Subject: IHS

I would like it be known that the IHS Program is of great value to the people that we see in home health. They have been very helpful in helping us understand and connect to services that should be available to the people who suffer from psychiatric challenges. When our home health clients are struggling with psychiatric episode or they are cycling in their illness, we are able to call IHS for assistance and they are valuable in preventing hospitalizations and are able to intervene with the client before the illness cycles too far and causes them stress that can be prevented. I have had meaningful conversations with everyone that I have called and they are more than willing to assist in any way that they can. We find this program to be a worthwhile program to continue and support.

Rhonda Schreier BSN
Home Care Nurse Supervisor
