision shall file monthly reports as provided herein until notified in writing to discontinue such reports. Net capital, minimum net capital, aggregate indebtedness and the ratio of net capital to aggregate indebtedness shall be computed in accordance with the net capital requirements for broker-dealers as set out in this section. A licensee who is required to file reports at least monthly containing substantially the information specified herein with the securities and exchange commission, or the National Association of Securities Dealers, Inc. may file copies of such reports with the commissioner of insurance in lieu of the reports required by this subdivision, provided such reports are filed within the times specified herein. Except as otherwise provided, the reports required by this subdivision shall be upon the form approved by the commissioner of insurance.

17.8 to 17.10 Reserved for future use.

17.11(502) Segregated accounts.

17.11(1) A broker-dealer shall at all times keep its customers' securities and funds in trust and segregated from its own securities and funds.

17.11(2) When a broker-dealer is engaged in more than one enterprise or activity, it shall maintain separate books of accounts and records relating to its securities business and its other businesses and the assets relating to its securities business shall not be commingled with those of such other businesses. There also shall be a clearly defined division among such businesses with respect to income and expense.

17.12(502) Confirmations. Confirmations by broker-dealers of all purchases and sales of securities and notices of all other debits and credits for securities, cash and other items for the account of customers, officers, agents, partners and employees shall be given or sent to such persons at or before completion of each transaction, disclosing at least the following:

17.12(1) The account for which entered.

17.12(2) Terms and conditions, whether executed or unexecuted.

17.12(3) Date of execution of transaction. (Time of trade shall be furnished upon request.)

17.12(4) Whether such broker-dealer is acting for its own account, as agent for both such customer and some other person.

17.12(5) If a broker-dealer is acting as agent for the customer, the following additional information or a statement that same will be furnished upon request:

a. The name of the person from whom the security was purchased, or to whom it was sold, and date and time the transaction occurred.

b. Source and amount of commission or remuneration received or to be received in connection with such transaction.

17.12(6) Name or identification number of agent handling transaction.

17.13(502) Records required of broker-dealers. Every broker-dealer shall make and keep current the following books and records relating to his business (provided, however, that compliance with the requirements of the S.E.C. with respect to maintenance of books and records shall be deemed to be in compliance with this section):

17.13(1) Blotters (or other records of original entry) containing an itemized daily record of all purchases and sales of securities, all receipts and deliveries of securities (including certificate numbers), all receipts and disbursements of cash, and all other debits and credits. Such records shall show the account for which each such transaction was effected, the name and amount of securities, the unit and aggregate purchase or sale price (if any), the trade date, and the name or other designation of the person from whom purchased or received or to whom sold or delivered.

17.13(2) Ledgers (or other records) reflecting all assets and liabilities, income, and expense and capital accounts.

17.13(3) Ledger accounts itemized separately as to each cash and margin account of each customer and of such broker-dealer, partners, agents and employees thereof, all purchases, sales, receipts and deliveries of securities and commodities for such account and all other debits and credits to such account.

17.13(4) Ledgers (or other records) reflecting the following:

a. Securities in transfer;

b. Dividends and interest received;

c. Securities borrowed and securities loaned;

d. Moneys borrowed and moneys loaned (together with a record of the collateral therefor and substitutions in such collateral);

e. Securities failed to receive and failed to deliver.

17.13(5) A securities record or ledger reflecting separately for each security as of the clearance dates all "long" or "short" positions (including securities in safekeeping) carried by such broker-dealer for his account or for the account of his customers or partners and showing the location of all securities long, and the offsetting position to all securities short, and in all cases the name or designation of the account in which each position is carried.

17.13(6) A memorandum of each brokerage order, and of any other instruction, given or received for the purchase or sale of securities, whether executed or unexecuted. Such memorandum shall show the terms and conditions of the order or instructions and of any modification or cancellation thereof, the account for which entered, the time of entry, the price at which executed and, to the extent feasible, the time of execution or cancellation. Others entered pursuant to the exercise of discretionary power by such broker-dealer, or any employee thereof, shall be so designated. The term "instruction" shall be deemed to include instructions between partners and employees of a broker-dealer. The term "time of entry" shall be deemed to mean the time when such broker-dealer transmits the order or instruction for execution, if it is not so transmitted, the time when it is received.

17.13(7) A memorandum of each purchase and sale of securities for the account of such broker-dealer showing the price and, to the extent feasible, the time of execution.

17.13(8) Copies of confirmations of all purchases and sales of securities and copies of notices of all other debits and credits for securities, cash and other items for the account of customers and partners of such broker-dealer.

17.13(9) A record in respect of each cash and margin account with such broker-dealer containing the name and address of the beneficial owner of such account and, in the case of a margin account, the signature of such owner; provided that, in the case of a joint account or an account of a corporation, such records are required only in respect of the person or persons authorized to transact business for such account.

17.13(10) A record of all puts, calls, spreads, straddles and other options in which such broker-dealer has any direct or indirect interest of which such broker-dealer has granted or guaranteed, containing at least an identification of the security and the number of units involved. Such records shall not be required with respect to any cash transaction of $100.00 or less involving only subscription rights or warrants which by their terms expire within 90 days after the issuance thereof.

17.13(11) This rule shall not be deemed to require a member of a recognized national securities exchange to make or keep such records of transactions cleared for such member by another member as are customarily made and kept by the clearing member.

17.14(502) Records to be preserved by broker-dealers.

17.14(1) Every broker-dealer shall preserve for a period of not less than six years, the first two years in an easily accessible place, all records required to be made pursuant to these rules.

17.14(2) Every broker-dealer shall preserve for a period of not less than three years and, for the first two years, in an easily accessible place, the following:

a. All check books, bank statements, canceled checks and cash reconciliations.

b. All bills receivable or payable (or copies thereof) paid or unpaid relating to the business of such broker-dealer as such.

c. Originals of all communications received and copies of all communications sent by such broker-dealer (including interoffice memoranda and communications) relating to his business as such.

d. All trial balances, financial statements, branch office reconciliations and internal audit working papers, relating to the business of such broker-dealer as such.

e. All guarantees of accounts and all powers of attorney and other evidence of the granting of any discretionary authority given in respect of any account, and copies of resolutions empowering an agent to act on behalf of a corporation.

f. All written agreements (or copies thereof) entered into by such broker-dealer relating to his business as such, including agreements with respect to any account.

17.14(3) Each such broker-dealer shall preserve for a period of not less than six years after the closing of any customer's account, any account cards or records which relate to the terms and conditions with respect to the opening and maintenance of such account.

17.14(4) Every such broker-dealer shall preserve during the life of the enterprise and of any successor enterprise all partnership articles or, in the case of a corporation, all articles of incorporation or charter, minute books and stock certificate books.

17.14(5) After a record or other document has been preserved for two years, a photograph thereof on film may be substituted therefor for the balance of the required time.

17.14(6) Compliance with the requirements of the securities and exchange commission with respect to preservation of records shall be deemed to be in compliance with this section.

17.15(502) Denial, suspension and revocation. Grounds for denial, suspension or revocation of registration shall in the public interest include, but not be limited to, the following, in addition to such other dishonest or unethical practices within the meaning of section 502.14.

17.15(1) Unreasonable delay or failure to execute orders, liquidate customer's accounts or in making delivery of securities purchased or remittances (or credit) of securities sold.

17.15(2) Selling securities at unfair prices in relation to market value, or with unreasonable or excessive markups or commissions.

17.15(3) Effecting transactions in the account of a customer without his knowledge or consent, or maintaining discretionary accounts without written authorization.

17.15(4) Willful switches, churning, overtrading or reloading of securities in a customer's account for the purpose of accumulating or compounding commissions.

17.15(5) Inducing a customer to invest beyond his known immediate financial resources or without regard to the nature and character of such account.

17.16 to 17.18 Reserved for future use.

17.19(502) Appointment and licensing of securities agents—general provisions.

17.19(1) Agents of a broker-dealer or issuer-dealer may be registered or reregistered as such under the Act, if the commissioner of insurance finds that the applicant is qualified, has sufficient training, knowledge and experience in the securities business, is of good repute, and has otherwise fully satisfied the requirements of the Act and the rules hereunder.

17.19(2) A director of a broker-dealer or any person occupying a similar status, or performing similar functions, who represents a broker-dealer or issuer-dealer in effecting or attempting to effect purchases or sales of securities in Iowa, must be registered as an agent of said broker-dealer or issuer-dealer.

17.19(3) An agent, including directors, may not be registered as agents for more than one broker-dealer or issuer-dealer at any one time.

17.19(4) The license period for each such agent shall be for a period of one year from date of issuance, renewable annually.

17.19(5) The annual licensing fee for each agent shall be five dollars and it shall be payable at the time said application for licensing or renewal of said license is made.

17.20(502) Applications. An application for an original or renewal agent's license shall be filed by the employer broker-dealer or issuer-dealer on the appropriate appointment and acceptance of agent form prescribed by the commissioner of insurance.

17.20(1) Appointment of agent's applications shall be accompanied by a five dollar licensing fee, and the scheduled exhibits specified in the appropriate form.

17.20(2) Additional exhibits or information not specifically required, but essential to a full presentation of all material facts relating to the applicant's qualifications should be furnished and properly identified.

17.20(3) The Iowa securities law does not require the posting of a surety bond on behalf of an agent.

17.21(502) Examination requirements. A first-time applicant for registration as a securities agent will be required to pass a written examination to determine the skill, competency and knowledge of such applicant with respect to general securities matters, the Iowa securities law and regulations.

17.21(1) The date, time and place for taking such examination shall be determined and announced by the commissioner of insurance, and notices thereof shall be published or circulated and available to the applicants at the time of filing.

17.21(2) All registration applications involving individuals subject to examination must be filed with the insurance department at least five days prior to the date of examination.

17.21(3) Notwithstanding the five dollars applicant's licensing fee, each applicant must furnish with their application a company draft in the amount of five dollars to pay for the examination fee.

17.21(4) Examinations shall be composed of two parts: Part I shall cover the general securities subject matter; Part II shall cover the Iowa securities law and regulations. The passing score on each of the examinations shall be 70 percent for agents.

17.21(5) Exemptions—the following classes of persons shall be exempt from Part I of the examination:

a. Applicants who have passed the New York Stock Exchange or National Association of Securities Dealers "Registered Representative" examination given on or after July 1, 1963.

b. Applicants who have passed an examination essentially identical in subject matter in another state, provided that the passing score attained on such examination was at least as high as required by this department.

17.22(502) Registration of issuer-dealers—general provisions.

17.22(1) An issuer may be registered to sell its own securities, if said securities have been approved for sale in Iowa by the commissioner of insurance, if the commissioner of insurance finds that the applicant is qualified, has personnel with sufficient training, knowledge and experience in the securities business, is of good repute, and has otherwise fully satisfied the requirements of the Act and the rules hereunder.

17.22(2) The qualification of each issuer-dealer shall run concurrently with the registration of said issuer-dealer's securities in the state of Iowa.

17.23(502) Applications.

17.23(1) Issuer-dealer applications shall be accompanied by the filing fee, consent to service of process and the scheduled exhibits specified in the appropriate form.

17.23(2) An issuer-dealer, dealing only in its own approved securities, is not required to post a surety bond.

17.23(3) An issuer-dealer is not required to file a registration fee as such. However, the minimum fee for registration of said issuer-dealer's securities for sale in the state of Iowa shall be $50.

17.24(502) Examination requirements. A first-time applicant for registration as an issuer-dealer will be required to pass a written examination to determine the skill, competency, and knowledge of such applicant with respect to general securities matters, the Iowa securities law and regulations.

17.24(1) In the case of issuer-dealer applications the following classes of persons shall be subject to examination:

a. The principal of a sole proprietorship.

b. General partners of a partnership.

c. The executive officers of a corporation, provided that if it can be shown to the satisfaction of the commissioner of insurance that certain corporate officers will not be active in the selling of applicant's securities in Iowa, such officers shall not be required to take the examination.

17.24(2) The date, time and place for taking such examination shall be determined and announced by the commissioner of insurance, and notice thereof shall be published or circulated and available to applicants at the time of filing.

17.24(3) All registration applications involving individuals subject to examination must be filed with the insurance department at least five days prior to the date of examination.

17.24(4) Applicants must furnish with their application a company draft in the amount of five dollars to pay for the examination fee.

17.24(5) Examinations shall be composed of two parts: Part I shall cover the general securities subject matter; Part II shall cover the Iowa securities law and regulations. The passing score on each part of the examination shall be 70 percent for issuer-dealers.

17.24(6) Exemptions—the following classes of persons shall be exempt from Part I of the examination:

a. Applicants who have passed the New York Stock Exchange or National Association of Securities Dealers "Principal's" examination given on or after July 1, 1963.

b. Applicants who have passed an examination essentially identical in subject matter in another state, provided that the passing score attained on such examination was at least as high as required by this department.

17.25(502) Responsibility of agents. The ultimate responsibility for quality and conduct of agents must be with the issuer-dealer that employs said agent. Said employer issuer-dealer

must bear the ultimate responsibility for supervision and control of said agent employee.

17.26 and 17.27 Reserved for future use.

17.28(502) Rules relating to the registration of securities. The commissioner of insurance will look with disfavor upon an application for registration of securities as not being in the public interest and tending to work a fraud upon purchasers that is incomplete and misleading in any material aspect or that results in unreasonable amount of underwriters' and sellers' discounts, commissions, or other compensation, or promotors' profits or participation or unreasonable amounts or kinds of options. Failure to comply with the following requirements may be considered grounds for an order denying effectiveness to, or suspending or revoking effectiveness of any registration, in the absence of good cause shown for an exception.

17.29(502) Maximum commissions and expenses.

17.29(1) In connection with the sale and promotion of a public offering, the aggregate underwriting and selling discounts or commissions and finder's fees (including cash, securities, options, warrants, contracts and anything else of value to accrue to the underwriters, dealers and finders in connection with the offering) shall not exceed ten percent of the aggregate amount of the public offering actually sold.

17.29(2) The selling expenses incurred in connection with the offering (including but not limited to the legal, engineering, printing and accounting charges) shall not exceed five percent of the aggregate amount of the public offering actually sold. All expenses not strictly accounted for will be considered underwriting commission, and will be included when determining the ten percent limitation on the underwriting commission.

17.30(502) Offering price.

17.30(1) On applications for the registration of securities by qualification or notification, the offering price of the issue sought to be registered shall bear a reasonable relationship to the established public market price, if there is an established price. Information shall be submitted justifying the adequacy of such public market, including the number of shares owned by public shareholders, the number of shares traded each of the six or more preceding months, the number of transactions during each of such months, the number of shareholders at the beginning and end of such period, the names and locations of dealers regularly making a market in the shares, and the newspapers and financial publications where the shares are regularly quoted. If there has been a significant change in the price-earnings multiple of the issuer over such period, information shall be submitted accounting for such change.

17.30(2) The offering price of securities when no public market price has been established should bear a reasonable relationship to one or more of the following:

a. Normally the maximum offering price should not exceed 35 times the net earnings per share of the issuer prior to the proposed offering date, or such other multiple earnings as the commissioner of insurance may prescribe from time to time. The price earnings ratio may be somewhat higher when the increased future earnings are clearly established.

b. Information may be submitted comparing the proposed offering price in relation to the current market prices of the companies closely similar and comparable to the issuer in terms of size, industry, products and other relevant factors. When appropriate, the market prices of comparable companies must be justified according to paragraph "*a*" above.

17.30(3) Submission of an underwriter's memorandum on the issuer prepared in connection with the proposed offering, containing the foregoing information may justify the foregoing requirements.

17.31(502) Options and warrants. Options or warrants to purchase securities issued or sold to persons other than all of the purchasers of the securities must be justified by the applicant. The following policies shall be applicable in determining whether such options or warrants are justified:

17.31(1) Options to employees in the nature of restricted or qualified stock options for incentive purposes shall be considered justified if reasonable in number and method of exercise.

17.31(2) Options or warrants to underwriters shall be considered justified if all of the following conditions are met:

a. The options or warrants are issued to managing underwriters under a firm underwriting agreement, provided they are not transferable except in cases where the managing underwriter is a partnership and then only within the partnership.

b. The number of shares covered by all options or warrants does not exceed ten percent of the shares to be outstanding upon completion of the offering.

c. The options or warrants do not exceed five years in duration and are exercisable no sooner than one year after issuance.

d. The initial exercise price of the options or warrants is at least equal to the public offering price plus a step-up of said public offering price of either seven percent each year they are outstanding, so that the exercise price throughout the second year is 107 percent, throughout the third year 114 percent, throughout the fourth year 121 percent, throughout the fifth year 128 percent; or in the alternative, 20 percent at any time after one year from the date of issuance; provided that an

election as to either alternative must be made by the underwriters at the time that the options or warrants are issued.

e. The options or warrants are issued by a relatively small company, which is in the promotional stage, or which, because of its size, lacks public ownership of its shares, or other facts and circumstances make it appear that the issuance of options is necessary to obtain competent investment banking services; provided that the direct commissions to the underwriters are lower than the usual and customary commissions in the absence of such options or warrants.

f. The prospectus used in connection with the offering fully discloses the terms and the reason for the issuance of such options or warrants; provided that if such reason relates to future advisory services to be performed by the underwriter without compensation in consideration for the issuance of such options or warrants, a statement to that effect is placed in the prospectus.

g. Where is it necessary to include the value of the options or warrants in the computation of underwriting commissions, the market value of such options or warrants, if any, shall be used. In cases where no market value exists, a presumed fair value of 20 percent of the public offering price of the shares to which the options or warrants pertain shall be used, unless evidence indicates that a contrary valuation exists.

h. The same conditions shall be applied to options or warrants by selling shareholders, unless evidence indicates that the selling shareholders are so separated from the issuer and so lacking in control of the issuer as to require different treatment.

17.31(3) Options or warrants issued to financing institutions other than the underwriters in connection with financing arrangements made by the issuer shall be considered justified if all of the following conditions are met:

a. The options or warrants are issued contemporaneously with the issuance of the evidence of the indebtedness of the loan.

b. The options or warrants expire not later than the final maturity date of the loan.

c. The options or warrants are issued as a result of bona fide negotiations between the issuer and parties not affiliated with the issuer.

d. The exercise price of such options or warrants is not less than the fair market value of the shares into which they are exercisable on the date the loan is approved.

e. The number of shares issuable upon exercise of the options or warrants multiplied by the exercise price thereof does not exceed the face amount of the loan.

17.31(4) The total amount of options and warrants issued or reserved for issuance at the date of the public offering shall be reasonable. The amount of options and warrants shall be presumed reasonable if the number of shares represented by such options and warrants, excluding options to financing institutions and options in connection with acquisitions, does not exceed a number equal to ten percent of the number of shares to be outstanding upon completion of the offering or ten percent of the number of shares outstanding during the period the registration is in effect. The number of options and warrants reserved for issuance may be disregarded if the issuer files an undertaking or states in the prospectus that the amount of outstanding options and warrants shall not exceed the above limitation during the period the registration is in effect.

17.31(5) All options and warrants other than those issued to financing institutions shall be issued at not less than fair market value on the date of issuance.

17.31(6) This policy shall apply to applications for registration of equity securities or securities convertible into equity securities.

17.32(502) Cheap stock. The proposed offering of securities in which cheap stock has been or will be issued must be justified by the applicant.

17.32(1) Any securities sold or issued within two years prior to the public offering date to persons who at the time of sale or issuance were underwriters, promoters, finders, officers, directors, employees, or controlling stockholders of the issuer, for a consideration lower than the proposed net public offering price of such securities, including options and warrants exercised, in the absence of any public market for such securities or any substantial change in the earnings or financial position of the issuer, shall be presumed to be "cheap stock". If the shares were or are to be acquired by an underwriter, the difference between the consideration for the shares and the proposed public offering price, when added to the other expenses of the sale, shall not exceed the legal maximum.

17.32(2) Cheap stock shall not be considered justified unless both the following conditions are met:

a. The shares are sold or issued by an issuer which is in the promotional or developmental stage.

b. The number of shares sold or issued shall be reasonable in amount and the consideration shall have a reasonable relationship to the proposed public offering price.

17.32(3) The commissioner may require all cheap stock to be deposited in escrow under such terms and conditions as the commissioner shall prescribe.

17.32(4) The same policy shall be applied to cheap stock acquired from shareholders unless such shareholders are so lacking in control of the issuer as to require different treatment.

17.32(5) This policy shall apply to applications for registration of equity securities or se-

curities convertible into equity securities. In the latter case, and in the absence of a public market for the equity securities, the conversion price shall be deemed to be the public offering price.

17.33(502) Promoters' investment.

17.33(1) The offering or proposed offering of an issuer which is in the promotional or developmental stage shall be considered unfair and inequitable to public investors unless the fair value of the equity investment of the officers, directors and promoters of such issuer, determined as of the offering date, equals at least ten percent of the total equity investment resulting from the sale of all of the securities which are the subject of the offering or proposed offering.

17.33(2) For purposes of this policy:

a. An issuer which is in the "promotional or developmental stage" shall mean an issuer which has no significant record of operations or earnings prior to the proposed offering date or the offering of whose securities cannot be justified on the basis of such record.

b. The "fair value of the equity investment" of the officers, directors and promoters shall mean the total of all sums contributed to the issuer in cash together with the reasonable value of all tangible assets contributed to the issuer, as determined by independent appraisal, and as adjusted by the earned surplus or deficit of the issuer subsequent to the dates of contribution.

c. The term "total equity investment" shall mean the total of: (1) The par or stated value of all securities outstanding or offered or proposed to be offered, and (2) the amount of surplus of any kind, regardless of description and whether or not restricted.

17.34(502) Nonvoting stock. Unless preferential treatment as to dividends and liquidation is provided with respect to the publicly offered securities or the differentiation is otherwise justified, the offering or proposed offering of equity securities of an issuer having more than one class of equity securities authorized or outstanding shall be considered unfair and inequitable to public investors if the class of equity securities offered to the public has no voting rights, or has less than equal voting rights, in proportion to the number of shares of each class outstanding, on all matters, including the election of members to the board of directors of the issuer.

17.35(502) Preferred stock and debentures.

17.35(1) The offering or proposed offering of preferred stock of an issuer shall be considered unfair and inequitable to public investors if the net earnings of the issuer for: (1) Its last year prior to the public offering or (2) the average of its last three years prior to the public offering, exclusive of nonrecurring items, or the substantiated future earnings capability of the issuer, is insufficient to cover the dividends on the securities proposed to be offered to the public.

17.35(2) The offering or proposed offering of debt securities, including debentures, notes and bonds of an issuer, shall be considered unfair and inequitable to public investors if the cash flow of the issuer for its last year prior to the public offering, or the average of its last three years prior to the public offering, exclusive of nonrecurring items and adjusted for the issuance of the debt securities, or the substantiated future cash flow capability of the issuer, is insufficient to cover the interest on the securities proposed to be offered to the public.

17.35(3) If the issuer has made any material acquisitions subsequent to the latest year for which actual figures are stated in the prospectus, the computation of earnings or cash flow for the purpose of this policy shall be made on a pro forma basis to include such acquisitions.

17.35(4) The issuance of preferred stock or debentures by an issuer in the promotional or developmental stage will not be permitted unless justified by the applicant.

17.35(5) This policy shall not apply to the issuance of debt securities by a nonprofit issuer, nor to the issuance of industrial development revenue bonds, nor to the issuance of securities pursuant to a voluntary or involuntary corporate reorganization, nor to the issuance of securities by an issuer whose financial structure or the issuance of whose securities is regulated effectively by a federal or state governmental authority.

17.36(502) Real estate investment trusts. The offering or sale of securities of real estate investment trusts, as defined in sections 856, 857 and 858 of the Internal Revenue Code of 1954, may be deemed unfair and inequitable to public investors unless their declarations of trust or other organizational instruments contain provisions which satisfy the following minimum conditions:

17.36(1) A majority of the trustees shall not be affiliated with the adviser of the trust or any organization affiliated with the adviser of the trust, and shall be elected by the shareholders of the trust annually.

17.36(2) No trustee, officer or adviser of a trust, or any person affiliated with any such persons, shall sell any property or assets to the trust or purchase any property or assets from the trust, directly or indirectly, nor shall any such person receive any commission or other remuneration, directly or indirectly, in connection with the purchase or sale of trust assets, except pursuant to transactions that are fair and reasonable to the shareholders of the trust and that relate to:

a. The acquisition of property or assets at the formation of the trust or shortly thereafter and is fully disclosed in the proposed prospectus;

b. The acquisition by the trust of federally insured or guaranteed mortgages at prices not exceeding the currently quoted prices at which the federal national mortgage association is purchasing comparable mortgages;

c. The acquisition of other mortgages on terms not less favorable to the trust than similar transactions involving unaffiliated parties; or,

d. The acquisition by the trust of other property at prices not exceeding the fair value thereof as determined by independent appraisal.

All such transactions and all other transactions in which any such persons have any direct or indirect interest shall be approved by a majority of the trustees, including a majority of the independent trustees. All commissions or remuneration received by any such person in connection with any such transactions shall be deducted from the advisory fee.

17.36(3) The aggregate annual expenses of every character paid or incurred by the trust, excluding interest, taxes, expenses in connection with the issuance of securities, stockholder relations and acquisition, operation, maintenance protection and disposition of trust properties, but including management and advisory fees and mortgage servicing fees, shall not exceed:

a. One and one-half percent of the average net assets of the trust, net assets being defined as total invested assets at cost less total liabilities excluding depreciation reserves, calculated at least quarterly on a basis consistently applied, or

b. Twenty-five percent of the net income of the trust, excluding realized capital gains before deducting advisory and servicing fees and expenses, whichever is greater, calculated at least quarterly on a basis consistently applied, but in no event shall aggregate annual expenses exceed one and one-half percent of the total invested assets of the trust.

The adviser shall reimburse the trust at least quarterly for the amount by which aggregate annual expenses paid or incurred by the trust exceed the amounts herein provided.

17.36(4) The aggregate borrowings of the trust, secured and unsecured, shall not be unreasonable in relation to the net assets of the trust, as defined in 17.36(3) hereof, and the maximum amount of such borrowing shall be stated in the prospectus and declaration of trust.

17.36(5) The net assets of the trust, as defined in 17.36(3) hereof, prior to the initial public offering shall be $200,000.00 or ten percent of the net assets of the trust, whichever is less.

17.36(6) A trust shall not:

a. Invest more than ten percent of its total assets in unimproved real property or mortgages on unimproved real property, excluding property being developed or property which will be developed within a reasonable period.

b. Invest more than ten percent of its total assets in junior mortgages, excluding wrap-around type junior mortgages.

c. Engage in any material trading activities with respect to its properties.

d. Issue redeemable equity securities or equity securities of more than one class.

e. Issue debt securities to the public unless the historical cash flow of the trust or the substantiated future cash flow of the trust, excluding nonrecurring items, is sufficient to cover the interest on the debt securities.

f. Issue options or warrants to purchase its securities to the adviser to the trust or any person affiliated with the adviser, or at exercise prices less than the fair market value of such securities.

g. Any advisory or management contract entered into by the trustees prior to the public offering shall be for a period not longer than three years, and any such contract entered into thereafter shall be for a period not longer than one year. Any such advisory or management contract shall provide that it may be terminated at any time without penalty, by the trustees or a majority of the holders of outstanding shares of beneficial interest, upon not more than 60 days' written notice to the adviser or manager.

h. The trust shall prepare an annual report concerning its operations for each fiscal year ending after the public offering of its securities, including financial statements prepared in accordance with generally accepted accounting principles applied on a consistent basis and certified by certified public accountants. The annual report shall be delivered to each public shareholder and debenture holder within 120 days after the end of such fiscal year. There shall be an annual meeting of the holders of outstanding shares of beneficial interest of the trust upon reasonable notice following delivery of the annual report.

17.37 to 17.45 Reserved for future use.

17.46(502) Expense ratios of investment company shares. No investment fund shares shall be registered and no registration of investment fund shares shall be renewed if the application for registration or renewal of registration or any financial statements or documents filed with the commissioner of insurance in accordance with any agreement or commitment contained in an application for registration or renewal of registration indicate that:

17.46(1) The ratio of total operating and management expenses, exclusive of taxes and interest, for any period, of the issuer of such investment fund shares is, or is in excess of, 25 percent of the total investment income of such issuer.

17.46(2) The ratio of the total operating and management expenses (exclusive of taxes, interest, brokerage commissions and extraordinary charges such as litigation costs, but inclusive of an incentive-performance fee of the issuer of such investment fund shares) is in excess of one and

one-half percent of the average net assets per annum. When a fund adopts a flexible advisory fee as an incentive, the penalty for poor performance shall be as great as the reward for superior performance as measured against the selected index.

17.47(502) Commissions to officers and directors. No commission or sales fee will be allowed either directly or indirectly to officers, directors or promoters of an issuer, when such issuer is a dealer in its own securities unless such officers, directors or promoters receive no other salary or remuneration from such issuer and do not sell securities in more than one issue at the same time.

17.48(502) Manual exemptions. Each of the following publications is approved by the commissioner as a recognized manual of securities within the meaning of that term as used in section 502.5(12):

17.48(1) Standard & Poor's Standard Corporation Descriptions.

17.48(2) Moody's Industrial Manual.

17.48(3) Moody's Band and Finance Manual.

17.48(4) Moody's Municipal and Government Manual.

17.48(5) Moody's Public Utility Manual.

17.48(6) Moody's OTC Industrial Manual, only if audited financials of the issuer have been furnished to the publisher.

Proof of actual publication must be presented to the commissioner of insurance in order to prove compliance with section 502.5(12).

17.49(502) Approved stock exchanges. Each of the following national stock exchanges is approved by the commissioner as recognized and responsible exchanges:

17.49(1) American stock exchange.

17.49(2) Midwest stock exchange.

17.49(3) New York stock exchange.

17.49(4) Pacific Coast stock exchange.

17.50(502) Abandonment and withdrawal. The commissioner may, by notice to the applicant, order an applicant to register securities to be abandoned upon the failure of the applicant within a reasonable time to respond to any request for additional information upon the application; or the applicant may, with the consent of the commissioner, withdraw his application without prejudice. There can be no refund of the examination (filing) fee paid upon abandonment or withdrawal of the application to register securities.

17.51(502) Request for written interpretive opinion. Each request for a written interpretive opinion of the commissioner shall be made in writing and shall fully set forth the questions presented and the particular facts and circumstances upon which the opinion is requested.

17.52(502) Appearance and practice before the department. In any proceeding before the commissioner any person may be represented by an attorney at law admitted to practice before the highest court of any state or territory of the United States, or the court of appeals or the district court of the United States, District of Columbia. Any individual may, however, appear before the department in his own behalf, a member of a partnership may represent the partnership, and an authorized officer of a corporation, trust or association may represent such corporation, trust or association.

17.53(502) Filing and use of the prospectus.

17.53(1) *Delivery of prospectus.* Except for negotiations with and among underwriters and members of a selling group; and except for secondary trading of registered securities; but not including securities determined to be exempt under section 502.5:

a. No written offer of securities of an issuer required to be registered with the commissioner shall be made unless a prospectus or offering circular approved by the commissioner is concurrently given or has previously been given to the person to whom the offer is made, or has been sent to such person, under such circumstances that it would normally have been received by him at or prior to the time of such written offer; and

b. No securities of such issuer shall be sold unless such a prospectus is given to the person to whom the securities were sold, or is sent to such person under such circumstances that it would normally be received by him, with or prior to any confirmation of the sale, or prior to the payment by him of all or any part of the purchase price of the securities, whichever first occurs.

c. Nothing herein shall prevent the distribution of preliminary or final prospectuses pertaining to securities registered or being registered with the securities and exchange commission if such distribution takes place in accordance with the rules and regulations of the securities and exchange commission.

17.53(2) *Revised prospectus.* If the offering is not completed within six months from the date of order of registration, a revised prospectus shall, in the case of securities to be sold solely to the residents of Iowa and not registered with the securities and exchange commission or the subject of a notification under regulation A of the securities and exchange commission, be prepared, filed and used in accordance with these rules as for an original prospectus. Prospectuses relating to securities registered with or by subject of notification to the securities and exchange commission shall be revised in accordance with the applicable provisions of the federal laws relating thereto and the

regulations of the securities and exchange commission thereunder. A prospectus shall not contain any untrue statement of material fact or omit to state any material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading.

17.53(3) *Amendments to prospectus.* The prospectus shall constitute a part of the application and shall be amended in accordance with the provisions of these rules dealing with amendments to applications.

17.54(502) Reports subsequent to registration.

17.54(1) *Annual report.* An applicant for the registration of any securities registered with the department shall file an annual report on the proper form to be provided by the insurance department, in compliance with section 502.7 within 30 days subsequent to the anniversary date of the registration until the registration is terminated.

17.54(2) A termination of a registration of securities may be accomplished by filing a "Request for Waiver of Annual Reports" on the appropriate form to be furnished by the insurance department. No "Request for Waiver of Annual Reports" will be granted unless said request is attached to an accurate "Annual Report of Sales", as described in 17.54(1) above.

[Filed August 1, 1963;
amended May 18, 1971]

IOWA DEVELOPMENT COMMISSION

The Iowa development commission has the responsibility of administering the law governing the use of the state Trade-Mark or label bearing the words "Made-In-Iowa" or "Product of Iowa".

The commission has issued the following instructions to manufacturers who wish to use this label:

(1) Each manufacturer desiring to use the Iowa Trade-Mark shall file with the Iowa development commission the statement saying how the label or trade-mark is to be used and on what products.

(2) Information must be filed to indicate that the trade-mark will be used on bona fide Iowa-made products.

(3) Upon satisfactory showing, to meet the foregoing requirements, the commission will furnish black and white, or color copy from which the manufacturer can reproduce the Iowa Trade-Mark.

[Filed before July 1, 1952]

LABOR, BUREAU OF

BOILER INSPECTION DIVISION

CHAPTER 1
SAFETY RULES FOR BOILERS

1.1(89) Definitions.

1.1(1) State of Iowa construction code is used to designate the accepted reference for construction, installation, operation and inspection of boilers and unfired pressure vessels and should hereafter be referred to as the Iowa boiler code.

1.1(2) The A.S.M.E. boiler code and amendments and interpretations thereto are hereby adopted and shall hereafter be known as the "Iowa Construction Code" (Iowa code). A copy of this code is on file in the office of the commissioner of labor and in the state law library in the statehouse.

1.1(3) *"Power boiler"* as used herein shall mean any vessel used for generating steam or vapor for power or heating purposes at a pressure in excess of 15 pounds per square inch.

"Unfired pressure vessel" as used herein shall mean any tank, jacketed vessel or other unfired pressure vessel used for transmitting steam for power or for using or storing steam under pressure for heating or steaming purposes at a pressure in excess of 15 pounds pressure except those vessels definitely excluded by paragraph U-1 of the Iowa code.

1.1(4) *"Chief inspector"* as used herein shall mean the state boiler inspector appointed by the commissioner of labor under the provisions of section 89.1.

1.1(5) *"Deputy inspector"* as used herein shall mean any deputy inspector of boilers appointed by the commissioner of labor under the provisions of section 89.1.

1.1(6) *"Special inspector"* as used herein shall mean an inspector employed by an insurance company, which is authorized to insure boilers in the state of Iowa, and who shall have been commissioned by the commissioner of labor. Such inspectors shall be commissioned by the commissioner of labor provided they hold a commission from a state having a boiler law the equivalent of that of the state of Iowa or a commission from the National Board of Boiler and Pressure Vessel Inspectors.

1.1(7) *"Inspector"* as used herein shall mean the chief inspector, a deputy inspector or a special inspector.

1.1(8) *"Department"* as used herein shall mean the bureau of labor of the state of Iowa.

1.1(9) *"Commissioner"* as used herein shall mean the commissioner of labor.

1.1(10) The term *"secondhand boiler"* or *"secondhand pressure vessel"* is a boiler or pressure vessel of which both the location and ownership have been changed.

1.1(11) *"Owner or user"* as used herein shall mean any person, firm or corporation owning or operating or in charge of or in control of any boiler or unfired pressure vessel within this state.

1.1(12) *"Existing installation"* as used herein shall be taken to mean and to apply to any boiler or unfired pressure vessel which was installed or within this state ready to be installed or has previously operated in this state prior to the effective date of these rules.

1.2(89) New installations—power boilers.

1.2(1) No power boiler shall hereafter be brought into this state and installed unless it has been constructed and inspected in accordance with the requirements of the Iowa code for boilers and is so stamped or is inspected and stamped in accordance with the requirements of the National Board of Boiler and Pressure Vessel Inspectors. A boiler having a standard stamping of a state that has adopted a standard of construction equivalent to the standard of the state of Iowa may be accepted by the department provided, however, that the person desiring to install same shall make application for the installation of same and shall file with the application a manufacturer's data report covering the construction of the boiler in question.

1.2(2) Upon completion of installation, all such boilers shall be inspected by the chief inspector, a deputy inspector or a special inspector commissioned to inspect boilers in this state and at least once each year thereafter shall be subjected to a regular internal and external inspection.

Also at time of first inspection after installation all said boilers must be stamped with a serial number of the state of Iowa followed by the letters Ia., said letters and figures to be not less than 5/16 inch in height.

1.3(89) Existing installations—power boilers.

1.3(1) The maximum allowable working pressure on the shell of a power boiler or drum shall be determined by the strength of the weakest section of the structure, computed from the thickness of the plate, the tensile strength of the plate, the efficiency of the longitudinal joint or tube ligaments, the inside diameter of the course and the factor of safety allowed by these rules

$\frac{TS \times t \times E}{R \times FS}$ = maximum allowable working pressure in pounds per square inch.

Where:

TS = ultimate tensile strength of shell plates, lbs. per square inch.

t = minimum thickness of shell plate, in weakest course in inches.

E = efficiency of longitudinal joint.

For riveted construction, determined by rules given in paragraph P-181, of Iowa code.

For fusion-welded construction, determined by rules in paragraph P-102, of Iowa code or rule 2.

For tube ligaments, determined by rules in paragraphs P-192 and P-193, of Iowa code.

For seamless construction, shall be considered 100 percent.

1.3(2) *Factors of safety.*

a. The lowest factor of safety permissible on existing installations shall be four, excepting for horizontal tubular boilers having continuous lap seams more than 12 feet in length where the factor of safety shall be eight, and when this type of boiler is removed from its existing setting, it shall not be reinstalled for pressure in excess of 15 pounds.

b. Boilers which are reinstalled shall have a minimum factor of safety of six when the longitudinal seams are of lap riveted construction, and a minimum factor of safety of five when the longitudinal seams are of butt and double strap construction.

c. A boiler constructed with fusion-welded seams which are not X-rayed and stress relieved during construction shall have at least three one-inch diameter plugs trepanned from each seam and these plugs etched to determine the soundness of the weld. If this test discloses the weld to be sound through 80 percent of the thickness of the plate the boiler may be operated at a pressure based upon the formula in rule 1, using an efficiency of longitudinal joint of 80 percent and a factor of safety of not less than seven. If the weld is not sound through 80 percent of the thickness of plate the boiler shall not be operated at a pressure in excess of 15 pounds.

A boiler with fusion-welded seams that have been X-rayed and stress relieved may be operated at a pressure based upon the formula in rule 1, using an efficiency of longitudinal joint 80 percent and a factor of safety of five.

d. The above factors of safety shall be increased by the inspector if the condition and safety of the boilers demand it.

e. In no case shall the maximum working pressure of an old boiler be increased to a greater pressure than would be allowed for a new boiler of same construction.

1.3(3) *Cast iron headers and mud drums.*

a. The maximum allowable working pressure on a water tube boiler, the tubes of which are secured to cast iron or malleable iron headers, or which have cast iron mud drums shall not exceed 160 pounds per square inch.

b. The maximum steam pressure on any boiler in which steam is generated, if constructed of cast iron, shall be 15 pounds per square inch.

1.3(4) *Tensile strength.* When the tensile strength of steel or wrought iron shell plates is not known, it shall be taken as 55,000 pounds per square inch for steel and 45,000 pounds per square inch for wrought iron.

1.3(5) *Strength of rivets in shear.* In computing the ultimate strength of rivets in shear the cross-sectional area of the rivet shank shall be used, for the values in pounds per square inch, based upon the requirements of paragraphs P-16 of Iowa code.

1.3(6) *Crushing strength of mild steel.* The resistance to crushing of mild steel shall be taken at 95,000 pounds per square inch of cross-sectional area.

1.3(7) *Rivets.* When the diameter of the rivet holes in the longitudinal joints of a boiler is not known, the diameter and cross-sectional area of rivets, after driving, may be selected from the following table or ascertained by cutting out one rivet in the body of the joint.

Thickness of plate	1/4"	9/32"	5/16"	11/32"
Diameter of rivet after driving	11/16"	11/16"	3/4"	3/4"
Thickness of plate	3/8"	13/32"	7/16"	15/32"
Diameter of rivet after driving	13/16"	13/16"	15/16"	15/16"
Thickness of plate		1/2"	9/16"	3/8"
Diameter of rivet after driving		15/16"	1 1/16"	1 1/16"

1.3(8) *a.* Each boiler shall be equipped with one or more safety valves placed as close to the boiler as possible. No valve of any description shall be placed between the safety valve and the boiler nor on the escape pipe between the safety valve and the atmosphere. When an elbow is placed on a safety valve escape pipe, it shall be located close to the safety valve outlet or the escape pipe shall be securely anchored and supported. When an escape pipe is used, it shall be full sized and fitted with an open drain to prevent water lodging in the upper part of the safety valve or escape pipe. Safety valves having either the seat or disc of cast iron shall not be used. Dead weight safety valves are prohibited for pressure exceeding 15 pounds. Lever-weighted safety valves, when in need of repair, must be replaced with spring-loaded safety valves.

b. The safety valve capacity of each boiler shall be such that the safety valve or valves will discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than six percent above the maximum allowable working pressure, or more than six percent above the highest pressure to which any valve is set.

1.3(9) One or more safety valves on every boiler shall be set at or below the maximum allowable working pressure. The remaining valves may be set within a range of three percent above the maximum allowable working pressure, but the range of setting of all the safety valves on a boiler shall not exceed ten percent of the highest pressure to which any valve is set.

1.3(10) Fire-actuated fusible plugs, when used, shall conform to the rules of the Iowa code for new construction.

1.3(11) In all cases where no mechanical feed is attached to a boiler, the safety valve shall be set at not less than six percent below the pressure of the main source of supply feeding the boiler. A return trap shall not be considered as a mechanical feeding device. Not less than two means shall be provided for feeding the boiler against the maximum approved pressure.

In all cases where the source of feed water is such that the pressure will not feed the boiler, approved feed pumps, injectors or inspirators shall be provided to give ample feed against the maximum approved pressure. Feed water should have a temperature of not less than 120° F.

1.3(12) *Water glasses.* Each steam boiler shall have at least one water glass, the lowest visible part of which shall be not less than three inches above the lowest permissible water level.

1.3(13) Each boiler shall have three or more gage cocks, located within the range of the visible length of the water glass, when the maximum allowable working pressure exceeds 15 pounds per square inch except when such boiler has two water glasses with independent connections to the boiler, located on the same horizontal line and not less than two feet apart.

1.3(14) No outlet connections, except for damper regulator, feed water regulator, low water fuel cut-out, drains or steam gages, shall be placed on the pipes connecting a water column to a boiler.

1.3(15) *Steam gages.* Each steam boiler shall have a steam gage connected to the steam space or to the steam connection to the water column. The steam gage shall be connected to a siphon or equivalent device of sufficient capacity to keep the gage tube filled with water and so arranged that the gage cannot be shut off from the boiler except by a cock placed near the gage and provided with a tee or lever handle arranged to be parallel to the pipe in which it is located when the cock is open.

1.3(16) *Stop valve.* Each steam outlet from a boiler (except safety valve connections) shall be fitted with a stop valve located as close as practicable to the boiler.

1.3(17) When a stop valve is so located that water can accumulate, ample drains shall be provided.

1.3(18) *Bottom blow-off pipes.* Each boiler shall have a blow-off pipe fitted with valve or cock in direct connection with the lowest water space practicable. When cocks are used they shall be of the gland or guard type and suitable for the pressure allowed. Globe valves are not permitted.

1.3(19) When the maximum allowable working pressure exceeds 100 pounds per square inch, the blow-off pipe shall be extra heavy from boiler to valve or valves, and shall run full size without reducers or bushings. Blow-off piping shall be of black wrought iron or black steel (not galvanized) and shall be extra heavy pipe size. All fittings between the boiler and valve shall be of steel or extra heavy fittings or bronze, brass or malleable iron. In case of renewal of pipe or fittings in the blow-off lines, as specified in this paragraph, they shall be installed in accordance with the rules for new installations.

1.3(20) When the maximum allowable working pressure exceeds 100 pounds per square inch, each bottom blow-off pipe shall be fitted with two valves or a valve and cock, such valves and cocks to be of extra heavy type.

1.3(21) A bottom blow-off pipe, when exposed to direct furnace heat, shall be protected by fire-brick or other heat-resisting material, so arranged that the pipe may be inspected.

1.3(22) An opening in the boiler setting for a blow-off pipe shall be arranged to provide for free expansion and contraction.

1.3(23) *Feed piping.* The feed pipe of a steam boiler shall be provided with a check valve near the boiler and a valve or cock between the check valve and the boiler, and when two or more boilers are fed from a common source, there shall also be a globe valve on the branch to each boiler, between the check valve and the source of supply. When a globe valve is used on a feed pipe, the inlet shall be under the disc of the valve.

1.3(24) *Test pressure.* When a hydrostatic test is applied, test pressure shall be not more than one and one-half times the maximum allowable working pressure.

During a hydrostatic test of a boiler, suitable provisions shall be made so that it will not be necessary to screw down the compression screw upon the spring of the safety valve. The temperature of water used during a hydrostatic test shall not exceed 160° F.

1.3(25) In any case where repairs are made or fittings or appliances renewed they must comply with the Iowa code for new installations.

1.3(26) All existing installed boilers shall be stamped with an Iowa serial number provided for new installations.

1.3(27) In any condition not definitely covered by these rules the Iowa code for new installations shall apply.

1.4(89) New installations—miniature boilers.

1.4(1) No miniature boiler shall hereafter be brought into this state and installed after March 31, 1967, unless it has been constructed and inspected in accordance with the requirements of the Iowa code for miniature boilers and is so stamped or is inspected and stamped in accordance with the requirements of the National Board of Boiler and Pressure Vessel Inspectors. A boiler having a standard stamping of a state that has adopted a standard of construction equivalent to the standard of the state of Iowa may be accepted by the department provided, however, that the person desiring to install same shall make application for the installation of same and shall file with the application a manufacturer's data report covering the construction of the boiler in question.

1.4(2) Upon completion of installation all such boilers shall be inspected by the chief inspector, a deputy inspector or a special inspector commissioned to inspect boilers in this state and at least once each year thereafter shall be subjected to a regular internal and external inspection.

1.4(3) Also at time of first inspection after installation all said boilers must be stamped with the serial number of the state of Iowa, followed by the letters Ia., said letters and figures to be not less than 5/16 inch in height.

[Filed May 4, 1967]

1.5(89) Existing installations—miniature boilers. Rules as adopted for power boilers, 1.3(89), as applied to strength of material, mathematical calculations to determine the safety of a boiler shall be used in all computations pertaining to the safe working pressure of a miniature boiler unless a special rule is hereafter given.

1.5(1) The maximum allowable working pressure on the shell of a boiler or drum shall be determined by 1.3(1) for power boilers. $\frac{TS \times t \times E}{R \times FS}$ = maximum allowable working pressure, pounds per square inch.

Where:

TS = ultimate tensile strength of shell plates, lbs. per square inch.

t = minimum thickness of shell plate, in weakest course, in inches.

E = efficiency of longitudinal point, method of determining which is given in paragraph P-181, of the Iowa code.

E = for tube ligaments between openings shall be calculated by the rules given in P-192 and P-193, Iowa code.

R = inside radius of the weakest course of the shell or drum in inches.

FS = factor of safety allowed by these rules.

NOTE: To be used as given above for longitudinal joints, riveted construction or if for fusion-welded joints, E shall be taken as per efficiency specified in paragraph P-102, of the Iowa code.

In any case wherein there are both riveted joints and tube ligaments to consider, the weaker of these shall be used for E.

1.5(2) The construction of miniature boilers including factor of safety, except where otherwise specified, shall conform to that required for power boilers [1.3(89)].

1.5(3) The temperature of the heating element for electrically heated steam boilers (closed system) shall be so controlled that it will not exceed 1200° F. All electrical equipment shall be installed and grounded in accordance with the requirements of the National Electrical Safety Code.

1.5(4) Every miniature boiler shall be fitted with suitable washout plugs of one-inch iron pipe size, which shall be screwed into openings in the shell near the bottom. In miniature boilers of the closed-system type heated by removable internal electrical heating elements, the opening for these elements when suitable for cleaning purposes, may be substituted for washout openings. All threaded openings in the boiler shall be provided with a riveted or welded reinforcement if necessary to give four full threads therein.

1.5(5) Every miniature boiler shall be provided with at least one feed pump or other feeding device, except where it is connected to a water main carrying sufficient pressure to feed the boiler, or where the steam generator is operated with no extraction of steam (closed system).

In the latter case in lieu of a feeding device, a suitable connection or opening shall be provided to fill the generator when cold. Such connection shall be not less than one-half inch pipe size.

In all cases where no mechanical feed is attached to a boiler the safety valve shall be set at not less than six percent below the pressure of the main source of supply feeding the boiler. A return trap shall not be considered as a mechanical feeding device.

1.5(6) Each miniature boiler shall be fitted with feed water and blow-off connections, which shall not be less than one-half inch iron-pipe size unless operated on a closed system as provided in subrule 1.5(5). The feed pipe shall be provided with a check valve and a stop valve. The feed water may be delivered to the boiler through the blow-off connection, if desired. The blow-off shall be fitted with a valve or cock in direct connection with the lowest water space practicable.

1.5(7) Each miniature boiler for operation with a definite water level shall be equipped with a glass water gage for determining the water level. The lowest permissible water level shall be at a point one-third of the height of the shell, except where the boiler is equipped with internal furnace, when it shall be not less than one-third of the length of the tubes above the top of the furnace. In the case of small generating units operated on the closed system where there is insufficient space for the usual glass water gage, water level indicators of the glass bull's-eye type may be used.

1.5(8) Each miniature boiler shall be equipped with a steam gage having its dial graduated to not less than one and one-half times the maximum allowable working pressure. The gage shall be connected to the steam space or to the steam connection to the water column by a brass or bronze composition siphon tube or equivalent device that will keep the gage tube filled with water.

1.5(9) Each miniature boiler shall be equipped with a sealed spring-loaded pop safety valve, not less than one-half inch in diameter, connected directly to the boiler. Where there is no extraction of steam (closed system) a fracturing disk safety valve may be used in addition to the spring-loaded pop safety valve. The safety valve shall be plainly marked by the manufacturer with a name or an identifying trade-mark, the nominal diameter and the steam pressure at which it is not to blow. The safety valve capacity of each boiler shall be such that the safety valve or valves will discharge all the steam that can be generated by the boiler without allowing the pressure to rise more than six percent above the maximum allowable working pressure, or more than six percent above the highest pressure to which any valve is set.

1.5(10) Each steam line from a miniature boiler shall be provided with a stop valve located as close to the boiler shell or drum as is practicable, except when the boiler and steam receiver are operated as closed system.

1.5(11) Where miniature boilers are gas-fired, the burners used shall conform to the requirements of the American Gas Association, as given in paragraph MA-5 of the Appendix of the Iowa code. The burners shall in such cases be equipped with a fuel-regulating governor, which shall be automatic and regulated by the steam pressure. This governor shall be so constructed that in the event of its failure, there can be no possibility of steam from the boiler entering the gas chamber or supply pipe.

1.6(89) New installations—unfired pressure vessels.

1.6(1) No unfired pressure vessel shall hereafter be brought into this state and installed unless it has been constructed and inspected in accordance with the requirements of the Iowa code for unfired pressure vessels and is so stamped or is inspected and stamped in accordance with the requirements of the National Board of Boiler and Pressure Vessel Inspectors. An unfired pressure vessel having a standard stamping of a state that has adopted a standard of construction equivalent to the standards of the state of Iowa may be ac-

cepted by the department provided, however, that the person desiring to install same shall make application for the installation of same and shall file with the application the manufacturer's data report covering the construction of the unfired pressure vessel in question.

1.6(2) Upon completion of installation all such unfired pressure vessels shall be inspected by the chief inspector, a deputy inspector or a special inspector commissioned to inspect boilers in this state, and at least once each year thereafter shall be subjected to a regular internal and external inspection.

1.6(3) Also at time of first inspection after installation all said unfired pressure vessels must be stamped with the serial number of the state of Iowa, followed by the letters Ia., said letters and figures to be not less than 5/16 inch in height.

1.7(89) Existing installations—unfired pressure vessels.

1.7(1) The maximum allowable working pressure of the shell of an unfired pressure vessel shall be determined in accordance with 1.3(1) applying to power boilers except that E for fusion-welded joints shall equal:

Single butt welds	50%
Double butt welds	70%
Single lap welds	30%
Double lap welds	60%
Forged welds	80%
Lap brazed joints in steel or copper	90%

1.7(2) *Factors of safety.* The lowest factor of safety permissible on existing installations shall be four, except that this factor of safety shall be increased by the inspector if the condition and safety of the unfired pressure vessel demands it. In no case shall the maximum working pressure of an old unfired pressure vessel be increased to a greater pressure than would be allowed for a new vessel of the same construction.

1.7(3) *Lap seam cracking.* The shell and drum of a pressure vessel in which a lap seam crack is discovered along a longitudinal riveted joint, either butt or lap construction, shall be immediately discontinued from use.

1.7(4) *Tensile strength.* Subrule 1.3(4) for power boilers shall apply.

1.7(5) *Strength of rivets in shear.* Subrule 1.3(5) for power boilers shall apply.

1.7(6) *Crushing strength of mild steel.* Subrule 1.3(6) of power boilers shall apply.

1.7(7) *Rivets.* Subrule 1.3(7) for power boilers shall apply.

1.7(8) *Safety appliances.* All pressure vessels shall be provided with such safety and relief valves and indicating and controlling devices as will insure their safe operation. These devices shall be so constructed, located and installed that they cannot readily be rendered inoperative. The relieving capacity of a safety valve shall be such as to prevent a rise of pressure in the vessel of more than ten percent above the maximum allowable working pressure, taking into account the effect of static head. The safety valve discharges shall be carried to a safe place. Safety valves shall be of the direct spring-loaded type, designed with substantial lifting device so that disc can be lifted from its seat by the spindle not less than one-eighth the diameter of the valve when the pressure of the vessel is 75 percent of that at which the safety valve is set to blow. Safety valves having either the seat or disc of cast iron shall not be used. In a vessel in which pressure is derived from an outside source, each safety valve should be so connected to the vessel, vessels or system which it protects as to prevent a rise of pressure beyond the maximum allowable pressure in any vessel protected by the safety valve. Safety valve springs shall not be adjusted to carry more than ten percent greater pressure than that for which the springs are made.

1.7(9) *Fusion welding.* Any repairs by fusion welding must be approved beforehand by a commission inspector and all welded repairs must be made in accordance with the rules recommended by the National Board of Boiler and Pressure Vessel Inspectors.

1.7(10) In any condition not covered by the above rules, the rules for new installations of the Iowa code shall apply.

1.8(89) General rules—power boilers and unfired pressure vessels.

1.8(1) All power boilers and unfired pressure vessels which are subject to regular inspections as provided in chapter 89 of the Code shall be prepared for inspection when the owners or users are notified by either the chief inspector, a deputy inspector or a special inspector to prepare for such inspections and for hydrostatic test if necessary.

1.8(2) The owner or user of a power boiler or unfired pressure vessel herein required to be inspected, shall, on a date specified by the chief inspector, a deputy inspector or a special inspector, which date shall be not less than seven days after date of such notice, unless by consent of the owner, prepare the power boiler, heating boiler or unfired pressure vessel for internal inspection or hydrostatic pressure test when necessary.

1.8(3) To prepare a power boiler for internal inspection, the water shall be drawn off and the boiler thoroughly washed. All man-hole and hand-hole plates and washout plugs in boilers and water column connections shall be removed, and the furnace and combustion chambers thoroughly cooled and cleaned. All grates of internally fired boilers shall be removed; also enough of the brick work of any type of boiler shall be removed to determine the condition of the boiler, furnace or oth-

er parts at each annual inspection when deemed necessary by the inspector. The steam gage shall be removed for testing.

An unfired pressure vessel shall be prepared for a general inspection to the extent deemed necessary by the inspector.

1.8(4) If a power boiler or an unfired pressure vessel has not been properly prepared for inspection as provided in 1.8(3), the inspector may decline to make such inspection and the certificate of inspection shall be withheld until the boiler has been properly prepared and inspected.

If it is found that steam or hot water is leaking into a boiler or unfired pressure vessel the source of such leakage shall be disconnected if necessary to cut out such steam or hot water from the boiler or pressure vessel to be inspected.

1.8(5) The fees for inspection and for inspection certificate shall be paid to the bureau of labor before a certificate of inspection shall be issued. If the owner or user of any boiler or unfired pressure vessel required to be inspected under this Act by the department refuses to allow a boiler or unfired pressure vessel to be inspected or refuses to pay the fee as provided for in section 89.7, then such boiler or unfired pressure vessel shall not be operated until after a valid inspection has been made by either the chief inspector or any deputy inspector or any special inspector.

1.8(6) If, upon inspection, a boiler or unfired pressure vessel is found to be in such condition that it is unsafe to operate, the inspection certificate shall be suspended and the owner or user of such boiler or unfired pressure vessel who causes the same to be operated shall be subject to the penalty as provided in section 89.9.

1.8(7) Shop inspections made at the request of a boiler manufacturer by the chief inspector or any deputy inspector, shall be charged for at the rate of ten dollars for each boiler plus all expenses to include traveling, hotel and incidentals.

1.8(8) The shell or drum of a boiler or unfired pressure vessel in which a typical "lap seam crack" is discovered along a longitudinal riveted joint for either butt seam or lap joint shall be permanently disconnected for use under steam pressure. By "lap seam crack" is meant the typical crack frequently found in lap seams extending parallel to the longitudinal joint and located either between or adjacent to rivet holes.

1.8(9) All appliances required for electric steam generators shall be attached in accordance with the following rules.

A cable at least as large as one of the incoming power lines to the generator shall be provided for grounding the generator shell. This cable shall be permanently fastened on some part of the generator and shall be grounded in an approved manner.

A suitable screen or guard shall be provided around high tension bushings and a sign posted warning of high voltage. This screen or guard shall be so located that it will be impossible for anyone working around the generator to accidentally come in contact with the high tension circuits. When adjusting safety valves, the power circuits to the generator shall be open. The generator may be under steam pressure but the power line shall be open while the operator is making the necessary adjustments.

Each kw. of electrical energy consumed by an electric steam generator, operating at maximum rating, shall be considered the equivalent of one square foot of heating surface of a fire tube boiler when determining the required amount of safety valve capacity.

1.8(10) If a boiler or unfired pressure vessel is jacketed so that the longitudinal seam of shells, drums or domes cannot be seen, and if it cannot otherwise be determined, enough of the jacketing, setting wall or other covering shall be removed so that the size and pitch of the rivets and such other data as may be necessary to determine the safety of the boiler or unfired pressure vessel or appliance may be determined.

1.8(11) Where a major repair is necessary, a commissioned inspector shall be called for consultation and advice as to the best method of making such repairs; after such repairs are made they shall be subject to the approval of a commissioned inspector. Repairs to all boilers, unfired pressure vessels, and their appurtenances shall conform as nearly as practicable to the requirements of the Iowa code.

1.8(12) When repairs are to be made wherein fusion welding is to be used, permission must be obtained from the chief inspector, a deputy inspector or a special inspector and the welding must be done in accordance with the rules recommended by the National Board of Boiler and Pressure Vessel Inspectors.

1.8(13) *Condemned boilers.* Any boiler or pressure vessel that has been recommended for condemnation shall be immediately discontinued from service. The department shall be promptly notified of such action and the chief inspector or a deputy boiler inspector shall reinspect the boiler for final action. Boilers or pressure vessels that have been condemned shall have distinctly stamped thereon over the state of Iowa serial number the following symbol, XXX.

1.8(14) An inspection certificate issued in accordance with section 89.2 shall be valid until expiration unless some defect or condition affecting the safety of the boiler or pressure vessel for which it was issued is disclosed.

1.8(15) If a special inspector, upon the first inspection of a new risk, finds that the boiler or pressure vessel or any of the appurtenances are in such condition that his company refuses insurance on same, he shall immediately notify the

commissioner of that fact together with a report of the defects.

1.8(16) If upon an external inspection there is evidence of a leak or crack, enough of the covering of the boiler or unfired pressure vessel shall be removed to satisfy the inspector in order that he may determine as to the safety of the boiler or unfired pressure vessel, or if the covering cannot be removed at that time, he may order the operation of the boiler or unfired pressure vessel stopped until such time as the covering can be removed and proper examination made.

1.8(17) In any case where a stationary boiler or unfired pressure vessel is moved and reinstalled the fittings and appliances must comply with the Iowa code for new installations.

1.8(18) *Riveted patches.* In applying riveted patches the design of patch and method of installation must be in accordance with the rules for riveted patches recommended by the National Board of Boiler and Pressure Vessel Inspectors.

1.9(89) Insured boilers and vessels.

1.9(1) As of July 4, 1959, each certificate shall be issued for a period of one year and shall show an expiration date, and this expiration date shall remain the same as to day and month for this particular boiler or vessel as long as this boiler or vessel remains at the same location or is operated by the same owner or user. New installations are required to have a certificate of inspection issued within 30 days from the date boiler or vessel is put into operation.

1.9(2) Internal inspection must be made within a 60-day period immediately prior to the expiration of the certificate.

1.9(3) Owner or user of boiler or vessel shall not be issued a notice or statement but must remit the required fee to the bureau of labor after inspection has been made and before the expiration date of their valid certificate. Drafts should be made payable to the bureau of labor.

1.9(4) Upon written request to the bureau of labor, showing an emergency exists, owner or user shall be granted a 30-day grace period beyond the expiration date of said certificate and during this grace period said owner or user shall not be considered by the bureau of labor to be in violation of chapter 89 of the Code.

1.9(5) Where owners or users have allowed certificates to become delinquent and boilers have not been in use for a period of 90 days or more, it will be necessary to establish new expiration date to correspond with the date that boiler has been reinspected and put into use.

1.9(6) Boilers or vessels inspected by insurance company inspectors that have been previously inspected by the state boiler inspector will be issued a certificate as of the date of inspection made by the insurance company.

1.9(7) Insurance companies shall notify the bureau of labor at the same time they notify owner or user of any cancellation of insurance on any boiler or pressure vessel.

1.9(8) When an insurance company insures a boiler or pressure vessel that has been previously insured by another company, the bureau of labor must be notified by the present underwriter within 30 days of the date that the company assumes the risk.

[Filed July 15, 1959]

CHILD AND MIGRATORY LABOR DIVISION

CHAPTER 2
CHILD LABOR

2.1 to 2.4 Reserved for future use.

2.5(92) Definition of other work as may be approved by the committee on child labor as provided in section 92.5(11) shall be interpreted to include the following: Manual detasseling of corn on power-operated detasseling machines.

2.6 Reserved for future use.

2.7(92) Definition of week as used in section 92.7 is interpreted to mean Sunday through Saturday.

2.8(92) Definition of occupations of motor vehicle driver and helper as used in section 92.8(2) are interpreted as follows: The occupations of motor vehicle driver and outside helper on any public road, highway or in any mine (including open pit mine or quarry), place where logging or sawmill operations are in progress or in any excavation.

2.8(1) The following are exceptions for occupations of motor vehicle driver and helper as provided by section 92.8(2) and further defined by the committee on child labor.

a. Incidental and occasional driving shall be exempt from the above hazardous occupation and shall not apply to the operation of automobiles or trucks not exceeding 6,000 pounds gross vehicle weight if such driving is restricted to daylight hours provided further that the vehicle is equipped with a seat belt or similar device for the driver and for each helper, and that the employer has instructed each child that such belts or other devices must be used. This exemption shall not be applicable to any occupation of a motor vehicle driver which involves the towing of vehicles.

b. The driving of a school bus is exempt from the occupation of a motor vehicle driver and helper.

2.8(2) *Definitions.*

a. Motor vehicle. Any automobile, truck, truck tractor, trailer, semitrailer, motorcycle or similar vehicle propelled or drawn by mechanical power and designed for use as a means of transportation but shall not include any vehicle operated exclusively on rails.

b. Driver. Any individual who, in the course of his employment, drives a motor vehicle at any time.

c. Outside helper. Any individual, other than a driver, whose work includes riding on a motor vehicle outside the cab for the purpose of assisting and transporting or delivering goods.

d. Gross vehicle weight. Includes the truck chassis with lubricants, water and full tank or tanks of fuel, plus the weight of the cab or driver's compartment, body and special chassis, and body equipment and pay load.

2.8(3) Definition of occupations involved in the operation of power-driven woodworking machines as provided by section 92.8(4) are interpreted as follows: The occupations of operating power-driven woodworking machines including supervision or controlling the operation of such machines, feeding material into such machines, and helping the operator to feed material into such machines, but not including the placing of material on a moving chain or in a hopper or slide for automatic feeding.

The occupations of setting up, adjusting, repairing, oiling or cleaning power-driven woodworking machines.

The operations of off-bearing from circular saws and from guillotine-action veneer clippers.

2.8(4) *Definitions.*

a. Power-driven woodworking machines. All fixed or portable machines or tools driven by power and used or designed for cutting, shaping, forming, surfacing, mailing, stapling, wire stitching, fastening or otherwise assembling, pressing or printing wood or veneer.

b. Off-bearing. The removal of material or refuse directly from a saw table or from the point of operation. Operations not considered as off-bearing within the intent of this section include:

(1) The removal of material or refuse from a circular saw or guillotine-action veneer clipper where the material or refuse has been conveyed away from the saw table or point of operation by a gravity chute or by some mechanical means such as a moving belt or expulsion roller, and (2) the following operations when they do not involve the removal of material or refuse directly from a saw table or from the point of operation: The carrying, moving or transporting of materials from one machine to another or from one part of a plant to another; the piling, stacking or arranging of materials for feeding into a machine by another person; and the sorting, tying, bundling or loading of materials.

2.8(5) Definitions of occupations involved in the operation of elevators and other power-driven hoisting apparatus as provided by section 92.8(6) are interpreted as follows:

a. Work of operating an elevator, crane, derrick, hoist or high-lift truck, except operating an unattended automatic operation passenger elevator or air-operated hoist not exceeding one ton capacity.

b. Work which involves riding on a manlift or on a freight elevator, except a freight elevator operated by an assigned operator.

c. Work of assisting in the operation of a crane, derrick or hoist performed by crane hookers, crane chasers, hookers-on, riggers, rigger helpers and like occupations.

2.8(6) *Definitions.*

a. Elevator. Any power-driven hoisting or lowering mechanism equipped with a car or platform which moves in guides in a substantially vertical direction. The term shall include both passenger and freight elevators, (including portable elevators or tiering machines) but shall not include dumbwaiters.

b. Crane. A power-driven machine for lifting and lowering a load and moving it horizontally, in which the hoisting mechanism is an integral part of the machine. The term shall include all types of cranes, such as cantilever gantry, crawler, gantry, hammerhead, ingot pouring, job, locomotive, motor truck, overhead travelling, pillar job, pintle, portal, semigantry, semiportal, storage bridge, tower, walking job and wall cranes.

c. Derrick. A power-driven apparatus consisting of a mast or equivalent members held at the top by guys or braces, with or without a boom, for use with a hoisting mechanism and operating ropes. The term shall include all types of derricks, such as A-frame, breast, Chicago boom, ginpole, guy and stiff-leg derricks.

d. Hoist. A power-driven apparatus for raising or lowering a load by the application of a pulling force that does not include a car or platform running in guides. The term shall include all types of hoists, such as base-mounted electric, clevis suspension, hook suspension, monorail, overhead electric, simple drum and trolley suspension hoists.

e. High-lift truck. A power-driven industrial type of truck used for lateral transportation that is equipped with a power-operated lifting device usually in the form of a fork or platform capable of tiering loaded pallets or skids one above the other. Instead of a fork, or platform, the lifting device may consist of a ram, scoop, shovel, crane, revolving fork or other attachments for handling specific loads. The term shall mean and include high-lift trucks known under such names as forklifts, fork trucks, forklift trucks, tiering trucks or stacking trucks, but shall not mean low-lift trucks or low-lift platform trucks that are designed for the transportation of, but not the tiering of, material.

f. Manlift. A device intended for the conveyance of persons which consists of platforms or

brackets mounted on or attached to an endless belt, cable or chain or similar method of suspension; such belt, cable or chain operating in substantially vertical direction and being supported by and driven through pulleys, sheaves or sprockets at the top or bottom.

2.8(7) *Exception.* Section 92.8(6) shall not prohibit the operation of an automatic elevator and an automatic signal operation elevator provided that the exposed portion of the car interior (exclusive of vents and other necessary small openings), the car door and the hoistway doors are constructed of solid surfaces without any opening through which a part of the body may extend; all hoistway openings at floor level have doors which are interlocked with the car door so as to prevent the car from starting until all such doors are closed and locked; the elevator (other than hydraulic elevators) is equipped with a device which will stop and hold the car in case of overspeed or if the cable slackens or breaks; and the elevator is equipped with upper and lower travel limit devices which will normally bring the car to rest at either terminal and a final limit switch which will prevent the movement in either direction and will open in case of excessive over-travel by the car.

2.8(8) *Definitions as used in 2.8(7).*

a. Automatic elevator. A passenger elevator, a freight elevator or a combination passenger-freight elevator, the operation of which is controlled by pushbuttons in such a manner that the starting, going to the landing selected, leveling and holding, and the opening and closing of the car and hoistway doors are entirely automatic.

b. Automatic signal operation elevator. An elevator which is started in response to the operation of a switch (such as a lever or pushbutton) in the car which when operated by the operator actuates a starting device that automatically closes the car and hoistway doors—from this point on, the movement of the car to the landing selected, leveling and holding when it gets there, and the opening of the car and hoistway doors are entirely automatic.

2.8(9) Definition of excavation occupations as used in section 92.8(16) includes all occupations on the excavation site.

2.8(10) Definition of occupations in or about plants or establishments manufacturing or storing explosives or articles containing explosive components as provided by section 92.8(1) are interpreted as follows: The term "occupations" shall include those of handling and transporting explosives or articles containing explosive components including ammunitions.

Retail establishments, selling small arms and ammunitions, but not connected with the manufacture of explosives shall be exempt from this section.

2.8(11) Definition of occupations involved in logging occupations and occupations in the operation of any sawmill, lath mill, shingle mill or cooperage-stock mill as provided by section 92.8(3) are interpreted as follows: The term "occupations" shall not include those of office work or maintenance of fire trails with hand tools.

2.8(12) Definition of occupations involving exposure to radioactive substances and to ionizing radiations as provided by section 92.8(5) are interpreted as follows: The term "occupations" shall include any work in any workroom in which (a) radium is stored or used in the manufacture of self-luminous compound; (b) self-luminous compound is made, processed or packaged; (c) self-luminous compound is stored, used or worked upon; (d) incandescent mantles are made from fabric and solutions containing thorium salts, or are processed or packaged; (e) other radioactive substances are present in the air in average concentrations exceeding ten percent of the maximum permissible concentrations in the air recommended for occupational exposure by the National Committee on Radiation Protection, as set forth in the 40-hour week column of Table One of the National Bureau of Standards Handbook No. 69 entitled *"Maximum Permissible Body Burdens and Maximum Permissible Concentrations of Radionuclides in Air and in Water for Occupational Exposure"* issued June 5, 1959.

Any other work which involves exposure to ionizing radiations in excess of 0.5 rem per year.

2.8(13) *Definitions of terms as used in section 92.8(5).* [Subrule 2.8(12)]

a. Self-luminous compound. Any mixture of phosphorescent material and radium, mesothorium or other radioactive element.

b. Workroom. The entire area bounded by walls of solid material and extending from floor to ceiling with doors of solid material that shall be closed during periods of operation.

c. Ionizing radiations. Alpha and beta particles, electrons, protons, neutrons, gamma and X ray and all other radiations which produce ionizations directly or indirectly, but does not include electromagnetic radiations other than gamma and X ray.

2.8(14) Definition of occupations involved in the operation of power-driven metal forming, punching and shearing machines as provided by section 92.8(7) are interpreted as follows: Occupations of operator of or helper on the following power-driven metal forming, punching and shearing machines:

a. All rolling machines, such as beading, straightening, corrugating, flanging or bending rolls and hot or cold rolling mills.

b. All pressing or punching machines, such as punch presses, power presses and plate punches.

c. All bending machines, such as apron brakes and press brakes.

d. All hammering machines, such as drop hammers and power hammers.

e. All shearing machines, such as guillotine or squaring shears, alligator shears and rotary shears.

This section shall also include the occupations of setting up, adjusting, repairing, oiling or cleaning these machines including those with automatic feed and ejection.

2.8(15) *Definitions of terms as used in section 92.8(7).*[Subrule 2.8(14)]

a. Operator. A person who operates a machine covered by this section by performing such functions as starting or stopping the machine, placing materials into or removing them from the machine, or any other functions directly involved in operation of the machine.

b. Helper. A person who assists in the operation of a machine covered by this section by helping place materials into or removing them from the machine.

c. Forming, punching and shearing machines. Power-driven metalworking machines, other than machine tools, which change the shape of or cut metal by means of tools, such as dies, rolls or knives which are mounted on rams, plungers or other moving parts. Types of forming, punching and shearing machines enumerated in this section are the machines to which the designation is by custom applied.

2.8(16) Definition of occupations in connection with mining as provided by section 92.8(8) are interpreted as follows: The term "occupations" shall not include those of office work or maintenance of living quarters.

2.8(17) Definition of occupations in or about slaughtering and meat packing establishments and rendering plants as provided by section 92.8(9) are interpreted as follows: The term "occupations" shall include those involving the killing of poultry, rabbits or small game. It shall also include the use of knives in the processing of such animals, and the operating of feeding of any power-driven machinery in any area, including the setting up, adjusting, repairing, oiling or cleaning of any such machinery. However, it shall not include any other occupation in the processing of poultry, rabbits and small game.

The term "occupations" shall not include office work, that of the work of messengers, runners, hand truckers and similar occupations which require entering workrooms or workplaces infrequently or for short periods of time.

2.8(18) *Definitions of terms as used in section 92.8(9).*

a. Slaughtering and meat packing establishments. Places in or about which cattle, hogs, sheep, lambs, goats, horses, poultry, rabbits or small game are killed, processed or butchered. The term shall also include establishments which manufacture or process meat products or sausage casings from such animals.

b. Rendering plants. Establishments engaged in the conversion of dead animals, animal offal, animal fats, scrap meats, blood and bones into stock feeds, tallow, inedible greases, fertilizer ingredients and similar products.

2.8(19) Definitions of occupations involved in the operation of certain power-driven bakery machines as provided by section 92.8(10) are interpreted as follows: The following occupations involved in the operation of power-driven bakery machines:

a. The occupations of operating, assisting to operate or setting up, adjusting, repairing, oiling or cleaning any horizontal or vertical dough mixer, batter mixer, bread dividing, rounding or molding machine, dough brake, dough sheeter, combination bread slicing and wrapping machines or cake cutting band saw.

b. The occupation of setting up or adjusting a cooky or cracker machine.

2.8(20) Definitions of wrecking, demolition and shipbreaking operations as provided by section 92.8(14) are interpreted as follows: All work, including cleanup and salvage work, performed at the site of the total or partial razing, demolishing or dismantling of a building, bridge, steeple, tower, chimney, other structure, ship or other vessel.

2.8(21) Definition of roofing operations as provided by section 92.8(15) is interpreted as follows: All work performed in connection with the application of weatherproofing materials and substances (such as tar or pitch, asphalt prepared paper, tile, slate, metal, translucent materials and shingles of asbestos, asphalt or wood) to roofs of buildings or other structures. The term shall also include all work performed in connection with:

a. The installation of roofs, including related metal work such as flashing and

b. Alterations, additions, maintenance and repair, including painting and coating, of existing roofs. The term shall include gutter and downspout work; the construction of the sheathing or base of roofs; or the installation of television antennas, air conditioners, exhaust and ventilating equipment or similar appliances attached to roofs.

2.8(22) Definition of occupations deemed by the committee on child labor to be hazardous to life or limb as provided in section 92.8(21) shall be interpreted to include the following: Occupations involved in the operation of power cutters on corn detasseling machines.

It shall also include occupations involved in the driving of power-driven detasseling machines unless the driver has a valid driver's license or a certificate issued by the Federal Extension Service showing that he has completed a 4-H farm and machinery program.

2.9 and 2.10 Reserved for future use.

2.11(92) Definition of superintendent as used in section 92.11 shall be interpreted to mean

the superintendent of a public school, and in the case of a nonpublic accredited school to be the superintendent or individual with equal responsibilities.

2.12 to 2.16 Reserved for future use.

2.17(92) Definition of work as used in section 92.17(1) shall be interpreted to mean such work for which compensation is not usually given.

2.17(1) Definition of part-time as provided by section 92.17(3) shall be interpreted to mean one-half of the maximum hours allowed under the Act.

2.17(2) Definition of occupation or business operated by the child's parents as provided by section 92.17(4) shall be interpreted to be those operated by the child's parent who operates and has complete control of the day to day business of the business and is on the premises during the hours of the child's employment.

This rule is intended to implement chapter 92 of the Code of Iowa.

[Filed April 15, 1971; amended February 9,1972]

ADMINISTRATIVE DIVISION

CHAPTER 3
INSPECTIONS, CITATIONS
AND PROPOSED PENALTIES

3.1(88) Posting of notice; availability of the Act, regulations and applicable standards.

3.1(1) Each employer shall post and keep posted a notice or notices, to be furnished by the Occupational Safety and Health Administration, U. S. Department of Labor or the Iowa bureau of labor, informing employees of the protections and obligations provided for in the Act, and that for assistance and information, including copies of the Act and of specific safety and health standards, employees should contact the employer or the Iowa bureau of labor. Such notice or notices shall be posted by the employer in each establishment in a conspicuous place or places where notices to employees are customarily posted. Each employer shall take steps to insure that such notices are not altered, defaced or covered by other materials.

3.1(2) *"Establishment"* means a single physical location where business is conducted or where services or industrial operations are performed. (For example: A factory, mill, store, hotel, restaurant, movie theatre, farm, ranch, bank, sales office, warehouse, central administrative office or governmental agency or subdivision thereof.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities from the same physical location as a lumber yard), each activity shall be treated as a separate physical establishment, and a separate notice or notices shall be posted in each such establishment, to the extent that such notices have been furnished by the Occupational Safety and Health Administration, U. S. Department of Labor, or the Iowa bureau of labor. Where employers are engaged in activities which are physically dispersed, such as agriculture, construction, transportation, communications and electric, gas and sanitary services, the notice or notices required by this rule shall be posted at the location to which employees report each day. Where employees do not usually work at, or report to, a single establishment, such as longshoremen, traveling salesmen, technicians, engineers, etc., such notice or notices shall be posted at the location from which the employees operate to carry out their activities. In all cases, such notice or notices shall be posted in accordance with the requirements of 3.1(1).

3.1(3) Copies of the Act, all regulations published in this chapter and all applicable standards are available from the Iowa bureau of labor. If an employer has obtained copies of these materials from the Iowa bureau of labor or the U. S. Department of Labor, he shall make them available upon request to any employee or his authorized representative for review in the establishment where the employee is employed on the same day the request is made or at the earliest time mutually convenient to the employee or his authorized representative and the employer.

3.1(4) Any employer failing to comply with the provisions of this rule shall be subject to citation and penalty in accordance with the provisions of section 88.14.

3.2(88) Objection to inspection. Upon a refusal to permit a field safety technician, in the exercise of his official duties, to enter without delay and at reasonable times any place of employment or any place therein, to inspect, to review records or to question any employer, owner, operator, agent or employee, or to permit a representative of employees to accompany the field safety technician during the physical inspection of any workplace, the field safety technician shall terminate the inspection or confine the inspection to other areas, conditions, structures, machines, apparatus, devices, equipment, materials, records or interviews concerning which no objection is raised. The field safety technician shall endeavor to ascertain the reason for such refusal and he shall immediately report the refusal and the reason therefor to the labor commissioner or his designee. The labor commissioner shall promptly take appropriate action, including compulsory process, if necessary.

3.3(88) Entry not a waiver. Any permission to enter, inspect, review records or question any person shall not imply or be conditioned upon a waiver of any cause of action, citation or penalty under the Act. Field safety technicians are not authorized to grant any such waiver.

3.4(88) Advance notice of inspections.

3.4(1) Advance notice of inspections may not be given, except in the following situations:

a. In cases of apparent imminent danger, to enable the employer to abate the danger as quickly as possible;

b. In circumstances where the inspection can most effectively be conducted after regular business hours or where special preparations are necessary for an inspection;

c. Where necessary to assure the presence of representatives of the employer and employees or the appropriate personnel needed to aid in the inspection; and

d. In other circumstances where the labor commissioner determines that the giving of advance notice would enhance the probability of an effective and thorough inspection.

3.4(2) In the situations described in 3.4(1), advance notice of inspections may be given only if authorized by the labor commissioner, except that in cases of apparent imminent danger, advance notice may be given by the field safety technician without such authorization if the labor commissioner is not immediately available. When advance notice is given, it shall be the employer's responsibility promptly to notify the authorized representative of employees of the inspection, if the identity of such representative is known to the employer. Upon the request of the employer, the field safety technician will inform the authorized representative of employees of the inspection, provided that the employer furnishes the field safety technician with the identity of such representative and with such other information as is necessary to enable him promptly to inform such representative of the inspection. An employer who fails to comply with his obligation under this paragraph promptly to inform the authorized representative of employees of the inspection or to furnish such information as is necessary to enable the field safety technician promptly to inform such representative of the inspection, may be subject to citation and penalty under section 88.14(3). Advance notice in any of the situations described in 3.4(1) shall not be given more than 24 hours before the inspection is scheduled to be conducted, except in apparent imminent danger situations and in other unusual circumstances.

3.5(88) Conduct of inspections.

3.5(1) Inspections shall take place at such times and in such places of employment as the labor commissioner or his designee may direct. At the beginning of an inspection field safety technicians shall present their credentials to the owner, operator or agent in charge at the establishment; explain the nature and purpose of the inspection; and indicate generally the scope of the inspection and the records specified in 4.2(88), 4.4(88), and 4.5(1) which they wish to review. However, such designation of records shall not preclude access to additional records specified in 29 C.F.R., Chapter XVII, section 1903.3 and published in 36 Fed. Reg. 17850 (September 4, 1971).

3.5(2) Field safety technicians shall have authority to take environmental samples and to take or obtain photographs related to the purpose of the inspection, employ other reasonable investigative techniques, and question privately any employer, owner, operator, agent or employee of the establishment.

3.5(3) In taking photographs and samples, field safety technicians shall take reasonable precautions to insure that such actions with flash, spark-producing or other equipment would not be hazardous. Field safety technicians shall comply with all employer safety and health rules and practices at the establishment being inspected, and they shall wear and use appropriate protective clothing and equipment.

3.5(4) The conduct of inspections shall be such as to preclude unreasonable disruption of the operations of the employer's establishment.

3.5(5) At the conclusion of the inspection, the field safety technician shall confer with the employer or his representative and informally advise him of any apparent safety or health violations disclosed by the inspection. During such conference, the employer shall be afforded an opportunity to bring to the attention of the field safety technician any pertinent information regarding conditions in the workplace.

3.5(6) Inspections shall be conducted in accordance with the requirements of this chapter.

3.6(88) Representatives of employers and employees.

3.6(1) Field safety technicians shall be in charge of inspections and questioning of persons. A representative of the employer and a representative authorized by his employees shall be given an opportunity to accompany the field safety technician during the physical inspection of any workplace for the purpose of aiding such inspection. A field safety technician may permit additional employer representatives and additional representatives authorized by employees to accompany him where he determines that such additional representatives will further aid the inspection. A different employer and employee representative may accompany the field safety technician during each different phase of an inspection if this will not interfere with the conduct of the inspection.

3.6(2) Field safety technicians shall have authority to resolve all disputes as to who is the representative authorized by the employer and employees for the purpose of this rule. If there is no authorized representative of employees, or if the field safety technician is unable to determine with reasonable certainty who is such representative, he should consult with a reasonable number

of employees concerning matters of safety and health in the workplace.

3.6(3) Field safety technicians are authorized to deny the right of accompaniment under this rule to any person whose conduct interferes with a fair and orderly inspection.

3.7(88) Trade or governmental secrets.

3.7(1) At the commencement of an inspection, the employer may identify areas in the establishment which contain or which might reveal trade or governmental secrets. If the field safety technician has no clear reason to question such identification, information obtained in such areas, including all negatives and prints of photographs and environmental samples, shall be labeled "confidential-trade/governmental secrets" and shall not be disclosed except in accordance with the provisions of section 88.12.

3.7(2) Upon the request of an employer, any authorized representative of employees in an area containing trade or governmental secrets shall be an employee in that area or an employee authorized by the employer to enter that area. Where there is no such representative or employee, the field safety technician shall consult with a reasonable number of employees who work in that area concerning matters of safety and health.

3.8(88) Consultation with employees. Field safety technicians may consult with employees concerning matters of occupational safety and health to the extent that they deem necessary for the conduct of an effective and thorough inspection. During the course of an inspection, any employee shall be afforded an opportunity to bring any violation of the Act which he has reason to believe exists in the workplace to the attention of the field safety technician.

3.9(88) Posting of citations.

3.9(1) Upon receipt of any citation under the Act, the employer shall immediately post such citation or a copy thereof, unedited, at or near each place an alleged violation referred to in the citation occurred, except as provided below. Where, because of the nature of the employer's operations, it is not practicable to post the citation at or near each place of alleged violation, such citation shall be posted, unedited, in a prominent place where it will be readily observable by all affected employees. For example, where employers are engaged in activities which are physically dispersed, the citation may be posted at the location to which employees report each day. Where employees do not primarily work at or report to a single location, the citation may be posted at the location from which the employees operate to carry out their activities. The employer shall take steps to ensure that the citation is not altered, defaced or covered by other material. Notices of de minimis violations need not be posted.

3.9(2) Each citation or a copy thereof shall remain posted until the violation has been abated, or for three working days, whichever is later. The filing by the employer of a notice of intention to contest shall not affect his posting responsibility under this rule unless and until the review commission issues a final order vacating the citation.

3.9(3) An employer to whom a citation has been issued may post a notice in the same location where such citation is posted indicating that the citation is being contested before the review commission, and such notice may explain the reasons for such contest. The employer may also indicate that specified steps have been taken to abate the violation.

3.9(4) Any employer failing to comply with the provisions of 3.9(1) and 3.9(2) shall be subject to citation and penalty in accordance with the provisions of section 88.14.

3.10(88) Informal conferences. At the request of an affected employer, employee or representative of employees, the labor commissioner may hold an informal conference for the purpose of discussing any issues raised by an inspection, citation, notice of proposed penalty or notice of intention to contest. The settlement of any issue at such conference shall be subject to the rules of procedure prescribed by the review commission. If the conference is requested by the employer, an effected employee or his representative shall be afforded an opportunity to participate, at the discretion of the labor commissioner. If the conference is requested by an employee or representative of employees, the employer shall be afforded an opportunity to participate, at the discretion of the labor commissioner. Any party may be represented by counsel at such conference. No such conference or request for such conference shall operate as a stay of any 15-working-day period for filing a notice of intention to contest.

3.11(88) Definitions.

3.11(1) *"Act"* means the Iowa Occupational Safety and Health Act of 1972, chapter 88 of the Code.

3.11(2) The definitions and interpretations contained in section 88.3 shall be applicable to such terms when used in this chapter.

3.11(3) *"Working days"* means Mondays through Fridays but shall not include Saturdays, Sundays or federal or state holidays. In computing 15 working days, the day of receipt of any notice shall not be included, and the last day of the 15 working days shall be included.

3.11(4) *"Field safety technician"* means a person authorized by the labor commissioner of the Iowa bureau of labor to conduct inspections.

3.11(5) *"Inspection"* means any inspection of an employer's factory, plant, establish-

ment, construction site or other area, workplace or environment where work is performed by an employee of an employer, and includes any inspection conducted pursuant to a filed complaint, and any followup inspection, accident investigation or other inspections conducted under the Act.

These rules are intended to implement chapter 88 of the Code.

[Filed August 29, 1972]

CHAPTER 4
RECORDING AND REPORTING OCCUPATIONAL INJURIES AND ILLNESSES

4.1(88) Purpose and scope. These rules provide for recordkeeping and reporting by employers covered under chapter 88 of the Code as necessary or appropriate for enforcement of the Act, for developing information regarding the causes and prevention of occupational accidents and illnesses, and for maintaining a program of collection, compilation and analysis of occupational safety and health statistics.

4.2(88) Log of occupational injuries and illnesses.

4.2(1) Each employer shall maintain in each establishment a log of all recordable occupational injuries and illnesses for that establishment, except that under the circumstances described in 4.2(2) an employer may maintain a log of occupational injuries and illnesses at a place other than the establishment. Each employer shall enter each recordable occupational injury and illness on the log as early as practicable but no later than six working days after receiving information that a recordable case has occurred. For this purpose, Occupational Safety and Health Administration Form 1 OSHA Form No. 100 or any private equivalent may be used. OSHA Form No. 100 or its equivalent shall be completed in the detail provided in the form and the instructions contained in OSHA Form No. 100. If an equivalent to OSHA Form No. 100 is used, such as a printout from data-processing equipment, the information shall be as readable and comprehensible to a person not familiar with the data-processing equipment as the OSHA Form No. 100 itself.

4.2(2) Any employer may maintain the log of occupational injuries and illnesses at a place other than the establishment or by means of data-processing equipment, or both, under the following circumstances:

a. There is available at the place where the log is maintained sufficient information to complete the log to a date within six working days after receiving information that a recordable case has occurred, as required by 4.2(1).

b. At each of the employer's establishments, there is available a copy of the log which reflects separately the injury and illness experience of that establishment complete and current to a date within 45 calendar days.

4.3(88) Period covered. Logs shall be established on a calendar year basis. The initial log shall include recordable occupational injuries and illnesses occurring on or after July 1, 1972.

4.4(88) Supplementary record.

4.4(1) In addition to the log of occupational injuries and illnesses provided for under 4.2(88), each employer shall have available for inspection at each establishment within six working days after receiving information that a recordable case has occurred, a supplementary record for each occupational injury or illness for that establishment. The record shall be completed in the detail prescribed in the instructions accompanying Occupational Safety and Health Administration OSHA Form No. 101. Workmen's compensation, insurance or other reports are acceptable alternative records if they contain the information required by OSHA Form No. 101. The state of Iowa Form L-1/WC-1 meets the above requirements. If no acceptable alternative record is maintained for other purposes, OSHA Form No. 101 shall be used or the necessary information shall be otherwise maintained.

4.4(2) Pursuant to section 88.18 all employers shall report in writing to the Iowa bureau of labor any occupational injury or illness that results in two or more lost workdays. This report shall be made as early as practicable, but no later than six working days after receiving information that an occupational injury or illness has occurred that will result in two or more lost workdays. The forms to be used for reporting under this rule are those prescribed under 4.4(1).

4.5(88) Annual summary.

4.5(1) Each employer shall compile an annual summary of occupational injuries and illnesses for each establishment. Each annual summary shall be based on the information contained in the log of occupational injuries and illnesses for that particular establishment. OSHA Form No. 102 shall be used for this purpose, and shall be completed in the form and detail as provided in the instructions contained therein.

4.5(2) The summary shall be completed no later than one month after the close of each calendar year beginning with the calendar year 1972.

4.5(3) Each employer, or the officer or employee of the employer who supervises the preparation of the annual summary of occupational injuries and illnesses, shall certify that the annual summary of occupational injuries and illnesses is true and complete. The certification shall be accomplished by affixing the signature of the employer, or the officer or employee of the employer who supervises the preparation of the annual summary of occupational injuries and illnesses, to the lower right hand corner of the annual summary or by appending a separate statement to the annual summary certifying that the annual summary is true and complete.

4.5(4) Each employer shall post a copy of the establishment's summary in each establishment in the same manner that notices are required to be posted in 3.1(88). The summary covering the previous calendar year shall be posted no later than February 1, and shall remain in place until March 1. For employees who do not primarily report or work at a single establishment, or who do not report to any fixed establishment on a regular basis, employers shall satisfy this posting requirement by presenting or mailing a copy of the summary during the month of February of the following year to each such employee who receives pay during that month. For multiestablishment employers where operations have closed down in some establishments during the calendar year, it will not be necessary to post summaries for those establishments.

A failure to comply with the requirements of this subrule may result in the issuance of citations and assessment of penalties pursuant to sections 88.7 and 88.14.

4.6(88) Retention of records. Records provided for in 4.2(88), 4.4(1) and 4.5(1) shall be retained in each establishment for five years following the end of the year to which they relate.

4.7(88) Access to records. Records provided for in 4.2(88), 4.4(1) and 4.5(1) shall be available for inspection and copying by field safety technicians during any occupational safety and health inspection provided for under section 88.6 or by the labor commissioner or his designee for the purposes of any statistical compilation under section 88.18.

4.8(88) Reporting of fatality or multiple hospitalization accidents. Within 48 hours after the occurrence of an employment accident which is fatal to one or more employees or which results in hospitalization of five or more employees, the employer of any employees so injured or killed shall report the accident either orally or in writing to the Iowa bureau of labor. The reporting may be by telephone or telegraph. The report shall relate the circumstances of the accident, the number of fatalities and the extent of any injuries. The labor commissioner may require such additional reports, in writing or otherwise, as he deems necessary, concerning the accident.

4.9(88) Falsification or failure to keep records or reports. Falsification of or failure to maintain records or file reports as required by this chapter, or in the details required by forms and instructions issued under this chapter, may result in the issuance of citations and assessment of penalties as provided for in sections 88.7, 88.8 and 88.14.

4.10(88) Change of ownership. Where an establishment has changed ownership, the employer shall be responsible for maintaining records and filing reports only for that period of the year during which he owned such establishment. However, in the case of any change of ownership, the employer shall preserve those records, if any, of the prior ownership which are required to be kept under this chapter. The records shall be retained at each establishment to which they relate, for the period or remainder thereof, required under 4.6(88).

4.11(88) Definitions.

4.11(1) *"Act"* means the Iowa Occupational Safety and Health Act of 1972, chapter 88 of the Code.

4.11(2) The definitions and interpretations contained in section 88.3 shall be applicable to such terms when used in this chapter.

4.11(3) *"Recordable occupational injuries or illnesses"* are any occupational injuries or illnesses which result in:

a. Fatalities, regardless of the time between the injury and death, or the length of the illness; or

b. Lost workday cases, other than fatalities, which result in lost workdays; or

c. Nonfatal cases without lost workdays which result in transfer to another job or termination of employment, or require medical treatment (other than first aid) or involve: Loss of consciousness or restriction of work or motion. This category also includes any diagnosed occupational illnesses which are reported to the employer but are not classified as fatalities or lost workday cases.

4.11(4) *"Medical treatment"* includes treatment administered by a physician or by registered professional personnel under the standing orders of a physician. Medical treatment does not include first aid treatment even though provided by a physician or registered professional personnel.

4.11(5) *"First aid"* is any one-time treatment and any followup visit for the purpose of observation, of minor scratches, cuts, burns, splinters and so forth, which do not ordinarily require medical care. Such one-time treatment and followup visit for the purpose of observation is considered first aid even though provided for by a physician or registered professional personnel.

4.11(6) *"Lost workdays"* is the number of days (consecutive or not) after, but not including, the day of injury or illness during which the employee would have worked but could not do so; that is, could not perform all or any part of his normal assignment during all or any part of the workday or shift, because of the occupational injury or illness.

4.11(7) *Establishment.*

a. A single physical location where business is conducted or where services or industrial operations are performed. (For example: A factory, mill, store, hotel, restaurant, movie theatre, farm, ranch, bank, sales office, warehouse, central administrative office or governmental agency or

subdivision thereof). Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity shall be treated as a separate establishment.

b. For firms engaged in activities such as agriculture, construction, transportation, communications and electric, gas and sanitary services which may be physically dispersed, records may be maintained at a place to which employees report each day.

c. Records for personnel who do not primarily report or work at a single establishment, and who are generally not supervised in their daily work, such as traveling salesmen, technicians, engineers etc., shall be maintained at the location from which they are paid or the base from which personnel operate to carry out their activities.

4.12(88) Petitions for recordkeeping exceptions.

4.12(1) *Submission of petition.* Any employer who wishes to maintain records in a manner different from that required by this chapter may submit a petition containing the information specified in 4.12(3) to the labor commissioner of the Iowa bureau of labor.

4.12(2) *Opportunity for comment.* Affected employees or their representatives shall have an opportunity to submit written data, views or arguments concerning the petition to the labor commissioner within ten working days following the receipt of notice under 4.12(3)"*e*".

4.12(3) *Contents of petition.* A petition filed under 4.12(1) shall include:

a. The name and address of the applicant;

b. The address of the place or places of employment involved;

c. Specifications of the reasons for seeking relief;

d. A description of the different recordkeeping procedures which are proposed by the applicant;

e. A statement that the applicant has informed his affected employees of the petition by giving a copy thereof to them or to their authorized representative and by posting a statement giving a summary of the petition and by other appropriate means. A statement posted pursuant to this paragraph shall be posted in each establishment in the same manner that notices are required to be posted under 3.1(88). The applicant shall also state that he has informed his affected employees of their rights under 4.12(2);

f. In the event an employer has more than one establishment he shall submit a list of the states in which such establishments are located and the number of establishments in each such state. In the further event that certain of the employer's establishments would not be affected by the petition, the employer shall identify every establishment which would be affected by the petition and given the state in which they are located;

g. Any petition granted pursuant to 29 C.F.R. 1904.13 shall be granted automatically as if it were applied for pursuant to this rule.

4.13(88) Description of statistical program. Section 88.18 directs the labor commissioner to develop and maintain a program of collection, compilation and analysis of occupational safety and health statistics. The program shall consist of periodic surveys of occupational injuries and illnesses.

4.14(88) Duties. Upon receipt of an Occupational Injuries and Illnesses Survey Form, OSHA Form No. 103, the employer shall promptly complete the form in accordance with the instructions contained therein and return it to the Iowa bureau of labor.

4.15(88) Employees not in fixed establishments. Employers of employees engaged in physically dispersed operations such as occur in construction, installation, repair or service activities who do not report to any fixed establishment on a regular basis but are subject to common supervision may satisfy the provisions of 4.2(88), 4.4(1) and 4.6(88) with respect to such employees by:

1. Maintaining the required records for each operation or group of operations which is subject to common supervision (field superintendent, field supervisor, etc.) in an established central place;
2. Having the address and telephone number of the central place available at each worksite; and
3. Having personnel available at the central place during normal business hours to provide information from the records maintained there by telephone and by mail.

These rules are intended to implement chapter 88 of the Code.

[Filed July 13, 1972; amended August 29, 1972, December 1, 1972]

CHAPTER 5
RULES OF PRACTICE FOR VARIANCES, LIMITATIONS, VARIATIONS, TOLERANCES AND EXEMPTIONS

5.1(88) Purpose and scope. This chapter contains rules of practice for administrative proceedings to grant variances and other relief under sections 88.5(3), 88.5(6), and 88.5(7). These rules shall be construed to secure a prompt and just conclusion of proceedings subject thereto.

5.2(88) Definitions. As used in this chapter unless the context clearly requires otherwise -

5.2(1) "*Act*" means the Iowa Occupational Safety and Health Act of 1972, chapter 88 of the Code.

5.2(2) The definitions and interpretations contained in section 88.3 shall be applicable to such terms when used in this chapter.

5.2(3) *"Person"* means an individual, partnership, association, corporation, business trust, legal representative, an organized group of individuals, or an agency, authority or instrumentality of the state of Iowa.

5.2(4) *"Party"* means a person admitted to participate in a hearing conducted in accordance with 5.14(88)-5.21(88). An applicant for relief and any affected employee shall be entitled to be named parties. For the purpose of special variance hearing procedures under section 88.5(7), the conflicting federal regulatory agency shall also be a party. The bureau of labor shall be deemed to be a party without the necessity of being named.

5.2(5) *"Affected employee"* means an employee who would be affected by the grant or denial of a variance, or any one of his authorized representatives, such as his collective bargaining agent.

5.2(6) *"Hearing examiner"* means the labor commissioner or his designee.

5.2(7) *"Variance"* means variances, limitations, variations, tolerances and exemptions for temporary variances section 88.5(3), permanent variances section 88.5(6), and special variances section 88.5(7), unless otherwise specified.

5.3(88) Petition for amendments to this chapter. Any person may at any time petition the labor commissioner in writing to revise, amend or revoke any provisions of this chapter. The petition should set forth either the terms or the substance of the rule desired, with a concise statement of the reason therefor and the effects thereof. The labor commissioner may propose a change on his own motion or upon the written petition of any person.

5.4(88) Effect of variances. All variances granted pursuant to this chapter shall have only future effect. In his discretion, the labor commissioner may decline to entertain an application for a variance on a subject or issue concerning which a citation has been issued to the employer involved, and a proceeding on the citation or a related issue concerning a proposed penalty or period of abatement is pending before the Occupational Safety and Health Review Commission until the completion of such proceedings.

5.5(88) Notice of a granted variance. Notice of every final action granting a variance under this chapter shall be published in one or more newspapers in the state having a state-wide circulation. Every such final action shall specify the alternative to the standard involved which the particular variance permits.

5.6(88) Form of documents; subscription; copies.

5.6(1) No particular form is prescribed for applications and other papers which may be filed in proceedings under this chapter. However, any application and other papers shall be clearly legible. An original and six copies of any application or other papers shall be filed. The original shall be typewritten. Clear carbon copies or printed or processed copies are acceptable copies.

5.6(2) Each application or other paper which is filed in proceedings under this chapter shall be subscribed by the person filing the same or by his attorney or other authorized representative.

5.7(88) Temporary variance.

5.7(1) *Application for variance.* Any employer or class of employers desiring a variance from a standard, or portion thereof, authorized by section 88.5(3) may file a written application containing the information specified in 5.7(2) with the labor commissioner.

5.7(2) *Contents.* An application filed pursuant to 5.7(1) shall include:

a. The name and address of the applicant;

b. The address of the place or places of employment involved;

c. Any request for a hearing, as provided in this chapter; and

d. The statements and certifications required by section 88.5(3).

5.7(3) *Interim order.*

a. Application. An application may also be made for an interim order to be effective until a decision is rendered on the application for the variance filed previously or concurrently. An application for an interim order may include statements of fact and arguments as to why the order should be granted. The labor commissioner may rule ex parte upon the application.

b. Notice of denial of application. If an application filed pursuant to 5.7(3) *"a"* is denied, the applicant shall be given prompt notice of the denial, which shall include, or be accompanied by, a brief statement of the grounds therefor.

c. Notice of the grant of an interim order. If an interim order is granted, a copy of the order shall be served upon the applicant for the order and other parties and notice of the terms of the order shall be made in accordance with the notice requirements of 5.5(88). It shall be a condition of the order that the affected employer shall give notice thereof to affected employees by the same means to be used to inform them of an application for a variance [see 5.8(2) *"e"* (2)].

5.8(88) Permanent variance.

5.8(1) *Application for variance.* Any employer or class of employers desiring a variance authorized by section 88.5(6) may file a written

application containing the information specified in 5.8(2) with the labor commissioner.

5.8(2) *Contents.* An application filed pursuant to 5.8(1) shall include:

a. The name and address of the applicant;

b. The address of the place or places of employment involved;

c. A description of the conditions, practices, means, methods, operations or processes used or proposed to be used by the applicant;

d. A statement showing how the conditions, practices, means, methods, operations or processes used or proposed to be used would provide employment and places of employment to employees which are as safe and healthful as those required by the standard from which a variance is sought;

e. A certification that the applicant has informed his employees of the application by (1) giving a copy thereof to their authorized representative; (2) posting a statement giving a summary of the application and specifying where a copy may be examined, at the place or places where notices to employees are normally posted (or in lieu of such summary, the posting of the application itself); and (3) by other appropriate means when necessary;

f. Any request for a hearing, as provided in this chapter; and

g. A description of how employees have been informed of the application and of their right to petition the labor commissioner for a hearing.

5.8(3) *Interim order.* Procedures for applications and for notifications of a denial or grant of interim orders shall be in the same manner as provided for in 5.7(3).

5.9(88) Special variance.

5.9(1) *Application for variance.* Any employer, or class of employers, desiring a special variance authorized by section 88.5(7) may file a written application containing the information specified in 5.9(2) with the labor commissioner.

5.9(2) *Contents.* An application filed pursuant to 5.9(1) shall include:

a. The name and address of the applicant;

b. The address of the place or places of employment involved;

c. The name of the federal agency and a designation of the standard, rule, or regulation allegedly in conflict with an Iowa bureau of labor standard, rule or regulation;

d. A designation of the Iowa bureau of labor standard, rule or regulation allegedly in conflict;

e. A description of the conditions, means, methods, operations, and procedures used and a specific detailed statement as to how or where the conflict exists between federal agency or agencies and the Iowa bureau of labor;

f. A description of the conditions, practices, means, methods, operations or processes used or proposed to be used by the applicant;

g. A statement showing how the conditions, practices, means, methods, operations or processes used or proposed to be used would take into consideration the safety and health of the employees involved;

h. A certification that the applicant has informed his employees of the application by (1) giving a copy thereof to their authorized representative; (2) posting a statement giving a summary of the application and specifying where a copy may be examined, at the place or places where notices to employees are normally posted (or in lieu of such summary, the posting of the application itself); and (3) by other appropriate means when necessary;

i. Any request for a hearing, as provided in this chapter; and

j. A description of how employees have been informed of the application and of their right to petition the labor commissioner for a hearing.

5.9(3) *Interim order.* Procedures for applications and for notifications of a denial or grant of interim orders shall be in the same manner as provided for in 5.7(3).

5.10(88) Modification and revocation of rules or orders.

5.10(1) An affected employer or an affected employee may apply in writing to the labor commissioner for a modification or revocation of a rule or order issued under section 88.5(3), 88.5(6), or 88.5(7). The application shall contain:

a. The name and address of the applicant;

b. A description of the relief which is sought;

c. A statement setting forth with particularity the grounds for relief;

d. If the applicant is an employer, a certification that the applicant has informed his affected employees of the application by: (1) Giving a copy thereof to their authorized representative; (2) posting at the place or places where notices to employees are normally posted, a statement giving a summary of the application and specifying where a copy of the full application may be examined (or, in lieu of the summary, posting the application itself); and (3) other appropriate means when necessary;

e. If the applicant is an affected employee, a certification that a copy of the application has been furnished to the employer; and

f. Any request for a hearing, as provided in this chapter.

5.10(2) The labor commissioner may on his own motion proceed to modify or revoke a rule or order issued under section 88.5(3), 88.5(6), or 88.5(7). In such event, the labor commissioner shall cause a notice of his intention to be published in accordance with the notice requirements of

5.5(88), affording interested persons an opportunity to submit written data, views or arguments regarding the proposal and informing the affected employer and employees of their right to request a hearing, and shall take such other action as may be appropriate to notify the affected employer and employees. Any request for a hearing shall include a short and plain statement of:

a. How the proposed modification or revocation would affect the requesting party; and

b. What the requesting party would seek to show on the subjects or issues involved.

5.11(88) Action on applications.

5.11(1) *Defective applications.* If an application filed pursuant to 5.7(1), 5.8(1), 5.9(1), or 5.10(1) does not conform to the applicable rule, the labor commissioner may deny the application. Prompt notice of the denial of an application shall be given to the applicant and shall include, or be accompanied by, a brief statement of the grounds for the denial. A denial of an application pursuant to this rule shall be without prejudice to the filing of another application.

5.11(2) *Adequate applications.* If an application has not been denied pursuant to 5.11(1), the labor commissioner shall cause notice of the filing of the application to be made in accordance with 5.5(88).

A notice of the filing of an application shall include:

a. The terms or an accurate summary, of the application;

b. A reference to the section of the Act under which the application has been filed;

c. An invitation to interested persons to submit within a stated period of time written data, views or arguments regarding the application; and

d. Information to affected employers and employees of any right to request a hearing on the application.

5.12(88) Requests for hearings on applications.

5.12(1) *Request for hearing.* Within the time allowed by a notice of the filing of an application, any affected employer or employee may file with the labor commissioner, in quadruplicate, a request for a hearing on the application.

5.12(2) *Contents of a request for a hearing.* A request for a hearing filed pursuant to 5.12(1) shall include:

a. A concise statement of facts showing how the employer or employee would be affected by the relief applied for;

b. A specification of any statement or representation in the application which is denied, and a concise summary of the evidence that would be adduced in support of each denial; and

c. Any views or arguments on any issue of fact or law presented.

5.13(88) Consolidation of proceedings. The labor commissioner on his own motion or that of any party may consolidate or contemporaneously consider two or more proceedings which involve the same or closely related issues.

5.14(88) Notice of hearing.

5.14(1) *Service.* Upon request for a hearing as provided in this chapter, or upon his own initiative, the labor commissioner shall serve, or cause to be served, a reasonable notice of hearing.

5.14(2) *Contents.* A notice of hearing served under 5.14(1) shall include:

a. The time, place, and nature of the hearing;

b. The legal authority under which the hearing is to be held; and

c. A specification of issues of fact and law.

5.15(88) Manner of service. Service of any document upon any party may be made by personal delivery of, or by mailing, a copy of the document to the last known address of the party. The person serving the document shall certify to the manner and the date of the service.

5.16(88) Hearing examiner; powers and duties.

5.16(1) *Powers.* The labor commissioner or his designee shall preside over the hearing and shall have all powers necessary or appropriate to conduct a fair, full and impartial hearing, including the following:

a. To administer oaths and affirmations;

b. To rule upon offers of proof and receive relevant evidence;

c. To provide for discovery and to determine its scope;

d. To regulate the course of the hearing and the conduct of the parties and their counsel therein;

e. To consider and rule upon procedural requests;

f. To hold conferences for the settlement or simplification of the issues by consent of the parties;

g. To make, or to cause to be made, an inspection of the employment or place of employment involved;

h. To make decisions in accordance with the Act and this chapter; and

i. To take any other appropriate action authorized by the Act or this chapter.

5.16(2) *Private consultation.* Except to the extent required for the disposition of ex parte matters, the hearing examiner may not consult a person or a party on any fact at issue, unless upon notice and opportunity for all parties to participate.

5.16(3) *Disqualification.* When the labor commissioner or his designee deems himself disqualified to preside, or to continue to preside, over

a particular hearing, he shall withdraw therefrom by notice on the record, and the labor commissioner shall designate another.

Any party who deems the labor commissioner or his designee for any reason to be disqualified to preside, or to continue to preside, over a particular hearing, may file with the labor commissioner a motion for disqualification and removal, such motion to be supported by affidavits setting forth the alleged ground for disqualification. The labor commissioner shall rule upon the motion. Such decision shall be deemed final for the purposes of judicial review under 5.24(88).

5.16(4) *Contumacious conduct; failure or refusal to appear or obey the rulings of the hearing examiner.* Contumacious conduct at any hearing before the hearing examiner shall be ground for exclusion from the hearing.

If a witness or a party refuses to answer a question after being directed to do so, or refuses to obey an order to provide or permit discovery, the hearing examiner may make such orders with regard to the refusal as are just and appropriate, including an order denying the application of an applicant or regulating the contents of the record of the hearing.

5.16(5) *Referral to Iowa rules of civil procedure.* On any procedural question not regulated by the Act or this chapter, the hearing examiner shall be guided to the extent practicable by any pertinent provisions of the Iowa rules of civil procedure.

5.17(88) Prehearing conferences.

5.17(1) *Convening conference.* Upon his own motion or the motion of a party, the labor commissioner or his designee may direct the parties or their counsel to meet with him for a conference to consider:

a. Simplification of the issues;

b. Necessity or desirability of amendments to documents for purposes of clarification, simplification, or limitation;

c. Stipulations, admissions of fact and of contents and authenticity of documents;

d. Limitation of the number of parties and of expert witnesses; and

e. Such other matters as may tend to expedite the disposition of the proceeding, and to assure a just conclusion thereof.

5.17(2) *Record of conference.* The labor commissioner or his designee shall make an order which recites the action taken at the conference, the amendments allowed to any documents which have been filed, and the agreements made between the parties as to any of the matters considered, and which limits the issues for hearing to those not disposed of by admissions or agreements; and such order when entered controls the subsequent course of the hearing, unless modified at the hearing, to prevent manifest injustice.

5.18(88) Consent findings and rules or orders.

5.18(1) At any time before the reception of evidence in any hearing, or during any hearing a reasonable opportunity may be afforded to permit negotiation by the parties of an agreement containing consent findings and a rule or order disposing of the whole or any part of the proceeding. The allowance of such opportunity and the duration thereof shall be in the discretion of the hearing examiner, after consideration of the nature of the proceeding, the requirements of the public interest, the representations of the parties and the probability of an agreement which will result in a just disposition of the issues involved.

5.18(2) *Contents.* Any agreement containing consent findings and rule or order disposing of a proceeding shall also provide:

a. That the rule or order shall have the same force and effect as if made after a full hearing;

b. That the entire record on which any rule or order may be based shall consist solely of the application and the agreement;

c. A waiver of any further procedural steps before the labor commissioner or his designee; and

d. A waiver of any right to challenge or contest the validity of the findings and of the rule or order made in accordance with the agreement.

5.18(3) *Submission.* On or before the expiration of the time granted for negotiations, the parties or their counsel may:

a. Submit the proposed agreement to the hearing examiner for his consideration; or

b. Inform the hearing examiner that agreement cannot be reached.

5.18(4) *Disposition.* In the event an agreement containing consent findings and rule or order is submitted within the time allowed therefor, the hearing examiner may accept such agreement by issuing a decision based upon the agreed findings.

5.19(88) Discovery.

5.19(1) *Perpetuating testimony.* Iowa Rules of Civil Procedure 159-166 are applicable for the taking of depositions for a variance hearing before the hearing examiner.

5.19(2) *Other discovery.* Whenever appropriate to a just disposition of any issue in a hearing, the hearing examiner may allow discovery by other appropriate procedures, such as by written interrogatories upon a party, production of documents by a party, or by entry for inspection of the employment or place of employment involved. Iowa Rules of Civil Procedure 121-134 and 140-158 shall be applicable to such authorized discovery procedures.

5.20(88) Hearings.

5.20(1) *Order of proceeding.* Except as may be ordered otherwise by the hearing examiner

the party applicant for relief shall proceed first at a hearing.

5.20(2) *Burden of proof.* The party applicant shall have the burden of proof.

5.20(3) *Evidence.*

a. Admissibility. A party shall be entitled to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts. Any oral or documentary evidence may be received, but a hearing examiner shall exclude evidence which is irrelevant, immaterial or unduly repetitious.

b. Testimony of witnesses. The testimony of a witness shall be upon an oath or affirmation administered.

c. Objections. If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination, or to the failure to limit such scope, he shall state briefly the grounds for such objection. Rulings on all objections shall appear in the record. Only objections made before the hearing examiner may be relied upon subsequently in a proceeding.

d. Proof for a special variance. Before a special variance may be granted, there must be proof that an actual conflict does exist. The proof required to establish such conflict is information in writing or oral testimony from a representative of the involved federal regulatory agency or agencies, substantiated by evidence, that there is a conflict between the standards, rules or regulations of the federal agency and those of the Iowa bureau of labor. Also, it must be proved that compliance with the Iowa bureau of labor standard, rule or regulation would subject the applicant to probable citation, penalty, or prosecution for violating such federal agency standard, rule or regulation.

5.20(4) *Official notice.* Official notice may be taken of any material fact not appearing in evidence in the record, which is among the traditional matters of judicial notice or concerning which the bureau of labor by reason of its functions is presumed to be expert: Provided, that the parties shall be given adequate notice, at the hearing or by reference in the hearing examiner's decision, of the matters so noticed, and shall be given adequate opportunity to show the contrary.

5.20(5) *Transcript.* Hearings shall be stenographically reported. Copies of the transcript may be obtained by the parties upon written application filed with the reporter, and upon the payment of fees at the rate provided in the agreement with the reporter.

5.21(88) Decisions of hearing examiner.

5.21(1) *Proposed findings of fact, conclusions and rules or orders.* Within ten days after receipt of notice that the transcript of the testimony has been filed or such additional time as the hearing examiner may allow, each party may file with the hearing examiner proposed findings of fact, conclusions of law, and rule or order, together with supporting briefs shall be served on all other parties, and shall refer to all portions of the record and to all authorities relied upon in support of each proposal.

5.21(2) *Decision.* Within a reasonable time after the time allowed for the filing of proposed findings of fact, conclusions of law, and rule or order, the hearing examiner shall make his decision which shall be reviewed and countersigned by the labor commissioner. The labor commissioner shall serve the decision upon each party, and the decision shall become final upon the twentieth day after service thereof. The decision shall include: (1) A statement of findings and conclusions, with reasons and bases therefor, upon each material issue of fact, law, or discretion presented on the record, and (2) the appropriate rule, order, relief or denial thereof. The decision shall be based upon a consideration of the whole record and shall state all facts officially noticed and relied upon. It shall be made on the basis of a preponderance of reliable and probative evidence.

5.21(3) *Grant of a special variance.* The grant of a special variance shall be renewable upon review by the labor commissioner at six-month intervals beginning on the date the decision becomes final under 5.21(2). If at the time of the review the labor commissioner finds that there has been a change in the standard, rule, or regulation or a change in the interpretation of such standard, rule or regulation of the federal agency or the Iowa bureau of labor affecting or resolving the conflict on which the special variance was granted, the labor commissioner shall set the case for an evidentiary hearing in accordance with 5.14(88)-5.21(88). Enforcement shall be stayed during review and hearing procedures under this rule.

Affected employees shall be notified by their employer of a renewal or a refusal to renew by: (1) Giving a copy of the labor commissioner's notice to the authorized employee representative; (2) posting a copy of the commissioner's notice at the place or places where notices to employees are normally posted; and (3) other appropriate means.

5.22(88) Motion for summary decision.

5.22(1) Any party may, at least 20 days before the date fixed for any hearing, move with or without supporting affidavits for a summary decision in his favor on all or any part of the proceeding. Any other party may, within ten days after service of the motion, serve opposing affidavits or countermove for summary decision. The hearing examiner may, in his discretion, set the matter for argument and call for the submission of briefs.

5.22(2) The filing of any documents under 5.22(1) shall be with the labor commissioner,

and copies of any such documents shall be served in accordance with 5.15(88).

5.22(3) The hearing examiner may grant such motion if the pleadings, affidavits, material obtained by discovery or otherwise obtained, or matters officially noticed show that there is no genuine issue as to any material fact and that a party is entitled to summary decision. The hearing examiner may deny such motion whenever the moving party denies access to information by means of discovery to a party opposing the motion.

5.22(4) Affidavits shall set forth such facts as would be admissible in evidence in the hearing and shall show affirmatively that the affiant is competent to testify to the matters stated therein. When a motion for summary decision is made and supported as provided in this rule, a party opposing the motion may not rest upon the mere allegations or denials of his pleading; his response must set forth specific facts showing that there is a genuine issue of fact for the hearing.

5.22(5) Should it appear from the affidavits of a party opposing the motion that he cannot for reasons stated present by affidavit facts essential to justify his opposition, the hearing examiner may deny the motion for summary decision or may order a continuance to permit affidavits to be obtained or discovery to be had or may make such other order as is just.

5.23(88) Summary decision.

5.23(1) *No genuine issue of material fact.*

a. Where no genuine issue of a material fact is found to have been raised, the hearing examiner may issue a decision to become final 20 days after service thereof.

b. A decision made under 5.23(1) shall include a statement of: (1) Findings and conclusions, and the reasons or bases therefor, on all issues presented; and (2) the terms and conditions of the rule or order made.

c. A copy of the decision under this rule shall be served on each party.

5.23(2) *Hearings on issues of fact.* Where a genuine material question of fact is raised, the hearing examiner shall, and in any other case he may, set the case for an evidentiary hearing in accordance with 5.14(88)–5.21(88).

5.24(88) Finality for purposes of judicial review. A preliminary, procedural or intermediate agency action or ruling is immediately reviewable if review of the final agency decision would not provide an adequate remedy. The filing of the petition does not itself stay enforcement of the agency decision. The agency may grant, or the reviewing court may order, a stay upon appropriate terms.

These rules are intended to implement chapter 88 of the Code.

CHAPTER 6
EDUCATIONAL PROGRAMMING

6.1(88) Duties of the labor safety educator. It shall be the duty of the labor safety educator to prepare and present programs and information for the education and training of field safety technicians and employers and employees in the recognition, avoidance and prevention of unsafe or unhealthful working conditions in employment.

6.2(88) Exemption from inspection and citation. For purposes of inspection and investigation under section 88.6 and citation under section 88.7 of the Code, the labor safety educator, while performing the duties described in 6.1(88), shall not be considered as an authorized representative of the labor commissioner. The labor safety educator shall comply with the duties and responsibilities imposed on an authorized representative of the labor commissioner under all other provisions of the Iowa occupational safety and health Act of 1972, except those exempted by this rule.

These rules are intended to implement chapter 88 of the Code.

RAILROAD DIVISION

CHAPTER 60
SANITATION AND SHELTER RULES FOR RAILROAD EMPLOYEES

60.1(477) Definitions. As used herein or in connection with these rules, the following terms shall mean:

60.1(1) *Bunk or section house.* Any building or portion thereof, excepting a family dwelling, in which persons employed by railroad companies are furnished sleeping or living accommodations.

60.1(2) *Caboose.* Any car or coach used on a train to carry the train crew.

60.1(3) *Camp car.* Any group of sleeping, dining, kitchen or recreation cars, on or off rail, furnished for the use of any one gang or group of employees.

60.1(4) *Commissioner.* The commissioner of labor.

60.1(5) *Company.* A common carrier railroad company as an employer.

60.1(6) *Employee.* Any person employed by a company to which these rules apply.

60.1(7) *Dressing room.* A room used by employees either as a dressing room, or as a rest room, or for both purposes.

60.1(8) *Number of employees.* Unless otherwise specified, the maximum number of employees going on or coming off shift within any single hour.

60.1(9) *Railroads.* Common carrier railroads.

60.1(10) *Sanitary.* Free from or effective in preventing or checking agencies injurious to health; especially filth and infection.

60.1(11) *Station.* A location where freight or passenger traffic is ordinarily received and delivered and at which an employee is regularly assigned for duty.

60.1(12) *Terminal.* A location where engine and train crews in yard and train service and switchmen, switch tenders and car clerks are regularly required to report for or relieved from duty.

60.1(13) *Toilets.* Fixtures such as flush toilets, chemical closets, incinerator type toilets, or privies for the purpose of defecation, unless otherwise specified.

60.1(14) *Usual place of employment.* The place where an employee works with a reasonable measure of continuity throughout the major part of his company service.

60.1(15) *Yards.* Yards, section headquarters, locomotive and car shops.

60.1(16) *Office work area.* A yard office, station, depot, terminal, or freight, baggage and express office which is a permanent or semi-permanent stationary facility located on railroad property and a usual place of employment for the performance of clerical or work concerned with or identified with the office functions of the company.

60.2(477) Water Supply.

60.2(1) *General Specifications.* Water supplied for domestic and drinking purposes under these regulations shall meet the standards of the state department of health. Cross-connections between a potable and impotable water supply are prohibited.

60.2(2) *Drinking water.*

a. An adequate supply of cool, clean, sanitary water, satisfactory for drinking purposes, shall be made available to all employees. Drinking water shall be obtained only from sources approved by the state department of health or an approved water line.

b. When necessary, this water shall be provided in suitable, clean, sterilized and sanitary containers conveniently placed for the use of employees, but not in toilet rooms. Each container shall be equipped with an approved type of fountain, approved faucet or other approved dispenser.

c. All containers used to furnish drinking water shall be thoroughly cleansed and sterilized as often as necessary to assure a clean and sanitary water supply.

d. The common drinking cup for public use is prohibited, either single service containers or drinking fountains with sanitary angle head, shall be used in lieu thereof.

60.2(3) *Required locations.*

a. Running facilities. Drinking water which meets the specifications of 60.2(1) and 60.2(2) shall be provided on the following equipment when in use and when offered for use at terminals having servicing or replenishing facilities:

(1) All locomotives.

(2) Baggage and express cars (where employees are assigned for work en route).

(3) Cabooses.

(4) Camp cars.

b. Stationary facilities. Drinking water, according to the general specifications shall be made available at the following locations:

(1) All terminals.

(2) All yard offices.

(3) All stations.

(4) All freight, baggage, and express offices (located on railroad property).

(5) All shops and engine houses.

(6) All bunk or section houses and section headquarters.

(7) All lunchrooms located on railroad property.

(8) All permanent watchmen shelters at public highway crossings.

(9) All maintenance of way camps.

(10) All office work areas.

60.2(4) *Washing facilities.*

a. General specifications—wash basins—lavatories.

(1) Wash basins or lavatories shall be made of vitrified glazed earthenware, vitreous enameled metal, or other smooth finished material, impervious to moisture.

(2) Twenty-four inches of trough or circular wash basin shall be considered the equivalent of one wash basin. The trough or circular wash basins shall not be equipped with a plug or stopper.

(3) Spring closing hand operated faucets are prohibited in trough wash sinks, or circular basins.

b. Wash basins—availability.

(1) An adequate number of wash basins or lavatories for maintaining personal cleanliness shall be provided within reasonable access for all employees normally assigned to work at the following locations: All terminals, all yard offices, all stations, all freight, baggage and express offices (located on railroad property), all shops and engine houses, all lunchrooms located on railroad property and at all bunk or section houses.

(2) There shall be provided one lavatory for every ten employees (men or women) or portion thereof, up to 100 persons; and over 100 persons one lavatory for each additional 15 persons or portion thereof.

(3) At least one wash basin shall be located in or adjacent to each toilet room.

c. Wash basins—supplies.

(1) Hot and cold running water preferably a combination shall be supplied to wash basins.

(2) Mechanical drying facilities or individual towels, either paper or cloth, shall be provided. (The use of common towels is prohibited.)

(3) Waste receptacles shall be provided for used paper towels.

(4) Soap or other suitable cleansing agent shall be supplied at each wash basin.

(5) All supplies shall be adequate to meet the needs for which they are intended, and shall be so maintained by the employer.

(6) Employees shall exercise care to see that unnecessary waste of supplies does not occur.

60.2(5) *Showers, locker rooms, dressing rooms and lockers.*

a. Showers.

(1) Showers shall be required when in the judgement of the bureau of labor such facilities are necessary at specified locations to protect employees whose work involves exposure to poisonous, infectious or irritating material or to excessive dirt, heat fumes or vapors or other materials or substances injurious to health. Such shower facilities shall be provided in conjunction with adequate and necessary locker or dressing room facilities.

(2) Showers shall be provided with a spray fixture connected to an ample supply and pressure of hot and cold water, preferably mixed by a mixing valve.

(3) Each shower room or compartment shall be constructed of material impervious to moisture.

(4) Each shower compartment shall be not less than 36 inches in width and 36 inches in depth.

b. Lockers or dressing rooms.

(1) In all places of employment where, because of the nature of the work, it is necessary to change clothing, a locker room shall be provided separated from toilet rooms by solid partitions and doors. Such locker rooms shall have not less than 80 square feet of floor space per ten employees, or fraction, and for each additional employee not less than four additional square feet shall be added thereto. Necessary furniture such as benches and tables shall be provided.

(2) Such locker or dressing rooms shall be properly lighted, heated to a minimum of 65°F. and adequately ventilated. Where practicable cross-ventilation shall be provided.

c. Lockers. In all places of employment where the nature of the employment requires a change of clothing, individual metal lockers shall be provided. The dimensions of metal lockers shall be not less than 12 inches wide, 18 inches deep and 72 inches high, exclusive of legs or other base. The lockers shall be equipped with a shelf and with not less than one clothes hook for each side or equivalent hanger bar, and also sufficient openings in the door for purposes of ventilation. Wooden lockers are prohibited.

d. Separate facilities for women.

(1) In instances where women or girls are employed in such activities, the showers, lockers and dressing rooms used by them shall be separate and apart from those used by the men and boys.

(2) These shall have separate entrances and exits and shall be so marked.

60.3(477) Toilets.

60.3(1) *General.*

a. Where running water and sewer or septic tank connections are reasonably available, flush-type toilets and urinals shall be maintained.

b. Chemical toilets or privies may only be used where it is impractical to install inside toilet and urinal facilities.

c. No privy, urinal, cesspool, septic tank or other receptacle for human excrement shall be constructed, maintained or used, except those maintained on moving equipment, which directly or indirectly drains or discharges over, into or upon the surface of the grounds, or into the waters of the state, either directly or indirectly, unless the contents of such urinal, cesspool, septic tank or receptacle for human excrement are subjected to some recognized sterilization treatment approved by the state department of health.

60.3(2) *Waterclosets.*

a. Every flush toilet shall have a rim flush bowl or be so constructed as to prevent the accumulation of fecal matter on the bowl. The bowl shall be constructed or vitrified glazed earthenware, enameled metal, or other smooth finished material impervious to moisture.

b. Every such bowl shall be so installed that the surroundings and floor space can be easily cleaned.

c. No pan, plunger or wash-out water closets are permitted except that pan or double-pan types are permitted for running facilities.

d. Every flush toilet shall have a separate hinged seat made of a material, other than metal, which does not absorb moisture or which shall be finished with varnish or other substances resistant to moisture.

60.3(3) *Urinals.*

a. Every urinal shall be made of vitrified glazed earthenware, enameled metal or other smooth finished material impervious to moisture.

b. Every urinal shall be located within a toilet room.

c. Twenty-four inches of trough urinal shall be equivalent to an individual urinal.

d. Wherever a slab urinal is installed, the floor, for a distance of not less than 24 inches in front of the urinal, shall be sloped toward the urinal drain, and adequate splash guards shall be installed.

e. Every urinal shall be flushed from a water-supplied tank or through valve, and flush valves shall be installed with an approved backflow preventer. Every such tank shall furnish an adequate quantity of water for each discharge for every fixture. In place of such discharge from a tank or flush valve, water may be allowed to run continuously over slab or trough urinals.

f. Clear floor space allowed for each urinal or its equivalent shall be not less than two feet in width, adequate passage shall be allowed for.

60.3(4) *Chemical toilets.* All chemical toilets installed must be of a type approved by the bureau of labor. Containers shall be charged with chemical solution of proper strength and their contents shall be agitated daily with proper devices provided for that purpose. When containers are more than two-thirds full the contents shall be disposed of in an approved manner, such as by the burial or into a public sewer system. The stacks connecting the seats with the containers shall be cleaned as often as is necessary to keep them in a clean and sanitary condition.

60.3(5) *Incinerator toilets.* An incinerator toilet may be described as containing a receptacle for toilet waste to which intense heat is applied obtained from electrical current, gas or some heat producing agent.

a. All incinerator toilets used on railroad equipment in the state of Iowa must be of a type approved by the bureau of labor.

b. The installation and method of venting must be approved by the bureau of labor.

c. Clear and concise instructions must be provided by the railroad company to insure that the units are operated correctly.

60.3(6) *Privies.*

a. All privies shall be located so as to avoid contaminating any water of the state.

b. A suitable approach, such as concrete, gravel or cinder walk shall be provided.

c. Privies shall be constructed and maintained insect and rodent proof.

d. Every privy shall be provided with a door and such door shall be self-closing.

e. The lids over the seats shall be so constructed as to fall into a closed position when the seat is not occupied.

f. The pit, or vault shall be ventilated to the outside air by means of a stack protected at its outlet and by screens.

g. Individual seats shall be provided in accordance with the ratio hereinafter set forth.

60.3(7) *Toilet rooms — specifications for.*

a. Separation.

(1) No toilet room shall have direct communication with any room in which unwrapped food products are prepared, stored, handled or sold, unless separated from said room by a self-closing door maintained in operating condition.

(2) Separate toilet facilities shall be provided for each sex, and each toilet room shall be plainly marked by a sign reading "MEN" or "WOMEN", as the case might be.

(3) There shall be no direct connection between toilet rooms for men and women. Each shall have a separate entrance, and each door leading thereto shall have an automatic closing device maintained in operating condition.

b. Compartments. Each water closet in toilet rooms containing more than one water closet, or water closets, together with one or more urinals, shall be in an individual compartment.

c. Ventilation. Every toilet room shall be adequately ventilated.

d. Lighting. All toilet facilities shall be clearly lighted at all times during working hours.

e. Heating. Except privies, every toilet room shall be kept adequately heated.

f. Screens. All windows, ventilators and other openings, shall be screened to prevent the entrance of insects. Toilet rooms shall be kept free of insects and vermin.

60.3(8) *Toilets — number required — general.*

a. Adequate toilet facilities shall be provided for all employees, and for each sex. Such facilities shall be conveniently located and accessible, and shall be maintained in a usable and sanitary condition at all times.

b. The following table shall be used as a guide in determining the adequacy of toilet facilities.

Number of Employees	Minimum Number of Facilities
1 to 10 persons	1 toilet
11 to 24 persons	2 toilets
25 to 49 persons	3 toilets
50 to 74 persons	4 toilets
75 to 100 persons	5 toilets
Over 100	1 toilet for each additional 30 persons

c. Whenever urinals are provided, one urinal may be substituted for one toilet, provided the number of toilets shall not be reduced to less than two-thirds of the number shown in the foregoing table.

60.3(9) *Toilets — supplies.*

a. Toilet paper. An adequate supply of toilet paper with holder shall be supplied by the employer for each toilet.

b. Sanitary napkins. In all toilet rooms used by women the company shall permit the installation of dispensing machines for sanitary napkins.

60.3(10) *Toilets — location of and type.*

a. Running facilities. Flush type, chemical type or incinerator type toilets shall be provided on the following running facilities.

(1) All locomotives except when used in yard service or as unmanned auxiliary units.

(2) Baggage and express cars where employees are required to work en route.

(3) Cabooses.

b. Stationary facilities. Appropriate type toilets, according to the specifications herein, shall be provided and made accessible to all employees at the following locations:

(1) All terminals.

(2) All yard offices.

(3) All stations or depots.

(4) All freight, baggage and express offices (located on railroad property).

(5) All engine houses and shops.

(6) All bunk or section houses and section headquarters.

(7) Lunchrooms located on railroad property.

(8) All maintenance of way camps.

(9) Crossing watchman locations, where practicable, and where such facilities are not otherwise readily and conveniently located.

(10) All office work areas.

60.4(477) Eating places and lunchrooms.

60.4(1) *Eating places.*

a. Whenever practicable and at all permanent and semipermanent installations an acceptable place, maintained in clean and sanitary condition, with adequate space for eating meals shall be provided for employees who bring their meals to their place of employment, or eat their meals prepared at the camp facilities.

b. Eating places shall be so constructed as to permit their being readily cleaned, and they shall be kept clean, in good repair and free of rodents, insects and vermin.

c. Kitchen cars or other camp facilities shall have adequate equipment for the sanitary preparation, cooking and refrigeration of food.

60.4(2) *Lunchrooms.*

a. In lunchrooms where food is served for employees, the food, equipment, and facilities shall be subject to the same inspection and regulation as is required in public eating places, generally consistent with the rules of the state pertaining to public food establishments.

b. Employees and workers handling and serving food in such places shall be subject generally to those rules of the state which are necessary to the sanitary handling of food.

c. Concessionaire facilities provided by the company in lieu of direct company operation shall comply with the regulations in this Code with respect to adequate space, adequate food handling facilities and cleanliness.

d. Adequate table and seating facilities shall be provided for the maximum number of employees using the room at any one time.

60.4(3) *Lunchrooms and eating places—size, etc.*

a. General. The minimum area of lunchrooms, or the amount of space to be added to that required for a locker room where a lunchroom is not provided, shall be based upon the maximum number of employees using the room or added space at any one time, generally in accordance with the following table:

Number of Employees	Square Feet Per Employee
25 and less	13
26 to 74	12
75 to 149	11
150 and over	10

b. Ventilation. Every eating place and lunchroom shall be adequately ventilated. Where practicable cross-ventilation shall be provided.

c. Lighting. All lunchrooms shall be clearly lighted at all times during hours of use.

d. Heating. Every lunchroom shall be kept reasonably heated at all times.

e. Screens. The windows, ventilators and doors opening to the outside of all lunchrooms shall be properly screened during the season when insects are prevalent.

f. Waste disposal. One or more covered receptacles, as may be necessary, shall be furnished in lunchroom and eating places for the disposal of waste food and other waste matter. Such containers shall be emptied regularly and cleaned as often as is necessary. The area where the receptacles are kept shall be maintained free of litter occurring from the possible overflow of such receptacles.

60.5(477) Sleeping accommodations.

60.5(1) *Running facilities.* Camp cars, other than passenger coaches, furnished for sleeping purposes, shall provide at least 50 square feet of floor space for each person with a ceiling height of not less than 7 feet, except where double bunks are used, at least 30 square feet of floor space shall be provided for each person so accommodated. Where passenger coaches are furnished, the bureau of labor may designate the number of men to be housed in each coach.

a. Walls, floors and ceilings shall be so constructed as to permit them to be readily cleaned.

b. Exterior windows and doors shall be weather stripped during the cold weather.

c. Screens shall be provided during the season when insects are prevalent for outer doors and windows.

d. Heating facilities and adequate fuel shall be provided with which employees may maintain a comfortable temperature as weather conditions may require.

e. Lighting by windows or acceptable artificial illumination shall be provided.

f. Ventilation shall be provided by windows opening directly to the outside air.

g. Beds, bunks or cots with proper mattresses shall be provided. Such beds, bunks or cots shall be raised at least 12 inches above the floor and be located two feet or more from the side of any other bed, bunk or cot located in the same room, and have at least 27 inches of clear space above it.

60.5(2) *Stationary facilities.*

a. Dormitories or bunk rooms shall be of such area as to provide at least 50 square feet of floor area for each person, except where double bunks are used, at least 30 square feet of floor space shall be provided for each person so accommodated. The headroom of dormitories or bunk rooms shall be at least seven feet.

b. Specifications for the walls, floors and ceilings, lockers, drinking water, toilet accommodations, washing facilities, ventilation, lighting, heat, weather stripping, screening, beds, bunks or cots as described in running facilities of this rule shall apply to stationary facilities.

60.6(477) Cleanliness and maintenance.

60.6(1) *General specifications.*

a. The company shall provide for the cleanliness and maintenance of the facilities, fixtures and appurtenances referred to in these regulations. Said fixtures shall be maintained in proper working order when offered for use.

b. Frequency of regular and thorough cleansing shall be determined in each case by the amount of traffic; and in all instances the frequency of cleaning shall be adequate to keep said facilities, fixtures and appurtenances free from vermin and rodents and clean and wholesome at all times.

c. Toilet rooms and washrooms shall not be used for storage. Posters or signs shall be placed in toilet rooms requesting co-operation of employees in keeping the premises clean.

60.6(2) *Floors.* Floors shall be maintained in a clean and so far a practicable dry condition. Where wet processes are used, drainage shall be maintained and false floors, platforms, mats or other dry standing places shall be provided wherever practicable.

60.6(3) *Screens.* Screens required by these rules shall be of 16 mesh or equal.

60.6(4) *Cuspidors.* Where cuspidors are used they shall be of such construction as to be cleanable and shall be kept in a clean condition.

60.6(5) *Receptacles for waste.* Suitable receptacles shall be provided and used for the storage of waste and refuse and shall be maintained in a sanitary condition. Receptacles used for moist or liquid waste shall be made of metal or glazed earthenware, or be metal-lined, and shall not leak. They shall be kept covered and shall be washed out as often as necessary to keep them clean.

60.6(6) *Removal of sweepings, waste and refuse.* All sweepings, waste and refuse shall be removed in such a manner as to avoid raising dust and as often as necessary to keep all rooms used by employees clean.

60.6(7) *Yard servicing areas.* Toilet waste shall not be discharged onto the ground surface from railroad cars within servicing areas of yards. Such areas shall be kept free of refuse, litter, debris, vermin and rodents.

60.6(8) *Yard repair areas.* Where work is performed in repair yards or on repair tracks in the open or in open sheds of pits, adequate drainage shall be provided. This waste shall not drain into any water of the state, nor contaminate the ground surface, but must be disposed of in a manner approved by the state department of health.

60.6(9) *Running facilities.*

a. Locomotives and yard diesels. During use, the cabs on locomotives shall be heated to a minimum of 50°F. at floor level.

(1) When necessary to comply with rules 60.6(1)"*a.*" and 60.6(1)"*b.*" herein, all locomotives shall have their floors and toilets cleaned, and their windows washed when offered for use at terminals having servicing facilities.

(2) When required by the season of the year, doors and windows of all locomotives shall be equipped with adequate protection to occupants from the elements by means of weather-stripping, or other device sufficient to provide equally adequate protection.

b. Cabooses.

(1) Cabooses shall be maintained in a clean and sanitary condition.

(2) When required by the season of the year, doors, and windows of cabooses shall be equipped with adequate weather-stripping.

(3) When necessary to comply with 60.6(1)"*a.*" and 60.6(1)"*b.*" herein, cabooses shall have their toilets cleaned, and their windows washed when offered for use at terminals having servicing facilities.

(4) Every caboose used in any train in this state, regardless of service, shall be provided with a stove or other adequate means of heating. A sufficient supply of fuel for the trip or shift shall be provided. Cabooses shall be heated to a minimum of 50°F. at floor level.

c. Running facilities shall be equipped with shatterproof glass.

60.6(10) *Stationary facilities.*

a. Bed linen. Where bed linen is furnished by the railroad it shall be changed and fresh clean linen supplied at least once a week or for each new occupant.

b. Crossing watchman facilities. Adequate shelter shall be furnished and maintained for crossing watchman. Such shelter shall be adequately heated, sealed and insulated against cold and inclement weather.

c. Office work areas.

(1) Office work areas shall be maintained in clean and wholesome condition when offered for use.

(2) Office work areas shall be clearly lighted at all times during hours of use.

(3) Office work areas shall be heated at all times during hours of use at not less than 65°F.

(4) Office work areas shall be provided with cross-ventilation when possible.

(5) Windows, ventilators and doors opening to the outside of office work areas shall be properly screened during the seasons when insects are prevalent.

60.7(477) General rules.

60.7(1) Application for the waiver of or modification of any of the rules of the bureau of labor herein shall contain a reference to each rule on which modification or waiver is requested, and shall fully and clearly set forth the special grounds upon which such a request is based. Any waiver granted must be by order of the bureau of labor.

60.7(2) Each company subject to these amended sanitation and shelter rules shall, within 60 days from the effective date of these rules, submit to the commission, in writing, the following:

a. A description of the current company servicing program for cleaning, maintaining and replenishing drinking water facilities as prescribed by 60.2(3)"*a.*"

b. A list of the names of the terminals or locations at which said current servicing program for drinking water facilities is accomplished, said list to indicate which terminals and locations have, and which do not have servicing program facilities.

c. A description of the means the company uses, or proposes to use to accomplish said servicing program at terminals or locations not having servicing program facilities.

d. Where a company drinking water servicing program is nonexistent, or not as complete as contemplated, a description of the program the company proposes to institute.

e. A description of the current company servicing program for cleaning and maintaining toilets on locomotive, baggage and express car, and caboose units that have not been conformed to the requirements of 60.3(10)"*a.*"

f. A description of the company timetable for bringing into conformity the locomotive, baggage and express car, and caboose units required to conform to 60.3(10)"*a.*"

g. A description of the current company servicing program to accomplish compliance with 60.6(9).

h. A list of the names of the terminals or locations at which said current servicing program for locomotives, yard diesels and cabooses is accomplished.

i. Where a company servicing program to comply with 60.6(9) is nonexistent, or not as complete as contemplated, a description of the program the company proposes to institute.

j. By means of a current report, to be filed not less frequently than quarterly, each company shall apprise the bureau of labor of the then salient effective and ineffective features of the company servicing program employed to comply with 60.2(3)*a.*, 60.3(10)*a.*, and 60.6(9).

60.7(3) All companies shall have one year from the effective date of the rules in which to comply with the exception of 60.7(3).

This rule is intended to implement chapter 477 of the Code.

[Filed June 14, 1972]

LAW ENFORCEMENT ACADEMY

CHAPTER 1
MINIMUM STANDARDS FOR IOWA LAW ENFORCEMENT OFFICERS

1.1(80B) General requirements for law enforcement officers. In no case shall any person hereafter be recruited, selected, or appointed as a law enforcement officer unless such person:

1.1(1) Is a citizen of the United States and a resident of Iowa or intends to become a resident upon being employed.

1.1(2) Has reached his or her twenty-first birthday and has not reached his or her sixtieth birthday at the time of his or her appointment.

1.1(3) Has a current active drivers license issued by the state of Iowa.

1.1(4) Is able to read and write the English language.

1.1(5) Is not a drug addict or a drunkard.

1.1(6) Is of good moral character as determined by a thorough background investigation including a fingerprint search conducted of local, state and national fingerprint files and has not been convicted of a felony or a crime involving moral turpitude.

1.1(7) Reserved for future use.

1.1(8) Is not by reason of conscience or belief opposed to the use of force, when appropriate or necessary to fulfill his duties.

1.2(80B) Additional requirements for state, county and city law enforcement officers. The following additional requirements shall apply to all law enforcement officers hereafter recruited, selected, or appointed except those employed by towns with a population of under 2000 people, highway commission weight officers, fairground police and capitol police.

1.2(1) Is a high school graduate with a diploma, or possesses an equivalency certificate which meets the minimum score required by the state of Iowa as determined by the state department of public instruction.

1.2(2) If a male, is at least 5'7" in height without shoes.

1.2(3) Is of a weight proportional to height as determined by an examining physician.

1.2(4) Has an uncorrected vision of not less than 20-100 in either eye; correctable to 20-20, and normal color vision.

1.2(5) Has normal hearing in each ear as determined by an examining physician.

1.2(6) Has participated in an oral interview held by the hiring authority, or representative, or representatives, to determine such things as appearance, background and ability to communicate.

1.2(7) Has been examined by a physician to determine if free from physical, emotional or mental condition which might adversely affect the performance of duties.

1.2(8) Has attained a satisfactory grade in a pre-employment written examination.

1.3(80B) Higher standards not prohibited. While no law enforcement officer can be selected who does not meet requisite minimum requirements, they shall not limit or restrict law enforcement agencies in establishing additional recruitment standards.

These rules are intended to implement chapter 80B of the Code.

[Filed December 12, 1968; amended December 8, 1970]

CHAPTER 2
MINIMUM BASIC RECRUIT CURRICULUM FOR APPROVED IOWA LAW ENFORCEMENT TRAINING SCHOOLS

2.1(80B) Minimum recruit curriculum for law enforcement officers. The basic recruit law enforcement course of study in an ac-

credited law enforcement training school shall consist of no less than 160 hours of training, which training must be completed within an eight-week period and no law enforcement training facility will be approved by the Iowa law enforcement academy council unless it meets the minimum requirements of basic recruit study as set forth in the following curriculum.

2.1(1) *Patrol and related subjects* ..... 47 hours

a. Patrol.

(1) Mobile, foot or beat.

(2) Patrolling techniques and their effect on crime prevention.

b. Handling of the juvenile delinquent.

c. Handling of intoxicated persons.

d. Handling of disturbed and abnormal persons.

e. Handling of domestic situations.

f. Communications—radio and teletype.

g. National Crime Information Center.

h. Police community relations.

(1) Law enforcement and the news media.

(2) Law enforcement and minority groups.

(3) Creating a favorable public image.

(4) Human relations and applied psychology.

i. Traffic and traffic arrests.

(1) Iowa motor vehicle laws.

(2) Traffic safety.

(3) Directing of traffic in normal and abnormal situations.

(4) Calculating speeds.

(5) Licensing of drivers.

(6) The intoxicated driver.

(7) Implied consent law.

j. Accident investigation.

(1) Causes of accidents.

(2) Hit and run accidents.

(3) Accident reports.

(4) Use of accident records.

(5) Financial responsibility.

k. Impounding motor vehicles.

2.1(2) *Services of other agencies* ..... 9 hours

a. Iowa bureau of criminal investigation.

b. Iowa highway safety patrol.

c. Federal bureau of investigation.

d. U.S. treasury department.

e. U.S. secret service.

f. Iowa department of health—Duties of medical examiner and dead body examination.

g. Iowa department of social services—Probation and parole.

2.1(3) *Firearms and related subjects* ..... 30 hours

a. Firearms. Time should be spent in the classroom discussing the safe handling, proper grip and sight alignment of firearms prior to the actual practice on the shooting range. There should be a demonstration on the range showing the proper use and handling of weapons made available to officers by their department. (Example: riot gun, gas gun, etc.) The remainder of the time (suggest 16 hours) should be devoted to safe handling and target shooting with the officer's personal service revolver. A minimum score of 60, out of a possible 100, should be attained by each student (supervised, timed and on an appropriate target) in order to qualify and be certified in firearms training.

b. Defensive tactics, disarming methods and the use of restraining devices.

c. Handling of civil disturbances.

(1) Classroom discussion of mob and riot control.

(2) Field practice for control of mobs and riots.

2.1(4) *Principles of investigation and investigative procedures* ..... 39 hours

a. Investigative note taking.

b. Report writing.

c. Narcotics identification and investigation.

d. Auto theft investigation.

e. Arson, bombing and bomb threat investigation.

f. Homicide investigation.

g. Sex crime investigation.

h. Burglary investigation — Should include discussion or demonstration of types of locks and safes, and how they operate.

i. Surveillance.

j. Development of informants.

k. Fingerprints.

(1) History and use in law enforcement.

(2) Proper procedure for taking and classifying prints.

(3) Developing and lifting latent fingerprints.

l. Photography.

(1) Practical use of cameras.

(2) Explanation of developing and processing films and prints.

(3) Document, tire tread and crime scene photography.

(4) Photographing of prisoners.

m. Collection, preservation and handling of evidence.

n. Crime scene search—Classroom discussion, practical field problem and critique. To include such things as sketching, diagraming and how to make a plaster cast.

2.1(5) *Law, criminal procedure, courts and related subjects* ..... 31 hours

a. Constitution, Bill of Rights, and Civil Rights.

b. Criminal Code of Iowa.

c. Techniques and mechanics of arrest.

d. Establishing probable cause.

e. Procedural handling of felony and misdemeanor violations.

f. Obtaining and serving arrest warrants.
g. Interview, interrogation and confession.
h. Search and seizure.
(1) Obtaining search warrants.
(2) Search of persons and property.
(3) Identification and handling of seized property.
i. Preparation of cases for court.
j. Testifying.
k. Courtroom procedures.
l. Laws and rules of evidence.
m. Moot court.
(1) Pretrial discussion of practical problem.
(2) Student's testimony and presentation of evidence.
(3) Critique—with the presiding judge, defense attorneys, prosecuting attorneys, students and instructors.

2.1(6) *Review and examination* ..... 4 hours

2.1(7) Subjects not covered in the 160-hour minimum basic curriculum as outlined above, but suggested to be included in the recruit training program, are as follows:
a. Orientation and indoctrination to include introduction to the training school, explanation of the rules of the school, registration and fingerprinting of each officer.
b. Classroom note taking and study habits.
c. Defensive driving training.
d. First-aid course.

2.2(80B) More extensive recruit training curriculum not prohibited. While no law enforcement training facility will be approved by the Iowa law enforcement academy council which does not meet the minimum requirements of this basic recruit curriculum, this in no way limits or restricts any law enforcement training facility in instituting a basic recruit curriculum that surpasses the curriculum established pursuant to this Act.

This rule is intended to implement chapter 80B of the Code.

[Filed July 22, 1969]

CHAPTER 3
CERTIFICATION OF INSTRUCTORS FOR APPROVED REGIONAL LAW ENFORCEMENT TRAINING FACILITIES

3.1(80B) Definitions. For the purpose of these approval standards, the following definitions shall be used.

3.1(1) "Academy council" means the Iowa law enforcement academy council.

3.1(2) "Regional training facility" means an approved regional law enforcement training facility.

3.1(3) "Regional facility director" means the administrative head or responsible official of the approved regional law enforcement training facility.

3.1(4) A "guest lecturer" is a person who by reason of his position or experience can make a worthwhile contribution to a training program. He will normally be experienced in a specialized area and his instruction limited to the area of his experience. While the regional training facility may avail itself of his services on repeated occasions his use will not be of such frequency as to reasonably infer he is a member of the permanent regional instructional staff.

3.2(80B) Instructors for approved regional training facility.

3.2(1) *Instructors (general and professional).* All instructors at regional training facilities will be designated as either general or professional in nature. General law enforcement instructors will be those instructing in subjects clearly law enforcement in nature. Professional law enforcement instructors will be those instructing subjects in the area of criminal law, human relations and other areas requiring specialized academic training. Final decision as to whether an instructor is in the general or professional area rests with the academy council.

3.2(2) *Certification of regional training instructors (general and professional).* Certification of regional training instructors (general and professional) will be issued by the academy council.

3.2(3) *Request for instructional certification (general and professional).* Instructors (general and professional) requesting certification must submit this request to the academy council on an approved application for regional instructional certification form, which form can be obtained from the Iowa Law Enforcement Academy.

3.2(4) *Instructor qualifications (general).* Instructors (general) will be certified on the basis of minimum qualifications in the areas of education, training, experience and background. The actual evaluation and selection of instructors (general and professional) will remain the responsibility of the regional facility director who is ultimately responsible for the instruction provided.

3.2(5) *Granting or revocation of instructor certification (general and professional).* Instructor certification (general and professional) will be issued for a period of four years. At the end of a four-year period certification may be renewed if the instructor has instructed in a regional training facility program during the period of the certification and if his renewal certification is recommended by the regional facility director under whose supervision he has instructed. The certification may be revoked, in writing, whenever in the opinion of the academy council or in the opinion of the regional facility director, the same should be revoked. Prior to denying the certification, or revok-

ing any certification, the certified holder may file a written appeal within 30 days of the date of revocation notice with the academy council. The academy council, upon receipt of written notice of such appeal, will hold a hearing within a 30-day period from the date of written appeal. The appeal hearing will be held at the Iowa Law Enforcement Academy, Camp Dodge, unless otherwise designated by the academy council.

3.2(6) *Waiver of application requirements for instructor certification.* The requirement for the submission of a formal application for instructional certification for instructors at a regional training facility may be waived by the academy council in instances involving instructors made available by federal agencies. Final decision regarding the applicability of this provision to a proposed regional facility instructor (general) rests with the academy council.

3.2(7) *Responsibility for insuring instructional excellence.* It is the continuing responsibility of the regional facility director to insure that instructors are assigned only topics they are qualified to teach and are supervised on a regular basis to insure that instructional excellence is maintained.

3.2(8) *Endorsement of application for instructor certification.* Applications for instructor (general) certification will be endorsed by the regional facility director and where applicable by the applicant's department head.

3.2(9) *Guest lecturers.* These regulations do not preclude the utilization of guest lecturers. Final decision as to whether an individual qualifies as a guest lecturer rests with the academy council.

3.3(80B) Minimum qualifications for certification for instructor (general) for approved regional law enforcement training facility. The following are minimum qualifications for certification of instructor (general), as defined, at approved regional law enforcement training facility.

3.3(1) *Experience.* A minimum of five years law enforcement experience is required by personnel instructing general subjects. This requirement may be modified by the director of the regional school, with academy council approval, in exceptional cases reflecting outstanding education or experience.

3.3(2) *Education.* Must have a minimum of a high school graduation with a diploma or possess an equivalency certificate which meets the minimum score required by the state of Iowa as determined by the state department of public instruction.

3.3(3) *General background.*

a. Is of good moral character as determined by a thorough background investigation including a fingerprint search conducted of local, state and national fingerprint files and has not been convicted of a felony.

b. Has participated in an oral interview held by the hiring authority, or representative, or representatives, to determine such things as appearance, background and ability to communicate.

c. Has been examined by a physician to determine if free from physical, emotional or mental condition which might adversely affect the performance of duties.

d. The general background requirement may be waived if such requirements have already been met as a result of the instructor's current employment in the law enforcement field. Proof of compliance with the general background requirement shall be made available to the academy council upon request.

3.4(80B) Minimum qualifications for certification of instructor (professional) for approved regional law enforcement training facility. The following are minimum qualifications for certification of instructor (professional), as defined, at an approved regional law enforcement training facility.

3.4(1) *Experience.* Must have at least three years of experience in the subject area to be instructed.

3.4(2) *Education.* Must have at least a baccalaureate degree in the subject area or a related field.

3.4(3) *Background.* While no background investigation is required, an instructor (professional) must be recommended by the regional facility director and in making such recommendation the regional facility director shall consider the reputation, conduct, stability and ability of the person being recommended.

These rules are intended to implement chapter 80B of the Code.

[Filed July 16, 1970]

CHAPTER 4
APPROVED REGIONAL LAW ENFORCEMENT TRAINING FACILITY

4.1(80B) Definitions. For the purpose of these approval standards, the following definitions shall be used.

4.1(1) "Academy council" means the Iowa law enforcement academy council.

4.1(2) "Regional training facility" means an approved regional law enforcement training facility.

4.1(3) "Regional facility director" means the administrative head or responsible official of the approved regional law enforcement training facility.

4.1(4) "Facilities approval application form" means the form prepared by the Iowa law enforcement academy council to be utilized in an application for approval of a regional law enforcement training facility.

4.1(5) "B.C.I. bulletin" means the Iowa bureau of criminal investigation weekly bulletin.

4.2(80B) Procedures for approval or disapproval of regional training facility.

4.2(1) *On-site inspection.* Approval of a regional training facility will be made on the basis of on-site inspections conducted by members of the academy council, with or without advance notice to the regional training facility.

4.2(2) *Written request for approval.* A request for approval of a regional training facility will be made in writing to the academy council by the regional facility director.

4.2(3) *Facilities approval application form.* The request for approval of a regional training facility must be accompanied by a completed facilities approval application form, which form may be obtained from the Iowa law enforcement academy.

4.2(4) *Inspection.* The inspection of a regional training facility must be conducted within 20 days of receipt of the request by the academy council.

4.2(5) *Approval or disapproval furnished in writing.* Approval, or disapproval, of the regional training facility will be furnished in writing by the academy council to the regional facility director within 30 days of receipt of the request by the academy council. Such approval will be published in the B.C.I. bulletin.

4.2(6) *Appeal.* In the event approval of a regional training facility is denied, a written appeal may be made to the academy council. This appeal will be heard at the next regularly scheduled meeting of the academy council or within 30 days of the date of appeal, whichever occurs first. Decision of the academy council is final.

4.2(7) *Continuing approval of facility.* Continuing approval of regional training facilities shall be granted to facilities offering law enforcement training on a regular basis and will continue in effect until surrendered or revoked.

4.2(8) *One-time approval of facility.* Approval of a regional training facility offering one-time law enforcement training shall be for a specific course and shall be issued for a definite period of time not to exceed one year. A renewal of approval of such a facility may be granted by the academy council upon receipt of a written approval request accompanied by a completed facilities approval application form with or without a reinspection by members of the academy council.

4.2(9) *Revocation of approval.* Approval of a regional training facility may be revoked by action of the academy council whenever a facility is deemed inadequate. Such revocation shall be furnished in writing by the academy council to the regional facility director specifically stating why approval is being revoked. Notice of such revocation will be published in the B.C.I. bulletin. The facility may be reapproved by the academy council when it deems the deficiencies have been corrected. Such reapproval will be published in the B.C.I. bulletin.

4.2(10) *Notification to law enforcement officers of status of regional training facility.* It is the responsibility of the regional facility director to appropriately notify officers enrolled in a training course whether the facility has or has not been approved in compliance with Iowa's mandated training law.

These rules are intended to implement chapter 80B of the Code.

[Filed July 16, 1970]

LIBRARY, LAW

CHAPTER 1
USE OF LIBRARY

1.1(303) Library hours. The Iowa state law library shall be open to the public each day of the week from 8 o'clock a.m. to 5 o'clock p.m. until officially changed, except Saturdays, Sundays, and on occasions when offices in the statehouse are closed by order of the executive council.

1.2(303) Eligibility for loans. Loan of material for use outside the law library shall be limited to members of the Iowa courts, the Iowa bar, the general assembly and elective and appointive state officials. Other residents of Iowa may use in the law library any material therein, except material of a private or confidential nature.

1.3(303) Loan period. In the course of legal research the reader may need to refer to many books, some for extensive study, others for brief reference. If one of these books is not available his work will be delayed, or, worse still, he may have to conclude his research without examination of all the books for which he has citations. To avoid this situation the collection in the law library should be kept intact so far as possible. Therefore, initial loans may be made for a period of seven days. At the expiration thereof an extension of seven days may be granted. Further extension may be granted only for cause satisfactory to and for the period determined by the law librarian. Initial loans of bound volumes of Iowa supreme court abstracts and arguments may be made for 14 days. Shepard's citations cannot be loaned.

1.4(303) Shipping charges. On all loans requiring the shipment of material to a point outside of Des Moines the borrower shall pay shipping charges from Des Moines and return.

1.5(303) Loan cards. No material shall be removed from the law library except upon loans signed by borrowers on loan cards furnished by the law library, and a complete record of the loan preserved.

1.6(303) Misplaced books. Great care should be used in returning books to the shelves after use. A book misplaced is for the time being a book lost. Readers thereof are requested to leave them on the reading tables. A library attendant will replace them.

1.7(303) Smoking. Smoking is prohibited on all floors above the first floor on account of fire hazard.

1.8(303) Disturbing noise. Noise is not conducive to study, is annoying, and out of place in a law library. Persons using the library are requested to regulate their conduct in this respect so as not to disturb others.

1.9(303) Marking books prohibited. Books are to be read, not marked or interlined. Users are requested to strictly observe this rule.

1.10(303) Penalties and fines. Any book in the collection of the Iowa state law library that is injured, defaced, destroyed or lost while in the possession of or loaned to any person shall be replaced by said person. If said person fails to replace said book within 60 days after receipt of a letter signed by the law librarian, mailed by registered mail, requesting said person to replace said book, then and in that event said person shall, within 15 days thereafter, pay to the treasurer of the state of Iowa a sum of money equal to the cost of replacing said book, or the value placed thereon by the Iowa library board of trustees if said book is irreplaceable after an effort so to do has been made by the law librarian, and on failure to make said payment said person shall be penalized and fined in an amount equal to said sum of money, and said fine, together with court costs, may be collected in the manner prescribed in section 303.3(9).

[Filed prior to July 4, 1951]

LIBRARY, STATE TRAVELING

CHAPTER 1
USE OF LIBRARY

1.1(303) Borrowers. State officials and employees may borrow direct from the Des Moines headquarters. Public libraries and individuals without public library service may borrow by mail with the borrower paying transportation on loan collections.

1.2(303) Books. All books except reference items are available for loan for one month. Reference items can be "verifaxed" at a nominal cost.

1.3(303) Phonodiscs. Phonodiscs are available to public libraries in loan collections of 15 to 200 depending upon size of library for a two-month period with public libraries paying transportation on loan collections.

1.4(303) Reference service. Reference service in the headquarters is available to anyone using the reference and circulation division reading area and to borrowers designated in 1.1(303).

1.5(303) Loss of books and related materials. Borrowers will receive first notice of overdue books within two weeks after date due, second notice within two weeks following first notice and billing using list price will be made within one month of original due date.

[Filed January 11, 1966]

IOWA BEER AND LIQUOR CONTROL DEPARTMENT

CHAPTER 1
DEFINITIONS

1.1(123) General.

1.1(1) *Act.* "Act" shall mean the Iowa Beer and Liquor Control Act.

1.1(2) *Department.* "Department" shall mean The Iowa Beer and Liquor Control Department.

1.1(3) *Supplier.* "Supplier" shall mean liquor distiller, importer, broker brewer, vintner or beer wholesaler.

1.1(4) *Advertisement.* The term "advertisement" as used in these rules includes any advertisement of distilled spirits through the medium of radio broadcast or telecast; or of newspapers, free newspapers, shopping guides, periodicals or other publications; or of any sign or outdoor advertisement; or any other printed or graphic matter, including trade publications, menus and wine cards.

1.1(5) *Distilled spirits.* "Distilled spirits" means ethyl alcohol, ethanol or spirits of wine, including dilutions and mixtures thereof, from whatever source or by whatever process produced, for beverage use, and shall include, but not be limited to, neutral spirits, whiskey, brandy, rum, gin, vodka, cordials and liqueurs and include wine of whatever alcoholic percentage by weight or volume.

1.1(6) *Person.* "Person" means any individual, association, partnership, corporation, club, hotel or motel or municipal corporation owning or operating a bona fide airport, marina, park, coliseum, auditorium or recreational facility in or at which the sale of alcoholic liquors or beer is only an incidental part of such ownership or corporation.

[Filed December 14, 1972]

CHAPTER 2
LIQUOR LICENSEES AND BEER PERMITTEES

2.1(123) Improper conduct.

2.1(1) *Illegality on premises.* No licensee, permittee, his agent or employee shall engage in any illegal occupation or illegal act on the licensed premises.

2.1(2) *Co-operation with law enforcement officers.* No licensee, permittee, his agent, or employee shall refuse, fail or neglect to co-operate with any law enforcement officer in the performance of such officer's duties to enforce the provisions of the Act.

2.1(3) *Immoral activities.* No licensee, permittee, his agent or employee shall knowingly allow in or upon his licensed premises any improper conduct, disturbances, lewdness, immoral activities, indecent, profane or obscene language, songs, entertainment, literature, pictures or advertising material, or cause to have printed or distributed any lewd, immoral, indecent or obscene literature, pictures or advertising material.

2.1(4) *Molesting patrons.* No licensee, permittee, his agent, or employee shall knowingly allow in or upon his licensed premises the annoying or molesting of patrons or employees by other patrons or employees, nor any accosting or soliciting for immoral purposes.

2.1(5) *Frequenting premises.* No licensee, permittee, his agent or employee shall knowingly permit his licensed premises to be frequented by or to become the meeting place, hangout or rendezvous for known prostitutes, vagrants or those who are known to engage in the use, sale or distribution of narcotics or in any other illegal occupation or business.

2.1(6) *Prohibited interest in business of licensee.* No licensee, permittee or any agent, or employee thereof shall accept any aid or assistance by gifts, loan of money, free merchandise, treats, premiums or rebates or property of any description or other valuable things from any supplier.

2.2(123) Violation by agent, servant or employee. Any violation of the Act or the rules of the department by any employee, agent or servant of a licensee or permittee shall be deemed to be the act of said licensee or permittee and shall subject the license of said licensee or permittee to suspension or revocation.

2.3(123) Gambling evidence. The intentional possession or willful keeping of any gambling device, machine or apparatus as defined in section 99A.1, upon the premises of any establishment licensed by the department shall be prima facie evidence of a violation of section 123.49(2)a and subject the license of said licensee or permittee to suspension or revocation.

2.4(123) Supplier interest. No supplier shall have any financial interest directly or indirectly, in the establishment, maintenance, operation or promotion of business of any other licensee or permittee. No supplier shall have any interest by ownership in fee, leasehold, mortgage or otherwise, directly or indirectly, in the establishment, maintenance, operation or promotion of the business of any licensee or permittee. No supplier shall have any interest directly or indirectly by interlocking directors in a corporation or by interlocking stock ownership in a corporation in the establishment, maintenance, operation or promotion of the business of any licensee or permittee.

2.5(123) Donations by supplier. No supplier, specially designated distributor or any other licensee or permittee shall directly or indirectly make any contribution or donation of any kind to any other licensee or permittee or specially designated distributor, nor to any club, lodge, order or any fraternal, social, patriotic or religious organization for tickets, grand openings, anniversaries or otherwise, unless he is a bona fide member, and no licensee shall directly or indirectly solicit or accept any such contribution or donation.

2.6(123) Display of license, permit, signs. All licenses, permits and signs issued by the department shall be prominently displayed in full view of the licensed premises.

2.7(123) Out-door service. Any licensee or permittee having tables out of doors may serve the type of alcoholic liquor or beer permitted by his license at such tables, provided that such tables are immediately adjacent to the indoor premises.

2.8(123) Revocation or suspension by local authority. When local authority revokes or suspends a beer liquor license or retail beer permit, they shall notify the department in written form stating the reasons for the revocation or suspension and length of same.

2.9(123) Eligibility for Class "B" beer privileges. A person holding a Class "A", or a Class "C" beer permit is not eligible to hold a Class "A", Class "B", Class "C" or Class "D" liquor license with Class "B" beer privileges.

2.10(123) Living quarter permit. This permit may be issued by the director of the department to a licensee after the application furnished by the department has been filled out and submitted to the local authority for approval or denial. Local authorities shall forward this application to the director of the department for processing.

2.11(123) Suspension of beer liquor license or beer permit. At the time of the suspension of any license or beer permit by the department, there shall be placed in a conspicuous place in the front door or window of the licensed establishment, a placard furnished by the department showing that the license or beer permit of that establishment has been suspended by the department and such placard shall also show the number of days and the reason for the suspension. No licensee or permittee shall remove, alter, obscure or destroy said placard without the express written approval of the department.

2.12(123) Cancellation of beer permits—refunds. A beer permittee, or his executor or administrator may voluntarily surrender his permit to the department or to the local authority. When so surrendered to the department, the department will notify the local authority; state whether there is a complaint on file in the department office, and inquire if there are any complaints filed locally charging such permittee with violation of the beer and liquor laws that would make the permittee ineligible for a refund. When the permit is surrendered to the local authority, the local authority shall notify the department; inquire if there is a complaint on file with the department that would make the permittee ineligible for a refund. The local authority by itself, in the case of retail beer permits, shall make the refund on a quarterly-use basis starting from the effective date of the permit. The local authority will complete and send in a cancellation certificate, furnished by the department, for all canceled beer permits. The permit is to be attached to the cancellation certificate if at all possible. The department must have all cancellations reported to them.

2.13(123) Prohibited storage of alcoholic beverages. No licensee shall permit alcoholic beverages, purchased under authority of his liquor control license, to be kept or stored upon any premises other than those licensed, however, under special circumstances, the director of the department can authorize the storage of alcoholic beverages other than the licensed premises. The director may allow Class "D" licensee to store alcoholic liquor in a bonded warehouse to be used for consumption in Iowa, under authority of a Class "D" license.

2.14(123) Transfer of license or permit to another location. No licensee or permittee shall transfer location of beer liquor license or beer permit, without the consent of the local authority and the department. Applications for such transfer may be obtained from the department, 300 Fourth Street, Des Moines, Iowa 50319. Local authorities shall not charge more than $15 to cover the administrative cost of such transfer, such fee to be retained by the local authority involved. If the transfer of the license or permit is for the purpose of accommodating a special event or circumstances, temporary in nature and not exceeding the period of one week, letter notice only need be given the department by the local authority granting the temporary transfer and no change of address need be made on the license or permit and no transfer fee shall be levied therefore.

2.15(123) Alcoholic liquors levied upon or bankruptcy proceedings of licensee. Alcoholic liquors purchased and possessed by a liquor control licensee, and levied upon under execution of a valid judgment, or under a bankruptcy proceeding against such licensee, must be sold under the following provisions:

2.15(1) An inventory must be made of all alcoholic liquors and the sheriff or other official must contact the department, or one of its duly authorized agents, furnishing them with a copy of the inventory.

2.15(2) The department, or its duly authorized agency, may purchase the entire stock, or

any part thereof, of the alcoholic liquors levied upon under execution at a wholesale cost to the department or arrange the disposition of the alcoholic liquors in a manner to be determined by the department.

[Filed December 14, 1972]

CHAPTER 3
GENERAL REQUIREMENTS

3.1(123) Sanitation. All licensees and permittees of the department shall at all times keep and maintain their premises in compliance with the laws, orders and regulations of state, county and city health department and the state department of agriculture.

3.2(123) Toilet facilities. All licensees and permittees who mix, serve or sell alcoholic liquor or beer for consumption on the licensed premises shall provide for their patrons adequate, conveniently located, separate indoor or outdoor toilet facilities for men and women, which shall conform to county, city and department of agriculture rules and regulations. In case of outside toilet facilities, they shall be approved by the department of agriculture and the local authority where the licensed premise is located.

3.3(123) Cleanliness of premises. The interior and exterior of all licensed premises shall be kept clean and free of litter or rubbish, painted and in good repair. No licensee shall permit or suffer any unsanitary conditions in or about the licensed premises and every licensee shall be held strictly accountable for the sanitary conditions and appearance of the licensed premises.

3.4(123) Water. All licensed establishments shall be equipped with hot and cold running water from a source approved by an authorized health department.

3.5(123) Local ordinances permitted. The foregoing regulations shall in no way be construed as to prevent any county, city or town from setting up an ordinance or more restrictive regulations governing such establishments within their jurisdiction.

[Filed December 14, 1972]

CHAPTER 4
LICENSE AND PERMIT DEPARTMENT

4.1(123) Permit department.

4.1(1) *Manufacture and sale of native wines.* Manufacturers of native wines from grapes, cherries, other fruit juices or honey may sell, keep or offer for sale and deliver the same subject to the following regulations and restrictions.

4.1(2) *Manufacturer entering in business.* Before commencing the business of selling wine, the manufacturer shall inform the department in writing of his intention to enter into such business, the place where it will be conducted, the type, brand name and package sizes of each wine to be sold and the name and mailing address of the manufacturer. If any of such facts are thereafter changed, the manufacturer shall immediately notify the department in writing of the full nature of such change.

4.1(3) *Sale and delivery.* Sale and delivery of such wine may be made only on the premises where the wine was manufactured.

4.1(4) *Hours of sale.* Such native wine shall not be sold or delivered on Sunday. On other days, sale and delivery of such native wine may be made only between 9:00 a.m. to 10:00 p.m.

4.1(5) *Report on gallons of wine produced.* The manufacturer shall, in January of each year, deliver to the department a complete report, sworn to under oath by the owner, a partner or a corporation officer, showing the number of gallons of wine produced by him in the preceding year, and number of gallons of wine in his possession at the beginning and at the end of the preceding year; such report shall be subdivided so as to show such information in respect to each different type and brand of wine. If such manufacturer is also engaged in buying and selling wine, such report shall also contain such information, so subdivided, in regard to wine purchased, purchased wine sold, and purchased wine in the manufacturer's possession at the beginning and at the end of the preceding year.

4.1(6) *Monthly report required.* A monthly report showing the amount of wine on hand at the beginning of the month, the amount produced, the amount sold and used for family use and any other information requested on report form which shall be sent to the department, not later than the last day of the month following the month or period of time for which each report is made. Report forms shall be furnished by the department.

4.1(7) *Premises, books of account and records available for inspection.* The manufacturer shall cause his premises, books of account and records to be accessible and available at all reasonable times for inspection by representatives of the department or the law enforcement division, department of public safety.

4.1(8) *Requirement of a manufacturer's or wholesaler's license.* Such manufacturer of native wines shall not be required to have a license or permit for such business unless his business is such as to require a manufacturer's or wholesaler's license under the provisions of section 123.41 and 123.42.

4.2(123) Special permits issued.

4.2(1) *Special permits.* All special permits issued under the provisions of section 123.29 shall be issued for one year.

4.2(2) *Reports by holder of special compounds permit.* The holder of a special compounds permit, being the type of permit referred to in sec-

tion 123.29(4) shall deliver to the department within ten days after receipt of any alcoholic liquor purchases from any seller other than said department, a complete report showing the quantity, alcoholic proof and description of each type of such liquor, and the name and address of the seller and date the liquor was received.

4.2(3) *Ethyl alcohol.* Ethyl alcohol, meaning potable ethyl alcohol not contained in an alcoholic liquor ordinarily used for beverage purposes, shall be sold only to:

a. Holders of special permits described in section 123.29(1, 2, 4).

b. Holders of scientific permits for use in laboratory, scientific, experimental or testing purposes only, who after application giving full information regarding such proposed use, receive permission from the department to purchase ethyl alcohol.

4.3(123) Licensed manufacturers and wholesalers.

4.3(1) *License required.* A separate manufacturer's or wholesaler's license shall be required for each place of business of the holder thereof.

4.3(2) *To whom liquor may be sold outside the state of Iowa.* The holder of a manufacturer's or wholesaler's license shall not sell alcoholic liquor outside the state of Iowa, except to a purchaser having the legal right to buy and receive it from such seller at the place of sale and place of delivery respectively.

4.3(3) *Proof of right to purchase.* Before making a sale to a purchaser other than the department, a licensed manufacturer or wholesaler shall require the purchaser to produce and exhibit for inspection proof of his right to purchase alcoholic liquor according to the laws of his own state.

4.3(4) *Registry number of license or permit to physician or pharmacist required.* If the purchaser is a licensed physician or pharmacist or the holder of any other form of license or permit entitling him to purchase alcoholic liquor, the licensed manufacturer or wholesaler must make a record of the sale to him showing registry number of such license or permit, date thereof and where and to whom it was issued and the date of such sale, name and address of the purchaser and kind and quantity of alcoholic liquor sold to him.

4.3(5) *Licensed manufacturer or wholesaler to maintain record.* The licensed manufacturer or wholesaler shall maintain a record of all shipments of liquor received and an individual record of each and every sale made, which record shall disclose the name and address of the purchaser and the kind and quantity of alcoholic liquor sold to each purchaser. The licensed manufacturer or wholesaler shall obtain from the carrier a receipt for each shipment of alcoholic liquor to each purchaser and shall deliver such receipt or a duplicate original thereof to the department.

4.3(6) *Records accessible and available for inspection.* All records, books of account and premises of a licensed manufacturer or wholesaler shall be accessible and available at all reasonable times for inspection by representatives of the department.

4.3(7) *Monthly report showing wine on hand required.* A monthly report showing the amount of wine on hand at the beginning of the month, and the amount produced and purchased, the amount sold and used for family and any other information requested on report forms shall be sent to the department by each licensed manufacturer or wholesaler. This report must reach the department not later than the last day of the month following the month or period of time for which each report is made. Report forms shall be furnished by the department.

4.4(123) Investigation before issuing license or permit. No manufacturer's or wholesaler's license, nor any special permit referred to in section 123.29 shall be issued until an investigation has been made which shows that the applicant is entitled to such license or permit under the laws of Iowa and the rules of the department.

[Filed December 14, 1972]

CHAPTER 5
ADVERTISING

5.1(123) Advertising. It is the policy of the department that the within rules shall apply to all advertising media engaged in interstate commerce and shall in no way be construed to include those solely engaged in intrastate commerce by which the advertising of distilled spirits is strictly prohibited or as hereinafter regulated.

5.1(1) *Application.*

a. No supplier, directly or indirectly, or through an affiliate shall publish or disseminate or cause to be published or disseminated in any newspaper, free newspaper, shopping guide, magazine or similar publication or any medium of advertising, any advertisement unless such advertisement is in conformity with these rules; provided, that these provisions shall not apply to the publisher of any newspaper, free newspaper, shopping guides, magazine or similar publication, or operator of any other medium of advertising, unless such publisher is engaged in business as a supplier, directly or indirectly, or through an affiliate.

b. The department hereby declares it to be a departmental policy that the department itself shall not advertise distilled spirits or wine in any form or through any medium whatsoever.

5.1(2) *General requirements and rules in the advertising of distilled spirits.* In permitted

advertising, the following mandatory statements shall be included:

a. Responsible advertiser. The advertisement shall state the name and address of the supplier responsible for its publication. Street name and number may be omitted in the address.

b. Class, type and distinctive designation. The advertisement shall contain a conspicuous statement of the class and type, or other designation of the product corresponding with the complete designation which appears on the brand label of the product.

c. Alcoholic content. The alcoholic content shall be stated in the manner and form in which it appears on the labels of distilled spirits advertised.

d. "Line" or "brand" advertisements. Where an advertisement does not mention a specific product but merely refers to a class of distilled spirits (such as "whisky") and the advertiser markets more than one brand of distilled spirits of that class, or where the advertisement refers to several classes of distilled spirits (such as "whisky", "brandy", "rum", "gin", "liqueur", etc.) marketed under a single brand, the only mandatory information prescribed by 5.1(123) hereof applicable to such advertisement would be the name and address of the responsible advertiser.

5.1(3) *Conspicuousness of mandatory statements.* Statements required by these regulations to be stated in any written, printed or graphic advertisement shall appear in lettering or type of a size, kind and color sufficient to render them both conspicuous and readily legible. In particular:

a. Required information shall be stated against a contrasting background and in type or lettering which is at least the equivalent of eight-point type.

b. Required information shall be so stated as to appear to be a part of the advertisement and shall not be separated in any manner from the remainder of the advertisement.

c. Where an advertisement relates to more than one product, the required information shall appear in such manner as to clearly indicate the particular products to which it is applicable.

d. Required information shall not be buried or concealed in unrequired descriptive matter or decorative designs.

5.1(4) *Prohibited statements—restrictions.* An advertisement shall not contain:

a. Any statement that is false or misleading in any material particular. An example of such prohibited statement is: Reproduction of medals or facsimiles of awards, when no medals or awards have been given or where the medals or awards were not given on a competitive or comparative basis.

b. Any statement that is disparaging of a competitors products. An example of such prohibited statement is "contains no neutral spirits or alcohol," or "this rum will not turn dark in the bottle."

c. Any statement, design, device or representation which is obscene or indecent.

d. Any statement, design, device or representation of or relating to analyses, standards or tests, irrespective of falsity, which is likely to mislead the customer. An example of such prohibited statement is: "Analyzed by the ....Laboratory and found to be pure and free from deleterious ingredients"; or "Tested and approved," signed by The .... Research Institute.

e. Any statement, design, device or representation of or relating to any guaranty, irrespective of falsity, which is likely to mislead the consumer. Nothing in this section shall prohibit the use of any enforceable guaranty in substantially the following form: "We will refund the purchase price to the purchaser if he is in any manner dissatisfied with the contents of this package."

.....

Blank to be filled in with the name of the person making guaranty.

f. Any statement that the product is produced, blended, made, bottled, packed, or sold under, or in accordance with, any authorization, law or regulation of any municipality, county or state, federal or foreign government unless such statement is required or specifically authorized by the laws or regulations of such government; and, if a municipal, county, state or federal permit number shall not be accompanied by any additional statement relating thereto.

g. Statements inconsistent with labeling. The advertisement shall not contain any statement concerning a brand or lot of distilled spirits that is inconsistent with any statement on the labeling thereof.

h. Curative and therapeutic effects. The advertisement shall not contain any statement, design or device representing that the use of any distilled spirits has curative or therapeutic effects.

i. Place of origin. The advertisement shall not represent that the distilled spirits were manufactured in, or imported from, a place or country other than that of their actual origin, or were produced or processed by one who was not in fact the actual producer or processor.

j. Flags, seals, coat-of-arms, crests and other insignia. No advertisement shall contain any statement, design, device or pictorial representation of or relating to, or capable of being construed as relating to the armed forces of the United States or of the United States flag, any state flag, or any emblem, seal, insignia, decoration associated with any flag or the armed forces of the United States, nor shall any advertisement contain any statement, device, design or pictorial representation of or concerning any flag, seal, coat-of-arms, crest or other insignia likely to falsely lead the consumer to believe that the product has been endorsed, made or used by, or produced for, or under the supervision of, or in accordance with the specifications of the government, organization, family, or individ-

ual with whom such flag, seal, coat-of-arms, crest or insignia is associated.

5.1(5) *Other prohibited statements are:*

a. Words "bond", "bonded", etc. An advertisement for distilled spirits shall not contain the words "bond", "bonded", or "bottled in bond", "aged in bond" or phrases containing these or synonymous terms, unless such words or phrases appear upon the labels of the distilled spirits advertised, and are stated in the advertisement in the manner and form in which they appear upon the label.

b. Statements of age. An advertisement for distilled spirits shall not contain any statement, design or device directly or by implication concerning age or maturity of any brand or lot of distilled spirits unless a statement of age appears on the labels of the advertised product. When any such statement, design or device concerning age or maturity is contained in any advertisement, it shall include, in direct conjunction therewith and with substantially equal conspicuousness, all parts of the statement concerning age and percentages, if any, which appear on the label. However, an advertisement for any whiskey or brandy, which does not bear a statement of age on the label, or an advertisement for rum which is four years or more old, may contain general inconspicuous age, maturity or other similar representation, e.g., "aged in wood", "mellowed in fine oak casks."

c. The word "pure" except as part of the bona fide name of a permittee.

d. The terms "double distilled", "triple distilled" or any other similar term.

e. The code number or price excepting in trade magazines, periodicals or books sent on a direct mail basis to retail liquor licensees for the exclusive use of such licensee only and showing a complete listing of Iowa code numbers, brands and prices offered for sale by the department. The format of all trade magazines, periodicals or books containing prices of alcoholic beverages sold by the department shall be approved by the director prior to publication. No trade magazine, periodical or book containing prices of alcoholic beverages sold by the department, with the exception of the one published by the department, shall in any way use the phrase "official" or "official price list".

f. No licensee shall run any alcoholic liquor advertising through any medium which carries the price or brand name of the product being sold. The exception shall be advertising placed in trade magazines, periodicals or books sent on a direct mail basis to retail liquor licensees.

5.1(6) *Prohibitions in regard to wine.*

a. Restrictions. An advertisement for wine shall not contain:

(1) Any statement of bonded wine cellar and bonded winery numbers unless stated in direct conjunction with the name and address of the person operating such winery or storeroom. Statement of bonded winecellar and bonded winery numbers may be made in the following form: "Bonded winecellar no. . . .," "bonded winery no. . . . .," "b.w.c. no. . . . .," "b.w. no. . . . .". No additional reference thereto shall be made, nor shall any use be made of such statement that may convey the impression that the wine has been made or matured under U. S. government or any state government supervision or in accordance with U. S. government or any state government specifications or standards.

(2) Any statement, design, device or representation which relates to alcoholic content or which tends to create the impression that a wine is "unfortified" or has been "fortified", or has intoxicating qualities, or contains distilled spirits, except for a reference to distilled spirits in a statement of composition where such statement is required by these regulations to appear as a part of the designation of the product.

b. Statement of age. No statement of age or representation relative to age, including words or devices in any brand name or mark, shall be made, except that:

(1) In the case of vintage wine, the year of vintage may be stated if it appears on the label.

(2) Truthful references of a general and informative nature relating to methods or production involving storage or aging, such as "this wine has been mellowed in oak casks," "stored in small barrels" or "matured at regulated temperatures in our cellars" may be made.

c. Statement of bottling dates. The statement of any bottling date shall not be deemed to be a representation relative to age, if such statement appears without undue emphasis in the following form: "Bottled in. . . ." (inserting the year in which the wine was bottled).

d. Statement of miscellaneous dates. No date, except as provided in paragraph "*b*" and "*c*" of this subrule with respect to statement of vintage year and bottling date, shall be stated unless, in addition thereto, and in direct conjunction therewith, in the same size and kind of printing there shall be stated an explanation of the significance of such date: Provided, that if any date refers to the date of establishment of any business, such date shall be stated without undue emphasis and in direct conjunction with the name of the person to whom it refers.

5.1(7) *Other prohibitions.*

a. Use of insignia or reference to the department prohibited. No liquor advertising shall use any insignia or other device that may be in use by the department, nor shall any such advertising refer to the department.

b. School programs. No liquor advertising shall be carried in any programs for events or activities in connection with schools, colleges or universities or publications designed for distribution primarily to undergraduates.

c. Contests, lotteries, prohibited. No liquor advertising shall include, be connected with or

make reference to the conducting of any form of contest, lottery or the awarding of prizes or premiums.

d. Sound truck and aircraft advertising prohibited. No liquor advertising shall be permitted by the use of sound trucks, skywriting or banner towing by aircraft.

e. Mailing forbidden. No advertisement shall be distributed to consumers, through the medium of the United States mail or by distribution of circulars, provided that this restriction shall not apply to newspapers, free newspapers, shopping guides or magazines.

f. Picture screen advertising. No advertising of distilled spirits shall be displayed upon the picture* of any theater.

g. Certain advertising forbidden. No advertising shall be permitted which:

(1) Is primarily or especially appealing to children.

(2) Depicts any juvenile or the likeness of any person if such illustration exploits the human form in an immodest, vulgar or sensuous manner.

(3) Depicts a person in the act of actually drinking distilled spirits.

(4) Refers to a brand of liquor not actually on sale in the state of Iowa.

(5) Uses any Biblical character, Easter or other religious or church sign or symbol except in relation to kosher wines, provided, nothing in this rule shall be interpreted to prohibit the use of nonreligious illustrations identified with special days, such as holly wreaths or borders, punch bowls, table settings; nor the publication of strictly institutional advertising or holiday greetings containing no stated, implied or associated reference to brand, label, product, slogan, manufacturer, supplier or retailer, other than the signature of the manufacturer, supplier or retailer, such signature to consist solely of the name of the manufacturer, supplier or retailer.

h. In addition to the restrictions applicable to all advertising of distilled spirits set out heretofore in these regulations, outdoor advertising shall be subject to the following provisions:

(1) Outdoor advertising shall be permitted by billboard, poster or neon sign as allowed by these regulations if the copy used on such billboard, poster, or neon sign shall conform in all respects to the requirements hereinabove set forth and provided the locations of such advertising shall be limited as described in regulations.

(2) All outdoor advertisements of distilled spirits shall be prohibited in any political subdivision of this state wherein the sale thereof may be contrary to law.

(3) Outdoor advertising of distilled spirits shall be prohibited except in areas zoned for business or industrial use.

(4) Outdoor advertising of distilled spirits is prohibited within 300 feet of churches, schools, playgrounds and parks.

5.1(8) *On-premise advertising of distilled spirits.*

a. Brand name prohibited. Except on menus, or bill of fare and price list, the advertising of spirits by brand name on the premises of a retail licensee is prohibited. The printing, lettering or type size shall be the same size for all brand names listed.

b. Novelty advertising prohibited. No liquor trade name or the name of an alcoholic liquor supplier shall be used in connection with any novelty advertising for use, sale or distribution on retail licensed premises. Such novelty advertising shall include, but not be limited to matches, trays, score cards, lighters, blotters, post cards, pencils, coasters, menu cards, meal checks, napkins, clocks, calendars, wearing apparel, mugs, glasses or similar articles. The foregoing shall not prohibit a retail licensee from listing the brand names and prices of liquor he serves on menus and tents.

c. Window displays. No licensee of any class shall expose any alcoholic liquor or containers in window displays for advertising purposes.

d. Limitation on wording and size of sign. No existing exterior sign and no exterior sign to be erected in the future which states alcoholic beverages are sold or available shall exceed the size of 10½ square feet, and must not contain the word "liquor", "booze" or derivative thereof, with the exception of retail stores operated by the department.

5.1(9) *Advertising conclusion.* In any case where an industry member or licensee is doubtful as to whether a proposed advertisement is in compliance with the provisions of these rules, a sample, specimen or copy of the proposed advertisement should be submitted to the director of the department for prior approval to publication, printing or purchasing.

[Filed December 14, 1972]

CHAPTER 6
REPRESENTATIVES OF DISTILLERS, RECTIFIERS, MANUFACTURERS, BREWERS AND VINTNERS

6.1(123) Sales to the department—registration of agents.

6.1(1) *Forms for registration by suppliers.* All persons, firms or corporations selling or intending to sell or offering for sale any alcoholic beverages to the department shall register with the department upon forms prescribed by the department each salesman, agent, consultant, broker and representative through which such person, firm or corporation transacts or conducts its sales or makes its offers, and each salesman, agent, consultant, broker or representative shall obtain from

*"screen" probably intended.

the department a registration card carrying his name, address and registration number.

6.1(2) *Registration fees.* Fees for the registration of each applicant shall be $50 annually and shall expire on the anniversary date one year later and shall be renewed upon application unless suspended or revoked for cause. One $50 fee annually shall cover all registrations of individuals for each supplier. As employees are added or replaced, it shall be the responsibility of the supplier to register or have deleted the names of such employees with the department. Such employees may represent more than one supplier if properly registered.

6.2(123) Salesmen—prohibited practices—penalties.

6.2(1) *Solicitation of employees.* No supplier of alcoholic beverages, or salesman, agent or representative thereof, shall solicit either in person, by mail or otherwise any employee of the department except the director or his designee thereof, for the purpose or with the intent of furthering the sale of a particular brand or brands of merchandise as against another brand or brands of merchandise, and that at no time will any supplier or their representative call upon or make contact personally with the department or a member of the department more than four times a year in any one year, unless so requested to do so by the department. No supplier or representative thereof shall give away any alcoholic beverage of any kind or description or anything of value to any person in the employ of the department except for testing or sampling purposes only. This last provision shall not prevent any contribution to any college, university or any research project for use in combating and studying alcoholism.

6.2(2) *Visiting of state stores.* No salesman, agent or representative of any supplier shall visit any state liquor store except for the purpose of making a purchase in the usual manner, as any other customer, and such person shall not enter any warehouse or store of the department for the purpose of sales promotion or to secure information regarding inventory or any other matter relating to sales. Any information relative to sales or inventories of their particular brands will be furnished on request by the director or his designee at the central offices located in Des Moines, Iowa.

6.2(3) *Gifts of liquor prohibited.* No salesman, agent or representative of any supplier shall give or offer to any employee of the department any entertainment, gratuity or any other consideration for the purpose of inducing or promoting sale of merchandise.

6.2(4) *Advertising material.* No advertising material of any nature is to be left with state liquor store managers or personnel, warehouse personnel for distribution, except as provided in 5.1(5)"*e*", mailings of advertising material may be made only by suppliers and must be confined and directed to licensees only.

6.2(5) *Solicitation of orders prohibited.* Solicitation of orders for merchandise not listed on the price list of the department is prohibited. Proposals for listings may be made to the department only.

6.2(6) *Sale or brand information.* No accounting or statistical data relative to liquor sales, liquor inventories and operations of the department shall be furnished to anyone outside the department except as provided herein:

a. The director's office shall furnish each month to the National Alcoholic Beverage Control Association, Inc., Washington, D. C. a report showing liquor sales by code number, in units and retail sales value. Similar information is now being supplied to this same association by all state liquor control departments.

b. Any advertising agency, any representative of a supplier or anyone seeking information concerning sales or inventory of any liquor code number sold by the department, or anyone making inquiry, verbal or written, concerning financial or operating figures of the department shall be referred to the director or his designee.

6.3(123) Purchases.

6.3(1) *Procedure for presentation of new items for listing.*

a. The following information is furnished for the convenience and guidance of suppliers of alcoholic liquors wishing to submit their products to the department for consideration and possible listing.

b. The form of liquor control in effect in Iowa is that of state control. This department operates its own retail stores; all retail sales are by the package for off-premise consumption.

c. New listings are made on a quarterly basis: February 1, May 1, August 1 and November 1 of each year. These dates also include any change in price, alcoholic content, name or formula. The deadline for submission of merchandise for possible listings shall be 30 days prior to the effective dates shown in this paragraph.

d. All new listings shall be submitted on the proper form "Liquor Vendors Price Quotation," furnished by the department, and shall include freight charges f.o.b. our warehouse at Camp Dodge, Iowa.

e. All new listings shall be submitted to the director or his designee. The director reserves the right to establish a time limit on submissions made. This rule is established as a means of shortening interviews.

f. No supplier shall give away any alcoholic liquor samples of any kind or description at any time in connection with his business except for testing or sampling purposes.

(1) The department may, if necessary, when a brand of liquor has been accepted for testing, forward samples to the state chemist for analysis. Such brand shall be subject to final approval by the department after receiving the chemist's report.

(2) When a distiller wishes to change the formula or price of a brand already listed with the department, he must submit new quotations 30 days prior to the effective date which must fall only on February 1, May 1, August 1 and November 1.

(3) Suppliers must have their presentation made before the department only by an authorized agent or representative whose name has been properly registered with the department, and who must carry a department identification card and number.

(4) In relationship to any of the above, no member or employee of the department shall accept or receive any gift of alcoholic liquor or other things of value from any supplier doing business with the department or seeking to do business with the department, and that no employee or member of the department shall at any time give or sell any sample liquor, or liquor received for chemical analysis to any person.

6.4(123) Infraction of rules. Upon the infraction of any of the foregoing rules by any salesman, agent, consultant, broker or representative, the department may cancel the credentials issued to such salesman, agent, broker or representative and may remove his company's products from the sales list of the department after notice and hearing before the department hearing board. Decisions of the hearing board concerning such suspension or revocations shall be binding upon all parties.

[Filed December 14, 1972]

CHAPTER 7
TRANSPORTATION AND WAREHOUSE

7.1(123) Transportation of liquor.

7.1(1) *Transportation of tax-free alcohol.* Any common carrier may receive for transportation, and transport and deliver tax-free alcohol consigned to a holder of a permit from the United States Government authorizing such holder to purchase tax-free alcohol; provided, however, that in respect of such shipments compliance shall be had with sections 123.98, 123.101, 123.103 and 123.104; provided further that such common carrier shall make to the department a report of each such shipment showing date thereof, to whom and where made, and the character and quantity of such shipment.

7.1(2) *Transportation of sacramental wines.* Any common carrier may receive for transportation, and transport and deliver sacramental wines to holders of clergymen's permits issued under law, provided the transportation thereof and delivery to the consignee is in conformity with the provisions of said chapter.

7.1(3) *Transportation and delivery of intoxicating liquors.* Any common carrier may receive for transportation, and transport and deliver shipments of intoxicating liquors made by or consigned to wholesalers, distillers, rectifiers, blenders and manufacturers holding a permit issued by this department provided that in respect to such shipments and the delivery thereof, compliance shall be had and required under sections 123.98, 123.101 and 123.103; and provided further that promptly upon arrival of any such shipment at the delivery point, the carrier shall report to the department at Des Moines the purported amount and character thereof, and the name and address of the consignor and consignee.

7.2(123) Rules and regulations as between shippers and this department.

7.2(1) *Shipment into state.* Shipments of alcoholic liquors, wines and malt beverages can only be made into the state of Iowa by suppliers against purchase orders issued by the department. Shipments can only be made to state warehouse, Camp Dodge, Iowa.

7.2(2) *Purchase order and requirements.* The original copy of the purchase order and a duplicate acknowledgement copy are mailed direct by the department to the supplier. The shipping plant will execute the acknowledgement copy and return same direct to the department duly signed.

7.2(3) *Bottle-label requirements and registration.* After the type of container and labels submitted are approved by the department for use on shipments into Iowa, no change may be made in the type of container or labels without the expressed approval of the department. All labels must conform to the regulations of the Federal Alcohol Administration.

7.2(4) *Standard case code label.* All shipments of alcoholic liquors, wines, etc., consigned to the department must have affixed to each shipping case a standard case code label as adopted by the Industry Advisory Committee for Control States. Affix the standard case code label to the end of the case and to that end of the case which will place the government serial number side on your left as you stand facing the case. Affix the label in the upper left hand corner of the designated end of the case and about ¼ inch away from the edges to prevent fringing. On such merchandise where serial numbers are not used, affix the standard case code label on the recognized end of said case. This will permit the warehouse to tier cases with the end with the standard case code label outward and the Government or serial number side on the left as you stand facing the tier of cases.

7.2(5) *Notification—changes in age, proof, formula.* Whenever consent has been given by the department for a change in either age or proof, the supplier must notify the department at the time the first shipment goes forward, giving the new age or proof together with car number and initial, date of shipment. Failure of the shipper to give this notification shall mean that the shipper

shall assume all cost of necessary inconvenience suffered by the department as a result of the changes made. Letter covering this advice should be forwarded to the director of the department, State Office Building, 300 Fourth Street, Des Moines, Iowa 50319.

7.2(6) *Car loading plan.* Be consistent as possible in keeping codes together and yet keep cases properly and safely braced.

7.2(7) *Standard manifest of liquor shipment.* Standard manifest of liquor shipment on typewriter (or its equivalent as to legibility) and handled as follows:

a. Original to go forward with shipment.

b. Duplicate to accompany copy of forwarding advice furnished to superintendent of warehouse, Camp Dodge, Iowa.

7.2(8) *How to consign shipments.* All shipments to the department are to be forwarded on straight bill of lading. The original bill of lading is to be retained in the files of the shipping point for future use in supporting claims, etc. The signed memorandum copy of the bill of lading is to be forwarded to invoice department to be attached to the invoice when prepared and mailed to Iowa. Freight rate must be shown on the bill of lading in the proper place.

7.2(9) *Prepaid freight and freight bill.* Under the sales agreement with the department, the goods are sold on a delivered price basis at their warehouse railroad side track. Freight charges must accordingly be fully prepaid to destination by distillers' shipping plants. The shipping plant will retain the prepaid bill and not forward it to Iowa.

7.2(10) *Forwarding advice.* Upon forwarding shipment the shipper shall send by first class mail such advice showing therein:

a. Shipping point .....
b. Shipping date .....
c. Car no. .....
d. Department purchase order nos. .....
e. .....cases of code.....
.....cases of code.....
.....cases of code.....

The above advice should be directed to the traffic department of the department, State Office Building, 300 Fourth Street, Des Moines, Iowa 50319. Copies of above advice should be sent under separate cover to each of the following:

*Superintendent of Warehouse
Iowa Beer and Liquor Control Department
Camp Dodge, Iowa

*together with duplicate of manifest to:

Merchandise Manager
Iowa Beer and Liquor Control Department
300 Fourth Street
Des Moines, Iowa 50319

*Each copy to be mailed separately.

7.2(11) *Mail forwarding advice.*

a. Original to: Traffic Department, Iowa Beer and Liquor Control Department, 300 Fourth Street, Des Moines, Iowa 50319.

b. *Copy to—(with blue manifest attaches thereto):
Superintendent of Central Warehouse
Iowa Beer and Liquor Control Department
Camp Dodge, Iowa
*Copy to:
Merchandise Manager
Iowa Beer and Liquor Control Department
300 Fourth Street
Des Moines, Iowa 50319

7.2(12) *Invoicing instructions.* Shipping plant is to use its own regular invoice form as no special invoice form is supplied by the department. Purchase order number must be shown on the invoice and in the proper place. Car initial and number must be shown without fail and complete routing. Iowa code number must be shown on the same line with the particular brand and size and not placed at the foot of the invoice. The various items on the invoices must be listed in consecutive order of the code numbers, namely, the item carrying the lowest code number must be the first item appearing on the face of the invoice. The signed memorandum copy of the bill of lading is to be attached to the invoice when mailed in Iowa. Shipping plant will retain in its files the original bill of lading. After completing the invoice to the above extent, the shipping plant must show the following claimant's affidavit typewritten across the face of the original and duplicate of the invoice and to have same signed:

Claimant's Affidavit

State of_____
_____County ss:

We,_____, the within claimant, do state that items for which payment is claimed were furnished under authority of the law, that the charge is just and lawful and that the same is wholly unpaid.

_____
Claimant

The invoice in duplicate carrying the above claimant's affidavit together with signed memorandum copy of the bill of lading is to: (Also see following note)

Accounting Department
Iowa Beer and Liquor Control Department
300 Fourth Street
Des Moines, Iowa 50319

*Each copy to be mailed separately.

NOTE: Shipping plant must be careful to observe the special requirements of Iowa and forward all shipping papers complete, attached together, and in one envelope to the Accounting Department, Iowa Beer and Liquor Control Department, 300 Fourth Street, Des Moines, Iowa 50319, so that same will be received by time shipment arrives. A complete set of shipping papers to the accounting department will comprise the following:

a. Invoice in duplicate with Claimant's Affidavit executed thereon.

b. Acknowledgement of order duly executed.

c. Signed memorandum copy of bill of lading.

7.2(13) *For correspondence purposes.* All mail to the department should be directed to: Director, Iowa Beer and Liquor Control Department, 300 Fourth Street, Des Moines, Iowa 50319.

[Filed December 14, 1972]

CHAPTER 8
DRAM SHOP AND SURETY BOND

8.1(123) Dram shop liability insurance requirements. For the purpose of providing proof of financial responsibility as required under the provisions of section 123.92, a liability insurance policy must meet the following requirements:

8.1(1) *Current certificate required.* It must be issued by a company holding a current certificate of authority from the Iowa insurance commissioner authorizing the company to issue dram shop liability insurance in Iowa.

8.1(2) *Countersigned.* It must be countersigned by a resident insurance agent licensed by the issuing company.

8.1(3) *Limits of liability.* It must provide the following minimum limits of liability, exclusive of interests and costs of actions, per accident: (For the purpose of this subsection, the word "accident" shall mean any one occurrence, or any one accident, or series of accidents or occurrences arising out of any one event or any one case of intoxication).

a. $10,000 in respect to any one person who shall be injured in person or killed.

b. Subject to the limitation above—stated as respects any one person, $20,000 in respect to all persons who shall be injured in person or killed.

c. $5,000 in respect to any and all persons who shall be injured in means of support.

8.1(4) *Cancellation notice.* It must contain a provision that the policy cannot be canceled by either the company or the insured until after the department at its office in Des Moines, Iowa, has received 30 days' prior written notice of said cancellation.

8.1(5) *Civil tort liability.* Subject to these conditions and exclusions usually found in a policy of dram shop liability insurance, it must contain coverage to insure against all civil tort liability of the insured created under the provisions of sections 123.92, 123.93 and 123.94 as it now exists or may hereafter be amended.

8.1(6) *Proof of financial responsibility.* A licensee or permittee shall be deemed to have furnished proof of financial responsibility as contemplated under the provisions of sections 123.92, 123.93 and 123.94, when it has filed with the department at its office in Des Moines, Iowa, a properly executed copy of form no. L-10, a copy of which is attached hereto and by reference made a part hereof.

8.1(7) *Signature required.* Copies of form no. L-10 shall not be deemed properly executed unless the authorized company representative executing the same shall first have filed with the department a sample of his signature. Facsimile signatures will be acceptable.

8.1(8) *Proof of liability insurance.* Applications to post bond in lieu of providing a liability insurance policy to show proof of financial responsibility as contemplated under the provisions of sections 123.92, 123.93 and 123.94, must be made in writing to the department and the form and the amount of such bond will be determined on each application individually.

Form L-10

8.2(123) Surety bond requirements. A $5,000 penal bond must be filed with the department with each application for a liquor control license. A $500 penal bond must be filed with the department for retail beer permit. Each must meet the following requirements:

8.2(1) *Certificate of authority.* It must be issued by a company holding a current certificate of authority from the Iowa insurance commissioner authorizing the company to issue bonds in Iowa.

8.2(2) *Forfeiture of beer liquor bond.* It must contain a provision for the principal and his surety to consent to the forfeiture of principal sum of the bond in the event of his revocation of the beer liquor license held by the principal if said revocation is the result of a conviction of any violations of sections 123.49(2,*a*), 123.49(2,*d*), or 123.49(2,*e*).

8.2(3) *Forfeiture of retail beer bond.* It must contain a provision for the principal and his surety to consent to the forfeiture of principal sum of the bond in the event of his revocation of the retail beer permit held by the principal if said revocation is the result of a conviction of violation of section 123.49(2,*a*).

8.2(4) *Notice of cancellation.* It must contain a provision that the bond cannot be canceled by either the principal or the surety until after the department at its office in Des Moines, Iowa, has received 30 days prior written notice of said cancellation and the cancellation or notice thereof will be of no force and effect in the event of revocation.

8.2(5) *Proof of bond.* A licensee or beer permittee shall be deemed to have furnished a surety bond as contemplated by sections 123.30(1), 123.128(3) and 123.129(3), when it has filed with

the department at its office at Des Moines, Iowa, a copy of form L-11, a copy of which is attached hereto and by reference made a part hereof.

8.2(6) *Alternate for surety bond.* Applications to post a bond in lieu of providing a surety bond as contemplated by section 123.30, must be made in writing to the department and each application will be determined individually.

State of Iowa, as Principal, and _____
_____of _____
(City and State)

as Surety, are held and firmly bound unto the STATE OF IOWA in the penal sum of _____, lawful money of the UNITED STATES, for the payment of which, in Des Moines, Polk County, Iowa, we bond ourselves, our successors and our legal representatives firmly by these presents.

THE CONDITION of the foregoing is such that the principal and his surety consent to forfeiture of the principal sum of said bond in event of revocation of the beer liquor license held by the principal under the provisions of section 123.49(2 a, d, or e), or retail beer permit held by the Principal under paragraph "a" of said section.

NOW, THEREFORE, if the said _____ shall well and truly observe and obey all of the provisions of sections 123.30 or 123.128 and 123.129, including the payments of all taxes as provided therein, then this bond shall be void, otherwise to remain in full force and effect.

THIS BOND shall be effective on _____ 19____, and shall remain effective continuously without cumulative liability until canceled. This bond may be canceled by the principal or the surety by giving written notice to the other party and the department at its office in Des Moines, Iowa, stating the date of cancellation, which in no event shall be less than 30 days after actual receipt of said notice; however, no cancellation shall be effective as to forfeiture in the event proceedings for the revocation of the principal's liquor control license have been or are commenced prior to the effective date of such cancellation.

Signed this _____ day of _____, 19____.

MEDICAL LIBRARY

CHAPTER 1
USE OF LIBRARY

1.1(303) Borrowers. Adult residents of the state are entitled to borrow books by filling out an application card.

1.2(303) Loan period. The period of loan (except for reserve material) is two weeks; with the privilege of a two weeks renewal if at the time of request for renewal there are no other calls for the material. Student loans are for two weeks only.

1.3(303) Postage. The borrower pays the return postage on material sent through the mail.

1.4(303) Student loans. Students may borrow three volumes at a time, no two of which may be on the same subject. Student loans are not renewable. There is a fine of two cents per day for each piece of literature kept out over the loan period.

1.5(303) Reserve material. The librarian may place on reserve any material being used by classes or groups and restrict loans on such material to overnight or over the weekend. Such loans are to be returned by 12:30 p.m. of the day designated or a fine of 25 cents paid for each day each piece is kept out beyond the stated time.

1.6(303) Restricted material. Books purchased from the publisher under restrictive clause may be used only after application to and at the discretion of the librarian.

1.7(303) Forfeiture of privilege. Loss of books or journals without paying for same, defacing or mutilating material, three requests for return of material without results, or necessity of asking attorney general's aid to have material returned, bars from future loans.

1.8(303) Transients. Transients and those at hotels may borrow books by depositing the cost of the book or five dollars, which is refunded when the book is returned.

MERIT EMPLOYMENT DEPARTMENT

CHAPTER 1
DEFINITIONS

1.1(19A) Definitions.

1. *"Absence without leave"* means any absence of a classified employee from duty without specific authorization, either before or after such absence.

2. *"Act or merit employment Act"* means the law creating the merit system of personnel administration.

3. *"Agency"* means any legally constituted board, commission, office, authority, agency, department or other branch of state government in which all positions are under the same appointing authority.

4. *"Agency promotional list"* means an eligible list of permanent employees of the agency, or duly established organizational unit thereof, established by examination from which promotions are made.

5. *"Allocation"* means the original assignment of a position to an appropriate class on the basis of duties and responsibilities assigned and performed.

6. *"Appointing authority"* means the officer, board, commission, person or group of persons having the power by virtue of a statute, or lawfully delegated authority, to make appointments to, or remove from employment in the state classified service.

7. *"Certification"* means the act of submitting the required number of available names on an appropriate eligible list to an appointing authority for the purpose of his making a selection in accordance with these rules.

8. *"Class"* or *"class of position"* means one or more positions, which are sufficiently similar in duties and responsibilities, that each position in the group can be given the same job title, require the same minimum qualifications as to education and experience, can be filled by substantially the same test of ability or fitness, and that the same schedule of pay can be applied with equity to all positions in the class under the same or substantially the same employment conditions.

9. *"Class specification"* means a descriptive and explanatory guide reflecting distinct characteristics of duties and responsibilities normally assigned to positions allocated to the class and the minimum qualifications requisite thereto.

10. *"Classification plan"* means the orderly arrangement of positions within the classified service into separate and distinct classes, so that each will contain those positions which involve substantially similar or comparable skills, duties and responsibilities.

11. *"Classified employee"* means an employee occupying a position in the classified service or an employee currently on leave in accordance with established leave regulations.

12. *"Commission"* means the Iowa merit employment commission.

13. *"Demotion"* means a change of a classified employee from a position in a given classification to a position in a lower classification. Normal-

ly, the lower classification will have a lower entrance salary. Demotion may be voluntary or involuntary.

14. *"Department"* means the Iowa merit employment department.

15. *"Detail to special duty"* means the temporary assignment of a classified employee to perform the duties and responsibilities of a position other than the ones to which he is regularly assigned without prejudice to his rights in and to his regularly allocated position.

16. *"Director"* means the director of the Iowa merit employment department.

17. *"Eligible list"* means an officially promulgated list of eligibles for a class of position in the order of their final rating in an examination as provided herein.

18. *"Established position"* means a position duly approved by statute or the executive council which is funded and allocated to an appropriate class.

19. *"Examination"* means all the tests of fitness that are applied to determine eligibility of applicants for positions in any class in the classified service.

20. *"Geographic list"* means an officially established list of eligibles residing in a county, or other designated administrative area, in the order of their final rating in an examination.

21. *"Grievance"* means any expressed difference, dispute or controversy between an employee and the appointing authority or his representative with respect to circumstances and conditions which concern their working relationship in the agency.

22. *"Minimum qualifications"* means the requirements of training and experience and other qualifications, including those to be measured by an appropriate examination, as prescribed in the job specification for the class of position.

23. *"New position"* means a position not previously existing.

24. *"Open-competitive examination"* means an examination which permits the competition of persons who meet the minimum requirements of the official announcement for the class of position, and is not restricted to persons currently employed in the classified service.

25. *"Part-time position"* means a position requiring the services of an employee for less than a standard or nonstandard work week on a continuing basis.

26. *"Pay plan"* means a schedule of salaries or hourly wages established for the several classes recognized in the state classification plan.

27. *"Permanent employee"* means an employee who has completed the required probationary period or who has acquired permanent status in conformity with the Merit Employment Act.

28. *"Position"* means a group of specific duties, tasks and responsibilities assigned by the appointing authority to be performed by one employee; a position may be part-time or full-time, temporary or permanent, occupied or vacant.

29. *"Probationary employee"* means a person certified from a list of eligibles or employed through a work test appointment and serving a probationary period.

30. *"Probationary period"* means a working test period and is a part of the examination process following an original appointment, during which the employee is required to demonstrate his fitness for the position to which he is appointed by the satisfactory performance of the duties and responsibilities of the position to which appointed.

31. *"Promotion"* means a change in status of a permanent employee from a position in a lower classification to a position in a higher classification. Normally the higher classification will have a higher entrance salary.

32. *"Reallocation"* means the reassignment or change in the allocation of a position by raising it to a higher, reducing it to a lower, or moving it to another class of the same level on the basis of significant changes in the kind or difficulty of the tasks, duties and responsibilities in such position, or because of an amendment to the classification plan, and officially assigning to that position the class title for such appropriate class of position.

33. *"Reinstatement"* means the re-employment of a permanent employee as provided in these rules, or the placing of a probationary or permanent employee's name back on a list of eligibles as provided herein.

34. *"Statewide list"* means a list of eligibles for a class position, who have indicated their willingness to accept employment wherever a particular vacancy exists, ranked in the order of their examination scores.

35. *"Transfer"* means a change of a classified employee from one classified position to the same or a comparable classified position of equal rank, from one geographical location to another geographical location; from one agency to another agency.

[Filed June 9, 1970]

CHAPTER 2
STATE SERVICE AND ITS DIVISIONS

2.1(19A) Exempt service. The exempt service shall include those positions as determined by the commission in accordance with the provisions of section 19A.3. The director may, upon request, assist and advise appointing authorities concerning salary rates appropriate for positions in the exempt service.

2.2(19A) Classified service. The classified service shall consist of all positions now existing or hereafter created and not included in the exempt service. There shall be in the classified service three divisions, to be known as Division "A", Division "B", and Division "C".

2.2(1) *Division "A"* shall include only those positions and employments for which is practicable to determine the merit and fitness of applicants by assembled examination.

2.2(2) *Division "B"* shall consist of all positions requiring peculiar and exceptional qualifications of a scientific, managerial, professional, or educational character and for which an unassembled examination may be used.

2.2(3) *Division "C"* shall include positions involving unskilled, semiskilled, domestic, attendant or custodial work.

The director shall assign each class in the position classification plan to Division "A", "B", or "C".

2.3(19A) Nonstate employment. Specialized personal services rendered by an individual to the state under contract as an independent contractor and as a part of, or incidental to, the individual's regular profession or occupation and not as a state employee shall be designated as nonstate employment and shall not be subject to the provisions of these rules. The appointing authority shall report each such employment to the director in such form and such detail as the director may require. If, after such investigation as he deems necessary, the director determines that the proposed employment is of such a nature as to constitute state employment, he shall so notify the appointing authority and the state comptroller and that notice shall constitute advice that such employment is not in conformance with the provisions of chapter 19A of the Code.

In evaluating contracts for personal services, the following guidelines shall be used:

2.3(1) Whether the contract is with a recognized existing organization rather than with an individual, and the organization has the facilities and expertise to fulfill the contract. However, a contract with an individual may be appropriate if he is an independent "entrepreneur".

2.3(2) Whether the contract clearly indicates the "independent contractor" concept with the agency having no direct administrative or supervisory responsibility of the day-to-day carrying out of the contract. So long as the agency has the right to control both the method and result of the services, the individuals involved cannot be considered as independent contractors.

2.3(3) Whether the contract includes a terminal date with the end product (report, service to be accomplished, etc.) clearly set forth.

2.3(4) Whether the agency is withholding various taxes from the individual's salary. If the individual is on the agency payroll and income taxes are withheld, it is obvious that the agency is the employer and the individual is not working for or as an independent contractor.

[Filed April 1, 1969; amended December 1, 1972]

CHAPTER 3
CLASSIFICATION PLAN

3.1(19A) Preparation, adoption and maintenance of the classification plan for the classified service.

3.1(1) The commission shall review agency recommendations, hear suggestions, ascertain the actual duties, tasks and responsibilities of all classified positions and adopt a uniform classification plan.

3.1(2) The classification plan shall set forth for each class of position a class title, definition, examples of work performed, minimum qualifications and special requirements that are necessary for satisfactory performance in the class. Personal qualifications commonly required of an employee in any class such as good citizenship, honesty, loyalty, sobriety, industry, amiability to supervision and willingness to co-operate with associates shall be implied for entrance into any class.

3.1(3) The classification plan shall be so developed and maintained that all positions which are substantially similar and comparable with respect to kind, difficulty and responsibility of work are included in the same class; that the same means of recruitment and appropriate examination method may be used in filling all positions within a class; and, that the same schedule of pay may be applied with equity to all positions in a class in the same geographical area.

3.1(4) The commission through co-ordination with, and the co-operation of, the agencies shall from time to time review the classification plan and may add, combine, divide or abolish classes or revise the specifications of existing classes or establish new classes as the needs of the classified service so indicate. All of the aforementioned shall be submitted to the state comptroller, the governor and the executive council and approved by the executive council before they become effective. The director shall submit a schedule of classes of position reflecting the types of employment in each agency to the governor annually.

3.1(5) Each position in the classification plan shall be reviewed at intervals, or at the request of the appointing authority or by a permanent classified employee affected by the review to ascertain whether it is correctly allocated. Decisions of the appeal board shall not be subject to review until significant changes in the duties and responsibilities of a position can be shown. Allocation or reallocation shall be made by the director. The appointing authority and permanent classified employees shall be notified in writing. Allocation or reallocation shall become effective on the first day of the pay period following the date of the director's notice of the action. An appointing authority or permanent classified employee affected

by such allocation or reallocation may within 14 calendar days of notice file a request in writing to the director for reconsideration stating the reasons supporting such request. The director shall act on the request within 30 calendar days. During such period, the original action shall be held until the director's final determination and notice thereof. Thereafter, allocation or reallocation shall become effective on the first day of the next pay period unless appeal is made as set forth in chapter 12 of these rules.

3.1(6) No allocation or reallocation will become effective, notwithstanding 3.1(5), until approval has been obtained from the state comptroller stating that such allocation or reallocation does not result in the expenditure of funds in excess of the amount budgeted for the department of the appointing authority concerned.

3.1(7) The commission may delegate to the director such of their duties as imposed under 3.1(19A) and subdivisions as they deem necessary or expedient for the needs of the classified service.

3.2(19A) Creation and allocation of new positions. When a new position, or positions, as approved by the executive council, are to be established, the appointing authority shall notify the director in writing and furnish job descriptions. The director shall study the duties and responsibilities of the new position, or positions, and determine the proper classification. If an appropriate classification does not already exist, he shall prepare a new class specification to cover the position or positions, and they shall be allocated and approved as set forth in 3.1(19A) of this chapter.

3.3(19A) Position reallocation. Whenever reorganization of an agency or action of the executive council cause the duties of a position to change or a position appears to have been incorrectly allocated, the director shall upon his own initiative or at the request of the appointing authority or a permanent classified employee affected by the reallocation, investigate the duties of the position or positions in question. After conferring with the appointing authority and the classified employees involved and reviewing agency recommendations and suggestions, the director shall reallocate the position or positions to the appropriate class or classes in accordance with the provisions of 3.1(19A). Reallocation shall not be used to avoid the provisions of chapter 19A or these rules dealing with layoffs, demotions, promotions or dismissals.

3.4(19A) Status of incumbents when positions are reallocated. In all cases of reallocation, the employee in the position when it is reallocated shall be entitled to serve therein with the classified status that he had in the position before its reallocation, provided he meets the minimum qualifications for the class to which his position is reallocated or if the duties and responsibilities of the position have not appreciably changed. If ineligible for appointment to the position as reallocated, he shall be transferred, promoted or demoted by appropriate action in accordance with the provisions of these rules. However, a classified employee shall not be required to meet the minimum qualifications, if his position is reallocated to a lower or comparable class. In any case in which the incumbent is ineligible to continue in the position, and he is not transferred, promoted or demoted, the provisions of these rules regarding separation shall apply.

3.5(19A) Class specifications. The class specification, along with classification standards and desk audits, shall be considered in allocating positions and specifications shall be interpreted as follows:

3.5(1) Class specifications are descriptive only and are not restrictive. The use of a particular expression of duties, qualifications, requirements or other attributes shall not be held to exclude others not mentioned but germane to the class concept.

3.5(2) In determining the class to which any position shall be allocated, the specification for each class shall be considered as a whole. Consideration shall be given to the general duties, specific tasks, responsibilities required and relationship to other classes as affording together a picture of the positions that the class intended to include.

3.5(3) A class specification shall be construed as a general description of the kinds of work characteristic of positions properly allocated to that class and not as prescribing what the duties of any position shall be, nor as limiting the expressed or implied authority of the agency, now or hereafter vested with the right to prescribe or alter the duties of any position.

3.5(4) The fact that all of the actual tasks and duties performed by the incumbent of a position do not appear in the specification of a class to which the position has been allocated shall not be taken to mean that the position is necessarily excluded from the class, nor shall any one example of a typical task taken without relation to other parts of the specification be construed as determining that a position should be allocated to the class.

3.5(5) Changes in minimum qualifications requirements shall have no affect on the status of incumbent employees.

3.6(19A) Position descriptions and notification of change in position content. Position descriptions shall be supplied and kept current by the appointing authority for each position under his jurisdiction on forms prescribed by the commission. Agencies shall give written notice to the director of material changes in the duties and responsibilities of any position.

3.7(19A) Assignment of lead-worker duties. Whenever a classified employee, who is performing the same duties as other employees in

his class, is assigned limited supervisory duties such as distribution of work assignments, maintaining a balanced work load among a group and keeping record of work, production or attendance over employees in the same class or a class having the same entrance salary and which duties do not justify reallocation to a supervisory class in a higher pay range, the appointing authority may request the director to approve the position as a "lead-worker position".

3.8(19A) Position numbering system. The director in co-ordination with the office of the state comptroller shall develop a position numbering system that will uniformly identify the agency and position location, the class code number and the position number of each established position in the classified service.

[Filed September 18, 1970]

CHAPTER 4
PAY PLAN

4.1(19A) Preparation and adoption of the pay plan. The director, after consultation with appointing authorities, shall prepare and recommend to the commission a pay plan for all classes of positions in the classified service.

4.1(1) *Factors to be considered in preparing the pay plan.* Pay grades shall be related directly to the position classification plan for the classified service and shall be determined with due consideration to pay grades for other classes, the relative difficulty and responsibility of work in the several classes, the recruiting experience of the state, the availability of employees in particular occupational categories, prevailing rates of pay for similar employment in private and other public jurisdictions in the area, employee turnover, cost of living factors, the financial policies and economic considerations of the state. The minimum and maximum rates of pay assigned the several classes of positions shall be those which most nearly reflect these factors.

4.1(2) *Adoption by commission.* The commission, after holding a public hearing, shall adopt the pay plan, or a revision thereof, and forward same to the executive council for approval.

4.1(3) *Approval by executive council.* The pay plan shall become effective on the date it is approved by the executive council unless another date is specified.

4.2(19A) Pay plan review and amendment. The director, at his discretion, but not less than annually, shall review the pay plan, giving consideration to factors as specified in 4.1(1) of these rules, and may recommend revisions to the commission. Revision in the pay plan shall be made in the same manner as the adoption and approval of the original pay plan under 4.1(19A). Any appointing authority may initiate a written request for amendment of the pay plan to the director.

4.2(1) *Revisions in pay grade assignments.* At the written request of any appointing authority or when the director determines that a pay grade assignment for a class of position is not competitive or is not properly related to the overall pay plan, the director may recommend the reassignment of the class of position to a different pay grade. Revision in the pay grade assignment for the class of position shall be made in the same manner as the adoption and approval of the original pay plan under 4.1(19A).

4.2(2) *Economic pay adjustment.* When the director's investigations show an increase or decrease in the cost of living, he may recommend a percentage increase or decrease in pay for all pay grades. Upon approval, each step in each pay grade in the pay schedule shall be recalculated to reflect the percentage increase approved. Each employee shall then be placed on his proper step in the revised pay schedule.

4.3(19A) Content of the pay plan. The pay plan for the classified service shall include:

4.3(1) A schedule of numbered pay grades with the minimum, maximum and intermediate steps for each pay grade.

4.3(2) A list of classes of positions by occupational groups and the pay grade to which each class is assigned.

4.4(19A) Pay of employees.

4.4(1) *Employees to be paid at one of the steps in the pay plan.* Each employee shall be paid at one of the steps of pay set forth in the pay plan for the class of positions to which the position he occupies is allocated except as provided in these rules or when otherwise authorized by the commission. Such pay shall constitute the total compensation for the employee for services rendered to the state.

4.4(2) *Total remuneration.* No employee shall receive any pay under governmental jurisdiction other than that specifically authorized by the commission for the discharge of the duties of his position or additional duties which may be assigned to him or which he may undertake, or volunteer to perform as a state employee.

In any case in which part of the compensation for services in a classified position, exclusive of military training leave, is paid by another department, division, or an outside agency such as the city, county, or federal government, or from a different fund or account, any such payments shall be deducted from the compensation of the employee concerned to the end that the total compensation paid to any employee from all sources combined, for any period, shall not exceed the amount payable at the rate prescribed for the class of positions to which the employee is certified and appointed.

4.4(3) *Subsistence or maintenance allowances received in lieu of cash shall be considered*

as part of total compensation. In each case where an employee and his family are provided with full or part maintenance, consisting of one or more meals per day, lodging or living quarters, and domestic or other personal services, such compensation in kind shall be treated as part payment and its value shall be deducted from the appropriate pay rate in accordance with the schedule promulgated by the director after consultation with appointing authorities and approval of the commission.

4.5(19A) Administration of the pay plan.

4.5(1) *Entrance rate of pay.* The entrance salary for any classified position shall be at the minimum salary for the class of position to which appointed, except:

a. Appointment based on scarcity of qualified applicants. When an appointing authority submits a written request setting forth the economic or employment conditions which make recruitment of eligibles at the minimum rate for the class of position difficult or impossible, the director may authorize appointment of qualified eligibles at a higher rate within the pay grade for the class of position in a limited geographical area or for the class as a whole not to exceed step "C" of the pay grade. The higher entrance rate shall remain in effect until the director orders such rate rescinded. All employees in the same class and under the same conditions necessitating the higher entrance rate, who are earning less than the higher entrance rate, shall be increased to the approved entrance rate. Thereafter all new employees or promoted employees subject to the same conditions shall be treated in a like manner. Requests for appointment above step "C" of the pay grade for the class of position shall be submitted to the commission.

b. Appointment based on overqualification or exceptional qualifications. An appointing authority may with the prior approval of the director, offer appointment above the entrance rate to qualified eligibles who exceed the minimum qualifications of the class or who possess outstanding and unusual experience for the class of position depending upon the eligible's qualifications and the needs of the appointing authority; and, provided further, that all other employees possessing similar qualifications in the same class in the same agency in the same geographical area are adjusted in pay to the step approved. Requests for appointment above step "C" shall be submitted to the commission.

c. Appointment by reinstatement. A permanent classified employee who has been reinstated to his former class of position or to a lower class of position may, at the discretion of the appointing authority, be paid at any step within the pay grade for the class of position to which appointed which does not exceed the step in the pay grade to which assigned upon separation from the classified service. Salary increases shall be in accordance with the provisions as to probationary or permanent classified employees.

d. Military and educational leave. Any permanent classified employee who returns from authorized military or educational leave may be paid at the salary rate for which he would have been eligible if he had not gone on such authorized leave.

e. Reappointment from preferred employment lists. The appointing authority may re-employ a former employee from the preferred employment list in accordance with these rules at the same step in the pay grade for the class from which he was laid off or at any step in the pay grade if he is re-employed in a class of position in a lower pay grade, provided it does not exceed the rate he would have been eligible to receive in the class from which he was laid off.

f. Appointment below minimum step "A" of the pay grade. The director may authorize appointment below the minimum step "A" of the pay grade for a class as follows:

(1) *Career development appointment.* When a career development appointment is made in accordance with these rules, the rate of pay shall be set one step below the minimum step "A", or the special appointment rate, whichever is applicable, for each six months experience the appointee lacks in meeting the minimum experience requirements for the class to which the career development appointment is being made. If the appointee is a permanent employee, and his rate of pay equals or exceeds the rate provided herein, he shall be permitted to accrue pay rights in the class from which he is appointed until such time as his eligibility for pay increase exceeds the rate to which he is entitled in his former class.

(2) *Co-operative training and trainee appointments.* When co-operative training and trainee appointments are made in accordance with these rules, the rate of pay shall be set one step below the minimum step "A" or the special appointment rate, whichever is applicable, for each semester of training the appointee lacks in meeting the minimum training requirements for the class to which the co-operative training or the trainee appointment is being made.

(3) *Budget limitation.* If the director is advised by the state comptroller that an agency is unable to make appointments at the minimum step "A" of the pay grade for a class because of budget limitations, he may authorize appointment at such step below the minimum as budgetary conditions will permit.

(4) *Competitive rates below minimum.* When the director determines that the competitive entrance rate for a class in a geographical area is below the minimum step "A" of the pay grade, he may authorize appointment of eligibles at such step below the minimum as is necessary to avoid payment of premium entrance rates in that area. Such rate shall be used for all appointments made

in the geographical area concerned, until such time as economic conditions warrant a higher entrance rate.

4.5(2) *Merit pay increases.* A merit pay increase is a periodic increase in pay from one step to the next higher step within the pay grade for a class.

a. A basis for merit pay increases. Merit pay increases shall not be automatic or retroactive. All such pay increases shall be upon specific recommendation of the appointing authority and shall be based on standards of performance as indicated by official performance ratings and other pertinent data.

b. Merit pay increase eligibility. Probationary and permanent classified employees shall be eligible and may be given consideration by the appointing authority for a one-step merit pay increase at the beginning of the pay period following the satisfactory completion of the periods of service prescribed below for progression from step to step within the pay grade for the class to which their positions are allocated. The periods of service shall be exclusive of time spent on educational leave (except as required by the appointing authority) or, leave without pay which exceed 30 days, and periods during which service was rated less than satisfactory as reflected by an official performance rating. Periods of satisfactory service required for eligibility are as follows:

(1) Progression from step "A" to "B" and step "B" to "C"—six months.

(2) Progression from step "C" to "D," step "D" to "E" and step "E" to "F"—12 months.

(3) Progression from step "F" to "G" and step "G" to "H"—24 months, except employees occupying highway engineer-in-training positions may be considered for merit pay increase progression from step "F" to "G" in 12 months prior to required registration as a professional engineer.

(4) Maintenance and trades classes which are assigned to salary schedule II in the compensation plan may be considered for merit increase progression from the entrance rate to the intermediate rate after six months of service, and from the intermediate rate to the maximum rate after 18 months of service.

c. Anniversary date. Any type of pay increase given an individual, other than an adjustment incident to an upward revision of the range of the class in which he is employed, an exceptionally meritorious service raise, pay for lead-worker duty assignment or special duty assignment shall establish a new anniversary date for purposes of eligibility for merit increases.

For any employee at the top of or "red circled" above the top step of a pay range, his anniversary date shall be established as the date of his last pay raise as provided herein, and upon adjustment of the pay range the time period spent at such top step or "red circled" rate shall be credited against the time interval between steps in the new range, if any.

When a probationary employee is appointed to the classified service, the merit increase date shall be established on the first day of the pay period for those employees who enter on duty on the first work day of a pay period. Otherwise, it shall be the first day of the pay period following the date of entry on duty.

4.5(3) *Pay increase for exceptionally meritorious service.* A pay increase of one step within the pay grade for the class may be made for exceptionally meritorious service, in addition to merit pay increases provided in 4.5(2), upon recommendation of the appointing authority and the approval of the commission. Exceptionally meritorious service pay increases shall be governed by the following:

a. The employee must have served in the position for at least three months.

b. Written justification, setting forth in detail the nature of the exceptionally meritorious service rendered, must be submitted to the commission and approved in advance of granting the pay increase.

c. No more than one exceptionally meritorious service pay increase may be granted in any 12-month period.

4.5(4) *Pay increase upon promotion.* A promotion means a change from a position in one class to a position in another class having a higher minimum step "A".

a. An employee who is promoted shall have his pay increased to the minimum step "A" of the pay grade for the higher class if his rate of pay before promotion falls below said minimum "A" step. In the case of overlapping pay grades and the employee's rate of pay is at or above the minimum "A" step of the pay grade for the class to which he is promoted, he shall receive a one-step promotional pay increase except as otherwise provided in "*b*" and "*c*" below.

b. For promotions between classes with a one- or two-pay step differential between the pay grades, the director may approve a two-step promotional increase, provided the appointing authority certifies that a change of residence beyond a normal commuting distance is required of the appointee.

c. For promotions between classes with a three- or more pay step differential between the pay grades, the director may approve a two-step promotional increase upon written request of the appointing authority.

d. An appointing authority may, for employees who fall within 4.5(1) "*b*", as with a new employee, request the commission approval for similar consideration.

4.5(5) *Pay for lead-worker duty assignment.*

a. An employee who is occupying a position which has been classified by the director as a

lead-worker position, as provided in these rules, shall be eligible for a one-step pay increase in addition to his regular step in the pay grade for the class to which the position is allocated.

b. At such time as the employee is removed from the position or the lead-worker duties are removed therefrom, the employee's pay shall be reduced one step to his regular step in the pay grade for the class.

4.5(6) *Pay upon assignment to special duty.* When an employee is assigned to special duty in another position, as provided in these rules his pay may be increased to the minimum step he could receive upon promotion to such position, provided that:

a. Any such temporary increase granted shall not affect the employee's eligibility for pay increases in his regular position.

b. At the expiration of the assignment to special duty, his pay shall revert to his authorized rate in his regular position.

4.5(7) *Pay on demotion.* An employee who is demoted shall have his rate of pay fixed by the appointing authority on any step within the pay range for the class of position to which he has been demoted, which does not exceed his last rate of pay in the pay range for the class of position from which demoted.

4.5(8) *Pay adjustments incident to pay grade reassignments.*

a. In the event a class is assigned to a higher pay grade, all employees in positions in that class shall be adjusted to a corresponding step in the new pay range as they held in the old pay range. If an employee has not been adjusted previously, as provided in 4.5(9) "*c*", such adjustment shall be made prior to grade adjustment.

b. In the event a class is assigned to a lower pay grade, the following pay adjustments will be made to employees occupying positions of that class:

(1) The rate of pay of an employee who has served at least six months at his current rate of pay may remain the same.

(2) The rate of pay of an employee who has less than six months' service at his current pay step will be reduced at least one-pay step below the step he is receiving or the maximum of the pay grade for the lower class, whichever is lower.

4.5(9) *Salary adjustments for probationary and permanent classified incumbents.* Notwithstanding eligibility time limitations provided elsewhere in this chapter and providing the comptroller certifies that funds are available:

a. Where the rate of pay of an incumbent is lower than the minimum of the pay range for his class, the appointing authority shall increase the rate of pay of the incumbent to the minimum step of the pay range for the class.

b. Where the rate of pay of an incumbent is higher than the maximum step pay range of a class, the pay may remain the same as long as the incumbent retains his present position, but no further increases or adjustments will be approved.

c. Where the rate of pay of an incumbent is between the minimum and maximum rates of the pay range for a class of position, but not coinciding with any intermediate step of such pay range, the appointing authority shall adjust the incumbent to the next higher step of the pay range for the class.

4.5(10) *Pay upon reassignment.* An employee who is reassigned from a position in one class to a different position in the same class or to a position in a different class in the same pay grade shall not be eligible for a pay increase nor shall such reassignment have any effect on his merit pay increase eligibility.

4.5(11) *Pay upon transfer.*

a. When an employee is transferred from a position in one agency to a position in the same class or another class in the same pay grade in another agency, his rate of pay shall be no higher than the pay he was receiving prior to transfer, and his eligibility for merit pay increases shall not be affected.

b. When an employee is transferred from a position in one agency to a position in a higher or lower pay grade in another agency, his rate of pay shall be fixed by the rules governing promotions or demotions, whichever is applicable.

4.5(12) *Pay upon reallocation of position.* When a position is reallocated, the incumbents pay shall be fixed in accordance with these rules governing pay upon promotion, demotion or transfer, whichever is applicable and subject to the certification of the state comptroller of the availability of funds.

4.5(13) *Pay for part-time employment.* Pay for part-time employment in a position shall be proportionate to the rate of pay for full-time employment.

4.5(14) *Effective date of pay changes.* All pay changes shall be made effective on the first day of a pay period. Original appointments, reemployments, and reinstatements shall be effective on the first day the appointee reports for duty.

4.5(15) *Pay for overlap in position.* In cases where it is deemed necessary by the appointing authority to fill a position on an overlap basis pending the separation of an incumbent employee, an appointment of a new employee may be made in accordance with the rules for a period not to exceed one month. Any overlap for a longer period must be approved by the director.

4.5(16) *Pay for certified instructional personnel.* Employees of state institutions who are incumbents of teaching positions allocated to classes for which teaching certificates are required shall be paid in accordance with the prevailing rates of pay for the school district in which they are employed. The appointing authority shall file

a copy of the pay plan for each school district, in which positions requiring teaching certificates are located, with the director not later than September 1 of each year. Such pay plan shall clearly indicate the rates of pay for classes of teachers comparable to those utilized by the institution. Rates of pay for such classes shall require the approval of the director and shall be effective on the first day of the normal contract year for the school district.

4.6(19A) Overtime. Overtime shall be payable in accordance with the Code of Iowa and federal provisions of the Fair Labor Standards Act as applicable and authorized. It shall be the responsibility of the appointing authority to determine coverage and certify payment by the state comptroller.

Positions shall be categorized for purposes of determining eligibility for overtime as follows:

4.6(1) *Standard workweek.* A standard workweek shall include positions which require 40 hours of work in seven consecutive days for shift assignments.

4.6(2) *Extended workweek.* An extended workweek shall include positions which require more than 40 hours of work in seven consecutive days on regular daily assignments or of 80 hours of work in 14 consecutive days for shift assignments. Extended workweeks shall be approved by the commission only after certification by the state comptroller of the availability of funds. Extended workweeks may be established on increments of two additional hours per week up to 48 hours. The rate of pay for the position shall be increased one step for each two-hour increment above 40 hours per week. Upon reduction of the workweek the pay of the incumbent employee shall be reduced accordingly, without right of appeal. The extended workweek shall not be applicable to positions within the classified service which are subject to the Fair Labor Standards Act.

4.6(3) *Nonstandard workweek.* The nonstandard workweek shall include all positions not assigned to the standard workweek and the extended workweek, which regularly and normally work in excess of 40 hours per week and are compensated on that basis.

4.7(19A) Pay differential. The commission may authorize a pay differential for a position within a class due to special duty requirements related to the position, but not to the class as a whole or for a class as a whole within an agency structure where such class is performing under duty requirements not normally required to the class in general state service. This differential shall be over and above the pay within the pay grade for the class of position and shall be paid only as long as the employee occupies the particular position or the class is used under the circumstances which have necessitated the differential. The request shall be submitted in writing and shall outline all facts as to the particular need. Such differential payment shall be subject to the approval of the state comptroller that funds are available for such differential payment.

4.8(19A) Rate for granting compensatory time off. An employee shall be granted one hour of compensatory time off for each hour worked in excess of a normal workweek for a class not compensated by overtime payment. Compensatory time off shall be granted as soon as possible after it is earned and must be granted within one year of the date earned. If an employee is transferred or promoted from one agency to another or separates or retires from the classified service, he shall be given the accumulated compensatory time off prior to the effective date of such action by the agency from which he is so transferred, promoted, separated or retired.

[Filed July 14, 1969; amended June 9, 1970, September 18, 1970, November 10, 1970, April 14, 1971, January 18, 1972, February 11, 1972]

CHAPTER 5
RECRUITMENT AND EXAMINATION

5.1(19A) Scheduling of open competitive and promotional examinations. The director shall from time to time conduct such open competitive examinations as necessary for the purpose of establishing and maintaining registers of eligibles and promotional registers. The examinations shall be of such character as to determine the relative qualifications, fitness and ability of the persons tested to perform the duties of the class for which a register is to be established.

5.2(19A) Announcement of examinations.

5.2(1) *Open competitive examinations.* Examinations for entrance to the classified service shall be conducted on an open competitive basis. The director shall give public notice of all entrance examinations at least 15 calendar days in advance of the closing date for receiving applications and shall make every reasonable effort to attract qualified persons to compete in the examinations.

Notice of open competitive examinations shall be published by posting throughout the state and copies sent to newspapers, radio stations, educational institutions, Iowa employment security offices, state agencies, professional and vocational societies and associations, public officials and such other organizations and individuals as the commission may deem expedient.

5.2(2) *Promotional examinations.* Promotional examination announcements shall be posted on bulletin boards or in other conspicuous places of the department or agency concerned and necessary steps shall be taken to bring such announcements to the attention of eligible employees within the agency.

5.2(3) *Content of announcements.* Examination announcements shall specify class title and salary range of the class for which the examination is announced; the nature of the work to be performed; the minimum qualifications required for the performance of the work of the class; the time, place and manner of making application; the closing date for receiving applications; and other pertinent information. For those classes for which there is to be continuous recruitment, a statement shall be included in the announcement to the effect that applications will be received until further notice.

5.3(19A) Eligibility to compete in examinations.

5.3(1) *Open competitive examinations.* Competitive examinations for original appointment to a class of position in the classified service shall be open to all applicants who meet the minimum training and experience requirements, and the necessary special requirements, if any, prescribed in the class specification for the class.

5.3(2) *Promotional examinations.* Promotional examinations shall be open to all permanent and probationary classified employees who meet the requirements and the necessary special qualifications, if any, prescribed for the class.

5.4(19A) Application and admission. An application for examination shall be made on a form prescribed by the commission and shall constitute an integral part of the examination. Applications must be filed with the department on or prior to the closing date specified in the announcement or postmarked before midnight on that date; except, the director, in cases where sufficient cause is presented and approved, may order the acceptance of any application or information supplementary thereto received after the close of such period and prior to the administration of the first phase of the examination. For those classes of positions in which satisfactory evidence of frequent turnover or nearly constant employment activity may be presented, the director may establish a procedure involving continuous receipt of applications and frequent examinations.

5.4(1) The application form shall require information as to education, training and experience of the applicant and such other information as the commission may deem pertinent. The director may require any applicant for any examination to submit documented proof of the possession of any license, certificate, degree or other evidence of eligibility or qualification claimed or required by state law, these rules or the specification and may refuse credit for such claimed or required qualification in the absence of such proof.

5.4(2) An applicant, currently enrolled in an educational institution, who does not meet the minimum education or training requirements may be admitted to examinations, provided he will meet the requirements within eight months. The name of an applicant, so admitted, who attains a qualifying rating shall have his name placed on the eligible list. His name may be certified subject to his completing the education or training requirements necessary for admission to the class, but he shall not be appointed until all requirements are met.

5.5(19A) Disqualification of applicants. The director may refuse to examine an applicant, or after examination, may disqualify such applicant or remove his name from the eligible list or refuse to certify any eligible on a list or may consult with the appointing authority in taking steps to remove such person already appointed if:

5.5(1) It is found that he does not meet any one of the qualification requirements established for the class of positions for which the examination is being conducted.

5.5(2) He is so disabled as to render him unfit for the performance of the duties of the class of positions.

5.5(3) He has made a false statement of material fact in his application.

5.5(4) He has used or attempted to use political pressure or bribery to secure an advantage in the examination.

5.5(5) He has directly or indirectly obtained information regarding the examination to which, as an applicant, he was not entitled.

5.5(6) He has failed to submit his application correctly or within the prescribed time limits.

5.5(7) He has taken part in the compilation, administration, or correction of the examination for which he is an applicant.

5.5(8) He has previously been dismissed from a position in the state service or private industry for cause or has resigned while charges for dismissal for cause were pending.

5.5(9) He has reached, or will within one year of the date of the examination reach, retirement age as prescribed by law.

5.5(10) He has been convicted of a felony or an indictable misdemeanor or he has a record of conduct which is unbecoming a state employee.

5.5(11) He is addicted to the use of narcotics and other self-induced stimulants which are illegally obtained and utilized.

5.5(12) He is known to use intoxicating beverages to excess.

A disqualified applicant or eligible shall promptly be notified in writing of such action at his last known address. A disqualified applicant or eligible may request review of the reason for his disqualification. Such request shall be in writing and upon receipt the director shall give full consideration to the request, and notify the applicant or eligible in writing of the action taken thereon.

5.6(19A) Postponement or cancellation of examinations. In the event a sufficient number of qualified applicants have not made application for any examination, the director may postpone the last filing date and the date of the examination and shall, in such cases, give written notice to the applicants and department heads concerned.

5.7(19A) Character of examinations. Examinations may be assembled or unassembled and may include written, oral, physical, or performance tests, or any combination of these. They may take into consideration such factors as education, experience, aptitude, knowledge, character, physical fitness, or any other qualifications or attributes which in the judgment of the director enter into the determination of the relative fitness of applicants.

5.7(1) *Assembled examinations.* Assembled examinations shall be conducted for those classes for which written tests are practical. Such examinations may include one or more of the following in addition to the written tests: Skill demonstration tests, physical tests, oral interviews, and evaluations of training and experience.

Where official certification, registration or licensing is accepted in lieu of basic skills testing, other factors which enter into the determination of the relative fitness of applicants may be included in the examination.

5.7(2) *Unassembled examinations.* For those classes of a craft nature or where peculiar and exceptional qualifications of a scientific or professional nature are required and competition through an assembled examination is impracticable, an unassembled examination may be held. Such examinations shall consist of an evaluation of a statement of training and experience and such other materials as the applicants may be required to submit as evidence of fitness for a position, and may or may not include oral interviews for evaluation of personal and technical qualifications and evaluations of other factors which enter into the determination of the relative fitness of applicants.

5.7(3) *Types of examinations.* Examinations shall be announced as one or a combination of the following:

a. Open competitive. Open competitive examinations shall be open to all persons meeting the minimum training and experience and other requirements announced for admission to the examination.

b. Promotional. Promotional examinations shall be open only to employees in the classified service meeting the minimum education and experience and other requirements stipulated in the specification for the class concerned.

c. Open continuous examinations. When it is necessary to meet continued requirements for filling positions and a sufficient number of applicants for a class is unavailable, applicants for any examination may be tested continuously in such manner and at such times and places as the director may provide. The closing date for any open continuous examination may be set at any time by the director, but notice of the action shall be posted at least 15 days prior to the effective date of the action. Applicants making qualifying ratings shall be placed on eligible lists in order of their final ratings irrespective of the date on which the examination was taken.

5.7(4) *Simplified examination procedure.* For positions involving unskilled, semiskilled, domestic, attendant or custodial work, where the character or conditions of employment make it impracticable to supply the needs of the service through procedures prescribed above, the director may adopt or authorize the use of such other procedures as he determines to be appropriate which will assure the selection of such employees on the basis of merit and fitness. Examinations so given shall conform with and utilize such methods, forms and techniques as the director may require.

5.8(19A) Development and administration of examinations.

5.8(1) *Examination development.* The director shall develop examinations for the various classes of positions in the classified service. The director may also contract for test services or purchase test material, and may use qualified technical consultants in developing tests. Final test material shall be known only to the director and to authorized employees of the department. Every precaution shall be exercised by all persons participating in the development of tests to maintain the highest integrity in the examination process.

a. Special test sections. The director may provide for special test sections or options within an examination for a single class when appropriate, to provide for special assignments to positions within a class. For a group of classes with common requirements, the director may provide one basic test with any appropriate additional options which may be necessary to test special requirements of any class in the group. These test sections may be used in combination with ratings on other portions of the test to provide the basis for selective certification of specially qualified persons.

b. Oral examinations. The director shall develop the forms, procedure and instructions for conducting oral examinations.

c. Ratings of training and experience. The director shall develop a procedure for the evaluation of the training and experience qualifications for the various classes of positions when applicable. The procedure shall give primary consideration to the quality, recency, and pertinency of training and experience and secondary consideration to the quantity.

5.8(2) *Examination administration.* Examinations shall be conducted in as many places as are necessary for reasonable convenience

of applicants within practicable limits for proper administration and control. The director shall appoint monitors necessary to conduct examinations, and provide them with instructions. The director shall arrange for use of public or other buildings suitable for the conduct of examinations.

a. Number to be admitted to examination. The director may announce, in advance of the establishment of an eligible list, the maximum number of applicants who shall have their names placed on the list, or who shall be permitted to compete in any of the separate parts of the examination. Under such procedure those considered as having passed or as being permitted to take the remainder of the examination shall be the set number of candidates rating highest in the examination or a part thereof.

b. Anonymity of applicants. The identity of persons taking written examinations shall not be disclosed to examiners except for open continuous examinations where conditions of anonymity are impractical. An identification number shall be used to identify examination papers of applicants when practicable. In such cases, if any examination paper bears the name of the applicant or identification other than an identification number, the applicant shall be disqualified. In case of disqualification, the applicant shall be promptly notified in writing.

c. Oral examination. When an oral examination constitutes all or a part of the total examination, the director shall appoint one or more oral examination boards as needed. An oral examination board shall consist of two or more members who shall be known to be interested in the improvement of public administration and in the selection of efficient government personnel, one of whom shall be technically familiar with the character of work in the position for which the applicants will be examined. Any person holding political office or any officer or committee member of any political organization, or, any person actively engaged in the work of any political organization, shall not serve as a member of an oral examination board. If practicable, all applicants qualifying for the oral examination for the same class shall be rated by the same oral examination board. A member of an oral examination board shall disclose each instance in which he knows the applicant personally.

d. Examination of the handicapped. Persons under such disability as not to make them ineligible by reason thereof, shall be examined in such manner as will fairly test their ability to perform the duties of the position, notwithstanding such disability.

e. Special examinations. Except in the case of a manifest error in the admission or examining of an applicant, no applicant shall be given a special examination unless the commission by formal recorded action finds that the applicant's failure to take or complete an examination was due to circumstances entirely beyond the control of the applicant. The commission's findings and recommendations shall be recorded in its minutes. No claim for a special examination shall be allowed unless it is filed in writing with the director within 15 days after the date of the original examination. Any special examination shall be constructed on a pattern similar to, and as extensive as, the original examination. Any such special examination shall not invalidate any certification or appointment previously made.

f. Retaking examinations. Applicants may retake an examination for classes which are announced. In such examination program, no person may be scheduled nor tested at less than 30 calendar days following his initial examination in the class of position, and subsequently at 60 calendar days and then at 90-calendar-day intervals thereafter. The same provisions shall apply to promotional examinations. Procedures adopted for retesting must be administered uniformly to all applicants. In all cases, the most recent passing score will be used to determine the candidate's standing on the eligible list. Any applicant who fails the performance part of any examination may repeat that part of the examination, if scheduled, after the lapse of seven calendar days. If the applicant fails to pass the performance portion of the examination the second time, he shall be prohibited thereafter from repeating that part of the examination in less than 30-day intervals.

g. Removing examination material from premises. Any applicant or unauthorized employee of the state removing examination materials from the premises at which examinations are being administered or stored, in any manner whatsoever, shall be subject to prosecution under section 19A.20.

5.9(19A) Rating examinations. The director shall utilize appropriate scientific techniques and procedures in rating the results of examinations and in determining the final scores of the applicant. In determining the system for rating results of the examinations, the director shall give due regard to the number of applicants and to the number of vacancies which may reasonably be expected to occur in the life of the eligible list. All applicants for the same class of positions shall be accorded uniform and equal treatment in all phases of the examination rating process.

5.9(1) *Setting minimum ratings.* In all examinations the minimum ratings by which eligibility may be achieved shall be set by the director. Such minimum ratings may also apply to the rating on any parts of the tests and applicants may be required to obtain minimum ratings on separate parts in order to receive qualifying ratings or to be rated on the remaining parts of the tests.

5.9(2) *Computing final ratings.* The final earned rating of each applicant shall be determined by computing the earned ratings on each part of the examination in accordance with the weights established for each part of the examina-

tion. All applicants may be required to obtain at least a minimum rating in each or any part of the examination in order to receive a final qualifying rating or to be allowed to participate in the remaining parts of the examination.

5.9(3) *Rating for lower class.* The results of examination of applicants who fail to qualify as eligibles for the class for which the examinations were taken, may, with the approval of the director, be rated with reference to their eligibility for a lower class for which an examination is in process, if the applicants have signified their willingness to accept appointments to positions in such lower class. Eligibles for a given class may be certified to a lower position in the same class if they signify their willingness to accept an appointment to a position in the lower class.

5.9(4) *Preference for veterans on entrance examinations.* Veterans preference as provided by law shall be added to qualifying ratings on open competitive examinations. Proof of eligibility for preference shall be provided by the veteran in the form of a discharge paper, official order of separation from active duty, or a certified or photostatic copy, or other satisfactory evidence of honorable service. In addition, disabled veterans shall submit proof of current disability certified by the United States Veterans Administration.

5.9(5) *Verifying information.* The director may verify statements contained in an application and secure further information concerning the applicant's character and fitness. If, after a list is established, information is obtained which materially affects the rating of experience, training, or fitness of the applicant, the director shall make a new rating of the applicant's examination and make necessary adjustments in eligible lists. The director shall promptly notify the applicant of any change made in his standing and the reasons therefor.

5.9(6) *Adjustment of errors.* A manifest error in the rating of an examination, if called to the attention of the director within one month after receipt by the applicant of the notice of examination results, shall be corrected by the director provided, however, that such correction shall not invalidate any certification and appointment previously made.

5.10 Reserved for future use. [See 6.3(19A)]

5.11(19A) Notice of examination results. Each applicant shall be notified by mail of the results of the examinations as soon as the rating of the examination has been completed and the eligible list established.

5.12(19A) Review of ratings. Any applicant may request the director to review the rating of his examination, provided such request is filed within 15 days of the date the notice of examination results was mailed. Review of examination ratings shall be limited to the applicant and the appointing authority to whom the eligible has been certified for appointment. Such review shall be provided only during regular business hours in the offices of the department. Any person who reviews an examination that has been taken may not participate in another examination in the same series or with similar examination content until 90 calendar days have elapsed after such review.

[Filed May 1, 1969; amended May 13, 1970, September 17, 1970, April 14, 1971]

CHAPTER 6
ELIGIBLE LISTS

6.1(19A) Establishment of eligible lists. The director shall establish and maintain eligible lists necessary to provide an adequate supply of qualified candidates for all classified positions. Eligible lists shall be by class of position and shall be statewide in application except where these rules or the action of the director specifically makes provision for the establishment of eligible lists by geographical area, organizational unit or special entitlement. The following types of eligible lists shall be used to meet the needs of the classified service:

6.1(1) *Preferred employment lists.* The names of permanent classified employees separated from the classified service in good standing by layoff, or by demotion in lieu of layoff, shall be placed on the preferred employment lists established for the agency or the unit thereof enforcing the layoff and shall be given absolute preference in selection as provided in these rules for reduction in force. Such list shall have a life of one year from the date of layoff or establishment of the list, whichever is later.

6.1(2) *Agency promotional lists.* Shall show the names of all permanent classified employees of an agency or organizational unit thereof who have attained a qualifying rating on the promotional examination.

6.1(3) *Open competitive lists.* Shall show names of all candidates who attain a qualifying rating on an open competitive examination.

6.1(4) *Agency promotional and open competitive lists.* Shall be deemed continuous in nature, unless abolished as provided herein, but eligibility of an applicant on lists shall be not less than one nor more than three years as determined by the director and uniformly applied.

6.2 Reserved for future use.

6.3(19A) Ranking of eligibles. After each examination, the director shall prepare a list of persons with passing grades. The names of such persons shall be placed on the eligible lists in the order of their final rating, starting with the highest. If two or more eligibles have final ratings which are identical, their names shall be arranged on the eligible list in the order of their final rating on the written part of the examination. If this re-

sults in a tie, they shall be certified concurrently. Eligible lists resulting from a continuous examination program shall be merged prior to use by ranking the names of all successful candidates in order of their final qualifying scores.

6.4(19A) Compilation of eligible lists in absence of appropriate eligible lists. If a vacancy exists in a class of position for which there is no appropriate eligible list, and an announcement has been made and opportunity given for applicants to take the examination, the director, with the approval of the commission, may prepare an appropriate register for the class from one or more existing related eligible lists. For this purpose, the director shall select the eligible lists from classes for which the minimum qualifications and examinations are similar to or higher than those required for the class in which the vacancy exists. The director may, if necessary, re-rate training and experience in accordance with the rules on examination on the basis of the minimum qualifications required for the class in which the vacancy exists.

6.5(19A) Consolidation and amendment of lists. When a new eligible list is established for a class of positions for which an eligible list is already in existence, the existing eligible list may be canceled or merged with the new eligible list at the discretion of the commission. If the name of any individual appears on both the old and the new eligible lists, and the eligible lists are merged, his standing on the new eligible list shall be determined by his score on the more recent examination. An eligible list may be amended by the addition of other successful candidates who are admitted to subsequent examinations and the scores of the individual names that appear on the amendment shall be merged in rank order with the scores of those on the original eligible list.

6.6(19A) Removal of names from eligible lists. In addition to the causes set forth in the chapter on examinations, the director may remove names from eligible lists permanently or temporarily for any of the following reasons:

6.6(1) On receipt of a statement from the eligible that he no longer desires consideration for a position in the class.

6.6(2) Appointment through certification from such eligible list to fill a permanent position.

6.6(3) Appointment to fill a permanent position at the same or higher salary from a different register, provided that any person whose name is removed may have his name restored to any eligible list other than the one from which appointment was made by making written application for such action to the director.

6.6(4) Declination of appointment without good cause or under conditions which the eligible previously indicated he would accept.

6.6(5) Failure to appear for scheduled employment interview or to report for duty within a reasonable time specified by the appointing authority.

6.6(6) Failure to maintain a record of his current address with the department as evidenced by the return of a properly addressed unclaimed letter or other evidence.

6.6(7) In case of agency promotional lists, separation from the classified service or from the departmental or organizational unit for which the list is established.

6.6(8) In case of exhaustion or abolition of eligible lists or expiration of eligible lists, the director shall notify the eligible by mail at his last known address of this action and the reason therefore.

6.6(9) Willful violation of any of the provisions of chapter 19A of the Code or the rules promulgated thereunder. [See also 7.7(19A)]

6.7(19A) Restoration of names to eligible lists. An eligible whose name is removed from an eligible list may make written request to the director for the restoration of his name to such eligible list for the duration of the eligible list , stating the reasons for his conduct resulting in removal and reasons for restoration. The director, after full consideration of the request, may restore the name to the eligible list or may refuse such request. The eligible shall be notified of the director's action and may make written appeal to the commission to review the director's action.

A probationary or permanent employee who has resigned while in good standing or who has been separated without prejudice, shall, upon written request, have his name restored to the eligible list from which his most recent appointment was made; but such eligibility shall not exceed original entitlement of not less than one nor more than three years as determined by the original eligible list.

6.8(19A) Statement of availability. It shall be the responsibility of eligibles to notify the department in writing of any change in address or other change affecting availability for employment. However, the director may circularize lists or use other methods to determine at any time the availability of eligibles. Whenever an eligible submits a written statement restricting the conditions under which he will be available or the locations where he will accept employment, his name shall be withheld from all certifications which do not meet the stated conditions and locations under which he will be available. An eligible may file a new written statement at any time during the duration of an eligible list modifying any prior statement as to conditions under which he will be available for employment, except that if such statement results in the withdrawal of his name from a certification outstanding at the time of the receipt

of the statement, it may be deemed a declination of appointment.

[Filed May 1, 1969; amended September 17, 1970, April 14, 1971]

CHAPTER 7
CERTIFICATION AND SELECTION

7.1(19A) Method of filling positions. Vacancies in the classified service shall be filled by re-employment, promotion, transfer, demotion, reinstatement or original appointment as provided by these rules.

7.2(19A) Request for certification. If a vacancy occurs in any classified position in an agency, or if new positions are established and new employees are needed, a requisition shall be submitted, as far in advance of the desired appointment date as possible, by the agency to the director upon a form prescribed by the commission. This requisition shall state the number of positions to be filled in each class, identifying the location of each position and all other pertinent information.

7.3(19A) Certification methods. Upon receipt of a requisition, the director shall certify and submit in writing to the appointing authority the names of available persons.

7.3(1) *Agency preferred list.* The number of names certified for a class shall be equal to the number of vacancies. Selection shall be made from this list until the list is exhausted before certification may be made from an agency promotional or open competitive list.

7.3(2) *Open competitive list.* If one position is involved the three highest ranking names available from the state-wide eligible list established and one name for each additional vacancy will be submitted. In filling vacancies, the appointing authority shall select any one of the top three available whose names have been certified for each agency.

7.3(3) *Agency promotional list.* The number of names certified for one position shall be three, with one additional name for each additional vacancy, or the upper one-half of the promotional list whichever is greater. Appointments shall be made in the same manner as prescribed from open competitive list, except that appointment may be made from the upper half of the promotional list if the number of eligibles on the list exceeds six.

7.3(4) *Concurrent certifications.* Groups of eligibles shall be certified to clerical vacancies in order of receipt of requisitions for employees, with due regard for the rights of eligibles standing highest on the list provided, however, this section shall not require simultaneous certification of the same name on different certifications made concurrently to the same class of position.

7.3(5) *Temporary appointment certification.* If an employee is needed for a temporary period by an agency, not to exceed 180 calendar days in any 12-month period, a certification shall be made of the names of those eligibles, in the order of their place on an appropriate eligible list, who have indicated willingness to accept temporary appointment, in accordance with 7.3(2).

7.3(6) *Incomplete certification.* When the number of names available for filling a vacancy in a class of position is fewer than three, the appointing authority may decline certification for that vacancy and make a provisional appointment to fill such position for a period not to exceed 180 calendar days as provided in the rules.

7.3(7) *Certification for positions filled by provisional appointees.* The director shall issue, on a regular basis, a certificate of eligibles to fill positions occupied by provisional appointees whenever three names are available for certification for that class of position.

7.3(8) *Selective certification.*

a. Special qualifications. Where certification of eligibles with special education or training is requested in writing by the appointing authority, and such specific and technical requirements are part of the specifications, and these special experience or training options are so announced, the director will certify only the highest ranking eligibles, as provided under open competitive lists, who possess the special qualifications prescribed. Certification as to physical qualifications shall be observed as long as they are uniform as to the class of position and are contained in the specifications or are approved by the commission for special and uniform application.

b. Desirable qualifications. An appointing authority may request, in writing, the certification of those eligibles meeting the desirable training and experience requirements stipulated in the specification, if any, giving the reason for such request. If approved by the director, only the names of those eligibles on the list who meet the desirable training and experience qualifications shall be certified in the order of their standing on the list. If, in certifying the names of such eligibles, the director finds there are fewer than three such eligibles, he shall complete the certification by adding after the names of such eligibles, the names of other eligibles available for appointment in the order of their standing on the list.

7.3(9) *Geographic certification.* Eligibles for positions in local offices, geographic or administrative areas of the agency shall be certified in the same manner as for state offices (open-competitive), except that in filling such a position in a local office, geographic or administrative area of the agency, the appointing authority may request the certification of eligibles who are residents of the area established for such local office, geo-

graphic or administrative area. Certification shall be made as provided in 7.3(2). If, in certifying and submitting the names of such eligibles for a vacancy in a local office, geographic or administrative area, the director finds there are fewer than three eligibles who are residents thereof, he shall certify the required number of additional eligibles from a state-wide register.

7.4(19A) Life of certificate of eligibles. The life of a certificate of eligibles shall be three weeks from the date of issue unless extended by the director for a period not to exceed one week. Any appointment made from a certificate shall not be affected by any change in the condition of the list during the life of the certificate. In the event appointment is not reported within one month of the date of issue, the certificate shall expire and appointment reported thereafter shall be voided.

7.5(19A) Waiver of certification after appointment. If an eligible receives a probationary or permanent appointment, such appointment shall constitute, for its duration, a waiver of his right to certification from any register for the same or lower class of position on which his name appears.

7.6(19A) Omission of names after three considerations. If, in the exercise of his choice, the appointing authority passes over the name of an eligible on a register in connection with three separate appointments he has made from the eligible lists for that class of position, the name of such eligible shall thereafter not be certified to him from that eligible list for future vacancies in that class if such appointing authority requests in writing that the eligible not be certified on future certificates. The eligible shall be so notified.

7.7(19A) Failure to reply. An eligible may be considered not available by the director if he fails to reply to written inquiry of the director or appointing authority as to availability within five calendar days of written inquiry or within three calendar days of telegraphed inquiry.

7.8(19A) Certification from related lists. Whenever the number of names on an eligible list is insufficient to make a complete certification, the director may certify names of eligibles willing to accept employment from lists for classes of higher standing or from lists for other comparable classes, if he determines the qualifications and appropriate examinations for those classes are comparable to the class for which the certificate is being issued.

[Filed May 1, 1969; amended November 10, 1970]

CHAPTER 8
APPOINTMENTS

8.1(19A) Appointments. All vacancies in part-time or full-time classified positions shall be filled as provided by chapter 19A of the Code and these rules. No appointment to a classified position, other than an emergency appointment, shall be made without prior authorization of the director. All appointments shall be made at the minimum salary for the class of position, unless otherwise provided in these rules. No appointment shall be made to any classified position nor shall the position otherwise be encumbered until the position has been classified in accordance with chapter 19A and these rules and the comptroller has certified as to the availability of funds.

8.2(19A) Probationary appointment. Probationary selections shall be made for each classified position from the three highest available names on the certificate submitted by the director in accordance with the chapter on certification and selection. Appointments shall be made only to positions authorized and established on a permanent basis, subject to the successful completion of a one-year probationary period. Probationary appointment shall not confer upon the appointee any privilege or right of promotion, transfer, reemployment, reinstatement or demotion to any position in the classified service, nor does it confer any right of appeal.

8.3 Reserved for future use.

8.4(19A) Provisional appointment. If there are fewer than three persons available for employment from an eligible list for a class of position or an appropriate eligible list the appointing authority may submit the name or names of persons to fill the position or positions pending examination and the establishment of an adequate eligible list. If such person(s) meet(s) the qualifications as to training and experience for the class of position, such person or persons may be provisionally appointed to fill the existing vacancy or vacancies until an adequate eligible list is established and appointments made therefrom. No provisional appointment shall be continued for more than 30 calendar days after an adequate eligible list has been established nor for more than 180 calendar days from the date of appointment. Successive provisional appointments shall not be allowed. No provisional appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or reinstatement to any classified position, nor shall a provisional employee be entitled to vacation or sick leave under these rules.

8.5(19A) Intermittent appointment. If the work of an agency requires the service of a person or persons on an intermittent or irregular basis, the appointing authority shall select such person or persons who have signified their willingness to accept intermittent appointment in accordance with the chapter on certification and selection. Such intermittent appointment shall not exceed 180 calendar days or 1040 hours in any 12-month period. Appointees may be placed on leave without pay at the end of the appointment and may be returned to duty the following year in the same class

without further certification at the agency's determination. All periods of active service shall be reported to the commission. A period of intermittent service shall not constitute a part of the probationary period except where such service immediately precedes probationary appointment to the same class within the agency. The acceptance or refusal of intermittent appointment shall not affect an eligible's standing on an eligible list or his eligibility for a probationary appointment. No intermittent appointment shall confer upon the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or any other right to any classified position, nor to annual or sick leave under these rules.

8.6(19A) Career development appointment. When a position within a class cannot be filled because of the lack of qualified eligibles or applicants meeting the minimum qualifications for the class, the director may authorize the appointing authority to make a career development appointment to a person meeting the minimum education requirements, but who lacks the experience necessary to qualify. Career development appointments shall be limited to one year; appointees must meet the minimum experience requirements upon expiration of the appointment; and, appointees must have passed the appropriate examination provided before appointment. Appointment does not confer on the appointee any privilege or right of promotion, transfer, re-employment, reinstatement or demotion to any position in the classified service, nor does it confer any right of appeal upon termination of the appointment. Vacation and sick leave shall be in accordance with probationary appointment.

8.7(19A) Reinstatement to previous class of position. A permanent classified employee, who has resigned while in good standing or who has been separated for other than good cause as outlined in these rules and chapter 19A of the Code, shall be eligible for reinstatement to his former class of position or to a lower class of position within a period of time equivalent to his period of continuous classified service, not to exceed two years from the date of separation—provided, he has been certified by the director as meeting the current minimum qualifications as to training, experience, knowledge, skills and education for the class of position to which he is reinstated.

8.8(19A) Emergency appointment. When an emergency exists in order to preserve the public peace, health or safety or to prevent the stoppage of public business, requiring the immediate services of one or more persons, the appointing authority may appoint a person or persons to a class of position without regard to other provisions governing appointments. In no case, however, shall the same person be appointed under this provision for more than a total of 60 calendar days with any or all state agencies during any 12-month period. Employment for any part of a day shall be considered as a full day. No emergency appointment shall confer on the appointee any privilege, right of appeal or right of position, transfer, promotion, demotion, reinstatement or any other right to any classified position, nor shall an emergency employee be entitled to vacation or sick leave under these rules.

8.9(19A) Work-test appointment. In accordance with 5.7(4), the appointing authority, who has under his jurisdiction positions involving unskilled or semiskilled domestic, attendant or custodial work, as so designated by the commission, may appoint persons to such positions on the basis of a competitive working test performance for the length of the probationary period. Any such person appointed shall serve a probationary period in accordance with these rules and shall acquire permanent status and be subject to the same rules as other classified probationary employees.

8.10(19A) Seasonal appointments. When the services to be rendered in a position occur, terminate and reoccur periodically or annually, the appointing authority may make a seasonal appointment. Certification shall be made in accordance with the chapter on certification and selection to fill only positions which are authorized and established as seasonal positions for a specified period each year, not to exceed eight months in any 12-month period, on a continuing basis, year after year. Appointees shall be placed on leave without pay upon completion of each period of seasonal employment and may be returned to duty the following season in a position in the same class the following year, if recommended by a satisfactory service review. No seasonal appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, demotion, promotion or reinstatement to any classified position nor shall a seasonal employee be entitled to vacation or sick leave under these rules.

8.11(19A) Co-operative training appointment. Upon request, the director may authorize the appointing authority to make co-operative training appointments to one or more permanent positions. Appointees must be certified to be bona fide students in an accredited educational institution, pursuing a study program directly related to the work of the position and have successfully completed one year of the study program for which he is enrolled. Two co-operative training appointments may be made to each authorized position and the appointee(s) shall work a period not to exceed a combined total of eight hours a day. No appointee shall be employed more than three semesters, or the equivalent, in any two-year period. No co-operative training appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, promotion, demotion or reinstatement, nor shall a co-operative training employee be entitled to vacation or sick leave under these rules.

8.12(19A) Trainee appointment. Where there is a need for services which can be performed by student trainees, the director may authorize the appointing authority to make a trainee appointment of a person who does not meet the minimum education and experience requirements as follows:

8.12(1) *Appointments for half-time or less.* May be made to bona fide students who are currently enrolled in a course of study which will qualify them for the position to which appointed within one year and who have been certified by the educational institution as to status and course of study. Appointments shall be made only to permanent or temporary positions and not to exceed 180 calendar days or the equivalent in part-time employment.

8.12(2) *Appointments exceeding half-time.* May be made to bona fide students pursuing a course of training which will qualify them for appointment to the position to which appointed. Such appointments shall be made only to authorized and established permanent or temporary positions and shall not exceed 180 calendar days in any 12-month period. Appointees must be at least 14 years old and possess working permits if required by law.

8.12(3) No trainee appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, promotion, demotion or reinstatement, nor shall a trainee employee be entitled to vacation or sick leave under these rules.

8.13(19A) Summer employment appointment. Upon request, the director may authorize the appointing authority to make summer employment appointments to one or more permanent or temporary positions providing the comptroller certifies the funds are available for payment and the positions are established. Such appointments shall be limited to 90 calendar days within the period of May 1 to September 30 in any year. Appointments may be made to any class on a work test basis and shall not be made in conjunction with an emergency appointment either prior to or subsequent to a summer employment appointment. No summer employment appointment shall confer on the incumbent any privilege, right of appeal or right of position, transfer, promotion, demotion or reinstatement; nor shall a summer employment incumbent be entitled to vacation or sick leave under these rules.

[Filed July 14, 1969; amended November 11, 1970, March 9, 1971, January 17, 1972]

CHAPTER 9
PROBATIONARY PERIOD

9.1(19A) Nature, duration and purpose. All original appointments to permanent positions shall be made from officially promulgated eligible lists, except as otherwise provided in these rules, for a probationary period of one year. Any statutory probationary period for a position or class in excess of that herein provided shall be followed. The probationary period shall be an essential part of the examination process, and shall be utilized for the most effective adjustment of a new employee and for the elimination of any probationary employee whose performance does not meet the required standards of work.

9.2(19A) During probationary period. At any time during the probationary period, a probationary employee may be terminated by the appointing authority from the classified service without right of appeal or hearing.

9.3(19A) Demotion during probationary period. At any time during the probationary period, a probationary employee may be demoted by the appointing authority to a lower class of position, provided such demotion does not result in the separation of any other employee with longer service. The probationary period of a probationary employee demoted to a lower class of position shall include the period of service in the class from which he was demoted. Demotion during the original probationary period shall not give the right of appeal or hearing.

9.4(19A) Promotion to higher class of position during probationary period. A probationary employee shall not be eligible for promotion to a higher class of position during his probationary period, except where:

9.4(1) There are no eligibles on the promotional eligible list for the higher class and reasonable effort has been made to establish an eligible list for the higher class;

9.4(2) The probationary employee can be certified in accordance with 7.3(2) of these rules.

Such promoted probationary employee shall be allowed to count probationary time spent in the lower class toward the total required probationary period and pay shall be in accordance with 4.5(4).

9.5(19A) Transfer during probationary period. A probationary employee shall not be transferred during his probationary period to a position in another class or interagency in the same class of position. Nor shall a probationary employee certified to a vacancy in a local office, geographic or administrative area, in accordance with the provisions of these rules as to certification and selection, or otherwise, be transferred from the local office, geographic or administrative area until six months of the probationary period has been completed.

9.6(19A) Leave of absence during probationary period. A probationary employee may be granted leave of absence with or without pay at the appointing authority's discretion and such probationary period shall be extended by the amount of leave granted, provided such probationary employee has been at a paid status for at least 30 days or as provided by the commission or provided in the Code of Iowa.

9.7(19A) Vacation and sick leave during probationary period. Probationary employees shall be granted vacation and sick leave in accordance with the provisions of these rules as with permanent classified employees.

9.8(19A) Probationary period for promoted permanent classified employees. When a permanent employee is promoted, under the provisions of the rules as to promotion, the appointing authority may at its discretion require such employee to serve a probationary period in the new class of position to which he has been promoted. This probationary period shall be for a maximum of six months or for such shorter period as determined by the appointing authority. The permanent classified employee so promoted shall be informed, in writing with a copy to the commission, at the time of the promotion of the determination of the appointing authority to require that a probationary period and the length of such period to be served before such promotion shall become final. If such employee does not prove to be satisfactory in the new class of position during such probationary period, he shall be reinstated to his former position or in a similar position thereto at a salary not lower than that received by him in such former position at the time of his promotion. Such action by merit employment commission, but the reasons for the failure to certify him for permanent appointment to the promotional position shall be submitted in writing to the individual and a copy placed in the employee's file at the department office.

9.9 Reserved for future use.

9.10(19A) Provisional service credit. Provisional service immediately prior to probationary appointment in the same class of position may be credited toward the probationary period at the discretion of the appointing authority. The decision not to allow provisional service credited toward the probationary period must be reported, in writing, to the director within five working days of the eligible's entrance on duty as a probationary employee.

9.11(19A) Completion of probationary period. Within ten calendar days prior to expiration of the employee's probationary period, the appointing authority shall notify the director, in writing with a copy to the employee, whether the employee is satisfactory or unsatisfactory. If unsatisfactory, the employee shall be separated at date specified or at the end of probationary period. A satisfactory report will give permanent classified status in the class of position. The appointing authority's determination shall be conclusive and final.

[Filed July 14, 1969; amended November 5, 1970, April 14, 1971]

CHAPTER 10
PROMOTIONS, REASSIGNMENTS, TRANSFERS AND DEMOTIONS

10.1(19A) Promotions.

10.1(1) *Selection.* As far as practicable and feasible, vacancies shall be filled by promotion of qualified, permanent, classified employees based upon individual performance, as evidenced by recorded service records, personal observation, examination results and due consideration for length of service and capacity for the new position.

10.1(2) *Certification as to qualifications.* A candidate for promotion must be certified by the director to possess the qualifications for the position as set forth in the current job specification for the class of position for which he is a candidate and he shall be required by the director to qualify for the new position by promotional competitive or noncompetitive examination. Promotional examinations shall be of the same nature and content as those used in establishing open competitive eligible lists. Passing grade attainment shall be the same as with open competitive examinations.

10.1(3) *Establishment of promotional eligible lists.* Each permanent classified employee who receives a passing grade on a competitive promotional examination shall be placed on a promotional register for the class of position in the order of his examination rating. The life of a promotional eligible list shall be the same as that for an open competitive eligible list for the same class of position.

10.1(4) *Promotion by competitive examination.* Openings shall be announced and posted by the agency and may be limited to permanent classified employees of the agency concerned or may, with the approval of the agency, be open to permanent classified employees of all agencies. Certification and selection shall be in accordance with the rules contained in chapter 7.

10.1(5) *Promotion by noncompetitive examination.* The appointing authority may fill a vacancy or vacancies in a particular class of position by noncompetitive promotional examination, provided written justification is approved by the commission. A permanent classified employee proposed for noncompetitive promotion shall be examined by the director in accordance with 10.1(2), and if found to qualify for the class shall be so certified by the director.

10.2(19A) Reassignments. An appointing authority may, at any time, reassign an employee from one position to a position in the same class, except:

10.2(1) A probationary employee certified on a geographic or administrative area basis may not be reassigned outside the certification area until six months of the probationary period have been completed.

10.2(2) A probationary employee certified to fill a vacancy on the basis of specific requirements of particular experience, education, skill or physical characteristics shall not be reassigned from that position until six months of the probationary period have been completed or the reassignment proposed requires the same special qualifications which justified the original certification.

10.3(19A) Detail to special duty. When the services of a permanent classified employee, or a probationary employee who has completed six months of his probationary period, are temporarily needed in a position with the agency, other than the position to which he is allocated and assigned, he may be detailed, at the discretion of the appointing authority, to perform the duties of such position for a period not to exceed three months without change in title or status. A written statement outlining the reasons for the detail shall be submitted to and approved by the commission before such detail may be made. In unusual circumstances, an extension of a detail beyond the three months may be authorized by the commission, upon written request of the appointing authority.

10.4(19A) Transfers.

10.4(1) *Intra-agency transfers.* The appointing authority may transfer a permanent classified employee from a position in one class to a position in another class in the same pay grade, provided the director certifies the permanent classified employee possesses the minimum qualifications and has passed an appropriate examination for the new class.

10.4(2) *Interagency transfers.* A permanent classified employee may be transferred from a position in one agency to a position in the same or different class in the same pay grade in another agency, providing both appointing authorities have approved the transfer and the director certifies the employee meets the minimum qualifications for the class and has passed an appropriate examination.

10.4(3) *Transfer to a higher class of position.* Any transfer of a permanent classified employee from a position in a lower to a position in a higher class shall be made in accordance with the rules governing promotions.

10.4(4) *Transfer to a lower class of position.* Any transfer of a permanent classified employee from a position in a higher to a position in a lower class shall be made in accordance with the rules governing demotions.

10.5(19A) Voluntary demotion. If, for personal or other reasons, a permanent classified employee wishes to be demoted to a position in a lower class, the appointing authority may, upon written request of the employee, make such demotion. However, no such demotion shall be made unless the employee to this lower class is certified by the director as being eligible for appointment. Voluntary demotion shall not be subject to appeal to the commission.

10.6(19A) Effective date of actions. All promotions, reassignments, transfers and voluntary demotions shall be made effective at the beginning of a pay period.

[Filed July 14, 1969;
amended October 19, 1970]

CHAPTER 11
SEPARATION AND DISCIPLINARY ACTION

11.1(19A) Separations.

11.1(1) *Resignations.* To resign in good standing, an employee must give the appointing authority at least 14 calendar days prior notice unless the appointing authority agrees to permit a shorter period of notice. A written resignation shall be supplied by the employee to the appointing authority. An employee who fails to give proper notice, may at the request of the appointing authority, be barred from future certification to that agency or reinstatement to the register from which certification was made.

11.1(2) *Termination upon expiration of appointment.* Upon the expiration of an original appointment of specified duration, the appointing authority shall report such action to the director upon the forms prescribed by the commission.

11.1(3) *Reduction in force—layoff.* An appointing authority may lay off an employee whenever he deems it necessary because of shortage of funds or work, a material change in duties or organization or abolishment of one or more positions. Such reduction in force shall be by agency formula, as approved by the commission. Separation by reduction in force shall be accomplished in a systematic manner, with equity for the rights of employees and shall not be allowed as a subterfuge to abrogate an employee's right of appeal if the reduction in force separation is in fact a discharge. The agency formula shall conform to the following provisions:

a. Reduction in force shall be by class of position.

b. Reduction in force may be by organizational unit of an agency or agency wide, as designated by the appointing authority, provided such designation is made and approved by the commission before the effective date of the reduction.

c. The order of reduction in force shall be by type of appointment as follows: Emergency, provisional, intermittent, temporary, career development, probationary, permanent.

d. Each employee affected by a reduction in force shall be notified in writing of layoff and reasons therefor, at least ten days prior to the effective date of the layoff unless budgetary limitations require a lesser period of notice.

e. There shall be adequate competition among all employees in the class of position or positions affected by the layoff by reasons of a reduction in force based on a retention points system which shall be made up of a combination of points for length of service and performance evaluation of all employees in the class of position or positions in the organizational unit or units affected. Length of service and performance evaluation points shall be calculated as follows:

(1) Length of service credit shall be allowed at a rate of one point for each month of service. For the purpose of computing length of service credits, the appointing authority shall include all continuous periods of employment between the date of original appointment and the date of layoff. Approved leaves of absence without pay, suspensions without pay and layoffs for periods exceeding 14 consecutive days shall not be counted; however, the periods of service immediately preceding and that immediately following such leaves of absence and layoffs shall be counted. An employee who is returned to duty following approved military duty shall have all periods of military service counted as continuous service. Breaks in service, where the employee is off of the payroll of an agency for more than 14 days shall be considered as a new employment. Part-time employment shall receive pro rata service credit.

(2) Performance evaluation credit shall be allowed at a rate of one point for each month of service rated as satisfactory under a performance evaluation plan approved by the commission. An additional one-half point shall be added for each month of service during which performance is rated one or more levels above satisfactory. No credit shall be allowed for service rated less than satisfactory.

No performance evaluations which are made less than three months prior to a reduction in force shall be used in determining performance evaluation credits.

In the absence of performance evaluations made under an approved plan, all employees in the class or classes affected shall be considered to be of equal efficiency and one performance evaluation point (satisfactory) shall be given for each month of continuous service.

(3) Reduction in force retention points shall be the total of the length of service credit points and the performance evaluation credit points.

f. Employees shall be placed on the layoff list beginning with the employee with the highest number of retention points. Employee layoffs shall be made from the layoff list in inverse order. Copies of the computation of the length of service credits and performance evaluation credits shall be furnished to the employees and to the commission.

g. When two or more employees have the same combined total of retention points from length of service credits and performance evaluation credits, order of termination shall be determined by giving preference for retention in the following sequence:

(1) The employee with the greatest length of service credits.

(2) The employee with the highest service review credits.

(3) Alphabetically.

h. The reduction in force formula approved by the commission shall be posted by the appointing authority so all employees shall have access to same.

i. The appointing authority shall give written notice to the commission of its intention at least 14 days prior to a reduction in force and shall send to the commission a list of persons affected by the layoff with their total retention points and shall indicate thereon which employees will be laid off.

j. Appeal to the commission must be filed in writing within seven days after notification as provided in paragraph "*d*" of this subrule.

k. A permanent employee in a class of position in which layoffs are to be effected may, in lieu of layoff, elect voluntary demotion to a position in the next lower class of position in the same series as the class of position in which layoffs are to be effected, or, in the absence of a lower class of position in the same series, to a class of position which the employee has formerly occupied while in the continuous employ of the agency. Such demotion or the occupying of a formerly held position shall not be permitted, however, if the result thereof would be to cause the layoff of a permanent employee with a greater combined total of retention points. To exercise the right of voluntary demotion or to occupy a formerly held position, in lieu of layoff, the employee must notify the appointing authority, in writing, of such election not later than five calendar days after receiving notice of layoff. Any permanent employee displaced under these provisions shall have the right of election as provided herein.

Any employee who elects a voluntary demotion or to occupy a position he formerly held, in lieu of layoff, shall have the right of promotion or reinstatement to the class of position he formerly occupied, provided he meets the qualifications of the position, before any other person may be promoted to, or a new employee hired for such class of position by the appointing authority enforcing the layoff. Any employee laid off because of a reduction in force, shall be offered a position in the class from which he was laid off, provided he meets the qualifications of the position, before a new employee may be hired for such position by the appointing authority enforcing the layoff, if such opening becomes available within one year of the date of such layoff because of a reduction in force.

l. The names of employees laid off by an appointing authority shall be placed on eligible lists as follows:

(1) The name of a permanent employee shall be placed on the preferred employment list and the reinstatement list for the class from which he is laid off as provided in 6.1(1) and 6.1(2), respectively, of these rules.

(2) The name of a probationary employee shall be placed on the reinstatement list for the class from which he is laid off, as provided in 6.1(2) of these rules.

m. Any temporary interruption of employment because of adverse weather conditions, shortage of supplies, or for other unexpected or unusual reasons, which does not exceed ten days, shall not be considered a layoff if, at the termination of such conditions, employees are to be returned to employment. Such interruptions of employment shall be recorded and reported as leave without pay. Interruptions in employment of school term employees due to lack of work between terms shall be recorded and reported as leave without pay. If all such employees available for work cannot be returned to their positions when school resumes, order of recall shall be in accordance with rules governing layoff.

11.1(4) *Retirement.* If a permanent classified employee is retired under any provision of the Iowa Code or through his own volition, he shall be considered as separated without prejudice and does not have a right of appeal to the commission.

11.2(19A) Disciplinary action. The attainment of permanent classified status in a class of position does not create sinecure of right of position regardless of performance level, but rather a fair evaluation and treatment in relation to a reasonable standard of performance and action. Any employee is subject to discharge, suspension or demotion for any of the following causes: Inefficiency, insubordination, incompetence, failure to perform his assigned duties, inadequacy in performance of assigned duties, narcotics addiction, dishonesty, unrehabilitated alcoholism, negligence, conduct which adversely affects the employee's performance or the agency employing him, conviction of a crime involving moral turpitude, conduct unbecoming a public employee, misconduct or any other just and good cause.

11.2(1) *Suspension.* An appointing authority may, for disciplinary purposes, suspend without pay any permanent employee for such length of time as it considers appropriate not to exceed 30 days, for any of the reasons set forth in 11.2(19A). A written statement of the reasons for the suspension shall be given to the employee within 24 hours of the action and a copy shall be sent to the director. The suspended employee may appeal to the appointing authority and if not satisfied, may within 30 calendar days after such suspension appeal to the commission for a review of the action.

11.2(2) *Reduction within pay grade.* An appointing authority may, for good cause, reduce the pay of a classified employee to a lower step within the pay grade assigned to the class of position. Within 24 hours of the action, a written statement of the reason or reasons for the reduction and the duration of the reduction in pay shall be given to the employee and a copy sent to the director. The employee may file a written response to the appointing authority, and if not satisfied, may within 30 calendar days after such reduction in pay appeal to the commission for a review of the action.

11.2(3) *Demotion.* An appointing authority may demote a permanent classified employee to a vacant permanent classified position for any of the causes set forth in 11.2(19A). A written statement setting forth the specific reasons for the action shall be given to the employee within 24 hours of the action and copy sent to the director. Such employee must meet the current specification requirements for the class to which demotion is made. The demoted employee may appeal to the appointing authority, and if not satisfied, may within 30 calendar days after such demotion appeal to the commission for a review of the action.

11.2(4) *Discharge.* An appointing authority may discharge any permanent classified employee for any of the causes set forth in 11.2(19A). A written statement setting forth the specific cause or causes under which the appointing authority has so acted shall be given to the employee within 24 hours of the action and a copy sent to the director. The discharged employee may appeal to the appointing authority and if not satisfied, may within 30 calendar days after such discharge appeal to the commission for a review of the action.

amended October 19, 1970]

CHAPTER 12
APPEALS

12.1(19A) Appeals of allocation or reallocation. The appointing authority or a permanent classified employee affected by an allocation or reallocation may within 14 calendar days of the final action of the director, on reconsideration, file an appeal to a qualified classification committee appointed by the commission. The appeal request shall be filed in writing with the director and shall contain affidavits, written evidence, statements or exhibits which are to be considered by the classification committee. The classification committee shall make such investigation as it deems necessary to determine the proper allocation or reallocation and make its findings in writing to the commission. The findings of the classification committee shall be binding on all parties concerned and shall be presented within 30 calendar days of the receipt of the written appeal. Decisions of the classification committee shall stand until significant changes in duties and responsibilities of the position can be shown.

12.2(19A) Appeal from examination rejection. Any applicant whose application to entrance or promotional examination has been rejected by the director may appeal to the commission for a review of the reasons for his rejection. Such right of appeal shall expire unless the applicant shall file written appeal to the director within seven calendar days of notification of the rejection of his application. The commission shall hear the appeal at its next regularly scheduled meeting, or at special meeting as the commission may direct, and give its written decision within seven calendar days of the hearing date.

Applicants who have made proper appeal may be admitted to the examination pending the commission's decision.

12.3(19A) Review of examination ratings. Any applicant who has taken an open competitive or promotional examination may appeal to the commission for a review of his rating on any part of such examination to assure that uniform rating procedures have been applied equally and fairly. Such appeal right shall expire unless the applicant shall file written appeal to the director within seven calendar days of notification of the examination results. The commission shall hear the appeal at its next regularly scheduled meeting, or at special meeting as the commission may direct, and give its written decision within seven calendar days of the hearing date.

A rating in any part of an examination may be changed if compliance with the foregoing conditions has been met and it is found by the commission that a substantial error has been made. A correction in the rating shall not affect a certification or appointment which may already have been made from the eligible lists.

12.4(19A) Appeal for removal from eligible lists. An eligible whose name has been removed from an eligible list for any of the reasons specified in these rules may appeal to the commission for reconsideration of such action. Such right of appeal shall expire unless the eligible shall file written appeal to the director within seven calendar days of notification of removal. The commission shall hear the appeal at its next regularly scheduled meeting, or at special meeting as the commission may direct, and give its written decision within seven calendar days of the hearing date.

12.5(19A) Appeal for veteran's preference. Any person entitled to veteran's preference of five points or ten points, as outlined in these rules and chapter 19A of the Code, may appeal to the commission his preference entitlement, placement on the eligible lists or certification method. Such appeal rights shall expire unless the person claiming veteran's rights shall file written appeal to the director on notification of or his learning of the alleged mistake in granting veteran's preferences. The commission shall hear the appeal at its next regularly scheduled meeting, or at special meeting as the commission shall direct, and give its written decision within seven calendar days of the hearing date.

12.6(19A) Appeal from discrimination. Any applicant or employee who has reason to believe that he has been discriminated against because of religious or political opinions or affiliations or race or national origin or any other nonmerit factor in any personnel action including denial of transfer, may appeal to the commission. Such appeal shall be filed in writing and within 90 calendar days of the alleged discrimination. The commission shall hear the appeal at its next regularly scheduled meeting, or at special meeting as the commission shall direct, and give its written decision within seven calendar days of the hearing date.

12.7(19A) Retirement. If a permanent classified employee is retired under any provisions of the Iowa Code or, through his own volition, he shall be considered as separated without prejudice and does not have right of appeal of such action to the commission.

12.8(19A) Resignation. Any permanent classified employee who resigns from his position shall not have the right of appeal to the commission.

12.9(19A) Appeals from dismissal, suspension or demotion. Any permanent classified employee who is dismissed, demoted or suspended may appeal in writing to the commission within 30 calendar days of such action by the appointing authority. Within seven calendar days of the receipt of such written appeal, the commission shall serve the employee and the appointing authority with written notice of the hearing date, which shall be the next regularly scheduled meeting or a special meeting as the commission may direct within 30 calendar days following the filing of appeal, and give its written decision within ten calendar days of the hearing date. The commission shall sustain or not sustain the appeal for suspension, and if sustained the employee shall be reinstated to his position without loss of pay or other benefits for the period of suspension. In the case of dismissal or demotion the commission may affirm, modify or reverse on its merits.

12.10(19A) Conduct of the appeal hearing by the commission.

12.10(1) *Information for conduct of hearing.*

a. Hearings before the commission shall not be open to the public, unless a public hearing is requested by the employee prior to the hearing date.

b. Hearings shall be informal and technical rules of evidence shall not apply.

c. The chairman of the commission, or any member of the commission, as designated by the chairman, shall preside at the hearing.

d. The appointing authority concerned shall appear in person or shall designate a representative to appear in his behalf and shall present the agency's position in the personnel action.

e. The appellant may appear before the commission in his own behalf or be represented by a third party.

f. The commission shall determine the evidence, facts or testimony upon the specific cause under which the appointing authority has acted in discharging, suspending or demoting the appellant, as contained in the letter or other appropriate document in written form given to the appellant, and shall not consider any additional material beyond the scope of the charges so contained.

g. All testimony, facts, documents or other materials offered must be relevant and bear upon the act of dismissal, suspension or demotion. Any testimony, facts, documents or other materials considered by the commission not to meet this criteria may be properly excluded. The commission shall consider the objection of either party to the introduction of the aforementioned. Competence and relevance shall be the primary test in ruling on such objections.

h. The commission will make no assumption of innocence or guilt, but will be guided solely in its decision by the facts as they appear at the hearing.

i. At the beginning of his testimony, each witness will be required to state his name, address and other pertinent information. All testimony shall be made under oath and shall be subject to questioning by the parties and the commission at the proper time.

j. Any letter, paper, or other object offered at the hearing shall be properly presented and shall be marked with a distinguishing number, such as Appointing Authority Exhibit #1 or Appellant's Exhibit #1. Opposing parties shall be entitled to examine the exhibits as offered and make objections where applicable.

k. Testimony may be presented in statement or question and answer form, and shall be recorded, transcribed or otherwise preserved as the commission may direct.

l. No questioning shall be allowed or statements made, by any person attending the hearing, except through the appointing authority, the appellant, or their designated representatives or through the presiding officer of the commission.

m. The members of the commission or the director shall have the power to administer oaths, subpoena witnesses and compel the production of books and papers pertinent to any investigation or hearing authorized by chapter 19A of the Code.

n. Good reason appearing therefore, hearings may be continued beyond the period originally scheduled or recessed until a future day by agreement of the commission and the parties. Request for continuance shall be made to the commission at least one calendar week prior to the scheduled hearing date.

12.10(2) *Order of procedure on appeal.*

a. The chairman of the commission, or any member of the commission, designated by the chairman, shall convene the commission at the time and place specified for the purpose of hearing the appeal. Written notice of the time and place of the hearing shall be furnished in accordance with chapter 19A and these rules.

b. The chairman or commission member designated shall state the subject of the hearing and the names of the principals.

c. The hearing shall be heard in the following manner:

(1) Presentation by the appellant, followed by responsive questioning by the appointing authority and the commission.

(2) Presentation of the appointing authority, followed by responsive questioning by the appellant and the commission.

(3) Closing statement by the appellant.

(4) Closing statement by the appointing authority.

(5) Submission of the case to the commission.

[Filed July 14, 1969;
amended September 17, 1970]

CHAPTER 13
SERVICE RECORDS
(PERFORMANCE EVALUATION)

13.1(19A) The commission shall establish and make effective a system of service records designed to give a fair and impartial evaluation of the quality and quantity of the work performed by classified employees. Insofar as practicable, the system of service records in the agencies shall be uniform, but the commission may approve an agency service record form which is in accordance with the service records established by the commission.

13.2(19A) Such service records shall be prepared at least once per year for each classified employee. Service records shall be considered in determining salary advancement, in making promotions, demotions, transfers, reinstatements, dismissals, in the reduction-in-force formula and shall serve as a counseling device.

13.3(19A) Service records shall be discussed with the classified employee and each classified employee shall have a right to make his comments thereon. The signing of the service record by the classified employee does not signify his agreement with the service record, but only that he has seen the service record, it has been discussed with him and he has been afforded the opportunity to make comments to be attached to or placed in the service record.

13.4(19A) Each classified employee shall receive a copy of his service record or records and a copy of all service records shall be sent to the merit employment department for inclusion in the classified employee's file as a permanent record.

13.5(19A) For any period in which a service record has not been made as to the performance of a classified employee, or for which a service record is not made in accordance with this chapter, service shall be considered as satisfactory.

[Filed June 9, 1970]

CHAPTER 14
VACATION AND LEAVE

14.1(19A) Attendance. The appointing authority in each agency shall establish the working days and the hours of attendance for classified employees under his direction and such other regulations in regard to attendance as it deems necessary. Such regulations shall be made known to the employees.

14.2(19A) Vacation leave. A probationary or permanent classified employee shall earn vacation leave with full pay for continuous employment accrued on a monthly period as follows:

a. One week vacation during the first year of employment; three hours for the first month, three hours for the second month, four hours for the third month and similarly for succeeding three-month periods during the first year of employment.

b. Two weeks vacation during the second and through the fourth year of employment; six hours for the first month, six hours for the second month, eight hours for the third month and similarly for succeeding three-month periods during the second and through the fourth year of employment.

c. Three weeks vacation during the fifth and through the eleventh year of employment; nine hours for the first month, nine hours for the second month, twelve hours for the third month and similarly for succeeding three-month periods during the fifth and through the eleventh year of employment.

d. Four weeks of vacation during the twelfth and all subsequent years of employment; twelve hours for the first month, twelve hours for the second month, sixteen hours for the third month and similarly for succeeding three-month periods during the twelfth and all subsequent years of employment.

e. After one year employment if a classified employee is terminated, other than discharge for good cause, he shall be paid the vacation he has earned and has not taken prior to termination.

f. Time spent in military service, within the four-year time limit under the military training and service act, shall be considered continuous service, provided the classified employee left an agency of state government to enter the military service and returned to the state unit within the thirty-day period following his military discharge. Subject to the following conditions:

14.2(1) Vacation leave must be applied for by the classified employee and may be used only when approved by the appointing authority, who shall designate such time or times when it will least interfere with the efficient operation of the agency, taking into consideration the vacation preference of the classified employee. Vacation need not be taken in period of one week or more.

14.2(2) Probationary or permanent part-time classified employees shall accrue vacation leave in an amount proportionate to that which would be accrued under full-time employment.

14.2(3) Vacation leave shall not accrue to any classified employee on leave without pay, suspension, layoff or educational leave.

14.2(4) A classified employee who is transferred from one state agency or department to another state agency or department shall be credited with the vacation leave he has accumulated.

14.2(5) Any classified employee who is separated from the state employment by layoff, resignation, death or otherwise, shall be paid or shall have payment made according to law, for any unused vacation earned.

14.2(6) All earned accumulated vacation leave shall be paid to a classified employee before he is granted leave without pay, except as otherwise provided in these rules.

14.2(7) Vacation leave shall be taken upon a work day basis. Officially designated holidays falling within a period of vacation leave shall not be counted against vacation leave.

14.2(8) A classified employee who is discharged for good cause, or for other reasons set forth in these rules, shall not be paid for vacation leave earned.

14.2(9) Vacation leave may not be taken in advance.

14.2(10) Vacation leave shall be cumulative to twice the annual entitlement, but an appointing authority may require a classified employee to take vacation leave whenever in his administrative judgment such action would be in the best interests of the agency, but no classified employee shall be required to reduce his accrued leave to less than one week by such action.

14.2(11) Reserved for future use.

14.2(12) One week vacation shall be equal to the number of hours in the employee's normal work week.

14.3(19A) Sick leave. A probationary or permanent classified employee shall be entitled to sick leave with full pay at the rate of two and one-half working days for each month of service. Subject to the following conditions:

14.3(1) Sick leave shall apply to a period in which the classified employee is incapacitated

from the performance of his duties by sickness or injury, for medical, surgical, dental or optical examination or treatment, or where by reason of his exposure to contagious disease, his presence at his post of duty would jeopardize the health of others. Disabilities caused or contributed to by pregnancy and recovery therefrom shall be covered by sick leave.

14.3(2) Sick leave shall not be used for vacation leave.

14.3(3) Sick leave shall not be taken in advance.

14.3(4) Sick leave shall not be cumulative for more than 90 working days.

14.3(5) In all cases where a classified employee has been absent on sick leave, he shall immediately upon return to work submit a statement that such absence was due to illness or other reasons stated in 14.3(1). In cases where such absence exceeds three calendar days, such statement shall be verified by a physician or other authorized practitioner, unless waived by the appointing authority. For a lesser period of absence, the appointing authority may, at his discretion, require evidence of illness or other reasons defined in 14.3(1) as he deems necessary and in all cases sick leave shall not be granted until approved by the appointing authority.

14.3(6) Sick leave shall be taken on a working day basis. Officially designated holidays falling within a period of sick leave shall not be counted against sick leave.

14.3(7) Sick leave shall not accrue during leave of absence without pay, suspension, layoff or educational leave.

14.3(8) Probationary and permanent part-time classified employees shall accrue sick leave in an amount proportionate to that which would be accrued under full-time employment.

14.3(9) A classified employee who is transferred from one state agency or department shall be credited with the sick leave he has accumulated.

14.3(10) All sick leave shall expire on the date of separation from the classified service, and no classified employee shall be reimbursed for sick leave outstanding at the time of such separation.

14.3(11) If an absence of illness or injury extends beyond the sick leave accrued to the credit of the classified employee, such additional time may be charged to vacation leave. If all sick and vacation leave is used, the classified employee may be granted sick leave without pay, other leave without pay or terminated.

14.4(19A) Enforced leave. The appointing authority shall grant a classified employee time off from his duties, with compensation for absence necessary or reasonable, when some member of his immediate family requires the classified employee's care or attention, or in case of death in the immediate family. Said enforced leave shall be charged against the employee's sick leave and shall not be granted in excess of accumulated sick leave. The number of days granted will be governed by the circumstances of the case, but in no event shall they exceed five sick days in any calendar year.

14.5(19A) Sick leave without pay. Upon written application of a classified employee, sick leave without pay may be granted by the appointing authority, in writing, for the remaining period of disability after both sick leave and vacation leave have been exhausted. In the event such leave exceeds one year, an extension must be requested and approved by the appointing authority. At any time the appointing authority may require the classified employee to submit a certificate from the attending physician or practitioner. In the event of a failure or refusal to supply such certificate, or if the certificate does not clearly show sufficient disability to preclude the classified employee from the performance of his regular duties, such sick leave without pay shall be canceled and the classified employee returned to work or terminated at the appointing authority's option.

14.6(19A) Leave of absence without pay. A permanent or probationary classified employee, upon application in writing, and upon written approval of the appointing authority, may be granted leave without pay for any reason deemed satisfactory to the appointing authority, subject to the following conditions:

14.6(1) Such leave shall not be granted for more than 12 months, but upon written application, prior to the expiration of such leave, the appointing authority may grant written extensions of such leave as appear best to serve the interests of the agency. Such extension shall not be for more than an additional year.

14.6(2) Failure on the part of the classified employee to report immediately at the expiration of a leave of absence without pay or extension of such leave, except for valid reasons submitted in advance and approved by the appointing authority, shall be considered a resignation.

14.7(19A) Education leave. Educational leave, either with or without pay, may be granted at the discretion of the appointing authority for a period not to exceed one year. Provided, however, the appointing authority may grant such extensions as may appear best to serve the interests of the agency not to exceed one year. When additional leave is granted, the classified employee need not be required to first exhaust his vacation leave.

14.8(19A) Rights upon return from sick leave without pay, leave without pay or education leave without pay. A properly executed sick leave without pay, leave of absence

without pay or educational leave shall accord the classified employee the right to be returned to his position, or one of like nature, on the expiration thereof or sooner if agreeable to or by action of the appointing authority; except, that if the position has been abolished through legislation, material reorganization of the agency or by action of the executive council, the employee shall be given consideration for any other position of similar pay grade and class which, in the opinion of the appointing authority and approved by the commission, does not require qualifications substantially higher than or different than those of the position previously held. If there is no such position, the layoff provisions of these rules shall apply. Leave without pay of 30 days or less shall not affect review date for merit increase or vacation and sick leave benefits.

If it is found necessary to fill the position during the interim of leave, the new employee shall vacate the position upon the return of the classified employee on leave subject to layoff, transfer or demotion rights earned under these rules.

14.9(19A) Compensatory leave. A classified employee shall be granted compensatory leave for all work in excess of a normal working schedule in accordance with the policy, and regulations of the employing agency. Such policy and regulations shall be uniform and made known to the classified employees of the appointing authority.

14.10(19A) Holidays. Holidays shall be granted in accordance with state law and the governor or executive council's proclamations as they are observed by the individual agencies in accordance with their workload, policy and regulations.

14.11(19A) Military leave. A probationary employee or a permanent classified employee who is a member of the national guard, organized reserve or any component part of the military, naval, air force or nurse corps of the state of Iowa or the United States or, who is or may otherwise be inducted into the military service of the state of Iowa or the United States shall, when ordered by proper authority to active state or federal service, be granted leave for the period of such active state or federal service, without loss of pay during the first 30 days of such leave of absence. Rights upon return from military leave shall be in accordance with the provisions of 14.8(19A).

14.12(19A) Maternity leave. Maternity leave shall be granted to permanent or probationary female classified employees when requested and supported by competent medical determination of pregnancy disability, normally not later than the seventh month of pregnancy, but may be extended by the appointing authority where requested by the employee, if supported by competent medical determination and working conditions permit extension. Such leave shall expire not later than two months after the birth of the child, unless extended by the action of the appointing authority. Reinstatement shall be in accordance with 14.8(19A).

14.13(19A) Election leave. Any classified employee not subject to the federal Hatch Act, who becomes a candidate for paid, partisan elective office, shall be granted leave without pay, voluntarily or involuntarily, commencing 30 days prior to the particular primary or general election and continuing until the classified employee is eliminated. Rights upon return after elimination shall be the same as those provided under 14.8(19A).

14.14(19A) Court and jury service. When in obedience to a subpoena or direction by proper authority, a classified employee appears as a witness or a jury member for the federal government, the state of Iowa or a political subdivision thereof, he shall be entitled to leave of absence from regular duty with regular compensation. When a classified employee is subpoenaed or appears in private litigation other than the federal government, the state of Iowa or political subdivision thereof, the time absent by reason therefor, may be taken as the appointing authority shall direct.

14.15(19A) Abandonment of position. Any classified employee who is absent from duty for three consecutive work days without proper notification and authorization thereof shall be deemed to have resigned his position.

[Filed November 5, 1970; amended April 14, 1971, May 1, 1971, August 18, 1971, December 23, 1971, May 10, 1972, September 13, 1972, October 11, 1972]

CHAPTER 15
GRIEVANCES AND COMPLAINTS

15.1(19A) Each appointing authority shall establish a grievance and complaint procedure, as approved by the commission. The agency grievance procedure shall contain at the least the following provisions and such others as the commission may prescribe. In the absence of an approved agency grievance procedure, the provisions in this chapter shall govern. The procedure shall be published and made known to all employees with the agency.

15.2(19A) Policy. An approved grievance and complaint procedure does not replace the appeal procedure set forth in these rules.

15.2(1) All levels of agency supervisory and staff personnel involved shall be directed by the appointing authority to consider grievances and complaints as a first order of business. The maximum time limits set forth in the various steps should not be used where there is an immediate safety hazard or if circumstances will permit a more prompt processing of the grievance or complaint.

15.2(2) Any classified employee may file a grievance or complaint without fear of jeopardizing his position or opportunities for advancement or salary increase. This shall be published and made known to the employees.

15.2(3) All grievances and complaints shall be discussed on state time, except no overtime or compensatory time shall be allowed if the proceedings extend beyond the employee's normal working hours.

15.2(4) The employee or employees involved in the proceeding will co-operate with the appointing authority so there will be a minimum of interference with the normal operations of the agency's work.

15.2(5) An extension of the time limits specified in the grievance procedure may be made when mutually agreed upon.

15.3(19A) Minimum procedure requirements.

Step 1. The classified employee shall initiate the grievance or complaint by orally bringing it to the attention of his immediate supervisor for oral discussion within five days of the incidence of the alleged grievance or complaint. The immediate supervisor shall within five working days orally transmit his decision to the employee.

Step 2. If the classified employee is not satisfied with the oral decision of the immediate supervisor, he may within five working days of notification by his immediate supervisor present his grievance or complaint in written form to the next higher supervisor in the unit, section, division or department in which the employee is assigned. The next higher authority shall within ten working days of receipt of the written appeal affirm the appeal, modify and affirm the appeal, deny the appeal or convene a hearing and present his decision in writing to the employee.

Step 3. If the classified employee is not satisfied with the decision of the next higher supervisor, he may within five working days of written notification by the next higher authority file an appeal in writing to the appointing authority containing all pertinent matters which were brought forth in the first two steps. Within ten working days of the written appeal, the appointing authority shall affirm the appeal, modify and affirm the appeal, deny the appeal or convene a hearing and present his decision in writing to the employee.

Step 4. If the classified employee is not satisfied with the decision of the appointing authority, he may within five working days of the written notification of the appointing authority file an appeal in writing to the merit employment commission which shall contain all the pertinent matters which were brought forth in the first three steps. The merit employment commission shall set a hearing for its next regular meeting or special meeting after receipt of written notification of the appeal. The commission's decision shall be presented to the employee and the appointing authority within five working days of the hearing.

15.4(19A) The employee may obtain judicial review of the commission's decision by writ of certiorari as provided in the rules of civil procedure.

15.5(19A) If the employee fails to proceed with the grievance or complaint within any of the time limits set forth under 15.3(19A), or special procedures approved by the commission, it shall be assumed the grievance or complaint has been settled on the basis of the last decision reached.

15.6(19A) If the appointing authority, or his representative supervisors fail to comply with the time limitations, the employee may proceed immediately to the next step as if a decision had been reached with which he was not satisfied.

15.7(19A) The singular employee shall also be interpreted to mean employees where such would be applicable.

15.8(19A) Form and content of written appeal notification.

15.8(1) The appeal shall be written in a form specified or approved by the commission.

15.8(2) The appeal shall contain specific information as to time and place alleged complaint or grievance, notation of procedures followed and corrective action desired. The name of a third party, if any, selected by the employee to represent his interest shall be set forth. The third party may be an attorney, an organization, a fellow employee or other individual the employee may desire for representation.

15.8(3) All germane information brought out in the hearings may be added to and shall become a part of the appeal.

15.9(19A) The hearing.

15.9(1) All hearings shall be held in an informal manner. Witnesses may be called by either party and questioned by both parties. Documents and written statements which are material shall be considered but not limited by legal rules of evidence.

15.9(2) The presiding officer of the respective hearings shall be

Step 2—The next higher authority.

Step 3—The appointing authority or his delegated representative.

Step 4—The chairman of the merit employment commission.

15.10(19A) The aggrieved employee shall be notified far enough in advance of any hearing so that he can make arrangements to attend the hearing.

15.11(19A) The aggrieved classified employee and all witnesses, who are classified state employees, shall be allowed time off with pay to

attend the hearings. But witnesses shall not be cumulative and shall be controlled as to numbers so as not to affect the service of the agency. Statements of witnesses may be taken in lieu of appearance or stipulation made thereto.

15.12(19A) No classified employee may be coerced by his supervisor or the appointing authority into not proceeding with a grievance or appearing as a witness at a hearing. Such action by the supervisor or the appointing authority shall be considered as a basis of appeal.

15.13(19A) The third party, if a classified employee, shall be allowed time off but without pay.

[Filed September 17, 1970;
amended April 4, 1971]

CHAPTER 16
POLITICAL ACTIVITY

16.1(19A) Classified employees, whether full-time or part-time, temporary, provisional, intermittent, probationary or permanent, shall be prohibited from:

16.1(1) Engaging in any partisan political activity during scheduled working hours, while on duty, when using state equipment, or on state property;

16.1(2) Neglecting his or her assigned duties or responsibilities or being absent from or tardy to work because of permitted political activities;

16.1(3) Wearing badges or other representation of political preference during working hours, while on duty, when using state equipment or on state property;

16.1(4) Using his or her office, public position, public property or supplies to secure contributions or to influence an election for any political party or any person seeking political office;

16.1(5) Soliciting or receiving anything of value as a partisan political contribution or subterfuge for such contribution from any other person for any political party or any person seeking political office during scheduled working hours, while on duty, when using state equipment or on state property (Also see section 740.13);

16.1(6) Promising or using influence, to secure public employment or other benefits financed from public funds as a reward for political activity;

16.1(7) Discriminating in favor of, or against, an officer, employee, or applicant on account of his or her political contribution or permitted political activity at any level of state government;

16.1(8) Being a candidate for any partisan elective office for remuneration while on active duty. This does not prohibit a classified employee from holding any office which is not paid or for which token pay is received.

16.2(19A) In addition to 16.1(19A), employees of the federal grant-aided agencies such as employment security commission, department of health, certain areas of social services and civil defense and others, shall be subject to the applicable provision of the federal Hatch Act, when required, by the granting federal agency. These provisions shall be made known to employees of such agencies by the appointing authorities concerned and compliance adhered to.

16.3(19A) In addition to 16.1(19A), officers and employees of the Iowa beer and liquor control department are governed by the provisions of section 123.17. These provisions shall be made known to officers and employees by the liquor control commission and compliance adhered to.

[Filed October 17, 1970;
amended November 5, 1970]

CHAPTER 17
RECORDS AND REPORTS

17.1(19A) Agency attendance records. Each agency shall maintain an adequate set of classified employee records for the purpose of recording attendance. These records shall include attendance on official duty; vacation and sick leave earned, used and accrued; compensatory time earned, used and accrued; overtime earned, used and accrued.

17.2(19A) Roster. The director shall establish and maintain a roster of all employees in the classified service, showing for each classified employee the class title, salary, date of employment and such other data as the commission deems pertinent.

17.3(19A) Reports of personnel transactions in the classified service. The commission shall prescribe the necessary official forms for the report of all personnel transactions and procedures. Classified employees shall receive a copy of all personnel status changes by which they are affected.

17.4(19A) Records of the merit employment department. The records of the merit employment department, except for examination materials, service records, personal histories, and such other records as may be specified in the rules or by official action of the commission as confidential, may be inspected at the department's offices during working hours. Any classified employee shall have the right to examine his personal file during regular working hours of the department.

[Filed June 9, 1970]

CHAPTER 18
CONDUCT OF CLASSIFIED EMPLOYEES

18.1(19A) Every classified employee shall fulfill to the best of his ability the duties of the of-

fice or position conferred upon him and shall prove himself in his behavior, inside and outside, the worth of the esteem which his office or position requires. In his official activities, the classified employee shall pursue the common good, and, not only be impartial, but so act as neither to endanger his impartiality nor to give occasion for distrust of his impartiality.

18.2(19A) A classified employee shall not engage in any employment, activity or enterprise which has been determined to be inconsistent, incompatible, or in conflict with his duties as a classified employee or with the duties or responsibilities of the appointing authority by which he is employed.

18.3(19A) Each appointing authority shall determine and prescribe those activities which, for classified employees under its jurisdiction will be considered inconsistent, incompatible or in conflict with their duties as classified employees. All classified employees under the jurisdiction of the appointing authority shall be notified of this determination. In making this determination, the appointing authority shall give consideration to employment, activity, or enterprise which;

a. Involves private gain or advantage of state time, facilities, equipment and supplies; or, the badge, uniform, prestige or influence of one's state office of employment,

b. Involves receipt or acceptance by classified employees of any money or other consideration from anyone, other than the state, for the performance of an act which the classified employee would be required or expected to render in the regular course or hours of his state employment or as a part of his duties as a state classified employee, or

c. Involves the performance of an act in other than his capacity as a state classified employee which act may later be subject directly or indirectly to the control, inspection, review, audit or endorsement by such classified employee or the agency by which he is employed.

18.4(19A) Each classified employee shall during his hours of duty and subject to such other laws, rules and regulations as pertained thereto, devote his full time, attention and efforts to his office or employment. The tenure of office of every classified employee shall depend upon good behavior and the satisfactory performance of his duties as recorded in his service record and other standards of performance. This provision, however, shall not be interpreted to prevent the separation of a classified employee for causes set forth in these rules or chapter 19A, or the separation of a classified employee because of lack of funds, curtailment of work or organization, when made in accordance with these rules and approved when required by the executive council of the state of Iowa.

MINE INSPECTORS

CHAPTER 1
GENERAL PROVISIONS

1.1(82) Electricity.

1.1(1) All electrical equipment shall be provided with switches of safe design, construction and installation.

1.1(2) A suitable cut-out switch shall be installed at all branch circuits to adjacent lines.

1.1(3) Cut-off switches shall be marked so that they may be found readily in case of emergency.

1.1(4) Trailing cables shall be properly protected against mechanical injury at all places where cars and other forms of transportation are required to cross.

1.1(5) Electrical equipment shall be inspected daily, and maintained in safe condition.

1.2(82) Blasting.

1.2(1) All shots shall be fired by certified persons.

1.2(2) All explosives and detonators shall be kept separate until ready for use.

1.2(3) Fuses shall be at least four feet long, or over, in all shots fired.

1.2(4) Tamping sticks shall be made of wood, with no exposed metal parts.

1.2(5) Warning signals shall be given, and all workmen required to retreat to a safe place before shots are fired.

1.2(6) Each misfire presents an individual problem and shall be handled by the shot examiner and the mine foreman.

1.2(7) Any explosive used while men are in the mine shall be known as "permissible explosive" and shall be on the approved list of permissible explosives of the United States bureau of mines and shall have been approved by the mine inspectors in the state.

1.2(8) No person shall perform the duties of shotfirer in any coal mine of this state without having in his possession and on his person an efficient gas mask or self-rescuer.

1.2(9) Any person or persons, firm or corporation contemplating the use of permissible powder to blast coal while workmen are in the

mine, either by shaft, slope, or drift methods to mine or produce for sale, barter or trade, must first obtain a permit from the state mine inspector of the district in which the intended mine is located; which permit shall be issued as hereinafter provided, permitting and authorizing the use of permissible explosives or any other device to break down the coal, while the workmen are in the mine. The permit shall not be valid until a copy is filed in the general office of the state mine inspectors.

1.2(10) In all mines in the state, where mechanical units are in use, during the last minute of each hour, a period of silence shall be observed, in order that the operator of the said mechanical units may make a thorough test of roof conditions in the various places in which these units are used.

1.2(11) Firing of shots while others, than those firing the shots, are in the mine, shall in no case be permitted in any coal mine except in mines where the coal is mechanically undercut.

1.2(12) In all mines where coal is blasted while others than the shotfirer are in the mine, the operator shall furnish sand, soil, or clay to be used for tamping, which shall be delivered to the employee and placed at a convenient distance from the working place, ready for use. So as not to obstruct any employee in his work, no person shall be permitted to use any substance or material other than sand, soil or clay, for tamping.

1.3(82) Air.

1.3(1) The operator shall provide and maintain an amount of ventilation of not less than 150 cubic feet of air per minute for each person employed in the mine, and not less than 500 cubic feet of air per minute for each animal used therein.

1.3(2) All abandoned rooms or other workings shall be closed with a permanent and substantial stopping, and these stoppings shall be examined daily by the preshift inspector for methane, carbon dioxide (black damp), and carbon monoxide (white damp), and a report kept at the office of the mine.

1.4(82) Sprinkling or rock dusting. Where shots are fired while others than the shotfirers are in the mine, a suitable sprinkler or rock dusting system shall be installed, which shall have been approved by the state mine inspector. No shots shall be fired until the room or entry shall have been sprinkled or rock dusted for a distance of 50 feet back from the face of said room or entry or breakthrough.

Any violation of these rules shall be just cause to cancel any permit issued to use permissible explosives while others than the shotfirer or shotfirers are in the mine.

NURSING BOARD

CHAPTER 1
ACCREDITATION OF NURSING EDUCATION PROGRAMS

1.1(152) Definition of terms.

1.1(1) *Approval-accreditation — used interchangeably.* Terms refer to those programs and clinical facilities which have met requirements of the Iowa board of nursing. Also includes approval granted by voluntary, regional and other state agencies.

1.1(2) *Board.* Iowa board of nursing.

1.1(3) *Baccalaureate program.* A program in nursing leading to a baccalaureate degree which is conducted by an educational unit in nursing (department, division, school, or college) and is an integral part of a college or university and organized and controlled in the same way as similar units in the institution. The graduate is eligible to write the registered nurse licensing examination.

1.1(4) *Diploma program.* A program in nursing leading to a diploma which is conducted by a single purpose school under the control of a hospital or other authority. The graduate is eligible to write the registered nurse licensing examination.

1.1(5) *Associate degree program.* A program in nursing leading to an associate degree which is conducted by an educational unit in nursing (department or division) and is an integral part of a school system or a college and organized and controlled in the same way as similar units in the institution. The graduate is eligible to write the registered nurse licensing examination.

1.1(6) *Practical nurse program.* A program in nursing leading to a diploma or certificate in practical nursing, which is part of a larger controlling institution, either a department of a hospital or a school system. The graduate is eligible to write the practical nurse licensing examination.

1.1(7) *Controlling agency.* The single agency or institution that administers the school in its entirety.

1.1(8) *Co-operating agencies.* Those outside the framework of the controlling agency which offer facilities that contribute to the educational program. This includes institutions used as the clinical laboratory for students in nursing.

1.1(9) *Co-ordinator.* The individual immediately responsible for a nursing program in the vocational-technical system.

1.1(10) *Counseling and guidance.* Personnel services available to the student to assist in his adjustment.

1.1(11) *Course.* A subject area within the curriculum.

1.1(12) *Curriculum.* The course of studies organized in a systematic manner.

1.1(13) *Dean-chairman.* The individual immediately responsible for a nursing program controlled by a college or university.

1.1(14) *Director.* The individual immediately responsible for a nursing program. This title is usually used in hospital controlled schools.

1.1(15) *Educational climate.* An environment in which effective learning can take place and in which attitudes that recognize the student as a learner are fostered.

1.1(16) *Faculty.* Individuals employed to administer and to teach in the educational program. In this document, *nurse faculty* refers to the faculty members who are registered nurses or licensed practical nurses. *Nursing faculty* refers to all individuals employed to carry out the educational program.

1.1(17) *Learning experience.* Interaction between the student and his environment.

1.1(18) *Legal finishing date.* Legal finishing date is interpreted by the board to mean the date on which the student has completed all theory and clinical practice required for graduation. In accordance with this interpretation:

a. The diploma and the student final record shall bear this legal finishing date.

b. The effective date of the work permit will be the legal finishing date.

1.1(19) *Observational experience.* A planned and supervised experience of two weeks or less.

1.1(20) *Objectives.* Statements developed by the faculty which identify the behavioral changes which are expected to occur in the student during his educational experience.

1.1(21) *Organization.* The administrative framework within which the program exists.

1.1(22) *Philosophy.* A statement which identifies the beliefs accepted by the faculty about education and nursing.

1.1(23) *Principle.* Accepted or professed rule or guide for action.

1.1(24) *Program.* Used interchangeably with school.

1.1(25) *Purpose.* A statement which identifies the reason for the existence of the school of nursing.

1.1(26) *Recommendations.* Desirable standards for development of quality schools and programs are those strongly urged by the board although they are not mandatory. The words "should," "it is desirable" and "it is suggested" designate the statement of recommendations.

1.1(27) *Requirements.* Mandatory standards with which schools must comply in order to be approved. The words "shall" and "must" designate the statements of requirements.

1.1(28) *School.* A division or department of nursing offering a basic course of study preparing individuals for licensure as a registered nurse or a licensed practical nurse.

1.2(152) Purposes of accreditation.

1.2(1) To insure the safe practice of nursing by setting minimum requirements for schools preparing the practitioner.

1.2(2) To assure the graduates of these schools of their eligibility for admission to the licensing examination.

1.2(3) To encourage within each school self-evaluation and study of its program for growth and improvement.

1.2(4) To provide on request, a list of schools of nursing accredited by the board for the use of prospective students and counselors in the selection of a school of nursing.

1.3(152) Types of accreditation.

1.3(1) *Interim.* Granted to a newly established school which is demonstrating that it can meet requirements established by the board. This accreditation will be continued until the first class of students is graduated. However, there must be evidence through reports and survey visits that minimum requirements are being met.

1.3(2) *Provisional.* Accorded for one year to any school previously having interim or full accreditation if minimum standards as established by the board are not being met. Before a school is placed on provisional status, representatives from the school will be asked to meet with the board of nursing. At periodic intervals, progress reports and survey visits will be required. If standards are not met within the defined period, the board may either extend provisional accreditation or remove the school from accreditation status.

1.3(3) *Full.* Granted to a school that has met the requirements set by the board and has demonstrated its ability to provide an educational program which meets the standards of the board. Full accreditation is granted for three years unless there is evidence that the school is not progressing satisfactorily.

1.4(152) Accreditation.

1.4(1) *New and reopened schools.* Any agency wishing to establish or reopen a school of nursing shall inform the board by writing to the executive director during the initial planning. Ear-

ly consultation and planning with the board is essential for the development of all types of sound programs in nursing.

a. Advisory committee. An advisory committee to the controlling agency may be utilized. If an advisory committee is formed:

(1) Membership shall be representative of the community and nursing.

(2) Functions shall be purely advisory.

(3) Relationships to the controlling agency and faculty shall be clearly defined in writing. Minutes of meetings shall be on file.

b. Proposal. Written proposal (eight copies) shall be submitted to the executive director one month prior to a regular meeting for board action. Proposal must include:

(1) Request for permission to open a school, signed by appropriate officials of the controlling agency.

(2) Classification of proposed school.

(3) Evidence of community interest.

(4) Financial support.

(5) Accreditation status of the controlling agency.

(6) Evidence of availability of clinical resources.

(7) Evidence of availability of physical facilities.

(8) Provision for qualified faculty.

(9) Educational philosophy of controlling agency.

(10) Availability of qualified applicants. This should be realistically projected for a five-year period.

c. Survey visits.

(1) A survey of the controlling agency and clinical resources to be used for student experience will be made by a representative of the board.

(2) Written reports of survey will be submitted to the board for action simultaneously with proposal. This will necessitate early notification of intention to open a school so that survey visits can be arranged.

(3) Representatives from the controlling agency will meet with the board at the time the proposal and reports of survey are discussed. This meeting will serve as a means of clarification and communication.

d. Report of board action.

(1) Written report of board action accompanied by the board survey reports will be sent to the administrative official of the controlling agency.

(2) The controlling agency will receive a copy of all reports.

(3) The co-operating agencies will receive only the copy of the report of their agency.

e. Faculty requirements—all programs.

(1) Educational requirements are outlined in 2.4(2).

(2) The head of the nursing program shall be employed for a sufficient period of time prior to the admission of students to organize and develop the program.

(3) The instructors of the nursing program shall be employed for a sufficient period of time prior to the beginning of their teaching assignment to become oriented to the school and facilities and prepare for teaching assignment.

f. Progress reports.

(1) Monthly progress reports (eight copies) must be submitted to the executive director for review by the board of nursing.

(2) These reports will start one month after the head of the nursing program is employed and continue until otherwise notified by the board. These reports are to reflect the accomplishments in the development of the program.

g. Publicity. Publicity released relative to opening a new program should be carefully stated during the interim before approval is granted. Words such as "planning", "tentative opening date", etc., should be used.

1.4(2) *Established schools.*

a. Survey visits. All schools regardless of accreditation status will be visited by a qualified representative of the board at regular intervals as determined by the board. The purpose of the visit is to examine educational objectives, review courses, programs, administrative practices, services and facilities and to prepare a written report for review and action by the board. All visits will be conducted under impartial and objective conditions.

(1) The tentative written report of survey visit to the educational program is submitted to the dean-chairman, director, co-ordinator for review prior to typing in final form for board action.

(2) The final survey report accompanied by a written report of board action is sent to the administrative official of the controlling agency. A copy is sent simultaneously to the dean-chairman, director, co-ordinator of the program.

b. Survey of clinical facilities. All institutions used as a clinical laboratory for students will be visited by a qualified representative of the board as part of the school survey. The purpose of the visit is to review administrative practices, patient care practices, facilities and programs for patient care and personnel and to prepare a written report for review and action by the board.

(1) The tentative written report of survey visit to each clinical facility is submitted to the director of nursing service for review prior to typing in final form for board action.

(2) The final survey report accompanied by a written report of board action is sent to the chief administrative officer of the institution. A copy is sent simultaneously to the director of nursing service.

1.4(3) *Withdrawal of accreditation.*

a. Withdrawal of accreditation will be made only after the school has been on provisional status.

b. Accreditation will not be withdrawn until a survey has been made.

c. Representatives of the school will meet with the board to discuss problems and status of the school.

d. Final action will be communicated to the controlling agency in writing.

1.4(4) *Change of ownership or control.*

a. The board shall be notified in writing of any changes in ownership or control of a school.

b. Information shall include the official name of the school, organizational chart of the controlling agency and names of administrative officials.

[Filed May 12, 1970]

CHAPTER 2
CRITERIA FOR ACCREDITATION

2.1(152) Accreditation of controlling institution.

2.1(1) *Baccalaureate programs.* North Central Association of Colleges and Secondary Schools.

2.1(2) *Diploma programs.*

a. Community health facilities services, state department of health.

b. Joint Commission on Accreditation of Hospitals.

c. If appropriate, bureau of professional education, American Osteopathic Association.

2.1(3) *Associate degree programs.*

a. Department of public instruction, or

b. North Central Association of Colleges and Secondary Schools.

2.1(4) *Practical nursing programs.*

a. Department of public instruction, or

b. Joint Commission on Accreditation of Hospitals.

c. If appropriate, bureau of professional education, American Osteopathic Association.

2.2(152) Organization and administration of the program.

2.2(1) *Authorization.* Authorization for conducting a school of nursing is granted:

a. By the charter or articles of incorporation of the controlling institution, or by resolution of its board of control, or

b. By the school's own charter or articles of incorporation.

2.2(2) *Administrative responsibility.* The authority and administrative responsibility of the school are vested in the dean-chairman, director or co-ordinator who is responsible to the controlling board either directly or through proper administrative channels.

2.2(3) *Organization chart.* The organization chart shall indicate responsibilities and lines of communication. It will show:

a. Relationship of school to the controlling body.

b. Relationship of school to the co-operating agencies, advisory committee and nursing service.

c. Such relationships may be direct, advisory, contractual or co-operative in nature.

d. A legend shall describe various lines used on the chart.

2.2(4) *Finances.*

a. There shall be adequate funds allocated by the controlling agency to carry out the purposes of the program.

b. The faculty through the head of the nursing program (dean-chairman, director, co-ordinator) will assist in the preparation and supervision of the budget within the administrative framework for the controlling institution.

2.2(5) *Ethical practice.*

a. The controlling agency of each school of nursing will establish a well-defined set of standards regarding the school's ethical practices, including recruitment and advertising.

b. These standards shall appear in writing and be available to students.

2.2(6) *Contractual agreements.*

a. If clinical resources are located outside the framework of the controlling agency, written contractual agreements shall be initiated by the school.

b. The agreement shall be developed jointly with the co-operating agency and reviewed periodically according to policies of the controlling institution.

c. The agreement shall insure full control of student education by the faculty. Faculty shall have freedom to teach and guide students. Selection of learning experiences shall be the responsibility of the faculty. Planning of clinical experience shall be done in co-operation with the director of nursing service and appropriate head nurses.

d. There shall be joint planning when more than one program uses the same facility for student experience. Representation shall be from nursing service and each nursing program. Meetings shall be scheduled for planning and subsequent evaluation. Minutes shall be written and disseminated to representatives.

2.2(7) *Philosophy and objectives.*

a. The philosophy and objectives of the nursing program shall be in writing and in accordance with currently accepted educational, social and nursing standards.

b. The philosophy shall be consistent with the philosophy of the controlling institution.

c. The philosophy and objectives developed and adopted by the faculty shall serve as a guide in the development, implementation and evaluation of the program.

d. The philosophy and objectives shall be reviewed periodically and revised as necessary by the faculty.

e. Students shall receive a copy of the philosophy and objectives of the program soon after admission.

2.3(152) Curriculum.

2.3(1) *General requirements—all programs.* The curriculum shall:

a. Reflect the philosophy and objectives of the program.

b. Follow an organized pattern in which the sequence of learning is from the simple to the complex and from the known to the unknown with each learning experience built upon previous ones.

c. Be organized to provide for regular terms.

(1) Courses shall be designed in keeping with those terms.

(2) There shall be a general plan of the total curriculum.

(3) There shall be a reasonable distribution of courses throughout the program.

d. Identify the terminal behavioral outcomes expected of students.

e. Be developed by the faculty and include plans whereby growth of students is promoted by:

(1) Understanding roles and responsibilities of the practitioners of nursing.

(2) Applying principles of sciences which are basic to nursing practice and to the understanding of plans for medical care.

(3) Recognizing physical and emotional needs of patients and making appropriate application of these learnings.

(4) Understanding effective human relations and demonstrating ability to use these principles in nursing situations.

(5) Understanding manifestations of diseases and abnormal conditions and initiating and applying the principles underlying the nursing care.

(6) Preparing the particular practitioner for his accepted role.

(7) Learning experiences which will develop skills and abilities in observation, communications, problem solving and working relationships and an understanding of related legal and professional responsibilities.

f. Provide learning experiences for both men and women in which there is no gross differentiation.

2.3(2) *General requirements—baccalaureate programs only.*

a. The curriculum shall be consistent with the quality of other degree programs in the college or university.

b. The program shall be planned within the college calendar and meet the requirements for a degree.

c. The program shall include courses in general and nursing education.

d. Required general education courses shall contribute in breadth and depth to student development.

e. Credit hours for lecture and clinical experience shall be consistent with the college pattern.

2.3(3) *Instructional requirements—baccalaureate, diploma and associate degree programs.*

a. Biological and physical sciences. Courses in biological and physical sciences may be planned separately or combined. The ability to use scientific principles in individualized patient care shall be the goal set for student achievement.

b. Behavioral sciences. Experience shall be provided for students to improve abilities in observation, communication, interviewing, problem solving and interpersonal relationships.

c. Nursing content. Content including theory and guided clinical practice must be provided in medical nursing, surgical nursing, obstetric nursing, nursing of children, psychiatric nursing and, for baccalaureate programs, community nursing.

d. Supporting courses. Supporting courses such as nutrition, diet modification, growth and development, etc., may be separate or integrated courses.

e. Clinical experience. Students shall have experience in the care of men, women and children. Experience should include preventive aspects, care during acute illness, chronic illness and rehabilitation.

2.3(4) *Instructional requirements—practical nursing programs.*

a. Natural sciences.

(1) Selected facts and principles of the natural sciences and related terminology.

(2) General gross aspects of body structure and function.

(3) Elementary microbiology.

(4) Nutrition.

b. Behavioral sciences.

(1) Elementary psychosocial facts and principles.

(2) Gross signs of emotional and mental health and development in all age groups.

(3) Elementary principles of human relations.

c. Nursing content. Content including theory and guided clinical practice must be provided in the following areas:

(1) Nursing care of adults.

(2) Nursing care of children.

(3) Nursing care of mothers and infants.

d. Clinical experience. Students shall have experience in the care of men, women and children. This experience shall be within the accepted role of the practical nurse.

2.3(5) Students in all programs shall receive copies of course outlines at the appropriate time.

2.4(152) Faculty—all programs.

2.4(1) Some factors to be considered in determining the number of faculty needed are:

a. Number of students enrolled.

b. Frequency of admissions.

c. Level of students taught.

d. Preparation and experience of the faculty member.

e. Formal class or clinical laboratory.

f. Number and location of the clinical resources.

g. Total responsibilities of the faculty.

2.4(2) *Faculty requirements—all programs.*

a. General requirements for nurse faculty.

(1) Current nurse licensure in Iowa.

(2) Competent practitioner with knowledge and skills of current practice.

b. Educational requirements for faculty.

(1) Senior colleges and universities shall establish educational qualifications for the faculty of the program in nursing comparable to all other faculty. The baccalaureate degree shall be the minimum qualification.

(2) Hospitals conducting programs in nursing shall establish educational qualifications for the nursing faculty. It is recommended that the baccalaureate degree be the minimum qualification.

(3) Community, junior colleges and area schools shall establish educational qualifications for the faculty of a program in nursing as required for other comparable programs leading to a like diploma and degree. It is recommended that the baccalaureate degree be the minimum qualification.

(4) Practical nurse programs only—in selected instances a licensed practical nurse who is a graduate of an approved program in practical nursing may be utilized as a faculty member in a practical nurse program.

2.4(3) *Functions of faculty.* The principal functions of the faculty are to:

a. Develop the philosophy and objective of the program.

b. Participate in construction, implementation, evaluation and revision of the curriculum.

c. Develop policies for the selection of nursing students within the framework of the policies of the controlling agency.

d. Participate in counseling and guidance of the nursing students.

e. Organize and develop nursing courses and their sequence in the program, select and organize learning experiences and guide students in attaining the objectives.

f. Establish policies consistent with those of the institution as a whole, for progression and completion of the program in nursing.

g. Evaluate student achievement on the basis of determined policies, assign earned grades for the courses in nursing and recommend successful candidates for degree, diploma and other forms of recognition.

h. Participate in appropriate activities of the controlling agency.

2.4(4) *Organization of the nursing faculty.*

a. There shall be a nursing faculty organization.

(1) All members of the faculty shall participate in the activities of this organization.

(2) Meetings shall be held on a regular basis.

(3) Minutes, which include faculty action, shall be recorded and available for reference.

(4) Committees, as needed, shall be established.

(5) Minutes of meetings shall be recorded and kept on file.

(6) Standard format shall be used to include resumé of discussion and action taken.

b. The conditions under which the faculty work will contribute stability as well as continuous professional growth.

(1) Qualifications and responsibilities are defined for each faculty position.

(2) There is an in-service education program designed to further the competence of individuals as well as that of the faculty as a whole.

(3) The teaching assignments and other responsibilities allow time for class and laboratory preparation, program revision, improvement of teaching methods, guidance of students, participation in the faculty organization and committees, and attendance at professional meetings and participation at workshops, institutes and special courses.

(4) There are written personnel policies that provide for orientation, promotion, leave of absence, sick leave, vacation, holidays and salary increments. The salary should be commensurate with preparation, responsibility and performance.

c. Provision for clerical staff.

(1) There shall be a sufficient number of personnel for secretarial and clerical work.

(2) There should be provision for continuity in the clerical service.

2.5(152) Students—all programs.

2.5(1) *Selection of students.*

a. Students shall be selected without discrimination on the basis of the philosophy and objectives of the program and the ability of the student to carry the program to completion.

b. Admission policies shall be developed in writing by the faculty.

c. There shall be adherence to these written policies.

2.5(2) *Admission of students.*

a. There shall be dates set for the beginning of each term.

b. In order to provide some flexibility, each school shall determine the date for close of registration. Close of registration is defined as the time after which a student will not be allowed to begin the program.

c. Any student leaving the school after close of registration shall be reported to the board

as a withdrawal when submitting statistics on enrollment.

d. All students admitted during the registration period shall be considered as having been admitted on the same date.

e. There shall be a well-defined refund policy governing all fees and tuition paid by students.

2.5(3) *Transfer and readmission.*

a. The faculty shall establish and adhere to written policies for transfer and readmission of students.

b. Students admitted by transfer from another approved school of nursing or readmitted for completion of the program shall meet standards required of those currently enrolled.

c. The admission date of a student shall be determined by the term in which the required courses that he needs will be given.

d. When a school accepts a transfer student (student with advanced standing), that school assumes the responsibility for recommending the individual for the state board test pool licensing examinations.

e. The transcript from the original school becomes part of the final record (official transcript) of the school graduating the applicant. The complete transcript shall be filed with the board of nursing when application for the state board test pool examination is made.

f. The school shall determine the time necessary for the student to meet the above criteria.

2.5(4) *Advanced standing.*

a. Individuals with previous experience or course of study related to nursing may be admitted to a registered nurse program or a practical nursing program with advanced standing after satisfactory evaluation has been made.

b. Whether or not a school wishes to participate in such programs shall be the prerogative of the individual school.

c. If a school elects to participate, the board shall be notified in writing. The board of nursing "Guide to the Development of a Program for Advanced Placement in a Nursing Program" shall be followed.

d. Approval of the board is required before program is initiated.

2.5(5) *Progression and graduation.*

a. The faculty shall establish and adhere to written policies regarding progression and graduation of the student.

b. These written policies shall be shared with the student.

c. These policies must include:

(1) Grading system.

(2) Suspension or dismissal policy.

(3) Requirements for graduation.

d. The board does not require or recommend that students be retained in a program to "make up days". A student should be retained only if he has not fulfilled the objectives of the program.

e. Prerequisites must be determined for each course.

f. Signed diplomas shall be granted only to students who complete the prescribed program.

g. The graduate shall have the privilege of writing the first scheduled state board test pool examination following completion of the program.

2.5(6) *Health and welfare.*

a. There must be written policies that safeguard the health and well-being of students. These will include:

(1) Vacation.

(2) Health policies.

(3) Leave of absence.

(4) Holidays.

(5) Employment.

(6) Class attendance required.

(7) Provision of counseling and guidance.

b. The board recommends that each student be covered by liability and malpractice insurance.

c. Copies of these policies shall be distributed to the students.

2.6(152) Records and school bulletin.

2.6(1) *School records.*

a. A nursing program shall maintain a meaningful and useful system of records. These should include:

(1) Current course outlines.

(2) Current faculty and committee minutes.

(3) Faculty personnel records.

(4) Pertinent correspondence.

(5) Pertinent reports.

(6) School bulletins.

b. All printed materials shall have a heading and a date. Dates shall be added as materials are reviewed and revised.

2.6(2) *Student records.*

a. The nursing program shall maintain an individual record for each student.

b. School policy will determine contents necessary to serve the purpose intended. These may include:

(1) Application.

(2) Health summary.

(3) Student final record or transcript.

(4) Summary of evaluations and achievement.

(5) Results of state board test pool licensing examination.

(6) Verification of change of name if change occurs while enrolled in the school.

c. Student final record or transcript. The student final record submitted to the board of nursing:

(1) Must carry the correct dates of admission to and completion of the program.

(2) Must include the name and location of school of previous enrollment and dates of that enrollment.

(3) Must include legal name of student.

(4) Must be signed by the proper school official.

(5) Must have the school seal affixed. If there is no school seal, the signature must be notarized.

(6) Must be legible.

d. The student final record retained in the permanent file of the school should be signed by the proper official and have the school seal affixed.

2.6(3) Provision shall be made for the protection of records against loss, destruction and unauthorized use.

2.6(4) *School catalog.*

a. Information about the school shall be published periodically (at least every two years).

b. The publication shall be dated and include:

(1) Philosophy and objectives of the school.

(2) A general description of the program.

(3) Curriculum plan.

(4) Brief course descriptions.

(5) Facilities and conditions provided for student learning and welfare.

(6) Faculty.

(7) Statement of tuition, fees and refund policies.

(8) Statement regarding ethical practices, including recruitment and advertising.

(9) Housing and residence facilities.

2.7(152) Evaluation.

2.7(1) Evaluation shall be a planned, ongoing activity of the school of nursing directed toward the improvement of the program, faculty and students.

2.7(2) The plan for evaluation shall be in writing and take into consideration the following:

a. Program evaluation should assist the faculty in determining accomplishments, setting new goals and making a blueprint for action.

b. Evaluation of the individual faculty member is part of the total evaluation process.

c. The faculty shall make provision for the evaluation of student performance at specified intervals. Since the student is the direct object of the evaluation process, provision must be made for him to participate actively.

2.8(152) Physical facilities of the program.

Physical facilities shall be appropriate to the type of program and size of the student body and include:

1. Classrooms.
2. Offices for faculty and clerical staff.
3. Library.

Holdings shall be commensurate with the needs of the program. Library hours shall provide for maximum usage by students.

Audio-visual equipment should be provided so that a multi-media approach to learning can be used.

4. Conference rooms.
5. Residence facilities, if provided, should provide healthful and pleasant surroundings.

2.9(152) Clinical resources.

2.9(1) The clinical resource (hospital, extended care facility, nursing home) to which the student is assigned for clinical practice is considered an integral part of the nursing program.

2.9(2) The following criteria must be met:

a. There shall be a well organized and directed nursing service department.

b. There shall be an environment in which effective learning can take place and in which the student is recognized as a learner.

c. There shall be an adequate number of qualified professional and other nursing personnel to insure safe care of the patient.

d. There shall be a sufficient number of patients to provide adequate learning experiences.

2.9(3) Clinical resources used for student experience shall be selected so that the best experience in each major area of nursing can be secured. Community resources outside of hospitals should be investigated.

2.9(4) The clinical resource must be surveyed and approved by the board of nursing before it can be used for student experience.

2.9(5) *Accreditation.*

a. Hospitals.

(1) Community health facilities service, state department of health.

(2) Joint Commission on Accreditation of Hospitals.

(3) If appropriate, bureau of professional education, American Osteopathic Association.

b. Nursing homes and extended care facilities. Community health facilities service, state department of health.

2.10(152) Reports.

2.10(1) The head of the nursing program should make at least an annual written report to the controlling agency.

2.10(2) The head of the nursing program shall submit an annual report to the board of nursing on forms provided. This report will provide current data on:

a. Progress toward achievement of its stated objectives in nursing education.

b. Qualifications and major responsibilities of the dean-chairman, director, co-ordinator and of each faculty member.

c. Policies used for selection, promotion and graduation of students.

d. Practices followed in safeguarding the health and well being of students.

e. Current enrollment by class and student-teacher ratios.

f. Number of admissions to school per year for past five years.

g. Number of graduations from school per year for past five years.

h. Performance of students on state board test pool examinations for past five years.

i. Curriculum plan.

j. Brief course descriptions.

k. Descriptions of resources and facilities, clinical areas, and contractual arrangements which reflect upon the academic program.

l. Copy of audited fiscal reports, including a statement of income and expenditures.

m. Achievements of past year.

n. Goals for present year.

2.10(3) Forms for reporting the following information to the board will be sent to schools at the appropriate time:

a. Legal name and address of students admitted.

b. Legal name of candidates for state board test pool examinations.

2.10(4) *Special reports.* The board shall be informed in writing regarding:

a. Change in ownership or administrative control of the school.

b. Changes in administrative personnel in the school and the controlling agency.

c. Dismissal of a student for reasons outlined under sections 147.55 and 147.56.

2.11(152) Board approval requirements. Board approval is required before the following can be instituted.

2.11(1) Major curriculum change to include:

a. Alteration of the present curriculum which increases or shortens the program, exclusive of vacation days.

b. Changes in use of co-operating agencies.

c. Major change in course offering.

2.11(2) Experimentation which represents a deviation from these rules. The board of nursing "Guide to Experimentation in Nursing Education" shall be followed.

2.11(3) Schools with interim or provisional accreditation shall request board approval to increase the number of students admitted to a program.

2.11(4) All schools regardless of accreditation status must have board approval to admit additional classes during a given school year.

2.11(5) Eight copies of all above proposed changes shall be submitted to the executive director one month prior to a regular board meeting.

[Filed May 12, 1970;
amended August 11, 1970]

CHAPTER 3
LICENSURE TO PRACTICE—REGISTERED NURSE

3.1(152) Licensure by examination.

3.1(1) *Official examination.*

a. The state board test pool examination constructed by the evaluation service of the National League for Nursing shall be the official licensing examination of the Iowa board of nursing.

b. The passing score for each series of the Iowa licensing examination shall be determined by the Iowa board of nursing.

c. The Iowa certificate to practice nursing will not be issued until the final record (transcript) has been received.

d. The licensing examination shall be administered in Des Moines three times a year.

e. State board test pool examination statistics:

(1) Compiled once a year and include all graduates of all Iowa schools for the year.

(2) Identity of schools other than the one to which the report is sent is not revealed.

(3) Scores achieved by individual applicants are personal information and hence will be released only on permission of the applicant.

f. Licensed practical nurse graduating from a school preparing the registered nurse.

(1) The board shall be notified on list of eligible candidates submitted for the state board test pool examination of any candidates already licensed as a licensed practical nurse.

(2) When the candidate is issued a registered nurse license to practice nursing, his licensed practical nurse license will be put on inactive status.

3.1(2) *Application.*

a. The application form and instructions for filing are provided by the Iowa board of nursing.

b. The completed application, accompanied by the statutory fee and identification picture, shall be submitted in advance of the published deadline for the desired examination date.

c. Only a person who has filed the required application and has been notified of acceptance by the Iowa board of nursing will be permitted to write the examination.

d. Prior to the examination date each accepted applicant will be sent an admission card which shall be presented by the applicant for admission to the examination center.

3.1(3) *Qualifications.*

a. Requirements set forth in the Code must be met.

b. All requirements for graduation from an accredited school of nursing, including theory and clinical experience, must be completed before examination date.

c. Accredited school of nursing means one approved by the Iowa board of nursing or by a

similar board in another jurisdiction to prepare persons for registered nurse licensure.

d. Previous conviction of a felony does not automatically bar an individual from eligibility for licensure. In order to determine eligibility, the applicant must be reviewed by the board of nursing to determine that qualification of good moral character is met.

3.1(4) *Work permit.*

a. A work permit to practice nursing for compensation at the general staff level will be issued to new graduates of Iowa programs by the board of nursing upon receipt of proof of graduation from an approved school of nursing. A letter from the director or the official transcript shall be considered proof of graduation.

b. The work permit shall be effective on the legal finishing date.

c. The graduate must appear for the first scheduled examination following graduation unless a written valid excuse is submitted to the board of nursing.

d. A second permit may be issued to a candidate who fails no more than two areas of the examination upon application for the next scheduled examination.

e. No more than two work permits will be issued.

f. Any candidate who fails three or more areas on the examination must return his work permit to the board of nursing. No further work permit will be issued.

g. A work permit may be issued by the board of nursing to graduates of approved schools of nursing in other states who submit documentary evidence to the Iowa board of nursing that they have either applied for or written the licensing examination in that state. All of the above paragraphs ("*a*" to "*f*") apply in these cases.

h. Work permits must be signed by the permittee to be valid.

i. A holder of a work permit shall not use the title registered nurse or use the abbreviation R. N. in Iowa until his certificate is issued although he may be employed in nursing while the permit is valid.

3.1(5) *Re-examination.*

a. Any applicant who fails three or more areas of the examination shall be required to rewrite the entire examination (all five areas).

b. An applicant who fails one or two areas of the examination shall be required to write only the area or areas failed.

c. An applicant who fails to pass the Iowa licensing examination may rewrite the area or areas as above until a passing score is attained.

After the first failure, candidate may repeat the required areas of the examination without further preparation than what they wish to pursue on their own initiative.

d. Application for re-examination shall be a letter of intent accompanied by the statutory fee and identification picture. Application shall be submitted in advance of the published deadline for the desired examination date.

3.1(6) *Nurses educated in another country.*

a. Standardized tests may be used as an evaluation device.

b. If the individual was graduated in 1950, or thereafter, he must have taken the state board test pool examination and achieved at least a score of 350 in each area.

c. The transcript from the school of nursing must show theory and practice in all five areas (medical, surgical, obstetrics, nursing of children and psychiatric nursing) if required in Iowa at the time of his graduation.

d. The board will accept midwifery in lieu of obstetrical nursing.

e. The candidate will be required to enroll in an approved school of nursing to make up deficiencies.

f. Individuals writing the state board test pool examination will follow the same schedule as other first time candidates.

3.2(152) Licensure without examination by interstate endorsement.

3.2(1) *Application.*

a. The application form and instructions for filing are provided by the Iowa board of nursing.

b. The completed application accompanied by the statutory fee and proof of licensure elsewhere shall be filed with the Iowa board of nursing.

3.2(2) *Qualifications.*

a. Applicants for licensure in Iowa as a registered nurse must meet the qualifications for licensure in effect at the time of their graduation from their school of nursing.

b. A person licensed as a registered nurse in another United States jurisdiction by waiver shall be accepted for Iowa licensure only if the waiver period corresponds to that in Iowa.

c. An applicant must have written the same licensing examination as that administered in Iowa and achieved scores established as passing for that series by the Iowa board of nursing unless he graduated and was licensed by examination prior to September, 1946.

d. An applicant whose licensing examination scores do not meet the Iowa requirements shall rewrite the current Iowa examination in order to raise his scores to meet Iowa standards.

e. A registered nurse who is based and currently licensed in another state does not need an Iowa license to perform consultant services in Iowa.

f. High school equivalency shall be the high school equivalency certificate issued by the state department of public instruction.

3.2(3) *Work permit.*

a. A work permit to practice nursing in Iowa for a period up to 30 days shall be issued by the Iowa board of nursing to an applicant who is a graduate of an approved United States school of nursing and is licensed by examination in another United States jurisdiction upon submission of the current, valid license from another state or completed endorsement form.

b. Such permit allows employment in nursing in Iowa while application credentials are being assembled and Iowa certificate issued. The work permit does not entitle the individual to use the abbreviation R.N. or the title registered nurse.

c. If the permit expires and the certificate has not been issued, a second permit may be issued for a period not to exceed 15 days.

d. A work permit shall not be issued to an applicant educated in a foreign country until all credentials are on file and eligibility for licensure has been determined.

3.3(147) Annual renewal.

3.3(1) The application form and instructions for renewal of license to practice nursing as a registered nurse will be mailed to the licensee at least 90 days prior to expiration of his license.

3.3(2) In order for a change of name to appear on the renewal license, the board of nursing must be notified. Name can be changed by:

a. Submitting marriage certificate, or

b. Submitting notarized change of name card supplied by the board of nursing.

3.3(3) An applicant for renewal of license, except if on inactive status, shall pay the statutory penalty fee plus the statutory renewal fee if the application for renewal is postmarked after June 30.

3.4(147) Reinstatement.

3.4(1) A delinquent letter will be sent each year after July 1 to those licensees who fail to renew their license or fail to ask for inactive status.

3.4(2) Licensees who fail to notify the board of nursing of change of address as provided by statute shall pay statutory reinstatement fees.

3.5(147) Enforcement—discipline of licensees.

3.5(1) All complaints regarding licensees or those purporting to be registered nurses shall be investigated by the staff or inspector of the board of nursing.

3.5(2) In investigating such complaints the licensee may be asked to appear at a board meeting for consultation by board members.

3.5(3) The board may accept the voluntary surrender of a license.

3.5(4) Any person whose license has been revoked or suspended may apply to the board for reinstatement at any time. Upon submission of documentary evidence of rehabilitation of the licensee, the board may reinstate the license or remove the license from suspension. The board may impose reasonable terms and conditions in conjunction with such action.

3.5(5) An Iowa license to practice nursing as a registered nurse will not be issued by endorsement to an individual whose license to practice is under revocation, suspension, or, if applicable, probation, in another state.

[Filed May 12, 1970]

CHAPTER 4
LICENSURE TO PRACTICE—LICENSED PRACTICAL NURSE

4.1(152) Licensure by examination.

4.1(1) *Official examination.*

a. The state board test pool examination constructed by the evaluation service of the National League for Nursing shall be the official licensing examination of the Iowa board of nursing.

b. The passing score for the Iowa licensing examination shall be determined by the Iowa board of nursing.

c. The Iowa certificate to practice nursing will not be issued until the final record (transcript) has been received.

d. The licensing examination shall be administered in Des Moines twice a year.

e. State board test pool examination statistics:

(1) Compiled once a year and include all graduates of all Iowa schools for the year.

(2) Identity of schools other than the one to which the report is sent is not revealed.

(3) Scores achieved by individual applicants are personal information and hence will be released only on permission of the applicant.

f. The board shall be notified when an individual licensed by waiver as a licensed practical nurse enrolls in a practical nurse program. Upon successful completion of the program, the status of the individual's license will be changed to graduate of an approved program. The state board test pool examination need not be repeated.

4.1(2) *Application.*

a. The application form and instructions for filing are provided by the Iowa board of nursing.

b. The completed application, accompanied by the statutory fee and identification picture, shall be submitted in advance of the published deadline for the desired examination date.

c. Only a person who has filed the required application and been notified of acceptance by the Iowa board of nursing will be permitted to write the examination.

d. Prior to the examination date each accepted applicant will be sent an admission card which shall be presented by the applicant for admission to the examination center.

e. Those individuals who apply for the licensing examination by virtue of one year in a school preparing registered nurses must submit an official transcript for review to determine eligibility.

f. Nursing content required for a licensed practical nurse shall include successful completion of theory and clinical experience in four basic areas, i.e. medical nursing, surgical nursing, obstetric nursing and nursing of children.

g. An individual who does not meet requirements may enroll in an approved school of practical nursing with advanced standing and complete the program in practical nursing.

4.1(3) *Qualifications.*

a. Requirements set forth in the Code must be met.

b. All requirements for graduation from an accredited school of practical nursing, including theory and clinical experience, must be completed before examination date.

c. Accredited school of practical nursing means one approved by the Iowa board of nursing or by a similar board in another jurisdiction to prepare persons for practical nurse licensure.

d. Previous conviction of a felony does not automatically bar an individual from eligibility for licensure. In order to determine eligibility, the applicant must be reviewed by the board of nursing to determine that qualification of good moral character is met.

4.1(4) *Work permit.*

a. A work permit to practice practical nursing for compensation will be issued by the board of nursing upon receipt of proof of graduation from an approved school of practical nursing.

(1) A letter from the co-ordinator or the official transcript will be considered proof of graduation.

(2) The work permit shall be effective on the legal finishing date.

(3) The graduate must appear for the first scheduled examination following graduation unless a written valid excuse is submitted to the board of nursing.

(4) A permit will be reissued once in the event of failure on the licensing examination upon application for the next scheduled examination.

b. A work permit to practice practical nursing for compensation may be issued by the board to graduates of approved schools of practical nursing in other states who submit documentary evidence to the board that they have either applied for or written the licensing examination in that state, provided the applicant meets all requirements for licensure as a practical nurse in this state. All of the above [paragraph "*a*", subparagraphs (1) to (4)] apply to these cases.

c. Those candidates who qualify for the licensing examination by virtue of previous enrollment in a school preparing registered nurses are not eligible for a work permit.

d. A holder of a work permit shall not use the title licensed practical nurse or use the abbreviation L.P.N. in Iowa until his certificate is issued although he may be employed in practical nursing while the permit is valid.

4.1(5) *Re-examination.*

a. An applicant who fails to pass the Iowa licensing examination may rewrite the examination until a passing score is attained.

After the first failure, candidates may repeat the examination without further preparation other than what they wish to pursue on their own initiative.

b. Application for re-examination shall be a letter of intent accompanied by the statutory fee and identification picture. Application shall be submitted in advance of the published deadline for the desired examination date.

4.1(6) *Nurses educated in another country.* If the applicant for licensure in Iowa does not meet the requirements for licensure as a registered nurse, he may apply for the practical nurse licensing examination provided qualifications 4.2(2) "*e*" and "*f*" are met.

4.2(152) Licensure without examination by interstate endorsement.

4.2(1) *Application.*

a. The application form and instructions for filing are provided by the Iowa board of nursing.

b. The completed application accompanied by the statutory fee and proof of licensure elsewhere shall be filed with the Iowa board of nursing.

c. A work permit or license to practice as a licensed practical nurse shall be received by the applicant from the Iowa board of nursing prior to employment.

4.2(2) *Qualifications.*

a. Applicants for licensure in Iowa as a licensed practical nurse must meet the qualifications for licensure in effect at the time of their graduation from their school of nursing.

b. A person licensed as a licensed practical nurse in another United States jurisdiction by waiver shall be accepted for Iowa licensure only if the waiver period corresponds to that in Iowa.

c. An applicant must have written the same licensing examination as that administered in Iowa and achieved score established as passing for that examination by the Iowa board of nursing unless he graduated and was licensed by examination prior to July 1951.

d. An applicant whose licensing examination score does not meet the Iowa requirements shall rewrite the current Iowa examination in order to raise his scores to meet Iowa standards.

e. Tenth grade equivalency shall be determined by the general educational development test. A standard score of not less than 35 on each

test or an average standard score of 45 or above on the five tests will be accepted.

f. High school equivalency shall be the high school equivalency certificate issued by the state department of public instruction.

4.2(3) *Work permit.*

a. A work permit for the practice of practical nursing in Iowa for a period up to 30 days shall be issued by the Iowa board of nursing to an applicant who is a graduate of an approved United States school of nursing and is licensed by examination in another United States jurisdiction upon submission of the current, valid license from another state or completed endorsement form.

b. Such permit allows employment in practical nursing in Iowa while application credentials are being assembled and Iowa certificate issued. The work permit does not entitle the individual to use the abbreviation L.P.N. or the title licensed practical nurse.

c. If the permit expires and the certificate has not been issued, a second permit may be issued for a period not to exceed 15 days.

4.3(147) Annual renewal.

4.3(1) The application form and instructions for renewal of license to practice nursing as a licensed practical nurse will be mailed to the licensee at least 90 days prior to expiration of his license.

4.3(2) In order for a change of name to appear on the renewal license, the board of nursing must be notified. Name can be changed by:

a. Submitting marriage certificate, or

b. Submitting notarized change of name card supplied by the board of nursing.

4.4(147) Reinstatement.

4.4(1) A delinquent letter will be sent each year after July 1 to those licensees who fail to renew their license or fail to ask for inactive status.

4.4(2) Licensees who fail to notify the board of nursing of change of address as provided by statute shall pay statutory reinstatement fees.

4.5(147) Enforcement—discipline of licensees.

4.5(1) All complaints regarding licensees or those purporting to be licensed practical nurses shall be investigated by the staff or inspector of the board of nursing.

4.5(2) In investigating such complaints the licensee may be asked to appear at a board meeting for consultation by board members.

4.5(3) The board may accept the voluntary surrender of a license.

4.5(4) Any person whose license has been revoked or suspended may apply to the board for reinstatement at any time. Upon submission of documentary evidence of rehabilitation of the licensee, the board may reinstate the license or remove the license from suspension. The board may impose reasonable terms and conditions in conjunction with such action.

4.5(5) An Iowa license to practice nursing as a licensed practical nurse will not be issued by endorsement to an individual whose license to practice is under revocation, suspension, or, if applicable, probation, in another state.

[Filed May 12, 1970;
amended August 11, 1970]

NURSING HOME ADMINISTRATORS BOARD OF EXAMINERS

CHAPTER 1
LICENSURE OF NURSING HOME ADMINISTRATORS

1.1(147) Definitions. For the purpose of these rules the definitions set out in section 147.118 shall be considered to be incorporated verbatim in these rules, except it shall not include adult foster homes, boarding homes and custodial homes as defined in section 135C.1.

1.2(147) Minimum qualifications for licensure as a nursing home administrator.

1.2(1) *Personal qualifications of applicants.*

a. Applicant must be not less than 21 years of age at the time his application is filed.

b. Each applicant must establish to the satisfaction of the board of examiners for nursing home administrators that he is of reputable and responsible character.

c. Each applicant must establish to the satisfaction of the board of examiners for nursing home administrators that he is in sound physical and mental health.

1.2(2) *Education qualifications of applicants.*

a. High school or equivalent education. Each applicant must establish to the satisfaction of the board of examiners for nursing home administrators that he is a graduate of a high school accredited at the time of his graduation by the state department of public instruction or its equivalent of the state in which said high school is located; or that he has achieved a passing score on the general education and development examination as may be recognized as the equivalent of high school graduation by the state department of public instruction of the state in which the examination was completed. The educational requirement of high school graduation or equivalent will be waived for

all applicants who fulfill the experience requirement for a temporary license as provided in section 4 of chapter 1085, Acts of the Second Session of the 63rd General Assembly. [147.120 of the Code]

b. Health care education.

(1) Each applicant must establish to the satisfaction of the board of examiners for nursing home administrators that he has successfully completed the academic and training program in nursing home administration prescribed, adopted and required by the board.

(2) Applicants prior to July 1, 1977 may fulfill the educational requirements by one year or more of employment as a health care administrator or an assistant and by showing evidence of satisfactory completion of at least one year of a course of study leading to a degree in health care administration, or its equivalent as determined by the board of examiners for nursing home administrators.

(3) The curriculum of the program in long term health care administration offered by the area community colleges, under the Iowa state department of public instruction, with an applied arts degree or its equivalent as determined by the board of examiners for nursing home administrators shall be the minimum education requirement for all new applicants as of July 1, 1977.

c. Examination. Each applicant shall be required to pass a written examination in the nursing home administration subjects listed in 1.6(2) "*b*" in these rules and may at the board of examiners for nursing home administrators discretion be required to pass an oral examination.

1.2(3) *Experience.*

a. Any person who, on date of July 1, 1970, has actually served as a health care administrator at least two years preceding such date, shall have satisfied the experience requirements.

b. One year of full-time paid employment as an administrative assistant in a licensed health care facility under the supervision of a licensed nursing home administrator subsequent to July 1, 1970 shall fulfill the experience requirements.

c. The experience requirement will be fulfilled by any individual who has successfully completed a course of study for a degree in a health care administration field. This degree, acceptable to the board of examiners for nursing home administrators, from an accredited institution must include an approved internship or its equivalent as determined by the board.

1.3(147) Application for licensure as a nursing home administrator.

1.3(1) Each applicant for licensure as a nursing home administrator shall make a verified application therefor on a form furnished by the board of examiners for nursing home administrators. The application and supporting data and documents as may be required by the board of examiners for nursing home administrators must be completed and on file at least 30 days prior to the announced licensure examination date. Each applicant found to be eligible for the examination will be notified by letter to the address shown on his application, of eligibility for, and of the time and place of the examination, at least five days prior to the examination date.

1.3(2) An examination fee of $25 will be required for each written examination.

1.3(3) Each applicant who is otherwise qualified and has passed the approved written examination, and oral examination if requested by the board of examiners for nursing home administrators, will be notified of his eligibility for licensure.

1.3(4) Each applicant who fails the examination or who otherwise fails to meet the minimum score may apply for re-examination at the next examination scheduled by the board of examiners for nursing home administrators.

1.3(5) Application forms are available from the Iowa state department of health, and license fees and examination fees are sent to: Iowa State Board of Examiners for Nursing Home Administrators, Iowa State Department of Health, Lucas State Office Building, Des Moines, Iowa 50319.

1.4(147) Licensure expiration, renewal, denial, revocation and suspension.

1.4(1) *Renewal of license.*

a. Each applicant for a renewal of a license shall file a renewal application on a form as prescribed by the board of examiners for nursing home administrators and shall provide such evidence of his ability and competence and evidence of continued education required by the board to continue as a licensed nursing home administrator.

b. Each applicant for the renewal of a license shall file his application at least 45 days prior to the expiration date on his current license.

1.4(2) The board of examiners for nursing home administrators may deny an initial application, renewal application or may suspend or revoke a nursing home administrator license for the following:

a. The obtaining or attempting to obtain a license by fraud or deceit.

b. Conviction of a crime involving moral turpitude, a felony, or a crime involving violation of any narcotic or drug control law. The record of a conviction, or a copy thereof certified by the clerk of the court or by the judge in whose court the conviction is entered, is conclusive evidence of the conviction.

c. Habitual intoxication or addiction to the use of drugs.

d. Commitment to a mental institution or judicial determination of incompetence.

e. Gross negligence, fraud, dishonesty, malfeasance, cheating in the management of a nursing home or other conduct unbecoming to a person licensed or subject to licensure under this law when in the judgment of the board of examiners for nursing home administrators such conduct is detrimental to the best interest of the nursing home profession and the public.

1.5(147) License fees.

1.5(1) The fee for a license issued by examination is $30.

1.5(2) The fee for a license issued by reciprocity is $30.

1.5(3) The fee for a temporary license is $30 except that the fee for a temporary license for the period from July 1, 1970 until December 31, 1970 is $20.

1.5(4) The fee for renewal of all licenses will be $30 per year payable on or before December 13 of each calendar year.

1.6(147) Requirement for licensure.

1.6(1) As of the effective date of chapter 1085, Acts of the Second Session of the 63rd General Assembly, July 1, 1970, all persons acting or serving in the capacity of a nursing home administrator shall hold a nursing home administrator license issued by the board of examiners for nursing home administrators except as provided in section 147.126(3).

1.6(2) *Examinations.*

a. Applications, properly completed, shall be filed with the board at their official address: Iowa State Board of Examiners for Nursing Home Administrators, State Department of Health, Lucas State Office Building, Des Moines, Iowa 50319.

b. Following is a listing of the subjects to be tested:

(1) Environmental health and safety.

(2) General administration.

(3) Patient care.

(4) Departmental organization and management.

(5) Community inter-relationships.

(6) Basic terminology.

c. A general average of no less than 60 percent of correct answers shall be considered to constitute a passing grade. Persons failing the examination shall retake the sections of the examination in which a score of less than 60 percent is received without additional fee upon evidence filed substantiating continued study in the sections failed.

d. Any applicant failing the examination who wishes to take a second partial examination on the sections failed must take such examination within one year.

e. Any applicant detected seeking or giving help while writing the examination will be dismissed and his paper collected. He may return for examination within one year upon reapplication.

1.6(3) *Provisional administrator.* In the event an existing nursing home loses the service of its licensed administrator, and the home is unable to secure another licensed administrator, an unlicensed person may be employed as a provisional administrator for a period not to exceed six months except as provided in section 147.126(3). The provisional administrator shall apply to the board of examiners for nursing home administrators for a provisional letter within 15 days of his appointment. This application shall be made on the regular application form furnished by the board of examiners for nursing home administrators and accompanied by a fee of $30 for the examination of credentials. On or before the expiration of six months a licensed nursing home administrator must be employed. During this six-month period the provisional administrator may prepare for licensing if he meets the qualifications of these rules and section 147.120. In the event a nursing home cannot secure a licensed nursing home administrator, the owner or governing body may, in consultation with the board of examiners for nursing home administrators have a licensed nursing home administrator appointed until the owner or governing body can secure one.

1.6(4) *Notice and hearing.*

a. Any proposed action by the board of examiners for nursing home administrators, denying, refusing to renew, suspending, or revoking a license, shall be communicated to the applicant by certified mail and addressed to his last known place of business or residency at least 15 days in advance of the proposed action of the board.

b. Any applicant or licensee aggrieved by an action of the board of examiners for nursing home administrators respecting his application for licensure, renewal of same, or proposed suspension or revocation may within 15 days of the receipt of notice of the action or proposed action of the board, request a hearing by the board.

(1) The board of examiners for nursing home administrators will set a date, time and place for the hearing and the secretary will inform the aggrieved by certified mail, addressed to his last known business or residence address, of the scheduling of such hearing at least ten days in advance of the date set for same.

(2) The hearing may be before the board of examiners for nursing home administrators or any member or members of the board designated by the chairman to take testimony and conduct the hearing.

(3) A full and complete record shall be kept of all proceedings. A report, in whole or in summary, together with any exhibits produced, shall be furnished to the board of examiners for nursing home administrators at its next regular or special meeting.

(4) The applicant or licensee and his attorney, together with witnesses, may be present to testify and present evidence at the hearing.

(5) The applicant or licensee and his attorney may be present when the hearing reports and findings are presented to the board of examiners for nursing home administrators at its next regular or special meeting and shall be given an opportunity to sum up their position and present arguments before the board.

(6) All actions of the board of examiners for nursing home administrators shall be final but the aggrieved applicant or licensee may appeal the action of the board to the district court for review.

c. The board of examiners for nursing home administrators shall take appropriate action with respect to any verified charge or complaint to the effect that any individual licensed as a nursing home administrator has failed to comply with the requirements of the Act relating to the licensure and registration of nursing home administrators or these rules.

1.7(147) Reciprocity.

1.7(1) All applicants for licensure to practice as a nursing home administrator in the state of Iowa who hold a currently valid license, issued by examination in another state, may make application for license by reciprocity with the board of examiners for nursing home administrators providing the other state holds a reciprocal agreement with Iowa. All applications shall be considered on each individual's own merits.

1.7(2) A license to practice as a nursing home administrator shall be granted by the board of examiners for nursing home administrators without examination or by as much examination as may be required by the board to establish the proficiency of each applicant.

1.7(3) Upon being granted a license to practice nursing home administration, an Iowa licensee shall thereafter comply with all rules for continuing licensure of nursing home administration in Iowa.

1.7(4) All applications for reciprocity shall be made on the official forms supplied by the Iowa state board of examiners for nursing home administrators. The secretary shall mail the official application forms as requests are received.

These rules are intended to implement section 147.121 of the Code.

[Filed February 23, 1971]

PHARMACY EXAMINERS

CHAPTER 1
LICENSURE

1.1(147) Licensure examination dates. The board of pharmacy examiners shall fix the dates for the examination both in Des Moines and Iowa City and applications must be presented to the board at least ten days before the dates set for the examination.

1.2(147) Examination fee. The fee for examination shall be $25 and is to accompany the application.

1.3(147) Unmounted photograph. The application for examination shall be accompanied by an unmounted photograph of a size approved by the board.

1.4(147) Notarized statement. The application for examination shall be made as a sworn statement.

1.5(147) Re-examination applications. Each applicant for re-examination shall make request for such re-examination on proper forms, to be provided by the board, and the request for such re-examination shall become a part of the official files.

1.6(147) Records preserved. All applications, with necessary statements or requests for re-examination, together with the actual written examination, shall be preserved in the files of the board of pharmacy examiners.

1.7(147) Grading examinations.

1.7(1) A passing grade shall be considered a general average of not less than 75 percent and no grade in any subject shall be less than 60 percent, except that a grade of 75 percent is required on the practical examination.

1.7(2) Failure in one or more subjects shall require the applicant to take another examination in all subjects.

1.7(3) Any applicant for a license who fails in his examination shall be entitled to a second examination without further fee at any time within a period of 14 months after the first examination.

1.8(147) Date of notice. Grades and certificates shall be mailed to each new registrant as soon after the examination as possible.

1.9(155) Internship requirements. Each applicant must furnish to the board an employing pharmacist's affidavit giving complete information covering internship experience in a pharmacy. Said experience must comply with the "Minimum Standards for Evaluating Practical Experience", as set forth in chapter 3 of these rules. Practical experience must be acquired after successfully completing not less than one year of prepharmacy training and no experience will be allowed while in actual attendance at college.

1.10(155) Internship after graduation. Any person making application to the pharmacy board to be licensed by examination after January 1, 1963, must have completed one year of internship, as defined in chapter 3 of these rules, at least three months of which must be acquired after graduation from an approved college of pharmacy. Any internship on file in the office of the pharmacy examiners prior to January 1, 1963, will be required to meet the administrative rules relative to internship requirements in force on that date.

1.11(155) College graduate certification. Each applicant shall furnish a certificate from a recognized college of pharmacy stating that he has successfully graduated from a school or college of pharmacy offering a minimum five-year course graduating with a bachelor of science degree in pharmacy.

1.12(155) Application for examination—requirements. On each application for examination, the applicant must state his correct age; place of birth; name and location of high school and date of graduation; citizenship, and pharmaceutical experience under a registered pharmacist.

1.13(155) Examination subjects.

1.13(1) Written examinations shall be given in the following subjects: Pharmacy, pharmacology and toxicology, chemistry, pharmaceutical and chemistry calculations.

1.13(2) Practical examination shall consist of an examination of prescription laboratory techniques.

1.13(3) An oral examination shall be given to each applicant before the issuance of any license to practice pharmacy.

These rules are intended to implement chapters 147 and 155 of the Code.

[Filed April 11, 1968]

CHAPTER 2
PHARMACY BUSINESS LICENSES

2.1(155) Pharmacy business license requirements.

2.1(1) Each person must be not less than 21 years of age.

2.1(2) Each person must be of good moral character.

This rule is intended to implement 155.12.

2.2(155) Change of residence and sanitation requirements.

2.2(1) Each pharmacy shall be provided with adequate lighting.

2.2(2) Storage areas, restrooms, basement and all other areas in the pharmacy shall be kept in a thoroughly clean condition.

2.2(3) Every employer must notify the board of pharmacy examiners of any change of address of his pharmacist.

This rule is intended to implement 155.17.

2.3(155) Reference library and prescription equipment.

2.3(1) The following shall be deemed as minimum reference material required of a pharmacy.

a. The latest edition and supplements to the United States Pharmacopeia.

b. The latest edition and supplements to the National Formulary.

c. Up-to-date reference work on recent prescription drugs such as Facts and Comparisons or Modern Drug Encyclopedia.

d. Copies or summaries of federal, state and local laws governing the practice of pharmacy.

e. An antidote chart—telephone number of the nearest poison control center.

This rule is intended to implement 155.18

2.3(2) The following shall be considered necessary equipment for the proper compounding and dispensing of drugs and medicines.

a. Class A prescription balance sensitive to 10 mg.

b. Weights—metric and apothecary—complete set.

c. Graduates capable of accurately measuring from 1 ml. to 250 ml. (15 minims to 8 fluid ounces.)

d. Mortars and pestles—glass, porcelain, or wedgewood.

e. Spatulas—steel and nonmetallic.

f. Filtration funnel with filter papers.

g. A heating unit.

h. Suitable refrigeration unit for proper storage of biologicals and other pharmaceuticals.

i. Ointment slab or ointment paper or equivalent.

j. Exempt narcotic and poison register.

k. Glass stirring rods and indicator paper.

l. Powder papers, parchment or wax.

This rule is intended to implement 155.18.

2.4(155) Prescription compounding and dispensing area.

2.4(1) Minimum area or space, where prescriptions are dispensed or compounded, shall be no less than 50 square feet. Active and reserve storage area shall be double the dispensing and compounding space or larger as needed to meet the requirement of the pharmacy.

2.4(2) The prescription dispensing and compounding area shall be in open view and clearly identified.

This rule is intended to implement 155.17.

2.5(155) Prescription identification.

2.5(1) All prescriptions shall be dated and numbered by the pharmacist at the time of filling and dated at the time of refilling.

2.5(2) The original prescription must be retained by the pharmacy filling the prescription, excepting in governmental or compensational prescriptions in which case a copy or a record must be retained.

2.5(3) All medication dispensed on a prescription shall be in a clean container and have a clean legible label.

2.5(4) No pharmacist shall fill, and no pharmacy shall permit the filling of, a copy of a prescription.

2.5(5) Every reference copy of a prescription shall bear the following statement—"This prescription copy is issued for medical practitioner reference only."

This rule is intended to implement 155.3.

2.6(155) Return of drugs and appliances. For the protection of the public health and safety, no prescription drugs of any description or items of personal contact nature which have been removed from the original package or container after sale, shall be accepted for return, exchanged or resold by any pharmacist.

This rule is intended to implement 155.3.

2.7(155) Pharmacist temporary absence. In case of the temporary absence of the pharmacist, or the temporary absence of the pharmacist while fulfilling the pharmaceutical services in a local hospital or other health care institution, the pharmacy must display a card or sign which can be read from the front of the pharmacy "PHARMACIST TEMPORARILY ABSENT. NO PRESCRIPTIONS WILL BE FILLED UNTIL HIS RETURN". Letters not less than 1¾ inches high.

This rule is intended to implement 155.3.

[Filed May 16, 1967]

CHAPTER 3
MINIMUM STANDARDS FOR EVALUATING PRACTICAL EXPERIENCE

3.1(155) Internship. These regulations are for the purpose of defining and regulating the practical experience requirements of prospective pharmacists as provided by Iowa statute, chapter 155.

3.2(155) Effective date. These regulations shall take effect immediately after filing with the secretary of state, but the provision contained herein shall not nullify any period of internship experience by any individual previous to its adoption provided such period of internship is filed in a proper manner with the secretary of the board of pharmacy.

This rule is intended to implement 155.6.

3.3(155) Definitions. As used herein the following terms are defined.

3.3(1) "Pharmacist intern" or "intern" means a person registered by the state board of pharmacy for the purpose of obtaining instructions in the practice of pharmacy from a pharmacist preceptor licensed in this state pursuant to the practical experience requirements of the Code. The board may register, as an intern, any person who has satisfied the board that he is of good moral character, and, who has successfully completed not less than one year of prepharmacy training and who has been accepted for admission to a college of pharmacy recognized and approved by the board.

3.3(2) "Year of practical experience in pharmacy" means 52 work weeks of not less than 40 hours per week of internship training acquired under the supervision of a preceptor, not concurrent with undergraduate academic work other than established vacation periods.

3.3(3) "Preceptor" means a person licensed as a pharmacist by the state board of pharmacy, or by a duly constituted licensing agency of any state.

a. Each preceptor shall have been actively engaged in full-time practice of pharmacy for at least two years.

b. Each preceptor shall be a graduate of a recognized college of pharmacy.

c. Each preceptor shall subscribe to the principles of the Code of Ethics of the American Pharmaceutical Association.

d. Each preceptor shall attend or participate in at least one professional continuing educational meeting, seminar, or correspondence course, recognized by the board, each year.

e. The pharmacy in which a preceptor is practicing, must fill at least 6,000 prescriptions annually and have a grade of "A" as defined in the board's inspection and rating report and must be operated in a professional manner.

3.3(4) "In a professioanl manner," as used in connection with these regulations means being operated within federal, state, and local laws. Any pharmacist found to be in violation of the law, or operating his pharmacy in other than a clean and orderly manner, is not operating in a "professional manner" and, therefore, is not eligible for certification as a preceptor.

This rule is intended to implement 155.6.

3.4(155) Interns shall not be left in charge of a pharmacy at any time when direct personal supervision of a pharmacist is required. Violation of this rule will result in citation of the intern and pharmacist involved, before the board, for such action as the board may desire after a proper hearing.

This rule is intended to implement 155.6.

3.5(155) Registration and reporting.

3.5(1) Every person shall register before beginning his internship. Registration shall re-

main in effect during successive training periods if progress reports, and other required records and affidavits prescribed by the board are executed promptly upon beginning or terminating employment and if the board is satisfied that the registrant is in good faith and with reasonable diligence pursuing a degree in pharmacy.

3.5(2) Credit for internship time will not be granted unless registration, progress reports, and other required records and affidavits of experience for preceding time are completed.

a. The pharmacist-intern shall be so designated in his professional relationships, and shall not falsely assume to be a pharmacist. The board shall upon proper registration issue to the intern a pocket registration card for purposes of identification and verification of his role as an intern.

b. All registered interns shall notify the board immediately upon change of employment or mailing address.

c. The intern shall maintain additional records of his professional activities. Such records are to be prescribed by the board for the purpose of recording details of the scope of internship experience, and are to be submitted not less than quarterly during the internship year. Quarterly progress reports and other required records must be filed in the office of the board not later than 30 days following completion date of each quarter.

3.5(3) No credit shall be given for experience prior to registration as an intern, except that credit may be granted for experience obtained while employed as an intern or pharmacist in another state if properly documented.

This rule is intended to implement 155.6.

3.6(155) Training requirements.

3.6(1) The intent of these regulations is to provide a proper preceptor-intern (teacher-student) relationship within the context of the employer-employee relationship, provide a broad base of internship experience and to supplement academic training in a manner which prepares the intern for all aspects of the practice of pharmacy.

3.6(2) Nothing in these regulations shall imply that the standards described herein are intended to change reciprocal agreements with other states.

3.6(3) When an intern desires to obtain credit for training received in a state other than Iowa, he shall abide by all the provisions of these regulations. Where a possible conflict may exist between the provisions of this rule and the requirements of the state in which the intern is training, the intern shall contact the secretary of the board of pharmacy and outline any possible problem.

3.6(4) No more than one intern shall be trained by a preceptor at one time.

3.6(5) Upon registration and payment of two dollars, interns will be furnished all progress reporting forms and such other records prescribed by the board. Interns and preceptors will be furnished a copy of the "PHARMACY PRECEPTOR'S GUIDE" sponsored by the National Association of Boards of Pharmacy and the American Association of Colleges of Pharmacy. The guide is furnished to suggest appropriate types, scope and order of training experiences. It is not intended to be restrictive in the method of instruction, but shall be used as a guide to insure that the intern's practical experiences are commensurate with his educational level, and that his total experience will be broad in scope.

This rule is intended to implement 155.6.

3.7(155) Practical experience in armed forces. No more than six months of practical experience acquired while engaged in pharmaceutical pursuits in the armed forces will be accepted toward the one year prerequisite. Said experience must be substantiated by a notarized affidavit signed by a duly licensed pharmacist under whose supervision the applicant has served and must comply with the minimum standards of evaluating apprentice training.

This rule is intended to implement 155.6.

[Filed July 19, 1967]

CHAPTER 4
FEES FOR DUPLICATE LICENSES AND CERTIFICATION OF GRADES

4.1(147) Fees. Duplicate certificates for registered pharmacists may be issued for a fee of two dollars each.

4.2(147) Duplicate annual renewals. Duplicate annual renewals may be issued by the board of pharmacy examiners without charge.

4.3(147) Fee—certification of grades. Certification of grades shall be made upon payment of a ten dollar fee.

4.4(155) Duplicate wholesale narcotic license. Upon a showing of loss or destruction of the original, a duplicate wholesale narcotic license may be issued by the board of pharmacy examiners without a fee.

These rules are intended to implement chapters 147 and 155 of the Code.

[Filed April 11, 1968;amended September 29, 1971]

CHAPTER 5
RECIPROCAL REGISTRATION

5.1(147) Originates from state of registration by examinations. The applicant must be a registered pharmacist by examination in some state of the United States with which Iowa has a reciprocal agreement, and must be in good standing at the time he makes application.

5.2(147) Educational requirements. If the applicant was licensed prior to July 1, 1917,

the applicant must make affidavit to at least four years of experience under the supervision of a registered pharmacist before registration. After July 1, 1917, affidavit must be made to at least two years experience and two years completed work in a recognized college of pharmacy or three years of college work and one year experience. No experience that was gained while attending a school or college of pharmacy will be accepted. A certified copy of college work from the dean of a college or, a certified copy of an affidavit from the secretary of the board of the state from which the applicant applies relating to experience as an apprentice or assistant, must be furnished to the Iowa board of pharmacy examiners. Any pharmacist registered as an apprentice or assistant prior to October 1, 1917, and licensed before July 1, 1924, may be exempted from the college requirement.

5.3(147) Examination eligibility. Applicant must have been eligible to take the examination for a pharmacist in the state from which reciprocal licensure is sought. If he was not qualified to take the Iowa examination at that time, he would not be eligible for reciprocal registration.

5.4(147) Minimum grade requirement and practice after licensure. He must have passed the board in the state from which reciprocal licensure is sought with a general average of 75 percent and not have been below 60 percent in any one subject. He must have practiced pharmacy in the state from which reciprocal licensure is sought for at least one year subsequent to his registration there, or pass an oral and practical examination prescribed by the Iowa board of pharmacy examiners.

5.5(147) Examination failure. An application for reciprocal registration will not be considered if the applicant has at one time taken the Iowa examination for pharmacists and has failed to pass the same.

5.6(147) Reciprocity fee. The fee for reciprocal registration is $50, which must accompany the application. The fee is returned if the application is denied.

5.7(147) Oral examination. Reciprocal registration will not be granted until the application is approved by all members of the pharmacy board in regular session and after the applicant has made a personal appearance before the entire board, showing proof of qualifications, and has passed a satisfactory oral examination on the Iowa pharmacy laws.

5.8(147) Character vouchers. Applicant must file an unmounted photograph bearing his signature as well as the signatures of the two registered pharmacists who sign the character vouchers included in the official application obtained from the National Association of Boards of Pharmacy.

5.9(147) Necessary credentials. The application blank together with the photo and all other necessary credentials must be filed with the secretary of the Iowa Pharmacy Examiners, Statehouse, Des Moines, Iowa.

5.10(147) Fiscal registration. No additional collection of registration fees shall be made for the balance of the fiscal year in which the applicant has been declared fully registered by reciprocity by the pharmacy examiners.

These rules are intended to implement chapters 147 and 155 of the Code.

[Filed April 11, 1968]

CHAPTER 6
MINIMUM STANDARDS FOR THE PRACTICE OF PHARMACY

6.1(155) Authorized person. For the purpose of section 155.6, the phrase "fill the prescriptions" shall be deemed to include the following:

6.1(1) Read and interpret the prescription of a duly licensed medical practitioner, whether transmitted to the pharmacist by writing or orally.

6.1(2) Accurately measure, or compound, ingredients specified by the medical practitioner.

6.1(3) Read and interpret, and write, adequate label directions as are necessary to assure the patient's understanding of the prescriber's intentions.

6.1(4) Affix label in, or to the container containing the medication, prescribed for the patient.

6.2(155) Mechanical devices. Except for printed or typewritten instructions on labels and simple counting and weighing tools, no mechanical device shall be used to perform the functions contained in 6.1(1), 6.1(2), 6.1(3) and 6.1(4).

These rules are intended to implement chapter 155 of the Code.

[Filed April 11, 1968]

CHAPTER 7
ITINERANT VENDORS

7.1(203) Upon a showing of loss or destruction of the original, a duplicate vendor's license may be issued by the board of pharmacy examiners for a fee of one dollar each.

7.2(203) Itinerant vendor's licenses shall be issued for a period of no less than one year.

These rules are intended to implement chapter 203 of the Code.

[Filed April 11, 1968]

CHAPTER 8
CONTROLLED SUBSTANCES
(Drugs)

8.1(204) Drug control program administrator. For the purpose of carrying out the regulatory provisions of chapter 204 of the Code, the secretary of the board of pharmacy shall serve as a "drug control program administrator".

8.2(204) Who must register. Manufacturers, distributors, individual practitioners (M.D., D.O., D.D.S., D.V.M., pharmacy, resident physician), institutional practitioners (hospital) health care institutions (nursing, custodial and county homes), research and analytical laboratories, and teaching institutions shall register on forms provided by the office of the drug control program administrator.

8.3(204) Registration and re-registration fee. For each registration or re-registration to manufacture, distribute, dispense, conduct research or instructional activities with controlled substances listed in schedules I through V of chapter 204 of the Code, the registrant shall pay a fee of five dollars.

8.3(1) *Time and method of payment.* Registration and re-registration fees shall be paid at the time when the application for registration or re-registration is submitted for filing. Payment should be made in the form of a personal, certified or cashier's check or money order made payable to Treasurer, State of Iowa. Payments made in the form of stamps, foreign currency or third party endorsed checks will not be accepted.

8.3(2) *Late application.* Persons required to register under provisions of the Act who file late application for registration shall pay a registration fee of ten dollars.

8.3(3) *Separate registration for independent activities.* The following six groups of activities are deemed to be independent of each other:

a. Manufacturing controlled substances;

b. Distributing controlled substances;

c. Dispensing, conducting research (other than research described in paragraph "*d*" of this subrule) with, and conducting instructional activities with, controlled substances listed in schedules II through V;

d. Conducting research with narcotic drugs listed in schedules II through V for the purpose of continuing the dependence on such drugs of a narcotic drug dependent person in the course of conducting an authorized clinical investigation in the development of a narcotic addict rehabilitation program pursuant to a Notice of Claimed Investigational Exemption for a New Drug approved by the Food and Drug Administration;

e. Conducting research and instructional activities with controlled substances listed in schedule I; and

f. Conducting chemical analysis with controlled substances listed in any schedule.

8.3(4) *Separate registration—coincident activities.* Every person who engages in more than one group of independent activities shall obtain a separate registration for each group of activities, except as provided in this paragraph. Any person, when registered to engage in the group of activities described in each paragraph in this subrule, shall be authorized to engage in the coincident activities described in that paragraph without obtaining a registration to engage in such coincident activities, provided that, unless specifically exempted, he complies with all requirements and duties prescribed by law for persons registered to engage in such coincident activities:

a. A person registered to manufacture any controlled substance or basic class of controlled substance shall be authorized to distribute that substance or class, but no other substance or class which he is not registered to manufacture.

b. A person registered to manufacture any controlled substance listed in schedules II through V shall be authorized to conduct chemical analysis and preclinical research (including quality control analysis) with narcotic and non-narcotic controlled substances listed in those schedules in which he is authorized to manufacture.

c. A person registered to conduct research with a basic class of controlled substance listed in schedule I shall be authorized to manufacture such class if and to the extent that such manufacture is set forth in the research protocol filed with the application for registration and to distribute such class to other persons registered to conduct research with such class or to conduct chemical analysis.

d. A person registered to conduct chemical analysis with controlled substances shall be authorized to manufacture and import such substances for analytical or instructional purposes, to distribute such substances to other persons registered to conduct chemical analysis or instructional activities, to persons registered or authorized to conduct research with such substances, and to persons exempted from registration pursuant to section 204.302(3), to export such substances to persons in other countries performing chemical analysis or enforcing laws relating to controlled substances or drugs in those countries, and to conduct instructional activities with controlled substances.

e. A person registered or authorized to conduct research (other than research described in 8.3(3),"*d*") with controlled substances listed in schedules II through V shall be authorized to conduct chemical analysis with controlled substances listed in those schedules in which he is authorized to conduct research to manufacture such substances if and to the extent that such manufacture is set forth in a statement filed with the application for registration, and to distribute such substances to other persons registered or authorized to conduct chemical analysis, instructional activities, or research with such substances and to persons exempted from registration pursuant to section 204.302(3), and to conduct instructional activities with controlled substances.

f. A person registered to dispense, or to conduct research (other than research described in paragraph 8.3(3),"*d*") with controlled substances listed in schedules II through V shall be authorized to dispense and to conduct such research and to conduct instructional research with those substances.

8.3(5) *Separate registration—one or more controlled substances.* A single registration to engage in any group of independent activities may include one or more controlled substances listed in the schedules authorized in that group of independent activities. A person registered to conduct research with controlled substances listed in schedule I may conduct research with any substance listed in schedule I for which he has filed and had approved a research protocol.

8.3(6) *Separate registrations for separate locations.* The following locations shall be deemed not to be places where controlled substances are manufactured, distributed or dispensed:

a. A warehouse where controlled substances are stored by or on behalf of a registered person, unless such substances are distributed directly from such warehouse to registered locations other than the registered location from which the substances were delivered or to persons not required to register by virtue of section 204.302(3).

b. An office used by agents of a registrant where sales of controlled substances are solicited, made, or supervised but which neither contains such substances (other than substances for display purposes or lawful distribution as samples only) nor serves as a distribution point for filling sales orders; and

c. An office used by a practitioner (who is registered at another location) where controlled substances are prescribed but neither administered nor otherwise dispensed as a regular part of the professional practice of the practitioner at such office, and where no supplies of controlled substances are maintained; and

d. All activities covered by these regulations not exempted above will require regulation for each location.

8.3(7) *Time for application for registration.* Any person who is required to be registered and who is not so registered may apply for registration at any time. No person required to be registered shall engage in any activity for which registration is required until the application for registration is granted and a certificate of registration is issued by the drug control program administrator to such person.

8.3(8) *Expiration date for application for registration.* Any person who is registered may apply to be re-registered not less than 30 days, nor more than 60 days, before the expiration date of his registration. A registered person who fails to file for re-registration at least 30 days before the expiration date of his registration must apply for a new registration; his existing registration will expire on the date specified.

8.3(9) *Exemption of law enforcement officials.* In order to enable law enforcement agency laboratories to obtain and transfer controlled substances for use as standards in chemical analysis, such laboratories must obtain annually a registration to conduct chemical analysis. Such laboratories shall be exempted from payment of a fee for registration. Laboratory personnel, when acting in the scope of their official duties, are deemed to be officials exempted by this subrule. For purpose of this subrule, laboratory activities shall not include field or other preliminary chemical tests by officials exempted by this subrule.

8.3(10) *Application forms—contents—signature.* Application forms may be obtained at the state board of pharmacy examiners' office or by writing to the board of pharmacy examiners. Forms will be mailed, as applicable, to each registered person approximately 60 days before the expiration date of his registration; if any registered person does not receive such forms within 45 days before the expiration date of his registration, he must promptly give notice of such fact and request such forms by writing to the board of pharmacy examiners at the foregoing address.

a. Each application shall include all information called for in the form, unless the item is not applicable, in which case this fact shall be indicated.

b. Each application, attachment or other document filed as part of an application shall be signed by the applicant, if an individual; by a partner of the applicant, if a partnership; or by an officer of the applicant, if a corporation, corporate division, association, trust or other entity.

8.3(11) *Filing of application—joint filings.* All applications for registration shall be submitted for filing to the board of pharmacy examiners. The appropriate registration fee and any required attachments must accompany the application.

Any person required to obtain more than one registration may submit all applications in one package. Each application must be complete and should not refer to any accompanying application for required information.

8.3(12) *Acceptance for filing—defective applications.* Applications for registration and re-registration submitted for filing are dated upon receipt. If found to be complete, the application will be accepted for filing. Applications failing to comply with the requirements of this part will not be accepted for filing. In the case of minor defects as to completeness, the board may accept the application for filing with a request to the applicant for additional information. A defective application will be returned to the applicant within ten days following its receipt with a statement of the reason for not accepting the application for filing. A defective application may be corrected and resubmitted for filing at any time; the board shall accept for filing any application upon resubmission by the applicant, whether complete or not.

a. Accepting an application for filing does not preclude any subsequent request for additional information and has no bearing on whether the application will be granted.

b. The board of pharmacy examiners may require an applicant to submit such documents or written statements of fact relevant to the application as it deems necessary to determine whether the application should be granted. The failure of the applicant to provide such documents or statements within ten days after being requested to do so shall be deemed to be a waiver by the applicant of an opportunity to present such documents or facts for consideration by the board in granting or denying the application.

c. An application for registration or re-registration may be amended or withdrawn without permission of the board at any time before the date on which the applicant receives an order to show cause. An application may be amended or withdrawn with permission of the board at any time where good cause is shown by the applicant or where the amendment or withdrawal is in the public interest. After an application has been accepted for filing, the request by the applicant that it be returned or the failure of the applicant to respond to official correspondence regarding the application, when sent by registered or certified mail, return receipt requested, shall be deemed to be a withdrawal of the application.

8.3(13) *Inspection.* The board may inspect, or cause to be inspected, the establishment of an applicant or registrant. The board shall review the application for registration and other information regarding an applicant in order to determine whether the applicable standards of chapter 204 of the Code and these rules have been met by the applicant.

8.3(14) *Modification in registration.* Any registrant may apply to modify his registration to authorize the handling of additional controlled substances by submitting a letter of request to the board. The letter shall contain the registrant's name, address, registration number and the substances or schedules to be added to his registration and shall be signed by the same person who signed the most recent application for registration or re-registration. If the registrant is seeking to handle additional controlled substances listed in schedule I for the purpose of research or instructional activities, he shall attach one copy of a federally approved research protocol describing each research project involving the additional substances, or two copies of a statement describing the nature, extent and duration of such instructional activities, as appropriate. No fee shall be required to be paid for the modification. The request for modification shall be handled in the same manner as an application for registration.

8.3(15) *Termination of registration.* The registration of any person shall terminate if and when such person dies, ceases legal existence, discontinues business or professional practice or changes his name or address as shown on the certificate of registration. Any registrant who ceases legal existence, discontinues business or professional practice or changes his name or address as shown on the certificate of registration shall notify the board promptly of such fact. In the event of a change in name or address, the person may apply for a new certificate of registration in advance of the effective date of such change by filing an application and paying the appropriate fee in the same manner as an application for new registration.

8.4(204) Exemptions—registration fee. The requirement of registration fee is waived for the following federal and state institutions: Hospitals, health care or teaching institutions, and analytical laboratories authorized to possess, manufacture, distribute and dispense controlled substances in the course of official duties.

8.4(1) *Exemption—requirement of duties.* Exemption from payment of a registration or re-registration fee does not relieve the registrant of any other requirements of duties prescribed by law.

8.4(2) *Exemption of agents and employees—affiliated practitioners.* An individual practitioner who is an intern, resident or foreign physician may dispense and prescribe controlled substances under the registration of the hospital or other institution which is registered and by whom he is employed provided that:

a. The hospital or other institution by whom he is employed has determined that the individual practitioner is so permitted to dispense or prescribe drugs by the appropriate licensing board;

b. Such individual practitioner is acting only in the scope of his employment in the hospital or institution;

c. The hospital or other institution authorizes the intern, resident or foreign physician to dispense or prescribe under the hospital registration and designates a specific internal code number, letters, or a combination thereof and shall be a suffix to the institution's BNDD registration number, preceded by a hyphen (e.g., APO 123456-10 or APO 123456-12); and

d. A current list of internal codes and the corresponding individual practitioner is kept by the hospital or other institution and is made available to the public upon request for the purpose of verifying the authority of the prescribing individual practitioner.

8.5(204) Revision of controlled substances schedules. Any person seeking to have any compound, mixture, or preparation containing any depressant or stimulant substance listed in sections 204.204, 204.206, 204.208, 204.210 and 204.212, excepted from or to have new substances added to the application of all or any part of the chapter pursuant to section 204.201 or sections 204.203, 204.205, 204.207, 204.209 and 204.211 of chapter 204 of the Code may apply to the board of pharmacy examiners for such exception or inclusion.

8.5(1) *Application for exception of a stimulant or depressant compound.* An application for an exception under this rule shall contain the following information:

a. The complete quantitative composition of the dosage form.

b. Description of the unit dosage form together with complete labeling.

c. A summary of the pharmacology of the product including animal investigations and clinical evaluations and studies, with emphasis on the psychic or physiological dependence liability (this must be done for each of the active ingredients separately and for the combination product).

d. Details of synergisms and antagonisms among ingredients.

e. Deterrent effects of the noncontrolled ingredients.

f. Complete copies of all literature in support of claims.

g. Reported instances of abuse.

h. Reported and anticipated adverse effects.

i. Number of dosage units produced for the past two years.

j. Evidence that an exception has been granted by the bureau under section 202(d) of the Federal Controlled Substances Act [21 U.S.C. 812(d)].

8.5(2) *Notification of application.* Within 20 days after the receipt of an application for an exception or inclusion under this rule, the board of pharmacy examiners shall notify the applicant of its acceptance or nonacceptance of the application, and if not accepted, the reason therefor. The board need not accept an application for filing if any of the requirements prescribed in 8.5(1) of these rules are lacking or are not set forth so as to be readily understood. If the applicant desires, he may amend the application to meet the requirements of 8.5(1). The board shall permit any interested person to file written comments on or objections to the proposal and designate the time during which such filings may be made. After consideration of the application and any comments on or objections to the board's finding, the board shall issue its findings on the application.

8.6(204) Certificate of registration—denial of registration—contents. The board shall issue a certificate of registration to an applicant if the issuance of registration or re-registration is required under the applicable provisions. In the event that the issuance of registration or re-registration is not required, the board shall deny the application. Before denying any application, the board shall issue an order to show cause and, if requested by the applicant, shall hold a hearing on the application.

The certificate of registration shall contain the name, address, and registration number of the registrant, the activity authorized by the registration, the schedules of the controlled substances which the registrant is authorized to handle, the amount of fee paid (or exemption), and the expiration date of the registration. The registrant shall prominently display the certificate of registration at the registered location.

8.7(204) Suspension or revocation of registration. The board may suspend any registration for any period of time it determines to be justified upon the facts of the case.

8.7(1) The board may revoke any registration.

8.7(2) *Order to show cause before revocation or suspension.* Before revoking or suspending any registration, the board shall issue an order to show cause and, if requested by the registrant, shall hold a hearing. Notwithstanding the requirements of this rule, however, the board may suspend any registration pending a final order.

8.7(3) *Requirements upon service of order.* Upon service of the order of the board suspending or revoking registration, the registrant shall immediately deliver his certificate of registration to the board. Also, upon service of the order of the board revoking registration, the registrant shall, as instructed by the board:

a. Deliver all controlled substances in his possession to the board or to authorized agents of the board; or

b. Place all controlled substances in his possession under seal.

8.7(4) *Limited substances.* In the event that revocation or suspension is limited to a particular controlled substance or substances, the registrant shall be given a new certificate of registration for all substances not affected by such revocation or suspension; no fee shall be required to be paid for the new certificate of registration. The registrant shall deliver the old certificate of registration to the board. Also, the registrant shall, as instructed by the board:

a. Deliver to the board or to authorized agents of the board all of the particular controlled substance or substances affected by the revocation or suspension which are in his possession; or

b. Place all of such substances under seal.

8.7(5) *Suspension of registration pending final order.* The board may suspend any registration simultaneously with or at any time subsequent to the service upon the registrant of an order to show cause why such registration should not be revoked or suspended, in any case where it finds that there is an imminent danger to the public health or safety. If the board so suspends, it shall serve with the order to show cause an order of immediate suspension which shall contain a statement of its findings regarding the danger to public health or safety.

8.7(6) *Requirements upon suspension.* Upon service of the order of immediate suspension, the registrant shall promptly return his cer-

tificate of registration to the board. Also, upon service of the order of the board immediately suspending registration, the registrant shall, as instructed by the board:

a. Deliver all affected controlled substances in his possession to the board or to authorized agents of the board; or

b. Place all of such substances under seal.

8.7(7) *Effectiveness pending final order.* Any suspension shall continue in effect until the conclusion of all proceedings upon the revocation or suspension, including any judicial review thereof, unless sooner withdrawn by the board or dissolved by a court of competent jurisdiction. Any registrant whose registration is suspended under this rule may request a hearing on the revocation or suspension of his registration at a time earlier than specified in the order to show cause, which request shall be granted by the board who shall fix a date for such hearing as early as reasonably possible.

8.7(8) *Extension of registration pending final order.* In the event that an applicant for re-registration (who is doing business under a registration previously granted and not revoked or suspended) has applied for re-registration at least 30 days before the date on which the existing registration is due to expire, and the board has issued no order on the application, the date on which the existing registration is due to expire, the existing registration of the applicant shall automatically be extended and continue until the date on which the board so issues its order. The board may extend any other existing registration under the circumstances contemplated in this rule even though the registrant failed to apply for re-registration at least 30 days before expiration of the existing registration, with or without request by the registrant, if the board finds that such extension is not inconsistent with the public health and safety.

8.8(204) Order to show cause. If, upon examination of the application for registration from any applicant and other information regarding the applicant, the board is unable to make the determinations required to register the applicant, the board shall serve upon the applicant an order to show cause why the registration should not be denied.

8.8(1) If, upon information regarding any registrant, the board determines that the registration of such registrant is subject to suspension or revocation, the board shall serve upon the registrant an order to show cause why the registration should not be revoked or suspended.

8.8(2) The order to show cause shall call upon the applicant or registrant to appear before the board at a time and place stated in the order, which shall not be less than 30 days after the date of receipt of the order. The order to show cause shall also contain a statement of the legal basis for such hearing and for the denial, revocation or suspension of registration and a summary of the matters of fact and law asserted.

8.8(3) Upon receipt of an order to show cause, the applicant or registrant must, if he desires a hearing, file a request for a hearing. If a hearing is requested, the board shall hold a hearing at the time and place stated in the order.

8.8(4) When authorized by the board any agent of the board may serve the order to show cause.

8.9(204) Waiver or modification of rules. The board or the presiding officer (with respect to matters pending before him) may, with the approval of the respondent, modify or waive any rule in this part by notice in advance of the hearing, if he determines that no party in the hearing will be unduly prejudiced and the ends of justice will thereby be served. Such notice of modification or waiver shall be made a part of the record of the hearing.

8.9(1) *Request for hearing.* Any person entitled to a hearing and desiring a hearing shall, within 30 days after the date of receipt of the order to show cause, file with the board a written request for a hearing.

8.9(2) *Waiver for hearing.* Any person entitled to a hearing may, within the period permitted for filing a request for a hearing, file with the board a waiver of an opportunity for a hearing or to participate in a hearing, together with a written statement regarding his position on the matters of fact and law involved in such hearing. Such statement, if admissible, shall be made a part of the record and shall be considered in light of the lack of opportunity for cross-examination in determining the weight to be attached to matters of fact asserted therein.

8.9(3) *Failure to file or appear.* If any person entitled to a hearing fails to file a request for a hearing or a notice of appearance, or if he so files and fails to appear at the hearing, he shall be deemed to have waived his opportunity for the hearing or to participate in the hearing, unless he shows good cause for such failure.

8.9(4) *Condition for cancellation of hearing.* If any person entitled to a hearing or to participate in a hearing waives or is deemed to have waived his opportunity for the hearing, or to participate in the hearing, the board may cancel the hearing, if scheduled, and issue its final order without a hearing.

8.9(5) *Burden of proof—denial of a registration.* At any hearing for the denial of a registration, the board shall have the burden of proving that the requirements for such registration are not satisfied.

8.9(6) *Burden of proof—revocation or suspension.* At any hearing for the revocation or suspension of a registration, the board shall have

the burden of proving that the requirements for such revocation or suspension are satisfied.

8.9(7) *Time and place of hearing.* The hearing will commence at the place and time designated in the order to show cause, but thereafter it may be moved to a different place and may be continued from day to day or recessed to a later day without notice other than announcement thereof by the presiding officer at the hearing.

8.9(8) *Hearings—opportunity to be present—powers.* Every hearing held by the board where an order may be made or determination had against any person the same shall be by the board except as herein otherwise provided. No evidence shall be received except upon reasonable opportunity for all persons to be present. The board and the officer, agent or representative presiding at the hearing shall have the power to administer oaths and affirmations, issue subpoenas, rule upon offers of proof and receive relevant oral or documentary evidence, take or cause depositions to be taken, regulate the course of the hearing and conduct of the parties, hold informal conferences for the settlement or simplification of the issues by consent of the party or parties and dispose of procedural motions and similar matters.

8.9(9) *Informal hearings—evidence—place.* The board may conduct such hearing in an informal manner and without recourse to the technical common-law rules of evidence required in proceedings in judicial courts, and such manner of proof and introduction of evidence shall be deemed sufficient and shall govern the proof, decision, and administrative or judicial review of all questions of fact if substantial, reliable and probative evidence supports the board's determination. The board shall as a matter of policy provide for the exclusion of irrelevant, immaterial or unduly repetitious evidence. Every person who is a party to such proceedings shall have the right to submit evidence in open hearing and shall have the right of cross-examination. Hearings may be held at any place in the state determined by the board.

8.9(10) *Record of hearing—official reporter—employment and compensation—transcript of pleadings and evidence.* The transcript of testimony adduced and exhibits admitted together with the notice, all pleadings, exceptions, motions, requests and papers filed, other than briefs or arguments of law, shall constitute the complete and exclusive record of such hearing and determination of the board and it shall be available to all parties for examination. Any party may obtain a copy thereof at its expense.

a. The board may employ and engage the services of a stenographer or reporter, and pay for such services of such stenographer or reporter from any funds available to the board or from any funds which may hereafter be appropriated therefor.

b. Said stenographer or reporter so employed for such purposes shall be designated by the board for the purpose of any such hearing as its official reporter to take down in shorthand or stenotype all evidence and matters occurring at such hearing exclusive of oral arguments thereon. Whenever objections are filed to recommended determinations or when a petition for judicial review is filed, such evidence together with the original or a copy of all exhibits admitted and with the notice of hearing, all pleadings, exceptions, motions, requests and papers filed, other than briefs or arguments of law, shall be incorporated in a transcript and certified to by the officer, agent or representative of the board presiding at the hearing. Such transcript when so prepared and certified shall be admissible without further proof in any subsequent review or proceeding affecting such determination of such agency, and shall be prima-facie evidence of all facts therein contained as the complete record of such hearing or determination.

8.9(11) *Finding of facts.* An issue of fact shall be considered and determined upon the record required to be made, except as herein otherwise provided as to newly discovered evidence. The board shall make an informal finding of facts which shall encompass the relevant facts shown by the evidence. Said finding of facts may be made by direct statement or by reference to the particular charges made in the complaint before the board. A reference to the particular charges in the complaint shall be sufficient as a finding of facts.

8.9(12) *Final orders—by whom made—proceeding for revocation or suspension of registration.* The final order or determination made by the board shall be made by a majority of the board. Proceedings for revocation or suspension of certificates of registration shall be determined by not less than a majority of the members compromising the board.

8.9(13) *Preliminary hearings—recommendation and record—notices—objections—final determinations.* Any board member or representative thereof may conduct the hearing on behalf of the board. In the event of such hearing before a member, agent or representative it shall be conducted in the same manner provided for a hearing before the board except that instead of making an order or determination the said member, agent or representative shall make a recommendation as to the order or determination. After said recommendation is made said member, agent or representative shall present to and file with the board the complete record of the proceedings before him, together with his recommended order or determination and notice of such filing and a copy of his recommended order or determination shall be given by ordinary mail to all persons who were parties to the hearing. Any interested and affected person may, within 20 days thereafter, or within

such additional time as may be granted by the board, file with the board his objections to the entry of such order. If any such objections are filed the board shall set the same for hearing. Such hearing shall be on the record so filed with it. The board may hear additional evidence or refer it back to the hearing member or agent to hear additional evidence. Upon said hearing the board may adopt the recommendations of its member, agent or representative conducting the hearing, amend or modify the same or may make such order or determination as is proper on the record. If no objections are so filed the board may adopt the order or determination recommended by its member, agent or representative without further hearing. If the board does not so adopt such recommendation, order or determination where no objections are filed it shall set said matter for hearing and notify the parties present at said original hearing and proceed as though objections had been filed to the recommended order or determination. Notice of all final orders and determinations shall be given promptly by ordinary mail to all parties to the hearing by the board.

8.9(14) *Orders and determinations—force and effect.* Every order or determination so made shall be in full force and effect after it is duly entered in the permanent records of the board. Revocation or suspension of certificates of registration shall be effective as of the date of revocation by the board, and shall remain revoked or suspended until and unless set aside by a court on review.

8.10(204) Security requirements generally. All applicants and registrants shall provide effective controls and procedures to guard against theft and diversion of controlled substances. In order to determine whether a person has provided effective controls against diversion, the board shall use the security requirements set forth in these rules as standards for the physical security controls and operating procedures necessary to prevent diversion. Substantial compliance with these standards may be deemed sufficient by the board after evaluation of the over-all security system and needs of the applicant or registrant.

8.10(1) *Security requirements of substances in possession of the registrant.* Physical security controls shall be commensurate with the schedules and quantity of controlled substances in the possession of the registrant in normal business operation. When physical security controls become inadequate as a result of a controlled substance being transferred to a different schedule, or as a result of a noncontrolled substance being listed on any schedule, or as a result of a significant increase in the quantity of controlled substances in the possession of the registrant during normal business operations, the physical security controls shall be expanded and extended accordingly. A registrant may adjust physical security controls within the requirements set forth in these rules when the need for such controls decreases as a result of a controlled substance being transferred to a different schedule, or as a result of a controlled substance being removed from control, or as a result of a significant decrease in the quantity of controlled substances in the possession of the registrant during normal business operation.

8.10(2) *Security requirements of locations.* Physical security controls of locations registered under the Federal Harrison Narcotic Act or the Federal Narcotics Manufacturing Act of 1960 on April 30, 1971, shall be deemed to comply substantially with the standards set forth in this rule. Any new facilities or work or storage areas constructed or utilized for controlled substances, which facilities or work or storage areas have not been previously approved, shall not necessarily be deemed to comply substantially with the standards set forth in this rule, notwithstanding that such facilities or work or storage areas have physical security controls similar to those previously approved.

8.10(3) *Factors in evaluating physical security systems.* In evaluating the over-all security system of a registrant or applicant necessary to maintain effective controls against theft or diversion of controlled substances, the board may consider any of the following factors as it may deem relevant to the need for strict compliance with the requirements of this rule:

a. The type of activity conducted;

b. The quantity of controlled substances handled;

c. The location of the premises and the relationship such location bears on security needs;

d. The type of building construction comprising the facility and the general characteristics of the building or buildings;

e. The type of vault, safe and secure enclosures available;

f. The type of closures on vaults, safes and secure enclosures;

g. The adequacy of key control systems or combination lock control systems;

h. The adequacy of electric detection and alarm systems, if any;

i. The extent of unsupervised public access to the facility, including the presence and characteristics of perimeter fencing, if any;

j. The procedures for handling business guests, visitors, maintenance personnel and nonemployee service personnel;

k. The availability of local police protection or of the registrant's or applicant's security personnel, and;

l. The adequacy of the registrant's or applicant's system for monitoring the receipt, manufacture, distribution and disposition of controlled substances in its operations.

8.10(4) *Storage areas.* Raw materials, bulk materials awaiting further processing, and

finished products which are controlled substances listed in any schedule shall be stored in one of the following secure storage areas:

a. Where small quantities permit, a safe:

(1) Which safe has an Underwriters' Laboratories Burglary Rating of T-20, E or better, or the equivalent of such a safe;

(2) Which safe, if it weighs less than 750 pounds, is bolted or cemented to the floor or wall in such a way that it cannot be readily removed; and

(3) Which safe, if necessary, depending upon the quantities and type of controlled substances stored, is equipped with an alarm system which, upon unauthorized entry, shall transmit a signal directly to a central protection company of a local or state policy agency which has a legal duty to respond, or a 24-hour control station operated by the registrant, or such other protection as the board may approve.

b. A vault constructed which is of substantial construction with a steel door, combination or key lock, and an alarm system.

8.11(204) Manner of issuance of prescriptions. All prescriptions for controlled substances shall be dated as of, and manually signed on, the day when issued and shall bear the full name and address and registration number of the practitioner. A practitioner must manually sign a prescription in the same manner as he would sign a check or legal document. Where an oral order is not permitted, prescriptions shall be written with ink or indelible pencil or typewriter and shall be manually signed by the practitioner. The prescriptions may be prepared by a secretary or agent for the signature of a practitioner, but the prescribing practitioner is responsible in case the prescription does not conform in all essential respects to the law and regulations. A corresponding liability rests upon the pharmacist who fills a prescription not prepared in the form prescribed by those regulations.

8.11(1) *Intern—resident—foreign physician.* An intern, or foreign physician exempted from registration under section 204.302 shall include on all hospital orders issued by him the registration number of the hospital or other institution and the special internal code number assigned to him by the hospital or other institution as herein provided, in lieu of the registration number of the practitioner required by this section. Each hospital order shall have the name of the intern, or foreign physician stamped or printed on it.

8.11(2) *Requirements on prescriptions of exempted officials.* An official exempted from registration under section 204.302 shall include on all prescriptions issued by him, his branch of service or agency (e.g., "U.S. Army" or "Public Health Service") and his service identification number, in lieu of the registration number of the practitioner required by this rule. The service identification number for a Public Health Service employee is his social security identification number. Each prescription shall have the name of the officer stamped or printed on it, as well as the signature of the officer.

8.12(204) Dispensing of narcotic drugs for maintenance purposes. The administering or dispensing directly (but not prescribing) of narcotic drugs listed in any schedule to a narcotic drug dependent person for the purposes of continuing his dependence upon such drugs in the course of conducting a federally authorized clinical investigation in the development of a narcotic addict rehabilitation program shall be deemed to be within the meaning of the term "in the course of his professional practice or research" in section 204.101(1).

8.13(204) Controlled substances listed in schedule II—requirement of prescription. In the case of an emergency situation, as defined by 8.13(5), a pharmacist may dispense a controlled substance listed in schedule II upon receiving oral authorization of a prescribing individual practitioner, provided that:

8.13(1) The quantity prescribed and dispensed is limited to the amount adequate to treat the patient during the emergency period (dispensing beyond the emergency period must be pursuant to a written prescription manually signed by the prescribing individual practitioner);

8.13(2) The prescription shall be immediately reduced to writing by the pharmacist and shall contain all information required except for the signature of the prescribing individual practitioner;

8.13(3) If the prescribing individual practitioner is not known to the pharmacist, he must make a reasonable effort to determine that the oral authorization came from a registered individual practitioner, which must include a callback to the prescribing individual practitioner using his phone number as listed in the telephone directory or other good faith efforts to insure his identity; and

8.13(4) Within 72 hours after authorizing an emergency oral prescription, the prescribing individual practitioner shall cause a written prescription for the emergency quantity prescribed to be delivered to the dispensing pharmacist. In addition to conforming to the requirements, the prescription shall have written on its face "Authorization for Emergency Dispensing," and the date of the oral order. The written prescription may be delivered to the pharmacist in person or by mail, but if delivered by mail it must be postmarked within the 72-hour period. Upon receipt, the dispensing pharmacist shall attach this prescription to the oral emergency prescription which had earlier been reduced to writing. The pharmacist shall notify the board if the prescribing individual fails to deliver a written prescription to him, failure of

the pharmacist to do so shall void the authority conferred by this subrule to dispense without a written prescription of a prescribing individual practitioner.

8.13(5) *Emergency situations.* For the purposes of authorizing an oral prescription of a controlled substance listed in schedule II of the Uniform Controlled Substances Act [Ch. 204 of the Code] the term "emergency situation" means those situations in which the prescribing practitioner determines:

a. That immediate administration of the controlled substance is necessary, for proper treatment of the intended ultimate user;

b. That no appropriate alternative treatment is available, including administration of a drug which is not a controlled substance under schedule II of Chapter 204 of the Code;

c. That it is not reasonably possible for the prescribing practitioner to provide a written prescription to be presented to the person dispensing the substance, prior to the dispensing.

8.13(6) *Partial filling of prescriptions.* The partial filling of a prescription for a controlled substance listed in schedule II is permissible, if the pharmacist is unable to supply the full quantity called for in a written or emergency oral prescription and he makes a notation of the quantity supplied on the face of the written prescription (or written record of the emergency oral prescription). The remaining portion of the prescription must be filled within 72 hours of the first partial filling; however, if the remaining portion is not or cannot be filled within the 72-hour period, the pharmacist shall so notify the prescribing individual practitioner. No further quantity may be supplied beyond 72 hours without a new prescription.

8.13(7) *Labeling of substances.* The pharmacist filling a written or emergency oral prescription for a controlled substance listed in schedule II shall affix to the package a label showing date of filling, the pharmacy name and address, the serial number of the prescription, the name of the patient, the name of the prescribing practitioner, and directions for use and cautionary statements, if any, contained in such prescription or required by law.

8.13(8) *Requirement of prescription.* An institutional practitioner may administer or dispense directly (but not prescribe) a controlled substance listed in schedule III or IV pursuant to a written prescription signed by a prescribing individual practitioner, or pursuant to an oral prescription made by a prescribing individual practitioner and promptly reduced to writing by the pharmacist or pursuant to an order for medication made by an individual practitioner which is dispensed for immediate administration to the ultimate user.

8.13(9) *Refilling of prescriptions.* No prescription for a controlled substance listed in schedule III or IV shall be filled or refilled more than six months after the date on which such prescription authorized to be refilled may be refilled more than five times. Each refilling of a prescription shall be entered on the back of the prescription or on another appropriate uniformly maintained readily retrievable record, such as medication records, which indicate the date, quantity, and name of dispensing pharmacist for each prescription initialed, and dated by the pharmacist as of the date of dispensing, and shall state the amount dispensed. If the pharmacist merely initials and dates the back of the prescription he shall be deemed to have dispensed a refill for the full face amount of the prescription. Additional quantities of controlled substances listed in schedule III or IV may only be authorized by a prescribing practitioner through issuance of a new prescription as provided herein which shall be a new and separate prescription.

8.13(10) *Partial filling of prescriptions.* The partial filling of a prescription for a controlled substance listed in schedule III, IV, or V is permissible, provided that:

a. Each partial filling is recorded in the same manner as a refilling,

b. The total quantity dispensed in all partial fillings does not exceed the total quantity prescribed, and

c. No dispensing occurs after six months after the date on which the prescription was issued.

8.13(11) *Labeling of substances.* The pharmacist filling a prescription for a controlled substance listed in schedule III or IV shall affix to the package a label showing the pharmacy name and address, the serial number and date of initial filling, the name of the patient, the name of the practitioner issuing the prescription, and directions for use and cautionary statements, if any, contained in such prescription as required by law.

8.13(12) *Requirement of prescription.* A pharmacist may dispense a controlled substance listed in schedule V pursuant to a prescription as required for controlled substances listed in schedules III and IV. A prescription for a controlled substance listed in schedule V may be refilled only as expressly authorized by the prescribing individual practitioner on the prescription; if no such authorization is given, the prescription may not be refilled. A pharmacist dispensing such substance pursuant to a prescription shall label the substance in accordance with these rules and fill the prescription.

8.13(13) An individual practitioner may administer or dispense a controlled substance listed in schedule V in the course of his professional practice without a prescription, subject to these rules.

8.13(14) An institutional practitioner may administer or dispense directly (but not pre-

scribe) a controlled substance listed in schedule V only pursuant to a written prescription signed by the prescribing individual practitioner, or pursuant to an oral prescription made by a prescribing individual practitioner and promptly reduced to writing by the pharmacist or pursuant to an order for medication made by an individual practitioner which is dispensed for immediate administration to the ultimate user.

8.13(15) *Dispensing without prescription.* A controlled substance listed in schedule V, and a controlled substance listed in schedule III, or IV which is not a prescription drug as determined under the Federal Food, Drug and Cosmetic Act, may be dispensed by a pharmacist without a prescription to a purchaser at retail, provided that:

a. Such dispensing is made only by a pharmacist and not by a nonpharmacist employee even if under the direct supervision of a pharmacist except as specifically provided by other rules of the board.

b. Not more than 120cc. (4 ounces) of any such controlled substance may be distributed at retail to the same purchaser in any given 48-hour period.

c. The purchaser is at least 18 years of age.

d. The pharmacist requires every purchaser of a controlled substance under this rule not known to him to furnish suitable identification (including proof of age where appropriate).

e. A bound record book for dispensing of controlled substances (other than by prescription) is maintained by the pharmacist, which book shall contain the name and address of the purchaser, the name and quantity of controlled substance purchased, the date of each purchase and the name or initials of the pharmacist who dispensed the substance to the purchaser.

f. A prescription is not required for distribution or dispensing of the substance pursuant to any other federal, state or local law.

These rules are intended to implement section 204.302 of the Code.

[Filed September 29, 1971;
amended August 9, 1972,
December 15, 1972]

[No advisory opinion by attorney general
on rules 8.3(204) to 8.13(15)]

CHAPTER 9
POISONS

9.1(205) The following shall constitute "the preparations of these poisonous drugs" as used in section 205.5.

Any compound or mixture in pharmacy made after a formula that contains as an ingredient one or more of the substances listed in section 205.5.

9.2(205) The following shall constitute "potent poisons" as used in section 205.7:

Any substance which, when introduced in relatively small amounts into an organism or system, may chemically produce an injurious or deadly effect or destroy living tissue.

9.3(205) The following shall constitute "not in themselves poisonous" as used in section 205.8(1):

Any substance which, when introduced in relatively small amounts into an organism or system without producing injurious or deadly effect or destroy living tissue.

NOTE: The following ruling is hereby made on this twentieth day of January, 1960 by the board of pharmacy examiners pursuant to authority given it by 205.13 of the Code.

The application of Lehn and Fink Products Corporation has been presented to the board requesting a ruling on the question as to whether the product sold under the registered trade name "Lysol Brand Disinfectant" and manufactured by Lehn and Fink Products Corporation is a poison within the provisions of chapter 205 of the Code. After oral hearings at which evidence was presented by Lehn and Fink Products Corporation and transcribed and printed in permanent form, and after making an investigation of the facts which consisted, among other things, consultation with experts in the field of chemistry, medicine and toxicology, and by examining written reports from poison control centers and the statistical services of the United States department of health, education and welfare, as well as other public health agencies, and being fully advised in the premises, the board of pharmacy examiners hereby finds:

1. That the product known as "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation and presently being marketed in the state of Iowa, is a preparation which contains cresol (listed on the label of said product as cresylic acid) and, under the rules of this board, falls within the prohibitions set forth in section 205.5.

2. That the product known as "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation, is a "potent poison", as provided in section 205.7 and the rules of this board in that if the same is taken in relatively small quantities into the body, it will produce injury or death or destroy living tissue.

3. That "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation is not a proprietary medicine, as it is a disinfectant and, further, it is poisonous as provided in sections 205.8(1), and 155.3(7), and the rules of this board in that if taken into the body in relatively small quantities, it will produce injury or death or destroy tissue.

It is, therefore, the rule of the board of pharmacy examiners, upon the application of Lehn and Fink Products Corporation, and for the purposes of enforcing the provisions of chapter 205 of the Code, that:

1. "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation, falls within the scope of section 205.5 and must be sold by a licensed pharmacist, as provided therein.

2. "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation, is a "potent poison" and can only be sold under the conditions as set forth in section 205.7.

3. "Lysol Brand Disinfectant", manufactured by Lehn and Fink Products Corporation, is not a proprietary medicine and is poisonous and, therefore, does not fall within the exclusion of sections 205.8(1), and 155.3(7).

9.4(205) No pharmacist or retail pharmacy licensed pursuant to the laws of the state of Iowa shall advertise, directly or indirectly, by any media affecting the public, any drug, medicine or device bearing the legend: "Caution: Federal law prohibits dispensing without prescription", or whose sale is restricted to a prescription by Iowa law. Nothing in this regulation shall prohibit the furnishing of professional information to qualified medical practitioners.

9.5(205) Any person, ... violating rule 1, adopted pursuant to section 155.19 .... may be cited under section 155.13 to show cause .....

9.6(205) This rule is not intended to and should not in any way establish or restrict the price charged for such drugs, medicines or devices by retail sale.

[Filed January 21, 1960; amended January 31, 1962, March 29, 1963, April 11, 1968]

PUBLIC INSTRUCTION DEPARTMENT

TITLE I
ADMINISTRATION AND FINANCE

CHAPTER 1
DIVISION OF ADMINISTRATION AND FINANCE

1.1(286A) Aid for institute day. One day of state aid will be granted each year to all schools which have dismissed a day for a legally called and approved county institute.

1.2(286A) Terms defined for aid purposes.

1.2(1) *Attendance.* Attendance is the presence of a pupil on days school was officially in session.

School session. A school shall be deemed to be in session when the pupils and teachers are present and the normal program is pursued for a school day.

1.2(2) *School day.* A school day shall mean that time that school is actually in session for any given division of the public school, and shall include a minimum of not less than five and one-half hours, not including lunch intermission, for all grades above the third; not less than four hours for the first three grades; and not less than three hours in kindergarten, preprimer or primer grades.

1.2(3) *Average daily attendance.* Average daily attendance is that average obtained by dividing the aggregate attendance for the period (month, semester, year) by the number of days the school was in session for the period.

a. Average daily attendance concerns itself only with days present, not days absent.

b. Where kindergartens or primary grades are limited to half-day sessions count each half-day session as a full day of attendance.

1.2(4) *Aggregate attendance.* Aggregate attendance means the total of all days of attendance for all the pupils during the period under consideration.

1.3(442) Tax equalization and state aid—definition of terms. For purposes of the administration of chapter 442 [C. '71], the following terms shall have the following meaning:

1.3(1) *Adjusted gross income.* Adjusted gross income shall mean net income as defined in section 422.7.

1.3(2) Reserved for future use.

1.3(3) Reserved for future use.

1.3(4) *Percent of allowable change.* Percent of allowable change is defined as the percent of allowable growth per pupil as provided for in section 442.2(4) [C. '71].

1.3(5) *Proposed growth.* Proposed growth for purposes of section 442.22 [C. '71] means the school district proposed reimbursable expenditures per pupil in average daily membership, for the current year.

1.3(6) *Tax askings.* Tax askings for purposes of section 442.22 [C. '71] means proposed general fund expenditures, reduced by estimated receipts (other than basic school tax equalization funds and state equalization funds) and further reduced by the estimated unencumbered balance to apply on the budget.

[Amended February 13, 1968]

TITLE II

APPROVED AND CLASSIFIED SCHOOLS AND SCHOOL DISTRICTS

CHAPTER 2
MINIMUM REQUIREMENTS AND STANDARDS FOR INSTRUCTIONAL MATERIALS

DIVISION I
STANDARDS FOR THE ELEMENTARY GRADES

DIVISION II
STANDARDS FOR THE HIGH SCHOOL

DIVISION I
STANDARDS FOR THE ELEMENTARY GRADES

2.1(257) Reading programs in general. All educators recognize the importance of a thorough-going reading program. This need has been impressed upon them through investigation, reports, and conferences on reading problems.

In order to help teachers promote and develop an effective reading program the department of public instruction issued a teachers handbook on reading, which should be used as a guide and in conjunction with the teachers manuals provided by the publisher of the basic reading series used in the school.

Reading is one of the most important experiences children are to have in school. Success or failure depends largely upon reading abilities, as there is a very close relationship between reading and practically every school subject. With this in mind major emphasis has been placed on the reading instructional materials in establishing these minimum requirements and standards.

DIVISION I
STANDARDS FOR THE ELEMENTARY GRADES

2.2(257) Primer and first grade.

2.2(1) *Reading readiness materials (Reading Handbook, Pages 32-62).*

Preprimer or preprimers of basic series.

Word, phrase, and sentence cards or charts.

One set of basic preprimers.

NOTE: We recommend that the primer or primers of the basic series usually be read before reading preprimers of a different series. (See Reading Handbook, Page 57, Plan A.) Presenting the reading instruction outlined above will insure a vocabulary of the proper number of words and their introduction will follow a planned program.

2.2(2) *A basic first reader.*

Workbooks which accompany the readers.

Teachers manuals for all basic books shall be provided.

Five broken sets preprimers.

Five broken sets primers.

Three broken sets first readers.

NOTE: Several broken sets readers should be available because the better readers will read as high as ten or fifteen books in addition to the basic series. (See Reading Handbook, Page 47.) The term broken sets is used to mean that a sufficient number of copies of a reading series are purchased to take care of the different reading groups and a similar number of copies of another series are purchased. The main point to remember is that when changing from a reader of one series to a reader of another series, check the overlap of vocabulary carefully and drill on the new words. (Reading Handbook, Page 59.)

2.2(3) Recreational books should be equal to twice the number of pupils enrolled as a minimum number of recent copies in good condition.

NOTE: On the average the district should spend annually at least fifty cents per pupil for reading materials, exclusive of textbooks and exclusive of county library funds. (See Library Bulletin, Number 45, Pages 15-17.)

NOTE: Credit will not be given for sample copies, books with ragged covers, private books donated to the school, books belonging to teachers, and supplementary or basic readers having a copyright earlier than 1935.

2.2(4) *A library table and chairs.*

A sufficient number of primary chairs for reading groups.

A suitable bulletin board (See Reading Handbook, Pages 126-127).

2.3(257) Second grade. Begin with a book which they can read easily; in most cases it will be first readers, but it may also be primers.

NOTE: There should be a very high vocabulary overlap with the book or books completed in the first grade.

2.3(1) One set first grade level readers—new materials.

A basic second reader or readers (Reading Handbook, Pages 64-75).

NOTE: This reader should be of the same basic series used in the primer and first grades.

2.3(2) Workbooks should be used with the basic series.

NOTE: These workbooks should relate in content and vocabulary with the basic series used.

Teachers' manuals should be provided.

2.3(3) One work-type reader.

NOTE: At least two drill lessons a week should be given over some of the study skills using a study reader, a dictionary, or teacher-prepared material. (Reading Handbook, Pages 77-78.) Work-type readers are not to be used after finishing the basic text but are to be used along with the basic reader, and the lessons should vary with the teacher's purpose and the child's needs.

2.3(4) Two sets literary or recreatory readers.

Three broken sets of readers of different levels.

Recreational books should be equal to twice the number of pupils enrolled as a minimum number of recent copies in good condition.

2.3(5) A library table and chairs.

A sufficient number of chairs for reading groups.

2.3(6) A bulletin board (Reading Handbook, Pages 126-127).

2.3(7) A set of arithmetic flash cards (addition and subtraction).

2.4(257) Third grade.

2.4(1) One set of first or second-reader level books—not previously read.

A basic third reader or readers (Reading Handbook, Pages 64-73).

NOTE: This should be the same basic series used in primer, first, and second grades.

2.4(2) Workbooks should be used with the basic series.

NOTE: These workbooks should relate in content and vocabulary with the basic series used.

2.4(3) Teachers' manuals for all books should be provided.

One set work-type readers.

NOTE: At least two drill lessons a week should be given over some of the study skills. (Reading Handbook, Pages 77-78.) Work-type readers are not to be used after finishing the basic text but are to be used along with the basic reader, and the lessons should vary with the teacher's purpose and the child's needs.

2.4(4) Two sets literary or recreatory readers.

Three broken sets of readers of different levels.

Recreational books should be equal to twice the number of pupils enrolled as a minimum number of recent copies in good condition.

NOTE: On the average the district should spend annually at least 50 cents per pupil for reading materials, exclusive of textbooks and exclusive of county library funds. (See Library Bulletin, Number 45, Pages 15-17.)

NOTE: The department will not grant credit for sample copies, books with ragged covers, private books donated to the school, books belonging to teacher, and supplementary or basic readers having copyright earlier than 1935.

2.4(5) A library table and chairs. A sufficient number of primary chairs for reading groups.

A bulletin board (Reading Handbook, Pages 126-127).

2.4(6) A set of arithmetic flash cards (addition, subtraction, multiplication and division).

2.5(257) Fourth through eighth grades.

2.5(1) One set of lower grade level books (for easy reading in the fall).

A basic reader (Read carefully Reading Handbook, Pages 75-95).

NOTE: This reader should be of the same series used in primer, first, second, and third grades. "Schools are courting disaster in their selection of such materials when, in a misguided effort to distribute commercial patronage, they adopt for different primary grades portions of several systems that are essentially incompatible and hence virtually incapable of sequential use."

2.5(2) Teachers' manuals for all basic books should be provided.

2.5(3) One set work-type or content readers.

NOTE: At least two drill lessons a week should be given over some of the study skills. (Reading Handbook, Pages 84-95.)

2.5(4) Each pupil should have a standard, elementary dictionary furnished either by his parents or the school. (Reading Handbook, Pages 169-176.) Several single copies of other texts and books to supplement history, geography, science, health, safety, etc.

NOTE: These books should have a spread of several grade levels in reading difficulty. Some books should be easier than the text for slower readers and some books of the expanded, more difficult type for the more capable readers.

2.5(5) Two sets of literary or recreatory-type readers.

One standard juvenile reference set.

NOTE: Selections should be made from the list recommended for elementary grades in the report of the special committee of the Iowa Library Association.

Recreational books should be equal to twice the number of pupils enrolled as a minimum number of recent copies in good condition.

2.6(257) Other equipment for fourth grade.

2.6(1) A set of arithmetic flash cards (addition, subtraction, multiplication, and division).

2.6(2) A map of United States.

2.6(3) A geographic terms map.

2.6(4) A map of the world on an equal area projection.

2.6(5) A political-physical globe.

NOTE: The 16-inch (in diameter) globe is recommended because of its superior size and because of its added legibility.

2.7(257) Fifth grade.

2.7(1) A large map of North America.

2.7(2) A large map of the United States.

2.7(3) A large map of Iowa.

2.7(4) A bulletin board (Reading Handbook, Pages 126-127).

2.8(257) Sixth through eighth grades.

2.8(1) One standard Atlas.

2.8(2) One political-physical globe.

2.8(3) Large maps of Europe, Asia, Africa, South America and the World.

2.8(4) Other desirable maps would be:

a. Blackboard outline maps, especially of the world and the United States.

b. Political map of the United States, showing states in separate colors, at least 38 inches by 48 inches.

c. Rainfall map and population density map of world, of the United States, of Europe.

2.8(5) Visual materials:

a. Film strip projector.

b. A 16 mm sound projector.

NOTE: The visual aids should be fitted to the curriculum and films should be obtained that meet the instructional plan.

2.8(6) Magazine list:

Please refer to Library Bulletin, Number 45, page 37.

DIVISION II

STANDARDS FOR THE HIGH SCHOOL

2.9(257) Condition of books. In evaluating a school with reference to the standards, credit will not be allowed for sample copies, books with ragged covers, supplementary readers having a copyright earlier than 1930, private books donated to the school, or books belonging to teachers. The covers of older books should be repaired or the books rebound if they are not in reasonably attractive condition. Worn-out sets and copies of obsolete books should be taken off the shelves to make room for more recent, attractive books.

2.10(257) Types of materials for library.

The high school library should include at least the following types of books:

2.10(1) Encyclopedias.

2.10(2) Single copies of recent textbooks to parallel and supplement the adopted text.

2.10(3) Single copies of books for collateral reading, enrichment and appreciation in the various subjects taught.

2.10(4) Fiction, travel, biography, etc., for recreational reading.

2.10(5) Dictionaries—abridged and unabridged.

2.10(6) Atlas.

2.10(7) Magazines and periodicals.

2.10(8) Compilations and collections of source materials, including autobiographies, letters, memoirs, documents, etc.

2.11(257) Encyclopedias. It is recommended that two sets of encyclopedias be available in the high school: One of those recommended for first purchase for senior high school only on page 3 of the report of the special committee of the Iowa Library Association and one set recommended for secondary purchase for senior high school.

2.12(257) Parallel text and supplementary books.

2.12(1) *Parallel texts.* For each content subject taught in high school there should be some copies of recent parallel texts. Old, obsolete, ragged, useless books of the textbook type should be removed from the library and the classrooms.

2.12(2) *Specialized books.* There should also be books of a more expanded, specialized type than the textbooks. They may be of a semirecreational, biographical, historical or popular nature. Their chief purpose is to broaden the scope of the pupil's knowledge of topics or subjects, to fill in details, to familiarize the pupil with literature in fields of special interest, to develop an appreciation of this literature, and to cultivate a desire on the part of the student to spend more of his leisure time in worthwhile reading.

2.12(3) *Lists of books.* Suggested lists of books for some subjects in high school will be found on pages 67-99 of Library Bulletin Number 45. These lists were prepared by prominent classroom teachers in Iowa and are graded as to difficulty. They should be of assistance to superintendents and classroom teachers who wish to purchase supplementary enrichment books. Other books can be selected from bibliographies in Iowa courses of study, from recent textbooks, or from the single or double-starred books in the Standard Catalog for High School Libraries.

2.12(4) *Number of books.* The number of books of the types described above in the high school library or classrooms should be equal to the enrollment of the class, up to 30 copies for each subject.

2.13(257) Books for recreational reading.

2.13(1) *Number and condition.* The school should own a minimum of 100 titles of these types of books in usable, attractive condition. One book should be added for each pupil above 100. Books from the state traveling library are helpful, but the school should not depend upon this source alone. Additions and replacements should be made annually.

2.13(2) *Types and interests.* Books should have a wide spread of interest appeal and reading level. They should deal with the present interests of high school boys and girls. Many of them should be graded considerably below the high school reading level so that they will not be too difficult for the slower readers and will develop an interest in reading for leisure time enjoyment. (See lists and suggestions for selection of fiction given on page 32, Library Bulletin, Number 45.)

2.14(257) Dictionaries.

2.14(1) *Unabridged.* One recent edition of an unabridged dictionary of recognized standing should be available in the high school.

2.14(2) *Abridged.* It is recommended that copies of dictionaries of the secondary or collegiate type be available in the library, study hall, and classrooms, where they may be handy for ready reference.

2.15(257) Magazines and periodicals. In schools with an enrollment of 100 pupils or less, there should be at least five carefully selected current magazines, appropriate for the various departments, and a daily newspaper. If the five magazines indicated in the report of the special committee of the Iowa Library Association are provided, the "Abridged Readers' Guide to Periodical Literature" can be secured for $2.25 per year. This will be of great service in providing classified subject references to current materials for the various classes. (See page 8 of report of Iowa Library Association Committee, Reference Books Recommended for First Purchase in Elementary Grades and High Schools of Iowa, for description, and addresses of publishers.)

[Filed prior to July 4, 1952]

CHAPTER 3
APPROVED SCHOOLS AND SCHOOL DISTRICTS

DIVISION I
GENERAL STANDARDS

3.1(257) General standards. For purposes of these approval standards, the following general standards shall apply.

3.1(1) *Educational units governed by standards.* The following standards shall govern the approval of all schools and school districts operated by public school corporations and the approval of all schools operated under nonpublic auspices. "School" means: Nursery school, kindergarten, elementary school, junior high school, or high school that is operated in Iowa.

3.1(2) *School board.* Each nonpublic school shall be governed by an identifiable agency which shall exercise functions necessary for the effective operation of the school. As used herein the agency governing each school, public and nonpublic, shall be referred to by the word "board."

3.1(3) *Application for approval.* The board of any school or school district that is not on the approved list on the effective date of these standards and which seeks approval shall file an

application for approval on or before the first day of October of the school year for which approval is desired.

3.1(4) *Approved schools and school districts.* Each school or school district on the list of approved schools on the effective date of these standards shall continue to be approved except in those instances, when by subsequent action of the state board of public instruction, it is removed from the approved list. Each such school or school district shall submit such annual reports that the state board of public instruction may request.

3.1(5) *When nonapproved.* A school or school district shall be considered as nonapproved on the day after the date it was removed from the approved list.

3.1(6) *Innovative programs.* School officials who wish to initiate responsible administrative, organizational or program innovations that depart in pattern but not in substance from the standards outlined herein are encouraged to do so, provided that all statutory conditions of section 257.25 are met. A description of such innovations shall be filed with the state board of public instruction as they are put into operation. On the basis of information gained by the staff of the department of public instruction concerning the success of such innovations, the state board of public instruction may, at its discretion, give approval of said innovations.

3.1(7) *Provisional approval.* The state board of public instruction, at its discretion, may extend provisional approval on a year-to-year basis to schools or school systems which currently are not meeting all the standards outlined herein but which are making satisfactory annual progress toward that goal, provided that all self-executing conditions of the approval-standards law have been met.

DIVISION II
DEFINITIONS

3.2(257) Definitions. For the purposes of these approval standards, the following definitions shall be used.

3.2(1) *Nursery school.* A nursery school shall be defined as a school which: (*a*) Provides a continuous program of educational activities in a suitable environment especially planned for three- and four-year-old children, who attend on a regular basis prior to kindergarten, provided that a child who reaches his fifth birthday during the school year shall be eligible to continue in nursery school until the close of that year; (*b*) meets all applicable standards of the state board of public instruction outlined herein; (c) adheres to all applicable standards of the Iowa state department of health; and (*d*) complies with all applicable standards of the Iowa state department of social welfare.

3.2(2) *Kindergarten.* A kindergarten is hereby defined as that part of an elementary school which provides a program of educational activities especially planned for developing the potentialities of children of school age who are past nursery-school age but who have not been enrolled in first grade.

3.2(3) *Elementary school.* The elementary school is hereby defined as consisting of a kindergarten, if operated, and grades one through eight or grades one through six when grades seven and eight are included in a secondary school as defined herein.

3.2(4) *Junior high school.* The junior high school is hereby defined as consisting of grades seven, eight, and nine, or grades seven and eight, when such grades are included in a unit that is separately organized and administered.

3.2(5) *Four-year high school.* The four-year high school is hereby defined as consisting of grades nine, ten, eleven and twelve when such grades are included in a unit that is separately organized and administered.

3.2(6) *Senior high school.* The senior high school is hereby defined as consisting of grades ten, eleven and twelve when such grades are included in a unit that is separately organized and administered.

3.2(7) *Junior-senior high school.* The junior-senior high school is hereby defined as consisting of grades seven, eight, nine, ten, eleven and twelve when such grades are included in a unit that is separately organized and administered.

3.2(8) *Secondary school.* The secondary school is hereby defined according to one of the following patterns: (*a*) A junior high school comprising grades seven, eight, and nine, and a senior high school; (*b*) a combined junior-senior high school comprising grades seven through twelve; (*c*) a junior high school comprising grades seven and eight, and a four-year high school comprising grades nine through twelve; or (*d*) a four-year high school comprising grades nine through twelve.

3.2(9) *Enrolled public school pupil.* A pupil shall be regarded as enrolled in a public school after he is registered and is taking part in that school's educational program.

3.2(10) *Enrolled nonpublic school pupil.* A pupil shall be regarded as enrolled in a nonpublic school after he is registered and is taking part in that school's educational program. A pupil who also attends a public school for specified courses not available to him in his private school, as provided by law, shall be entitled to transportation under the terms of and to the extent provided in the attorney general's opinion dated July 14, 1965, or such subsequent opinions as may be rendered on the subject.

3.2(11) *School day.* A school day shall be defined as the number of hours the school is actually in session in any one of its divisions. In order to be counted as a school day, a school must be in session a minimum of five and one-half hours for all grades above the third; four hours for grades one, two and three, respectively; and two and one-quarter hours for both the kindergarten and the nursery school. These minimum hours shall be exclusive of the lunch period.

3.2(12) *Day of school.* A day of school shall be defined as a day that the school is in session and the pupils are under the guidance and instruction of the teachers. School shall be considered in session during field trips and excursions if pupils are engaged in school projects or activities under the guidance and direction of teachers.

3.2(13) *Day of attendance.* A day of attendance shall be a day during which a pupil was present, for at least the above-prescribed minimum number of hours, under the guidance and instruction of the teachers. When a nursery school or a kindergarten is limited to half-day sessions, each half-day session attended by a pupil shall count as a day of attendance. A day of more than the minimum number of hours may not be counted as more than one day. Pupils shall not be counted in attendance on a day when school was dismissed for an improvement-of-instruction institute or other educational meeting.

3.2(14) *Aggregate days of attendance.* Aggregate days of attendance shall mean the sum of the days of attendance for all pupils who were enrolled during the school year.

3.2(15) *Average daily attendance.* Average daily attendance shall be defined as the average obtained by dividing the aggregate days of attendance for the school year by the total number of days school was legally in session. For example, if there had been 179 days of school and school was dismissed one day for an improvement-of-instruction meeting, the average daily attendance would be computed by dividing the aggregate days of attendance for the 179-day period by 179.

3.2(16) *Member.* A pupil shall be considered a member of a class or a school from the date he is enrolled until the date he leaves the class or the school permanently. The date of the pupil's withdrawal shall be the date on which it became officially known that he had left that class or school, which will not necessarily be the first day after the date he last attended. Membership, on any date, may be obtained by adding the total number of enrollments to the total number of re-enrollments and subtracting therefrom the total number of withdrawals. Membership may also be obtained by adding the total number present to the total number absent. Membership means the number belonging.

3.2(17) *Aggregate days of membership.* Aggregate days of membership shall mean the sum of the days of attendance and the days of absence for all pupils who were enrolled during the school year.

3.2(18) *Average daily membership.* Average daily membership shall mean the aggregate days of membership divided by the number of days of school.

3.2(19) *Pupils between seven and sixteen years of age.* When reporting the number of pupils enrolled who are between the ages of seven and sixteen during the school year, a pupil shall be counted if any portion of the school year falls between his seventh and sixteenth birthdays.

3.2(20) *High school dropout.* For purposes of school approval, a high school dropout shall be a pupil who has been in membership in grade nine, ten, eleven, or twelve in a school at any time, during the 12-month period from July 1 through the following June 30, who withdraws from such school for any reason other than those specified in section 257.27, and who is not an enrolled member of that school during the ensuing 12-month period.

A high school pupil shall be recorded as having transferred to another school if, within the 12-month period cited herein, he has become enrolled in a recognized educational institution.

A high school pupil shall not be regarded as a dropout within the meaning of section 257.27 if, within the 12-month period cited herein, he has been: (*a*) Issued a diploma in formal recognition of his successful completion of a high school program of instruction, or (*b*) issued either a certificate of attendance or of completion of a high school's program of instruction.

DIVISION III
ADMINISTRATION

3.3(257) Administration. The following standards shall apply to the administration of approved schools.

3.3(1) *Board records.* Each board shall adopt and maintain accurate records which shall provide for the recording of the minutes of all board meetings, coding of all receipts and expenditures, and the recording and filing of all reports. All public school boards shall maintain census records required by the appropriate sections of the Code and they shall retain copies of attendance reports on all children of compulsory school age who have attended nonpublic schools.

3.3(2) *Report of nonpublic school instruction.* Between September 1 and October 1 of each year the secretary of each public school board shall request from each nonpublic school located within the public school district a report of school instruction and attendance as required by section 299.3. Each such nonpublic school shall submit the required duplicate report on forms prescribed by the state board of public instruction. One copy

of this duplicate report shall constitute the report that the secretary of the public school board is legally required to file in the office of the county superintendent.

Each nonpublic school, between September 1 and October 1 of each year, shall send to each school district from which it receives pupils a list of the pupils of compulsory school age who are residents of that district and who are enrolled in that nonpublic school. The list shall include the name, grade, date of birth, name of parent or guardian and location of residence.

3.3(3) *Activity fund records.* Accurate, complete and up-to-date records of all pupil-activity funds shall be maintained according to a system approved by the state board of public instruction.

3.3(4) *Audit of school funds.* The results of the annual audit of all public school funds by a state auditor or a private auditing firm shall be made part of the official records of the board.

3.3(5) *State aid for an improvement-of-instruction meeting.* One day of state aid per pupil in average daily attendance shall be granted each year to each public school district that dismissed school a day for an improvement-of-instruction meeting called pursuant to chapter 272 of the Code. Two half-day meetings shall be regarded as equivalent to a one-day meeting.

3.3(6) *Time loss adjustment.* Time loss adjustment on general aid, for days lost, shall not be granted when the school term ends prior to May 30.

3.3(7) *Minimum school year.* The minimum length of the school year shall be 180 days. The one day or equivalent devoted to an improvement-of-instruction meeting shall be counted as one of the 180 days but the other 179 days shall be days of school.

3.3(8) *School system organizational structure.* Each board that maintains a school system comprising both an elementary and a secondary school shall adopt and record in its minutes an elementary- and secondary-school organizational structure consistent with 3.2(3), 3.2(4), 3.2(5), 3.2(6), 3.2(7), and 3.2(8).

3.3(9) *Elementary school organization.* Each board that maintains a nonpublic elementary school only, shall adopt and record in its minutes an elementary school organizational structure consistent with 3.2(3).

3.3(10) *Secondary school organization.* Each board, maintaining a nonpublic secondary school only, shall adopt and record in its minutes a secondary school organizational structure consistent with 3.2(4), 3.2(5), 3.2(6), 3.2(7), and 3.2(8).

3.3(11) *Records of certificates.* The board shall require each administrator, supervisor, teacher, assistant teacher, teacher associate and substitute teacher on its staff to supply evidence that he has registered with the county superintendent of schools a certificate which is in force and valid for the type of position in which he is employed. The minutes of the board shall show that this evidence has been supplied for each such person.

3.3(12) *Records required regarding teacher assignment.* The board shall require its superintendent or other designated administrative official to have on file at the beginning of and throughout each school year complete official transcripts of the preparation of all regularly employed members of the instructional professional staff. This official shall maintain for all members of said staff, including substitute teachers, a file consisting of copies of their legal certificates or copies of records made therefrom showing that they are legally eligible for the positions in which they are employed and that these certificates are registered in the office of the county superintendent of schools. The board shall also require said official to have on file for each member of the noninstructional professional staff a statement of professional recognition as defined in 3.4(2).

All members of the instructional professional staff shall teach only in those subjects, grades, or areas of special service in which they have met the personnel approval standards of the board of public instruction set out in the *Iowa Departmental Rules* and amendments thereto.

3.3(13) *Pupil accounting system.* Each board shall adopt and record in its minutes a system of pupil accounting that is consistent with the principles and procedures included in the state board of public instruction's handbook, *Pupil Accounting for Iowa Schools.*

3.3(14) *Permanent office records and cumulative records of pupils.* Each board shall require its administrative staff to establish and maintain an accurate and complete permanent office record for every enrolled pupil. This record shall be established immediately after a pupil enrolls. It shall be kept up to date; it shall be retained permanently; and it shall be stored in a fire-resistant safe or vault. A copy of this record shall be sent to the receiving school when a pupil transfers from one school or school system to another.

In addition to the permanent office record, the board shall require the instructional, guidance and administrative personnel to establish and maintain a pupil's cumulative record. This record shall be a collection of pertinent data relating to the pupil which may be of assistance in counseling him. This record shall be established immediately after a pupil enrolls and it shall be kept up to date. It shall be made readily available to all professional staff members who have a direct concern for the pupil's welfare. It, minus certain personal information of a restricted nature which may have had

value only to the school in which the pupil was enrolled, shall be sent to the officials of the receiving school when the pupil is transferred.

The permanent office record and the pupil's cumulative record shall be adequate in form and completeness when checked against the state board of public instruction's handbook, *Pupil Accounting for Iowa Schools.*

3.3(15) *Record of dropouts.* Each school shall prepare annually, in a manner prescribed by the state board of public instruction, a permanent office record of the number and percent of pupil dropouts for the preceding 12 months and this record shall clearly identify those pupils who are high school dropouts as defined in 3.2(20) and in section 257.27.

3.3(16) *Board's responsibility for establishing standards for high school graduation.* Each board that operates a secondary school which extends through grade 12 shall formulate, and record in its minutes, policies, consistent with law and these standards, that pupils must meet to be eligible for high school graduation.

DIVISION IV
SCHOOL PERSONNEL

3.4(257) School personnel. The following standards shall apply to the personnel employed in approved schools.

3.4(1) *Instructional professional staff.* Every person who holds a teacher's certificate endorsed for administering, supervising, teaching or performing a special school service in a school or school system shall be eligible for classification as a member of the instructional professional staff of the school or school system in which he is employed.

3.4(2) *Noninstructional professional staff.* Every person who holds a statement of professional recognition in one of the noninstructional areas listed in section 257.25(9),"*b*", or in one of the other noninstructional professional areas designated by the state board of public instruction, shall be eligible for classification as a member of the noninstructional professional staff of the school or school system in which he is employed.

3.4(3) *Basis for approval of professional staff.* Each member of the professional staff shall be classified as either instructional or noninstructional. A professional staff member shall be regarded as approved when he holds either an appropriate certificate and an approval statement indicating the specific teaching assignments he may be given, or, alternatively, a statement of professional recognition for the specific type of noninstructional school professional service for which he is employed.

3.4(4) *Substitute teacher.* A substitute teacher is hereby defined as a person who serves in place of a regularly employed teacher who is absent from his position. A person who holds only a substitute teacher's certificate shall serve as a teacher a maximum of 90 days during one school year in place of a regularly employed teacher.

3.4(5) *Assistant teacher.* A person employed by a board to serve as a teacher under the guidance of a teacher holding a professional certificate shall be classified as an assistant teacher and, at the minimum, he shall hold a certificate that authorizes such service.

3.4(6) *Teacher associate.* A person employed by a board not to teach but to supervise pupils on a monitorial or service basis when not in the presence of a properly certificated teacher, shall be classified as a teacher associate, and shall be registered for the performance of such service.

3.4(7) *Teacher aide.* A person who is authorized by a board to perform nonteaching assistance in supportive tasks which facilitate teaching, but who never teaches or supervises pupils, shall be classified as a member of the noncertificated personnel. Persons employed as teacher aides shall be at least 16 years of age.

3.4(8) *Required administrative personnel.* Each board that operates a school system consisting of both elementary schools and secondary schools shall employ as its executive officer and chief administrator a person who holds a teacher's certificate endorsed for service as school superintendent.

3.4(9) *Staffing policies — elementary schools.* The board operating an elementary school organized as defined in 3.2(3), or, alternatively, organized according to a plan submitted in accordance with the procedures described in 3.1(6), shall develop, adopt and record in its minutes staffing policies designed to attract, hold and effectively utilize competent professional personnel — instructional and noninstructional. Said policies shall include but not be limited to guidelines or criteria to be used in determining: (*a*) The scope and size of the staff; (*b*) the school or system-wide average class enrollment per teacher; (*c*) the maximum class enrollment per teacher; (*d*) extra-class duties; (*e*) time for planning and parent-teacher communications; (*f*) the employment of substitute teachers, assistant teachers, teacher associates, and teacher aides; (*g*) salaries and salary schedules, and (*h*) participation by members of the professional staff in the formation of school policies.

When grades seven and eight are a part of an organized and administered junior high school, the staffing policies adopted by the board for secondary schools shall apply.

3.4(10) *Staffing policies — secondary schools.* The board operating a secondary school organized according to one of the four patterns defined in 3.2(8), or, alternatively, organized according to a plan submitted in accordance with the procedures described in 3.1(6), shall develop,

adopt and record in its minutes staffing policies designed to attract, hold and effectively utilize competent professional personnel—instructional and noninstructional. Said policies shall include but not be limited to guidelines or criteria to be used in determining: (*a*) The scope and size of the staff needed to provide each class with an instructor who is approved to teach each course in which pupils are enrolled, and to provide the nonclass services mandated by section 257.25(7) "*a*", "*b*", and "*c*"; (*b*) the maximum pupil enrollment in each class; (*c*) the total number of classes including the number of different classes for which separate or special preparations must be made; (*d*) the assignment of nonteaching duties such as study hall monitoring and supervision of pupil activities; (*e*) the employment of substitute teachers, assistant teachers, teacher associates and teacher aides; (*f*) salaries and salary schedules; and (*g*) participation by members of the professional staff in the formation of school policies.

3.4(11) *Nursery school staff.* The staff of a nursery school shall consist of one teacher, one assistant teacher, and either one teacher associate or teacher aide for each 15 children or major fraction thereof, provided that no nursery school staff shall be assigned more than two groups of children.

3.4(12) *Provision for nursery school health supervision.* Each nursery school shall have health supervision, on at least a part-time basis, by a physician or by a person who has an Iowa license as a registered professional nurse.

3.4(13) *Annual check for tuberculosis.* All persons employed in approved schools shall be required to undergo an annual check for tuberculosis and file the results with the board.

3.4(14) *Physical examinations.* Except as otherwise provided in rules of this department, the board shall require each employee to file with it, at the beginning of his service and at three-year intervals thereafter, a written medical report of a physical examination by the licensed physician who has performed said examination.

DIVISION V
EDUCATIONAL PROGRAM

3.5(257) Educational program. The following standards shall apply to the educational program of approved schools.

3.5(1) *Curriculum defined.* The word curriculum is hereby defined as including all pupil experiences that take place under the guidance of the school. It shall be used to describe the school-connected learning experiences of any pupil and also to indicate the arrangement of a group of courses to be taken by groups of pupils having a common objective.

3.5(2) *Educational program defined.* The educational program is hereby defined as including the entire offering of the school, including the out-of-class activities, and the arrangement or sequence of subjects and activities. It may be referred to as the program of studies and activities.

3.5(3) *Educational program — form and content.* The educational program, as adopted by each board, shall set forth the administrative measures and the sequence of learning situations through which attempts are made to provide pupils with well-articulated, developmental learning experiences from the date of school entrance until high school graduation.

3.5(4) *Educational program—description and filing.* The board shall require its administrators and professional staff to develop and furnish a description of the total elementary- and secondary-school educational program that the board is willing to approve. This description, after having been adopted by the board, and all subsequent revisions thereof shall be filed with the state department of public instruction as evidence of compliance with the provisions of law as itemized below.

The description of the elementary school educational program shall be in sequential order and shall explain the manner in which pupils are served in each of the areas of instruction specified in chapters 257 and 280 of the Code.

The description of the educational program for any separately organized and administered junior high school shall be in sequential order and shall explain the manner in which pupils are served in each of the areas of instruction specified in chapters 257 and 280 of the Code.

The description of the secondary school educational program, excepting that part which is separately organized and administered as a junior high school, shall be in sequential order and shall explain how the pupils are served in each of the subjects and services specified in chapters 257, 280, 321 (section 321.178) of the Code, provided that the description adopted by the board of a nonpublic school may omit any reference to driver education.

3.5(5) *Provision for special education services.* The board maintaining a junior and a senior high school, a junior or a senior high school, or a combined junior-senior high school shall adopt and record in its minutes a plan which makes the provision for special education services required by section 257.25. The required services shall be those defined in the rules of the state board of public instruction implementing chapter 281 of the Code, and shall be designed for handicapped pupils as defined therein. This plan shall be filed with the state department of public instruction as evidence of compliance with the approval-standards law.

3.5(6) *Instructional guide for each subject.* Classroom instruction in each subject taught in the schools shall be based on careful planning. The resource guide, developed for each instruc-

tional sequence, shall include a statement of its educational purposes; suggested instructional activities, materials and content; and a description of the means of evaluating each pupil's progress during the educational sequence.

3.5(7) *Subject offering.* A school shall be judged as offering a subject when: (*a*) The teacher of the subject has met the personnel approval standards of the state board of public instruction for that subject; (*b*) instructional materials and facilities for that subject have been provided; and (*c*) pupils have been informed, on the basis of their individual aptitudes, interests and abilities, about the possible value of the subject for them.

A subject that the law requires to be taught annually shall be regarded only when, during each year, pupils enroll in it and are instructed in it in accordance with all applicable standards outlined herein. Subjects which the law requires schools to offer and teach shall be made available during the school day in session as defined in 3.2(11) and 3.2(12) herein.

3.5(8) *Unit of credit.* A unit of credit is hereby defined as that amount of credit earned by a pupil who successfully completes a course that is either pursued for 36 weeks for the required number of minutes per week as specified by the state board of public instruction or as an equated requirement as part of an innovative program properly described and filed with the state board of public instruction as prescribed in 3.1(6) herein. A fractional unit of credit shall be awarded in a manner consistent with this standard.

In order for a course not specifically designated as a laboratory course to yield one unit of credit, the course must either be pursued for 36 weeks for at least 200 minutes per week or for the equivalent of 120 hours of instruction.

In order for a course specifically designated as a laboratory course to yield one unit of credit, the course must either be pursued for 36 weeks for at least 275 minutes per week or for the equivalent of 165 hours of instruction.

3.5(9) *Organization of daily and weekly schedule.* Daily and weekly schedules shall be organized by school officials in a manner which, in their judgment, best fits the conditions within their schools. Instructional innovations—such as team teaching, provisions for individual students and modular scheduling—which require variable lengths of time and other instructional arrangements shall be permitted provided such arrangements are described and filed with the state board of public instruction in accordance with 3.1(6).

Each course taught shall, to some degree, incorporate a laboratory approach to learning. Courses in which one-third or more of the instruction time is laboratory based, and such other courses as the state board of public instruction may designate, shall be considered laboratory courses in order to yield one unit of credit.

3.5(10) *Program of testing and evaluation.* The board shall require its administrators and professional staff to develop and present to it for approval a long-range program of systematic, periodic testing and evaluation of all pupils enrolled.

This program of testing and evaluation, which shall be co-ordinated throughout all elementary- and secondary-school grades, shall include the use of comparable tests that have yielded stabilized and consistent year-to-year data about pupils' development in relation to specified educational objectives. The school staff shall show how teacher-made tests, observational records and informal (and largely subjective) appraisals of pupils' development fit into this program. The minutes of the board shall show that this program has been adopted.

Individual psychological examinations of pupils shall be administered by a person holding a teacher's certificate endorsed for service as a school psychologist or by a person who has been approved by the state department of public instruction as competent specifically in the administration of individual psychological examinations.

3.5(11) *Evaluation of educational program.* School officials shall, year-by-year, systematically evaluate their educational program to determine its effectiveness and its adequacy in terms of its scope. In making this evaluation, school officials shall: (*a*) Use techniques such as conducting follow-up studies of graduates, preparing pupil dropout studies and identifying over- and under-achievers; and (*b*) take into consideration the comments and recommendations of pupils, parents and professional staff members obtained through surveys, discussion groups, conferences and questionnaires.

3.5(12) *Parent-teacher communications.* School officials in every school shall provide for parent-teacher communications to improve the pupil-home-school relationship, and to meet more effectively each individual pupil's needs.

3.5(13) *Guidance program in secondary schools.* Every board that operates a junior high school, a combined junior-senior high school, or a senior high school shall provide therein an organized and functioning guidance program to aid pupils with their personal, educational, and vocational planning and problems. The guidance program shall be staffed with guidance counselors who have met the professional standards established by the state board of public instruction for such personnel. Their number, as specified in chapter [257.25(9)"*b*"], and their manner of use shall be set out in the minutes of the board.

Guidance counselors shall be provided adequate space, facilities, and materials, and they shall be allotted time on the program schedule for performing guidance services. Individual and group conferences with pupils, parents, and professional

staff members shall also be provided for in the guidance program.

3.5(14) *Guidance services in elementary schools.* Effective September 1, 1970, the board shall institute a program of guidance services for its elementary schools. Each pupil shall have access to the minimum amount of guidance service specified by the board and recorded in its minutes.

3.5(15) *Nursery school program.* Each board that operates a nursery school shall require its professional staff to develop an educational program that meets the conditions for nursery school activities as specified in chapter 257 of the Code. This program and all subsequent revisions thereof, when adopted by the board, shall be recorded in its minutes.

3.5(16) *Kindergarten program.* Each board that operates a kindergarten shall require its professional staff to develop, subject to official adoption by said board, an educational program that meets the conditions for kindergarten activities as specified in chapter 257 of the Code. This program and all subsequent revisions thereof, when adopted by the board, shall be recorded in its minutes.

3.5(17) *Instructional supplies.* Instructional supplies are hereby defined as items that are used in the teaching-learning process and that are usually consumed in less than five years. In determining how to classify borderline items as instructional supplies rather than as instructional materials or equipment, the financial accounting and the educational plant and facilities handbooks published by the state board of public instruction shall be used as guidelines.

3.5(18) *Instructional supplies required.* Each board shall provide each school with instructional supplies sufficient for each subject and each supporting service offered in the school. Handbooks published by the state board of public instruction which relate to each subject and supporting service shall be used as guidelines.

3.5(19) *Instructional materials and equipment.* Instructional materials and equipment are hereby defined to mean science apparatus, laboratory tables and demonstration desks; shop tools and machinery; gymnasium equipment and apparatus; equipment for business education, art, industrial arts and music rooms; audio-visual aids equipment; equipment needed in rooms designed especially for each subject taught (such as English and language arts, foreign languages, mathematics, sciences, social studies and vocational subjects); maps, atlases, and charts; library books and periodicals; encyclopedias and reference books and the like.

3.5(20) *Instructional materials and equipment required.* Each board shall provide each school with instructional materials and equipment that are adequate to meet the needs for all courses, activities, and services. Handbooks published by the state board of public instruction relating to each subject and supporting service shall be used as guidelines.

3.5(21) *Elementary school library materials.* Centralized library materials shall be provided in each elementary school system, even though at any given time the bulk of the collection of books and other types of learning materials is actually housed in classrooms. Items such as books, pictures, maps, charts, audio-visual equipment with appropriate slides, films, filmstrips and sound recordings and museum items shall be included as parts of said materials. The entire collection shall be cataloged and classified according to the Dewey decimal or comparable system and made accessible to teachers and pupils alike. An area shall be provided in each elementary school attendance center for the preparation of learning and instructional materials.

DIVISION VI
ACTIVITY PROGRAM

3.6(257) Activity program. The following standards shall apply to the activity program of approved schools.

3.6(1) *Pupil activity programs—general guidelines.* Each school or school system shall have a pupil activity program sufficiently broad and balanced to offer opportunities for all pupils to participate. The activity program shall be co-operatively planned by pupils and teachers, shall be supervised by qualified school personnel, and shall be designed to: (*a*) Meet the needs and challenge the interests and abilities of all pupils consistent with their individual stages of development; (*b*) contribute to the physical, mental, aesthetic, civic, social, moral, emotional and spiritual growth of all pupils; (*c*) offer opportunities for both individual and group activities; (*d*) be integrated with the instructional program; (*e*) provide balance whereby a limited number of activities will not be perpetuated at the expense of others; (*f*) be controlled to a degree that interscholastic activities do not unreasonably interfere with the regularly scheduled daily program, and (*g*) furnish guidance to pupils to insure that they regulate the amount of time they participate in the activity program so that they will not jeopardize benefits they might receive from other aspects of the school program.

The school shall make reasonable efforts to provide and maintain adequate facilities and equipment to develop and encourage a broad activities program.

3.6(2) *Pupil activity program in elementary schools.* Elementary schools shall have a broad and balanced pupil activity program, closely integrated with the instructional program, and designed to help pupils achieve maximum personal development. The program shall provide opportunities for pupils to participate in a variety of

physical activities, in arts and crafts, music, creative dramatics, homeroom and citizenship projects, class projects, hobby pursuits and other activities the school may provide.

3.6(3) *Interscholastic sports activities in elementary school.* Elementary schools comprised of kindergarten and grades one through six, shall not participate in, encourage, promote or sponsor interscholastic sports activities.

3.6(4) *Supervised intramural sports.* Supervised intramural sports activities shall be encouraged in grades seven, eight and nine.

Two levels of priority shall be considered in this standard: First, the school or school system shall provide professionally qualified personnel, space and facilities, equipment and supplies, and a broad program of basic instruction in physical education, based upon individual and group needs of all pupils; second, the school or school system shall sponsor a broad and varied, voluntary program of intramural sports activities for all pupils in grades seven, eight and nine.

3.6(5) *Pupil activity program in junior high schools.* The junior high school shall have a broad and balanced pupil activities program closely integrated with the instructional program, designed to help pupils achieve maximum personal development. In addition, opportunities shall be provided in the areas of clubs, intramural athletics, music groups, supervised social activities, student government embodying the principles of democracy and other activities to meet the increasing range of interests, abilities and aptitudes of junior high pupils.

3.6(6) *Pupil activity program in senior high schools.* The senior high school shall have a pupil activity program based on mutual as well as individual needs, interests, abilities and enthusiasms. The program shall be organized and administered in such a manner that broad and varied experiences which contribute to the enrichment of the total educational program will be available. Opportunities shall be provided in the following areas: (*a*) Physical activities and athletics, including intramurals; (*b*) speech activities and dramatics; (*c*) vocal and instrumental music; (*d*) student council organization embodying democratic principles; (*e*) journalism; (*f*) clubs and social activities; (*g*) class activities; (*h*) assemblies and (*i*) other areas as may be developed under adequate school supervision.

3.6(7) *Balanced activity program required.* The activity program in the senior high school in specific areas shall not be overemphasized to the extent that other worthwhile and constructive activities are unduly weakened or eliminated.

DIVISION VII
EDUCATIONAL PLANT

3.7(257) Educational plant. The following standards shall apply to the educational plant of approved schools or school systems.

3.7(1) *Educational plant defined.* The educational plant of a school or school system is hereby defined as the site, buildings and equipment that constitute the physical facilities.

3.7(2) *Educational plant requirements.* The educational plant shall be adequate to support all of the courses, activities and services offered by each school.

3.7(3) *Safe buildings and grounds required.* Every school building shall be safe. The buildings and grounds shall be so maintained as to provide a safe and healthful environment.

3.8 Reserved for future use.

DIVISION VIII
PROVISIONS FOR IN-SERVICE GROWTH OF PROFESSIONAL STAFF

3.9(257) In-service growth of professional staff. The following standards shall apply to the provisions for the in-service growth of the professional staff.

3.9(1) *Budget for in-service growth.* The board—in recognition of the high importance of the teacher in the establishment and maintenance of an optimal learning environment for pupils—shall make provision in its budget for the support of a planned, comprehensive program for the in-service growth of its professional staff—instructional and noninstructional.

3.9(2) *Professional library.* The board shall establish and maintain a professional library-instructional materials center for use by its professional staff. The budget shall provide for annual expenditures to make planned additions to the equipment, supplies, and professional books, magazines and instructional print and nonprint materials essential to the work and professional growth of the staff.

[Filed December 21, 1966;
amended March 2, 1971, May 4, 1972]

TITLE III
AREA VOCATIONAL SCHOOLS, JUNIOR AND COMMUNITY COLLEGES

CHAPTER 4
APPROVAL OF PUBLIC JUNIOR OR COMMUNITY COLLEGES

4.1(286A) Definitions. For the purposes of these approval standards, the following definitions shall be used.

4.1(1) *A "junior or community college"* is a collegiate institution offering (*a*) Not to exceed two years of work beyond the secondary school in college courses, (*b*) programs of two years or less of other post high school courses or (*c*) courses not normally accepted towards a bachelor's degree.

A public junior or community college is a local tax-supported institution under the jurisdiction of the local board of education, whose primary purpose is to provide for the educational needs of the community it serves. It must meet the needs of students who plan to continue their education in a senior college or the needs of those who wish to increase their knowledge or skills in special areas.

4.1(2) *"Accreditation"* is a process of granting approval to a collegiate institution which results in the acceptance of its credits by other collegiate institutions. It may carry with it other advantages such as the right to receive financial aid.

Regional accreditation in the midwest is by the North Central Association of Colleges and Secondary Schools. Junior colleges shall work toward meeting these regional standards and in a reasonable time be expected to apply for and gain accreditation by the North Central Association.

State accreditation in Iowa is provided through standards adopted jointly by the state board of public instruction and state board of regents. State accreditation is required in order that credits for a junior college be accepted by the three Iowa public senior institutions of higher learning. It is also required if a junior college is to receive state financial aid.

4.1(3) *Terms—junior or community college.* For the purpose of these regulations, the words "junior" and "community" shall be considered the same.

4.2(286A) Superintendent. The superintendent of schools in the local district shall be the chief administrative officer of the junior college. He shall delegate to the dean all necessary administrative and supervisory responsibilities to insure an efficient college operation.

4.3(286A) Dean—powers and duties.

4.3(1) The dean shall be responsible for the operation of the college:

a. Its educational program.

b. Its faculty and student personnel programs.

c. The use of facilities assigned to it. (If operated in the same building as a high school this responsibility shall be co-ordinate with that of the principal of the high school.)

d. The dean may not serve as principal of a high school.

4.3(2) In colleges enrolling 200 or more students carrying 12 semester hours or more in average daily enrollment, the dean shall devote full time to junior college administrative and supervisory duties. If the college has additional administrative officers having time set aside for administrative duties, the dean shall not devote more than 40 percent of his time to teaching or guidance.

4.3(3) In colleges enrolling less than 200 full-time students carrying 12 semester hours or more in average daily enrollments, the dean shall devote at least 50 percent of his time to administrative duties.

4.4(286A) Financial records and reports. The public junior college shall, as a condition for eligibility for state aid, maintain accurate financial records and make reports in the form prescribed by the state department of public instruction. Such records must show all costs of operation and reasonable share of costs for shared facilities or personnel. It shall neither bear the financial burden of other school units nor have its costs borne by other units.

4.5(286A) Minimum enrollment. A junior college shall be considered to have an adequate minimum enrollment to receive state aid if it satisfies the following criteria:

4.5(1) It is able to provide adequate classes of reasonable economic size as needed by the students of the district.

4.5(2) It meets the needs of the students of the local area in terms of available curricula as evidenced by periodic surveys.

4.5(3) It shows over the preceding five years by its enrollment that it has stability.

4.6(286A) Academic records and transcripts. The junior college shall maintain an adequate personnel record for each student which shall show clearly a summary of the secondary school record and the college work for each session attended. The junior college shall retain the original college transcripts for students who transfer from another college. The junior college shall issue official transcripts which may be photo copies of the permanent record and which shall contain the signature of the Dean or the Registrar and the imprint of the college seal. The transcript or the accompanying sheet of information shall provide as a minimum the items enumerated in the publication "An Adequate Transcript Guide" issued by the American Association of Collegiate Registrars and Admissions Officers.

4.7(286A) Catalog and announcements. The catalog of the junior college shall be the official publication of the college. The catalog shall present factual information on courses offered, available curricula, staff data, college rules and regulations, cost information, philosophy and objectives of the institution and other information of a general nature. A catalog shall be published at least every other year. In general, material of an advertising or publicity nature shall be published separately from the catalog.

4.8(286A) Admission requirements. The standard minimum requirements for admission to a junior college shall be graduation from an approved high school, or its equivalent. The junior college shall have the right to either establish admission requirements that are higher than this basic policy or to waive the basic admission requirements for students who will be taking only courses not leading to a baccalaureate degree. The method of determining the equivalance of a high school diploma shall be consistent with the practices followed by the three state institutions for higher education in Iowa.

4.9(286A) High school students. If the standard college course work offered by a junior college is of college level, most high school students will not be qualified for college level courses until after high school graduation. The faculty of a junior college may establish, however, standards under which high school seniors of special ability may take college course work for credit if the student has been registered for sufficient high school units to complete the requirements for graduation. The standards established by the faculty shall be filed with and approved by the department of public instruction.

4.10(286A) Academic year and class periods. The academic year of a junior college shall provide for a minimum of 34 weeks of instruction. Each recitation or lecture section shall be at least 50 minutes in length.

4.11(286A) Extra sessions restricted. As a general principle, Iowa public junior colleges shall not hold summer schools or offer classes meeting only on Saturdays. If under special conditions a departure from this principle seems justified, special permission must be secured from the state department of public instruction. If permission is granted, the same standards shall be used as for regular classes and in the case of Saturday classes they will be counted as a part of the instructor's regular weekly load.

Evening classes are a standard part of a junior college program and must be counted as a part of an instructor's load if he also teaches regular daytime classes. Normally regular day college students will not take evening classes.

4.12(286A) Credit towards a degree. Not more than one-half of the collegiate requirements for a baccalaureate degree from a state institution for higher learning may be satisfied by credit earned in a junior college.

4.13(286A) Graduation requirements. A minimum of 60 semester hours of junior college credit exclusive of required courses in physical education and military science shall be required for graduation from a junior college. The diploma granted for completion of a junior college curriculum may be called an Associate in Arts, an Associate in Science, or an Associate degree of another designation. Documents of a lesser status may also be awarded for graduation.

No student shall be certified for graduation from a junior college who has not earned an overall grade point ratio of 1.80 or above. Grade points shall be awarded as follows: A—4, B—3, C—2, D—1, F—0.

4.14(286A) High school accreditation. A public junior college shall not be eligible to be approved unless the high school or high schools operated by the same district are accredited by the North Central Association.

4.15(286A) Faculty.

4.15(1) *Instructor qualifications.* Junior college instructors must hold certificates issued by the board of public instruction which are valid for teaching in grades 13 and 14.

Junior college instructors shall either have had collegiate preparation in junior college philosophy and teaching methods, and in counseling and guidance at the college level; or shall secure such preparation through participation in an approved in-service program.

4.15(2) *General requirements.* The instructor shall hold a master's degree from a recognized graduate school with a graduate major in his principal field of instruction and at least 15 semester hours of graduate credit in any other field taught.

4.16(286A) Art instructor requirements. The instructor in art shall hold a master's degree with a major in art from a recognized graduate school; or, in lieu thereof, a certificate endorsed specifically for the teaching of art.

4.17(286A) Qualifications for librarians. A person serving as librarian for half-time or less shall have completed 20 semester hours of preparation in library science; or, in lieu thereof, said person shall hold a certificate endorsed for service as a school librarian; a person serving as librarian for more than half-time shall have completed 15 hours of graduate credit in library science, and said person shall hold a certificate endorsed for service as a school librarian.

4.18(286A) Music instructor. The instructor in music shall hold a master's degree with a major in music from a recognized graduate school; or, in lieu thereof, a certificate endorsed specifically for the teaching of music.

4.19(286A) Physical education instructor. The instructor in physical education shall hold a master's degree with a major in physical education from a recognized graduate school; or, in lieu thereof, a certificate endorsed specifically for the teaching of physical education.

4.20(286A) Accounting instructor. The instructor in accounting shall hold a master's degree from a recognized graduate school with 15 semester hours of credit in accounting of which at least three semester hours shall be graduate credit.

4.21(286A) Instructors in nontransfer courses. The instructor in any course which is not usually included in programs leading to the bachelor's degree in accredited colleges and universities shall have had appropriate preparation or competence for each such course taught as determined by the official in the department of public instruction who supervises junior colleges.

4.22(286A) Drawing instructor. The instructor in engineering drawing shall hold a bachelor's degree from a recognized collegiate institution with at least eight semester hours of credit in engineering drawing of the type required in a basic curriculum in engineering.

4.23(286A) Typing and shorthand instructor. The instructor in shorthand and typewriting shall hold a master's degree from a recognized graduate school with either a graduate or an undergraduate major in the field of business or commerce, and with not less than five semester hours of graduate or undergraduate credit in each of these subjects.

4.24(286A) Instructor workload. The load of an instructor in a junior college shall not exceed 16 semester credit hours. All junior college administrators shall use the following uniform method of computing the teaching load:

4.24(1) Junior college nonlaboratory courses shall carry the same number of semester credit hours as are given in the course.

4.24(2) Junior college laboratory classes, extracurricular supervision, and administrative duties shall be weighted .70 per clock hour.

4.24(3) High school classes shall be weighted .70 per class period.

4.24(4) High school extracurricular supervision and administrative duties shall be weighted .50 per clock hour.

4.24(5) Adult education teaching assignments shall constitute a part of the 26 semester hour load and shall be weighted at .70 per clock hour of instruction except when carrying semester hours of college credit in which case items 1 and 2 will apply.

4.25(286A) Faculty organization. The faculty shall be regularly organized and meet regularly for the purpose of study and development of the curriculum, improvement of instruction, development of general policy and such other matters as are appropriate to a college faculty. It is essential that the organized faculty have definite responsibility in the operation of the college.

4.26(286A) Curriculum. A junior college shall provide college courses in English, mathematics, the physical or natural sciences, the social sciences, and the humanities. Foreign language, business and other college courses may be offered in accordance with local needs where the community is able to supply the necessary equipment and qualified teacher or teachers.

On the basis of determined community or area needs, junior colleges may offer courses which are basically technological, service or vocational in nature. These courses may differ in content, purpose and length from college courses. Differences that do exist shall be noted in the official publications of the junior college. Junior colleges making such offerings shall comply with the requirements for each course in terms of teacher competency and instructional materials which the appropriate state supervising agency of the junior colleges shall establish from time to time.

4.27(286A) Work standards and student load. Each course which is offered for college credit in a junior college shall be taught at a standard consistent with the quantity and quality of similar courses offered in accredited senior colleges.

A normal full-time student-load shall be 16 semester hours. Extra work may be taken by superior students with faculty approval but under no circumstances shall any student be permitted to register for more than 20 semester hours of work.

4.28(286A) Library. In evaluating a junior college library, for purposes of approval hereunder, consideration shall be given to the following specific recommendations:

4.28(1) *Organization and administration.* The library shall be adequately housed and professionally administered with books well distributed. An appropriate reading room, separate from the high school library if possible, should be open to all students throughout the day. Adequate seat-

ing space (recommended to seat 20 percent of the student body) shall be provided.

4.28(2) *Adequacy of materials.* The library shall contain adequate basic general reference books, and appropriate current periodicals in sufficient variety for each department in which instruction is given.

4.28(3) *Annual appropriation.* In each junior college there shall be an annual appropriation for the purchase of new books, exclusive of government documents and periodicals, of not less than $1000 or ten dollars per student, whichever is greater.

4.28(4) *Cataloging.* Books must be properly cataloged.

4.28(5) *Co-ordination with other library facilities.* In no case shall the junior college depend upon the city library for any large share of materials or facilities unless it is close enough for students to use it for study during the school day and unless the junior college has adequate control over the books purchased and their use.

4.28(6) *Use by students and staff.* Both students and staff members shall have free access to all library facilities.

4.29(286A) Equipment, laboratories and supplies. The junior college shall provide adequate equipment, laboratories and supplies in relation to the courses offered. Annual budgetary provision shall be adequate to keep instructional material, equipment and facilities up-to-date.

4.30(286A) Physical plant. The location, buildings and equipment of a junior college shall be well maintained and in good repair. They shall be clean, orderly and in good hygienic condition. A consistent plan of systematic maintenance shall be in evidence.

The physical plant shall be adequate in size and properly equipped for the program offered by the college. If space is shared with a high school, there shall be sufficient separation of rooms assigned to permit the development of a college atmosphere. Office space for the junior college shall be separate from the high school office.

4.31(286A) Student personnel.

4.31(1) *Extracurricular activities.* The junior college shall provide sufficient extracurricular activities to afford its students with an opportunity for the development of leadership and initiative. All extracurricular activities of the college must be under the direct supervision of qualified members of the junior college faculty.

4.31(2) *Counseling and guidance.* A junior college shall provide guidance services which serve all students enrolled and which utilize the aid of staff members, school facilities and community agencies. These services should include curriculum planning, student counseling, standardized testing, collection of student personal data, job placement and follow-up studies.

The guidance services shall be directed by a staff member specially prepared and qualified. Allotments shall be made of time, space and funds which are adequate for a comprehensive guidance program for the college.

CHAPTER 5
AREA VOCATIONAL SCHOOLS AND COMMUNITY COLLEGES

5.1(280A) Form and content of notice of intent. The form and content of the notice of intent to form the proposed merged area, required by statute to be published by each county board of education which is a planning board, within 30 calendar days after approval by the state board of public instruction of the plan for such area, are hereby prescribed to be substantially as follows:

NOTICE OF INTENT
TO FORM A PROPOSED
MERGED AREA

Pursuant to Section 280A.10, subsection 1, Code of Iowa notice is hereby given by the .....County Board of Education, a planning board within the meaning of said section, that the State Board of Public Instruction met on the ..... day of....., 19...., and approved a proposed plan for the purpose of establishing an area .....

(Here insert name of county.)

(Here insert "voca-

..... ; and designated
(tional school" or "community college")
said area as merged area (Education) .....
...., at ....., said
(Here insert post-office address of administrative office)
area to include all of the territory in the school systems of .....
(Here name county school systems included in their entirety.)
and .....
(Here describe included territory in county school sys-
..... , as the said
tems, if any, not included in their entirety.)
county school systems or designated parts thereof existed on the ..... day of....., 19....; and designated the location or locations of said area vocational school (or community college) as .....
(Here specify the officially-designated location
..... ; and officially designated director
or locations.)
districts in said proposed merged area as conterminous with the territorial boundaries of .....
(Here describe director districts in terms of boundaries of
..... , from
existing county school systems or local districts.)
which a governing and tax-certifying board of directors for said merged area, composed of one director elected from each director district, will be elected upon final approval by said planning board of the proposal to form said merged area.

Notice is further given that the purpose for formation of the said proposed area is to offer to residents of said proposed area, to the greatest extent possible, educational opportunities and services as follows: (Here insert such of the following services applicable to the proposal.)

1. The first two years of college work including preprofessional education.
2. Vocational and technical training.
3. Programs for in-service training and retraining of workers.
4. Programs for high school completion for students of post-high school age.
5. Programs for all students of high school age who may best serve themselves by enrolling for vocational and technical training while also enrolled in a local high school public or private.
6. Student personnel services.
7. Community services.
8. Vocational education for persons who have academic, socio-economic or other handicaps which prevent succeeding in regular vocational educational education programs.
9. Training, retraining and all necessary preparation for productive employment of all citizens.

Notice is further given that the county board of education of ..... county
(Here insert name of county.)
hereby expresses its intent to act with the several county boards of education having jurisdiction of the territory hereinabove described in the formation of the merged (education) area hereinabove described.

Dated at ....., this....day of....., 19.....

.....
President, ...
County Board of Education

.....
County Superintendent of Schools

[*Rules 5.2(280A) to 5.13(280A) were filed as joint rules with the Board of Regents and the Board of Public Instruction.*]

5.2(280A) Definitions. For purposes of these approval standards, the following definitions shall be used.

5.2(1) *Accreditation.* Accreditation is the process of granting approval to an institution to indicate that such institution has met the minimum requirements of excellence for an institution of its type.

5.2(2) *Area community college.* An area community college shall satisfy the definition of both an "area vocational school" and an "area community college" as set forth in sections 280A.1 and 280A.2.

5.3(280A) Administration.

5.3(1) *Superintendent.* The superintendent, who shall be the holder of a teacher's certificate authorizing service as superintendent of an area vocational school or area community college, shall be the chief administrative officer of the area community college operated under the jurisdiction of a merged area board, and he shall be the executive officer of that board. The superintendent shall be responsible for the operation of the area community college with respect to its educational program, its faculty and student personnel programs, and the use of its facilities. He shall delegate to the directors all necessary administrative and supervisory responsibilities to insure an efficient operation of the institution.

5.3(2) *Administrative assistant.* The administrative assistant shall be responsible to the superintendent for projects and duties assigned.

5.3(3) *Business manager.* The business manager shall perform the functions of financial accounting, record keeping and reporting, and he shall implement decisions of the administration relative to budgeting. In addition, he shall be responsible for inventory keeping, equipment and plant maintenance, operation of plant and operation of services such as food service and bookstore.

5.3(4) *Director.* A director, who shall be the holder of a teacher's certificate authorizing service in the administrative position of director of a division of an area community college or of a separate attendance area, shall be administratively responsible to the superintendent.

5.3(5) *Chairman or department head.* A chairman or department head is a person who holds a teacher's certificate authorizing service as

community college or vocational school instructor and who heads a department of instruction within a division.

5.3(6) *Administrative structure.* Each merged area board, subject to the approval of the state board of public instruction, shall, for each educational institution or branch thereof which it may operate, establish and staff an administrative structure consistent with the educational services offered. Each area community college shall have the following divisions with a director, responsible to the superintendent, for each such division: Vocational-technical education, adult or continuing education, education in arts and sciences, student personnel services and institutional services. If additional attendance centers are operated, a center director shall be appointed for each such center.

5.3(7) *Financial records and reports.* The area community college shall maintain accurate financial records and make reports in the form prescribed by the state department of public instruction.

5.3(8) *Enrollment.* An area community college shall meet minimum enrollment requirements if it offers instruction as outlined in 5.5(280A), and if, to the satisfaction of the state board of public instruction, it: (*a*) Is able to provide classes of reasonable economic size as needed by students of the merged area, (*b*) meets the needs of the students of the merged area in terms of available curricula as evidenced by periodic geographical area occupational surveys, and (*c*) shows by its past and present enrollment and placement picture that it meets the individual and employment needs.

The full-time equivalent of part-time students shall be determined by dividing by twelve the sum of all credit hours carried by all part-time students.

The total full-time equivalent enrollment of an institution shall be determined by adding to the quotient above, the total number of full-time students.

5.3(9) *Student records and transcripts.* The area community college shall maintain for each student a permanent record which shall include: (*a*) A summary of the secondary school records, (*b*) original copies of official transcripts on intransferring students, (*c*) a record of each course in which the student has been enrolled. The permanent records shall be maintained in perpetuity, and they shall be kept in a fire resistant storage located in a designated administrative office.

A cumulative record folder, including copies of both the permanent record and a compilation of any data which will assist the faculty members to understand the student better and to assist the student to develop his talents to the greatest extent possible, shall be maintained for each student, and it shall be located in a guidance office or records center.

Official transcripts of the permanent student records shall be issued to the student involved and to authorized persons upon the approval and signature of the designated school official. The transcripts shall provide, as a minimum, the items enumerated in any adequate transcript guide which the state department of public instruction may designate.

5.3(10) *Registrar.* The registrar shall provide for all student registrations, keep the official student records, issue all transcripts of student records, maintain statistics on student enrollments, class size, room and space utilization and other pertinent data.

5.3(11) *Admissions officer.* The admissions officer shall enforce the policies of the admissions requirements, receive and act upon all applications for admission, co-operate with the directors and department heads, and co-operate with the public schools in the area.

5.3(12) *Catalog.* The catalog of the area community college shall be the official publication of the college. It shall include accurate information on the following: (*a*) Statement of institutional policy; (*b*) listing of administrative, faculty, and staff personnel; (*c*) curricular offerings; (*d*) all courses by course number, title, credit hours, and description; (*e*) admission requirements; (*f*) retention standards; (*g*) graduation requirements; (*h*) grading system; (*i*) rules of conduct; (*j*) college costs and (*k*) institutional accreditation or approval. The catalog shall be published at least every other year.

5.3(13) *Admission requirements.*

a. Arts and sciences. The minimum requirement for admission as an entering freshman, including preprofessional education, shall be graduation from an approved secondary school or its equivalent. The method of determining equivalency of a secondary school diploma shall be consistent with the practices employed by the three state institutions for higher education in Iowa. The minimum requirement for admission of a student transferring from another college shall be completion of college credit from an accredited collegiate institution. The method of determining accreditation of an institution shall be in accordance with recognized institutional standards.

b. Technical curricula. The minimum requirements for admission to technical curricula shall be: (1) Graduation from an approved high school, or evidence of demonstrated interest, aptitude, and ability to profit from technical education; (2) possession of physical, mental, and emotional capability to profit from technical education and (3) fulfillment of the prerequisites for enrollment in a curriculum including the meeting of specific standards for entrance to the particular technical curriculum which shall have been established by the state board of public instruction.

"Part-time supplemental courses" are those in which instruction is given to individuals for the

purpose of increasing or extending their skill and knowledge in the occupation in which they are or have been engaged. Admission to such courses in a technical area shall be limited to persons who have left the full-time school, under conditions not in violation of the compulsory school law, and who are or have been employed in the activity in which instruction is sought.

c. Vocational. The standard minimum requirements for admission to vocational curricula shall be: (1) Evidence of demonstrated interest, aptitude, and ability to profit from vocational education; (2) possession of physical, mental, and emotional capability to profit from vocational education and (3) fulfillment of the prerequisites for enrollment in a curriculum including the meeting of specific standards for the particular vocational curriculum which shall have been established by the state board of public instruction.

"Part-time supplemental courses" are those in which instruction is given to individuals for the purpose of increasing or extending their skill and knowledge in the occupation in which they are or have been engaged. Admission to such part-time courses in a vocational area shall be limited to persons who have left the full-time school, under conditions not in violation of the compulsory school law, and who are employed in the activity in which instruction is sought.

d. Vocational education for persons with handicaps. The requirements for admission to programs of vocational education for persons who have academic, socio-economic, or other handicaps which prevent succeeding in regular vocational education programs shall be based on analysis, evaluation, and screening of each individual's needs, abilities and interests in accordance with procedures established by appropriate divisions of the state department of public instruction.

e. High school completion. The requirements for admission of persons to programs for high school completion shall be: (1) Chronological age of the typical high school graduate, and (2) evidence of interest and ability to complete a high school curriculum.

f. Adult general education courses. The requirements for admission of persons to adult general education courses shall be: (1) Chronological age of the typical high school graduate, and (2) evidence of interest.

5.3(14) *High school students in arts and science courses and in vocational-technical courses.*

a. Arts and science courses. Students with demonstrated superior competence in specific areas of academic fields may be admitted to college level course work in comparable areas for college credit. Authorization to undertake such work shall have co-operative approval of the college administration and the high school principal.

b. Vocational-technical courses. Courses for all students of high school age who may best serve themselves by enrolling for vocational and technical training while also enrolled in a local high school, public or private, shall be offered in accordance with plans developed for such students subject to approval by the state department of public instruction.

5.3(15) *School year and length of periods.* The length of the school year and the length of periods for: (*a*) Offerings comprising the first two years of college work including preprofessional education, and (*b*) offerings in vocational and technical education, respectively, shall comply with the following conditions. The duration of continuing education (general and occupational) shall be governed by the course content.

a. Arts and sciences. The academic year of that portion of the educational program of an area community college which is devoted to instruction yielding credits for the first two years of college work including preprofessional education shall be a minimum of 36 weeks of instruction. One hour per week including passing time for 12 weeks shall be regarded as the minimum basis for one quarter hour of credit. Courses involving laboratory work shall include in addition to the required lecture minimum, at least, one quarter time per week of supervision in the laboratory. Appropriate adjustment shall be made if work is offered on the semester plan.

b. Vocational-technical education. An area community college shall provide for 48 weeks of instruction consisting of four 12-week quarters. Provision shall be made for conducting programs of instruction for which the scheduling does not fit into the normal school year. The base period shall be one hour in length including passing time.

5.3(16) *Graduation requirements.* Graduation from an area community college shall be certified by the issuance of a diploma indicating the type of two-year curriculum or program which the student has completed. No student shall be issued a diploma who has not earned a cumulative grade point ratio of 1.80 or above. Grades and grade points shall be awarded as follows: A-4, B-3, C-2, D-1, F-0.

a. Associate in arts and science. The degree issued to a person who has been graduated from a two-year college curriculum shall certify that its recipient is either an associate in arts or an associate in science.

b. Associate in applied science. The degree issued to a person who has been graduated from a two-year technology curriculum shall certify that the recipient is an associate in applied science.

c. Graduate in vocational or technical education. A diploma shall be issued to a person who has been graduated from a vocational curriculum or a technical curriculum of less than two years' duration and it shall specify the type of curriculum completed.

d. Certificate in course of instruction. A certificate of completion shall be issued to signify

that a student has satisfactorily completed a course of instruction other than the above.

5.4(280A) Faculty.

5.4(1) *Certificate and preparation in field of instruction.* An area community college instructor or area vocational school instructor must hold a certificate issued by the state board of public instruction which is valid for teaching in such institutions. The instructor must be prepared in his respective field of instruction as outlined herein.

5.4(2) *Approval in area in arts and sciences.* Each instructor in any of the following areas shall hold a master's degree in his principal field of instruction from an accredited graduate school: (*a*) Business, (*b*) English, (*c*) the fine arts, (*d*) foreign languages, (*e*) mathematics, (*f*) physical education, (*g*) sciences, (*h*) social science, and (*i*) speech.

5.4(3) *Other fields.* Each person offering service or instruction in any of the following fields shall have met the preparation requirements indicated for each field.

a. Accounting. An instructor in accounting shall hold a master's degree in business from an accredited graduate school providing that the degree includes 15 semester hours of credit in accounting of which at least three semester hours shall be graduate credit.

b. Counseling and guidance. A counselor shall have a master's degree in counseling and guidance or in college student personnel work with a major in counseling from an accredited institution.

c. Pre-engineering drawing. An instructor in this area shall hold a bachelor's degree from an institution approved by the department of public instruction with emphasis in the area of engineering graphics and competency in the field of drafting as evidenced by work experience.

d. Librarian. A professional librarian shall hold a master's degree or equivalent in library science from an accredited institution. An assistant librarian shall have a bachelor's degree with a major in library science from an accredited collegiate institution.

e. Business skills. An instructor in business skills shall hold a bachelor's degree from an accredited collegiate institution, providing that the degree includes a major in business or commerce, with advanced course work for credit in office machine operation, shorthand, and stenography or typewriting—whichever business skills the instructor will teach.

5.4(4) *Approval in areas in vocational-technical education.* Instructors in vocational-technical education areas shall meet the approval standards for the fields taught as outlined in the Iowa State Plan for Vocational Education in: (*a*) Agriculture, (*b*) distribution, (*c*) health occupations, (*d*) home economics, (*e*) office occupations, (*f*) trade and industry and (*g*) related courses designed to increase knowledge and understanding and develop attitudes concerned with occupations and necessary for general education.

5.4(5) *Approval in adult or continuing education.* Instructors in vocational-technical education areas shall meet the approval standards as set forth in 5.4(4); in other fields as set forth in 5.4(2). For all adult general education classes, the instructor shall display (*a*) a genuine interest in teaching, (*b*) evidence of proficiency in the area of instruction, and (*c*) compliance with all rules and regulations established by the area school superintendent or the appointed director.

5.4(6) *Instructor load.*

a. Arts and sciences. The standard load of an instructor in arts and science courses shall be 12 credit hours, with the exception that any faculty member may teach the equivalent of one three-credit-hour adult or continuing education course at night in addition to a full-time day school load; in no case shall it exceed 16 credit hours.

b. Vocational-technical. The full-time teaching load of an instructor in shop or laboratory vocational and technical courses shall not exceed six hours per day, and an aggregate of 30 hours per week, including teaching, supervision, co-ordination, and other assignments provided that this limitation does not include continuing education or supplemental programs. When the teaching assignment includes classroom subjects (nonlaboratory and nonshop), consideration shall be given to establishing the teaching load more in conformity with that of "*a*" above.

5.4(7) *Faculty organization.* The faculty shall be organized in such a way as to promote unity through two-way communication between the faculty and administration and to insure faculty participation in the development of the curriculum, improvement of instruction, development of general policy, and such other matters as are appropriate. The faculty shall meet regularly to fulfill these functions. The faculty shall be organized into departments or instructional areas, and, where the department is sufficiently large to justify it, it shall be led by a chairman or departmental head who has released time and office facilities commensurate with his leadership responsibilities. The chairman or departmental head shall work in co-operation with his departmental staff in: (*a*) Development of a departmental curriculum responsive to the needs of the principal types of prospective students and occupations; (*b*) determination and administration of a departmental testing program; (*c*) participation with the administration in employing and promoting staff members; (*d*) conduct of in-service education; and (*e*) leadership and stimulation of the experienced members of the department.

5.4(8) *Faculty development.* The administration of the college shall encourage the continued development of faculty potential by: (*a*) Regu-

larly stimulating department chairmen or heads to meet their responsibilities in this regard; (*b*) lightening the teaching loads of first-year instructors whose course preparation and in-service training demand it; (*c*) stimulating curricular evaluation, and (*d*) encouraging the development of an atmosphere in which the faculty brings a wide range of ideas and experiences to the students, each other, and the community.

[The above rule as herein printed also appears in the Code as section 280A.36 since it is an enactment by the general assembly.]

5.5(280A) Curriculum.

5.5(1) *Arts and sciences.* The first two years of college work including preprofessional education shall be offered in division of arts and sciences, and this work shall provide courses in: (*a*) Business, (*b*) English, (*c*) the fine arts, (*d*) foreign languages, (*e*) mathematics, (*f*) sciences, (*g*) social sciences, and (*h*) speech. A continuing survey of the institutions of higher learning to which students tend to transfer shall be carried on by each area institution to determine how well such students succeed and which adjustments in its curriculum and standards, if any, need to be made.

5.5(2) *Technical and vocational education.* Instruction shall be offered in technical and vocational education in no less than five different occupational fields as defined by the state department of public instruction leading to immediate employment. The occupational fields in which instruction is offered shall be determined by merged area and geographical area needs as identified by periodic surveys in these areas. Advisory committees shall be used in connection with these surveys and in establishing instructional programs.

a. Technical education. The curricula which may be offered under the heading "technical education" shall be classified as: (1) Agricultural education, (2) distributive education, (3) health occupations education, (4) home economics education, (5) office occupations education, (6) trade and industrial education, and (7) special technical education programs.

b. Vocational education. The curricula which may be offered under the heading "vocational education" shall be classified in the same manner as those offered under the heading of technical education.

c. Curriculum content. A technical education curriculum shall include 15 to 30 percent in related instruction, for example, communication skills, social studies, economics, and human relations; 20 to 30 percent in related basic and applied mathematics and science; 40 to 60 percent in technical skills and specialties; and zero to ten percent in electives.

Vocational curricula will require more time devoted to the development of skills and specialties than will technical curricula.

5.5(3) *Part-time occupational education.* Part-time adult continuing or supplemental education shall be offered as needed in the technical and vocational areas cited herein including education for single skill occupations, supervisory development, related instruction for apprentices, and new industry and business education.

5.5(4) *Part-time general education.* Part-time adult or continuing general education shall be offered as needed in adult basic education; adult secondary education; continuing general education of a liberal, informational, avocational, or recreational type; and community service programs.

5.5(5) *Programs of technical and vocational education for the handicapped.* Surveys shall be conducted in each merged area to determine the educational needs of persons who, due to academic, socio-economic or other handicaps, are prevented from succeeding in regular technical or vocational education programs, and appropriate modifications in facilities, materials, and instructional arrangements shall be made to make it possible for those whose abilities and interests warrant it to enroll in such programs.

5.6(280A) Community services. The area community college shall provide a program of community services designed to meet the needs of the persons residing in the merged area. Programs shall be developed with the assistance of an advisory committee. The purpose of the community service programs shall be to foster agricultural, business, industrial, cultural and recreational development in the area.

5.7(280A) Standards of work and student load.

5.7(1) *Arts and sciences.* Each course which is offered in the arts and sciences division for college credit shall be taught at a standard consistent with the quality and quantity of similar courses offered in accredited institutions of higher learning.

Courses of a remedial nature or a prefreshman level shall not bear college transfer credit and shall be clearly identified in the college catalog and on transcripts.

A normal full-time student's load shall be 16 credit hours. Additional work may be taken by superior students with faculty approval, but no student shall be permitted to register for more than 20 credit hours without college approval.

A full-time student in arts and sciences shall be defined as one who is carrying 12 or more hours of college credit.

5.7(2) *Technical and vocational education.* Each course offered in the area of technical and vocational education shall be taught at a standard consistent with the quality and quantity of work needed to prepare the student for successful employment in the occupation for which instruction is being offered.

A full-time student in technical or vocational education shall be defined as one who is taking 12 or more credit hours of technical or vocational education credit.

Curricula in technical and vocational education shall be offered on the basis of an average load of 30 class hours per five-day week, 12 weeks per quarter. Students enrolled in part-time curriculum work shall be scheduled, based on class needs, to accomplish this average load, but over a longer period of time.

a. Class work. "Class work" shall mean lecture and other classroom instruction. One quarter hour of technical or vocational credit shall require one hour of class work per week for 12 weeks.

b. Laboratory work. "Laboratory work" shall mean demonstration by the instructor, and experimentation and practice by students. One quarter hour of technical or vocational credit shall require two hours of laboratory work per week for 12 weeks.

c. Shop work. "Shop work" shall mean development of manipulative skills and job proficiency. One quarter hour of technical or vocational credit shall require three hours of shop instruction for 12 weeks.

5.8(280A) Library.

5.8(1) *Staff.*

a. A professional librarian as defined by 5.4(3)"*d*" herein shall be employed.

b. The librarian shall have faculty rank equivalent to that of a department head as defined by 5.4(7) herein.

c. An area institution with a full-time equivalent enrollment up to 500 shall employ one professional librarian, and, for each increase of 500 in enrollment, one additional professional librarian shall be employed.

d. An area institution with a full-time equivalent enrollment up to 500 shall employ one assistant librarian as defined by 5.4(3) "*d*" and also at least one clerical assistant; at least one additional clerical assistant shall be added for each additional 500 students enrolled.

e. Student assistants may be employed on a part-time basis, provided they are not left with complete supervision of the library or a branch thereof in the absence of a professional librarian or an assistant librarian for longer than a two-hour period.

5.8(2) *Expenditures.*

a. The library expenditures shall be at least five percent of the total general fund budget.

b. The percent of the general fund budget devoted to the library shall, if necessary, be augmented as the student enrollment or course offerings increase, or if the library is responsible for audio-visual services.

c. The library expenditures for an area institution shall exceed five percent of the general fund budget each year by the amount needed to meet the conditions of 5.8(3)"*a*" herein.

5.8(3) *Collections.*

a. An area community college with an enrollment up to 1,000 full-time equivalent students shall have a professionally selected book collection of at least 20 volumes per student; for each additional 500 students, there shall be an additional ten volumes per student. The collection of an area vocational school shall be evaluated in terms of its adequacy for the number and variety of programs offered and the number of students enrolled.

b. In addition to the book collection the library shall have a professionally selected list of periodicals, newspapers, government documents, maps, pamphlets and basic reference books all appropriate for each area in which instruction is given.

c. The audio-visual services of the library shall include recordings, tapes, slides, film strips and other appropriate audio-visual items.

d. The library collection shall be fully organized for use, using classification schemes and cataloging practices in general use by professional librarians.

e. Provision shall be made for locating library materials as needed for ready reference in classrooms, laboratories and shops.

5.8(4) *Quarters.* Whether housed in a separate building or as a part of a complex, the library shall be centrally located on the campus or at the attendance center; its lighting shall conform to generally accepted standards for libraries; it shall be air conditioned; there shall be free access to the collections with seating accommodations for at least 25 percent of the full-time equivalent students enrolled. Provision shall be made for expansion as the student enrollment and collection grow.

5.8(5) *General standard.* Merged area boards shall take into account recognized standards developed by professional librarians and accrediting associations in developing, equipping, staffing, housing and operating library services in the educational institutions which they maintain and operate. Evaluative instruments developed by these librarians and associations shall be used in appraising the adequacy of libraries in area institutions.

5.9(280A) Laboratories, shops, equipment, and supplies. Laboratories, shops, equipment and supplies comparable with that used in the occupations for which instruction is offered shall be provided in accordance with the conditions of the most recent Iowa state plan for vocational education. Similarly, arts and science courses shall be supported in a manner comparable to those which prevail in standard, accredited colleges and universities to which students may wish to transfer college credits.

Specific annual budgetary provisions shall be made to meet this standard.

5.10(280A) Physical plant. The location, buildings and equipment of the area institution

shall be well maintained and in good repair. A consistent plan of systematic maintenance shall be in evidence.

The physical plant shall be adequate in size and properly equipped for the program offered.

5.11(280A) Student personnel services. A program of student personnel services shall be provided to meet the needs of students.

5.11(1) *Counseling and related services.* Professionally prepared and certificated counselors shall be employed on the staff of the director of personnel services. There shall be one professional counselor for each 300 full-time equivalent students. These services shall deal with student academic, vocational, and personal adjustment problems. More specifically, these services shall be concerned with standardized testing, personal data collection, counseling, information service, placement and follow-up. Allotments shall be made of space, time, equipment and materials necessary for a comprehensive program providing counseling and related services in keeping with the total programs of the institution.

5.11(2) *Housing.* Unmarried students under 21 years of age and not living at home shall be required to live in approved housing. The inspection and approval of private residences for student housing shall be done by the division of personnel services to insure that students will be protected from exploitation and will live in a healthful situation. If the area institution maintains a residence hall, its staff shall be selected in terms of their interest with priority given to those who have experienced background or preparation for this type of work.

5.11(3) *Health services.* Provision shall be made for health services adequate to meet those student needs which fall within the responsibility of the area institution operated by a merged area board.

5.11(4) *Extracurricular activities.* Sufficient extracurricular activities to afford students an opportunity for leadership and initiative shall be provided. Planning of the activities shall involve both students and faculty, but all activities shall be under the direct supervision of qualified members of the faculty or staff.

5.12(280A) Approval procedures.

5.12(1) *Procedure for first and second years of operation.* Temporary approval of an area community college for each of the first two years of operation shall be granted annually subject to approval by the state board of public instruction and the state board of regents upon certification by the state department of public instruction that said institution has followed prescribed procedures in getting started and that it gives promise of ultimate compliance with all standards contained herein.

During the second year of operation, the institution shall prepare a comprehensive self-study following the directions issued by the state department of public instruction.

5.12(2) *Procedures after second year of operation.*

a. During the third year of operation, the institution shall be visited by a team of six examiners equally representing the state board of public instruction and the state board of regents and chosen by the respective boards. The chairman of the team shall be selected by the state department of public instruction. The examiners shall spend a minimum of two days at the institution visited.

b. Within one month after the visit the chairman of the examination team shall submit to the state board of public instruction and the state board of regents a report, together with the institution's self-study and pertinent supplementary materials. The report shall identify the institution's strengths and weaknesses on the basis of the state standards and the final pages of the report shall consist of a specific recommendation as to whether or not approval by the state board of public instruction and the state board of regents seems warranted. The head of the institution shall have an opportunity to file supplementary statements or data. The state department of public instruction shall distribute copies of the report, the self-study, any supplementary statements or data filed by the head of the institution, and related materials to the members of the state board of public instruction and the state board of regents.

c. If, after the visit by the examination team, the institution is given full approval by the state board of public instruction and the state board of regents, its approval shall continue, ordinarily, on an annual basis for a period of five years, contingent upon evidence that the institution is making consistent efforts to strengthen the areas in which weaknesses were noted. To provide this evidence of progress, the institution shall submit by April 1, of each year, a report of what improvements have been made and what changes are planned for the next year. To supplement and verify this annual report, a representative of the state department of public instruction shall visit each institution at least one day each year. However, acting jointly, the state board of public instruction and the state board of regents have the discretionary authority to review the approval in intervening years.

On the basis of this report and the visit by its representative, the state department of public instruction shall recommend to the state board of public instruction and the state board of regents whether or not an institution's approval should be continued. The institution shall be revisited by an examination team every five years. If the state department of public instruction believes that the situation in a given institution warrants such, it shall arrange for a revisit by an examination team,

which shall always be preceded by a self-study, even though a period of five years has not yet elapsed.

d. If, after the visit by the examination team, the institution is given provisional approval by the state board of public instruction and the state board of regents, the institution shall be revisited by an examination team within three years after the original visit. One year after the team visit and again a year later, the institution shall be visited by a representative of the state department of public instruction who will submit an annual report as provided in 5.12(2)"*c*" herein.

On the basis of the visit and the report, the state department will recommend to the state board of public instruction and the state board of regents whether continuation of provisional approval seems warranted. Provisional approval shall continue if, in the judgment of the state board of public instruction and the state board of regents, the institution has made satisfactory progress in improving areas where weaknesses were noted by the examination team.

"Provisional approval" shall mean that the institution's strengths are judged to be greater than the weaknesses and that there is a good possibility that the weaknesses can be corrected within three years or less.

5.12(3) *State financial aid.* An institution that has received temporary approval, full approval, or provisional approval by the state board of public instruction and the state board of regents is eligible to receive financial aid from state funds.

5.12(4) *Progress toward regional accreditation.* Each area community college that has not received accreditation by the regional association is expected to demonstrate that it is making annual progress toward meriting such accreditation.

5.13(280A) Standards for area vocational schools. Area vocational schools; with the exception of offering the first two years of college work including preprofessional education and with the exception of providing instructors, facilities and equipment for such college work; shall be subject to the same standards as outlined for area community colleges and hereinabove set forth insofar as applicable.

[Filed October 5, 1966; amended 62 G.A., ch 244, section 29]

5.14(280A) Tuition rates.

5.14(1) *Residents.* The board of directors of any merged area vocational or area community college may establish tuition rates not to exceed $100 per semester of 18 weeks, for resident students of the state, who are subject to tuition under section 280A.18, enrolled for a full course of study and may establish equivalent and lesser rates for such resident students of the state enrolled for less than a full semester work-load or for specific course-subjects of less than 18 weeks' duration.

5.14(2) *Nonresidents.* The board of directors of any merged area vocational or area community college may establish tuition rates not to exceed the actual operational costs per semester of 18 weeks for students who are nonresidents of the state of Iowa enrolled for a full course of study and may establish equivalent or lesser rates for nonresident students of the state enrolled for less than a full semester work-load or for specific course-subjects of less than 18 weeks' duration. In no case shall these rates be less than for Iowa resident students.

5.15(280A) Attendance outside resident area. The boards of directors of two or more merged areas, may by agreement provide for attendance of students residing in one area in the vocational school or community college of another area for the purpose of taking courses not offered in the area of their residence. The boards of directors of merged areas entering into such agreements may provide for sharing of costs and expenses of such courses. No agreement entered into under this section shall have any force or effect until approved by the state board of public instruction.

5.16(280A) Building site—size. All sites for area school shall be approved by the state board of public instruction. The minimum size for an area school site shall be 80 acres for the first 100,000 in total population in the merged area plus additional 10 acres for each additional 25,000 in population or major portion thereof. Provided, however, that the state board of public instruction may waive said requirement for good cause shown.

5.17(280A) Building plans. All building plans and specifications for construction shall be submitted to the state board of public instruction for review and approval of educational adequacy.

5.18(280A) Preliminary planning. Each merged area board shall present evidence of adequate, preliminary planning along with the preliminary building plans and specifications. Preliminary planning includes: Tentative program approval; a master campus plan; written educational specifications; site plot showing location of proposed facilities, and existing facilities; elevations and floor plans and specifications of materials.

5.19(280A) Other governmental approval. After a tentative approval has been received from the state board of public instruction, evidence shall be submitted indicating the approval by the state fire marshal and by the state department of health, when required, before final approval will be made by the state board of public instruction.

5.20(280A) Parking lots. All-weather parking lots of adequate size to accommodate the enrollment shall be included as part of the planned construction.

5.21(280A) Flexibility and expansion. Evidence shall be presented to show that flexibility and expansion of the proposed construction is possible.

5.22(280A) Physically handicapped. The facilities planned shall be functional for the physically handicapped.

5.23(280A) Adequate facilities. All administrative facilities, classrooms, laboratories and related facilities shall be educationally adequate for the purpose for which they are designed.

5.24(280A) Air-conditioning. All buildings or parts of buildings, used for instructional or office purposes, shall be air-conditioned, to accommodate year-around use of such facilities.

5.25(280A) Library. An instructional material center shall be planned as a part of the master campus plan and some space made available for library services within the initial construction.

5.26(280A) Commons. An area of the school plant shall be provided where students may gather informally and where food is available.

5.27(280A) Permanent facilities. All facilities constructed with state funds appropriated for area school construction shall be of a permanent type.

5.28(280A) Nonacceptable facilities. No facility intended primarily for events for which admission may be charged, nor any facility specially designed for athletic or recreational activities other than physical education, shall be constructed with state-appropriated funds.

[Filed January 11, 1966; amended October 5, 1966, October 10, 1966, April 17, 1967]

TITLE IV

DRIVER AND SAFETY EDUCATION

CHAPTER 6

DRIVER EDUCATION

6.1(257) Certification and approval.

6.1(1) The instructor in driver education must have a certificate valid for teaching in secondary schools in the state of Iowa.

6.1(2) To be approved the instructor must have ten semester hours in the field of safety education including two semester hours in actual behind-the-wheel driving.

6.1(3) The instructor must have a valid Iowa operator's or chauffeur's license.

6.1(4) The instructor must have a satisfactory driving record verified by the state department of public safety.

6.1(5) The instructor must be free of any physical defects that would be a handicap in the teaching of driver education.

6.2(257) Time standards.

6.2(1) *Minimum time.* Schools shall provide for each student an absolute minimum of 30 class hours of 60 minutes each (or a total of 1800 minutes) in classroom instruction, plus six class hours of 60 minutes each (or a total of 360 minutes) in supervised laboratory instruction, exclusive of observation time, in a dual control automobile.

6.2(2) *Evaluation.* In evaluating driver training courses for approval, consideration will be given to whether: The classroom and driving phases run concurrently; and the driver education course be organized on the full-semester basis. Time allotments for each phase of the program should be such that time spent in each, at any one time, is equivalent to the time allotment in other subject areas. Time allowances to take care of individual differences, and special occasions in each school should be provided over and above the minimums set forth in 6.1(1).

6.2(3) *Scheduling class sessions.* The following will serve as a guide for determining the number of sessions required for class periods of specified durations to assure 30 clock hours per student in classroom instruction:

Minutes per Class Period	Minimum Number of Sessions Required
40	45
45	40
50	36
55	33
60	30

6.2(4) *Scheduling practice driving.* To assure six clock hours per student in practice driving instruction, the following table will be observed:

Minutes per Class Period	Minimum Number of Sessions Required	
	Two Pupils in Car	Three Pupils in Car
40	18	27
45	16	24
50	15	22
55	14	20
60	12	18

6.3(257) Summer school. Summer school driver training courses shall be at least eight weeks

in duration. If all the instruction is scheduled in the summer the amount of time devoted to the program shall be on the same basis as outlined in the previous sections. Specific approval for any proposed course of less than eight weeks in duration must be obtained from the department of public instruction prior to commencing the course.

6.4(257) Time on driving simulators. When simulators are used for part of the practice driving experiences, four hours of simulator experience shall be considered equal to one hour of practice driving in the car. Not more than three of the six hours required for practice driving may be simulator experience.*

6.5(257) Driving ranges. Special permission for programs on multiple-vehicle driving ranges must be secured from the department of public instruction.

6.6(257) Adult programs. Wherever possible adult programs will provide a basic course comparable in time and content to that of the secondary school.

6.7(257) Dual controlled cars.

6.7(1) *Used on streets.* Dual controlled automobiles shall be used in all cases involving driving on the street or highway.

6.7(2) *Marking.* All dual controlled automobiles should have identification signs, visible from the rear, showing that the automobile is being used for driver education. If the vehicle is being used for other than driver education, the identification signs should be removed or covered.

6.8(257) Insurance.

6.8(1) *Liability and property damage.* All dual controlled automobiles shall be adequately insured. The following policy limits are deemed adequate coverage: $100,000-300,000 on liability and $50,000 on property damage.

6.8(2) *Medical payments.* Liability insurance does not cover injuries received by students in accidents by other vehicles or from other causes not resulting from carelessness, on the part of the student or the instructor. Therefore, medical insurance of at least $1000 per student shall be carried.

6.8(3) *Uninsured motorist.* It is hereby approved that all dual controlled automobiles be covered by uninsured motorist insurance.

6.9(257) Instruction permit. Students enrolled in an approved driver education program must meet the preliminary licensing provisions of the department of public safety.

*Standards 6.1 through 6.4 are the minimum recommendations of the National Education Association as well as requirements of most state departments and insurance companies. The insurance companies accept these standards for offering a lower rate of insurance premium where there is a person under the age of 25 driving the family car.

6.10(257) Reimbursement. The secretary of each district entitled to driver education reimbursement shall, on or before the first day of July of each year, report to the state department of public instruction on forms furnished by the department, such information as it may require for determining the amount the district shall be reimbursed for driver education courses provided to pupils. The state department may require further supporting data and information, and from said reports, data and information, it shall determine and compute the amount to which each district is entitled for reinbursement, and shall certify same for payment to the state comptroller who will draw warrants upon such certification and cause same to be delivered to the districts named as payee thereon. The appropriation for driver education shall be used to reimburse school districts in the amount and manner provided by law.

6.11(257) Records. The necessary records for determining the days of attendance for each student enrolled, in each phase of the driver education program, shall be maintained by each school in the district.

6.12(257) Failure to qualify. Failure by any local district to comply with the provisions of law, or any rules made by the state department of public instruction, relating to driver education, shall disqualify such district for reimbursement for and during the period such failure to comply existed.

[Filed December 2, 1965]

TITLE V

DUAL ENROLLMENT

CHAPTER 7

SHARED TIME

7.1 Policy and purpose.
7.2 Applicability of rules.
7.3 Who may apply.
7.4 Content of application.
7.5 Report required.
7.6 Form of application.
7.7 Where to file.
7.8 Time for filing.
7.9 Local policies.

7.1(257) Policy and purpose. The purpose of this chapter of rules of the department of public instruction is to provide an orderly and uniform procedure, for the submission of approval applications for shared-time arrangements, by boards of directors of public school districts, to the state board of public instruction, under section 257.26, as construed in the opinion of the attorney general of Iowa dated November 4, 1965, and further construed in the opinion of the attorney general dated April 27, 1967.

It is hereby declared to be the policy of the state board that all applications submitted from sources other than herein authorized, or substantially de-

viating in content of form from the requirements hereinafter set forth, will be returned, without approval action, to the party submitting same, for resubmission from the proper source or after deficiencies in form or content have been remedied.

7.2(257) Applicability of rules. Rules appearing in this chapter apply only to shared-time arrangements proposed under section 257.26. In the event a school district elects to enter into a shared-time arrangement under the provisions of section 274.7 as construed in the opinion of the attorney general dated November 4, 1965, by the independent method described in said opinion, no approval application will be submitted to or acted upon by the state board of public instruction.

7.3(257) Who may apply. Applications for approval of shared-time arrangements may be submitted to the state board of public instruction directly by boards of directors of public school districts.

7.4(257) Content of application. Applications for approval of shared-time arrangements shall specify the courses in which the applicant board of directors propose to permit enrollment of students who are also enrolled in private schools and the tentative number of such students proposed to be enrolled in each course. Each application shall state whether or not the board of directors of the applicant public school district waives the requirement that it shall be given notice by the state board, of its decision to permit such special enrollment, at least six months prior to July 1 of the school year in which said special enrollments are proposed to be made.

7.5(257) Report required. Each applicant school district shall agree to submit to the state department, on or before September 15 of each year, a report covering the following items:

7.5(1) *Teacher load.* Specify the total number of students, both dually-enrolled and regularly-enrolled, who will attend upon each class or class section in specified courses.

7.5(2) *Course availability.* State whether or not the courses specified under subsection one of this section are available at the private school or schools in which each of the students proposed for admission to dual enrollment is enrolled.

7.5(3) *Minimum curriculum.* State whether or not each of the private schools from which it is proposed to accept students on a shared-time basis maintains minimum curriculum as defined in section 257.25.

7.5(4) *Prerequisite courses.* State whether or not each shared-time student proposed for enrollment in specified public-school courses has completed prerequisite courses, if any, in a school or schools maintaining standards equivalent to the approval standards for public schools in the state of Iowa.

7.5(5) *Competence through testing.* State whether or not each student proposed for enrollment in specified public-school courses, who has not completed prerequisite courses in a school or schools maintaining standards equivalent to the approval standards for public schools in the state of Iowa, has demonstrated competence for admission to such course through testing.

7.5(6) *Tuition.* State the number of shared-time students who are actual residents of the public school district, the number, if any, who will be enrolled on a tuition basis, the amount of tuition to be charged, and who will pay the tuition.

7.6(257) Form of application. Applications shall be submitted in the form of a resolution of the board of directors of the applicant public school district and may be supported by affidavits and exhibits. Applications shall be typed in pica or equivalent using a standard typewriter face (no script) on bond paper size 8½" by 11" in triplicate.

7.7(257) Where to file. All triplicate applications shall be filed with the State Department of Public Instruction, Des Moines, Iowa.

7.8(257) Time for filing. All applications in which the local board does not waive the six-month notice requirement as provided in 7.4(257), supra, must place their applications on file at least eight months prior to July 1 of the school year in which special enrollments are proposed to be made. All applications in which the six-month notice is waived must be placed on file no later than May 1 of said year. From and after November 1, 1966, applications failing to meet the applicable filing deadline will be returned without being acted upon by the state board.

7.9(257) Local policies. Each applicant school district shall attach to its application a copy of rules and policies adopted by it, pursuant to authority of section 279.8 for the government of shared-time programs.

[Filed May 10, 1966; amended July 13, 1967]

TITLE VI
HIGH SCHOOL EQUIVALENCY

CHAPTER 8
HIGH SCHOOL EQUIVALENCY CERTIFICATES

8.1(259A) Test. Applicants for high school equivalency certificates shall satisfactorily complete the high school level General Educational Development Tests of the American Council on Education, 1785 Massachusetts Avenue, N. W., Washington, D. C. 20036.

8.2(259A) By whom administered. The General Educational Development Tests shall be administered in Official Iowa General Educational Development Testing Service agencies, official agencies of the Veterans' Testing Service of the American Council on Education in other states, the United States Armed Forces Institute, and Veterans' Administration Hospitals which have an authorized educational therapy program.

8.3(259A) Minimum score. Applicants shall make a minimum standard score of 35 on each test and an average standard score of 45 on all five of the General Educational Development Tests.

8.4(259A) Date of test. Test results dated prior to the date of application will be acceptable provided the tests were taken at an authorized center as specified in rule 8.2(259A).

8.5(259A) Retest. Any applicant not achieving the minimum standard test scores as defined in 8.3(259A), upon payment of a five-dollar fee, shall be permitted to make application for retest, provided that one of the following conditions is met:

8.5(1) A period of one year from the date of original testing has elapsed.

8.5(2) The applicant shall complete instruction in an adult education program, in the area or areas to be retested. This instruction shall be certified to the department of public instruction by an official of the adult education program.

[Filed October 6, 1965; amended September 18, 1969, July 12, 1972]

TITLE VII

INTERSCHOLASTIC COMPETITION

CHAPTER 9

EXTRACURRICULAR INTERSCHOLASTIC COMPETITION

9.1(257) Purpose. The purpose of this chapter of rules is to implement the provisions of section 257.25(10) and so much of subsections 11, 12 and 13 of said section as may be applicable to subsection 10.

9.2(257) Approved list. Neither school districts nor pupils of said school districts shall participate in events sponsored by organizations which are required to meet requirements imposed by statute or rule for their operations, if such organizations are found not to be in compliance therewith. After official notice to the school districts of such noncompliance by an organization, continued participation shall be cause for said district to be removed immediately from the approved list of schools by the state board of public instruction.

9.3(257) Filings by organizations. Each organization, as defined in section 257.25(10) shall maintain a current file with the state department of public instruction of the following items:

9.3(1) *Constitution and bylaws.*

9.3(2) *Current membership lists.*

9.3(3) *Organization policies.*

9.3(4) *Minutes of all meetings of organization governing bodies and executive boards thereof.*

9.3(5) *Proposed constitution and bylaw amendments or revisions.*

9.3(6) *General bulletins.*

9.3(7) *Other information pertinent to clarifying organization administration.*

9.4(257) Governing body of organizations. The membership of the governing body of each organization shall be school administrators, teachers and elective school officers. Provided, however, that such membership shall include:

9.4(1) *School board member.* One member who shall be a member of a school board in Iowa, appointed by the Iowa Association of School Boards to represent the lay public.

9.4(2) *Activity member.* One member, who is either a coach, sponsor or director, of an activity sponsored by the organization to which he is elected and who works directly with the students or the program; this member is to be elected by ballot of the member schools, the vote to be cast by

the school's designated representative of the organization involved.

9.5(257) Organization elections. The election procedure for each organization shall be conducted as provided by their constitution. All criteria for protecting the voters' anonymity and insuring adequate notice of elections shall be maintained in the election procedures. In addition, there shall be one representative designated by the state board of public instruction present at the counting of all ballots. That representative shall also validate election results.

9.6(257) Salaries. No remuneration, salary or remittance shall be made to any member of a governing board of an activity organization for his service thereon.

9.7(257) Expenses. Travel and actual expenses of said governing board members and officers of the board shall be paid from organizational funds only when on official business for the organization. Actual expenses shall be paid for travel within the state, but not more than first class air travel for transportation outside the state, along with other necessary (itemized and reasonable) expenses. Itemized accounting of the travel and business expenses of employees shall be furnished to the department of public instruction in an annual report.

9.8(257) Compensation reported. Full and detailed reports of salaries, expense accounts and fringe benefits paid employees shall be filed with the department of public instruction. All reports of expenditures and amounts paid full-time or part-time employees shall be submitted annually to the state board of public instruction.

9.9(257) Bond. The executive board of each activity organization shall purchase a blanket fidelity bond from a corporate surety approved by it, conditioned upon the faithful performance of the duties of the executive officer, the members of the executive board, and all other employees of the activity organization. Such blanket bond shall be in a penal amount set by the executive board and shall be the sum of 50 percent of the largest amount of moneys on hand in any 30-day period during the preceding fiscal year, and 20 percent of the net valuation of all assets of the activity organization as of the close of the last fiscal year, but such bond shall in no case be in an amount less than $10,000.

9.10(257) Access to records. Upon request, organizations shall make available to the state department of public instruction or its delegated representative all records, data, written policies, books, accounts and other materials relating to any or all aspects of their operations.

9.11(257) Appearance before state board. At the request of the state board of public instruction or its executive officer, members of the governing boards and employees of said organizations shall appear before and give full accounting and details on the aforesaid matters to the state board of public instruction.

9.12(257) Eligibility requirements reported. All organizations shall submit to the state board of public instruction for their approval detailed eligibility requirements for students who participate in organizational activities.

9.13(257) Organization policies. The constitution or bylaws of organizations sponsoring contests for participation by approved schools shall reflect the following policies:

9.13(1) *"All Star" games.* "All Star" games of any type shall not be held.

9.13(2) *Team participation.* Participation in events shall be by school teams only and not selected individuals, with the exception of individual sports events such as wrestling, track, golf, tennis, etc. and music and speech activities.

9.13(3) *Contests outside Iowa.* Out-of-state participation shall be limited to regularly scheduled interscholastic activities. Out-of-state participation for students or member schools in other activities must be approved by their respective association or organization.

9.13(4) *Promoting interstate contests.* No activity organization shall promote or support interstate contests or competition between individuals, teams or groups.

9.13(5) *Chaperones.* It is the responsibility of all school districts to see that all teams or contestants are properly chaperoned when engaged in interscholastic activities.

9.13(6) *Insurance subsidies.* No financial subsidies shall be paid to any type of insurance company for participants in any organization.

9.14(257) Interscholastic athletic competition definitions. Whenever the following terms are used in the eligibility requirements, they shall refer to the following definitions:

9.14(1) *"Governing organization"* for interscholastic athletic competition shall mean the Iowa High School Athletic Association or the Iowa Girls' High School Athletic Union.

9.14(2) *"Executive board"* means the board of control of the Iowa High School Athletic Association or the Board of Directors of the Iowa Girls' High School Athletic Union.

9.14(3) *"Executive officer"* means the executive secretary of each governing organization.

9.14(4) *"Superintendent"* means a superintendent of a local school or his duly authorized representative.

9.14(5) Statements of masculine gender shall apply equally to feminine gender.

9.14(6) *"Parents"* means a natural or adoptive parent or legal guardian having actual bona fide custody of the student.

9.15(257) Scholarship rules.

9.15(1) A student is academically eligible upon entering the ninth grade. No student shall be eligible to participate in any given interscholastic athletic sport if he has engaged in that sport professionally.

9.15(2) A student who is eligible at the close of a semester is academically eligible until the beginning of the subsequent semester. Twenty days of attendance in any semester, or participation in any part of an athletic contest on a team representing his school, shall be regarded as a semester of attendance and a semester of athletics.

9.15(3) No student shall take part in athletic contests between high schools for more than eight semesters. A student shall not be eligible to participate in more than four years of any particular sport. No student on or after his twentieth birthday shall be allowed to enter any athletic contest.

9.15(4) All contestants shall be regular students of the school in good standing; they shall have made passing grades in 15 semester hours the preceding semester of the school, and shall be making passing grades in 15 semester hours for the current semester determined by the local school administrator.

a. No student of an "approved school," within the meaning of section 257.25 shall be denied eligibility if his school program deviates from the traditional two-semester school year.

b. The term "preceding semester" means that semester immediately preceding the semester in which the student wishes to participate in athletics. Fifteen semester hours means three subjects of one period or "hour" each, daily, five times a week for one semester or the equivalent.

9.15(5) In case of incomplete work, the work must be made up under the direction, supervision, and issuance of credits by the same school where the work was taken. If for any reason it is impossible for the student to meet this requirement, upon request by the local superintendent, the executive board can rule on the student's eligibility.

A student may earn up to two credits in a summer school which is accredited by the State Department of Public Instruction or approved correspondence course by a local board of education, based upon national accreditation agencies or member schools introducing voluntary courses of study, which credits can be used for interscholastic eligibility purposes. For a student to be able to take summer school, he must have been enrolled during the spring semester immediately preceding the summer session. In the spring semester, he must have been charged with a semester of eligibility attendance, but will not be charged with a semester of eligibility, or any part thereof, by reason of having taken such summer-school work.

9.16(257) Physical exam. Every year each student shall present to his superintendent a health certificate signed by a licensed physician, to the effect that he has examined the student and that this student may safely engage in athletic competition.

9.17(257) Attendance. A student who enters school after the second school week of the semester shall be ineligible to participate in athletic contests during that semester except by permission of the executive board.

9.18(257) Dropouts. If a student is obliged to drop out of school, the local superintendent of schools, with the approval of the local board of education, may give permission to participate in athletics upon his return to school.

9.19(257) Transfer. A student who changes school systems except upon a like change of parental residence shall be ineligible to compete in interscholastic contests for a period of 18 weeks. If under a legal guardianship, the legal guardian must make like change of residence and the executive board must be notified at once relative to all circumstances regarding this guardianship or ward of the court.

9.19(1) In ruling upon the eligibility of transfer pupils, the executive board is empowered to consider broken home conditions of students when transfers are alleged to depend upon such factors. When the existence of necessary conditions has been validated by the principal of the school from whence the student transfers, the executive board may declare the student eligible. But under no circumstances shall a student who transfers from one school to another be made eligible for interscholastic athletics until after he has been in attendance at the school to which he transfers for a period of ten school days, unless there has been a like change of residence on the part of his parents.

9.19(2) In ruling upon the eligibility of a student whose transfer was caused by a change of designation by the county board of education, or the state department of public instruction, the executive board has the authority to consider the factors underlying the change of designation in determining the student's eligibility.

9.19(3) In ruling upon the eligibility of foreign exchange students, either students from foreign countries transferring to American schools, or American students who have gone to foreign schools and are returning to American schools, the executive board is authorized to make any ruling regarding the student's eligibility deemed to be fair and reasonable.

9.19(4) Whenever a student transfers from one school to another, he is ineligible to participate in the school summer program insofar as transfer is concerned unless such transfer involves a bona fide change of parental residence and a certified registration for the next semester shall have been completed by the subsequent superintendent. A student granted summer eligibility in this case is drawing upon eligibility associated with the most immediate forthcoming semester, such grant of eligibility foreclosing opportunity for use of eligibility in any other member school the following fall. A student who has just completed eight semesters of high school attendance or who has been awarded a graduation diploma and whose parents have made a bona fide change of residence, shall be considered eligible immediately provided that satisfactory evidence of his academic progress, citizenship and conduct at the school from where he is transferring is accepted and approved by his subsequent superintendent.

9.19(5) In the event a student participates and represents a member school in a tournament series sponsored by a governing organization, he shall in no way become eligible to represent another school in the same tournament series.

9.20(257) Nonschool team participation. A student who is participating in a sport sponsored by a governing organization may not participate in that particular sport as an individual or a member of a team in an outside school event during the given season of that particular sport without written permission of his school superintendent or designated representative. At the conclusion of that sport season, a student may then participate on an outside school team without jeopardizing his eligibility and without written permission from his school superintendent.

9.20(1) If a student while out for a given sport desires to participate in that particular sport on a team outside the school before the conclusion of that sport, and without asking permission, participates on an outside school team or event, he then would make himself ineligible for 12 calendar months in all sports.

9.20(2) This rule applies only to sports sponsored by the governing organization.

9.21(257) College participation. A student shall not be eligible for any athletic contest who has been a member of a college squad or who has trained with a college squad or participated in a college contest.

9.22(257) Awards.

9.22(1) No member of an athletic team shall receive any compensation in any form for services rendered as a member of his team. No student shall be eligible to participate in contests sponsored by a governing organization if it shall be known that he, or any member of his family, is receiving any remuneration, either directly or indirectly, to influence him to attend, or his family to reside in a given school district in order to establish eligibility on the team of said school.

9.22(2) A student will be permitted to receive for his participation in an interscholastic athletic contest the customary medal or ribbon only. A student will be allowed to receive from his school for participation in the interscholastic athletic program only a trophy, plaque, cup, medal, unattached letter, monogram or other insignia of his school. The value of any school award cannot exceed $10.

a. A student shall not receive any award from an individual or outside organization for his high school participation.

b. No student shall be given any trip or excursion of any kind by any individual, organization, or group outside his own school or the governing organization.

c. A school shall not receive any award from any individual, group, or organization other than the governing organization.

d. The superintendent shall be held responsible for any evasion of the above rules. Questions or interpretation regarding medals or awards shall be referred to the executive board.

(1) Nothing in the above section shall preclude giving of a complimentary dinner by local individuals, organizations, or groups with approval of the superintendent to members of the local high school athletic squad.

e. Nothing in 9.22(2) shall preclude or prevent the awarding and the acceptance of an inexpensive, unmounted, unframed paper certificate of recognition as an award, or if attending a banquet, an inexpensive table favor which is given to everyone who attends the banquet.

f. If a student participates in an outside school activity during the school year, he may accept a statuette trophy, plaque or cup for participation in a particular event as long as the award is not in violation of the amateur sanctioning body for that sport. He may not receive any other award the value of which exceeds $10. At no time may any student accept an award of money or in the form thereof. During the summer months, a student may enter an event in any sport as an individual or as a member of a team not representing his school. If such student wins an award, he may accept the award provided it does not violate the amateur award rule of the amateur sanctioning body for that sport.

9.23(257) Local rules. These eligibility rules are minimal requirements. Local boards of education may impose rules not in conflict herewith.

9.24(257) Student conduct. Nothing herein contained shall be construed to prevent a local school board from suspending a student from eligibility to participate in interscholastic competition by reason of violation by such student of rules for

the government of the school adopted pursuant to the provisions of sections 279.8 and 279.9.

9.25(257) Sportsmanship. It is the clear obligation of contestants in all interscholastic competitions to practice the highest principles of sportsmanship and ethics of competition. The governing organization shall have authority to penalize any contestant in violation of this obligation.

9.26(257) Ineligible player participation. Participation in any event by a person in violation of these rules shall be subject to such sanctions as the executive board may impose.

9.27(257) Interstate competition. Every student participating in interstate athletic competition must qualify for such participation under these eligibility rules.

9.28(257) Competition seasons. The establishing of training periods and competition seasons shall be solely determined by the governing organization.

9.29(257) Due process. A student or parent contesting the declared ineligibility of a student based on these rules, other than 9.26(257), shall be required to state the basis of their objections in writing and also their request for oral hearing, addressed to the executive officer of the governing organization. The executive officer shall then schedule a meeting of the executive board within 20 days of receipt of such objections, giving at least five days' written notice of said hearing, unless a shorter time is mutually agreeable. The executive board shall consider the evidence presented including statements by the appellant's legal counsel and make written findings of its decision within five days of the hearing, mailing a copy forthwith to said appellant.

9.30(257) Appeals. If the claimant is still dissatisfied, an appeal may be made in writing to the state board of public instruction by giving written notice of the appeal to the executive officer of the governing organization with a copy, by registered mail, to the state superintendent of public instruction. Such appeal shall be taken within ten days after the date of mailing of the decision of the governing organization. The state superintendent of public instruction shall establish a date for hearing within 20 days of receipt of said written notice of appeal by giving five days' written notice to appellant unless a shorter time is mutually agreeable. The procedures for hearing followed by the state board of public instruction shall be applicable.

[Filed December 13, 1966;
amended December 15, 1972]

TITLE VIII

SCHOOL LUNCH

CHAPTER 10
SCHOOL LUNCH DIVISION

10.1(283A) Authority of state department. Chapter 283A of the Code authorizes the department of public instruction to administer the school lunch program in the public schools of the state.

10.2(283A) Agreement with participating schools. All school lunch programs operating in public schools and approved for federal assistance must operate according to the terms of an agreement or contract executed between the department of public instruction and the individual school. This agreement or contract is continuous and remains in effect until terminated or canceled by either party. The agreement may be terminated upon ten days' notice on the part of either party, provided, however, that the department of public instruction may cancel the agreement immediately upon receipt of evidence that the terms and conditions of the agreement have not been fully complied with by the individual school.

[Filed prior to July 4, 1952]

TITLE IX

REORGANIZATION OF SCHOOL DISTRICTS

NOTE: This title and chapter 11 are reserved for future rules to be adopted for the purposes of implementing chapter 275 of the Code.

TITLE X

SPECIAL EDUCATION AND GUIDANCE

CHAPTER 12
SPECIAL EDUCATION

12.1(281) Definitions. The following terms shall have the following meanings:

12.1(1) *"Education for children requiring special education"* shall include classes, programs, therapy, supplemental instruction, supplemental assistance, special equipment, special materials, special transportation, payment of tuition, supplemental services or other activities, singularly or in combination, provided to handicapped children.

12.1(2) *"Children requiring special education"* are defined to include the following classes of handicapped children:

a. Children *"crippled"* or children who have *"heart disease or tuberculosis, or who by reason of physical defects cannot attend the regular public school classes with normal children"* shall include those children commonly identified as crippled or other health impaired. They are those pupils who suffer from physical disabilities or severe health impairments which make it impractical or impossible for them to participate in normal classroom programs without modification, provided that "physical disability" does not include handicapping conditions otherwise defined in this chapter. Pupils with specific learning disabilities are pupils who manifest an educationally significant discrepancy between their estimated intellectual potential and actual level of performance related to basic disabilities in the learning processes, which may or may not be accompanied by demonstrable central nervous system dysfunction and which are not secondary to generalized mental retardation, educational or cultural deprivation, severe emotional disturbance or sensory loss.

b. Children who *"have defective sight"* shall include those children commonly identified as visually handicapped. They are those pupils whose impairment, with maximum correction, does not permit them to make satisfactory use of regular instructional materials or techniques.

c. Children who *"are hard of hearing"* shall include those children commonly identified as hearing handicapped. They are those pupils having a hearing loss which significantly restricts benefit from or participation in the normal classroom program and necessitates a modified instructional program.

d. Children who *"have an impediment in speech"* shall include those children commonly identified as children with a communication handicap. They are those pupils with a disorder of communication, present when one has deviation in speech, voice or language to the degree that it makes a difference: It interferes with self-expression, or ability to comprehend speech, or causes the individual to become maladjusted to his environment. Speech deviations which do not fit one or more of these criteria are not considered to be of a handicapping nature but rather may be of a developmental nature or an expression of individuality. The speech handicapped pupil's special education needs shall be met through six distinct speech therapy services: Identification, remediation, referrals, resource, administrative and research services.

e. Children who are *"emotionally maladjusted"* shall include those children commonly identified as emotionally disturbed or socially maladjusted. They are those pupils who display an inability to develop or maintain satisfactory intrapersonal or interpersonal relationships.

f. Children *"intellectually incapable of profiting from ordinary instructional methods"* shall include those children commonly identified as mentally handicapped. They are those pupils, who as a result of subaverage general intellectual functioning which is associated with impairment of maturation learning and social adjustment, are incapable of being educated profitably and efficiently through ordinary classroom instruction. *"Subaverage general intellectual functioning"* refers to performance which is greater than one standard deviation below the population mean on an approved individual test of general intelligence, administered by an approved examiner.

12.2(281) Reporting need status. To promote education for children requiring special education, special education personnel shall periodically, on forms provided, report to the state division of special education and to local school administrators the nature and extent of present special education services and indications of present and projected needs for such services.

12.3(281) Delegation of authority. To adequately supervise education for children requiring special education, locally employed directors of special education shall be delegated authority for the administration, supervision and co-ordination of all special education activities and personnel within the school system or area served. Where more than one person of a particular specialty area is employed, the administrator will designate one as responsible for insuring program continuity and consistency.

12.4(281) Local educational units. To initiate, organize and operate services for children requiring special education, local educational units shall:

12.4(1) *Preliminary plan.* Initiate special education services only after careful planning which insures sound establishment of such services, proper identification of children, meeting of required standards, and continuity of instruction which includes follow-up activities at all levels consistent with needs of the handicapped child and necessary expansion of services. Services may be established independently by a single school district or jointly by two or more contiguous school districts or in co-operation with an intermediate unit.

12.4(2) *Planning considerations.* In planning, specifically consider the number of handicapped pupils necessary to accommodate appropriate groupings according to nature and severity of handicaps, ages of children and educational objectives at all educational levels, and shall provide for appropriate and continuing identification procedures. Evidence of adequate planning shall be made available to the division of special education upon request and shall be considered in the approval of special education services.

12.4(3) *Filings.* Submit the following:

a. Application for the approval of individual programs for which full-time special personnel are not employed before the program is initiated. Individual programs are defined as "Programs established specifically for one child including, but not limited to special transportation, home or hospital instruction, provision of special equipment, supplemental instruction and other special services".

b. Approval applications for the operation of special classes and the employment of special personnel during the ensuing summer or the following academic year. These shall be submitted annually before June 20 to be eligible for approval. Application for approval of programs to be initiated after the beginning of the regular academic school year (August) shall be submitted at least 30 days before the program is scheduled to be initiated.

12.4(4) *Records kept.* Keep in its files required evidence of the existence of a handicap and approval of the pupil's participation in the program.

12.4(5) *Sequential program.* Provide special instructional services only as a part of a sequential program designed to fulfill the educational and developmental goals, including vocational training and guidance, which are commensurate with the abilities of handicapped children enrolled and for whom the special service provided has been recommended by approved special education personnel.

12.4(6) *Economy of effort.* Insure that special class curricula utilize portions of regular school curricula whenever reasonable and consistent with the needs of children enrolled in the special class.

12.4(7) *Written approval obtained for services.* Insure that special written approval has been obtained from the state division of special education prior to initiating special education services involving the employment of special personnel which are employed part-time in special education and part-time in another capacity within the school or part-time in two or more of the special education personnel areas.

12.4(8) *Prerequisite program approval.* Insure that preschool programs for handicapped children are established only after a "Proposed Program Plan," submitted on forms provided, has been approved by the state division of special education.

12.4(9) *Summer programs.* Insure that rules pertinent to programs, eligibility, equipment, materials, facilities, supervision and duties of personnel are observed in summer programs for children requiring special education.

12.5(281) Special education personnel. Special education personnel shall:

12.5(1) *Certification.* Meet the department of public instruction certification requirements for the position employed and shall meet the approval requirements of the state department of public instruction as provided for particular special education services and programs.

12.5(2) *Co-operation.* Co-operate with other disciplines represented in schools and local regional agencies in order that all possible resources may be explored and utilized to complement the special services provided.

12.5(3) *Records and reports.* Maintain sufficient records and reports to assure continuity and effective program planning and shall submit to the division of special education records and reports specifically requested.

12.5(4) *Facilities.* Be provided by the local educational agency with office time, secretarial and clerical assistance, office space, supplies, equipment and regularly available facilities as determined by professional standards to be appropriate to carry out assigned responsibilities and functions.

12.6(281) Approval conditions. Each approved public school system shall have equal opportunity for approval of programs and reimbursement of excess costs for special education services and shall observe the following additional conditions:

12.6(1) *Advance payment.* The cost of any program must be paid by the school system before reimbursement can be claimed.

12.6(2) *Claims prorated.* State reimbursement for the excess costs of approved programs shall be prorated if appropriated funds are insufficient to reimburse audited claims in full.

12.6(3) *Computation basis.* Computation of state reimbursement shall be computed on an annual basis (July 1 through June 30).

12.6(4) *Time for making claim.* Reimbursement claims for all approved special education services and programs shall be submitted upon completion of the school year and prior to June 20.

12.7(281) Classrooms. Special classes and rooms for special education shall be at least equivalent in quality to regular classrooms in the system, located in buildings housing regularly enrolled children of comparable ages, and containing facilities in keeping with an educational program designed to meet the needs of the children enrolled. Rooms shall be sufficient to accommodate the use of special equipment and individual or small group instruction if necessary. Classes for trainable mentally handicapped children may be segregated from the general school population. In some cases, for compelling reasons, a local educa-

tional agency may find it necessary, on a temporary basis, to locate other special classes in a segregated facility. Approval to locate a special class in a segregated facility shall be obtained from the state division of special education prior to the initiation of such a program. Annual reapproval is required.

12.8(281) Tuition. If the resident school of "children requiring special education" does not directly provide appropriate special education services, tuition may be paid to another school system which has agreed to provide appropriate special education services to such pupils.

12.9(281) Identification services. Identification services, including locating pupils with handicapping conditions through routine screening and evaluative testing of referrals from parents, teachers, physicians or others, may be provided by the local educational agency to the general school population.

12.10(281) Transportation. Special transportation may be provided by the local educational agency for any pupil whose handicap or subsequent special education service requires him to be transported to and from or in and about school.

12.11(281) Special equipment. Various types of special equipment and materials appropriate to meet specific educational needs of handicapped pupils may be provided by the local educational agency. Such equipment and materials shall be acquired, inventoried and used according to guidelines established by the state division of special education.

12.12(281) Physician's report. Prior to placement in special classes for handicapped children, each pupil must be examined by a licensed physician; and the physician's report must be on file in the office of the special education director or local school system.

12.13(281) Eligibility requirements. Eligibility of children for special education shall, in addition to prescribed evaluations to determine diagnoses, meet the following requirements:

12.13(1) *Crippled or other health impaired children.* Diagnosis of crippling conditions and health impairments based upon a comprehensive physical examination by a licensed medical examiner. The director of special education shall determine the eligibility of pupils with specific learning disabilities to receive services. Determination of eligibility shall be consistent with the pupil's needs as indicated by the following evaluations performed by approved examiners:

a. An evaluation of the pupil's educational functioning level.

b. A psychological evaluation including at least an individual test of intelligence.

c. An evaluation of verbal communication skills.

d. A physical examination including a neurological examination.

e. A vision examination.

f. An audiologic evaluation.

g. A psychiatric evaluation when appropriate.

h. Social case study.

Children shall be re-evaluated annually by appropriate specialists.

12.13(2) *Visually handicapped children.* Determination based upon a comprehensive evaluation by a licensed eye examiner.

12.13(3) *Hearing handicapped children.* Determination based upon:

a. An otologic examination and subsequent otologic examination (required at least every two years or as recommended by the otologist).

b. A vision examination.

c. An audiologic evaluation by an approved hearing clinician and subsequent evaluations made at the request of the teacher or as recommended by the hearing clinician.

d. A psychological evaluation.

12.13(4) *Communication handicapped children:*

a. For each pupil with a communication disorder who receives remediation services, a certificate of existence of the handicap, dated and signed by an approved speech clinician, shall consist of results of professionally reliable tests or evaluative techniques of articulation, hearing acuity, language, fluency, voice, prosody and the peripheral speech mechanism.

b. Children shall be re-evaluated annually by an approved speech clinician.

c. Certificates shall be removed from the child's records upon completion of the therapy program.

12.13(5) *Emotionally disturbed children.* Evaluated by a psychiatrist or approved clinical psychologist and special education services provided shall be consistent with recommendations made by the examiner. An annual re-evaluation shall be made by appropriate specialists.

12.13(6) *Mentally handicapped children.* Diagnosis of mental retardation and subsequent recommendations for purposes of educational planning shall be based upon a comprehensive evaluation which includes investigation and testing of intellectual, physical, cultural, educational, medical, emotional and sensory factors by approved examiners. Each child shall be re-evaluated by an approved psychological examiner at least once every three years.

12.13(7) *Required mental capacity.* Pupils enrolled in special education classes, other than those designated for the mentally handicapped, shall be capable of functioning at an intellectual level above that of a mentally handicapped pupil. In classes for educable mentally handi-

capped, special permission must be obtained from the state division of special education prior to the placement of a pupil with a measured IQ of 80 or above on an individual test of intelligence administered by an approved psychologist. In classes for trainable mentally handicapped, special permission must be obtained from the state division of special education prior to the placement of a pupil with a measured IQ of 30 or less on an individual test of intelligence administered by an approved psychologist.

12.14(281) Authorized personnel. The following types of special education personnel are authorized to be employed by a local educational agency:

12.14(1) *Special education directors.* Employed to administer, supervise and co-ordinate a total special education program.

12.14(2) *Special consultants.* Employed to assist school administrators in carrying out programs for pupils in need of special education.

12.14(3) *Speech clinicians.* Employed to provide clinical speech services necessary for identifying, planning, co-ordinating and carrying out programs for speech, voice and language handicapped pupils.

12.14(4) *School psychologists.* Employed to provide those psychological services necessary for the identification of pupils in need of special education services and for planning and carrying out programs for them.

12.14(5) *Hearing clinicians.* Employed to provide services necessary for the identification of public school pupils having hearing impairments and for planning and providing special education services for them.

12.14(6) *School social workers.* Employed to serve handicapped pupils through group or individual case work practice, consultation with school personnel and counseling of parents and pupils.

12.14(7) *Physical and occupational therapists.* Employed to provide those specific therapies needed by handicapped pupils.

12.14(8) *Hospital teachers and teachers of the homebound.* Employed to provide instruction for pupils unable to attend regular classes because of a physical handicap.

12.14(9) *Teachers for specific types.* Employed to teach children who are physically handicapped, emotionally disturbed, educable mentally handicapped, trainable mentally handicapped, visually handicapped, hearing handicapped and children with specific learning disabilities. Itinerant or resource teachers may be employed for children with specific learning disabilities, visually handicapped children and hearing handicapped children.

12.14(10) *Supplemental teachers.*

12.14(11) *Matrons and teacher aides.*

12.14(12) *Work study co-ordinators and work adjustment co-ordinators.*

12.15(281) Special approvals. Special approval and reimbursement may be given for special education service for which specific provisions are not otherwise made or for experimental or demonstration type services involving new practices or procedures which show promise for future application in other schools. A plan shall be submitted on forms provided by the state division of special education and approved by that division before such programs are established.

12.16(281) Teacher load. The maximum number of pupils per teacher shall be:

12.16(1) *Crippled and other health impaired children.* The number of pupils and the chronological age range of pupils enrolled shall not exceed the sum of 15 except that the number of pupils shall not exceed ten in classes for specific learning disabilities.

12.16(2) *Visually handicapped children.* The number of pupils and the chronological age range of pupils enrolled shall not exceed the sum of 15.

12.16(3) *Hearing handicapped children.* Eight pupils.

12.16(4) *Emotionally disturbed children.* Enrollment shall not exceed ten pupils and the chronological age range shall not exceed four years.

12.16(5) *Educable mentally handicapped children.* The number of pupils and the chronological age range of pupils enrolled shall not exceed the sum of 20 provided that the chronological age range shall not exceed six years.

12.16(6) *Trainable mentally handicapped children.* Ten pupils, provided that the chronological age range shall not exceed eight years and provided that an additional five students may be enrolled upon employment of an approved matron.

12.17(281) Handbook as guide. The guide for programming for children requiring special education shall be the Special Educator's Handbook issued by the State Division of Special Education, Department of Public Instruction.

12.18(281) When provisions mandatory. For purposes of meeting the requirements placed on junior and senior high schools by the provisions of 257.25(9)"c", the provisions of the foregoing rules shall be applicable. Said provisions shall be made either directly within such schools or indirectly through payments of tuition or other authorized expenses.

[Filed December 13, 1966]

TITLE XI

TEACHERS

CHAPTER 13

GENERAL INFORMATION AND REQUIREMENTS FOR CERTIFICATION

DIVISION I
HOW TO APPLY

13.1(257) Address to use. Address all communications to:
Department of Public Instruction
Division of Teacher Education and Certification
Grimes Building
Des Moines, Iowa 50319

13.2(257) Applicants from Iowa colleges. Certificates are issued only upon application filed on a blank furnished by the department of public instruction available on request or from office of college registrars, superintendents and county superintendents. Applicants must have the recommendation of a designated official of the approved Iowa teacher-education institution where their preparation was completed.

13.3(257) Applicants from non-Iowa colleges.

13.3(1) Applicants prepared in recognized teacher-education institutions in other states may file applications exactly as in section 13.2(257) above, provided such colleges have filed and received approval of the curricula which they have each prospective applicant for each type of certificate complete.

13.3(2) Applicants with four-year degrees prepared in other states in institutions which are accredited by the National Council for Accreditation of Teacher Education are eligible to receive Iowa certificates in accordance with the conditions of the *Reciprocity Agreement of the Central States Conference of State Department of Education.*[1]

13.3(3) Applicants whose situations do not fit those described in the preceding two paragraphs are requested to:

1. Write a letter indicating the type of teaching service for which a certificate is desired.
2. Enclose complete official transcript or transcripts showing all college preparation.
3. Itemize teaching experience, if any.

[1]See chapter 20 for text of the Reciprocity Agreement of the Central States Conference of State Departments of Education.

4. List all certificates held in other states, if any.

The materials presented will be evaluated and the applicant will receive a decision as to his eligibility for a certificate, and, if eligible, instructions as to steps to follow in completing the application.

13.4(257) Classification of certificates. Chapter 14 shows the classes of certificates available, the length of terms and the specific services for which each class of certificate may be endorsed. The three areas of endorsement are: (1) Teaching or special service, (2) supervision and (3) administration (principals and superintendents).

13.5(257) Fees. The fee for all original certificates is two dollars. The fee for each endorsement added to a certificate except at the time of original issuance or renewal is two dollars.

Each fee should be made payable to the superintendent of public instruction.

When an application is canceled or not approved, the fee will be refunded.

13.6(257) Transcripts not returned. All transcripts of applicants who receive certificates become the property of the state of Iowa and are not returned.

13.7(257) Response to application. Upon receipt of application, fee, transcript and other needed materials, the records will be evaluated and the certificate or the notification of any deficiency will be sent.

13.8(257) Adding endorsements. When an application accompanied by the fee is filed, a certificate will be endorsed for additional service at any time provided the applicant has met the current requirements for such endorsement. When an added endorsement is requested on the date of issuance of an original certificate or renewal, no separate fee is required. It is not necessary to return one's present certificate for added endorsements. A new certificate, with expiration date unchanged, but carrying all endorsements—old and new—will be prepared. This new certificate must in turn be registered in the office of the county superintendent of each county in which it is used.

13.9(257) Dating of certificates. Certificates are valid only from and after the date of issuance recorded thereon. All term certificates expire on June 30 of the final year of the term for which they are issued and each fraction of a year during the term of a certificate counts as a full year. The service authorized by each endorsement on a certificate may legally be performed only from and after the date of each such endorsement.

DIVISION II
REQUIREMENTS FOR ALL APPLICANTS

13.10(257) Age, physical and moral status. In addition to meeting the standards prescribed in these rules, applicants for certificates must be 18 years of age or over, and physically competent and morally fit to teach.

13.11(257) Recency of preparation. Any applicant who meets the preparation and experience requirements for a permanent professional certificate shall be immediately eligible for that certificate without regard to the recency of that preparation or experience.

Any applicant who meets the preparation requirements for an original professional certificate, but who has had less than eight months' teaching experience during the ten-year period immediately preceding the date of application for such certificate, must have completed at least six additional semester hours of credit in an accredited institution within the said ten-year period, such credit to be in addition to meeting the specific requirements for the type of certificate desired.

Any applicant who meets the preparation requirements for an original preprofessional certificate must satisfy the same conditions regarding recency of preparation as applicants for the original professional certificate except that the additional preparation required must be completed within the five-year period immediately preceding the date of application for the certificate.

Where recent credits are required, they should be taken in professional education or in the applicant's area or field of specialization. When an applicant qualifies for the certificate desired with the exception of having had recent preparation as herein defined, a temporary certificate, valid for one year, will be issued.

13.12(257) Graduation from approved institutions.

13.12(1) *Iowa colleges.* Certificates are issued on records showing graduation from teacher-education curricula in Iowa colleges approved by the state board of public instruction for the type of certification and endorsement(s) sought.

13.12(2) *Colleges in other states.* Certificates are issued on records showing graduation from teacher-education curricula in colleges in other states which are members of the regional accrediting agencies of the territories in which they are located, and which are accredited by the National Council for Accreditation of Teacher Education, provided such records show that the Iowa requirements have been met.

13.12(3) *National accredited colleges.* Certificates are issued to applicants with four-year degrees granted by colleges in other states which are accredited by the National Council for Accreditation of Teacher Education, provided the states in which such colleges are located are signatory to the *Reciprocity Agreement of the Central States Conference of State Departments of Education,*[1] provided the applicants meet the conditions of the agreement.

[1]See chapter 20 for text of the Reciprocity Agreement of the Central States Conference of State Departments of Education.

13.13(257) Evidence of success of experience. Every experienced teacher applying for a certificate must file evidence on forms provided showing that such experience was successful. The applicant must show also that—if legally required for the position held—an appropriate certificate authorizing such experience was held in the state in which such experience occurred.

13.14(257) Recommendation by institution. Each application for a certificate or endorsement thereof must carry the recommendation of the institution where the required program of preparation was completed.

13.15(257) American history or government. Two semester hours of credit in American history or government are required for all certificates. Where an applicant qualifies for the certificate desired with the exception of this credit, a temporary certificate, valid for one year, will be issued.

In lieu of two semester hours of college credit in American history or government, the applicant may present evidence certified by the registrar of an accredited institution showing that said applicant has passed a special written examination in one of these subjects.

13.16(257) Standards for approval. Two sets of standards which teachers must meet are in force at all times. The first set of standards gives the requirements for teachers' certificates and the services authorized by the endorsements appearing on them. This first set of standards appears in chapters 13 to 17 of these rules.

The second set of standards, which appears in chapters 18 and 19 of these rules, governs the specific subjects and services to which teachers in schools approved by the department of public instruction must be assigned. These standards are referred to as "approval standards."

Division III
DEFINITION OF "RECOGNIZED INSTITUTION"

13.17(257) Iowa colleges. All programs of teacher education and the Iowa colleges offering these programs must be approved by the state board of public instruction according to standards established by this board.

13.18(257) Colleges in other states. Programs of teacher education of colleges in other states are recognized to the extent that they are equivalent to Iowa's requirements for certificates, provided these colleges are members of the regional accrediting agencies of the territories in which they are located, and are accredited by the National Council for Accreditation of Teacher Education.

13.19(257) Validation of credit from nonaccredited institutions. Applicants whose preparation has taken place at a college not accredited within the meaning of the definition herein set forth but whose teacher-education programs have been approved by the state board or other agency which has jurisdiction over teacher education and certification in the state in which such college is located and which college is accredited by the regional accrediting agency of the territory in which it is located may be issued a temporary certificate valid for a one-year term. If teaching performed under such temporary certificate is evaluated by the applicant's supervisor as successful, a professional certificate will then be issued to the applicant or, at the recommendation of such supervisor, said temporary certificate may be renewed.

Applicants whose preparation has taken place at a college not accredited by the regional accrediting agency of the territory in which such college is located but which is approved by the state board or other agency which has jurisdiction over teacher education and certification within the state in which such college is located may qualify for certification after admission to a graduate school recognized by the state board of public instruction and by successful completion of six semester hours of graduate-level courses at said graduate school.

The principal responsibility for recommending applicants for certification under the provisions of this section will rest in all cases with the college at which the applicant completed his teacher-education program. In those cases where qualification has been completed by the taking of six semester hours of graduate courses, additional recommendation may be obtained from the graduate school at which the work was successfully completed.

Applicants who have qualified for certification except for the admission to a recognized graduate school and the completion of six semester hours of graduate work, as hereinabove provided, may be issued a temporary certificate, valid for one year, pending the successful completion of such work.

13.20(257) Applicants with experience. Applicants, prepared at a non-Iowa college not accredited as defined herein, who hold regular term certificates issued by the state in which the college is located and who have had one year of successful teaching experience in that state, will be exempted from taking the validating credit outlined in 13.19(257) above.

Division IV
SECURING ADDITIONAL ENDORSEMENT

13.21 and 13.22 Reserved for future use.

Division V
POSITIONS FOR WHICH CERTIFICATES ARE REQUIRED

13.23(257) Public school positions. Section 260.6 stipulates, "Every person employed as an administrator, supervisor, or teacher in the public schools shall hold a certificate valid for the type of position in which he is employed."

13.24(257) Private school teaching. Section 299.1 specifies that children of compulsory

school age must either attend some public school or "upon equivalent instruction by a certified teacher elsewhere."

13.25(257) Registration of certificate. A contract for teaching in a public school in this state is void unless the teacher holds an Iowa certificate which has been registered in the office of the county superintendent. The Code section 260.20 includes the following statement:

"All diplomas and certificates shall be valid in any county when registered therein, and no person shall teach in any public school whose certificate has not been registered with the county superintendent of the county in which the school is located, provided that whenever there is a sufficient number of holders of advanced and standard elementary certificates available to supply the elementary schools in any county it shall not be incumbent upon the county superintendent to register limited elementary certificates."

13.26(257) Uncertificated teaching prohibited. It is the duty of the county superintendent to order to be closed any public school or schoolroom taught by any teacher not certificated as required by law. Section 273.18(23) requires the county superintendent to:

"Order to be closed, any public school or schoolroom taught by any teacher not certified as required by law. If his order is not immediately obeyed, he shall enforce the same against the teacher and the school board by an action for a mandatory injunction in a court of competent jurisdiction."

13.27(257) Compensation for uncertificated teaching prohibited. Under section 294.1, no compensation shall be recovered by a teacher for service rendered while without a certificate.

DIVISION VI
RESIDENCE, CORRESPONDENCE, AND EXTENSION STUDY

13.28(257) Definition of terms. Residence study is interpreted by the state board of public instruction to be study in which the class attendance is on the campus of the institution or in an approved branch school established by the institution which grants the credits for such study. Extension study shall be interpreted as that which is associated with attendance of off-campus classes except where such classes are in an approved branch school. Correspondence study shall be interpreted as that which takes place off campus and which involves no class attendance.

13.29(257) Standards for residence study. Under sections 504.12 and 504.13, at least one academic year of residence work must have been completed at the institution which grants an academic degree.

For certification purposes it may consist of one academic year; of not less than 30 weeks if distributed among three summer sessions; of 24 weeks if distributed among four summer sessions.

At least 20 semester hours of any accredited two-year course must be completed in residence at the institution issuing the record certifying to the completion of such course.

13.30(257) Standards for correspondence and extension study. A teacher employed full time may apply toward an original certificate not more than 12 semester hours of credit earned by any method during the regular school year of nine months.

Not more than one-fourth of any accredited two- or four-year course may be taken under projected registration, correspondence study, and extension classes; provided that an experienced teacher who is following a two-year curriculum leading to a preprofessional certificate will not be subject to this standard if the following conditions are met: The credits in excess of 15 semester hours shall have been completed in a class and not by correspondence study, the institution certifying to the completion of the two-year elementary teacher-education curriculum shall have had this student in residence classes for at least 20 semester hours of the work included in such curriculum.

DIVISION VII
CERTIFICATE REQUIREMENTS FOR THOSE WITH ACADEMIC DEGREES

13.31(257) Applicants without education courses. Persons holding baccalaureate degrees from accredited institutions, without having begun a program of professional education prior to the securing of such degrees, who desire to qualify for original certificates based on college degrees may secure certificates by completing the specific courses required in an institution approved for teacher education leading to a professional certificate. Such persons must complete the required work in residence. This residence work must extend over a period of at least 22 weeks.

13.32(257) Persons with partially completed programs of professional education. College graduates who partially completed teacher-education programs before securing their degrees, may complete their work at the institution from which they were graduated without meeting the additional residence requirement.

DIVISION VIII
CONVERSION OF PRIOR CERTIFICATE[1]

13.33(257) Old-type certificates defined. Prior to June 30, 1935, authorization to teach known as "state certificates" were issued. These certificates were designated as first-grade state certificates when issued on the basis of four-year college degrees. When issued on the basis of two years of college preparation, they were designated either as second- or third-grade state certificates.

[1]For information regarding conversion of other types of existing certificates, see chapter 16.

13.34(257) Equivalent new classes of certificate available.

13.34(1) *First-grade.* Holders of expired first-grade state certificates may, upon meeting requirements, exchange them for the professional certificate described in chapter 14 of these rules. The endorsement will be for secondary-school teaching when the original preparation was at that level. If the original preparation was in the elementary-school field, the endorsement will be for elementary-school teaching.

13.34(2) *Second or third grade.* Holders of expired second- or third-grade state certificates may, upon meeting requirements, exchange them for the preprofessional certificate described in chapter 14 of these rules. The endorsement will always be for elementary-school teaching.

13.35(257) Requirements for exchange. Eight semester hours of credit must be completed in an approved college within the five-year period immediately preceding the date of application for exchange. At least three semester hours of this total must be completed in professional education related to the endorsement to appear on the certificate.

DIVISION IX
TEACHING EXPERIENCE RECOGNIZED

13.36(257) Amount of experience. Applicants for certificates may present evidence of five years' successful teaching experience in the type of work authorized by the endorsement to appear on the certificate sought in lieu of the credits in student teaching required for such endorsements, provided the three conditions outlined in 13.37(257) are met.

13.37(257) Conditions to be met. The five years of experience to be substituted for student teaching shall have been gained in any state on a valid certificate other than an emergency certificate, a corresponding number of semester hours of credit is presented in other education courses, and the institution recommending the applicant for such a certificate is agreeable to the substitution.

DIVISION X
MISCELLANEOUS INFORMATION

13.38(257) Extension for military service. The expiration date of the certificate of a teacher who is called into military service is extended for that period of time for which said teacher is in military service, provided that said teacher applies to the state department of public instruction for such extension within one year after honorable discharge from military service has been secured, or on or before the date of expiration of his certificate, even though that date should be more than 12 months after the date of honorable discharge.

13.39(257) Certificates for exchange teachers. The state board of public instruction is authorized, section 260.10, to issue a certificate to an exchange teacher from another state or country when such teacher has the qualifications equivalent to the regular teacher employed by the board and who is serving as the exchange teacher.

The state board has authorized the issuance of a temporary certificate valid for one year, to such exchange teachers. Employing officials participating in arrangements for the exchange of teachers should correspond with the division of teacher education and certification of the department of public instruction for instructions to be followed by the incoming exchange teacher in order to comply with the conditions of the law referred to in the preceding paragraph.

13.40(257) Revocation. Any diploma or certificate is revocable by the state board of public instruction for any cause which would have authorized or required a refusal to grant the same.

The certificate of any teacher employed in a given county is revocable by the county superintendent when, in his judgment, there is proper cause for the revocation of said certificate or when complaint is filed supported by affidavits charging incompetency, immorality, intemperance, cruelty or general neglect of the business of the school.

The procedure for the trial before the county superintendent and the appeal to the superintendent of public instruction is set forth in sections 260.24, 260.25, and 260.26.

13.41(257) Requirements tentative. The minimum requirements set forth in this bulletin are to be considered as tentative in nature and subject to revision from time to time.

[Filed January 3, 1955; amended October 6, 1955, July 17, 1957, October 31, 1967]

CHAPTER 14
CLASSIFICATION OF CERTIFICATES

DIVISION III
PREPROFESSIONAL CERTIFICATE

14.15 Validity.
14.16 Elementary endorsement.
14.17 Secondary (trade and industrial classes) endorsement.
14.18 Elementary-secondary (not available to new applicants) endorsement.

DIVISION IV
SUBSTITUTE CERTIFICATE

14.19 Validity.
14.20 Endorsements available.
14.21 Requirements.

DIVISION V
TEMPORARY CERTIFICATE

14.22 Validity.
14.23 Endorsements available.
14.24 Requirements.

DIVISION VI
PROFESSIONAL COMMITMENT CERTIFICATE

14.25 Requirements for renewal.

DIVISION VII
MERGED AREA PERSONNEL

14.26 Superintendent.
14.27 Director.
14.28 Instructor.

14.1(257) Classes listed. The teachers' certificates available are grouped into five major classes.[1] The various types of specific services which each teacher is authorized to perform are indicated by one or more endorsements[2] on the certificate held.

The classes of certificates are:

14.1(1) *Permanent professional certificate.* Valid throughout lifetime of holder except when revoked for cause.

14.1(2) *Professional certificate.* Valid for ten-year term and renewable according to prescribed conditions.

14.1(3) *Preprofessional certificate.* Valid for six-year term and renewable according to prescribed conditions.

14.1(4) *Substitute certificate.* Valid for two-year term, but, except as authorized by the department of public instruction by written statement, not to exceed 90 full days of teaching in any one academic year and renewable according to prescribed conditions.

14.1(5) *Temporary certificates.* Valid for one-year term.

[1]See chapter 15 for information as to the content of the *preparation needed for each of the various classes of certificates.*

[2]Except for certificates endorsed for elementary-secondary-school teaching in specified subjects, Iowa certificates give "blanket" authorization to teach any subject in the grades indicated by the endorsements. However, schools, in order to be approved by the department of public instruction, must assign duties to their teachers in accordance with the *approval standards* outlined in chapters 18 and 19 of these rules.

14.1(6) *Professional commitment certificate.* Valid for one-year term and subject to successive renewals provided defined progress is made toward meeting the requirements for the professional certificate, provided that, effective December 31, 1963, the professional commitment certificate shall not be available for original issue. [Implementing 257.10(11)]

DIVISION I
PERMANENT PROFESSIONAL CERTIFICATE

14.2(257) Validity. The permanent professional certificate shall be valid throughout the lifetime of the holder except when revoked for cause, and for service as indicated by the endorsement or endorsements appearing thereon.

14.3(257) Endorsements available. This certificate shall have exactly the same endorsement or endorsements available on the professional certificate which every person applying for a permanent professional certificate must first have had. Additional endorsements may be made at any time that the requirements for them have been met. (See 14.8, below.)

14.4(257) Requirements. The holder of a professional certificate who has had four years of successful experience and 30 semester hours of approved preparation beyond the baccalaureate degree shall be eligible to receive the permanent professional certificate except that, on and after August 31, 1960, said 30 semester hours of approved preparation shall have been graduate credit and a master's degree from an accredited institution shall have been awarded to said holder.

DIVISION II
PROFESSIONAL CERTIFICATE

14.5(257) Validity. The professional certificate shall be valid for a term of ten years, and for service as indicated by the endorsement or endorsements appearing thereon. It shall be renewable according to conditions prescribed in this bulletin.[1]

14.6(257) Elementary endorsement.

14.6(1) *Type of service authorized.* Authorization to teach in kindergarten and grades one through nine.

14.6(2) *Requirements.* Four years of approved college preparation and a baccalaureate degree from a recognized institution.

14.7(257) Secondary endorsement.

14.7(1) *Type of service authorized.* Authorization to teach in grades seven through fourteen.[2]

14.7(2) *Requirements.* Four years of approved college preparation and a baccalaureate degree from a recognized institution.

[1]See chapter 17.

[2]Grades 13 and 14 are junior college grades.

14.8(257) Community or junior college endorsement.

14.8(1) *Type of service authorized.* Authorization to teach in a community or junior college.

14.8(2) *Requirements.* A master's degree from a recognized institution in an approved program of graduate study with a graduate major in a principal field of instruction and including also six semester hours of appropriate professional preparation for college teaching. [Implementing §257.10(11)]

14.9(257) Elementary-secondary and other specialized endorsements.

14.9(1) *Type of service authorized.* Authorization to teach only in special subjects or to serve in special service areas in nursery school, kindergarten, grades one through fourteen or limited groupings associated therewith.

14.9(2) *Special subjects.* The special subjects for which such endorsements are available are: Art, industrial arts, music, athletics and physical education.

14.9(3) *Special service areas and specialized endorsements.* The special service areas for which such endorsements are available are: Speech clinician, librarian, director of library services, public school health nurse, educational media specialist, hearing clinician, reading clinician and special education. The endorsement for special education may be further subdivided by approval area to authorize its holder to render services primarily to the emotionally or socially maladjusted, the mentally handicapped, those handicapped in hearing, the visually handicapped, the physically handicapped and those handicapped in their ability to communicate with others. A specialized endorsement is available for the area of nursery school-kindergarten.

14.9(4) *General requirements.* The requirements for the foregoing endorsements shall include four years of approved college preparation and a baccalaureate degree in all cases.

14.9(5) *Special requirements.* The following requirements shall be applicable to the specific endorsements indicated:

a. Speech clinician. For authorization by endorsement to provide clinical speech services in kindergarten and grades one through fourteen, the applicant must possess a master's degree based upon completion of a program of graduate study in which major emphasis was placed upon speech pathology for school speech clinicians.

b. Director of library services. For authorization by endorsement to serve as director of library services, the applicant shall have met the requirements for a professional certificate endorsed for elementary- or secondary- school teaching and shall possess a master's degree or its equivalent in library science. The applicant must present evidence of successful completion of a course or courses of study in the administration of school library services, which course or courses may be either included in, or in addition to, the work leading to said degree.

c. Nursery-kindergarten teacher. For authorization by endorsement to serve as a teacher in nursery school and kindergarten, the applicant shall possess a bachelor's degree and have completed an approved program of study for the preparation of nursery-kindergarten teachers, which program may be either included in, or in addition to, the work leading to said degree.

d. Educational media specialist. For authorization by endorsement to serve as an educational media specialist in kindergarten and grades one through fourteen, the applicant shall have met the requirements for a professional certificate endorsed for elementary- or secondary-school teaching and shall possess a master's degree based upon an approved program in the specialized area of educational media.

e. Hearing clinician. For authorization by endorsement to provide clinical hearing services in kindergarten and grades one through fourteen, the applicant shall possess a master's degree based upon an approved program of study in which emphasis was placed upon audiology for school hearing clinicians.

f. Reading clinician. For authorization by endorsement to provide diagnostic and instructional services on an individual basis as reading clinician in kindergarten and grades one through fourteen for children with severe reading disabilities, the applicant shall have met the requirements for a professional certificate endorsed for either elementary- or secondary-school teaching and shall present evidence of completion of an approved master's degree program in clinical reading at a recognized institution. In addition, such applicant shall present evidence of at least two years of successful teaching experience.

g. School psychologist. For approval by endorsement for service as school psychologist in kindergarten and grades one through fourteen, the applicant shall possess a master's degree in psychology from a recognized institution of higher learning and shall present evidence of completion of an approved program of graduate study in preparation for service as a school psychologist, either included in, or in addition to, the work leading to said master's degree. In addition, applicant shall present evidence of two years of successful teaching experience.

h. Reading specialist. For authorization by endorsement for services as a reading specialist in kindergarten and grades one through fourteen, the applicant shall have met the requirements for a professional certificate endorsed for either elementary school teaching or secondary school teaching, secured a master's degree from a recog-

nized institution, and have completed an approved graduate program in reading including preparation in the supervision of reading. In addition, such applicant shall present evidence of at least four years of successful teaching experience; at least one of which shall have included the teaching of reading as a significant part of his responsibility.

14.10(257) Elementary school supervision.

14.10(1) *Type of service authorized.* Authorization to serve as a supervisor or teacher in the kindergarten and in grades one through nine.

14.10(2) *Requirements.* Applicant must have met the requirements for endorsement as an elementary-school teacher and, in addition thereto, have completed 20 semester hours of approved graduate credit and have had two years of successful teaching experience except that, on and after August 31, 1960, applicant shall have met the requirements for the professional certificate endorsed for elementary-school teaching, and, in addition thereto, have secured a master's degree in elementary-school education from a recognized institution with emphasis on supervision and have had four years of successful teaching experience; provided further that said applicant shall have had elementary-school supervisory experiences, either with or without credit, under the supervision of the institution awarding said applicant's master's degree, or, in lieu thereof, equivalent experiences as judged by said institution.

14.11(257) Elementary-secondary supervision.

14.11(1) *Type of service authorized.* Authorization to serve only as a supervisor or teacher in special subjects or special service areas in kindergarten and grades one through fourteen.

NOTE: For a list of special subjects and special service areas, see rule 14.9, subrules 1 to 3, above.

14.11(2) *Requirements.* Applicant must have met the requirement for endorsement as an elementary-secondary teacher in the special subject or special service area in which supervision is to be done,[1] and in addition thereto, have completed twenty semester hours of approved graduate credit and have two years of successful teaching experience, except that, on and after August 31, 1960, applicant shall have met the requirements for a professional certificate endorsed for elementary-secondary-school teaching in the special subject or special service area in which supervision is to be done, and, in addition thereto, have secured a master's degree from a recognized institution and have completed an approved graduate program in this special subject or special service area, including preparation also in elementary- and secondary-school curriculum or supervision and have had four years of successful teaching experience; provided further that said applicant shall have had supervisory experiences, either with or without credit, in the special subject or special service area under the supervision of the institution awarding said applicant's master's degree or, in lieu thereof, equivalent experiences as judged by said institution.

14.12(257) Elementary school principal.

14.12(1) *Type of service authorized.* Authorization to serve as a principal, supervisor or teacher in any elementary school through grade nine.

14.12(2) *Requirements.* Applicant must have met the requirements for a professional certificate with endorsement as an elementary-school teacher, and in addition thereto, have completed 20 semester hours of approved graduate credit and have had two years of successful teaching experience except that, on and after August 31, 1960, applicant shall have met the requirements for the professional certificate endorsed for one of the several types of teaching service, and, in addition thereto, have secured a master's degree in elementary-school education with emphasis on administration, but including attention to problems of supervision and have had four years of successful teaching experience; provided further that said applicant shall have had elementary-school administrative experiences, either with or without credit, under the supervision of the institution granting said applicant's master's degree or, in lieu thereof, equivalent experiences as judged by said institution.

14.13(257) Secondary school principal.

14.13(1) *Type of service authorized.* Authorization to serve as a principal, supervisor or teacher in any secondary school through grade 14.

14.13(2) *Requirements.* Applicant must have met the requirements for a professional certificate with endorsement as a secondary-school teacher, and in addition thereto, have completed 20 semester hours of approved graduate credit and have had two years of successful teaching experience except that, on and after August 31, 1960, applicant shall have met the requirements for the professional certificate endorsed for one of the several types of teaching service, and, in addition thereto, have secured the master's degree in secondary-school education with a recognized institution with emphasis on administration, but including attention to problems of supervision and have had four years of successful teaching experience; provided further that said applicant shall have had secondary-school administrative experiences, either with or without credit, under the supervision of the institution awarding said applicant's

[1]A person holding a professional certificate who desires authorization for elementary-secondary-school supervision in special education, must have met the requirements for endorsement in only one area of the education of exceptional children.

master's degree, or, in lieu thereof, equivalent experiences as judged by said institution.

14.14(257) Superintendent.

14.14(1) *Type of service authorized.* Authorization to serve as county superintendent, or as superintendent, principal, supervisor or teacher in any elementary or secondary school through grade 14.

14.14(2) *Requirements.*

a. Standard preparation. Applicant must have met the requirements for a professional certificate with endorsement as a secondary-school teacher, an elementary-school teacher or as an elementary-secondary-school teacher; and in addition thereto, have completed an approved program of preparation, have been awarded a master's degree by a recognized institution, and have had four years of successful teaching experience except that, on and after August 31, 1960, applicant shall have met the requirements for a professional certificate endorsed for one of the several types of teaching service, and, in addition thereto, have secured a master's degree in school administration from a recognized institution plus 30 semester hours of approved graduate study completed after the date of the awarding of the master's degree, and have had four years of successful teaching experience; provided further that said applicant shall have had general school administrative experiences, either with or without credit, under the supervision of the institution in which the additional 30 semester hours were completed or, in lieu thereof, equivalent experiences as judged by said institution.

b. Advanced preparation. Same requirements as for standard preparation plus 30 semester hours of approved graduate preparation beyond the master's degree.

14.14(3) *Superintendent of an area vocational school or community college.* To qualify for authorization to serve as superintendent of an area vocational school or an area community college, an applicant shall submit evidence of preparation and experience as follows:

a. [*Option 1**] Applicant shall have completed an approved program of preparation based upon at least a master's degree in administration and shall have had five years of successful administrative experience including administration of an accredited or approved vocational or technical institution or program embracing two or more fields of vocational or technical education.

b. Reserved for future use.

DIVISION III
PREPROFESSIONAL CERTIFICATE

14.15(257) Validity. The preprofessional certificate shall be valid for a term of six years, and for service as indicated by the endorsement or endorsements appearing thereon. It shall be renewable according to conditions prescribed in this bulletin.[1]

14.16(257) Elementary endorsement.

14.16(1) *Type of service authorized.* Authorization to teach in kindergarten and grades one through nine.

14.16(2) *Requirements—On less than a degree.* Two years (60 semester hours) of approved college preparation in a recognized institution except that, on and after August 31, 1958, the accreditation of each college or university to offer two-year programs of teacher education shall be terminated.

14.17(257) Secondary (trade and industrial classes) endorsement.

14.17(1) *Type of service authorized.* Authorization only to teach the specific subject or subjects designated in the recommendation in grades nine through twelve.

14.17(2) *Requirements.* Recommendation as to competence in designated subject or subjects made by director of division of vocational education of Iowa department of public instruction.

14.18(257) Elementary-secondary (not available to new applicants) endorsement.

14.18(1) *Teaching service authorized.* Authorization to teach the specified subject or subjects in kindergarten and grades one through fourteen.

14.18(2) *Requirements.* Applicant must be holder of a special subject certificate issued in former years which is in force or for which current renewal requirements have been met.

DIVISION IV
SUBSTITUTE CERTIFICATE

14.19(257) Validity. The substitute certificate shall be valid for a six-year term, and for the same services authorized by Iowa or non-Iowa certificate (exclusive of emergency or temporary certificate) once held by the applicant. It shall be valid only for those positions in which a regularly employed, certificated teacher actually began the school year. It shall be valid for not more than 90 days of full-time teaching during any single school year except that an appropriate supervisor in the department of public instruction may, by written statement, authorize the holder of such a certificate to teach in excess of the 90-day period when, in his judgment, the best interests of the pupils would be served thereby. In such an event, the said substitute teacher shall not occupy the position beyond the close of the current school year.

*See 14.26(257) for additional options.

[1]See chapter 17.

14.20(257) Endorsements available. Endorsements on a substitute certificate shall be exactly the same as those to which the applicant would be entitled if a term certificate (equivalent to the type of certificate once held) were issued to the applicant.

14.21(257) Requirements. The applicant for a substitute certificate must once have held an Iowa or non-Iowa certificate (exclusive of emergency or temporary certificate) which, by meeting current renewal requirements in force in the state of issue, could again be issued for a term of years.

DIVISION V
TEMPORARY CERTIFICATE

14.22(257) Validity. The temporary certificate shall be valid for a one-year term and for service as indicated by the endorsement or endorsements appearing thereon.

14.23(257) Endorsements available. This certificate shall be endorsed in a manner similar to permanent professional, professional and preprofessional certificates in accordance with the type of preparation completed.

14.24(257) Requirements.

14.24(1) *Based on expired Iowa certificate, exclusive of emergency or one-year special certificate.* The holder of an expired Iowa certificate (exclusive of emergency or one-year special certificate), who has had one year (eight months) of successful teaching experience, shall be eligible to receive the temporary certificate upon application accompanied by recommendation of a superintendent or county superintendent, provided that no temporary certificate shall be available to any teacher during the first year immediately following the expiration date of said teacher's regular certificate, and no temporary certificate shall be issued to a person whose expired, regular certificate was based on less than 60 semester hours of preparation when said certificate has been expired for a period of five years. This certificate shall be endorsed for the type of service authorized by the expired certificate on which it is based. This certificate is nonrenewable. See chapter 17 for requirements for renewal of Iowa certificate once held.

14.24(2) *Based on eligibility for a professional or preprofessional certificate except for defined deficiencies outlined in chapter 13.* This certificate is nonrenewable.

14.24(3) *Based on 100 semester hours of specified college credit.* This certificate is available only to an applicant who has never had an Iowa teacher's certificate. It requires 100 semester hours of college credit with eight strictly in elementary-school professional education including three in elementary-school methods. The applicant shall have completed at least six semester hours of credit within the five-year period immediately preceding the date of the issuance of the certificate. It shall give the holder authorization to teach in kindergarten and grades one through nine. [Implementing §257.10(11)]

This certificate will be renewable not to exceed three times for one-year terms upon the completion of eight semester hours of credit each year leading toward completion of requirements for a professional certificate, provided that teaching experience continues to be successful.

No temporary certificate will be issued or renewed under the provisions of this subsection from and after August 31, 1970.

14.24(4) *Based on administrative decision.* The superintendent of public instruction is authorized to issue the temporary certificate to applicants whose services are needed to fill positions in specific schools in emergency situations.

14.24(5) *Issued under the conditions of an approved Title I elementary-secondary-education Act program.* This certificate is available to persons employed in the schools under the provisions of an approved Title I elementary-secondary-education Act (P. L. 89-10) program. The applicant shall have completed at least 60 semester hours of college preparation in an institution acceptable to the board. It shall give the holder authorization to teach or supervise children in the position described in the approved Title I program.

The applicant shall show moral and physical fitness for the position and freedom from communicable diseases.

The employing superintendent shall provide a complete job description of the position to be held by the applicant and a statement indicating the special qualifications the applicant has for the position.

This certificate may be registered for additional one-year terms during employment of its holder only so long as approval of the specific Title I program is continued.

14.24(6) *Issued for the performance of supervisory or monitorial services for the purpose of relieving certificated teachers for other duties.* This certificate is available to persons employed in the schools for the performance of various nonteaching duties involving the supervision of pupils and for the purposes of rendering such assistance to teachers as will enable them to perform more effectively their teaching duties.

The applicant shall show moral and physical fitness for the position and freedom from communicable diseases.

Application for such certificate shall be accompanied by a statement, from the local superintendent or administrative officer of the employing district or school, which contains a description of the work for which the applicant is proposed to be employed and states that said superintendent or officer has examined the qualifications of the said

applicant and finds him physically, mentally and morally fit for the performance of such duties.

Certificates issued under the provisions of this subrule will be endorsed for the performance of the specific duties named in the job description and annually registered at the request of the employer.

DIVISION VI
PROFESSIONAL COMMITMENT CERTIFICATE

14.25(257) Requirements for renewal. The professional commitment certificate is renewable for consecutive yearly terms provided that the equivalent of six semester hours of additional preparation leading toward the professional certificate is completed each year*, and provided also that teaching experience continues to be successful and the college where the preparation is being completed recommends each renewal.

The holder of a professional commitment certificate is not required to renew it each year provided no teaching is done. However, a grand total of additional credits equivalent to at least six semester hours of progress each year (except during military service) after the issuance of the original professional commitment certificate will be required.

DIVISION VII
MERGED AREA PERSONNEL

[Rules 14.26(280A) to 14.28(280A) were filed by the Board of Public Instruction]

14.26(280A) Superintendent. In addition to the option provided in 14.14(3)"*a*" [*Option I*] the following options are hereby authorized for the professional certificate.

14.26(1) *Option II.* Applicant shall hold a doctor's degree with specialization in educational administration granted by an institution, approved by the state board of public instruction, shall have had five years of successful administrative experience, and shall be recommended by the institution awarding the degree as having competence to serve successfully as chief administrator of an Iowa area vocational school or area community college and as executive officer of a merged area board.

14.26(2) *Option III.* Applicant shall have had five years of successful experience as administrator of a regionally accredited community college or vocational school, shall hold at least a master's degree with at least two years of graduate study from a regionally accredited institution, and shall be recommended by the institution awarding the master's degree as having competence to serve successfully as chief administrator of an Iowa area vocational school or area community college and as executive officer of a merged area board.

14.26(3) *Option IV.* Applicant shall have had at least five years of successful teaching experience and two years of successful administrative experience in a vocational school, community college, junior college, or four-year college with successful programs in general education or college transfer, or adult or continuing general education, and at least three programs of vocational education. He shall hold an earned doctor's degree in an academic area, vocational education, adult or continuing education, student personnel work, higher education or education with specialized work in administration.

14.26(4) *Option V.* Applicant shall hold a master's degree granted by an institution recognized by the state board of public instruction, and shall be evaluated by a review committee appointed by the state superintendent of public instruction as having competence to serve successfully as chief administrator of an Iowa area vocational school or area community college and as executive officer of a merged area board.

14.27(280A) Director.

14.27(1) *Director of a division of area vocational school or area community college, or administrative center thereof.* To qualify for a professional certificate with authorization to serve as director of a division of an area vocational school or area community college, or attendance center thereof, an applicant shall submit evidence of preparation and experience which meets one of the following options:

14.27(2) *Option I.* Applicant shall hold a master's degree granted by an institution, approved by the state board of public instruction, with specialization in one of the following: (*a*) Subject-matter field taught in the area institution, (*b*) administration, (*c*) vocational-technical education, or (*d*) student personnel work.

Applicant shall have had four years of successful teaching experience and shall be recommended for this certificate by the institution granting the master's degree.

14.27(3) *Option II.* Applicant shall hold a master's degree granted by an institution recognized by the state board of public instruction, and shall be evaluated by a review committee appointed by the state superintendent of public instruction as having competence to serve successfully as director of a division of an area vocational school or area community college, or attendance center thereof.

14.28(280A) Instructor.

14.28(1) *Instructor in an arts and sciences field of an area community college or public community or junior college.* To qualify for a pro-

*If recommended by the college, credits in excess of 6 semester hours completed during any year following the original issuance of the certificate may be cumulated and applied toward meeting the requirements for one or more succeeding yearly renewals. For example, if a teacher should complete ten semester hours during a given year, 4 of them could be carried over and used on the next renewal.

fessional certificate with authorization to teach in an arts and sciences field of an area community college or public community or junior college, an applicant shall submit evidence of preparation and experience as follows:

Applicant shall hold a master's degree granted by an institution, approved by the state board of public instruction, with specialization in a field of instruction offered in the arts and sciences division of an area community college. This preparation shall include six semester hours of professional preparation appropriate for college teaching, provided that adequate experience in college teaching as evaluated by a review committee appointed by the state superintendent of public instruction shall be accepted in lieu of part or all the required credits in professional education.

14.28(2) *Instructor in a vocational or technical field in an area vocational school or area community college or public community or junior college.* To qualify for a professional certificate with authorization to teach in a vocational or technical field in an area vocational school or area community college or public community or junior college, an applicant shall submit evidence of preparation and experience as follows:

Applicant shall hold a bachelor's degree granted by an institution, approved by the state board of public instruction, with specialization for teaching in one vocational or technical field offered in the vocational-technical division of an area vocational school or area community college and recommendation by the preparing institution.

14.28(3) *Instructor in a vocational or technical field in an area vocational school or area community college or public community or junior college.* To qualify for a preprofessional certificate with authorization to teach in a vocational or technical field in an area vocational school or area community college or public community or junior college, an applicant shall submit evidence of preparation and experience as follows:

Applicant shall have competence in one vocational or technical field offered in an area vocational school or an area community college based on adequate preparation and experience as evaluated by a review committee appointed by the state superintendent of public instruction.

[Filed January 3, 1955; amended October 6, 1955, August 23, 1956, July 17, 1957, January 22, 1959, December 2, 1963, December 31, 1963, May 10, 1966, October 5, 1966, October 31, 1967, July 8, 1969, September 18, 1969, March 26, 1971, May 4, 1972]

CHAPTER 15
APPROVAL OF INSTITUTIONS AND TEACHER EDUCATION PROGRAMS

15.1(257) Advisory committee. Chapter 16 presents the teacher certification framework which has been adopted for Iowa by the state board of public instruction.

As a matter of policy, the state board has not set up a rigidly specified curriculum for the preparation of teachers in any field. It has authorized the superintendent of public instruction to appoint an advisory committee on teacher education and certification. This committee will make recommendations regarding the content of each of the various programs of preparation for consideration by the state board. This committee will be a recommending body only. The final legal authority rests with the board.

15.2(257) Recommendations by committee. The state board has stipulated that the advisory committee shall organize its recommendations under four categories:

15.2(1) Academic work in general education needed by all teachers.

15.2(2) Academic preparation needed for secondary- or elementary-secondary-school teachers in their chosen teaching fields, and certain subjects essential in the preparation of elementary-school teachers.

15.2(3) Preparation in education and psychology courses including teaching under supervision.

15.2(4) Student selection and guidance.

15.3(257) Experimental programs. The state board has further stipulated that the advisory committee shall organize its recommendations in such a manner that considerable room will be left for institutional initiative in the methods of preparing teachers. Experimentation with promising programs for improved preparation of teachers is encouraged by the state board.

15.4(257) Filings by institutions. Iowa colleges and universities seeking the approval of their programs of teacher education shall file evidence of the extent to which they meet the standards of the National Council for Accreditation of Teacher Education provided that colleges and universities already accredited by the said council shall be exempted from filing such evidence.

15.5(257) Specific program filed. In order for its graduates to be accepted for teacher certification by the state board of public instruction, each Iowa college or university shall file a specific program or curricular pattern of teacher

education designed to meet the requirements for each certificate, and it shall also specify the courses its students must complete and the levels of excellence which they must attain in said courses as a condition to being recommended for approval to teach the subjects in public schools for which standards are hereinafter prescribed.

15.6(257) Demonstration of competence. When any Iowa college or university which is approved for teacher education by the state board of public instruction certifies that an applicant for a teacher's certificate has demonstrated competence in any required area of preparation equivalent to the completion of regular college courses in that area, said applicant shall not be required to present a record of college credit in said area.

15.7(257) Certificates requiring degree. Certificates based on requirements specifying four years of college preparation and a bachelor's degree shall be issued only after the applicant for one of the said certificates has met each of the following standards, where applicable to the type of said certificate to be issued, in an Iowa college or university whose program or programs of teacher education leading to said certificates shall have been filed with and approved by the state board of public instruction:

15.7(1) *General education.* The applicant shall have completed 40 semester hours of credit in courses specified by the institution awarding said applicant's bachelor's degree as being classified as general education.

15.7(2) *Field of concentration.* The applicant shall have completed 30 semester hours of credit in an area of subject-matter concentration which shall have been listed by the institution awarding said applicant's bachelor's degree in said institution's program or programs of teacher education filed with and approved by the state board of public instruction, provided that, when so designated by said institution, "elementary-school education" shall be regarded as an acceptable area of subject-matter concentration.

15.7(3) *Elementary certificate subjects.* The applicant for a certificate valid for teaching in the elementary-school field shall have completed preparation in at least five of the following areas: Literature for children, mathematics, art, music, geography, health and physical education, industrial arts, conservation education, elementary speech correction and dramatics as separate college courses, or, in lieu thereof, in courses in general education required by the institution awarding said applicant's bachelor's degree.

15.7(4) *Secondary certificate subjects.* The applicant for a certificate valid for teaching in the secondary-school field shall have met the minimum approval standards as herein prescribed for teaching subjects within one or more fields outside his own area of subject-matter concentration for which said approval standards include requirements except in cases where the institution awarding said applicant's bachelor's degree shall have been authorized by the state board of public instruction to recommend applicants who have been permitted by said institution to omit preparation sufficient to meet approval standards in any field outside their area of concentration, and when said institution does so recommend said applicant.

15.7(5) *Special field certificate subjects.* The applicant for a certificate valid for teaching in a special subject or special service area in the elementary- and secondary-school fields shall have completed 40 semester hours of preparation in general education and 30 semester hours of preparation in an area of subject-matter concentration both as specified herein provided that the special subject or special service area in which said certificate authorizes said applicant to teach shall comprise the area of subject-matter concentration, provided further that an applicant for a certificate valid to serve as a teacher in the area of school psychologist must hold a master's degree including the preparation herein prescribed and have had two years of teaching experience.

15.7(6) *Hours of education courses.* The applicant shall have completed a grand total of 20 semester hours of credit in professional education at least one-fourth of which credits shall be in professional education courses which deal with problems which are of common concern to both elementary- and secondary-school teachers.

15.7(7) *Methods and student teaching—elementary certificate.* The applicant for a certificate valid for teaching in the elementary-school field shall complete courses dealing with (*a*) learning experiences designed to develop skill in methods of teaching and evaluating pupil progress in the areas of instruction included in the elementary-school curriculum, and (*b*) shall have completed work in supervised student teaching at the elementary-school level. At least five semester hours of college credit shall have been secured in said supervised student teaching by said applicant.

15.7(8) *Methods and student teaching—secondary certificate.* The applicant for a certificate valid for teaching in the secondary-school field shall have completed courses dealing with (*a*) learning experiences designed to develop skill in methods of teaching and evaluating pupil progress in the areas of instruction included in the secondary-school curriculum, and (*b*) shall have completed work in supervised student teaching in the secondary-school field. At least five semester hours of college credit shall have been secured in said supervised student teaching by said applicant.

15.7(9) *Methods and student teaching—special subject certificate.* The applicant for a certificate valid for teaching in a special subject or

special service area at the elementary- and secondary-school levels shall have completed courses dealing (*a*) with learning experiences designed to develop skill in methods of teaching and evaluating progress of elementary- and secondary-school pupils in the special subject or service area for which said certificate is valid, and (*b*) shall have completed work in supervised student teaching in the special subject or service area for which said certificate is valid. At least five semester hours of college credit in said supervised student teaching shall have been secured by said applicant. This work in student teaching shall have dealt with both elementary- and secondary-school pupils.

15.7(10) *Certification of special subject teacher as elementary teacher.* The holder of a certificate valid for teaching in a special subject or special service area at the elementary- and secondary-school levels shall become eligible for certification as an elementary-school teacher by completing the same subject-matter preparation specified herein as required of the applicant for a certificate valid for teaching in the elementary-school field, and, in addition thereto, by completing six semester hours in elementary-school methods outside the special subject or special service area for which said holder's certificate is already valid.

15.7(11) *Certification of special subject teacher as secondary teacher.* The holder of a certificate valid for teaching in a special subject or special service area at the elementary- and secondary-school levels shall become eligible for certification as a secondary-school teacher by completing the same subject-matter preparation specified herein as required of the applicant for a certificate valid for teaching in the secondary-school field, and, in addition thereto, by completing three semester hours of secondary-school teaching methods outside the special subject or special service area for which said holder's certificate is already valid.

15.8(257) Graduate programs filed. Iowa colleges and universities offering programs of preparation leading to certificates for which graduate study is specified herein shall be authorized to recommend applicants for said certificates only when said programs have been filed with and approved by the state board of public instruction.

15.9(257) Out-of-state programs. In order to have their programs of teacher education considered for approval, out-of-state institutions shall offer programs and meet standards equivalent to those specified herein for Iowa colleges and universities and they shall also meet the following conditions: Be accredited for general excellence by a regional accrediting agency for collegiate institutions operating in the territories in which said institutions are located provided said regional accrediting agency is declared by the state board of public instruction as being acceptable to it; be approved by the state board or agency under whose jurisdiction the institution operates for the particular area or specialized field of teaching in which certification is sought; and be accredited by the National Council for Accreditation of Teacher Education, or, in lieu thereof, provide such other evidence of excellence of the teacher education program as may be required by the state board of public instruction.

15.10(257) Revised program approval. Each revised program of teacher preparation leading to each class of certificate and each endorsement must be submitted to and approved by the state board of public instruction. Every institution must submit its revised program or programs on or before December 31, 1958.

15.11(257) Review committee. The state board will take action regarding the approval of programs submitted by each institution after the report of a reviewing committee designated by the superintendent of public instruction has been submitted. In addition to appropriate members of the staff of the department of public instruction, the reviewing committee shall include representatives of colleges which prepare teachers and of the teaching profession. When a college contemplates major revisions in one or more of its approved programs such revisions may be announced and initiated only after having been approved by the state board.

[Filed July 17, 1957]

CHAPTER 16
CONVERSION OF EXISTING CERTIFICATES TO EQUIVALENT NEW CLASSES OF CERTIFICATES[1]

16.1(257) Conversion authorized. The state board of public instruction has authorized the conversion of all existing certificates to the equivalent new classes of certificates outlined in chapter 14.

---

[1](a) Teachers with certificates in force must have met the requirements for the renewal of such certificates in order to be eligible to convert them into equivalent professional or preprofessional certificates.

(b) Applications for conversion are acceptable within 12 months prior to expiration of certificates now in force.

(c) Permanent professional certificates are immediately available to qualified applicants.

16.2(257) Conversion tables. The following tables summarize the manner in which these conversions will be made:

Existing Certificates	*Equivalent New Certificates*
1. Life certificate where holder has 30 semester hours of credit beyond baccalaureate degree	1. Permanent professional certificates
2. All other life certificates	2. No conversion necessary unless lapsed; then eligible for conversion to equivalent new class of certificate on meeting reinstatement requirements
3. All term certificates in force and based on college degrees[1] a. Names of Certificates Involved (1) Superintendents' certificates (2) Principals' certificates (3) Supervisors' certificates (4) Advanced elementary certificates (5) Standard secondary certificates (6) Advanced secondary certificates (7) Special certificates, exclusive of one-year special certificates	3. Professional certificate, or when conditions are met, permanent professional certificate
4. All term certificates in force and based on less than college degrees a. Names of Certificates Involved (1) High school normal training certificates (2) Uniform county certificates (3) Standard elementary certificates (4) Special certificates, exclusive of one-year special certificates	4. Preprofessional certificate
5. All holders of expired certificates	5. Temporary certificate, also equivalent new class certificate when requirements for renewal or exchange have been met

[1]Although some certificates named in this category were issued in former years in exchange for old-type certificates based on less than college degrees, the experienced holders of such certificates are always given the same renewal or conversion privileges as younger teachers who secured these certificates on the basis of degrees.

[Filed prior to July 4, 1952]

CHAPTER 17
REQUIREMENTS FOR RENEWAL OF TEACHERS' CERTIFICATES

DIVISION I
MISCELLANEOUS REQUIREMENTS

17.1(257) Renewal application forms. Application forms for renewal of certificates may be secured from the department of public instruction, registrars of Iowa colleges, superintendents and county superintendents.

17.2(257) Fees. The fee for the term renewal of a certificate is two dollars; for a life renewal, five dollars. Fees should be sent to the department of public instruction made payable to the superintendent of public instruction.

17.3(257) Time for application. The application and fee for the renewal of a certificate may be filed as early as 12 months prior to expiration date.

17.4(257) Where credits must be taken. Credits earned for the renewal of certificates must be completed in an institution approved by the state board of public instruction. Teachers with 60 or more semester hours of credit on the date of registration for courses to be used for certificate renewal must earn the credits in an approved senior college.

17.5(257) Recency of credits. If a certificate is renewed at date of expiration, the credits presented for the renewal of the certificate are acceptable, if earned during the term of the certificate. If a certificate is not renewed at date of expiration, the credits presented for its renewal must have been completed within the five-year period immediately preceding the date of application for the renewal.

17.6(257) Records of experience. Statements from school officials under whom an applicant has taught are required for renewal of certificates. Appropriate forms for this purpose are provided by the state board of public instruction.

Applicants who have not completed the minimum experience requirements to combine with college credits for the renewal of a certificate and who present additional college credits in lieu of such experience must also file statements from school administrators for such experience as they may have had during the term of the certificate being offered for renewal.

17.7(257) Continued fitness evidence. Such evidence as the state board of public instruction may require showing continued physical and mental health, and moral fitness sufficient for work in the schools must be presented.

17.8(257) Professional spirit—evidence. A person renewing a certificate is required to present such evidence as the state board of public instruction may require showing professional spirit.

The state board has defined the evidence of professional spirit as follows:

17.8(1) Completion of additional college credits as specified since the date of issuance of certificate being offered for renewal.

17.8(2) Adherence to the Code of Ethics for Teachers as adopted by the National Education Association and the Iowa State Education Association.

17.8(3) Attendance at and co-operative participation in institutes and teachers' meetings called by school officials.

17.8(4) Assumption of responsibility for keeping one's own teacher's certificate in force and registered as required by law as long as employed in school work.

17.8(5) Refusal to accept a position for which one is not qualified.

17.8(6) Refusal to aid and abet in any manner the continuance in service of any teacher known to be ineligible for a teacher's certificate.

17.9(257) Requirements subject to change. Renewal requirements are subject to change. The holder of a certificate is responsible for keeping himself informed regarding changes in requirements. While all such changes are widely publicized by the department of public instruction, it is not possible to inform each certificate holder directly whenever such changes are adopted.

All changes in requirements are distributed among city and county superintendents, and college and university departments of education in Iowa. They are also available to any person or institution upon request.

DIVISION II
TERM RENEWAL REQUIREMENTS[1]

17.10(257) Certificates issued on degrees.

17.10(1) *Names of certificates involved:*

a. Professional certificates
b. Superintendents' certificates
c. Principals' certificates
d. Supervisors' certificates
e. Advanced elementary certificates
f. Standard secondary certificates
g. Advanced secondary certificates
h. Special certificates, exclusive of one-year certificates

When renewal requirements for these certificates are met, they will be converted to professional certificates.

17.10(2) *General requirements.* Every person renewing a certificate based on a college degree should complete the required college credits in courses related to the increase in competence to do the type of service covered by the certificate being offered for renewal.

17.10(3) *Renewal requirements — additional preparation and experience.* Successful experience in teaching during the term of the certificate as judged by analysis of evidence filed concerning all such experience, but totaling at least eight months; and, in addition thereto, six semester hours of credit earned since the date of issuance of the certificate.

---

[1]Term renewal requirements are suspended for people 60 years of age or older who hold preprofessional certificates or higher and have had five years (40 months) of successful teaching experience during the term of their certificates being offered for renewal.

In lieu of the above experience and credit: Eight semester hours of additional college credit.

17.11(257) Certificates issued without degree.

17.11(1) *Names of certificates involved:*

a. Preprofessional certificates

b. High school normal training certificates
c. Uniform county certificates
d. Standard elementary certificates
e. Special certificates, exclusive of one-year special certificates
f. Limited elementary certificates[2]

When renewal requirements for these certificates are met, they will be converted to preprofessional certificates.

17.11(2) *General requirements.* Every person renewing a certificate based on less than a college degree must present a statement signed by a registrar of the single, approved institution where the credits for renewal are on record showing the following facts:

a. All credit from other colleges has been received and evaluated in terms of the requirements for the completion of the program leading to a professional certificate.

b. The credits being offered in support of the application for renewal count toward the completion of the requirements for the professional certificate.

17.11(3) *Renewal requirements — additional preparation and experience.* Successful experience in teaching during the term of the certificate as judged by analysis of evidence filed concerning all such experience, but totaling at least eight months; and in addition thereto, six semester hours of credit earned since the date of issuance of the certificate.

In lieu of the above experience and credit: Eight semester hours of additional college credit.

DIVISION III
LIFE RENEWAL REQUIREMENTS[1]

17.12(257) Expired certificates. Certificates that have expired cannot be renewed for life. Any five-year certificate, in force as of December 31, 1953, may be renewed for life on date of expiration by meeting the following requirements.

17.13(257) Standard elementary and five-year special.

17.13(1) *Experience.* Five years' successful teaching experience, two of which must have occurred during the term of the certificate offered for life renewal.

17.13(2) *Professional training, growth, spirit.* Evidence of having completed a two-year college curriculum (or a minimum of 60 semester or 90 quarter hours of college credit) recognized by the state board of public instruction, and in addition thereto, at least nine semester or 13 quarter hours of college credit earned during the term of the certificate to be renewed for life.

17.14(257) Other five-year certificates. Five years' successful teaching experience, two of which must have occurred during the term of the certificate offered for life renewal.

17.15(257) Lapsing of life certificates.

17.15(1) *Lapsing due to nonuse.* A certificate renewed for life remains in force only as long as the holder permits no five-year period to pass in which he has not been employed in school work for at least eight months in administration, supervision or teaching. (One hundred sixty days of teaching is considered the equivalent of eight months.)

17.15(2) *Reinstatement of lapsed life certificate for term.* A life certificate which has lapsed may be reinstated upon filing eight semester hours of college credit earned in an approved institution within the five-year period immediately preceding the date of application for reinstatement.

A lapsed life certificate is reinstated, not as another life certificate, but as an equivalent term certificate as outlined in chapter 16.

Exception: If the requirements for it are met, the permanent professional certificate will be issued immediately upon meeting the requirements for the reinstatement of a lapsed life certificate.

DIVISION IV
SUBSTITUTE CERTIFICATE RENEWAL

17.16(257) Proper use. Evidence showing that substitute teacher's certificate was used only to take the place of a regularly employed, certificated teacher who actually began the school year.

17.17(257) Successful teaching. Evidence showing that any teaching experience had during the term of the certificate was successful, or recommendation by a superintendent or county superintendent as to continued fitness for teaching.

17.18(257) Limit on use per year. Evidence that not more than 90 days of full-time teaching was done by the applicant during any one school year while the certificate was in force, unless such teaching was covered by a valid certificate or was authorized in writing by an appropriate supervisor in the department of public instruction.

---

[2]These limited elementary certificates were renewable once only for one three-year term. However, upon completion of 12 additional semester hours of credit at a single institution under the conditions outlined under 17.13(2), they may be converted to preprofessional certificates.

[1]After June 30, 1958, life renewals will be available only to people with proper experience who have completed 30 semester hours of preparation in addition to the baccalaureate degree. Because, as outlined in chapter 14, such people will be eligible to receive permanent professional certificates, there will then be no advantage in securing a life renewed certificate of the old type.

DIVISION V
TEMPORARY CERTIFICATE RENEWAL

17.19(257) Generally not renewable. Except when so stipulated by the conditions under which it is issued, the temporary certificate is not renewable.

This certificate is usually issued only to people who will become holders of a regular term certificate by completing either six or eight additional semester hours of appropriate college credit.

[Filed prior to July 4, 1952]

CHAPTER 18
GENERAL INFORMATION RELATING TO THE APPROVAL OF CERTIFICATED PERSONNEL

18.1(257) Schools to which applicable. Aside from the fact that every rural school must be taught by a teacher or teachers holding certificates valid for the grade levels included in such schools to which said teachers are assigned, the approval standards stated herein apply to the elementary and secondary schools (including junior colleges) operated by school districts which maintain approved high schools.

18.2(257) Uncertificated personnel—consequences. Any school, rural or otherwise, which does not employ regularly certificated teachers who are qualified for the types of positions held may, under certain conditions, be ineligible for participation in the state distributive funds, and the collection of tuition from nonresidents from other districts which do not maintain approved high schools.

18.3(257) Minimum standards prescribed. The department of public instruction recognizes that the requirements outlined herein are minimum standards only. They are not to be accepted as standards for schools which are attempting to give maximum service. In every instance the required preparation should be exceeded by the good teacher. School boards and superintendents must recognize that standards for teaching are rising the country over, and that Iowa standards are relatively low as compared with other states. Iowa teachers, therefore, may expect that requirements will be raised and should govern themselves accordingly.

18.4(257) Special advice to officials.

18.4(1) *To school boards.* Section 279.14 designates the superintendent as the executive officer of the board. Before filling any vacancy at any time, consult your superintendent. *Under no circumstances should a contract be signed unless you are sure the teacher is properly qualified.* If you are not sure the teacher under consideration meets the minimum requirements for the position, call or write the Department of Public Instruction, Des Moines, Iowa 50319.

18.4(2) *To superintendents.* Be sure to consult these rules before filling any vacancies in your teaching staff. In filling vacancies, call the attention of your school board to the paragraph above so that such vacancies will not be filled with unqualified teachers.

In making assignments of secondary-school teachers it is expected that superintendents will recognize the preparation of the teacher, and require at least 20 semester hours of preparation in any field which constitutes the teacher's major assignment.

18.5(257) Certificates for certain positions. A certificate appropriate for each type of position is required. The following statements are important in this connection:

18.5(1) Certificates authorizing service or teaching at the elementary- and secondary-school levels in specific areas or subjects are not valid for teaching academic subjects not covered by such endorsements.

18.5(2) Certificates for elementary-school teaching are not valid for service above the eighth grade unless so designated by the certificates or the endorsements on them.

18.5(3) No certificates valid for secondary-school teaching may be used below seventh grade unless specific endorsements to that effect appear on them.

18.6(294) Prior service recognized. Any teacher who has been regularly approved for teaching a subject or grade in an approved Iowa school may continue to teach that subject or grade in the same type of Iowa school even though he does not meet the present standards (section 294.2). This privilege is not extended to teachers who have been approved but do not meet the legal requirements; e.g., a holder of a certificate valid only for teaching in the seventh grade or above does not qualify on that certificate for teaching below the seventh grade, even though he may have once taught in kindergarten and grades one through six.

18.7(257) Preparation at accredited institution. In every instance where "preparation or training" of the teacher is mentioned, such preparation or training must be secured in, or validated or evaluated by, a regularly accredited teacher-education institution. Such Iowa institutions are listed in the Iowa Educational Directory, published annually by the department of public instruction. Accredited out-of-state schools are those accredited by the North Central Association

of Colleges and Secondary Schools or comparable regional accrediting associations, or the National Council for Accreditation of Teacher Education. Any reference to "hours of preparation" is expressed in semester hours only.

18.8(257) Departmental approval statement. It is the practice of the department of public instruction to issue an official statement to each secondary-school teacher indicating the subjects which that teacher is approved to teach under these standards. Thus, employing officials will know in advance of hiring a teacher whether or not said teacher's qualifications fit the position to be filled. On request, this information will be supplied to any superintendent or school board direct from the department of public instruction.

Each Iowa teacher-preparing institution, approved by the state board of public instruction, shall outline the courses or levels of adequacy which its students must attain in order to be recommended for approval to teach in the various subject-matter areas. After the state board of public instruction has officially accepted said outline from an institution, the teacher prepared at said institution shall be approved only when said courses or levels of adequacy shall have been completed or attained as attested to by said institution even though said courses or levels of adequacy exceed the minimum approval standards outlined herein. When a teacher's record of credits from a college outside Iowa is filed for evaluation to determine said teacher's areas of approval, said record shall be interpreted for each teaching area in a manner consistent with standards typical of those filed by Iowa colleges and officially accepted by the state board of public instruction.

18.9(257) Emergency approval. The superintendent of public instruction shall, at his discretion, extend temporary approval in emergency situations to certificated teachers who are making annual progress to his satisfaction toward meeting the regular approval standards outlined herein.

[Filed July 17, 1957]

CHAPTER 19
REQUIREMENTS FOR EACH TYPE OF POSITION

DIVISION I
ADMINISTRATION

19.1(257) Superintendent and assistant.[1]

19.1(1) *Certificate.*

a. Superintendent's certificate, or professional or permanent professional certificate endorsed for service as superintendent.

b. Life validated old-type state certificate accepted for those previously approved as superintendent on such certificate.

19.1(2) *Preparation.* As prescribed for one of the above certificates.

19.1(3) *Experience.* As required to qualify for the certificate.

19.1(4) *Approval for teaching.* Superintendents are eligible to teach at either the secondary or elementary level, or both. However, they are limited in their teaching schedule the same as are other teachers; i.e., they must meet the preparation standards, or previous experience required of classroom teachers. Superintendents teaching special subjects may teach at either the secondary or the elementary level or both, but must meet the training requirements prescribed for the teachers at each level at which teaching is done. Any new combination of superintendent and vocational agriculture will not be approved. Any combination of duties or an overload of teaching and study hall

[1]The superintendent of a public school system which maintains a junior college must hold a master's degree and must have preparation in educational administration, and supervision or curriculum.

assignments which consumes more than one-half of the superintendent's time is viewed with disfavor. Ample time in the day's routine must be allotted for administrative procedures and direct supervision of the school's personnel.

19.2(257) Secondary principal and assistant.[2]

19.2(1) *Certificate.*

a. Secondary principal's certificate, or professional or permanent professional certificate endorsed for service as secondary-school principal.

b. Life validated old-type state certificates accepted for those previously approved.

19.2(2) *Preparation.* As prescribed for above certificates.

19.2(3) *Experience.* As required to qualify for the certificate.

19.2(4) *Approval for teaching.* Secondary-school principals are limited in their teaching schedule the same as are teachers; i.e., they must meet the preparation standards or previous experience required of classroom teachers at the secondary level.

Note: The standard and advanced secondary certificates are not valid for any principalship. Only teachers holding secondary-school principal's certificates or professional certificates endorsed for service as secondary-school principal may be designated as principal in any listings of the school's personnel. No teacher shall be assigned or designated as acting principal unless he holds a valid certificate for the principal's position.

19.3(257) Elementary principal and assistant.

19.3(1) *Certificate.*

a. Elementary principal's certificate, or professional or permanent professional certificate endorsed for service as elementary principal.

b. Life validated old-type state certificate accepted for those previously approved as elementary-school principal.

19.3(2) *Preparation.* As prescribed for above certificates.

19.3(3) *Experience.* As required to qualify for the certificate.

19.3(4) *Approval for teaching.* Any grade or subject at the elementary level, or, when so designated on the certificate, subjects in the ninth grade.

Note: The standard and advanced elementary certificates are not valid for any principalship. No teacher shall be assigned or designated as acting principal unless he holds a valid certificate for the principal's position.

DIVISION II
SUPERVISION

19.4(257) Definition of supervisor. A supervisor is defined as one who spends more than half time supervising the teaching of some particular subject or subjects, or a combination of such supervision and the preparation of outlines, directions, or performs services for those working under his supervision. The work of a supervisor may be done on the high school level or on the elementary level or on any combination of elementary and secondary supervision.

19.5(257) Secondary supervisor (not in special subjects).

19.5(1) *Certificate.*

a. Superintendent's or secondary principal's certificate; or professional or permanent professional certificate endorsed for service as superintendent or secondary principal.

b. Certificate for supervision of the subject involved.

c. Life validated old-type state certificate accepted on which the supervisor may have been previously approved in this position.

19.5(2) *Preparation.* As prescribed for above certificates.

19.5(3) *Experience.* As required to qualify for the certificate.

19.5(4) *Approval for teaching.* Any secondary subject in which the supervisor meets approval standards for teachers on preparation as prescribed in this bulletin.

19.6(257) Elementary supervisor (not in special subjects).

19.6(1) *Certificate.*

a. Superintendent's certificate, or professional or permanent professional certificate endorsed for service as superintendent.

b. Elementary supervisor's certificate or professional or permanent professional certificate endorsed for elementary-school supervision.

c. Life validated old-type state certificate accepted for persons previously approved as elementary supervisor on this certificate.

19.6(2) *Preparation.* As prescribed for above certificates.

19.6(3) *Experience.* As required to qualify for the certificate.

19.6(4) *Approval for teaching.* Any grade or elementary subject, and, if so designated on the certificate, subjects in the ninth grade in which approval standards have been met.

19.7(257) Elementary-secondary supervisor (special subjects or special services).

19.7(1) *Certificate.*

a. Supervisor's certificate, or professional or permanent professional certificate endorsed for supervision of the special subject or special service concerned.

b. Life validated old-type state certificate on which the teacher has been previously approved as a supervisor in the special subject or special service area concerned.

---

[2]A secondary-school principal or teacher who serves as a dean or junior college administrator must hold a master's degree and must have preparation in educational administration, and supervision or curriculum.

19.7(2) *Preparation.* As prescribed for above certificates.

19.7(3) *Experience.* As required to qualify for the certificate.

19.7(4) *Approval for teaching.* The special subject concerned at any level.

DIVISION III
HIGH SCHOOL AND JUNIOR COLLEGE TEACHERS

19.8(257) Grades seven through twelve. The specific requirements outlined herein give the approval standards for teachers of various subjects in grades nine through twelve. To be approved for teaching any subject in these grades the teacher must hold a certificate[1] valid for these grades and have the minimum number of college credits specified for each subject. Specific credits in seventh- and eighth-grade subjects taught are not required, except in special subjects and special service areas as outlined in Division IV of this chapter.

19.8(1) *Agriculture.*

a. General agriculture. Ten semester hours in agriculture.

b. Vocational agriculture. Completion of a four-year curriculum in an institution[2] approved by the state board of public instruction and the United States office of education of the department of health, education and welfare.

19.8(2) *Art (see Division IV).*

19.8(3) *Business education.* Each teacher to be approved in any subject in the field of business education shall have completed a total of 15 semester hours in said field and shall also meet the specific requirements for each subject as follows: (*a*) For approval in bookkeeping, the teacher shall have completed a college course in accounting or its equivalent; (*b*) for approval in shorthand and typewriting, the teacher shall have completed an advanced college course for credit in each such subject to be taught; (*c*) for approval in business arithmetic, the teacher shall have met the approval standard either in bookkeeping or mathematics; (*d*) for approval in business law, the teacher shall have completed a college course in said subject; (*e*) for approval in office practice, the teacher shall have met the approval standard in typewriting or bookkeeping; (*f*) for approval in secretarial practice, the teacher shall have met the approval standards in shorthand and typewriting; (*g*) for approval in general business training, the teacher shall have completed 15 semester hours in any single business-education course or combination thereof; (*h*) for approval in additional business subjects such as consumer education, salesmanship, or retailing, the teacher shall have completed some preparation in the subject to be taught.

19.8(4) *Distributive education (vocational).* Supervisors, co-ordinators and teachers of distributive education shall have completed a curriculum in business education in an institution[3] approved by the state board of public instruction and the United States office of education of the department of health, education and welfare, and shall have had work experience in the field of business education as set forth in the Iowa state plan for vocational education.

19.8(5) *Driver education and safety.* Ten semester hours in the field of safety education, including two semester hours in actual behind-the-wheel driving.

19.8(6) *English, speech and journalism.*

a. English. Fifteen semester hours in the field, with specific preparation in each subject taught, except that, provided a teacher has a broad and diversified preparation in the field of at least 24 semester hours, he may be approved for teaching all English except that, on and after August 31, 1958, 15 semester hours shall be required in the English field, with specific preparation required in each English subject taught, except that, provided a teacher has had a broad and diversified preparation in the English field of at least 30 semester hours, he shall be approved for teaching all typical high-school subjects in English and also such additional specialized English courses to which said teacher might be assigned.

b. Speech and journalism. Ten semester hours shall be required in the speech field except that a teacher who shall have completed 15 semester hours in the English field shall be approved to teach speech with only six semester hours having been completed by said teacher in the speech field.

Ten semester hours shall be required in the journalism field except that a teacher who shall have completed 15 semester hours in the English field shall be approved to teach journalism with only six semester hours having been completed by said teacher in the journalism field.

NOTE: A teacher approved in English is permitted to teach units dealing with speech and journalism in regular English classes to which this teacher is assigned.

Anyone who teaches a separate course in speech or journalism must meet the standards as outlined in "*b*" above.

19.8(7) *Homemaking.*

a. General homemaking. Twenty semester hours in homemaking.

b. Vocational homemaking. Completion of a four-year curriculum in home economics education in an institution[4] which has been approved by the state board of public instruction and the United States office of education of the department of health, education and welfare for the training of teachers in reimbursed programs in home economics.

[1]In addition to certificates of current issue which state specifically the grades for which they are valid, life validated old-type state certificates on which the teacher has been previously approved continue to be honored.

[2]Iowa State University, Ames, is the only institution in Iowa which is designated and approved to prepare teachers in vocational agriculture.

[3]The Iowa institutions which are designated and approved for preparing teachers in distributive education are Iowa State University, Ames; University of Northern Iowa, Cedar Falls; and University of Iowa, Iowa City.

[4]Iowa State University, Ames, is the only institution in Iowa which is designated and approved to prepare teachers in vocational homemaking.

19.8(8) *Industrial arts.* Fifteen semester hours in industrial arts, provided the preparation is general.

NOTE: Fifteen semester hours in mechanical drawing only would not suffice for the approval of a teacher of industrial arts. It would qualify him for teaching mechanical drawing at the secondary-school level.

A certificate valid for teaching industrial arts in elementary-secondary grades is now available in recognition of broad preparation in the field. Such a certificate, or two certificates (one elementary, one secondary), must be held by teachers whose program includes both elementary and secondary pupils.

19.8(9) *Languages (exclusive of English).* Fifteen semester hours in the language taught. Three semester hours of credit given for two years of high school training in the language taught.

19.8(10) *Mathematics.* Fifteen semester hours in the field. One semester hour of credit given for advanced algebra, trigonometry or solid geometry pursued in high school with a maximum of three semester hours.

19.8(11) *Music (see Division IV).*

19.8(12) *Physical education (see Division IV).*

19.8(13) *Science.* Fifteen semester hours in science with some preparation in the subject taught. Teachers will be approved for teaching all sciences if they have 24 semester hours of preparation in the area, including work in physical and biological science except that, on and after August 31, 1958, 15 semester hours shall be required in the science field and six semester hours shall be required in each science subject taught, except that, provided a teacher has had 30 semester hours of preparation in science including credits in chemistry, physics and biological science, he shall be approved to teach all typical high-school subjects in science.

NOTE: Teachers will be approved for teaching biology if, in lieu of hours in biology, they present hours in zoology and botany.

Teachers will be approved to teach general science if they present hours in physical science and a biological science background. In any case the total semester hours of science must be 15 or more.

19.8(14) *Social studies.* Fifteen semester hours in the field and some preparation in the subject taught, except that, provided a teacher has a broad and diversified preparation in the field of social studies (a total of at least 24 semester hours including some hours in history and American government and at least one other subject of the social studies area), he may be approved for all subjects in history and social studies.

On and after August 31, 1958, 15 semester hours shall be required in the social science field and six semester hours of preparation shall be required in each subject in the social studies subject taught, except that, provided a teacher has had 30 semester hours of preparation in social science including credits in American history, history other than American, government including American, economics and sociology, he shall be approved to teach all typical high school courses offered in history and social studies. Credits in American history and in history other than American shall be included in the minimum of six semester hours required of a teacher for approval to teach world history.

For approval to teach the combination-type course commonly taught in many high schools under titles such as modern problems or problems of American democracy, the teacher shall have completed some college credit classifiable as American history, American government, economics and sociology.

19.8(15) *Trade and industrial classes.* Instructional staff members in the field of trade and industrial education must meet the requirements as outlined in the Iowa state plan for vocational education. When specific professional training is required, this training must be taken in an institution approved by the state board of public instruction and the United States office of education of the department of health, education and welfare.

19.9(257) Grades 13 and 14 (junior college). Junior college instructors must hold certificates which are valid for teaching in grades 13 and 14.

Junior college instructors, those in service as well as additions to the staff, are encouraged to have preparation in junior college philosophy and teaching methods, and in counseling and guidance at the college level.

19.9(1) *Academic fields except those listed under 19.9(2) and 19.9(3) following.* Master's degree from a recognized graduate school and ten semester hours of graduate credit in each of the fields in which instruction is given.

19.9(2) *Special fields.*

a. Art. Master's degree in art from a recognized graduate school; or, in lieu thereof, a certificate valid for teaching art in the elementary-secondary grades.

b. Music. Master's degree in music from a recognized graduate school; or, in lieu thereof, a certificate valid for teaching music in the elementary-secondary grades.

c. Physical education. Master's degree in physical education from a recognized graduate school; or, in lieu thereof, a certificate valid for teaching physical education in elementary-secondary grades.

d. A person serving as librarian for half time or less shall have completed 20 semester hours of preparation in library science; or, in lieu thereof, said person shall hold a certificate endorsed for service as a school librarian; a person serving as librarian for more than half time shall have completed a master's degree in library sci-

ence, and said person shall hold a certificate endorsed for service as a school librarian.

19.9(3) *Other fields.*

a. Accounting. Master's degree from a recognized graduate school with 15 semester hours of graduate or undergraduate credit in accounting.

b. Engineering drawing. Bachelor's degree with eight semester hours as is required in a basic curriculum in mechanical engineering.

c. Shorthand and typewriting. Master's degree from a recognized graduate school with either a graduate or an undergraduate major in the field of commerce, and with not less than five semester hours of graduate or undergraduate credit in each of these subjects.

d. Speech. Master's degree from a recognized graduate school with ten semester hours of graduate or undergraduate credit in courses in speech, one-half of which must be in speech, as distinguished from dramatic art.

e. Teacher education. Master's degree from a recognized graduate school with ten semester hours of graduate credit in elementary education.

f. Terminal or nontransfer courses.[1] Appropriate preparation for each course taught as determined by the official in the department of public instruction who supervises junior colleges.

DIVISION IV
SPECIAL SUBJECT TEACHERS

19.10(257) Art, music, industrial arts and physical education. Schools which have a regularly approved special program operating under a fully qualified teacher holding a certificate valid for teaching the special subject in elementary-secondary grades may assign minor activities in the special field to other teachers who, on the basis of preparation and proficiency in the field, may be approved by the regional supervisor provided these teachers are certificated for the level on which they teach. The department of public instruction makes no distinction for approval purposes between physical education and athletics; between curricular and extra-curricular activities; or between credit and noncredit courses. If the teacher directs pupils in any part of the school program, it is assumed that he is paid for such service and he must meet approval standards.

19.10(1) *High school only.* The teacher of a special subject in high school only or in junior high school only shall hold a certificate valid for teaching at the grade levels involved and shall have completed 30 semester hours of preparation in the special subject. Temporary annual approval will be granted an applicant who has completed 15 semester hours of work in such special subject, provided that he undertakes to complete an additional 15 semester hours at an approved institution within a period of three years and furnishes evidence with each annual renewal application that he has completed or is enrolled in five or more semester hours of work in such year.

19.10(2) *Elementary grades only.* The teacher of a special subject in the elementary grades only shall hold a certificate valid for teaching in the elementary grades and shall have completed preparation in the special subject in the same amount and manner as is required for a high school teacher in 19.10(1).

19.10(3) *Both high school and elementary grades.* Certificate or certificates valid for general teaching at both the elementary and secondary levels with the number of credits in the special subject concerned as outlined in 19.10(1) and 19.10(2) above; or, in lieu thereof, a certificate valid for teaching the special subject concerned in elementary-secondary grades.

NOTE: Neither a certificate valid for secondary nor elementary teaching alone is valid in this situation, regardless of the amount of preparation.

19.11(257) Teachers in special service. See chapter 14 for the special service areas in which certification is available. With the exception of librarians and public school health nurses, these special service areas are concerned with the education of exceptional children (special education). See Divisions VI and VIII for further comment about librarians and nurses.

Any person who works in the schools in the field of special education must hold appropriate special service certification in order for the program to be approved for reimbursement by the department of public instruction.

DIVISION V
ELEMENTARY SCHOOL TEACHERS

19.12(257) Certificate. Teachers in the elementary school must be certificated for the elementary-school teaching. Life validated old-type state certificates on which the teacher has been previously approved for elementary-school teaching are accepted.

First grade uniform county and high school normal training certificates are accepted.

In all other cases, when a certificate is valid for elementary-school teaching, it is so stated on the certificate.

19.13(257) Preparation. As prescribed for the certificate, except that any one of the certificates must be accompanied by at least 30 semester hours of college preparation including eight semester hours in education, three semester hours of which shall be in elementary methods except

[1]Where teachers approved for giving instruction in nontransfer courses are not certificated for teaching in junior college (grades 13 and 14), a regulation exists whereby, with the concurrence of the Division of Vocational Education of the Department of Public Instruction, an approval certificate can be issued. For information, write to the Division of Teacher Education and Certification, Department of Public Instruction.

that, on and after August 31, 1958, 120 semester hours of preparation including 20 semester hours in education, six semester hours of which shall be in methods of teaching and evaluating pupil progress in the area of instruction included in the elementary-school curriculum shall be required of a teacher for approval; and 60 semester hours of college preparation including eight semester hours in education, three of which shall be in elementary methods, shall be required for temporary approval of a teacher provided that said temporary approval shall be continued for successive one-year terms upon the completion by said teacher of additional preparation yearly equivalent to six semester hours until a bachelor's degree has been secured; and except that on and after August 31, 1960, 120 semester hours of college preparation and a bachelor's degree including 20 semester hours in education, six semester hours of which shall be in methods of teaching and evaluating pupil progress in the area of instruction included in the elementary-school curriculum shall be required for approval of a teacher.

19.14(257) Experience. None.

19.15(257) Approval for teaching. Any or all of the elementary subjects in kindergarten, and grades one through eight, and subjects in grade nine when the certificate is so endorsed, except the special subjects outside of grades for which the teacher may be completely responsible. [See 19.10(2).]

NOTE: Teachers now on a temporary approval basis will be continued on such temporary approval as long as they progress toward and until they acquire the 30 semester hours required for regular approval. Superintendents are reminded that no original elementary certificate is now issued for term on less than 60 semester hours of preparation. Approval standards will undoubtedly rise as the certification requirements call for increased preparation. Teachers holding certificates valid for high-school teaching only are not eligible to teach any subject in grades below the seventh.

No cadet teacher or practice teacher of a teacher-training institution shall serve as a substitute teacher unless he holds a valid certificate.

DIVISION VI
LIBRARIANS

19.16(257) Certificate. On and after August 31, 1958, a person approved for service as a teacher-librarian for half-time service or less shall hold a certificate valid for either or both elementary- and secondary-school teaching, and also shall have completed nine semester hours in library science, three semester hours in children's literature and three semester hours in methods and materials of audio-visual instruction.

On and after August 31, 1958, a person approved for service as a school librarian devoting more than half time to such service shall hold a certificate endorsed for service as a school librarian in the elementary- and secondary-school grades

DIVISION VII
GUIDANCE

[Rule 19.17(257) was filed by the Board of Public Instruction.]

19.17(257) Qualifications for guidance personnel.

19.17(1) *Elementary level.* For endorsement or approval as an elementary school guidance counselor, the applicant shall have met the requirements for a professional certificate and, in addition thereto, shall possess a master's degree in guidance and counseling from a recognized institution, based upon an approved program of study in which emphasis was placed upon guidance and counseling at the elementary-school level, which program included supervised guidance and counseling experience under the supervision of such institution, or actual experience recognized as the equivalent thereof by such institution. Applicant shall also present evidence of successful teaching experience.

19.17(2) *Secondary level.* For endorsement or approval as a secondary school guidance counselor, applicant shall have met the requirements for a professional certificate and, in addition thereto, shall possess a master's degree in guidance and counseling from a recognized institution, based upon an approved program of study in which emphasis was placed upon guidance and counseling at the secondary level, which program included supervised guidance and counseling experience under the supervision of such institution, or actual experience recognized as the equivalent thereof by such institution. Applicant shall also present evidence of successful teaching experience.

19.17(3) *Elementary-secondary-level.* For authorization by endorsement to serve as guidance counselor in kindergarten and in grades one through fourteen, the applicant must possess a current valid professional certificate endorsed for teaching at either the elementary- or secondary-school level and, in addition thereto, must possess a master's degree and have completed an approved graduate program of at least 45 semester hours for the preparation of guidance counselors, which program may include courses completed in fulfillment of the requirements for said master's degree and shall include supervised counseling experience at both elementary- and secondary-school level. In addition, the applicant shall present evidence of successful teaching experience.

19.17(4) *Director of guidance services.* For authorization by endorsement to serve as a director of guidance services in kindergarten and grades one through twelve, the applicant must meet the qualifications for a school guidance counselor and, in addition, shall have completed an additional approved graduate program of at least 30 semester hours in guidance and counseling in kindergarten and grades one through twelve and in

the administration and supervision of guidance programs. The applicant shall also present evidence of successful practical experience in guidance and counseling at both elementary and secondary level.

[Filed July 17, 1957]

DIVISION VIII
PUBLIC SCHOOL HEALTH NURSES

19.18(257) Requirements. Nurses who teach hygiene and allied subjects must be certificated for public school nursing or for the grade level or levels in which such subjects are taught. It is recommended that public school health nurses—whether they teach hygiene and allied subjects or not—shall have had one year on a staff where qualified public health nursing supervision was given.

Nurses who do no teaching are not required to hold a teacher's certificate, but they must all be registered by the Iowa board of nurse examiners.

DIVISION IX
OTHER SERVICES

19.19(257) Certification. Standards for many other services involving the characteristics expected of the teacher and offered by schools are not yet developed. However, every person having any planning or teaching function to perform in connection with these services is expected to hold a certificate valid for the level at which the service is rendered.

[Filed July 17, 1957; amended October 31, 1967, September 18, 1969]

CHAPTER 20
RECIPROCITY AGREEMENT OF CENTRAL STATES CONFERENCE OF STATE DEPARTMENTS OF EDUCATION

20.1(257) Form of agreement. The state of.....hereby agrees, for a period of three years, beginning ..... , 19..., to issue certificates to applicants from all states which are signatory to this agreement on the following basis:

20.1(1) The processes involved in the issuance of certificates under reciprocity will be administered by the certification officials of the respective state departments of education.

20.1(2) Each teacher receiving a reciprocity certificate will have completed at least a four-year program of teacher education in a college or university recognized, approved, or accredited by the state department of education in the state in which the institution is located and by the National Council for Accreditation of Teacher Education at the time of completion of the program.

20.1(3) Each applicant shall have completed at least one year of successful teaching or eight semester hours' credit during the five-year period immediately preceding the date of application to be eligible for a reciprocity certificate.

20.1(4) Each applicant shall have completed a course in American history or government or some other course of equivalent content.[1]

20.1(5) The reciprocity certificate issued shall be valid only for the area or areas of instruction, and at the level or levels of instruction, for which certification was granted by the state from which transfer is to be made.

Minimum field and subject requirements shall be as follows:

a. Twenty-four semester hours in the field, with six semester hours or its equivalent in the particular subject taught:

social science	industrial arts
English	home economics
science	health
business	physical education

b. Twenty-four semester hours in the field—no specific requirements in the subject:

All fine arts other than music.

c. Twenty-four semester hours in the field—fifteen semester hours in the specific subject:

All foreign languages.

d. Eighteen semester hours in the field—no requirement in the specific subject:

All mathematics.

e. Forty-five semester hours in the field—no requirement in the specific subject:

All music.

20.1(6) Each applicant shall have the favorable recommendation of the certification officer of the state from which transfer is made to be eligible for a reciprocity certificate.

20.1(7) Each teacher, in order to obtain a reciprocity certificate shall:

a. Have met the requirements for certification in the state in which the program of teacher education is completed; or

b. Have taught successfully at least one year in the state from which transfer is being made after completing a four-year program of teacher education in any college approved under this agreement.

20.1(8) Certificates suspended or revoked in one state may, within the limits of legal authority, be suspended or revoked in all other states which are signatory to this agreement.

20.1(9) Each applicant for a reciprocity certificate shall comply with all requirements of the receiving state regarding filing of application, fees, age, citizenship, health and other similar requirements.

20.1(10) The reciprocity certificate shall be of a kind and for a term comparable to that

[1] See 13.15(257) for information regarding the temporary certificate which is available to otherwise qualified applicants who do not have credits in American history or government.

granted regularly by the receiving state for the completion of a four-year program of professional preparation to teach classes other than subjects commonly classified as vocational. Emergency, temporary or other types of substandard certificates shall not be issued under the provisions of this agreement. This agreement does not include administrative positions (supervisors, principals or superintendents).

20.1(11) When participating states have statutory or regulatory requirements which cannot be waived, it is understood that such requirements shall not invalidate the other parts of this agreement, provided they do not exceed six semester hours of college credit.

NOTE: It is desirable in such cases to issue a temporary certificate, valid for one year, so that reasonable time will be allowed for the applicant to meet these requirements.

20.1(12) Whenever authorized officials from two or more states sign this agreement it shall become effective immediately in such states.

CHAPTER 21
PROPER EXPENDITURE OF IMPROVEMENT OF INSTRUCTION FUNDS

21.1(272) Terms defined. In setting up criteria for reimbursement of an improvement of instruction program, it seems logical to state what the term "Improvement of instruction" shall be considered to mean.

21.1(1) *"Improvement of instruction"* shall mean that, through the media listed below, teachers shall be so instructed that they in turn shall be expected to improve their own teaching in the classroom; that from this instruction they shall become more proficient in teaching techniques, in specific subject matter taught in their classrooms, in developing skills, in handling children, in organizing classrooms and classroom procedures, in using state handbooks, in making better and wider use of teaching materials, in wise selection of teaching materials, in remedial teaching programs, and in follow-up work after a testing program where testing was done for purposes of diagnosis and remedy.

21.1(2) *"Improvement of instruction"* shall be differentiated from: Improvement of administration, improvement of organization, improvement of transportation.

21.1(3) *"Improvement of instruction"* shall be differentiated from: Discussion of teachers' salaries, teachers' group insurance, recruitment of teachers, professional ethics, membership in professional organizations, legislation or extracurricular activities.

21.1(4) *"Improvement of instruction"* shall be differentiated from: A testing program where tests are made purely for survey purposes to satisfy curiosity of local administrators or teachers.

21.1(5) *"Improvement of instruction"* shall be differentiated from: Speeches of general inspiration, talks by sales persons, talks by representatives of local organizations (in general), and viewing moving pictures of a general recreational nature.

21.2(272) Reimbursable activities.

21.2(1) *County institutes.*

a. Multiple county institute directed by the department of public instruction.

b. County institute directed by the county superintendent after previous approval of the program by the department of public instruction.

21.2(2) *Study centers.* Directed by the county superintendent and under the leadership of competent speakers, or demonstrators, approved by the department of public instruction, and in which the subject matter shall be the curriculum handbooks prepared by the department of public instruction.

21.2(3) *Workshops.* Directed by the department of public instruction or the county superintendent, and under the leadership of persons previously approved by the department of public instruction for that work.

21.2(4) *Testing programs.* Directed by the county superintendent as a part of a county-wide activity necessary for the proper conduct of a well defined remedial program of instruction.

21.2(5) *Supply of handbooks.* When purchase is necessary beyond the quota furnished free of charge by the department of public instruction.

21.2(6) *Miscellaneous.* Any activity or procedure which has previous approval of the supervisor concerned.

21.3(272) Nonreimbursable items. Recognizing that many of the following items may have definite value for teachers, it is yet felt necessary to exclude the expense connected with them from approval for reimbursement.

21.3(1) Speakers on general inspirational themes.

21.3(2) Speakers on topics of general information.

21.3(3) Speakers on teachers' welfare, ethics, organization or activities.

21.3(4) Speakers at eighth grade commencement exercises.

21.3(5) Speakers, group leaders or demonstrators drawn from the group concerned with the meeting.

21.3(6) Expenses of instructors to the county superintendents' conferences called by the state department of public instruction.

21.3(7) Expenses of delegates, or the county superintendent, to any conference or meeting.

21.3(8) Materials or literature supplied to the schools for general promotion of good schools.

21.3(9) Any item the major nature of which is administrative.

21.3(10) Tests for purely administrative purposes.

21.3(11) Library or supplementary instructional books and supplies.

21.3(12) Supplies used in a program conducted by the division of special education, or any other division which has its own budget set up for the conduct of its program.

21.3(13) Any item not clearly and directly identified with improvement of instruction as defined above.

21.4(272) Claims procedure. For approval of programs and speakers, study center leaders or demonstrators, confer with the supervisor in charge of your area previous to any final or definite arrangement.

Under the regulations as established by the department all claims must be presented on proper blanks, to be supplied, itemized to show to whom the money was paid and for what service. Itemized claims must be approved by the supervisor.

PRIVATE CONTRACTORS

DIVISION V
FINANCIAL RECORDS AND REPORTS

DIVISION VI
TRANSPORTATION MAPS

DIVISION VII
USE OF SCHOOL BUSES

DIVISION VIII
THE BUS DRIVER

DIVISION IX
PURCHASE OF BUSES

DIVISION X
MISCELLANEOUS REQUIREMENTS

DIVISION I
DESIGNATIONS

22.1(285) Area designations.

22.1(1) To avoid the necessity for making a new set of designations each July and to conform to the provisions of section 285.4, it is necessary that designations be set up on a territorial basis.

22.1(2) The designation form must carry a geographic description of the territory included, rather than a list of the homes involved. Home numbers may be included only when a section is split or divided between two or more receiving schools.

22.1(3) When feasible, the designations shall be set up so as to avoid placing the boundary or the designation area on geographic section lines if a public, traveled road is involved. The area shall be clear cut with definite boundaries.

When the road situation, or the density of population and diversity of choice of school requires it, a designation area boundary line may be approved on a public road.

22.1(4) Separate designation forms shall be used for high school and elementary areas. Use form TR-F-1 for the high school designations. Use form TR-F-2 for the elementary designations.

22.1(5) Elementary designations are not to be made if the school in the district is open. If the school is closed by action of the board prior to July 15 of any year, the designation is to be made as provided in section 285.4. If the school is closed after July 15, the designation is to be made as provided in sections 282.7 and 285.4.

22.1(6) In ascertaining the wishes of the majority of the patrons in regard to the designations, the board shall count only those families with children of school age.

Only those families who are directly involved in the decision are to be counted.

The guiding principle shall be to satisfy the wishes of as many of the patrons as possible while providing a reasonable and legal transportation program.

A district may be split so that it is designated to two or more receiving schools.

22.1(7) Distance between schools shall not be a major factor in determining the boundary of designation areas.

22.2(285) Special designation.

22.2(1) To further implement the principle stated in 22.1(6) above, the special designation (Form TR-F-3) has been set up to provide for families whose homes are in one designation area but who have been sending their children, in the past, to a school in another designation area. The special designation may also be considered by boards to provide for families with curricular or other problems which necessitate sending their children to a school other than that regularly designated.

22.2(2) The special designation covers one family only and should list the family name and home number, also the names of the children.

22.2(3) The special designation covers family only during the time it remains in the home occupied at the time the designation is made. The home will revert to the original designation when the family moves away. Families moving from one home to another will be expected to send their children to the school to which the new home is designated if transportation aid is desired.

22.2(4) Special designations are to be considered only upon the request of the family or board involved.

22.2(5) Where bus transportation is available the special designation should be limited to homes which are within three-fourths of a mile of the bus route because of the extra expense involved. However, a family may waive the right to compensation for transporting their children beyond three-fourths of a mile to meet a bus.

22.2(6) Designation areas shall be set up so as to require the least possible number of special designations. It is generally not necessary to have special designations on the extreme border of the designation area. Place the boundary line to include these families whenever it can be done without causing bus route difficulties.

22.2(7) Four copies of each designation, both area and special, are to be made up. After official county board action has been taken all copies are to be forwarded to the department of public instruction.

22.3(285) Changing designations.

22.3(1) Either local boards or parents may request a change in existing designations to be effective at the beginning of the next fall term.

22.3(2) Before making a request to the county board for a change the local board shall determine the desires of all the parents of children of school age in the area of proposed change. A majority of the parents concerned must desire the change.

22.3(3) When parents desire a change of designation they may make written request for the change, on or before July 5, to the president of the local board, stating their reasons for making the request. All interested parents should sign the request.

22.3(4) Parents should be encouraged to take all problems regarding change of designation

to their local board of education. If the local board fails to act by July 10, the parents shall file the request for a change directly with the county board on or before July 15.

22.3(5) The local board, in considering the request for change, shall meet in session and permit all parents to be affected by the change to attend the meeting. After all facts have been heard the local board shall either grant or deny the request. The decision must be made on facts presented and must be in accord with legal requirements and restrictions.

The local board shall certify action taken to the county board on or before July 15.

22.3(6) Solicitation by school officials or their representatives in territory designated to another school is prohibited. Parents are to be given opportunity to express their wishes but shall not be subjected to direct solicitation or pressure from outside groups. Requests for changes in designations which come about because of solicitation shall not be approved.

DIVISION II
BUS ROUTES

22.4(285) Intracounty routes.

22.4(1) Bus routes within the boundaries of transporting districts as well as within designated areas must be as efficient and economical as possible under existing conditions. Duplication of service facilities shall be avoided insofar as possible.

22.4(2) A route shall provide a load of at least 75 percent capacity of the bus.

22.4(3) An official route shall not be so long as to require a high school pupil to ride on the bus more than 75 minutes, nor an elementary pupil more than 50 minutes. (These limits may be waived upon request of the parents.)

22.4(4) Pupils whose residence is within two miles of a bus route are within the area served by the bus and are not eligible for parent or private transportation at public expense, to the school served by the bus, except as follows:

a. Bus is fully loaded.

b. Physical handicap makes bus transportation impractical.

22.4(5) Transporting districts shall arrange routes to provide the greatest possible convenience to the pupils. Distance pupils who are required to transport themselves to meet the bus shall be kept to the minimum consistent with road conditions, uniform standards and legal requirements for locating bus routes.

22.4(6) Bus routes shall not be approved for a school district when such approval will encompass an area within which all students and their parents desire to attend another school, provided that the chosen school can serve the area efficiently.

22.4(7) A bus route may not be extended outside the designated area to give service to a pupil covered by special designation when such extension will cause duplication with the approved route of the other school operating in its own designated area.

22.4(8) In emergency situations, or when road conditions require it, a bus route may be approved temporarily to pass through a portion of an adjoining designation area, provided duplication of bus routes is not caused thereby. Such approval shall be considered very carefully and given only if clearly indicated by the situation. Approval shall be indicated on the bus route map by a broken line.

22.4(9) Transporting school districts shall file application for approval of bus routes with the county board of education not later than August 5.

Such application shall include a written geographical description of the route and a map of the area with the requested route plainly shown thereon. A list of the pupils to be transported, with house numbers and the township in which the homes are located, shall accompany the application. Four copies of estimated cost of transportation (TR-F-13) should also be submitted.

22.5(285) Intercounty routes.

22.5(1) The superintendent of the transporting school district shall submit application for intercounty bus route on form TR-F-22 to his home county superintendent and board of education. The application shall be submitted in quadruplicate and shall include a map of the area accurately picturing the proposed route. Application shall be filed not later than August 5.

22.5(2) Joint consultation shall then be held by the county boards involved. The initial steps may be undertaken by the county superintendents. If there are no difficulties and agreement is reached, the route is approved and no further action need be taken.

22.5(3) If agreement is not reached in the initial attempt the superintendent of the county in which the applying school is located shall advise the superintendent of reasons for failure to reach agreement and request that he revise the application to meet the objection and resubmit same.

22.5(4) If the county boards do not reach agreement on the route, the home county superintendent shall forward complete record of the case together with disapproved application to the state department of public instruction. Every effort should be made, however, to settle the matter locally.

22.5(5) All legal provisions, standards and regulations applying to approval and operation of bus routes apply equally to intercounty bus routes.

22.5(6) All intercounty bus routes must be approved each year. If there has been no

change in the designations, nor in the proposed route, application may be made and agreement indicated by letter.

22.6(285) Bus route conflicts. Bus route controversies shall be settled with reference to the designation area. Except as stated above, bus routes shall not be approved outside the designated area. Pupils covered by special designation will be expected to meet the bus as provided above.

DIVISION III
COUNTY BOARD PROCEDURE

22.7(285) Hearing on designations. After receipt of petition from parents requesting change in designation or after receipt of notice of action taken by local boards on request for change of designation, the county board shall set a date for a hearing. All parents and the local board involved should be permitted to be present for the discussion.

After completion of the hearing the county board shall render the decision and notify all parties concerned of the decision within three days of the hearing.

22.8(285) Errors corrected. In areas where corrections are necessary due to errors in the original designations the county board may initiate procedure for making necessary changes. The resulting designation must, however, be in accordance with legal requirements and regulations.

22.9(285) Change in designation. When a change in the designation is approved by the county board, new designations conforming to the new division lines shall be made up.

A note should be attached to the four copies forwarded to the division of transportation listing designations which are superseded and which should be removed from the files.

22.10(285) Instructions furnished. The county superintendent shall supply all school district officials and other interested parties with detailed instructions and information covering procedure to be followed in setting up designations and in affecting changes in designations.

22.11(285) Map furnished. The county superintendent shall supply each district with a map showing designation areas.

22.12(285) Patrons informed. The county superintendent shall make diligent efforts to acquaint all patrons of the county with the details of the transportation program.

DIVISION IV
PRIVATE CONTRACTORS

22.13(285) Contract required. All private individuals wishing to transport public school pupils to and from public school in privately owned vehicles must be under contract with the board of education. This will not apply to parents who transport their own children only.

The contract form used shall be that provided by the department of public instruction. (Form TR-F-4-497)

22.14(285) Uniform charge. The contract must provide for a uniform charge for all pupils transported. No differentiations may be made between pupils of different districts except as provided in 285.1(12).

22.15(285) Board must be party. The contractor may not arrange with individual families for transportation. The contractor undertakes to transport only those families indicated by the board of education.

22.16(285) Contract with parents. Parents undertaking to transport other children in addition to their own, are private contractors. These parents must be under contract, and must obtain a chauffeur's license and a school bus driver's permit.

22.17(285) Vehicle requirements. Any vehicle used, other than that used by a parent to transport his own children only, is considered to be a school bus and must meet all requirements set up for the type of vehicle used. (This is not intended to restrict the use of passenger cars during the time they are not actually engaged in transporting public school pupils.)

DIVISION V
FINANCIAL RECORDS AND REPORTS

22.18(285) Required charges. Full pro rata costs must be charged and collected for the transportation of all nonresident pupils. No differentiation may be made in charges due to differences in distance or grade in school.

22.19(285) Estimated cost report. Form TR-F-13, estimated cost of transportation, must be compiled by transporting districts each year. The form shall be completed in quadruplicate and forwarded to the county superintendent with application for approval of bus route.

After the county board has officially acted upon the report, all four copies are to be forwarded to the department of public instruction.

22.20(285) School-owned buses. All data indicated on Form TR-F-13 must be supplied for school-owned buses.

Contingent expense should in no case be estimated at less than $100 per bus. For older buses this item should be as high as $400.

22.21(285) Contract buses. In case buses are privately owned, only the amount of the contract need be given. This shall be entered in the space provided for driver's salary.

22.22(285) Billing basis. Transportation bills must be based on the current year's costs.

22.23(285) Adjusted billing. The bill to the sending district covering the first semester shall be based on the estimated cost and the estimated amount of state reimbursement.

The bill to the sending district covering the second semester shall be based on the actual cost and the estimated amount of state reimbursement.

The second semester bill must, therefore, make the necessary adjustment arising from any variations between the estimated cost used in the first semester bill and the actual cost as determined at the end of the second semester.

22.24(285) Account corrected. As soon as the actual amount of state reimbursement is known a transporting district may make the necessary corrections in accounts by means of a credit to the sending district on the next transportation bill if the charge was too high or by adding the amount the sending district owes if the charge was too low.

22.25(285) Activity trips deducted. Transporting school districts which use their equipment for activity trips or educational tours must deduct the cost of such trips from the total yearly transportation bill. In other words, such costs may not be included in the pro rata costs which determine the charge to sending districts.

Accurate and complete accounting records must be kept so that the cost of transportation to and from school may be ascertained.

DIVISION VI
TRANSPORTATION MAPS

22.26(285) County superintendent. Each county superintendent is responsible for providing up-to-date transportation maps each year to the various districts in the county and to the state department of public instruction.

The regular Iowa highway commission road maps drawn on a scale of one inch to the mile should be used.

22.27(285) Homes numbered. All homes in the county outside of incorporated towns and villages shall be numbered.

22.28(285) Color coding. Designation areas shall be blocked out in light color, using contrasting colors for adjacent areas. All territory outside of high school operating districts shall be included.

22.29(285) Crosshatching. Elementary districts in which the school is open may be indicated on the map by light crosshatching with lines about one-fourth inch apart.

22.30(285) Route markings. All bus routes shall be clearly marked as approved by the county board. The same color shall be used as for the designation area in which the bus operates.

22.31(285) Special designation coding. Special designations may be indicated by a circle around the home and an arrow pointing to the area in which the school attended is located.

DIVISION VII
USE OF SCHOOL BUSES

22.32(285) Permitted uses listed. School buses may be used to transport pupils under the following conditions:

22.32(1) The program is a part of the regular or extracurricular program of a public school and has been so adopted and made a matter of record in the minutes of all the boards involved.

22.32(2) The pupils are enrolled in a public school.

22.32(3) The program or activity must be sponsored by a school or group of schools co-operatively and be under the direct control of a qualified teacher or recreational or playground director of some school district.

a. A regularly certificated teacher must be in charge of the program. Several or all schools may engage the same instructor on a co-operative basis.

b. In transporting pupils to Red Cross swimming classes a superintendent of schools may be designated by his own board as the supervisor or director of the activity and may use the Red Cross instructor to carry on the actual instruction in swimming.

c. If the Red Cross instructor holds a regular teacher's certificate issued by the board of educational examiners, he can be named as general supervisor of the activity by the several schools.

22.32(4) The bus shall be driven by a regularly approved driver holding a chauffeur's license and a school bus driver's permit. In addition thereto, the buses must be accompanied by a member of the faculty of said school who will be responsible for the conduct and general supervision of the pupils on the bus and at the place of the activity. If the faculty member is an approved driver he can act both as a driver and faculty sponsor.

22.33(285) Teacher transportation. Public school teachers who are transported should be included in the average number transported and should be charged the pro rata cost by the transporting district.

The teachers should be included in the list of pupils transported, form TR-F-20-4, and the number of weeks the teacher was transported included in the nonreimbursable column.

DIVISION VIII
THE BUS DRIVER

22.34(285) Driver qualifications. General character and emotional stability are qualities which must be given careful consideration by boards of education in the selection of school bus

drivers. Elements that should be considered in setting a character standard are:

1. Reliability or dependability.
2. Initiative, self-reliance, and leadership.
3. Ability to get along with others.
4. Freedom from use of undesirable language.
5. Personal habits of cleanliness.
6. Moral conduct above reproach.
7. Honesty.
8. Freedom from addiction to narcotics or habit-forming drugs.
9. Freedom from addiction to alcoholic beverages or liquors.

22.35(285) Stability factors. Factors to be considered in determining emotional stability are:

22.35(1) Patience.

22.35(2) Considerateness.

22.35(3) Even temperament.

22.35(4) Calmness under stress.

22.36(285) Driver age. School bus drivers must be at least 16 years of age, and not more than 65 years of age as of August 1 preceding the opening of the school year. The department of public instruction may, at its discretion, waive the upper age limit upon application of the board of education and receipt of evidence of satisfactory physical condition of the driver.

22.37(285) Physical fitness. Applicants for the school bus driver's permit must submit signed physician's statement indicating physical fitness as follows:

22.37(1) Sufficient physical strength to operate the bus effectively.

22.37(2) Possession of full and normal use of both hands, both arms, both feet and both legs. Amputation of an arm or foot will disqualify the applicant. Amputation of more than two fingers of the hand will disqualify the applicant. In other words, the applicant should have one complete hand, and the thumb and at least two fingers of the other hand to qualify. Individual evaluations will be made for applicants who have parts of fingers missing.

22.37(3) Freedom from any communicable disease, such as tuberculosis.

22.38(285) Tests for tuberculosis.

22.38(1) *Types of tests.* An applicant for a school bus driver's permit may take either the intradermal tuberculin skin test or a chest X-ray film. If the result of the intradermal tuberculin skin test is positive, however, an X ray must then be taken. An applicant whose chest X ray shows any active form of tuberculosis will be rejected. Patch tests are not acceptable for purposes of qualifying for a school bus driver's permit.

22.38(2) *Duration of test results.* An applicant who has had a negative intradermal tuberculin skin test or a negative chest X ray within the 12-month period preceding August 1 of the school year in which the permit is to be issued is not required to be retested within that school year.

22.39(285) Additional fitness requirements. Freedom from mental, nervous, organic or functional disease; including but not limited to epilepsy, paralysis, insanity, abnormal blood pressure, heart ailments or any disease that may cause a tendency to fainting. Blood pressure in excess of 170 (systolic) and 100 (diastolic) taken in a sitting position, or diabetes, will disqualify the applicant in the absence of a qualified physician's recommendation and satisfactory statement covering the significance of the condition.

22.40(285) Mental fitness. The driver must be mentally alert and of at least normal intelligence.

22.41(285) Vision requirements. The applicant must have at least 20/40 vision in each eye, either normally or after correction. If the vision in one eye is near normal, visual acuity within the limits of 20/60 in the other eye will be acceptable for qualification. If corrective lenses are required to bring vision within the aforesaid limits they must be worn by the licensee at all times when operating the bus. Tunnel or barrel vision will disqualify an applicant. The applicant must have a field of vision of at least 150 degrees. The applicant must have near-normal depth perception and have no color deficiency which would interfere with safe driving.

22.42(285) Hearing requirements. The driver must have sufficient hearing in both ears to be able to hear sirens, whistles, warning bells, signals and other sounds related to safe operation of school buses. Applicant must meet this requirement without the use of a hearing aid.

22.43(285) Experience. Experience in driving large vehicles, such as trucks or buses, is essential. When student drivers who have not had this experience are selected, the administration must see that they are given this experience in the operation of the school bus before permitting them to transport pupils.

22.44(285) Traffic law knowledge. A thorough knowledge of traffic laws and regulations shall be required of all drivers.

22.45(285) Application form. The school bus driver and the board of education shall submit signed application for the permit upon forms prescribed by the department of public instruction.

22.46(285) Driving record. No driver should be employed until the board has assured itself that the applicant has an acceptable driving record.

DIVISION IX
PURCHASE OF BUSES

22.47(285) Local board procedure. The board of education shall proceed as follows in purchasing school buses:

22.47(1) Obtain a letter of approval of purchase from county board when required.

22.47(2) Use separate specification and bid request sheets. (The statutes require body and chassis to be bought on separate contracts.)

22.47(3) Notify at least four body and four chassis dealers of intent to purchase school transportation equipment and request bids.

22.47(4) Reserve right to reject all bids.

22.47(5) Require all bids to be on comparable equipment which meets all state requirements and is on list of equipment listed as meeting said requirements.

22.47(6) Hold an open meeting for dealers to present merits of their equipment.

22.47(7) Review bids, tabulate all bids, make a record of action taken.

22.47(8) Sign separate contracts or orders for purchase of body and chassis. Purchase agreement must provide that dealer will deliver equipment which will pass initial state inspection at no further cost to school and further provide that school board shall withhold at least $150 until vehicle passes initial state inspection.

22.47(9) Notify the state department of public instruction, division of transportation, of purchase and date of delivery so that arrangements can be made for initial inspection. No vehicle can be put into service until inspected, approved, and a seal of approval issued.

22.48(285) Financing. The board of education may finance purchase of transportation equipment as follows:

22.48(1) The board may pay all of the cost of each bus from funds on hand in general fund.

22.48(2) Bonds may be voted to purchase equipment, and funds so derived shall be used for that purpose.

22.49(285) Purchase on installments. The board may purchase buses on contracts.

22.49(1) Contracts for that purpose must be made in duplicate for the purchase of both chassis and bus body. A copy of the resolutions of the board for the purchase of said equipment should be included in the contract. Said contract must provide that at least one-fourth of the cost will be paid on delivery and the balance paid in not to exceed five equal installments on the dates specified with accrued interest due at a rate not to exceed four percent. The number and date of each warrant with the date of payment shall be stated in the contract.

22.49(2) Warrant for down-payment shall be issued when the bus is delivered and shall be cashed at once. No more than five additional warrants, covering the cost of each vehicle purchased, for not to exceed one-fifth of the balance due and the date of payment on each vehicle, shall be issued at the time of purchase. These additional warrants shall be presented to the treasurer of the district and endorsed "not paid for lack of funds" and shall draw interest at the rate agreed upon but not to exceed four percent. Copies of contracts and a letter of approval from the county board of education for the purchase of bus body and chassis shall be delivered to any bank or person who purchases said warrants and the holder shall present said warrant to the board for payment on the date due as provided in the contract. (See attorney general's opinion of July 25, 1949, to superintendent of public instruction.)

22.50(285) County board approval. Form TR-F-17-4912 shall be used when county board approval is required. If bus is to be paid for over a period of five years, eleven copies of TR-F-17-4912 are necessary.

22.51(285) Details of purchase procedure.

22.51(1) If the contract provides for buying the bus over a five-year period, the board of education will issue six copies of form TR-F-19-4911 per body, and six copies of form TR-F-19-4911 for chassis. One copy each of contract for body and chassis shall be kept for the secretary's files.

22.51(2) Secretary shall issue necessary warrants for meeting terms of contract. At least one warrant must be drawn for the one-fourth down-payment on body and one for the one-fourth down-payment on chassis and not more than five equal warrants drawn for the annual payments on body and not more than five equal warrants drawn for annual payments on chassis.

22.51(3) Said warrants must be drawn in favor of the firm or company selling the respective body and chassis.

22.51(4) Each warrant must have one copy of the contract and one copy of county board approval attached.

22.51(5) Said warrants with contract attached must be presented to treasurer of school district who will stamp said warrants as follows:

"Not paid for lack of funds"
This warrant to be presented
for payment on ..... 19...
or when called for payment.

.....
Treasurer, School District

22.51(6) The person or company who receives these warrants may sign them over to any bank or person with or without recourse as follows:

Pay to the order of

.....

(Name of bank or person)

with or without recourse.

.....

(Name of payee)

22.51(7) Banks or individuals may accept these warrants as herein provided.

DIVISION X
MISCELLANEOUS REQUIREMENTS

22.52(285) Annual inspection. To facilitate the annual inspection program required by statute school district officials shall send their buses to inspection centers as scheduled. The buses shall be driven to and accompanied through the inspection by the regular drivers.

22.53(285) Maintenance record. As a part of the annual inspection program school district officials shall cause the chassis of all buses, whether publicly or privately owned, to be inspected and all necessary repairs made before the opening of the school term each fall. The inspection and repairs shall be recorded on forms prescribed by the department of public instruction. The completed form shall be signed by the mechanic and carried in the glove compartment of the bus.

22.54(285) Drivers' schools. All school bus drivers shall attend classes or schools of instruction when held by the state department of public instruction.

22.55(285) Insurance. The board of education shall carry insurance on all school-owned buses and see that insurance is carried by all contractors engaged in transporting pupils for the district as follows:

22.55(1) Fire-theft-windstorm-comprehensive insurance should be carried on each bus.

22.55(2) *Liability insurance.* Since bus drivers can be sued for damages for which they are directly responsible, no driver should drive a bus unless fully covered by liability insurance. Since drivers often change during the year, the board of education shall carry insurance on all buses written to protect all approved drivers. Insurance should be carried in the amount of $100,000-$300,000 liability and $10,000 property damage.

22.55(3) *Medical care, hospitalization, etc.* Since liability insurance does not cover accidents to children caused by other vehicles or from other causes not resulting from carelessness, etc., of the driver of the school bus, medical pay insurance in the amount of at least $500 per pupil shall be carried.

Both liability and medical care insurance should be bought only for school term of nine months except that if one of the buses is to be used for approved summer activities, insurance for twelve months should be purchased. Collision insurance is not recommended and cannot be charged to cost of transportation.

22.55(4) The Iowa school bus endorsement shall be a part of all school bus policies.

22.56(285) Contract—privately owned buses. The board of education and a contractor who undertakes to transport public school pupils for the board, in privately owned vehicles, shall sign the official contract prescribed by the department of public instruction. The contract shall contain the following provisions:

22.56(1) To furnish and operate at his own expense a legally approved vehicle of transportation (or a legally approved chassis on which may be mounted a school bus body supplied and maintained by the board of education) to and from the ..... school each day beginning on the date set by the board over route as described, ... transporting only children attending public school designated by the party of the second part.

22.56(2) To comply with all legal and established uniform standards of operation as required by statute or by legally constituted authorities.

22.56(3) To comply with all uniform standards, established for protection of health and safety for pupils transported.

22.56(4) To comply with all rules and regulations adopted by the board of education for the protection of the children, or to govern the conduct of driver of bus.

22.56(5) To keep bus in good mechanical condition and up to standards required by statutes or by legally constituted authorities.

22.56(6) To take school bus to official inspection when held by state authorities with no additional expense to party of second part.

22.56(7) To see that the bus is swept and the windows cleaned each day and that registration plates and all lights are cleaned before each trip. Further, that the bus is washed and the floor swept and scrubbed with a good disinfectant each week. In case of an epidemic he shall wash entire bus with a disinfectant.

22.56(8) To drive the bus himself or to use only drivers and substitute drivers who have been approved by the board of education and have received school bus driver permits.

22.56(9) To furnish the board of education an approved certificate of medical examination for each person who is approved by the board of education to drive the bus.

22.56(10) To attend one county or regional school of instruction for bus drivers when called by state department of public instruction, division of transportation. (If owner does not drive the bus, the regular approved driver of bus shall attend.)

22.56(11) To carry insurance on bus and pupils with Iowa endorsement as part of policy. As follows: Liability $10,000-$100,000; property damage $5,000 and medical care $500 per pupil. Copy of policy to be filed with superintendent of schools.

22.56(12) To make such reports as may be required by state department of public instruction, county board of education, and superintendent of schools.

22.56(13) That the school bus shall be used only for transporting regularly enrolled students to and from public school and to extracurricular activities approved and designated by the board of education and further to comply with all legal restrictions on use of bus.

22.56(14) To obtain, if possible, the registration numbers of all cars violating the school bus passing law, section 321.372 and file information for prosecution.

22.56(15) Party of second part hereby reserves the right to change routing of the bus and if additional mileage is required it shall be at an extra cost not exceeding $ ..... per additional mile per month. If shortened .....

22.56(16) The use of alcoholic beverages or immoral conduct by party of the first part shall automatically cancel this contract as provided in section 321.375.

22.56(17) Contract may be terminated on 90-day notice by either party, section 285.5(4).

22.56(18) Party of first part agrees that, in case he desires to terminate the contract he will sell his school bus to the board of education at their request as provided in section 285.5(1). (Does not apply to passenger auto used as school bus.)

22.56(19) It is further agreed that party of second part reserves the right to withhold and retain as property of the board of education two weeks salary pending complete compliance with terms of contract or for being avoidably late.

22.57(285) Contract—district-owned buses. The board of education and a private individual undertaking to transport public school pupils for the board in school-district-owned vehicles shall sign the official contract prescribed by the state department of public instruction. The contract shall contain the following provisions:

22.57(1) To conform to all rules of the board of education in and for said district adopted for the protection of the children and to govern the conduct of the person in charge of said conveyance.

22.57(2) To make such reports as may be required by the state department of public instruction, county board of education, or superintendent of schools.

22.57(3) To conform to all standards for operation of the school buses as required by statute or by legally constituted authorities.

22.57(4) To take bus to school bus inspections when held under auspices of the division of transportation, department of public instruction, without further cost to the board.

22.57(5) To attend a county or regional school of instruction for bus drivers when called by the state department of public instruction, division of transportation.

22.57(6) That the party of the second part can terminate this contract and dismiss the party of the first part for any inattention to duty, use of intoxicating liquors, immoral conduct, incompetency or for any other good cause.

22.57(7) That this contract shall not be in force until driver presents official school bus driver permit.

22.58(285) Accident reports. The superintendent of schools shall make a report to the division of transportation, department of public instruction, on any accident involving any vehicle in use as a school bus. The driver of the bus shall cooperate with the superintendent in making such report. The report shall be made on the department of public safety Form D-48, "Driver's Confidential Report of Motor Vehicle Accident, State of Iowa."

22.59(285) Railroad crossings. The driver of any school bus shall bring the bus to a complete stop at all railroad crossings, as required in section 321.343, regardless of whether or not there are any pupils in the bus, and regardless of whether or not there is an automatic signal at the crossing.

22.60(285) Stopping on highway.

22.60(1) A school bus shall not stop to load or unload pupils at any point on a primary highway where the clear vision distance in either direction is less than 1,000 feet.

22.60(2) On a secondary highway the clear vision distance shall be at least 700 feet in each direction.

22.60(3) No scheduled stop shall be made in a "no passing" zone.

22.61(285) Civil defense projects. Civil defense projects may be recognized by the board of directors of any school district as an authorized extracurricular activity under the following conditions:

22.61(1) Such activity may take the form of, but need not be restricted to:

a. First-aid classes.

b. Study and distribution of materials relating to community survival, fallout shelters, radiation detection, and other pertinent disaster measures.

c. Exercises and field trips related to the above matters.

d. Co-operation with local, state and national authorities, both civil and military, and interested organizations, in carrying out civil defense exercises and in planning and making preparations for passive defense in time of actual emergency.

22.61(2) The use of school buses for field trips and exercises, and the planned use of school buses in connection with actual emergency procedures to be carried on in co-operation with local, state or national authorities, civil or military, is hereby defined as properly incident to such authorized extracurricular activity.

22.61(3) All such projects, except an actual emergency operation where time is of the essence, shall have prior approval of the state department of public instruction.

22.61(4) The bus shall be driven by an approved driver holding a chauffeur's license and a regular school bus driver's permit except that in actual emergency situations, where regular drivers are not available, certain other drivers, including students and teachers, may be used providing the following conditions are met:

The driver shall:

a. Be approved by the local board of education.

b. Be at least 16 years of age and not more than 65 years of age, be physically and mentally competent, and not possess personal or moral habits which would be detrimental to the best interests of the safety and welfare of the children transported.

c. Have an emergency school bus driver's permit issued by the state department of public instruction.

22.61(5) To qualify for this special permit, the applicant must pass a physical examination which shall indicate the following:

a. Sufficient physical strength to handle the bus with care.

b. Possession of full and normal use of both hands, both arms, both feet and both legs. Amputation of an arm or foot will disqualify the applicant. Amputation of more than two fingers of the hand will disqualify the applicant. In other words, the applicant should have one complete hand, and the thumb and at least two fingers of the other hand to qualify. Individual evaluations will be made for applicants who have parts of fingers missing.

c. Freedom from mental, nervous, organic or functional disease such as epilepsy, paralysis, insanity, diabetes, abnormal blood pressure, heart ailments or any disease that may cause a tendency to fainting. Blood pressure in excess of 170 (systolic) and 100 (diastolic) taken in a sitting position will disqualify the applicant in the absence of a qualified physician's recommendation and satisfactory statement covering significance of high pressure.

d. At least 20/40 vision in each eye, either normally or after correction. If one eye is near normal, visual acuity within the limits of 20/100 in the other eye is permissible. If glasses are required to bring the vision within above limits, the glasses must be worn at all times when driving the bus. Persons with tunnel or barrel vision may not be used. The driver must have near normal depth perception. Color blindness in a driver is undesirable.

e. Sufficient hearing in both ears to be able to hear sirens, whistles, warning bells, signals and other sounds related to safe operation of school buses. Applicant must meet this requirement without the use of a hearing aid.

[Filed June 2, 1961; amended April 30, 1962, July 12, 1962, May 10, 1966, May 10, 1972]

CHAPTER 23
THE SCHOOL BUS

23.1(285) Requirements for manufacturers. In order to protect both the boards of education and distributors from misunderstanding and confusion, all manufacturers shall:

23.1(1) Submit specifications to division of transportation, department of public instruction, for all models of equipment that are to be offered for sale in Iowa. Notice of approved equipment will be made available to all schools. Certification of models as approved will be given to manufacturers.

23.1(2) File with transportation a statement of list price of approved models including equipment needed to meet state requirements.

23.1(3) On special equipment obtain approval of state department of public instruction before using on or in buses. This shall apply to such special equipment as:

a. First-aid kits.
b. Fire extinguishers.
c. Flashing stop warning lights and switch.
d. Directional signal lights.
e. Stop signal arm.
f. Assistor brake equipment.
g. Heaters.
h. Reflectors.

23.1(4) Be sure buses are bought according to established procedures and legal provisions for purchasing school transportation equipment.

23.2(285) The school bus chassis. Minimum standards for the school bus chassis shall be those recommended at pages 13 to 28, inclusive, of *Minimum Standards for School Buses,* 1964 Revised Edition, by the National Conference on School Transportation, administered by the National Commission on Safety Education, and published by the National Education Association, 1201 Sixteenth Street N.W., Washington, D. C. 20036, except as may be otherwise provided by statute and except as follows:

23.2(1) *Air cleaner.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, the air cleaner shall be so designed and located as to prevent intake of water from cowl drainage or runoff.

23.2(2) *Battery.*

a. The storage battery as established by the manufacturer's rating shall be of sufficient capacity to efficiently care for the starting, lighting, signal devices, heating, defrosting and other electrical equipment. The battery shall be mounted on a sliding battery tray in a special compartment located in the body skirt, or in the engine compartment under the hood in an accessible place.

b. When the battery is mounted in a special compartment located in the body skirt it shall have a rating of not less than 150 ampere hours at 12 volts measured at 20-hour rate.

c. The battery, when it is mounted in the engine compartment under the hood, shall have a minimum ampere-hour rating of 85 amperes. The battery rack shall be of such size that it will accommodate a 90-ampere hour battery of maximum size. The use of two six-volt batteries is permissible, but when used, they shall be rated at a minimum of 150 ampere hours.

d. When the battery is to be mounted outside of the engine compartment, it may be temporarily mounted to the chassis. The body company will permanently mount the battery on a sliding tray located so that the center line of the battery is 52 inches back of the cowl. One-piece battery cables shall be provided by the chassis manufacturer; such cables are to be at least 36 inches longer than normally required, to accommodate the battery when it is located 52 inches to the rear of the cowl. The battery cable, if passed through holes in the metal, shall be protected by nonmetallic grommets. All retaining clips or fastening devices for the battery cables must be insulated.

e. No small vehicle shall be equipped with a battery of less than 70 ampere hours at 12 volts, measured at 20-hour rate.

23.2(3) *Bumper, front.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, the front bumper shall be "heavy-duty" type and be curved or beveled at each end so as to prevent snagging or hooking.

23.2(4) *Color.* The chassis including front bumper, fenders and wheels shall be black. The hood and cowl shall be national school bus chrome. The grille shall be either black or national school bus chrome.

23.2(5) *Alternator.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, the alternator, except in the case of small vehicles, shall have a minimum output of 100 amperes with a minimum charging rate of 20 amperes at manufacturer's recommended idle speed.

For small vehicles the generator or alternator with rectifier shall have a minimum output of 40 amperes with 12-volt system and shall be ventilated and voltage controlled and, if necessary, current controlled.

23.2(6) *Horn.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, the bus shall be equipped with dual horns with each having a sound level of 120 decibels.

23.2(7) *Instruments.* The bus shall be equipped with instruments, as provided in the nationally recommended minimum standards hereinabove adopted, except that a voltmeter shall be substituted in place of an ammeter.

23.2(8) *Tires and rims.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, on equipment now in operation, recapped tires may be used as replacements for use on rear wheels only providing the tires are guaranteed by the seller.

23.2(9) *Tow hooks.* The bus shall be equipped with one front heavy duty center mounted tow hook, adequately secured to the frame rails with braces, or two tow hooks fastened securely to the front end of the frame. Tow hooks on the rear are optional. If provided, however, they shall not protrude beyond outer edge of rear bumper.

23.2(10) *Voltage regulator.* The bus electrical system shall include a voltage regulator of a repairable type. Such regulator shall be of the full-transistor variety except for the field relay which may be either a solid state or controlled contact unit. The regulator shall have readily accessible external adjustment.

23.3(285) The school bus body. Minimum standards for the school bus body shall be those recommended at pages 29 to 53, inclusive, of *Minimum Standards for School Buses,* 1964 Revised Edition, by the National Conference on School Transportation, administered by the National Commission on Safety Education, and published by the National Education Association, 1201 Sixteenth Street N.W., Washington, D. C.,

except as may be otherwise provided by statute and except as follows:

23.3(1) *Ax.* The bus shall be equipped with a short hand ax with approximately a two-pound head and an 18-inch shank, mounted in a position accessible to the driver.

23.3(2) *Body sizes.* The bus shall meet the specifications as provided in the nationally recommended minimum standards hereinabove adopted, except that small vehicles may vary in capacity up to 20 pupils.

23.3(3) *Color.* The school bus body, including roof, shall be uniformly painted in the color, national school bus chrome, in accordance with specifications disseminated by the general services administration of the United States government. The rear bumper, all lettering, and body trim if used, shall be black.

23.3(4) *Defrosters and heaters shall be required.*

a. The defrosters shall be of sufficient capacity to keep the windshield, window to left of driver and glass in entrance door clear of fog, frost and snow.

b. The defrosters shall have separate all-metal fans which secure air directly from the heater core and the air mixture shall be at least 60 percent fresh air.

c. The defroster units shall be driver controlled and regulated, operating independently through their own duct system.

d. In addition, two adjustable six-inch all-metal or polycarbonate resin defroster fans shall be installed. The fans shall have a minimum of four blades and be equipped with adequate guards. Each unit shall be independently adjustable and operated by the driver. These fans shall be on a separate circuit, with a switch for each fan, and be capable of two-speed operation.

23.3(5) *Service door.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to service doors, a header pad of approximately 18 inches in width shall be installed directly within and above the service door opening and shall extend horizontally between the vertical sides of the service door opening to within three inches of each such vertical side. A power operated door must provide for manual operation in case of power failure. If understep-type door control is used, it must be completely enclosed. There shall be no security type of lock, or locking device, installed on the service door.

23.3(6) *Emergency door.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to emergency doors, the lower portion of the emergency door shall be equipped with approved safety glass, exposed area of which shall not be less than 300 square inches. There shall be no security type of lock, or locking device, installed on the emergency door. The emergency door shall be equipped with a heavy duty metal doorstop and hold bracket or two heavy duty straps to prevent the door from striking lamps when it is open.

23.3(7) *Fire extinguisher.*

a. The bus shall be equipped with one dry chemical type fire extinguisher of five-pound capacity or two dry chemical type fire extinguishers of at least two and one-half pound capacity each, mounted in extinguisher manufacturer's bracket of automotive type, and located in the driver's compartment in full view of and readily accessible to the driver.

b. Each fire extinguisher shall have a minimum rating of 8-B:C and shall have a pressure gauge or indicator installed on it.

c. Each extinguisher shall meet the applicable standards prescribed by a testing organization of national reputation which undertakes to test and provide standards for extinguisher equipment. The testing laboratory must be one that is recognized by the Iowa state fire marshal. Each extinguisher shall bear the label of the testing laboratory.

23.3(8) *First-aid kit.*

a. The bus shall carry a grade "A" metal first-aid kit and shall either be mounted in full view or the location of the kit labeled so any driver will know where to find it. The kit shall be accessible to the driver and mounted in such manner that it can be removed from the bus if necessary.

b. First-aid kits must be approved by the state department of public instruction.

c. Sizes required for buses:

Ten unit kit required in all vehicles carrying less than 20 passengers.

Sixteen unit kit required in all buses carrying 20 to 30 passengers.

Twenty-four unit kit required in all buses carrying 31 to 48 passengers.

Thirty-six unit kit required in all buses carrying 49 or more passengers.

Band Aids (Packet)	1	1	1	1
Wire Splint	1	1	1	1

23.3(9) *Flags.* Three 16-inch red flags and means for roadside mounting shall be located in an accessible place near driver.

23.3(10) *Flares.* Each bus shall be equipped with three red reflector type flares. (Oil type flares are not acceptable.) Flares must be mounted in an accessible place near driver.

23.3(11) *Fusees.* Each bus shall be equipped with three 30-minute stand-up fusees stored in a canister with a lid. The canister is to be mounted in an accessible place near the driver.

23.3(12) *Floor covering.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to floor covering, cove molding shall be used along the side walls and rear corners, and all floor seam separations shall be covered with durable metal stripping.

23.3(13) *Gasoline fill cap cover.* The gasoline fill cap opening in the body skirt shall be equipped with a hinged cover held closed by a spring or other conveniently operated device.

23.3(14) *Identification.* In addition to meeting the nationally recommended minimum standards, except minimum standard three, hereinabove adopted, identification shall conform to the following requirements:

a. The bus, whether school owned or privately owned, shall bear the official name of the school on each side in black standard unshaded letters, at least five inches but not more than seven inches high.

Examples: (1) Blank Community School District
(2) Blank Independent School District
(3) Blank Consolidated School District
(4) Blank Township School District

If there is insufficient space due to the length of the name of the school district, the words Community, Independent, Consolidated, Township and District may be abbreviated.

b. The rated pupil seating capacity of the bus shall be printed to the left of the entrance door, approximately six inches below the name of the school district, in two-inch characters. The word "capacity" may be abbreviated. For example: Rated Cap. 48.

c. The number of the bus shall be printed in not less than five-inch nor more than eight-inch characters. The location of the number is at the discretion of the local district except that the number of the bus shall not be on the same line as the name of the school district.

d. Privately owned buses shall also bear the name of the owner, followed by the word "OWNER" in one and one-half inch characters printed approximately six inches below the bus capacity on the right side of the bus.

e. The rated seating capacity of the bus shall also be printed above the right windshield on the inside of the bus.

f. Decals for any lettering on the bus in lieu of painting are not acceptable with the exception that the label on the inside of the emergency door to indicate how it operates may be a decal.

23.3(15) *Insulation.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to insulation, all insulation shall be so firmly installed that it will retain its original position. Plywood may be used for floor insulation.

23.3(16) *Lamps and signals.*

a. General. All lamps and their installation shall conform to the current standards and recommendations of the Society of Automotive Engineers. All lamps and reflectors must be approved by the Iowa commissioner of public safety.

b. Head lamps.

(1) The bus shall be equipped with a minimum of two sealed-beam head lamps of proper intensity and fuses or circuit breakers.

(2) There shall be a manually operated foot switch for selection of high or low beam distribution of these headlights.

c. Clearance lights. The body shall be equipped with two red clearance lamps at the rear and two amber clearance lights at the front mounted at the highest and widest portion of the body.

d. Identification lights. The bus shall be equipped with three amber identification lights on the front and three identification lights on the rear. Each such group shall be evenly spaced not less than six nor more than 12 inches apart along a horizontal line near the top of the vehicle.

e. Reflectors.

(1) The bus shall be equipped with two amber reflectors, one on each side at the lower front and corner of the body approximately at floor level and back of the door on the right side, and at a similar location on the left side.

(2) The bus shall be equipped with four red reflectors; one at each side at or near the rear; and two on the rear, one at each side.

(3) The reflectors are to be mounted at a height not to exceed 42 inches nor less than 20 inches above the ground on which the vehicle stands.

f. Tail and stop (brake) lamps.

(1) Bus shall be equipped with two tail lamps and two stop (brake) lamps not in combination, emitting red light plainly visible for distance of 500 feet to rear. Signal area of stop (brake) lamps shall be at least six inches in diameter and shall have light intensity at least equal to Class "A", Type "I" turn-signal units as established by Society of Automotive Engineers.

(2) Tail lamps shall be mounted not less than 40 inches from surface on which vehicle stands. Stop (brake) lamps shall be as high as practicable but below window line, and spaced as

far apart laterally as practicable but not less than three feet. Measurements shall be taken from lamp centers.

(3) The lens on these lamps shall be free of lettering except for manufacturer's markings.

g. Interior lights. Interior lights shall be provided which adequately illuminate the interior aisles and step-well.

h. Registration plate lamp. The bus shall be equipped with a rear registration plate illuminator. This lamp may be combined with one of the tail lamps.

i. Warning signal lights. School bus warning signal lamps are alternately flashing lamps at the same horizontal level, intended to identify the vehicle as a school bus, and to inform other users of the highway that such vehicle is about to stop, or is stopped, to take on or discharge school children. Requirements for such lights, as used on school buses, shall be as follows:

(1) All school buses shall be equipped with two alternately flashing red lights at the rear of the vehicle and two double lamp assemblies at the front of the vehicle; two of these front lamps shall display an amber light and the remaining two shall display a red light. These shall be sealed-beam units.

(2) Right and left lights shall flash alternately. Each light shall flash not less than 60 nor more than 120 flashes per minute.

(3) The flashing stop warning lights are to have a signal area of not less than 28 square inches per lens. There shall be no lettering, except manufacturer's markings, on the lens. The lamps shall give a distinct warning illumination of entire lens area when lighted for a distance of 500 feet when the bus is in bright sunlight.

(4) The lens color and wiring must conform to S.A.E. specifications.

(5) The entire lamp assembly must meet S.A.E. specifications and successfully pass vibration and shock, moisture, dust, corrosion and photometric tests.

(6) The flashing warning signal lights shall be actuated manually with a switch mounted on the steering column. The switch shall have three positions: Position one—when switch lever is horizontal, all lamps shall be off; Position two—when switch lever is down, front amber and rear red lamps shall flash; Position three—when switch lever is up, front red and rear red lamps shall flash.

(7) The switch shall have two telltale or indicator lights; one shall show amber light when the switch is in position two, and the other shall show red light when the switch is in position three.

(8) The red lamps shall be mounted on the outer side of the amber lamps in the front assembly. Each signal lamp shall be mounted with its axis substantially parallel to the longitudinal axis of the vehicle. The front and rear signal lamps shall be spaced as far apart laterally as practicable, but in no case shall the spacing between lamp centers be less than 40 inches. The signal lamps shall be mounted at the front on the same horizontal center line and above the windshield, and at the rear on the same horizontal center line so that the lower edge of the lens is not lower than the top line of the side window opening. The vision of the front signal lamps to the rear shall be unobstructed by any part of the vehicle from five degrees above to ten degrees below horizontal and from 30 degrees to the right and 30 degrees to the left of the center line of the vehicle. The area around the lens of each alternately flashing signal lamp and extending outward approximately three inches shall be painted black. In installations where there is no flat vertical portion of the body immediately surrounding entire lens of lamp, a circular or square band of black approximately three inches wide, immediately below and to both sides of the lens, shall be painted on the body or roof area against which signal lamp is seen from distance of 500 feet along the axis of vehicle. Each lamp shall be mounted with its aiming plane vertical and normal to the vehicle axis.

(9) All new school buses sold within the state of Iowa from and after the effective date of this subparagraph, in lieu of meeting the specifications set forth in subparagraphs (1) through (8) hereof, shall be equipped with warning signal lamps as follows:

All such school buses shall be equipped with four alternately-flashing warning lamps at the front and four alternately-flashing warning lamps at the rear of the bus. Two of each of said sets of four lamps shall be amber in color and two shall be red in color. Said lamps shall conform to the Society of Automotive Engineers Standard "J887, July, 1964", except that the candlepower requirement shall be two and one-half times that specified in said standard.

Installation of said lamps shall conform to said standard except that an amber signal lamp shall be located adjacent to each red signal lamp, at the same level, and at the side of the red signal lamp nearer the vertical center line of the bus. As a further exception to said standard, the system of red and amber signal lamps shall be so wired that the amber signal lamps are energized manually; and the red signal lamps are energized automatically and the amber signal lamps are de-energized automatically when the bus entrance door is opened.

The switch to actuate the amber lamps shall be installed within easy reach of the hands of the bus driver. Two indicator lights shall be located within view of the driver, one of which shall show an amber light when the amber signal lamps are flashing and the other of which shall show a red light when the red signal lamps are flashing.

The area of the bus body around the lens of each flashing signal lamp and extending outward for at least three inches shall be painted black.

j. Turn signal units. An electric direction signal lamp for school buses is a device for giving a flashing warning light to the front and to the rear

of a school bus to indicate to approaching and overtaking motor vehicles the intention of the bus operator to change direction. Requirements for such devices, as used on school buses, shall be as follows:

(1) The bus shall be equipped with four class "A" amber flashing turn signal lamps that meet the specifications of the Society of Automotive Engineers. These signals must be independent units and may be equipped with a four-way hazard warning switch to cause simultaneous flashing of the turn signal lamps when needed as a vehicular traffic hazard warning. Telltale or indicator lights plainly visible to operator shall be provided to indicate that each signal is functioning properly.

(2) The illuminated signal area of the lamp shall be in the form of an amber arrow with head and shaft or arrowhead only. The luminous area shall be not less than 12 square inches. The area of the lamp face surrounding the luminous area shall be black. This may be a metal shield painted dull black or a vitreous black enamel applied to the lens itself.

(3) The lens coloring and wiring must conform to S.A.E. specifications.

(4) The flashing rate for turn signal lamps shall be no slower than 60 and no faster than 120 times per minute under normal operating conditions. The "on" period of flasher shall be long enough to permit bulb filament to come to full brightness.

(5) The entire lamp assembly must meet S.A.E. specifications and successfully pass vibration and shock, moisture, dust, corrosion and photometric tests.

(6) Each turn signal lamp shall be mounted with its axis substantially parallel to longitudinal axis of vehicle. Rear lamps shall be mounted as near to the right and left side of bus as possible but in no case shall outer edge of lamps be more than ten inches from outer body width line. They shall be mounted below rear windows but in no case shall distance from top edge of lamp to lower edge of window exceed five inches. Front lamps shall be mounted either on top of each front fender or on cowl. If mounted on cowl, distance from top edge of lamp to lower windshield line shall not exceed five inches. Mounting brackets or hoods for both front and rear lamps shall be of sufficient strength to withstand normal vibration. Those for rear lamps shall be streamlined to body to prevent hitching of rides.

k. Supervisor's light. The rearmost ceiling light or a separate light may be used as a supervisor's light. This light shall have a separate switch controlled by the driver so he may have this light on when traveling after sunset.

23.3(17) *Mirrors.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, as the same relate to mirrors, a cross-view mirror of at least four inches in diameter shall be installed on the bus in such a manner that the seated driver may observe the area in front of the bus which could not otherwise be viewed from his position.

23.3(18) *Seat belt for driver.* A seat belt for the driver shall be provided, and shall be fastened to the bus floor immediately behind the driver's seat when adjusted to its rearmost position. Both the right and left half of this seat belt shall be equipped with a retractor and shall be held by a metal strap or loop of substantial material securely fastened to the seat frame in a manner that will keep the belt off the floor. All seat belts require special approval of the Iowa state commissioner of public safety.

23.3(19) *Seats.* In addition to meeting the nationally recommended minimum standards hereinabove adopted, seats shall meet the following requirements:

a. The backs of all seats of similar size shall be of the same width at the top and of the same height from the floor and shall slant at same angle with the floor. Backs of seats shall be free of coat rails.

b. The tops of back rests shall be not less than 33 and not more than 45 inches above the floor level except that tops of back rests on rear seats shall not be above bottom edge of rear windows.

c. The seat cushions shall be securely attached to the seat frames with a positive type retainer to keep the cushion from being completely dislodged from the seat frame if the bus overturns. The retainer should be secured to the front rail of the seat frame so the cushion can be raised for cleaning purposes. Spring clips do not meet this requirement.

d. Where beading is used it shall be double sewn in all seams to assure less splitting from flexing.

e. All seats shall be securely fastened with bolts and nuts with lock washers on that part or parts of the bus which support them.

f. The spacing of fiber glass seats shall be on a "knee space" basis with a minimum requirement of 25 inches between seats.

23.3(20) *Seats in small vehicles.* For small vehicles the following standards for seats apply in lieu of those in 23.3(19):

a. All seats shall be securely fastened to the body of the vehicle.

b. The seats shall be covered with fire-resistant padding material and comfortably upholstered with adequate padding. (Not applicable to fiber glass seats).

c. Jump seats or portable seats shall not be used.

d. The seat beside the driver, if regular equipment or installed by vehicle manufacturer, may be used for pupil seating. It shall be securely fastened to the body and shall be so constructed as not to interfere with pupils entering or leaving the vehicle.

e. The allowable average rump width in determining the rated seating capacity of the bus shall be 13 inches.

f. All seats shall be at least 14 inches in over-all depth.

g. All seats shall be forward facing.

23.3(21) *Seat rail padding.*

a. The top seat rail of all school bus seats (except the two rear seats on either side), the crossbar back of the driver's seat on the left-hand side, and the top modesty panel crossbar on the right-hand side shall be covered with padding sufficient to minimize facial injury in case of impact.

b. The seat rail and crossbar padding shall be semidense sponge rubber or other shock absorbing material with similar resilient characteristics. The padding shall have a minimum nondepressed thickness of one inch.

c. The seat rail padding shall cover all of that part of the top seat rail likely to be struck by the heads or faces of pupils sitting back of it if they are thrown forward by impact.

d. The seat rail padding shall be covered with and held in place by a covering made of the same material used to cover the padding of the seat cushion. The seat rail padding cover shall be securely attached to the seat back.

23.3(22) *Steps.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to steps, the surface of the steps shall be of nonskid rubber with ribbed thread and contrasting colored nosing. A full length assist rail shall be provided in an unobstructed location inside doorway.

23.3(23) *Stop signal arm.*

a. The stop signal arm shall be a flat 18-inch octagon, exclusive of brackets for mounting.

b. The arm shall be constructed of aluminum alloy with a minimum gauge of .080, and temper of 5052-H34 or equivalent.

c. It shall have the word "STOP" printed on both sides in white letters at least six inches high, with a brush stroke of approximately seven-eighths inch width, on a bright red background; the outer edge shall be painted white one-half inch wide.

d. The colors shall conform to the colors shown and specified in the American Association of State Highway Officials Manual for Signing and Pavement Marking of the National System of Interstate and Defense Highway, dated 1961 or latest issue. In addition, the colors shall be the same in daylight and at night under artificial headlight illumination. Reflective sheeting shall be uniform in color and reflectivity.

e. The entire sign, including letters, shall be reflectorized with "SCOTCHLITE" or equivalent, and must not lose over 20 percent of reflectivity when wet.

f. The sign shall be mounted outside the bus on the left side opposite the driver and immediately below the window. Rubber spacers shall be installed on either the side of the bus or the stop arm so as to prevent sign from making abrasive contact with the side of the bus.

g. It shall have a driver controlled mechanism, either manual or mechanical (vacuum), which will positively hold the sign in an extended or retracted position to prevent whipping in the wind. (Gears are not acceptable.)

h. An additional vacuum reserve tank with check valve is required for vacuum controlled arm.

i. The control mechanism must be mounted so the driver will remain in normal driving position while operating the stop signal arm.

j. All stop signal arms, including the mechanism, must have special approval of the state department of public instruction.

23.3(24) *Storage compartment.* A metal container of adequate strength and capacity for the storage of tire chains, tow chains and such tools as may be necessary for minor emergency repairs while bus is enroute shall be provided. Such storage container may be located either inside or outside the passenger compartment but, if inside, it shall have cover other than the seat cushion and be securely fastened to floor or seat frame. The container must have a latch to keep the cover securely fastened to it in such a manner as to prevent the contents from spilling in case the bus overturns.

23.3(25) *Sun shield.* There shall be installed on the windshield header an interior sun visor which is double bracketed, adjustable and not less than six inches wide and thirty inches long.

23.3(26) *Ventilation.* Static type exhaust roof ventilators, nonclosing type, shall be installed in low pressure area of the front roof panel.

Exception—small vehicles.

This standard does not apply to small vehicles not manufactured specifically as school buses.

23.3(27) *Windshields and windows.* In addition to meeting the nationally recommended minimum standards, hereinabove adopted, as the same relate to windshields and windows, when full drop windows are used they must be blocked so that when in a down position, the opening between the window header and top of glass is not more than nine inches.

23.3(28) *Windshield washers.* The bus shall be equipped with windshield washers which shall conform to the body manufacturer's recommendations as to type and size for the bus on which they are to be used.

23.3(29) *Windshield wipers.*

a. The bus shall be equipped with two positive-action, variable-speed windshield wipers of air or electric type. All wipers by design and installation shall provide desirable vision for the driver.

b. Two separate heavy-duty motors, with separate switches, shall be provided and equipped

with blades of sufficient length to clear the windshield glass in the driver's direct view.

c. The windshield wiper blades and arms shall be of the heavy-duty type. The blades must be at least 14 inches in length.

d. All wiper controls shall be located within easy reach of the driver and designed, when in stop position, to move blades from the driver's direct view.

23.4(285) Small vehicles. "Small vehicles" are hereby defined, for purposes of these rules, as vehicles of less than 20 passenger capacity, and shall meet the following requirements.

23.4(1) *Passenger cars, station wagons, and similar vehicles.* Passenger cars, station wagons, carryalls and similar vehicles may be used for lawful transportation of school pupils, but may not stop on the traveled portion of the road to pick up and discharge such pupils, when said vehicles comply with the following requirements:

a. The vehicle must be of closed body type.

b. Passenger cars must be full size.

c. Body must be all steel or of a metal at least equivalent in strength to steel.

d. Vehicle must be equipped with:

(1) Four-wheel brakes properly adjusted to efficiently stop car when fully loaded.

(2) Hand brake adequate to hold vehicle when stopped on incline.

(3) Two windshield wipers.

(4) Rear-view mirrors—one inside and one outside on left side.

(5) Two taillights.

(6) Two stop lights.

(7) Multiple beam headlights (including indicator light).

(8) Switch to raise or lower headlight beam.

(9) Directional signals—front and rear (including indicator lights).

(10) Adequate horn.

(11) Interior adjustable sun visor.

(12) Adequate heating equipment.

(13) Heater defroster—an additional defroster fan for left windshield may be required.

(14) Safety glass throughout.

(15) Spare tire in good condition.

(16) Two school bus signs, one on front and one on rear, or one sign located on the top of the vehicle with printing on each side of the sign. Signs must be national school bus chrome in color with black letters six inches high. Sign shall be of type that can be dismounted, turned down, or covered when vehicle is not being used as a school bus.

(17) Dry chemical type fire extinguisher with a minimum capacity of two and one-half pounds and a rating of 8-B:C.

(18) First-aid kit containing at least ten units.

(19) Hand ax.

(20) In addition to meeting the foregoing requirements, carryalls and similar vehicles must have additional equipment as follows: Four red reflectors located approximately at floor level, one on each side at or near rear and two on the rear, one at each side; three 16-inch red flags; three 30-minute fusees in canister with lid; and three reflector type flares.

23.4(2) *Carryalls, travel-alls and similar vehicles.* Carryalls, travel-alls and similar vehicles may be used for the transportation of pupils, as provided in 23.4(1), and when equipped as follows may stop on the traveled portion of the road to pick up or discharge pupils:

a. Must meet conventional school bus specifications listed in these standards for the following items:

(1) Color
(2) Identification
(3) Stop arm
(4) Flashing warning lights
(5) Reflectors
(6) Flags, flares, fusees

b. Must be equipped with rear-view mirror on right side in such position that the roadway on the right side of vehicle, beginning at service door, is visible from the driver's position.

c. Must meet all other requirements listed for small vehicles in preceding section which are not inconsistent with this section.

These rules shall be applicable only to buses purchased after September 1, 1968.

[Filed July 1, 1952; amended February 13, 1968, June 24, 1969]

TITLE XIII
VETERANS' TRAINING

CHAPTER 24
APPROVAL OF ON-THE-JOB TRAINING ESTABLISHMENTS UNDER THE SERVICEMEN'S READJUSTMENT ACT

24.1(257) Application. In order to qualify as a training facility, the establishment must submit a written application on form as prescribed by this department.

24.2(257) Inspection. Upon receipt of the written application, it is checked by a staff member, and if there is any merit to the application, the establishment is visited and a detailed inspection is made to determine the correctness of the information given in the application.

24.3(257) Report reviewed. The inspector's recommendations are subject to the review of the director of the division.

24.4(257) Wage schedules. The employer shall observe the following points in setting forth the wage schedule for the training period:

1. The schedule shall set up for the entire period of training with provision for increases at regular intervals.

2. The starting wage and the wage paid during training cannot be less than the wage normally paid a nonveteran learner in this trade.

3. The starting wage shall not be less than 50 percent of the stated objective wage.

4. The wage schedule shall increase during each period of training until the employer is paying approximately 90 percent of the objective wage during the last period of training.

5. The wages shall be in conformity with state and federal laws and applicable bargaining agreements.

6. Wage schedules contained in applicable bargaining agreements, wages established by law, or other wage schedules established by large businesses which can be shown to be a matter of record will be recognized.

7. The after-training wage shall be the wage that is normally paid to a person who has had training equivalent to that contemplated by the proposed training program and who is beginning employment in the classification. Further raises which have been granted to other employees on the basis of length of service or loyalty to the firm should not be considered in determining the completion wage.

8. Since the employer is required to guarantee definite periodic wage increases, programs shall not be approved which contain a wage schedule set up on a commission basis.

[Filed July 1, 1952]

CHAPTER 25
APPROVAL OF EDUCATIONAL INSTITUTIONS FOR THE EDUCATION AND TRAINING OF ELIGIBLE VETERANS UNDER THE SERVICEMEN'S READJUSTMENT ACT

25.1(257) Colleges. All colleges, universities and junior colleges accredited by the state department of public instruction, the Iowa committee on secondary school and college relations, or the North Central Association are approved without further inspection.

25.2(257) High schools. All high schools accredited by the department of public instruction are approved without further inspection.

25.3(257) Related courses for apprenticeship. Approved upon recommendation of the department of vocational education without subsequent inspection.

25.4(257) Schools of Bible or theology. Must be recommended by a recognized accrediting agency in the theological field. Subject to inspection following receipt of written application.

25.5(257) Schools of nursing. Must be recommended by the Iowa state board of nurse examiners. Subject to inspection following receipt of written examination.

25.6(257) Hospitals. (Residencies, medical technologists, X-ray technicians, etc.) Must be recommended by the council on medical education and hospitals, American Medical Association, and the Iowa state department of health. Subject to inspection following receipt of written application.

25.7(257) Schools of cosmetology. Must be recommended by the board of cosmetology examiners, department of health. Subject to inspection following receipt of written application.

25.8(257) Schools of barbering. Must be recommended by the board of barber examiners, department of health. Subject to inspection following receipt of written application.

25.9(257) Flight schools. Must be recommended by the U. S. civil aeronautics authority and the Iowa department of aeronautics. Subject to inspection following receipt of written application.

25.10(257) Schools of business. Subject to inspection following receipt of written application.

25.11(257) Trade schools. Same as 25.10(257) above.

25.12(257) Correspondence courses. Must have operated successfully in Iowa for at least three years. Subject to inspection following receipt of written application.

All of the above institutions, except public or other tax-supported schools, must operate successfully in Iowa for at least one year prior to approval. With respect to correspondence courses, three years of successful operation is required.

The one-year requirement may be waived when the institution submits positive evidence that the school is essential to meet the requirements of veterans in the state of Iowa.

The written application referred to in the above shall include the following information:

25.12(1) Name, address and telephone number of the school.

25.12(2) Names and qualifications of owners and managers of the school.

25.12(3) Statement concerning the date the school was established, and the period of time school has been under the present management.

25.12(4) Statement as to the financial solvency of the school, and assurance that school will continue operations for a considerable period of time.

25.12(5) Statement concerning the school's accreditation by any recognized accrediting agencies, if any.

25.12(6) Statement concerning present enrollment and maximum number of students proposed to be trained in the courses at one time.

25.12(7) Description of the physical plant of the school, giving the number and size of classrooms; type of heating, lighting and ventilation, blackboard space; number of toilets and lavatories; number and kinds of desks, tables, chairs and other school furniture; total floor space; and a listing of all laboratory and classroom equipment available for instruction.

25.12(8) Names and educational and experience qualifications of all instructors.

25.12(9) Statement of the educational prerequisite for each course.

25.12(10) Statement as to the exact title of the course and specific description of the objective for which given.

25.12(11) Statement as to the length of the course(s) in weeks; number of hours school is in session per week.

25.12(12) A detailed curriculum must be attached showing subjects taught, type of work or skills to be learned, and approximate length of time to be spent on each.

25.12(13) Samples of permanent records showing students' conduct and progress are to be enclosed, as is a sample certificate or diploma issued students upon satisfactory completion of the course of study.

25.12(14) Statement as to tuition costs, and costs for required books, supplies and equipment.

25.12(15) Statement concerning graduates' placement during the year preceding date of application.

25.12(16) Statement that school buildings meet local and state regulations concerning fire, safety, and health.

Upon receipt of the written application, it is checked by a staff member, and if there is any merit to the application, the school is visited and a detailed inspection is made to determine the correctness of the information given in the application.

25.13(257) Evaluation standards. The following standards are used in evaluating a school:

25.13(1) The curriculum and instruction must be consistent in quality, content and length with similar courses in the public schools or other private schools with recognized and accepted standards.

25.13(2) Each school must have a system for keeping attendance, progress and placement records which is acceptable to this department. Records must be kept up-to-date and reports must be prepared and submitted as requested. Furthermore, school records must be made available for inspection on request of department representatives.

25.13(3) School must have clearly stated and enforced standards of attendance, progress and conduct. Such standards must be acceptable to this department.

25.13(4) The school must give appropriate credit for previous training or experience, with training period shortened proportionately. No course of training will be considered bona fide as to a veteran who is already qualified by training and experience for the course objective.

25.13(5) The school must provide the student and the veterans' administration with a copy of the approved curriculum.

25.13(6) Upon completion of the training, the school must give the veteran a certificate indicating the approved course, title, and length and that the training was completed satisfactorily.

25.13(7) The school must have a clear statement as to entrance qualifications and must abide by them.

25.13(8) The school must have sufficient toilet facilities to adequately serve the enrollment.

25.13(9) Each school must provide at least 25 square feet of floor space for each student in a classroom; and at least 40 square feet in laboratories or shop rooms for each student training therein.

25.13(10) Heat, light and ventilation shall be adequate for the type of instruction and enrollment in the school. Thirty foot-candles of light shall be considered minimum where reading is done.

25.13(11) School buildings must meet local and state regulations concerning fire, safety and health.

25.13(12) Schools must be ethical in their advertising and solicitation. Both are subject to review and approval by this department.

25.13(13) Instructors for a trade school shall have at least three years of experience in the trade as a journeyman, above the learning level.

Instructors in other schools shall hold appropriate certificates, licenses or degrees.

25.13(14) The student-instructor ratio may not exceed 35 to one in any classroom activity, and may not exceed 20 to one in any laboratory or shop activity unless the school is licensed by another agency of the state. The ratio in flight schools must be based on requirements of the U. S. civil areonautics authority.

25.13(15) While schools may not guarantee employment upon graduation, a school should exert every effort to assist its graduates in obtaining employment.

25.13(16) Tuition and other charges made by school should be clearly set out in publications of the school.

25.13(17) Schools should make use of modern teaching aids and procedures.

TITLE XIV

VOCATIONAL EDUCATION

CHAPTER 26

VOCATIONAL EDUCATION PROGRAMS

26.1(258) Standards for vocational education. Vocational education programs carried on under the provisions of chapter 258 of the Code shall be governed by and administered pursuant to the Acts of Congress accepted by said chapter, the provisions of said chapter, duly-adopted rules of the federal agencies involved and the current federal-state contracts or plans approved pursuant to said statutes and rules.

[Filed October 18, 1969]

CHAPTERS 27 to 34

Reserved for future use

TITLE XV

VOCATIONAL EDUCATION—REHABILITATION

CHAPTER 35

REHABILITATION DIVISION

DIVISION I
AGENCY FOR ADMINISTRATION

35.1 Designation of state board.
35.2 Vocational rehabilitation of the blind.
35.3 Responsibility of the state board.
35.4 Plan materials and reports.
35.5 Plan materials and reports—agency for the blind.
35.6 Legal basis.

DIVISION II
ELIGIBILITY

35.7 Responsibility for determination.
35.8 Residence.
35.9 Criteria of eligibility for vocational rehabilitation.
35.10 Criteria of eligibility for specific services.
35.11 Nondiscrimination.
35.12 Classes of individuals to be rehabilitated.
35.13 War-disabled civilians and civil employees of the United States.
35.14 Hearings on applicants' appeals.

DIVISION III
CASE FINDING

35.15 Finding and intake.
35.16 Working arrangements with other agencies.

DIVISION IV
CASE DIAGNOSIS

35.17 Scope of diagnosis.
35.18 Basis of diagnosis.
35.19 Medical diagnosis.
35.20 Vocational diagnosis.

DIVISION V
RECORDING OF CASE DATA

35.21 Division files.

DIVISION VI
CONFIDENTIAL INFORMATION

35.22 Rules.
35.23 Use and exchange of information.

DIVISION VII
PLAN FOR INDIVIDUALS

35.24 Formulation of the plan.
35.25 Content of plan.
35.26 Client's participation and approval.
35.27 Conditions for undertaking the individual plan.
35.28 Trainee co-operation.

DIVISION VIII
SERVICES

35.29 Scope of services.
35.30 Counseling and guidance.
35.31 Placement.
35.32 Working arrangements.

DIVISION IX
FACILITIES

35.33 Types of facilities.
35.34 General standards.
35.35 Standards for hospitals.
35.36 Standards for persons providing physical restoration services.
35.37 Standards for facilities providing specialized training or other services.

DIVISION X
ECONOMIC NEED

35.38 Establishment of need.
35.39 Standards for determining amount of supplementation.
35.40 Resources of client.
35.41 Rules respecting capital assets.

DIVISION XI
PERSONNEL ADMINISTRATION

35.42 Methods and policies of selection and appointment.
35.43 Separation of permanent employees.
35.44 Participation in political activity.
35.45 Personnel qualifications.
35.46 Vacations and leaves for illness and military service.

DIVISION XII
ADMINISTRATIVE ORGANIZATION
(Internal Operations)

DIVISION XIII
FISCAL ADMINISTRATION (Internal Operations)

DIVISION XIV
MAXIMUM FEES FOR SERVICES

35.47 Training.
35.48 Physical restoration services (other than hospitalization and prosthetic devices) and medical examinations.
35.49 Hospitalization.
35.50 Prosthetic devices.
35.51 Travel.

DIVISION XV
COMPENSATION SCHEDULE (Internal Operations)

DIVISION XVI
REIMBURSEMENT FROM FEDERAL FUNDS
(Internal Operations)

DIVISION XVII
SUBMISSIONS OF REPORTS (Internal Operations)

DIVISION I
AGENCY FOR ADMINISTRATION

35.1(259) Designation of state board. The state board for vocational education is designated as the sole agency for the administration, supervision and control of the state plan except as indicated in 35.2(259).

35.2(259) Vocational rehabilitation of the blind. The commission for the blind is authorized by state law to rehabilitate the blind.

The following definition of blindness observed by the department of public welfare in determining eligibility for blind assistance is the basis for allocating cases between the two agencies:

"An individual approved for blind assistance shall be one who has no vision, not more than 20/200 central visual acuity in the better eye with correcting glasses, or a field defect, in which the peripheral field has contracted to such an extent that the widest diameter of visual field subtends at an angular distance of no greater than 20 degrees."

35.3(259) Responsibility of the state board. The state board assumes responsibility for the statistical and financial reports containing estimates of expenditures, accounting for federal funds and the furnishing of other information to meet federal requirements found necessary by the federal director.

35.4(259) Plan materials and reports.

35.4(1) The superintendent of public instruction as chairman and executive officer of the state board may act for the board in approving plan material that does not involve a major change in policies.

35.4(2) The plan and all amendments thereto shall be transmitted to the federal director by the state director of the rehabilitation division with a statement over the signature of the executive officer indicating the effective date and the fulfillment of any conditions necessary to its operation. Plan materials relating to the rehabilitation of the blind will also indicate the date of adoption by the commission for the blind.

35.5(259) Plan materials and reports—agency for the blind.

35.5(1) Plan materials and reports of the commission for the blind will be submitted to the federal director through the state board according to special agreement.

35.5(2) An agreement exists between the state board and the commission for the blind which provides that plan materials and reports transmitted to the federal office by the commission will be of the same effect as though transmitted by the state board if: (*a*) Copies of such plan materials and reports are simultaneously furnished to the state board; (*b*) such plan materials and reports indicate that copies have been furnished to the state board; (c) within a specified period after the transmission of such materials the executive officer of the state board has not advised the federal director that for any reason the state board does not concur in such material.

35.6(259) Legal basis. Certified copies of all laws, including current appropriation laws, pertaining to the administration of the division of vocational rehabilitation are included as attachments to this plan.

DIVISION II
ELIGIBILITY

35.7(259) Responsibility for determination. The division of vocational rehabilitation assumes responsibility for determination of individuals for vocational rehabilitation, and of the nature and scope of vocational rehabilitation services to be provided such individuals; and such responsibility will not be delegated to any other agency or individual not on the staff of the division.

35.8(259) Residence. Six months of residence is required to establish eligibility for rehabilitation services; however, applicants who have resided in the state for less than six months may be accepted for service upon submission of satisfactory evidence of intention to remain as permanent residents. If applicant is a former resident of another state, a summary of that state's case record will be sought as a part of investigative procedure.

35.9(259) Criteria of eligibility for vocational rehabilitation. Eligibility for vocational rehabilitation will be determined upon the basis of two established criteria: The existence of a physical or mental disability; and a substantial employment handicap resulting from such disability.

35.10(259) Criteria of eligibility for specific services. The following criteria are established for determination of eligibility of clients for the following services:

35.10(1) *Physical restoration.*

a. The service is necessary for the individual's satisfactory occupational adjustment.

b. The condition causing disability is relatively stable or slowly progressive.

c. The condition is of such a nature that treatment may be expected to remove, arrest or substantially reduce the handicap within a reasonable length of time.

d. The prognosis for life and employability are favorable.

35.10(2) *Training and training materials.*

a. The training and books and supplies are necessary for the individual's satisfactory occupational adjustment.

b. The individual has the mental and physical capacity to acquire a skill that he can perform in an occupation commensurate with his abilities and limitations.

35.10(3) *Transportation, occupational licenses and occupational tools and equipment.*

a. An individual may be provided transportation in connection with securing medical or psychological examinations, physical restoration, training or placement and a companion may be transported at rehabilitation expense if the disabled individual cannot travel alone.

b. An individual is eligible for occupational licenses and customary occupational tools and equipment when such services are necessary for entrance into, and successful performance in, a selected occupation.

35.10(4) *Maintenance.* A client is eligible for maintenance when it is necessary to his vocational rehabilitation.

Financial need must be established prior to provision of certain services at rehabilitation expense. Individuals are eligible for physical restoration, occupational licenses, customary occupational tools and equipment, training materials, maintenance and transportation (except transportation for diagnosis, guidance or placement) only on the basis of financial need and when such services are not otherwise immediately available. Federal reimbursement for these services will be requested only for disabled individuals found to require financial assistance with respect thereto.

35.11(259) Nondiscrimination. The division observes the principle that sex, race or color do not justify inequality in the determination of eligibility and in the provision of necessary rehabilitation service.

35.12(259) Classes of individuals to be rehabilitated. The division makes rehabilitation services available only to such classes of disabled individuals who through rehabilitation services may be made employable, or more suitably employable; and individuals who are severely disabled or homebound are not excluded.

35.13(259) War-disabled civilians and civil employees of the United States. The division accepts for vocational rehabilitation under the state plan any individual certified by the federal director as a war-disabled civilian or a civilian employee of the United States disabled in the performance of his duty, who is a resident of the state or who chooses the state as and for his residence.

All necessary rehabilitation services, other than maintenance, will be made available to persons so certified irrespective of the individual's financial need.

35.14(259) Hearings on applicants' appeals. Disabled persons may appeal from the decision of any counselor to a district case board (supervisor and two other counselors). Appeals from the decision of a district case board will be heard by the state case board (director and two supervisors), or in instances where the district case board cannot properly function the case may be heard originally by the state case board. In making his appeal to the state case board the client is required to set forth his contentions in writing and submit them to the state director at least ten days prior to the date of the hearing. The individual may be accorded an appeal from the state case board to the state board for vocational education if the state director and the executive officer of the board agree that the problem merits further review. Notification of the right to appeal is verbal in the first instance; in the second instance the written decision of the district case board will include notification of the right to appeal to the state case board.

DIVISION III
CASE FINDING

35.15(259) Finding and intake. The organized program of case finding now in effect at both the local and state level will be maintained and improvements will continuously be sought. Counselors share the responsibility for developing referral arrangements with local co-operators and accepting referrals in the field for prompt handling. All new cases whether referred to a local worker or to the state office are checked against a master index for previous information and are acknowledged promptly by letter or a personal call. Public information directed to all known sources of referrals as well as to the general public seeks to localize all disabled individuals of employable age who may be eligible, interpret rehabilitation to them and ascertain whether or not they are interested in or in need of the services offered.

35.16(259) Working arrangements with other agencies. In order to facilitate the over-all case finding program the division establishes wherever possible working relationships with public and private agencies in areas of health, welfare, compensation, education, employment and other related services.

DIVISION IV
CASE DIAGNOSIS

35.17(259) Scope of diagnosis. The case diagnosis constitutes a comprehensive study of the client, including medical as well as a vocational diagnosis of the individual.

35.18(259) Basis of diagnosis. The case diagnosis in each case is based on pertinent information, including the individual's health and physical status, intelligence, educational background and achievements, vocational aptitudes and interests, employment experience and opportunities and personal and social adjustments.

35.19(259) Medical diagnosis.

35.19(1) As a basis for determination of eligibility and formulation of the individual's rehabilitation plan the division secures competent medical diagnosis and provides every case with the opportunity for a general medical examination. Where reasonably necessary to a decision in doubtful cases, the diagnosis is, if at all practicable, secured from recognized specialists in specific fields indicated by the general medical diagnosis.

Whenever possible the diagnosis is accompanied by recommendations as to the means and methods of restoration and by a statement of any physical or mental limitations that may exist.

35.19(2) The division accepts a medical report in lieu of securing a new examination when such report is from a reliable source and can be relied upon to provide a sound basis for diagnosis of the physical or mental condition of the individual.

35.19(3) Minimum procedures routinely required in the general medical diagnosis are a determination of the physical and mental abilities and limitations of the individual including blood serologic tests, urinalysis and other necessary laboratory tests.

35.19(4) Hospitalization for diagnostic purposes is provided by the division upon proper medical recommendation and upon approval of the medical consultant or supervisor. Normally such hospitalization is not for more than three days and in no case does it exceed ten days.

35.20(259) Vocational diagnosis. The methods of the vocational diagnosis include counseling interviews with the client; such reports as may be needed, including when necessary in the individual case, reports from schools, employers, social agencies, and others; psychological information substantiating the determination of eligibility where such eligibility is based on the existence of mental retardation; and exploratory services, services provided by workshops or centers and short tryout courses.

DIVISION V
RECORDING CASE DATA

35.21(259) Division files. The division maintains a record for each case which includes pertinent case information including as a minimum, the basis for determination of eligibility, the basis justifying the plan of services and the reason for closing each case together with a justification of the closure. Records and case files may be destroyed when deemed obsolete by the director but in no instance shall such records be destroyed until five years after both state and federal audits have been completed and satisfactory adjustments made. A summary card showing pertinent facts will be retained on all case files retired in this manner.

DIVISION VI
CONFIDENTIAL INFORMATION

35.22(259) Rules. The division maintains in effect such rules as are necessary to assure that all information as to personal facts and circumstances of clients given or made available to the division, its representatives or employees in the course of administration of the vocational rehabilitation program, including lists of names and addresses and records of evaluation, will be held to be confidential.

35.23(259) Use and exchange of information.

35.23(1) The use of such information and records is limited to purposes directly connected with the administration of the vocational rehabilitation program, and is not disclosed, directly or indirectly, other than in the administration of the program, unless the consent of the client to such release has been obtained either expressly or by necessary implication.

Release of information to employers in connection with placement is considered as a release of information in connection with the administration of the program.

35.23(2) Such information is released to other welfare agencies or programs from which the client has requested certain services under circumstances which presume his consent, provided such agencies have adopted regulations which assure that the information will be held confidential and be used only for the purposes for which it was intended.

35.23(3) All such information is the property of the division and may be used only in accordance with the division's regulations.

35.23(4) *Procedures and standards.* The division has adopted such procedures and standards as are necessary to (*a*) give effect to its regulations; (*b*) assure that clients and interested persons will be informed as to the confidentiality of rehabilitation information and that a copy of the division's regulations is available to them; and (*c*) assure the adoption of such office practices and the availability of such office facilities and equipment as will assure the adequate protection of the confidentiality of such reports.

DIVISION VII
PLAN FOR INDIVIDUALS

35.24(259) Formulation of the plan. The division formulates an individual plan of rehabilitation for each eligible individual to whom rehabilitation services are to be furnished. Such plans are formulated on the basis of an evaluation of all data secured through the case diagnosis.

35.25(259) Content of plan. The individual plan summarizes diagnostic findings, sets forth the services necessary to accomplish the individual's vocational rehabilitation, the way in which these services are provided, the estimated costs and the established job objective.

35.26(259) Client's participation and approval. The individual plan is formulated with the individual's participation and approval and provides for all rehabilitation services that are recognized to be necessary to fully accomplish the individual's vocational rehabilitation whether or not such services are at the expense of the rehabilitation division.

35.27(259) Conditions for undertaking the individual plan. The basic conditions to the undertaking of the individual plan are: (1) The belief of the division that when concluded it will satisfactorily achieve the individual's vocational rehabilitation; and (2) that all services are to be carried to completion, provided, however, that the division exercises its discretion in relation to the termination or revision of the individual's plan when, for any reason, it becomes evident that the above underlying conditions will not be met or when the financial condition of the individual or the division makes termination necessary.

35.28(259) Trainee co-operation. The division requires good conduct, regular attendance and co-operation of all individuals engaged in rehabilitation training but believes that these requirements will usually be achieved through the maintenance of the previously developed counseling relationship rather than by an authoritative approach. The division makes the following provisions for assuring itself of trainee co-operation: Instruction, verbally or by pamphlet, emphasizing the importance of these factors to the success of the individual plan; advising each trainee at the beginning of the program just what is expected of him and that services will continue only if his progress, attitude and conduct are satisfactory; requiring periodic progress, grade and attendance reports from the training agency; maintaining personal supervision of each training program by a counselor—the intensity of supervision as specifically outlined in the Manual of Operations Procedures depends upon the type of training and the individual problems involved; promptly calling the trainee's attention to evidence of unsatisfactory progress or attendance before such conditions become serious; providing encouragement to the trainee to promote good work habits with due commendation for effective effort; maintaining good relationships with the training agency and with one instructor or advisor on the school staff responsible as a co-ordinator. A co-ordinator is an absolute requirement in all out-of-state resident training programs.

DIVISION VIII
SERVICES

35.29(259) Scope of services.

35.29(1) All necessary vocational rehabilitation services, including counseling, physical restoration, training and placement are made available to eligible individuals to the extent necessary to achieve their vocational rehabilitation.

35.29(2) The division in selected instances assumes responsibility for providing short periods of medical care for acute conditions arising in the course of rehabilitation, which if not cared for, would constitute a hazard to the achievement of the rehabilitation objective because of the client's limited funds and the unavailability of free medical services.

35.29(3) *Duration of training.* Rehabilitation training is provided according to the actual needs of the individual case and is limited to the amount of such training necessary to fit the client for the vocational objective agreed upon.

35.30(259) Counseling and guidance.

35.30(1) Systematic counseling and guidance for the benefit of each individual is provided from acceptance to completion of all services included in the rehabilitation plan.

35.30(2) *Service reports.* Adequate reports are obtained at reasonable intervals from physicians, schools, hospitals, employers and other agencies providing services to rehabilitation clients and such reports become a part of the individual case files.

35.31(259) Placement.

35.31(1) The division recognizes that satisfactory employment is the objective of all services of preparation and that placement is an integral part of the rehabilitation program. The division assumes responsibility not only for preparing the disabled for jobs and training them in techniques in securing their own jobs, but also for accomplishing the actual placement, either directly or indirectly, of all eligible disabled individuals receiving rehabilitation services. Prompt selective placement following preparation is always sought.

35.31(2) Provision is made for a reasonable period of post placement follow-up to insure that placement has been successfully accomplished.

35.32(259) Working arrangements. The division co-operates with federal and other state agencies providing vocational rehabilitation or

similar services and written agreements providing for interagency co-operation may be entered into at the discretion of the state board.

DIVISION IX
FACILITIES

35.33(259) Types of facilities. It is the policy of the state division to use any type of public or private facility which is equipped to render the required services of diagnosis, physical registration, training and placement. Such facilities include public and private schools, colleges and universities, correspondence schools, tutors, agencies or individuals for personal adjustment training, business and industrial establishments for employment training, psychometric service agencies, physicians and dentists, hospitals, sanatoria and clinics, audiometric service centers, rehabilitation centers, occupational, physical and work therapists or agencies providing these services, hospitals and convalescent homes, nurses, prosthetic appliance dealers and other similar facilities that are adequately equipped to contribute to the rehabilitation of the disabled.

35.34(259) General standards. It is the policy of the division to use only those facilities which meet standards indicating that the services offered are of high quality. Indications of these standards are accreditation, approval or certification by a recognized agency if such exists; use of the facility by other public agencies; reputation and community standing; or investigative survey by the division to determine adequacy of professional and technical qualifications of personnel; quantity and quality of equipment and quarters; scope and completeness of services including guarantee of materials and workmanship in case of artificial appliances.

35.35(259) Standards for hospitals. Hospitals approved by the American College of Surgeons will be used when available. In areas where approved hospitals are not available a local hospital approved by the medical consultant may be used, but only in cases in which the physical condition to be corrected is one which does not present a serious problem and is the type that is commonly handled in that hospital by local physicians. To the extent that is practicable, preference will be given to hospitals with more than 100 beds with well developed surgical and specialty services which have submitted satisfactory reimbursable cost statements.

35.36(259) Standards for persons providing physical restoration services.

35.36(1) Persons providing physical restoration services must meet standards which insure services of high quality. Clients have free choice of professional persons meeting these standards to the extent that such is reasonable and appropriate.

35.36(2) Medical diagnosis and treatment are provided only by physicians licensed to practice medicine and surgery and who are otherwise qualified by training and experience to perform the specific services required. In instances where qualifications are questionable, decision as to the acceptability of a physician is made by the medical consultant. Whenever possible, well organized clinics offering services of high quality or recognized medical schools are used.

Standards for physical therapists and occupational therapists are those adopted by the Council on Medical Education and Hospitals of the American Medical Association. Therapists working under approved medical supervision in hospitals approved by the American College of Surgeons are assumed to have acceptable qualifications. When personnel of such qualifications are not available other experienced therapists may be used under medical supervision.

Standards for graduate nurses are those adopted by the state board of nursing examiners. Practical nurses are used only when absolutely necessary and when considered qualified as to education and experience in the opinion of local physicians.

Dental diagnosis and dental treatment are provided only by dentists who are licensed to practice dentistry and are otherwise qualified by training and experience to perform the specific dental services required.

35.36(3) The division determines which of the services required by a client are specialty services and such specialty services are rendered only by physicians found by the division to be specialists qualified to perform the particular services required.

35.36(4) It is the policy of the state division to select specialists according to the following standards and in descending order of preference:

a. Diplomats of an American board in a medical specialty.

b. Those eligible for certification as such diplomats.

c. If a physician of one of the first two groups is not available or is not the acceptable choice of the client, other doctors of medicine who are recognized as being qualified in the specialty may be selected by the medical consultant after conferring when necessary with members of the professional advisory committee or local physicians.

35.37(259) Standards for facilities providing specialized training or other services. The division selects its training agencies on the basis of their ability to supply the quality of training desired. The general practice of the division is to utilize the facilities of accredited or approved colleges, universities, trade and commercial schools for residence and correspondence training.

35.37(1) *Tutorial training.* The standards of selection of tutors will be based upon adequate training and experience in the field in which the instruction is to be given. Insofar as possible these tutors will meet the educational standards for instructors in the regular fields of education.

35.37(2) *On-the-job training.* Agencies selected for employment training must have personnel qualified with respect to personality, knowledge and skill in the technique of instruction, have adequate equipment and instructional material and be willing to make definite provision for a plan of graduated progress in the job to be learned according to an efficiently organized and supervised instructional schedule.

35.37(3) *Personal adjustment training.* In addition to other standards set for tutorial and on-the-job training, an important basis for selection of facilities for personal adjustment training is a sympathetic understanding of the personal adjustment needs of the individual and their importance to the client's total rehabilitation.

35.37(4) The standards for facilities used in purchasing testing services are: (*a*) That the service be secured from the psychological department of a recognized educational institution or counseling service, or (*b*) that the testing be performed by a competent psychologist or psychometrist qualified by adequate training and at least one year of successful experience. Test technicians must be practical in their interpretation of test results to the division and be willing to recognize that they are not employed to do direct counseling with the disabled since the counseling done by the division must be based on all diagnostic information including results of objective measurement.

35.37(5) *Determination of compliance with standards.* The division will use the following methods of determining compliance with standards: Careful surveys will be made when deemed necessary of all pertinent factors, including qualification of instructors or other personnel concerned, adequacy of quarters and instructional or other equipment, the use of well organized instructional schedules, the use of good materials and business integrity with the provision of conscientious complete service.

DIVISION X
ECONOMIC NEED

35.38(259) Establishment of need. The division establishes the client's economic need prior to providing physical restoration including prostheses, transportation (for other than diagnostic guidance or placement purposes), maintenance, occupational licenses, tools and equipment and training books and supplies except that financial need is only considered when providing maintenance for war-disabled civilians or civil employees of the United States.

In determining economic need the clients, or, in the case of minors, their parents, guardians or responsible relative, are required to make a specific declaration regarding all capital assets and income from any source that may be applied toward the cost of rehabilitation services except those of diagnosis, counseling, training and placement which are provided without regard to economic need.

It is considered desirable to secure an appraisal of the client's financial situation in every instance, however, in order to be certain that the client possesses the resources necessary to carry his part of the planned program through to completion. A properly signed financial inventory which certifies as to the total resources available and agrees to notify the division in event of significant change is required prior to the approval of any plan requesting the purchase of services and such inventory becomes a part of the individual's case file. If there is any doubt as to the accuracy of information submitted on the signed inventory, further investigation is made to determine the correctness of the data collected.

The following policies are observed in making determination of need based upon the findings:

35.38(1) All services requiring the determination of financial need are provided on the basis of supplementing the resources of the client or those responsible for him.

35.38(2) Personal savings, especially the income from the client's own earnings, are not required to be invested in the rehabilitation program to the extent that the individual's future security may be jeopardized.

35.38(3) Consideration will be given to the client's responsibility for the maintenance of his dependents and he will be expected to reserve sufficient funds to meet his family obligations and provide for their future care, education and medical expense.

35.38(4) Consideration will also be given to such factors as prior obligations as well as to the desirability of conserving the client's own resources for future rehabilitation purposes such as becoming established in business or providing himself with a business automobile required for his transportation or employment.

35.38(5) Income or resources which are considered must be real and should not include apparent assets that are actually liabilities and produce no income.

35.38(6) The income or resources should be available to the client, that is, actually on hand, free from prior obligations and ready when needed.

35.38(7) Income or resources up to a reasonable amount should be considered from the standpoint of its conservation and its maximum utilization to the long term interest of the client. Small casual earnings and unpredictable gifts of indeterminate value should not be counted as resources.

35.38(8) Financial aid from public assistance is disregarded as a resource except as it applies to maintenance.

35.38(9) Since the major and fundamental purpose of the rehabilitation program is the upbuilding and maintaining of attitudes of independence and self-reliance among disabled persons, every effort is made to avoid impoverishing the individual by exhausting his accumulated resources or requiring that he mortgage his future.

35.39(259) Standards for determining amount of supplementation.

35.39(1) The amount of financial supplementation that is required to meet the cost of necessary services in any individual rehabilitation plan requiring the establishment of need is determined in the following manner: (*a*) The total cost of the services to be provided is determined; (*b*) the net available resources of the client which may be used to apply toward the purchase of these services is calculated; (*c*) the division assumes that portion of the cost which is not covered by the client's available resources; (*d*) when it is not reasonable to expect any of the client's resources to be applied the total cost of the services is assumed by the division.

35.39(2) In providing maintenance, the dollar standard method of determining need is followed. The standard is changed as advisable to reflect changes in living costs and varies according to type and size of community, kind of training program and other factors affecting living standards. In no case, however, does the maximum maintenance allowance exceed $20 per week except that in cases where special diets, medicines or special transportation must be provided for severely disabled individuals or during a special training program, the maximum amounts in the dollar standard may be increased by 20 percent.

35.39(3) Goods and services provided are required to be of standard quality, avoiding both inferior and luxury types of purchases, and are required to be provided in such amount and at such time as will contribute most to the satisfactory consummation of the client's rehabilitation plan.

35.39(4) The cost of care during short periods of acute illness as set forth in 35.29(2) is paid for clients in financial need at the rates specified in the fee schedules. These amounts may be in addition to payments under the dollar standard.

35.39(5) The standards set forth in this rule are uniformly applied.

35.40(259) Resources of client. In determining the economic circumstances of the individual the division takes into consideration all consequential resources available to the individual, however derived, including any benefit to which the individual may be entitled by way of pension, compensation, insurance, services in kind or remuneration in connection with employment training. In appraising the income level of the individual, consideration is given to all factors above set forth.

35.41(259) Rules respecting capital assets. The general policy of the division (subject to the special provisions indicated above) with respect to the extent that capital assets not constituting current income may be disregarded in determining the economic circumstances of the individual is:

35.41(1) The "reasonable amount of capital assets" which may be disregarded in determining need for assistance is established as: (*a*) Any form of life insurance; (*b*) real property which consists mainly of a home for himself or dependents; (*c*) personal property in any amount needed to carry on his business or earn his livelihood, that is: Necessary stock and equipment and business automobile are exempt as are cash or liquid net assets up to $500 if client has no dependents or $1000 if client has dependents.

35.41(2) Capital assets representing the client's earnings from his own labor are given special consideration as are other factors connected with the client's long term responsibilities as set forth under 35.38(259).

DIVISION XI
PERSONNEL ADMINISTRATION

35.42(259) Methods and policies of selection and appointment. The personnel administration of the division is conducted in accordance with the standards and rules provided by state law. Acting within the scope of state personnel legislation currently in effect the board for vocational education selects and appoints all personnel upon recommendation of the director of the division and the executive officer of the board. This procedure applies also to promotions, thus insuring that no individual will be appointed or promoted except on the basis of fitness, merit and experience and unless it is believed that he possesses all the qualifications required for the position and otherwise merits the appointment or advancement. Demotions and discharges of professional workers are made according to the same procedure and in accordance with state personnel regulations currently in effect but authority is delegated to the director to adjust work assignments, re-establish territories, designate actual official residences or transfer employees within the division whenever such action, in his opinion, contributes to the efficiency of the division and is carried out in accord with state personnel regulations currently in effect. The state board for vocational education also delegates to the director the authority to immediately suspend any professional worker for cause or discharge any clerical worker for cause subject to provisions of state personnel legis-

lation currently in effect. The director reports in writing all such action to the executive officer and final action as to the termination or reinstatement of suspended professional workers rests with the board.

It is recognized that only the highest caliber of personnel should be engaged in molding the vocational future of the handicapped and therefore the education, experience, and personal qualifications of all professional workers are required to equal or exceed the highest standards required of professional employees in the state department of public instruction. The relative merits of all applicants are weighed and selection is made from among those available possessing the highest qualifications for specific positions. Applicants submit written statements of their education and experience to the executive officer through the director who personally interviews the applicants and investigates their records and qualifications. Transcripts of college credit, records of graduate study and copies of theses, dissertations or other professional writings and accomplishments are required to be submitted for review. The director reports the results of his interviews and investigations and makes recommendations to the executive officer who makes appointments with board approval. The board delegates authority to the director to investigate, select and employ clerical workers as needed to carry on the operating program of the division but requires that such action be in accord with accepted personnel regulations and be reported in writing to the executive officer. All appointments and promotions on the professional or clerical staff are considered to be on a probationary basis for the first year or to the extent consistent with state personnel regulations currently in effect.

35.43(259) Separation of permanent employees. No permanent employee engaged in the day-to-day administration of the program is discharged except for cause or for reasons of curtailment of work or lack of funds, and that in event of separation, he shall have the right of appeal through established procedure and opportunity for a fair hearing consistent with personnel legislation currently in effect.

35.44(259) Participation in political activity. Personnel employed in the day-to-day administration of the program will be prohibited from participation in political activity as required by the federal government except that an employee shall have the right to express his views and cast his vote.

35.45(259) Personnel qualifications. The qualifications here stated are the minimum to be applied in the appointment of new employees and it is the policy of the board to secure whenever possible persons whose qualifications exceed those established as the minimum in an effort to engage only the best prepared and highest caliber of individuals to meet the challenge of rehabilitating the handicapped.

The following minimum qualifications are required of junior vocational counselors or of any employee appointed on a temporary, probationary or permanent basis to do direct interviewing and vocational diagnosis, counseling and plan building:

35.45(1) *Personal qualifications.*

a. Physical stamina. Physical ability and energy required to meet the rigorous duties of rehabilitation service.

b. Initiative, resourcefulness and persistence. Aggressiveness in originating, planning, and carrying out an undertaking; the ability to find the ways and means of accomplishing it; and the tenacity in following it through to completion.

c. Moral standards. High moral standards, business integrity and sympathetic understanding of handicapped persons.

d. Adaptability. The capacity to get along with others whatever their social or economic status, to understand the viewpoint of others and to discuss matters connected with vocational rehabilitation with an open mind and without becoming argumentative.

e. Maturity of judgment. Good common sense in meeting situations, handling people and in helping the disabled to lay sound plans for carrying through logical rehabilitation programs to successful conclusion.

f. Emotional stability. Free from peculiarities of temperament or behavior and from timidity and shyness in meeting and dealing with people.

g. A good command of English. Ability to speak and write with a reasonable degree of correctness and to express himself clearly.

h. Co-operativeness. Willingness to work harmoniously with his co-workers and to carry out the details of his work according to instructions and in line with approved policies.

35.45(2) *Educational qualifications.*

a. A minimum of formal education as represented by graduation from a four-year course in an accredited college or university or four or more years of such training satisfactorily completed above graduation from high school.

b. Preference is given to persons whose major educational preparation has been in technical fields related to vocational rehabilitation, such as vocational guidance, personnel or industrial management, educational administration, specialized social work or applied psychology.

35.45(3) *Experience qualifications.*

a. A minimum of three years recent, full-time, paid experience during which the individual has demonstrated personal qualities as indicated above.

b. Other factors being equal preference is given individuals having two or more years experience in one or a combination of the following fields:

(1) Full-time vocational counseling and guidance work with adults or vocational rehabilitation work involving counseling, training, physical restoration and placement of disabled persons.

(2) Selection, training, employee counseling, and vocational adjustment of employees in a commercial or industrial concern or public agency employing 50 or more persons.

(3) Public or quasi-public employment service with major responsibility for employee placement and employer contacts through actual field work.

(4) Instructor in skilled trades or vocational courses or a supervisor of such training.

(5) Workmen's compensation referee or claims adjudication officer or job adjustment specialist.

Junior vocational rehabilitation counselor. The above statement of minimum personal, educational and experience qualifications applies to the junior vocational rehabilitation counselor. An employee is classified as a junior vocational rehabilitation counselor during a period of temporary or probationary employment, thereafter, if his services are satisfactory, he is added to the permanent professional staff as counselor unless promoted to an advanced classification by approved procedures. Counselors whose services are otherwise satisfactory but who are unable to meet the minimum production standard for full-time counselors employed by the division are retained as junior vocational rehabilitation counselors or are reduced to that status upon the recommendation of the director, who will take into consideration the quality of work being performed, types of difficult cases being served, and other factors affecting production. This policy will not be applied in such a manner that will discourage quality work or encourage the acceptance of "easy" cases.

Vocational rehabilitation counselor. The minimum qualifications listed above apply to this position and the qualities required must have been demonstrated by successfully passing the probationary period of employment and meeting quantitative and qualitative standards of production.

Senior vocational rehabilitation counselor. In addition to the qualifications of counselor, the senior vocational rehabilitation counselor must hold a master's degree or other technical experience or training in a specialized area of service connected with some phase of rehabilitation and have demonstrated by five or more years of employment to be qualified for handling specialty services to the disabled within the rehabilitation program.

District supervisor. In addition to the minimum qualifications of counselor, the district supervisor must have demonstrated by two or more years additional case work or technical experience in vocational rehabilitation or by one year of such experience and additional specialized training to possess the abilities to perform the duties outlined for this position. Special consideration is given to qualities shown by outstanding case work and the ability to train other counselors and supervise and evaluate their work to the end that the highest quality and quantity of rehabilitation services are obtained.

State medical consultant and district medical consultant. Graduation from a school of medicine approved by the Council on Medical Education and Hospitals of the American Medical Association, licensed to practice medicine and surgery in the state, at least three years of resident or graduate training or experience in a medical field appropriate to physical restoration, and held in high regard by his fellow physicians, the state department of health and the Iowa Medical Society.

Assistant state director. In addition to the minimum personal and educational qualifications of the counselor, the assistant state director must possess a master's degree or not less than five years of formal training above high school graduation. He shall possess additional personal qualifications as follows:

35.45(4) *Leadership ability.* The ability to enlist, organize and use effectively the co-operative efforts of others including co-workers, agencies, groups and individuals and to retain their loyalty.

35.45(5) *Planning ability.* The ability to anticipate, analyze and lay plans for developing the state-wide service to rehabilitate the handicapped.

35.45(6) *Administrative and supervisory ability.* The ability to develop organization and manage personnel efficiently; the ability to train subordinates in their duties, to analyze and evaluate their work, to effectuate plans, and to devise and apply remedial measures when necessary.

These qualities must have been demonstrated by at least five years of technical experience in civilian vocational rehabilitation employment, including two years in an administrative or supervisory capacity. A person who has qualified for and successfully held the position of district supervisor for three or more years is considered to have met the educational and experience requirements for this position.

State director. Same as for assistant state director and in addition must possess the ability to manage funds, maintain financial and statistical records, account for state property, conduct administrative details according to established policy and promote the general rehabilitation program.

Chief fiscal officer. Because of the responsibilities entailed in this position, high personal as well as educational and experience qualifications are required. The chief fiscal officer must be at least 21 years of age and qualified to serve as a notary public; must be of good moral character and must have demonstrated high standards of business integrity throughout his business or professional life; must have completed high school training with additional training at the university or business

college level in mathematics or accounting and must have excelled in such activity and in addition must have had at least four years of successful business or office experience, at least two years of which must have been in the handling of financial accounts. Preference is given to persons who are four-year college graduates and qualify as certified public accountants or to those whose experience has been closely related to the rehabilitation division in auditing or managing financial accounts.

Clerical staff assistant. This clerical position requires the ability to co-ordinate office activities, manage inventories, case files and record systems. The individual must be capable of being a personal secretary or administrative aid and to take special assignments in supervising clerical personnel or in performing the more responsible duties in the various departments. The personal qualifications for this position are: (*a*) Strong personality; (*b*) initiative; (*c*) emotional stability; (*d*) good judgment; and (*e*) interest in the total development of the program. In addition to possessing the educational and experience qualifications of a secretary, the clerical staff assistant must have demonstrated the required abilities by actual employment of not less than one year.

Secretary. Minimum educational qualifications consist of graduation from a four-year high school with additional business training necessary to meet above average requirement in both speed and accuracy in the fields of typing, shorthand, business English and related subjects. In addition a secretary must have demonstrated proficiency by at least one year of successful employment in secretarial or stenographic work. Personal characteristics required are: (*a*) Initiative; (*b*) industry; (*c*) neatness; (*d*) accuracy; (*e*) pleasing personality; (*f*) good judgment and (*g*) good health.

Stenographer. Minimum educational qualifications consist of graduation from a four-year high school with additional business training necessary to meet at least average requirements in both speed and accuracy in the fields of typing, shorthand, business English and related subjects. In addition a stenographer must have demonstrated proficiency by at least six months of successful employment in secretarial or stenographic work. Personal characteristics required are: (*a*) Initiative; (*b*) industry; (*c*) neatness; (*d*) accuracy; (*e*) pleasing personality; (*f*) good judgment and (*g*) good health.

Statistical clerk. The minimum educational, experience and personal qualifications for this position are those set forth for the position of stenographer and in addition the individual must possess sufficient ability in handling mathematical and statistical problems to handle case accounting procedures and prepare analyses of statistical data.

Bookkeeper. The minimum educational, experience and personal qualifications for this position are those set forth for the position of stenographer and in addition the individual must have specialized in bookkeeping or accounting procedures and have demonstrated proficiency in handling routine financial accounts.

Junior stenographer. Minimum educational qualifications consist of graduation from a four-year high school with additional business training necessary to meet at least average requirements in both speed and accuracy in the fields of typing, shorthand, business English and related subjects. Personal characteristics required are: (*a*) Initiative; (*b*) industry; (*c*) neatness; (*d*) accuracy; (*e*) pleasing personality; (*f*) good judgment and (*g*) good health.

Typist. Minimum educational qualifications consist of graduation from a four-year high school with additional training whenever necessary to meet average requirements in both typing speed and accuracy. In addition the personal qualifications of a stenographer are required.

35.46(259) Vacations and leaves for illness and military service. Insofar as is consistent with state personnel regulations currently in effect the division will allow all employees an annual vacation with pay for one week after the first year of employment and two weeks after two years or more of employment. An employee is not entitled to a portion of his vacation as the vacation is only due when fully earned but the director may at his discretion adjust vacation periods to permit them to fall during the usual vacation months. Short leaves of absence due to personal illness or serious illness or death in the employee's immediate family will be granted by the director upon request as conditions seem to warrant. Permanent employees on the professional or clerical staff may be granted a leave of absence with pay of not to exceed 30 days per year when necessary by reason of sickness or injury. The question of need is determined by the director and he may request substantiating medical information. Unused portions of such sick leave may be accumulated for three consecutive years.

Leaves for military service will be granted in accordance with state law.

DIVISION XII
ADMINISTRATIVE ORGANIZATION
(Internal Operations)

DIVISION XIII
FISCAL ADMINISTRATION
(Internal Operations)

DIVISION XIV
MAXIMUM FEES

35.47(259) Training.

35.47(1) In no case is the amount paid a training facility in excess of the rate published and in the case of facilities not having published rates, the amount paid the facility does not exceed the amount paid to the facility by other public agencies for similar services.

35.47(2) When facilities are used which have no published rates or from which other public agencies do not purchase similar services, such as on-the-job training, tuition fees will be established by agreement after ascertaining the comprehensiveness of instruction, the adequacy of equipment, the personal and technical qualifications of instructors and other factors which contribute to the success of such programs. In establishing tuition fees consideration will be given to the productive value of the trainee's services to the employer, the amount of wages which the employer will be required to pay the trainee, the amount and type of supervision required of the employer and the length of the training program. Fees may be graduated downward as training progresses but in no case will the division pay an amount in excess of $20 per week tuition for on-the-job training for two dollars and a half per clock hour for special tutorial instruction. Travel costs of tutors, when required, may be reimbursed in accordance with applicable state regulations.

35.47(3) The division will maintain such information as is necessary to justify the rates of payment made to training facilities.

35.48(259) Physical restoration services (other than hospitalization and prosthetic devices) and medical examinations.

35.48(1) The division has established fee schedules which indicate the maximum payments that may be made for physical restoration services and medical examinations. These maximum fees do not exceed those paid by other public agencies operating in the state for such services or examinations.

35.48(2) When medical personnel or facilities located in another state are utilized, the rates of payment of the vocational rehabilitation division of the other state will be observed.

35.48(3) The division maintains such information as is necessary to justify the rates of payment made for physical restoration services and medical examinations.

35.49(259) Hospitalization.

35.49(1) Payments made for days of hospital care are made at inclusive per diem rates as defined in the regulations, and shall not exceed the average per diem cost for hospitalization as computed by the reimbursable cost method promulgated by the federal director, except that services at the Iowa state university hospitals may be purchased at rates not in excess of the average of per diem rates established by all hospitals being used by the Iowa division.

35.49(2) The reasonableness of the cost of such items as blood donors, X rays, anesthesia, appliances, casts, drugs and supplies, not purchased or provided by the hospital, for which the hospital has made no expenditures during the accounting period and which, therefore, are not covered by the inclusive rates, will be determined by the charges made for such services to the general public and will not exceed the amount paid by other public agencies for other services.

35.50(259) Prosthetic devices.

35.50(1) In no case is the amount paid for prosthetic devices in excess of the published rates for such devices, or, if there are no published rates, the amount paid for such devices does not exceed the amount generally paid for such devices by other public agencies operating in the state.

35.50(2) The division maintains information necessary to justify the rates of payment for prosthetic devices.

35.51(259) Travel.

35.51(1) All travel expenditures will be made in accordance with applicable state regulation.

35.51(2) The authority for all official travel of a duly constituted official of the division is issued by the director. He delegates authority to control the official travel of all members of the operating staff to the assistant director. Travel within a district is under the immediate supervision of the district supervisor and authority for district personnel to travel outside of their district is issued by the assistant director on specific request. All out-of-state travel must be recommended by the director and approved by the executive officer of the board and by the executive council of the state.

35.51(3) Official travel will not be allowed for expenses within the official station of an officer or employee except for necessary transportation expenses other than between home and office or place of duty.

PUBLIC SAFETY DEPARTMENT

TITLE I

ADMINISTRATION

CHAPTER 1

MOTOR VEHICLE LIGHTING DEVICES AND OTHER SAFETY EQUIPMENT

1.1(321) Submittal procedure and requirements. The following procedures shall be followed when any equipment or device is submitted for approval:

1.1(1) *Original equipment.*

a. The vehicle manufacturer, or his supplier, shall submit to the American Association of Motor Vehicle Administrators (AAMVA), a written request for approval of the lamp or device; or

b. The vehicle manufacturer, or his supplier, shall submit to the commissioner of public safety a written request for approval of the lamp or device. With the request the following shall be supplied:

(1) Identification of the make and model, or models, of vehicle for which the lamp or device is designed.

(2) A test report, from a recognized testing laboratory approved by the commissioner, showing compliance with the appropriate specifications and regulations as specified herein.

In cases where there may be delays in obtaining completed test reports from approved laboratories, the manufacturer may submit with his request for approval a test report from his own laboratory indicating compliance with appropriate specifications. In such cases, a temporary certificate of conditional approval will be issued subject to cancellation without further hearing if the applicant fails to supply the required test report from an approved laboratory within 90 days after issuance of the certificate.

1.1(2) *"After-market" equipment.*

a. The manufacturer or his representative shall submit to the American Association of Motor Vehicle Administrators (AAMVA), a written request for approval of the lamp or device; or

b. The manufacturer or his representative shall submit to the commissioner of public safety, a written request for approval of the lamp or device. With the request the following shall be supplied:

(1) A test report, from a recognized testing laboratory approved by the commissioner, showing compliance with the appropriate specifications and regulations specified herein.

(2) A set of installation or mounting instructions when applicable.

(3) A set of aiming instructions when applicable.

1.1(3) *Safety glass.* Requests for approval of safety glass shall be submitted in accordance with the requirements set forth above for original equipment items, except that it will not be necessary to supply information as to make and model of vehicle on which the glass is to be installed.

1.1(4) *Listing of approved motor vehicle equipment.* Items of equipment will be dropped from the "List of Approved Motor Vehicle Equipment" five years from January 1 following the date of approval, unless the manufacturer requests further listing, in which case he shall submit a test report or other proof that the item as then being manufactured meets the then current specifications.

1.1(5) *Specifications for lamps and devices.*

a. General.

(1) All lamps and lighting devices, and parts thereof, shall comply with the "SAE Standards" and "SAE Recommended Practices" appearing in the then current edition of the "SAE Handbook", published by the Society of Automotive Engineers, Inc., 29 West 39th Street, New York 18, New York, which are applicable to the lamp or device being submitted for approval, provided such standards are consistent with Iowa statutory requirements.

(2) The interstate commerce commission standards for reflector flares, towing devices, and saddle mounts.

(3) The current American Standards Association specifications for safety glass.

(4) Additional specifications may be adopted by the department whenever the before mentioned specifications are deemed inadequate or inapplicable to a particular device.

b. Model designation. Each individual device or equipment shall have a model designation. Devices or equipment which are substantially different in optical or mechanical construction, even though such devices or equipment may serve the same functions, shall bear distinctive model designations.

c. Identification.

(1) The device or equipment shall be marked with the trade-mark or name and the model designation in letters and numerals at least ⅛-inch in height. The manufacturer's initials will be acceptable as the name. The approval markings shall be readily visible and legible from the outside of the device or equipment when it is properly mounted on the vehicle; except that required markings on built-in headlamp and auxiliary lamp subbodies using sealed beam units, and on built-in turn signal operating units, may be on the inside. Markings other than those which are required may be of any size or in any location. The required markings shall be permanently die-stamped or molded in both the body and lens except that the body markings may be marked by a suitable decalcomania protected from abrasion and weathering if it is not feasible to die-stamp or mold them on the body. In such cases the lens markings shall still be molded in the lens and shall

be visible from the outside. Safety glass shall be marked according to current specifications of the American Standards Association.

(2) No raised or indented markings or identification shall be so placed as to interfere with the proper seating of surfaces where a tight seal is desirable.

1.1(6) *Testing samples.* The commissioner may require samples or further testing at the manufacturers expense of any device for which approval has been requested.

[Filed June 30, 1961; amended June 14, 1972]

CHAPTER 2
EMERGENCY EQUIPMENT ON PRIVATELY OWNED MOTOR VEHICLES AND THE ISSUANCE OF PERMITS FOR THE USE THEREOF

2.1(321) Definitions.

2.1(1) Authorized emergency vehicle defined by section 321.1(26).

2.1(2) *Ambulance.* A vehicle which is designed and used primarily for the conveyance of injured or ill persons which is acceptable as such by the commissioner of the department of public safety.

2.1(3) *Rescue vehicle.* A vehicle used to extricate or to assist persons in dangerous situations involving their bodily welfare.

2.1(4) *Disaster vehicle.* Same as rescue vehicle.

2.1(5) *Emergency equipment.* Warning lights, sirens and any and all types of equipment or devices which can be mounted on or carried in a motor vehicle which is designed for or may be used to warn persons or other motorists of the approach of or the presence of the motor vehicle which is so equipped.

2.2(321) Flashing lights. The use of flashing lights on motor vehicles is prohibited, except as a means of indicating a right or left turn or intention of stopping or on the following enumerated vehicles:

2.2(1) *Authorized emergency vehicles.*

2.2(2) Rural mail carriers may use a flashing white or amber, or any shade of color between white or amber, dome lights on their vehicles when outside the corporate limits of any city or town when stopping on or near the highway while in the process of delivering mail. No permit is required for this type of light to be used by a rural mail carrier.

2.2(3) Volunteer firemen may display and use a flashing blue light on their privately owned vehicles. However, a permit must be obtained from the commissioner of public safety before such display or use is authorized.

2.3(321) Red lights on the front of motor vehicles. No person shall operate or move any motor vehicle or equipment upon any highway which has any lamp or device thereon which displays or reflects a red light visible from directly in front of such vehicle. This provision shall not apply to authorized emergency vehicles.

2.4(321) Government-owned motor vehicles. All motor vehicles which are owned or operated by the federal, state, county or municipal governments may be classified as authorized emergency vehicles by such governmental agency and said agencies do not need to procure a permit from this department to equip and use emergency equipment on such vehicles.

2.5(321) Privately owned motor vehicles. All motor vehicles which are privately owned must be issued a permit from the commissioner of public safety before such privately owned vehicles may be equipped with and use emergency equipment.

2.5(1) The commissioner is authorized to designate a privately owned ambulance, rescue or disaster vehicle as an authorized emergency vehicle and to issue a certificate of designation therefor, upon written request being made on forms provided by the department and a showing of necessity for such designation.

2.5(2) The commissioner may revoke such certificate of designation upon a showing of abuse thereof.

2.6(321) Authorization to sheriffs and their deputies. Sheriffs and their authorized, full-time, compensated deputies may be given permits to operate their privately owned vehicles as rescue or disaster vehicles.

2.7(321) Authorization to chiefs of police and town marshals. Chiefs of police, town marshals or chiefs of organized, full-time, compensated fire departments may obtain a permit for the use of emergency equipment on their privately owned vehicles when the department of public safety determines that the public welfare calls for the use of such equipment and when the permit is requested by the city council and signed by the mayor of the city or town in which the applicant resides.

2.8(321) Applications which will be considered. Only those vehicles which are specifically mentioned herein, or by law, or those vehicles which meet the requirements as set out herein will be considered as subjects for which a permit will be issued.

2.9(321) Types of emergency equipment which is subject to approval. When application is made for a permit to operate any emergency equipment consisting of lighting devices, the applicant will not receive consideration for a permit unless the light to be used is on the commissioner's list of approved lighting devices.

2.10(321) Application form. An application for designation of a privately owned motor vehicle as an authorized emergency vehicle shall be made on the following form. These forms may be obtained from the commissioner's office.

APPROVED BY: _____ ON: _____

Application for Designation of Vehicle as "Authorized Emergency Vehicle"
(Complete in Duplicate)

TO THE COMMISSIONER OF PUBLIC SAFETY OF THE STATE OF IOWA:

Application is hereby made for designation of the vehicle, below described, as an "authorized emergency vehicle":

Your County _____

(1) Your Name _____ Your Age _____
Regular Occupation _____ Address of Owner _____

(2) Description of vehicle: Make _____ Year _____ Type _____
Registration No. _____ Gross Weight _____ Serial No. _____

(3) The undersigned has insurance coverages with _____
_____ Insurance Co. of _____ and as covered by _____ liability coverage. Check if no coverage ( ).

(4) Exact Factory Description, (and specify whether or not Flasher type light), of the emergency equipment to be used _____

_____

Siren type description _____

(5) State if vehicle is to be used as an ambulance, rescue or disaster vehicle _____

_____

Specify in detail the full, and only uses of the vehicle _____

_____

_____

(6) State the full names, ages, and addresses, plus occupations of all persons who will operate this vehicle at any time. _____

_____

_____

I CERTIFY THAT THE INFORMATION ABOVE PROVIDED IS A FULL DISCLOSURE, AND IS TRUE AND CORRECT. AND I FULLY UNDERSTAND THAT ANY NONCOMPLIANCE WITH THE LAW, OR MISREPRESENTATION IN THIS APPLICATION MAY RESULT IN REVOCATION OF THIS PERMIT AND PENALTIES AS THE LAW PROVIDES.

STATE OF IOWA }
} SS _____
COUNTY OF _____ } Owner of Vehicle

Subscribed and sworn to before me, by owner of vehicle on this _____ day of _____, 19____.

_____
Notary Public

Said application must be submitted in duplicate, must be notarized, filled out completely, and must be accompanied by two photographs of the vehicle. The photographs should be no less than three inches by three inches and show a side and a front view of the vehicle.

2.11(321) Mayor's certificate of necessity.

The following "Certificate" must be completed in duplicate and accompany the application for all permits which are requested for the use of emergency equipment on the privately owned motor vehicles of chiefs of police or Iowa marshals.

CERTIFICATE

I, _____, being a Mayor of _____, Iowa, do hereby certify that the City Council, of which I am presently Mayor, has by resolution, duly executed, requested the State Department of Public Safety to issue a vehicular emergency permit to _____

_____

who is a duly authorized, full time, fully compensated peace officer, engaged in law enforcement work in our city or town.

It is understood and agreed that any permit the Department of Public Safety may issue on the basis of the authorization of this certificate, is granted subject to the provisions of this certificate, and subject to the conditions, as represented, continuing. Any change in the conditions or provisions as represented by this certificate, or by the permit application form, as executed, will terminate, by force of law, the permissions granted by the permit.

_____

Mayor of _____, Iowa

[Filed November 13, 1962]

CHAPTER 3
FLASHING LIGHTS AND WARNING DEVICES ON SLOW-MOVING VEHICLES

3.1(321) "Slow-moving vehicle" means any farm tractor, implement of husbandry, road construction or maintenance vehicle, road grader and any other vehicle principally designed for use off the highway which when operated on the highway, is operated on the highway at a speed of 25 miles per hour or less.

3.2(321) Required equipment. Slow-moving vehicles shall be equipped with and display at least one flashing light meeting the specifications of A.S.A.E. S279.4, and with a slow-moving vehicle warning device meeting the specification of A.S.A.E. S276.1.

3.2(1) *Lamps.*

a. There shall be at least one amber flashing warning lamp, conforming to SAE J974, Flashing Warning Lamp for Farm and Light Industrial Equipment, visible from both front and rear, and at least 42 inches (1067 mm) high as measured to the lamp axis. When more than one lamp is used, they shall flash in unison, be mounted at the same level and be as widely spaced as practicable.

b. The lamp shall comply in both the forward and rearward direction with the candlepower requirements of a Class "A" turn signal, SAE J575, Table 2. In addition, the lamp shall project at least four c.p. on both sides at 90° to the lamp axis.

c. The color of the light from the warning lamp shall be amber in accordance with SAE J578.

d. The lamp shall be flashed at least 60 f.p.m. (flashes per minute) but not more than 120 f.p.m. when it is operating.

e. The effective projected illuminated area measured on a plane at right angles to the axis of the lamp shall be not less than 12 square inches.

3.2(2) *Warning device.* The slow-moving vehicle warning device shall be mounted point up in a plane perpendicular to the direction of travel. It shall be placed at the rear of the vehicle, unobscured, and at least two feet above the ground measured from the lower edge of the emblem.

[Filed February 22, 1972]

CHAPTER 4
WEIGHT EQUALIZING HITCH AND SWAY CONTROL DEVICES FOR TRAILERS

4.1(321) Definitions.

4.1(1) *Weight equalizing hitch or weight distributing hitch.* A mechanical device that connects the trailer to the towing vehicle and by means of leverage applied on both the trailer and towing vehicle structures or axles, distributes the imposed vehicle's load of the hitch and coupling connection between structures of towing vehicle and trailer when a towing vehicle frame is used, and between the rear axle of the towing vehicle and the trailer structure when an axle mount is used. The towing vehicle thus loaded retains a level position with respect to the road.

4.1(2) *Sway control device.* Equipment which is mounted on the trailer or a part of the hitch, used to limit sway from one side to another.

4.1(3) *Fifth wheel type connection.* A coupling between a trailer and the towing vehicle in which a portion of the weight of the trailer is carried on the towing vehicle of or forward of, the rear axle of the towing vehicle.

4.2(321) Weight equalizing hitches. The following types of weight equalizing hitches are hereby approved for use with trailers.

4.2(1) Weight equalizing hitches which apply leverage by means of spring bars.

4.2(2) Weight equalizing hitches which apply leverage by means of coil springs.

4.2(3) Weight equalizing hitches which apply leverage by means of torsional bars.

4.2(4) Fifth wheel types of connection.

4.3(321) Sway control devices. The following types of sway control devices are hereby approved for use with trailers:

4.3(1) Devices employing friction to limit sidesway.

4.3(2) Devices employing hydraulics to limit sidesway.

4.3(3) Devices employing torsional bars to limit sidesway.

4.3(4) Devices employing mechanical cams to limit sidesway.

4.3(5) Devices employing electronics to limit sidesway.

4.3(6) Fifth wheel types of connection.

TITLE II
LICENSES, PERMITS AND CERTIFICATES

CHAPTER 10
PLACE OF BUSINESS REQUIREMENTS FOR DEALERS

10.1(322) "Designated location" means a building actually occupied, easily accessible to the public, and wherein the public may contact the owner or operator at all reasonable times.

10.2(322) "Adequate facilities shall be maintained for displaying cars" means a suitable space in a building reserved for display pur-

poses where automobiles may be viewed by prospective buyers under conditions favorable to health and safety, meaning clean air, dry and safe flooring, well-lighted, and free from obstacles, equipment or machinery, etc.

10.3(322) "Reconditioning and repairing" means a suitable repair shop separate from display room, with space to repair and recondition one or more automobiles at the same time, equipped with ample tools for making these repairs.

10.4(322) New and used dealer plates. Whenever an Iowa dealer operates a motor vehicle that is not currently registered in Iowa on the public highway under the authority of section 321.57, such motor vehicle shall at all times display dealer plates provided by the department which identify the motor vehicle as a "new car" or a "used car" as the case may be. "Used car" dealer plates may only be displayed on a used motor vehicle as defined in section 322.2(6) by dealers licensed by the department to sell used motor vehicles. "New car" dealer plates may only be displayed on new motor vehicles by dealers licensed by the department to sell such make of new motor vehicles.

10.5(322) Identification sticker. Whenever an Iowa dealer obtains title to a foreign registered motor vehicle under the authority of section 321.48(2), and holds such motor vehicle for resale without obtaining a current Iowa registration; there shall be displayed upon such motor vehicle at all times an official identification sticker furnished by the department certifying the identity of the motor vehicle, the state of previous registration, and that it is a used car as defined by section 322.2(6). Such sticker shall be obtained from the county treasurer by the dealer at the same time the Iowa title is obtained, and the dealer shall immediately fasten the sticker securely to the inside lower right corner of the windshield of the motor vehicle. The sticker shall remain displayed thereon until said motor vehicle is sold at retail and a regular Iowa registration has been applied for as provided by law.

10.6(322) Salesmen.

10.6(1) No motor vehicle dealer shall act as a salesman for any other motor vehicle dealer.

10.6(2) No unlicensed person employed as a salesman of motor vehicles by a licensed new or used motor vehicle dealer shall act as a salesman, or represent or imply, either directly or indirectly, that he is a salesman for any other new or used motor vehicle dealer.

This rule is intended to implement section 322.3(3) of the Code.

[Filed December 19, 1956; amended November 26, 1963]

CHAPTER 11
TRANSFER OF OWNERSHIP OF A REGISTERED MOTOR VEHICLE

11.1(321) The transfer of ownership of a registered vehicle which has been repossessed may be effected without obtaining the registered owner's signature on the notice or application for transfer appearing on the reverse side of the certificate of registration, provided that the mortgage or conditional sales contract under which such repossession was had, has been filed in the county recorder's office of the county in which such notice or application for transfer is made, and provided further that a repossession affidavit together with the original mortgage or conditional sales contract, or a certified or photostatic copy thereof, is filed with the county treasurer of said county. Such repossession affidavit shall be in substantially the following form:

"AFFIDAVIT OF REPOSSESSION

State of Iowa, ...County, ss.
I, ... ,Being an Officer of the Firm of ..... .,located at..... ,Iowa, on oath depose and say that the motor vehicle described as follows: Make ..... Model.....Year..... Style.....Motor No. ..... Factory No..... Registration No..... for 19...., which was sold ..... of....., Iowa, as per our
Conditional Sales Con.
Chattel Mortgage
and recorded in County of ..... in File No ..... Receipt No.....has been repossessed by said ..... for failure of the purchaser to comply with the conditions as set forth in said contract (copy attached), specifically giving the holder thereof the right to repossession under conditions of such contract.

Signed .....
For .....

Subscribed and sworn to before me by said... ....., this.....day of ..... 19....
Notary Public ..... "
(Seal)

Vehicles which have been repossessed by a finance company must first be transferred to such company before any transfer of ownership may be made to an individual purchaser or dealer. The ownership of a vehicle which has not been registered for the current year and which has not been stored in accordance with the provisions of law, cannot be transferred under the procedure set forth herein until such time as it has been currently and properly registered in the name of its registered owner.

11.2(321) The ownership of a vehicle which has been properly stored, in accordance with the provisions of chapter 321 of the Code, may be transferred to a purchaser without being registered for the year in which such transfer is made.

11.3(321) The ownership of a registered vehicle may be transferred on the previous year's registration certificate by its individual owner to a licensed dealer during the month of January.

11.4(321) The ownership of a registered truck, truck tractor, road tractor, trailer or semitrailer may not be transferred after June 30 in any year unless the annual registration fee for such vehicle has been paid in full for that year.

11.5(321) A new and unregistered vehicle purchased from a dealer in another state who is authorized by such state to sell such vehicle unregistered, may be registered in Iowa if the applicant for registration presents to the county treasurer or to the department a certified copy of the dealer's printed invoice together with an affidavit showing such dealer to be authorized to sell such vehicle as a new unregistered vehicle in his home state.

11.6(321) When an Iowa registration certificate or card shows the owner of the registered vehicle to have an out-of-state address, the county treasurer before transferring the ownership of such vehicle to a purchaser shall require the surrender of the Iowa registration certificate or card and in addition thereto shall require the purchaser to file an original or certified copy of a bill of sale showing ownership of such vehicle to be in him.

11.7(321) The owner of a house trailer which is not currently registered may register such vehicle at any time during the calendar year on a pro rata registration fee upon filing with the county treasurer an affidavit, duly sworn to and acknowledged, in which the owner states that such vehicle has been actually used for dwelling purposes for more than six months during the preceding calendar year and that such vehicle has not been moved upon the highways of this state at any time during the current calendar year. In the absence of a showing in said affidavit that the sales tax or use tax on such vehicle has been paid, the county treasurer shall require payment of the Iowa use tax before registering such vehicle.

11.8(321) All vehicle registration plates or number plates issued by a county treasurer shall be issued by him in numerical sequence.

11.9(321) Where the ownership of a vehicle is transferred by a peace officer's bill of sale or by an order of court, and such vehicle is not currently registered in Iowa, the registration fee for such vehicle shall be computed in accordance with the following rules:

11.9(1) When ordered confiscated or forfeited by a court under a judgment of forfeiture, the fee shall be on a pro rata basis from the date of the court's order;

11.9(2) When sold on a peace officer's bill of sale as an unclaimed stolen, embezzled or abandoned vehicle, or as a vehicle seized under the provisions of section 321.84, the fee shall be on a pro rata basis from the date of such sale;

11.9(3) When sold or transferred under a judgment or order entered by a court in a civil action or proceeding, the fee shall be the full annual registration fee plus all delinquencies and accrued penalties to the date on which registration of the vehicle is completed.

11.10(321) Application for the designation of a vehicle as "special mobile equipment" may be made by the owner or lessee of such vehicle, provided such vehicle is only incidentally operated or moved over the highways of this state exclusively by such owner or lessee or his employees, and provided further that such "special mobile equipment" is permanently mounted on such vehicle. Such application may only be made to the motor vehicle registration division of this department, and if approved by the director of said division, special identifying plates bearing a number and the words "Special Mobile Equipment" will be issued without fee for such vehicle together with a certificate of designation and identification. Such special plates shall not be transferable from person to person nor from vehicle to vehicle and shall be securely attached to such vehicle at all times when it is being moved over the highways. Such certificate of designation and identification shall be in the immediate possession of the operator of such vehicle whenever it is being operated or moved over the highways.

The owner or lessee of any vehicle moving "special mobile equipment" which is not permanently mounted on such vehicle must apply for and receive a regular registration certificate and registration plates for such vehicle and pay the appropriate fee therefor. The appropriate registration fee for such vehicle shall be computed on the gross weight of the vehicle less the weight of the "special mobile equipment."

11.11(321) A certificate of designation issued for an authorized emergency vehicle shall expire at midnight on the thirty-first day of December in the year in which it was issued unless sooner revoked by the commissioner upon a showing of abuse thereof.

11.12(321) The notice to the county treasurer of the transfer of ownership of any registered vehicle shall be on the reverse side of the certificate of registration for such vehicle, and shall be in substantially the following form:

"BILL OF SALE ..... (Year) APPLICATION FOR TRANSFER STATE OF IOWA, ... COUNTY, ss:
We being first duly sworn on our oaths state that ....., whose address is .....Street, City of..... and County of ....., Iowa, purchased the vehicle described on the reverse side hereof from ..... on the.....day of ....., 19....
Application is hereby made for transfer of said vehicle to the purchaser.

.....Purchaser
.....Seller

I certify that the foregoing affidavit was fully completed, subscribed and sworn to before me on the.....day of ....., 19...., and I FURTHER CERTIFY THAT THE AFFIANTS SIGNED THE SAME IN THE PRESENCE OF EACH OTHER.

.....
Notary Public in and for said County and State.

Receipt No. ....."

Appearing vertically on the right-hand side of said form are the words, "A penalty of five dollars accrues for failure to complete transfer within five days from date of sale."

Appearing vertically on the left-hand side of said form are the words, "Forward with remittance of 50 cents to county treasurer."

11.13(321) The ownership of a registered vehicle may be transferred by a person holding a valid power of attorney from the owner of such vehicle. Before registering such vehicle in the name of the purchaser or transferee, the county treasurer shall require the person signing such transfer of ownership on behalf of the seller or transferor to file in his office a duly acknowledged power of attorney which may be in form and substance as follows:

"POWER OF ATTORNEY
TO TRANSFER INTEREST IN AND TO A
REGISTERED VEHICLE

State of Iowa, County of ....., ss:
Know all men by these presents, that I/we, the undersigned, of ..... (Address), the owner(s) of a vehicle described as ..... (Description of vehicle), bearing motor/serial number ....., have made, constituted and appointed ..... (Name) of ....., my/our true and lawful attorney for me/us, in my/our name(s), place, and stead, to transfer all my/our title and interest in said vehicle as an owner to ..... (Name of purchaser) of ..... (Address of purchaser)

Witness my/our hand(s) this ..... day of ....., 19.....

.....
(Signature)

Subscribed and sworn to before me this.... day of ....., 19....

.....
Notary Public in and for said County and State"

11.14(321) A permit, granting to a nonresident applicant authority to enter or pass through this state with a chartered bus party without the necessity of first obtaining an Iowa vehicle registration, may only be issued by the motor vehicle registration division of this department, and shall be in such form as may be prescribed and adopted by the director of said division.

11.15(321) The owner of a house trailer which is not currently registered and which is actually being used solely for dwelling purposes, may, upon application to the motor vehicle registration division of this department, obtain a permit granting him authority to move such house trailer over the highways of this state from one location to another without first registering such vehicle. The application and permit shall be in such form and substance as the director of that division may prescribe.

11.16(321) The registration card or certificate issued for a trailer shall at all times be carried in the driver's compartment of the towing vehicle.

11.17(321) Current registration receipt. For the purpose of obtaining a certificate of title upon presentation of a current registration receipt as provided in section 321.40, the term, "current registration receipt" shall be deemed to include any immediately previous year's registration receipt presented during the month of January.

[Filed December 21, 1953]

CHAPTER 12
COLLECTING BREATH FOR TESTING ALCOHOLIC CONTENT

12.1(321B.4) Breath collection. A peace officer desiring to collect a sample of a subject's breath for the purpose of determining the alcoholic content of the person's blood shall use an indium encapsulation breath crimper.

12.2(321B.4) Collection procedures.

1. Break seal on test kit. Attach mouthpiece and collection bag to indium templet.
2. Insert templet in crimper box, mount handle and close box top.
3. Plug crimper box to applicable electrical power source and wait for red light to go off.
4. Observe subject for a minimum of 15 minutes to establish no alcohol has entered his mouth.
5. Have arrested blow into the mouthpiece until the collection bag has filled. With arrested continuing to exhale, squeeze handle to collect samples of breath.
6. Repack templet, forms and partitions in mailing box and return to appropriate laboratory.

12.3(321B.4) Definition. An indium encapsulation breath crimper is a device that is so designed as to weld by crimping an indium tube so as to collect and preserve three samples of a subject's breath.

[Filed April 20, 1972]

CHAPTER 13
DRIVERS' LICENSES

13.1(321) Driver's license examinations. A person desiring to secure an Iowa driver's license must pass an examination given in Iowa by

a uniformed driver's license examiner. He may take the examination as soon as he is eligible for an operator's license, and as soon as he feels that he has learned the rules of the road and has had sufficient practice to pass the examination.

The purpose of the examination is to determine three things:

13.1(1) Is the applicant physically and mentally competent to operate a motor vehicle with safety?

13.1(2) Does he know the law of the road, and has he had sufficient experience to operate a motor vehicle with safety?

13.1(3) Is he willing to keep his vehicle properly equipped for safe driving?

The examination shall consist of four parts: (*a*) Vehicle inspection; (*b*) driving test; (*c*) written or oral test; and (*d*) vision test. A person wishing to obtain an instruction permit will be required to pass parts "*c*" and "*d*" of such examination; a person wishing to secure an operator's or chauffeur's license will be required to pass parts "*a*", "*b*", "*c*" and "*d*" of such examination.

13.2(321) The usual signature of the licensee shall contain the surname as the last name appearing in the signature.

13.3(321) The full name appearing at the top of the license shall contain the Christian name in the first position and the surname in the last position.

13.4(321) All persons possessing a valid license who have a legal change in name shall immediately apply to the department for a license to be issued in his or her new name.

13.5(321) No license shall be valid unless it bears the signature of the licensee in conformance to these rules.

13.6(321) Time when an applicant may appear for re-examination:

13.6(1) If the uniformed driver's license examiner fails a person for low visual acuity which may be corrected by glasses, or if the applicant is refused an examination because of the condition of his vehicle, the applicant may appear again to complete the examination as soon as the necessary corrections have been made. The examination may be completed the same day in such cases, if the applicant's equipment is ready and time permits.

13.6(2) If the applicant must do some studying or practicing to complete the examination (as in the case where he has failed the tests on road rules and signs), he shall not be permitted to take the remainder of the examination until the following day except in the case of out-of-state drivers who are anxious to be on their way or other emergency cases. In any case, a second trial should not be given less than four hours after the first, because the applicant may need this much time to prepare himself properly.

13.6(3) If the applicant fails the road test and needs considerable practice, he shall not be permitted to take the examination again within a week. An applicant who lacks very little of passing on the first driving test may be examined the following day at the discretion of the uniformed driver's license examiner.

13.7(321) Vehicle inspections.

13.7(1) The vehicle inspection will be made by the uniformed driver's license examiner. The vehicle shall be roadworthy, shall be properly equipped with two headlights and a taillight in good working order, rear vision mirror, muffler, adequate foot and hand brakes, clear vision windshield of safety plate glass, windshield wiper, and horn or signaling device, and shall have proper registration plates and registration certificate.

13.7(2) No person shall be given a driving test until the vehicle which he presents for vehicle inspection meets the requirements as set forth herein. An applicant whose vehicle fails to pass the vehicle inspection test will be permitted to have the vehicle repaired or necessary adjustments made, and may return his vehicle for another inspection on the same day.

13.8(321) Road signs test. Applicants who are unable to read standard signs and the questions pertaining thereto may be given an oral examination. This shall be done by using a set of standard signs as illustrated in the Iowa drivers guide. The applicant shall be shown the signs one by one and will be asked to explain the meaning of each or tell what he would do upon reaching each particular sign and why. The applicant must correctly explain the meaning of these signs in order to pass. The results of an oral test should be recorded in the same manner as the written test.

13.9(321) Test for road rules.

13.9(1) *Purpose.* The purpose of the road rules test is to learn if the applicant knows driving rules well enough to permit him to drive safely.

13.9(2) *Scoring.* The following rules will govern the scoring of the written examination required of an applicant for an operator's license, restricted chauffeur's license, school permit and instruction permit.

a. The applicant must satisfactorily answer 20 questions out of 25 questions submitted to him in order to qualify for an operator's license, school permit or instruction permit.

b. On road sign tests, the applicant must answer correctly seven out of ten questions submitted to him.

c. To satisfactorily pass the chauffeur's license examination, the applicant must correctly answer 23 out of 30 questions submitted to him.

Applicants who cannot read or write will be examined orally by the uninformed driver's li-

cense examiner taking a set of the standard rules questions and asking the applicant to give the correct answers. Results of such oral examinations will be recorded in the same manner as for written tests.

13.10(321) Road test procedures. Driving tests will be given whenever the weather permits; however, postponement of such tests will not be made unless absolutely necessary.

13.11(321) Vision examination. All applicants for an operating license will be required to pass a 20-40 vision test. If the applicant cannot score 20-40 vision without glasses and has glasses correcting his vision to 20-40, the license issued shall be restricted to wearing adequate glasses. If his vision score is 20-50 with each individual eye, and the applicant can score 20-40 reading with both eyes, the license shall not be restricted to glasses. If an applicant cannot score 20-40 vision with or without glasses he shall be referred to an eye specialist of his own choosing. If an applicant's vision score is less than 20-100 in one eye, his better eye should score 20-30 with or without glasses. Whenever the vision in the left eye is no better than 20-100, the applicant's license shall be restricted to the use of an outside rear vision mirror on the vehicle which he operates. A vision score of 20-75 or worse shall be considered as a vision failure.

License restrictions based on vision scores shall be substantially in accordance with the following table:

Vision Score	Restrictions Imposed on License
a. 20-40 to 20-50	"TO ADEQUATE GLASSES", when glasses are required to correct to this tolerance.
b. 20-50 to 20-60	"TO ADEQUATE GLASSES", when glasses will correct vision to this tolerance, plus "DAYLIGHT DRIVING ONLY".
c. 20-60 but better than 20-75	"TO ADEQUATE GLASSES", when glasses will correct vision to this tolerance, plus "DAYLIGHT DRIVING ONLY", plus "MAXIMUM SPEED 45 M.P.H."

13.12(321) Instruction permits. The law does not permit driving on Iowa highways without a driver's license, and requires an examination before a license may be issued. An applicant who is unable to pass the required driving examination may be issued an instruction permit, if he successfully passes all other tests required of him. A fee shall be charged for such instruction permit and the applicant may, at any time during the effective period of such permit, return to the driver's license examiner and upon successfully passing the required driving test, and paying the required statutory fee, be issued a regular license.

13.13(321) Restricted licenses. There are many borderline drivers who cannot be conscientiously approved for unrestricted use of the highways. The following is a partial list of restrictions that may be imposed on any operating license whenever deemed necessary by the driver's license examiner:

13.13(1) *Time.* Some drivers may be restricted to daytime driving only, particularly aged drivers whose vision may be impaired. Other drivers may be restricted only to the times when it is necessary for them to go to and from school. In a few cases an operating license may be restricted to the driver's working hours only.

13.13(2) *Devices.* On driver, such as artificial legs, arms, braces, or other equipment except hearing aids.

13.13(3) *Adequate glasses.* The most common restriction which simply means that applicant must wear glasses while driving.

13.13(4) *Type of vehicle.* If the driving examination is taken on a motorcycle, a motor scooter, or other unusual vehicle, the applicant's license will be restricted to the use of that vehicle only, as for example, "Motorcycle only".

13.13(5) *Taxicab or passenger car.* Restricted to operation of taxicab or passenger car.

13.13(6) *Place.* Restrictions may be imposed on an applicant's license limiting his operation of a motor vehicle to a described route or to a certain community or locality, as, for example, "Restricted to driving within Smithfield city limits only".

13.13(7) *Minors.* When the application of a minor must be signed by the parent, or guardian, any restrictions requested by such parent or guardian will be made by the driver's license examiner. For example, if a parent insists that his child's application be restricted to driving the parent's vehicle, it will be so restricted until such time that the parent requests the restriction to be removed, or until the child becomes old enough to drive without the parent's consent. Such a restriction to a stated vehicle may read, "Restricted to driving vehicle owned by R. C. Smith of Thomasville", or, "Restricted to driving 1939 Plymouth coupe, engine No. 9603214".

13.13(8) *Notation of restriction.* Any restriction imposed on an operating license will appear in the space marked "Restriction" if space permits. A lengthy restriction may be placed on the back of the license with the word "OVER" in the restriction box.

13.14(321) Restricted licenses for minors. Any restricted license issued prior to July 4, 1953, under section 321.194, as such section existed prior to its repeal on July 4, 1953, by virtue of Senate File 263, Acts of the 55th General Assembly, shall continue valid from and after July 4, 1953, until its holder's 16th birthday for the driving purposes permissible under, and subject to all

terms, restrictions and conditions of, the substitute restricted license provision enacted by said Senate File 263, Acts of the 55th General Assembly.

13.15(321) Standards for bodily disabilities. The following restrictions will be placed on the operating license of an applicant who is unable to pass the required driving test without special equipment or devices:

13.15(1) *Extremities.*

a. When both hands and both feet or one hand or one foot are missing or useless. . License will be restricted to use of a vehicle equipped with needed special equipment.

b. When either hand is missing or useless. . . . License will be restricted to use of artificial arm or to vehicle equipped with a grip knob on wheel and mechanical turn indicator.

c. When either foot is missing or useless. . . . License will be restricted to use of an artificial foot, or to use of a vehicle equipped with a pedal extension, or a manual brake or clutch.

13.15(2) *General.*

a. Joints stiff. Unrestricted license may be issued at discretion of driver's license examiner.

b. Body or limbs shaky or wobbly. Unrestricted license may be issued at discretion of driver's license examiner.

c. Strength too small for legal stop. No license will be issued applicant until special equipment is installed on vehicle to be used, such equipment to be so designed as to aid the person in the process of stopping.

d. Stature too small for legal stop. No license will be issued applicant until special equipment is installed on vehicle to be used, such equipment to be so designed as to aid the person in the process of stopping.

e. Special equipment. If any special or unusual equipment such as automatic gear shift, manually operated brakes or clutch, extra seat, cushions or power brakes is on the car used in the road demonstration the applicant's license shall be restricted to the use of a vehicle equipped with such special equipment, if needed.

13.15(3) *Hearing—deaf.* License will be restricted to the use of a vehicle equipped with an outside rear view mirror only if the applicant is accident-prone or has a bad driving record.

13.15(4) Whenever the department has reason to believe an applicant is physically incompetent, he shall not be licensed until he has been examined by competent medical authority and has been pronounced physically able to drive safely. Such statement must be presented, in writing, to the department. A special examination may be required of applicant before a final decision on the granting or the denial of a license is made by the department.

13.16(321) Mental disability standards.

13.16(1) No person who has ever been committed to or has been a patient in any prison, asylum, state hospital or similar institution, whether public or private, because of insanity, mental diseases, feeble-mindedness, epilepsy, catalepsy, alcoholism, drug addiction, "spells", seizures or other similar disorders, shall be licensed as a motor vehicle driver until he has presented a certificate (or a certified copy thereof) signed by the head of the institution to which he had been committed stating that he has been discharged as cured.

13.16(2) Whenever the department has any reason to believe that an applicant for a motor vehicle driver's license is mentally incompetent, or disabled, he shall not be licensed until he has been examined by competent medical authority and pronounced able to drive safely.

13.16(3) When statements of restoration-to-competency or discharged-as-permanently-cured are required from institutions, they must be secured in writing by the applicant and supplied to the department signed and attested by the proper officials. The original (or a certified copy) of such court order or certificate must be presented to the driver's license examiner and forwarded to the department of public safety as a permanent part of the application for a motor vehicle driver's license.

13.17(321) Temporary driver's permit.

13.17(1) *General.* Any person on first application for a license to operate a motor vehicle, except for a school license, who successfully passes the required written, vision and driving tests, will be issued without charge, a temporary driving permit for a period not to exceed one year, during which time the department will continually review the applicant's driving record in order to complete its investigation and determination of all facts relative to granting of an operator's license to the applicant.

13.17(2) *Invalidation.*

a. General. This temporary driving permit will be invalidated by the department if the application for license is refused.

b. Specific. The department will refuse the application of a permit holder who is convicted of any moving traffic violation occurring during the life of the permit.

13.17(3) *Reapplication.* Such person will be ineligible to reapply for a license to operate a motor vehicle for a period of 30 days after invalidation. Furthermore, the department may require any such person to complete a class of instruction in driver improvement before establishing eligibility to reapply for such license.

13.17(4) *Extension of permit.* If the grounds for invalidation occur within six months

of issuance, the new temporary driving permit will extend for a period of one year from the date of reissuance; if the grounds for invalidation occur after the sixth month of issuance, the new temporary driving permit will extend for a period of six months from the date of reissuance.

13.17(5) *Issuance of license.* Any applicant who remains violation free for the life of the temporary driving permit will, upon request, be issued a license to operate a motor vehicle upon payment of the statutory fee. If such request is not made within 30 days after the expiration of the temporary driving permit, the applicant must again successfully pass the required written and vision tests.

This rule is intended to implement section 321.181 of the Code.

TITLE III

MOTOR VEHICLE INSPECTION

ADMINISTRATIVE PROCEDURES DIVISION

CHAPTER 21
DEFINITIONS

21.1(321) Definitions. The definitions of section 321.1 are hereby made a part of these rules.

[Filed April 20, 1972]

CHAPTER 22
APPOINTMENT OF AN OFFICIAL INSPECTION STATION

22.1(321) How to make application for an official inspection station.

22.1(1) Application for a Class "A", "B", "C", and "D" official inspection stations shall be made on the application forms established by the department of public safety.

22.1(2) Submit application properly completed and signed to the inspection division.

a. Signature. The application shall be signed by the owner, if a natural person, and in the cases where the owner is a corporation, copartnership or association, by an executive officer thereof or some person specifically authorized to sign the application, to which shall be attached written evidence of his authority.

b. Applications for official inspection stations signed by persons that reside outside of Iowa shall be rejected, unless the applicant has an Iowa resident as his responsible agent at such inspection station.

c. A foreign corporation shall not be issued an official inspection station certificate unless such corporation is registered to do business in Iowa and has an Iowa resident as its responsible agent.

22.1(3) Upon approval of the application, by the inspection division, a certificate shall be issued each owner for the place of business within the state set forth in the application. Certificates shall not be assignable and shall be valid only for the owners in whose name issued and for transaction of business at the place designated therein and shall at all times be conspicuously displayed at the place for which issued. Inspections are forbidden until a valid certificate has been properly issued to, received and displayed by the owner.

22.1(4) After the application has been approved, the owner shall prominently display an "official inspection station" sign, outside of the garage visible to the public and it must be of a type approved by the department.

22.2(321) Space requirements.

22.2(1) All inspections must be conducted in the approved area, unless specific regulations state otherwise.

22.2(2) "Inspection area" is defined as the designated "space in the clear" approved for inspection purposes. Approval cannot be granted, nor permitted to continue, unless full compliance of the following requirements is maintained:

a. The floor must be nearly level. A slope, of not to exceed two percent, front to rear or rear to front, is acceptable.

b. It shall be free of all obstructions including shelves, work benches, partitions, displays, machinery, stairways etc., unless in the opinion of the investigating officer the obstruction does not protrude in the area far enough to curtail or interfere with inspections.

c. Wall shelves at a height of not less than four feet are permitted, if they do not present a hazard to the vehicles, public or employees.

d. Floors must be a hard surface (such as concrete) and in a good smooth condition. Wood and dirt floors are not acceptable in this area.

22.2(3) The available level space for inspections is placed in classifications outlined as follows:

a. Class "A" station—capable of inspecting all motor vehicles.

(1) Minimum space requirement: Twelve feet by forty-five feet with approved headlight tester.

(2) Minimum space requirement: Twelve feet by seventy feet with approved screen and intensity meter.

(3) Height of door and ceiling must be adequate to allow for entrance into inspection area and the raising of the vehicle.

b. Class "AA" station—capable of inspecting motor vehicles in excess of two ton, gross vehicle weight.

(1) Minimum space requirement: Twelve feet by forty-five feet with approved headlight tester.

(2) Minimum space requirement: Twelve feet by seventy feet with approved screen and intensity meter.

(3) Height of door and ceiling must be adequate to allow for entrance into inspection area and the raising of the vehicle.

c. Class "B" station—capable of inspecting the smaller types of motor vehicles, i.e. all passenger cars and small trucks up to and including two ton, gross vehicle weight.

(1) Minimum space requirement: Ten feet by twenty-five feet with approved headlight tester.

(2) Minimum space requirement: Ten feet by forty-five feet with approved screen and intensity meter.

(3) Height of door and ceiling must be adequate to allow for entrance into inspection area and the raising of the vehicle.

d. Class "C" station—governmental inspection stations. Minimum space requirements the same as for class "A" or "B" stations.

e. Class "D" station—capable of inspecting all types of motorcycles. Minimum space requirement: Five feet by twenty feet. Headlight aiming must be performed by the use of an approved screen or photo electric type headlight tester.

22.2(4) A building must be a sound, enclosed structure, in good repair with adequate heating facilities to qualify as an official inspection station.

22.2(5) All classes of inspection stations must be staffed with an approved inspector, with knowledge, tools and equipment to perform inspections on all motor vehicles presented for inspection.

22.3(321) Manpower requirements.

22.3(1) Each official inspection station must have a minimum of one approved inspector to perform inspections.

22.3(2) An inspector must be over 18 years of age and have a current valid operator's license to be an approved official inspector.

22.3(3) If an operator's license is revoked or suspended (for any reason or period of time) the inspector shall cease inspecting during the suspension period and shall not inspect until privileges have been fully restored.

22.3(4) If an official inspector is to inspect at more than one official inspection station, he must receive separate certification for each inspection station.

22.3(5) Approved inspectors are subject to re-examination at any time, to determine whether they have knowledge of current official inspection rules. In the event there is no certified inspector employed, a suspension of the station's certificate is mandatory until an inspector is certified.

22.3(6) Owners or operators of official inspection stations must request certification of new inspectors.

22.3(7) The use of a noncertified inspector is sufficient cause for immediate revocation of that official inspection station's certificate.

22.3(8) The owners of the official inspection station are responsible for the quality of the inspections performed.

22.4(321) Tools and equipment. Inspection stations must be equipped to inspect both domestic and foreign-made vehicles.

22.5(321) Inspection sticker security.

22.5(1) It shall be unlawful for any person to furnish, give or sell an inspection sticker to any owner or operator of a motor vehicle. No one shall place in or on any motor vehicle an inspection sticker unless an official inspection of the motor vehicle has been made and the vehicle conforms with the regulations established by the inspection rules.

22.5(2) It shall be unlawful for any such designated official inspection station to furnish, give, loan or sell inspection stickers to any other official inspection station or any other persons except those entitled to receive them under the provisions of the inspection rules.

22.5(3) Inspection stickers must be kept in a locked compartment. The station owner or operator is solely responsible for their safety.

22.5(4) Unused or mutilated stickers must be returned to the inspection division, department of public safety, where an audit shall be made of the stickers. The inspection station owner or inspectors shall not destroy any stickers. Unused inspection stickers shall be audited by the inspection division, department of public safety.

22.6(321) Inspection sticker information.

22.6(1) *Types of stickers.* There shall be two types of official inspection stickers issued.

a. Type A: All vehicles except motorcycles.

b. Type B: Motorcycles.

22.6(2) *Inspection sticker ordering procedure.*

a. Obtain an official order form from the department of public safety, indicate number and type of stickers that are needed. Enclose check to cover cost of stickers ordered.

b. All information on the form must be completed.

(1) Correct station number.

(2) Name and address of the official inspection station, as shown on the certificate.

(3) Orders must be signed by the authorized owner or authorized employee.

(4) Sticker orders must be accompanied by a check or money order. All checks must be made payable to the Treasurer, State of Iowa.

(5) Stickers must be ordered in quantities of 25 or multiples of 25 (example: 25, 50, 75, etc.) including governmental inspection stations.

(6) All incomplete or improper orders or checks will be returned to the official inspection station for correction.

[Filed April 20, 1972]

CHAPTER 23
REVOCATIONS

23.1(321) Failure to comply.

23.1(1) Any failure to comply with the provisions of this Act [64GA, ch183] or any rules promulgated pursuant thereto, shall be construed as being a failure to properly conduct all or a portion of the inspection process or shall be construed as a failure to be properly equipped within the meaning of section 321.238(4)"*a*" 1.4(1), as said paragraph pertains to the authority of the commissioner to revoke an inspection station's permit.

23.1(2) The period of revocation shall be determined by the commissioner, or his authorized agent, after considering the gravity of the violation, said period to be not less than 30 days.

[Filed April 20, 1972]

CHAPTER 24
GENERAL REQUIREMENTS OF OFFICIAL INSPECTION STATIONS

24.1(321) General requirements.

24.1(1) The inspection station owner shall have available the official inspection station rules.

24.1(2) The inspection station owner must prominently display the inspection station certificate, the certificate of inspectors authorized to conduct inspections, and any other notices deemed necessary by the department of public safety.

24.1(3) The inspection station owner shall maintain a clean and orderly place of business.

24.1(4) The inspection station owner shall keep up-to-date inspection records on file at the inspection station, which shall be available at all times for examination by the inspection division or an authorized employee of the department of public safety. The inspection station shall keep their copy of the inspection form for each inspection performed and inspection materials receipts on file at the inspection station for three years.

24.1(5) Official inspection stations must be open for business at least eight normal daylight business hours, five days a week (excluding legal holidays), with an inspector in attendance.

24.1(6) The department of public safety, inspection division must be notified of the following:

a. Change of ownership.

b. Change of location of the official inspection station.

c. Dissolution of partnerships or corporations.

d. Cessation of operation.

e. In case inspection stickers are damaged, lost or stolen.

f. Dismissal or resignation of an authorized inspector or person authorized to purchase inspection stickers.

g. All changes in post-office address.

h. Any change in authority. Submit an application if the person whose signature appears on the corporation's application resigns or loses authority.

i. Change in trade name.

24.2(321) Recording inspection.

24.2(1) Fraudulent recording on inspection forms is cause for immediate revocation of inspection station's certification.

24.2(2) The inspector must record the correct information on the proper report form and place his signature in the appropriate location. This must be done immediately following inspection. Recorded information shall be printed unless directed to do otherwise.

24.2(3) The inspection record form must be completed in triplicate. Copies one and three are to remain with the inspected motor vehicle. The second copy must be retained as a garage record and kept on file at the inspection station for a period of three years.

24.3(321) Verification of legal registration. Owner's registration card must be checked with registration plate and vehicle identification numbers. If the numbers do not correspond or if the manufacturer's serial number (VIN) is defaced, obliterated or not available, the inspection shall be completed and this information left blank.

24.4(321) Road test.

24.4(1) A road test of at least one-quarter mile shall be performed to determine brake equalization and general condition of the steering behavior.

24.4(2) A vehicle must be rejected for any malfunction of the braking or steering mechanism.

24.4(3) Inspection form must accompany the inspector on all road tests.

24.5(321) Inspection sticker. When a vehicle has successfully passed inspection, meeting the requirements of the law, the inspection sticker shall be validated in the following order:

24.5(1) Punch the exact date and month of the inspection in the date box of the inspection sticker.

24.5(2) Remove any other inspection stickers.

24.5(3) Affix the inspection sticker to the inside of the windshield on a motor vehicle in the blind area behind the inside rear view mirror, or in the case of a motorcycle, on the left side of the rear fender. Care should be taken to keep sticker out of the heavily-tinted area of the windshield.

24.5(4) Only an approved inspector may affix the inspection sticker.

24.6(321) Inspection fees.

24.6(1) The fee shall be $5.25. Iowa law requires that sales tax be collected on this fee.

24.6(2) All official inspection stations shall prominently display a sign within their garage which shall announce the complete charge for an inspection.

24.7(321) Vehicle rejection procedure.

24.7(1) A complete inspection must be performed and the inspection form marked as to the condition of the motor vehicle for each item listed on the inspection form.

24.7(2) If the inspection reveals deficiencies that would be cause for rejection, circle the word "rejected" directly under inspector's signature.

24.7(3) If the motor vehicle is rejected under 24.7(2), a rejection sticker must be affixed in the same manner as the inspection sticker.

24.7(4) The inspector must inform the owner or operator of a rejected vehicle that he may exercise one of the following options for having his vehicle repaired:

a. Have the repairs made by the same company that operates the inspection station.

b. Have the repairs made by another repair facility of his choice.

c. Make the repairs himself.

24.7(5) The inspector must inform the owner or operator of the rejected vehicle that the inspection station is obligated to reinspect the rejected items without additional charge if returned within the statutory time.

24.7(6) The owner or operator of a rejected motor vehicle is not required to return to an inspection station conducting the original inspection for reinspection; however, should the owner or operator desire to have the reinspection made by another inspection station, the usual inspection fee will be charged by that station. Owner's copy of the inspection form must be presented to the inspection station when requesting reinspection.

24.7(7) A motor vehicle with rejection sticker affixed may be sold to an authorized dealer in lieu of repairs.

24.7(8) A rejection sticker may be removed by another inspection station under the following conditions:

a. The owner must present the inspection form (rejected) to another inspection station and an additional inspection fee must be paid.

b. The next inspection station shall retrieve the owner's copy of the inspection form, remove the rejection sticker from the motor vehicle, complete another inspection and distribute the inspection forms.

c. The inspection station shall send the owner's rejection copy (from first inspection station) to the department of public safety.

24.7(9) The inspection station shall send the first copy (county treasurer's copy) to the inspection division for all motor vehicles that fail to return for reinspection within the statutory time provided by the Code.

[Filed April 20, 1972]

INSPECTION REQUIREMENTS DIVISION

CHAPTER 25
REQUIREMENTS FOR INSPECTION OF ALL MOTOR VEHICLES

25.1(321) Brakes.

25.1(1) *Service brakes.* All motor vehicles are required to be equipped with service brakes and these brakes must meet or surpass the provisions of chapter 321 of the Code. Service brakes adequacy may be tested by any of the following:

a. Platform tester. Reject if:

(1) Test indicates that vehicle cannot stop in conformance with the requirements of section 321.431.

(2) Any wheel fails to indicate braking action.

(3) Reading on one wheel less than 75 percent of reading on other wheel of same axle.

b. Dynamometer. Reject for same causes as for platform tester.

c. Pull right front wheel and brake drum.

Exceptions: Motorcycles, new motor vehicles, vehicles with four-wheel drive, vehicles with front-wheel drive, trucks with brake inspection plates, vehicles with sealed braking systems.

Reject if:

(1) Cracks in brake drum or brake disk surface.

(2) Evidence of mechanical damage other than wear.

(3) Friction surface warped or grooved by metal contact.

(4) Friction surface is contaminated with oil, grease, or brake fluid.

(5) Drums worn more than .090 inch or 50 percent beyond factory recommended turn-down specifications.

(6) Bonded linings less than 1/32 inch at thinnest point.

(7) Riveted linings less than 1/64 inch above any rivet head.

(8) Any loose or missing brake shoe rivets.

(9) Wire visible on friction surface of wire backed linings.

(10) Lining broken, cracked or not firmly attached.

(11) Disk brake pads with thickness less than 1/32 inch or less than 1/64 inch of any rivet head. (Except American Motors Corporation vehicles which must be 1/16 inch.)

d. Other causes for rejection:

(1) Any leaks in hydraulic system, (including the master cylinder, wheel cylinders, hoses, lines and couplings).

(2) Less than one half of pedal travel remains.

(3) On mechanical linkage, missing or defective linkage, pins, springs, rods, couplings, nuts or other essential parts.

(4) Worn or misaligned mechanical pedal shaft or bearings.

(5) Any leaks, collapsed hoses and tubes, loose hose clamps or clogged air cleaners on power brake units.

(6) If brakes pull to either side during road test.

(7) Pedal pads worn through to the pedal or missing.

25.1(2) *Parking brakes.* All motor vehicles, except motorcycles, must be rejected if they are not equipped with a parking brake system in good working order and adequate to hold such vehicle under all load conditions, upon any grade on which it is operated.

25.2(321) Lighting.

25.2(1) *Failure to conform.* Vehicles failing to conform to the lighting requirements of sections 321.384, through and including 321.429 as applicable must be rejected.

25.2(2) *Headlights.*

a. Headlight aim may be tested by the use of any of the following:

(1) Mechanical aimer.

(2) Headlight testing machine.

(3) Approved screen.

b. During and as part of the inspection process, headlight aim must be adjusted if found faulty. The vehicle must be rejected if the adjusting mechanism is found faulty or the light is not firmly mounted.

25.3(321) Glazing.

25.3(1) Motor vehicles must conform to the provisions of chapter 321 of the Code.

25.3(2) Vehicles shall be rejected for any of the following defects:

a. Improper or unmarked glazing materials are used. Glazing must conform to ANSI Glazing Standard Z26.1 (1966).

b. Nontransparent materials are used to replace glass.

c. Left front window (driver's side) is not operable.

d. Driver's vision is obstructed by venetian blinds, signs, posters, novelties, other personal property or materials placed, hung or attached in such a position as to interfere with the vision through the windshield, sidewings, side or rear windows.

e. Tinted sprays or paints apply to any glazing.

f. Cracks, discolorations or scratches to the front, right, left, or rear of the driver which interferes with his vision.

g. Star chips (stone nicks) larger than one and one-half inches in diameter in the area swept by the windshield wipers.

25.4(321) Wipers.

25.4(1) Motor vehicles must conform to the provisions of chapter 321 of the Code.

25.4(2) Vehicles shall be rejected for any of the following:

a. Missing wipers or components thereof.

b. Controls beyond reach of driver.

c. Visible evidence of physical breakdown of the blade—damaged, torn, or hardened rubber.

d. If blades smear or streak windshield after five cycles of operation with windshield continuously wet and wiper controls on.

25.5(321) Mirrors.

25.5(1) Motor vehicles must conform to the provisions of chapter 321 of the Iowa Code.

25.5(2) Vehicles shall be rejected for any of the following:

a. Mirror not firmly mounted.

b. Cracked or discolored lens that prohibits clear vision for at least 200 feet.

c. If the vehicle is so constructed as to prevent the operator's view to the rear, unless an outside mirror is present.

25.6(321) Body items.

25.6(1) Motor vehicles must conform to the provisions of chapter 321 of the Code.

25.6(2) Vehicles shall be rejected for:

a. Bumpers, fenders, doors or rocker panels having protruding or broken sharp edges that would be hazardous.

b. Doors with inoperable latches, handles or hinges, or doors wired shut or otherwise secured in a closed position.

c. Holes rusted in floor and trunk pans.

d. Fenders rusted to the point that debris can be thrown on following vehicles.

e. Cracked or broken frames.

f. Missing or defective seat belts or hardware in the front seat of every motor vehicle, except motorcycles, 1966 motor vehicles and later.

g. A seat for the operator that is not firmly anchored and designed for use in a motor vehicle.

25.7(321) Tires. Any pneumatic tire on a motor vehicle shall be considered unsafe if found

to have any of the following defects and shall be rejected.

25.7(1) For any unsafe condition listed in section 321.440.

25.7(2) For slicks or tires designed originally without grooves or tread.

25.7(3) For tires on the same axle which differ in size or structural design (e.g. bias versus belted versus radial).

25.7(4) For oversize tires that require the motor vehicle body to be raised to accept the oversized tires or that oversized tires project beyond the side of the motor vehicle body.

25.8(321) Wheels.

25.8(1) Wheels that are not held firmly to the motor vehicle due to missing and defective bolts, nuts or lugs, shall be rejected.

25.8(2) A wheel that is bent and structure is cracked shall be rejected.

25.8(3) A rim or wheel flange which is damaged and fails to allow a tire, when mounted, to remain safely mounted shall be rejected.

25.9(321) Other mechanical items.

25.9(1) *Steering.* The inspection of the steering systems must be conducted in accordance with the allowable tolerances provided for by the manufacturer's specifications (to be supplied by inspection division).

25.9(2) The motor vehicle must be rejected for any of the following: (on vehicles equipped with power steering, fluid level and belt tension must be adequate before testing.)

a. Steering binds or jams.

b. Steering wheel play greater than the following: Sixteen-inch steering wheel diameter—two-inches lash; 18-inch steering wheel diameter—two and one-fourth inches lash; 20-inch steering wheel diameter—two and one-half inches lash; 22-inch steering wheel diameter—two and three-fourths inches lash.

c. If column support bracket is loose or not properly mounted.

d. If plastic mounting capsules are not intact.

e. If relative movement between brake drum and backing plate is greater than one-eighth inch measured at outer circumference of tire.

f. If steering linkage play exceeds one-fourth inch on 16-inch or less wheels; three-eighths inch on 17-inch and 18-inch wheels; one-half inch on wheels over 18 inches.

g. If toe-in or toe-out exceeds manufacturer's recommended specifications (to be supplied by inspection division).

h. If ball joint movement is in excess of manufacturer's specifications (to be supplied by inspection division).

25.9(3) *Springs.* The motor vehicle must be rejected for any of the following:

a. If the vehicle leans to either right or left by more than three inches measured from the corner of vehicle to the floor on either the front or the rear.

b. If any spring has been substantially altered by removal of tension.

c. Any broken leaves or coils.

d. Improperly mounted springs.

e. Broken or missing bolts, clamps, bushings or other components.

f. Extended shackles.

25.9(4) *Shock absorbers.* The motor vehicle must be rejected for any of the following:

a. If, upon bouncing, the vehicle continues to bounce for more than two cycles (one cycle includes both the up and down movement of the vehicle).

b. Any broken or missing shock absorber or component parts.

25.9(5) *Rear wheel tracking.* Reject vehicle if rear wheels do not follow the front wheel track in "straight ahead" travel.

25.9(6) *Exhaust system.* Motor vehicles must conform to the provisions of chapter 321 of the Code. Visually examine, with the vehicle running, the exhaust system and supporting hardware and reject for any of the following:

a. The vehicle has no muffler.

b. There are loose or leaking joints.

c. There are holes, leaking seams or patches on the muffler, exhaust pipe or tail pipe.

d. The tail pipe is pinched.

e. Elements of system are not securely fastened.

f. There is a muffler cut-out, bypass or similar device which can be operated from the passenger portion of the motor vehicle to which such muffler is attached.

g. Any part of system passes through passenger compartment or trunk.

h. The exhaust fumes are not emitted either:

(1) At the extremities of the body of the vehicle, or

(2) Behind a point which is immediately forward of the leading edge of the rear wheel well.

Exception: If the vehicle was designed or originally equipped to exhaust in a manner other than that set forth above.

25.9(7) *Windshield defroster.* The motor vehicle must be rejected if the blower fan fails to function or the stream of heated air is not directed to the proper area.

25.9(8) *Sun visors.* A motor vehicle if equipped with a sun visor must be rejected for the following:

a. If broken, bent or loose parts which prevent the visor from being positioned.

b. If visor fails to stay in a set position.

25.9(9) *Fuel system.* Motor vehicle should be rejected for any of the following:

a. If any part of the system is not securely fastened to the motor vehicle.

b. If any fuel is leaking at any point in the system.

c. If fuel cap is missing.

25.9(10) *Horn.* Each motor vehicle is required to conform to chapter 321 of the Code. Reject vehicle if:

a. Not firmly mounted.

b. Poor electrical connection exists.

c. Sound is not audible for 200 feet.

d. Sound emitted is unusually loud or harsh.

e. Activating device is not easily accessible to motor vehicle operator.

CHAPTERS 26 to 30
Reserved for future use.

TITLE IV
MOTOR CARRIERS

CHAPTER 31
SAFETY RULES

31.1(325) Definitions.

31.1(1) *"Vehicle"* means every device in, upon, or by which any person or property is or may be transported or drawn upon a highway for compensation.

31.1(2) *"Motor vehicle"* means every self-propelled vehicle used for carrying freight or property for compensation which is required to be registered for a gross weight of 10,000 pounds or more, or is used to transport more than nine passengers for hire, but not including city transit buses or school buses.

31.1(3) *"Trailer"* means every vehicle without motive power required to be registered for a gross weight of 8,000 pounds or more, designed for carrying persons or property for compensation, and for being drawn by a motor vehicle.

31.1(4) *"Semitrailer"* means every vehicle without motive power required to be registered for a gross weight of 24,000 pounds, or more, designed for carrying persons or property for compensation, and for being drawn by a motor vehicle and so contructed that some part of its weight and that of its load rests upon or is carried by another vehicle.

31.1(5) *"Motor truck or truck"* means every motor vehicle required to be registered for a gross weight of 10,000 pounds or more, designed for carrying livestock, merchandise or freight of any kind for compensation.

31.1(6) *"Truck tractor"* means every motor vehicle required to be registered for a gross weight of more than 24,000 pounds, designed and used for drawing other vehicles for compensation and not so contructed as to carry a load other than a part of the weight of the vehicle and load so drawn.

31.1(7) *"Bus"* means any motor vehicle used to transport more than nine persons for compensation but not including city transit buses or school buses.

31.2(325) Equipment.

31.2(1) *Electrical equipment wiring specifications.* Wiring for both low tension and high tension circuits shall be constructed and installed so as to function reliably and adequately and shall conform to the appropriate requirements in the SAE standard for "Insulated Cable" or by wiring which is mechanically and electrically at least equal to such cable. Required lamps shall be connected to the source of power with such standard wire. The source of power, and candle power of the bulb and the electrical wiring shall be of such size and characteristics that required lamps shall when lighted be capable of being seen at least 500 feet under clear atmospheric conditions during the time lamps are required to be lighted. This shall not be so construed as to prohibit the use of the frame or other metal parts of a motor vehicle as a return ground system provided that for truck tractor-semitrailer combinations, the truck tractor is electrically bonded to the semitrailer.

31.2(2) *Wiring to be protected.* Wiring shall, when possible, be grouped together and protected by nonmetallic tape, braid, or other covering capable of withstanding severe abrasion or shall be protected by being enclosed in a metallic sheath or tube. Wiring shall be properly supported. Wiring shall not be so located as to be likely to be charred, overheated, or enmeshed in moving parts. Insofar as is practicable, wiring shall not be adjacent to any part of the fuel system. The edges of all holes in metal through which the wiring passes unless the wiring is metal covered, shall be rolled or bushed with a grommet of rubber or other suitable material.

31.2(3) *Grounds.* The battery ground and trailer return ground connections on a grounded system shall be readily accessible. The contact surfaces of electrical connections shall be clean and free of oxide, paint or other nonconductive coating.

31.2(4) *Battery installation.* Every storage battery on every vehicle, unless located in the engine compartment, shall be covered by a fixed part of the motor vehicle or protected by a removable cover or enclosure. Removable covers or enclosures shall be substantial and shall be securely latched or fastened. The storage battery compartment and adjacent metal parts which might corrode by reason of battery leakage shall be painted or coated with an acid-resisting paint or coating

and shall have openings to provide ample battery ventilation and drainage. Wherever the cable to the starting motor passes through a metal compartment, the cable shall be protected against grounding by an acid and waterproof insulating bushing. Wherever a battery and a fuel tank are both placed under the driver's seat, they shall be partitioned from each other, and each compartment shall be provided with an independent cover, ventilation and drainage.

31.2(5) *Overload protection devices.* The current to all low tension circuits shall pass through overload protective devices except that this requirement shall not be applicable to battery-to-starting motor or battery-to-generator circuits, ignition and engine control circuits, horn circuits, electrically-operated fuel pump circuits or electric brake circuits. Protective devices for electric circuits on every motor vehicle the date of manufacture of which is subsequent to June 30, 1953, except motor vehicles being transported in driveaway-towaway operations, shall be arranged so that either the head lamp circuit or circuits shall not be affected by a short circuit in any of the other lighting circuits on the motor vehicle, or if the head lamp circuit is protected in common with other electrical circuits, the protection device shall be an automatic reset overload circuit breaker.

31.2(6) *Detachable electrical connection.* Electrical wiring between towing and towed vehicles shall be contained in a cable or cables or entirely within another substantially constructed protective device. All such electrical wiring shall be mechanically and electrically adequate and free of short or open circuits. Suitable provision shall be made in every such detachable connection to afford reasonable assurance against connection in an incorrect manner or accidental disconnection. Detachable connection made by twisting together wires from the towed and towing units are prohibited. Precaution shall be taken to provide sufficient slack in the connecting wire or cable to accommodate without damage all normal motions of the parts to which they are attached.

31.2(7) *Wiring—installation.* Electrical wiring shall be systematically arranged and installed in a workmanlike manner. All detachable wiring, except temporary wiring connections for driveaway-towaway operations, shall be attached to posts or terminals by means of suitable cable terminals which conform to the SAE standard for "Cable Terminals" or by cable terminals which are mechanically and electrically at least equal to such terminals. The number of wires attached to any post shall be limited to the number which such post was designed to accommodate. The presence of bare, loose, dangling, chafing or poorly connected wires is prohibited.

31.3(325) Brakes.

31.3(1) *Brake tubing and hose, adequacy.* Brake tubing and brake hose shall be:

a. Designed and constructed of proper material and so installed as to insure proper continued functioning;

b. Sufficiently long and flexible as to accommodate without damage all normal motions of the parts to which they are attached;

c. Suitably secured against chafing, kinking or other mechanical injury; and

d. Brake hose shall be so constructed as to insure adequate and reliable functioning and shall conform to the appropriate specifications set forth in the SAE Standards for "Hydraulic Brake Hose", "Air Brake Hose", or "Vacuum Brake Hose".

31.3(2) *Brake tubing and hose connections.* All connections for air, vacuum or hydraulic braking systems shall:

a. Be adequate in material and construction to insure proper continued functioning;

b. Be designed, constructed and installed so as to insure when properly connected, an attachment free of leaks, constrictions or other defects;

c. Have suitable provision in every detachable connection to afford reasonable assurance against accidental disconnection;

d. Have the vacuum brake engine manifold connection at least ⅜ inch in diameter.

31.3(3) *Brake lining.* The brake lining on every motor vehicle and trailer shall be so constructed and installed as not to be subject to excessive fading and grabbing and shall be adequate in thickness, means of attachment, and physical characteristics to provide for safe and reliable stopping of the motor vehicle.

31.3(4) *Single valve to operate all brakes.* Every motor vehicle, the date of manufacture of which is subsequent to June 30, 1953, which is equipped with power brakes, shall have the braking system so arranged that one application valve shall when applied operate all the service brakes, on the motor vehicle or combination of motor vehicles. This requirement shall not be construed to prohibit motor vehicles from being equipped with an additional valve to be used to operate the brakes on a trailer or trailers. This rule shall not be applicable to driveaway-towaway operations unless the brakes on such operations are designed to be operated by a single valve.

31.3(5) *Warning devices and gauges.*

a. Air brakes. Every bus, truck and truck tractor using compressed air for the operation of its own brakes or the brakes on any towed vehicle shall be equipped with a warning signal readily audible or visible to the driver, which will give continuous warning at all pressures below a fixed pressure not less than one-half the compressor governor cutout pressure. In addition, each such vehicle shall be equipped with a pressure gauge which will indicate to the driver the pressure in pounds per square inch available for braking.

b. Vacuum warning signal. Every bus, truck and truck tractor using vacuum for the operation of its own brakes or the brakes on any towed vehicle shall be equipped with a warning signal readily audible or visible to the driver, which will give continuous warning at any time the vacuum in the vehicle's supply reservoir is less than eight inches of mercury. In addition, each such vehicle shall be equipped with a vacuum gauge which will indicate to the driver the vacuum in inches of mercury available for braking.

31.4(325) Glazing and window construction.

31.4(1) *Glazing in specified openings.*

a. Windshield condition. Every motor vehicle windshield shall be free of discoloration or other damage, except that discoloration and damage as follows are allowable:

(1) Coloring or tinting applied in manufacture for reduction of glare.

(2) Any crack not over ¼ inch wide, if not intersected by any other crack and if it does not interfere with the driver's vision.

(3) Any damaged area which can be covered by a disc ¾ inch in diameter, if not closer than 3 inches to any other such damaged area and does not interfere with driver's vision.

b. Use of vision-reducing matter. No motor vehicle may be operated with any label, sticker, decalcomania or other vision-reducing matter covering any portion of its windshield or windows at either side of the driver's compartment, except that stickers required by law may be affixed, at the bottom of the windshield, provided no portion of any label, sticker, decalcomania, or other vision-reducing matter may extend upward more than 4½ inches from the bottom of such windshield.

31.4(2) *Window construction.* Windows in trucks and truck tractors. Every truck and truck tractor, except vehicles engaged in armored car service, shall have, in addition to the area provided by the windshield, at least one window on each side of the driver's compartment which windows shall have sufficient area so as to allow clear and unrestricted vision to the right and left. However, if the cab is designed with clear openings where doors or windows are customarily located, then no windows shall be required in such locations.

31.5(325) Fuel systems.

31.5(1) *Requirements and prohibitions.*

a. Fuel container location. No part of any fuel tank or container or intake pipe shall project beyond the over-all width of any motor vehicle upon which it is mounted. No part of any fuel tank shall be located forward of the front axle of the power unit upon which it is located, except that this requirement shall not apply to trucks manufactured prior to September 30, 1953, which have a total fuel capacity of less than 20 gallons, nor shall fuel be supplied to the engine of a bus, truck or truck tractor from a fuel tank or container located on a semitrailer or trailer.

b. Fuel container on bus. No part of any fuel tank or container or intake pipe shall be located within or above the passenger-carrying portion of any bus unless securely sealed off from such compartment by means of a substantial metal cover. The fuel container, including intake pipes, caps and vents, on every bus, except buses having a seating capacity of nine or less persons, shall be so designed that, in the event of overturn, the fuel will not be spilled at a rate in excess of one ounce per minute.

c. Gravity or siphon feed prohibited. No fuel system on a motor vehicle shall be so constructed as to permit gravity or siphon feed direct to the carburetor or injector.

d. Selector valves. If a motor vehicle is equipped with a selector control valve for fuel feed from two or more tanks, such valve shall be installed so that either (1) it is in normal reach of the driver so that he can readily operate it without taking his eyes from the road or moving from his customary driving position, or (2) the driver must stop the vehicle and leave his seat in order to operate the valve.

e. Liquid fuel tank requirements.

(1) Every liquid fuel tank or container used for fuel for use on any motor vehicle shall be of substantial construction, free of leaks, securely attached to the motor vehicle, and shall have its filling opening provided with a plug or cap with means for securing it in place, such as by the use of properly fitted screw threads or bayonet type joint, and without leaks except as elsewhere provided in these rules with regard to tank vents.

(2) Replacement side-mounted gasoline tanks, the date of manufacture of which is subsequent to November 30, 1953, shall comply with the requirements of paragraphs "*f*" and "*i*" of this rule.

f. Liquid fuel tank construction.

(1) *Material.* Material used in the construction of the tank and its fittings shall be suitable for the purpose intended.

(2) *Joints.* Joints of the tank body shall be closed only by arc, gas, seam or spot welding, brazing or silver soldering.

(3) *Fittings.* The tank shall be provided with suitable flanges or spuds for the assembly of all fittings.

(4) *Threads.* Threads on all fittings shall be American (national) standard taper pipe thread or SAE standard sort dryseal taper pipe thread except that straight (nontapered) threads may be used on fittings having integral flanges and using gaskets for sealing. There shall not be less than four full threads in engagement in any fitting.

(5) *Drains and bottom fittings.* Drains and other bottom fittings shall not extend more than ¾ inch below the lowest part of the tank and shall be designed or guarded to minimize their being torn loose. All drain fittings shall be so de-

signed and located as to permit complete drainage. The drain shall be located in a suitable flange or spud.

(6) *Fuel discharge line.* The fitting through which the fuel is drawn from the tank shall be located above the normal full line of the tank.

(7) *Excess flow valve.* When pressure devices are used to force fuel from the tank, means shall be provided to prevent the continued flow of fuel in the event the fuel feed line is broken.

(8) *Fill-pipe design.* The fill-pipe shall be designed and located so as to minimize the probability of its being torn loose in the event of an accident. The fill-pipe and vents on any fuel tank having a total fuel capacity in excess of 25 gallons shall be so designed and constructed as to permit filling at a rate of at least 20 gallons per minute without spillage.

(9) *Air vent.* Every fuel tank shall be equipped with an air vent of a nonspill type (ball check or equivalent). The air vent may be mounted separately or combined with the filler cap or safety vent.

(10) *Safety vents, fusible.* Side-mounted fuel tanks having a total capacity in excess of 25 gallons shall be provided with a fusible safety vent or vents which shall be so designed as to limit the pressure rise in the tank under any fire condition to a maximum of 50 pounds per square inch gauge. The vent area shall be sufficient to prevent a rise in pressure in the tank of more than ten percent of the release pressure of the safety vent or vents when the tank is subjected to a fire of any magnitude. If but one fusible safety vent is provided, it shall be located in the top of the tank; if more than one fusible safety vent is provided, at least one shall be in the top of the tank.

(11) All fuel tanks having a fuel capacity in excess of 25 gallons shall be provided with means of relieving pressure in the tank due to fire before such pressure would result in the failure of the body, seams or any bottom opening in the tank.

g. Liquid fuel tank capacity markings. The tank shall be marked with its liquid capacity and shall be provided with means to indicate that it shall not be filled to more than 95 percent of its total capacity.

h. Liquid fuel tank identity markings. Each tank shall be marked to identify its manufacturer and to indicate the approximate date of manufacture by lot number or otherwise.

i. Liquid fuel tank installation.

(1) *General requirement.* The tank shall be mounted in accordance with the best commercial practice.

(2) *Location of fill-pipe.* The nozzle opening in the fill-pipe shall be outside the cab or body and must be so located as to minimize the likelihood of spillage of fuel during the filling process on the exhaust system or battery.

j. Liquid fuel tank tests.

(1) *Drop test on corner of tank.* The tank when filled with water equal in weight to that of its fuel capacity shall withstand without leakage a drop of 30 feet falling so as to strike squarely on one corner on concrete or equivalent surface which shall not rupture under the impact. The fill-pipe and cap, fuel gauge sending device, and the air intake and safety vents shall not leak more than one ounce of water per minute as a result of this test.

(2) *Drop test on fill-pipe.* The tank when filled with water equal in weight to that of its fuel capacity shall withstand without leakage a drop of ten feet falling so as to strike squarely on the fill-pipe on concrete or equivalent surface which shall not rupture under the impact. The fill-pipe or cap shall not leak more than one ounce of water per minute as a result of this test.

(3) *Safety vent test.* The safety vent, or vents, shall limit the rise in internal pressure in the tank to a maximum of 50 pounds per square inch gauge when the tank is filled to ¼ of rated capacity with standard fuel and placed in inverted position with the fuel feed outlet connection plugged when an enveloping flame is applied to the tank with sufficient intensity to produce an internal fuel temperature rise of 6° to 8°F. per minute starting from a fuel temperature of 50° to 80°F. Neither the tank, fill-pipe, fuel gauge, air intake vent nor any other opening except blown fusible plugs shall leak more than one ounce of fuel per minute after having been subjected to these conditions. Other types of tests or calculations may be employed to determine compliance with this requirement if a comparable result is obtained.

(4) *Rupture test.* The tank and all appurtenances including the fill-pipe, cap, fuel gauge and air intake vent shall withstand without rupture an internal hydrostatic pressure of 150 percent of the maximum at which the safety vent is required to release.

(5) *Spillage test.* At ordinary room temperature the tank when filled to capacity with its normal fuel and turned through an angle of 150 degrees from its normal position, with outlet pipe plugged, shall not spill or leak fuel at a rate greater than one ounce per minute. The fill-pipe, cap, fuel gauge outlet, air intake vent, safety vent, and any other openings shall withstand this test.

k. Liquid fuel tank certificates. Every gasoline fuel tank designed and constructed to comply with these requirements shall be plainly and permanently marked with the date of manufacture and a certification of the manufacturer that it complies with such requirements.

31.5(2) *Liquefied petroleum gas fuel systems.* Every motor vehicle utilizing liquefied petroleum gas for any purpose shall be equipped with a fuel system, being utilized for such purpose, which complies with Division IV, June 1959 edition of the "Standards for the Storage and Handling of Liquefied Petroleum Gas" of the National

Fire Protection Association, 60 Batterymarch Street, Boston 10, Massachusetts, provided, however, that such fuel systems installed on motor vehicles prior to the effective date of this order shall comply with the "Standards for the Storage and Handling of Liquefied Petroleum Gas" of the National Fire Protection Association, as published in the 1951 edition, or such subsequent edition of the "Standards for the Storage and Handling of Liquefied Petroleum Gas" of the National Fire Protection Association, in effect at the time of such installation; provided further, however, that in any case compliance with the 1959 edition shall be deemed to be permissible. This section, in every case, requires the marking of the container in such fuel system to indicate compliance with the standard as provided herein.

31.6(325) Coupling devices and towing methods.

31.6(1) Coupling devices and towing methods, except for driveaway-towaway operations.

a. Fifth wheel mounting. The lower half of every fifth wheel mounted on any truck tractor or dolly shall be securely affixed to the frame thereof by U-bolts of adequate size, securely tightened, or by other means providing at least equivalent security. Such U-bolts shall not be of welded construction. The installation shall be such as not to cause cracking, warping, or deformation of the frame. Adequate means shall be provided positively to prevent the shifting of the lower half of a fifth wheel on the frame to which it is attached.

b. Fifth-wheel parts, securing. The upper half of every fifth wheel shall be fastened to the motor vehicle with at least the security required for the securing of the lower half to a truck tractor or dolly.

c. Fifth wheel locking. Locking means shall be provided in every fifth wheel mechanism, including adapters when used, so that the upper and lower halves may not be separated without the operation of a positive manual release. A release mechanism operated by the driver from the cab shall be deemed to meet this requirement. On fifth wheels designed and constructed as to be readily separable, the fifth wheel locking device shall apply automatically on coupling for any motor vehicle the date of manufacture of which is subsequent to December 31, 1952.

d. Tow bar. Every trailer shall be equipped with a tow bar and means of attaching the tow bar to the towing and towed units which shall be structurally adequate for any weight drawn, properly and securely mounted, without excessive slack but with sufficient play to allow for universal action of the connection, and provided with a suitable locking means to prevent accidental separation of the towed and towing motor vehicle. The mounting of the trailer hitch (pintle-eye or equivalent mechanism) on the towing motor vehicle shall include sufficient reinforcement or bracing of the frame to provide sufficient strength and rigidity and to prevent undue distortion of the frame.

e. Tracking. Coupling devices shall be so designed, constructed and installed, and the vehicles in the combination shall be so designed and constructed, as to insure that any vehicle or vehicles being towed on level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving from side to side over three inches to each side of the path of the towing vehicle when it is moving in a straight line.

f. Safety chains. Every trailer shall be coupled with a safety chain or chains (stay chains or cables) directly to the frame of the motor vehicle by which it is to be towed. Attachment to the pintle hook will not meet this requirement. No more slack shall be left in safety chains or cables than shall be necessary to permit proper turning. Chains or cables shall be so connected to the towed and towing vehicle and to the tow bar as to prevent the tow bar from dropping to the ground in the event the tow bar fails. The means of attachment to both the towing and towed vehicles shall be capable of developing the full capacity of the safety chains or cables. Each chain or cable shall have an ultimate strength at least equal to the gross weight of the trailer being towed. Every trailer and every dolly used to convert a semitrailer to a trailer shall be equipped with two safety chains or cables; the points of attachment of which to the frame or axle of the full trailer dolly shall be not less than 48 inches apart, or as near thereto as the configuration of the frame or axle permits.

g. Location of lower half of fifth wheel. The lower half of every fifth wheel shall be so located that, for any condition of loading, the relationship of position of king pin to the rear axle or axles of the towing motor vehicle results in proper distribution of the total gross weight of the motor vehicles to the axles and does not unduly interfere with the steering, braking, or maneuvering of the towing motor vehicle, or otherwise contribute to the unsafe operation of the motor vehicles comprising the combination.

h. Location of upper half of fifth wheel. The upper half of every fifth wheel shall be so located as to accomplish proper distribution of weight to the axles and safe movement of the combination of motor vehicles in all turning maneuvers.

31.6(2) Coupling devices and towing methods, driveaway-towaway operations.

a. Number in combination. No more than two saddle-mounts may be used in any combination. No more than one motor vehicle shall be towed by tow bar.

b. Bumper tow bars on vehicles prohibited. Tow bars of the type which depend upon the bumpers as a means of transmitting forces between the vehicle shall not be used.

(1) *Tow bars, structural adequacy and mounting.* Every tow bar shall be structurally adequate and properly installed and maintained.

(2) *Tracking.* The tow bar shall be so designed, constructed, maintained, and mounted as to cause the towed vehicle to follow substantially in the path of the towing vehicle. Tow bars of such design or in such condition as to permit the towed vehicle to deviate more than three inches to either side of the path of a towing vehicle moving in a straight line are prohibited.

31.7(325) Heaters. On every motor vehicle, every heater shall comply with the following requirements:

31.7(1) *Definition.* "Heater" means any device or assembly of devices or appliances used to heat the interior of any motor vehicle.

31.7(2) *Prohibited types of heaters.* The installation or use of the following types of heaters is prohibited:

a. Exhaust heaters. Any type of exhaust heater in which the engine exhaust gases are conducted into or through any space occupied by persons or any heater which conducts engine compartment air into any such space.

b. Unenclosed flame heaters. Any type of heater employing a flame which is not fully enclosed, except that such heaters are not prohibited when used for heating the cargo of tank motor vehicles.

c. Heaters permitting fuel leakage. Any type of heater from the burner of which there could be spillage or leakage of fuel upon the tilting or overturning of the vehicle in which it is mounted.

d. Heaters permitting air contamination. Any heater taking air, heated or to be heated, from the engine compartment or from direct contact with any portion of the exhaust system; or any heater taking air in ducts from the outside atmosphere to be conveyed through the engine compartment, unless said ducts are so constructed and installed as to prevent contamination of the air so conveyed by exhaust or engine compartment gases.

31.8(325) Defrosting device. Every bus, truck and truck tractor shall be equipped with a device or other means, not manually operated, for preventing or removing such obstructions to the driver's view: Provided, however, that this section shall not apply in driveaway-towaway operations when the driven vehicle is a part of the shipment being delivered.

31.9(325) Rear-vision mirrors. Every bus, truck and truck tractor shall be equipped with two rear mirrors, one at each side firmly attached to the outside of the motor vehicle and so located as to reflect to the driver a view of the highway to the rear along both sides of the vehicle: Provided, however, that only one outside mirror shall be required, which shall be at the driver's side, on trucks which are so constructed that the driver has a view to the rear by means of interior mirror: And provided further, that in driveaway-towaway operations the driven vehicle shall have at least one mirror furnishing a clear view to the rear.

31.10(325) Speedometer. Every bus, truck and truck tractor shall be equipped with a speedometer indicating vehicle speed in miles per hour, which shall be operative with reasonable accuracy; however, this requirement shall not apply to any driven vehicle which is part of a shipment being delivered in a driveaway-towaway operation if such driven vehicle is equipped with an effective means of limiting its maximum speed to 45 miles per hour or to any towed vehicle.

31.11(325) Exhaust system location. No part of the exhaust system of any motor vehicle shall be so located as would be likely to result in burning, charring, or damaging the electrical wiring, the fuel supply, or any combustible part of the motor vehicle. The exhaust system of every bus shall discharge to the atmosphere at or within six inches forward of the rearmost part of the bus. The exhaust system of every truck and truck tractor shall discharge to the atmosphere at a location to the rear of the cab or, if the exhaust projects above the cab, at a location near the rear of the cab. Any defects in the manifold or exhaust system causing exhaust gases to be emitted at other than proper exhaust point shall be corrected immediately.

31.12(325) Floors. The flooring in all motor vehicles shall be substantially constructed, free of unnecessary holes and openings, and shall be maintained so as to minimize the entrance of fumes, exhaust gases or fire. Floors shall not be permeated with oil or gasoline, and shall have the interior surface in safe condition.

31.13(325) Protection against shifting cargo. Carrying cargo such as beams, pipes, sheet steel and heavy rolls, the nature of which is such that the shifting thereof due to rapid deceleration or accident would be likely to result in penetration or crushing of the driver's compartment must, in addition to having the load securely fastened or braced, be provided with header boards or similar devices of sufficient strength to prevent such shifting and penetration. All motor vehicles shall be so constructed or be equipped with adequate cargo fastening devices so that the load will not shift so as to cause the driver to lose control while traversing any curve on a highway or while making a turn at any urban intersection.

31.14(325) Recapped or regrooved tires. Recapped tires or regrooved tires may not be used on the steering axle or axles of any bus, truck or truck tractor.

31.15(325) Special tires. Special use tires and tires commonly known as piggy-back trailer

tires or tires manufactured for specific type short haul operations shall not be used on any bus, truck or truck tractor, trailer or semitrailer engaged in over-the-road operation.

CHAPTERS 32 to 34
Reserved for future use.

TITLE V
FIRE PROTECTION

CHAPTER 35
CLASS "A" ESCAPES

35.1(103) Metal spiral and tubular slide type and enclosed fireproof stairways. Spiral and tubular slide fire escapes shall be considered as Class "A" escapes and will be permitted when general plans and specifications for such escapes have been filed with the state fire marshal by the manufacturer and approved by the fire marshal. Plans for each installation shall be submitted for approval before escape is fabricated.

Enclosed fireproof stairs may be considered as Class "A" escapes when approved as such by the state fire marshal.

[Filed December 19, 1956]

CHAPTER 36
CLASS "B" ESCAPES

36.1(103) Iron stairway fire escapes—balconies.

36.1(1) *Frames.* All frames shall be constructed according to specifications noted in 36.1(103) for balconies for ladder escapes with exception of opening and depth, and of sufficient length to permit of an easy (or about 45 degrees) pitch to the stairs. All balconies shall be not less than 26 inches deep and 12 inches longer than width of exit, said 12 inches to extend in direction of downward flight of stairway, and shall not be less than 54 inches deep at turns, and the full width of stairway must be maintained at all turns in stairways.

36.1(2) *Posts.* All railings and posts for stairway balconies to be constructed the same as for ladder balconies, 37.1(103), except that posts at open end of balconies shall be braced and intermediate posts shall be braced at least every six feet to the top member of brackets and which shall extend at least ten inches beyond balcony platform, to provide support for a 1¼ x 1¼ x 1¼-inch angle [iron], or a ⅝-inch round or square brace to posts fastened about 15 inches above balcony frame.

36.1(3) *Rails.* Rails of balconies for Class "B" escapes shall be constructed as provided for ladder or Class "C" escapes, 37.1(103). Provided, however, that all stairway escapes hereafter erected on school buildings shall be constructed with filling-in bars or wire mesh in which case a two-rail system may be used with bottom rail not more than eight inches above the floor of balcony and shall be of 1½ x ⅜-inch bar, or of 1½ x 1½ x ¼-inch angle iron, and a top rail of 1¾ x ½-inch bar, or 1¾ x 1¾ x ¼-inch angle iron and not less than three feet above balcony floor. Rails at dead ends to be leaded or cemented into the wall not less than four inches.

36.1(4) *Filling-in bars or wire mesh.* The standard or filling-in bars shall be not less than ⅝-inch round or square iron, well riveted or welded to the top and bottom rails of all balconies and stairways, and shall be placed not more than six inches apart, or a wire mesh filling may be used, the same to be constructed of not smaller than ten-gauge wire with not larger than 1½-inch mesh, securely fastened to all posts and railings of balconies and stairways.

36.1(5) *Brackets—balconies.* Bracket construction of angle iron shall be not less than 1¾ x 1¾ x ¼-inch angle iron, firmly secured at all points of intersection of main members to ¼-inch gusset plates, by at least two ½-inch rivets. Where width of balcony exceeds 42 inches, interior braces of 1½ x 1½ x ¼-inch angle iron, or its equivalent, shall be securely riveted to main members of bracket. The anchorage of all angle iron brackets shall consist of one-inch round iron, securely riveted with not less than three ½-inch rivets to the top member of bracket and passing through the wall and secured both above and below as specified for brackets for ladder balconies. Angle of brackets shall be same as for ladder escapes. [See 37.2(3).]

36.2(103) Stairways.

36.2(1) *Stairway clearance.* No stairway shall be erected closer than four inches from any portion of walls of building.

36.2(2) *Stringers.* Stringers for stairs to be not less than 2¼ x 5/16-inch iron, two on each side of stair with steps securely bolted to same and so spaced that no part of tread will protrude beyond stringers. Stairway stringers to be securely fastened to the balconies with ½-inch bolts.

36.2(3) *Steps.* Steps to be made of at least five ½-inch square irons with corners upward, firmly riveted or welded to steel plates at each end. Said plates to be 2¼ inches by 5/16-inch mild steel firmly bolted with ½-inch bolts to stringers and punched 1¾ inches center to center, forming a tread not less than seven inches wide and 22 inches long.

36.2(4) *Rise.* Steps to be spaced so as to make about eight-inch rise. On counterbalance stairways there shall be provided between the four upper treads a filling-in riser, of the same construction as stair treads, attached to and parallel with lower members of stringers.

36.2(5) *Posts.* Angle iron posts 1¾ x 1¾ x ¼-inch shall be spaced not to exceed four feet

apart on all stairways, and shall be rigidly fastened to the stringers of stairway.

36.2(6) *Rail.* Railings for stairways to be the same as balcony railings, [see 37.1(4)], except that no brace posts shall be required and all double width stairways shall have railings on both sides of stairway. All single width stairways, where there is more than four-inch space between stairways and walls, recesses or openings in walls, shall be provided with railings on the inside, the same as specified for outside of stairways.

36.2(7) *Double width stairs.* Where double width stairways are constructed they must be designed to carry the double load required, the treads to be composed of at least five ¾-inch square irons, corners upward, and firmly riveted or welded to steel plates at each end, provided that where a center stringer is used, the treads shall conform to specifications for single stairways. Class "B" fire escapes for hospitals shall be double width and reach ground direct.

36.2(8) *Stair bracket.* Where any flight of stairway exceeds 16 feet in length, a bracket complying with bracket specifications to provide support and stiffening shall be placed as near midway of the flight as possible.

36.2(9) *Intermediate platform.* Whenever the length of any stairway (Class "B") fire escape shall exceed 20 feet between platforms, an intermediate platform not less than three feet in length and the full width of escape shall be provided.

36.2(10) *Terminal balcony.* In all cases where stairway (Class "B") fire escapes terminate within six and one-half feet from the ground, they shall be provided with a balcony at bottom the full width of stairway and not less than 30 inches in length.

36.2(11) *Exits.* Fire escapes erected on theaters, opera houses and school buildings, public halls and assembly rooms shall be reached through doorways provided at floor level on each floor and shall reach ground either direct or by counterweight or counterbalance stair. Provided, however, that buildings used strictly for high school purposes may be exempted from this rule because of construction or other exceptionally favorable conditions. Every (Class "B") fire escape that reaches the ground direct shall be firmly anchored to a cement or stone block footing. Exits to Class "A" and Class "B" fire escapes shall be doors at floor level and open outward.

All hospitals, sanatoriums, infirmaries, homes for the aged, county homes and other similar institutions shall be equipped with an approved type of spiral or tubular fire escape.

36.2(12) *Counterbalanced stair.* Counterweight or counterbalanced stairways shall be constructed from lower balcony to the ground, and must be railed on both sides, and so braced and strengthened as to withstand the stresses produced when loaded stairway strikes the ground. The path described by the operation must be free from any obstruction which might prevent the successful operation of same.

36.3(103) Counterweight construction.

36.3(1) *Brackets.* Top bracket to be standard construction for brackets. Lower bracket construction may be two standard brackets, or their equivalent, with not less than four-inch channel iron crossplate on top. Where special lower brackets are provided they shall be attached to wall by two expansion bolts not less than ⅝-inch in diameter.

36.3(2) *Guides for counterweight.* Guides shall be not less than two 1¾ x 1¾ x ¼-inch angle iron or two iron rods not less than ¾-inch diameter arranged in such manner that counterweight is securely retained. Guides to be securely attached to upper and lower brackets, with two nuts on bolts.

36.3(3) *Sheaves.* Not less than two sheaves of self-lubricating type shall be provided. For ⅝-inch cable the diameter of sheaves shall not be less than ten inches. For one-half-inch cable the diameter of sheaves shall be not less than eight inches.

36.3(4) *Housing.* Housing for sheaves shall be constructed of sheet iron not less than No. 10 gauge and shall enclose both sheaves to their full depth.

36.3(5) *Cables.* Cables shall be not less than ½-inch diameter flexible hoisting cable.

36.3(6) *Counterweights.* Counterweights shall be so constructed that they will operate freely in guides under any weather conditions.

36.3(7) *Bails.* Bails shall be constructed of not less than ¾-inch diameter iron rod attached to outside of stair stringers and provided with crossbar equal to width of stair at top of bail, with a minimum head clearance of not less than seven feet at all times.

CHAPTER 37
CLASS "C" ESCAPES

37.1(103) Iron ladder fire escapes—balconies.

37.1(1) *Material.* All balconies for ladder fire escapes hereafter erected must be of wrought iron or mild steel, not less than twenty-eight inches deep and six feet long.

37.1(2) *Frame.* The balcony frame shall be made continuous of not less than 1¾ x 1¾ x ¼-inch angle iron securely riveted or welded together, with crossbars every two feet, said bars to be punched ½-inch square every 1¾ inches center to center, and ½-inch square iron with corners upward forced through the same, leaving a manhole of not less than 24 x 24 inches located to clear side

of exit to balcony by at least six inches. The crossbars to be securely riveted, welded, or bolted to the angle iron frame. Said crossbars must be not less than 1¾ x ⅜-inch iron. Balconies over 30 inches wide must have at least one 1¾ x ¼-inch T-iron lengthwise through the balcony.

37.1(3) *Posts.* Said balconies to have a 1¾ x 1¾ x ¼-inch angle iron post every three feet, bolted to the balcony.

37.1(4) *Rails.* Balconies to be equipped with three rails of angle iron, or pipe. Angle iron to be 1¾ x 1¾ x ¼-inch. Pipe rail to be ¾-inch inside diameter pipe. Top rail to be not less than three feet, and bottom rail not more than eight inches above balcony with intermediate rail spaced equally between the two. All railing to be continuous, except the space occupied by ladder, where railings shall be securely bolted to sides of ladder.

Rails shall enter the wall at each end at least four inches and top rail be securely braced to balcony with 1½ x ¼-inch bar.

In lieu of the above a rail system with filling-in bars or wire mesh as described under stairway escapes may be used. [See 36.1(4).]

37.2(103) Brackets for balconies of ladder escapes.

37.2(1) *Material.* There shall be not less than three one-inch square or one-inch diameter round mild steel brackets to every six-foot balcony, brackets to be spaced not to exceed three feet apart. Brackets as specified for stairway escapes may be used. [See 36.2(8).]

37.2(2) *Fastenings.* Top bar of said bracket must pass through the wall of the building and be bolted on the inside with a nut and 4 x 4 x ⅜-inch plate iron washer back of nut. Where walls are of frame construction, or veneered, said brackets must be secured by a 4 x ⅜-inch plate, or two, 2 x 5/16-inch iron bars securely spiked to each studding on inside of wall and running the full length of balcony.

37.2(3) *Angle.* The angle of brackets to be about 45° and not less than 30° without special permission from the state fire marshal, and to pass into the wall at least 4 inches at bottom.

37.3(103) Ladders.

37.3(1) *Material.* Rungs of ladders to be ½-inch square iron, with the corners upward. Every rung to be riveted and to be 14-inch centers. All ladders must be 18 inches between side guards, which shall be not less than 2 x 5/16-inch iron.

37.3(2) *Location.* All such ladders, when erected on buildings, to be placed to the side of the windows, opposite the wall or pier, securely fastened with hook bolts, on the inside of each side bar, to the balconies and not less than 24 inches away from the wall, and to start 6½ feet from the ground. In lieu of starting ladder within 6½ feet from the ground a drop ladder may be hung at second story in such a manner that it can be easily lowered in case of necessity, same to be secured by guides to insure safe upright position when ladder is lowered, and to be secured at second story in such manner as to be easily dropped without lifting. The vertical distance between anchorage for all ladders shall not exceed 12 feet.

37.4(103) General requirements.

37.4(1) *Use of other materials.* Materials of the following type and meeting the following specifications may be used in the construction of all classes of fire escapes in addition to or in substitution of the materials heretofore authorized for such use:

Steps, double width stairs, balconies, landing platforms and walkways may be constructed of serrated or antiskid open type steel grating. The material from which the sections are made shall not be less than 12-gauge thickness.

Openings in the surface shall not be more than ⅞ inches wide and 1½ inches long or less than ½ inch wide and 1½ inches long. All sections shall be capable of supporting a uniform superimposed load of 100 pounds per square foot without causing a deflection in excess of 1/240 of the span.

37.4(2) *Rivets and bolts.* All rivets and bolts used in general construction to be not less than ½-inch diameter unless otherwise specified and all rivets to be driven hot, with heads concentric, with all holes well filled and rivet heads well rounded where clearance will permit.

37.4(3) *Material.* The use of second-hand material will not be permitted, and will be condemned if found in fire escape construction.

37.4(4) *Fittings.* No cast iron fittings shall be used.

37.4(5) *Roof ladder.* All fire escapes to have a ladder of standard construction extending from top story balcony over and three feet above the roof, with gooseneck construction securely fastened to the roof or wall. The bottom of said ladder to be secured to balcony, and in no case shall said ladder be constructed to lean outward from the building. When more than one fire escape is erected on a building, the number of roof-ladder extensions may be limited to a reasonable number necessary for fire-fighting purposes.

37.4(6) *Holes in masonry.* All holes in masonry must be filled with best Portland cement mortar.

37.4(7) *Painting.* All work must be painted with not less than two coats of paint, one of iron oxide and linseed oil in shop, and one of graphite and linseed oil after erection. The field coat to be different color than shop coat.

37.4(8) *Factor of safety.* Balconies and stairways shall be capable of sustaining a live load

of 100 pounds to the square foot. Fire escapes shall have a factor of safety of not less than four.

37.4(9) *Approval of plans.* Duplicate sets of blueprints of plans and specifications for fire escapes should be submitted to the state fire marshal for approval before beginning fabrication in the shop. If plans are acceptable, they will be approved, one set being returned to the sender and the other retained for the files of the state fire marshal.

37.4(10) *Maintenance and painting.* Steel members of all classes of outside fire escapes shall be painted before and after erection.

All outside fire escapes shall be inspected at least once each year and shall be scraped and painted as often as necessary to maintain them in proper condition at all times.

All outside fire escapes shall be kept clear of all obstructions.

All outside fire escapes shall be promptly cleaned after snow or ice has accumulated thereon.

No obstructions such as telephone or lighting wires shall be permitted on or near outside fire escapes. Electric light or power wires shall not be directly over or within three feet of outside fire escapes or balconies, unless such wires are enclosed in rigid conduit.

[Filed November 25, 1955]

CHAPTER 38
EXITS, RAMPS AND ESCAPES

38.1(103) Doors.

38.1(1) *Doors to open outward.* The entrance and exit doors of all hotels, churches, lodge halls, courthouses, assembly halls, theaters, opera houses, colleges, public schoolhouses and other structures where the hazard is deemed sufficient by the inspector, and the entrance doors to all class and assembly rooms in public school buildings, shall open outward and shall not be fastened against exit or so the same cannot be easily opened from within. (Section 103.8.)

Entrance and exit doors for hospitals or retail stores shall open outward when such arrangement appears warranted by the inspector, subject, however, to the approval of the state fire marshal.

38.1(2) *Emergency exits.* Emergency exit doors for theaters, assembly halls, auditoriums, and dance halls shall be provided as follows: There shall be at least 22 inches emergency exit door width for each 100 persons, or major fraction in excess thereof, and no emergency door shall be less than 44 inches in width except doors to fire escapes. At least one emergency door shall be provided. Emergency exit doors shall have lighted signs over door at night or when room is darkened. All emergency exit doors shall open outward and shall not be fastened against exit, except by antipanic bar locks, while the building is open to the public.

38.1(3) *Foyers.* Foyers, corridors, passageways and stairways for buildings noted in preceding paragraph shall not be of less width than the combined width of aisles leading into same and in no case shall any aisle or passageway be less than 36 inches wide or any foyer or stairway less than 44 inches wide in the clear. Stairs and passageways shall be properly lighted. Auditoriums, assembly halls and dance halls on the second floor of two-story buildings not provided with at least two adequate stairs shall be equipped with fire escapes according to the ratio fixed by law.

38.1(4) *Ramps.* Ramps shall be provided in aisles and passageways leading to exits instead of steps whenever the rise to exit will permit a ramp to be used, and shall be surfaced with suitable nonslip material whenever surface is such as to involve danger of slipping. The rise in a ramp shall not exceed one foot in each seven feet of lineal length except by special permission of the state fire marshal.

38.1(5) *Seats.* Seats in auditoriums, theaters and assembly halls, balconies and galleries shall be securely fastened to the floor, except that railed-in enclosures, boxes or loges with level floors and having not more than 14 seats need not be fastened.

Seats shall be arranged in such manner that no more than 14 seats shall be placed between aisles or more than seven seats between an aisle and the wall when there is no outside aisle at the wall. Seats shall be arranged so that there will not be less than 30 inches from back to back of the seats. Seats without dividing arms shall have their capacity determined by allowing 20 inches per person. No seats shall be placed in the aisles or persons allowed to stand in aisles or foyers. Persons waiting to enter the building shall not occupy more than one-half of lobby, thus leaving one-half of the lobby clear for exit.

[Filed September 14, 1964]

CHAPTER 39
LIQUEFIED PETROLEUM GASES

39.1(101) The standards of "Storage and Handling of Liquefied Petroleum Gas", No. 58, 1969 edition of the National Fire Protection Association and "Installation of Gas Appliances, Gas Piping", No. 54, 1969 edition of the National Fire Protection Association together with their references to other specific pamphlets referred to and contained within the volumes of the National Fire Code, 1969-70 edition of the National Fire Protection Association published in 1969, shall be the rules governing liquefied petroleum gases in the state of Iowa.

39.2(101) No person shall transfer any liquefied petroleum gas into a container, regardless of size, if the container has previously been used for the storage of any other product until the container has been thoroughly purged, inspected

for contamination, provided with proper valves, and determined to be suitable for use as a container for liquefied petroleum gas as prescribed in the standards established under rule 5.1(101) of this chapter.

[Filed August 21, 1957; amended January 15, 1960; June 22, 1962; August 19, 1970]

CHAPTER 40
FLAMMABLE AND COMBUSTIBLE LIQUIDS CODE

40.1(101) The standard of "Flammable and Combustible Liquids Code", No. 30, 1972 edition of the National Fire Protection Association with the exception of the following twelve sections: 2181, 7633, 7635, 7641, 7642, 7643, 7644, 7645, 7646, 7647, 7648, 7649, together with its reference to other specific standards referred to and contained within the volumes of the National Fire Code, 1972-73 edition of the National Fire Protection Association published in 1972, shall be the rules governing flammable and combustible liquids in the state of Iowa.

40.2(101) Storage, and handling and use—plans approved.

40.2(1) Before any construction or new or additional installation for the storage, handling or use of flammable or combustible liquids is undertaken in bulk plants, service stations and processing plants, drawings or blueprints thereof made to scale shall be submitted to the state fire marshal with an application, all in duplicate, for his approval. Within a reasonable time after receipt of the application with drawings or blueprints, the state fire marshal will cause the same to be examined and if he finds that they conform to the applicable requirements of this chapter as written or as modified, shall forthwith signify his approval of the application either by endorsement thereon or by attachment thereto, retain one copy for his files and return to the applicant the other copy plus any additional copies submitted by the applicant. If the drawings or blueprints do not conform to the applicable requirements of this chapter as written or modified as aforesaid, he shall within the time aforesaid notify the applicant accordingly.

40.2(2) If proposed construction or installation is to be located within a local jurisdiction which requires that a local permit be first obtained, the drawings or blueprints shall be submitted to the appropriate local official or body with the application for permit and then except in case of dispute need not be submitted to the state fire marshal. The local official or body, as a condition to the issuance of the permit, shall require compliance with the applicable requirements of this chapter as written or as modified. In the event of dispute as to whether the drawings or blueprints show conformity with the applicable requirements of this chapter as aforesaid the plans and drawings shall forthwith be submitted to the state fire marshal whose decision in the matter shall be controlling.

40.2(3) Drawings shall show the name of the person, firm or corporation proposing the installation, the location thereof and the adjacent streets or highways.

40.2(4) In the case of bulk plants the drawings shall show, in addition to any applicable features required under 40.2(6) and 40.2(7) of this rule, the plot of ground to be utilized and its immediate surroundings on all sides; complete layout of buildings, tanks, loading and unloading docks; heating devices therefor, if any.

40.2(5) In the case of service stations, the drawings, in addition to any applicable features required under subrule 40.2(6) and 40.2(7) of this rule, shall show the plot of ground to be utilized; the complete layout of buildings, drives, dispensing equipment, greasing or washing stalls and the type and location of any heating device.

40.2(6) In the case of aboveground storage the drawing shall show the location and capacity of each tank; dimensions of each tank the capacity of which exceeds 50,000 gallons; the class of liquid to be stored in each tank; the type of tank supports; the clearances as covered in NFPA Pamphlet No.30, 1972 edition; the type of venting and pressure relief relied upon and the combined capacity of all venting and pressure relief valves on each tank, as covered in NFPA Pamphlet No. 30, 1972 edition; the tank control valves as covered in Pamphlet No.30, 1972 edition; and the location of the pumps and other facilities by which liquid is filled into and withdrawn from the tanks.

40.2(7) In the case of underground storage, the drawings shall show the location and capacity of each tank, class of liquids to be stored therein, together with the clearances and requirements covered in NFPA Pamphlet No.30, 1972 edition; and the location of fill gauge and vent pipes and openings as covered in NFPA Pamphlet No.30, 1972 edition.

40.2(8) In the case of an installation for storage, handling or use of flammable or combustible liquids within buildings, or enclosures at any establishment or occupancy covered in this chapter, the drawings shall be in such detail as will show whether applicable requirements are to be met.

40.3(101) Storage, handling and use.

40.3(1) *Flammable liquid in fuel tanks of display vehicles not to include agency showrooms.* Where flammable liquid fueled vehicles are to be displayed at shows, or displays, the following safety precautions shall be taken:

a. Fuel tanks shall contain a minimum amount of fuel, not more than one gallon.

b. Fuel tanks fill cap shall be locked or sealed shut with gummed tape.

c. Batteries shall be disconnected, or removed.

d. Vehicles shall be displayed in roped off areas, and kept locked, unless an attendant is in the immediate area.

e. Drapes, curtains, and decorative materials shall be of flame-proofed material.

40.3(2) *Tank valves.*

a. External valves. Each connection to an aboveground tank storing flammable or combustible liquids, located below normal liquid level, shall be provided with an external control valve located as close as practicable to the shell of the tank. Except for flammable liquids whose chemical characteristics are incompatible with steel, such valves and their tank connections installed after effective date of these regulations shall be of steel.

b. Emergency internal check valves. In addition to any normal valves on aboveground tanks, there must be an extra valve at each pipe line connection to any tank below normal liquid level, which valve is effective inside the tank shell is operated both manually and by an effective heat actuated device which, in case of fire, will automatically close the valve to prevent the flow of liquid from the tank even though the pipe lines are broken from the tank. These extra valves are not required in crude oil tanks in oil fields, on tanks at refineries, or on tanks at terminals which are equipped with a swing line or where facilities are provided to transfer the contents of the tank to another tank in case of fire.

40.3(3) *Venting.* With respect to vents or pressure relief devices on aboveground tanks, control valves on tanks or in piping systems, ventilation or sources of ignition shall be deemed distinctly hazardous and shall be corrected or eliminated; except tanks that were in compliance with the 1957 venting regulations as of the effective date of this amendment need not be corrected until such time of major remodeling.

40.4(101) Bulk plants. Property shall be kept free from weeds, high grass, rubbish and litter, and shall be kept neat, clean and orderly throughout.

40.5(101) Service stations — buildings.

40.5(1) *Basements.*

a. No basement or excavation shall hereafter be constructed under any service station building. Steps shall be taken to eliminate existing basements upon the occasion of any major remodeling of a service station. This restriction shall not apply to garages.

b. Floor shall preferably be of concrete or other fire resisting materials, in all buildings constructed after the effective date of these regulations.

40.5(2) *Service pits.*

a. Except as otherwise provided in 40.5(2), "*c*", no service station or filling station shall be constructed or remodeled after the effective date of these regulations in such a manner as to include a service pit.

b. Service pits existing as of the following date of these regulations shall comply with the following:

(1) No sewer connection shall be permitted from any pit, unless protected with an approved grease trap which will effectively intercept greases and oils, and prevent their entry into the sewer.

(2) If service pits are electrically lighted, lights and switches shall be of explosion-proof construction and wiring in conduit.

c. In an establishment where greasing or other services are to be regularly rendered to vehicles of such type, size or weight or for other good reason, it would be impracticable to utilize ramp or hoist type equipment for these services, a pit may be installed but only after written approval from the state fire marshal upon application in writing accompanied by plans and specifications for the proposed installation. Every such approval shall be on the condition that the proposed installation be constructed and maintained in conformity with the following requirements.

(1) Each pit must be constructed of poured concrete.

(2) All electrical wiring and electric equipment in each pit or used in connection therewith must be explosion-proof and all such equipment shall bear the Underwriters Laboratories label.

(3) Each pit must be equipped with a mechanical exhaust system capable of exhausting five cubic feet of air per minute per square foot of floor area within the pit and shall have a capacity of not less than 1,400 cubic feet per minute. The exhaust system shall be wired electrically so that the system will be in full operation when pit lights are lighted.

(4) The discharge from the exhaust system shall be to the outside atmosphere and located in such a manner that the exhaust air will not reenter the building.

(5) No sewer connection shall be permitted from any pit, unless protected with an approved grease trap which will effectively intercept greases and oils, and prevent their entry into the sewer.

40.6(101) Supervision.

40.6(1) The provisions of 7111 shall not prohibit the dispensing of flammable liquids in the open from a tank vehicle to a motor vehicle. Such dispensing shall be permitted provided:

a. An inspection of the premises and operations has been made and approval granted by the authority having jurisdiction.

b. The tank vehicle complies with the requirements covered in the Recommended Regulatory Standard for Tank Vehicles for Flammable and Combustible Liquids, NFPA No. 385.

c. The dispensing is done on premises not open to the public and the vehicles being serviced are owned or operated by a commercial, or industrial firm, or governmental agency.

d. The dispensing hose does not exceed 50 feet in length.

e. The dispensing nozzle is a listed automatic-closing type without a latch-open device.

f. Nighttime deliveries shall only be made in adequately lighted areas.

g. The tank vehicle flasher lights shall be in operation while dispensing.

h. Fuel expansion space shall be left in each fuel tank to prevent overflow in the event of temperature increase.

40.6(2) The dispensing of flammable or combustible liquids from above ground tanks into the fuel tanks of motor driven vehicles shall not be permitted in cities or towns except in conformity with section 7634, NFPA No. 30, 1972 edition, or the Iowa Standards for the Storage of Flammable and Combustible Liquids on Farms and Isolated Construction Projects.

40.6(3) Dispensing of flammable liquids by commercial, industrial, governmental or manufacturing establishments for fueling vehicles used in connection with their businesses does not require an attendant or supervisor. The dispensing shall be done on premises not open to the public.

40.6(4) *Self-service stations.*

a. Self-service stations shall mean that portion of property where flammable and combustible liquids used as motor fuels are stored and subsequently dispensed from fixed approved dispensing equipment into the fuel tanks of motor vehicles by persons other than the service station attendant, and may include facilities available for sale of other retail products. Any self-service station that has in excess of 50 percent of its gross sales in merchandise other than petroleum products, tires, batteries, motor vehicle accessories, parts, motor service and repair, shall have one attendant on duty with the sole responsibility of supervising the dispensing of petroleum products.

No dwelling unit for the attendant, or sleeping facilities for the attendant, shall be maintained in, or on, the premises of said self-service station, closer than 100 feet from Class I flammable liquid self-service dispensing devices, or 50 feet from Class II flammable liquid self-service dispensing devices.

b. Approved dispensing devices such as, but not limited to coin operated, card operated and remote controlled types, are permitted at self-service stations.

c. All self-service stations shall have at least one attendant on duty within 60 feet of the dispensers of Class I flammable liquid, while the station is open to the public, and in a service station where Class I flammable liquid is regularly dispensed into the fuel tanks of motor vehicles by the station attendant then the presence of such an attendant within 60 feet of the self-service dispenser of Class I flammable liquids shall be prima-facie evidence of compliance with this section.

d. It shall be the responsibility of the attendant to (1) prevent the dispensing of Class I liquids into portable containers not in compliance with 7620, or other state regulations; (2) control sources of ignition; and (3) immediately handle accidental spills and fire extinguishers if needed. The attendant or supervisor on duty shall be mentally and physically capable and alert, and be suitably trained to perform the functions and assume the responsibilities prescribed by this chapter.

e. Emergency controls specified in 7320 shall be installed at a location acceptable to the authority having jurisdiction, but controls shall not be more than 90 feet from the self-service dispenser.

f. Operating instructions shall be conspicuously posted in the dispensing area, and shall be considered a directional sign.

g. The dispensing area shall at all times be in clear view of the attendant, and the placing or allowing of any obstacle to come between the dispensing area, and the attendant control area shall be prohibited, provided however the presence of motor vehicles in the station driveway for the sole purpose of being serviced shall not be considered an obstacle as prohibited in this section. The attendant shall at all times be able to communicate with persons in the dispensing area. Suitable electronic communication devices shall be installed at all flammable liquid dispensers beyond 50 feet of the emergency controls specified in subsection (e) and section 7320.

h. Hose nozzle valves used at a self-service station shall be of the approved automatic-closing type without a latch-open device.

i. Warning signs shall be conspicuously posted in the dispensing area incorporating the following or equivalent wording:

1. **WARNING.** It is unlawful and dangerous to dispense gasoline into unapproved containers;
2. **NO SMOKING;**
3. **STOP MOTOR.**

These signs shall be considered directional signs.

40.7(101) Safety.

40.7(1) Premises shall be kept neat and clean, and free from oil and grease, rubbish, or trash. Only approved water solutions, or detergents, floor sweeping compounds and grease absorbents shall be used for cleaning floors.

40.7(2) Cleaning of parts, in, or around, the service station shall be done with nonflammable solvent except that a flammable solvent with a flash point above 100° F. may be used for the purpose provided adequate ventilation is supplied and

no sources of ignition are present in the cleaning area.
[Filed October 8, 1957; amended January 15, 1960, August 31, 1971, November 24, 1971, December 13, 1972]

CHAPTER 41
OIL BURNING EQUIPMENT

41.1(101) "The Standard for the Installation of Oil Burning Equipment" No. 31, 1972 edition of the National Fire Protection Association with the exception of section 1901 together with its reference to other specific standards referred to and contained within the volumes of the National Fire Code 1972-73 edition of the National Fire Protection Association published in 1972 shall be the rules governing oil burners in the state of Iowa.

41.2(101) The grade of fuel oil used in a burner shall be that for which the burner is approved and as stipulated by the manufacturer. Crankcase oil or any oil containing gasoline shall not be used unless they are reprocessed to meet the stipulations of the proper grade of fuel oil required. For use of oil fuels other than those defined herein see section 1103 of standard No. 31.
[Filed January 15, 1960; amended December 13, 1972]

CHAPTER 42
STORAGE OF FLAMMABLE AND COMBUSTIBLE LIQUIDS ON FARMS AND ISOLATED CONSTRUCTION PROJECTS

42.1(101) "The Standard for the Storage of Flammable and Combustible Liquids on Farms and Isolated Building Projects" #395, 1972 edition of the National Fire Protection Association together with its reference to other specific standards referred to and contained within the volumes of the National Fire Code 1972-73 edition of the National Fire Protection Association published in 1972 shall be the rule for "Storage of Flammable and Combustible Liquids on Farms and Isolated Building Projects".
[Filed January 15, 1960; amended August 31, 1971, December 13, 1972]

CHAPTER 43
TRANSPORTATION AND DELIVERY OF FLAMMABLE AND COMBUSTIBLE LIQUIDS BY TANK VEHICLES

43.1(101) The "Recommended Regulatory Standard for Tank Vehicles for Flammable and Combustible Liquids" No. 385, 1971 edition of the National Fire Protection Association with the exception of the following sections: 5050 and 2231 a, together with its reference to other specific standards referred to and contained within the volumes of the National Fire Code 1972-73 edition of the National Fire Protection Association published in 1972 shall be the rules governing the transportation of flammable and combustible liquids in tank vehicles in the State of Iowa.

43.2(101) Application. This rule shall not apply to the transportation of flammable liquids when in conformity with U.S. Department of Transportation regulations, or regulations lawfully on file with and approved by the U.S. Department of Transportation.

43.3(101) Operation of tank vehicles. Class II or Class III liquids shall not be loaded into an adjacent compartment to Class I liquids unless double bulkheads are provided, nor shall chemically noncompatible chemicals be loaded into adjacent compartments unless separated by double bulkheads. Tank vehicles without double bulkheads constructed and in use prior to the effective date of these rules, shall be permitted to continue to be used, but new construction is not permitted.

43.4(101) Emergency discharge control. The outlets of each cargo tank or compartment used for transportation of Class I liquids and trucks constructed hereafter for transportation of Class II and Class III liquids having a viscosity less than 45 Saybolt Universal Seconds at 100° F., shall be equipped with a reliable and efficient shut-off valve located inside the shell; or in the sump when it is an integral part of the shell; and designed so that the valve must be kept closed except during loading and unloading operations. "However, tank vehicles constructed and in use prior to the effective date of these rules that have no compartment that has a capacity of more than 500 gallons shall not be subject to these provisions."

NOTE: The 45-second viscosity limit is included for the purposes of requiring internal valves when transporting free-flowing distillate oils, such as kerosene, diesel oil and domestic heating oil, and of excluding this requirement when transporting viscous oils such as residual fuel oil, bunker fuel oil and asphalt products which may congeal and cause malfunctioning of the valve.

[Filed January 15, 1960; amended August 31, 1971, December 13, 1972]

CHAPTER 44
CHILDREN'S BOARDING HOMES
DIVISION I
NEW NURSERY FACILITIES

44.1(100) Scope.

44.1(1) Facilities shall include all buildings or portions of buildings, used for nursery facilities requiring license by the Iowa department of social services in accord with chapter 237 of the Code.

44.1(2) *Occupancy restrictions.*

a. Rooms intended for the occupancy of children shall be located only on the floor of exit to exterior of building at ground level.

b. Occupant load of building, or any section thereof to be used for this purpose shall be not less than 35 square feet per person net area, in the

child occupied area. Nurseries where sleeping facilities are provided shall have at least 35 square feet per person in these facilities. If cots are used, there must be 2 feet between cots. Where permanent sleeping equipment is required there shall be at least 50 square feet per child.

44.1(3) *Exits.*

a. There shall be two separate and remote exits from child occupied areas. Doors shall have locks that can readily be opened from the inside without a key, or any special type of knowledge, and cannot be locked against egress. Any room with an area of over 1000 square feet shall have two doorways as remote from one another as possible and leading to separate exits. Exit doors shall swing with exit travel and be equipped with panic hardware if the door is intended to accommodate over 30 children.

b. Distance to an exit shall not exceed 150 feet, from any point in the building.

c. All exit corridors must be at least 6' feet in clear width, and have no appreciable dead ends, more than 20 feet beyond the exit.

d. Every child occupied activity or sleeping room shall have a door, or a window to the outside, which can be readily opened, and is of sufficient size to be used for emergency rescue or ventilation.

e. Interior stairways shall be separated from child occupied spaces by one hour rated enclosure, with at least a 1¾-inch solid core wood door, kept closed at all times.

44.1(4) *Interior finish.*

a. Interior finish shall be Class A in corridors, but may be Class B or C elsewhere. Carpet installations are to have a flame spread of less than 75 and smoke density of less than 100, by ASTME-84 test. Window draperies and curtains for decorative and acoustical purposes shall be flame retardant.

b. Untreated, flammable materials shall not be used for decorative purposes, seasonal or otherwise. Posters, or other temporary educational materials, or aids, are excepted. The use of candles with an exposed flame shall not be allowed except as used for educational purposes and maintained under control of supervising adults.

44.1(5) *Fire alarm.*

a. An approved manual fire alarm system with a distinctive tone must be provided where the facility has more than three child occupied activity or sleeping rooms. This shall be in addition to any other required fire detection or sprinkler system. Fire drills shall be held at least once a month and recorded. A written fire emergency plan shall be written and posted in a conspicuous place.

b. In all facilities there shall be a private line telephone, when available, immediately accessible to staff. Immediately adjacent to the telephone shall be conspicuously posted emergency telephone numbers including fire, police, physician, health agency and ambulance.

44.1(6) *Heating and building service equipment.*

a. Heating, air conditioning, electrical appliances, equipment and wiring shall be of approved types and properly installed.

b. Open flame heating devices are not permitted on the child occupied floor except when completely separated by a one hour rated separation with combustion air from the outside. No portable type heaters are permitted.

c. The burning of trash in incinerators, trash burners or otherwise by children shall not be permitted. Trash burning facilities shall be located in an enclosure separated from child play areas. Open trash burning, or incinerator use, shall be strictly in compliance with state and local regulations.

44.1(7) *Emergency lighting.* If the facility operates at other than daylight hours, emergency lighting shall be required. An approved rechargeable battery powered, automatically operated device may be used.

44.1(8) *Fire extinguishers.* Approved fire extinguishers shall be installed in accordance with National Fire Protection Association Standard No. 10. Class B shall be installed in kitchen and mechanical rooms, and Class A shall be installed elsewhere.

44.1(9) *Construction and occupancy.*

a. Frame or ordinary construction limited to not over two stories in height, shall be equipped with an approved automatic fire, or smoke, detection and alarm system, if it is intended to be occupied by more than 15 children. If it is intended to be occupied by 30 or more children, shall be equipped with an approved automatic sprinkler system.

b. One-hour protected frame construction one story only, shall be equipped with an approved automatic fire, or smoke, detection and alarm system, if it is intended to be occupied by more than 15 children.

c. Noncombustible construction one story only, shall be equipped with an approved automatic fire, or smoke, detection and alarm system, if it is intended to be occupied by over 15 children.

d. Fire resistive construction of any height, shall be equipped with an automatic fire, or smoke, detection and alarm system, if it is intended to be occupied by over 15 children.

e. Corridors shall be at least 6 feet wide in new construction and 44 inches wide in existing licensed facilities. Corridors shall be kept clear at all times. No corridor, or combination of corridors, shall exceed 150 feet in length without an approved smoke barrier.

f. Room doors shall be at least 36 inches wide in new construction and 32 inches wide for existing licensed facilities and shall be 1¾-inch solid core wood or the equivalent. No transoms are permitted over doors. Room doors shall be hung to swing out into corridors.

g. When new construction, additions or alterations are contemplated for a facility, working drawings, plans and specifications shall be submitted to the state fire marshal for review and approval prior to construction.

44.1(10) *Storage.* All flammable materials, including fuel, cleaning fluids and supplies, polishes and matches shall be stored in designated cabinets or storage facilities accessible only to authorized persons. The construction of such facilities shall be in accordance with the provisions of nationally recognized standards, such as NFPA No. 30.

DIVISION II
EXISTING NURSERY FACILITIES

44.2(100) Existing building.

44.2(1) An existing building housing a licensed child care facility, prior to the effective date of these regulations may continue in use if it conforms, or can be made to conform, to the provisions for a new facility to the extent that in the opinion of the fire marshal, or his duly designated subordinate, equivalent life safety against the hazards of fire, explosion or panic is provided and maintained.

Additional means of egress, installation of automatic sprinkler protection, area separations, emergency lighting and other alternate means of protection may be used to provide reasonable life safety from fire and panic. In existing buildings the required flame spread classification of interior surfaces may be secured by applying approved fire-retardant paints or solutions to existing interior surfaces having a higher flame spread rating than permitted. Such paints or solutions shall be renewed as often as necessary to maintain the necessary fire-retardant properties.

44.2(2) Every child occupied area, below the floor of exit discharge, shall have at least one approved exit which leads directly to the exterior to ground level without entering the floor above. Every child occupied area above the floor of exit discharge shall have an approved exit to the outside, with an approved stair to ground level. All windows under and within 10 feet of the stairs are to be equipped with approved wire glass panes.

44.2(3) Sleeping facilities are permitted only on floor of exit discharge. If cots are used there must be 2 feet between cots.

44.2(4) Existing facilities shall comply with 44.1(2)"*b*" through 44.1(10) of regulations for new facilities, unless granted exceptions, or variances under 44.2(1) of this rule.

[Filed July 12, 1972]

CHAPTER 45
HEALTH CARE FACILITIES

DIVISION I
ADULT FOSTER HOMES AND BOARDING HOMES

45.1(100) Definitions.

45.1(1) *Health care facility.* In these regulations "health care facility" or "facility" means any foster home or boarding home requiring licenses by the Iowa department of health in accord with chapter 135C of the Code.

45.1(2) *Adult foster home.* "Adult foster home" means any private dwelling or other suitable place providing for a period exceeding 24 consecutive hours accommodation, board, and supervision, for which a charge is made, to not more than two individuals, not related to the owner or occupant of the dwelling or place within the third degree of consanguinity, who by reason of age, illness, disease or physical or mental infirmity are unable to sufficiently or properly care for themselves, but who are essentially capable of managing their own affairs.

45.1(3) *Boarding home.* "Boarding home" means any institution, place, building or agency providing for a period exceeding 24 consecutive hours accommodation, board and supervision to three or more individuals, not related to the administrator or owner thereof within the third degree of consanguinity, who by reason of age, illness, disease or physical or mental infirmity are unable to sufficiently or properly care for themselves, but who are essentially capable of managing their own affairs.

45.1(4) *Resident.* "Resident" means an individual admitted to a health care facility in the manner prescribed by section 135C.23 who does not require daily services of a registered or licensed practical nurse. An employee of, or an individual related within the third degree of consanguinity to the administrator or owner of, a health care facility shall not be deemed a resident thereof for the purposes of this chapter solely by reason of being provided living quarters within such facility.

45.1(5) *Ambulatory.* The term "ambulatory" when used in these standards shall mean a person who immediately and without aid of another, is physically or mentally capable of walking a normal path to safety including the ascent and descent of stairs.

45.1(6) *Nonambulatory.* The term "nonambulatory" when used in these standards shall mean a person who immediately and without aid of another is not physically or mentally capable of walking a normal path to safety including the ascent and descent of stairs.

45.1(7) *Competent.* Having sufficient physical and mental ability to react to an emergency and put into operation a plan for evacuation and extinguishment.

45.1(8) *State fire marshal.* "State fire marshal" shall mean the chief officer of the division of fire protection as described in 100.1 of the Code or one authorized to act in his absence.

45.1(9) *Fire marshal.* "Fire marshal" means the state fire marshal, any of his staff, or "assistant state fire inspectors", carrying authorized cards signed by the state fire marshal.

45.1(10) *Combustible.* The term "combustible" shall mean capable of undergoing combustion.

45.1(11) *Combustible or hazardous storage area or room.* The term "combustible or hazardous storage area or room" shall mean those areas containing heating apparatus and boiler rooms, basements or attics used for the storage of combustible material, flammable liquids, workrooms such as carpenter shops, paint shops and upholstery shops, central storerooms such as furniture, mattresses and miscellaneous storage, and similar occupancies intended to contain combustible materials which will either be easily ignited, burn with an intense flame or result in the production of dense smoke and fumes.

45.1(12) *Automatic.* The term "automatic" as applied to a door, window or other protection for an opening shall mean that such door, window or other protection is so constructed and arranged that if open it will close when subjected to a predetermined temperature or rate of temperature rise, or products of combustion.

45.1(13) *Flammable liquid.* The term "flammable liquid" shall mean any liquid which is governed by the rules promulgated by the state fire marshal under the state of Iowa laws governing the handling, storage and transportation of flammable liquids.

45.1(14) *Approved.* The term "approved" when used in these standards shall mean acceptable to the state fire marshal.

a. "Approved standards" shall mean any standard or code prepared and adopted by any nationally recognized association.

b. "Approved equipment and material" shall mean any equipment or material tested and listed by a nationally recognized testing laboratory.

c. "Approved" is defined as being acceptable to the state fire marshal. Any equipment, device or procedure which bears the stamp of approval or meets applicable standards prescribed by an organization of national reputation such as the Underwriters Laboratories, Inc., Factory Mutual Laboratories, American Society for Testing Materials, American Insurance Association, National Fire Protection Association, American Society of Mechanical Engineers or American Standards Association, which undertakes to test and approve or provide standards for equipment, devices or procedures of the nature prescribed in these regulations shall be deemed acceptable to the state fire marshal.

45.1(15) *Types of construction.* "Types of construction" shall be as defined in National Fire Protection Association Pamphlet No. 220, published in 1961.

45.1(16) *Story.* A "story" shall mean that part of a building comprised between a floor and the ceiling next above. The first story shall be that story which is of such height above the ground that it does not come within the definition of a basement or cellar. However, if part of a basement qualifies for patient area, it shall be considered the first story.

45.1(17) *Attic.* The term "attic" when used in these standards shall mean the space between the ceiling beams of the top habitable story and the roof rafters.

45.1(18) *Basement.* A "basement" or cellar, for these regulations, shall mean that part of a building where the finish floor is more than 30 inches below the finish grade of the building.

45.1(19) *Exit.* "Exit" is that portion of a means of egress which is separated from all other spaces of the building or structure by construction or equipment as required in these regulations to provide a protected way of travel to the exit discharge.

45.1(20) *Exit access.* "Exit access" is that portion of a means of egress which leads to an entrance to an exit.

45.1(21) *Exit discharge.* "Exit discharge" is that portion of a means of egress between the termination of an exit and a public way.

45.1(22) *Fire partition.* The term "fire partition" shall mean a partition which subdivides a story of a building to provide an area of refuge or to restrict the spread of fire for a minimum of one hour.

45.1(23) *Fire door.* The term "fire door" shall mean a door and its assembly, so constructed and assembled in place as to give protection against the passage of fire, equal to surrounding construction.

45.1(24) *Fire-resistance.* The term "fire-resistance" shall mean that property of materials or assemblies which prevents or retards the passage of excessive heat, hot gases or flames under condition of use. The terms "fire-resistant" and "fire-resistive" shall mean the same as "fire-resistance".

45.1(25) *Fire-resistance rating.* The term "fire-resistance rating" shall mean the time in hours or fractions thereof that materials or their assemblies will resist fire exposure as determined by fire tests conducted in compliance with approved standards.

45.1(26) *Fire wall.* The term "fire wall" shall mean a wall of approved material having adequate fire-resistance and structural stability under fire conditions to accomplish the purpose of completely subdividing a building or of completely separating adjoining buildings to resist the spread of fire. A fire wall shall extend continuously through all stories from foundation to or above the roof.

45.1(27) *Sprinklered.* The term "sprinklered" shall mean to be completely protected by an approved system of automatic sprinklers installed and maintained in accordance with approved standards.

45.1(28) *Automatic sprinkler system.* The term "automatic sprinkler system" shall mean an arrangement of piping and sprinklers designed to operate automatically by the heat of fire and to discharge water upon the fire, according to the standards of the National Fire Protection Association.

45.1(29) *Interior finish material.* Interior finish material shall be classified in accordance with the method of tests of surface burning characteristics of building material National Fire Protection Association Standard No. 255, Test Methods, Surface Burning — Building Materials, 1969. Classification of interior finish material shall be in accordance with tests made under conditions simulating actual installations, provided that the state fire marshal may by rule establish the classification of any material on which a rating by standard test is not available. Interior finish material shall be grouped in the following classes in accordance with their flame spread and related characteristics:

Class A. Interior finish flame spread 0-25.

Class B. Interior finish flame spread 25-75.

Class C. Interior finish flame spread 75-200.

45.2(100) Adult foster home.

45.2(1) Resident may be housed in any private dwelling, but not above the second floor nor in basement or cellar. Nonambulatory residents are to be housed on first floor only.

45.2(2) There shall be two separate means of exit from the residence.

45.2(3) There shall be an approved fire extinguisher located on resident occupied floors as designated by the state fire marshal.

45.2(4) Adult foster care homes shall have an approved means of outside communication such as a telephone, a private line if available.

45.2(5) If residents are housed on an upper floor, there shall be an approved one-hour fire-resistant separation at stairs, with a door, equivalent to 1¾-inch solid core wood. This door is to be kept closed at all times, except when passing through opening. There shall be two approved means of egress from this upper floor.

45.2(6) Occupancies not under the control of, or not necessary to, the administration of an adult foster home, are prohibited therein with the exception of the residence of the owner or manager.

45.2(7) Regular and proper maintenance of all electrical service, heating plant, and exit facilities, neat and proper housekeeping, shall be a requisite for an adult foster care home. Excessive or improper, storage of combustible, or flammable materials is prohibited.

45.3(100) Boarding homes.

45.3(1) *Classification.*

a. Frame or ordinary construction not over two stories in height: Class 1A shall include 15 or less, residents and shall be equipped with an approved automatic fire detection and alarm system. Class 2A shall include 16 or more residents and shall be equipped with an approved automatic sprinkler system.

b. One-hour protected frame construction:

Class 1B shall be one story only and be equipped with an approved automatic fire detection and alarm system.

Class 2B shall be two story, with 20 or less residents, and shall be equipped with an approved automatic fire detection and alarm system. Homes with 21 or more residents shall be equipped with an approved automatic sprinkler system.

c. Noncombustible construction:

Class 1C shall be one- or two-story homes and shall be equipped with an approved automatic fire detection and alarm system.

Class 2C shall be more than two stories and shall be equipped with an approved automatic sprinkler system.

d. Fire-resistive construction any height:

Class 1D shall be fire-resistive construction, any height, and shall be equipped with an approved automatic fire detection and alarm system.

e. New, or additional, construction, or structural alterations, shall be approved by the state fire marshal prior to work being started. Preliminary plans may be submitted for review. Working plans and specifications shall be submitted to the state fire marshal for review and approval. Written approval by the state fire marshal shall be required prior to construction.

45.3(2) *Floor areas.*

a. All floors having a maximum occupancy above 30 persons, shall be divided into two sections by a one-hour fire wall or fire partition with ample room on each side for the total number of beds on each floor.

b. Corridor length between smokestop partitions, horizontal exits, or from either to the end of the corridor shall not exceed 150 feet on any resident occupied sleeping floor.

c. Any smokestop partition shall have at least a one-hour fire-resistance rating and shall be continuous from wall to wall and floor to floor or roof arch above. Openings in a smokestop partition shall be protected by fixed wire glass panels in steel frames, maximum size of 1296 square inches each panel or by 1¾-inch solid core wood doors with vision panel in each door, wire glass not over 720 square inches, as a minimum requirement. Such doors shall be self-closing or may be so installed that they may be kept in an open position provided they meet the requirements of paragraph "d". Doors in smokestop partitions are not required to swing with exit travel. Ample space shall be provided on each side of the barrier for the total number of occupants on both sides.

d. Any door in a fire separation, horizontal exit or a smokestop partition may be held open only by an approved electrical device. The device shall be so arranged that the operation of the required detection, alarm, or sprinkler system will initiate the self-closing action.

e. Every interior wall and partition in buildings of fire-resistive and noncombustible construction shall be of noncombustible materials.

f. Every resident sleeping room shall have an outside window or outside door arranged and located to permit the venting of products of combustion and to permit any occupant to have access to fresh air in case of emergency. Sill height not to exceed 36 inches above floor.

g. Interior finish shall be Class A or B, except in buildings equipped with an approved, complete automatic sprinkler system. Class C may be continued in use except in means of egress.

45.3(3) *Exit details.*

a. Exits shall be of the following types or combinations thereof as defined by the National Fire Protection Association:

(1) Horizontal exits.

(2) Doors leading directly outside the buildings (without stairs).

(3) Ramps.

(4) Stairways, or outside stairs.

(5) Seven-foot spiral slides. Approved only where installed prior to effective date of these regulations.

(6) Exit passageways.

(7) Smoke towers.

b. At least two exits of the above types, remote from each other, shall be provided for every floor or section of the building. At least one exit in every floor or section shall be of type 2, 3, 4, 6 or 7, as listed above. Exterior fire escape stairs may be accepted as a second means of exit.

c. At least one required exit from each floor, resident occupied, above or below the first floor shall lead directly or through an enclosed corridor, to the outside. A second or third required exit, where a more direct exit is impracticable, may lead to a first floor lobby having ample and direct exits to the outside.

d. Travel distance (1) between any room door intended as exit access and an exit shall not exceed 100 feet; (2) between any point in a room and an exit shall not exceed 150 feet; (3) between any point in a resident occupied sleeping room or suite and an exit access door of that room or suite shall not exceed 50 feet. The travel distance in (1) or (2) above may be increased by 50 feet in buildings completely equipped with an automatic fire extinguishing system.

e. Exit doors shall not be locked against the egress by bolts, key locks, hooks or padlocks. A latch type lock is permissible that locks against outside entrance. Panic hardware shall be installed on exit doors of boarding homes with over 30 residents.

45.3(4) *Construction and arrangement.* All stairs, ramps or other ways of exit for areas shall be of such width and so arranged as to avoid any obstruction to the convenient removal of nonambulatory persons by carrying them on stretchers or on mattresses serving as stretchers. A standard 44-inch wide stairway or ramp is the minimum permitted, slope of ramp shall be 1 to 1⅜ in 12 or less.

45.3(5) *Access.*

a. Every sleeping room, unless it has a door opening to the ground level, shall have an exit access door leading directly to a corridor which leads to an exit. One adjacent room such as a sitting or anteroom may intervene if all doors along the path of exit travel are equipped with nonlockable hardware.

b. Any required aisle, corridor or ramp shall be not less than 44 inches in clear width when serving as means of egress from resident sleeping rooms.

c. Corridors and passageways to be used as a means of exit, or part of a means of exit, shall be unobstructed and shall not lead through any room or space used for a purpose that may obstruct free passage. Corridors and passageways which lead to the outside from any required stairway shall be enclosed as required for stairways.

d. All rooms must be equipped with a door. Divided doors shall be of such type that when the upper half is closed, the lower section shall close.

(1) All doorways to resident occupied spaces, and all doorways from resident occupied spaces, and the required exits shall be no less than 32 inches in width; 30-inch doors may be accepted in existing homes.

(2) Doors to resident rooms shall swing in, unless fully recessed, except any room accommodating more than four persons shall swing with exit travel.

(3) Residential type of occupancy room doors may be lockable by the occupant if they can be unlocked on the corridor side, and keys are carried by attendants at all times.

(4) Doors to basements, furnace rooms and hazardous areas shall be kept closed and

marked "FIRE DOOR — PLEASE KEEP CLOSED".

45.3(6) *Protection of vertical openings.*

a. Each stairway between stories shall be enclosed with partitions having a one-hour fire-resistance rating, except that where a full enclosure is impractical, the required enclosure may be limited to that necessary to prevent a fire originating in any story from spreading to any other story.

b. All doorways in stairway enclosures or partitions shall be provided with approved self-closing fire doors, except that no such doors shall be required for doorways leading directly outside the buildings, and all doors shall be kept closed unless held open by an approved electrical device, actuated by an approved smoke detection device located at top of stairwell, and connected to alarm system.

c. Any elevator shaft, light and ventilation shaft, chute, and other vertical opening between stories shall be protected as required above for stairways.

45.3(7) *Sprinkler system.*

a. Automatic fire extinguishing protection when required in 45.3(1), shall be in accordance with approved standards for systems in light hazard occupancies, and shall be electrically interconnected with the manual fire alarm system. The main sprinkler control valve shall be electrically supervised so that at least a local alarm will sound when the valve is closed.

b. The sprinkler piping for any isolated hazardous area which can be adequately protected by a single sprinkler may be connected directly to a domestic water supply system having a flow of at least 22 gallons per minute at 15 pounds per square inch residual pressure at the sprinkler. An approved shut-off valve shall be installed between the sprinkler and the connection to the domestic water supply.

45.3(8) *Fire detection and alarm system.*

a. There shall be an automatic fire detection system in all boarding homes except where there is a sprinkler system which shall include an approved manual fire alarm system.

b. Requirements for automatic fire detection systems. The system shall meet the following standards:

(1) Automatically detect a fire.

(2) Indicate at a central supervised point, the location of the fire.

(3) Sound alarm signal throughout the premises for evacuation purposes.

(4) Provide assurance the system is in operating condition by electric supervision.

(5) Provide auxiliary power supply in the event of main power failure.

(6) Underwriters Laboratory listed equipment to be used throughout system.

(7) Provide a manual test switch.

(8) Installation of equipment and wiring shall be in a neat and workmanship like manner, according to manufacturers instructions.

(9) Shall be tested by competent person at least semiannually. Date of test and name noted.

(10) To include smoke, or products of combustion, detection devices as required by any section of these regulations.

(11) Properly located manual alarm stations.

c. Where fire detection systems are installed to meet the requirements of this regulation, they shall be approved electrically supervised systems protecting the entire building, including unoccupied spaces, such as attics. Detectors shall be approved combined rate of rise and 135° F., or smoke, or products of combustion type and properly installed. Where fixed temperature devices are required, they shall be constructed to operate at 165° F. or less, except that in spaces where high temperature is normal, devices having a higher operating point may be used. Operation of a detection, or alarm, device shall cause an alarm which is audible throughout the building.

d. Smoke, or products of combustion, detectors shall be installed at strategic locations such as corridors, hallways or stairways. The confirmation of compliance with this requirement shall be by the fire marshal.

45.3(9) *Fire extinguishers.*

a. Approved type fire extinguishers shall be provided on each floor, so located that a person will not have to travel more than 75 feet from any point to reach the nearest extinguisher. An additional extinguisher shall be provided in, or adjacent to each kitchen or basement storage room.

b. Type and number of portable fire extinguishers shall be determined by the fire marshal.

45.3(10) *Heating and building service equipment.*

a. Air conditioning, ventilating, heating, cooking and other service equipment shall be in accordance with state regulations governing same, or nationally recognized standards such as National Fire Protection Association standards governing the type of equipment, and shall be installed in accordance with the manufacturer's specifications. Central heating plants shall be separated from resident occupied spaces by at least a one-hour fire separation. Activation of the alarm system shall shut down the air distribution system.

b. Portable comfort heating devices are prohibited.

c. Any heating device, other than a central heating plant, shall:

(1) Be so designed and installed that combustible material will not be ignited by it or its appurtenances.

(2) If fuel fired, be chimney or vent connected, take its air for combustion directly from the outside, and be so designed and installed to

provide for complete separation of the combustion system from the atmosphere of the occupied area. In addition, it shall have safety devices to immediately stop the flow of fuel and shut down the equipment in case of either excessive temperatures or ignition failure.

Exceptions:

Approved suspended unit heaters may be used, except in means of egress and resident sleeping areas, provided such heaters are located high enough to be out of the reach of persons using the area and provided they are equipped with the safety devices called for in subparagraph (2) above.

Fireplaces may be installed and used only in areas other than resident areas, provided that these areas are separated from resident sleeping spaces by construction having a one-hour fire-resistance rating and they comply with the appropriate standards. In addition thereto, the fireplace must be equipped with a heat tempered glass fireplace enclosure guaranteed against breakage up to a temperature of 650° F. If, in the opinion of the fire marshal, special hazards are present, a lock on the enclosure and other safety precautions may be required.

d. Combustion and ventilation air for boiler, incinerator, or heater rooms shall be taken directly from and discharged directly to the outside air. No incinerator flue shall connect to boiler or furnace flue.

e. Every incinerator flue, rubbish, trash or laundry chute shall be of a standard type, properly designed and constructed and maintained for fire safety. Any chute other than an incinerator flue shall be provided with automatic sprinkler protection installed in accordance with applicable standards.

An incinerator shall not be directly flue fed. Existing flue fed incinerators shall be sealed by fire-resistive construction to prevent further use. Any trash chute shall discharge into a trash collecting room, used for no other purpose and separated from the rest of the building with construction of at least one-hour fire-resistance rating, and provided with approved automatic sprinkler protection.

f. Cooking shall be prohibited except in approved food preparation areas.

45.3(11) *Attendants, evacuation plan.*

a. Every boarding home shall have at least one attendant on duty. This attendant shall be at least 21 years of age and capable of performing the required duties of evacuation. No person other than the management or a person under management control shall be considered as an attendant.

b. Every boarding home shall formulate a plan for the protection of all persons in the event of fire and for their evacuation to areas of refuge and from the building when necessary. All employees shall be instructed and kept informed respecting their duties under the plan. This plan is to be posted where all employees may readily study it. Fire drills shall be held at least once a month. Infirm or disturbed residents need not exit from building. Records of same to be kept available for inspection.

45.3(12) *Smoking.*

a. Smoking may be permitted in boarding homes only where proper facilities are provided. Smoking shall not be permitted in sleeping quarters or dormitories. "NO SMOKING" signs shall be posted in all resident rooms, stating the smoking regulations in that particular facility.

b. Ash trays of noncombustible material, and safe design, shall be provided in all areas where smoking is permitted.

45.3(13) *Exit signs and lighting.*

a. Signs bearing the word "EXIT" in plainly legible block letters shall be placed at each exit opening, except at doors directly from rooms to exit corridors or passageways and except at doors leading obviously to the outside from the entrance floor. Additional signs shall be placed in corridors and passageways wherever necessary to indicate the direction of exit. Letters of signs shall be at least six inches high, four and one-half inches if internally illuminated. All exit and directional signs shall be maintained clearly legible by electric illumination or other acceptable means when natural light fails.

b. All stairways and other ways of exit and the corridor or passageways appurtenant thereto shall be properly illuminated at all times to facilitate egress in accordance with the requirements for exit lighting.

c. Emergency lighting system of an approved type shall be installed so as to provide necessary exit illumination in the event of failure of the normal lighting system within the building. An approved rechargeable battery powered, automatically operated device will be acceptable.

45.3(14) *Combustible contents.*

a. Window draperies, and curtains for decorative and acoustical purposes shall be flame retardant.

b. Fresh cut flowers and decorative greens, as well as living vegetation, may be used for decoration, except those containing pitch or resin.

c. Carpeting and carpet assembly as installed, after effective date of these regulations, shall comply with the state fire marshal's specifications pertaining to same.

45.3(15) *Occupancy restrictions.*

a. A resident bedroom shall not be located in a room where the finish floor is more than 30 inches below the finish grade at the building.

b. Occupancies not under the control of, or not necessary to, the administration of a boarding home, are prohibited therein with the exception of the residence of the owner or manager.

c. Nonambulatory residents shall be housed on the first floor only.

45.3(16) *Maintenance.*

a. Regular and proper maintenance of electric service, heating plants, alarm systems, sprinkler systems, fire doors and exit facilities shall be a requisite for boarding homes of all classes.

b. Storerooms shall be maintained in a neat and proper manner at all times.

c. Excessive storage of combustible materials such as papers, cartons, magazines, paints, sprays, old clothing, furniture and similar materials shall be prohibited at all times in boarding homes.

45.4 to 45.9 Reserved for future use.

DIVISION II
EXISTING AND NEW CUSTODIAL, BASIC NURSING, INTERMEDIATE NURSING, SKILLED NURSING HOMES AND EXTENDED CARE FACILITIES

45.10(100) Definitions.

45.10(1) *Health care facility.* In these regulations "health care facility" or "facility" means any custodial home, basic nursing home, intermediate nursing home, skilled nursing home or extended care facility requiring license by the Iowa department of health in accord with section 135C.6.

45.10(2) *Custodial home.* "Custodial home" means any institution, place, building, or agency providing for a period exceeding 24 consecutive hours accommodation, board, and personal assistance in feeding, dressing, and other essential daily living activities to three or more individuals, not related to the administrator or owner thereof within the third degree of consanguinity, who by reason of age, illness, disease or physical or mental infirmity are unable to sufficiently or properly care for themselves or manage their own affairs, but who do not require the daily services of a registered or licensed practical nurse.

45.10(3) *Basic nursing home.* "Basic nursing home" means any institution, place, building, or agency providing for a period exceeding 24 consecutive hours accommodation, board, and personal care and treatment or simple nursing care to three or more individuals, not related to the administrator or owner thereof within the third degree of consanguinity, who by reason of age, illness, disease or physical or mental infirmity require domiciliary care, simple nursing care or occasional skilled nursing care but who do not require hospital or skilled nursing home care.

45.10(4) *Intermediate nursing home.* "Intermediate nursing home" means any institution, place, building or agency providing for a period exceeding 24 consecutive hours accommodation, board, and nursing care and supporting services as directed by a physician to three or more individuals, not related to the administrator or owner thereof within the third degree of consanguinity, who by reason of age, illness, disease or physical or mental infirmity require continuous nursing care and related medical services or occasional skilled nursing care but who do not require hospital care.

45.10(5) *Skilled nursing home.* "Skilled nursing home" means any institution, place, building or agency providing for a period exceeding 24 consecutive hours accommodation, board, and the health care services necessary for certification as a skilled nursing home under Title XIX of the United States Social Security Act (Title XLII, United States Code, sections 1396 through 1396g), as amended to January 1, 1970, to three or more individuals not related to the administrator or owner thereof within the third degree of consanguinity.

45.10(6) *Extended care facility.* "Extended care facility" means any institution, place, building or agency providing for a period exceeding 24 consecutive hours accommodation, board, and the health care services necessary for certification as an extended care facility under Title XVIII of the United States Social Security Act (Title XLII, United States Code, sections 1395 through 139511), as amended to January 1, 1970, to three or more individuals not related to the administrator or owner thereof within the third degree of consanguinity.

45.10(7) *Patient.* "Patient" means an individual admitted to a custodial home, basic nursing home, intermediate nursing home, skilled nursing home or extended care facility in the manner prescribed by section 135C.23 for care.

45.10(8) *Bed patient.* The term "bed patient" shall mean a person who is not ambulatory as defined in these standards.

45.10(9) *Ambulatory.* The term "ambulatory" when used in these standards shall mean a person who immediately and without aid of another, is physically or mentally capable of walking a normal path to safety including the ascent and descent of stairs.

45.10(10) *Nonambulatory.* The term "nonambulatory" when used in these standards shall mean a person who immediately and without aid of another is not physically or mentally capable of walking a normal path to safety including the ascent and descent of stairs.

45.10(11) *State fire marshal.* "State fire marshal" shall mean the chief officer of the division of fire protection as described in section 100.1 or one authorized to act in his absence.

45.10(12) *Fire marshal.* "Fire marshal" means the state fire marshall, any of his staff, or "assistant state fire inspectors", carrying authorized cards signed by the state fire marshal.

45.10(13) *Competent.* Having sufficient physical and mental ability to react to an emergency and put into operation a plan for evacuation and extinguishment.

45.10(14) *Combustible.* The term "combustible" shall mean capable of undergoing combustion.

45.10(15) *Combustible or hazardous storage area or room.* The term "combustible or hazardous storage area or room" shall mean those areas containing heating apparatus and boiler rooms, basements, or attics used for the storage of combustible material, flammable liquids, workrooms such as carpenter shops, paint shops and upholstery shops, central storerooms such as furniture, mattresses and miscellaneous storage, and similar occupancies intended to contain combustible materials which will either be easily ignited, burn with an intense flame or result in the production of dense smoke and fumes.

45.10(16) *Automatic.* The term "automatic" as applied to a door, window or other protection for an opening shall mean that such door, window or other protection is so constructed and arranged that if open it will close when subjected to a predetermined temperature or rate of temperature rise.

45.10(17) *Flammable liquid.* The term "flammable liquid" shall mean any liquid which is governed by the rules promulgated by the state fire marshal under the state of Iowa laws governing the handling, storage and transportation of flammable liquids.

45.10(18) *Approved.* The term "approved" when used in these standards shall mean acceptable to the state fire marshal.

a. "Approved standards" shall mean any standard or code prepared and adopted by any nationally recognized association.

b. "Approved equipment and material" shall mean any equipment or material tested and listed by a nationally recognized testing laboratory.

c. "Approved" is defined as being acceptable to the state fire marshal. Any equipment, device or procedure which bears the stamp of approval of or meets applicable standards prescribed by an organization of national reputation such as the Underwriters Laboratories, Inc., Factory Mutual Laboratories, American Society For Testing Materials, American Insurance Association, National Fire Protection Association, American Society of Mechanical Engineers or American Standards Association, which undertakes to test and approve or provide standards for equipment, devices or procedures of the nature prescribed in these regulations shall be deemed acceptable to the state fire marshal.

45.10(19) *Types of constructions.* "Types of construction" shall be as defined in National Fire Protection Association Pamphlet No. 220 published in 1961.

45.10(20) *Story.* A "story" shall mean that part of a building comprised between a floor and ceiling or roof next above. The first story shall be that story which is of such height above the ground, that is, does not come within the definition of a basement or cellar. However, if part of a basement qualifies for patient area, it shall be considered the first story.

45.10(21) *Attic.* The term "attic" when used in these standards shall mean the space between the ceiling beams of the top habitable story and the roof rafters.

45.10(22) *Basement.* A "basement" or cellar for these regulations shall mean that part of a building where the finish floor is more than 30 inches below the finish grade at the building.

45.10(23) *Exit.* "Exit" is that portion of a means of egress which is separated from all other spaces of the building or structure by construction or equipment as required in these regulations to provide a protected way of travel to the exit discharge.

45.10(24) *Exit access.* "Exit access" is that portion of a means of egress which leads to an entrance to an exit.

45.10(25) *Exit discharge.* "Exit discharge" is that portion of a means of egress between the termination of an exit and a public way.

45.10(26) *Fire partition.* The term "fire partition" shall mean a partition which subdivides a story of a building to provide an area of refuge or to restrict the spread of fire for a minimum of one hour.

45.10(27) *Fire door.* The term "fire door" shall mean a door and its assembly, so constructed and assembled in place as to give protection against the passage of fire, equal to surrounding construction.

45.10(28) *Fire-resistance.* The term "fire-resistance" shall mean that property of materials or assemblies which prevents or retards the passage of excessive heat, hot gases or flames under condition of use. The terms "fire-resistant" and "fire-resistive" shall mean the same as "fire-resistance".

45.10(29) *Fire-resistance rating.* The term "fire-resistance rating" shall mean the time in hours or fractions thereof that materials or their assemblies will resist fire exposure as determined by fire tests conducted in compliance with approved standards.

45.10(30) *Fire wall.* The term "fire wall" shall mean a wall of brick or reinforced concrete having adequate fire-resistance and structural stability under fire conditions to accomplish the purpose of completely subdividing a building or of completely separating adjoining buildings to resist the spread of fire. A fire wall shall extend continuously through all stories from foundation to or above the roof.

45.10(31) *Sprinklered.* The term "sprinklered" shall mean to be completely protected by an approved system of automatic sprinklers installed and maintained in accordance with approved standards.

45.10(32) *Automatic sprinkler system.* The term "automatic sprinkler system" shall mean an arrangement of piping and sprinkler designated to operate automatically by the heat of fire and to discharge water upon the fire, according to the standards of the National Fire Protection Association.

45.10(33) *Interior finish material.* Interior finish material shall be classified in accordance with the method of tests of surface burning characteristics of building material National Fire Protection Association Standard No. 255, Test Methods, Surface Burning — Building Materials, 1969. Classification of interior finish material shall be in accordance with tests made under conditions simulating actual installations, provided that the state fire marshal may by rule establish the classification of any material on which a rating by standard test is not available. Interior finish material shall be grouped in the following classes in accordance with their flame spread and related characteristics.
