Contracting for Services by State Agencies

ISSUE

Each month the Department of Administrative Services (DAS) reports to the Legislative Services Agency on the new service contracts approved through the Services Pre-Contract Questionnaire (PCQ) process. The PCQ process insures that an employer/employee relationship is not created through contracting. This *Issue Review* describes the contracting process and examines the reports for FY 2010 through FY 2013 and provides a summary of new service contracting by state agencies.

CODE AUTHORITY

Iowa Code section 8.47 and Iowa Administrative Code chapters 118 and 119

BACKGROUND

State agencies often contract with individuals and organizations for services to facilitate the operation of the agency. In some instances, the service contract is for expertise the state agency does not have, such as, appraisal services, analysis and assessment of business processes, auditing, peer reviews, attorneys, information technology consulting, investment advisors, research projects, and a variety of other services. Other times the contracted service is for day-to-day functions, such as boiler testing, aerial mapping, building alarm system service and repair, communication systems installation, janitorial service, pest and weed control, and other such services.

The DAS oversees services contracting, and it is the DAS policy that contractors are to be selected through an open competitive process. The PCQ approval process is applied to service contracts with individuals and small businesses to insure an employee/employer relationship is not created. For example, a retiree could not come back to the agency where he or she had worked, contract to do the same work performed prior to retirement, and essentially perform as an employee. If a contract were to establish an employee/employer relationship then the federal tax withholding requirements would come into play. If a State agency's service contract inappropriately created an employee/employer relationship, the State, when federally audited, could be subject to backup withholdings and related fines.

Not all contracts are required to go through the PCQ process. The PCQ process exempts:

- Contracts for less than \$1,000.
- Contracts between State departments and other State agencies, political subdivisions, or federal government agencies.
- Contracts with a corporation.
- Contracts with individuals and businesses that already have been through the PCQ process and have been approved to provide services.

In practice, corporations are reviewed to verify the organizations do qualify for the corporation exemption. Other businesses, such as partnerships and limited liability companies (LLCs) need to be reviewed to distinguish which are exempt as corporations and which are not. (See **Attachment A** for the twenty common law factors used in determining the existence of an employer/employee relationship.)

There are provisions for "sole source" contracts where venders are selected without competitive bidding. When the department determines there is only one qualified or obviously most qualified service provider, when only a single source is available within the geographic location, or when the provider owns the needed intellectual property rights for the service, the department may select a sole source provider. Sole source providers may also be used for peer reviews and for legal services (experts, advisors, counsel, or consultants). Sole source providers may be used when the federal government or other funding agency restricts the state agency to one provider and when permitted by statute. Otherwise, service providers are to be selected from among competitive bidders.

Pre-Contract Questionnaire (PCQ) Process. The DAS monitors state agency contracting with individuals and small businesses through the PCQ process. When an agency proposes to contract for services, the Vendor-Customer Table in the Iowa Statewide Accounting System (I/3 System) is checked for a State Accounting Enterprise (SAE) control number. If the vendor has the SAE control number, it has been determined that no employer/employee relationship exists between the State and the contractor, and the individual or business is available for contracting. If the individual or company does not have an SAE control number, then prior to signing the contract, the agency must submit a PCQ (**Attachment B**) to DAS for approval.

The critical factor in contracting for services is whether an employer/employee relationship is being established. Although there are some differences in state laws, different states¹ apply similar criteria to determine whether the service provider is an independent contractor or an employee. These criteria focus on:

- Control over the workday. It may be an employer/employee relationship if the
 department sets work hours, directs the sequencing or order of work, sets hours, and
 requires reports. An independent contractor would set his or her own hours and decide
 the work process.
- Provision of resources. An indicator of an employer/employee relationship would be the
 department hiring, supervising and paying helpers, paying travel expenses, requiring work
 be done on the department's premises, and furnishing tools and materials. An
 independent contractor manages and pays helpers, provides their own tools and materials,
 and decides whether to perform the work on the department's premises.
- Independence from the State agency. An independent contractor has the risk of a profit
 or loss from the relationship, makes these services available to the public, and may work
 for more than one firm simultaneously. An employee is paid by the hour, week, month, or
 by piece rate without risk of loss and works only for the department.

CURRENT SITUATION

For this analysis, the PCQ contracts were classified according to the service being provided. Eleven categories were developed and each service was assigned to one of the following categories.

¹ The National Conference of State Legislatures (NCSL) provided examples of the employer/employee determination processes for Alaska, Hawaii, Massachusetts, and Ohio which are referenced here. A comprehensive study of all states was not available from the NCSL or from the National Association of

State Procurement Officers (NASPO).

- <u>Building Construction</u> contracts are for services relating to building construction, repair, renovation, and/or demolition, including landscaping, excavation, and bulldozing; tree removal and planting; well digging and filling; and other such activities.
- <u>Business Financial</u> contracts are for normal business operations and administration, such as auditing, market or other business analysis, human resources, inventory, and product or supply delivery.
- <u>Computer contracts</u> relate to computer use and development, such as, programming, data base development or management, software development, and data entry.
- <u>Custodial</u> contracts are for services such as janitorial cleaning services, lawn care, mowing, and weed control, including seeding of broad areas, snow removal, garbage pickup and removal, painting, pest control, window cleaning, and related activities.
- <u>Equipment Maintenance</u> contracts are for equipment maintenance, maintenance agreements, upgrading, repair, installation, calibration, and equipment rental.
- Expert Consultant contracts are for services requiring expert knowledge or special skills not available through the agency's regular staffing, such as, engineering and architectural services, wildlife surveys, research projects and analyses, artistic and graphic design, consulting for project planning, facilitation, and development, and technical assistance.
- <u>Legal</u> contracts are for services involving legal representation, mediation, arbitration, consultation, and expert witnesses.
- Medical contracts are for services involving medical and dental treatment, medical protocols, pharmaceuticals, eye examinations, physical and occupational therapy, psychiatric services, immunizations, and other such services.
- <u>Social Service</u> contracts are for services involving improvement of the human condition by social workers, psychologists, and volunteer social support agencies. These services address areas such as, domestic and child abuse, food and shelter, suicide prevention, group homes, workforce and life skill development, mental health counseling, drug abuse, and afterschool programs.
- <u>Training</u> contracts involve skill development, information distribution and education, seminars, speakers, and workshops, webinars, education and training materials development, workshops, and conferences.
- Rent is a contract to rent or lease land, a building, or space within a building.

Table 1 shows the types of services state agencies had approved through the PCQ process between FY 2010 and FY 2013.

The Iowa Public Employees' Retirement System (IPERS) signed a six-year contract with New York Life Insurance in FY 2012 for fixed income investment management services totaling \$900.0 million. The size of this contract dwarfs the rest. The Department of Human Services

(DHS) contracted for computer services with Accenture LLC in FY 2013 for \$133.0 million for a seven-year four-month data transfer project. Disregarding the aforementioned IPERS and DHS contracts, expert consultants receive the largest share of the service contract expenditures. In terms of the number of contracts, about one third of the contracts were for some form of training.

Table 2 (on the following page) shows the number and contract amounts for state agencies. The Departments of Education (DE) and Natural Resources (DNR) have the most contracts and account for 43.6% of the contracts in the years examined. When combined, the DHS and the Department of Public Health (DPH) account for another 30.4% of the contracts. Together these four departments awarded almost three-fourths of the service contracts processed through the PCQ system. Those with the fewest new service contracts tend to be the smaller agencies. The Department of Corrections is a large agency that sends few contracts through the PCQ system.

In terms of the amount spent on contracts, IPERS and the DHS are the largest users because of the contracts mentioned above. Even without the two large contracts by IPERS and the DHS, the DHS spent by far the most on contracts. The DPH came in a distant third, spending \$11.6 million on PCQ contracts, with the DNR and the DAS each spending a little more than half that amount.

Table 3 provides the number of contracts per department by service type, and **Table 4** provides a breakdown of the contracted amounts per department by service type. Some of the contracts and payments extend over several years. Training and expert consultants dominate the types of contracts across all departments with building construction and custodial services coming in a distant third and fourth. The DE contracts predominately for training (70.0% of the contracts)

with most of the rest being for expert consultants. The DNR spreads its contracts relatively evenly among building construction, expert consultants, and custodial services. The DPH invests most for service contracts related to training and less in expert consultants. Social service contracts dominate the contracts for the DHS with expert consultants coming in second.

The large contract amounts of the IPERS's \$900.0 million six-year contract with New York Life Insurance for fixed income investment management services and the DHS \$133.0 million computer services contract with Accenture LLC skew the spending patterns. Without those two contracts, spending on expert consultants is the highest with \$94.9 million spent by all departments. The DHS still spends the most on contracts processed through the PCQ system with \$78.8 million for expert consultants and \$45.3 million for social services plus other smaller amounts. It is interesting to note that training contracts are relatively inexpensive. While 34.0% of the contracts were for training, spending on training accounted for only 0.9% of the total spending and only 5.4% of total spending with the two extremely large contracts removed. Otherwise, those with the most contracts spend the most in patterns consistent with where the contracts fall.

The DAS requires state agencies to report the funding source on the Service PCQ. The funding sources are defined as:

- State The contracts are paid from the department's appropriation. This can be State General Fund or from another appropriated fund.
- Federal The contract receives federal funding.
- Other Contracts are paid from funds not associated with federal funding or state appropriation. For example, conference registration fees or some other type of self
 - generated revenues could be used to pay for a speaker at a conference. Nonappropriated funds such as the IPERS Fund appear here.
- Combined Contracts are paid from a combination of state, federal, and/or other funding.
- Not Reported This indicates the item on the questionnaire was not answered.

Table 5 shows the funding sources for PCQ service contracts by department. (**Attachment C** breaks this information down by fiscal year.) It appears that the majority of the funding comes from other nonappropriated state funding. The two extremely large contract amounts for IPERS (other source) and DHS (combined source) confound the patterns in this table. If those two amounts are dropped from examination, 10.6% of the contract funding comes from appropriated state funds; 7.8% comes from federal sources; 8.7% comes from other nonappropriated state sources, 69.6% comes from combined sources; and 3.3% of the funds did not have the source identified. The DHS, the DNR, and the DAS have the most state funding for PCQ contracts,

and the DHS, the DE, Workforce Development (IWD), and the DPH have the largest federal funded amounts. Without the \$900.0 million contract, IPERS still uses the most funding from other state sources to fund the PCQ contracts, and the DHS dominates the combined funding sources.

The amount of funding with the source not reported is somewhat problematic. The DNR did not report the source for \$2.2 million worth of contracts or 27.6% of their funding sources, and IWD did not report on \$1.9 million (43.4%) of its funding. (The DNR did not report the funding source for 92 PCQ contracts out of a total of 309, and IWD did not report for 16 out of 35.)

Table 6 shows the amounts by funding source for the different types of PCQ contracts. Expert consultants, social service contracts, and medical contracts account for most of the funding through appropriated state funds. Expert consultants, social service, and training dominate the use of federal sources. Even without the large IPERS contract, business financial contracts and building construction use the most other sources. The combined sources fund more expert consultants, medical, and social services contracts when ignoring the large DHS contract.

Sole Source. Table 7 shows the reporting for sole source contracting through the PCQ process. Over the four years examined, the percentage of sole source contracts approved ranged from 4.7% to 14.0% of the PCQ contracts for that year. The DNR accounted for 36.4% of the sole source contracts. Probably more interesting is the percentage of times the question was left blank on the DAS form. The item was left blank a high of 31.6% of the time in FY 2010 and a low of 16.5% in FY 2012. The DPH accounted for 53.6% of the blank responses. With this much missing data, any conclusions would be imprecise.

BUDGET IMPACT

Over four years, questionnaires representing 1,742 contracts and \$1.2 billion worth of spending were approved through the Services PCQ. This funding went to individuals and businesses outside of state government and sometimes out-of-state.

Currently preaudit functions authorizing payments are handled at the department level. The DAS may want to examine the PCQ process and develop a means to intervene before contract payments are made to enforce complete reporting and reduce the missing data on the PCQ submissions, particularly for funding sources and for sole source contracting data. If needed, action by the Legislature could be requested.

The oversight and reporting provided to the LSA by DAS focus on new individual service contracts. It would be more informative and provide greater transparency in government if DAS and the other State agencies reported on all service contracting broken down by type of contractor (such as, individuals, small businesses, and corporations) utilized by each department. This would allow examination of total expenditures, variations in staffing, and show how departments are fulfilling some of their responsibilities.

Twenty Common Law Factors for Determining an Employer/Employee Relationship

- A. Indicators of control by employer
 - 1. Set hours of work
 - 2. Full-time work requirement
 - 3. Set order or sequence of work
 - 4. Oral or written reports required
- B. Other indicators of employer/employee relationship
 - 5. Personal service required
 - 6. Hiring, supervising, and paying helpers
 - 7. Payment of business or travel expense
 - 8. Work performed on employer's premises
 - 9. Furnishing of tools and materials
- C. Indicators common to independent contractors
 - 10. Significant investment
 - 11. Realization of profit or risk of loss
 - 12. Work performed for more than one firm
 - 13. Services made available to the public
- D. Strong indicator of employer/employee relationship
 - 14. Continuing work relationship
 - 15. Paid by hour, week, month, or piece-work
 - 16. Right to discharge
 - 17. Right to terminate
- E. Indicators of control by employer
 - 18. Training provided
 - 19. Instructions given
 - 20. Integration
