DECLARATION OF INDEPENDENCE.

IN CONGRESS, JULY 4. 1776.

THE UNAMIOUS DECLARATION OF THE THIRTEEN UNITED STATES OF AMERICA.

(Adopted by the Continental Congress July 2, and authenticated and proclaimed July 4, 1776.)

When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitled them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident; that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty and the pursuit of happiness; to secure these rights. governments are instituted among deriving men. thelr iust powers from the consent of the governed: that. whenever aby form οf government destructive ٥f these ends. lt 10 the right οť to alter or abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and translent causes; and, accordingly, all experience hath shown that mankind are more disposed to suffer, while evils are sufferable than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurnations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future accurity. Such has been the patient sufferance of these colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these states. To prove this, let facts be submitted to a candid world:

He has refused his assent to laws the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained, and, when so suspended, he has utterly neglected to attend to) them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature—a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the respository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly for opposing, with manly firmness, his invasions on the rights of the people.

He has refused, for a long time after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the state remaining, in the meantime, exposed to all the dangers of invasion from without and convulsions within.

He has endeavored to prevent the population of these states, for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to barass our people and eat out their substance.

He has kept among us, in times of peace, standing armies, without the consent of our legislatures.

He has affected to render the military independent of, and superior to, the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws, giving his assent to their acts of pretended legislation—

For quartering large bodies of armed troops among us;

For protecting them, by a mock trial, from punishment for any murders which they should commit on the inhabitants of these states;

For cutting off our trade with all parts of the world:

For imposing taxes on us without our consent:

For depriving us, in many cases, of the benefits of trial by jury;

For transporting us beyond seas, to be tried for pretended offenses;

For abolishing the free system of English laws in a neighboring province; establishing therein an arbitrary government, and enlarging its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule into these colonies;

For taking away our charters, abolishing our most valuable laws, and altering fundamentally the forms of our governments;

For suspending our own legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here by declaring us out of his protection and waging war against us;

He has plundered our seas, ravaged our coasts, burnt our towns, and destroyed the flyes of our people.

He is, at this time, transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun, with circumstances of cruelty, and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fail themselves by their hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages, whose known rule of warfare is an undistinguished destruction of all ages, seves and conditions.

In every stage of these oppressions we have petitioned for redress, in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attentions to our British brethren. We have warned them, from time to time of attempts, by their legislature, to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity; and we have conjured them, by the ties of our common kindred, to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and of consanguisity. We must, therefore, acquiesce in the necessity which renounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace friends.

We, therefore, the representatives of the United States of America, in general congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name and by the authority of the good people of these colonies, solemnly publish and declare, that these united colonies are, and of right ought to be, free and independent states; that they are absolved from all allegiance to the British crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved; and that, as free and independent states, they have full power to levy war, conclude peace, contract alliances, establish commerce, and do all other acts and things which independent states may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually piedge to each other our lives, our fortunes, and our sacred bonor.

STATE BOARD OF MEDICAL EXAMINERS.

President, F. W. POWERS, Waterloo. Secretary and Treasurer, J. F. KENNEDY, Des Moines. Members, The physicians of the State Board of Health. Examinations held two weeks preceding the meetings of the Board of Health.

Correspondence relating to practice of medicine or osteopathy should be sent to the secretary of this board.

Every person practicing medicine or osteopathy in the State is required to secure a certificate from this board.

Every physician or osteopath itinerating within the State is required to procure a special license.

The board is authorized to issue two classes of certificates:

First, to physicians, under sections 2576 and 2582 of the Code, and second, to Osteopaths, under chapter 158, laws Twenty-ninth General Assembly.

There is no provision in the law for issuing permits to practice midwifery.

THE FUNCTIONS OF THE STATE BOARD OF HEALTH.

Few have any conception of the varied functions of the State Board of Health. Chapter 16 of the code gives the Board a general supervision of the lives and health of the people of the state and authorizes it to make rules and regulations respecting the public health and declares that such rules and regulations when made shall have the force of legislative enactments.

Under this general provision the Board through local boards establishes, maintains and releases quarantine; requires the disinfection of persons and premises exposed to contagion; erects and maintains pest houses when needed and prevents and abates nuisances. Under this same chapter it supervises the registration in each county of marriages and (by an amendment by the Thirty-first General Assembly) of divorces—transcripts of which are furnished by the clerks of the respective district courts to the Secretary of the State Board of Health by whom they are bound and deposited in the Historical building.

Under Chapter 100 laws of the Thirtieth General Assembly, which will doubtless be amended by the Thirty-first General Assembly, the Board in conjunction with the Secretary of State supervises a registration of births and deaths occurring within the state.

The Board also supervises the examination and registration of licensed embalmers. Over eight hundred undertakers have been thus examined and granted embalmers permits. The result has been that the science and skill as well as the technique of the funeral director has been greatly improved and the public health has been better protected thereby. In connection with this work the Board has adopted rules and regulations for the transportation of the dead so that bodies, dead of infectious diseases, may be so prepared as to be shipped without interference or danger to any points in the United States, Canada, Mexico or Cuba. The rules for the shipment of corpses are the same in the countries just mentioned—the benefits of which can hardly be appreciated unless one is unfortunate enough to require such services.

Under Chapter 87, Acts of the Thirtieth General Assembly, the Board is required to make rules and regulations for the inspection of petroleum products; to determine the number of oil inspectors that shall be appointed to examine lamps and apparatus to be used for burning gasoline for illuminating purposes and to determine their safety; and to make rules and regulations for testing miner's oil and linseed oil.

Chapter 129, laws of the Twenty-eighth General Assembly, makes it the duty of this Board to dispose of unclaimed bodies by directing to what medical college of the state such bodies shall be sent for anatomical purposes. It provides a penalty for any "coroner, undertaker, superintendent or managing officer of any public asylum, hospital, poorhouse or penitentiary within this state into whose hands the body of a deceased person shall come, which should be delivered to a medical college or school" to refuse or fail to notify the Secretary of the State Board of Health as to its disposition. The object of this law was not only to supply medical colleges of the state with much needed and required material in a legal way but also to relieve counties of the expenses of burial.

Chapter 14, Title 12, makes it the duty of this Board with the Executive Council, to review and approve such rules and regulations of the State Veterinary Surgeon as may be deemed "necessary for the prevention and supression, and against the spread of all contagious and infectious diseases among domestic animals in the state."

In addition to the above specified duties the Board supervises the disinterment, burial and transportation of all dead bodies within the state and keeps a record of all such disinterments and burials.

The Board also has under the provisions of chapter 101, Laws of the Thirtieth General Assembly, a thoroughly equipped and uptodate bacteriological laboratory at Iowa City in connection with the State University where upon short notice tests are made to determine the presence of tuberculosis, typhoid fever, diphtheria, rabies, etc., and where the best methods of disinfection are determined.

In addition to these functions, now required of the Board and those in contemplation, the Board prints and distributes a large amount of literature-circulars, blanks, etc. It publishes a monthly Health Bulletin, now in its nineteenth consecutive year, as an official organ. There are issued 11,000 copies, monthly. It is an agent by which the Board can gain access to every state, county and township officer and to all physicians, embalmers and superintendents and principals of our public schools as well as to every mayor and city clerk. This publication not only gives the official transactions of the Board but furnishes a large amount of information relative to the causes of diseases, the means of prevention and other matters pertaining to annitation and hygiene.

Under chapter 17 of the Code and chapter 158 Acts Twenty-ninth General Assembly, the physicians of the Roard of Health and its Secretary are constituted the members and Secretary of the Board of Medical Examiners and as such, determine the standing of medical colleges examine their graduates and license those who pass a satisfactory examination as physicians and osteopaths, with authority to refuse to issue certificates and to revoke those issued under certain specified conditions; and the Board also issues certificates on reciprocity with other states and grants itinerant licenses to those holding its certificates.

All these various functions are performed with little, if any, expense to the state -that is the fees turned into the state in discharge of the duties prescribed very nearly equal the appropriation.

STATE HYGENIC LABORATORY.

Statement of work done and immediate needs:-

The 30th general assembly in establishing the State Hygienic Laboratory (House File No. 455) provided for the appropriation of one thousand dollars for additional equipment, and five thousand dollars bienially for the salary of the director, assistants and the running expenses of the laboratory.

At the first meeting of the State Board of Health following the passage of this bill it was decided that for the present, on account of limited funds, a great deal of work which the laboratory should do in . the interests of the public health must be postponed, and that the work of the laboratory must be limited to the routine diagnostic work in connection with diptheria, typhiod fever, tuberculosis and rables. The bacteriological and chemical analyses of public water supplies, a problem of very great importance, must be postponed until further provision for such is made, except when the public health is eminently concerned as in epidemics of typhoid fever. At such occassions the director of the laboratory shall make a personal investigation of the epidemic and to have such bacteriological and chemical analyses of water and other substances made as are necessary to the finding and the removal of the causes of such epidemics. The rapid diagnosis of certain infectious diseases like diptheria being of such great importance in order that proper treatment may be begun as soon as possible, the Board devised a method (which places the diagnosis outfits for the collection of material in the hands of every physician) by establishing one or more culture stations in every city and town in the State where the diagnosis outfits are kept constantly on hand and given free of charge to all physicians. This meant the saving of a great deal of time required in the sending to the laboratory for the diagnosis outfits as is done in every other State in the Union except in Vermont and Florida. In these states there are only a comparatively few culture stations located in the larger cities, whereas in Iowa there are now one or more culture stations

placed in every city and town of the State. Only a few of the smaller villages have not yet been supplied. On account of this arrangement it was necessary that the laboratory should have a large number of diagnosis outfits. At least 20,000 outfits were necessary, and it was found by the Board of Health that the sum appropriated by the legislature was not sufficient to cover the expense of such. They therefore asked the Board of Regents of the State University to appropriate \$5,000 to be used in assisting in equipping the laboratory. The Board of Regents realizing the value and the importance of the work made the appropriation asked for and with the sum of \$11,000 on hand the laboratory began work Sept. 1904. Since that time 5,832 examina tions have been made in the laboratory as follows. Diptheria 2710. Typhoid fever 712, Tuberculosis 2112, Water 69, Milk 13, Food 8, Tissue 17, Rabies 5, Malaria 10, Actinomycosis 7, Animal inoculations and examinations 22, Sundry examinations 147. These examinations would have cost \$12.504. If they had been made at a commercial laboratory. This amount represents the amount of work done during one year. three and a half months. The examinations continued at this rate for two years, for which the appropriation was made, would bring the figures up to \$15,161. In addition to these examinations, investigations of typhoid fever epidemics were made in four different places, and experiments were carried on regarding the most efficient manner of disinfecting premises following contagious diseases.

The investigation of the typhoid fever epidemics if placed upon a commercial scale would raise the figures at least \$800.00, which means that the state has from a merely commercial standpoint at lowest estimations received \$16,751.00 worth of work for \$5,000—the laboratory now having in possession \$6,000.00 worth of equipment. This estimation does not take into consideration that the physicians have had the advantage of having the outfits on hand and obtaining them free of charge instead of sending away for the outfits for which they must pay, and at the same time wait several days before they arrive; nor the testing of disinfectants which has required a great deal of time and labor on the part of laboratory assistants, and which has been of great service to physicians and of inestimable value to the citizens of the State by insuring thorough disinfection; nor the fact that in about a dozen instances, the laboratory has succeeded in averting very probable epidemics of diphtherm by definitely diagnosing the condition of diphtheria in school-children in whom the condition had been suspected but in which no attempt had been made to quarantine the patient nor to isolate other children that had been exposed. Investigations of typhoid fever epidemics were made in Burlington, Marion, Parkeraburg and Estherville. An investigation of the con dition of the water supply was also made at Vinton. The water used for drinking purposes and the sewage from several state institutions, namely, the hospital for the care of the ineane at Mt. Pleasant, and the institution for the feeble-minded at Glenwood was also examined by request from the State Board of Control. In all of these places the findings of the laboratory were quite definite and in several instances the laboratory was instrumental in determining the exact source of the injection which when removed, was immediately followed by the cessation of the epidemic.

Disinfection experiments:—When the laboratory was first organized the director of the laboratory received many requests from physicians regarding the best method of disinfecting premises following contagious diseases, and regarding the efficiency of the various agents and appliances which were placed on the market by various companies and which were by no means efficient and therefore did more harm than good, by creating an assurance of safety when the agents producing infection had not actually been killed. With the object of determining the efficiency of these various agents and appliances and at the same time the determination of the best method of disinfection, a large number of experiments were carried on in the laboratory, the results of which have been highly gratifying and have been given to the physicians of the State, through the Iowa Medical Society last June.

In addition to its routine duties the laboratory is now preparing for an examination of the air of the various railway coaches of the State with the object of determining their sanitary condition. These examinations will be carried on in co-operation with the various railway companies.

All of this work has been made possible by the faithful and untiring efforts of the laboratory assistants and by the generosity on the part of the Board of Regents of the University, who, realizing the importance of such work are giving the room space for the laboratory work, paying for lighting and heating the laboratory, furnishing gas and electricity, keeping up the janitor service and partly paying the salary of one of the assistants of the laboratory in addition to having given \$5000 for the original equipment. The Board of Regents have been giving this assistance after having been assured by the Board of Health that this legislature would make the appropriation for all running expenses save that of heating the laboratory and the use of such apparatus as is used conjointly by this laboratory ar 1 the University department. Although this laboratory and the University have been assisting each other in the way of material, etc., the work is nevertheless entirely distinct and the laboratory, should, therefore, not be a burden to the University financially. In order that it may not be such a burden, the appropriation to carry on the work of the laboratory. for salaries, expenses and additional equipment should be increased from \$6,000 to \$12,000 for the biennial period.

The accession list of the State Library on the first day of July, 1805, included 88,156 volumes, exclusive of the volumes of the Historical Department with which the miscellaneous portion of the State Library was consolidated by act of the Twenty-eight General Assembly The total accessions during the year ending June 30, 1805, were 4,28 volumes.

The consolidation of the miscellaneous portion of the State Library with the Historical Department, ordered by the General Assembly and carried out as far as the Library Board deemed it advisable to now awaits the completion of the new building, the east wing of which will be wholly given over to the Library. Until the prospective change

is made, the present temporizing policy in the shelving of books must continue, but it is our constant endeavor to reduce to a minimum the inconvenience of such policy.

The librarian notes with satisfaction the steadily growing utilization of the State Library by advanced students of literature, philosophy, science and social problems and by debaters in the highschools and colleges of the State; also by state legislators and those interested in State legislation. This satisfaction is enhanced by the steadily increasing ability of his assistants to satisfy the wants of those who visit the library with serious purpose. Among the more than four thousand new volumes added to the library during the past year are several hundreds which, though comparatively inexpensive. are none the less necessary to the building up of a great State Library. Among these are sets of convention reports, addresses delivered in conferences of churches and societies: also collections of lectures on social acience, the arts, etc., university courses of lectures and sets of the works of great scholars and authors edited by special students Among the more costly sets added to the Library during the past year are reprints of first folios of Shakespeare and Chaucer, several complete sets of French classics and three comprehensive world histories. each constructed on a different plan from the other two and all extremely useful for ready reference by students of history.

The Law Department of the State Library is in urgent need of an increased appropriation, the present annual appropriation of two thousand five bundred dollars proving inadequate. Several valuable and high-priced sets to which the Library is committed, notably British Colonial reports, have not been brought down to date, owing to more pressing, but scarcely less imperative demands nearer home. Without an increased appropriation the State's splendid law library must lose the prestige it now holds as one of the best law libraries in the country.

The purchases in the Law and Document departments have largely been toward the completion of broken sets—a work calling for constant vigilance and careful study of the book-catalogues of Europe and America and a close watch of the catalogues of book-auction sales in New York and Boston. The completion of valuable sets of standard periodicals is one of the gratifying results of recent years, making the Library's Periodical department one of the completest in America, though still lacking not a little of that measure of approximate completeness towards which we are pushing as fast as our means and the several other interests of the Library will warrant.

As now organized this department dates from the first day of July, 1892 Its chief purpose is the collection of historical data relating to our own State and the territorry of the middle west of which it originally formed a part. So far as literature is concerned special efforts are made to collect Iowa newspapers from the carliest dates to the present time; works of State and general western and national history, biography and geneology; works on the slavery question and the War for the Union; histories of all our wars from the earliest times; reports upon the census of both State and Nation: works relating to the North American Indians; county histories, early and later maps. Iowa pamphlets, biographies of our noted men and women. printed or in manuscript; written or printed documents relating to early settlers and settlements; reports, catalogues and broadsides relating to the churches, educational and benevolent institutions of the State; in short, every species of data which can throw light upon local, State or western history.

The department publishes The Annals of Iowa, an illustrated quarterly historical magazine of eighty pages, now in its seventh volume. This is made up of original contributions in history and biography. By direction of the trustees it is sent free to every organized library in our State. Its price to subscribers is \$1 per year.

In addition to The Annals, the Historical department is to be credited with the following publications, viz: Six biennial reports; 'John Brown Among the Quakers, and Other Sketches," by Hon. Irving B. Richman; ''First Census of the Original Counties of Dubuque and Des Moines," edited by Dr. Benj. F. Shambaugh; ''History of the Constitutions of Iowa," by Dr. Shambaugh; reprints of the laws of Iowa, 1838-39 and of 1839-40, and the hitherto unpublished Journals of the Council and House of Representatives of the extra session of 1849.

The department has secured 80 fine oil portraits of distinguished Iowans, which are now on exhibition in the art gallery of the historical building. More are promised in the near future.

The library of the historical department on January 1, 1906, consisted of the following:

The collections include also a large number of maps, autograph letters and manuscripts.

The Museum includes seven large cases for autograph letters, manuscripts and portraits; a collection of recent, aboriginal and prehistoric pottery—some of the most interesting specimens of which were find in our own State; a large collection of stone implements, among which is an Iowa axe weighing 31% pounds—one of the largest ever discovered—with hundreds of flints; many teeth, tusks, and other bones of the mammoth and mastodon, all of which were found in Iowa; two large cases of birds—mostly specimens found within our State; many Iowa mammals; four large adjustions stocked with a collection of Iowa fishes; a case of Indian baskets, bead work, implements and weapons, the most of which were manufactured by the Musquakie Indians of Tama county; a collection of arms—canon.

mortars, swivel guns, rifles, muskets, carbines, swords and pistols. in use during the Civil, Spanish and Philippine wars; and duplicates in bronze of most of the historic medals issued by the U. S. Government.

At the session of the legislature commencing January 11, 1904, the sum of \$200,000 was appropriated for the completion of the Iowa Historical Building, and as these pages are going through the press, May, 1906, the structure is nearly enclosed. The materials and quality of the work were of the highest character. This building will occupy a full half block, with a frontage upon Grand Avenue of 280 feet. The material of which it is constructed is the well known Le Grand (Iowa) stone, so noted for its hardness and for preserving untarnished its color of pure white. It is conceded to be one of the most imposing and beautiful edifices in the State.

The Iowa Library Commission was created by an act of the Twenty-eighth General Assembly in March, 1900. The growing interest in library matters and the many gifts for the erection of library buildings have made the demands on the commission heavy and constant.

The demands made upon the secretary cover a wide range of interests, among which are the following: Assisting any community desiring aid in planning for the submission of a library tax to a popular vote; aiding boards of trustees and librarians in organizing libraries for a business-like administration; assisting in the classifying, shelf-listing and cataloging of books; addressing women's clubs, teachers' meetings, public meetings, etc.; conferring with library trustees and city councils in the consideration of plans for new library buildings, with special reference to best working interior arrangement, etc. By correspondence also much information is given to librarians and library boards as to details of library economy, the selection and classification of books, etc.

The work of the traveling library, formerly under the direction of the State library, was seen to be so intimately connected with the work of library extension over the entire State that the desirability of transferring it to the commission was soon evident, library extension being the primary purpose of the library commission. Therefore, the library commission law was revived by the Twenty-ninth General Assembly in order to provide for the transfer of the traveling library to the Iowa Library Commission.

The principal activities of the commission are as follows: (1) The traveling library 14,000 volumes, which consists of (a) miscellaneous collections of fifty volume libraries; (b) books on special subjects of study; (c) books for the blind loaned singly to any blind reader in the state. These are loaned free to any community in the State complying with a simple agreement and paying transportation charges. (2) Summer library school, conducted by the secretary at the State University at Iowa City for six weeks each summer as a department of the university's summer session. (3) Periodical clearing house for the exchange of standard periodicals indexed in Poole's Abridged Index, this exchange being for the purpose of aiding small libraries in securing sets of standard periodicals without cost. (4) Publication of quarterly circular of information, leaflets and other material practically helpful in discussioning library information and in developing and fostering the library spirit in lows.

The Twenty-ninth General Assembly, in accordance with the recommendation made by the Capitol Improvement Commission, appropriated the sum of \$250,000 to repair, improve, adorn and complete the Capitol building and grounds and authorized the Governor to appoint a commission of three members to superintend and contract for the improvements. In accordance with said law Governor Cummins in May, 1902, appointed the above members of the commission. The commission held its first meeting in July, 1902, and since that date has gone steadily forward with the work. The first substantial work was the replacing of the old slate roof of the Capitol with a modern copper one at a cost of \$18,178. A new fireproof warshouse has been erected

across the street from the Capitol at a cost of 873,465. This building is used for a document store house and the basement for the electrical machinery.

The heating and ventilating system of the Capitol has been replaced by a modern fan system. The building has been wired throughout so as to permit of the substitution of electricity for gas in lighting and a modern electrical plant has been installed to generate sufficient power. The old elevators have been removed and new machinery for their operation installed. At the boiler house the old boilers have been displaced by new high pressure water tube boilers. During the past twenty years many parts of the building had fallen into decay and consequently a considerable amount of restoration has been necessary in connection with the above mentioned improvements.

The fire in the north wing of the building on the th day of January, 1904, caused an important interruption in the work of the commission. Just the extent of the loss cannot be given, for the reason that estimates for restoration were on a basis of fireproof construction, costing much more than the value of material and labor destroyed. It is probable old construction could have been duplicated for an amount not exceeding \$100,000. Hasty temporary arrangements costing about \$6,000 made it possible to occupy the house chamber with comparative short delay. The appropriation schedule was reorganized and the commission was directed to restore the burned district and to complete the work for which it was originally created.

These sums have been set apart for Capital improvements and repairs:

Total \$158,740

The contract for the restoration of the north wing of the Capitol Building, which was awarded to the Grahl-Petersen Company and Herman & Son, is practically complete. A few minor details only being yet to finish. This contract was for the sum of \$52,407.00 and in addition to this the Commission has spent \$40,003.22 for the restoration and refinishing and furnishing the House Chamber and the Committee rooms in the north wing.

In this additional amount is included the cost of the decoration of the House Chamber which was a part of the contract of Elmer E. Garnsey who decorated the dome, rotunds and corridors in the Capitel

The House has been fitted with electric lights complete, and the general construction is of absolutely fire proof nature. The decorations are of the character that make the House Chamber second to no Legislative Hall in any of the Western states,

The painting for the panel at the head of the grand stairway has been executed and placed in position by Edwin H. Blashfield of New

York City, the price for the same being \$10,000. The painting is a grand one, and will stand for generations to come as a masterpiece of art and a credit to the State of Iowa. Already tourists are stopping off in Des Moines for the purpose of viewing this painting, and the reputation of the Iowa State Capitol, on account of its existence therein, is being spread from coast to coast.

The paintings for the eight lunettes above the entablature in the rotunds were executed by Kenyon Cox, one of the foremost artists of America. These paintings were placed in position the latter part of April, adding greatly to the appearance of the Capitol Building. Mr. Frederick Dielman, who has the commission to execute the mosaic decorations for the six panels or arcades above the grand stairway, has submitted his preliminary cartoons, and has advised the commission that the work is progressing rapidly.

The plumbing throughout the entire building has been completed with modern fixtures, and the ventilation of the different toilets is now complete. The installation of the standpipe system of the fire protection has been completed so far as the building proper is concerned, and connections to the city water mains will be made early in the spring of 1906, the contract having already been awarded.

The main dome has been gilded, and the four small domes repainted in a very satisfactory manner, at a remarkably low cost to the State. Experts in this line of work have advised the commission that the probabilities are that the gilding on the dome will perhaps last for a longer period than the former gilding did, on account of the method employed in the application of the gold leaf. The gold leaf is of an extra heavy quality and fineness, assaying .99 the pure.

Though no expense necessary to high grade material and work-manship has been spared, it is believed at this time that the funds provided will cover the entire schedule of work, with a margin to be returned to the State Treasury. Innumerable contingencie, unfore-seen, have come up during the progress of the work of the Commission which have been taken care of out of the appropriations made, in addition to the work regularly scheduled. Among the more important of these contingencies is the preparing of the four niches on the main floor to receive the battle flags of Iowa Regiments, which are now placed in these niches behind plate glass, hung in metal frames, giving the flags a very prominent position in the building and making them accessable to the view of the throngs of citizens who yearly visit the Capitol Building.

The Capitol Commission will complete its labor early in 1996, and expects to have all matters, except perhaps the placing of the mosaics, completed by July 1st, the date set by the Twenty-ninth General Assembly for the Commission to complete its work.

BOARD OF VOTING MACHINE COMMISSIONERS.

Appointed by the Governor. Term five years. Compensation not to exceed \$1,500.

	Terms Expire
ISAAC BRANDT, Des Moines	July 3, 1910
HENRY M. BELVEL, Des Moines	July 3, 1910
J. G. HEMPEL Elkader	July 3, 1910

The voting machine commission was created by an act of the Twenty-eighth General Assembly, providing for the use of voting machines at all state, county, city, town and township elements. By this act the Governor was authorized to appoint three commissioners, not more than two of whom should be from the same political party. The commissioners are appointed for the term of five years, subject to removal at the pleasure of the Governor.

Individuals or corporations owning or interested in any voting machine may call upon the commissioners to examine the said voting machine. After such examination the commissioners are to report the results to the Secretary of State, giving the capacity of such machine to register the vote of the people, its accuracy and efficiency, and its mechanical perfections or imperfections. This report is to be filed in the office of the Secretary of State, and it must state the opinion of the commissioners, whether the kind of machine so examined can be safely used by the votars. Should the report state that the machine can be so used, it shall be deemed approved by the commissioners, and machines of its kind may be adopted and used at the various elections held in the State. For making such examination and report, each commissioner is to receive the sum of \$150 for his compensation and expenses, but no commissioner is to receive an amount in excess of \$1.500 and reasonable expenses in any one year. The fees for examination are to be paid by the individual or corporation owning or interested in the voting machine examined.

The act makes the following provisions as to the construction of the machine approved:

"A voting machine approved by the State Board of Voting Machine Commissioners must be so constructed as to provide facilities for voting for the candidates of at least seven different parties or organizations, must permit a voter to vote for any person for any office although not nominated as a candidate by any party or organization, and must permit voting in absolute secrecy. It must also be so constructed as to prevent voting for more than one person for the same office, except where the voter is lawfully entitled to vote for more than one person for that office; and it must afford him an opportunity to vote for any or all persons for that office as he is by law entitled to vote for, and no more, at the same time preventing his voting for the same person twice. It may also be provided with one ballot in each party column or row containing only the words, 'presidential electors'

preceded by the party name, and a vote for such ballot shall operate as a vote for all candidates of such party for presidential electors. Such machine shall be so constructed as to accurately account for every vote cast upon it."

Six voting machines made by as many different companies have been examined and approved by the Commission. These are—The John Blocty, examined at Chicago, III., July 31, 1900; the Climax, examined at Cedar Rapids. September 15, 1900; the National, examined at Sioux City, December 22, 1903; the Universal, examined at Bloomington, III., December 26, 1903; the U. S. Standard, examined at Des Moines, May 31, 1904, and the Iowa, examined at Cedar Rapids, July 11, 1905. Each of these machines was found to comply with the provisions of the law, above mentioned, and was so reported by the Commission to the Secretary of State.

The Commission in making the examinations has not taken into account the manner in which results, required by law, are accomplished by the various machines, the examinations having been conducted only along the line of determining whether the machines would or would not comply with the law. The matter of expensiveness of construction is not investigated, because the law does not require it; this being a matter to be determined between the companies manufacturing the machines and the purchasers, boards of supervisors and city councils. The machines so far examined vary greatly in construction, some being quite complicated and intricate, and yet each will perform perfectly the requirements of the law in every respect. This difference in construction is so great that it would be impossible to describe each in detail in the short space allotted to this subject in the Official Register.

There is no question as to the absolute accuracy of the count of a. "legal" voting machine, nor as to the entire secrecy of ballots cast upon them. And another important point about them is that there is no such thing as a spoiled or mutilated ballot. Every voter who enters a booth is certain of casting a ballot for somebody and having that ballot counted. No election officers sit in ludgment upon how he intended to vote, throwing out or counting his vote as they see proper. The voter, when he votes, decides that matter for himself, as of right he should. For these reasons alone the voting machine should be installed in every precinct in the State. Sooner or later the voting machine will be the recognized and universal manner of expressing the will of the voters at the polls.

Chairman-E B SOPER, Emmetsburg

Vice-Chairman-William B Bell, Washington.

Secretary-JOHN HAYS, Red Oak.

The Twenty-eighth General Assembly appropriated the sum of fifty thousand dollars for the purpose of perpetuating the memory of those who participated in the battle of Shiloh and designating by proper monuments and markers of granite the positions of the several commands of Iowa volunteers there engaged April 6 and 7, 1862.

The act, approved April 8, 1960, provided for the appointment by the Governor of a commission composed of men who were present and participated in the battle-one soldier from each of the eleven Iowa Regiments engaged.

The commission is making use of the funds at its disposal by erecting in the Shiloh National Military Park at Pittsburg Landing, Tenn, a State monument at a cost approximating twenty-five thousand dollars and eleven regimental monuments at a cost approximating two thousand dollars each.

CONTROVERSY OVER THE FIFTEENTH AND SIXTEENTH IOWA REGIMENTS.

There has arisen a controversy between the Iowa Shiloh Battlefield Monument Commission and the Shiloh National Military Park Commission as to the time when the Fifteenth and Sixteenth Regiments participated in the memorable battle. The following is a statement of the facts of this controversy, prepared by John Hayes, Secretary of the Iowa Commission.

When the battle of Shiloh opened, April 6, 1852, the Fifteenth and Sixteenth Iowa Regiments were at Pittsburg Landing, having just arrived from the North. While in line on the bluff overlooking the

Landing, between eight and nine o'clock in the morning, they were ordered by General Grant to the support of McClernand's Division, and a staff officer was directed to show them the way.

But they never reached General McClernand While marching in columns of fours, about a mile and three-quarters from the Landing, they met the artillery and musketry fire of the enemy from the timber adjacent to a field they were crossing, now called Jones Field, on the border of which were the Eleventh and Thirteenth Iowa camps. They immediately formed in battle line and, disconnected from other troops, withstood the enemy's advance which was being made through a gap now known to have existed between the right of McClernand's Division and the left of Sherman's. There apart from other commands, the fight of these two regiments was maintained for two hours, at great loss, and there their dead were buried.

The official reports of the regimental commanders, Col. Hugh T. Reid commanding the fifteenth, and Col. Alexander Chambers commanding the sixteenth, made a few days after the battle, fix the time when first engaged at ten and ten-thirty A M respectively. These reports are embraced in the report of the Adjutant-General of Iowa, 1865, and are incorporated in the War of the Rebellion Official Records, Series 1, Volume 10. The absolute truthfulness of them is burned into the very being of every one of the survivors of the awful conflict

More than thirty years after the battle the Shiloh National Military Park was established by Act of Congress. Its purpose was "that the armies of the southwest may have the history of one of their memorable battles preserved on the ground where they fought" To carry out the provisions of this Act the Shiloh National Military Park Commission was appointed, subject to the control and direction of the Secretary of War. The Act provided:

"That it shall be lawful for any State that had troops engaged in the battle of Shiloh to enter upon the lands of the Shiloh National Military Park for the purpose of ascertaining and marking the lines of battle of its troops engaged therein."

How deeply Iowa was interested in this may be judged from the fact that of her fifteen regiments in the field in the spring of 1862, eleven participated in the battle of Shiloh.

Accordingly, preliminary to such future action as might be deemed advisable. Governor Frank D. Jackson, in June 1895, appointed a Commission composed of one soldier from each of the elseen regiments there engaged to locate and mark the respective positions held by the Iowa troops upon the Shiloh Field. In November, 1895, this Commission, by appointment, met the Shiloh National Military Park Commission (Gen. Don Carlos Buell was then Chairman) at Pittsburg Landing and did so fix and mark all the Iowa positions, making report thereof to the Governor of Iowa

In 1900, the Legislature of Iowa appropriated \$50,000 "for the purpose of perpetuating the memory of those who participated in, and designating by proper monuments and markers of granite the positions of the several commands of the Iowa Volunteers engaged in, the 12 IOR

battle of Shiloh." and made it the duty of the Governor to appoint a Commission composed of one soldier from each of the eleven regiments engaged to make contracts for construction, etc.

At that time Governor Leslie M. Shaw appointed the present Commission. This new Iowa Commission, when organized, received from the National Commission a copy of the Regulations Governing the Erection of Monuments in the Shiloh National Military Park, wherein was set forth that "incriptions must be purely historical and that "they must also be based upon and conform to the official reports of the battle and must be submitted to the Secretary of War through the Park Commission for his approval before being inscribed on monuments."

The Iowa Commission was advised that the practice would be general of inscribing upon monuments the time of engagement and the eleven Iowa Commissioners prepared and submitted inscriptions accordingly. All were approved except those for the fifteenth and sixteenth monuments.

Notwithstanding they were purely historical and based on the only official reports of the part these regiments took in battle, the inscriptions were rejected for the reason, as stated by the National Commission, that no troops were engaged in the locality where the fitteenth and sixteenth fought until afternoon. And when the official reports of Col. Reid and Col. Chambers fixing time of the respective engagements were cited the statements of time in such reports were declared to be untrue. From the start the idea of the National Commission seemed to be to sweep away all obstacles and maintain certain theories as to the process of the battle at whatever cost. The matter of discrediting the fifteenth and sixteenth survivors who fought on the spot or the blasting of the official reports of the venerated dead which had stood unchailenged for forty years seemed unworthy of their consideration.

Col. Hugh T. Reid and Col. Alexander Chambers were men of the highest honor and integrity. They became brigadier-generals and successively commanded Crocker's Iowa Brigade. The Fifteenth and Sixteenth Commissioners as well as all the survivers of the regiments named with one voice resented the action of the National Commission in impeaching the characters of their dead commanders and appeal was made to the Secretary of War to approve the inscriptions. At the same time other inscriptions, conforming to the wishes of the National Commission were submitted and the whole matter was referred to an officer of the War Department for investigation. The report of this officer sustained the contention of the National Commission.

Thereupon the Iowa Commission gave full consideration to the questions at issue, unanimously upheld the position of the Fifteenth and Sixteenth Commissioners and requested Governor Cummins to investigate the facts involved and present the matter to the Secretary of War to the end that the Fifteenth and Sixteenth Regiments might have inscriptions placed upon the monuments to these regiments in harmony with their official reports.

Complying with this request Governor Cummins gave much time and study to a thorough investigation of the subject, and upon his advice the Commissioners for the Fifteenth and Sixteenth Regiments procured upwards of sixty affidavits from the comrades who belonged to these regiments and who participated in the battle, all of which affidavits substantiated the official reports. The Governor then prepared and had printed a review of the case in which official records were cited, affidavits were published and argument made. This he submitted in person to Secretary of War Root in January, 1964, supplementing it with an oral presentation of the matter. A rehearing was ordered, the date was fixed for May 20, 1904,, and the place the headquarters of the National Commission, Pittsburg Landing, Tennessee. On that occasion there were in attendance besides the National Commission, Governor Albert B. Cummins, his stenographer and eight members of the Iowa Commission. Before proceeding to the hearing Governor Cummins, accompanied by the National Commission and by the Iowa Commission, was conducted, at his request, over the route marched by the Fifteenth and Sixteenth Regiments to the Jones Field and the circumstances with which he had become familiar were more fully explained on the ground where the regiments fought. At the meeting of the National Commission which followed, the chairman announced the order of procedure, namely: that the atenographer's record of the proceedings when submitted in typewritten form, would be considered at a future meeting of the Commission and the finding would be promulgated through the Secretary of War.

The Governor then presented the case in all its details, produced a mass of evidence to substantiate the fact that the regiments were engaged in the forenoon, demonstrated by the official reports of Generals McClernand and Sherman that a huge gap existed between the lines of their Divisions during the forenoon at the place where the Fifteenth and Sixteenth fought, and by forceful argument commanded the attention of the National Commission for a period of six hours. The hearing ended, the Iowa Commission met and expressed their gratitude to Governor Cummins by appropriate resolutions.

The finding of the National Commission having reached the War Department, Governor Cummins was advised that an exhaustive report had been made by the Shiloh National Military Park Commission adverse to the contention that the regiments were engaged in the forenoon. The Acting Secretary of War, Assistant Secretary Oliver, expressed a willingness to defer action should the Governor desire to make a further presentation of the case, whereupon the Assistant Secretary was informed that the Governor would again appear before the War Departmedt at such time as might be agreed upon, and this time was subsequently fixed for November 22, 1994, when he made a lengthy argument before the acting Secretary of War.

A compromise was then arranged between the Governor and the Assistant Secretary by which statements of time should be given to be followed by the words "as shown by the report of the Colonel commanding" and inscriptions of this character were submitted to the War Department and referred to the National Commission. But the prospect of this solution of the trouble was soon dispelled by the violent protest of the Secretary of the National Commission and a decision adverse to the regiments was rendered by the Assistant Secretary of War.

In February 1905, the Governor appealed to President Rousevelt to review the case. The President suggested that it be reviewed by the Secretary of War and accordingly a hearing was arranged for April 6, 1906 before Secretary Taft. On that occasion the Governor produced the original official reports of Colonel Reid and Colonel Chambers. To confirm the statements of time therein given he submitted the affidavits hitherto made and contemporary evidence in the way of diaries and letters. Again extended argument was made by him in behalf of the regiments and the matter was taken under advisement by the Secretary.

On the 18th of March, 1905, the Secretary of War entered an order prescribing the inscriptions for the two regiments in substantial accordance with the arrangement once made between Governor Cummins and the Assistant Secretary, and thus the controversy has been brought to a close.

To our delegation in congress much credit is also due for loyal and efficient help.

The foregoing is an outline of the trouble which has come to the Fifteenth and Sixteenth regiments. The attitude of the survivors is:

They have endeavored to preserve the history of their part of the battle according to the purpose for which the Shiloh National Military Park was established.

They wished to fix the time of their engagement, not only as a part of their history but because throughout the Park this is uniformly done upon monuments to other commands.

More especially have they insisted upon it because their records have been unjustly assailed and the truthfulness of their official reports denied.

They have been supported by the Governor of Iowa, the delegation in Congress and by the Iowa Commission for the erection of Monuments on the Battlefield of Shiloh.

The monuments erected by the State of Iowa on the battlefield of Shiloh are completed except those of the Fifteenth and Sixteenth Regiments and they lack only the attaching of the bronze tablets reciting the history of their service in that great battle.

2D REGIMENT INPANTRY VOLUNTEERS.
COMMANDED BY IT. COL. JAMES BAKER.

This regiment held this position from about 9a. m. until 4:30 p. m., April 6, 1862, successfully resisting repeated assaults from the enemy's infantry and the heavy fire of his artillery. Then, being nearly surrounded, it was ordered to fall back, which it did in good order, through a heavy cross fire from both flanks, to a point about one mile from this place where it formed in line and held its position until darkness closed the fighting for that day.

On April 7th, the regiment moved out early in reserve and was at different times under fire. About 2p. m. it was ordered, by General Nelson, to charge across a field on the enemy in the woods beyond, which was done in most gallant manner, the enemy retiring. This ended the two days fighting for this regiment.

Number engaged, 490. Its loss was, killed and wounded, 69; missing, 4; total 72.

Secretary-ALONZO ABERNETHY, Osage.

The Lookout Mountain and Missionary Ridge Monument Commission appointed by Governor Cummings, in compliance with chapter 197, laws of the Twenty-ninth General Assembly, for the erection of monuments on the battlefields about Chattanooga, Tenn., let the contract early in 1903 for three state monuments, as provided by law.

Two of the monuments were completed early in 1904, and the material for the third and larger one was all in position a month later, except a half dozen blocks of granite, one of the number a thirty foot shaft, weighing forty tons. Three successive accidents have occurred in attempts to place this shaft in position. Each time it received some injury.

Finally a third shaft was shipped from Barre. Vermont, in January, 1906, placed in position two months later, and the whole monument completed and accepted March 15. This completed the work of the commission. It is now planned to dedicate the Iowa Memorials at Chattanooga the latter part of November 1906.

Each monument contains a number of historical, patriotic and memorial inscriptions. The principal inscriptions on each monument are placed on the four faces of a large square block of polished granite called the die, and one face of each die has its polished surface so margined as to represent the shape of the map of lowa, with its river borders on the east and west. The name IOWA appears also conspicuously on nearly every face of each monument, so that when approached from any direction by friend or stranger, no one need to ask; "Whose monument is this?"

MONUMENT ON LOOKOUT MOUNTAIN.

The monument on Lookout Mountain stands near the center of the Government Reservation, in a sightly place, in front of the famous Craven House, around which raged the flercest conflict of the con-

tending hosts for the retention and the capture of this imposing stronghold, on that dismal afternoon of November 21, 1863, while gloomy clouds encircled the towering palisades and sunshine crowned the summit. This first victory of Chattanooga was named the same night, by Benj. F. Taylor, an eye witness, as "The Battle Above the Clouds." The monument is fifty feet high upon a square fifteen foot base. The main shaft is eighteen feet four inches in length by three by three feet in width. The die course contains four panels, with areas four feet seven inches by five feet each. The fourth course contains eight panels, with areas one foot two and one half inches by two fect two inches each. The inscriptions on this monument are as follows:

Secretary-Henry H. Rood, Mt. Vernon.

The Twenty-ninth General Assembly appropriated "\$150,000 for the purpose of perpetuating the memory and commemorating the valor and services of Iowa soldiers in the campaign and siege of Vicksburg, Mississippi, in 1863, by erecting brigade, regimental and state monuments and tablets on the Vicksburg National Military Park", and authorized the Governor to appoint a commission of nine members, each of whom shall have been a member of an Iowa regiment or battery in the War of the Rebellion, to let the contracts and superintend the erection of the monuments and tablets. Governor Cummins announced the appointment of the commission April 28, 1992.

The commission met in Des Moines, May 21st and organized. In October they visited Washington D. C., Gettysburg, Pn., and Richmond, Va., to study memorial designs and to further inform themselves for the discharge of their duties. In July 1993 a sub-committee visited New York and Boston to make a further study of memorial designs and to select a sculptor, and in October of the same year the full committee visited Vickeburg and selected sites for the State, Brigade and Regimental monuments. March 30, 1994 the committee met at Des Moines and accepted the design for the State Memorial prepared by

Henry H. Kitson of Boston, Mass., the sculptor selected by the commission. The commission entered into a contract with Mr. Kitson, March 30, 1904, for the erection of the State Monument for \$100, 600, the same to be completed in four years from date and sooner if possible. On the same date a contract was entered into with Edmund H. Prior, of Postville, Iowa, for the erection of the thirteen Brigade, Regimental and Battery Monuments for the sum of \$23,500 and at a subsequent meeting this sum was increased \$500 to permit of the enlargement of the only single regimental monument, the Third Infantry. The various organizations are grouped into brigades as far as possible, and all of the monuments stand on Union Avenue.

In the discharge of their duties the Commission has been governed from the beginning, as nearly as possible, by the following considerations:

To set up on this field, one of the greatest and most crucial of the war, such monuments and tablets as will adequately mark the positions of the Iowa commands engaged, and emphasize the truth of history, that from Grand Gulf, where Iowa sailors served on the gun boats, through Port Gibson, Jackson, Champion Hill, Black River Bridge, and the assaults of May 19th and 22d, in fact at every point of contact, the soldiers and sailors of Iowa were at the forefront of battle, their flags and muskets fully abreast of their comrades from other states in the effort to open the Mississippi and sever the Confederacy

Granite and bronze only have been used in the erection of the monuments. Both materials have been carefully tested and inspected. An inspector, employed by the commission, is present at the quarry at Barre, Vermont, to pass upon the fitness of every piece of granite. This inspection has been and is continued as the structure is erected at Vicksburg, to insure that nothing but the most perfect of materials shall mark the heroic part taken by the soldiers of Iowa in the investment and siege of Vicksburg. The Historical tablets, inscriptions on the smaller monuments, and the great panels in the central Memorial. are of United States standard bronze which readily lends itself to this use permitting of results in decoration and beauty of form not otherwise obtainable. It has been the purpose of the commission to see that the tablets, monuments and state memorial shall in their spirit and decorations be typical of the men and events they com. memorate, the whole set in a frame of simple and noble architecture. adorned with the highest conceptions of the sculptor's art.

STATE MEMORIAL.

The design is a peristyle, semi-circular in form; its dimensions are as follows:

	ieet.	Inches.
Total width	64	
Depth from front of steps to back of monument	29	9
Height of monument from ground	26	8
Height of center portion from ground	29	10
Height from ground to base of columns	G	
Height of columns	13	6
Height of entablature	4	Ü

	Feet.	Inches
Diameter of columns at base	. 1	
Diameter of columns at neck	1	
Height of bas-reliefs	. 4	6
Width of bas-reliefs	. 5	6
Width of pediment	. 18	
Length of pediment from platform	24	
Width across front and pylons	7	6
Width of side pylona	. 5	
Distance of columns on centers	. 6	
Depth of piers back of columns	. 1	6
Distance of face of column in front of bas-relief	. 2	6
Width of granite wall across rear at back of	ŧ	
pediment	22	
Width of tread of steps	. 1	4
Length of court from base of column to base of	ŧ	
column	. 50	

The design is pure Greek, the columns are massive Doric, and between are open spaces for six bas-reliefs, 4 feet and 6 inches by 6 feet and 6 inches in size, on which will be portrayed in bronze, the following scenes:

Grand Gulf (Naval). Jackson. Black River Bridge. Port Gibson. Champion Hill, Assault, May 22, 1863.

The tablet in the central panel will contain a list of the regiments and batteries engaged in the campaign and siege, the number of troops and their losses.

On the platform a bronze equestrian statue of heoric size will be placed, representing a soldier carrying the standard and entitled "The Standard Bearer."

The broad platform and generous steps give a setting for the monument and will enable throngs to visit the Memorial, and be impressed with the bas-reliefs and other sculpture. The design lends itself to the placing of inscriptions in a very advantageous form in the frieze and on the pylons. The complete effect of the bronzes, the inscriptions and the architecture will be of great beauty, and at the same time of great strength.

This noble architectural structure will stand on Union Avenue in front of the Rail Road Redoubt. A curved drive-way will leave Union Avenue, pass in front of the monument and return to Union Avenue.

A sub-committee visited the residence of the Sculptor H. H. Kitson at Quincy, Mass., in July, 1905, and inspected the clay models for the six large bas-reliefs. They found the models striking exam ples of the sculptor's skill fairly throbbing with intense action and vividly portraying the various scenes. After making suggestions looking to the changing in miner detail of the designs the committee approved the models.

It is the purpose of the commission to have the memorial completed by July 1, 1996, with the exception of the equestrian statue which will take considerable more time for completion.

The inscription on the face of the Memorial will be:

Iowa's Memorial to her soldiers who served in the compaign and siege of Vicksbury, March 20-July 4, 1865.

The following inscription in raised bronze letters is proposed for the central panel of the Pediment.

BRIGADE, REGIMENTAL AND BATTERY MONUMENTS.

The same style is followed in these monuments as is used for the State Memorial: Duric columns, entablatures etc. Thus the same general design is carried out presenting an uniform and harmonious whole. The inscriptions are in bronze and give the history of each command during the campaign and siege.

These monuments have been completed by the contractor and have been accepted by the commission. The beauty of their workmanship and the simple and noble lines of their design attract the attention of all visitors to the Park and elicit unqualified praise. The word "Iowa" appears not only on each of the granite monuments but is also on each bronze entablature. The inscriptions attached to each of the monuments are as follows:

IOWA ANDERSONVILLE PRISON MONUMENT COMMISSION.

Appointed by the Governor.

James A. Brewer Daniel C Bishard Milton T. Russell Martin V. B Evans William C. Tompkin	. Altoona . Des Moines Reaman	Twenty-third Missouri Infantry. Eighth Iowa Cavalry. Pitty-first Indiana Infantry. Eighth Iowa Cavalry. Tweitth United States Infantry.

Chairman, James A. Brewer, Des Moines. Secretary, Daniel C. Bishard, Altoons.

The Thirtieth General Assembly appropriated the sum of \$10,000 for the purpose of erecting a monument "Commemorative of the valor, suffering and martyrdom of the Iowa soldiers who were imprisoned and died in the confederate prison at Andersonville Georgia" The Governor was authorized to appoint a commission of five members each of whom must have served at least three months as a prisoner of war to select the site and erect the monument.

The Commission met in the Governor's office and organized July 19, 1904. On October 10th they visited the site of the old prison and selected a sight in the National Cemetery which adjoins the prison grounds and where are buried the Union soldiers who died while confined in the old stockade upon which to erect the monument. In view of the fact that the National Cemetery is owned, governed and cared for by the United States government the Commission felt that the monument would be much better cared for it placed here than if erected within the grounds of the old prison which are now owned by the National Woman's Relief Corps.

Proudicot and Bird of Des Moines were chosen to draw the plans for the monument after designs submitted by the Commission and the contract for its erection was let under competive hids to the Des Moines Marble and Mantie Company for the sum of \$8,130.00. Under the provisions of the contract the monument was to be in place by November 15, 1905 but because of delay at the quarries this time was extended to January 20, 1906 when it was formally accepted by the Chairman and Secretary on behalf of the Commission.

The monument is of seven pieces of granite standing on a concrete base three feet thick. It is twenty feet in height and weighs seventy-five tons. The base is ten feet square while the die or main shaft is five by seven feet of polished Montello granite. Burmounting the die is the figure of a weeping woman. The monument faces to the west occupying a sightly place and is passed by all visitors going from the National Cemetery to the old prison. Captain J. W. Bryant, Superictendent of the National Cemetery at Andersonville, in a letter to the Secretary of the Commission writes as follows regarding the Iowa monument: "The monument exceeds in bounty of design, in

appropriateness of inscriptions and substantial construction any thing of the kind that I have ever seen. Certainly no monument here-tofore creeted in this cometery or prison park equals it in these particulars. * * * The Commission merits the commendation of their comrades and the State of Iowa. I do not believe there has yet been erected a similar monument any where that can be favorably compared with the one fast completed by the Commission.

INSCRIPTIONS.

On the west die the Scal of Iowa is engraved beneath which are these words:

HISTORICAL,

Andersonville is located well to the southern part of Georgia being sixty miles south from Macon and eleven miles North from Americus. During the war the town was but a mere station on the caitroad that ran from Macon to Albany. The prison, which was officially designated Camp Sumpter by the confederates, was a half mile or so from the station and covered about twenty-seven acres of land which was.

enclosed by a stockade made by setting hewn logs five feet in the ground and extending upward to a height of twenty feet. This area of twenty-seven acres was considerably reduced by the establishment of the "dead line" twenty feet in from the stockade beyond which none dared step. A small stream of water ran through the enclosure which furnished the drinking water for the prisoners and was used for bathing purposes and to carry away the camp refuse. The confederate camp was located further up this stream causing the water to become poluted before it reached the stockade. Marshy ground bounded a considerable portion of the stream leaving a space of less than seventeen acres within the dead line suitable for the men to live on. In this enclosure the prisoners were confined; there being no shelter other than that they made themselves by burrowing in the ground or constructing rude tents from pieces of clothing and blankets. The prison, which was for the confinement of enlisted menonly, was opened February 27, 1864, and the last prisoner left its gates April 28, 1865 these two dates 52,160 union soldiers were confined within the stockade. The largest number confined at one time was in August, 184, when its population was over 33,000 and the death rate for this month was in excess of 3,000. The dead were taken out each day and buried by their comrades in what is now known as the National Cemetery. which is located a half mile to the north of the prison and is under the supervision of the War Department. The record kept by the burying squad as they laid their comrades in their last resting place furnishes the only register to the 13,838 graves in the cemetery.

Ohio, Rhode Island, Massachusetts and Michigan have erected monuments within the confines of the old stockade while Pennsylvania, Maine and New Jersey have erected monuments in the National Cemetery.

The following is a comparison of the death rate in twelve of the most noted Union prisons with that of Andersonville for the same period ie. March 1, 1864 to April 1, 1865. 'See War Records Series II, Vol. VII).

Appointed by the President of the Senate and the Speaker of the House of Representatives.

W. P. Whipple. Chairman. Vinton. Thomas Lambert, Sabula, R. C. Langan, Secretary, Clinton.

D. W. Turner, Corning.

LOBENZO D. Teter, Knoxville, R. M. Wright, Fort Dodge.

The Thirtieth General Assembly adopted a Joint Resolution authorizing "the President of the Senate to appoint three members of the Senate, and the Speaker of the House three members of the House, who when so appointed, shall constitute a committee for the purpose of carefully inquiring into, and the advisability of, changing the present system of management of the state educational institutions of Iowa." Senators Whipple, Turner and Lambert were appointed by the President of the Senate, and Representatives Kendall. Wright and Langan, by the Speaker of the House, as members of said committee. The committee met in Des Moines and organized.

The resolution further provided that the committee should "examine into the entire system of management and affairs of said educational institutions, their business management and educational policies." and "shall make to the Thirty-first General Assembly a detailed report of its findings and conclusions, supported by all the facts, and that said report shall be filed not later than the first day of the session, of the next General Assembly, said report to be based upon the investigations herein referred to, supplemented by a comparison and examination of the methods elsewhere employed."

The members of the committee received, while in the performance of their duties, mileage of five cents per mile each way, and the actual and necessary expenses incurred.

The committee made the investigation authorized by the resolution and filed their report with the Thirty-first General Assembly early in January, 1906.

The following extracts taken from the report give in brief the findings and the recommendations of the committee.

FINDINGS.

Duplication of Work: We have in the State Normal School a minature university, where a large part of the work is a duplication of that done at lowa City. Between the State University and the College of Agriculture and Mechanic Arts there is a considerable duplication of work. Some of this duplication is necessary and some is unnecessary. Between the State Institutions for higher learning and the high schools there is a considerable duplication of work. Graduates of the 180 accredited high schools are admitted to the freshmen year in any of the four year courses offered by any of the institutions. The College of Agriculture and Mechanic Arts offers an academic course, introductory to the various regular courses and graduates of small

*Appointed to fill vacancy caused by resignation of N. E. Kendall.

high schools who have two or three years of high school work are admitted to review or regular work in the academic classes. In the school year 1904-5, 24 students were enrolled in the preparatory department.

The board of regents at the State University recently made provision for the admission of graduates from three year high schools, as irregular or unclassified students. Students, except those able to pass the required examinations to enter the freshman class, should not be admitted to either of the two institutions last named without first having graduated from one of the accredited schools. The people of the state should not be taxed twice to do the same kind of work. The University and the College of Agriculture should not be allowed to enter into competition for students who ought to study in their high schools until they have finished their course, in view of the fact that we have practically an average of two of such accredited chools in every county of the state.

SMALL AND SALARIED BOARD OF CONTROL.

The proposition to create a small and salaried board of control is a new one. To place general and unlimited power with such a body would be a dangerous experiment. From the very nature of the case its appointees would have to be selected by the people or named by some person or persons. Under either method of appointment, the salaries that must necessarily be paid to men for assuming such responsible positions would invite place-hunters and men incompetent by reason of lack of education and experience in educational work, to creditably perform the duties assigned them. The tendency would be to place on such a board, politicians rather than educators and men of first class business qualifications. The tendency would be to lose sight of the educational side of the work, in an effort to make a favorable showing on the financial side. However, the management of the finances of our several institutions may be improved upon. Without going into details, an examination of the evidence submitted will convince the enquirer that there is room for improvement along this line.

There is also room for improvement in the educational work that is being done at the several institutions. What we desire, and what the people demand is, that every dollar appropriated for our educational institutions shall be so employed as to get the very best results.

EMPLOYEES.

Under the present system, too many opportunities are given to idle and fritter away time. A scheme should be devised that will give to the state good and efficient service on the part of each of its employees.

BUILDINGS AND SUPPLIES.

Greater care should be exercised, *** in the matter of purchase of supplies and in the letting of contracts for buildings and other improvements.

RIGH SCHOOL INSPECTOR.

Our high school inspector is all that is required to gather data touching the management and efficiency of our secondary schools.

UNIFORMITY.

There should be uniformity in the methods employed to get the best results. There should be more uniformity in the tuition and other fees charged the students at the several institutions. A system should be devised, that will remove from politics, as far as possible, the administration of our educational institutions and at the same time, secure to the State good and efficient business management.

BOARD OF REGENTS.

A board called upon to make rules and regulations respecting the management of educational institutions, to approve or disapprove educational policies as suggested by presidents and faculties should be large enough to be thoroughly representative. Its members should be broad minded men, who are willing to serve the state without pay and who will act from a pure sense of duty, having in mind the educational interests of the state they are called upon to serve.

EDUCATIONAL POLICIES.

The government of educational institutions should be and remain in the faculties for the purposes of discipline and for the purpose of educational policies.

RECOMMENDATIONS.

We therefore recommend the creation of a board of regents for the three state educational institutions. That it may be thoroughly representative, we suggest that it should be made up of fifteen members. The powers vested in the board should be such as are generally conferred upon like bodies. Its members should be appointed by the governor by and with the advice and consent of the Senate

We recommend that power be given to such proposed board of regents to appoint an executive committee from outside its membership, to perform the duties now required by law of the treasurer of the state University, the financial agent of the college of Agriculture and Mechanic Arts, and the executive committee of the board of regents of the state University and such other duties as may be required by law or the board of regents.

The members of this committee should receive a salary of not less than three thousand dollars a year and they should be required to frequently visit, and keep a duplicate set of books and accounts with each institution and to make a detailed report in writing of their work, with recommendations, at each meeting of the board of regents. The members of this committee, as in the case of the presidents and other employees of our educational institutions, should be elected subject to removal at the pleasure of the board. No powers of a legislative or judicial character should be given to this committee. The work required of it should in all respects be subject to the direction, examination and approval of the board of regents.

COMMITTEE TO INVESTIGATE THE INDETERMINATE SENTENCE AND ELMIRA REFORMATORY SYSTEMS.

Appointed by the President of the Senate and Speaker of the House of Representatives

C. G. Saunders, Council Bluffs.

M. L. Temple, Osceola,

F. F. Jones, Villisca

The appointment of this committee, composed of one member from the Senate, appointed by the President of the Senate, and two members from the House, appointed by the Speaker, was authorized by a loint resolution adopted by the Thirtieth General Assembly. The resolution provided that the committee should "fully inquire into and investigate the workings of the indeterminate sentence and Elmira reformatory systems in states where the same are now in force," and "report to the Thirty-first General Assembly not later than the second day of the session, with such information and recommendations as it may deem advisable to submit." The resolution also provided that the members of the committee were to serve without compensation, but should be allowed actual expenses and five cents per mile for each mile trayeled.

The committee performed the work of inquiry and investigation provided for in the resolution, and submitted a complete report with recommendations to the Thirty-first General Assembly. The committee reported that they "visited the penitentiary at Joliet, Illinois, and the reformatory institution at Pontiac in the same state; also the Elmira reformatory in the state of New York and that of Massachusetts, located at Concord Junction," "also the Massachusetts penitentiary, at Charleston and spent one day with Hon. F. G. Pettigrove, Chairman of the Board of Prison Commissioners of the State of Massachusetts, at Boston."

The following extracts from the report give in brief the conditions as found by the committee, their conclusions and recommendations:

INDETERMINATE AND PAROLE SYSTEM.

Your committee finds that at least thirteen states have the Indeterminate Sentence and Parole System applied to their penitentiaries. Six other states have Boards of Parole and Parole Systems. independent of any Indeterminate Sentence law. The sentences in these latter states are for definite terms, but the application of the Parole Law is such that the main features of the Indeterminate Sentence are carried into practice; so that the results are very similaralthough not as satisfactory. In all the states visited by your committee, the prison officials expressed themselves as being pleased with work and results of the Indeterminate Sentence and Reformatory System, and gave them hearty endorsement. We find also that this method of treatment for convicts is recommended by the International Prison Congress. In all our communications with prison officials and those who have made a study of prison reform, we found none who were not earnest in their endorsement of these systems; and the officient wardens of our own State earnestly recommend their adoption.

Your committee is of the opinion that the Indeterminate Sentence more nearly comports with the just administration of the law than the Definite Sentence System, for the reason that it tends to the equalization of sentences. In the hurry of the trial and the pressure of the court business, the Judge frequently inflicts a sentence that falls far short of doing justice to the community and the criminal. Experience has proven that the professional criminal is an adept in concealing for at least a limited period of time his former misdeeds and convictions. Where he is convicted under Indeterminate Sentence System and comes before the Board of Parole, after one or more years of confinement, the Board is in possession of the man's history and is better able to determine what the length of the sentence should be than the Judge and the County Attorney, whose acquaintaince with the man frequently does not extend beyond a few days or weeks.

REPORMATORIES.

We find that twelve states have provided reformatories for young men, in all of which the so-called reformatory principle obtains to a greater or less degree. The results obtained and the success shown seem to confirm the claim confidently made, that this principle is scientific, economic and ethic; scientific, because it inquires into the previous condition of the criminal, his associations, inherited tendencies and environments, and, in the light of this knowledge thus acquired, undertakes to remedy and reform his criminal tendencies: economic, because it saves the expense of trial, the maintenance of the convict, and saves his earning capacity, and the losses and damage sustained to society by reason of criminal depredations: it also restores to the community a productive worker and, oftentimes, a valuable citizen, who would otherwise be lost to the productive forces of society; ethic, because it changes his habits of thought and action, builds him up physically and mentally, gives him a higher conception of social obligations, equips him for making an honest living, and requires of him proof of his ability to stand morally erect and discharges him better able to succeed in the struggles of life than he was before his committal.

Your committee finds, however, that many principles and methods. of the Reformatory are being used in some states in the penitentiaries with marked success, and that there is a growing disposition to further supply these scientific and humanitarian methods in the treatment of prisoners in all parts of the world. Even in Iowa, while we have as yet no Reformatory, there is a gradual evolution in the management of our penal institutions. Corporator other punishments are not administered. We have abandoned the "lock step" and the "tin plate." Prisoners are humanely treated, and are well, but plainly fed, from earthenware table furnishings, and are permitted to assemble in a common dining room. Our statute grants a diminution of sentence for good conduct, so graded that it is possible for a prisoner to reduce a ten years' sentence to an actual service of six years and three months. By way of furthering discipline, we now use a system of grades and privileges which are to be earned by the prisoner under the rules and regulations of the prison.

Among the activities that are greatly emphasized in practically all reformatories, we mention the following:

Scientific physical training of all who need it.

Training to prompt and exact obedience and respect for law, by use of military drills, rules and regulations.

A "System" that keeps the inmates, under the care of a competent keeper, continuously busy from the morning bell tap until "lights out" at night.

The giving of a common school education to all who need it, supplemental to which is taught the obligations of the individual to society, the duties of American citizenship and the need of self-control.

The industrial school training, in which each is taught a useful trade or calling, by which he is able to retain employment and make an honest living in competition with the world; and, lastly,

The moral and religious work which is encouraged in every institution, with the object of strengthening and developing the weak

places in the character of the individual.

So far as your committee has been able to investigate the working of the institutions visited, we find them proceeding by somewhat different methods, using, to a certain extent, different rules and regulations, with conditions and equipment peculiar to each institution; but the common object sought in them all is the reformation of the convict for the protection of society. Pontiac has its parade ground and drills, its separate school building: its Junior Republic, where membership is only acquired by a higher degree of excellence, and which is practically self-governing, under the direction, of course, of the officials: its dormitories, instead of cells, for it's younger inmates; and its emphasis of manual training.

STATE PENITENTIARIES.

***Of all the penitentiaries visited, we found none better kept and better managed than the northern penitentiary of Iowa, at Anamosa-This could easily be converted, with little expense, into a Reformatory, and adapted to all the needs of such an institution. Fractically all of the equipment there is capable of use and, with the addition of a rew buildings, (not necessarily costly) and machinery for the tradeschools and manual training, it would possess all the equipment necessary to put in operation such an institution. Your committee believes, however, that some time will be necessary to develop plans and work out the program under which lowa may maintain one Reformatory prison and one Penitentiary proper. The State owns a large property at Fort Madison, and, if the decision shall be to continue it as the penitentiary, it will be necessary to erect a cell-house, with a capacity of from 720 to 760 cells. In all probability, a cell-house of this capacity will not be filled for some time to come, but, while building, it would be economic to provide sufficient accomodations which may be relied upon as a margin of safety for the future. The old cell-house at Fort Madison, in the judgment of your committee, is entirely unfit to be used as such, and should be replaced by a new one at the earliest possible time, even if no changes are made in our penal institutions. The management of this prison is excellent and no just eriticism can be made of its officials and the earnestness with which they have tried to better conditions surrounding the prison. The prison cell-house of Fort Madison was crected many years ago, before many of the modern improvements were known, and has outlived it's usefulness, and, in the judgment of your committee, is a disgrace to the great state of Iowa, being unfit for human habitation. We desire to emphasize in this connection that the efficient warden of this prison is in no way responsible for its condition, as he has done all that was possible under the surroundings, to better its condition; but the task cannot be accomplished short of replacing the antiquated cell-house by a modern one with modern conveniences and necessities.

RECOMMENDATIONS.

Your committee offer the following recommendations:

- The enactment by the General Assembly, of an Indeterminate Sentence and Parole Law.
- That the Thirty-first General Assembly make provision for a suitable penitentiary, to be used for the restraint of persons committed by the courts of the state to the penitentiary.
- 3. That a Reformatory law be enacted, providing in terms that all males between the ages of sixteen and thirty years who have not been sentenced to life imprisonment or convicted of beinous crimes such as murder, treason, etc., may be committed to a reformatory, when found guilty of a felony, provided, of course, that the prisoner is not by court sentenced to imprisonment in the county jail, or the payment of a fine, without imprisonment in the penitentiary. That the Board of Control be authorized to make such changes and improvements in the Anamosa prison as to render it suitable for use as a reformatory, and that the Anamosa prison be declared by law to be a Reformatory on and after some date, to be fixed by the General Assembly.
- 4. That, on and after the date fixed, upon which the Reformatory Law shall become effective, that the prison at Anamosa be known and maintained as a Reformatory and that the Board of Control be directed to creek such buildings, if any, as may be necessary to properly equip the same for reformatory purposes

In this connection your committee begs leave to recommend that, as a hospital has been erected in the prison at Anamosa, for the care of the criminal insame, that it still be maintained and used for that purpose, until such time as that the General Assembly shall make other provisions; and as the female portion of the prison at Anamosa has already by statute been declared a Reformatory, your committee recommend that it shall be used as the place of detention for the female convicts of Iowa until such time as the General Assembly shall make other provisions.

Board of Control of State Institutions

HEADQUARTERS, CAPITOL BUILDING, DES MOINES, IOWA

MEMBERS.

F. S. TREAT, Secretary, Des Moines.

HENRY F. LIEBBE, Architect, Des Moines.

The Board of Control of State Institutions was created under the provisions of chapter 118, laws of the Twenty-seventh General Assembly, which, with the amendments thereto, clothes the board with full power to manage, control and govern, subject only to the limitations contained in the act, the following named institutions;

Iowa Soldiers' Orphans' Home at Davenport.

Iowa Soldiers' Home at Marshalltown.

School for the Deaf at Council Bluffs.

College for the Blind at Vinton.

Institution for Feeble-minded Children at Glenwood.

Mt. Pleasant State Hospital.

Hospital for Female Inebriates (Mt. Pleasant.)

Independence State Hospital.

Clarinda State Hospital.

Cherokee State Hospital.

State Hospital for Inebriates (Knoxville.)

Industrial School for Boys at Eldora.

Industrial School for Girls at Mitchellville.

Industrial Reformatory for Females at Anamosa.

Penitentiary at Anamosa.

Penitentiary at Ft. Madison.

The board is also required to investigate thoroughly the reports and doings of the Regents of the State University, the trustees of the State Normal Schoolandthe State College of Agriculture and Mechanic Arts, and the books and records of said institutions. It also has supervision of county and private institutions in which insane persons are kept, and of associations and societies receiving friendless children.

Prior to July 1, 1898, the foregoing state institutions, except the penitentiaries, were in charge of separate boards, each of which had its officers and each had a secretary and treasurer.

* Appointed to fill vacancy caused by deathfoli. G. Kinne.

The Board of Control was organized on April 6, 1898, and took full control, as provided by statute, on July 1, 1898, of the institutions heretofore named. At that time the various boards of trustees, and commissioners ceased to exist.

The Board publishes quarterly a bulletin of over a hundred pages, devoted to the scientific investigation of the treatment of insanity and epilepsy, and the feeble-minded, and information embodying the experience of soldiers' homes, charitable, reformatory and penal institutions in this and other countries, it being the intention of the board to keep in touch with the best thought and judgment of the age.

As provided by law, under the direction of the board, the State institutions under its control are supplied with goods for their support on competitive bids, thus procuring proper supplies at the lowest market prices. An opportunity to bid is afforded anyone who indicates a desire to the Board.

The Thirtieth General Assembly enacted a law directing that a State Hospital for Inebriates be opened at Knoxville in the buildings formerly used as a Home for the Adult Blind and in such additional buildings as the Board should cause to be erected. The act has been complied with and the hospital is now open for the reception of male insbriates. Female inebriates are received in a department of the Mt. Pleasant State Hospital known as the Hospital for Female Inebriates.

As to the Institutions under its control the Board is charged with the duty of investigating their management and financial condition: it must determine questions as to the sanity of patients in hospitals and determine when persons shall be admitted to State hospitals as State charges, and it is to divide the State into hospital and nenitentiary districts. It must make biennial reports to the Governor and legislature; make a statement showing the cost of operating the institutions for the preceding two years, visit all institutions twice a year, and some of its members must visit each State hospital once a month; must meet the superintendents in quarterly conference. gather statistics, publish a bulletin, compel institutions to provide fire escapes, require employes handling State property to give bonds. require the making of an annual inventory of the State's property, make a quarterly invoice of all stores at the institutions, annually fix salaries of officers and employes, except the chief executive officers, appoint a State architect and perform many other duties. Since the Board took charge the population of the institutions has increased 1.800. In other words, there are over one third more people being supported in them than there were seven years ago, and notwith standing the advanced prices they are being better fed, clothed and cared for than ever before, and for a less sum for support than , under the former system. The physical conditions of the several properties. at the institutions have been greatly improved.

TUBERCULOSIS.

The Thirtieth General Assembly authorized the Board of Control of State Institutions to "investigate the extent of tuberculosis in Iowa and the best means of prevention and treatment of the disease and report its findings to the next General Assembly."

It also authorized the Board if it "deems it advisable to place under its immediate observation a number of cases of the disease for the purpose of more fully advising the General Assembly of the results of care and treatment," also "to publish and distribute at its discretion such facts as will advise the public regarding the prevention of tuberculosis."

For all of the above purposes an appropriation of one thousand dollars was made. The question the board was called upon to decide were how to obtain reasonably accurate information regarding the "extent of tuberculosis in Iowa;" the advisability of placing cases under observation, and if this was deemed best then the proper means of housing the patients, the requisites for such a patients' camp as well as such requisites for a permanent institution in the event such ap one should be bereafter established.

In the absence of any reliable vital statistics in this State, except in a few cities, the Board determined to obtain the opinions of experts on tuberculosis in this State and elsewhere regarding the best method of securing the information desired regarding the extent of tuberculosis and also to invite from them an expression of opinion regarding the other matters heretofore mentioned. A letter was prepared and mailed to seventy-three physicians, embracing the leading experts on tuberculosis in this country and in Europe. The following questions were submitted to them, viz:

- In prosecuting said; investigation as to the "extent of tuberculosis" in Iowa, from what sources other than the census reports, reports of vital statistics and information obtainable from practicing physicians and from experts in the treatment of the disease, would you expect to obtain information of value?
- 2. Would it be desirable to ask the physicians of the State how many cases of tuberculosis they have treated during a given period, the age and sex of each patient, the duration of the treatment, the extent and character of prior treatment, if any, the condition of the patient when treatment began (incipient case, advanced case, far advanced or doubtful), methods of treatment (medical, out-of-doors, etc.), condition of patients when discharged (apparently cured, disease arrested, disease improved, disease unimproved, doubtful, died), the effect of treatment on prominent symptoms such as a decrease in the number of bacilli in expectorations, gain or loss in weight, and in your judgment what other questions should be propounded, and if it is your opinion that some of those above suggested be omitted would you kindly indicate what ones you would eliminate?

- 3. What is your opinion as to the advisability of placing under observation cases of the disease for the purpose of advising the next General Assembly of the actual results of care and treatment, and if you would recommend such a course would you for that purpose recommend the use of tents or of temporary wooden structures and would there be any objection to conducting such a camp within a reasonable distance from an existing State hospital for the insane?
- 4. In your judgment can the results of care and treatment be as well ascertained and demonstrated with tubercular patients who may be insane as with tubercular patients who were not insane?
- 5. What in your opinion are the indispensable requisites for the location of such a camp as well as for the location of a permanent institution for the treatment of tubercular patients?
- 6. What in your opinion are the desirable, though not indispensable, requisites for the location of such a camp or permanent institution?
- Kindly give us fully any other information which will in your opinion be of value to us in the proper prosecution of this work.

A return stamped envelope was enclosed and over sixty of the physicians addressed replied fully.

A majority of them favored the plan indicated in questions one and two. Some proposed adding other questions: a few deemed statistics so gathered of little value, others would confine the search for information to a limited portion of the State, and still others thought that known facts in other states were a sufficient guide to follow. A majority opposed placing cases under observation, the objections being various, including insufficient time in which to make the experiment and too small an appropriation. In the event that patients were placed under observation, the physicians were about equally divided in opinion as to the use of tents or wooden structures for the purpose of housing patients. A large majority saw no objection to locating such a camp a reasonable distance from a hospital for the insane. The experts were practically unanimous in the opinion that as good results could not be obtained with insane tubercular patients as with sane patients. All advised the following as desirable for the location of either a temporary or permanent hospital for the treatment of tubercular patients, viz: pure air, a considerable elevation, a reasonable distance from a city, or town, good drainage, timber protection. southern exposure, etc. A few advised a high altitude of from 1,500 to several thousand feet as desirable, although the greater number farored a moderate elevation and deemed out-of-door care and proper treatment more important than altitude.

In view of the information thus received and its great value, coming from men who had made a study of tuberculosis and its treatment, the Board concluded that it was not wise to attempt to place cases under observation, that the time was too short and the funds insufficient to carry out all of the purposes of the act. It also determined to send to each physician in lows a blank calling for the following information, viz: The number of persons treated for tuberculosis by

each or known by them to have had said disease during the year ending June 30, 1904, the name, age, sex, social slate, color, occupation, residence and nativity of each of said persons so treated or known; also a statement as to whether they were afflicted with pulmonary tuberculosis or with tuberculosis of some other organ or part of the body. During the month of September, 1904, the blanks were mailed to all of the physicians in Iowa, 3,321 in number, and up to the evening of October 29, 1904, replies had been received from 1,595 of whom 678 reported no cases and 918 reported one or more cases. Of those not reporting cases a few had retired from practice and some had removed from the state or died. These 918 physicians reported 3,300 cases as existing during the period hereofore mentioned.

Early in November a second letter was mailed to every physician in the State who had failed to fill out and return the blanks sent to him. This resulted in receiving several bundred additional returns.

Up to January 8, 1905, the board received returns from 2,416 of the 3,522 physicians in this State. Of those reporting 1,022 say they have had no cases during the year, ending June 30, 1904; 1,334 report 4,512 cases.

If all had been heard from and the same percentage of cases been reported as heretofore, we should, have a record of over 6,800 cases.

As many physicians who do report some cases, advise the board that they have had other cases which they are unable to fully report because they have kept no record of the same, it is fair to assume that there were more than 7,000 cases in this State during the year ending June 30, 1904.

Nearly one-third of the cases exist in persons between twenty-one and thirty years of age. Of the 4,512 cases reported 3,679 are of a pulmonary character and 831 tuberculosis in other parts of the body.

While the foreign born people of Iowa constitute less than onesixth of the total population, yet almost one-third of the total numper afflicted are of foreign birth. Almost two-thirds of the total number of cases reported are found among people whose occupation is indoors.

In its report to the General Assembly the Board finds:

- That there are from 7,000 to 7,500 cases of tubuculosis in Iowa.
- 2 That the best means of prevention of the disease are:
- a. A strict enforcement of the existing rule of the Board of Health requiring a prompt report to be made by physicians of all cases of tuberculosis.
- b. State Legislation with proper penalties prohibiting expectoration in and about all churches, public halls and in all public conveyances and on sidewalks.
- c. The education of the people by the dissemination of proper literature informing them of the dangerous character of the disease, of the measures which should be taken for its treatment and to prevent its spread and to protect themselves and others from its rayages.

- d. Instruction in the public schools of the State regarding the disease, its prevention and treatment.
- e. The removal of tubercular cases in the carliest stages from the home to public or private sanatorium when practicable, to prevent the spread of the disease.
- f. Legislation authorizing and encouraging manipulation in the establishment and maintenance of local hospitals for the treatment of tubercular cases.
- 3. That the best means of treatment of the disease are, Sanatoria, public or private, where patients can lead a regular life under the most favorable conditions as to diet, clothing, exercise and medical and other care under the direction of skilled physicians and capable nurses and where the surroundings are calculated to promote recovery.

The State University of Iowa is an integral part of the public school system of the state. As required by law, the work of the University is based upon the preparation afforded by the duly accredited high schools of the state, whose graduates are admitted to the undergraduate and professional courses upon presentation of the proper certificates. A sense of this vital connection with the public schools determines, in a large measure, the requirements for admission to the University, its spirit, and its courses of study. The State through the University undertakes to furnish instruction in the various branches requisite for a liberal education in the liberal arts. law, medicine, dentistry, pharmacy, nursing, and in applied science, the various branches of engineering. It also aims to encourage research work in all departments, to produce creative scholars, and thus do its part in the enlargement of the domain of knowledge. Thus it is the general policy of the institution to foster the higher educational interests of the State, broadly and generously interpreted.

The control of the University is entrusted to a Roard of Regents, consisting of the Governor of Iowa and the Superintendent of Public Instruction ex-officies, and of one member elected by the General Assembly from each of the eleven congressional districts.

The lown Experiment Station was established in accordance with an act of Congress, approved March 2, 1887, for the purpose of aiding "in acquiring and diffusing among the people of the United States useful and practical information on subjects connected with agricul-

ture, and to promote scientific investigation and experiments respecting the principles and applications of agricultural science," under direction of the land grant colleges in each state and territory estab lished by the act of 1862, creating such colleges. This act appropriated to each state and territory, for the purpose of agricultural investigation, the sum of \$15,000 annually, and the experiment stations were thus established as a department of the land grant colleges. They are subject to the regulations of the United States department of agriculture, and are regularly inspected by officers of that department. The results of these investigations and experiments in agriculture, including live stock and all related branches, are published in bulletins issued by the e ment stations quarterly or oftener, and distributed free to all residents of the respective states who apply for them The work of the Iowa Experiment Station along these lines has proved extremely popular and met with favor in all parts of the State and Nation, and many foreign countries as well. The reports of some its experiments have been published entire by foreign governments. and the demand for bulleting is so large that applications outside of the State can no longer be supplied. These bulletins are free to farmers and citizens of Iowa.

The Iowa Engineering Experiment Station was established in accordance with an act of the State Legislature in 1904 for the purpose of carrying on investigations and disseminating information helpful to the industrial interests of the State, outside of agriculture, in the same way that the Agricultural Experiment Station carries on work helpful to the agricultural interests of the State.

This act appropriated \$6,000 for the fiscal years of 1904-1905 and 1905-1906 for such work. Upon the passage of the act considerable technical information became immediately available which had accumulated during the work of the Engineering Division of the State College for several years past. Fifteen Engineering Experiment Station bulletins have already been published, as follows:

Bulletin No. 1-"lowa State College Sewage Disposal Plant and Investigations."

Bulletin No. 2-"Bacteriological Investigations of the Iowa State College Sewage."

Bulletin No. 3-"Data of Iowa Sewage and Sewage Disposal.

Bulletin No. 4—"The Chemical Composition of Sewage of the Iowa State College Sewage Plant."

Vol. III. No. 1-"Tests of Cement."

Vol. III. No. 2-"State Railroad Taxation."

Vol. III, No. 3-"Investigations of Iowa Coals."

Future bulletins on which work is under way and already partly completed will be issued on the following subjects:

"Examination of Iowa Sewage Disposal Plants, 1904 and 1905."

"Investigations of Automatic Stokers Using Iowa Coal."

"Lubricating Oils."

"Cement and Concrete Investigations."

"Feed Water for Boilers."

"Data of Waterworks."

"Ordinances of Iowa Cities Regulating Plumbing, Water Connections and Sewer Connections."

"Investigations of Iowa Limes."

"Electric Lamp Testing for Iowa Cities."

"Ten Railway Lectures."

The work of the Engineering Experiment Station will be continued in these and other lines, and is being carried on in close cooperation with the Iowa manufacturers, municipal officers and others especially interested in the industrial development of the State.

The bulletins of the Engineering Experiment Station are furnished free to residents of Iowa on request. The demand for those already published has been so great that the edition of Bulletin No. 1 is exhausted.

COLLEGE FOR THE BLIND-VINTON.

Superintendent-J. E. Vance. Physician-C. C. Griffin, M. D. Oculist-Lee Wallace Dean, M. D. Sieward-George H. Bruner.

There is a regular appropriation for this institution of \$22 per capita per month for nine months of each year to cover support and maintenance.

The school term begins on the first Wednesday in September and usually ends about the first of June. It is desirable that the students enter at the first and remain until the close. They may, however, be admitted at any time, and they are at liberty to go home whenever their parents send for them.

The department of music is supplied with thirty-seven pianos, one pipe organ, several cabinet organs, and a sufficient number of violinsguitars, bass viols and brass instruments. Every student capable of receiving it is given a complete course in this department.

In the industrial department the girls are required to learn knitting, crocheting, fancy work, hand and machine sewing; the boys, netting, broom making, mattress making and cane seating. Those of either sex who so desire may learn carpet weaving.

These advantages are free to every person, either blind or of defective vision and of suitable school age and capacity, in the State. All that the friends are expected to do is to pay the traveling expenses and furnish clothing. If they are unable to clothe the pupil the necessary clothing will be furnished here and the bill sent to the county from which the pupil comes.

The United States Government pays to the State of Iowa the sum of \$100 per year for each male inmate of the Soldiers' Home, who served in any war in which the United States was engaged, which amount is used as a part of the support fund of the institution.

Persons who have property or means for their support, or who draw a pension sufficient therefor, will not be admitted to the Home; and if after admission, an inmate of the Home shall receive a pension or other means sufficient for his support, or shall recover his health so as to enable him to support himself, he will be discharged from the Home.

Regular appropriation by the State is \$14.00 per month for each member, and \$10.00 per month for each employee not a member of the Home.

IOWA SOLDIERS' ORPHANS' HOME-DAVENPORT.

Superintendent-F. J. SESSIONS.

Physician-William L. Allen, M. D.

Steward-U. D. RUNKLE.

There is in connection with this institution a school building, pleasant, commodius and well lighted, and it is the policy of the board to have the course of instruction of a high standard. A kindergarten is operated for the very young pupils.

The age limit beyond which children are not kept in the Home is

16 years. Fewer than 20 per cent remain to the age limit.

A library of well selected juvenile literature is a source of pleasure and profitable entertainment to the children, as from necessity their pastimes and pleasures are somewhat circumscribed.

It is the aim to provide the children with plenty of good comforta ble clothing, and to have them taught to take good care of the same. Their clothing is all manufactured at the Home, the large girls assisting in its manufacture. The table is supplied with a good variety of plain, wholesome food and a resonable amount of luxuries.

The Home is supported by a regular appropriation of \$12 per month for each inmate and the actual transportation charges of inmates to and from the institution. Each county is liable to the State for the support of its children to the extent of \$6.00 per month, except soldiers' orphans, who are cared for at the expense of the state.

INSTITUTION FOR FEEBLE-MINDED CHILDREN-GLENWOOD.

Superintendent-George Mogridge, M. D.
Physician and Assistant Superintendent—A. R. Schier, M. D.
Assistant Physician—H. W. Benson, M. D.

Steward-E. C. Cook.

There is a regular appropriation for this institution of \$12 per month for each inmate.

The purposes or objects of this institution are to provide special methods of training for that class of children deficient in mind or marked with such peculiarities as to deprive them of the benefits and privileges provided for children with normal faculties. The object is to make each child as nearly self-supporting as practicable, and to approach as nearly as possible the movements and actions of normal people. It further aims to provide a home for those who are not susceptible of mental culture, relying wholly on others to supply their simple wants.

INDUSTRIAL SCHOOL FOR BOYS-ELDORA.

Superintendent-L. D. DRAKE. Steward-J. T. HARNETT. Physician-W. E. WHITNEY, M. D. Matron-Lolla K. Kuser.

INDUSTRIAL SCHOOL FOR GIRLS-MITCHELLVILLE.

Superintendent-F. P. FITZGERALD.
Physician-Ione Stannard.
Matron-Mary Rilby.
Storekeeper-Margaret McGrath.

There is appropriated for the support of these schools the sum of \$10 monthly for each boy and \$13 monthly for each girl inmate.

The object of the institution is the reformation of juvenile delinquents. It is not a prison. It is a compulsory educational institution. It is a school where wayward and criminal boys and girls are brought under the influence of Christian instructors, and taught by example, as well as precept, the better ways of life. It is a training school, where the moral, intellectual and industrial education of the child is carried on at one and the same time.

With a few exceptions any boy or girl, over? and under 16 years of age, who has become habitually vagrant, disorderly or incorrigible or over the age of nine and under the age of sixteen found guilty of crime in a court of record may be committed to this school by any court of record. Any boy or girl may be discharged, or paroled from the school, atany time after one year's training, upon satisfactory evidence of reformation. They may also in exceptional cases be paroled or discharged in less than one year.

MOUNT PLEASANT STATE HOSPITAL.

Superintendent—C. F. APPLEGATE, M. D. First Assistant Physician—F. T. STEVENS, M. D. Second Assistant Physician—L. E. Embion, M. D. Third Assistant Physician—E. H. COHOON, M. D. Woman Physician—ANNE BURNET, M. D. Pathologist—(Vacant).

Matron-Jennette Bowman.

The statute provides that the Board of Control may fix the amount allowed for the care of insane patients, not exceeding \$12 per month each. All expenses of the hospital, except for special purposes, are paid from the sum so named, and the amount is charged to the counties

from which patients are sent, except that in case of the State Hospital at Cherokee the per capita in addition to the \$12 per month is paid by the State. The amount allowed for the Mount Pleasant bospital is \$12 per month for each patient.

National Convention, Chicago, June 21-23, 1904, Temporary Chairman—Hon. ELIHU ROOT, of New York, Permanent Chairman—Hon. JOSEPH G. CANNON, of Illinois. Secretary-Charles W. Johnson, of Minnesota,

NATIONAL PLATFORM.

Fifty years ago the Republican party came into existence, dedicated among other purposes to the great task of arresting the extension of human slavery. In 1860 it elected its first President. During twenty-four of the fourty-four years which have elapsed since the election of Lincoln the Republican party has held complete control of the Government. For eighteen more of the fourty-four years it has held partial control through the possession of one or two branches of the Government, while the Democratic party during the same period has had complete control for only two years. This long tenure of power by the Republican party is not due to chance. It is a demonstration that the Republican party had commanded the confidence of the American people for nearly two generations to a degree never equalled in our history, and has displayed a high capacity for rule and government which has been made even more conspicous by the incapacity and infirmity of purpose shown by its opponents.

CONDITIONS IN 1897.

The Republican party entered upon its present period of complete supremacy in 1897. We have every right to congratulate ourselves upon the work since then accomplished, for it has added lustre even to the traditions of the party which carried the Government through the storms of Civil War.

We then found the country, after four years of Democratic rule, in evil plight, oppressed with misfortune and doubtful of the future. Public credit had been lowered, the revenues were declining, the debt was growing, the administration's attitude toward Spain was feeble and mortifying, the standard of values was threatened and uncertain, labor was unemployed, business was sunk in the depression which had succeeded the panie of 1803, hope was faint and confidence was gone.

THE TARIFF LAW.

We met these unhappy conditions vigorously, effectively and at once. We replaced a Democratic tariff law based on free trade principles and garnished with sectional protection by a consistent protective tariff; and industry, freed from oppression and stimulated by the encouragement of wise laws, has expanded to a degree never before known, has conquered new markets and has created a volume of exports which has surpassed the imagination. Under the Dingley tariff labor has been fully employed, wages have risen and all industries have revived and prospered. We firmly established the gold standard which was then menaced with destruction. Confidence returned to business and with confidence an unexampled prosperity.

REVENUES.

For deficient revenues suplemented by improvident issues of bonds, we gave the country an income which produced a large surplus and which enabled us only four years after the Spanish war had closed to remove over one hundred millions of annual war taxes, reduce the public debt and lower the interest charges of the government.

THE PUBLIC CREDIT RESTORED.

Public credit, which has been so lowered that in time of peace a Democratic administration made large loans at extravagant rates of interest in order to pay current expenditures, rose under Republican administration to its highest point, and enabled us to borrow at two per cent, even in time of war

CUBA.

We refused to palter longer with the miseries of Cuba. We fought a quick and victorious war with Spain. We set Cuba free, governed the Island for three years and then gave it to the Cuban people with order restored, with ample revenues, with education and public health established, free from debt and connected with the United States by wise provisions for our mutual interests

PORTO RICO.

We have organized the government of Porto-Rico and its people now enjoy peace, freedom, order and prosperity.

THE PHILIPPINES.

In the Philippines we have suppressed insurrection, established order and given to life and property a security never known there before. We have organized civil government, made it effective and

strong in administration and have conferred upon the people of those islands the largest civil liberty they have ever enloyed.

By our possession of the Philippines, we were enabled to take promptand effective action in the relief of the legations at Peking and a decisive part in preventing the partition and the preserving of the integrity of China.

THE ISTHMIAN CANAL.

The possession of a route for an isthmian canal, so long the dream of American statesmanship, is now an accomplished fact. The great work of connecting the Pacific and Atlantic by a canal is at last begun, and it is due to the Republican party.

THE ARID LANDS.

We have passed laws which will bring the arid lands of the United States within the area of cultivation.

THE ARMY AND NAVY.

We have re-organized the army and put it in the highest state of efficiency.

We have passed laws for the improvement and support of the militia.

We have pushed forward the building of the navy, the defense and the protection of our honor and our interests. Our administration of the great departments of the Government has been honest and efficient, and wherever wrong-doing has been discovered, the Republican administration has not hesitated to probe the evil and bring offenders to justice, without regard to party or political ties.

THE GREAT CORPORATIONS.

Laws enacted by the Republican party which the Democratic party failed to enforce and which were intended for the protection of the public against the unjust discrimination or the illegal encroachment of vast aggregations of capital, have been fearlessly enforced by a Republican President, and new laws ensuring reasonable publicity as to the operations of great corporations and providing additional remedies for the prevention of discrimination in freight rates have been passed by a Republican Congress.

In this record of achievement during the past eight years may be read the pledges which the Republican party has fulfilled. We promise to continue these policies, and we declare our constant adherence to the following principles:

PROTECTION TO AMERICAN INDUSTRIES.

Protection which guards and develops our industries is a cardinal principle of the party. The measure of protection should always at least equal the difference in the cost of production at home and abroad. We insist upon the maintenance of the principle of protection, and therefore rates of duty should be readjusted only when conditions have so changed that the public interest demands their

alteration, but this work cannot be safely committed to any other hands than those of the Republican party. To entrust it to the Democratic party is to invite disaster. Whether as in 1892, the Democratic party declares the protective tariff unconstitutional, and whether it demands tariff reform or tariff revisions, its real object is always the destruction of the protective system. However specious the name, the purpose is ever the same. A democratic tariff has always been followed by business adversity, a Republican tariff by business prosperity. To a Republican Congress and a Republican President this great question can be safely entrusted. When the only free trade country among the great nations agitates a return to protection, the chief protective country should not falter in maintaining it.

FOREIGN MARKETS EXTENDED.

We have extended widely our foreign markets, and we believe in the adoption of all practicable methods for their further extension, including commercial reciprocity wherever reciprocal arrangements can be effected consistent with the principles of protection and without injury to American agriculture, American labor or any American industry.

We believe it to be the duty of the Republican party to uphold the gold standard and the integrity and value of our national currency.

THE GOLD STANDARD.

The maintenance of the gold standard, established by the Republican party, can not safely be committed to the Democratic party, which resisted its adoption and has never given any proof since that time of belief in it or fidelity to it.

AMERICAN SHIPPING.

While every other industry has prospered under the fostering aid of Republican legislation, American shipping engaged in foreign trade in competition with the low cost of construction, low wages and heavy subsides of foreign governments, has not for many years received from the Government of the United States adequate encouragement of any kind. We therefore favor legislation which will encourage and build up the American merchant marine and we cordially approve the legislation of the last Congress which created the merchant marine commission to investigate and report upon this subject A navy powerful enough to defend the United States against any attack, to uphold the Monroe doctrine and watch over our commerce is essential to the safety and the welfare of the American people. To maintain such a navy is the fixed policy of the Republican party.

CHINESE LABOR.

We cordially approve the attitude of President Roosevelt and Congress in regard to the exclusion of Chinese labor and promise a continuance of the republican party in that direction.

Brigade Monument in Vicksburg National Military Park.

CIVIL SERVICE.

The civil service law was placed on the statute books by the Republican party which has always sustained it, and we renew our former; declarations that it shall be thoroughly and honestly enforced.

THE SOLDIERS AND SAILORS.

We are always mindful of the country's debt to the soldiers and sallors of the United States and we believe in making ample provislons for them in the liberal administration of the pension laws.

ARBITRATION.

We favor the peaceful settlement of international differences by arbitration.

PROTECTION OF CITIZENS ABROAD.

We commend the vigorous efforts made by the administration to protect American citizens in foreign lands and pledge ourselves to insist upon the just and equal protection of all our citizens abroad. It is the unquestioned duty of the Government to procure for all our citizens, without distinction, the rights of travel and sojourn in friendly countries, and we declare ourselves in favor of all proper efforts tending to that end.

THE ORIENT.

Our great interests and our growing commerce in the Orient render the condition of China of high importance to the United States. We cordially commend the policy pursued in that direction by the administrations of President McKinley and President Rossevelt.

THE ELECTIVE FRANCHISE.

We favor such Congressional action as shall determine whether by special discriminations the elective franchise in any State has been unconstitutionally limited, and if such is the case we demand that representation in Congress and in the electoral college shall be proportionately reduced as directed by the Constitution of the United States.

COMBINATIONS OF CAPITAL AND OF LABOR.

Combinations of capital and of labor are the results of the economic movement of the age, but neither must be permitted to infringe upon the rights and interests of the people. Buch combinations when lawfully formed for lawful purposes are alike entitled to the protection of the laws, but both are subject to the laws and neither can be permitted to break them.

OUR LAMENTED PRESIDENT.

The great statesman and patriotic citizen, William McKinley, who was re-elected by the Republican party to the presidency four years ago, was assassinated just at the threshold of his second term. The 19 IOR

entire nation mourned his untimely death and did that justice to his great qualities of mind and character which history will confirm and repeat.

THE SIDENT ROOSEVELT.

The American people were fortunate in his successor, to whom they turned with a trust and confidence which have been fully justified. President Roosevelt brought to the great responsibilities thus sadly forced upon him a clear head, a brave heart, an earnest patrotism and a high ideal of public duty and public service. True to the principles of the Republican party and to the policies which that party had declared, he has also shown himself ready for every emergency and has met new and vital questions with ability and with success.

The confidence of the people in his justice, inspired by his public career, enabled him to render personally an inestimable service to the country by bringing about a settlement of the coal strike which threatened such disastrous results at the opening of the winter of 1902.

Our foreign policy under his administration has not only been able, vigorous and dignified, but in the highest degree successful. The complicated questions which arose in Venezuela were settled in such a way by President Roosevelt that the Monroe doctrine was singularly vindicated and the cause of peace and arbritration greatly advanced. His prompt and vigorous action in Panama, which we commend in the highest terms, not only secured to us the canal route, but avoided foreign complications which might have been of a very serious character.

He has continued the policy of President McKinley in the Orient and our position in China, signalized by our recent commercial treaty with that empire, has never been so high. He secured the tribunal by which the vexed and perilous question of the Alaska boundary was finally settled.

Whenever crimes against humanity have been perpetuated which have shocked our possels his protest has been made and our good offices have been tendered, but always with due regard to international obligations.

Under his guidance we find ourselves at peace with all the world and never were we more respected or our wishes more regarded by foreign nations. Preemimently successful in regard to our foreign relations, the President has been equally fortunate in dealing with the domestic questions. The country has known that the public credit and the national currency were absolutely safe in the hands of his administration. In the enforcement of the laws he has shown not only courage, but the wisdom which understands that to permit laws to be violated or disregarded opens the door to anarchy, while the just enforcement of the law is the soundest conservation. He has held firmly to the fundamental American doctrine that all men must obey the law, that there must be no distinction between

rich and poor, between strong and weak, but that justice and equal protection under the law must be secured to every citizen without regard to race, creed or condition.

His administration has been throughout vigorous and honorable, highminded and patriotic. We commend it without reservation to the considerate judgment of the American people.

RESOLUTIONS ADOPTED.

The Republicans of Iowa congratulate the country upon the general prosperity which prevails; upon the triumph of the home and foreign policies of the Republican party—wise policies which are the fulfillment of the pledges of the party.

- 2. We congratulate the country also upon the adjustment of the Alaskan boundary dispute and work done in preventing the partition of China, and for the assertion of American rights in the far East.
- 3. We are proud of the influence of Iowa's two members of the cabinet, and of the constant, able and wide influence that is at all times exercised by Iowa's members of the Senate and House.
- 4. We commend the record of Governor Cummins, the various State officers and the General Assembly in the successful conduct of the affairs of the State.
- 5. We endorse the administration of President Theodore Roosevelt, and instruct our delegates at large to the Republican national convention, and recommend to the delegates from the several congressional districts to do all in their power to secure his unamimous nomination. President Roosevelt, called to authority under most distressing circumstances, took up the presidency with a full appreciation of the responsibilities of the position. His course has been able, courageous, patriotic; he has no ambition but to serve his country. We commend him for his splendid administration, and believe every American, regardless of party, confides in his ability, patriotism and integrity. His firmness in the right, as he sees it, and his promptness and wisdom have won the admiration not only of our own people but of the world at large. He is the worthy successor of William McKinley, whose death the American people sincerely mourn.
- 6. We believe in the protective tariff, which builds American factories, makes possible great and small American industries and gives employment to American labor. We believe in the American home market for the products of American farms, factories and shops. We believe it unwise to seek markets abroad by first sacrificing some part of the markets at home. And equally unwise to legislate in a manner to provoke American industries to making war upon each other. Under the protective system, newly inaugurated in 1897, the country has enjoyed unusual prosperity. Protective duties have kept work and, wages at home and have furnished the revenue with which

to pay the expenses of a foreign war, to rebuild the navy, to enlarge and newly equip the army, to extend our coast defences and have made possible the Nation's expansion. Fortified by the advantages and benefits of a great home market the American manufacturers have thus had the courage and the capital with which to invade foreign markets. Our tariff system by giving assurance to the world that the revenues are ample has advanced the credit of the Nation to the first position; the same policy has converted our people into lenders instead of borrowers. We declare for faithful adherence to this system which found its highest fulfillment in laws bearing the names of William McKinley and Nelson Dingley.

- 7. We are in favor of reciprocity in non-competitive products only.
- 8. We are opposed to trusts and combines, of whatever nature organized to extort undue and exorbitant profits from the people We rejoice in the success of President Roosevelt in his efforts to enforce in the courts the laws of Congress made to curb the improper exercise of power by these great organizations.
- 9. We commend the Congress and administration for the constant progress made in building an American navy; and in making certain the early realization of the aspirations of the American people by the acquisition and completion of the Panama canal.
- 10. To the soldiers and sailors of the republic, suitable pensions should be paid for disabilities incurred and for wounds received.
- 11. This convention of republicans can not conclude its labors without an expression of regret on account of the death of the chairman of the national republican committee. Senator Marcus A. Hanna, of Ohio, who exemplified in his life and character the ideal of the true American business man and patriotic citizen.

We approve the able, conservative and patriotic states manship of the Iowa delegation in the National Congress.

DEMOCRATIC PARTY.

NATIONAL TICKET.

For President,
ALTON B. PARKER,
of New York.

For Vice-President, HENRY G. DAVIS, of West Virginia.

National Convention, St. Louls, Missouri, July 6-9, 1901. Temporary Chairman—Hon. John Sharp Williams, of Mississippi. Permanent Chairman—Hon. Champ Clark, of Missouri. Secretary—Hon. Charles A. Walsh, of Iowa.

NATIONAL PLATFORM.

The Democratic party of the United States, in national convention assembled, declares its devotion to the essential principles of the Democratic faith which bring us together in party communion.

Under these principles, local self-government and national unity and prosperity were alike established. They underlaid our independence, the structure of our free republic, and every Democratic expansion from Louisiana to California, and Texas to Oregon, which preserved faithfully in all the States the tie between taxation and representation. They yet inspirit the masses of our people, guarding jealously their rights and liberties, and cherishing their fraternity, peace and orderly development. They remind us of of our duties and responsibilities as citizens, and impress upon us, particularly at this time, the necessity of reform and the rescue of the administration of government from the headstrong, arbitrary, and spasmodic methods which distract business by uncertainty, and pervade the public mind with dread, distrust, and purturbation.

FUNDAMENTAL PRINCIPLYS.

The application of these fundamental principles to the living issues of the day constitutes the first step toward the assured peace, safet, and progress of our Nation. Freedom of the press, of conscience, and of speech; equality before the law of all citizens; right

of trial by jury; freedom of the person defended by the writ of arbeas corpus; liberty of personal contract untrammeled by sumptuary awa; supremacy of the civil over militiary authority; a well disciplined militis; separation of church and state; economy in expenditures; low taxes, that labor may be lightly burdened; prompt and sacred fulfillment of public and private obligations; fidelity to treaties; peace and friendship with all nations; entangling alliances, with none; absolute acquiescence in the will of the majority, the vital principle of republics—these are doctrines which Democracy has established as proverbs of the nation, and they should be constantly invoked and enforced.

ECONOMY OF ADMINISTRATION.

Large reductions can easily be made in the annual expenditures of the Government without impairing the efficiency of any branch of the public service, and we shall insist upon the strictest economy and frugality compatible with vigorous and efficient civil, military and naval administration as a right of the people too clear to be denied or withheld.

HONESTY IN THE PUBLIC SERVICE.

We favor the enforcement of honesty in the public service, and to that end a thorough legislative investigation of those executive departments of the Government already known to teem with corruption, as well as other departments suspected of hurboring corruption, and the punishment of ascertained corruptionists without fear or favor or regard to persons. The persistent and deliberate refusal of both the Senate and House of Representatives to permit such investigation to be made demonstrates that only by a change in the executive and in the legislative departments can complete exposure, punishment, and correction be obtained.

FEDERAL GOVERNMENT CONTRACTS WITH TRUSTS.

We condemn the action of the Republican party in Congress in refusing to prohibit an executive department from entering into contracts with convicted trusts or unlawful combinations in restraint of interstate trade. We believe that one of the best methods of procuring economy and honesty in the public service is to have public officials, from the occupant of the White House down to the lowest of them, returned as nearly as may be to Jeffersonian simplicity of living.

EXECUTIVE USURPATION.

We favor the nomination and election of a President imbued with the principles of the constitution who will set his face sternly against executive usurpation of legislative and judicial functions, whether that usurpation be veiled under the guise of executive construction of existing laws, or whether it take refuge in the tyrants' plea of necessity, or superior wisdom.

IMPERIALISM.

We favor the preservation, so far as we can, of an open door for the world's commerce in the Orient, without unnecessary joutanglement in Oriental and European affairs and without arbitrary, unlimited, irresponsible, and absolute government anywhere within our jurisdiction. We oppose as fervently as did George Washington an indefinite, irresponsible, discretionary and vague absolutism and a policy of colonial exploitation, no matter where or by whom invoked or exercised; we believe with Thomas Jefferson and John Adams that no government has a right to make one set of laws for those "at home" and another and a different set of laws, absolute in their character. for those "In the colonies". All men under the American flag are entitled to the protection of the institutions whose embiem the flag is: if they are inherently unfit for those institutions then they are inherently unfit to be members of the American body politic. Whereever they may exist a people incapable of being governed under American laws, in consonance with the American Constitution, the territory of that people ought not to be a part of the American domain.

We insist we ought to do for the Filipinos what we have done already for the Cubans, and it is our duty to make that promise now and upon suitable guarantees of protection to citizens of our own and other countries resident there at the time of our withdrawal, to see the Filipino people upon their feet, free and independent to work out their own destiny.

The endeavor of the Secretary of War, by pledging the Government's indersement for "promotors" in the Philippine Islands to make the United States a partner in speculative exploitation of the archipelage, which was only temporarily held up by the opposition of Democratic Senators in the last session, will, it successful, lead to entanglements from which it will be difficult to escape.

TARIFF.

The Democratic party has been, and will continue to be, the consistent opponent of that class of farifi legislation by which certain interests have been permitted, through Congressional favor, to draw a heavy tribute from the American people. This monstrous perversion of those equal opportunities which our political institutions were established to secure has caused what may once have been infant industries to become the greatest combinations of capital that the world has ever known. These especial favorites of the Government have, through trust methods, been converted into monopolies, thus bringing to an end domestic competition, which was the only alleged check upon the extravagant profits made possible by the protective system. These industrial combinations, by the financial assistance they can give, now control the policy of the Republican party.

We denounce protection as a robbery of the many to enrich the few, and we favor a lariff limited to the needs of the Government, econically, effectively and constitutionally administered, and so tevied as not to discriminate against any industry, class or section, to the end that the burdens of taxation shall be distributed as equally as possible,

We favor a revision and a gradual reduction of the tariff by the friends of the masses and for the common weal and not by the friends of its abuses, its extortions, and its discriminations, keeping in view the ultimate end of "equality of burdens and equality of opportunities" and the constitutional purpose of raising a revenue by taxation, to wit, the support of the Federal Government in all its integrity and virility, but in simplicity.

TRUSTS AND UNLAWFUL COMBINATIONS.

We recognize that the gigantic trusts and combinations designed to enable capital to secure more than its just share of the loint products of capital and labor, and which have been fostered and promoted under Republican rule, are a menace to beneficial competition and an obstacle to permanent business prosperity. A private monopoly is indefensible and intolerable.

Individual equality of opportunity and free competition are essential to a healthy and permanent commercial prosperity and any trust, combination, or monopoly tending to destroy these by controlling production, restricting competition, or fixing prices and wages should be prohibited and punished by law. We especially denounce rebates and discriminations by transportation companies as the most potent agency in promoting and strengthening these unlawful conspiracies against trade.

We demand an enlargement of the powers of the Interstate Commerce Commission, to the end that the traveling public and ship pers of this country may have prompt and adequate relief from the abuses to which they are subjected in the matter of transportation. We demand a strict enforcement of existing civil and criminal statutes against all such trusts, combinations, and monopolies; and we demand the enactment of such further legislation as may be necessary effectually to suppress them.

Any trust or unlawful combination engaged in interstate commerce which is monopolizing any branch of business or production should not be permitted to transact business outside of the State of its origin. Whenever it shall be established in any court of competent jurisdiction that such monopolization exists, such prohibition should be enforced through comprehensive laws to be enacted on the subject.

CAPITAL AND LABOR.

We favor the enactment and administration of laws giving labor and capital impartially their just rights. Capital and labor ought not to be enemies. Each is necessary to the other. Each has its rights, but the rights of labor are certainly no less "vested", no less "sacred" and no less "inalienable" than the rights of capital.

We favor arbitration of differences between corporate employers and their employees, and a strict enforcement of the eight-hour law on all Government work.

We approve the measure which passed the United States Senate in 1896, but which a Republican Congress has ever since refused to

enact, relating to contempts in lederal courts, and providing for trial by jury in cases of indirect contempt.

CONSTITUTIONAL GUARANTEES.

Constitutional guarantees are violated whenever any citizen is defined the right to labor, acquire and enjoy property, or reside where interest or inclination may determine. Any defial thereof by individuals, organizations, or governments should be summarily rebuked and punished.

We dony the right of any executive to disregard or suspend any constitutional privilege or limitation. Obedience to the laws and respect for their requirements are alike the supreme duty of the citizen and the official.

The military should be used only to support and maintain the law. We unqualifiedly condemn its employment for the summary banishment of citizens without trial or for the control of elections.

WATERWAYS.

We favor liberal appropriations for the care and improvement of the waterways of the country. When any waterway, like the Mississippi River, is of sufficient importance to demand the special aid of the Government, such aid should be extended with a definite plan of continuous work until permanent improvement is secured.

We oppose the Republican policy of starving home development in order to feed the greed for conquest and the appetite for national "prestige" and display of strength.

RECLAMATION OF ARID LANDS AND DOMESTIC DEVELOPMENT.

We congratulate our Western citizens upon the passage of the measure known as the Newlands irrigation act for the irrigation and reclamation of the arid lands of the West: a measure framed by a Democrat, passed in the Senate by a non-partisan vote, and passed in the house against the opposition of almost all of the Republican leaders by a vote the majority of which was Democratic.

We call attention to this great Democratic measure, broad and comprehensive as it is, working automatically throughout all time without further action of Congress, until the reclamation of all the lands in the arid. West capable of reclamation is accomplished, reserving the lands reclaimed for homeseekers in small tracts, and rigidly guarded against land monopoly, as an evidence of the policy of domestic development contemplated by the Democratic party should it he placed in power.

THE ISTHMIAN CANAL.

The Democracy, when intrusted with power, will construct the Panama Canal speedily, honestly, and economically, thereby giving to our people what Democrats have always contended for-a great inter-occanic canal, furnishing shorter and cheaper lines of transportation, and broader and less trammeled trade relations with the other peoples of the world.

AMERICAN CITIZENSHIP.

We pledge ourselves to insist upon the just and fawful protection of our citizens at home and abroad, and to use all proper measures to secure for them, whether native born or naturalized, and without distinction of race or creed, the equal protection of laws and the enjoyment of all rights and privileges open to them under the covenants of our treaties of friendship and commerce, and if under existing treaties the right of travel and sojourn is denied to American citizens or recognition is withheld from American passports by any countries on the ground of race or creed, we favor the beginning of negotiations with the governments of such countries to secure by new treaties the removal of these unjust discriminations.

We demand that all over the world a duly authenticated passport issued by the Government of the United States to an American citizen shall be proof of the fact that he is an American citizen and shall entitle him to the treatment due him as such.

ELECTION OF SENATORS BY THE PEOPLE.

We favor the election of United States Senators by the direct vote of the people.

STATEHOOD FOR TERRITORIES ..

We favor the admission of the Territory of Oklahoma and the Indian Territory. We also favor the immediate admission of Arizona and New Mexico as separate States and territorial governments for Alaska and Porto Rico.

We hold that the officials appointed to administer the government of any territory, as well as with the district of Alaska, should be bona fide residents at the time of their appointment of the territory or district in which their duties are to be performed.

CONDEMNATION OF POLYHAMY.

We demand the extermination of polygamy within the jurisdiction of the United States and the complete separation of church and state in political affairs.

MERCHANT MARINE.

We denounce the ship subsidy bill recently passed by the United States Senate as an iniquitous appropriation of public funds for private purposes, and a wasteful, illogical and useless attempt to overcome by subsidy the obstructions raised by Republican legislation to the growth and development of American commerce on the sea.

We favor the upbuilding of a merchant marine without new or additional burdens upon the people and without bountles from the public treasury.

RECIPROCITY.

We favor liberal trade arrangements with Canada and with peoples of other countries where they can be entered into with benefit to American agriculture, manufactures, mining or commerce.

MONROE DOCTRINE.

We tayor the maintenance of the Monroe doctrine in its full integrity

ARMY.

We favor the reduction of the army and of army expenditures to the point historically demonstrated to be safe and sufficient.

PENSIONS FOR OUR SOLDIERS AND SAILORS.

The Democracy would secure to the surviving soldiers and sailors and their dependents generous pensions, not by arbitrary executive order, but by legislation, which a grateful people stands ready to enact

Our soldiers and sailors who defend with their lives the Constitution and the laws have a sacred interest in their just administration. They must, therefor, share with us the humiliation with which we have witnessed the exultation of court favorites, without distinguished service, over the scarred heroes of many battles; or aggrandizement by executive appropriations out of the treasuries of prostrate peoples in violation of the act of Congress which fixes the compensation of allowances of the military officers.

CIVIL SERVICE.

The Democratic party stands committed to the principles of civil service reform, and we demand their honest, just and impartial enforcement.

We denounce the Republican party for its continuous and sinister encroachment upon the spirit and operation of civil service rules, whereby it has arbitrarily dispensed with examinations for office in the interests of favorites and employed all manner of devices to over-reach and set aside the principles upon which the civil service was based.

SECTIONAL AND RACE AGITATION.

The race question has brought countless woes to this country. The calm wisdom of the American people should see to it that it brings no more.

To revive the dead and hateful race and sectional animosities in any part of our common country means confusion, distraction of business, and the reopening of wounds now happily healed. North, South, East and West have but recently stood together in line of battle from the walls of Peking to the hills of Santiago, and as sharers of common glory and a common destiny we should share fraternally the common burdens.

We, therefore, deprecate and condemn the Bourbon-like, selfish and narrow spirit of the recent Republican convention at Chicago, which sought to kindle anew the embers of racial and sectional strife, and we appeal from it to the soler, common sense and patriotic spirit of the American people.

THE REPUBLICAN ADMINISTRATION.

The existing Republican administration has been spasmodic, erratic, sensational, spectacular, and arbitrary. It has made itself a satire upon the Congress, courts, and upon the settled practices and usages of national and international law.

It summoned the Congress in hasty and futile extra session, and virtually adjourned it, leaving behind in its flight from Washington uncalled calendars and unaccomplished tasks.

It made war, which is the sole power of Congress, without its authority, thereby usurping one of its fundamental prerogatives. It violated a plain statute of the United States as well as plain treaty obligations, international usages and constitutional law; and has done so under pretense of executing a great public policy which could have been more easily effected lawfully, constitutionally, and with honor.

It forced strained and unnatural constructions upon stalutes usurping judicial interpretation, and substituting for Congressional enactment executive decree.

It withdrew from the Congress its customary duties of investigation, which have heretofore made the representatives of the people and the states the terror of evil doers.

It conducted a secretive investigation of its own and boasting of a few sample convicts, it threw a broad coverlet over the bureaus which had been their chosen field of operative abuses and kept in power the superior officers under whose administration the crimes had been committed.

It ordered assault upon some monopolies, but paralyzed by a first victory, it flung out the flag of truce and cried out that it would not "run amuck"—leaving its future purposes beclouded by its vacillations.

APPEAL TO THE PROPER.

Conducting the campaign upon this declaration of our principles and purposes, we invoke for our candidates the support not only of our great and time-honored organization, but also the active assistance of all of our fellow citizens, who, disregarding past differences, desire the perpetuation of our constitutional government, as framed and established by the fathers of the Republic.

JUDGE PARKER'S TELEGRAM.

I regard the gold standard as firmly and irrevocably established and shall act accordingly if the action of the convention today shall be ratified by the people. As the platform is silent on the subject, my views should be made known to the convention, and if it is proved to be unsatisfactory to the majority I request you to decline the nomination for me at once so that another may be nominated before adjournment.

ALTON B. PARKER

REPLY OF CONVENTION.

"The platform adopted by this convention is silent on the question of the monctary standard because it is not regarded by us as a possible issue in this campaign, and only campaign useues are mentioned in the platform. Therefore there is nothing in the views expressed by you in the telegram just received which would preclude a man entertaining them from accepting the nomination on said platform."

RESOLUTIONS ADDETED.

The representatives of the Democratic party in lowa reaffirm their loyalty to the historic principles of the national party and express their confident helief that upon such a broad basis the Democrats of the entire Nation can and will, present once more a solid front to the common enemy.

We declare

First-The historic principles of justice, equality and liberty upon which our party is founded were never more urgently required than now in the solution of the grave questions pressing upon us. Among these are taxation for public purposes only, local self-government and the observance of the instrights of the states under the constitution, the freedom of the individual, unhindered by governmental interference, except to the extent demanded by law and good order. The equality of all men before the law with special privileges to none, economy in public expenditures, honesty in the public service and strict enforcement of all law without fear or favor. These are not mere generalities, they are essentials.

Second—That we recognize in the predatory trusts the greatest danger that has ever threatened the life of the Nation and the welfare of the people and we denounce their scheme of levying tribute upon all producers and consumers as a modern system of brigandage which while masquerading under the cloak of the law in fact makes of law a mockery and justice a farce. In utter disregard of the natural and constitutional rights of the farmers, the merchants and the great army of wage carners the trusts have ruthlessly scized upon every branch of production and distribution until every avenue of human endeavor is compelled to how at the behest of these conscienceless criminals and pay tribute or cease to exist.

Third That we denounce the vicious tariff system fostered and perpetuated by the Republican party under which the trusts have been born, bred, fattened and the species multiplied until they have every industrial and commercial interest by the throat and we demand the repeal of every tariff which denies "equal opportunities for all."

Fourth-That in William Randolph Hearst we recognize a living exponent of true Democratic faith. We hall him as the sworn and unconquerable for of all predatory trusts, an untiring defender of the rights and liberties of the people, a true friend of labor and all legitimate business and withal a patriotic American. We commend his unselfish work for the people as a congressman, as an editor and as a private citizen in the courts where trust-owned Republican officials brazenly ignore the law and refuse to do their sworn duty and we declare him to be our choice as the Democratic nominee for President of the United States and hereby instruct our delegates to the National Convention to be held in St. Louis July 6th to vote for his nomination and use all honorable means to secure his nomination.

PROHIBITION PARTY.

NATIONAL TICKET.

For President, SILAS C. SWALLOW, of Pennsylvania, For Vice-President, GEORGE W. CARROLL, of Texas.

National Convention, Indianapolis, Indiana, June 29-30, 1904.

Temporary Chairman-Hon, Homer L. Castle, of Pennsylvania. Permanent Chairman-Hon, A. G. Wolfenbarger, of Nebraska. Secretary-James A. Tate, of Tennessee.

NATIONAL PLATFORM.

The Prohibition party in National convention assembled, recognizing that the chief end of all governments is the establishment of lighteousness and justice, and believing in the perpetuation of the high ideals of a government of the people, by the people and for the people, established by our fathers, make the following declaration of principles and purposes:

THE MOST IMPORTANT QUESTION IN AMERICAN POLITICS.

I. The widely prevailing system of licensed and legalized sale of alcoholic beverages is so ruinous to individual interests, so inimical to public welfare, so destructive of National wealth and so subversive of the rights of great masses of our citizenship, that the destruction of the traffic is, and for years has been, the most important question in American politics.

18 IGNORED BY DEMOCRATIC AND REPUBLICAN LEADERS.

II. We denounce the lack of statesmanship exhibited by the leaders of the Democratic and Republican parties in their refusal to recognize the paramount importance of this question, and the cowardice with which the leaders of these parties have courted the favor of those whose selfish interests are advanced by the continuation and augmentation of the traffic, until today the influence of the liquor traffic practically dominates National, State and local governments throughout the Nation.

REGULATION A FAILURE-LICENSE MONEY A BRIBE

III. We declare the truth demonstrated by the experience of half a century, that all methods of dealing with the liquor traffic which recognize its right to exist, in any form, under any system of license or tax or regulation, have proved powerless to remove its evils, and useless as checks upon its growth, while the insignificant public revenues which have accrued therefrom have seared the public conscience against a recognition of its iniquity.

PROHIBITORY LAW, ADMINISTERED BY ITS FRIENDS, THE ONLY HOPE.

IV. We call public attention to the fact, proved by the experience of more than fifty years, that to secure the enactment and enforcement of prohibitory legislation, in which alone lies the hope of the protection of the people from the liquor traffic, it is necessary that the legislative, executive and judicial branches of government should be in the hands of the political party in harmony with the prohibition principle, and pledged to its embodiment in law, and to the execution of those laws.

PARTY WILL ENACT AND ENFORCE PROBIBITORY LAWS:

V. We pledge the Prohibition party wherever given power by the suffrages of the people, to the enactment and enforcement of laws prohibiting and abolishing the manufacture, importation, transportation and sale of alcholic beverages.

NO OTHER ISSUE OF EQUAL IMPORTANCE.

VI. We declare that there is not only no other issue of equal importance before the American people today, but that the so called issues upon which the Democratic and Republican parties seek to divide the electorate of the country are, in large part, subterfuges under the cover of which they wrangle for the spoils of office.

PARTY ATTITUDE ON OTHER PUBLIC QUESTIONS.

VII. Recognizing that the intelligent voters of the country may properly ask our attitude upon other questions of public concern, we declare ourselves in favor of:

The impartial enforcement of all law.

The safeguarding of the peoples' rights by a rigid application of the principles of justice to all combinations and organizations of capital and labor.

The recognition of the fact that the right of suffrage should depend upon the mental and moral qualifications of the citizen.

A more intimate relation between the people and government, by a wise application of the principle of the initiative and referendum.

Such changes in our laws as will place tariff schedules in the hands of an omni-partisan commission.

The application of uniform laws to all our country and dependencies.

The election of United States Senators by vote of the people.

The extension and honest administration of the civil service laws. The safeguarding of every citizen in every place under the government of the people of the United States, in all the rights guaranteed by the laws and the Constitution.

International arbitration, and we declare that our Nation should contributed in every manner consistent with national dignity, to the permanent establishment of peace between all nations.

The reform of our divorce laws, the final extirpation of polygamy, and the total overthrow of the present shameful system of the illegal sanction of the social evil, with its unspeakable traffic in girls, by the municipal authorities of almost all our cities.

STATE PLATFORM.

We, the Prohibitionists of Iowa in State convention assembled, recognize Almighty God as ruler of the universe, and His law as the standard of human law.

Whereas, the great weight of public opinion, among all classes of citizenship, among all departments of commercialism, among all moral and religious organizations, among state-smen, scholars and philanthropists, recognizes in the legalized liquor traffic, men's mental, moral and financial ruin, and in the organized liquor traffic, a spirit of anarchy, endangering the liberties of our people and the flag of the republic; it realizes that the perpetuity of the Nation, now menaced by such a fee to Christian citzenship entrenched in organization, can be preserved only by uniting at the ballot box, the citizenship that stands for good government and the enforcement of the law, in support of a political party whose platform declarations carry conviction to the voting masses that if given power it will carry out its pledges.

Resolved, 1. Therefore, we the Prohibition party of the State of Iowa, reaffirm our former pledges, if given power, to prohibit the manufacture, sale, importation and exportation of intoxicants for beverage purposes. We declare for good government and enforcement of law and pledge our sacred honor to conduct the authority entrusted to us to this end.

2. We are opposed to the principle of taxation without representation, therefore, we stand for a universal qualification for the right, of suffrage, regardless of sex.

- 3. Since the safety of government and the people's will depends so largely on the law making power, being so closely related to its constituency, we declare for the election of United States Senators by a direct vote of the people.
- 4. To guard against corrupt legislators and class legislation, that so often thwart the will of the people, we declare for the initiative and referendum system of government.
- 5. To remove the danger of panies because of tariff revision, as well as the menace to trade during presidential campaigns resulting from the discussion of tariff changes, we favor a tariff commission, non-partisan in character, to study the commerce and trade relations of nations and make proper recommendations of tariff changes to Congress whenever the people's interests demand it.

SOCIALIST PARTY.

NATIONAL TICKET.

Fur President, EUGENE V. DEBS, of Indiana.

For Vice President, BEN HANFORD, of Pennsylvania.

National convention, Chicago, Ill., May 1-6, 1904.

Chairman - A chairman was chosen for each day's session. The following officiated:

JAMES F. CAREY, of Massachusetts; N. A. RICHARDSON, of California; MORRIS HILLQUIT, of New York; F. A. SIEVERMAN, of New York; WILLIAM MAILLY, of Nebraska; SEYMOUR STEDMAN, of Illinois.

Secretaries - F. X. WALDHURST, of Alabama: CHAS. DOBBS, of New York:

NATIONAL PLATFORM.

The Socialist party, in convention assembled, makes its appeal to the American people as the defender and proserver of the idea of liberty and self government, in which the nation was born; as the only political movement standing for the program and principles by which the liberty of the individual may become a fact; as the only political organization that is democratic, and that has for its purpose the democratizing of the whole of society.

To this idea of liberty the Republican and Democratic parties are equally false. They alike struggle for power to maintain and profit by an industrial system which can be preserved only by the complete overthrow of such liberties as we already have, and by the still further enslavement and degradation of labor.

Our American institutions came into the world in the name of freedom. They have been seized upon by the capitalist class as the means of rooting out the idea of freedom from among the people. Our state and national legislatures have become the mere agencies of great propertled interests. These interests control the appointments and decisions of the judges of our courts. They have come into what is practically a private ownership of all the functions and forces of government. They are using these to betray and conquer foreign and weaker peoples, in order to establish new markets for the surplus goods which the people make, but are too poor to buy. They are gradually so invading and restricting the right of suffrage as to take away unawares the right of the worker to a vote or voice in pub-

lie affairs. By enacting new and misinterpreting old laws, they are preparing to attack the liberty of the individual even to speak or

think for himself, or for the common good.

By controlling all the sources of social revenue, the possessing class is able to silence what might be the voice of protest against the passing of liberty and the coming of tyranny. It completely controls the univerity and public school, the pulpit and the press, and the arts and literatures. By making those economically dependent upon itself, it has brought all the forms of public teaching into servile submission to its own interests.

Our political institutions are also being used as the destroyers of that individual property open which all liberty and opportunity depends. The promise of economic independence to each man was one of the faiths upon which our institutions were founded. But, under the guise of defending private property, capitalism is using our political institutions to make it impossible for the vast majority of human beings ever to become possessors of private property in the means of life.

Capitalism is the enemy and destroyer of essential private property. Its development is through the legalized confiscation of all that the labor of the working class produces, above its subsistence-wage. The private ownership of the means of employment grounds society in an economic slavery which renders intellectual and political tyranny inevitable.

Socialism comes so to organize industry and society that every individual shall be secure in that private property in the means of life upon which his liberty of being, thought and action depends. It comes to rescue the people from the fast increasing and successful assault of capitalism upon the liberty of the individual.

11.

As an American Socialist party, we pledge our fidelity to the principles of international socialism, as embodied in the united thought and actions of the socialists of all nations. In the industrial development already accomplished, the interest of the world's workers are separated by no national boundaries. The condition of the most exploited and oppressed workers, in the most remote places of the earth, inevitably tends to drag down all the workers of the world to the same level. The tendency of the competitive wage system is to make labor's lowest condition the measure or rule of its universal condition. Industry and finance are no longer national but international, in both organization and results. The chief signiticance of national boundaries, and of the so-called patriotisms which the ruling class of each nation is seeking to revive, is the power which these give to capitalism to keep the workers of the world from uniting, and to throw them against each other in the struggles of contending capitalist interests for the control of the yet unexplored markets of the world, or the remaining sources of profit.

The socialist movement, therefor, is a world movement. Itknows of no conflicts of interest between the workers of one nation and the

workers of another. It stands for the freedom of the workers of all nations; and, in so standing it makes for the full freedom of all humanity.

111.

The socialist movement owes its birth and growth to that economic development or world process which is rapidly separating a working or producing class from a possessing or capitalist class. The class that produces nothing possesses labor's fruits, and the opportunities and enjoyments these fruits afford, while the class that does the world's real work has increasing economic uncertainty, and physical and intellectual misery, for its portion

The fact that these two classes have not yet become fully conscious of their distinction from each other, the fact that the lines of division and interest may not yet be clearly drawn, does not change the fact of the class conflict.

This class struggle is due to the private ownership of the means of employment, or the tools of production. Wherever and whenever a man owned his own land and tools, and by them produced only the things which he used, economic independence was possible. But production, or the making of goods, has long ecased to be individual. The labor of scores, or even thousands enters into almost every article produced. Production is now social or collective. Practically everything is made or done by many men-sometimes separated by seas and continents—working together for the same end. But this co-operation in production is not for the direct use of the things made by the workers who make them, but for the profit of the owners of the tools and means of production; and to this is due the present division of society into two classes; and from it have sprung all the miseries, inharmonics and contradictions of our civilization.

Between these two classes there can be no possible compromise or identity of interests, any more than there can be peace in the midst of war, or light in the midst of darkness. A society based upon this class division carries in itself the seeds of its own destruction. Such a society is founded in fundamental injustice. There can be no possible basis for social peace, for individual freedom, for mental and moral harmony, escept in the conscious and complete triumph of the working class as the only class that has the right or power to be.

IV. 1

The socialist program is not a theory imposed upon society for its acceptance or rejection. It is but the interpretation of what is, sooner or later, inevitable. Capitalism is already struggling to its destruction. It is no longer competent to organize or administer the work of the world, or even to preserve itself. The captains of industry are appalled at their own inability to control or direct the rapidly socializing forces of industry. The so-called trust is but a sign and form of the developing socialism of the world's work. The universal increase of the uncertainty of employment, the universal capitalist determina-

tion to break down the unity of labor in the trades unions, the widespread apprehensions of impending change, reveal that the institutions of capitalist society are passing under the power of inhering forces that will soon destroy them.

Into the midst of the strain and crisis of civilization, the socialist movement comes as the only conservative force. If the world is to be saved from chaos, from universal disorder and misery, it must be by the union of the workers of all nations in the socialist movement. The Socialist party comes with the only proposition or program for intelligently and deliberately organizing a nation for the common good of all its citizens. It is the first time that the mind of man has ever been directed toward the conscious organization of society.

Socialism means that all those things upon which the people in common depend shall by the people in common be owned and administered. It means that the tools of employment shall belong to their creators and users; that all production shall be for the direct use of the producers; that the making of goods for profit shall come to an end; that we shall all be workers together; and that all opportunities shall be open and equal to all men.

v.

To the end that the workers may seize every possible advantage that may strengthen them to gain complete control of the powers of government, and thereby the sooner establish the co-operative commonwealth, the Socialist party pledges itself to watch and work, in both the economic and the political struggle, for each successive immediate interest of the working class; for shortened days of labor and increases of wages; for the insurance of the workers against accident, sickness and lack of employment; for pensions for aged and exhausted workers; for the public ownership of the means of transportation, communication and exchange; for the graduated taxation of incomes, inheritances, franchises and land values, the proceeds to be applied to the public employment and improvement of the conditions of the workers; for the complete education of children, and their freedom from the workshop; for the prevention of the use of the military against labor in the settlement of strikes; for the free administration of justice; for popular government, including initiative, referandum, proportional representation, equal suffrage of men and women, municipal home rule, and the recall of officers by their constituents; and for every gain or advantage for the workers that may be wrested from the capitalist system, and that may relieve the suffering and strengthen the hands of labor. We lay upon every man elected to any executive or legislative office the first duty of striving to procure whatever is for the workers' most immediate interest, and for whatever will lessen the economic and political powers of the capitalist, and increase the like powers of the worker.

But, in so doing, we are using these remedial measures as means to the one great end of the co-operative commonwealth. Such measures of relief as we may be able to force from capitalism are but a preparation of the workers to seize the whole powers of government, in order that they may thereby lay hold of the whole system of industry, and thus come into their rightful inheritance.

To this end we pledge ourselves, as the party of the working class, to use all political power as fast as it shall be entrusted to us by our fellow-workers, both for their immediate interests and for their ultimate and complete emancipation. To this end we appeal to all the workers of America and to all who will lend their lives to the service of the workers in their struggle to gain their own, and to all who will nobly and disinterestedly give their days and energies unto the workers' cause, to cast in their lot and faith with the Sociallst party. Our appeal for the trust and suffrages of our fellow workers is at once an appeal for their common good and freedom and for the freedom and blossoming of our common humanity. In pledging ourselves and those we represent, to be faithful to the appeal which we make, we believe that we are but preparing the soil of that economic freedom from which will spring the freedom of the whole man.

STATE PLATFORM.

The Socialist party of the State of Iowa, in delegate convention assembled at Marshalltown, Iowa, July 4, 1904, call upon every member of the working class to join with us for the purpose of capturing the powers of government by the ballot that we may take possession of the tools of production, abolish the wage system, and establish a system of production for the benefit of theworkers.

Today the tools of production are owned by the capitalist class: they are operated by the working class, but only when their operation will make profit for the owning class. Ownership of the machines, the mines, factories and railroads gives the capitalist class control over the lives of the members of the working class, through the wage system.

The owning class can give or withhold employment at will As a result of this absolute power, the workers, who perform all useful labor, must humiliate themselves by begging for jobs of a class that performs no useful labor. If this permission to work is withheld they and their families must starve.

The wage system is the cause of starvation, disease, crime, prostitution, child labor, stunted bodies and warped minds for the workers, while it gives to the capitlists palaces for homes, the pick of the world's markets for their food, the finest raiment, culture, education, travel and all that makes life worth living.

Society is thus divided into two hostile classes, the capitalist class and the working class. This condition has brought into birth the Socialist party, the political expression of the struggle of the working class for power. This party owes allegiance to and is a part of the International Socialist movement.

With a system of industry owned and operated by the workers, the struggle for existence would be shifted from the individual to society as a whole.

The ownership of the means of production and distribution by the capitalist class gives this class control of the legislatures, the courts and all executive offices. Republican, democrat and reform parties are financed by the capitalist, and are, therefore, the servants, thus in effect, making the government the executive committee of the capitalist.

This fact demands, as an inevitable conclusion, the organization of the working class into a political party that shall be, everywhere and always, distinct from and opposed to every political party not founded entirely upon the interests of the working class. The Socialist party is organized to meet this demand and is therefore the party of the working class.

The Socialist party, when in office shall always and everywhers, until the present system of wage slavery is utterly abolished, make the answer to this question its guiding rule of conduct: "Will this leg-

islation advance the interests of the working class and aid the workers in their class struggle against capitalism?? If it does the Socialist party is for it; if it does not, the Socialist party is absolutely opposed to it.

In accordance with this principle, the Socialist party pledges itself to conduct all public affairs of this State in such a manner as to promote the interests of the working class.

In conclusion we appeal to the working class to study the principles of Socialism, to vote with their class at all elections until they overthrow the power of capitalism, abolish industrial classes in society, terminate forever the class struggle, and inaugurate the co-operative commonwealth based upon this fundamental principle of justice:

To every laborer the full product of his labor.

"Workers of the world unite! You have nothing to loose but your chains! You have a world to gain!"

NATIONAL PLATFORM.

The People's party reaffirms its adherence to the basic truths of the Omaha platform of 1892, and of the subsequent platforms of 1896 and 1900, in session in its fourth national convention on July 4, 1904, in the city of Springfield, Ill., it draws inspiration from the day that saw the birth of the nation, as well as its own birth as a party, and also from the soul of him who lived at its present place of meeting.

We renew our allegiance to the old fashioned American spirit that gave this Nation existence, and made it distinctive among the people of the earth. We again sound the keynote of the Declaration of Independence, that all men are created equal in a political sense, which is the sense in which that instrument, being a political document, intended that the utterance should be understood. We assert that the departure from this fundamental truth is responsible for the ills from which we suffer as a Nation; that the giving of special privileges to the few has enabled them to dominate the many, thereby tending to destroy the political equality which is the corner stone of Democratic government.

We call for a return to the truths of the fathers, and we vigorously protest against the spirit of mammonism and of thinly veiled monarchy, that is invading certain sections of our national life, and of the very administration itself. This is a Nation of peace, and we deplore the appeal to the spirit of force and militarism which is shown in illadvised and vainglorious boasting and in more harmful ways, in the denial of the rights of man under martial law.

A political democracy and an industrial despotism can not exist side by side; and nowhere is this truth more plainly shown than in the gigantic monopolies which have bred all sorts of kindred trusts, abverted the governments of many of the states, and established their official agents in the National Government. We submit that It

is better for the Government to own the railroads than for the railroads to own the Government; and that one or the other alternative seems inevitable.

We call the attention of our fellow citizens to the fact that the surrender of both of the old parties to corporate influences leaves the People's party the only party of reform in the Nation.

Therefore, we submit the following platform of principles to the American people:

The issuing of money is a function of government, and should never be delegated to corporations or individuals. The Constitution gives to Congress alone power to coin money and regulate its value.

We demand, therefore, that all money shall be issued by the Government in such quantity as shall maintain stability in prices, every dollar to be a full legal tender, none of which shall be a debt redeemable in other money.

We demand that postal savings banks be established by the Government for the safe deposit of the savings of the people.

We believe in the right of labor to organize for the benefit and protection of those who toil; and pledge the efforts of the People's party to preserve this right inviolate. Capital is organized and has no right to deny to labor the privilege which it claims for itself. We feel that intelligent organization of labor is essential; that it raises the standard of workmanship, and promotes the efficiency, intelligence, independence and character of the wave carner. We believe with Abraham Lincoln that labor is prior to capital, and is not its slave, but its companion; and we plead for that broad spirit of toleration and justice which will promote industrial peace through the observance of the principles of voluntary arbitration.

We favor the enactment of legislation looking to the improvement of conditions for wage carners, the abolition of child labor, the suppression of sweat-shops and of convict labor, in competition with free labor, and the exclusion from American shares of foreign pauper labor.

We favor the shorter work day, and declare that if eight hours constitutes a day's labor in Government service, that eight hours should constitute a day's labor in factories, work shops and mines.

As a means of placing all public questions directly under the control of the people, we demand that legal provision be made under which the people may exercise the initiative, referendum and proportional representation, and direct vote for all public officers with right of recall.

Land, including all the natural sources of wealth, is a heritage of all the people, and should not be monopolized for speculative purposes; and alien ownership of land should be prohibited.

We demand a return to the original interpretation of the Constitution and a fair and impartial entorcement of laws under it; and denounce government by injunction and imprisonment without the right of trial by jury.

To prevent unjust discrimination and monopoly, the Government should own and control the railroads; and those public utilities, which -

in their nature are monopolies. To perfect the postal service the Government should own and operate the general telegraph and tele-

phone systems, and provide a parcels post.

As to those trusts and monopolies which are not public utilities or natural monopolies we demand that those special privileges which they now enjoy, and which alone enables them to exist, should be immediately withdrawn. Corporations being the creature of government should be subjected to such government regulations and control as will adequately protect the public. We demand the taxation of monopoly privileges, white they remain in private hands, to the extent of the value of the privileges granted.

We demand that Congress shall enact a general law uniformly regulating the power and duties of all incorporated companies doing

interstate business.
